The hide room shall not connect with the slaughtering department except for one opening which shall be equipped with a tight-fitting, self-closing door. The hide room shall not connect with any other room in which edible products are stored, processed, or handled.
  7. Disposal of blood. When blood is not permitted to drain into the sewage system, it may be collected in a metal tank and removed from the premises or blown to the blood drier in a manner that will not mask odors or create a harborage for pests.
  8. Other inedible products departments.
    - a. An inedible products department, completely separate and apart from edible products departments, shall be provided. Walls shall be of smooth, finished, Portland cement plaster, glazed tile, or other USDA-approved material impervious to moisture. Floors shall be constructed of dense concrete or floor tile, sloped to drain. Hot and cold water connections shall be provided. With the exception of one opening to the slaughtering department, there shall be no openings between an inedible products department and an edible products department. This one opening shall be approximately five feet in width to allow the free passage of materials and shall be equipped with a close-fitting, self-closing door of solid construction. This door shall be kept closed at all times, except when in actual use, to prevent the entrance of undesirable odors to the slaughtering department. The area at the loading dock shall be paved, drained, and of sufficient size to accommodate the largest truck used. If inedible offal is stored in an edible offal room, the room is classed as an inedible products department. Paunches may be opened in the slaughtering department only when a hydraulic mechanically operated paunch lift table is provided and used for this purpose. Otherwise, the paunches shall be opened in the inedible offal rooms.

Each floor drain shall be equipped with a deep-seal trap; the drainage lines shall be vented to the outside in accordance with local plumbing codes. In no case shall a drain line be less than four inches in diameter.
    - b. Sewage may be disposed of into a municipal sewer system, if permitted by local ordinance, or it may be disposed of into a stream or other similar body of water, provided that:
      - i. This method is acceptable to local health authorities having jurisdiction over sewage disposal, and
      - ii. The flow of the stream or other body of water is sufficient to carry the sewage away from the plant at all seasons of the year. When cesspools are used, they shall be of sufficient size to receive the sewage from the plant at all times; they shall be so constructed that they do not create a nuisance by breeding flies or other insects.
    - c. Grease recovery basins shall not mask odors or create a harborage for pests.
  11. Equipment and utensils.
    - a. Equipment shall be constructed of metal and shall be so constructed that it can be easily cleaned. Cutting boards may be of hard wood or synthetic material, but equipment, such as the framework of boning or cutting tables, scalding vats, offal racks and trees, product storage racks, and product trucks shall be of metal construction. Rusty or worn-out equipment shall be replaced.
    - b. All equipment shall be thoroughly cleaned following each day's operations. The use of a clear, colorless, odorless, tasteless, edible mineral oil may be used on metal equipment, such as choppers, grinders, mix-

- ers, tables, meat trucks, offal racks, hooks, and trolleys. Scale shall not be permitted to accumulate on metal equipment.
- c. Sterilizing receptacles equipped with drains to permit draining and cleaning shall be placed at convenient locations in the slaughtering department for the cleaning and sterilization of contaminated tools and equipment. Water wasting from equipment shall not flow across the floor.
  - d. Shovels used for transferring ice or other edible materials from one container to another shall not touch the floor.
12. Ventilation and lighting. Natural ventilation may be supplemented by artificial means and shall be sufficient to assure the absence of dust, masking odors, or steam vapors. Points where inspection is conducted may require special lighting. The glass area shall be at least 1/4 of the floor area in all nonrefrigerated work rooms. To assure adequate lighting at all times and at all places, natural lighting must be supplemented by well-distributed artificial lighting.
  13. Water supply, wash basins, sterilizing facilities.
    - a. Hot and cold running water, under pressure, shall be available at all parts of the establishment and in conformity with the requirements of the Arizona Department of Health Services. The hot water used for sterilizing equipment, floors, and walls that may be contaminated by the dressing procedure or handling of diseased carcasses, viscera, and other animal parts, shall be at least 180° F. A thermometer shall be installed to verify the temperature of the water at the point of use. A cleanup hose shall be available for use.
    - b. Foot-pedal operated wash basins shall be placed in or near dressing rooms. These wash basins shall be equipped with running hot and cold water, delivered through a combination mixing faucet with an outlet at least 12 inches above the rim of the bowl. The drainage outlet shall lead directly into the sewage lines. Soap and towels, and a receptacle for dirty paper towels or other trash, shall be convenient to the wash basin.
    - c. One or more wash basins shall be located in the slaughtering department, and one or more in the sausage manufacturing room and at any other place in the establishment essential to ensure cleanliness of all persons handling products. The wash basins shall be equipped with hot and cold running water, delivered through a combination mixing faucet with an outlet at least 12 inches above the rim of the bowl. The water delivery shall be foot-pedal operated, and the drainage outlet shall lead directly into the sewage lines. Soap and disposable towels shall be convenient to the wash basins.
    - d. Water for sterilizing purposes shall be maintained at a temperature of at least 180° F. One or more sterilizing receptacles of rust-resisting, impervious material shall be placed at convenient locations in the slaughtering department for the sterilization of all implements that have been contaminated or used on a diseased carcass or part of a diseased carcass. The sterilizer shall be equipped with a cold water and steam line, or other means to maintain water at a temperature of at least 180° F during slaughtering operations. The sterilizer shall contain a drain so that water may be completely drained out for daily cleaning. Boilers and water heaters shall not be located in the slaughtering department or in any edible products department. To prevent possible back siphonage, vacuum breakers shall be provided on all steam and water lines when open ends are submerged or connected to equipment.
  14. Protection against flies, rodents, or other vermin.
    - a. Plants must be kept free of flies, rats, mice, roaches, and other pests or vermin. The plant shall be constructed to prevent entrance of rodents to the premises and to eliminate their breeding places from the surrounding areas and in the establishment. Construction of the plant shall be such as to eliminate roach and other insect harbors. Windows, doors, and other openings to the plant shall be provided with insect screens, or other measures to prevent entrance of flies or other insects. The screens shall be kept in good repair. Sprays containing residual-acting chemicals shall not be used in edible products departments.
    - b. Animal-handling facilities such as stock pens and runways shall be cleaned as often as necessary and the manure or other waste materials removed shall not be permitted to accumulate at or near the plant.

