- E.** The Director may exempt a qualifying party from taking the section on general knowledge, and one or more of the specialized sections, if the qualifying party provides proof of passing an equivalent examination given by the National Ground Water Association.

#### Historical Note

Adopted effective March 5, 1984 (Supp. 84-2). Section repealed, new Section adopted effective June 18, 1990 (Supp. 90-2). Amended by final rulemaking at 13 A.A.R. 3022, effective October 6, 2007 (Supp. 07-3).

#### R12-15-806. License Fee; Issuance and Term of Licenses; Renewal; Display of License

- A.** The fee for a well driller's license shall be \$50.00.
- B.** Upon submittal of the license fee and satisfactory completion of an examination, the Director shall issue the applicant a well drilling license. The license shall be numbered and shall state the specialized classifications of drilling activities for which the applicant is qualified and licensed. The applicant shall be licensed in only those classifications for which the qualifying party has passed the specialized sections of the examination. If the qualifying party subsequently passes other specialized sections, the applicant's license shall be amended. The applicant shall pay a fee of \$50.00 for the amendment of a well driller's license.
- C.** A well drilling contractor shall notify the Director in writing within 30 days of the date on which the well drilling contractor no longer has a qualifying party for one or more of its specialized drilling classifications. Upon such notification, the Director may revoke or suspend part or all of the well drilling license of the well drilling contractor and require a new qualifying party to take and pass the examination.
- D.** A well drilling license shall expire each year on June 30th, unless renewed pursuant to subsection (E).
- E.** A person may renew a well drilling license by submitting an application for renewal on forms prescribed and furnished by the Director and a fee of \$50.00. If the application and renewal fee are postmarked on or before June 30, the well drilling contractor may operate as a licensee until actual issuance of the renewal license. A license which has expired may be reactivated.

## Department of Water Resources

vated and renewed within one year of its expiration by filing the required application and a reactivation fee of \$50.00. If a license has been expired for one or more years for failure to renew, the well drilling contractor shall apply for a new license and repeat the examination.

- F. A well drilling contractor shall prominently display the well drilling license number on all well drilling rigs owned or operated by the contractor in this state. Good quality paint or commercial decal numbers shall be used in placing each identification number on the drilling rig. The license number shall not be inscribed in crayon, chalk, pencil, or other temporary markings.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

**R12-15-807. Single Well License**

- A. An applicant for a single well license pursuant to A.R.S. § 45-595(D) shall submit a verified application on forms prescribed and furnished by the Director, which shall include:
1. The name and address of the applicant.
  2. The location of the well and whether the applicant owns the land.
  3. The type of drill rig to be used and the owner of the rig.
  4. The proposed design of the well or method of abandonment.
  5. The names of any people who will be assisting the applicant in the drilling or abandonment of the well, and whether the applicant will compensate them for their efforts.
  6. The applicant's experience, if any, in well drilling or abandonment.
  7. Such other information as the Director may require relevant to the applicant's experience and qualifications in well drilling or abandonment.
- B. The Director shall offer the single well examination no less than six times yearly and shall administer the examination to those eligible applicants whose applications were submitted at least 20 days prior to the date of the examination.
- C. The single well examination shall be of a form prescribed and furnished by the Director and shall test the applicant's knowledge of abandonment techniques, or those minimum well construction requirements and drilling techniques applicable to the proposed design of the well. The passing grade on the sections of the examination dealing with construction requirements and drilling techniques, respectively, shall be 70 percent.
- D. Rule R12-15-805 relating to testing procedures shall be fully applicable.
- E. Applicants who twice fail the examination shall wait a minimum of 90 days before re-testing.
- F. Upon passing the examination, the applicant shall be issued a single well license, authorizing the applicant to drill or abandon one exempt well at the location specified in the application. The license shall be valid for a period of one year from issuance.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-808. Revocation of License**

The Director may revoke, suspend, or place on probationary status a well drilling license issued pursuant to R12-15-806, or a single well license, for good cause, including:

1. Intentionally making a misstatement of fact on any filing with the Department.
2. Violating any provision of A.R.S. Title 45, Chapter 2, Article 10, and the rules promulgated thereunder, or aiding and abetting in such a violation.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). Section number corrected (Supp. 93-1).

**R12-15-809. Notice of Intention to Drill**

A notice of intention to drill required to be filed pursuant to A.R.S. § 45-596 shall be signed by the owner or lessee of the property upon which the well is to be drilled.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2).

**R12-15-810. Authorization to Drill**

- A. A well drilling contractor or single well licensee may commence drilling a well only if the well drilling contractor or licensee has possession of a drilling card at the well site issued by the Director in the name of the well drilling contractor or licensee, authorizing the drilling of the specific well in the specific location.
- B. In extraordinary situations not requiring a permit but only a notice of intention to drill, the Director may grant a request by telephone for emergency authorization of commencement of drilling prior to the actual receipt by the well driller of the drilling card. Within seventy-two hours after such a request is granted, the well driller shall file a written statement indicating the nature and reasons for the request, and the date, time and Department employee granting the request, and the well owner shall file a notice of intent to drill if such a notice has not previously been filed.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). Amended to correct typographical error under A.A.C. R1-1-109 (Supp. 01-2). Amended by final rulemaking at 13 A.A.R. 3022, effective October 6, 2007 (Supp. 07-3).

**R12-15-811. Minimum Well Construction Requirements**

- A. Well casing
1. Casing shall be of a sufficient strength and wall thickness to hold the borehole open and survive any necessary grouting. A person shall use only steel or thermoplastic casing in the construction of a well, unless the person has received a variance from the Director pursuant to R12-15-820. The well casing or an extension of the casing shall extend a minimum of one foot above ground level. When installing a pitless adaptor, the casing may be terminated below ground level for aesthetic reasons or freeze protection purposes. Casing made of, or which has been exposed to, hazardous or potentially harmful materials, such as asbestos, shall not be used.
  2. All well casing joints or overlaps shall be made watertight to prevent the degradation of the water supply by the migration of inferior quality water. Except as provided in subsection (H) of this rule, any openings in the casing that will be above the water level in the well, such as bar holes, cracks or perforations, shall be completely plugged or sealed.

3. Thermoplastic casing shall be installed only in an over sized drillhole without driving. Thermoplastic casing shall conform with American Society for Testing and Materials Standard Specification F480-89 (1989), which is incorporated herein by reference and is on file with the Office of the Secretary of State. Rivets or screws used in the casing joints shall not penetrate the inside of the casing.
  4. Steel casing shall be new or in like-new condition, free from pits or breaks, and shall conform with American Society for Testing and Materials Standard Specification A53-89a (1989), A139-89b (1989) or A312/A312M-89a (1989), whichever is applicable, all of which are incorporated herein by reference and are on file with the Office of the Secretary of State.
  5. Copies of The American Society for Testing and Materials standard specifications referred to in subsections (3) and (4) above may be obtained with these rules at the Office of the Secretary of State of the State of Arizona, State Capitol, West Wing, Phoenix, Arizona 85007; from the Department of Water Resources, 3550 N. Central Avenue, Phoenix, AZ 85012; and from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959. This rule does not include any later amendments or editions of those standard specifications.
- B. Surface seal**
1. Except as provided in subsections (2) and (4) of this subsection, and R12-15-817(B)(1), all wells shall be constructed with a surface seal as herein provided. The seal shall consist of steel casing, one foot of which shall extend above ground level, and cement grout placed in one continuous application from the bottom of the zone to be grouted to the land surface. If a pitless adaptor is utilized, the cement grout may terminate at the bottom of the pitless adaptor. The minimum length of the steel casing shall be 20 feet. The minimum annular space between the casing and the borehole for placement of grout shall be one and one-half inches. Curing additives, such as calcium chloride, shall not exceed ten percent of the total volume of grout. Bentonite as an additive shall not exceed five percent of the total volume. The minimum length of the surface seal shall be 20 feet. Any annular space between the outer casing and an inner casing shall be completely sealed to prevent contamination of the well.
  2. All hand-dug wells shall be constructed with a watertight curbing extending, at a minimum, from one foot above the natural ground level to the static water level, or into the confining formation if the aquifer is artesian. The curbing shall consist of poured cement grout or casing surrounded by cement grout. Concrete block with cement grout and rock with cement grout may also be used. The poured cement grout shall not be less than six inches thick. If casing is to be used, the minimum annular space between the casing and the borehole shall be three inches. Hand-dug wells shall be sealed at the surface with a watertight, tamper-resistant cover to prevent contaminants from entering the well.
  3. All wells constructed by jetting or driving shall have cement grout placed in the annular space to a minimum depth of six feet. The minimum annular space between the casing and the borehole for placement of the grout shall be one and one-half inches.
  4. All horizontal wells, to prevent leakage, shall be constructed with a surface seal consisting of steel casing and cement grout extending a minimum of ten feet into the land surface.
- C. Access port.** Every well with casing four inches in diameter or larger shall be equipped with a functional watertight access port with a minimum diameter of one-half inch so that the water level or pressure head in the well can be monitored at all times.
- D. Gravel packed wells**
1. If a gravel pack has been installed, the annular space between the outer casing and the inner casing shall be sealed, either by welding a cap at the top or by filling with cement grout from the bottom of the outer casing to the surface.
  2. If a gravel tube is installed, it shall be sealed with a cap.
- E. Vents.** All vents installed in the well casing shall open downward and be screened to prevent the entrance of foreign material.
- F. Removal of drilling materials**
1. In constructing a water well, the well driller shall take all reasonable precautions to protect the producing aquifer from contamination by drilling materials. Upon completion of the well, the well driller shall remove all foreign substances and materials introduced into the aquifer or aquifers during well construction. For purposes of this subsection, "substances and materials" means all drilling fluids, filter cake, lost circulation materials, and any other organic or inorganic substances.
  2. Materials known to present a health hazard, such as chrome-based mud thinners, asbestos products, and petroleum-based fluids, shall not be used as construction, seal or fill materials or drilling fluids.
  3. Drilling fluids and cuttings shall be contained in a manner which prevents discharge into any surface water.
- G. Repair of existing wells**
1. If, in the repair of a well, the old casing is withdrawn, the well shall be recased in conformance with these rules.
  2. If an inner casing is installed to prevent leakage of undesirable water into a well, the annular space between the casings shall be completely sealed by packers, casing swedging, pressure grouting or other methods which will prevent the movement of water between the casings.
- H. Monitor wells**
1. A monitor well may be screened up to ten feet above the highest seasonal static water level of record for the purpose of monitoring contaminants.
  2. A monitor well shall be identified as such on the vault cover or at the top of the steel casing. Identification information shall include the well registration number.
- I. Completion at the surface.** In areas of traffic or public rights-of-way, wells may be constructed below the land surface in a vault. All other requirements in this Article shall apply.
- Historical Note**
- Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). The reference to R12-14-817(B)(1) in subsection (B)(1) corrected to read R12-15-817(B)(1) (Supp. 93-1). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).
- R12-15-812. Special Aquifer Conditions**
- A. Artesian wells**
1. The well casing shall extend into the confining formation immediately overlying the artesian aquifer and shall be grouted from a minimum of ten feet into the confining formation to the land surface to prevent surface leakage into and subsurface leakage from the artesian aquifer.

2. If leaks occur adjacent to the well or around the well casing, within 30 days the well shall be completed with the seals, packers, or casing and grouting necessary to eliminate such leakage or the well shall be abandoned according to R12-15-816.
  3. If the well flows at land surface, the well shall be equipped with a control valve, or suitable alternative means of completely controlling the flow, which must be available for inspection at the well site at all times.
- B.** Mineralized or polluted water. In all water-bearing geologic units containing mineralized or polluted water as indicated by available data, the borehole shall be cased and grouted so that contamination of the overlying or underlying groundwater zones will not occur.

#### Historical Note

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

#### R12-15-813. Unattended Wells

All wells, when unattended during well drilling, shall be securely covered for safety purposes and to prevent the introduction of foreign substances into the well.

#### Historical Note

Adopted effective March 5, 1984 (Supp. 84-2). Section number corrected (Supp. 93-1).

#### R12-15-814. Disinfection of Wells

A well drilling contractor shall disinfect any well from which the water to be withdrawn is intended to be utilized for human consumption or culinary purposes without prior treatment before removing the drill rig from the well site in accordance with the requirements contained in Engineering Bulletin No. 8, "Disinfection of Water Systems", issued by the Arizona Department of Health Services in August 1978, and Engineering Bulletin No. 10, "Guidelines for the Construction of Water Systems", issued by the Arizona Department of Health Services in May 1978, both of which are incorporated by reference and are on file with the Office of the Secretary of State. Copies of the Engineering Bulletins referred to above may be obtained with these rules at the Office of the Secretary of State of the State of Arizona, State Capitol, West Wing, Phoenix, Arizona 85007, and from the Department of Water Resources, 3550 N. Central Avenue, Phoenix, AZ 85012. This rule does not include any later amendments or editions of those Bulletins.

#### Historical Note

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### R12-15-815. Removal of Drill Rig from Well Site

The drilling rig shall not be removed from the well site unless the well is in one of the following conditions:

1. Constructed in full conformance with R12-15-811 and R12-15-812 and either sealed with a cap or equipped with a pump.
2. Abandoned in accordance with R12-15-816.

#### Historical Note

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

#### R12-15-816. Abandonment

- A.** Well abandonment shall be performed only by a licensed well drilling contractor or single well licensee.
- B.** Except as provided in subsection (F) of this Section, the owner of a well shall file a notice of intent to abandon the well prior

to abandonment, on a form prescribed and furnished by the Director, which shall include:

1. The name and mailing address of the person filing the notice.
  2. The legal description of the land upon which the well proposed to be abandoned is located and the name and mailing address of the owner of the land.
  3. The legal description of the location of the well on the land.
  4. The depth, diameter and type of casing of the well.
  5. The well registration number.
  6. The materials and methods to be used to abandon the well.
  7. When abandonment is to begin.
  8. The name and well drilling license number of the well drilling contractor or single well licensee who is to abandon the well.
  9. The reason for the abandonment.
  10. Such other information as the Director may require.
- C.** The Director shall, upon receipt of a proper notice of intent to abandon, mail a well abandonment authorization card to the designated well drilling contractor or single well licensee.
- D.** Except as described in subsection (F) of this Section, a well drilling contractor or single well licensee may commence abandoning a well only if the driller has possession of an abandonment card at the well site, issued by the Director in the name of the driller, authorizing the abandonment of that specific well or wells in that specific location.
- E.** Within 30 days after a well is abandoned pursuant to this Section, the well drilling contractor or single well licensee shall file with the Director a Well Abandonment Completion Report on a form prescribed and furnished by the Director which shall include the date the abandonment of the well was completed and such other information as the Director may require.
- F.** In the course of drilling a new well, the well may be abandoned without first filing a notice of intent to abandon and without an abandonment card. If the well is abandoned pursuant to this subsection without first filing a notice of intent to abandon and without an abandonment card, the well drilling contractor or single well licensee shall provide the following information in the Well Abandonment Completion Report:
1. The legal description of the land upon which the well was abandoned and the name and mailing address of the owner of the land.
  2. The legal description of the location of the well on the land.
  3. The depth, diameter and type of casing of the well prior to abandonment.
  4. The well registration number.
  5. The materials and methods used to abandon the well.
  6. The name and well drilling license number of the well drilling contractor or single well licensee who abandoned the well.
  7. The date of completion of the abandonment of the well.
  8. The reason for the abandonment.
  9. Such other information as the Director may require.
- G.** The abandonment of a well shall be accomplished through filling or sealing the well so as to prevent the well, including the annular space outside the casing, from being a channel allowing the vertical movement of water.
- H.** A well drilling contractor or single well licensee shall construct a surface seal for a well that does not penetrate an aquifer, as follows:
1. If the casing is removed from the top 20 feet of the well, a cement grout plug shall be set extending from two feet below the land surface to a minimum of 20 feet below the

land surface, and the well shall be backfilled above the top of the cement grout plug to the original land surface.

2. If the casing is not removed from the top 20 feet of the well, a cement grout plug shall be set extending from the top of the casing to a minimum of 20 feet below the land surface and the annular space outside the casing shall be filled with cement from the land surface to a minimum of 20 feet below the land surface.

**I.** In addition to the surface seal required in subsection (H):

1. A well penetrating a single aquifer system with no vertical flow components shall be filled with cement grout, concrete, bentonite drilling muds, clean sand with bentonite, or cuttings from the well.
2. A well penetrating a single or multiple aquifer system with vertical flow components shall be sealed with cement grout or a column of bentonite drilling mud of sufficient volume, density, and viscosity to prevent fluid communication between aquifers.

**J.** Materials containing organic or toxic matter shall not be used in the abandonment of a well.

**K.** The owner or operator of the well shall notify the Director in writing no later than 30 days after abandonment has been completed. The notification shall include the well owner's name, the location of the well, and the method of abandonment.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2). Amended by final rulemaking at 13 A.A.R. 3022, effective October 6, 2007 (Supp. 07-3).

**R12-15-817. Exploration Wells**

**A.** Notification. Prior to drilling one or more exploration wells, the well owner, lessee, or exploration firm shall file a notice of intention to drill on forms provided by the Director. If the notice of intention to drill is filed for the project as a whole, the drilling card shall be issued for the project as a whole.

**B.** Construction and abandonment.

1. If an exploration well which is to be left open for re-entry at a later date encounters groundwater, it shall be cased and capped in accordance with R12-15-811, R12-15-812, and R12-15-822. The minimal length of surface seal shall be either 20 feet, or five feet into the first encountered consolidated formation, whichever is less. If no groundwater is encountered, the well shall be cased, grouted and capped in such a manner so as to prevent contamination of the well bore from the surface.
2. Exploration wells not left open for re-entry shall be abandoned in accordance with R12-15-816.

**C.** Completion report. Within 30 days of project completion, the well owner, lessee, or exploration firm shall submit a project completion report on forms provided by the Director. The report shall include:

1. The exact number of wells drilled.
2. The depth to water encountered or detected, with reference to specific wells.
3. The abandonment method utilized, or construction details if completed for re-entry.
4. Any other information which the Director may require.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-818. Well Location**

Except for monitor wells and piezometer wells, no well shall be drilled within 100 feet of any septic tank system, sewage disposal area, landfill, hazardous waste facility, storage area of hazardous

materials or petroleum storage areas and tanks, unless authorized in writing by the Director.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-819. Use of Well as Disposal Site**

No well may be used as a storage or disposal site for sewage, toxic industrial waste, or other materials that may pollute the groundwater, except as authorized by the Arizona Department of Environmental Quality.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-820. Request for Variance**

- A.** If extraordinary or unusual conditions exist, a well drilling contractor or owner may request a variance from the provisions of this Article.
- B.** The request for variance shall be in writing and shall set forth the location of the well site, the reasons for the request, and the recommended requirements to be applied. The Director may approve the request only if the well drilling contractor or owner has clearly demonstrated that the variance will not adversely affect other water users or the local aquifers.
- C.** A variance shall not be effective until the well drilling contractor or owner receives from the Director a written approval of the variance and a new drilling card stamped "variance issued."

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-821. Special Requirements**

If the Director determines that the literal application of the minimum well construction requirements contained in this Article would not adequately protect the aquifer or other water users, the Director may require that further additional measures be taken, such as increasing the length of the surface seal or increasing the well's minimum distance from a potential source of contamination.

**Historical Note**

Adopted effective March 5, 1984 (Supp. 84-2). Amended effective June 18, 1990 (Supp. 90-2).

**R12-15-822. Capping of Open Wells**

- A.** The owner of an open well shall either install a cap on the well or abandon the well in accordance with R12-15-816. Within five days after capping the well, the owner of the well shall file with the Department a notice of well capping on a form approved by the Director which shall include the following information:
  1. The name and address of the well owner.
  2. The name and address of the person installing the cap.
  3. The well registration number.
  4. The legal description of the location of the well.
  5. The date the well was capped.
  6. The method of capping.
  7. The type and diameter of casing.
- B.** If no casing exists in an open well, or if the integrity of the existing casing is insufficient to allow installation of a cap, the well owner shall install a surface seal in accordance with R12-15-811(B) prior to capping.
- C.** The owner of a well on which a cap is installed shall make the cap tamper resistant by welding the cap to the top of the casing by the electric arc method of welding, except that the owner of a well may make the cap tamper resistant by securing the cap

to the top of the casing with a lock during temporary periods of well maintenance, modification or repair, not to exceed 30 days, or at any time if the well is a monitor well or piezometer well.

#### Historical Note

Adopted as an emergency effective March 2, 1989, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 89-1). Emergency expired. Readopted without change as an emergency effective June 2, 1989, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 89-2). Emergency expired. Readopted without change as an emergency effective September 5, 1989, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 89-3). Emergency expired. Readopted without change as an emergency effective December 1, 1989, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 89-4). Emergency expired. Readopted without change as an emergency effective March 23, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-1). Permanent rule adopted with changes effective June 18, 1990 (Supp. 90-2). Amended by final rulemaking at 13 A.A.R. 3022, effective October 6, 2007 (Supp. 07-3).

#### R12-15-823. Reserved

through

#### R12-15-849. Reserved

#### R12-15-850. Evaluation of Notices of Intention to Drill; Notification of Registered Site Locations; Vertical Cross-Contamination Evaluation

- A. The Director shall, upon receipt of a complete and correct notice of intention to drill form required under A.R.S. § 45-596, or upon receipt of an application for a permit under A.R.S. § 45-597 through 45-599, identify whether the proposed well will be drilled within a groundwater basin or sub-basin in which there exists a site listed on the registry established under A.R.S. § 49-287.01(D). If the proposed well is situated within such a groundwater basin or subbasin, the Director shall notify the applicant and the authorized well drilling contractor in writing of the existence of the site and shall enclose a map indicating the boundaries of all listed sites within the groundwater basin or subbasin. The notification letter shall include the name, address, and telephone number of a Department contact person, along with a reference to the provision in R12-15-851 that requires the applicant to notify the Department in advance of the date drilling of the well will commence. The Department shall also specify in the notification letter whether the applicant is subject to the requirements of R12-15-851.
- B. The Director shall, upon receipt of a complete and correct notice of intention to drill form required under A.R.S. § 45-596, or upon receipt of an application for a permit under A.R.S. § 45-597 through 45-599, identify whether the proposed well will be drilled within an area where existing or anticipated future groundwater contamination presents a risk of vertical cross-contamination, as defined in A.R.S. § 49-281(15). If the Director determines that the proposed well will be drilled in such an area, and if the Director finds that the requirements of R12-15-811 are insufficient to prevent the risk of vertical cross-contamination, the Director shall establish site-specific requirements pursuant to R12-15-812 and R12-15-821.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R.

469, effective January 3, 2000 (Supp. 00-1).

#### R12-15-851. Notification of Well Drilling Commencement

A well owner who has been issued a drilling card for a notice of intent to drill authorizing the drilling of a well located within a site listed on the registry established under A.R.S. § 49-287.01, shall provide written notice to the Director indicating the date drilling will commence. The well owner shall coordinate with the contracted well driller to ensure that the Department receives proper notification under this Section. This notification shall consist of a letter or facsimile transmission received by the Department at least 2 business days before drilling commences at the well site. The Department shall use notification letters required by R12-15-850(A) to inform well owners whether they are subject to the requirements of this Section.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 469, effective January 3, 2000 (Supp. 00-1).

#### R12-15-852. Notice of Well Inspection; Opportunity to Comment

- A. At least 30 days before the beginning of a well inspection under A.R.S. § 45-605(A), the Director shall notify in writing all potentially affected well owners of record within a community involvement area established under A.R.S. § 49-289.02 or within other areas that the Director has selected for inspection of wells that may be contributing to vertical cross-contamination. The notices shall include a map of the community involvement area, remedial site, or a subsection of either, that the Department intends to inspect, indicating the location of affected wells of record. The notice shall indicate the approximate date the inspection will start, the approximate duration of the inspection, an access agreement defining what specific activities will occur during a well inspection, and the name, address, and telephone number of a Department contact person.
- B. Once the Director has given notice of a well inspection under A.R.S. § 45-605(A), potentially affected well owners have 30 days from the date the letter is postmarked to comment on the proposed inspection. The Director, upon receiving a written request, may extend the comment period for a maximum of 30 additional days.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 469, effective January 3, 2000 (Supp. 00-1).

### ARTICLE 9. WATER MEASUREMENT

#### R12-15-901. Definitions

In addition to the definitions set forth in A.R.S. §§ 45-101 and 45-402, the following words and phrases shall have the following meanings, unless the context otherwise requires:

1. "Approved measuring device" means an instrument, approved by the Director pursuant to R12-15-903 or R12-15-909(A) which measures the volume or flow rate of water withdrawn, delivered, received, transported, recharged, stored, recovered, or used, and which measurements, when used with an approved measuring method, allow for accurate computation of a volume of water.
2. "Approved measuring method" means a procedure, approved by the Director in R12-15-903 or R12-15-909(A), which, when used with an approved measuring device, will accurately calculate a volume of water.
3. "Flow rate" or "discharge" means the volume of water, including any sediment or other solids that may be dis-

solved or mixed with it, which passes through a particular reference section in a unit of time.

4. "Measured system" means a system through which water passes for the purpose of withdrawal, delivery, receipt, transportation, recharge, storage, replenishment, recovery or use.
5. "Responsible party" means an irrigation district or a person required by A.R.S. Title 45 or by a permit, rule, or order issued pursuant to A.R.S. Title 45, to use a measuring device or method approved by the Director.

#### Historical Note

Adopted effective December 27, 1982 (Supp. 82-6).  
Amended effective June 15, 1995 (Supp. 95-2). Amended  
to correct typographical error under A.A.C. R1-1-109  
(Supp. 01-2).

#### R12-15-902. Installation of Approved Measuring Devices

- A. A responsible party shall install an approved measuring device to monitor the volume of water withdrawn, delivered, transported, recharged, stored, replenished, recovered, and used.
- B. A responsible party shall install and use a sufficient number of approved measuring devices to allow for the separate monitoring and reporting of the volume of water passing through the measured system pursuant to the following categories of rights:
  1. Irrigation grandfathered rights,
  2. Non-irrigation grandfathered rights,
  3. Service area rights,
  4. Groundwater withdrawal permits, and
  5. Recovery well permits or water storage permits.

This subsection does not require separate measuring devices for rights within each category unless otherwise required by A.R.S. Title 45, a permit, rule, or order pursuant to that Title.
- C. An approved measuring device which measures groundwater withdrawals shall be installed as close to the wellhead as is practical, consistent with the manufacturer's instructions. An approved measuring device which measures another point in the measured system shall be installed as close as is practical to the point of delivery, receipt, transportation, recharge, storage, replenishment, recovery, or use which the device is intended to measure, consistent with the manufacturer's instructions.

#### Historical Note

Adopted effective December 27, 1982 (Supp. 82-6).  
Amended effective June 15, 1995 (Supp. 95-2). Amended  
to correct typographical error under A.A.C. R1-1-109  
(Supp. 01-2).

#### R12-15-903. Approved Water Measuring Devices and Methods

- A. Any measuring device is approved by the Director if it is installed, maintained, and used in accordance with the manufacturer's recommendations, and if it meets the accuracy requirements set forth in R12-15-905(A).
- B. An approved measuring device shall be used with an approved measuring method set forth in R12-15-903(C) or an alternative measuring method approved by the Director as provided in R12-15-909(A).
- C. The following water measuring methods are approved by the Director:
  1. Totalizing measuring method: This method requires an approved measuring device which continuously records the volume of water passing through the measured system;
  2. Electrical consumption measuring method: This method requires measurements of either pipeflow rates or open-

channel flow rates used in combination with electrical energy records;

3. Natural gas consumption measuring method: This method requires measurements of either pipe flow rates or open channel flow rates used in combination with natural gas energy records;
4. Hour meter measuring method: This method requires measurements of either pipe flow rates or open-channel flow rates used in combination with hour meter readings;
5. Elapsed time of flow method: This method requires measurements of flow rates used in combination with elapsed time of the flow. This method may be used only by a responsible party who receives water from an open channel or by a person or entity who delivers water in an open channel to one or more grandfathered rightholders or permit holders, if it is not possible to use the electrical or gas consumption measurement methods or hour meter measuring method.

#### Historical Note

Adopted effective December 27, 1982 (Supp. 82-6).  
Amended effective June 15, 1995 (Supp. 95-2).

#### R12-15-904. Water Measuring Method Reporting Requirements

- A. A responsible party using one of the water measuring methods described in R12-15-903 shall file, with the annual report required by A.R.S. Title 45 and on a form prescribed by the Director, the following information, unless that information has not changed from that submitted in the annual report filed in the previous calendar year.
  1. The approved measuring method used;
  2. The type of approved measuring device used;
  3. The make, model, and size of the approved measuring device used.
- B. Except as provided in R12-15-904(B)(5) and R12-15-909(B) and (D), a responsible party shall file with the annual report the information required in subsection (A) of this Section and the following information on a form prescribed by the Director:
  1. Totalizing measuring method:
    - a. The initial totalizing meter reading for the reporting year taken prior to the first use of the measured system during the reporting year;
    - b. The end totalizing meter reading for the year taken subsequently to the last use of the measured system during the reporting year;
    - c. The units in which the water is measured;
    - d. Whether the power meter serves uses other than the pump motor or engine;
    - e. An estimate of the amount of any water passing through the measured system during measuring device malfunctions;
    - f. If the well is in operation for more than a 30-day period, the results of a minimum of two flow-rate measurements per reporting year taken under normal system operating conditions. The responsible party shall not submit the results of the flow-rate measurements with the annual report unless a meter malfunction continues longer than 72 hours during the reporting year;
    - g. The installation or overhaul date of the totalizing meter; and
    - h. The name of the energy company supplying energy to the responsible party's measured system, its power account number, meter number, total energy

## Department of Water Resources

- consumption for the year, and the type of energy unit.
2. Electrical consumption measuring method:
    - a. The results of a minimum of two flow-rate measurements per reporting year taken at least 30 days apart and under normal system operating conditions or, if the measured system is used during a single period of 30 days or less during the year, the result of one flow-rate measurement taken during that single period in that year under normal system operating conditions;
    - b. The dates of the measurements;
    - c. The discharges in gallons per minute;
    - d. The time, in seconds, of ten cycles of the electric meter disk, power indicator pulse, or an alternative measurement, provided that the alternative means of measurement is approved in advance by the Director;
    - e. The inside diameter of the discharge pipe;
    - f. The multiplier ( $K_T$ ) and disk constant ( $K_h$ ) of the electric meter; and
    - g. The name of the energy company supplying energy to the responsible party's measured system, its power account number, meter number, total energy consumption for the year, and the type of energy unit.
  3. Natural gas consumption measuring method:
    - a. The results of a minimum of two flow-rate measurements per reporting year taken at least 30 days apart and under normal system operating conditions or, if the measured system is used during a single period of 30 days or less during the year, the result of one flow-rate measurement taken during that single period in that year under normal system operating conditions;
    - b. The dates of the measurements;
    - c. The discharges in gallons per minute;
    - d. The amounts of gas per second in cubic feet indicated by the gas meter;
    - e. The billing factors (F);
    - f. The inside diameter of the discharge pipe; and
    - g. The name of the energy company supplying energy to the responsible party's measured system, its power account number, meter number, total energy consumption for the year, and the type of energy unit.
  4. Hour meter measuring method:
    - a. The results of a minimum of two flow-rate measurements per reporting year taken at least 30 days apart and under normal system operating conditions or, if the measured system is used during a single period of 30 days or less during the year, the result of one flow-rate measurement taken during that single period in that year under normal system operating conditions;
    - b. The dates of the measurements;
    - c. The discharges in gallons per minute;
    - d. The initial hour meter reading for the reporting year taken prior to the first use of the measured system during the reporting year;
    - e. The end hour meter reading taken subsequently to the last use of the measured system during the reporting year;
    - f. Whether the energy meter serves uses other than the pump motor or engine;
    - g. The installation or overhaul date of the hour meter; and
    - h. The name of the energy company supplying energy to the responsible party's measured system, its power account number, meter number, total energy consumption for the year, and the type of energy unit.
  5. Elapsed time of flow measuring method: A responsible party using this measuring method shall not be required to submit the following information with the annual report but instead shall record and retain it for three years after the reporting year.
    - a. The responsible party or agent shall measure and record an initial flow rate taken at the start of flow for each delivery of water;
    - b. If the flow rate continues for more than eight hours, a subsequent measured flow-rate measurement shall be taken. If any subsequently measured flow-rate differs by more than 10% from the initial flow rate, and the delivery is not adjusted to conform with the initial flow rate, the responsible party or agent shall record the subsequent flow rate;
    - c. The time the flow begins and the time the flow ends for each delivery of water; and
    - d. The dates of the measurements.
  - C. A responsible party or person or entity who uses an approved measuring method or an approved alternative water measurement method shall save the records required by subsections (A) and (B) of this Section for three years after the reporting year.

**Historical Note**

Adopted effective December 27, 1982 (Supp. 82-6). Former Section R12-15-904 renumbered to R12-15-905, new Section adopted effective June 15, 1995 (Supp. 95-2). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

**R12-15-905. Accuracy of Approved Measuring Devices**

- A. A responsible party shall install, maintain, and use an approved measuring device and method in a manner which will ensure that its measurement error does not exceed 10% of the actual flow rate.
- B. All measured systems shall be installed or constructed and thereafter maintained so as to allow the Director, using another measuring device, to check readily the accuracy of the measuring device utilized by the responsible party.

**Historical Note**

Adopted effective December 27, 1982 (Supp. 82-6). Former Section R12-15-905 renumbered to R15-15-906, new Section R12-15-905 renumbered from R12-15-904 and amended effective June 15, 1995 (Supp. 95-2).

**R12-15-906. Repair and Replacement of Approved Measuring Devices**

If an approved measuring device fails to perform its designated function for more than 72 hours, the responsible party shall notify the Director of the failure, in writing, within seven calendar days after the discovery of the failure of the device. The reason for such failure shall be stated, as well as the estimated date of return to service of the device. If the malfunction is discovered by the Director and the malfunction does not appear to be the result of an attempt to render the device inaccurate, the Director shall notify the responsible party of the malfunction. The responsible party shall return the measuring device to full service within 30 days of either original notice by the responsible party to the Director or by the Director to the responsible party, unless repair or replacement service or parts

are not available. In such case, the responsible party shall notify the Director of the delay within seven days and the reasons for it. The responsible party shall take corrective action in such cases as soon as practical. In all cases, the responsible party shall notify the Director within seven days when the measuring device is returned to full service and shall submit on a form prescribed by the Director estimates of the volume of water, if any, passing through the measured system during the period the measuring device was out of service and a description of the method used to calculate the estimates.

#### Historical Note

Section R12-15-906 renumbered from R12-15-905 and amended effective June 15, 1995 (Supp. 95-2).

#### R12-15-907. Calculation of Irrigation Water Deliveries

If one or more irrigation grandfathered rights receive water by a common distribution system where water is measured with an approved device or method at the point of delivery to the common distribution system, but not at a point of delivery to each irrigation grandfathered right, each irrigation grandfathered rightholder or agent shall report the water used by either of the following methods:

1. Estimate the amount of water used based on a pro rata share of the acres irrigated, or
2. Estimate the amount of water used based on a combination of the pro rata share of the acres irrigated and the consumptive use of each crop grown.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R12-15-908. Measurement of Water by One Person on Behalf of Another

A responsible party shall be liable for any fines, penalties, or other sanctions resulting from the installation, monitoring, use, or accuracy of any measuring device, method, or recordkeeping, notwithstanding that the installation, monitoring, use, or recordkeeping may have been done by an agent of the responsible party.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R12-15-909. Alternative Water Measuring Devices, Methods, and Reporting

- A. A responsible party may use an alternative water measuring device or method that differs from those described in R12-15-903 provided the device or method is approved in advance by the Director. The Director shall approve an alternative water measuring device or method if the device meets the requirements of R12-15-905. The Director may require from the responsible party such information as may be necessary to demonstrate that the alternative device or method meets the requirements of R12-15-905.
- B. Responsible parties may substitute equivalent information for the information required on the annual report form or use reporting formats that differ from that required in R12-15-904, provided the substituted information or format is approved in advance by the Director.
- C. Responsible parties may use estimation methods that differ from those described in R12-15-907 provided they are approved in advance by the Director.
- D. A municipal provider is exempted from the reporting requirements under R12-15-904 and the provisions under R12-15-906 pertaining to notification to the Director of measuring device malfunctions regarding metered service connections, unless required to report by A.R.S. Title 45 or by a permit, rule, or order issued pursuant to A.R.S. Title 45.
- E. Municipal providers and irrigation districts may notify the Director of measuring device malfunctions at the time of filing

the annual report and in a manner that differs from the requirements of R12-15-906, provided the municipal provider or irrigation district implements a schedule of regular maintenance of measuring devices, repairs or replaces malfunctioning measuring devices within seven days of discovery of the malfunction, and the alternative notification is approved in advance by the Director.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

### ARTICLE 10. REPORTING REQUIREMENTS FOR ANNUAL REPORTS, ANNUAL ACCOUNTS, OPERATING FLEXIBILITY ACCOUNTS, AND CONVEYANCES OF GROUNDWATER RIGHTS

#### R12-15-1001. Definitions

In addition to the definitions in A.R.S. §§ 45-101 and 45-402, the following words and phrases in this Article have the following meanings, unless the context otherwise requires:

1. "Annual account" means an accounting of water required to be filed pursuant to A.R.S. § 45-468.
2. "Annual report" means an annual report of water withdrawn, delivered, received, transported, recharged, stored, recovered, replenished or used as required by A.R.S. §§ 45-437, 45-467, 45-632, 45-875.01, 45-876.01, 45-877.01, 45-878.01 or 45-1004.
3. "Central Arizona project water" means Colorado River water delivered through the facilities of the central Arizona project, and surface water from any other source conserved and developed by dams and reservoirs in the central Arizona project and lawfully delivered by the United States or a multi-county conservation district.
4. "Decreed or appropriative surface water" means surface water which is delivered or used pursuant to a decreed or appropriative water right, except any such water which is included in central Arizona project water.
5. "Farm" means an area of irrigated land under the same ownership as defined in A.R.S. § 45-402, including the area of land described in a certificate of irrigation grandfathered right, as well as contiguous land that the owner is legally entitled to irrigate only with decreed or appropriative surface water.
6. "Maximum annual groundwater allotment" means the quantity of water in acre-feet obtained by multiplying the number of water duty acres for a farm by the current irrigation water duty for the farm unit.
7. "Normal flow" means water delivered or used pursuant to a right to appropriate an unstored, natural flow of surface water.
8. "Operating flexibility account" means an accounting of water use pursuant to an irrigation grandfathered right as provided in A.R.S. § 45-467.
9. "Responsible party" means a person required by law to file an annual account or annual report.
10. "Spillwater" means surface water, other than Colorado River water, released for beneficial use from storage, diversion, or distribution facilities to avoid spilling that would otherwise occur due to uncontrolled surface water inflows that exceed facility capacity and to which one of the following applies:
  - a. The water is released from the facility under written criteria for releasing water to avoid spilling that have been approved in writing by the Director.
  - b. The water is released from the facility because an unreasonable risk exists that the storage capacity of the facility will be exceeded within the next 30 days because the facility is near capacity and either the

inflow to the facility or the forecast runoff into the facility is equal to or greater than the quantity of water ordered from the facility.

- c. The water is released from the facility because an unreasonable risk exists that the storage capacity of the facility will be exceeded more than 30 days in the future because the forecast runoff into the facility exceeds current unused storage capacity and projected water demand during the forecast period, provided that the Director has made a written finding before the release that the forecast is reasonable.
- 11. "Surface water right acre" means land to which the owner is legally entitled to apply decreed or appropriative surface water.
- 12. "Tailwater" means water which, after having been applied to a farm for irrigation purposes,
  - a. Is subsequently used for the irrigation of a different farm, without having entered the distribution system of a city, town, private water company or irrigation district, or
  - b. Is delivered to an irrigation district in accordance with R12-15-1010. Such water, once having entered the distribution system of the irrigation district, loses its characterization as tailwater.
- 13. "Water deliverer" means a city, town, private water company or irrigation district delivering a combination of groundwater and any other type of water for irrigation purposes.

#### Historical Note

Adopted effective December 27, 1982 (Supp. 82-6). Section R12-15-1001 renumbered to R12-15-1003, new Section R12-15-1001 adopted effective December 12, 1990 (Supp. 90-4). Amended to correct typographical error under A.A.C. R1-1-109 (Supp. 01-2). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### R12-15-1002. Form of Annual Account or Annual Report

- A. A person filing an annual account or an annual report shall do so on a form prescribed by the Director, unless the person has requested and received the Director's prior written approval to use an alternative form.
- B. A person may file both an annual account and an annual report in one document. A person required to file an annual account shall designate in the annual account whether the annual account is being filed also as an annual report.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).

#### R12-15-1003. Accuracy of Annual Reports

The quantity of water a responsible party reports in an annual report as having been withdrawn, delivered, received, transported, recharged, replenished, stored, recovered, or used during a year shall not deviate from the quantity of water actually withdrawn, delivered, received, transported, recharged, replenished, stored, recovered, or used by the responsible party during the year unless both of the following apply:

- 1. The deviation is 10 percent or less.
- 2. The deviation is not the result of an intentional act of misrepresentation by the responsible party.

#### Historical Note

Section R12-15-1003 renumbered from R12-15-1001 effective December 12, 1990 (Supp. 90-4). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4,

2006 (Supp. 05-4).

#### R12-15-1004. Annual Reports Filed on Behalf of a Responsible Party

- A. A responsible party is liable for any fines, penalties, or other sanctions resulting from or attributable to the filing or content of an annual report filed on behalf of the responsible party by an irrigation district pursuant to A.R.S. § 45-632, or by another person in a form acceptable to the Director.
- B. If a responsible party has not filed an annual report for a calendar year, and the Department receives an annual report for that calendar year purportedly filed on behalf of the responsible party by an irrigation district pursuant to A.R.S. § 45-632, or by another person in a form acceptable to the Director, there is a rebuttable presumption that the annual report was filed with the responsible party's knowledge, consent, and authorization.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).

Amended to correct typographical error under A.A.C.

R1-1-109 (Supp. 01-2). Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### R12-15-1005. Management Plan Monitoring and Reporting Requirements

A responsible party who is required by a provision of a management plan to comply with monitoring and reporting requirements shall comply with such requirements and shall include all such information in an annual account or annual report.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).

#### R12-15-1006. Reporting Requirements for Holders of Recovery Well Permits

A responsible party recovering water during a year pursuant to a recovery well permit shall include in the annual report required by A.R.S. § 45-875.01 the names of any persons, other than non-irrigation customers of cities, towns, private water companies and irrigation districts, to whom the responsible party delivered the recovered water during the year, the quantity of recovered water delivered to each person named, and the uses to which the recovered water was applied. If the recovered water included commingled groundwater, decreed or appropriative surface water other than spillwater, central Arizona project water, effluent or spillwater, the responsible party shall include in the annual report an estimate of the quantity of each type of water delivered to each person named in the annual report or put to a specific use by the responsible party.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).

Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### R12-15-1007. Reporting Requirements for Annual Account

A person required to file an annual account pursuant to A.R.S. § 45-468 shall account for water provided to the following classes of users:

- 1. Cities and towns,
- 2. Private water companies,
- 3. Irrigation districts,
- 4. Dairies,
- 5. Metal mining facilities,
- 6. Cattle feed lots,
- 7. Turf-related facilities,
- 8. Sand and gravel facilities,
- 9. Electrical power generation facilities,
- 10. Other industrial users.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).

