2. The subject matter of the proposed rule:

PDEQ is proposing to change the fees it charges for air quality permits. The fees that would be affected are fees for permit actions, administrative, and emission based fees for Title V sources, inspection fees for non-Title V sources, and fees for general permits. The classes of permits rule (17.12.140) will also be amended to include a Class III permit category. This category is for any source requiring a Class II permit that emits, or has the potential to emit, without controls, regulated air pollutants that do not exceed seventy percent (70%) of any major source threshold. This category will be exempt from certain permit requirements, such as monitoring, testing, recordkeeping, reporting, compliance plans, permit shields, and certification. The general permit rule (17.12.160) will be amended to provide emission, monitoring, reporting, recordkeeping, and operational limits for a certain class of facilities. The permit content rule (17.12.180) will be amended to correct deficiencies noted by the EPA regarding excess emissions during malfunctions, startup, maintenance, and shutdown. Other permit rules will be updated and corrected to conform with the current Arizona Department of Environmental Quality and the Environmental Protection Agency requirements.