Before use, all equipment coming in contact with milk products or frozen desserts shall have a bactericidal or sanitizing treatment. Equipment not designed for C-I-P cleaning shall be disassembled, thoroughly cleaned and sanitized. Biodegradable dairy cleaners, wetting agents, detergents, sanitizing agents, or other similar material that does not adversely affect or contaminate the frozen desserts or ingredients may be used. Steel wool or metal sponges shall not be used to clean any equipment or utensils with product contact surfaces. C-I-P cleaning shall be used only on equipment and pipeline systems designed, engineered, and installed for that type of cleaning. - B.** Commercial Certification Categories, 40 CFR 171.4(c)(1) through (6) and (8) through (10).
1. Agricultural pest control.
    - a. Plant. Applicators must demonstrate practical knowledge of crops grown and the specific pests of those crops on which they may be using restricted use pesticides. The importance of such competency is amplified by the extensive areas involved, the quantities of pesticides needed, and the ultimate use of many commodities as food and feed. Practical knowledge is required concerning soil and water problems, pre-harvest intervals, re-entry intervals, phytotoxicity, and potential for environmental contamination, non-target injury and community problems resulting from the use of restricted use pesticides in agricultural areas.
    - b. Animal. Applicators applying pesticides directly to animals must demonstrate practical knowledge of such animals and their associated pests. A practical knowledge is also required concerning specific pesticide toxicity and residue potential, since host animals will frequently be used for food. Further, the applicator must know the relative hazards associated with such factors as formulation, application techniques, age of animals, stress and extent of treatment.
  2. Forest pest control. Applicators shall demonstrate practical knowledge of types of forests, forest nurseries, and seed production in this state and the pests involved. They shall possess practical knowledge of the cyclic occurrence of certain pests and specific population dynamics as a basis for programming pesticide applications. A practical knowledge is required of the relative biotic agents and their vulnerability to the pesticides to be applied. Because forest stands may be large and frequently include natural aquatic habitats and harbor wildlife, the consequences of

pesticide use may be difficult to assess. The applicator must therefore demonstrate practical knowledge of control methods which will minimize the possibility of secondary problems such as unintended effects on wildlife. Proper use of specialized equipment must be demonstrated, especially as it may relate to meteorological factors and adjacent land use.

3. Seed-treatment. Applicators shall demonstrate practical knowledge of types of seeds that require chemical protection against pests and factors such as seed coloration, carriers, and surface active agents which influence pesticide binding and may affect germination. They must demonstrate practical knowledge of hazards associated with handling, sorting and mixing, and misuse of treated seed such as introduction of treated seed into food and feed channels, as well as proper disposal of unused treated seeds.
4. Aquatic pest control. Applicators shall demonstrate practical knowledge of the secondary effects which can be caused by improper application rates, incorrect formulations, and faulty application of restricted use pesticides used in this category. They shall demonstrate practical knowledge of various water use situations and the potential of downstream effects. Further, they must have practical knowledge concerning potential pesticide effects on plants, fish, birds, beneficial insects and other organisms which may be present in aquatic environments. These applicators shall demonstrate practical knowledge of the principles of limited area application.
5. Right-of-way pest control. Applicators shall demonstrate practical knowledge of a wide variety of environments, since rights-of-way can traverse many different terrains, including waterways. They shall demonstrate practical knowledge of problems on runoff, drift, and excessive foliage destruction and ability to recognize target organisms. They shall also demonstrate practical knowledge of the nature of herbicides and the need for containment of these pesticides within the right-of-way area, and the impact of their application activities in the adjacent areas and communities.
6. Public health pest control. Applicators shall demonstrate practical knowledge of vector-disease transmission as it relates to and influences application programs. A wide variety of pests is involved, and it is essential that they be known and recognized, and appropriate life cycles and habitats be understood as a basis for control strategy. These applicators shall have practical knowledge of a great variety of environments ranging from streams to those conditions found in buildings. They shall also have practical knowledge of the importance and employment of such non-chemical control methods as sanitation, waste disposal, and drainage.
7. Regulatory pest control. Applicators shall demonstrate practical knowledge of regulated pests, applicable laws relating to quarantine and other regulation of pests, and the potential impact on the environment of restricted use pesticides used in suppression and eradication programs. They shall demonstrate knowledge of factors influencing introduction, spread, and population dynamics of relevant pests. Their knowledge shall extend beyond that required by their immediate duties, since their services are frequently required in other areas of the country where emergency measures are invoked to control regulated pests and where individual judgments must be made in new situations.

8. Demonstration and research pest control. Persons demonstrating the safe and effective use of pesticides to other applicators and the public will be expected to meet comprehensive standards reflecting a broad spectrum of pesticide uses. Many different pest problems situations will be encountered in the course of activities associated with demonstration, and practical knowledge of problems, pests, and population levels occurring in each demonstration situation is required. Further, they shall demonstrate an understanding of a pesticide-organism interaction and the importance of integrating pesticide use with other control methods. In general, it would be expected that applicators doing demonstration pest control work possess a practical knowledge of all of the standards detailed in (G)(1). In addition, they shall meet the specific standards required for subsections (c)(1) through (7) of this subsection as may be applicable to their particular activity.

C. Private Certification, 40 CFR 171.5(a)(1) through (5).

1. Recognize common pests to be controlled and damage caused by them.
2. Read and understand the label and labeling information, including the common name of pesticides the applicator applied; pest(s) to be controlled, timing and methods of application; safety precautions; any pre-harvest or re-entry restrictions; and any specific disposal procedures.
3. Apply pesticides in accordance with label instructions and warnings, including the ability to prepare the proper concentration of pesticide to be used under particular circumstances taking into account such factors as area to be covered, speed at which application equipment will be driven, and the quantity dispersed in a given period of operation.
4. Recognize local environmental situations that must be considered during application to avoid contamination.
5. Recognize poisoning symptoms and procedures to follow in case of a pesticide accident.

(3) “Uniform” samples are homogeneous products which can be analyzed by established procedures. In most cases, validated analytical methods are available for these samples.

(4) “Non-uniform” samples are non-homogeneous samples or products which are difficult to sample or subsample. These products may not be uniformly mixed or packaged and include some special formulations like natural products. These types of samples include fertilizer containing pesticides, pesticides in pressurized containers, strips, plastic bands, collars, grain and other carriers. Natural product formulations such as rotenone and pyrethrin are also included in this group. When it is necessary to use methods which are not validated for accuracy, precision, and reproducibility in a specific matrix, the “non-uniform” guidelines may be used for allowed deviations. States may use judgment in placing a sample into the “uniform” or “non-uniform” category.