**R12-15-1008. Information Required to Maintain an Operating Flexibility Account**

- A.** A responsible party who withdraws, receives, or uses groundwater during a calendar year pursuant to an irrigation grandfathered right, including any in lieu water received pursuant to a groundwater savings facility permit issued pursuant to A.R.S. § 45-812.01, shall include the following information for the calendar year in an annual report filed pursuant to A.R.S. § 45-467 or 45-632:
1. The quantity of groundwater withdrawn from each well.
  2. The quantity of groundwater withdrawn and delivered to another person for irrigation purposes.
  3. The quantity of groundwater received from a city, town, private water company, or irrigation district, including any in lieu water received pursuant to a groundwater savings facility permit issued pursuant to A.R.S. § 45-812.01.
  4. The quantity of groundwater received from a person other than a city, town, private water company, or irrigation district, including any in lieu water received pursuant to a groundwater savings facility permit issued pursuant to A.R.S. § 45-812.01.
  5. The quantity of effluent received.
  6. The quantity of decreed or appropriative surface water received, other than normal flow and spillwater.
  7. The quantity of normal flow received.
  8. The quantity of spillwater received.
  9. The quantity of tailwater used.
  10. The quantity of tailwater delivered in accordance with the provisions of R12-15-1010(A), and the farm or irrigation district to which the tailwater was delivered.
  11. The quantity of central Arizona project water received.
  12. The quantity of any surface water received and not accounted for pursuant to subsections (6) through (11) of this subsection.
  13. The number of surface water right acres in the farm to which the irrigation grandfathered right is appurtenant.
  14. The quantity of water used for the legal irrigation of acres in the farm to which irrigation grandfathered rights are not appurtenant. If the responsible party omits this information, the Director shall presume that the total amount of water received or used for the irrigation of the farm was applied to acres to which irrigation grandfathered rights are appurtenant.
  15. Any other information the Director may reasonably require to accomplish the management goals of the applicable active management area.
- B.** A water deliverer shall include the following information for an accounting period in an annual account filed pursuant to A.R.S. § 45-468:
1. The quantity of groundwater delivered to each farm, including any in lieu water delivered pursuant to a groundwater savings facility permit issued pursuant to A.R.S. § 45-812.01.
  2. The quantity of normal flow delivered to each farm.
  3. The quantity of spillwater delivered to each farm.
  4. The quantity of decreed or appropriative surface water, other than normal flow and spillwater, delivered to each farm.
  5. The quantity of central Arizona project water delivered to each farm.
  6. The quantity of decreed or appropriative surface water, other than normal flow and spillwater, delivered for use

within the service area of the water deliverer, including all farm and non-farm deliveries.

7. The number of surface water right acres within the service area of the water deliverer.
8. The quantity of effluent delivered to each farm.
9. Any other information the Director may reasonably require to accomplish the purposes of A.R.S. § 45-468.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).

Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

**R12-15-1009. Credits to Operating Flexibility Account**

- A.** Except as provided in subsection (B) of this Section and in R12-15-1010, if the total amount of water from all sources other than spillwater used by a farm for irrigation purposes in a calendar year is less than the farm's maximum annual groundwater allotment for the year, the Director shall register the difference as a credit to the farm's operating flexibility account.
- B.** If a farm is within the service area of a water deliverer, the Director shall reduce the credit as calculated pursuant to subsection (A) of this Section by an amount equal to the difference between the farm's pro rata share of the total quantity of decreed or appropriative surface water, other than normal flow or spillwater, delivered by the water deliverer during the year for use within its service area, and the quantity of water actually received by the farm during the year. The Director shall determine the farm's pro rata share by dividing the number of surface water right acres in the farm that are within the service area of the water deliverer by the total number of surface water right acres within the service area of the water deliverer, and multiplying the quotient by the total quantity of decreed or appropriative surface water, other than normal flow or spillwater, delivered by the water deliverer during the year for use within its service area.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).

Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

**R12-15-1010. Operating Flexibility Account; Tailwater**

- A.** When calculating credits or debits to a farm's operating flexibility account for a year, the Director shall exclude from the total amount of water used on the farm during that year the amount of any tailwater that originated on the farm and that was delivered from the farm to another farm or to an irrigation district for irrigation purposes during the year if all of the following apply:
1. Prior to January 1 of the year in which the deliveries of tailwater take place, the Director approves a written plan to measure and record the tailwater deliveries. The plan shall include:
    - a. The installation and use of a totalizing water measuring device that will record tailwater deliveries with no greater than a 10 percent margin of error.
    - b. Procedures for keeping accurate records of the tailwater deliveries.
    - c. A description of how the tailwater will be delivered.
    - d. An identification of the farm or irrigation district to which the tailwater will be delivered.
  2. The person has measured, recorded, and delivered the tailwater in accordance with the plan approved under subsection (A)(1) of this Section.
  3. The tailwater was delivered directly from the farm on which it originated to:

## Department of Water Resources

- a. A specified farm that used the tailwater for the legal irrigation of irrigation acres or surface water right acres on that farm, or
  - b. A specified irrigation district that delivered the tailwater for the legal irrigation of irrigation acres or surface water right acres within that district.
- B. A person who delivers tailwater in accordance with subsection (A) of this Section, and a person who directly receives and uses the tailwater pursuant to subsection (A)(3)(a) of this Section, shall account for and report the tailwater as if it were comprised of a mixture of groundwater, decreed and appropriative surface water other than normal flow, central Arizona project water, spillwater, other surface water, and effluent, as applicable, in the same proportions as those types of water comprise the total amount of water other than normal flow received or withdrawn for irrigation use during the calendar year on the farm on which the tailwater originated.
- C. A person who uses tailwater that has not been delivered and accounted for as provided in subsections (A) and (B) of this Section may credit against the person's use of groundwater in a calendar year the amount of the tailwater used during the calendar year if the use of such tailwater would cause a debit to be incurred. The credit shall be applied only against the person's operating flexibility account debits that otherwise would have been incurred that year and shall not be used to discharge debits from prior years or accumulate credits for future years. For purposes of calculating credits to the person's operating flexibility account, the Director shall treat tailwater as groundwater, unless reported otherwise according to its source.
- D. An irrigation district that receives tailwater pursuant to subsection (A)(3)(b) shall account for the water in the same manner as other water in the district's distribution system.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).  
Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

**R12-15-1011. Statement of Operating Flexibility Account**

- A. The Director shall annually issue to each owner or user of an irrigation grandfathered right for which a current annual report has been filed a statement of the operating flexibility account setting forth the status of the operating flexibility account for the farm, based on the information submitted in the annual report filed for the right.
- B. Upon a motion or on the initiative of the Director, the Director may amend a statement of operating flexibility account at any time to correct clerical mistakes or to adjust the balance of the account based on information submitted in an amended or late annual report. The Director shall give written notice of any amendments made pursuant to this subsection to the person to whom the statement of operating flexibility account was issued.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).  
Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

**R12-15-1012. Rule of Construction**

Nothing in A.A.C. R12-15-1001 through R12-15-1011 shall be construed to determine the legality of any water use for which an accounting is required under these rules.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).

**R12-15-1013. Retention of Records for Annual Accounts and Annual Reports**

The responsible party shall keep and maintain, for at least three calendar years following the filing of an annual account or an annual report, all records which may be necessary to verify the information and data contained therein.

**Historical Note**

Adopted effective December 12, 1990 (Supp. 90-4).

**R12-15-1014. Late Filing or Payment of Fees; Extension Penalties**

- A. An annual account, an annual report, or a request for extension pursuant to subsection (E) of this rule shall be deemed to be filed at the time a complete annual account, a complete annual report or a request for extension is hand-delivered to any Department office, or at the time the envelope in which it is mailed is postmarked.
- B. Except as provided in subsection (C) of this Section, groundwater withdrawal fees and long-term storage credit recovery fees are deemed paid at the time the fees are hand-delivered to any Department office, or at the time the envelope in which they are mailed is postmarked.
- C. If any groundwater withdrawal fees or long-term storage credit recovery fees are paid with a negotiable instrument that is not honored and paid upon the Department's initial demand, the fees are deemed paid at the time the Department actually receives the fees in cash or when the negotiable instrument is honored and paid to the Department.
- D. If an annual account or an annual report filed on or before the date required by the applicable statute is found by the Director to be incomplete, the Director shall notify the responsible party of the inadequacies and allow the responsible party 30 days from the date of the notice to provide the missing information in a form prescribed by the Director. If the responsible party does not provide the missing information within 30 days from the date of the notice, late penalties under A.R.S. §§ 45-437, 45-632, 45-875.01, 45-876.01, 45-877.01, 45-878.01 or 45-1004 shall begin to accrue on the 31st day following the date of the notice. The Director shall not recommend to a court, pursuant to A.R.S. §§ 45-634, 45-635, 45-881.01, 45-882.01, 45-1062 or 45-1063, that civil penalties be imposed through the first 30 days following the date of the notice. However, if the inadequacy included the failure to pay all groundwater withdrawal fees due or all long-term storage credit recovery fees due, late penalties under A.R.S. §§ 45-614 or 45-874.01 shall begin to accrue on April 1, except as provided in subsection (E) of this Section.
- E. A responsible party required to file an annual account or annual report for a year may request a 30-day extension of the first day of accrual of the late penalties under A.R.S. §§ 45-437, 45-614, 45-632, 45-874.01, 45-875.01, 45-876.01, 45-877.01, 45-878.01 or 45-1004 and of the civil penalties that the Director may recommend that a court impose pursuant to A.R.S. §§ 45-634, 45-635, 45-881.01, 45-882.01, 45-1062 or 45-1063. The request shall be filed no later than the date the annual account or annual report is required to be filed under the applicable statute. The Director shall grant a request for a 30-day extension if good cause is shown. If the Director grants the request, the late penalties and civil penalties shall begin to accrue on the first day after the 30-day extension period, except that if the Director finds that the person making the request presented false or misleading information to the Director and the Director relied on that information in granting the request, the late penalties and civil penalties shall begin to accrue as if the request was not granted. The Director shall not grant an extension to a responsible party who was granted an extension in the preceding calendar year and who subsequently failed to file a complete annual account or annual

report and pay all groundwater withdrawal fees and all long-term storage credit recovery fees due within the 30-day extension period.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).  
Amended by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### **R12-15-1015. Reporting Requirements for Conveyances of Grandfathered Rights and Groundwater Withdrawal Permits**

- A. A person who is required by A.R.S. § 45-482 to notify the Director of a conveyance of a grandfathered right shall file a notice of conveyance, on a form prescribed by the Director, within 30 days of the conveyance. All parties to the conveyance may use a single form for the required notice. Except provided in subsection (B) of this rule, the notice of conveyance shall include an accounting of the amount of water withdrawn or received pursuant to that grandfathered right from January 1 to the date of conveyance for that calendar year.
- B. If the person to whom a grandfathered right is conveyed is unable, because of extraordinary circumstances and good cause shown, to perform the accounting otherwise required by subsection (A) of this rule, the Director may waive the requirement for that person.
- C. If a person, including a person who is granted a waiver pursuant to subsection (B) of this rule, fails to include the required accounting in a timely filed notice of conveyance pursuant to subsection (A) of this rule, the Director shall determine the amount of groundwater withdrawn or received pursuant to the grandfathered right from January 1 to the date of conveyance for that calendar year. Such a person shall bear the burden, in any subsequent administrative or judicial proceeding, of establishing by clear and convincing evidence that the Director's determination was incorrect.
- D. A person requesting the Director's approval of a proposed conveyance of a groundwater withdrawal permit pursuant to A.R.S. § 45-520(B) shall include with such request the quantity of groundwater withdrawn pursuant to the groundwater withdrawal permit for that calendar year and all other information required to be submitted pursuant to A.R.S. § 45-632.

#### Historical Note

Adopted effective December 12, 1990 (Supp. 90-4).

#### **R12-15-1016. Spillwater Reporting by Water Deliverers**

A water deliverer that delivers spillwater during a year shall include the following information in the annual account or annual report submitted by the water deliverer for that year:

- 1. The total quantity of spillwater delivered for non-irrigation uses during the year.
- 2. The total quantity of spillwater delivered for irrigation uses during the year.
- 3. Any other information the Director may reasonably require to determine whether the water qualifies as spillwater under R12-15-1001(10).

#### Historical Note

New Section made by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

#### **R12-15-1017. Maintenance and Filing of Annual Reports Required by A.R.S. § 45-343**

A community water system required to file an annual report under A.R.S. § 45-343 shall maintain the report on a calendar year basis and shall file the report with the Director no later than June 1 of each year for the preceding calendar year.

#### Historical Note

New Section made by final rulemaking at 11 A.A.R. 5395, effective February 4, 2006 (Supp. 05-4).

### **ARTICLE 11. INSPECTIONS AND AUDITS**

#### **R12-15-1101. Inspections**

- A. For the purpose of this rule, "inspection" means an entry by the Director at reasonable times onto private or public property for any of the following purposes:
  - 1. To obtain factual data or access to records required to be kept under A.R.S. §§ 45-632, 45-879.01, or 45-1004.
  - 2. To inspect a well or another facility for the withdrawal, transportation, use, measurement, or recharge of groundwater under A.R.S. § 45-633.
  - 3. To inspect a facility that is used for the purpose of water storage, stored water recovery, or stored water use under A.R.S. § 45-880.01(A).
  - 4. To inspect a body of water under A.R.S. § 45-135 or to ascertain compliance with A.R.S. Title 45, Chapter 1, Article 3.
  - 5. To inspect or to obtain factual data or access to records pursuant to any Section of A.R.S. Title 45 that requires the Director to adopt rules for conducting inspections, examining records, and obtaining warrants.
  - 6. To inspect facilities used for the withdrawal, diversion, or use of water pursuant to a water exchange under A.R.S. § 45-1061.
- B. Not less than seven days prior to an inspection, the Director shall mail notice of the inspection by first class letter to the owner, manager or occupant of the property. The notice shall include the statutory authorization and purpose for the inspection. The notice shall specify a date and time certain or a seven-day period within which the inspection may take place. If a request is made before the seven-day period, the Director shall schedule the inspection for a time certain within the seven-day period to allow an opportunity for a representative of the property to be present at the inspection. The notice shall include the name and telephone number of a Department employee who may be contacted to arrange such an appointment.
- C. Whenever practical, Department employees shall minimize disruptions to on-going operations caused by an inspection.
- D. If the property is controlled or secured against entry at the time specified in the notice of inspection but consent to the inspection was not denied, the Director shall give a second notice in the manner prescribed in subsection (B) before seeking a search warrant or its equivalent. The second notice shall request that a representative of the property be present at the inspection to accompany Department personnel.
- E. If the Director gives notice of an inspection and is not permitted to conduct an inspection, the Director may apply for and obtain a search warrant or its equivalent.
- F. Notice of inspection shall not be required under subsections (B) and (D) of this rule if the Director reasonably believes that notice would frustrate the enforcement of A.R.S. Title 45, or where entry is sought for the sole purpose of inspecting water measuring devices required pursuant to A.R.S. § 45-604.
- G. The Director shall mail a copy of the report of the inspection either to the person to whom the notice of inspection was directed, or to the owner, manager or occupant of the property if no notice of inspection was given. The report shall include the date of the inspection and a short summary of the findings. If no notice was given, the report shall include an explanation of the reason for determining that notice would not be given, unless providing the explanation would frustrate enforcement of A.R.S. Title 45. An aggrieved person may file with the

## Department of Water Resources

Director written comments on the report within 30 days after the report is mailed.

- H. The owner, manager or occupant of the property may waive the provisions for notice contained in this rule.
- I. The Director shall comply with the requirements of A.R.S. § 41-1009 when conducting inspections under this Section.

**Historical Note**

Adopted effective August 31, 1992 (Supp. 92-3).  
Amended effective July 22, 1994 (Supp. 94-3). Amended  
by final rulemaking at 11 A.A.R. 5395, effective  
February 4, 2006 (Supp. 05-4).

**R12-15-1102. Audits**

- A. For the purpose of this rule, “representative” means
  - 1. An officer or director of a corporation subject to the audit,
  - 2. A general partner of a partnership subject to the audit, or
  - 3. A person who appears at an audit and produces a signed authorization to act on behalf of the person subject to the audit.
- B. This rule applies to audits conducted pursuant to A.R.S. §§ 45-633(C), 45-880.01, and any other Section of A.R.S. Title 45 that authorizes the Director to require a person to appear at the Director’s office and produce records and information and that also requires the Director to adopt rules for conducting inspections, examining records, and obtaining warrants.
- C. No less than 20 days prior to an audit, the Director shall mail notice of the audit by first class letter to the person that is the subject of the audit. The notice shall state the date, time and place of the audit. The notice shall specify the records or information which the person must produce. The notice shall also include the statutory authorization and purpose for the audit and the name and telephone number of a Department employee who may be contacted for further information. The audit shall be held at the Department’s offices, unless the Director grants a request to have the audit conducted at a different location.
- D. The person subject to the audit or a representative shall appear at the scheduled time and shall produce the records and information specified in the notice. The person subject to the audit or a representative may make one request to reschedule the audit, which the Department shall grant if practicable.
- E. The Director shall mail a copy of the report of the audit to the person subject to the audit. An aggrieved person may file with the Director written comments on the report within 30 days after the report is mailed.
- F. The person subject to the audit may waive the provisions for notice contained in this rule.

**Historical Note**

Adopted effective August 31, 1992 (Supp. 92-3).  
Amended effective July 22, 1994 (Supp. 94-3).

**ARTICLE 12. DAM SAFETY PROCEDURES****R12-15-1201. Applicability**

- A. This Article applies to any artificial barrier meeting the specifications of A.R.S. § 45-1201(1) as interpreted by R12-15-1204. This Article applies to an application for the construction of a dam and reservoir; an application to reconstruct, repair, alter, enlarge, breach, or remove an existing dam and reservoir, including a breached or damaged dam; operation and maintenance of an existing dam and reservoir; and enforcement. A structure identified in R12-15-1203 is exempt from this Article.
- B. This Article is applicable to any dam regardless of hazard potential classification, with the following exceptions:

1. R12-15-1208, R12-15-1209, R12-15-1213, R12-15-1221, R12-15-1225, and R12-15-1226 apply only to a dam classified as a high or significant hazard potential dam.
2. R12-15-1210 applies only to a dam classified as a low hazard potential dam. A low hazard potential dam is exempt from R12-15-1208, R12-15-1209, R12-15-1211, R12-15-1213, R12-15-1221, R12-15-1225, and R12-15-1226.
3. R12-15-1211 applies only to a dam classified as a very low hazard potential dam. A very low hazard potential dam is exempt from R12-15-1208, R12-15-1209, R12-15-1210, R12-15-1212, R12-15-1213, R12-15-1215, R12-15-1216, R12-15-1221, R12-15-1225, and R12-15-1226.
4. R12-15-1216(B) applies only to an embankment dam.

**Historical Note**

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-01 renumbered without change as Section R12-15-1201 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**R12-15-1202. Definitions**

In addition to the definitions provided in A.R.S. § 45-1201, the following definitions are applicable to this Article:

1. “Alteration or repair of an existing dam or appurtenant structure” means to make different from the originally approved construction drawings and specifications or current condition without changing the height or storage capacity of the dam or reservoir, except for ordinary repairs and general maintenance as prescribed in R12-15-1217.
2. “Appurtenant structure” means any structure that is contiguous and essential to the safe operation of the dam including embankments, saddle dikes, outlet works and controls, diversion ditches, spillway and controls, access structures, bridges, and related housing at a dam.
3. “Classification of dams” means the placement of dams into categories based upon an evaluation of the size and hazard potential, regardless of the condition of the dam.
4. “Concrete dam” means any dam constructed of concrete, including arch, gravity, arch-gravity, slab and buttress, and multiple arch dams. A dam that only has a concrete facing is not a concrete dam.
5. “Construction” means any activity performed by the owner or someone employed by the owner that is related to the construction, reconstruction, repair, enlargement, removal, or alteration of any dam, unless the context indicates otherwise. Construction is performed after approval of an application and before issuance of a license.
6. “Dam failure inundation map” means a map depicting the maximum area downstream from a dam that would be flooded in the event of the worst condition failure of the dam.
7. “Department” means the Arizona Department of Water Resources.
8. “Director” means the Director of the Arizona Department of Water Resources or the Director’s designee.
9. “Embankment dam” means a dam that is constructed of earth or rock material.
10. “Emergency spillway” means a spillway designed to safely pass the inflow design flood routed through the reservoir. If the flow is controlled by gates, it is a controlled spillway. If the flow is not controlled by gates, it is an uncontrolled spillway.

11. "Engineer" means a Professional Engineer registered and licensed in accordance with A.R.S. Title 32, Chapter 1, with proficiency in engineering and knowledge of dam technology.
12. "Enlargement to an existing dam or appurtenant structure" means any alteration, modification, or repair that increases the vertical height of a dam or the storage capacity of the reservoir.
13. "Flashboards" mean timber, concrete, or steel sections placed on the crest of a spillway to raise the retention water level that may be quickly removed at time of flood either by a tripping device or by designed failure of the flashboards or their supports.
14. "Flood control dam" means a dam that uses all of its reservoir storage capacity for temporary impoundment of flood waters and collection of sediment or debris.
15. "Hazard potential" means the probable incremental adverse consequences that result from the release of water or stored contents due to failure or improper operation of a dam or appurtenances.
16. "Hazard potential classification" means a system that categorizes dams according to the degree of probable incremental adverse consequences of failure or improper operation of a dam or appurtenances. The hazard potential classification does not reflect the current condition of the dam with regard to safety, structural integrity, or flood routing capacity.
17. "Height" means the vertical distance from the lowest elevation of the outside limit of the barrier at its intersection with the natural ground surface to the spillway crest elevation. For the purpose of determining jurisdictional status, the lowest elevation of the outside limit of the barrier may be the outlet pipe invert elevation if the outlet is constructed below natural ground.
18. "Impound" means to cause water or a liquid to be confined within a reservoir and held with no discharge.
19. "Incremental adverse consequences" means under the same loading conditions, the additional adverse consequences such as economic, intangible, lifeline, or human losses, that would occur due to the failure or improper operation of the dam over those that would have occurred without failure or improper operation of the dam.
20. "Inflow design flood" or "IDF" means the reservoir flood inflow magnitude selected on the basis of size and hazard potential classification for emergency spillway design requirements of a dam.
21. "Intangible losses" means incremental adverse consequences to property that are not economic in nature, including property related to social, cultural, unique, or resource-based values, including the loss of irreplaceable and unique historic and cultural features; long-lasting pollution of land or water; or long-lasting or permanent changes to the ecology, including fish and endangered species habitat identified and evaluated by a public natural resource management or protection agency.
22. "Jurisdictional dam" means a barrier that meets the definition of a dam prescribed in A.R.S. § 45-1201 that is not exempted by R12-15-1203 over which the Department of Water Resources exercises jurisdiction.
23. "Levee" means an embankment of earth, concrete, or other material used to prevent a watercourse from spreading laterally or overflowing its banks. A levee is not used to impound water.
24. "License" means license of final approval issued by the Director upon completion or enlargement of a dam under A.R.S. § 45-1209.
25. "Lifeline losses" mean disruption of essential services such as water, power, gas, telephone, or emergency medical services.
26. "Liquid-borne material" means mine tailings or other milled ore products transported in a slurry to a storage impoundment.
27. "Maximum credible earthquake" means the most severe earthquake that is believed to be possible at a point on the basis of geologic and seismological evidence.
28. "Maximum water surface" means the maximum elevation of the reservoir water level attained during routing of the inflow design flood.
29. "Natural ground surface" means the undisturbed ground surface before excavation or filling, or the undisturbed bed of the stream or river.
30. "Outlet works" means a closed conduit under or through a dam or through an abutment for the controlled discharge of the contents normally impounded by a dam and reservoir. The outlet works include the inlet and outlet structures appurtenant to the conduit. Outlet works may be controlled or uncontrolled.
31. "Probable" means likely to occur, reasonably expected, and realistic.
32. "Probable maximum flood" or "PMF" means the flood runoff expected from the most severe combination of critical meteorologic and hydrologic conditions that are reasonably possible in the region, including rain and snow where applicable. 1/2 PMF is that flood represented by the flood hydrograph with ordinates equal to 1/2 the corresponding ordinates of the PMF hydrograph.
33. "Probable maximum precipitation" means the greatest depth of precipitation for a given duration that is theoretically physically possible over a particular size storm area at a particular geographical location at a particular time of year.
34. "Reservoir" means any basin that contains or is capable of containing water or other liquids impounded by a dam.
35. "Residual freeboard" means the vertical distance between the highest water surface elevation during the inflow design flood and the lowest point at the top of the dam.
36. "Restricted storage" means a condition placed on a license by the Director to reduce the storage level of a reservoir because of a safety deficiency.
37. "Saddle dike or saddle dam" means any dam constructed in a topographically low area on the perimeter of a reservoir, required to contain the reservoir at the highest water surface elevation.
38. "Safe" means that a dam has sufficient structural integrity and flood routing capacity to make failure of the dam unlikely.
39. "Safe storage level" means the maximum reservoir water surface elevation at which the Director determines it is safe to impound water or other liquids in the reservoir.
40. "Safety deficiency" means a condition at a dam that impairs or adversely affects the safe operation of the dam.
41. "Safety inspection" means an investigation by an engineer or a person under the direction of an engineer to assess the safety of a dam and determine the safe storage level for a reservoir, which includes review of design reports, construction documents, and previous safety inspection reports of the dam, spillways, outlet facilities, seepage control and measurement systems, and permanent monument or monitoring installations.
42. "Spillway crest" means the highest elevation of the floor of the spillway along a centerline profile through the spillway.

43. "Storage capacity" means the maximum volume of water, sediment, or debris that can be impounded in the reservoir with no discharge of water, including the situation where an uncontrolled outlet becomes plugged. The storage capacity is reached when the water level is at the crest of the emergency spillway, or at the top of permanently mounted emergency spillway gates in the closed position. Storage capacity excludes dead storage below the natural ground surface.
44. "Surcharge storage" means the additional water storage volume between the emergency spillway crest or closed gates, and the top of the dam.
45. "Total freeboard" means the vertical distance between the emergency spillway crest and the top of the dam.
46. "Unsafe" means that safety deficiencies in a dam or spillway could result in failure of the dam with subsequent loss of human life or significant property damage.

#### Historical Note

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-02 renumbered without change as Section R12-15-1202 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended to correct typographical error under A.A.C. R1-1-109 (Supp. 01-2).

#### R12-15-1203. Exempt Structures

The following structures are exempt from regulation by the Department:

1. Any artificial barrier identified as exempt on Table 1 and defined as follows:
  - a. Less than 6 feet in height, regardless of storage capacity.

- b. Between 6 and 25 feet in height with a storage capacity of less than 50 acre-feet.
- c. Greater than 25 feet in height with 15 acre-feet or less of storage capacity.
2. A dam owned by the federal government. A dam designed by the federal government for any non-federal entity or person that will subsequently be owned or operated by a person or entity defined as an owner in A.R.S. § 45-1201 is subject to jurisdiction, beginning with design and construction of the dam.
3. A dam owned or operated by an agency or instrumentality of the federal government, if a dam safety program at least as stringent as this Article is applicable to and enforced against the agency or instrumentality.
4. A transportation structure such as a highway, road, or railroad fill that exists solely for transportation purposes. A transportation structure designed, constructed, or modified with the intention of impounding water on an intermittent or permanent basis and meeting the definition of dam in A.R.S. § 45-1201 is subject to jurisdiction.
5. A levee constructed adjacent to or along a watercourse, primarily to control floodwater.
6. A self-supporting concrete or steel water storage tank.
7. An impoundment for the purpose of storing liquid-borne material.
8. A release-contained barrier as defined by A.R.S. § 45-1201(5).

#### Historical Note

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-03 renumbered without change as Section R12-15-1203 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

Table 1. Exempt Structures

#### Historical Note

New Table adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1204. Provision for Guidelines

The Department may develop and adopt substantive policy statements that serve as dam safety guidelines to aid a dam owner or engineer in complying with this Article. The Department recom-

mends that dam owners and engineers consult design guidelines published by agencies of the federal government, including the U.S. Bureau of Reclamation, the U.S. Army Corps of Engineers, the Natural Resources Conservation Service, and the Federal Energy

Regulatory Commission, for the design of concrete, roller compacted concrete, stone masonry, timber, inflatable rubber, and mechanically-stabilized earth dams. The Director may require that other criteria be used or revise any of the specific criteria for the purpose of dam safety. An owner shall obtain advance approval by the Director of design criteria.

#### Historical Note

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-04 renumbered without change as Section R12-15-1204 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1205. General Responsibilities

- A. Each owner is responsible for the safe design, operation, and maintenance of a dam. The owner shall operate, maintain, and regularly inspect a dam so that it does not constitute a danger to human life or property. The owner of a high or significant hazard potential dam shall provide timely warning to the Department and all other persons listed in the emergency action plan of problems at the dam. The owner shall develop and maintain effective emergency action plans and coordinate those plans with local officials as prescribed in R12-15-1221.
- B. The owner shall conduct frequent observation of the dam, as prescribed in the emergency action plan and as follows:
  1. The owner shall increase the frequency of observation when the reservoir is full, during heavy rains or flooding, and following an earthquake.
  2. The owner shall report to the Director any condition that threatens the safety of the dam as prescribed in R12-15-1224(A). The owner shall make the report as soon as possible, but not later than 12 hours after discovery of the conditions.
  3. If dam failure appears imminent, the owner shall notify the county sheriff or other emergency official immediately.
  4. The owner is responsible for the safety of the dam and shall take action to lower the reservoir if it appears that the dam has weakened or is in danger of failing.
- C. The owner of a dam shall install, maintain, and monitor instrumentation to evaluate the performance of the dam. The Director shall require site-specific instrumentation that the Director deems necessary for monitoring the safety of the dam when failure may endanger human life and property. Conditions that may require monitoring include land subsidence, earth fissures, embankment cracking, phreatic surface, seepage, and embankment movements.
- D. The owner shall perform timely maintenance and ordinary repair of a dam. The owner shall implement an annual plan to inspect the dam and accomplish the maintenance and ordinary repairs necessary to protect human life and property.
- E. If a change of ownership of a dam occurs, the new owner shall notify the Department within 15 days after the date of the transaction and provide the mailing address and telephone number where the new owner can be contacted. Within 90 days after the date of the transaction, the new owner shall provide the name and telephone number of the individual or individuals who are responsible for operating and maintaining the dam.

#### Historical Note

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-05 renumbered without change as Section R12-15-1205 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000

(Supp. 00-2).

#### R12-15-1206. Classification of Dams

- A. Size Classification. Dams are classified by size as small, intermediate, or large. Size is determined with reference to Table 2. An owner or engineer shall determine size by storage capacity or height, whichever results in the larger size.
- B. Hazard Potential Classification
  1. The Department shall base hazard potential classification on an evaluation of the probable present and future incremental adverse consequences that would result from the release of water or stored contents due to failure or improper operation of the dam or appurtenances, regardless of the condition of the dam. The evaluation shall include land use zoning and development projected for the affected area over the 10 year period following classification of the dam. The Department considers all of the following factors in hazard potential classification: probable loss of human life, economic and lifeline losses, and intangible losses identified and evaluated by a public resource management or protection agency.
    - a. The Department bases the probable incremental loss of human life determination primarily on the number of permanent structures for human habitation that would be impacted in the event of failure or improper operation of a dam. The Department considers loss of human life unlikely if:
      - i. Persons are only temporarily in the potential inundation area;
      - ii. There are no residences or overnight campsites; and
      - iii. The owner has control of access to the potential inundation area and provides an emergency action plan with a process for warning in the event of a dam failure or improper operation of a dam.
    - b. The Department bases the probable economic, lifeline, and intangible loss determinations on the property losses, interruptions of services, and intangible losses that would be likely to result from failure or improper operation of a dam.
  2. The 4 hazard potential classification levels are very low, low, significant, and high, listed in order of increasing probable adverse incremental consequences, as prescribed in Table 3. The Director shall classify intangible losses by considering the common or unique nature of features or habitats and temporary or permanent nature of changes.
    - a. Very Low Hazard Potential. Failure or improper operation of a dam would be unlikely to result in loss of human life and would produce no lifeline losses and very low economic and intangible losses. Losses would be limited to the 100 year floodplain or property owned or controlled by the dam owner under long-term lease. The Department considers loss of life unlikely because there are no residences or overnight camp sites.
    - b. Low Hazard Potential. Failure or improper operation of a dam would be unlikely to result in loss of human life, but would produce low economic and intangible losses, and result in no disruption of lifeline services that require more than cosmetic repair. Property losses would be limited to rural or agricultural property, including equipment, and isolated buildings.
    - c. Significant Hazard Potential. Failure or improper operation of a dam would be unlikely to result in

## Department of Water Resources

loss of human life but may cause significant or high economic loss, intangible damage requiring major mitigation, and disruption or impact on lifeline facilities. Property losses would occur in a predominantly rural or agricultural area with a transient population but significant infrastructure.

- d. High Hazard Potential. Failure or improper operation of a dam would be likely to cause loss of human life because of residential, commercial, or industrial development. Intangible losses may be major and potentially impossible to mitigate, critical lifeline services may be significantly disrupted, and property losses may be extensive.
3. An applicant shall demonstrate the hazard potential classification of a dam before filing an application to construct. The Department shall review the applicant's demonstration early in the design process at pre-application meetings prescribed in R12-15-1207(D).
4. The Department shall review the hazard potential classification of each dam during each subsequent dam safety inspection and revise the classification in accordance with current conditions.

**Historical Note**

Adopted effective November 2, 1978 (Supp. 78-6). Former Section R12-15-06 renumbered without change as Section R12-15-1206 effective October 8, 1982 (Supp. 82-5). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**Exhibit A. Repealed****Historical Note**

Exhibit repealed by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000; a Historical Note for Exhibit A did not exist before this date (Supp. 00-2).

**Table 2. Size Classification**

Category	Storage Capacity (acre-feet)	Height (feet)
Small	50 to 1,000	25 to 40
Intermediate	greater than 1,000 and not exceeding 50,000	higher than 40 and not exceeding 100
Large	greater than 50,000	higher than 100

**Historical Note**

New Table adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**Table 3. Downstream Hazard Potential Classification**

Hazard Potential Classification	Probable Loss of Human Life	Probable Economic, Lifeline, and Intangible Losses
Very Low	None expected	Economic and lifeline losses limited to owner's property or 100-year floodplain. Very low intangible losses identified.
Low	None expected	Low

Significant	None expected	Low to high
High	Probable - One or more expected	Low to high (not necessary for this classification)

**Historical Note**

New Table adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**R12-15-1207. Application Process**

- A. An applicant shall obtain written approval from the Director before constructing, reconstructing, repairing, enlarging, removing, altering, or breaching a dam. Application requirements differ according to the hazard potential of the dam.
  1. To construct, reconstruct, repair, enlarge, or alter a high or significant hazard potential dam, the applicant shall comply with R12-15-1208.
  2. To breach or remove a high or significant hazard potential dam, the applicant shall comply with R12-15-1209.
  3. To construct, reconstruct, repair, enlarge, alter, breach, or remove a low hazard potential dam, the applicant shall comply with R12-15-1210.
  4. To construct, reconstruct, repair, enlarge, alter, breach, or remove a very low hazard potential dam, the applicant shall comply with R12-15-1211.
- B. An application shall not be filed with the Director under the following circumstances:
  1. The dam is exempt under R12-15-1203;
  2. A dam owner starts repairs to an existing dam that are necessary to safeguard human life or property and the Director is notified without delay;
  3. The owner performs general maintenance or ordinary repairs as prescribed in R12-15-1217(A) or (B); or
  4. Breach, removal, or reduction of a very low hazard dam as prescribed in R12-15-1211(C).
- C. An applicant is not required to comply with a requirement in this Article if the Director finds that, considering the site characteristics and the proposed design, the requirement is unduly burdensome or expensive and is not necessary to protect human life or property. The Director shall consider the size, hazard potential classification, physical site conditions, and applicability of a requirement to a proposed dam. The Director shall state in writing the reason or reasons the applicant is not required to comply with a requirement.
- D. An applicant shall schedule pre-application conferences with the Department to discuss the requirements of this Article and to resolve issues essential to the design of a dam while the design is in preliminary stages. The Director shall view the dam site during the pre-application process. The following are examples of issues for pre-application conferences: the hazard potential classification, the approximate inflow design flood, the basic design concepts, and any requirements that may be found by the Director to be unduly burdensome or expensive and not necessary to protect human life or safety. In addition, the applicant may submit preliminary design calculations to the Department for review and comment. The Department shall comment as soon as practicable, depending on the size of the submittal and the current workload.
- E. The Department shall review applications as follows:
  1. Applications will be received by appointment. During this meeting the Department shall make a brief review of the application to determine that the application contains each of the items required by R12-15-1208, R12-15-1209, R12-15-1210, or R12-15-1211.

2. Following receipt of an application submitted under R12-15-1208, R12-15-1209, R12-15-1210, or R12-15-1211, the Director shall complete an administrative review as prescribed in R12-15-401(1) and notify the applicant in writing whether the application is administratively complete. If the application is not administratively complete, the notification shall include a list of additional information that is required to complete the application.
3. After finding the application submitted under R12-15-1208, R12-15-1209, R12-15-1210, or R12-15-1211 administratively complete, the Director shall complete a substantive review as prescribed in R12-15-401(3) and notify the applicant in writing of the Director's approval or disapproval. If during this review period, the Director determines that there are defects in the application that would impact human life and property, a written notice of the defects shall be sent to the applicant.
4. An applicant may request in writing that the Director expedite the review of an application by employing an expert consultant on a contract basis under A.R.S. § 45-104(D). The Director shall establish on-call contracts with expert consultants to facilitate the process of expediting review. The Director may retain a consultant to review all or a portion of the application as necessary to expedite the process in response to an owner's request or to comply with time-frame rules. Before conducting the review, the consultant shall provide the Director and the applicant with a proposed time schedule and cost estimate. If the applicant agrees to the consultant's proposal for an expedited review of an application and the Director employs the consultant, the applicant shall pay to the Department the cost of the consultant's services in addition to the application fees. The Director retains the authority to review and approve, disapprove, or modify the findings and recommendations of the consultant.
5. The Director shall not approve an application in less than 10 days from the date of receipt.
6. If the Director disapproves the application, the Director shall provide the applicant with a statement of the Director's objections.
7. If the Director approves an application, the applicant shall submit in triplicate revised drawings and specifications that incorporate any required changes.
  - a. The Director shall return to the applicant 1 set of final construction drawings and specifications with the Department's approval stamp to be retained onsite during construction;
  - b. The Director shall retain for permanent state record 1 set of final construction drawings and specifications with the Department's approval stamp; and
  - c. The Director shall retain for use by the Department during construction the 3rd set of final construction drawings and specifications with the Department's approval stamp.
8. The Director shall impose conditions and limitations that the Director deems necessary to safeguard human life and property. Examples of the conditions of approval include but are not limited to:
  - a. The applicant shall not cover the foundation or abutment with the material of the dam until the Department has been given notice and a reasonable time to inspect and approve them.
  - b. The applicant shall start construction within 1 year from the date of approval.
  - c. The applicant shall maintain a safe storage level for an existing dam being reconstructed, repaired, enlarged, altered, or breached.
- F. An approval to construct a new dam or repair, enlarge, alter, breach, or remove an existing dam is valid for 1 year.
  1. If construction does not begin within 1 year, the approval is void.
  2. Upon written request and good cause shown by the owner, the time for commencing construction may be extended. An applicant shall not start construction before the Director reviews the application for changes and grants approval.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### **R12-15-1208. Application to Construct, Reconstruct, Repair, Enlarge, or Alter a High or Significant Hazard Potential Dam**

- A. An application package to construct, reconstruct, repair, enlarge, or alter a high or significant hazard potential dam shall include the following prepared by or under the supervision of an engineer as defined in R12-15-1202(11):
  1. A completed application filed in duplicate on forms provided by the Director.
  2. A design information summary or checklist of items prepared in duplicate on forms provided by the Director.
  3. An initial application fee based on the total estimated project cost and computed in accordance with A.R.S. § 45-1204 and R12-15-104(A)(7).
  4. A detailed estimate of project costs. Project costs are all costs associated with construction of the dam and appurtenant works including preliminary investigations and surveys, engineering design, supervision of construction, and any other engineering costs.
  5. Two complete sets of construction drawings as prescribed in R12-15-1215(1).
  6. Two complete sets of construction specifications as prescribed in R12-15-1215(2).
  7. An engineering design report that includes information needed to evaluate all aspects of the design of the dam and appurtenances, including references with page numbers to support any assumptions used in the design, as prescribed in R12-15-1215(3). The engineering design report shall recommend a safe storage level for existing dams being reconstructed, repaired, enlarged, or altered.
  8. A construction quality assurance plan describing all aspects of construction supervision.
  9. A description of the use for the impounded or diverted water, proof of a right to appropriate, and a permit to store water as prescribed in A.R.S. §§ 45-152 and 45-161.
  10. A long-term budget plan and evidence of financing, prepared using customary accounting principles, that demonstrate that the applicant has the financial capability to construct, operate, and maintain the dam in a safe manner. If the applicant does not have evidence that can be verified by an independent audit of the financial capability to construct, operate, and maintain the dam in a safe manner, the Director may require a performance bond for the entire cost of the proposed construction work.
- B. The following may be submitted with the application or during construction.
  1. An emergency action plan as prescribed in R12-15-1221.
  2. An operation and maintenance plan to accomplish the annual maintenance.
  3. An instrumentation plan regarding instruments that evaluate the performance of the dam.

**Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

**R12-15-1209. Application to Breach or Remove a High or Significant Hazard Potential Dam**

- A.** An applicant shall excavate the dam down to the level of the natural ground at the maximum section. Upon approval of the Director, additional breaches may be made. This provision shall not be construed to require more than total removal of the dam regardless of the flood magnitude. The breach or breaches shall be of sufficient width to pass the greater of:
1. The 100 year flood at a depth of less than 5 feet, or
  2. The 100 year flood at a normal flood depth of not more than 2 feet at a distance of 2,000 feet downstream of the dam.
- B.** The sides of each breach shall be excavated to a slope ratio that is stable and not steeper than 1 horizontal to 1 vertical.
- C.** Each breach shall be designed to prevent silt that has previously been deposited on the reservoir bottom and the excavated material from the breach from washing downstream.
- D.** Before breaching the dam, the reservoir shall be emptied in a controlled manner that will not endanger lives or damage downstream property. The applicant shall obtain approval from the Director for the method of breaching or removal.
- E.** An application package to breach or remove a high or significant hazard potential dam shall include the following prepared by or under the supervision of an engineer as defined in R12-15-1202(11).
1. The construction drawing or drawings for the breach or removal of a dam, including the location, dimensions, and lowest elevation of each breach.
  2. A long-term budget plan and evidence of financing, prepared using customary accounting principles, that demonstrate that the applicant has the financial capability to breach or remove the dam in a safe manner. If the applicant does not have evidence that can be verified by an independent audit of the financial capability to breach or remove the dam in a safe manner, the Director may require a performance bond for the entire cost of the proposed construction work.
  3. A construction quality assurance plan describing all aspects of construction supervision.
- F.** Reduction of a high or significant downstream hazard potential dam to nonjurisdictional size may be approved by letter under the following circumstances:
1. The owner shall submit a completed application form and construction drawings for the reduction and the appropriate specifications, prepared by or under the supervision of an engineer as defined in R12-15-1202(11).
  2. The construction drawings and specifications shall contain sufficient detail to enable a contractor to bid on and complete the project.
  3. The plans shall comply with all requirements of this Section except that the breach is not required to be to natural ground.
  4. Upon completion of an alteration to nonjurisdictional size, the engineer shall file as constructed drawings and specifications with the Department.

**Historical Note**

New Section adopted by final rulemaking at 6 A.A.R.

2558, effective June 12, 2000 (Supp. 00-2).

**R12-15-1210. Application to Construct, Reconstruct, Repair, Enlarge, Alter, Breach, or Remove a Low Hazard Potential Dam**

- A.** An application package to construct, reconstruct, repair, enlarge, or alter a low hazard potential dam shall include the following prepared by or under the supervision of an engineer as defined in R12-15-1202(11):
1. A completed application filed in duplicate on forms provided by the Director.
  2. An initial application fee based on the total estimated project cost, computed in accordance with A.R.S. § 45-1204 and R12-15-104(A)(7).
  3. A detailed estimate of project costs. Project costs are all costs associated with construction of the dam and appurtenant works, including preliminary investigations and surveys, engineering design, supervision of construction, and any other engineering costs.
  4. The seal and signature of the responsible engineer in accordance with A.A.C. R4-30-304.
  5. A statement by the responsible engineer that classifies the dam as low hazard in accordance with R12-15-1206(B). The responsible engineer shall submit a map of the area that would be inundated by failure or improper operation of the dam. The responsible engineer shall demonstrate that failure or improper operation of the dam would be unlikely to result in:
    - a. Loss of human life. The demonstration may be based on an emergency action plan for persons who may be in the area of inundation;
    - b. Significant incremental adverse consequences; or
    - c. Significant intangible losses, as defined in R12-15-1202(21) and identified and evaluated by a public natural resource management or protection agency.
  6. Two complete sets of construction drawings as prescribed by R12-15-1215(1).
  7. Two complete sets of construction specifications as prescribed by R12-15-1215(2).
  8. An engineering design report that includes information needed to evaluate all aspects of the design of the dam and appurtenances, including references with page numbers to support any assumptions used in the design, as prescribed in R12-15-1215(3).
  9. A description of the use for the impounded or diverted water, proof of a right to appropriate, and a permit to store water as prescribed in A.R.S. §§ 45-152 and 45-161.
  10. A construction quality assurance plan clearly describing all aspects of construction supervision.
  11. A long-term budget plan and evidence of financing, prepared using customary accounting principles, that demonstrate that the applicant has the financial capability to construct, operate, and maintain the dam in a safe manner. If the applicant does not have evidence that can be verified by an independent audit of the financial capability to construct, operate, and maintain the dam in a safe manner, the Director may require a performance bond for the entire cost of the proposed construction work.
- B.** An application package for the breach or removal of a low hazard potential dam shall include the following:
1. A completed application filed in duplicate on forms provided by the Director that contains the following information:
    - a. The name and address of the owner of the dam or the agent of the owner.
    - b. A description of the proposed removal.

