**5. An explanation of the rule, including the agency's reasons for initiating the rule:**

This rulemaking adds a new Article 8, entitled "Assaults on Officers or Firefighters" to 9 A.A.C. 6. The new Article 8 includes three new Sections to implement A.R.S. § 13-1210. A.R.S. § 13-1210 provides a procedure whereby a law enforcement officer, correctional service officer, detention officer, private prison security officer, or firefighter or the officer or firefighter's employer can obtain a court-ordered test for the presence of blood-borne disease agents,

Notices of Supplemental Proposed Rulemaking

including the human immunodeficiency virus, in the blood of an individual charged in a criminal complaint for interfering with the official duties of the officer or firefighter by biting, scratching, spitting, or transferring blood or other bodily fluids on or through the skin or membranes of the officer or firefighter. A.R.S. § 13-1210 makes the Arizona Department of Health Services responsible for establishing the notification procedure to be used to provide such test results. This rulemaking creates a definitions Section and two additional Sections that describe the notification procedure to be used and identify the parties responsible for providing notice.

**6. An explanation of the substantial change that resulted in this supplemental notice:**

The Department became aware that health care providers' compliance with the rules might be enhanced if the rules more closely resembled the rule for reporting positive HIV test results. Thus, in an effort to make the rules more similar to the rule for reporting positive HIV test results, while still maintaining the mandate of A.R.S. § 13-1210, the Department made the following changes:

- a. In R9-6-802(A), (B), and (C), the Department extended the notification deadlines from 14 days to 30 days and added "after the date";
- b. In R9-6-802(C), the Department changed "a laboratory report" to "written notice" to be consistent with R9-6-802(A)(2) and (F);
- c. The Department replaced R9-6-802(G) in its entirety;
- d. The Department deleted R9-6-802(H) and (I);
- e. In R9-6-803(A) and (B), the Department extended the notification deadlines from 14 days to 30 days and added "after the date";
- f. In R9-6-803(B), the Department changed "a laboratory report" to "written notice" to be consistent with R9-6-803(A)(3) and (E);
- g. The Department replaced R9-6-803(F) in its entirety;
- h. The Department replaced R9-6-803(G) in its entirety; and
- i. The Department deleted R9-6-803(H).

In addition, to improve the clarity, conciseness, and understandability of the rules, the Department made several minor changes to the text of the rules.

**7. A showing of good cause why the rule is necessary to promote a statewide interest if the rule will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

**8. The preliminary summary of the economic, small business, and consumer impact:**

As used in this economic impact summary, minimal means less than \$1,000, moderate means \$1,000 to \$9,999, and substantial means \$10,000 or greater.

The Department will incur a moderate cost for staff time to write, review, and process the rules through promulgation. The Department anticipates that the rules themselves will result in no additional burden on the Department.

The occupational health care provider for an officer or firefighter who is the victim of an assault covered by A.R.S. § 13-1210 will incur minimal costs as a result of the notification requirements in the rule. Likewise, the health care provider for a subject who is ordered to provide blood samples for testing under A.R.S. § 13-1210 will incur minimal costs as a result of the notification requirements in the rule. If a subject is detained or incarcerated, the chief medical officer of the facility in which the subject is detained or incarcerated will also incur minimal costs as a result of the notification requirements in the rule. The Department estimates that fewer than 50 subjects are ordered to provide blood specimens under A.R.S. § 13-1210 each year. Thus, the aggregate costs for occupational health care providers, health care providers, and chief medical officers should not be greater than moderate for each group.

A number of entities will benefit from the rules. The Department will receive minimal benefits from no longer receiving inquiries from individuals and agencies confused about the notification process under A.R.S. § 13-1210. Each officer or firefighter who is the victim of an assault covered by A.R.S. § 13-1210 will receive a significant, unquantifiable benefit from the information received in the notification counseling and the ability to take appropriate action to protect the officer's or firefighter's own health and the health of those around the officer or firefighter if the subject tests positive for an infectious agent. A subject will also receive a significant, unquantifiable benefit from the information received in the notification counseling and the ability to receive treatment to combat an infectious agent for which the subject tests positive and to take action to protect the health of those around the subject.

A law enforcement agency or firefighting agency that employs an officer or firefighter who is the victim of an assault covered by A.R.S. § 13-1210 will receive a significant, unquantifiable benefit from the information received in a notification counseling and the ability to institute appropriate control measures to prevent further transmission if an officer or firefighter has been exposed to an infectious subject. A law enforcement agency that is detaining or incarcerating a subject will receive the same benefit from the ability to institute appropriate control measures to prevent

Notices of Supplemental Proposed Rulemaking

transmission by an infectious subject.

The individuals who are required to provide notice under the rules will receive minimal benefits from the clarity of the notification procedure under the rules. Currently, there is much confusion over who is responsible to provide notification to whom and in what manner. The rules clarify the responsible parties, identify to whom each responsible party is to provide notification, and prescribe the manner in which notification is to be completed. The Department solicited input from a number of different law enforcement agencies, firefighting agencies, courts, and health care provider organizations throughout the state in drafting the rules and designated the individuals who are required to provide notice after determining the parties who are typically involved in providing this notification in the absence of rules.