  - a. The cause of the emergency,
  - b. The area where the emergency occurred,
  - c. A brief explanation of why early entry was necessary,
  - d. Why other methods could not be used to avoid the early entry, and
  - e. The justification that substantial economic loss would have occurred.
2. If a grower or requesting party does not submit the written evidence of the emergency in subsection (B)(1) or if the Assistant Director questions whether the written evidence of emergency could have occurred before the emergency, or the validity or adequacy of the written evidence of the emergency, the Assistant Director shall investigate a grower's entry into the restricted-entry interval area and advise the requesting party of the reasons for the denial.
3. The Assistant Director shall within 10 business days of receipt of the evidence of emergency or completion of the investigation issue a letter to the requesting party confirming or denying the request for the agricultural emergency.

**R3-3-1007. Violations and Civil Penalties**

- A.** Serious violations. The base penalty for any serious violation is \$500 and no adjustment shall be made for mitigating circumstances. The penalty for a violation in which a person is killed or permanently disabled shall be the maximum allowed in A.R.S. §§ 3-3113 and 3-3114.
- B.** Nonserious violations. The Assistant Director shall calculate the base penalty for a nonserious violation and determine the civil penalty amount based on the factors prescribed in A.R.S. § 3-3113(I). If there are contributing or mitigating circumstances, the points may be adjusted, provided the adjustment is documented.

**C. Size-of-business. The Assistant Director shall use:**

1. The maximum number of employees at any one time during the previous 12 months from the date of notice, including only the Arizona branch offices to determine the size business category; or
2. A site-specific employee count, if the violation does not endanger employees at other locations of the business; or
3. The number of persons trained by a trainer during the previous 12 months that violate the training provisions of this Section.

**SIZE-OF-BUSINESS**

Size Category	Number of Employees or Number of People Trained
I	1-10
II	11-75
III	76-150
IV	More than 150

- D.** Base penalty. The Assistant Director shall calculate the base penalty for the alleged violation by using the violation gravity factor established in subsection (B) and applying the size-of-business category established in subsection (C).

**BASE PENALTY**

2	300	350	400	450
3	350	400	450	500
4	500	500	500	500

- E.** Combined or group violations. The Assistant Director may combine or group violations.

1. Violations may be combined and assessed one penalty if the violation does not cause any immediate danger to public health or safety or damage to property. Example: Eight workers on a harvest crew have received no training and there is no evidence of exposure. This situation may result in only one training penalty being assessed against the employer.
2. Violations may be grouped if they have a common element and it is apparent which violation has the highest gravity. The penalty for a grouped violation is assessed on the violation with the highest gravity. The penalty for a grouped violation is assessed pursuant to the appropriate law or rule with the highest gravity. Example: Two crews from the same company are engaged in an improper handling activity and one crew is using a pesticide with a "danger" signal word, (skull and cross bones) while the other crew is using a pesticide with a "warning" signal word. This situation may result in the employer being assessed one penalty based on the penalty for the "danger" (skull and cross bones) violation.

- F.** If a decision is not reached in a negotiated settlement, the Director may assess a penalty pursuant to A.R.S. § 3-3114.

**Historical Note**

**R3-3-1008. Penalty Adjustments**

A. The Assistant Director shall assign an appropriate number of points for each of the following five factors to increase the base penalty for a serious violation, or increase or decrease the base penalty for a nonserious violation.

1. If the total adjustment points on a nonserious violation is less than 9, the base penalty is reduced; if it is more than 9, the base penalty is increased.
2. If the total adjustment points on a serious violation is 3 or less, the base penalty shall be imposed; if it is more than 3, the base penalty is increased.
3. If a violation is a repeated violation, as prescribed in R3-3-1011 for compliance history, a base penalty adjustment factor shall not be used in assessing a penalty.

13	Base + 65%	Base + 100%
14	Base + 80%	Base + 100%

15 or more Base + 100%

Base + 100%

Example: A business employs 26 people in Town A and 14 people in Town B. In addition, 35 seasonal people are employed during the harvest. The total annual employee positions equal 75. The following violations are found during an inspection: (1) No training for 35 seasonal workers on the harvest crew; (2) No available decontamination supplies; (3) No safety poster at the central posting location; (4) No emergency telephone number posted, and no medical facility location posted at the central posting location; (5) No posted pesticide application information at the central posting location.

Step 1. Use the *Violation Gravity Factor* table to determine the gravity of the violation.

- (1) Training, 1-4 2 points, all 35 workers are combined;
- (2) Decontamination, 1-43 points, no supplies were available within the prescribed distance and it has been 25 days since the most recent application;

(3) - (5) Central Posting, 1-2

1 point, since the violations concerns the same factor, they are combined. (There is evidence that the old poster blew away and the pesticide application information is kept available in the secretary's desk, but it is not 'readily' available.)

Step 2. Use the *Size of Business* table to determine the size category.

75 employees falls into the size category II;

Step 3. Use the *Base Penalty* table to determine the base penalty. Use column II based on the *Size of Business* determination from step 2.

Violation 1, with a gravity factor of 2, equals a base penalty of \$350;

Violation 2, with a gravity factor of 3, equals a base penalty of \$400;

Violations 3, 4, and 5, with a gravity factor of 1, equals 1 base penalty of \$300.

Step 4. Using the *Base Adjustment Factors* table to calculate the adjustments, if any. In this case, the base adjustments are uniform in all categories except #4, culpability.

Pesticide. It was a indirect relationship because of the timing of the application and when the workers were in the treated area. 1 point.

Harm to Human Health. There was no harm to health and the pesticide had not been applied recently. 1 point.

Compliance History. This farm has no previous violation history. 0 points.

Culpability. The supervisor attended a "train-the-trainer" course two years ago and should have been aware of the requirements of the

worker protection standard. Therefore, for the first two violations the supervisor should have known about the requirements. For the last three violations, the central posting sign was not checked frequently enough to ensure compliance. For violations 1 and 2, 4 points for knowing or should have known; For violations 3, 4, and 5, 2 points for negligence.

Good Faith. The inspector came back five days later and the workers were trained the day of the first inspection, the poster was posted and everything was in compliance. Since the employer corrected the violations quickly. -1 point.

Step 5. Add the points for each violation from Step 4.

Violation 1  $1 + 1 + 0 + 4 + -1 = 5$

Violation 2  $1 + 1 + 0 + 4 + -1 = 5$

Violations 3, 4, 5  $1 + 1 + 0 + 2 + -1 = 3$

Step 6. Using the *Final Penalty Calculation* table to determine the appropriate violation penalty adjustment that corresponds with the base adjustment factor point total. Use the definitions for nonserious or serious violations to determine the appropriate violation penalty adjustment column. In this case, use the nonserious penalty adjustment column.

