

NOTICES OF PUBLIC INFORMATION

Notices of Public Information contain corrections that agencies wish to make to their notices of rulemaking; miscellaneous rulemaking information that does not fit into any other category of notice; and other types of information required by statute to be published in the *Register*. Because of the variety of material that is contained in a Notice of Public Information, the Office of the Secretary of State has not established a specific format for these notices.

NOTICE OF PUBLIC INFORMATION DEPARTMENT OF ENVIRONMENTAL QUALITY

[M14-61]

- 1. Name of the Agency:** Department of Environmental Quality
Title and its heading: 18, Environmental Quality
Chapter and its heading: 6, Department of Environmental Quality - Pesticides and Water
Pollution Control
Article and its heading: 3, Groundwater Protection List
Section and its heading: R18-6-301, Groundwater Protection List

2. The public information relating to the listed statute:

Pursuant to A.R.S. § 49-305, the Arizona Department of Environmental Quality (Department) maintains a Groundwater Protection List (GWPL) composed of agricultural use pesticides and active ingredients that have the potential to pollute groundwater. The statute requires the Department to place a pesticide identified under A.R.S. § 49-303(C)(2) and (3) on the GWPL, and to regulate the use of the pesticide if the pesticide is intended for application to or injection into the soil by ground-based application equipment or chemigation, or the label of the pesticide requires or recommends that the application be followed within 72 hours by flood or furrow irrigation.

3. Draft 2014 Groundwater Protection List

The GWPL is a list of agricultural use pesticide active ingredients that have the potential to pollute groundwater. An agricultural use pesticide active ingredient is placed on the GWPL for any of the following reasons: 1) it fails to comply with the established specific numeric values, 2) the environmental fate assessment indicates potential to leach to groundwater, or 3) an active ingredient or degradation product has been detected in groundwater consistent with established testing requirements.

Pursuant to R18-6-301, the Department is publishing the draft 2014 GWPL to provide an opportunity for the public to comment on the active ingredients being placed on or removed from the GWPL. The final 2013 GWPL contained 85 active ingredients; the draft 2014 GWPL would add two new active ingredients: Florasulam and Picoxystrobin. With this publication, a 30-day public review and written comment period begins. After completion of the 30-day review and comment period, the Department will formulate a response to any comments submitted and consider making modifications to the GWPL in response to the comments. If no comments are received, the draft GWPL becomes final. If comments are received, the revised GWPL will then be re-published in the *Arizona Administrative Register*, including a summary of comments received and the Department's response to the comments. The final 2014 GWPL will become effective on December 1, 2014, in accordance with R18-6-301(A)(3) and will be posted on the agency's website at: <http://www.azdeq.gov/environ/water/compliance/pesticide.html#gpl>