- c. The proposed time for beginning and completing the removal.
  - 2. An initial application fee based on the total estimated project cost and computed in accordance with A.R.S. § 45-1204 and R12-15-104(A)(7).
  - 3. A statement by the responsible engineer demonstrating both of the following:
    - a. That the dam will be excavated to the level of natural ground at the maximum section; and
    - b. That the breach or breaches will be of sufficient width to pass the greater of:
      - i. The 100 year flood at a depth of less than 5 feet, or
      - ii. The 100 year flood at a normal flood depth of not more than 2 feet at a distance of 2,000 feet downstream of the dam,
      - iii. Subsection (B)(3)(b) shall not be construed to require more than a total removal of the dam regardless of flood magnitude.
    - c. That the sides of the breach will be excavated to a slope ratio that is stable and not steeper than 1 horizontal to 1 vertical.
  - 4. A detailed estimate of project costs. Project costs are all costs associated with the removal of the dam and appurtenant works, including preliminary investigations and surveys, engineering design, supervision of removal, and any other engineering costs.
- C.** An applicant intending to reduce a low hazard potential dam to nonjurisdictional size shall submit a written notice to the Director at least no less than 60 days before the date that construction begins.
- D.** Within 45 days after receipt of a complete application package as prescribed by subsection (A) or (B), the Director shall either:
- 1. Determine that the dam falls within the low hazard potential classification, or
  - 2. Issue a written notice that the dam does not fall within the low hazard potential classification.
- E.** The Director's determination that the proposed dam does not fall within the low hazard classification is an appealable agency action and subject to administrative and judicial review under A.R.S. Title 41, Chapter 6, Article 10.
- F.** Upon completion of construction, the owner shall notify the Department in writing. The owner shall not use the dam or reservoir before issuance of a license unless the Director issues written approval.
- G.** Within 90 days after completing construction, reconstruction, repair, enlargement, or alteration of a low hazard potential dam, the owner shall file the following:
- 1. An affidavit showing the actual cost of construction, reconstruction, repair, enlargement, or alteration of the dam. The owner shall submit a detailed accounting of the costs, including all engineering costs.
  - 2. An additional fee or refund request computed in accordance with A.R.S. § 45-1209 and R12-15-104(A)(7), based on the actual cost of construction, reconstruction, repair, enlargement, or alteration.
  - 3. A brief completion report summarizing the salient features of the project, including a description of the causes for any changes or deviations from the approved application package prepared by the engineer who supervised the construction, in accordance with A.R.S. Title 32, Chapter 1. The engineer shall indicate:
    - a. That the dam has been designed and constructed in compliance with basic principles of dam construction currently being practiced in the industry;
    - b. That the dam as constructed has structural integrity and flood routing capacity consistent with its hazard potential classification; and
    - c. That the as constructed drawings and the report accurately represent the construction of the dam.
  - 4. As constructed drawings prepared and sealed by the engineer who supervised the construction. The owner and the engineer shall maintain a record of the drawings.
- H.** Upon receiving the Director's written approval, the owner may operate the dam and appurtenant works. Within 30 days after receipt of the information in subsection (G), the Director shall issue to the owner either a license or a notice that the dam and appurtenant works shall not be operated because the dam and appurtenant works do not qualify as low hazard or were not built according to the submitted design. The license shall include conditions of operation, including:
- 1. The safe storage level of the reservoir,
  - 2. A requirement that the dam be operated and maintained so that it does not constitute a danger to human life and property,
  - 3. A requirement that the conditions resulting in the low hazard classification be maintained throughout the life of the dam, and
  - 4. A requirement that the owner demonstrate in writing the low hazard classification in the manner prescribed by subsection (A)(5) every five years.
- I.** Within 90 days after completing removal of a low hazard potential dam, the owner shall file the following. The Director shall remove the dam from jurisdiction upon approval of the submittal.
- 1. An affidavit showing the actual cost of removal of the dam. The owner shall submit a detailed accounting of the costs, including all engineering costs.
  - 2. An additional fee or refund request computed in accordance with A.R.S. § 45-1204 and R12-15-104(A)(7), based on the actual cost of removal.
  - 3. A brief completion report, including a description of the causes for any changes or deviations from the approved application package prepared by the engineer who supervised the construction, in accordance with A.R.S. Title 32, Chapter 1. The engineer shall certify that the as removed drawings and the report accurately represent the actual removal of the dam.
  - 4. As-removed drawings prepared and sealed by the engineer who supervised the removal. The owner and the engineer shall maintain a record of the drawings.
- J.** An owner shall immediately commence repairs necessary to safeguard human life and property and prevent failure and improper operation of a low hazard potential dam. The owner shall notify the Department as soon as reasonably possible and in all cases within 10 days of commencing the required repairs.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended by final rulemaking at 13 A.A.R. 3022, effective October 6, 2007 (Supp. 07-3). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

#### **R12-15-1211. Application to Construct, Reconstruct, Repair, Enlarge, Alter, Breach, or Remove a Very Low Hazard Potential Dam**

## Department of Water Resources

- A.** An application package to construct, reconstruct, repair, enlarge, or alter a very low hazard potential dam shall include the following prepared by an engineer or a person under the supervision of an engineer as defined in R12-15-1202(11):
1. A completed application filed in duplicate on forms provided by the Director that contains the following information:
    - a. The name and address of the owner of the dam or the agent of the owner.
    - b. The location, type, size, and height of the proposed dam and appurtenant works.
    - c. The storage capacity of the reservoir associated with the proposed dam.
    - d. The proposed time for beginning and completing construction.
    - e. A description of the use for the impounded or diverted water and proof of a right to impound that water.
  2. The means, plans, and specifications by which the stream or body of water is to be dammed, by-passed, or controlled during construction.
  3. Maps, drawings, and specifications of the proposed dam.
  4. An initial application fee based on the total estimated project cost and computed in accordance with A.R.S. § 45-1204 and R12-15-104(A)(7).
  5. A detailed estimate of project costs. Project costs are all costs associated with construction of the dam and appurtenant works, including preliminary investigations and surveys, engineering design, supervision of construction, and any other engineering costs.
  6. A statement by the responsible engineer that classifies the dam as very low hazard in accordance with R12-15-1206(B). The responsible engineer shall submit a map of the area that would be inundated by failure or improper operation of the dam. The responsible engineer shall demonstrate that failure or improper operation would be unlikely to result in:
    - a. Loss of human life. The demonstration may be based on an emergency action plan for persons who may be in the area of inundation;
    - b. Significant incremental adverse consequences; or
    - c. Significant intangible losses, as defined in R12-15-1202(21) and identified and evaluated by a public natural resource management protection agency, because the dam has a size classification of either small or intermediate under R12-15-1206(A) and any release would be limited to the 100 year floodplain or property owned or controlled by the dam owner under long-term lease.
  7. The seal and signature of the responsible engineer in accordance with A.R.S. Title 32, Chapter 1.
  8. The drawings required by subsection (A)(3) shall include a plan view and maximum section of the dam; the outlet works; and the spillway plan, profile, and cross section.
  9. The specifications required by subsection (A)(3) shall include the construction materials, testing criteria, and installation techniques.
- B.** The Director may make other requirements for drawings and specifications for the proposed repair or alteration of a very low hazard potential dam. In determining other requirements, the Director shall consider the size and extent of the repair or alteration, the portions of the dam that will be repaired or altered, and whether the requirements elicit a description of the proposed construction work that is adequate to allow the Director to evaluate the repair or alteration.
- C.** An owner intending to breach, remove, or reduce a very low hazard potential dam to nonjurisdictional size shall submit written notice to the Director at least 60 days before the date that construction begins.
- D.** After receipt of a complete application package as prescribed by subsection (A), the Director shall either:
1. Determine that the dam falls within the very low hazard classification and approve the application in writing; or
  2. Issue a written notice that the dam does not fall within the very low hazard classification.
- E.** The Director's determination that the proposed dam does not fall within the very low hazard classification is an appealable agency action and subject to administrative and judicial review under A.R.S. Title 41, Chapter 6, Article 10.
- F.** Upon completion of construction, the owner shall notify the Department in writing. The owner shall not use the dam and reservoir before receipt of a license unless the Director issues written approval.
- G.** Within 90 days after completion of the construction, reconstruction, repair, enlargement, or alteration of a very low hazard potential dam, the owner shall file the following:
1. An affidavit showing the actual cost of construction, reconstruction, repair, enlargement, or alteration of the dam. The owner shall submit a detailed accounting of the costs, including all engineering costs.
  2. An additional fee or refund request computed in accordance with A.R.S. § 45-1209 and R12-15-104(A)(7), based on the actual cost of construction, reconstruction, repair, enlargement, or alteration.
  3. A brief completion report summarizing the salient features of the project, including a description of the causes for any changes or deviations from the approved application package prepared by the engineer who supervised the construction in accordance with A.R.S. Title 32, Chapter 1. The report shall include:
    - a. That the dam has been designed and constructed in compliance with basic principles of dam construction currently being practiced in the industry;
    - b. That the dam as constructed has structural integrity and flood routing capacity consistent with its hazard potential classification; and
    - c. That the as constructed drawings and the report accurately represent the construction of the dam.
  4. As constructed drawings prepared by the engineer who supervised the construction. The owner and the engineer shall maintain a record of the drawings.
- H.** Within 30 days after receipt of the information in subsection (G), the Director shall issue to the owner either a license or a notice that the dam and appurtenant works shall not be operated because the dam and appurtenant works do not qualify as very low hazard or were not built according to the submitted design. Upon receiving the Director's written approval, the owner may operate the dam and appurtenant works. The license shall include conditions of operation, including:
1. The safe storage level of the reservoir,
  2. A requirement that the conditions resulting in the very low hazard classification be maintained throughout the life of the dam, and
  3. A requirement that the owner demonstrate in writing the very low hazard classification in the manner prescribed by subsection (A)(6) every five years.
- I.** An owner shall immediately commence repairs necessary to safeguard human life and property and prevent failure or improper operation of a very low hazard potential dam. The owner shall notify the Department as soon as reasonably possi-

ble and in all cases within 10 days of commencing the required repairs.

- J. The Department may periodically inspect construction to confirm that it is proceeding according to the approved design and that proper construction quality assurance is being exercised by the owner's engineer. The owner, or the owner's engineer under the direction of the owner, shall remedy any unsatisfactory condition using the contractor.
- K. The owner shall provide the Department access to the dam site for purposes of inspecting all phases of construction, including the foundation, embankment and concrete placement, inspection and test records, and mechanical installations.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

#### R12-15-1212. Construction of a High, Significant, or Low Hazard Potential Dam

- A. Before commencement of construction activities, the owner shall invite to a pre-construction conference all involved regulatory agencies, the prime contractor, and all subcontractors. At this meeting the Department shall identify, to the extent possible, the key construction stages at which an inspection will be made. At least 48 hours before each key construction stage identified for inspection, the owner or the owner's engineer shall provide notice to the Department.
- B. The owner and the owner's engineer shall oversee construction of a new dam or reconstruction, repair, enlargement, alteration, breach, or removal of an existing dam. Failure to perform the work in accordance with the construction drawings and specifications approved by the Director renders the approval revocable. The owner's engineer shall exercise professional judgment independent of the contractor.
- C. A professional engineer with proficiency in engineering and knowledge of dam technology shall supervise or direct the supervision of construction in accordance with the construction quality assurance plan.
- D. The owner's engineer shall submit summary reports of construction activities and test results according to a schedule approved by the Department.
- E. The owner shall immediately report to the Department any condition encountered during construction that requires a deviation from the approved plans and specifications.
- F. The owner shall promptly submit a written request for approval of any necessary change and sufficient information to justify the proposed change. The owner shall not commence construction without the written approval of the Director unless the change is a minor change. A minor change is a change that complies with the requirements of this Article and provides equal or better safety performance.
- G. Upon completion of construction, the owner shall notify the Department in writing. The Department shall make a final inspection. The owner shall correct any deficiencies noted during the inspection.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1213. Completion Documents for a Significant or High Hazard Potential Dam

Within 90 days after completion of the construction or removal work for a significant or high hazard potential dam and final inspection by the Department, the owner shall file the following:

1. An affidavit showing the actual cost of the construction. The owner shall submit a detailed accounting of the costs, including all engineering costs.
2. An additional fee or refund request based on the actual cost of the construction, computed in accordance with A.R.S. § 45-1209 and R12-15-104(A)(7).
3. One set of full sized as constructed drawings prepared and sealed by the engineer who supervised the construction. If changes were made during construction, the owner shall file supplemental drawings showing the dam and appurtenances as actually constructed.
4. Construction records, including grouting, materials testing, and locations and baseline readings for permanent bench marks and instrumentation, initial surveys, and readings.
5. Photographs of construction from exposure of the foundation to completion of construction.
6. A brief completion report summarizing the salient features of the project, including a description of the causes for any changes or deviations from the approved drawings and specifications that were made during the construction phase.
7. A schedule for filling the reservoir, specifying fill rates, water level elevations to be held for observation, and a schedule for inspecting and monitoring the dam. The owner shall monitor the dam monthly during the first filling.
8. An operating manual for the dam and its appurtenant structures. The operating manual shall include a process for safety inspections prescribed in R12-15-1219. The operating manual shall include schedules for surveillance activities and baseline information for any installed instrumentation as follows:
  - a. The frequency of monitoring,
  - b. The data recording format,
  - c. A graphical presentation of data, and
  - d. The person who will perform the work.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

#### R12-15-1214. Licensing

- A. Upon review and approval of the documents filed under R12-15-1213 and finding that the construction of the dam has been completed in accordance with the approved plans and specifications and finding that the dam is safe, the Director shall issue a license. The license shall specify the safe storage level for the reservoir and shall specify conditions for the safe operation of the dam. The dam and reservoir shall not be used before issuance of a license unless the Director issues written approval. Procedures for issuance of a license for low and very low hazard potential dams are prescribed in R12-15-1210(H) and R12-15-1211(H), respectively.
- B. A new license shall be issued in the following instances:
  1. Upon change of ownership of a dam.
  2. Upon change of the safe storage level.
  3. Upon expiration of time to appeal a notice issued under R12-15-1223(B).

4. Upon expiration of time to appeal an order issued by the Director under R12-15-1223(D).
5. Upon expiration of time to appeal an order of a court.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1215. Construction Drawings, Construction Specifications, and Engineering Design Report for a High, Significant, or Low Hazard Potential Dam

The owner and engineer are responsible for complete and adequate design of a dam and for including in the application all aspects of the design pertaining to the safety of the dam.

1. Construction Drawing Requirements. The construction drawings required by R12-15-1208(5), R12-15-1209(E)(1), and R12-15-1210(A)(6) shall include the following:
  - a. The seal and signature of the responsible engineer in accordance with A.A.C. R4-30-304.
  - b. One or more topographic maps of the dam, spillway, outlet works, and reservoir on a scale large enough to accurately locate the dam and appurtenances, indicate cut and fill lines, and show the property lines and ownership status of the land. Contour intervals shall be compatible with the height and size of the dam and its appurtenances and shall show design and construction details.
  - c. A reservoir area and capacity curve that reflect area in acres and capacity in acre-feet in relation to depth of water and elevation in the reservoir. The construction drawings shall show the spillway invert and top of dam elevations. The construction drawings shall also show the reservoir volume and space functional allocations. The construction drawings may include alternate scales as required for the owner's use.
  - d. Spillway and outlet works rating curves and tables at a scale or scales that allow determination of discharge rate in cubic feet per second at both low and high flows as measured by depth of water passing over the spillway control section.
  - e. A location map showing the dam footprint and all exploration drill holes, test pits, trenches, adits, borrow areas, and bench marks with elevations, reference points, and permanent ties. This map shall use the same vertical and horizontal control as the topographic map.
  - f. Geologic information including 1 or more geologic maps, profile along the centerline, and other pertinent cross sections of the dam site, spillway or spillways, and appurtenant structures, aggregate and material sources, and reservoir area at 1 or more scales compatible with the site and geologic complexity, showing logs of exploration drill holes, test pits, trenches, and adits.
  - g. One or more plans of the dam to delineate design and construction details.
  - h. Foundation profile along the dam centerline at a true scale where the vertical scale is equal to the horizontal scale, showing the existing ground and proposed finished grade at cut and fill elevations, including anticipated geologic formations. The foundation profile shall include any proposed grout and drain holes.
  - i. Profile and a sufficient number of cross sections of the dam to delineate design and construction details. The drawings shall illustrate and show dimensions

of camber, details of the top, core zone, interior filters and drains, and other zone details. The profile of the dam may be drawn to different horizontal and vertical scales if required for detail. A maximum section of the dam shall be drawn to a true scale, where the vertical scale is equal to the horizontal scale. The outlet conduit may be shown on the maximum section if this is typical of the proposed construction.

- j. One or more dam foundation plans showing excavation grades and cut slopes with any proposed foundation preparation, grout and drain holes, and foundation dewatering requirements.
- k. Plan, profile, and details of the outlet works, including the intake structure, the gate system, conduit, trashrack, conduit filter diaphragm, conduit concrete encasement, and the downstream outlet structure. The drawings shall include all connection and structural design details.
- l. Plan, profile, control section, and cross sections of the spillway, including details of any foundation preparation, grouting, or concrete work that is planned. A complex control structure, a concrete chute, or an energy dissipating device for a terminal structure shall include both hydraulic and structural design details.
- m. Hydrologic data, drainage area and flood routing, and diversion criteria.
2. Construction Specification Requirements. The construction specifications required by R12-15-1208(6) and R12-15-1210(A)(7) shall include the following:
  - a. The seal and signature of the responsible engineer in accordance with A.A.C. R4-30-304.
  - b. The statement that the construction drawings and specifications shall not be materially changed without the prior written approval of the Director.
  - c. A detailed description of the work to be performed and a statement of the requirements for the various types of materials and installation techniques that will enter into the permanent construction.
  - d. The statement that construction shall not be considered complete until the Director has approved the construction in writing.
  - e. The statement that the owner's engineer shall control the quality of construction.
  - f. The following construction information:
    - i. All earth and rock material descriptions, placement criteria, and construction requirements for all elements of the dam and related structures.
    - ii. All concrete, grout, and shotcrete material and mix descriptions, placement and consolidation criteria, temperature controls, and construction requirements for all elements of the dam and related structures.
    - iii. Material criteria and material testing, cleaning, and treatment. If foundation or curtain grouting is required, the specifications shall describe the type of grout, grouting method, special equipment necessary, recording during grouting, and foundation monitoring to avoid disturbance from grouting.
    - iv. All materials testing that will be performed by the contractor for pre-qualification of materials, including special performance testing, such as water pressure tests in conduits. The Director shall accept materials that are pre-tested suc-

- cessfully and constructed in-place in accordance with specifications.
- v. A plan for control or diversion of surface water during construction. The design engineer may determine frequency of storm runoff to be controlled during construction, commensurate with the risk of economic loss during construction.
  - vi. Criteria for blast monitoring and acceptable blast vibration levels, including particle velocities for the dam and other critical appurtenances. Monitoring equipment and monitoring locations shall be specified.
  - vii. Instrumentation material descriptions, placement criteria, and construction requirements and a statement that instrumentation shall be installed by experienced speciality subcontractors.
3. Engineering Design Report Requirements. The engineering design report required by R12-15-1208(7) and R12-15-1210(A)(8) shall include the following:
    - a. The seal and signature of the responsible engineer in accordance with A.A.C. R4-30-304.
    - b. The classification under R12-15-1206 of the proposed dam, or for the proposed enlargement of an existing dam or reservoir.
    - c. Hydrologic considerations, including calculations and a summary table of data used in determining the required emergency spillway capacity and freeboard, and design of any diversion or detention structures. The design report shall include input and output listings on both hard copy and computer diskette.
    - d. Hydraulic characteristics, engineering data, and calculations used in determining the capacities of the outlet works and emergency spillway. The design report shall include input and output listings on both hard copy and computer diskette.
    - e. Geotechnical investigation and testing of the dam site and reservoir basin. Results and analysis of subsurface investigations, including logs of test borings and geologic cross sections.
    - f. Guidelines and criteria for blasting to be used by the contractor in preparing the blasting plan.
    - g. Details of the plan for control or diversion of surface water during construction.
    - h. Details of the dewatering plan for subsurface water during construction.
    - i. Testing results of earth and rock materials, including the location of test pits and the logs of these pits.
    - j. Discussion and design of the foundation blanket grouting, grout curtain, and grout cap based on foundation stability and seepage considerations.
    - k. Calculations and basic assumptions on loads and limiting stresses for reinforced concrete design. The design report shall include input and output listings on both hard copy and computer diskette.
    - l. A discussion and stability analysis of the dam including appropriate seismic loading, safety factors, and embankment zone strength characteristics. Analyses shall include both short-term and long-term loading on upstream and downstream slopes. The design report shall include input and output listings on both hard copy and computer diskette.
    - m. A discussion of seismicity of the project area and activity of faults in the vicinity. The design report shall use both deterministic and statistical methods and identify the appropriate seismic coefficient for use in analyses.
    - n. Discussion and design of the cutoff trench based on seepage and other considerations.
    - o. Permeability characteristics of foundation and dam embankment materials, including calculations for seepage quantities through the dam, the foundation, and anticipated in the internal drain system. The design report shall include input and output listings on both hard copy and computer diskette. The design report shall include copies of any flow nets used.
    - p. Discussion and design of internal drainage based on seepage quantity calculations. The design report shall include instrumentation necessary to monitor the drainage system and filter design calculations for protection against piping of foundation and embankment.
    - q. Erosion protection against waves and rainfall runoff for both the upstream and downstream slopes, as appropriate.
    - r. Discussion and design of foundation treatment to compensate for geological weakness in the dam foundation and abutment areas and in the spillway foundation area.
    - s. Post-construction vertical and horizontal movement systems.
    - t. Discussion of foundation conditions including the potential for subsidence, fissures, dispersive soils, collapsible soils, and sink holes.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1216. Design of a High, Significant, or Low Hazard Potential Dam

##### A. General Requirements.

1. Emergency Spillway Requirements. An applicant shall:
  - a. Construct each spillway in a manner that avoids flooding in excess of the flooding that would have occurred in the same location under the same conditions before construction. The owner of a dam shall demonstrate that a spillway discharge would not result in incremental adverse consequences. In determining whether a spillway discharge of a dam would result in incremental adverse consequences, the Director shall evaluate whether the owner has taken any or all of the following actions: issuing public notice to downstream property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flow easements or other acquisitions of real property, or other actions appropriate to safeguard the dam site and flood channel.
  - b. Include a control structure to avoid head cutting and lowering of the spillway crest for spillways excavated in soils or soft rock. In the alternative, the design may provide evidence acceptable to the Director that erosion during the inflow design flood will not result in a sudden release of the reservoir.
  - c. Provide each spillway and channel with a minimum width of 10 feet and suitable armor to prevent erosion during the discharge resulting from the inflow design flood.

- d. Ensure that downstream spillway channel flows do not encroach on the dam unless suitable erosion protection is constructed.
  - e. Ensure that each spillway, in combination with outlets, is able to safely pass the peak discharge flow rate, as calculated on the basis of the inflow design flood.
  - f. Not construct bridges or fences across a spillway unless the construction is approved in writing by the Director. The Director's approval may include conditions regarding the design and operation of the spillway and fencing, based on safety concerns.
  - g. Not use a pipe or culvert as an emergency spillway unless the Director approves the use following review of the dam design and site characteristics.
2. Inflow Design Flood Requirements
- a. Unless directed otherwise in writing by the Director, the inflow design flood requirements for determining the spillway minimum capacity are stated in Table 4.
  - b. As an alternative to the requirements prescribed in Table 4, the Director may accept an inflow design flood determined by an incremental damage assessment study, based on the relative safety of the alternatives.
  - c. The Director may accept site-specific probable maximum precipitation studies in determination of the inflow design flood.
  - d. An applicant shall ensure that the total freeboard is the largest of the following:
    - i. The sum of the inflow design flood maximum water depth above the spillway crest plus wave run up.
    - ii. The sum of the inflow design flood maximum water depth above the spillway crest plus 3 feet.
    - iii. A minimum of 5 feet.
3. Outlet Works Requirements. An applicant shall ensure that a dam has a low level outlet works that:
- a. Is capable of draining the reservoir to the sediment pool level. A low level outlet works for a high or significant hazard potential dam shall be a minimum of 36 inches in diameter. A low level outlet works for a low hazard potential dam shall be a minimum of 18 inches in diameter.
  - b. For a high or significant hazard potential dam, has the capacity to evacuate 90% of the storage capacity of the reservoir within 30 days, excluding reservoir inflows.
  - c. Has a filter diaphragm or other current practice measures to reduce the potential for piping along the conduit.
  - d. Has accessible outlet controls when the spillway is in use.
  - e. Has an emergency manual override system or can be operated manually.
  - f. Is constructed of materials appropriate for loading condition, seismic forces, thermal expansion, cavitation, corrosion, and potential abrasion. The applicant shall not use corrugated metal pipes or other thin-walled pipes except as a form for a cast-in-place concrete conduit. The applicant shall construct outlet conduits of cast-in-place reinforced concrete. The applicant shall design each outlet to maintain water tightness. The applicant shall construct each outlet to prevent the occurrence of piping adjacent to the outlet.
  - g. Has an operating or guard gate on the upstream end of any gated outlet.
  - h. Has an outlet conduit near the base of 1 of the abutments on native bedrock or other competent material. The applicant shall support the entire length of the conduit on foundation materials of uniform density and consistency to prevent adverse differential settlement.
  - i. Has an upstream valve or gate capable of controlling the discharge through all ranges of flow on any gated outlet conduit.
  - j. Has a trashrack designed for a minimum of 25% of the reservoir head to which it would be subjected if completely clogged at the upstream end of the outlet.
  - k. Has an air vent pipe just downstream of the control gate. The applicant shall include a blow-off valve at or near the downstream toe of the dam for an outlet conduit that is connected directly to a distribution system.
  - l. Has an outlet conduit designed for internal pressure equal to the full reservoir head and for superimposed embankment loads, acting separately.
4. Dam Site And Reservoir Area Requirements
- a. An applicant shall demonstrate that reservoir storage during the inflow design flood will not result in incremental adverse consequences and that the design will not result in the inundation or wave damage of properties within the reservoir, except marina-type structures, during the inflow design flood. In determining whether a discharge will result in incremental adverse consequences, the Director shall evaluate whether the owner has taken any or all of the following actions: issuing public notice to upstream affected property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flood easements or other acquisitions of real property, or other actions appropriate to safeguard the dam site and reservoir. Permanent habitations are not allowed within the reservoir below the spillway elevation.
  - b. The applicant shall clear the reservoir storage area of logs and debris.
  - c. The applicant shall place borrow areas a safe distance from the upstream toe and the downstream toe of the dam to prevent a piping failure of the dam.
  - d. The applicant shall keep the top of the dam and appurtenant structures accessible by equipment and vehicles for emergency operations and maintenance.
5. Geotechnical Requirements
- a. The applicant shall provide an evaluation of the static stability of the foundation, dam, and slopes of the reservoir rim and demonstrate that sufficient material is available to construct the dam as designed.
  - b. The applicant shall not construct a dam on active faults, collapsible soils, dispersive soils, sink holes, or fissures, unless the applicant demonstrates that the dam can safely withstand the anticipated offset or other unsafe effects on the dam.
6. Seismic Requirements
- a. The applicant shall submit a review of the seismic or earthquake history of the area around the dam within

a radius of 100 miles to establish the relationship of the site to known faults and epicenters. The review shall include any known earthquakes and the epicenter locations and magnitudes of the earthquakes.

- b. The applicant shall identify the location of active or potentially active faults that have experienced Holocene or Late Pleistocene displacement within a radius of 100 miles of the site.
- c. For a high or significant hazard potential dam, the applicant shall design the dam to withstand the maximum credible earthquake.
- d. For a low hazard potential dam, the applicant shall use probabilistic or deterministic methods to determine the design earthquake. The magnitude of the design earthquake shall vary with the size of the dam, site condition, and specific location.

**B. Embankment Dam Requirements.**

1. Geotechnical Requirements. Table 5 states minimum factors of safety for embankment stability under various loading conditions. For an embankment dam an applicant shall provide a written analysis of minimum factors of safety for stability.

- a. The analysis of minimum factors of safety shall include the effects of anisotropy on the phreatic surface position by using a ratio of horizontal permeability to vertical permeability of at least 10. The Director may require ratios of up to 100 if the material types and construction techniques will cause excessive stratification.
- b. The applicant shall use tests modeling the conditions being analyzed to determine the strengths used in the stability analysis. The stability analysis shall include total and effective stress strengths appropriate for the different material zones and conditions analyzed. The stability analysis shall use undrained strengths or strength parameters for all saturated materials.
- c. The applicant shall perform an analysis of the upstream slope stability for a partial pool with steady seepage considering the reservoir level that provides the lowest factor of safety.
- d. A stability analysis is not required for low hazard potential dams if the owner or the owner's engineer demonstrates that conservative slopes and competent materials are included in the design.

2. Seismic Requirements

- a. The applicant shall determine the seismic characteristics of the site as prescribed in subsection (A)(6).
- b. The applicant shall determine the liquefaction susceptibility of the embankment, foundation, and abutments. The applicant shall use standard penetration testing, cone penetration testing, shear wave velocity measurements, or a combination of these methods to make this determination. The applicant shall compute the minimum factor of safety against liquefaction at specific points and make a determination of whether the overall site is subject to liquefaction.
- c. The applicant shall determine the safety of the dam under seismic loading using a pseudo static stability analysis, computing the minimum factor of safety if the embankment, foundation or abutment is not subject to liquefaction and has a maximum peak acceleration of 0.2g or less, or a maximum peak acceleration of 0.35g or less, and consists of clay on a clay or bedrock foundation. The applicant shall use in the pseudo static stability analysis a pseudo static

coefficient that is at least 60% of the maximum peak bedrock acceleration at the site.

- d. The applicant shall compute a minimum factor of safety against overtopping due to deformation and settlement in each of the following cases. The minimum factor of safety against overtopping can be no less than 2.5, determined by dividing the total pre-earthquake freeboard by the estimated vertical settlement in feet. The applicant shall determine the total vertical settlement by adding the settlement values of the upstream and downstream slopes.
    - i. The minimum factor of safety in a pseudo static analysis is less than 1.0;
    - ii. An embankment, foundation, or abutment is not subject to liquefaction, has a maximum peak acceleration of more than 0.2g or a maximum peak acceleration of more than 0.35g and consists of clay on a clay or bedrock foundation; or
    - iii. The embankment, foundation or abutment is subject to liquefaction.
  - e. The applicant shall perform a liquefaction analysis to establish approximate boundaries of liquefiable zones and physical characteristics of the soil following liquefaction for an embankment, foundation, or abutment subject to liquefaction. The applicant shall perform an analysis of the potential for flow liquefaction.
  - f. Other, more sophisticated analytical procedures may be required by the Director for sites with high seismicity or low strength embankment or foundation soils.
3. Miscellaneous Design Requirements
    - a. The design of any significant or high hazard potential dam shall provide seepage collection and prevent internal erosion or piping due to embankment cracking or other causes.
    - b. The Director shall review the filter and permeability design for a chimney drain, drain blanket, toe drain, or outlet conduit filter diaphragms on the basis of unique site characteristics.
      - i. The minimum thickness of an internal drain is 3 feet.
      - ii. The minimum width of a chimney drain is 6 feet.
      - iii. The applicant shall filter match an internal drain to its adjacent material.
      - iv. The applicant shall design internal drains with sufficient capacity for the expected drainage without the use of drainpipes using only natural granular materials.
    - c. The use of a geosynthetic is not permitted in a design if it serves as the sole defense against dam failure. The use of geotextiles and geonets as a filter or drain material or a geomembrane liner is permitted only in a location that is easily accessible for repair or if its excavation cannot create an unsafe condition at the dam. A geosynthetic liner is allowed under special conditions and in specific situations if it is subject to monitoring and redundant safety controls. The Director may impose conditions, including monitoring appropriate to the hazard classification, inspection, and necessary repairs, each performed every 5 years.
    - d. The applicant shall use armoring on any upstream slope of an embankment dam that impounds water

for more than 30 days at a time. If the applicant uses rock riprap, it shall be well-graded, durable, sized to withstand wave action, and placed on a well-graded pervious sand and gravel bedding or geotextile with filtering capacity appropriate for the site.

- e. The applicant shall protect the downstream slopes and groins of an embankment dam from erosion.
- f. The minimum width of the top of an embankment dam is equal to the structural height of the dam divided by 5 plus an additional 5 feet. The required minimum width for any embankment dam is 12 feet. The maximum width for any embankment dam is 25 feet.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**Table 4. Inflow Design Flood**

Dam Hazard Class	Dam Size Classification	IDF Magnitude
Very Low	All Sizes	100-year
Low	All Sizes	0.25 PMF
Significant	Small Intermediate Large	0.25 PMF 0.5 PMF 0.5 PMF
High*	All Sizes	*

\* For a high hazard potential dam, the applicant shall design the dam to withstand an inflow design flood that varies from .5 PMF to the full PMF, with size increasing based on persons at risk and potential for downstream damage. The applicant shall consider foreseeable future conditions.

#### Historical Note

New Table adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**Table 5. Minimum Factors of Safety for Stability<sup>1</sup>**

Embankment Loading Condition	Minimum Factor of Safety
End of construction case – upstream and downstream slopes	1.3
End of construction case for embankments greater than 50 feet in height on weak foundations	1.4
Steady state seepage - upstream (critical partial pool) and downstream slope (full pool)	1.5
Instantaneous drawdown - upstream slope	1.2

<sup>1</sup> Not applicable to an embankment on a clay shale foundation.

#### Historical Note

New Table adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1217. Maintenance and Repair; Emergency Actions

- A. An owner shall perform general maintenance and ordinary repairs that do not impair the safety of the dam. General maintenance and ordinary repair activities listed under this subsection do not require prior approval of the Director. These repair activities include:
  1. Removing brush or tall weeds.

2. Cutting trees and removing slash from the embankment or spillway. Small stumps may be removed provided no excavation into the embankment occurs.
  3. Exterminating rodents by trapping or other methods. Rodent damage may be repaired provided it does not involve excavation that extends more than 2 feet into the embankment and replacement materials are compacted as they are placed.
  4. Repairing erosion gullies less than 2 feet deep on the embankment or in the spillway.
  5. Grading the surface on the top of the dam embankment or spillway to eliminate potholes and provide proper drainage, provided the freeboard is not reduced.
  6. Placing additional riprap and bedding on the upstream slope, or in the spillway in areas that have sustained minor damage and restoring the original riprap protection where the damage has not yet resulted in erosion and weakening of the dam.
  7. Painting, caulking, or lubricating metal structures.
  8. Patching or caulking spalled or cracked concrete to prevent deterioration.
  9. Removing debris, rock, or earth from outlet conduits or spillway channels and basins.
  10. Patching to prevent deterioration within outlet works.
  11. Replacing worn or damaged parts on outlet valves or controls to restore them to original condition or its equivalent.
  12. Repairing or replacing fences intended to keep traffic or livestock off the dam or spillway.
- B. General maintenance and ordinary repair that may impair or adversely effect safety, such as excavation into or near the toe of the dam, construction of new appurtenant structures for the dam, and repair of damage that has already significantly weakened the dam shall be performed in accordance with this Article. The Director may approve maintenance performed according to a standard detail or method of repair on file with the Department upon submittal of a letter. The Director shall determine whether general maintenance and ordinary repair activities not listed in subsection (A) will impair safety.
  - C. Emergency actions not impairing the safety of the dam may be taken before guidance can be provided by an engineer and do not require prior approval of the Director. Emergency actions do not excuse an owner's responsibility to promptly undertake a permanent solution. Emergency actions include:
    1. Stockpiling materials such as riprap, earth fill, sand, sandbags, and plastic sheeting.
    2. Lowering the reservoir level by making releases through the outlet or a gated spillway, by pumping, or by siphoning.
    3. Armoring eroded areas by placing sandbags, riprap, plastic sheeting, or other available material.
    4. Plugging leakage entrances on the upstream slope.
    5. Increasing freeboard by placing sandbags or temporary earth fill on the dam.
    6. Diverting flood waters to prevent them from entering the reservoir basin.
    7. Constructing training berms to control flood waters.
    8. Placing sandbag ring dikes or reverse filter materials around boils at the downstream toe to provide back pressure.
    9. Removing obstructions from outlet or spillway flow areas.
  - D. Emergency actions impairing the safety of the dam require prior approval of the Director. An owner shall not lower the water level by excavating the spillway or embankment unless failure is imminent.

- E. For all high and significant hazard potential dams, the emergency action plan shall be implemented with any emergency actions taken at the dam.
- F. The owner shall notify the Director immediately of any emergency condition that exists and any emergency action taken.

**Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**R12-15-1218. Safe Storage Level**

The Director has the authority to determine the safe storage level for the reservoir behind each dam, including the storage level of an existing dam while it is being repaired, enlarged, altered, breached, or removed. The elevation of the safe storage level is stated on the license. The owner shall not store water in excess of the level determined by the Director to be safe. The owner shall not place flashboards or other devices in the emergency spillway without approval of an alteration of the dam in accordance with this Article.

**Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

**R12-15-1219. Safety Inspections; Fees**

- A. Except as provided in subsection (E), the Director shall conduct a dam safety inspection annually or more frequently for each high hazard potential dam, triennially for each significant hazard potential dam, and once every five years for each low and very low hazard potential dam. An owner of a dam shall pay the inspection fee required by R12-15-105 for each inspection of the dam pursuant to this subsection.
- B. An engineer is considered qualified to provide information to the Director regarding the safe storage level of a reservoir if the engineer:
  - 1. Meets the criteria in R12-15-1202(11),
  - 2. Has three years of experience in the field of dam safety, and
  - 3. Has actual experience in conducting dam safety inspections.
- C. A dam safety inspection includes:
  - 1. Review of previous inspections, reports, and drawings;
  - 2. Inspection of the dam, spillways, outlet facilities, seepage control, and measurement systems;
  - 3. Inspection of any permanent monument or monitoring installations;
  - 4. Assessment of all parts of the dam that are related to the dam's safety; and
  - 5. A recommendation regarding the safe storage level of the reservoir.
- D. The engineer shall submit a safety inspection report that describes the findings and lists actions that will improve the safety of the dam. The report shall include the engineer's recommendation of the safe storage level. The engineer shall use a report form approved by the Director.
- E. Inspections by the Owner
  - 1. An owner may provide to the Director, at the owner's expense, a safety inspection report that complies with the requirements of subsections (B), (C), and (D) in place of an inspection by the Department. The owner's engineer shall notify the Director and submit a written summary of the engineer's qualifications at least 14 days before the scheduled safety inspection.
  - 2. The Director may refuse to accept an inspection that does not conform to this Article.
  - 3. A safety inspection report submitted pursuant to this subsection shall include the fee required by R12-15-105(D).
- F. Inspections by the Department

- 1. The Director may enter at reasonable times upon private or public property and the owner shall permit such entry, where a dam is located, including a dam under construction, reconstruction, repair, enlargement, alteration, breach, or removal, for any of the following purposes:
  - a. To enforce the conditions of approval of the construction drawings and specifications related to an application for construction, reconstruction, repair, enlargement, alteration, breach, or removal.
  - b. To inspect a dam that is subject to this Article.
  - c. To investigate or assemble data to aid review and study of the design and construction of dams, reservoirs, and appurtenances or make watershed investigations to facilitate decisions on public safety to fulfill the duties of A.R.S. § 45-1214.
  - d. To ascertain compliance with this Article and A.R.S. Title 45, Chapter 6.
- 2. Upon receipt of a complaint that a dam is endangering people or property:
  - a. The Director shall inspect the dam unless there is substantial cause to believe the complaint is without merit.
  - b. If the complainant files a complaint in writing and deposits with the Director sufficient funds to cover the costs of the inspection, the Director shall make an inspection.
  - c. The Director shall provide a written report of the inspection to the complainant and the dam owner.
  - d. If an unsafe condition is found, the Director shall cause it to be corrected and return the deposit to the complainant. If the complaint was without merit the deposit shall be paid into the general fund.
- 3. The Director may employ qualified on-call consultants to conduct inspections.
- 4. Inspections under subsection (A) shall comply with the requirements of A.R.S. § 41-1009.

**Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 16 A.A.R. 1205, effective June 15, 2010 (Supp. 10-2). Amended by exempt rulemaking at 16 A.A.R. 1950, effective September 10, 2010 (Supp. 10-3). Amended by final rulemaking at 17 A.A.R. 659, effective June 4, 2011 (Supp. 11-2).

**R12-15-1220. Existing Dams**

- A. The requirements of this Article apply to existing dams, except as provided in subsections (B) and (C).
- B. If the Director has determined that an existing dam is in a safe condition, the owner is not required to comply with R12-15-1216 unless the Director determines that it is cost effective to upgrade the dam to comply with the requirements of R12-15-1216 at the time a major alteration or major repair is planned. In determining whether it is cost effective to upgrade a dam, the Director shall consider:
  - 1. The hazard potential classification of the dam;
  - 2. Whether the cost of the upgrade would exceed 25% of the total cost of the major alteration or major repair; and
  - 3. Whether there is a more cost effective alternative that would provide an equivalent increase in safety.
- C. If the Director has determined that a dam is in an unsafe condition, the owner shall comply with the requirements in R12-15-1216. The owner is not required to comply with a requirement in this Article if the Director finds that, considering the site characteristics and the proposed design, the requirement is unduly burdensome or expensive and is not necessary to pro-

tect human life or property. The Director shall consider the size, hazard potential classification, physical site conditions, and applicability of a requirement to the dam. The Director shall state in writing the reason or reasons the owner is not required to comply with a requirement.