Violation 1 5 points Base - 50% =  $350 - 175 = \$175$

Violation 2 5 points Base - 50% =  $400 - 200 = \$200$

Violations

3, 4, 53 points Base - 80% =  $300 - 240 = \$60$

Adjusted Penalty Total \$435

#### Historical Note

Adopted effective July 13, 1989 (Supp. 89-3). Section R3-3-1008 renumbered from R3-8-208 (Supp. 91-4). Section repealed; new Section adopted effective October 8, 1998 (Supp. 98-4).

#### R3-3-1009. Failure to Abate

- A. The Director shall issue a notification of failure-to-abate an alleged violation if a violation has not been corrected as specified on the citation. Failure-to-abate penalties, pursuant to A.R.S. § 3-3113(E), shall be applied if an employer or handler has not corrected a previous cited violation that is a final order of the Director. When determining the appropriate penalty amount, the Director shall take into consideration a good faith effort to abate the violation.
- B. If a person does not file a timely notice of contest within the 30-day contest period, the citation and proposed penalties shall be a final order of the Director.
- C. If a person files a notice of contest pursuant to A.R.S. § 3-3116(A), the period for the abatement shall not begin, as to those violations contested, until the day following the entry of the final order by the Director affirming the citation. If the person contests only the amount of the proposed penalty, the person shall correct the alleged violation within the prescribed abatement period.

#### Historical Note

Adopted effective October 8, 1998 (Supp. 98-4). Section heading corrected at request of the Department, Office File No. M11-60, filed February 23, 2011 (Supp. 09-4).

#### R3-3-1010. Calculation of Additional Penalties For Unabated Violations

- A. The Assistant Director shall calculate a daily penalty for unabated violations if failure to abate a serious or nonserious violation exists at the time of reinspection. That penalty shall

not be less than the penalty for the violation when cited, except as provided in subsection (C).

1. If no penalty was initially proposed, the Assistant Director shall determine a penalty. In no case shall the penalty be more than \$1,000 per day, the maximum allowed by A.R.S. § 3-3113(E).
  2. The daily proposed penalty shall be multiplied by the number of calendar days that the violation has continued unabated, except for the following: The number of days unabated shall be counted from the day following the abatement date specified in the final order. It shall include all calendar days between that date and the date of reinspection, excluding the date of reinspection.
- B. When calculating the additional daily penalty, the Assistant Director shall consider the extent that the violation has been abated, whether the employer has made a good faith effort to correct the violation, and it is beyond the employer's control to abate. Based on these factors, the Assistant Director may reduce or eliminate the daily penalty. Example: If three of five instances have been corrected, the daily proposed penalty (calculated as outlined in subsection (A) without regard to any partial abatement), may be reduced by the percentage of the total violations which have been corrected, in this instance, three of five, or 60%.

#### Historical Note

Adopted effective October 8, 1998 (Supp. 98-4).

#### R3-3-1011. Repeated or Willful Violations

- A. The Assistant Director shall calculate a penalty for each violation classified as serious or nonserious if similar violations are repeated within the last three years from the date of notice.
  1. The penalty for a repeated nonserious violation shall be doubled for the first repeated violation and tripled if the violation has been cited twice before, up to the maximum allowed by A.R.S. § 3-3113(A).
  2. The penalty for a repeated serious violation shall be multiplied five times for the first repeated violation and seven times if the violation has been cited twice before, up to the maximum allowed by A.R.S. § 3-3113(A).
  3. The penalty for a repeated serious violation in which someone is disabled or killed shall be multiplied 10 times for each repeated violation, up to the maximum allowed by A.R.S. § 3-3113(A).
  4. A repeated violation having no initial penalty shall be assessed for the first repeated violation as determined by this Article.
  5. If the Assistant Director determines, through documentation, that it is appropriate, the penalty may be multiplied by 10, up to the maximum allowed by A.R.S. § 3-3113(A).
- B. The Assistant Director may adjust the gravity based penalty by a multiplier up to 10 for any willful violation, up to the maximum allowed by A.R.S. § 3-3113(A).
- C. The Assistant Director shall not allow a reduction for any serious or nonserious willfully repeated violation.

#### Historical Note

Adopted effective October 8, 1998 (Supp. 98-4).

#### R3-3-1012. Citation; Posting

An employer shall post a citation prescribed at A.R.S. § 3-3110(C) for three days or until the violation is abated, whichever time period is longer.

#### Historical Note

New Section made by final rulemaking at 10 A.A.R. 276, effective March 6, 2004 (Supp. 04-1).

**R3-4-812. Inspections and Representative Sampling for Citrus Fruit**

- A. An inspector shall conduct a preliminary inspection of each commodity which includes a visual and physical inspection of

specimens of the commodity. When determining compliance of a field packing operation, the inspector shall select specimens from widely separated areas of the packing operation. When determining compliance in a packing shed, warehouse, fruit stand, retail store, or other business which sells citrus fruit, containers shall be selected at random from widely separated parts of the lot. If one-half of the containers or specimens in the containers of the lot or field packing operation comply with the requirements of this Article and the other half of the containers or specimens in the containers of the lot or field packing operation do not, an equal number of containers or specimens in the containers shall be examined from each half.

- B. If, after the preliminary inspection, the inspector determines that the quality of the product clearly meets or exceeds the requirements of this Article, the inspector need not complete a comprehensive inspection. If, after the preliminary inspection, the inspector suspects there may be a failure to comply with the requirements of this Article, the inspector shall complete the procedures for a comprehensive inspection.
- C. For a comprehensive inspection of a field or shed packing operation, all specimens in each container of the official sample shall be examined by an inspector. For a comprehensive inspection of a wholesale warehouse, fruit stand, retail store, or any other business dealing with the sale of citrus fruit, an inspector may examine all specimens in each container of the official sample. The official sample of the lot shall consist of an inspection of no less than two containers for the first 100 containers of the lot and one container for every 100 containers thereafter. For example:

No. of Containers	Containers Sampled
2-100	2
101-200	3
201-300	4
301-400	5
401-500	6

- D. In a comprehensive inspection of a wholesale warehouse, fruit stand, retail store, or any other business dealing with the sale of citrus fruit, an inspector need only examine a portion of the specimens in each container of the official sample. The official

sample of the lot shall consist of an inspection of no less than the following:

No. of Containers	Containers Sampled
less than 10	2
10-30	3
31-50	4
51-100	5
101-200	6
201-300	8
301-500	10

- E.** If only a portion of the specimens in each container of the official sample is examined during a comprehensive inspection in lots in excess of 500 containers, the official sample shall consist of the number of containers equal to at least 1/2 the square root of the total number of containers in the lot. For example:

No. of Containers	Containers Sampled
501-600	12
601-700	13
701-800	14
801-900	15
901-1000	16

- F.** Individual containers in any lot may contain up to double the amount of serious damage and other requirements prescribed for that commodity as long as the percentage of all requirements in the entire lot averages within the percent allowable as determined by inspection of a representative sample.

