

# Election Night Reporting

## Quick Start Guide

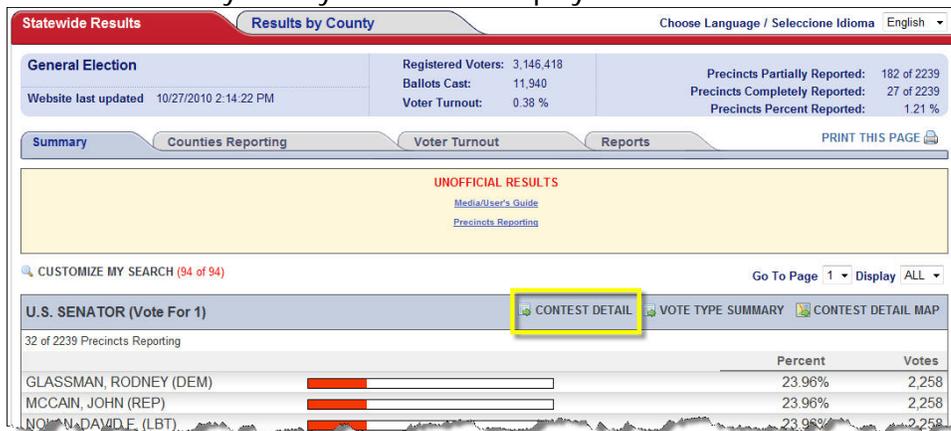

The Election Night Reporting (ENR) display provides extensive details on election results. Web visitors can view which candidates are leading for a contest as well as results by precinct and vote type (Polling Place, Early Ballots, Provisional Ballots, and Maricopa). There is a graphical display of the counties that are currently reporting results and the candidate leading in each county as well as voter turnout by county. Reports can be downloaded in various formats and a custom filter allows for a refined search on results.

### When and how often will the results be updated?

Once the precinct polling locations have closed, the results are reported to the county. The county uploads results, and then begins reporting results to the public via the ENR tool. Updates occur throughout the night until all precincts and counties have reported.

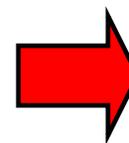

### Contest-Specific Results

For viewing contest-specific results by county, ENR has the functionality to view which candidate is receiving the most votes by county in a tabular display.

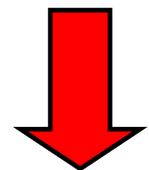

The screenshot shows the 'Statewide Results' page with the 'Results by County' tab selected. Under the 'U.S. SENATOR (Vote For 1)' section, the 'CONTEST DETAIL' link is highlighted with a yellow box. Other links include 'VOTE TYPE SUMMARY' and 'CONTEST DETAIL MAP'. A table below shows the overall results for the U.S. Senator race.

Candidate	Percent	Votes
GLASSMAN, RODNEY (DEM)	23.96%	2,258
MCCAIN, JOHN (REP)	23.96%	2,258
NOLAN, DAVID F. (LBT)	23.96%	2,258

Click on the "Contest Detail" link next to a contest to see a list of votes, broken down by county for that specific contest.