- D. The owner shall ensure that installation of utilities beneath or through an existing dam is accomplished by open cuts or jacking and boring methods.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1221. Emergency Action Plans

- A. Each owner of a high or significant hazard potential dam shall prepare, maintain, and exercise a written emergency action plan for immediate defensive action to prevent failure of the dam and minimize any threat to downstream development. The emergency action plan shall contain a:
1. Notification chart showing the priority for notification in an emergency situation. The owner shall notify local emergency response agencies, affected downstream populations, county emergency management agencies, and affected flood control districts;
  2. Description of the demand reservoir and scope of the emergency action plan;
  3. Delineation of potentially unsafe conditions, evaluation procedures, and triggering events that require the initiation of partial or full emergency notification procedures, based on the urgency of the situation;
  4. Delineation of areas of responsibility of the owner and other parties. The emergency action plan shall clearly identify individuals responsible for notifications and declaring an emergency;
  5. Specific notification procedure for each emergency situation anticipated;
  6. Description of emergency supplies and resources, equipment access to the site, and alternative means of communication. The emergency action plan shall also identify specific preparedness activities required, such as annual full or partial mock exercises and updates of the emergency action plan; and
  7. Map showing the area that would be subject to flooding due to spillway flows and dam failures.
- B. The owner shall use the Director's model emergency action plan, which is available at no cost, or an equivalent model, for guidance in preparing the emergency action plan.
- C. The owner shall submit a copy of the proposed emergency action plan for review by the Arizona Division of Emergency Management and all local emergency coordinators involved in the plan. The owner shall incorporate appropriate recommendations generated by the reviews and submit the revised emergency action plan to the Department.
- D. The owner shall review and update the emergency action plan annually or more frequently to incorporate changes such as new personnel, changing roles of emergency agencies, emergency response resources, conditions of the dam, and information learned from mock exercises. The owner shall send updated portions of the plan to persons and agencies holding copies of the plan within 15 days after preparation of an update.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1222. Right of Review

- A. An applicant or owner aggrieved by a decision of the Director regarding the determination of hazard classification, jurisdictional status, or the Director's application of this Article may seek review of an appealable agency action under A.R.S. Title 41, Chapter 6, Article 10.
- B. An applicant or owner aggrieved by a decision of the Director that requires the exercise of professional engineering judgment or discretion or the assessment of risk to human life or property, such as the adequacy of an applicant's project documentation, dam design, safe storage level, requirements for existing dams, or maintenance, may seek review by a board of review under A.R.S. §§ 45-1210 and 45-1211.
- C. The following actions are not subject to review:
1. Emergency measures taken under A.R.S. §§ 45-1212 or 45-1221.
  2. Agency decisions made under A.R.S. §§ 41-1009(E) or (F).
  3. Agency actions made exempt from review by law.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1223. Enforcement Authority

- A. The Department may exercise its discretion to take action necessary to prevent danger to human life or property. The Director may take any legal action that is proper and necessary for the enforcement of this Chapter.
- B. If the Director has cause to believe that a dam is unsafe or a person is violating or has violated a provision of this Article or A.R.S. Title 45, Chapter 6, Article 1, the Director may issue a notice directing the owner to remedy the safety deficiency or correct the violation. The owner may appeal a notice issued under this subsection as an appealable agency action in accordance with A.R.S. Title 41, Chapter 6, Article 10. If the owner does not appeal within 30 days after the date on the notice, the notice becomes final and may be incorporated as a condition of any license based on the duration of the requirement.
- C. If the Director has cause to believe that a dam is unsafe or a person is violating or has violated a provision of this Article or A.R.S. Title 45, Chapter 6, Article 1, the Director may proceed under A.R.S. § 45-1221 to initiate a contested case under A.R.S. Title 41, Chapter 6, Article 10 by requesting an administrative hearing.
- D. Following a written decision by an administrative law judge, the Director shall issue a decision and order accepting, rejecting, or modifying the administrative law judge's decision. Upon expiration of time to appeal, the decision and order becomes final and may be incorporated as a condition of any license based on the duration of the requirement.
- E. If the Director has cause to believe that a dam is unsafe or a person is violating or has violated a provision of this Article or A.R.S. Title 45, Chapter 6, Article 1 the Director may commence an action in a court of appropriate jurisdiction if:
1. The violation is an emergency requiring appropriate steps to be taken without delay; or
  2. The Director has cause to believe that use of the administrative procedure would be ineffective or that delay would ensue and a deterioration in the safety of the dam would occur.
- F. If the Director commences an action it shall be brought in a court of appropriate jurisdiction in which:
1. The cause or some part of the cause arose; or
  2. The owner or person complained of has his or her place of business; or
  3. The owner or person complained of resides.

- G. A person determined to be in violation of this Article; A.R.S. Title 45, Chapter 6; a license; or order may be assessed a civil penalty not exceeding \$1,000 per day of violation. The Director may offer evidence relating to the amount of the penalty in accordance with A.R.S. § 45-1222.
- H. A violation of A.R.S. Title 45, Chapter 6, Article 1 regarding Supervision of Dams, Reservoirs, and Projects is a class 2 misdemeanor, in accordance with A.R.S. § 45-1216.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1224. Emergency Procedures

- A. The owner of a dam shall immediately notify the Department and responsible authorities in adjacent and downstream communities, including emergency management authorities, of a condition that may threaten the safety of the dam. The owner shall take necessary actions to protect human life and property, including action required under an emergency action plan or order issued under this Article.
  1. A condition that may threaten the safety of a dam includes:
    - a. Sliding of upstream or downstream slopes or abutments contiguous to the dam;
    - b. Sudden subsidence of the top of the dam;
    - c. Longitudinal or transverse cracking of the top of the dam;
    - d. Unusual release of water from the downstream slope or face of the dam;
    - e. Other unusual conditions at the downstream slope of the dam;
    - f. Significant landslides in the reservoir area;
    - g. Increasing volume of seepage;
    - h. Cloudy seepage or recent deposits of soil at seepage exit points;
    - i. Sudden cracking or displacement of concrete in a concrete or masonry dam spillway or outlet works;
    - j. Loss of freeboard or dam cross section due to storm wave erosion;
    - k. Flood waters overtopping an embankment dam; or
    - l. Spillway backcutting that threatens evacuation of the reservoir.
  2. In case of an emergency, the owner shall telephone the Arizona Department of Public Safety's emergency numbers at (800) 411-2336 or (602) 223-2000.
- B. The Director shall issue an emergency approval to repair, alter, or remove an existing dam if the Director finds that immediate remedial action is necessary to alleviate an imminent threat to human life or property.
  1. The emergency approval shall be provided in writing on a form developed for this purpose.
  2. The emergency approval may contain conditions the Director determines are appropriate to protect human life or property.
  3. The emergency approval is effective immediately for 30 days after notice is issued unless extended in writing by the Director. The Director shall also send notice to the county flood control district of the county in which the dam is located, all municipalities within 5 miles downstream of the dam, and any additional persons identified in the emergency action plan.
  4. The Director may institute legal or administrative proceedings that the Director deems appropriate for violations of the emergency approval or conditions of the emergency approval.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1225. Emergency Repairs

- A. The Director shall use monies from the dam repair fund, established under A.R.S. § 45-1212.01 to employ any remedial measure necessary to protect human life and property resulting from a condition that threatens the safety of a dam if the dam owner is unable or unwilling to take action and there is not sufficient time to issue and enforce an order.
- B. The deputy director may authorize an expenditure not to exceed \$10,000 from the dam repair fund for remedial measures under A.R.S. § 45-1212. The expenditure of any additional funds shall be approved by the Director.
- C. The Director shall hold a lien against all property of the owner in accordance with A.R.S. § 45-1212.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

#### R12-15-1226. Non-Emergency Repairs; Loans and Grants

- A. If the Director determines that a dam represents a threat to human life and property but is not in an emergency condition, the Director may use the dam repair fund, established under A.R.S. § 45-1212.01, as prescribed in this Article to defray the costs of repair.
- B. Monies from the dam repair fund may be used for loans and grants to owners as provided in A.R.S. §§ 45-1218 and 45-1219.
- C. To qualify for a loan or grant from the dam repair fund, a dam shall be classified as unsafe by the Director.
- D. The Director may authorize grant funds for all or part of the cost of engineering studies or construction needed to mitigate the threat to human life and property created by a dam.
  1. The Director and the grantee shall execute a financial assistance agreement that includes terms of financial assistance, the work progress, and payment schedule.
  2. The Director shall disburse grant funds in accordance with the financial assistance agreement.
  3. The Director shall establish a priority ranking for grants based on factors including the potential for failure of a dam, the number of lives at risk, and the capability of the owner to pay a portion of the costs.
- E. The Director may loan funds for engineering studies or for all or part of construction as prescribed in A.R.S. § 45-1218.
  1. The Director and the dam owner shall execute a loan repayment agreement. The loan repayment agreement shall be delivered to and held by the Department.
  2. The Director shall establish a priority ranking for loans based on factors including the potential for failure of a dam, the number of human lives at risk, and the capability of the owner to pay a portion of the costs.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2558, effective June 12, 2000 (Supp. 00-2).

### ARTICLE 13. WELL SPACING REQUIREMENTS; REPLACEMENT WELLS IN APPROXIMATELY THE SAME LOCATION

#### R12-15-1301. Definitions

In addition to the definitions in A.R.S. §§ 45-101, 45-402, and 45-591, the following words and phrases in this Article shall have the following meanings, unless the context otherwise requires:

1. "Abandoned well" means a well for which a well abandonment completion report has been filed pursuant to

## Department of Water Resources

- R12-15-816(E) or for which a notification of abandonment has been filed pursuant to R12-15-816(K).
2. "Additional drawdown" means a lowering in the water levels surrounding a well that is the result of the operation of the well and that is not attributable to existing regional rates of decline or existing impacts from other wells.
  3. "Applicant" means any of the following:
    - a. A person who has filed an application for a permit to construct a new well or a replacement well in a new location under A.R.S. § 45-599;
    - b. A person who has filed an application for a recovery well permit under A.R.S. § 45-834.01 for a new well as defined in A.R.S. § 45-591 or, except as provided in A.R.S. § 45-834.01(B)(2) or (3), an existing well as defined in A.R.S. § 45-591;
    - c. A person who has filed an application for approval to use a well to withdraw groundwater for transportation to an active management area under A.R.S. § 45-559; or
    - d. A person, other than a city, town, private water company, or irrigation district, who has filed an application for a water exchange permit under A.R.S. § 45-1041.
  4. "ADEQ" means the Arizona Department of Environmental Quality.
  5. "Contaminated groundwater" means groundwater that has been contaminated by a release of a hazardous substance, as defined in A.R.S. § 49-201, or a pollutant, as defined in A.R.S. § 49-201.
  6. "DOD" means the United States Department of Defense.
  7. "EPA" means the United States Environmental Protection Agency.
  8. "LCR plateau groundwater transporter" means a person transporting groundwater from the Little Colorado River plateau groundwater basin to another groundwater basin pursuant to A.R.S. § 45-544(B)(1).
  9. "Notice of water exchange participant" means a person, other than a city, town, private water company, or irrigation district, named as a participant in a water exchange in a notice of water exchange filed under A.R.S. § 45-1051.
  10. "Original well" means the well replaced by a replacement well in approximately the same location, except that if the replacement well is the latest in a succession of two or more wells drilled as replacement wells in approximately the same location under R12-15-1308 or temporary rule R12-15-840 adopted by the director on March 11, 1983, "original well" means the well replaced by the first replacement well in approximately the same location.
  11. "Remedial action site" means any of the following:
    - a. The site of a remedial action undertaken pursuant to the comprehensive environmental response, compensation, and liability act ("CERCLA") of 1980, as amended, 42 U.S.C. 9601, et seq., commonly known as a "superfund" site;
    - b. The site of a corrective action undertaken pursuant to A.R.S. Title 49, Chapter 6, commonly known as a leaking underground storage tank ("LUST") site;
    - c. The site of a voluntary remediation action undertaken pursuant to A.R.S. Title 49, Chapter 1, Article 5;
    - d. The site of a remedial action undertaken pursuant to A.R.S. Title 49, Chapter 2, Article 5, commonly known as a water quality assurance revolving fund ("WQARF") site;
    - e. The site of a remedial action undertaken pursuant to the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901, et seq.; or
    - f. The site of remedial action undertaken pursuant to the Department of Defense Environmental Restoration Program, 10 U.S.C. 2701, et seq., commonly known as a "Department of Defense site" or a "DOD site."
  12. "Replacement well" means a well drilled for the purpose of replacing another well.
  13. "Replacement well in a new location" means a replacement well that does not qualify as a replacement well in approximately the same location under R12-15-1308.
  14. "Replacement well in approximately the same location" means a replacement well that qualifies as a replacement well in approximately the same location under R12-15-1308.
  15. "Well" has the meaning prescribed in A.R.S. § 45-402. An abandoned well is not a well.
  16. "Well of record" means, with respect to an applicant, an LCR plateau groundwater transporter, or a notice of water exchange participant, any well or proposed well not owned by the applicant, LCR plateau groundwater transporter, or notice of water exchange participant, or proposed to be drilled by the applicant, LCR plateau groundwater transporter, or notice of water exchange participant, to which any of the following apply:
    - a. The well is an existing well as defined in A.R.S. § 45-591 and the owner or operator has registered the well with the Department, unless the current well information on file with the Department identifies the sole purpose or purposes of the well as one or more of the following:
      - i. Cathodic protection;
      - ii. Use as a sump pump or heat pump;
      - iii. Air sparging;
      - iv. Injection of liquids or gasses into the aquifer or vadose zone, including injection wells that are part of an underground storage facility permitted under A.R.S. Title 45, Chapter 3.1;
      - v. Monitoring water levels or water quality, including a piezometer well;
      - vi. Obtaining geophysical, mineralogical, or geotechnical data;
      - vii. Grounding;
      - viii. Soil vapor extraction;
      - ix. Electrical energy generation pursuant to a temporary permit for electrical energy generation issued under A.R.S. § 45-517;
      - x. Dewatering pursuant to a dewatering permit issued under A.R.S. § 45-513 or a temporary dewatering permit issued under A.R.S. § 45-518;
      - xi. Drainage pursuant to a drainage water withdrawal permit issued under A.R.S. § 45-519; or
      - xii. Hydrologic testing pursuant to a hydrologic testing permit issued under A.R.S. § 45-519.01.
    - b. The well is a new well as defined in A.R.S. § 45-591 for which a notice of intention to drill was not filed pursuant to A.R.S. § 45-596 and for which a permit was not issued pursuant to A.R.S. §§ 45-599 or 45-834.01, and the owner or operator has registered the well with the Department, unless the current well information on file with the Department identifies the sole purpose or purposes of the well as one or

- more of the purposes in subsection (16)(a)(i) through (xii) of this Section;
- c. A filing has been made for the well pursuant to A.R.S. § 45-596(A) or (B), unless any of the following apply:
    - i. The filing has expired pursuant to A.R.S. § 45-596(E);
    - ii. The filing identifies the sole purpose or purposes of the well as one or more of the purposes in subsection (16)(a)(i) through (xii) of this Section; or
    - iii. The well is an exempt well and the director is prohibited by A.R.S. § 45-454(D)(4) from considering impacts on the well when determining whether to approve or reject a permit application filed under A.R.S. § 45-599.
  - d. An application for a permit to drill the well has been received by the Department pursuant to A.R.S. § 45-599, unless the application has been rejected after exhaustion of all administrative and judicial appeals or the permit issued pursuant to the application has been revoked or has expired according to its terms or for failure to complete the well in a timely manner pursuant to A.R.S. § 45-599(G);
  - e. An application for a permit pursuant to A.R.S. §§ 45-514 or 45-516 has been received by the Department pursuant to A.R.S. § 45-521, unless the application has been rejected after exhaustion of all administrative and judicial appeals or the permit issued pursuant to the application has been revoked or has expired according to its terms or for failure to complete the well before expiration of the drilling authority; or
  - f. An application for a permit to drill a recovery well has been received by the Department pursuant to A.R.S. § 45-834.01, unless the application has been rejected after exhaustion of all administrative and judicial appeals or the permit issued pursuant to the application has been revoked or has expired according to its terms or for failure to complete the well in a timely manner pursuant to A.R.S. § 45-834.01(F).

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### **R12-15-1302. Well Spacing Requirements - Applications to Construct New Wells or Replacement Wells in New Locations Under A.R.S. § 45-599**

- A. The director shall not approve an application for a permit to construct a new well or a replacement well in a new location under A.R.S. § 45-599 if the director determines that the withdrawals from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B) of this Section.
- B. The director shall determine that the withdrawals from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells if any of the following apply:
  1. Except as provided in subsection (D) of this Section, the director determines that the probable impact of the withdrawals from the proposed well or wells on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of operation of the proposed well or wells. To assist the director in making a determination under

this subsection, the applicant may submit a hydrological study delineating those areas surrounding the proposed well or wells in which the projected impacts on water levels will exceed 10 feet of additional drawdown after the first five years of operation of the proposed well or wells. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection;

2. The director determines that the proposed well or wells will be located in an area of known land subsidence and the withdrawals from the proposed well or wells will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the withdrawals from the proposed well or wells on regional land subsidence. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  3. Except as provided in subsection (E) of this Section, the director determines, after consulting with ADEQ, that withdrawals from the proposed well or wells will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence as of the date of the receipt of the application, resulting in a degradation of the quality of the water withdrawn from the well of record so that the water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated through the implementation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study demonstrating whether the withdrawals from the proposed well or wells will have the effect described in this subsection. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection.
- C. In making a determination under subsection (B)(1), (B)(2), or (B)(3) of this Section, if the proposed well is a replacement well in a new location, the director shall take into account the collective effects of reducing or terminating withdrawals from the well being replaced combined with the proposed withdrawals from the replacement well if the applicant submits a hydrological study demonstrating those collective effects to the satisfaction of the director.
  - D. If the director determines under subsection (B)(1) of this Section that the probable impact of the withdrawals from the proposed well or wells on one or more wells of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of operation of the proposed well or wells, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the withdrawals from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director,

the applicant submits one of the following for each well of record identified in the notice:

1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals from the proposed well or wells. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E. If the director determines that withdrawals from the proposed well or wells will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence as of the date of receipt of the application, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the withdrawals from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals from the proposed well or wells. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- F. At any time before a final determination under this Section, the applicant may:
1. Amend the application to change the location of the proposed well or wells or the amount of groundwater to be withdrawn from the proposed well or wells to lessen the degree of impact on wells of record or regional land subsidence; or
  2. Agree to construct or operate the proposed well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. The director shall indicate in the well permit that compliance with the agreement is a condition of the well permit.

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### **R12-15-1303. Well Spacing Requirements - Applications for Recovery Well Permits Under A.R.S. § 45-834.01**

- A. The director shall not approve an application for a recovery well permit under A.R.S. § 45-834.01 that is filed for a new well as defined in A.R.S. § 45-591 or, except as provided in A.R.S. § 45-834.01(B)(2) or (3), for an existing well as defined in A.R.S. § 45-591, if the director determines that the recovery of stored water from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B) of this Section.
- B. The director shall determine that the recovery of stored water from the proposed well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells if any of the following apply:
  1. Except as provided in subsection (D) of this Section, the director determines that the probable impact of the recovery of stored water from the proposed well or wells on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of the recovery of stored water from the proposed well or wells. To assist the director in making a determination under this subsection, the applicant shall submit with the application a hydrological study delineating those areas surrounding the proposed well or wells in which the projected impacts on water levels will exceed 10 feet of additional drawdown after the first five years of the recovery of stored water from the proposed well or wells;
  2. The director determines that the proposed recovery well or wells will be located in an area of known land subsidence and the recovery of stored water from the proposed well or wells will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the recovery of stored water from the proposed recovery well or wells on regional land subsidence. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  3. Except as provided in subsection (E) of this Section, the director determines, after consulting with ADEQ, that the recovery of stored water from the proposed well or wells will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence as of the date of receipt of the application, resulting in a degradation of the quality of the water withdrawn from the well of record so that the water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated through the implementation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study demonstrating whether the recovery of stored water from the proposed well or wells will have the effect described in this subsection. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection.
- C. In making a determination under subsection (B)(1), (B)(2), or (B)(3) of this Section:
  1. If the proposed recovery well is a replacement well in a new location, the director shall take into account the collective effects of reducing or terminating withdrawals from the well being replaced combined with the proposed recovery of stored water from the replacement well if the applicant submits a hydrological study demonstrating those collective effects to the satisfaction of the director.
  2. If the proposed recovery well will be located within the area of impact, as defined in A.R.S. § 45-802.01, of an underground storage facility and the applicant will account for all of the water recovered from the well as water stored at the facility, the director shall take into account the effects of water storage at the facility on the proposed recovery of stored water from the recovery well

if the applicant submits a hydrological study demonstrating those effects to the satisfaction of the director.

- D.** If the director determines under subsection (B)(1) of this Section that the probable impact of the recovery of stored water from the proposed recovery well or wells on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of operation of the proposed well or wells, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the recovery of stored water from the proposed recovery well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
1. A signed and notarized consent form from the owner of the well of record consenting to the recovery of stored water from the proposed recovery well or wells. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E.** If the director determines that the recovery of stored water from the proposed recovery well or wells will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence as of the date of receipt of the application, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the recovery of stored water from the proposed recovery well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
1. A signed and notarized consent form from the owner of the well of record consenting to the recovery of stored water from the proposed recovery well or wells. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- F.** At any time before a final determination under this Section, the applicant may:
1. Amend the application to change the location of the proposed recovery well or wells or the amount of stored water to be recovered from the proposed recovery well or wells to lessen the degree of impact on wells of record or regional land subsidence; or
  2. Agree to construct or operate the proposed recovery well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. The director shall indicate in the recovery well permit that compliance with the agreement is a condition of the recovery well permit.

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### **R12-15-1304. Well Spacing Requirements - Wells Withdrawing Groundwater From the Little Colorado River Plateau Groundwater Basin for Transportation to Another Groundwater Basin Under A.R.S. § 45-544(B)(1)**

- A.** An LCR plateau groundwater transporter may not withdraw groundwater from a well or wells drilled in the Little Colorado river plateau groundwater basin after January 1, 1991, except a replacement well in approximately the same location or a well drilled after that date pursuant to a notice of intention to drill filed on or before that date, for transportation away from the basin pursuant to A.R.S. § 45-544(B)(1) if the director determines that the withdrawals for that purpose will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B) of this Section.
- B.** The director shall determine that the withdrawals of groundwater from the well or wells will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells if any of the following apply:
1. Except as provided in subsection (D) of this Section, the director determines that the probable impact of the withdrawals of groundwater from the well or wells on any well of record in existence when the withdrawals commenced or are proposed to commence will exceed 10 feet of additional drawdown after the first five years of the withdrawals. To assist the director in making a determination under this subsection, the LCR plateau groundwater transporter may submit to the director a hydrological study delineating those areas surrounding the LCR plateau groundwater transporter's well or wells in which the projected impacts on water levels will exceed 10 feet of additional drawdown after the first five years of the withdrawals. The director may require the LCR plateau groundwater transporter to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection;
  2. The director determines that the well or wells from which the groundwater is withdrawn are located in an area of known land subsidence and the withdrawals of groundwater will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the LCR plateau groundwater transporter may submit to the director a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the withdrawals on regional land subsidence. The director may require the LCR plateau groundwater transporter to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  3. Except as provided in subsection (E) of this Section, the director determines, after consulting with ADEQ, that the withdrawals of groundwater from the well or wells will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence when the groundwater withdrawals commenced or are proposed to commence, resulting in a degradation of the quality of the water withdrawn from the well of record so that the water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated

through the implementation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the LCR plateau groundwater transporter may submit to the director a hydrological study demonstrating whether the withdrawals of groundwater will have the effect described in this subsection. The director may require the LCR plateau groundwater transporter to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection.

- C. In making a determination under subsection (B)(1), (B)(2), or (B)(3) of this Section, if a well from which the groundwater is withdrawn is a replacement well in a new location, the director shall take into account the collective effects of reducing or terminating withdrawals from the well being replaced combined with the withdrawals from the replacement well if the LCR plateau groundwater transporter submits a hydrological study demonstrating those collective effects to the satisfaction of the director.
- D. If the director determines under subsection (B)(1) of this Section that the probable impact of the withdrawals of groundwater from the well or wells on any well of record in existence when the withdrawals commenced or are proposed to commence will exceed 10 feet of additional drawdown after the first five years of the withdrawals, the director shall notify the LCR plateau groundwater transporter in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the withdrawals will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the LCR plateau groundwater transporter submits one of the following for each well of record identified in the notice:
  1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals. The LCR plateau groundwater transporter shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the LCR plateau groundwater transporter made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E. If the director determines that the withdrawals of groundwater from the well or wells will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence when the groundwater withdrawals commenced or are proposed to commence, the director shall notify the LCR plateau groundwater transporter in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the withdrawals will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the LCR plateau groundwater transporter submits one of the following for each well of record identified in the notice:
  1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals. The LCR plateau groundwater transporter shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the LCR plateau groundwater transporter made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- F. At any time before a final determination under this Section, the LCR plateau groundwater transporter may agree to construct or operate the well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. Compliance with the agreement is a condition for the use of the well or wells to withdraw groundwater for transportation away from the basin pursuant to A.R.S. § 45-544(B)(1).

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### **R12-15-1305. Well Spacing Requirements - Applications to Use a Well to Withdraw Groundwater for Transportation to an Active Management Area Under A.R.S. § 45-559**

- A. The director shall not approve an application to use a well or wells constructed after September 21, 1991, to withdraw groundwater for transportation to an active management area under A.R.S. § 45-559 if the director determines that the withdrawals for that purpose will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B) of this Section.
- B. The director shall determine that the withdrawals of groundwater will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells if any of the following apply:
  1. Except as provided in subsection (C) of this Section, the director determines that the probable impact of the groundwater withdrawals on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of the withdrawals. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study delineating those areas surrounding the proposed well or wells in which the projected impacts of the groundwater withdrawals on water levels will exceed 10 feet of additional drawdown after the first five years of the withdrawals. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection;
  2. The director determines that the proposed well or wells will be located in an area of known land subsidence and the groundwater withdrawals will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the groundwater withdrawals on regional land subsidence. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  3. Except as provided in subsection (D) of this Section, the director determines, after consulting with ADEQ, that the groundwater withdrawals will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence as of the date of receipt of the application, resulting in a degradation of the quality of the water withdrawn from the well of record so that the

water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated through the implementation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study demonstrating whether the groundwater withdrawals will have the effect described in this subsection. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection.

- C. If the director determines under subsection (B)(1) of this Section that the probable impact of the groundwater withdrawals on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of the withdrawals, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the groundwater withdrawals will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
  - 1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals. The applicant shall use the consent form furnished by the director; or
  - 2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- D. If the director determines that the groundwater withdrawals will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence as of the date of receipt of the application, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the groundwater withdrawals will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
  - 1. A signed and notarized consent form from the owner of the well of record consenting to the withdrawals. The applicant shall use the consent form furnished by the director; or
  - 2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E. At any time before a final determination under this Section, the applicant may:
  - 1. Amend the application to change the location of the proposed well or wells or the amount of groundwater to be withdrawn from the proposed well or wells to lessen the

degree of impact on wells of record or regional land subsidence; or

- 2. Agree to construct or operate the proposed well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. The director shall indicate in the permit that compliance with the agreement is a condition of the permit to use the well or wells to withdraw groundwater for transportation to an active management area under A.R.S. § 45-559.

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### R12-15-1306. Well Spacing Requirements - Applications for Water Exchange Permits Under A.R.S. § 45-1041

- A. The director shall not approve an application for a water exchange permit filed under A.R.S. § 45-1041 by a person other than a city, town, private water company or irrigation district if the director determines that any new or increased pumping by the applicant from a well or wells within an active management area pursuant to the water exchange will cause unreasonably increasing damage to surrounding land or other water users under subsection (B) of this Section.
- B. The director shall determine that new or increased pumping by the applicant from a well or wells within an active management area will cause unreasonably increasing damage to surrounding land or other water users if any of the following apply:
  - 1. Except as provided in subsection (C) of this Section, the director determines that the probable impact of the new or increased pumping on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of the pumping. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study delineating those areas surrounding the proposed well or wells in which the projected impacts of the new or increased pumping on water levels will exceed 10 feet of additional drawdown after the first five years of the pumping. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection;
  - 2. The director determines that the new or increased pumping will occur in an area of known land subsidence and the pumping will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the applicant may submit a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the new or increased pumping on regional land subsidence. The director may require the applicant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  - 3. Except as provided in subsection (D) of this Section, the director determines, after consulting with ADEQ, that the new or increased pumping will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence as of the date of receipt of the application, resulting in a degradation of the quality of the water withdrawn from the well of record so that the water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated through the imple-

mentation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the applicant may submit with the application a hydrological study demonstrating whether the new or increased pumping will have the effect described in this subsection. If the applicant does not submit such a hydrological study with the application, the director may require the applicant to submit the study if the director determines that the study will assist the director in making a determination under this subsection.

- C. If the director determines under subsection (B)(1) of this Section that the probable impact of the new or increased pumping on any well of record in existence as of the date of receipt of the application will exceed 10 feet of additional drawdown after the first five years of the pumping, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the new or increased pumping will cause unreasonably increasing damage to surrounding land or other water users under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
  1. A signed and notarized consent form from the owner of the well of record consenting to the new or increased pumping. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- D. If the director determines that the new or increased pumping will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence as of the date of receipt of the application, the director shall notify the applicant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the new or increased pumping will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the applicant submits one of the following for each well of record identified in the notice:
  1. A signed and notarized consent form from the owner of the well of record consenting to the new or increased pumping. The applicant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the applicant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E. At any time before a final determination under this Section, the applicant may:
  1. Amend the application to change the location of the proposed well or wells or the amount of the new or increase pumping to lessen the degree of impact on wells of record or regional land subsidence; or
  2. Agree to construct or operate the proposed well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. The director shall

indicate in the water exchange permit that compliance with the agreement is a condition of the water exchange permit.

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 2193, effective August 7, 2006 (Supp. 06-2).

#### R12-15-1307. Well Spacing Requirements - Notices of Water Exchange Under A.R.S. § 45-1051

- A. A notice of water exchange participant may not participate in a water exchange for which a notice is filed under A.R.S. § 45-1051 if the director determines that any new or increased pumping by the person from a well or wells within an active management area pursuant to the water exchange will cause unreasonably increasing damage to surrounding land or other water users under subsection (B) of this Section.
- B. The director shall determine that new or increased pumping from the well or wells in an active management area will cause unreasonably increasing damage to surrounding land or other water users if any of the following apply:
  1. Except as provided in subsection (C) of this Section, the director determines that the probable impact of the new or increased pumping on any well of record in existence when the pumping commenced or is proposed to commence will exceed 10 feet of additional drawdown after the first five years of the pumping. To assist the director in making a determination under this subsection, the notice of water exchange participant may submit to the director a hydrological study delineating those areas surrounding the notice of water exchange participant's well or wells in which the projected impacts of the new or increased pumping on water levels will exceed 10 feet of additional drawdown after the first five years of the pumping. The director may require the notice of water exchange participant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection;
  2. The director determines that the new or increased pumping is in an area of known land subsidence and the pumping will likely cause unreasonably increasing damage from additional regional land subsidence. To assist the director in making a determination under this subsection, the notice of water exchange participant may submit to the director a hydrological study, which may include a geophysical evaluation, demonstrating the impact of the pumping on regional land subsidence. The director may require the notice of water exchange participant to submit such a hydrological study if the director determines that the study will assist the director in making a determination under this subsection; or
  3. Except as provided in subsection (D) of this Section, the director determines, after consulting with ADEQ, that the new or increased pumping will likely cause the migration of contaminated groundwater from a remedial action site to a well of record in existence when the pumping commenced or is proposed to commence, resulting in a degradation of the quality of the water withdrawn from the well of record so that the water will no longer be usable for the purpose for which it is currently being used without additional treatment, and that the damage to the owner of the well of record will not be prevented or adequately mitigated through the implementation of a program regulated under Title 49 of the Arizona Revised Statutes, or a program regulated by EPA or DOD. To assist the director in making a determination under this subsection, the notice of water exchange participant may submit to the director

a hydrological study demonstrating whether the new or increased pumping will have the effect described in this subsection. The director may require the notice of water exchange participant to submit such a study if the director determines that the study will assist the director in making a determination under this subsection.

- C. If the director determines under subsection (B)(1) of this Section that the probable impact of the new or increased pumping on any well of record in existence when the pumping commenced or is proposed to commence will exceed 10 feet of additional drawdown after the first five years of the pumping, the director shall notify the notice of water exchange participant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the new or increased pumping will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(1) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the notice of water exchange participant submits one of the following for each well of record identified in the notice:
1. A signed and notarized consent form from the owner of the well of record consenting to the new or increased pumping. The notice of water exchange participant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the notice of water exchange participant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- D. If the director determines that the new or increased pumping will have the effect described in subsection (B)(3) of this Section on one or more wells of record in existence when the pumping commenced or is proposed to commence, the director shall notify the notice of water exchange participant in writing of the location of the wells of record and the names and addresses of the owners of the wells as shown in the Department's well registry. The director shall not determine that the new or increased pumping will cause unreasonably increasing damage to surrounding land or other water users from the concentration of wells under subsection (B)(3) of this Section if within 60 days after the date on the notice, or a longer time period approved by the director, the notice of water exchange participant submits one of the following for each well of record identified in the notice:
1. A signed and notarized consent form from the owner of the well of record consenting to the new or increased pumping. The notice of water exchange participant shall use the consent form furnished by the director; or
  2. Evidence satisfactory to the director that the address of the owner of the well of record as shown in the Department's well registry records is inaccurate and that the notice of water exchange participant made a reasonable attempt to locate the current owner of the well of record but was unable to do so.
- E. At any time before a final determination under this Section, the notice of water exchange participant may agree to construct or operate the well or wells in a manner that lessens the degree of impact on wells of record or regional land subsidence. Compliance with the agreement is a condition for the use of the well to pump water for the water exchange.

#### Historical Note

New Section made by final rulemaking at 12 A.A.R.

2193, effective August 7, 2006 (Supp. 06-2).

#### R12-15-1308. Replacement Wells in Approximately the Same Location

- A. For purposes of A.R.S. §§ 45-544, 45-596, and 45-597, a replacement well in approximately the same location is a proposed well to which all of the following apply:
1. The proposed well will be located no greater than 660 feet from the original well, and the location of the original well can be determined at the time the notice of intention to drill the proposed well is filed;
  2. Except as provided in subsections (A)(3) and (A)(4) of this Section, the proposed well will not annually withdraw an amount of water in excess of the maximum annual capacity of the original well. The director shall determine the maximum annual capacity of the original well by multiplying the maximum pump capacity of the original well in gallons per minute by 525,600, and then converting the result into acre-feet by dividing the result by 325,851 gallons. The director shall presume that the maximum pump capacity of the original well is the maximum pump capacity of the well in gallons per minute as shown in the Department's well registry records, except that:
    - a. If the director has reason to believe that the maximum pump capacity as shown in the Department's well registry records is inaccurate, or if the applicant submits evidence demonstrating that the maximum pump capacity as shown in the Department's well registry records is inaccurate, the director shall determine the maximum pump capacity by considering all available evidence, including the depth and diameter of the well and any evidence submitted by the applicant; or
    - b. If the Department's well registry records do not show the maximum pump capacity of the original well, the director shall not approve the proposed well as a replacement well in approximately the same location unless the applicant demonstrates to the director's satisfaction the maximum pump capacity of the original well;
  3. If a well permit was issued for the original well under A.R.S. § 45-599, the proposed well will not annually withdraw an amount of groundwater in excess of the maximum annual volume set forth in the well permit;
  4. If a recovery well permit was issued for the well to be replaced pursuant to A.R.S. § 45-834.01(B) and the permit sets forth a maximum annual volume of stored water that may be recovered from the well, the proposed well will not annually recover an amount of stored water in excess of the maximum annual volume set forth in the recovery well permit;
  5. If the well to be replaced has been physically abandoned in accordance with R12-15-816, a notice of intention to drill the proposed well is filed no later than 90 days after the well to be replaced was physically abandoned; and
  6. If the proposed well will be used to withdraw groundwater from the Little Colorado river plateau groundwater basin for transportation away from the basin pursuant to A.R.S. § 45-544(B)(1), one of the following applies:
    - a. The original well was drilled on or before January 1, 1991, or was drilled after that date pursuant to a notice of intention to drill that was on file with the Department on that date; or
    - b. The director previously determined that the withdrawal of groundwater from the original well for transportation away from the Little Colorado river

plateau groundwater basin complies with R12-15-1304.

- B. After a replacement well in approximately the same location is drilled, the replacement well may be operated in conjunction with the original well and any other wells that replaced the original well if the total annual withdrawals from all wells do not exceed the maximum amount allowed under subsection (A)(2), (A)(3), or (A)(4) of this Section, whichever applies.
- C. A proposed well may be drilled as a replacement well in approximately the same location for more than one original well if the criteria in subsections (A)(1), (A)(5), and (A)(6) of this Section are met with respect to each original well and if the total annual withdrawals from the proposed well will not

exceed the combined maximum annual amounts allowed for each original well under subsections (A)(2), (A)(3), or (A)(4) of this Section, whichever apply.

- D. The director may include conditions in the approval of the notice of intention to drill the replacement well to ensure that the drilling and operation of the replacement well meets the requirements of this Section.

**Historical Note**

New Section made by final rulemaking at 12 A.A.R.  
2193, effective August 7, 2006 (Supp. 06-2).

## **Replacement Check List**

For rules filed within the

4th Quarter

October 1 – December 31, 2016

# **THE ARIZONA ADMINISTRATIVE CODE**

Within the stated calendar quarter, this Chapter contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law.

These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information.

Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

**PUBLISHER**  
**Arizona Department of State**  
**Office of the Secretary of State, Public Services Division**

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
PUBLIC SERVICES DIVISION  
December 31, 2016

---

### RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

### ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2016 is cited as Supp. 16-1.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

### ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

### HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, [www.azsos.gov/services/legislative-filings](http://www.azsos.gov/services/legislative-filings).

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.*

## TITLE 14. PUBLIC SERVICE CORPORATIONS; CORPORATIONS AND ASSOCIATIONS; SECURITIES REGULATION

### CHAPTER 5. CORPORATION COMMISSION - TRANSPORTATION

*Editor's Note: The Office of the Secretary of State publishes all Code Chapters on white paper (Supp. 02-2).*

*Editor's Note: The Corporation Commission has determined that rules in this Chapter are exempt from the Attorney General certification provisions of the Arizona Administrative Procedure Act (A.R.S. § 41-1041) by a court order (State ex. rel. Corbin v. Arizona Corporation Commission, 174 Ariz. 216 848 P.2d 301 (App. 1992)). This exemption means that the rule was not certified by the Attorney General. Because this Chapter was filed under a rulemaking exemption, as determined by the Corporation Commission, other than a statutory exemption, the Chapter is printed on green paper.*

*New Article 2 consisting of Sections R14-5-201 through R14-5-205 adopted effective October 23, 1987.*

*Former Article 1 consisting of Sections R14-5-01 through R14-5-103, Article 2 consisting of Sections R14-5-201 through R14-5-203, Article 3 consisting of Sections R14-5-301 through R14-5-324 repealed effective September 30, 1982.*

*Former Article 4 consisting of Sections R14-5-401 through R14-5-403, R14-5-405 through R14-5-407 renumbered as Article 1, Sections R14-5-101 through R14-5-106 effective September 30, 1982.*

*Former Section R14-5-408 repealed effective September 30, 1982.*

*New Section R14-5-107 adopted effective September 30, 1982.*

*Former Section R14-5-409 renumbered as R14-5-108 effective September 30, 1982.*

**ARTICLE 1. RAILROADS**

*Editor's Note: The Arizona Corporation Commission has determined that the following Section is exempt from the Attorney General certification provisions of the Arizona Administrative Procedure Act (A.R.S. § 41-1041) by a court order (State ex. rel. Corbin v. Arizona Corporation Commission, 174 Ariz. 216 848 P.2d 301 (App. 1992)).*

**R14-5-101. Definitions**

As used in this Article:

1. "Car stop" means a device installed or constructed at the end of a spur track to prevent railroad cars from going off the rails.
2. "Commission" means the Corporation Commission.
3. "Configuration of a public railroad-highway grade crossing" means the physical characteristics of the crossing, including, but not limited to, size and type of warning devices, path of the roadway over the railroad track or tracks, warning signs, pavement markings, and roadway crossing surface.
4. "Constructive placement" means cars cannot be delivered to the designated private siding because of the inability of the consignee to receive them. The cars are placed in a sliding, another private track, or interchange track near the consignee's facility until such time as they can be delivered to the consignee.
5. "Event recorder" means a device located in the locomotive that records information reflecting the operation of the train, including on speed, elapsed time, direction of travel, load (amps), automatic brakes, dynamic brakes, and throttle settings.
6. "Hazardous materials" means any hazardous substance as defined by A.R.S. § 49-201(16)(a), (b), (c), (e), and (f).
7. "Highway authority" means the county, municipal, or other local board or body exercising jurisdiction over highways under the laws of this state.
8. "House track" means a track adjacent to or entering a freight house, used for the primary purpose of receiving or delivering freight.
9. "Industrial track" means a track or portion of track over which a railroad operates but which the railroad does not own or maintain either the rails, ties, or roadbed; or a track or portion of track which is devoted to the purpose of the user, either by lease or written agreement, in which case the lease or written agreement shall be considered as equivalent to ownership.
10. "Ladder track" means a track connecting successively the body of tracks of a train yard.
11. "Locomotive" means a self-propelled vehicle running on rails and generating or converting energy into motion for the primary purpose of hauling rail cars.
12. "Overhead clearance" means the vertical distance from the level of the top of the highest rail to a structure or obstruction above.
13. "Person" means any individual, firm, joint venture, partnership, corporation, association, municipality, governmental unit, department, or agency and shall include any trustee, receiver, assignee, or personal representative thereof.
14. "Private grade crossing" means any crossing where a legal agreement exists between a private property owner and a railroad company for the exclusive use of the landowner and the landowner's invitee.
15. "Public grade crossing" means any crossing, used by the general public, for which a legal agreement between a

private property owner and a railroad company does not exist.

16. "Rail gage" means the distance between the heads of the rails, measured at right angles to the rails in a plane 5/8 of an inch below the top of the railhead. Standard gage is 4 feet, 8 1/2 inches.
17. "Railroad" means every railway, other than a street railway, operated for public transportation of persons or property.
18. "Reconstruction" means the use of more than 50% of the material necessary to replace an entire structure or facility, or more than 50% of the current value of an entire installation.
19. "Side clearance" means the shortest distance from the centerline of track to a structure or obstruction at the side of the track.
20. "Spur track" means a stub track of indefinite length diverging from a main track or other track.
21. "Team track" means a track subject to general use by the public for the loading or unloading of freight cars.
22. "Unauthorized grade crossing" means any grade crossing that is not a public grade crossing or a private grade crossing or has not been issued an AAR/DOT crossing inventory.

**Historical Note**

Former General Order R-1; Former Section R14-5-401 renumbered as Section R14-5-101 effective September 30, 1982 (Supp. 82-5). Former Section R14-5-101 renumbered to R14-5-104, new Section R14-5-101 adopted effective May 28, 1992 (Supp. 92-2). Amended effective May 31, 1996 under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 96-2).

**R14-5-102. Adoption of Federal Regulations**

- A. In the furtherance of its constitutional and statutory duty to promulgate and enforce safety regulations for public service corporations, the Commission adopts and approves as its own, subject to changes noted in subsection (E) below, 49 CFR 210, 213, 215, 216, 217, 218, 219, 220, 221, 223, 225, 228, 229, 230, 231, 232, 233, and 236, as amended and revised through October 1, 1989, which are incorporated by reference, are on file in the Office of the Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975, all being regulations of the Federal Railroad Administration, United States Department of Transportation, Railroad Safety regulations.
- B. The Commission also adopts and approves as its own, 49 CFR 171 through 174, as amended and revised through November 1, 1989, incorporated herein by reference and on file with the Office of Secretary of State; 49 CFR 178 and 179, as amended and revised through November 1, 1989, incorporated herein by reference, on file with the Office of Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975, all being part of the Research and Special Programs Administration, United States Department of Transportation, Hazardous Materials regulations as they apply to the shipment of hazardous materials by rail.
- C. The regulations adopted in subsections (A) and (B) of this Section shall apply to all standard gage rail operations within Arizona. All terms defined in the adopted regulations shall apply unless redefined in R14-5-101.
- D. A copy of the Federal Safety Standards is attached to the Article and is hereby made a part thereof as if set forth in full.

## Corporation Commission – Transportation

(This copy is not printed in this volume but is available in the offices of the Arizona Corporation Commission and the Secretary of State.)

- E. The above-mentioned Parts of 49 CFR are changed, amended, or revised as follows:
1. Substitute “Arizona Corporation Commission” (ACC) where “United States Department of Transportation” (DOT), “Federal Railroad Administration” (FRA), “Federal Railroad Administrator”, “Administrator” or “Research and Special Programs Administration” appear.
  2. Substitute “Railroad Safety Section, Arizona Corporation Commission, at its office in Phoenix, Arizona” where addresses for the United States Department of Transportation, Federal Railroad Administration, Federal Railroad Administrator, Office of Chief Counsel, or Research and Special Programs Administration appear.
  3. Copies of all reports and forms required to be filed with the Federal Railroad Administration by Parts referred to in subsection (A) and the Research and Special Programs Administration by Parts referred to in subsection (B) of this Section shall be filed with the Railroad Safety Section, Arizona Corporation Commission, at its office in Phoenix, Arizona, within the same time limits required by the Federal Railroad Administration, and the Research and Special Programs Administration. Information pertaining only to that portion of the railroad’s operations within the State of Arizona need be submitted.
- F. If the Commission finds that a waiver of compliance or an exemption from any Section of the aforementioned Parts is in the public interest and is consistent with railroad safety, the Commission may grant the waiver or exemption subject to any conditions it deems necessary.