#### Historical Note

Adopted effective January 6, 1994 (Supp. 94-1).

Continuing education credit shall be given for a minimum of 50 minutes of continuous study for each class hour. No credit shall be allowed for breaks or for time expended for study outside of the classroom.
- B. Each course shall be on subjects of clinical benefit to the consumer of chiropractic services.
  - 1. The content of the course, seminar or workshop must be recognized by reputable authorities as having validity, and must conform to the scope of practice for assessment, treatment and diagnosis as authorized under A.R.S. § 32-925 and A.R.S. § 32-922.02.

Pre-approval does not include mediated instruction or programmed learning courses.
1. A college or university that meets the requirements of A.R.S. § 32-921(B)(2)(a), the American Chiropractic Association and the International Chiropractors Association, with qualified instructors and that provide courses that meet the subject requirements under subsections (J) or (K).

**TITLE 4. PROFESSIONS AND OCCUPATIONS****CHAPTER 26. BOARD OF PSYCHOLOGIST EXAMINERS**

(Authority: A.R.S. § 32-2061 et seq.)

*Editor's Note: This Chapter contains amendments that were filed with the Secretary of State on March 3, 1995. At the time of filing, the original copy of the rulemaking package differed from the copy of the package filed at the same time. The Secretary of State uses the copy to prepare the Code supplement. The agency notified the Secretary of State that the wrong version was used. That led to the Secretary of State's discovery of the two versions filed in March 1995. The Secretary of State then used the original package to publish a corrected edition with Supp. 95-2. The Secretary of State has since been advised by the Attorney General that the original version as published with Supp. 95-1 was correct with the exception of one phrase in R4-26-207 that was inadvertently omitted. With this publication, this Chapter reflects the correct amendments, and the omitted phrase in R4-26-207 has now been added.*

**R4-26-202. Doctorate**

A. The Board shall apply the following criteria to determine if a doctoral program complies with A.R.S. § 32-2071:

1. A program is “identified and labeled as a psychology program” under A.R.S. § 32-2071(A)(2) if the university, college, department, school, or institute had institutional catalogues and brochures that specified its intent to educate and train psychologists, at the commencement of the applicant’s degree program;
  2. A program “stands as a recognized, coherent organizational entity” under A.R.S. § 32-2071(A)(2) if the university, college, department, school, or institute had a psychology curriculum that was an organized sequence of courses at the commencement of the applicant’s degree program; and
  3. A program has “clearly identified entry and exit criteria” within its curriculum under A.R.S. § 32-2071(A)(2) if the university, college, department, school, or institute has requirements that outline the prerequisites for entrance into the program and the sequence of study and has requirements for graduation delineated.
- B. The Board shall verify that an applicant has completed the hours in the subject areas described in A.R.S. § 32-2071(A)(4). For this purpose, the applicant shall have the institution that the applicant attended provide directly to the Board an official transcript of all courses taken.
1. The Board shall verify that an applicant’s transcripts have been prepared solely by the institution under A.R.S. § 32-2071(A)(7) by determining whether the applicant had any input into the transcript drafting process.
  2. The Board may require additional documentation from the applicant or from the institution to determine whether the applicant has satisfied the requirements of A.R.S. § 32-2071(A)(4).
  3. The Board shall count five quarter hours as the equivalent of three semester hours, as required under A.R.S. § 32-2071(A)(4). When an academic term is other than a semester or quarter, 15 classroom contact hours equals one semester hour.
- C. To determine whether a comprehensive examination taken by an applicant as part of a doctoral program in psychology satisfies the requirements of A.R.S. § 32-2071(A)(4), the Board shall review documentation provided directly to the Board by the educational institution that granted the doctoral degree, that demonstrates how the applicant’s comprehensive examination was constructed, lists criteria for passing, and provides the information used to determine that the applicant passed.
- D. The Board shall not accept credit hours for workshops, practica, undergraduate courses, life experiences, or for credits transferred from institutions that are not accredited under A.R.S. § 32-2071(A)(1), to satisfy a requirement of A.R.S. § 32-2071(A)(4).
- E. The Board shall count a course or comprehensive examination only once to satisfy a requirement of A.R.S. § 32-2071(A)(4).
- F. An honorary doctorate degree does not qualify an applicant for licensure as a psychologist.
- G. The Board shall not accept as core program credits practica, workshops, continuing education courses, experiential or correspondence courses, or life experiences. The Board shall not accept core program credits for seminar or readings courses or independent study unless the applicant provides evidence that the course was an in-depth study devoted to a particular core area. The applicant shall submit evidence of one or more of the following:
1. Course description in official college catalogue,
  2. Course syllabus, or
  3. Signed statement from a dean or psychology department head detailing that the course was an in-depth study devoted to a particular core area.

Except as provided in subsection (C), when considering reinstatement of a psychologist from inactive status to active status, the Board shall presume that the psychologist has maintained and updated the psychologist's professional knowledge and capability to practice as a psychologist if the psychologist presents to the Board documentation of completion of a prorated amount of continuing education, calculated under subsection (B).
- B. Except as provided in subsection (C), to calculate the minimum number of continuing education hours required for reinstatement to active status, the Board shall divide the 60 hours of continuing education required by 24 and multiply that amount by the number of months that have elapsed since the licensee began inactive status.
- C. A psychologist who began inactive status before July 2, 2005 may reinstate a license to active status by demonstrating completion of a minimum of 60 hours of continuing education consistent with the requirements of R4-26-207 and completed during the previous two-year license renewal period.

**R4-26-207. Continuing Education**

- A.** A licensee shall complete a minimum of 60 hours of continuing education during each two-year license renewal period. One clock hour of instruction, training, preparation of a published book or journal article, or making a presentation equals one hour of continuing education credit.
1. Continuing education hours are prorated from the date of the Board correspondence notifying an applicant of approval for licensure. To calculate the minimum number of continuing education hours that a new licensee must obtain, the Board shall divide the 60 hours of continuing education required by 24 and multiply that amount by the number of months that remain until the next biennial renewal date.
  2. The Board uses the same method specified in subsection (A)(1) to calculate the minimum number of continuing education hours required in each of the categories listed in subsection (C).
- B.** A licensee shall obtain a minimum of eight of the 40 hours required under Category I in subsection (C) as follows:
1. At least four hours in professional ethics; and
  2. Beginning May 1, 2005, at least four hours in domestic violence or child abuse;
- C.** During the two-year license period, a licensee shall obtain a minimum of 40 hours from Category I. The remaining 20 required continuing education hours may be from Category I or Category II.
1. Category I consists of:
    - a. Post-doctoral study sponsored by a regionally accredited university or college as listed in A.R.S. § 32-2071(A)(1), that provides a graduate-level degree program, or a course, seminar, workshop, or home study with certificate of completion, or a continuing education program offered by a national, international, regional, or state association, society, board, or continuing education provider, if:
      - i. At least 75 percent of the program is related to the "practice of psychology" as defined in A.R.S. § 32-2061(A)(8); and
      - ii. The program's instructor meets the qualifications in subsection (D);
    - b. Attending a Board meeting. A licensee receives four continuing education hours in professional ethics as required under subsection (B)(1) for attending eight hours or more of a Board meeting and two continuing education hours for attending between four and eight hours of a Board meeting. A licensee shall complete documentation provided by the Board at the time the licensee attends a Board meeting. The Board shall not accept more than 10 continuing education hours obtained by attending a Board meeting from a licensee for each renewal period; and
    - c. Serving as a complaint consultant. A licensee who serves as a Board complaint consultant to review Board complaints and provide a written report to the Board, receives continuing education hours equal to the actual number of hours served as a complaint consultant up to a maximum of 20 hours per renewal period.
  2. Category II consists of:
    - a. Self-study or study groups for professional growth and development as a psychologist;
    - b. Preparation that results in publication of an authored or co-authored psychology book, psychology book chapter, or article in a peer-reviewed psychology journal;
    - c. Presentation of a symposium or paper at a state, regional, national, or international psychology meeting;
    - d. Attendance at or participation in a case conference; or
    - e. A course, workshop, seminar, or symposium for professional growth and development as a psychologist or enhancement of psychological practice, education, or administration.
- D.** The Board shall not approve continuing education for credit unless the continuing education instructor:
1. Is currently licensed or certified in the instructor's profession or works at least 20 hours each week as a faculty member at a regionally accredited college or university, as listed in A.R.S. § 32-2071(A);
  2. Is a fellow as defined in R4-26-101 or a diplomate as defined in R4-26-101; or
  3. Demonstrates competence and expertise in the subject or material the instructor teaches by having an advanced degree, teaching experience, work history, authored professional publication articles, or having previously presented seminars in that subject or material.
- E.** A licensee who organizes and presents a continuing education activity receives the same number and category of continuing education hours described in subsection (C) as those persons attending the continuing education activity. The Board shall not allow credit more than once in a two-year license renewal period for organizing and presenting a continuing education function on the same topic or content area.
- F.** A licensee elected to an officer position in an international, national, regional, or state psychological association or society, or appointed to a government psychology board or committee, receives Category I continuing education hours equal to the actual number of hours served in the position up to a maximum of 10 hours per renewal period.
- G.** Each licensee shall keep the following documents that substantiate completion of continuing education hours for the previous license renewal period:

The Board may deny renewal or take other disciplinary action against a licensee who fails to obtain or document required continuing education hours. The Board may discipline a licensee who commits fraud, deceit, or misrepresentation regarding continuing education hours.
- I.** A licensee who cannot meet the continuing education requirement for good cause may seek an extension of time to complete the continuing education requirement by submitting a written request to the Board, including the renewal fee.
1. Good cause is limited to licensee illness, military service, or residence in a foreign country for at least 12 months of the license renewal period.
  2. A licensee shall submit a request for extension on or before the expiration of a license. The Board shall not grant a time extension longer than one year.
  3. A licensee who cannot complete the continuing education requirement within the time extension may apply to the

- J. The Board shall not allow continuing education hours in excess of the 60 required hours to be carried beyond the two-year renewal period in which the hours were accrued.
- K. A course, workshop, seminar, or symposium designed to increase income or office efficiency is not eligible for continuing education hours.

4. That the two hours a week of other learning activities required in A.R.S. § 32-2071(D)(6) includes one or more of the following:

This rule does not restrict a student from participating in activities designed to fulfill other doctoral degree requirements; however, the Board shall not credit such time toward the hours required by A.R.S. § 32-2071(D); and

7. That to satisfy the first 1,500 hours required by A.R.S. § 32-2071(D), the written statement required under A.R.S. § 32-2071(D)(9) was established by the time the student began training.   - 1. A wood-destroying insect inspection is performed under R4-29-303 by a licensed applicator qualified under A.R.S. § 32-2323(E),
  - 2. A treatment proposal is prepared on a form approved by the Commission and contains the information required under A.R.S. § 32-2323(B) and (C), and
  - 3. The treatment proposal is delivered to the person requesting the proposal.
- C. An applicator shall apply a termiticide only in the quantity, strength, and dosage, and in the manner prescribed on the termiticide label unless otherwise specified by this Chapter or a Commission order.
- D. Pretreatment for commercial or residential construction.
  - 1. Unless a contract between the business licensee and customer specifies additional requirements, an applicator shall:
    - a. Establish a horizontal barrier of termiticide before any concrete slab under roof is poured or in conjunction with establishing the footings and supports for a raised foundation; and