**Historical Note**

Former General Order R-2; Former Section R14-5-402 renumbered as Section R14-5-102 effective September 30, 1982 (Supp. 82-5). Former Section R14-5-102 repealed, new R14-5-102 renumbered from R14-5-107 and amended effective May 28, 1992 (Supp. 92-2).

**R14-5-103. Unauthorized Passengers**

Railroads operating within this State shall prohibit and prevent unauthorized persons from traveling in or upon the cars and equipment of their trains.

**Historical Note**

Former General Order R-3; Former Section R14-5-403 renumbered as Section R14-5-103 effective September 30, 1982 (Supp. 82-5).

*Editor’s Note: The Arizona Corporation Commission has determined that the following Section is exempt from the Attorney General certification provisions of the Arizona Administrative Procedure Act (A.R.S. § 41-1041) by a court order (State ex. rel. Corbin v. Arizona Corporation Commission, 174 Ariz. 216 848 P.2d 301 (App. 1992)).*

**R14-5-104. Railroad-highway Crossings**

- A. The following rules shall apply in the construction, reconstruction, improvement, and maintenance of all public railroad-highway grade crossings within the state of Arizona. This Section is intended to be consistent with the provisions of the Manual on Uniform Traffic Control Devices, as adopted by the Department of Transportation.
1. No construction project taking place at or near a public railroad-highway grade crossing shall diminish the safety normally provided to a motorist approaching the crossing by the existing warning devices.

2. No temporary change in the configuration of a public railroad-highway grade crossing, for the purpose of facilitating a construction project at or near the crossing, may be made by any person without first notifying the owner of the railroad track and the owner of the trains or other track equipment operating over such track in writing. The letter notifying the track owner and train/track equipment owner shall describe the date, place, and type of changes to be made. Such letter shall be written and signed by the responsible person for the project and shall constitute an affirmation that all temporary traffic control measures to be implemented due to the project shall be made in accordance with this rule and the Manual on Uniform Traffic Control Devices (MUTCD) Parts VI and 8A-5. Notice shall be sent by registered mail, return receipt requested, to the business address of the owner of the railroad track and the owner of trains or the track equipment operating over such track, or to the statutory agent at its known place of business, not less than 10 days prior to the commencement of the construction project.

**B. Warning signals.**

1. Railroad crossbucks.
  - a. A railroad crossbuck shall be installed on the right-hand side of the public roadway on each approach to every crossing to warn motorists approaching from each direction, except at crossings where automatic control devices are in use in conformance with Appendix 8.
  - b. If there are two or more tracks, the number of tracks shall be indicated on an auxiliary sign of inverted “T” shape mounted below the crossbuck, (See in conformance with Appendix 8).
  - c. Crossbucks shall be located at not less than 15 feet from the centerline of the nearest track, and shall be in a position to be visible to motorists.
  - d. Crossbucks shall be a reflectorized white “X” (48” X 9” panels drilled for a 90-degree mounting) with the words “RAILROAD CROSSING” in black letters.
  - e. The distance that shall be assumed to separate tracks before additional crossbucks are considered necessary is 100 feet.
2. Automatically controlled crossing signals.
  - a. At railroad-highway grade crossings where studies indicate the need for warning beyond that provided by crossbucks, the Commission may order that automatically controlled crossing signals be installed.
  - b. Emergency stand-by power shall be provided for the operation of all automatically controlled crossing signals.
  - c. Automatically controlled crossing signals shall be arranged to provide not less than 20 seconds warning for motorists.
  - d. Signals shall operate until the rear of the last train using the crossing has cleared the crossing.
  - e. Traffic signals located within 200 feet of railroad crossing signals shall be preempted by the railroad crossing signals.
  - f. Where means are provided for cutting-out the automatically controlled warning devices during intervals when trains are making regular operating stops or performing switching operations on approach circuits, controls shall be arranged as follows:
    - i. Controls shall be so designed as to provide operation of warning devices before a train reaches the crossing.

## Corporation Commission – Transportation

- ii. Automatic control of warning devices actuated by approaching trains (other than the train that has stopped or is performing switching operations) shall take precedence over any cut-out feature.
- g. Where manual supervisory control of warning devices is provided in addition to automatically controlled signals, the following shall govern:
  - i. Automatic control, when actuated by approaching trains other than the train for which manual control has been made effective, shall take precedence over manual control;
  - ii. Means shall be provided to restore the controls to automatic operation;
  - iii. Means shall be provided to prevent manual operation by unauthorized persons.
- 3. Flashing light signals.
  - a. Lamp units (center of lens), shall be located at not less than 8 feet, 4 inches, nor more than 10 feet, 4 inches above the crown of the roadway.
  - b. Signal lights shall shine in both directions along the roadway, and shall be mounted horizontally, 2 feet, 6 inches to centers.
  - c. Lamp units shall be arranged in pairs, back to back, except on one-way streets or other roadways where highway traffic approaches from one direction only.
  - d. Lamp units shall be equipped with mountings to provide ready adjustments in all directions with positive locking for such adjustments.
  - e. Lamp units shall be provided with hoods of not less than 12 inches in length and with backgrounds 20 inches in diameter. Hoods and backgrounds shall be in black, except that when backlights are omitted, the back of the lamp unit and background shall be aluminum-colored so that the signal will not be mistaken for a dark signal.
  - f. Lamp units installed after the effective date of this Section shall have lenses or roundels, red in color, not less than 12 inches in diameter for both front and rear indications. Lamp units in use prior to the adoption of this Section shall be made to meet this requirement when the automatic warning devices are upgraded, improved, or reconstructed.
  - g. The beam spread shall be not less than 3 degrees each side of the axial beam under normal conditions. Throughout the beam spread, the intensity of the beam shall not be less than 50% of the intensity at the axis.
  - h. Lights shall flash alternately at a minimum rate of 45 flashes per minute and a maximum rate of 65 flashes per minute.
  - i. The effective range of flashing lights equipped with 10 volt, 10 watt lamps, or equivalent, burning at rated voltages, shall be not less than 1,000 feet under bright sunlight conditions with the sun at or near its zenith.
- 4. Highway traffic control signals shall not be used on main-line railroad crossings in lieu of flashing light signals. However, at industrial track crossings and other places where train movements are 10 miles per hour or less, highway traffic control signals may be used in lieu of conventional flashing light signals.
- 5. Bell warning signals. At least one automatic gong-type bell shall be used with each flashing light signal except on median strip installations.
- 6. Automatic gate arm signals.
  - a. Signals consisting of a combination of flashing lights, bells, and automatic gate shall, when indicating the approach or presence of trains, present towards the highway the appearance of horizontally flashing red lights and of a horizontal arm or arms extending over the traveled roadway a sufficient distance to cover the lane or lanes used by highway traffic approaching the crossing.
  - b. Automatic gate arms, when not indicating the approach or presence of trains, shall not obstruct or interfere with highway traffic, except as provided in subsection (B)(6)(d).
  - c. Automatic gate arms shall be mounted on posts or housing containing the arm-operating mechanism.
  - d. The design of the gate-opening mechanism shall be such as to ensure proper operation during unfavorable weather conditions. In case of power failure, the gate arm shall assume the horizontal position across the roadway.
  - e. The mechanism shall be so designed that if the arms, while being raised or lowered, strike or foul an object they will readily stop, and on removal of the obstruction shall assume the position corresponding to the control mechanism.
  - f. Each gate arm extending over the roadway shall have three red lights, with lenses not less than 7 inches in diameter, shining in both directions along the roadway, so positioned as to ensure as far as possible, that no vehicle or vehicles standing in the limits of the traffic lane or lanes approaching the crossing can obscure all three lights from the view of the drivers of the following vehicles. The light nearest the tip of each arm shall burn steadily, and the other two lights on each arm shall flash alternately in unison with the flashing lights on the roadside signal mast.
  - g. The gate arm shall, on new installations, be striped with 16 inch alternate diagonal reflectorized or fluorescent stripes of red and white.
  - h. Circuits for operation of signals shall be so arranged that the flashing lights, gate arm lights, and bell will start to operate at not less than 20 seconds before the arrival of the fastest train at the crossing. All lights shall operate at all times when the gate arm is in a position to obstruct highway traffic. The bell shall sound a warning from the time the signal lights start to operate at least until the gate arm has descended to within 10 degrees of the horizontal position.
  - i. Gate arms shall start their downward motion at not less than three seconds after the signal lights start to operate. Gate arms shall reach the full horizontal position before the arrival of the fastest train operated over the crossing and shall remain in that position until the rear of the train has cleared the crossing.
  - j. The bottom of the gate arms when in the horizontal position shall be not less than 3 feet nor more than 4 feet above the crown of the roadway.
  - k. Gate arms shall operate uniformly, smoothly, and complete all movement without slap or rebound, and be securely held when in the raised position.
- 7. Maintenance.
  - a. Metal parts shall be aluminum or painted aluminum, except as provided in subsection (B)(3)(e).
  - b. All materials and workmanship shall meet or exceed current industry standards in every respect, and

## Corporation Commission – Transportation

every warning signal and sign in all details shall be constructed, installed, and maintained in a satisfactory manner.

- c. The railroad shall provide for the maintenance of all grade crossing warning signs and signals. To this end, the railroad shall:

- i. Provide for alternate operations of automatically controlled warning signals during periods of failure, either manually or otherwise, as soon as possible after the failure has occurred;
- ii. Have skilled maintenance personnel available without undue delay for all emergency calls, including lamp failures;
- iii. Provide proper maintenance for all components;
- iv. Maintain the appearance of the installation in a satisfactory manner, with particular emphasis on painting and cleaning of optical systems;
- v. Inspect warning signals at a frequency of not less than once every 45 days. A written record of inspection shall be retained at the railroad's office within Arizona.
- vi. Provide standby equipment at a central location to minimize the interruption of signal operations due to equipment failure or damage.

8. Whistle posts.

- a. Whistle posts bearing the letter "X" or "W" shall be located in advance of each public crossing at grade to warn locomotive engineers of the presence of the highway grade crossing, and allow them sufficient time to sound the warning whistle.
- b. A person in charge of a railroad locomotive shall, before crossing any traveled public way, cause the bell to ring or a whistle, siren, or other sounding device to sound at a distance of at least 1/4 mile from a crossing and until it is reached.

C. Additional requirements.

1. When necessary to shove a railroad car or cars over a public grade crossing not having automatically controlled crossing signals, employees shall flag the crossing.
2. When, during normal train operations at night, it becomes necessary to block a public grade crossing with standing railroad cars, and the crossing does not have automatically controlled crossing signals, flares, or fusees, shall immediately be placed in the center of the roadway on both sides of the track at not less than 10 feet from the railroad car or cars to warn motorists that the crossing is occupied.
3. Detached railroad cars containing explosive or hazardous materials shall not be left standing on any grade crossing at any time.
4. Before moving onto any public railroad-highway grade crossing, operators of any on-track equipment, including high-rail vehicles, shall ensure that the automatic warning devices are activated or the crossing protected by a flagman. Public grade crossings without automatic warning devices shall be flagged by a flagman.
5. It shall be unlawful for railroad employees to "drop" or "kick" any railroad car or cars containing hazardous materials across a grade crossing in any circumstances or any other railroad car or cars across a grade crossing unless the crossing is flagged by a flagman or traffic is restricted by automatic gate arms.
6. Grade crossing maintenance and repair shall be conducted as follows:

- a. Whenever a highway intersects a railroad track at common grade, the appropriate highway authority shall maintain and keep in repair the roadway approaches to within 2 feet of the outside of either rail, and the railroad shall maintain the planking or other materials between the rails and for 2 feet on the outside thereof.
  - b. At crossing involving more than one track, maintenance by the railroad shall include that portion of the crossing:
    - i. Between the tracks not exceeding 20 feet from the center of the tracks, and
    - ii. Two feet on the outside of each of the two outside (field site) rails.
  - c. Unless the Commission otherwise authorizes, public grade crossings hereafter constructed shall be not less than 24 feet in effective roadway width measured at right angles with the centerline of the roadway.
  - d. Turnouts, switches, and frogs or bolted rail joints shall be so placed or relocated as to avoid placement in the paved area of a crossing.
  - e. Materials for permanent repairs on any component of a railroad-highway grade crossing surface shall be of the same type and quality or of equal quality to those which are being repaired or replaced.
  - f. Temporary repairs shall be made until the arrival of materials necessary for permanent repairs. Temporary repair shall be made within five working days of the date that the railroad is notified of the defect by the Commission. Permanent repairs shall be completed within 90 days from the date of notification.
  - g. The railroad shall coordinate with the highway authority any road closures and reopenings caused by the maintenance and repair of grade crossing.
  - h. The railroad shall stencil the AAR/DOT inventory number on all railroad-highway crossings.
7. Blockage of public grade crossing shall be limited as follows:
- a. Except as provided in subsections (C)(7)(c) and (d), no railroad shall cause a public grade crossing to be blocked by railroad equipment in excess of 10 continuous minutes.
  - b. Each period of crossing blockage shall be followed by an interval of time sufficient to allow the passage of waiting traffic.
  - c. The limitations set forth in subsection (C)(7)(a) do not apply to:
    - i. Any train continuously moving in the same direction during the entire time it occupies the crossing; and
    - ii. Blockage caused by wrecks, derailments, acts of nature, mechanical failure, or other emergency conditions.
  - d. The Commission, after hearing, may grant variances from the limitations set forth in subsection (C)(7)(a), upon proper application by the railroad or appropriate highway authority.
8. A crew member of a train blocking a public crossing shall immediately take all reasonable steps, consistent with the safe operation of such train, to clear the crossing upon receiving information from a peace officer, as defined in A.R.S. Title 13, member of any fire department or operator of an emergency vehicle, as defined in A.R.S. § 28-101.1, that emergency circumstances require the clearing of the crossing.

## Corporation Commission – Transportation

9. The railroad shall coordinate road closures and reopenings during emergency blockages with the appropriate highway authority.
10. When authorization for preliminary engineering and estimate or any federal-aid funding crossing improvement projects is submitted to the railroad, it shall be completed by the railroad and returned to the Department of Transportation within 60 days.
11. The railroad shall notify the Commission, in writing, within 10 days of both the commencement and completion of the project. The railroad shall tender a statement to the Commission reflecting the Commission's portion of such charges pursuant to A.R.S. § 40-337.02, within 60 days of completion of the project.
12. Federal-aid crossing improvement projects shall be completed within 15 months from the date of the Commission Order.
13. The Commission may approve an exception to any of the requirements of this Section. Such exceptions may be made upon the Commission's own initiative or upon written request from an interested party. Written requests shall contain a statement of the circumstances involved, the nature of the exception desired, and the reasons justifying such an exception. An exception shall be limited to the particular situation described in the written requests.

**Historical Note**

Former General Order R-5; Former Section R14-5-405 renumbered as Section R14-5-104 effective September 30, 1982 (Supp. 82-5). Amended subsection (H) effective April 16, 1986 (Supp. 86-2). Former Section R14-5-104 repealed, new Section R14-5-104 renumbered from R14-5-101 and amended effective May 28, 1992 (Supp. 92-2). Amended effective May 31, 1996 under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 96-2).

**R14-5-105. Railroad Accident/Incident Reports; Investigation****A. Reports by telephone.**

1. Railroads shall give the Commission immediate telephone notification of the following classes of accidents/incidents:
  - a. Accidents resulting in death;
  - b. Accidents resulting in injury requiring immediate hospitalization;
  - c. Accidents resulting in damage to railroad property in excess of the amount for which the Federal Railroad Administration requires an accident report to be filed;
  - d. Accidents or incidents in which any hazardous materials are involved;
  - e. All public railroad-highway grade crossing accidents;
  - f. All accidents/incidents involving rail passenger operations.
2. The immediate telephone notification shall include but not be limited to the following:
  - a. Name of person making the telephonic report;
  - b. Name of railroad or railroads involved;
  - c. Location of accident/incident;
  - d. Number of fatalities;
  - e. Number of injuries;
  - f. Number of derailed cars;
  - g. Generic name or names of the hazardous materials involved, including the name, address, and the telephone number of the shipper.

- B. Federal reports of accidents/incidents -- Railroads shall submit to the Commission copies of all accident/incident reports and supplements filed with the Federal Railroad Administration and the Hazardous Materials Regulation Board for accidents/incidents occurring in Arizona. Said reports shall be submitted to the Commission within the time specified for submitting to the Federal Railroad Administration. Said reports shall include:
  1. FRA F 6180.54 -- Rail Equipment Accident/Incident Report;
  2. FRA F 6180.55 -- Railroad Injury and Illness Summary;
  3. FRA F 6180.55a -- Railroad Injury and Illness (Continuation Sheet);
  4. FRA F 6180.56 -- Annual Railroad Report of Man-Hours by State;
  5. FRA F 6180.57 -- Rail-Highway Grade Crossing Accident/Incident Report;
  6. FRA F 6180.45 -- Annual Summary Report of Railroad Injury and Illness;
  7. DOT F 5800.1 -- Hazardous Materials Incident Report.

- C. Investigations by the Commission.
  1. Commission investigators shall investigate accidents, may inspect railroad records, accounts, books, memoranda, correspondence, and other documents, and may examine all lands, buildings, and equipment of railroads. Commission investigators may obtain all relevant information concerning accidents under investigation, make inquiries of persons having knowledge of the facts, conduct interviews, and attend, as observers, hearings or formal investigations by railroads into the causes of accidents. When necessary to carry out an investigation, the Commission may authorize the issuance of subpoenas to require the production of records and the giving of testimony.
  2. Whenever necessary, the Commission will schedule a public hearing on an accident.
  3. Incomplete or inaccurate reports will be investigated by the Commission. Incomplete or inaccurate reporting practices may be grounds for a public hearing into the matter.
  4. Late reports shall be accompanied by a letter of explanation. Late reports may be grounds for a public hearing into the matter.
- D. All railroads operating wholly or partially within the state of Arizona shall give the Commission immediate telephone notification of accidents/incidents as prescribed herein. All accidents/incidents not reported in accordance with the provisions of this Section shall be investigated by the Commission.

**Historical Note**

Former General Order R-6; Former Section R14-5-406 renumbered as Section R14-5-105 effective September 30, 1982 (Supp. 82-5). Amended subsections (A), (B), (D), and (F) effective April 16, 1986 (Supp. 86-2). Amended effective May 28, 1992 (Supp. 92-2).

**R14-5-106. Minimum Standards for Cabooses**

- A. Each railroad operating wholly or partially within the state of Arizona shall hereafter install and maintain minimum standards on cabooses in accordance with this Section.
- B. No caboose shall be used in service unless it complies with subsections (C) through (R) of this Section.
- C. Construction: Cabooses shall be of either the cupola or bay window type. Cabooses of metal construction shall have wooden or insulated metal floors. A cupola shall not extend inward toward the centerline of the car more than 3 inches from either side of the caboose.

## Corporation Commission – Transportation

- D. Trucks: Trucks shall provide riding qualities at least equal to those of freight type trucks modified with elliptic or additional coil springs or other means of equal or greater efficiency and shall be equipped with steel wheels.
- E. Draft gears: Draft gears shall have a minimum travel of 2 1/2 inches and a minimum capacity of 18,000 foot pounds. Draft gears shall be of rubber or a combination of friction and rubber types, or shall have other means of providing equal shock control.
- F. Lighting: An adjustable, shielded electric light, or lights, shall be provided for the direct illumination of the caboose desk. A ceiling or wall light, or lights, operable from separate switches shall be provided to otherwise illuminate the caboose interior. The area of the drinking water and lavatory facilities shall be illuminated. The caboose marker, or markers, shall be electrically lighted.
- G. Heating: A heating facility shall be maintained and shall be capable of providing a temperature of at least 70 degrees Fahrenheit in a standard caboose.
- H. Seats and cushions: Seats and cushions shall be provided with a shock absorbent material initially at least 3 inches in thickness, and backrests shall be of sufficient height to protect the neck and head from injuries. Seats in cupolas shall be of the pullman type and those in bays shall be of the passenger reversible type. The top of said seats shall not be lower than 11 inches nor higher than 9 inches beneath the cupola or bay window sills and no more than 18 inches above the floor or footrest. The backrests shall incline backward to not less than 3 inches nor more than 5 inches from the perpendicular. Subject to the approval of the Commission, seats of different design or materials may be used when such design or materials provide equal or better protection or comfort than those enumerated in this Section.
- I. Bunks: Each caboose shall have at least one bunk of not less than 2 feet in width and not less than 6 feet in length which shall be provided with a cushion of the same dimensions made of shock absorbent material initially of at least 3 inches in thickness.
- J. Wind deflector: Each cupola side window shall be equipped with a wind deflector.
- K. Weatherstripping: Weatherstripping or weatherproof sash shall be installed and maintained at all windows and doors to protect against weather and the seepage of dirt or dust.
- L. Window shades: With the exception of windows in bays and cupolas, windows shall be equipped with shades.
- M. Stanchions: Stanchions, grab handles, or bars shall be installed at entrances and exits and at other locations within convenient reach of employees moving about the caboose while a train is in motion.
- N. Drinking water: Caboose drinking water facilities shall be installed and maintained so as to provide fresh and pure drinking water. Such water facilities shall include individual bottled water containers placed in an ice chest. When ice is used for water cooling purposes, the containers shall be so arranged that the drinking water will not come in contact with the ice. Containers used for storing or dispensing potable water shall be kept clean at all times and shall be subjected to effective bactericidal treatment as often as may be necessary to prevent the contamination of the water so stored and dispensed.
- O. Lavatory facilities: Caboose lavatory facilities for washing shall be provided at a location where the use thereof will not result in contamination of the drinking water dispensing system. All cabooses shall have operative toilets which are illuminated, are kept clean and free of noxious odors at all times, and are subjected to effective bactericidal treatment as often as may be necessary.
- P. Fire extinguisher: Cabooses used in road service shall be equipped with an effective means of extinguishing minor fires. Such extinguishing agents shall be placed in a readily accessible location and shall be effectively maintained.
- Q. First-aid kit: Each caboose shall carry, in a visible and readily accessible place, a plainly marked first-aid kit which shall be so constructed that it and its entire contents are readily removable. The kit shall consist of materials, approved by the railroad's consulting physician, in a weatherproof container with individually sealed packages for each type item. The contents shall be inspected weekly to ensure that expended items are replaced.
- R. Maintenance and supplies: Cabooses shall be supplied with fresh water, paper towels, toilet tissue, sanitary drinking cups, fuel, ice as needed, hand soap or other cleaning agents in appropriate dispensers and such other equipment as may be required for service.
- S. Conditions arising after departure from terminal: In the event of a failure of required equipment or standards of maintenance occurs in a caboose after it has commenced a move in service, the railroad operating that caboose shall not be deemed in violation of this Section if said failure of equipment or standards of maintenance is corrected at the first point at which maintenance supplies are available, or, in the case of repairs, the first point at which materials and repair facilities are available and repairs can reasonably be made.
- T. Exemption: If, in any particular case, an exemption from any of the requirements of this Section is deemed necessary by a carrier concerned, the Commission will consider the application of such carrier for such exemption when accompanied by a full statement of the conditions existing and the reason why such exemption is needed. Any exemption so granted will be limited to the particular case covered by the application.

**Historical Note**

Former General Order R-7; Former Section R14-5-407 renumbered as Section R14-5-106 effective September 30, 1982 (Supp. 82-5). Correction in heading effective April 16, 1986 (Supp. 86-2). Amended effective May 28, 1992 (Supp. 92-2).

**R14-5-107. Minimum Standards for Locomotives**

- A. Each railroad operating wholly or partially within the state of Arizona shall hereafter install and maintain minimum standards on locomotives in accordance with this Section.
- B. All of the following requirements shall be met:
  1. Locomotives used in or through the state of Arizona shall be equipped with an effective means of extinguishing minor fires. Such extinguishing agents shall be placed in a readily accessible location and shall be effectively maintained.
  2. Each locomotive shall carry, in a visible and readily accessible place, a plainly marked first-aid kit which shall be so constructed that it and its entire contents are readily removable. The kit shall consist of materials, approved by the railroad's consulting physician, in a weatherproof container with individually sealed packages for each type item. The contents shall be inspected weekly to ensure that expended items are replaced.
  3. Each train operated in or through the state of Arizona at a speed in excess of 30 miles per hour shall have at least one locomotive equipped with an operating event recorder. Such event recorders shall be inspected at least once every 90 days and maintained in a fully operative condition.
  4. All locomotives shall have operative toilets which are illuminated, are kept clean and free of noxious odors at

all times, and are subjected to effective bactericidal treatment as often as may be necessary.

5. Drinking water facilities shall be installed and maintained so as to provide fresh and pure drinking water. Such water facilities shall include individual bottled water containers placed in an ice chest. When ice is used for water cooling purposes, the containers shall be so arranged that the drinking water shall not come in contact with the ice. Containers used for storing or dispensing drinking water shall be kept clean at all times and shall be subjected to effective bactericidal treatment as often as may be necessary to prevent the contamination of the water so stored and dispensed.
  6. Locomotives shall be supplied with fresh water, paper towels, toilet tissue, sanitary drinking cups, ice as needed, and such other equipment as may be required for service.
- C. A locomotive operating in a controlling position shall have an operating two-way radio that is on a frequency for the railroad being operated on and is capable of contacting the train dispatcher or other responsible railroad personnel.
- D. If, in any particular case, an exemption from any of the requirements of this Section is deemed necessary by a carrier, the Commission shall consider the application for such exemption as needed. Any exemption so granted shall be limited to the particular case covered by the application.

#### Historical Note

Adopted effective September 30, 1982 (Supp. 82-5).  
Amended subsections (A) and (B) effective April 16, 1986 (Supp. 86-2). Former Section R14-5-107 renumbered to R14-5-102, new Section R14-5-107 adopted effective May 28, 1992 (Supp. 92-2).

#### R14-5-108. Inspection of property

For the purpose of insuring compliance with safety rules and regulations, the Commission, or any authorized inspector or agent thereof, may, at any time, stop, board, ride, investigate, or inspect any train, locomotive, car, caboose, or any other rolling stock or equipment used by a railroad in the operation of their business.

#### Historical Note

Former General Order R-9; Former Section R14-5-409 renumbered as Section R14-5-108 effective September 30, 1982 (Supp. 82-5).

#### R14-5-109. Industrial Track Standards

- A. This Section shall be applicable to all industrial track construction, reconstruction, and repair commencing after the effective date of this Section.
1. The industry and the railroad contractor shall be responsible for notifying the Commission in writing prior to the construction, reconstruction, or alteration of industrial track, structures, or facilities adjacent thereto.
  2. The proposed design plans of any construction, reconstruction, or alteration of industrial track shall be submitted to the Commission, Railroad Safety Section, Phoenix, Arizona, prior to any construction, reconstruction, or alteration of industrial track.
- B. The following construction standards shall apply for all industrial track:
1. Profile:
    - a. Maximum grade of any proposed track, as shown on any plan, shall be 2% and shall not be exceeded. At all locations, excessive grades and frequent changes of grade shall be avoided. Where grade line changes, appropriate vertical curves shall be installed.
    - b. In cut sections, grade line shall be uniform throughout the cut to facilitate proper drainage. Grades in

cuts shall not be less than 3/10% and not more than 1%.

2. Subgrade:
  - a. Where soil condition, drainage conditions or amount of traffic justify, the upper portion of the subgrade shall be designed to provide adequate support. Methods of increasing support shall be to provide select material to an adequate supporting depth over the existing subgrade or subgrade stabilization.
  - b. The depth of any proposed material shall be specified by the design plans.
  - c. The upper portion of any subgrade to be stabilized shall be stabilized by thoroughly mixing suitable chemical additives such as cement, fly ash, or lime with the soil before compaction.
  - d. Each layer shall be fully compacted by approved mechanical compacting equipment before the next layer is placed. A fully compacted layer shall have a dry density of at least 95% of the maximum dry density.
  - e. Type of soil and soil conditions shall be indicated on any proposed plans along with typical sections showing rail, tie ballast, subballast, and any other appurtenances.
3. Drainage:
  - a. Each drainage or other water-carrying facility under or immediately adjacent to the roadbed shall be maintained and kept free of obstruction to accommodate expected water flow for the area concerned.
  - b. Every effort shall be made to keep the tracks, roadbed, and walkways properly drained at all times.
4. Ballast:
  - a. Ballast material shall conform to the recommended specifications contained in the American Railroad Engineering Association "Manual for Railway Engineering" (AREA Manual), as amended and revised through July 31, 1990, incorporated herein by reference, on file with the office of the Secretary of State, and copies available from the American Railroad Engineering Association, 50 F Street NW, Washington, D.C. 20001. The gradation of a ballast material shall be a prime consideration in track performance of ballast materials. Ballast material used in industrial tracks shall be not less than 3/4 of an inch to 1 1/2 inches, pursuant to AREA No. 4 gradation in the AREA Manual.
  - b. Ballast material may be crushed rock, slag, or equally stable material that will provide uniform support to the ties, will drain properly, and is not chemically reactive. The material used for ballast shall not short track signals. Quarried stone or slag produced in a crushing-screening plant shall be preferred when it satisfies all of the following specifications:
    - i. A shrinkage factor of 12% to 15% in volume differential from loose to compacted state.
    - ii. Processed ballast shall be composed of hard, strong, and durable particles free from excessive amounts of deleterious substances.
    - iii. Deleterious substances shall not be present in processed ballast in excess of the following amounts:
      - (1) Soft and friable pieces--5%;
      - (2) Material finer than No. 200 sieve--1%;
      - (3) Clay lumps--1/2%.

## Corporation Commission – Transportation

- iv. Percentage of wear of processed ballast, tested in the Los Angeles machine, shall not be greater than 40%.
- v. Soundness of processed ballast for use in regions where freezing temperatures are expected shall be such that when tested in the sodium sulfate soundness test, the weighted average loss shall be not in excess of 7% after five cycles.
- vi. Compacted weight of ballast shall be not less than 70 pounds per cubic foot for blast furnace-slag and 90 pounds per cubic foot for all other slags and crushed rock products.
- vii. Flat or elongated particles, particles with length three times greater than average thickness, shall not exceed 5% by weight in the ballast.
- c. Prior to installation, the supplier shall provide the railroad or industrial track owner with certified test results of ballast quality and grading.
- d. Care shall be used to ensure even distribution of ballast in the track. A minimum ballast depth of 8 inches below the ties shall be acceptable as a subballast base. Ballast shall be inserted under ties in convenient lifts but under not less than two lifts. Proper cross level, line and grade shall be attained on the final lift in accordance with currently accepted practice.
- e. Top of track ballast shall be dressed parallel with top of rails to a depth of 1 inch below top of tie extending 6 inches beyond end of tie. Ballast shall be thoroughly tamped for each tie end to 15 inches inside of rail. Centers shall be filled but not tamped. All work of track laying and surfacing shall be of the highest quality in accordance with currently accepted practice.
- f. Each owner of the track to which the ballast standards apply shall maintain proper track cross level, surface, and alignment prescribed as follows:
  - i. The runoff in any 31 feet of rail at the end of a rise may be not more than 3 1/2 inches.
  - ii. The deviation from uniform profile on either rail at the mid-ordinate of a 62-foot chord may be not more than 3 inches.
  - iii. Deviation from designated elevation on spirals may be not more than 1 3/4 inches.
  - iv. Variation in cross level on spirals in any 31 feet may be not more than 2 inches.
  - v. Deviation from zero cross level at any point on tangent or from designated elevation on curves between spirals may be not more than 3 inches.
  - vi. The difference in cross level between any two points less than 62 feet apart on tangents and curves between spirals may be not more than 3 inches.
  - vii. Alignment may not deviate from mid-ordinate of a 62-foot chord more than 3 inches.
- 5. The material, preservative treatment, quality control, inspection, and miscellaneous requirements for timber crossties and switch ties shall conform with the recommendations of Chapter 3, "Ties and Wood Preservation" of the AREA Manual and all of the following:
  - a. Crossties shall be either hardwood or softwood in accordance with the requirements of this Section.
  - b. Wooden crossties shall be new and manufactured from the following kinds of wood: Douglas fir, red oak, white oak, cypress, southern and western pine, elm, hickory, gum, or hemlock.
  - c. All wooden ties shall be made from sound, straight live timber and shall be free from any defects that may impair their strength and durability, such as bark, decay, splits, shakes, large or numerous holes or knots, pitch seams, pitch rings, grain with slant greater than 1 in 15, or other imperfections.
  - d. All crossties shall be a minimum of 8 feet in length. Ties shall measure 6 inches thick by 8 inches wide on top, AREA No. 6 grade. If a 6-inch wide base rail is used, 7-inch by 9-inch ties shall be required. All crossties shall be branded with the seller's symbol to indicate line end.
  - e. Crossties shall be spaced a maximum of 24 inches center to center. Each 39 feet of track shall be supported by a minimum of 19 crossties. The center of the ties shall coincide with the centerline of the track and the ties shall be laid at right angles to the rail with the wide-face up.
  - f. Hardwood ties shall be used on all curves of 2 degrees and over. Softwood ties shall be permitted on other curves and tangents.
  - g. Ties shall be inspected at suitable and convenient places satisfactory to the railroad or industry owner. Inspection shall include a reasonably close examination of the top, bottom, sides, and ends of each tie. All ties shall be judged independently using the following standards:
    - i. Decay shall be the disintegration of the wood substance due to the actions of wood destroying fungi. "Blue Stain" is decay and shall be permissible in all wood.
    - ii. A large hole shall be more than 1/2 inch in diameter and 3 inches deep within, or more than 1/4 the width of the surface on which it appears and 3 inches deep outside, the sections of the tie between 20 inches and 40 inches from its middle. Numerous holes shall be any number equaling a large hole in damaging effect. Such holes may be caused in manufacture or otherwise.
    - iii. Within the rail bearing areas, a large knot shall be one having an average diameter more than 1/3 the width of the surface on which it appears; but such a knot shall be allowed if it is located outside the rail-bearing areas. Numerous knots shall be any number equaling a large knot in damaging effect.
    - iv. A shake shall be a separation along the grain, most of which occurs between the rings of annual growth.
    - v. A split shall be a separation of the wood extending from one surface to an opposite or adjacent surface. In unseasoned crossties, a split no more than 1/8 of an inch wide or 4 inches long shall be acceptable. In a seasoned crosstie, a split no more than 1/4 of an inch wide or longer than the width of the face across which it occurs shall be acceptable. In seasoned crossties, a split exceeding the limit shall be acceptable provided split limitations and anti-splitting devices are approved by the buyer and properly applied.

## Corporation Commission – Transportation

- vi. Except in woods with interlocking grain, a slant in grain in excess of 1 inch in 15 inches shall be rejected.
  - vii. In manufacture:
    - (1) A tie shall be considered straight:
      - (a) When a straight line along the top from the middle of one end to the middle of the other end is entirely within the tie; and
      - (b) When a straight line along a side from the middle of one end to the middle of the other end is anywhere more than 2 inches from the top and the bottom of the tie.
    - (2) The top and bottom of a tie shall be considered parallel if any difference in the thicknesses at the sides or ends does not exceed 1/8 of an inch.
  - viii. The lengths, thicknesses, and widths specified shall be minimum for the standard sizes. Ties over 1 inch longer, thicker, or wider than the standard size ordered shall be rejected.
  - ix. A bark seam or pocket shall be a patch of bark partially or wholly enclosed in the wood. Bark seams shall be allowed provided they are not more than 2 inches below the surface or 10 inches long.
  - x. Ties with continuous checks appearing on one face only, whose depth in a fully seasoned tie is greater than 1/4 the thickness and longer than 1/2 the length shall be rejected.
  - h. The maximum distance between non-defective timber crossties shall be 70 inches, center of tie to center of tie.
  - i. A timber crosstie shall be considered defective when it is all of the following:
    - i. Broken through;
    - ii. Split or otherwise impaired to the extent that it will not hold spikes or will allow ballast to work through;
    - iii. So deteriorated that the tie-plate can move laterally more than 1/2 of an inch relative to the crossties;
    - iv. Cut by the tie-plate through more than 40% of its thickness; and
    - v. Not spiked as required by this Section.
  - j. Industry track shall have at least one non-defective crosstie whose centerline is within 18 inches of the rail joint location.
  - k. Used crossties, although not recommended, may be used subject to prior approval from the Commission.
  - l. Treated tie plugs of proper size shall be used to fill holes tightly and driven into old spike holes of used ties. Approved granular tie plug material may be used in lieu of treated tie plugs.
6. Switch ties:
- a. Switch ties shall be new and shall be hardwood in accordance with the requirements of this Section. Switch ties shall be located as shown on the turnout plans.
  - b. All switch ties shall be 7 inches thick by 9 inches wide in cross section. Switch tie length shall be as indicated on the turnout plans in 1 foot increments.
  - c. All switch ties shall be sawed top, bottom and sides, cut square at the ends, have top and bottom parallel, and have bark entirely removed.
7. Tie plates:
- a. Tie plates shall be placed under each rail at every tie. The tie plates shall be placed with the shoulder squarely against the rail.
  - b. No crooked tie plates shall be permitted. Each tie plate shall be of proper design to fit the rail section being used.
8. Rail:
- a. All rail used in industrial track construction shall weigh a minimum of 90 pounds per yard. The majority of rails used shall be a minimum of 30 feet in length, with no more than 20% of varying lengths down to 24 feet, except as required in switches.
  - b. Rail shall be laid with joints staggered so that joints on one side will not be more than 4 feet from center of the opposite rail. The best running side of the relay railhead shall form the gage side of the rail as laid.
  - c. Rails shall be new or equal to No. 2 relay rail or No. 3 relay rail as per the AREA Manual recommendations for rail grading classifications. Overflow on one or both sides shall be less than 1/4 of an inch. Base shall be solid and free of visual defects with only minor pitting. Relay rail shall be considered to be used material.
  - d. The bottom of rail, tie plate, and top surface of tie shall be clean and smooth to provide for full bearing for rails and tie plates.
  - e. The use of a torch for cutting track rail, except for field welds or for burning bolt holes shall be prohibited. A rail saw or rail chisel properly and expertly used for cutting and a hand or power rail drill for boring holes shall be employed. All chips and burrs shall be removed and all drilled holes shall be peened. The bolt hole shall conform to the standard plans.
  - f. Angle bars of approved design shall be properly fitted against the rail and properly bolted. Each joint shall be bolted with at least two bolts through each rail end. Joint bars cracked or broken through between the middle two bolts shall be replaced. Compromise and insulated joint bars of proper design shall be used where rail size and conditions dictate. Track bolts, of proper size, fitted with approved spring washers, shall be fully tightened to proper tension.
9. Spiking:
- a. Each rail will be spiked with two spikes per tie plate on tangent track, staggered with inside spikes to the east or north, outside spikes to the west or south.
  - b. Spikes shall be 5/8 of an inch wide by 6 inches long.
  - c. Track spikes shall be started and driven vertically with face shank in contact with the rail so that the face of the spike shall have full hold on rail base. Damage to tie timber fiber shall be minimized.
  - d. Spikes shall not be struck after head is down to snug contact with the railbase. Care shall be taken not to overdrive spikes and rail shall not be gouged or struck with spike maul or other tool.
  - e. In the construction of road crossings and turnouts, line spikes and hold down or anchor spikes shall also be used throughout the crossing and turnout closure rails. Hold down or anchor spikes shall be used on curves of 5 degrees or more.
10. Gage:

## Corporation Commission – Transportation

- a. Gage is measured between the heads of the rails at right angles to the rails in a plane 5/8 of an inch below the top of the railhead.
  - b. In new industrial construction the rails shall be gaged to 4 feet 8 1/2 inches.
  - c. Rail gage shall be maintained at not less than 4 feet 8 inches, nor more than 4 feet 9 3/4 inches for both curved and tangent track.
11. Rail anchors:
- a. 16 anchors per 39 feet of track shall be used, and 4 nonconsecutive ties shall be box-anchored per rail.
  - b. Anchors shall be used throughout the turnout area. The same tie shall be box-anchored across.
  - c. Anchors shall not be placed on joint ties or ties adjacent to joint ties.
  - d. Additional anchors shall be applied where longitudinal rail movement needs to be effectively controlled.
12. Gage rods:
- a. Gage rods may be used on curves where it is difficult to maintain gage.
  - b. On curves between 7 degrees and 10 degrees, 4 gage rods per 39-foot panel shall be installed and on curves between 10 degrees and 12 degrees, 5 gage rods per 39-foot panels shall be installed.
13. Switches:
- a. Each stock rail shall be securely seated in switch plates, but care shall be taken to avoid canting the rail by overtightening the rail braces.
  - b. Each switch point shall fit its stock rail properly, with the switch stand in either of its closed positions to allow wheels to pass the switch point. Lateral and vertical movement of a stock rail in the switch plates or of a switch plate on a tie shall not adversely affect the fit of the switch point to the stock rail.
  - c. Each switch shall be maintained so that the outer edge of the wheel tread cannot contact the gage side of the stock rail.
  - d. The heel of each switch rail shall be secure and the bolts in each heel shall be kept tight.
  - e. Each switch stand and connecting rod shall be securely fastened and operable without excessive lost motion.
  - f. Unusually chipped or worn switch points shall be repaired or replaced. Metal flow shall be removed to ensure proper closure.
  - g. The railroad shall be responsible for the installation and maintenance of switches connecting industrial track to railroad track facilities.
  - h. Owners of industrial switches shall be responsible for the installation and maintenance of their switches.
  - i. "Run-through" or damaged switches shall be repaired immediately.
14. Derails:
- a. Derails shall be installed where grade or other conditions indicate the need.
  - b. Derails shall be installed so that derailed cars will not foul or damage adjacent track or railroad structures.
  - c. Derail signs shall be clearly visible.
  - d. When in a locked position, the derail shall be free of lost motion which will allow it to be operated without removing the lock.
15. Car stops or bumping posts:
- a. Car stops or bumping posts shall be installed at the end of all industry spur tracks.
  - b. Car stops or bumping posts may be of any design that will adequately stop a car without damaging the car, such as, "wheelstops", "drawbar stop", or "earth-tie stop".

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-110. Walkway and Clearance Standards**

- A.** The following shall be the standards for all walkways.
- 1. Walkways shall be provided adjacent to tracks in all areas where railroad or industrial employees are required to perform trackside duties.
  - 2. Walkways shall be:
    - a. A uniform regular surface with a gradual slope not to exceed 1 inch rise in 8 inches;
    - b. Kept clean and free of weeds, debris and other materials or equipment that might tend to interfere with the footing of railroad or industrial employees performing trackside duties; and
    - c. Constructed and maintained to ensure proper drainage and prevent pooling of water, oil, or other liquids.
  - 3. In areas where heavy foot traffic exists, such as train yards and manually operated switches, the uniform surface material used shall be no larger than 3/8 inch fines.
  - 4. Applicable walkway measurement and clearance standards contained in Appendices 1 through 6 shall be met.
  - 5. The center of tracks shall be kept clean and free from all foreign materials that tend to build up between rails causing poor footing and a deterioration of track components.
  - 6. Walkway standards shall not apply to any of the following:
    - a. Tracks in streets or tunnels, existing bridges, grade separation structures, railroad-highway crossings, existing trestles, cattle guards, and tracks adjacent to walks, abutments, platforms, pillars, and structures where minimum widths are otherwise provided;
    - b. Tracks within cities, towns, populated or congested areas where there is insufficient width of right-of-way, except that standards shall apply to the full width of right-of-way available; and
    - c. Tracks during periods of damage or obstruction due to heavy rain or snow, derailments, rock and earth slides and other abnormal periods. Walkways shall be brought back into compliance with this Section within 30 days after the damage or obstruction occurred.
- B.** The following shall be the clearance standards:
- 1. Minimum overhead and side clearances as prescribed in this Section may be decreased to the extent defined by the half circumference of a circle having a radius of 8 feet, 6 inches and tangent to a horizontal line 22 feet above the top of rail at a point directly above the centerline of track, except that for tunnels and through bridges, such radius may be 8 feet. The requirements contained in Appendix 7 also shall be met.
  - 2. Minimum overhead clearance above the top of rail shall be 22 feet except as follows:
    - a. Clearance may be reduced to 18 feet if the track terminates inside a building and all cars, locomotives, or other equipment are brought to a stop before entering the building.
    - b. Clearance shall conform to the requirements specified in the National Electrical Safety Code (ANSI C2-1990) pertaining to the installation and maintenance of electrical supply and communication lines,

## Corporation Commission – Transportation

- published by the Institute of Electrical and Electronic Engineers, Incorporated (approved on June 26, 1989), incorporated herein by reference, on file with the Office of the Secretary of State, and copies available from 345 East 47th Street, New York, N.Y., 10017.
- c. Overhead clearances authorized in this subsection are applicable to tracks on which rail cars having a height of 15 feet 6 inches or less are transported. If rail cars of a height greater than 15 feet 6 inches are transported or proposed to be transported, minimum overhead clearance shall be increased by the amount of not less than such additional height, provided that such cars are exempt from this subsection when the top running boards have been removed, ladders and hand brakes lowered, car painted, stenciled, and otherwise modified in compliance with provisions of 49 CFR 231, as amended and revised through October 1, 1989, incorporated herein by reference, on file with the Office of the Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975.
  - d. Rotary dumpers used in the unloading of open top cars shall be exempt from the provisions of this Section.
3. Minimum side clearance from centerline to tangent standard gage track to obstruction shall be 8 feet 6 inches except as follows:
    - a. For platforms:
      - i. Platforms 8 inches or less above the top of rail shall be 4 feet 8 inches from centerline of track.
      - ii. Platforms 4 feet or less above the top of rail shall be 7 feet 3 inches from centerline of track.
      - iii. Stepped platforms combining two or more of the platform clearances described in subdivisions (i) and (ii) of this subsection shall not be permitted.
      - iv. Existing platforms may be extended at existing clearance, provided that such clearance, unless otherwise permitted by this Section, shall not be less than 6 feet 6 inches from the centerline of track.
    - b. Mail cranes shall be exempt from the provisions of this Section.
    - c. All poles shall be a minimum of 8 feet 6 inches from the centerline of track, except that 10 feet shall be recommended where possible.
    - d. Minimum clearance for through bridges supporting track and tunnels shall be 8 feet from the centerline of track.
    - e. Minimum clearance for handrails on bridges with walkways shall be 7 feet 6 inches from the centerline of track, except that the railroad may require clearances in excess of this minimum when the railroad deems it necessary.
    - f. Water barrels and refuge platforms shall be 4 feet above the top of rail and 8 feet distant laterally from the centerline of track.
    - g. For block signals and switch stands:
      - i. Block signals and switch stands shall be 3 feet or less above the top of rail and located between tracks. Where not practicable to provide clearances otherwise prescribed in this Section, they shall be a minimum of 6 feet from the centerline of track.
      - ii. All other block signals and switch stands shall be a minimum of 8 feet 6 inches from the centerline of track.
    - h. Water columns and oil columns shall be a minimum of 8 feet from the centerline of track.
    - i. Cattle guard fencing shall be a minimum of 6 feet 9 inches from centerline of track; except that existing cattle guards less than 6 feet 9 inches from the centerline of track may be maintained at existing clearance if such clearance does not extend beyond a line extending diagonally upward from a point level with the top of rail and 5 feet 10 inches distant laterally from the centerline of track to a point 4 feet above top of rail and 8 feet distant laterally from the centerline of track.
    - j. Log rollways may be constructed and maintained with impaired clearances when adjacent to tracks operated exclusively for logging purposes.
    - k. Clearances into shops and buildings where freight cars are spotted for repairs shall be a minimum of 7 feet 8 inches from the centerline of track.
    - l. For fences and gates:
      - i. The minimum distance between a fence and the centerline of track shall be not less than 8 feet 6 inches, except that where conditions permit, 10 feet shall be required.
      - ii. Fences topped with barbed wire shall have vertical arms or the arms shall be turned outward away from track, if necessary to maintain minimum clearances as prescribed herein.
      - iii. Gates shall be secure and shall be maintained in a condition that will allow for easy opening by one person. Gates, in the open position, shall be at least 8 feet 6 inches from the centerline of track.
      - iv. Mechanical means shall be provided to prevent gates from swinging closed while switching operations are being performed.
    - m. All minimum side clearances prescribed herein are for tangent track. All structures adjacent to curved track shall have a minimum side clearance 1 foot greater than the equivalent minimum side clearance for tangent track. Where space is limited, the minimum side clearance for structures adjacent to track of not over 12 degrees curvature shall be the same as for tangent track, but if over 12 degrees curvature, 1/4 of an inch shall be added to the equivalent minimum side clearance for tangent track for each degree of the curve. Where track contains superelevation, minimum side clearances shall be increased as necessary to give the equivalent clearances based on tangent track.
    - n. Minimum side clearances authorized in this subsection are applicable to tracks on which freight cars having a maximum overall width not greater than 10 feet 10 inches are transported. On tracks over which freight cars of greater width are transported, such minimum side clearance shall be increased by not less than 1/2 of such additional width.
  4. The minimum distance between the centerlines of parallel standard gage railroad tracks, which are used or proposed to be used for transporting freight cars, shall be 14 feet, except as follows:
    - a. The centerline of any standard gage track, except a main track, parallel and adjacent to a main track,

## Corporation Commission – Transportation

- shall be at least 15 feet from the centerline of main track.
- b. The centerline of any standard gage ladder track, constructed parallel to any other track, shall have a clearance of not less than 20 feet from the centerline of other track.
  - c. Minimum clearance between the centerline of parallel house or industry tracks shall be 13 feet, except that railroads may require clearances in excess of this minimum when conditions so warrant.
  - d. Minimum-clearance between centerlines of two parallel team tracks shall be 13 feet, except that railroads may require clearances in excess of this minimum.
  - e. Minimum clearances prescribed herein are applicable only to tracks on which freight cars having a minimum overall width of 10 feet 10 inches are transported. On track over which freight cars of greater width are transported, minimum distance shall be increased by an amount equal to 1/2 such additional width.
  - f. Existing tracks may be maintained, reconstructed, or extended at centers in existence as of the effective date of the Section.
5. For track occupying or adjacent to public roadways:
    - a. Requirements for track occupying a public roadway shall be considered individually by the Commission.
    - b. Track adjacent to a public roadway shall have a minimum clearance of 10 feet from the centerline of track to the face of curb or edge of roadway. Railroad maintenance roads shall be exempt from the provisions of this subsection.
  6. For roadway structures over or under railroad track:
    - a. Overhead roadway structures shall be a minimum of 23 feet above top of rail, except that overhead clearances greater than 23 feet may be approved when justified on the basis of railroad electrification.
    - b. Roadway structures beneath railroad track shall have a minimum clearance of 15 feet above the surface of the roadway or, if additional clearance is required, as determined by the Commission after public hearing.
  7. The general clearance requirements shall be:
    - a. No merchandise, materials, equipment, or other articles shall be placed either on the ground or on a platform adjacent to any track at a distance less than 8 feet 6 inches from the centerline of track. A suitable line or other marker shall be maintained on all platforms at a distance of 8 feet 6 inches from the centerline of track to indicate minimum clearance for the articles.
    - b. Nothing herein shall be considered as preventing the movement of special work equipment or cars, except that such operations shall be conducted in a safe manner.
  8. For impaired clearance signs:
    - a. Impaired clearance signs shall be of sufficient size to accommodate any wording prescribed by the Commission. The letters of said wording shall be at least 2 1/2 inches in height with a 1/2 of an inch black stroke on a fluorescent white background. In the event the Commission does not specify said wording, railroads may use their own wording for such warning signs.
    - b. Impaired clearance signs shall be located at no less than 8 feet 6 inches from the centerline of track,
- shall be in a position to be clearly visible to approaching train crews.
- C. All railroads operating wholly or partially within the state of Arizona shall comply with the requirements of this Section in all construction, reconstruction, or modification of track or railroad facilities performed subsequent to the effective date of this Section.
  - D. Existing track, walkways, or railroad facilities may be maintained at existing clearances, except that such track, walkways, or railroad facilities shall not jeopardize the safety of railroad employees, industrial employees, or the general public.
  - E. Except as provided for in subsection (B)(4)(f) of this Section, all applications for exemption from any of the requirements of this Section shall be approved by the Commission prior to construction, reconstruction, or modification of track or railroad facilities adjacent thereto. An application for exemption shall:
    1. Be submitted to the Railroad Safety Section, Arizona Corporation Commission;
    2. Contain the full name and address of the applicant and the nature of the applicant's business;
    3. Set forth the reason and the extent for which relief is sought;
    4. Include sufficient information to support and justify the exemption; and,
    5. If necessary, include engineering drawings to further clarify the application.

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-111. Crew Requirements**

- A. Railroads operating within Arizona shall maintain a minimum of two operating employees in the control compartment of the lead locomotive unit of a train.
- B. Compliance with subsection (A) of this Section shall not be required during switching operations, while moving cars for inspection purposes, or while performing setouts in conjunction with road service.

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-112. Reserved****R14-5-113. Hazardous Materials**

- A. All railroad operations which engage in the loading of railroad freight cars for the purpose of transporting hazardous materials by rail in and through Arizona shall be governed by all of the following:
  1. The material to be transported shall be authorized for transportation in freight cars. The freight car selected shall be compatible with the lading and be authorized for the commodity by the United States Department of Transportation. All fittings, tank, and safety appurtenances shall be in proper condition for the safe transportation of the product.
  2. Loading operations shall be performed only by persons properly instructed in loading hazardous materials and made responsible for careful compliance with 49 CFR 174.67, as amended and revised through November 1, 1989, incorporated herein by reference, on file with the Office of the Secretary of State and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975.
  3. Hand brakes shall be set and wheels blocked on all cars to be loaded.
  4. Caution signs shall be so placed on the track or cars to give necessary warning to persons approaching the cars from the open end of a siding and shall be left in place

## Corporation Commission – Transportation

- until after the cars are unloaded or loaded and disconnected from the loading or unloading connection. The signs shall be of metal or other comparable material, at least 12 inches high by 15 inches wide in size, and bear the words, "STOP--Freight Car Connected", or "STOP--Men at Work", the word "STOP" being in letters at least 4 inches high and other words in letters at least 2 inches high. The letters shall be white on a blue background.
5. Loading connections shall be securely attached to inlet pipes and other fittings before any discharge valves are opened.
  6. Freight cars shall not be allowed to stand with connections attached after loading is completed. Throughout the entire period of loading, and while the car is connected to the loading device, the car shall be attended by the loader.
  7. If necessary to discontinue loading a freight car for any reason, all loading connections shall be disconnected. All valves first shall be tightly closed, and the closures of all other openings securely applied.
  8. As soon as a freight car is completely loaded, all valves shall be made tight, the loading connections shall be removed, and all other closures made tight, except that heater coil inlet and outlet pipes shall be left open for drainage. The manhole cover shall be re-applied by the use of a bar or wrench, the outlet valve reducer and outlet valve cap replaced by the use of a wrench having a handle at least 36 inches long, and the outlet valve cap plug, end plug, and all other closures of openings and of their protective housings shall be closed by the use of a suitable tool.
  9. Railroad defect cards shall not be removed.
  10. If oil or gasoline has been spilled on the ground around connections, it shall be covered with fresh dry sand or dirt.
  11. All tools and implements used in connection with loading shall be kept free of oil, dirt, and grit.
- B. Placarding shall be as follows:**
1. When lading requiring placarding in compliance with provisions of 49 CFR 172.500(c), as amended and revised through November 1, 1989, incorporated herein by reference, on file with the Office of the Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975, is loaded in a freight car, it shall be the responsibility of the person loading the freight car to affix the prescribed number and type of placards to the freight car.
  2. The freight car shall be equipped with at least 4 metal placard holders which are suitable for service.
  3. Placards affixed to hazardous materials freight cars shall be in a condition so that the format, legibility, color, and visibility are not substantially reduced due to damage, deterioration, or obscurement by dirt or other matter.
- C. The accumulation of static electricity during the loading or unloading of freight cars with flammable liquids or flammable compressed gases shall be prevented by providing a means of grounding the freight car body to a suitable location using a grounding device capable of conducting static electricity away from the freight car and the loading or unloading appliances and appurtenances.**
- D. For rail bonds and insulated joints:**
1. Rail shall be adequately bonded at each joint upon which railroad equipment may stand while flammable liquids or flammable gases are being transferred.
  2. Insulated rail joints shall be installed to electrically separate the loading or unloading track section from all other track rails.
    - a. Insulated rail joints shall be applied only to rail having sawed ends.
    - b. Insulated rail joints shall not be applied to rails covered with scale, dirt, or other foreign matter; to rails with battered ends; or when the opening between rail ends is greater than 3/8 of an inch.
  3. An emergency transfer of flammable liquids or flammable gases that must be performed in conjunction with a hazardous material incident shall be exempt from Rail Bonding and Insulated Joint requirements, provided other means, such as ground rods, are utilized to ground the containers and transfer appliances.
- E. A derail shall be used to prevent the intrusion into an area where freight cars are being loaded or unloaded with a hazardous material. This device shall be kept in "derailing" position and locked with an effective locking device while freight cars are connected for loading or unloading. The key for the lock used to immobilize the derailing device shall be maintained in the care of the person who is in charge of the freight cars being loaded or unloaded.**
- F. Placarded freight cars which contain hazardous materials shall not be left to stand in populated areas for the purpose of constructive placement where the freight car is not under the direct supervision, observation, or control of the railroad carrier.**
- G. Rail carriers shall be prohibited from allowing freight or freight cars carrying hazardous materials to be constructively placed or otherwise withheld from their destination at other than an Environmental Protection Agency-approved transfer facility. For the purposes of this subsection, "transfer facility" shall mean any transportation-related facility including loading docks, parking areas, and other similar areas where shipments of hazardous materials are held during the normal course of transportation.**
- H. All railroad operations that engage in the unloading of railroad freight cars for the purpose of transporting hazardous materials by rail in and through Arizona shall be governed by 49 CFR 174.67, as amended and revised through October 1, 1989, incorporated herein by reference, on file with the Office of the Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975, all being regulations of the Federal Railroad Administration, United States Department of Transportation, Railroad Safety regulations.**

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-114. End-of-train Device**

Any railroad carrier subject to the provisions of 49 CFR 221, amended and revised through October 1, 1989, incorporated herein by reference, on file with the Office of the Secretary of State, and copies available from the United States Government Printing Office, P.O. Box 371975M, Pittsburgh, Pennsylvania 15250-7975, operating trains outside of yard limits without an occupied caboose at the rear of the train shall have an operable end-of-train device capable of activating the train's emergency air brake system electronically from the control panel of the locomotive controlling the train.

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-115. Train Composition**

## Corporation Commission – Transportation

All carriers operating within the state of Arizona shall strictly adhere to their respective instructions relative to “train makeup” or “special car handling instructions” as promulgated in the current timetable or other operating department special instructions.

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

**R14-5-116. Civil Penalty**

- A.** Any person, firm or corporation violating any provision of this Article or Order adopted pursuant to this Article pertaining to railroad safety and the transportation of hazardous materials by rail shall be subject to a civil penalty not to exceed \$2,000 for each violation with each day constituting a separate violation. In no event shall the maximum civil penalty exceed \$200,000 for any related series of violations. The penalties described in this subsection shall not apply to R14-5-102.
- B.** Any civil penalty pertaining to railroad and rail hazardous materials transportation safety may be compromised by the

Commission. In determining the amount of the penalty, or the amount agreed upon in compromise, the appropriateness of the penalty to the size of the business of the person, firm or corporation charged, the gravity of the violation and the good faith of the person, firm, or corporation charged in attempting to achieve compliance, after notification of a violation, shall be considered by the Commission. The amount of the penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owed by the state of Arizona to the person, firm, or corporation charged or may be recovered in a civil action in the Superior Court of the state of Arizona.

- C.** The Commission may avail itself of any other authority or remedies available under the Constitution of Arizona and the Arizona Revised Statutes to effect the purpose of this Article.

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

## Appendix 1. Walkways Along Main Tracks Along Short Line &amp; Branch Line - One Track

Walkways Along Main Tracks  
Along Short Line & Branch Line

## Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

## Appendix 2. Walkways Along Main Tracks Along Short Line &amp; Branch Line - Two Tracks

Walkways Along Main Tracks  
Along Short Line & Branch Line

## Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

**Appendix 3. Walkways at Main Line Switches Entering Yards and Serving Industry Tracks Except as Provided in Standard No. 4 - Walkways to be Level with Ties**

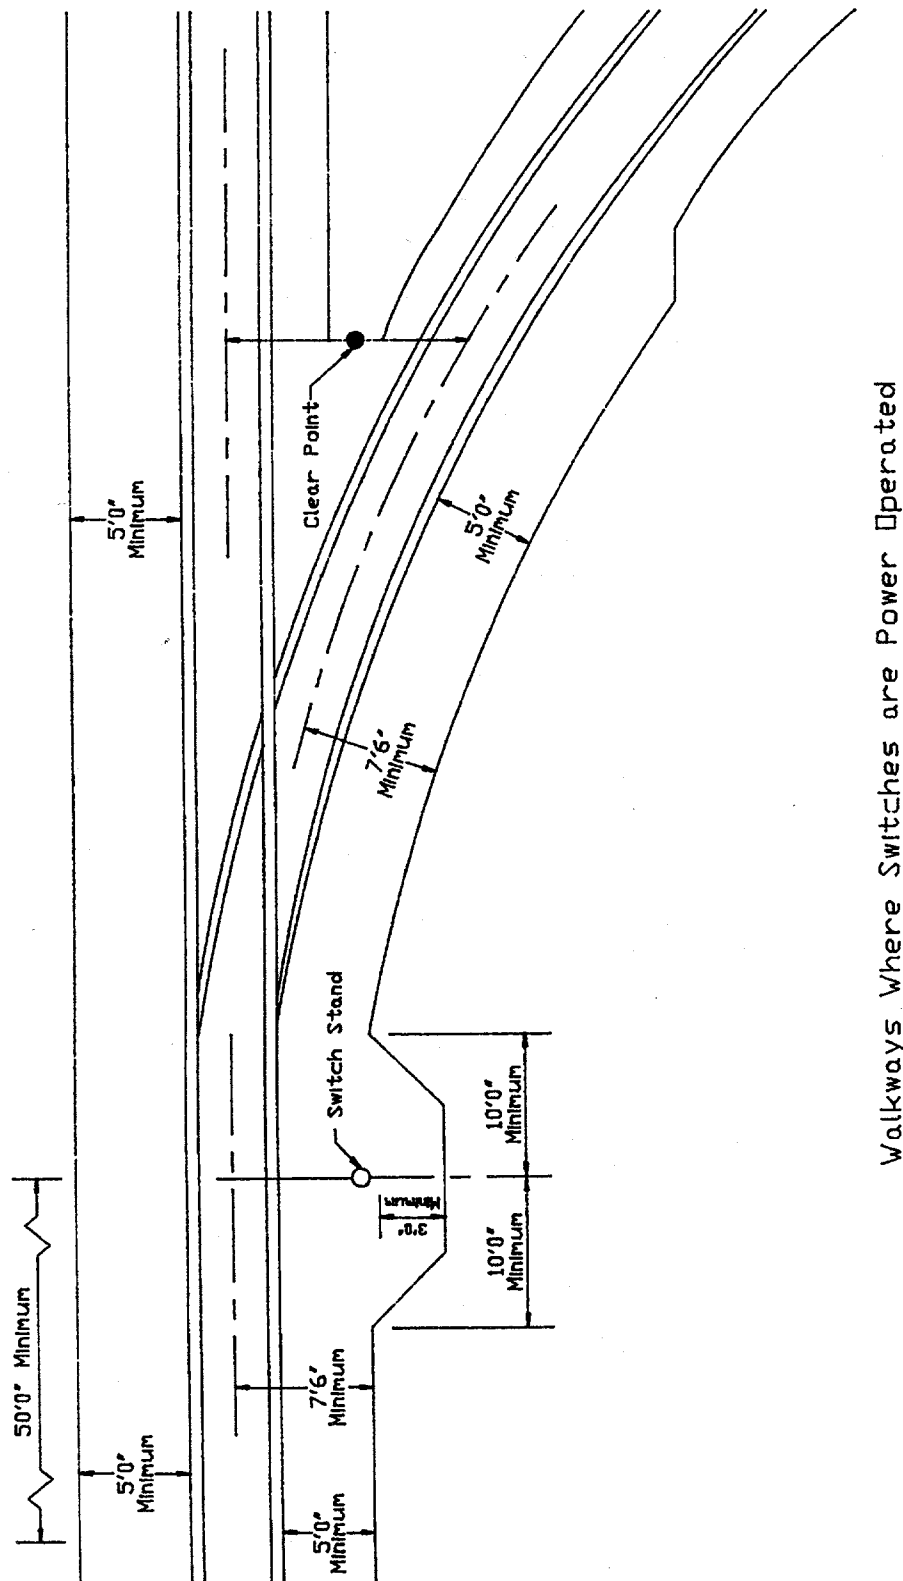

Walkways at Main Line Switches Entering Yards  
and Serving Industry Tracks Except as Provided  
in Standard No. 4 - Walkways to be Level with Ties

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

#### Appendix 4. Walkways Where Switches are Power Operated

## Walkways Where Switches are Power Operated

### Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

**Appendix 5. Walkways in Yards and Points Where Industrial Switching is Performed But Not Less Than 50 Feet in Advance of Switch**

Walkways in Yards and Points Where Industrial  
Switching is Performed, But Not Less Than  
50 Feet in Advance of Switch

**Historical Note**

Adopted effective May 28, 1992 (Supp. 92-2).

## Appendix 6. Requirements for Walkways Adjacent to Tracks

## Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

## Appendix 7. Typical Clearance of Structures from Railroad Tracks

**TYPICAL  
CLEARANCE OF STRUCTURES FROM RAILROAD TRACKS  
AS PRESCRIBED BY  
ARIZONA CORPORATION COMMISSION  
ADMINISTRATIVE REGULATION R14-5-110  
FOR NEW WORK AND RECONSTRUCTION OF EXISTING FACILITIES ADJACENT  
TO STANDARD GAUGE RAILROAD TRACKS TRANSPORTING FREIGHT CARS.**

## NOTES

OVERHEAD WIRE CLEARANCES SHALL CONFORM TO COMMISSION'S REGULATION R14-5-110.

POSTS, POLES, SIGNS AND SIMILAR FACILITIES MAY HAVE MINIMUM CLEARANCE OF 8'-6" BUT CLEARANCE OF 10'-0" IS RECOMMENDED WHERE PRACTICABLE.

ALL SIDE CLEARANCE DIMENSIONS ARE FOR TANGENT TRACK. IN GENERAL, SIDE CLEARANCE FOR CURVE TRACK TO BE 1'-0" GREATER THAN THAT FOR TANGENT TRACK.

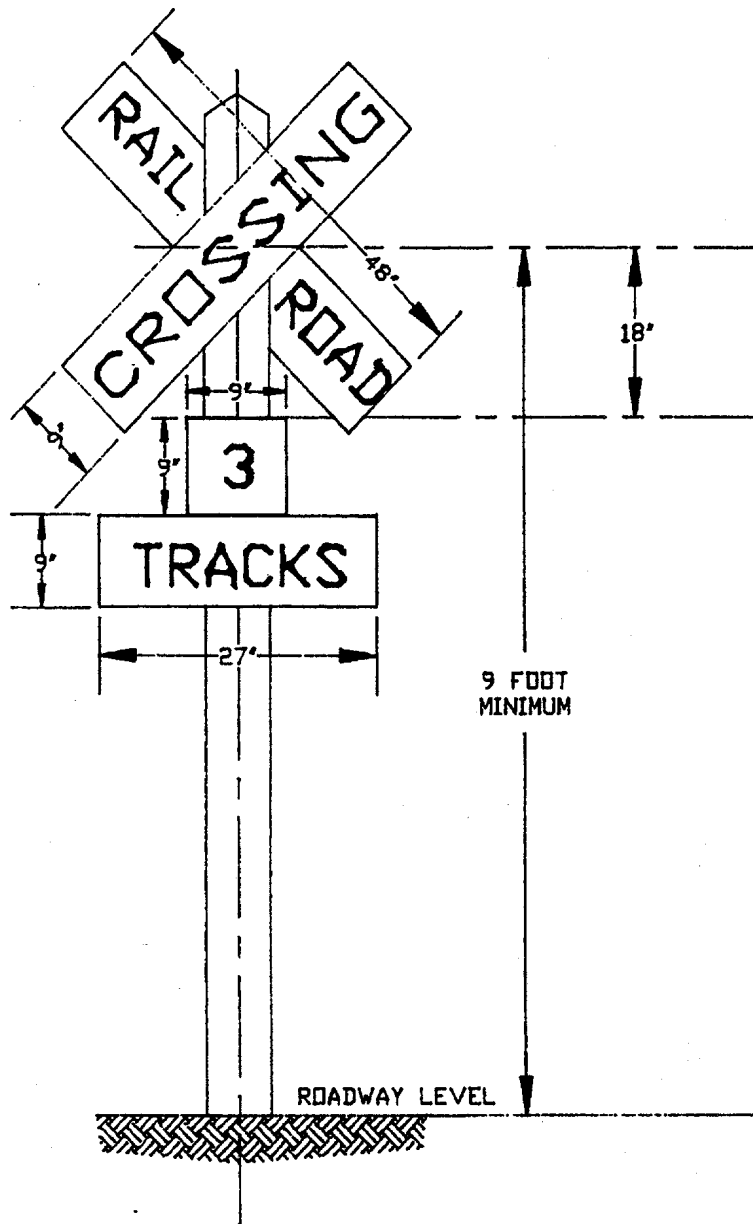

WHEN TRACK IS USED PRINCIPALLY FOR LOADING OR UNLOADING REFRIGERATOR CARS, PLATFORM HEIGHT OF 4'-6" ABOVE TOP OF RAIL MAY BE MAINTAINED PROVIDED THAT MINIMUM SIDE CLEARANCE TO CENTER LINE OF TRACK SHALL BE 8'-0".

PLATFORMS 4'-0" OR LESS IN HEIGHT WITH MINIMUM CLEARANCE OF 7'-3" MAY BE EXTENDED AT EXISTING CLEARANCES IF SUCH EXTENSION IS NOT IN CONNECTION WITH RECONSTRUCTION OF ORIGINAL PLATFORM.

### Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

## Appendix 8. Highway Crossing Sign

HIGHWAY CROSSING SIGN

48' x 9'  
(Drilled for 90 Degree Mounting)

9' x 9'  
27' x 9'

## Historical Note

Adopted effective May 28, 1992 (Supp. 92-2).

**ARTICLE 2. PIPELINE SAFETY****R14-5-201. Definitions**

As used in this Article:

1. "Building" means any structure intended for supporting or sheltering any occupancy.
2. "Commission" means the Arizona Corporation Commission.
3. "Discontinuation of service" means an interruption in service expected to exceed four hours, occurring after an operator tests a service line or meter set assembly and determines that additional actions are necessary to restore service because of a leak or hazardous operating condition.
4. "DOT" means the U.S. Department of Transportation.
5. "Evacuation" means denying entry into or the organized clearing of a building or buildings, involving:
  - a. One hundred or more individuals from any number of buildings;
  - b. All of the individuals present from five or more buildings;
  - c. All of the individuals present from five or more businesses within a single building such as a strip mall; or
  - d. A nonresidential building known or discovered to be occupied by individuals who are confined, are of impaired mobility, or would be difficult to evacuate because of their age or physical or mental condition or capabilities, such as a hospital, prison, school, daycare facility, retirement facility, or assisted living facility.
6. "Gas" means natural gas, flammable gas, or toxic or corrosive gas and includes LPG and LNG that is vaporized.
7. "Hazardous liquid" means:
  - a. Petroleum,
  - b. A petroleum product, or
  - c. Anhydrous ammonia.
8. "Independent laboratory" means a laboratory that is not owned or operated by the operator and that has no affiliation with the operator through ownership, familial relationship, or contractual or other relationship that results in the laboratory being controlled by or under common control with the operator.
9. "Intrastate pipeline" means all pipeline facilities included in the definition of "pipeline system" that are used by a provider to transport gas, LNG, or a hazardous liquid within Arizona and that are not used to transport gas, LNG, or a hazardous liquid in interstate or foreign commerce. This includes, without limitation, any equipment, facility, building, or other property used or intended for use in transporting gas, LNG, or a hazardous liquid.
10. "Liquefied natural gas" means natural gas or synthetic gas having as its major constituent methane (CH<sub>4</sub>) that has been changed to a liquid.
11. "LNG" means liquefied natural gas.
12. "LNG facility" means those portions of a pipeline system that are used for transporting or storing LNG or for LNG conversion.
13. "LPG" means liquefied petroleum gas.
14. "MAOP" means maximum allowable operating pressure, the maximum pressure at which a gas or LPG pipeline or segment of pipeline may be operated.
15. "Master meter system" means physical facilities for distributing gas within a definable area where the operator purchases metered gas from a provider to provide gas service to two or more buildings other than at a single family residence.
16. "Office of Pipeline Safety" means the Commission personnel assigned to perform the Commission's day-to-day activities under A.R.S. Title 40, Chapter 2, Article 10, who are headquartered at 2200 N. Central Ave., Suite 300, Phoenix, AZ 85004 and whose contact information is available at <http://www.azcc.gov/Divisions/Safety>.
17. "Operator" means a person that owns or operates a pipeline system or master meter system.
18. "OPS" means "Office of Pipeline Safety," as defined herein.
19. "Outage" means an unplanned and unscheduled discontinuation of service:
  - a. Concurrently to 250 or more residential customer accounts or to 10 or more commercial customer accounts; or
  - b. To a nonresidential building known or discovered to be occupied by individuals who are confined, are of impaired mobility, or would be difficult to evacuate or relocate because of age or physical or mental condition or capabilities, such as a hospital, prison, school, daycare facility, retirement facility, or assisted living facility.
20. "Person" means any individual, firm, joint venture, partnership, corporation, association, cooperative association, joint stock association, trustee, receiver, assignee, or personal representative, or the state or any political subdivision of the state.
21. "PHMSA" means the U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration.
22. "Pipeline system" means all parts of the physical facilities of a public service corporation or provider through which gas, LPG, LNG, or a hazardous liquid moves in transportation, including but not limited to pipes, compressor units, metering stations, regulator stations, delivery stations, holders, fabricated assemblies, and other equipment, buildings, and property so used.
23. "Provider" means any intrastate gas pipeline operator, public service corporation, or municipality that provides natural gas or LPG service to a master meter customer.
24. "PSIG" means pounds per square inch gauge.
25. "Public service corporation" has the same meaning as in Article 15, § 2 of the Arizona Constitution.
26. "Sandy type soil" means sand no larger than "coarse" as defined by the American Society for Testing and Materials, ASTM D-2487-83, Standard Practice for Classification of Soils for Engineering Purposes (1983), including no future editions or amendments, which is incorporated by reference; on file with the Office of Pipeline Safety; and published by and available from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA, 19428-2959.
27. "Sour gas" means natural gas that contains the corrosive sulfur-bearing compound hydrogen sulfide (H<sub>2</sub>S) in a concentration that exceeds a minimum threshold of 0.25 grain of hydrogen sulfide per 100 cubic feet (5.8 milligrams/m<sup>3</sup>) under standard operating conditions (4 parts per million).
28. "Sour oil" means crude oil containing the impurity sulfur in a concentration greater than 0.5 percent.
29. "State" means the state of Arizona and all lands within its boundaries.
30. "Structure" means something that is built or constructed, or any piece of work artificially composed of parts joined together in some definite manner.
31. "Transport" or "transportation" of gas, LNG, or a hazardous liquid means the gathering, transmission, distribu-

tion, or storage of gas, LNG, or a hazardous liquid using a pipeline system within the state.

32. “Unknown failure” means an occurrence in which a portion of a pipeline system fails, and:
  - a. The cause cannot be attributed to any observable corrosion, third-party damage, natural or other outside force, construction or material defect, equipment malfunction, or incorrect operations; or
  - b. The operator and the Office of Pipeline Safety disagree as to the cause.

#### Historical Note

Adopted effective October 23, 1987 (Supp. 87-4).  
 Amended Paragraph (5) effective February 3, 1989 (Supp. 89-1). Amended effective July 25, 1994, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 94-3). Amended by exempt rulemaking at 5 A.A.R. 3693, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2382, effective May 10, 2002 (Supp. 02-2). Amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4).

#### R14-5-202. Construction and Safety Standards for Gas, LNG, and Hazardous Liquid Pipeline Systems

- A. Applicability: This Section applies to the construction, reconstruction, repair, operation, and maintenance of each intrastate gas, LNG, or hazardous liquid pipeline system, pursuant to A.R.S. § 40-441.
- B. Subject to the definitional changes in R14-5-201 and the modifications noted in this Section, the Commission adopts, incorporates, and approves as its own 49 CFR 40; 191; 192, except (1)(A)(2) and (3) of Appendix D to Part 192; 193; 195, except 195.1(b)(2), (3), and (4); and 199 (October 1, 2015), including no future editions or amendments, which are incorporated by reference; on file with the Office of Pipeline Safety; and published by and available from the U.S. Government Printing Office, 710 North Capital Street N.W., Washington DC 20401, and at <http://www.gpo.gov/fdsys/>. For purposes of 49 CFR 192, “Business District” means an area where the public congregate for economic, industrial, religious, educational, health, or recreational purposes and two or more buildings used for these purposes are located within 100 yards of each other.
- C. The above mentioned incorporated Parts of 49 CFR, except 49 CFR 191; 49 CFR 192.727(g)(1), 192.913(b)(1)(vii), 192.943(a), 192.949(a)-(b), and 192.951; 49 CFR 193 Subpart A; and 49 CFR 195 Subparts A and B, are revised as follows:
  1. Substitute “Commission” where “Administrator,” “Pipeline and Hazardous Materials Administration,” “Office of Pipeline Safety,” or “OPS” appears; and
  2. Substitute “Office of Pipeline Safety, Arizona Corporation Commission, at its office in Phoenix, Arizona” where the address for the “Information Resources Manager, Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation” appears.
- D. An operator of an intrastate pipeline shall file with the Commission an Operation and Maintenance Plan, including an emergency plan, at least 30 days before placing a pipeline system into operation. Any changes in an existing Operation and Maintenance Plan shall be filed within 30 days after the effective date of the change.
- E. An operator of an intrastate pipeline transporting sour gas or sour oil shall comply with the following industry standards addressing facilities handling hydrogen sulfide (H<sub>2</sub>S), which are incorporated by reference, including no future editions or amendments:
  1. NACE Standard MR0175-99, Standard Materials Requirements-Sulfide Stress Cracking Resistant Metallic Material for Oilfield Equipment (1999 Revision), on file with the Office of Pipeline Safety and published by and available from the NACE International, 1440 S. Creek Dr., Houston, TX 77084-4906; and
  2. API RP55: Recommended Practice for Conducting Oil and Gas Producing and Gas Processing Plant Operations Involving Hydrogen Sulfide (2nd Edition 1995), on file with the Office of Pipeline Safety and published by and available from the American Petroleum Institute, 1200 L Street, NW, Washington, DC 20005-4070 and at <http://www.techstreet.com/>.
- F. An operator of an intrastate pipeline transporting LNG, hazardous liquid, or gas shall not construct any part of a hazardous liquid, LNG, or gas pipeline system under a building. If a building encroaches over a pipeline system, the operator may require the property owner to remove the building from over the pipeline or to reimburse the operator the cost associated with relocating the pipeline system. The operator shall determine, within 90 days after discovering the encroachment, whether the encroachment can be resolved within 180 days. If the operator determines that the encroachment cannot be resolved within 180 days, the operator shall, within 90 days of discovery, submit to the Office of Pipeline Safety a written plan to resolve the encroachment within a period longer than 180 days. The Office of Pipeline Safety may then extend the 180-day requirement in order to allow the property owner and the operator to implement the written plan to resolve the encroachment. If the operator does not submit a written plan, and the encroachment is not resolved within 180 days of discovery, the operator shall discontinue service to the pipeline system. This modifies 49 CFR 192.361 and 195.210.
- G. An operator of an intrastate distribution pipeline transporting gas shall not construct any part of a pipeline system less than 8 inches away from any other underground structure. If the 8-inch clearance cannot be maintained, a sleeve, casing, or shielding shall be used. This modifies 49 CFR 192.361.
- H. An operator of an intrastate pipeline transporting gas that has regulators, meters, or regulation meter sets that have been out of service for 36 months shall disconnect the pipeline from all sources and supplies of gas or hazardous liquids, purge the gas or hazardous liquids from the pipeline being disconnected, and cap all ends within six months after the 36 months have passed. This modifies 49 CFR 192.727.
- I. An operator of an intrastate pipeline shall not install or operate a gas regulator that might release gas within 3 feet of a source of ignition, an opening into a building, an air intake into a building, or any electrical source that is not intrinsically safe. The 3 foot clearance from a source of ignition shall be measured from the vent or source of release (discharge port), not from the physical location of the meter set assembly. This subsection does not apply to building permits issued and subdivisions platted before October 1, 2000. If an encroachment into the required 3 foot clearance is caused by an action of the property owner, an occupant, or a provider after the effective date of this rule, the operator may require the property owner to resolve the encroachment or to reimburse the operator the cost associated with relocating the pipeline system. The operator shall determine, within 90 days after discovering the encroachment, whether the encroachment can be resolved within 180 days. If the operator determines that the encroachment cannot be resolved within 180 days, the operator shall, within 90 days of discovery, submit to the Office of Pipeline Safety a written plan to resolve the encroachment within a period longer than 180 days. The Office of Pipeline Safety

may then extend the 180-day requirement in order to allow the property owner and the operator to implement the written plan to resolve the encroachment. If the operator does not submit a written plan, and the encroachment is not resolved within 180 days of discovery, the operator shall discontinue service to the affected pipeline system. This modifies 49 CFR 192.357 and 192.361.

- J. An operator of an intrastate pipeline transporting LNG, gas, or a hazardous liquid shall use a cathodic protection system designed to protect the metallic pipeline in its entirety, in accordance with 49 CFR 192, Subpart I, as incorporated by reference in subsection (B). Sections (I)(A)(2) and (3) of Appendix D to Part 192 shall not be utilized. This modifies 49 CFR 192.463(a), 193.2629, and 195.571.
- K. An operator of an intrastate pipeline transporting hazardous liquid or gas shall not install Acrylonitrile-Butadiene-Styrene (ABS) or aluminum pipe in a pipeline system. This modifies 49 CFR 192.53 and 192.59.
- L. An operator of an intrastate pipeline transporting hazardous liquid or gas shall not install plastic pipe aboveground unless the plastic pipeline is protected by a metal casing, or equivalent, and the installation is approved by the Office of Pipeline Safety. An operator may use a temporary aboveground plastic pipeline bypass for up to 60 days, provided that the plastic pipeline is protected and is under the direct supervision of the operator at all times. This modifies 49 CFR 192.321 and 195.254.
- M. An operator of an intrastate pipeline transporting hazardous liquid or gas that constructs a pipeline system or any portion thereof using plastic pipe shall install, at a minimum, a 14-gauge coated or corrosion resistant, electrically conductive wire as a means of locating the pipe while it is underground. Tracer wire shall not be wrapped around the plastic pipe. Tracer wire may be taped, or attached to the pipe in another manner, provided that the adhesive or attachment is not detrimental to the integrity of the pipe wall. This modifies 49 CFR 192.321 and 195.246.
- N. An operator of an intrastate pipeline transporting gas or hazardous liquid that constructs an underground pipeline system using plastic pipe shall bury the installed pipe with at least 6 inches of sandy type soil, free of any rock or debris, surrounding the pipe for bedding and shading, unless the pipe is otherwise protected as approved by the Office of Pipeline Safety. Steel pipe shall be installed with at least 6 inches of sandy type soil, free of any debris or materials injurious to the pipe coating, surrounding the pipe for bedding and shading, unless the pipe is otherwise protected as approved by the Office of Pipeline Safety. This modifies 49 CFR 192.321, 192.361, and 195.246.
- O. An operator of an intrastate pipeline transporting gas that constructs an underground pipeline system using plastic pipe shall install the pipe with sufficient slack to allow for thermal expansion and contraction. In addition, all plastic pipe and fittings for use in an area with service temperatures above 100° F shall be tested and marked CD, CE, CF, or CG as required by ASTM D2513 (1995), including no future editions or amendments, which is incorporated by reference, on file with the Office of Pipeline Safety, and published by and available from ASTM International, 100 Barr Harbor Dr., P.O. Box C700, W. Conshohocken, PA 19428-2959 and through <http://www.astm.org>. This modifies 49 CFR 192.63.
- P. An operator of an intrastate pipeline system transporting hazardous liquid or gas shall qualify welding procedures and shall ensure that welding of steel pipelines is performed in accordance with API Standard 1104, as incorporated by reference in 49 CFR 192.7, by welders qualified pursuant to API Standard 1104, except that welders qualified as delineated in 49 CFR 192, Appendix C may be used for low stress level pipe. This modifies 49 CFR 192.225, 192.227, 195.214, and 195.222.
- Q. An operator of an intrastate pipeline transporting gas shall survey and grade all detected leakage according to the standards provided below, which modify 49 CFR 192.706 and 192.723:
  1. In the case of all gas except LPG, leakage surveys and grading shall be performed pursuant to the standards set by ASME Guide for Gas Transmission and Distribution Pipeline System, Guide Material, Appendix G-11-1983, including no future editions or amendments, which is incorporated by reference; on file with the Office of Pipeline Safety; published by and available from ASME, Two Park Avenue, New York, NY 10016-5990; and modified by omitting 4.4(c) and by replacing “should” with “shall” each time it appears.
  2. In the case of LPG, leakage surveys and grading shall be performed pursuant to the standards set by ASME Guide for Gas Transmission and Distribution Pipeline System, Guide Material, Appendix G-11A-1983, including no future editions or amendments, which is incorporated by reference; on file with the Office of Pipeline Safety; published by and available from ASME, Two Park Avenue, New York, NY 10016-5990; and modified by replacing “should” with “shall” each time it appears.
  3. Leakage survey records shall identify in some manner each pipeline surveyed and shall be maintained to demonstrate that each required leakage survey has been conducted. This modifies 49 CFR 192.706 and 192.723.
- R. An operator of an intrastate transmission pipeline transporting gas shall conduct a leakage survey at least twice each calendar year, at an interval not exceeding 7 1/2 months, independent of class location, and shall repair each underground leak classified as grade two or three either upon discovery or within one year after discovery. This modifies 49 CFR 192.706 and 192.711.
- S. An operator of an intrastate transmission pipeline transporting gas and operating at or above 20 percent of Specified Minimum Yield Strength shall ensure that nondestructive testing is completed for each weld performed on newly installed, replaced, or repaired pipeline or an appurtenance. The nondestructive testing shall be completed before the newly welded area of the pipeline or appurtenance is used for service. This modifies 49 CFR 192.241.
- T. An operator of an LNG facility shall ensure that nondestructive testing is completed for each weld performed on newly installed, replaced, or repaired pipeline or an appurtenance. This modifies 49 CFR 193.2303.
- U. In the event of an unknown failure of a gas, LNG, or hazardous liquid pipeline, resulting in the operator’s being required to provide a telephonic or written report under R14-5-203 (B) or (C) and in the operator’s removing a portion of the failed pipeline, the following shall occur:
  1. The operator shall retain the portion of failed pipeline that was removed;
  2. The operator shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed, providing the following information:
    - a. Identity of the failed pipeline,
    - b. Description and location of the failure,
    - c. Date and time of the removal,
    - d. Length or quantity of the removed portion,
    - e. Storage location of the removed portion, and

## Corporation Commission – Transportation

- f. Any additional information about the failure or the removal of the portion of the failed pipeline that is requested by the Office of Pipeline Safety;
3. Within 48 hours after receiving telephonic notification pursuant to subsection (U)(2), the Office of Pipeline Safety shall:
  - a. Determine, based on the information provided by the operator and the availability, adequacy, and reliability of any pipeline testing laboratory operated by the operator, whether it is necessary to have the removed portion of pipeline tested at an independent laboratory; and
  - b. Telephonically notify the operator either:
    - i. That the operator must have the removed portion of pipeline tested, in accordance with Office of Pipeline Safety directions, by an independent laboratory selected by the Office of Pipeline Safety as provided in subsection (U)(5), to determine the cause or causes of the failure; or
    - ii. That the operator is not required to have the removed portion of pipeline tested by an independent laboratory and instead must conduct testing in its own pipeline testing laboratory, after which the operator may discard the removed portion of pipeline;
4. After providing telephonic notice as provided in subsection (U)(3)(b), the Office of Pipeline Safety shall confirm its notification in writing;
5. If the Office of Pipeline Safety directs testing by an independent laboratory:
  - a. The Office of Pipeline Safety shall:
    - i. Determine, as provided in subsection (U)(6), the independent laboratory that will do the testing and the period of time within which the testing is to be completed;
    - ii. Determine, based on the available information concerning the failure, the number and types of tests to be performed on the removed pipeline; and
    - iii. Notify the operator of its determinations; and
  - b. The operator shall:
    - i. Contact the selected independent laboratory to arrange the scheduling of the required tests;
    - ii. Notify the Office of Pipeline Safety, at least 20 days before the date of the tests, of the date and time scheduled for the laboratory tests;
    - iii. At the request of the Office of Pipeline Safety, ensure that a representative of the Office of Pipeline Safety is permitted to observe any or all of the tests;
    - iv. Ensure that the original test results are provided to the Office of Pipeline Safety by the independent laboratory within 30 days after the tests are completed; and
    - v. Pay for the independent laboratory testing; and
6. In determining an independent laboratory to perform testing required under subsection (U), the Office of Pipeline Safety shall:
  - a. Submit to at least three different independent laboratories written requests for bids to conduct the testing;
  - b. Consider each responding independent laboratory's qualifications to perform the testing, as demonstrated by:
    - i. Past experience in performing the required test or tests according to ASTM International standards, and
    - ii. Any recognition that a laboratory may have received from a national or international laboratory accreditation body, such as through a certification or accreditation process;
  - c. Wait to select an independent laboratory until one of the following occurs:
    - i. The Office of Pipeline Safety has received written bids from at least three different independent laboratories, or
    - ii. Thirty days have passed since the date of the request for bids; and
  - d. Select the independent laboratory that offers the optimum balance between cost and demonstrated ability to perform the required test or tests. This modifies 49 CFR 192.617, 193.2515, and 195.402.
- V. An operator shall ensure that all repair work performed on an existing intrastate pipeline transporting LNG, hazardous liquid, or gas complies with this Article.
- W. The Commission may waive compliance with any of the requirements of this Section upon a finding that such a waiver is in the interest of public and pipeline safety.
- X. To ensure compliance with the provisions of this Article, the Commission or an authorized representative thereof may enter the premises of an operator of an intrastate pipeline to inspect and investigate the property, books, papers, electronic files, business methods, and affairs that pertain to the pipeline system operation.