- b. Establish a vertical barrier of termiticide in all critical areas visible during the time of pretreatment. An area is critical at the time of pretreatment if the area is identified as critical by the termiticide label or if there is soil in the immediate vicinity of:
  - i. A penetration or protrusion through the slab;
  - ii. An observable preset for crack or joint control;
  - iii. A formed-up change of grade level;
  - iv. Abutting slabs;
  - v. A bath trap or tear-out;
  - vi. The interior of a foundation or stem wall; or
  - vii. A pier, pillar, pipe, or other object that extends from the soil to the structure.
- 2. Except as specified in subsection (D)(3) and unless the termiticide label requires more, an applicator shall treat all critical areas during a pretreatment, including the final-grade portion of a pretreatment, at a rate of four gallons of chemical preparation per 10 linear feet for each foot of depth from grade level to the footer. If there is no adjacent footer, the applicator shall treat to a depth of one foot.
- 3. Unless the termiticide label requires more, an applicator is not required to treat a critical area during a pretreatment beyond a depth of four feet if:
  - a. Treating beyond a depth of four feet will, or reasonably may, cause an off-site application;
  - b. Access to the footer is not possible because of its distance below grade; or
  - c. Treating beyond a depth of four feet will, or reasonably may cause an environmental contamination.
- 4. If an applicator does not treat a critical area during a pretreatment beyond a depth of four feet because the applicator determines that one of the exceptions in subsection (D)(3) is applicable, the applicator shall:
  - a. Apply the amount of termiticide possible without causing an off-site application or environmental contamination, and
  - b. Include evidence of the exception in the treatment record. Evidence of the exception may include:
    - i. A photograph of the interior grade and adjacent location that would or reasonably might be contaminated by treating beyond a depth of four feet,
    - ii. A photograph of the site after the pretreatment but before concrete placement,
    - iii. A written statement from the general contractor concerning the fill material and compaction rating,
    - iv. A written statement from the concrete subcontractor describing the depth of the footer as greater than four feet, or
    - v. A written compaction rating statement from the engineering subcontractor.
- 5. If an applicator is advised before concrete is poured that a treated area is disturbed and the continuous horizontal or vertical chemical barrier established under subsection (D)(1) is broken, and if the applicator is provided an opportunity to re-treat the disturbed area, the applicator shall re-treat the disturbed area and re-establish a continuous horizontal and vertical chemical barrier.
- 6. Immediately after completing a pretreatment, an applicator shall securely affix a tag to the pretreatment site. The applicator shall ensure that the tag is visible, readily available for inspection, and unlikely to be covered with concrete or soil. If there is a contractor's permit or inspection board at the pretreatment site, the applicator may

affix the tag to the board. The applicator shall ensure that the tag contains the following information about the pretreatment:

- a. Name of business licensee;
  - b. Address of business licensee;
  - c. Telephone number of business licensee;
  - d. License number of business licensee;
  - e. Location or address of project;

  - i. Trade name of pesticide used;
  - j. Percentage of active ingredient in the pesticide used;
  - k. Number of gallons of chemical preparation applied;
  - l. Square footage of area treated;
  - m. Linear footage of area treated;

  - o. Name of applicator; and
  - p. License number of applicator or, if not licensed, the name and license number of the applicator or qualifying party providing immediate supervision.
7. If it is necessary for an applicator to abandon a pretreatment site before completing the treatment, the applicator shall complete and affix the tag described in subsection (D)(6), representing the work completed, and after marking the tag "TREATMENT INCOMPLETE."
  8. If a contractor requires a copy of the tag described in subsection (D)(6) for the customer's file, an applicator shall prepare and provide the contractor with a duplicate tag that is clearly marked "DUPLICATE."
  9. An applicator shall leave a record of the final-grade treatment in an unlocked electrical or circuit-breaker box, if available. Otherwise, the applicator shall conspicuously post or leave the record with the property agent. The applicator shall ensure that the record of the final-grade treatment contains the information listed in subsection (D)(6) except the information required under subsections (D)(6)(l) and (D)(6)(n) is not required.

**E. New-construction treatment for commercial or residential construction.**

1. Unless specifically precluded by the termiticide label, an applicator shall treat all critical areas visible at the time of a new-construction treatment.   - a. A penetration or protrusion through the slab;
  - b. An observable crack or joint;
  - c. Abutting slabs;
  - d. A bath trap or tear-out;

2. An applicator shall comply with subsections (D)(2) through (D)(4) when treating a critical area during a new-construction treatment except that the treatment shall be at the labeled rate rather than at a rate of four gallons of chemical preparation per 10 linear feet for each foot of depth.
3. If an applicator is advised that a treated area is disturbed, the applicator shall re-treat the disturbed area.
4. Immediately after completing a new-construction treatment, an applicator shall securely affix a tag to the new-construction site in the manner described in subsection

(D)(6). The applicator shall ensure that the tag contains the information listed in subsection (D)(6).

5. An applicator shall comply with subsections (D)(7) through (D)(9) when performing a new-construction treatment.

**F. Post-construction treatment for commercial or residential construction.**

1. If an applicator uses a drilling and injecting application method for a post-construction treatment, the applicator shall space the treatment holes in each treated area no more than 24 inches apart or in accordance with the termiticide label, whichever is more restrictive. If an applicator determines that a structural feature makes it necessary to space treatment holes more than 24 inches apart, the applicator may space the treatment holes more than 24 inches apart if the greater distance is within the limits on the termiticide label.
2. If the critical areas of a structure received neither a pretreatment nor a new-construction treatment, an applicator shall treat all critical areas visible at the time of post-construction treatment before issuing a builder's warranty regarding subterranean termite treatment. An area is critical at the time of a post-construction treatment if it is an area listed in subsection (D)(1)(b), a change of grade, or a crack greater than 1/16th of an inch.
3. After completing a post-construction treatment using a drilling and injection application method, an applicator shall securely patch all treatment holes, including those in an unfinished basement, enclosed porch, garage, or workshop, with a material that is nonporous and non-cellulose.

- G.** An applicator who performs a pretreatment or new-construction treatment shall ensure that a copy of the information recorded on a tag required under subsection (D) or (E) is provided to the business licensee for inclusion in the business licensee's service records.

- H.** If a rehearing is granted, the Commission shall hold the rehearing within 60 days after the date on the order granting the rehearing.

**R6-5-2405. Hearing process**

**A.** Filing of appeal

1. A request for a hearing shall be filed in writing with the Department or provider within 15 calendar days after the mailing date of the decision letter, except that for appeals on denying, revoking or suspending a license of a child welfare agency or foster home the request shall be filed within 20 calendar days.
2. Except as otherwise provided by statute or by Department regulation, any appeal, application, request, notice, report, or other information or document submitted to the Department shall be considered received by and filed with the Department:
  - a. If transmitted via the United States Postal Service or its successor, on the date it is mailed. The mailing date will be as follows:

    - iii. If not postmarked or postage-meter marked, or if the mark is illegible, the date entered on the document as the date of completion.
  - b. If transmitted by any means other than the United States Postal Service or its successor, on the date it is received by the Department.
  - c. The submission of any appeal, application, request, notice, report or other information or document not within the specified statutory or regulatory period shall be considered timely if it is established to the satisfaction of the Department that the delay in submission was due to Department error or misinformation or to delay or other action of the United States Postal Service or its successor.
  - d. Any notice, determination, decision or other data mailed by the Department shall be considered as having been given to the addressee to whom it is directed on the date it is mailed to the addressee's last known address. The date mailed shall be presumed to be the date of the notice, determination, decision or other data unless otherwise indicated by the facts. Computation of time shall be made in accordance with Rule 6(a) of the Rules of Civil Procedure, 16 A.R.S.
3. Benefits shall not be reduced or terminated prior to a hearing decision unless due to a subsequent change in household eligibility another notice of adverse action is received and not timely appealed.
4. The local office or provider shall advise the client of any community legal services available and, when requested, shall assist in completing the hearing request.