**Historical Note**

Adopted effective October 23, 1987 (Supp. 87-4).  
 Amended subsections (B), (I) and (J) effective February 3, 1989 (Supp. 89-1). Amended effective December 18, 1991 (Supp. 91-4). Amended effective July 25, 1994, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 94-3).  
 Amended effective August 30, 1996, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 96-3). Amended effective September 26, 1997, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 97-3). Amended by exempt rulemaking at 5 A.A.R. 3693, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2382, effective May 10, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 3496, effective September 15, 2003 (Supp. 03-3). Amended by final rulemaking at 11 A.A.R. 1253, effective March 3, 2005 (Supp. 05-1). Amended by final rulemaking at 13 A.A.R. 4533, effective January 25, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 126, effective December 28, 2011 (Supp. 11-4). Amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Section R14-5-202 amended by emergency rulemaking at 22 A.A.R. 5, effective December 15, 2015 for 180 days (Supp. 15-4). Emergency renewed at 22 A.A.R. 1637, effective June 7, 2016 for 180 days (Supp. 16-2). Section amended by final rulemaking at 22 A.A.R. 2869, effective September 14, 2016 (Supp. 16-4).

**R14-5-203. Pipeline Incident Reports**

- A. Applicability. This Section applies to all intrastate pipeline systems.
- B. Required incident reports by telephone:

## Corporation Commission – Transportation

1. An operator of an intrastate pipeline transporting LNG or gas shall immediately notify by telephone the Office of Pipeline Safety, at 602-262-5601 during normal working hours or at 602-252-4449 at all other times, upon discovering the occurrence of any of the following related to the operator's intrastate pipeline system:
  - a. Release of gas or LNG from a pipeline or LNG facility, when any of the following results:
    - i. Death or personal injury requiring hospitalization;
    - ii. Injury to any individual resulting in loss of consciousness;
    - iii. An explosion or fire not intentionally set by the operator;
    - iv. Property damage estimated in excess of \$5,000, including the value of the gas lost; or
    - v. Unintentional release of gas from a transmission pipeline;
  - b. Emergency transmission pipeline shutdown;
  - c. News media inquiry;
  - d. Overpressure of a pipeline system where a pipeline operating at less than 12 PSIG exceeds MAOP by 50%, where a pipeline operating between 12 PSIG and 60 PSIG exceeds MAOP by 6 PSIG, or where a pipeline operating over 60 PSIG exceeds MAOP plus 10%;
  - e. Permanent or temporary discontinuance of service to a master meter system or when assisting with the isolation of any portion of a master meter system due to failure of a leak test;
  - f. Emergency shutdown of any LNG facility;
  - g. An evacuation; or
  - h. An outage.
2. An operator of an intrastate pipeline transporting hazardous liquid shall immediately notify by telephone the Office of Pipeline Safety, at 602-262-5601 during normal working hours or at 602-252-4449 at all other times, upon discovering a failure in a pipeline system resulting in the occurrence of any of the following:
  - a. Injury to an individual that results in one or more of the following:
    - i. Death or personal injury requiring medical treatment;
    - ii. Loss of consciousness; or
    - iii. Inability of the individual to leave the scene of the incident unassisted;
  - b. An explosion or fire not intentionally set by the operator;
  - c. Property damage estimated in excess of \$5,000;
  - d. Pollution of any land or stream, river, lake, reservoir, or other body of water that violates applicable environmental quality or water quality standards, causes a discoloration of the water surface or adjoining shoreline, or deposits sludge or emulsion beneath the water surface or upon the adjoining shoreline;
  - e. News media inquiry;
  - f. Release of 5 gallons (19 liters) or more of hazardous liquid or carbon dioxide, except that no report is required for a release of less than 5 barrels (0.8 cubic meters) resulting from a pipeline maintenance activity if the release is:
    - i. Not otherwise reportable under this Section;
    - ii. Not one described in 49 CFR 195.52(a)(4), as incorporated by reference in R14-5-202 and available from the Office of Pipeline Safety;
    - iii. Confined to the operator's property or the pipeline right-of-way; and
    - iv. Cleaned up promptly; or
  - g. Any release of hazardous liquid or carbon dioxide that was significant in the judgment of the operator even though it did not meet any of the criteria in subsections (B)(2)(a)-(f).
3. A telephonic incident report shall include the following information:
  - a. Name of the pipeline system operator,
  - b. Name of the reporting party,
  - c. Job title of the reporting party,
  - d. Telephone number of the reporting party,
  - e. Location of the incident,
  - f. Time of the incident, and
  - g. Description of any fatalities and injuries.
- C. Required written incident reports:
  1. An operator of an intrastate pipeline transporting LNG or gas shall file a written incident report when an incident involving a pipeline occurs resulting in any of the following:
    - a. Release of gas or LNG from a pipeline or LNG facility, when any of the following results:
      - i. Death or personal injury requiring hospitalization;
      - ii. Loss of consciousness;
      - iii. An explosion or fire not intentionally set by the operator;
      - iv. Property damage estimated in excess of \$25,000, including the value of all released gas; or
      - v. Unintentional release of gas from a transmission pipeline;
    - b. An incident involving an evacuation, outage, or property damage and resulting in expenses including the value of any released gas and of restoring service or evacuation estimated in excess of \$25,000;
    - c. Emergency transmission pipeline shutdown;
    - d. Overpressure of a pipeline system where a pipeline operating at less than 12 PSIG exceeds MAOP by 50%, where a pipeline operating between 12 PSIG and 60 PSIG exceeds MAOP by 6 PSIG, or where a pipeline operating over 60 PSIG exceeds MAOP plus 10%; or
    - e. Emergency shutdown of any LNG facility.
  2. A written incident report concerning a gas pipeline system shall be completed using the following, as applicable, which are incorporated by reference; on file with the Office of Pipeline Safety; and published by and available from PHMSA at East Building, Second Floor, 1200 New Jersey Ave., SE, Washington, DC 20590, and at <http://www.phmsa.dot.gov/pipeline/library/forms>:
    - a. Form PHMSA F 7100.1: Incident Report – Gas Distribution System (October 2014), including no future editions or amendments;
    - b. Form PHMSA F 7100.2: Incident Report – Natural and Other Gas Transmission and Gathering Pipeline Systems (October 2014), including no future editions or amendments; or
    - c. Form PHMSA F 7100.3: Incident Report – Liquefied Natural Gas (LNG) Facilities (October 2014), including no future editions or amendments.
  3. An operator of an intrastate pipeline transporting hazardous liquid shall file a written incident report completed using Form PHMSA F 7000-1: Accident Report – Hazardous Liquid Pipeline Systems (July 2014), including no

## Corporation Commission – Transportation

future editions or amendments, which is incorporated by reference, on file with the Office of Pipeline Safety, and published by and available from PHMSA as set forth in subsection (C)(2), any time the operator would have been required to make a notification as required under R14-5-203(B)(2).

4. A written incident report required by this Section shall be filed with the Office of Pipeline Safety within the time specified below:
  - a. For an LNG or gas - incident, within 20 days after detection; and
  - b. For a hazardous liquid incident, within 15 days after detection.
5. An operator shall either file a copy of each DOT required written incident report electronically with PHMSA at <https://portal.phmsa.dot.gov/pipeline> or submit a written request for an alternative reporting method to the Information Resource Manager, Office of Pipeline Safety, Pipeline and Hazardous Materials Safety Administration, PHP-20, 1200 New Jersey Avenue, SE, Washington, DC 20590, under 49 CFR 195.58, as incorporated by reference in R14-5-202.
6. After an incident involving shutdown or partial shutdown of a master meter system, an operator of a gas pipeline system shall request and obtain a clearance from the Office of Pipeline Safety before turning on or reinstating service to the master meter system or portion of the master meter system that was shut down.

**Historical Note**

Adopted effective October 23, 1987 (Supp. 87-4).  
 Amended effective December 18, 1991 (Supp. 91-4).  
 Amended effective September 26, 1997, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 97-3). Amended by exempt rulemaking at 5 A.A.R. 3693, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2382, effective May 10, 2002 (Supp. 02-2).  
 Amended by final rulemaking at 9 A.A.R. 3496, effective September 15, 2003 (Supp. 03-3). Amended by final rulemaking at 11 A.A.R. 1253, effective March 3, 2005 (Supp. 05-1). Amended by final rulemaking at 13 A.A.R. 4533, effective January 25, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 126, effective December 28, 2011 (Supp. 11-4). Amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Section R14-5-203 amended by emergency rulemaking at 22 A.A.R. 5, effective December 15, 2015 for 180 days (Supp. 15-4). Emergency renewed at 22 A.A.R. 1637, effective June 7, 2016 for 180 days (Supp. 16-2). Section amended by final rulemaking at 22 A.A.R. 2869, effective September 14, 2016 (Supp. 16-4).

**R14-5-204. Annual Reports**

- A. An operator of an intrastate pipeline shall file with the Office of Pipeline Safety, not later than March 15, for the preceding calendar year, an annual report completed using one of the following, as applicable, which are incorporated by reference; on file with the Office of Pipeline Safety; and published by and available from PHMSA as provided in R14-5-203(C)(2):
  1. Form PHMSA F 7000-1.1: Annual Report for Calendar Year 20\_\_ Hazardous Liquid Pipeline Systems (June 2014), including no future editions or amendments, which shall be completed in accordance with the PHMSA instructions for the form;

2. Form PHMSA F 7100.1-1: Annual Report for Calendar Year 20\_\_ Gas Distribution System (May 2015), including no future editions or amendments, which shall be completed in accordance with the PHMSA instructions for the form;
3. Form PHMSA F 7100.2-1: Annual Report for Calendar Year 20\_\_ Natural and Other Gas Transmission and Gathering Pipeline Systems (October 2014), including no future editions or amendments, which shall be completed in accordance with the PHMSA instructions for the form; or
4. Form PHMSA F 7100.3-1: Annual Report for Calendar Year 20\_\_ Liquefied Natural Gas (LNG) Facilities (October 2014), including no future editions or amendments, which shall be completed in accordance with the PHMSA instructions for the form.

- B. An operator of an intrastate pipeline shall submit a copy of each required annual report by March 15, for the previous calendar year, to PHMSA at <https://portal.phmsa.dot.gov/pipeline>.

**Historical Note**

Adopted effective October 23, 1987 (Supp. 87-4).  
 Amended effective December 18, 1991 (Supp. 91-4).  
 Amended by exempt rulemaking at 5 A.A.R. 3693, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2382, effective May 10, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 3496, effective September 15, 2003 (Supp. 03-3).  
 Amended by final rulemaking at 11 A.A.R. 1253, effective March 3, 2005 (Supp. 05-1). Amended by final rulemaking at 13 A.A.R. 4533, effective January 25, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 126, effective December 28, 2011 (Supp. 11-4).  
 Amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Section R14-5-204 amended by emergency rulemaking at 22 A.A.R. 5, effective December 15, 2015 for 180 days (Supp. 15-4). Emergency renewed at 22 A.A.R. 1637, effective June 7, 2016 for 180 days (Supp. 16-2). Section amended by final rulemaking at 22 A.A.R. 2869, effective September 14, 2016 (Supp. 16-4).

**R14-5-205. Commission Investigations**

- A. The Office of Pipeline Safety shall investigate the cause of each reportable incident, accident, or event resulting in a death or an injury requiring hospitalization and may investigate other incidents, accidents, or events.
- B. While investigating an incident, accident, or event, the Commission or an authorized agent of the Commission may:
  1. Inspect all plant and facilities of a pipeline system and all other property of a pipeline system operator;
  2. Inspect the books, papers, business methods, and affairs of a pipeline system operator;
  3. Make inquiries regarding and interview persons having knowledge of facts surrounding an incident or accident;
  4. Attend, as an observer, all hearings and formal investigations concerning a pipeline system operator;
  5. Schedule and conduct a public hearing into the incident or accident; and
  6. Issue subpoenas to compel the production of records and the taking of testimony.

**Historical Note**

Adopted effective October 23, 1987 (Supp. 87-4).  
 Amended subsections (B) and (G) effective February 3, 1989 (Supp. 89-1). Amended effective December 18, 1991 (Supp. 91-4). Amended effective July 25, 1994,

under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 94-3).

Amended effective August 30, 1996, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 96-3). Amended effective September 26, 1997, under a court-ordered exemption as determined by the Arizona Corporation Commission (Supp. 97-3). Amended by exempt rulemaking at 5 A.A.R. 3693, effective September 17, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2382, effective May 10, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 3496, effective September 15, 2003 (Supp. 03-3). Amended by final rulemaking at 11 A.A.R. 1253, effective March 3, 2005 (Supp. 05-1). Amended by final rulemaking at 13 A.A.R. 4533, effective January 25, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 126, effective December 28, 2011 (Supp. 11-4). Section R14-5-205 renumbered to R14-5-207; new Section R14-5-205 made by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Section R14-5-205 amended by emergency rulemaking at 22 A.A.R. 5, effective December 15, 2015 for 180 days (Supp. 15-4). Emergency renewed at 22 A.A.R. 1637, effective June 7, 2016 for 180 days (Supp. 16-2). Section amended by final rulemaking at 22 A.A.R. 2869, effective September 14, 2016 (Supp. 16-4).

#### **R14-5-206. Employee Drug and Alcohol Testing Requirements**

An operator of an intrastate pipeline facility transporting gas or a hazardous liquid or of an intrastate LNG facility shall ensure that drug and alcohol testing of its workers is performed in compliance with 49 CFR 199, as incorporated by reference in R14-5-202.

#### **Historical Note**

Section R14-5-206 made by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4).

#### **R14-5-207. Master Meter System Operators**

- A.** Applicability: This Section applies to the construction, reconstruction, repair, emergency procedures, operation, and maintenance of all master meter systems.
- B.** An operator of a master meter system shall comply with this Section as a condition of receiving service from a provider. Noncompliance with this Section by an operator of a master meter system constitutes grounds for termination of service by the provider when informed in writing by the Office of Pipeline Safety. In case of an emergency, the Office of Pipeline Safety may give the provider oral instructions to terminate service, with written confirmation to be furnished within 24 hours.
- C.** Each operator of a master meter system shall comply with all applicable requirements of 49 CFR 192, as incorporated by reference in R14-5-202.
- D.** An operator of a master meter system shall:
  - 1. Establish an Operation and Maintenance Plan, including an emergency plan; and
  - 2. At all times, maintain a copy of the Operation and Maintenance Plan at the master meter system location.
- E.** An operator of a master meter system shall:
  - 1. Ensure that no part of a gas pipeline system is constructed under a building and that no building is placed over any portion of a gas pipeline system; and
  - 2. Upon discovering that a building is located over a portion of a gas pipeline system, complete one of the following within 180 days:
    - a. Remove the building from over the pipeline,
    - b. Relocate the pipeline, or

- c. Discontinue service to the portion of the pipeline system located under the building.
- F.** An operator of a master meter system shall not install Acrylonitrile-Butadiene-Styrene (ABS) or aluminum pipe in the master meter system.
- G.** An operator of a master meter system that constructs a pipeline or any portion thereof using plastic pipe shall install, at a minimum, a 14-gauge coated or corrosion resistant, electrically conductive wire as a means of locating the pipe while it is underground. Tracer wire shall not be wrapped around the plastic pipe. Tracer wire may be taped or attached to the pipe in another manner, provided that the adhesive or attachment is not detrimental to the integrity of the pipe wall.
- H.** An operator of a master meter system that constructs an underground pipeline using plastic pipe shall bury the installed pipe with at least 6 inches of sandy type soil, free of any rock or debris, surrounding the pipe for bedding and shading, unless the pipe is otherwise protected as approved by the Office of Pipeline Safety. Steel pipe shall be installed with at least 6 inches of sandy type soil, free of any debris or materials injurious to the pipe coating, surrounding the pipe for bedding and shading, unless the pipe is otherwise protected as approved by the Office of Pipeline Safety.
- I.** An operator of a master meter system that constructs an underground pipeline using plastic pipe shall install the pipe with sufficient slack to allow for thermal expansion and contraction. In addition, all plastic pipe and fittings for use in an area with service temperatures above 100° F shall be marked CD, CE, CF, or CG as required by ASTM D2513 (1995), incorporated by reference in R14-5-202 and available from the Office of Pipeline Safety.
- J.** An operator of a master meter system shall qualify welding procedures and shall ensure that welding of steel pipelines is performed in accordance with API Standard 1104, as incorporated by reference in 49 CFR 192.7 and R14-5-202, by welders qualified pursuant to API Standard 1104.
- K.** An operator of a master meter system shall ensure that all repair work performed on an existing master meter system complies with this Article.
- L.** An operator of a master meter system shall:
  - 1. Ensure that each underground steel pipeline is protected against external corrosion with an external protective coating meeting the requirements of 49 CFR 192.461;
  - 2. When installing a new underground steel pipeline system, before placing the new pipeline system into service, provide a cathodic protection system designed to protect the new pipeline system in its entirety;
  - 3. When repairing, partially replacing, or relocating an existing underground steel pipeline system, within 45 days after completing the repair, replacement, or relocation, provide a cathodic protection system designed to protect the pipeline system; and
  - 4. Ensure that each cathodic protection system has a voltage of at least negative 0.85 volts direct current (-0.85Vdc) as measured using a saturated copper-copper sulfate half cell.
- M.** An operator of a master meter system shall ensure that no portion of an underground gas system is installed less than 8 inches away from any other underground structure.
- N.** At least 30 days before commencing construction of any pipeline, an operator of a master meter system shall file with the Office of Pipeline Safety a Notice of Construction that includes at least the following information:
  - 1. The dates projected for commencing and completing construction,
  - 2. The size and type of pipe to be used,

## Corporation Commission – Transportation

3. The location of construction, and
  4. The MAOP for the new pipeline.
- O.** An operator of a master meter system shall:
1. Perform leakage surveys at intervals not exceeding 15 months, but at least once each calendar year, using leak detection procedures approved by the Office of Pipeline Safety;
  2. Except for LPG, perform each leakage survey in accordance with ASME Guide for Gas Transmission and Distribution Pipeline System, Guide Material, Appendix G-11-1983, other than 4.4(c), as incorporated by reference in R14-5-202(Q);
  3. For LPG, perform each leakage survey in accordance with ASME Guide for Gas Transmission and Distribution Pipeline System, Guide Material, Appendix G-11A-1983, as incorporated by reference in R14-5-202(Q); and
  4. Repair each grade 1 leak immediately upon discovery, each grade 2 leak within 30 days of discovery, and each grade 3 leak within one year of discovery.
- P.** In the event of an unknown failure of a gas pipeline resulting in a master meter system operator's being required to provide a report under subsection (Q) and in the operator's removing a portion of the failed pipeline, the following shall occur:
1. The operator shall retain the portion of failed pipeline that was removed;
  2. The operator shall telephonically notify the Office of Pipeline Safety of the removal within two hours after the removal is completed, providing the following information:
    - a. Identity of the failed pipeline,
    - b. Description and location of the failure,
    - c. Date and time of the removal,
    - d. Length or quantity of the removed portion,
    - e. Storage location of the removed portion, and
    - f. Any additional information about the failure or the removal of the portion of the failed pipeline that is requested by the Office of Pipeline Safety;
  3. Within 48 hours after receiving telephonic notification pursuant to subsection (Q)(2), the Office of Pipeline Safety shall:
    - a. Determine, based on the information provided by the operator and the availability, adequacy, and reliability of any pipeline testing laboratory operated by the operator, whether it is necessary to have the removed portion of pipeline tested at an independent laboratory; and
    - b. Telephonically notify the operator either:
      - i. That the operator must have the removed portion of pipeline tested, in accordance with Office of Pipeline Safety directions, by an independent laboratory selected by the Office of Pipeline Safety as provided in subsection (P)(6), to determine the cause or causes of the failure; or
      - ii. That the operator is not required to have the removed portion of pipeline tested by an independent laboratory and instead must conduct testing in its own pipeline testing laboratory, after which the operator may discard the removed portion of pipeline;
  4. After providing telephonic notice as provided in subsection (P)(3)(b), the Office of Pipeline Safety shall confirm its notification in writing;
  5. If the Office of Pipeline Safety directs testing by an independent laboratory:
    - a. The Office of Pipeline Safety shall:
      - i. Determine, as provided in subsection (P)(6), the independent laboratory that will do the testing and the period of time within which the testing is to be completed;
      - ii. Determine, based on the available information concerning the failure, the number and types of tests to be performed on the removed pipeline; and
      - iii. Notify the operator of its determinations;
    - b. The operator shall:
      - i. Contact the selected independent laboratory to arrange the scheduling of the required tests;
      - ii. Notify the Office of Pipeline Safety, at least 20 days before the date of the tests, of the date and time scheduled for the laboratory tests;
      - iii. At the request of the Office of Pipeline Safety, ensure that a representative of the Office of Pipeline Safety is permitted to observe any or all of the tests;
      - iv. Ensure that the original test results are provided to the Office of Pipeline Safety by the independent laboratory within 30 days after the tests are completed; and
      - v. Pay for the independent laboratory testing; and
- Q.** In determining an independent laboratory to perform testing required under subsection (P), the Office of Pipeline Safety shall:
- a. Submit to at least three different independent laboratories written requests for bids to conduct the testing;
  - b. Consider each responding laboratory's qualifications to perform the testing, as demonstrated by:
    - i. Past experience in performing the required test or tests according to ASTM International standards; and
    - ii. Any recognition that a laboratory may have received from a national or international laboratory accreditation body, such as through a certification or accreditation process;
  - c. Wait to select an independent laboratory until:
    - i. The Office of Pipeline Safety has received written bids from at least three different independent laboratories; or
    - ii. Thirty days have passed since the date of the request for bids, whichever comes sooner; and
  - d. Select the independent laboratory that offers the optimum balance between cost and demonstrated ability to perform the required test or tests.
- Q.** An operator of a master meter system shall:
1. Telephonically notify the Office of Pipeline Safety, at 602-262-5601 during normal working hours or at 602-252-4449 at all other times, at the earliest practicable moment following discovery of any of the following related to the operator's master meter system:
    - a. An event involving a release of gas from a pipeline, along with any of the following:
      - i. A death or personal injury requiring hospitalization;
      - ii. Injury to any individual resulting in the individual's loss of consciousness;
      - iii. Estimated property damage, including the value of all released gas, in excess of \$5,000;
      - iv. Unintentional estimated gas loss of 3 million cubic feet or more;
      - v. An explosion or fire not intentionally set by the operator;

## Corporation Commission – Transportation

- vi. A news media inquiry;
  - vii. An evacuation; or
  - viii. An outage;
  - b. An event involving overpressure of a pipeline system where a pipeline operating at less than 12 PSIG exceeds MAOP by 50%, where a pipeline operating between 12 PSIG and 60 PSIG exceeds MAOP by 6 PSIG, or where a pipeline operating over 60 PSIG exceeds MAOP plus 10%;
  - c. An event involving permanent or temporary discontinuance of service to a master meter system or any portion of a master meter system due to a failure of a leak test or for any purpose other than to perform routine maintenance; or
  - d. An event that is significant, in the judgment of the operator, even though it does not meet any of the criteria listed in subsections (Q)(1)(a) through (c);
2. Include the following information in a telephonic report under subsection (Q)(1):
- a. The names of the operator and the person making the report;
  - b. The job title of the person making the report;
  - c. The telephone numbers of the operator and the person making the report;
  - d. A description of the type and location of the event;
  - e. The time of the event;
  - f. The number of fatalities and personal injuries, if any; and
  - g. All other significant facts that are known by the operator and are relevant to the cause of the event or the extent of the damages; and
3. Not later than April 15 of each year, submit to the Office of Pipeline Safety an annual report for the prior calendar year, completed on Commission Form MM-04: "Annual Report for Calendar Year 20\_\_\_\_, Small Operators of Gas Distribution System," which is included herein as Exhibit A.
- R.** The Commission may waive compliance with any of the requirements of this Section upon a finding that such a waiver is in the interest of public and pipeline safety.
- S.** To ensure compliance with all applicable provisions of this Article, the Commission or an authorized representative thereof may enter the premises of an operator of a master meter system to inspect and investigate the property, books, papers, electronic files, business methods, and affairs that pertain to the operation of the master meter system.

**Historical Note**

New Section R14-5-207 renumbered from Section R14-5-205 and amended by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4). Section R14-5-207 amended by emergency rulemaking at 22 A.A.R. 5, effective December 15, 2015 for 180 days (Supp. 15-4). Emergency renewed at 22 A.A.R. 1637, effective June 7, 2016 for 180 days (Supp. 16-2). Section amended by final rulemaking at 22 A.A.R. 2869, effective September 14, 2016 (Supp. 16-4).

### Historical Note

Exhibit A made by final rulemaking at 20 A.A.R. 75, effective December 16, 2013 (Supp. 13-4).

## **Replacement Check List**

For rules filed within the

4th Quarter

October 1 – December 31, 2016

# **THE ARIZONA ADMINISTRATIVE CODE**

Within the stated calendar quarter, this Chapter contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law.

These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information.

Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

## **PUBLISHER**

**Arizona Department of State**

**Office of the Secretary of State, Public Services Division**

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
PUBLIC SERVICES DIVISION  
December 31, 2016

---

### RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

### ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2016 is cited as Supp. 16-1.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

### ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

### HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, [www.azsos.gov/services/legislative-filings](http://www.azsos.gov/services/legislative-filings).

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.*

**ARTICLE 1. RESERVED****ARTICLE 2. VEHICLE TITLE****R17-4-201. Definitions**

In addition to the definitions prescribed under A.R.S. §§ 28-101, 28-2001, and 28-3001, the following definitions apply to this Article, unless otherwise specified:

“Authorized ELT Participant” means a lending institution or finance company authorized by the Division to electronically release a lien or encumbrance.

“Date of lien” means the date identified by the lienholder as the date the loan was issued to the borrower.

“Division” means the Arizona Department of Transportation’s Motor Vehicle Division.

“Encumbrance” means a lien recorded, by the Division, on a vehicle or mobile home record and the Arizona Certificate of Title.

“ELT” means Electronic Lien and Title.

“EPA standards” means the emission standards of the Environmental Protection Agency, as prescribed under 40 CFR 86.

“FMVSS” means the Federal Motor Vehicle Safety Standards as prescribed under 49 CFR 571.

“Joint tenancy with right of survivorship” means vehicle ownership by two or more persons and the deceased joint owner’s interest in the vehicle is transferred to the surviving owners.

“Lienholder” means a person or entity retaining legal possession of a vehicle or mobile home until the debtor has satisfactorily repaid the loan for which the vehicle or mobile home is designated as collateral.

“Lienholder Number” means the computer-generated record number assigned by the Division to a lienholder.

“Low-speed vehicle” has the same meaning as prescribed under 49 CFR 571.3.

“MPV” means multipurpose passenger vehicle, which has the same meaning as prescribed under 49 CFR 571.3.

“MVD” means the Arizona Department of Transportation’s Motor Vehicle Division.

“NHTSA” means National Highway Traffic Safety Administration of the United States Department of Transportation.

“Operation of law lien” means a lien resulting from the application of a state or federal statute.

“Primary lien” means the first of any multiple liens recorded on a vehicle or mobile home record.

“Registered importer” means a person registered by the NHTSA Administrator to import vehicles, as prescribed under 49 CFR 30141.

“Tenancy in common” means vehicle ownership by two or more people without the right of survivorship.

“Valid titling document” means one of the following documents showing a vehicle’s compliance with FMVSS and EPA standards:

- A NHTSA Declaration,
- A manufacturer’s letter, or
- A U.S. federal compliance label printed in English.

**Historical Note**

New Section made by final rulemaking at 9 A.A.R. 1353, effective June 6, 2003 (Supp. 03-2). Amended by final rulemaking at 13 A.A.R. 3281, effective November 10, 2007 (Supp. 07-3).

**R17-4-202. Certificate of Title Form**

- A.** The Motor Vehicle Division (MVD) shall produce the Certificate of Title form on tamper-resistant and counterfeit-resistant paper.
- B.** MVD shall provide space on the Certificate of Title form for the following information:
  1. Title information:
    - a. Title number;
    - b. Issue date;
    - c. Previous title number; and
    - d. State and date of previous title.
  2. Vehicle information:
    - a. Vehicle identification number (VIN);
    - b. Vehicle make, model, year, and body style;
    - c. Fuel type;
    - d. Odometer information; and
    - e. Vehicle mechanical or structural condition.
  3. Lienholder information:
    - a. Lienholder name and address;
    - b. Lienholder customer or federal identification number; and
    - c. Lien amount and lien date.
  4. Vehicle owner’s or owner’s legal designee information:
    - a. Name; and
    - b. Mailing address.
  5. Ownership change information:
    - a. Sale date;
    - b. Purchaser’s name and address;
    - c. Odometer mileage disclosure statement;
    - d. Seller’s signature; and
    - e. Seller’s signature certification.
  6. Dealer reassignment information.
  7. Other information as required by the Division for internal processing and recordkeeping.

**Historical Note**

New Section recodified from R17-4-204 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-203. Certificate of Title and Registration Application**

- A.** In addition to the requirements of A.R.S. §§ 28-2051 and 28-2157, a person applying for an Arizona motor vehicle title certificate and registration shall complete a form supplied by the Motor Vehicle Division that contains the following information:
  1. Vehicle information:
    - a. Tab number;
    - b. Initial registration month and year;
    - c. Vehicle make, model, year, and body style;
    - d. Mechanical or structural status indicating whether the vehicle is:
      - i. Dismantled,
      - ii. Reconstructed,
      - iii. Salvaged, or
      - iv. Specially constructed;
    - e. Gross vehicle weight;
    - f. Fuel type;
    - g. Odometer information;
    - h. Current title number and titling state.
  2. An owner’s or lessee’s legal ownership status.
  3. Lienholder information:
    - a. Lienholder names and addresses, and

## Department of Transportation – Title, Registration, and Driver Licenses

- b. Lien amount and date incurred.
  - 4. If a mobile home, the physical site.
  - 5. Co-ownership information:
    - a. A statement of whether any survivorship rights in the vehicle exist; and
    - b. A statement providing co-ownership legal status prescribed in R17-4-205(B).
  - 6. Owner certification information verifying:
    - a. Ownership,
    - b. Inclusion of all liens and encumbrances, and
    - c. Seller-verified odometer reading.
  - 7. Applicant signatures.
  - 8. An acknowledgement that:
    - a. The applicant agrees or disagrees to the Division's release of the applicant's name on a commercial mailing list; and
    - b. The applicant has read a printed explanation of odometer reading codes.
  - 9. Other information required by the Division for internal processing and recordkeeping.
- B.** An applicant may voluntarily provide the following information on the form:
- 1. Applicant's birth date;
  - 2. Applicant's driver license number; and
  - 3. Applicant's federal employer identification number, if the applicant is taking title as a sole proprietor, partnership, corporation, or other legal business entity.

**Historical Note**

New Section recodified from R17-4-205 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-204. Seller's Signature Acknowledgement**

A seller shall ensure that a Notary Public or a Motor Vehicle Division (MVD) agent witnesses the seller sign the title transfer. The Notary Public or MVD agent shall sign the title transfer acknowledging witnessing the seller's signature. "Motor Vehicle Division agent" has the meaning prescribed in A.R.S. § 28-370.

**Historical Note**

Adopted effective November 10, 1986 (Supp. 86-6). Former Section R17-4-75 renumbered without change as Section R17-4-204 (Supp. 87-2). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2468, effective June 8, 2000 (Supp. 00-2). Section recodified to R17-4-202 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-206 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-205. Co-ownership and Vehicle Title**

- A.** A title certificate application shall specify the form of co-ownership and names of a vehicle's co-owners as follows.
- 1. If co-ownership is a joint tenancy with right of survivorship in which all owners must sign to transfer or encumber the vehicle, the applicant shall provide the name of each owner separated by "and/or."
  - 2. If co-ownership is a joint tenancy that allows one owner to transfer or encumber the vehicle title, the applicant shall provide:
    - a. The name of each co-owner separated by "or"; and
    - b. A form, signed by each co-owner authorizing title transfer or encumbrance on the signature of any co-owner.
  - 3. If co-ownership is a tenancy in common, the applicant shall provide the name of each owner separated by "and."
- B.** Before a surviving joint tenant under subsection (A)(1) obtains a title certificate as owner or transfers or encumbers the vehicle

title, the surviving joint tenant shall present to the Division a death certificate for each deceased joint tenant.

- C.** After the death of a tenant in common, the Division shall issue a new title certificate only as directed by:
- 1. A certified probate court order, or
  - 2. A successor's affidavit under A.R.S. § 14-3971(B).

**Historical Note**

Adopted effective November 13, 1986 (Supp. 86-6). Former Section R17-4-75 renumbered without change as Section R17-4-205 (Supp. 87-2). Amended by final rulemaking at 7 A.A.R. 2752, effective June 8, 2001 (Supp. 01-2). Section recodified to R17-4-203 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-207 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 1353, effective June 6, 2003 (Supp. 03-2).

**R17-4-206. Additional Titling Standards for Vehicles Not Manufactured in Compliance with United States Safety and Emission Standards; "Gray-market Vehicles"****A. Titling standards.**

- 1. The Division shall issue a title to a foreign-manufactured vehicle imported to the United States if an applicant presents the following:
  - a. A valid titling document,
  - b. A completed MVD title and registration application as prescribed under R17-4-203,
  - c. A completed Vehicle Verification Form certifying that the vehicle passed the Division's physical inspection,
  - d. A document stating that the vehicle passed an Arizona emissions inspection under A.R.S. § 49-542, and
  - e. A certificate that the vehicle was converted to meet:
    - i. EPA standards, and
    - ii. FMVSS.
- 2. A foreign-manufactured vehicle imported to the United States is exempt from this subsection if it is older than 25 years from its manufacture date.
- 3. A foreign-manufactured vehicle imported to the United States that is between 21 and 25 years from the manufacture date is exempt from subsection (A)(1)(e)(i).
- 4. Titling standards for vehicles manufactured according to Canadian specifications.
  - a. The Division shall issue a title to a vehicle manufactured according to Canadian specifications if it:
    - i. Is not for resale;
    - ii. Has a GVWR of less than 10,000 pounds; and
    - iii. Is a passenger vehicle, motorcycle, or MPV.
  - b. Before titling a vehicle manufactured according to Canadian specifications, the owner shall submit to the Division manufacturer documentation verifying that the vehicle complies with FMVSS and EPA standards.
    - i. The Division shall waive the FMVSS and EPA labeling location requirements as prescribed in 49 CFR 571 and 40 CFR 86.
    - ii. If manufacturer documentation indicates that a vehicle's speedometer or headlights do not comply with FMVSS and EPA standards, the owner shall file additional documentation with the Division to verify completion of a modification that brings the vehicle into compliance.
  - c. A registered importer shall certify a vehicle manufactured according to Canadian specifications if:

## Department of Transportation – Title, Registration, and Driver Licenses

- i. The vehicle meets FMVSS standards except for occupant crash protection provisions prescribed under 49 CFR 571.208, or
  - ii. The owner did not submit manufacturer documentation as prescribed under subsection (A)(4)(b).
- B. The Division shall require a registered importer's certification of a foreign-manufactured vehicle imported to the United States that:
  - 1. Is not exempt under subsections (A)(2) or (A)(3), or
  - 2. Does not qualify under subsection (A)(4).

**Historical Note**

Former Rule, General Order 55. Former Section R17-4-19 renumbered without change as Section R17-4-206 (Supp. 87-2). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2468, effective June 8, 2000 (Supp. 00-2). Section recodified to R17-4-204 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-209 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 1353, effective June 6, 2003 (Supp. 03-2).

**R17-4-207. Lien Filing**

- A. Lien filing. When filing a lien with the Division, a person shall submit a Title and Registration Application (available online at [www.azdot.gov/mvd/FormsandPub/mvd.asp](http://www.azdot.gov/mvd/FormsandPub/mvd.asp)), the most recently issued certificate of title, the fee or fees to be paid as provided by law, and any other documentation required pursuant to A.R.S. Title 28.
  - 1. The Division shall record a statement of all liens and encumbrances on the vehicle or mobile home record upon receiving a lien filing that meets all requirements prescribed in this subsection.
  - 2. The Division shall immediately return a lien filing, with a letter stating why the lien filing was returned, when the lien filing does not meet the requirements prescribed in this subsection.
- B. Multiple liens. The Division will record up to three liens on any one vehicle or mobile home record. Additional liens are recorded through the County Recorder's office. Liens are valued in the order that they are filed and recorded on the vehicle or mobile home record. However, the Division considers the primary lien recorded on the vehicle or mobile home record to be above all other subsequent liens or encumbrances. In the absence of an operation of law lien, only the lienholder in the primary position may repossess a vehicle or mobile home.
- C. Lien filing notice. The Division shall notify the lienholder of the recording of a lien.
  - 1. The Division shall issue an Arizona Certificate of Title or, when the lienholder is an Authorized ELT Participant, transmit an electronic lien notification to the primary lienholder.
  - 2. The Division shall issue a computer-generated Lienholder Record to each subsequent lienholder recorded on the vehicle or mobile home record. The Division shall not issue a duplicate Lienholder Record.

**Historical Note**

Former Rule, General Order 62. Former Section R17-4-24 renumbered without change as Section R17-4-206 (Supp. 87-2). Section repealed; new Section made by final rulemaking at 7 A.A.R. 2752, effective June 8, 2001 (Supp. 01-2). Section recodified to R17-4-205 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Section recodified from R17-4-230 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Section repealed; new

Section made by final rulemaking at 13 A.A.R. 3281, effective November 10, 2007 (Supp. 07-3).

**R17-4-208. Lien Clearance**

- A. Lien clearance. The Division shall remove the lien from the vehicle or mobile home record indicated on the lien clearance and issue a new Arizona Certificate of Title upon receiving proof that the lien is satisfied and an application furnished by the Division, the most recently issued certificate of title, the fee or fees to be paid as provided by law, and any other documentation required pursuant to A.R.S. Title 28. The Division considers the following instruments satisfactory proof that the lien or encumbrance recorded on a vehicle or mobile home record is satisfied:
  - 1. The transmission of an electronic lien release from an ELT Participant,
  - 2. A certificate of title acknowledged by the lienholder as prescribed under subsection (B)(1),
  - 3. An original lien filing receipt acknowledged by the lienholder as prescribed under subsection (B)(1),
  - 4. An original computer-generated Lienholder Record acknowledged by the lienholder as prescribed under subsection (B)(1),
  - 5. A lender copy of the original lien instrument indicating the lien is paid in full acknowledged by the lienholder as prescribed under subsection (B)(1); or
  - 6. Any document giving a complete description of the vehicle, as recorded on the Arizona Certificate of Title, indicating that the lien is either "paid in full" or "satisfied" acknowledged by the lienholder as prescribed under subsection (B)(1).
- B. Lienholder satisfaction of lien requirements.
  - 1. The Division shall not accept a satisfaction of lien when the authorized signature of the lienholder or authorized agent of the lienholder, appearing on the lien clearance instrument, is not acknowledged before a Notary Public or witnessed by an authorized Division employee.
  - 2. The lienholder shall deliver the Arizona Certificate of Title to the next lienholder or, if there is not another lienholder, to the owner of the vehicle or mobile home within 15 business days after receiving payment in full satisfaction of the lien.
  - 3. A lienholder that fails to deliver the certificate of title within 15 business days may be assessed a civil penalty, as prescribed under A.R.S. § 28-2134.
- C. Lien release received in error. The Division will not reimburse any parties for any monetary damages that may occur when a lienholder issues a lien clearance to the Division in error.
- D. Administrative hearing. A lienholder who is assessed a civil penalty, as prescribed under A.R.S. § 28-2134, may request a hearing in accordance with the procedures prescribed under 17 A.A.C. 1, Article 5.

**Historical Note**

Former Rule, General Order 83. Former Section R17-4-35 renumbered without change as Section R17-4-208 (Supp. 87-2). Section repealed by final rulemaking at 6 A.A.R. 2468, effective June 8, 2000 (Supp. 00-2). Section recodified from R17-4-231 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 13 A.A.R. 3281, effective November 10, 2007 (Supp. 07-3).

**R17-4-209. Recodified****Historical Note**

Adopted as Section R17-4-81 and renumbered as Section R17-4-209 effective May 29, 1987 (Supp. 87-2). Amended

## Department of Transportation – Title, Registration, and Driver Licenses

by final rulemaking at 7 A.A.R. 2755, effective June 8, 2001 (Supp. 01-2). Section recodified to R17-4-206 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-210. Repealed****Historical Note**

Adopted effective July 30, 1992 (Supp. 92-3). Section R17-4-210 repealed by summary action with an interim effective date of August 28, 1998; filed in the Office of the Secretary of State August 4, 1998 (Supp. 98-3). The Department failed to submit to the Governor's Regulatory Review Council an adopted summary rule pursuant to A.R.S. § 41-1027, and therefore the rule went back into effect November 26, 1998; Section repealed by summary rulemaking with an interim effective date of August 20, 1999, filed in the Office of the Secretary of State July 30, 1999 (Supp. 99-3). Interim effective date of August 20, 1999 now the permanent effective date (Supp. 99-4).

**Appendix A. Repealed****Historical Note**

Adopted effective July 30, 1992 (Supp. 92-3). Appendix A repealed by summary action with an interim effective date of August 28, 1998; filed in the Office of the Secretary of State August 4, 1998 (Supp. 98-3). The Department failed to submit to the Governor's Regulatory Review Council an adopted summary rule pursuant to A.R.S. § 41-1027, and therefore Appendix A went back into effect November 26, 1998; Appendix A repealed by summary rulemaking with an interim effective date of August 20, 1999; filed in the Office of the Secretary of State July 30, 1999 (Supp. 99-3). Interim effective date of August 20, 1999 now the permanent effective date (Supp. 99-4).