**B.** Notice of hearing

1. Hearings will be held at the local office or any other place mutually agreed upon by the hearing officer and appellant. They shall be scheduled not less than 20 nor more than 30 days from the date of filing of the request for hearing. The appellant shall be given no less than 15 days notice of hearing, except that the appellant may waive the notice period or request a delay. For appeals on deny-

ing, revoking or suspending a license of a child welfare agency or foster home, however, the hearing shall be held within ten days of the date of filing of the request for hearing.

2. The notice of hearing shall inform the appellant of the date, time, and place of the hearing, the name of the hearing officer, the issues involved, and of his rights to: present his case in person or through a representative; examine and copy any documents in his case file and all documents and records to be used by the agency at the hearing at a reasonable time prior to the hearing as well as at the hearing; obtain assistance from the local office in preparing his case; and of his opportunity to make inquiry at the local office about the availability of community legal resources which could provide representation at the hearing.
3. Appellant, in lieu of a personal appearance, may submit a written statement, under oath or affirmation, setting forth the facts of the case provided that the statement is submitted to the Department prior to or at the time of the hearing. All parties shall be ready and present with all witnesses and documents at the time and place specified in the notice of hearing, and shall be prepared at such time to dispose of all issues and questions involved in the appeal.
4. The hearing officer may take such action for the proper disposition of an appeal as he deems necessary, and on his own motion, or at the request of any interested party upon a showing of good cause disqualify himself, or may continue the hearing to a future time or reopen a hearing before a decision is final to take additional evidence. If an interested party fails to appear at a scheduled hearing, the hearing officer may adjourn the hearing to a later date or may make his decision upon record and such evidence as may be presented at the scheduled hearing. If, within ten days of the scheduled hearing, appellant files a written application requesting reopening of the proceedings and establishes good cause for failure to appear at the scheduled hearing, the hearing shall be rescheduled. Notice of the time, place, and purpose of any continued, reopened or rescheduled hearing shall be given to all interested parties.

**C.** Prehearing summary

1. A prehearing summary of the facts and grounds for the action taken shall be prepared and forwarded to the hearing officer no less than four days prior to the hearing.
2. The summary shall be provided to the appellant prior to the commencement of the hearing.

**D.** Subpoena of witnesses. The hearing officer may subpoena any witnesses or documents requested by the Department or claimant to be present at the hearing. The request shall be in writing and shall state the name and address of the witness and the nature of his testimony. The nature of the witnesses' testimony must be relevant to the issues of the hearing, otherwise the hearing officer may deny the request. The request for the issuance of a subpoena shall be made to give sufficient time, a minimum of three working days, prior to the hearing. A subpoena requiring the production of records and documents shall specifically describe them in detail and further set forth the name and address of the custodian thereof.

**E.** Review of file. In the presence of a Department representative, the appellant and/or his authorized representative shall be permitted to review, obtain or copy any Department record necessary for the proper presentation of the case.

**F.** Conduct of the hearing

1. Hearings shall be conducted in an orderly and dignified manner.
  2. Hearings are opened, conducted and closed by the hearing officer who shall rule on the admissibility of evidence and shall direct the order of proof. He shall have power to administer oaths and affirmations, take depositions, certify to official acts and issue subpoenas to compel the attendance of witnesses, the production of books, papers, correspondence, memoranda and other records he deems necessary as evidence in connection with a hearing.
  3. Evidence not related to the issue shall not be allowed to become a part of the record.
  4. The hearing officer may, on his own motion, or at the request of the appellant or Department representative, exclude witnesses from the hearing room.
  5. The worker, supervisor or other appropriate person may be designated Department representative for the hearing.
  6. The appellant and Department representative may testify, present evidence, cross-examine witnesses and present arguments.
  7. The appellant may appear for himself or be represented by an attorney or any other person he designates.
  8. A full and complete record shall be kept of all proceedings in connection with an appeal, and such records shall be open for inspection by the claimant or his representative at a place accessible to him. A transcript of the proceedings need not, however, be made unless it is required for further proceedings. When a transcript has been made for further proceedings, a copy shall be furnished without cost to each interested party.
- G. Hearing decision**
1. The hearing decision shall be rendered exclusively on the evidence and testimony produced at the hearing, appropriate state and federal law, and Department rules governing the issues in dispute.
  2. The decision shall set forth the pertinent facts involved, the conclusions drawn from such facts, the sections of applicable law or rule, the decision and the reasons thereof. A copy of such decision, together with an explanation of the appeal rights, shall be delivered or mailed to each interested party and their attorneys of record not more than 60 days from the date of filing the request for appeal, unless the delay was caused by the appellant.
  3. In those cases where the local office must take additional action as a result of a decision, such action must be taken immediately.
  4. All decisions in favor of the appellant apply retroactively to the date of the action being appealed, or to the date the hearing officer specifically finds appropriate.
  5. When a hearing decision upholds the proposed action of reducing, suspending or terminating a grant, an overpayment is the result.
  6. All hearing decisions will be made accessible to the public, subject to meeting the provision for safeguarding confidential information relating to the client.
  7. Decision of the hearing officer will be the final decision of the Department unless a reconsideration is requested in accordance with subsection (I).
- H. Withdrawal of appeal.** An appeal may be withdrawn as follows:
1. Voluntary withdrawal. This may be accomplished by completing and signing the proper Department form or by submitting a letter properly signed.
  2. Abandonment or involuntary withdrawal. This occurs when an appellant fails to appear at a scheduled hearing and within ten days thereof fails to request a rescheduled hearing or fails to appear at a rescheduled hearing which he has requested. A hearing may not be considered abandoned if the claimant provides notification up to the time of the hearing that he is unable, due to good cause, to keep the appointment and that he still wishes a hearing.
- I. Reconsideration**
1. An appellant, within ten calendar days after the decision was mailed or otherwise delivered to him, may request the Director to review the decision. The request shall be in writing and should set forth a statement of the grounds for review, and may be filed personally or by mail.
  2. After receipt of an application for leave to appeal, the Director shall:
    - a. Deny the application, or
    - b. Remand the case for rehearing, specifying the nature of any additional evidence required and/or issues to be considered, or
    - c. Grant the application and decide the appeal on the record.
  3. The Director shall promptly adopt his decision which shall be the final decision of the Department. A copy of the decision, together with a statement specifying the rights for judicial review, shall be distributed to each interested party.