**R17-4-211. Reserved****R17-4-212. Reserved****R17-4-213. Reserved****R17-4-214. Reserved****R17-4-215. Reserved****R17-4-216. Recodified****Historical Note**

Adopted effective October 21, 1997 (Supp. 97-4). Section recodified to R17-4-302 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-217. Recodified****Historical Note**

Adopted effective September 12, 1997 (Supp. 97-3). Section recodified to R17-4-303 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-218. Recodified****Historical Note**

Amended effective April 21, 1980 (Supp. 80-2). Former Section R17-4-54 renumbered without change as Section R17-4-218 (Supp. 87-2). R17-4-218 and Appendix A repealed; new Section adopted effective December 8, 1998 (Supp. 98-4). Section recodified to R17-4-304 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-219. Recodified****Historical Note**

Former Rule, General Order 101. Former Section R17-4-

42 renumbered without change as Section R17-4-219 (Supp. 87-2). Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 4602, effective November 14, 2000 (Supp. 00-4). Section recodified to R17-4-305 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-220. Repealed****Historical Note**

Former Rule, General Order 103; Former Section R17-4-44 repealed, new Section R17-4-44 adopted effective April 21, 1980 (Supp. 80-2). Former Section R17-4-44 renumbered without change as Section R17-4-220 (Supp. 87-2). Repealed effective July 29, 1992 (Supp. 92-3).

**R17-4-221. Repealed****Historical Note**

Former Rule, General Order 75. Former Section R17-4-30 renumbered without change as Section R17-4-221 (Supp. 87-2). Repealed effective July 29, 1992 (Supp. 92-3).

**R17-4-222. Recodified****Historical Note**

Adopted effective December 3, 1986 (Supp. 86-6). Former Section R17-4-80 renumbered without change as Section R17-4-222 (Supp. 87-2). Section recodified to R17-4-306 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-223. Repealed****Historical Note**

Emergency rule adopted effective August 8, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency expired. Former emergency rule permanently adopted with changes effective December 31, 1991 (Supp. 91-4). Repealed effective July 18, 1994 (Supp. 94-3).

**ARTICLE 3. VEHICLE REGISTRATION****R17-4-301. Definitions**

Definitions. In addition to the definitions prescribed under A.R.S. §§ 28-101, 28-2231, and 28-5100, the following definitions apply to this Article, unless otherwise specified:

“Apportioned commercial vehicle” means a commercial vehicle that is subject to the proportional registration provisions prescribed under A.R.S. § 28-2233.

“Biennial” means once every two years.

“Business day” means a day other than a Sunday or holiday.

“Calendar quarter” means the following time periods established by the Division: January 1 to March 31, April 1 to June 30, July 1 to September 30, and October 1 to December 31.

“Day” means the 24-hour period from one midnight to the following midnight.

“Disabled person” means a recipient of public monies as a disabled individual under Title 16 of the Social Security Act.

“Division” means the Arizona Department of Transportation’s Motor Vehicle Division.

“Division Director” means the Assistant Director for the Arizona Department of Transportation’s Motor Vehicle Division or the Assistant Director’s designee.

“Drop box” means a receptacle designated by the Division into which a person places vehicle registration forms and fees, and from which the Division retrieves these items daily.

“Effective date of registration” means the date the vehicle first becomes subject to registration fees in Arizona.

“Electronic delivery” means the transmission of registration and credit card information to the Division, by computer, through an authorized third party electronic service provider.

“Emergency Vehicle Permit” means a document issued by the Division’s Enforcement Services Program to a private fire department for a single fire engine that authorizes the driver of a permitted vehicle to exercise the privileges prescribed under A.R.S. § 28-624.

“Expiration date” means the day, month, and year in which a vehicle registration expires.

“Fire Engine” means a motor vehicle containing fire-fighting equipment capable of extinguishing fires.

“IM147 Test” means the emissions test prescribed under A.R.S. § 49-542(F)(2)(a).

“Included vehicle” means a vehicle subject to annual or biennial Arizona registration unless otherwise excluded from the staggered registration prescribed under A.R.S. § 28-2159 and R17-4-304.

“Initial registration” means the first registration of an included vehicle in Arizona.

“OBD” means the On-Board Diagnostics emissions test prescribed under A.R.S. § 49-542(F)(2)(a).

“Off-highway vehicle” has the same meaning as prescribed under A.R.S. § 28-1171.

“Operator Requirements” means the requirements given in Chapter 2, Basic Driver/Operator Requirements, of the National Fire Protection Association Standard for Fire Apparatus Driver/Operator Professional Qualification (NFPA 1002), 1998 edition, which is incorporated by reference and on file with the Arizona Department of Transportation and the Office of the Secretary of State. This incorporation by reference contains no future editions or amendments.

“Private fire department” means a fire fighting business equipped to provide emergency fire-fighting devices for a private purpose that is neither a public service corporation nor a municipal entity.

“Private Fire Emergency Vehicle” means a fire engine operated by a private fire department for which an Emergency Vehicle Permit is issued.

“Registration” means the authorization, issued by the Division that allows a vehicle to use state highways.

“Registration fees” means the fees due to the Division at the time of registration and consisting of the general registration fees imposed under A.R.S. § 28-2003, the vehicle license tax imposed under A.R.S. § 28-5801, and the commercial registration and gross weight fees imposed under A.R.S. § 28-5433.

“Registration period” means the time-frame during which a vehicle registration is valid.

“Renewal registration” means the second and subsequent registration of an included vehicle.

**Historical Note**

Transferred to R17-1-301 (Supp. 92-4). New Section made by final rulemaking at 13 A.A.R. 3589, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 16 A.A.R. 1132, effective August 7, 2010 (Supp. 10-2).

**R17-4-302. Staggered Registration for Apportioned Commercial Vehicles**

Apportioned commercial vehicle fleet registration periods. The Division shall assign a registration period to a newly registered apportioned commercial vehicle fleet. The fleet owner and the Director shall mutually agree to the registration period and expiration date.

1. The Division shall:
  - a. Establish a registration period that expires on the last day of the calendar quarter selected by the fleet owner, not to exceed 12 months from the initial registration date.
  - b. Apply the original fleet registration fees towards the registration fees required for a replaced vehicle when an owner replaces a vehicle within a fleet.
  - c. Apply the original fleet registration fees towards the registration fees required for a transferred vehicle when an owner transfers a vehicle between fleets.
  - d. Refund any excess credit of registration fees in accordance with the provisions prescribed under A.R.S. § 28-2356.
2. The owner of an apportioned commercial fleet vehicle shall:
  - a. Ensure that all vehicles within a fleet have the same registration period.
  - b. Ensure that the fleet vehicle is not operated with an expired vehicle registration.
  - c. Maintain the assigned or selected registration period for at least three consecutive registration periods.
3. The Division shall not provide a grace period for late registration or late payment of fees.

**Historical Note**

Adopted effective August 1, 1988 (Supp. 88-3). Transferred to R17-1-302 (Supp. 92-4). New Section recodified from R17-4-216 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 3589, effective December 1, 2007 (Supp. 07-4).

**R17-4-303. Biennial Registration**

- A. Biennial registration.
  1. The Division may register any vehicle biennially, unless excluded.
  2. The Division shall register a newly licensed or newly leased vehicle biennially, unless the owner chooses to register the vehicle on an annual basis.
- B. Excluded vehicles. The owner of a vehicle that meets any one of the following criteria is excluded from the biennial registration program:
  1. A vehicle required to have an IM147 or OBD test within 12 months after the date of registration.
  2. A vehicle that requires an annual emissions test.
  3. A vehicle subject to any one of the following types of registration:
    - a. Allocated registration under A.R.S. § 28-2261,
    - b. Apportioned registration under A.R.S. § 28-2261,
    - c. Fleet registration under A.R.S. § 28-2202, or
    - d. Interstate registration under A.R.S. § 28-2052.
  4. A vehicle with an undersized mobile home plate registration.
  5. A vehicle that requires the owner to certify eligibility for a registration fee exemption on an annual basis; such as the registration exemption available to an active duty military member, a widow, widower, or disabled person other than a 100% disabled veteran.

**Historical Note**

Transferred to R17-1-303 (Supp. 92-4). New Section

recodified from R17-4-217 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 3589, effective December 1, 2007 (Supp. 07-4).

**R17-4-304. Staggered Registration for Included Vehicles**

- A. Included vehicles. The Division shall assign one of the following staggered expiration dates when issuing an initial registration to an included vehicle:
  1. If a vehicle has an effective date of registration from the first day through the 15th day of the month:
    - a. Annual registration expires on the 15th day of the month 12 months from the month the vehicle is subject to Arizona registration; or
    - b. Biennial registration expires on the 15th day of the month 24 months from the month the vehicle is subject to Arizona registration.
  2. If a vehicle has an effective date of registration from the 16th day through the last day of the month:
    - a. Annual registration expires on the last day of the month 12 months from the month the vehicle is subject to Arizona registration; or
    - b. Biennial registration expires on the last day of the month 24 months from the month the vehicle is subject to Arizona registration.
- B. Excluded vehicles. The staggered registration prescribed by this Section excludes the following vehicles:
  1. A vehicle exempt from registration;
  2. A vehicle subject to any one of the following types of registration:
    - a. Allocated registration under A.R.S. § 28-2261,
    - b. Apportioned registration under A.R.S. § 28-2261,
    - c. Fleet registration under A.R.S. § 28-2202,
    - d. Interstate registration under A.R.S. § 28-2052, or
    - e. Seasonal agricultural registration under A.R.S. § 28-5436;
  3. A vehicle subject to a one-time registration fee;
  4. A government vehicle, a vehicle owned by an official representative of a foreign government, or an emergency vehicle owned by a nonprofit organization as provided under A.R.S. § 28-2511(A);
  5. A noncommercial trailer that is not a travel trailer as defined by A.R.S. § 28-2003(B) and is less than 6000 pounds gross vehicle weight under A.R.S. §§ 28-2003(A)(7) and 28-5801(C);
  6. A moped;
  7. A motorized electric or gas powered bicycle or tricycle capable of reaching speeds of 20 to 25 miles per hour.
- C. Proration of fees. The Division shall prorate registration fees under A.R.S. §§ 28-2159, 28-5807, and 28-5434.
- D. Expiration dates. The Division shall utilize the following expiration dates, regardless of the effective date of the initial registration:
  1. Annual registration: Expires 12 months from the expiration of the previous registration period; or
  2. Biennial registration: Expires 24 months from the expiration of the previous registration period.
- E. Application for registration. A person applying for an initial registration or renewal registration for an included vehicle shall submit the requirements prescribed under subsection (1) or (2):
  1. If a person submits the registration to the Division or an Authorized Third-party Provider of registration functions in person or by mail:
    - a. The application for registration or registration card, and
    - b. Payment of registration fees.

## Department of Transportation – Title, Registration, and Driver Licenses

2. If a person submits the registration to an Authorized Third-party Electronic Delivery Provider:
  - a. Required registration information, and
  - b. Credit card information.
- F. Timely submission of registration. A person shall submit the renewal registration of an included vehicle not later than the day the prior registration period expires. If the prior registration period expires on a day other than an established business day, a person shall submit the renewal registration of an included vehicle not later than the first business day after the prior registration period expires.
- G. Penalties. The penalties imposed under A.R.S. § 28-2162 for delinquent renewal registration of an included vehicle shall apply when either of the following occurs:
  1. A person does not submit to the Division or an Authorized Third-party Provider of registration functions the items set forth in subsection (E)(1) so that the items are received by the due date; or
  2. A person does not electronically submit to an Authorized Third-party Electronic Delivery Provider the items required under subsection (E)(2) so that the items are received by the due date.
- H. Date of receipt. The date of receipt for the items required under subsection (E)(1) or (E)(2) shall be the following:
  1. The date a person presents the items required under subsection (E)(1) to a Division facility or the facility of an Authorized Third-party Provider of registration functions in person;
  2. The date an Authorized Third-party Electronic Delivery Provider receives by computer or telephone the items set forth in subsection (E)(2);
  3. The date a private express mail carrier receives the package containing the items set forth in subsection (E)(1), as indicated on the shipping package;
  4. The date of the last business day prior to the day the Division retrieves the items set forth at subsection (E)(1) from a designated Division drop box; or
  5. The date of the United States Postal Service postmark stamped on the envelope containing the items set forth in subsection (E)(1), unless the vehicle is not in compliance with the motor vehicle emissions testing requirements.
- I. Evidence of registration. The Division or Authorized Third-party Provider of registration functions shall assign and issue a number plate or plates to an included vehicle as evidence of registration.
  1. The assigned number plate shall be attached and displayed on the rear of the assigned vehicle. When two plates are issued, the second plate may be attached to the front of the assigned vehicle.
  2. Improper number plate display shall subject the owner and operator of the vehicle to the sanctions imposed under A.R.S. §§ 28-2531(B) and 28-2532.
  3. Any registration tabs or stickers issued by the Division or Authorized Third-party Provider of registration functions shall be displayed on the appropriate number plate of the assigned vehicle.

**Historical Note**

Transferred to R17-1-304 (Supp. 92-4). New Section recodified from R17-4-218 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 3589, effective December 1, 2007 (Supp. 07-4).

**R17-4-305. Temporary Registration Plate “TRP” Procedure****A. Definitions.**

1. “Charitable Event TRP” means a TRP issued to a motor vehicle dealership or manufacturer for a charitable event as prescribed by A.R.S. § 28-4548.
  2. “Deal Unwound” means the vehicle was returned to the dealership and the sale was not completed.
  3. “Voided TRP” means a TRP that the issuer records as voided after issuing the TRP.
- B. Issuing.**
1. New and used motor vehicle dealers and title service companies that issue TRPs shall send an electronic record of the TRP to the Division before placing the TRP on the vehicle.
  2. The TRP expiration date shall be 45 days from the issue date.
  3. TRPs issued for charitable events are valid for the duration of the event not to exceed 45 days.
  4. An issuer shall not issue more than one TRP per vehicle sale.
  5. An issuer shall attach the TRP to the vehicle rear in the same manner and position as a permanent license plate prescribed under A.R.S. § 28-2354.
- C. Voiding.** An issuer shall void a TRP when:
1. The TRP is lost,
  2. The TRP is damaged,
  3. The dealer reports a deal unwound,
  4. The issuer enters the wrong vehicle identification number, or
  5. The issuer enters the wrong customer identification number.

**Historical Note**

Transferred to R17-1-305 (Supp. 92-4). New Section R17-4-305 recodified from R17-4-219 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 11 A.A.R. 5320, effective February 6, 2006 (Supp. 05-4).

**R17-4-306. Nonresident Daily Commuter Fee**

A nonresident daily commuter shall pay a fee of \$8 for each motor vehicle exempt from registration under A.R.S. § 28-2294.

**Historical Note**

Former Rule, General Order 14. Former Section R17-4-05 renumbered without change as Section R17-4-306 (Supp. 87-2). Transferred to R17-1-306 (Supp. 92-4). New Section R17-4-306 recodified from R17-4-222 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 571, effective January 14, 2002 (Supp. 02-1).

**R17-4-307. Motor Vehicle Registration and License Plate Reinstatement Fee**

- A.** Under A.R.S. § 28-4151(A), the Division shall assess a \$50 fee for reinstatement of a motor vehicle registration and license plate suspended under A.R.S. §§ 28-4148 and 28-4149.
- B.** Subsection (A) does not apply to a motor carrier subject to the financial responsibility requirements prescribed under A.R.S. Title 28, Chapter 9, Article 2.

**Historical Note**

Former Rule, General Order 5. Former Section R17-4-03 renumbered without change as Section R17-4-307 (Supp. 87-2). Transferred to R17-1-307 (Supp. 92-4). New Section R17-4-307 recodified from R17-4-224 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 7 A.A.R. 5439, effective November 14, 2001 (Supp. 01-4).

**R17-4-308. Official Vehicle License Plates**

- A. The Motor Vehicle Division shall issue license plates without charge for official vehicles owned by any entity listed in A.R.S. § 28-2511(A).
- B. A license plate issued under A.R.S. § 28-2511 has no expiration date.
- C. An entity listed in A.R.S. § 28-2511(A) may transfer a license plate to another vehicle the entity owns.
- D. A person who has custody of vehicles governed by A.R.S. § 28-2511 shall:
  - 1. Complete title and registration procedures as prescribed under A.R.S. Title 28, Chapter 7;
  - 2. Display each license plate as prescribed by A.R.S. § 28-2354; and
  - 3. Maintain a record of each license plate transfer that includes:
    - a. The date of the transfer;
    - b. The year, make, and model of the vehicle, and
    - c. The vehicle identification number (VIN) for each car involved in the transfer.

**Historical Note**

Former Rule, General Order 20. Former Section R17-4-06 renumbered without change as Section R17-4-308 (Supp. 87-2). Transferred to R17-1-308 (Supp. 92-4). New Section R17-4-308 recodified from R17-4-252 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Section repealed; new Section made by final rulemaking at 8 A.A.R. 573, effective January 14, 2002 (Supp. 02-1).

**R17-4-309. Private Fire Emergency Vehicle Permit**

- A. Private Fire Emergency Vehicle Permit. A Private Fire Emergency Vehicle Permit may be issued to a private fire department if all requirements provided under subsections (B) and (C) are met.
  - 1. The Private Fire Emergency Vehicle Permit is valid until revoked or surrendered.
  - 2. The Private Fire Emergency Vehicle Permit shall be carried at all times in the fire engine for which the permit is issued.
  - 3. The Private Fire Emergency Vehicle Permit is not transferable.
  - 4. The Private Fire Emergency Vehicle Permit shall remain the property of the Division and shall be surrendered to the Division when the fire engine is no longer being used to respond to an emergency.
- B. Private Fire Emergency Vehicle Permit application. A person applying for a Private Fire Emergency Vehicle Permit shall submit the required documentation to the Division's Enforcement Services Program, P.O. Box 2100, Mail Drop 513M, Phoenix, Arizona 85007. The following documentation is required at the time of initial application:
  - 1. Private Fire Emergency Vehicle Permit Application. Multiple fire engines may be listed on one application. The Private Fire Emergency Vehicle Permit Application is furnished by the Division and is available upon request from the Division's Enforcement Services Program; and
  - 2. Proof of acceptable financial responsibility to cover any liability that may arise from the use of the Private Fire Emergency Vehicle Permit. Acceptable proof of financial responsibility is an insurance policy that:
    - a. Is issued by an insurance company licensed to conduct business in Arizona by the Arizona Department of Insurance;
    - b. Is written for a combined single-limit coverage of at least \$5 million;

- c. Contains a provision stating that the state of Arizona shall be notified at least 30 days prior to any policy cancellation, nonrenewal, or change in provisions; and
- d. Contains a provision stating that the state of Arizona shall be notified immediately if the insurance company becomes insolvent.

**C. Operational requirements.**

- 1. A fire engine may be operated with the privileges prescribed under A.R.S. § 28-624, but shall be subject to all other applicable provisions prescribed under A.R.S. Title 28, A.A.C. Title 17, and any other applicable statutes or ordinances.
- 2. A fire engine shall only be driven by an operator who meets the Operator Requirements as defined under R17-4-301.
- 3. A fire engine with a Private Fire Emergency Vehicle Permit, shall meet the National Fire Protection Association's (NFPA) fire engine and fire apparatus standards in effect for the manufacture date of the emergency vehicle.
- 4. The private fire department is responsible for ensuring that the fire engine is not operated using the privileges prescribed under A.R.S. § 28-624 with an invalid Private Fire Emergency Vehicle Permit.

**D. Denial.** If an application for a Private Fire Emergency Vehicle Permit is denied, a notice of denial shall be sent to the applicant at the address of record. An applicant is allowed to reapply for a permit following denial, provided all requirements listed under this Section are met.**E. Revocation.** If a Private Fire Emergency Vehicle Permit is revoked, a notice of the revocation shall be sent to the address of the applicant. An applicant is allowed to reapply for a permit following revocation, provided all requirements listed under this Section are met.

- 1. The emergency vehicle permit is immediately revoked upon a determination that:
  - a. The permitted vehicle or the private fire department no longer meets the requirements for the permit; or
  - b. The vehicle was operated in violation of the provisions of this rule, any other applicable rule, or statute.
- 2. The revocation shall be preceded by a notice of intent to revoke.
  - a. The notice of intent to revoke shall be sent by first-class mail to the address of the applicant as shown on the permit application.
  - b. The notice of intent to revoke shall inform the applicant of the right to an administrative hearing and the procedure for requesting a hearing.
- 3. The revocation shall become effective 25 days after the mailing date of the notice of intent to revoke unless a timely request for hearing is submitted.

**F. Administrative hearing.** The administrative hearing is held in accordance with the procedures prescribed under 17 A.A.C. 1, Article 5.**Historical Note**

Former Rule, General Order 31. Former Section R17-4-11 renumbered without change as Section R17-4-309 (Supp. 87-2). Transferred to R17-1-309 (Supp. 92-4). New Section recodified from R17-4-701 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 14 A.A.R. 2106, effective July 5, 2008 (Supp. 08-2).

**Appendix A. Repealed****Historical Note**

Appendix A recodified from 17 A.A.C. 4, Article 7 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

Appendix A repealed by final rulemaking at 14 A.A.R. 2106, effective July 5, 2008 (Supp. 08-2).

**R17-4-310. Personalized License Plates****A. Definitions.**

1. "Division" means the Motor Vehicle Division of the Arizona Department of Transportation.
2. "Division Director" means the Assistant Division Director for the Motor Vehicle Division of the Arizona Department of Transportation.
3. "Personalized plate" means a license plate with a registration number chosen by a person rather than assigned by the Division.
4. "Plate number" means the combination of letters, numbers, and spaces on a vehicle license plate.

**B. A person who wants to receive a personalized plate shall file an application with the Division on a form provided by the Division.**

1. An applicant shall provide the following information on the form:
  - a. Name of the vehicle's owner or lessee;
  - b. Vehicle owner's or lessee's mailing address;
  - c. Vehicle's make and year;
  - d. Vehicle identification number;
  - e. Vehicle's current plate number;
  - f. Date the vehicle's current registration expires;
  - g. Plate number to appear on the personalized plate;
  - h. Meaning or message of the personalized plate; and
  - i. Other information required by the Division.
2. If an applicant is purchasing the personalized plate as a gift for the vehicle's owner or lessee, the applicant shall also provide the applicant's name and mailing address.

**C. The Division shall reject the application if the requested plate number:**

1. Refers to or connotes breasts, genitalia, pubic area, buttocks, or relates to sexual or eliminatory functions;
2. Refers to or connotes the substance, paraphernalia, sale, use, purveyor of, or physiological state produced by any illicit drug, narcotic, or intoxicant;
3. Expresses contempt for or ridicule or superiority of a class of persons;
4. Duplicates another registration number;
5. Has connotations that are profane or obscene; or
6. Uses linguistics, numbers, phonetics, translations from foreign languages or upside-down or reverse reading to achieve a reference or connotation prohibited in subsection (C)(1) through (C)(3) or (C)(5).

**D. Rejection of application.**

1. If the Division does not issue personalized plates to an applicant, the Division shall inform the applicant by mail.
2. An applicant may make a written appeal by letter for a review of the rejection, within 10 days after the date of the Division's notice, to the following address:  
Motor Vehicle Division  
Special Plates Unit, Mail Drop 801Z  
PO Box 2100  
Phoenix, Arizona 85001-2100.

**E. Revocation of personalized plates; appeal.**

1. If the Division determines that a personalized plate should not have been issued because it contains a plate number prohibited under subsection (C), the Division shall require the plate holder to surrender the plates to the

division within 30 days after the date of the Division's mailed notice, unless the plate holder requests an appeal under subsection (D)(2).

2. A person who has been directed to surrender a personalized plate may submit a written appeal by letter as prescribed under subsection (D)(2).
3. Refund of personalized plate fees on revocation.
  - a. The Division shall refund the amount of the personalized plate fee and the pro rated amount of the special annual renewal fee to the person holding the revoked personalized plate along with any credit or refund calculated by the Division.
  - b. A person whose plate is revoked may request that instead of a refund, the Division issue the person a different personalized plate. The person shall apply for the personalized plate as prescribed under subsection (B).
4. The Division shall cancel the vehicle plate of a vehicle if the person who holds a revoked personalized plate does not surrender the plate within 30 days after the date of the Division's notice or, if the person timely requests an appeal, within 30 days after the Division issues a final decision.

**Historical Note**

Former Rule, General Order 25. Former Section R17-4-09 renumbered without change as Section R17-4-310 (Supp. 87-2). Transferred to R17-1-310 (Supp. 92-4). New Section recodified from R17-4-708 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 4227, effective November 15, 2002 (Supp. 02-3).

**R17-4-311. Special Organization Plate List**

As required under A.R.S. § 28-2404(D), the Division provides the following list of special organization license plates authorized by the state license plate commission and available for issue to qualified applicants:

1. Arizona Historical Society,
2. Firefighter,
3. Fraternal Order of Police,
4. Legion of Valor,
5. University of Phoenix, and
6. Wildlife Conservation.

**Historical Note**

Former Rule, General Order 24. Former Section R17-4-08 renumbered without change as Section R17-4-311 (Supp. 87-2). Transferred to R17-1-311 (Supp. 92-4). New Section made by exempt rulemaking at 7 A.A.R. 5251, effective November 2, 2001 (Supp. 01-4). Amended by exempt rulemaking at 8 A.A.R. 4007, effective November 1, 2002 (Supp. 02-3). Amended by exempt rulemaking at 13 A.A.R. 1894, effective June 1, 2007 (Supp. 07-2).

**R17-4-312. Off-highway Vehicle User Indicia**

**A.** For lawful Arizona off-highway operation, the owner or operator of a qualifying all-terrain vehicle, off-highway vehicle, or off-road recreational motor vehicle shall apply to the Department for an off-highway vehicle user indicia as prescribed under A.R.S. § 28-1177. The owner or operator shall submit to the Division:

1. The off-highway vehicle user indicia application provided by the Division, and
2. The fee prescribed under subsection (C).

## Department of Transportation – Title, Registration, and Driver Licenses

- B. The owner or operator shall indicate, on the application submitted to the Division under subsection (A), one of the following categories of intended vehicle usage:
1. Exclusively off-highway;
  2. Primarily off-highway, occasionally on-highway; or
  3. Primarily on-highway, occasionally off-highway.
- C. The fee for each off-highway vehicle user indicia issued or renewed by the Department under A.R.S. § 28-1177 is \$25.
- D. The off-highway vehicle user indicia, issued by the Division under subsection (A), shall have the same basic design as the license plate tab issued by the Division for other types of vehicles and shall contain the letters OHV.
- E. The applicant shall display the off-highway vehicle user indicia in the upper left corner of the license plate issued by the Division under A.R.S. Title 28, Chapter 7, Articles 11 through 15.

**R17-4-350. Rental Vehicle Surcharge Reimbursement**

**A.** Definitions. In addition to the definitions prescribed under A.R.S. § 28-5810, the following terms apply to this Section, unless otherwise specified:

“Person” means an individual, a sole proprietorship, firm, partnership, joint venture, association, corporation, limited liability company, limited liability partnership, estate, trust, business trust, receiver or syndicate, this state, any county, city, town, district or other subdivision of this state, an Indian tribe, or any other group or combination acting as a unit.

“Previous year” means the prior calendar year, January 1 through December 31.

“Rental revenue” means the total contract amount stated in the retail contract less any taxes and fees imposed by A.R.S. Title 42, Chapter 5, Article 1, A.R.S. Title 48, Chapter 26, Article 2, and selected non-vehicle related charges, including boxes, packing blankets, straps, and tow bars.

“Surcharge” means the amount equal to five percent of the total contract amount stated in the rental contract less any taxes and fees imposed by A.R.S. Title 42, Chapter 5, Article 1, A.R.S. Title 48, Chapter 26, Article 2, and selected non-vehicle related items, including boxes, packing blankets, straps, and tow bars.

## Department of Transportation – Title, Registration, and Driver Licenses

“Vehicle License Tax” means the tax imposed by A.R.S. § 28-5801, less any tax credited under A.R.S. § 28-2356.

- B. Reports.** Each person subject to A.R.S. § 28-5810, who has conducted a vehicle rental business for any time period during the previous year, shall file an annual report, for the previous year, with the Department. The annual report is due no later than February 15 of each year, unless the rental business is closed before December 31, in which case the annual report is due immediately. The report shall be made on a form furnished by the Department and shall contain all of the following:
1. Address where business records are secured;
  2. Name, title, phone number, and signature of the person authorized to sign the form;
  3. Business name;
  4. Business type, including sole proprietorship, partnership, corporation, limited liability company, and limited liability partnership;
  5. Name, title, phone number, mailing address, and e-mail address of the contact person;
  6. Federal Employer Identification Number (FEIN);
  7. Mailing address (if different from principal business address);
  8. Principal business address;
  9. Rental vehicle revenue collected, by county;
  10. Total Arizona Vehicle License Tax paid on rental vehicles;
  11. Total rental vehicle revenue collected;
  12. Total surcharge collected;
  13. Total surcharge due to the Department; and
  14. Type of rental business, including passenger vehicle, semitrailer, trailer, truck, motorcycle, moped, and recreational vehicle.
- C. Records.** A person in the business of renting vehicles, as defined under A.R.S. § 28-5810, is required to maintain records in support of the required annual reports for a period of four years after the date of the filing of the required annual report or the due date of the report, whichever is longer. The records shall contain all information in support of:
1. The total amount of Vehicle License Tax paid during the previous year. Supporting Vehicle License Tax records for each rental vehicle shall include:
    - a. The Vehicle Identification Number,
    - b. The Arizona vehicle license plate number,
    - c. A copy of the Arizona registration,
    - d. The amount paid for Vehicle License Tax minus any Vehicle License Tax credited under A.R.S. § 28-2356,
    - e. The date on which the Vehicle License Tax was paid, and
    - f. The dates the rental vehicle was in and out of service.
  2. The total gross amount of Arizona vehicle rental revenues collected for the previous year. Supporting Arizona vehicle rental revenue records shall include:
    - a. The rental contract for each rental vehicle,
    - b. The amount of surcharge collected,
    - c. Chart of accounts,
    - d. General ledger,
    - e. Financial statements,
    - f. Federal tax returns, and
    - g. Monthly trial balance.
  3. The amount of the surcharge collected during the previous year. Supporting surcharge collection records shall include:
    - a. All applicable rental contracts; and

- b. The total amount stated in each rental contract, supported by relevant documentation.
4. Failure to keep and maintain proper records or failure to provide records for audit purposes may result in the Department making an assessment against the rental business for the total surcharge amount estimated to have been collected, as determined from the best information available to the Director.
- D. Audits.** The Department shall conduct each audit of a person who collects the surcharge in accordance with generally accepted government auditing standards as set forth in *Government Auditing Standards: 2011 Revision* (commonly referred to as the Yellow Book,) issued by the U.S. Government Accountability Office. The Department incorporates by reference *Government Auditing Standards: 2011 Revision* and no later amendments or editions. The incorporated material is on file with the Department. The printed version is available from the U.S. Government Printing Office, P. O. Box 979050, St. Louis, MO 63197-9000. The incorporated material is available free of charge at <http://www.gao.gov/yellowbook> or can be ordered online by visiting the U.S. Government Online Bookstore at <http://bookstore.gpo.gov>.
  1. The rental business shall have records made available for audit during normal business hours at the rental business location in Arizona. The Department may conduct audits at an out-of-state location, which are paid for by the rental business. The rental business shall pay the audit expenses, per diem, and travel in accordance with the Arizona Department of Transportation expense guidelines in effect at the time of the audit.
  2. The Director has appropriate subpoena powers to require records to be produced for examination and to take testimony. In accordance with A.R.S. § 28-5922, if a person fails to respond to the Director's or agent of the Director's request for records, the Director shall issue subpoenas for the production of records or allow seizure of records.

**Historical Note**

New Section made by final rulemaking at 13 A.A.R. 2058, effective August 4, 2007 (Supp. 07-2). Amended by final rulemaking at 19 A.A.R. 888, effective, June 1, 2013 (Supp. 13-2).

**ARTICLE 4. DRIVER LICENSES****R17-4-401. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101, 28-1301, and 28-3001, the following definitions apply to this Article unless otherwise specified:

“Division” means the Arizona Department of Transportation, Motor Vehicle Division.

“Financial responsibility (accident) suspension” means a suspension, by the Department, of:

The Arizona driver license or driving privilege of an owner of a vehicle that:

Lacks the coverage required under A.R.S. § 28-4135, and

Is involved in an accident in Arizona; and

The Arizona registration of a vehicle, unless the Department receives proof the vehicle was sold.

“Gore area” is defined under A.R.S. § 28-644.

“Proof the vehicle was sold” means a written statement to the Department from an owner that includes the following:

The seller's name;

The VIN;

## Department of Transportation – Title, Registration, and Driver Licenses

The sale date; and

The purchaser's name and address.

"Restricted permit" means written permission from the Department for:

A person subject to a financial responsibility (accident) suspension to operate a motor vehicle only:

Between the person's home and workplace,

During the person's work-related activities, or

Between the person's home and school; and

A vehicle with an Arizona registration subject to a financial responsibility (accident) suspension to be operated by a person specified under R17-4-402 only:

Between the person's home and workplace;

During the person's work-related activities; or

Between the person's home and school.

"State" means a state, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

"SR22" means a certificate of insurance that complies with requirements under A.R.S. § 28-4077(A).

"Thirty-six-month period" means the time measured from the date of the most recent violation with assigned points for which a driver has a conviction or judgment to that day and month three years before the date of the violation.

"Twelve-month period" means the time measured from the date of the most recent violation with assigned points for which a driver has a conviction or judgment to that day and month one year before the date of the violation.

"Twenty-four-month period" means the time measured from the date of the most recent violation with assigned points for which a driver has a conviction or judgment to that day and month two years before the date of the violation.

"VIN" or "vehicle identification number" is defined under A.R.S. § 13-4701(4).

"Withdrawal action" means a Department action that invalidates a person's Arizona driving privilege or a vehicle's Arizona registration, which includes:

A cancellation;

A suspension;

A revocation;

Any outstanding warrant; or

Any unresolved citation.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 5220, effective February 3, 2003 (Supp. 02-4). Amended by final rulemaking at 12 A.A.R. 871, effective March 7, 2006 (Supp. 06-1). Amended by final rulemaking at 14 A.A.R. 839, effective March 4, 2008 (Supp. 08-1). Amended by exempt rulemaking at 21 A.A.R. 1092, effective September 1, 2015 (Supp. 15-2).

#### R17-4-402. Restricted Permit During a Financial Responsibility (Accident) Suspension

A. An applicant for a restricted permit shall:

1. Have no withdrawal action other than the financial responsibility (accident) suspension;
2. Provide an SR22 Certificate of Insurance as proof of future financial responsibility that must be kept in force for three consecutive years after the effective date of the financial responsibility (accident) suspension;

3. Pay the \$10 driving privilege reinstatement fee under A.R.S. § 28-4144(C)(2)(b); and

4. Pay the \$25 motor vehicle registration and license plate reinstatement fee under A.R.S. § 28-4144(C)(2)(b), or if the vehicle was sold before the date of the accident, provide proof the vehicle was sold as defined under R17-4-401;

5. Pay the driving privilege reinstatement application fee under A.R.S. § 28-3002(A)(2); and

6. Satisfy any applicable requirements of A.R.S. § 28-4033(A)(2)(c) or 28-4144(C).

B. In addition to subsection (A) during a financial responsibility (accident) suspension, a restricted permit applicant may:

1. Apply for an original or renew an Arizona driver license by:

a. Complying with A.R.S. §§ 28-3153, 28-3158, or 28-3171; and

b. Paying the application fee under A.R.S. § 28-3002(A)(2) determined by the applicant's age on the application date; or

2. Obtain a duplicate Arizona driver license by paying the \$12 duplicate driver license application fee under A.R.S. § 28-3002(A)(7).

C. At the end of the financial responsibility (accident) suspension, the Division shall immediately remove the driving privilege restriction from the Arizona driving record when the person surrenders an expired restricted permit to the Division.

#### Historical Note

New Section recodified from R17-4-227 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 5220, effective February 3, 2003 (Supp. 02-4). Amended by final rulemaking at 16 A.A.R. 2448, effective February 5, 2011 (Supp. 10-4).

#### R17-4-403. Application for Duplicate Driver License or Duplicate Nonoperating Identification License; Fees

A. An applicant shall apply to the Division, on a form provided by the Division, for a duplicate driver license or a duplicate nonoperating identification license.

B. The fee for the duplicate driver license or duplicate nonoperating identification license issued by the Division is \$12 under A.R.S. §§ 28-3002(A) and 28-3165.

#### Historical Note

New Section made by final rulemaking at 16 A.A.R. 2448, effective February 5, 2011 (Supp. 10-4).

#### R17-4-404. Driver Point Assessment; Traffic Survival Schools

A. Point assessment. The Department shall assign points to a driver, as prescribed under Table 1, Driver Point Valuation, for each violation resulting in a conviction or judgment.

B. Actions after point assessment. Under A.R.S. § 28-3306(A)(3), if a driver accumulates eight or more points in a twelve-month period, the Department shall:

1. Order the driver to successfully complete the curriculum of a licensed traffic survival school; or
2. Suspend the driver's Arizona driver license or driving privilege.

C. Traffic survival school order of assignment. The Department or the private entity under contract with the Department shall send a dated order of assignment to traffic survival school, as prescribed under A.R.S. § 28-3318, to a driver who accumulates 8 to 12 points in a twelve-month period, and who did not complete a traffic survival school course in the previous twenty-four-month period.

1. The order of assignment shall:

## Department of Transportation – Title, Registration, and Driver Licenses

- a. Instruct the driver to submit any hearing request to the Department within 15 days after the date of the order of assignment; and
- b. Instruct the driver that failure to successfully complete traffic survival school within 60 days after the date of the order of assignment will result in the Department issuing a six-month order of suspension.
2. The Department shall record that a driver completed traffic survival school if:
  - a. A licensed traffic survival school reports that the driver successfully completed the curriculum; or
  - b. The driver presents to the Department an original certificate of completion issued by a licensed traffic survival school, within 30 days of issuance of the certificate.
- D. Suspension for failure to complete traffic survival school. The Department or the private entity under contract with the Department shall mail a driver a six-month order of suspension, as prescribed under A.R.S. § 28-3318, if the driver failed to establish completion of traffic survival school in accordance with subsection (C). The order of suspension shall:
  1. Specify the period within which the driver may submit a hearing request to the Department; and
  2. Specify the effective date of the suspension.
- E. Suspension for accumulation of excessive points. The Department shall mail an order of suspension as prescribed under A.R.S. § 28-3318 to a driver who accumulates an excessive amount of points. The order of suspension shall:
  1. Specify the length of the suspension as follows:
    - a. A three-month suspension for accumulation of 8 to 12 points in a twelve-month period if a traffic survival school course was successfully completed in the previous twenty-four-month period;
    - b. A three-month suspension for accumulation of 13 to 17 points in a twelve-month period;
    - c. A six-month suspension for accumulation of 18 to 23 points in a twelve-month period; and
    - d. A twelve-month suspension for accumulation of 24 or more points in a thirty-six-month period;
  2. Specify the period within which the driver may submit a hearing request to the Department; and
  3. Specify the effective date of the suspension.

New Table 1 made by final rulemaking at 14 A.A.R. 839, effective March 4, 2008 (Supp. 08-1).

**R17-4-405. Emergency Expired****Historical Note**

Emergency rule adopted effective August 6, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency expired.

**R17-4-406. Minor's Application for Permit or License**

- A. For the purposes of administering the provisions of A.R.S. § 28-3160, the following definitions apply to this Section:
  1. "Application," means a form provided by the Division that includes the Legal Guardian Affidavit required by the Division to be submitted with each minor's driver license application.
  2. "Guardian" means one who has been appointed by a court of law to care for a minor child, but only if both parents of the child are deceased, or an agency as defined in A.R.S. § 8-513.
  3. "Parent" means the natural or adoptive father or mother of a child.
- B. Procedure when both parents sign: If both parents sign a child's application, no proof of custody need be furnished.
- C. Procedure when only one parent signs:
  1. If the signing parent is married to the child's other parent, that fact shall be stated and it shall be presumed the signing parent has custody of the child.
  2. If the signing parent is not married to the child's parent because the other parent is deceased, that fact shall be

## Department of Transportation – Title, Registration, and Driver Licenses

stated and it shall be presumed the signing parent has custody of the child.

3. If the signing parent is not married to the child's other parent, the signing parent shall affirm, by sworn statement to the Division or a notary public, that the other parent does not have custody of the child, in which event the Division shall presume the signing parent has custody of the child.
- D. Procedure when both parents are deceased:
  1. If both parents are deceased, the minor or minor's guardian shall attach certified copies of certificates of death or other satisfactory proof of death, that includes a court judgment, affidavits of close relatives of the child, or school records.
  2. A person who is guardian of a child shall sign an application as defined by this rule or furnish a certified court order appointing guardianship.
  3. An employer signing the application shall certify the person employs the minor on the date of application.
  4. A person who has custody of a child shall sign a Legal Guardian Affidavit affirming custody or furnish a certified court order awaiting custody.
- E. Proof of custody. Proof of custody may be established by a certified copy of the court order awarding custody or a written affirmation by the person signing the application.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-201 adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Correction, (C)(4) should read "... governed by R17-4-58" as certified effective November 30, 1983 (Supp. 84-3). Former Section R17-4-201 renumbered without change as Section R17-4-406 Supp. (87-2). Former Section R17-4-406 repealed, new Section R17-4-406 adopted effective July 14, 1989 (Supp. 89-3). Section recodified to R17-4-450 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-510 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 12 A.A.R. 4446, effective November 7, 2006 (Supp. 06-4).

**R17-4-407. Application for Travel-Compliant Driver License or Nonoperating Identification License; Fee**

- A. For the purposes of this Section:
  1. "Travel-compliant driver license" means a federally compliant driver license issued pursuant to A.R.S. § 28-3175.
  2. "Travel-compliant nonoperating identification license" means a federally compliant nonoperating identification license issued pursuant to A.R.S. § 28-3175.
- B. An applicant shall apply to the Department, on a form provided by the Department, for a travel-compliant driver license or a travel-compliant nonoperating identification license.
- C. An applicant must meet and comply with all lawful requirements for an Arizona driver license or nonoperating identification license.
- D. An applicant shall meet and comply with all application and documentation requirements in the most current edition of 6 CFR 37, including satisfactory proof of identity, date of birth, social security number, principle residency, and evidence of lawful status in the United States. Documents and information must be verified by the Department. An applicant may obtain a listing of acceptable documentation from the Department's website at [www.azdot.gov](http://www.azdot.gov).

- E. An applicant shall pay a \$25 fee for any class of a travel-compliant driver license or travel-compliant nonoperating identification license.
- F. A travel-compliant driver license is valid for a period of eight years after issuance and is renewable for successive periods of eight years up to but not exceed the year of the licensee's 65th birthday, except for when:
  1. The applicant is authorized for a shorter period of time as provided under A.R.S. § 13-3821, 28-3171(B), or 28-3223, or federal law authorizes the applicant's presence for a shorter period of time.
  2. The applicant is 60 years of age or older and the travel-compliant driver license is valid for a period of five years after issuance and renewable for successive periods of five years.
- G. A travel-compliant nonoperating identification license is valid for a period of eight years after issuance and is renewable for successive periods of eight years, except for when the applicant is authorized for a shorter period of time as provided under A.R.S. § 13-3821, 28-3171(B), or 28-3223, or federal law authorizes the applicant's presence for a shorter period of time.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-202 adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Correction, subsection (D) as certified effective November 30, 1983 (Supp. 84-3). Former Section R17-4-202 renumbered without change as Section R17-4-407 (Supp. 87-2). Section recodified to R17-4-451 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-706 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 9 A.A.R. 1158, effective May 12, 2003 (Supp. 03-1). New Section made by final exempt rulemaking under Laws 2015, Ch. 294, § 5 at 22 A.A.R. 819, effective March 28, 2016 (Supp. 16-1).

**R17-4-408. Mandatory Extension of a Certified Ignition Interlock Device Order**

- A. For purposes of this Section, "conviction" has the meaning prescribed in A.R.S. § 28-101(12).
- B. For the duration of a certified ignition interlock device order, each conviction for violating A.R.S. §§ 28-1464(A), 28-1464(C), 28-1464(D), 28-1464(F), or 28-1464(H) of the person subject to the order will result in the Division's extension of the order.
- C. Each extension by the Division of a person's certified ignition interlock device order shall be for one year.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-203 and Appendix D adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Correction, added (C)(5) as certified effective November 30, 1983 (Supp. 84-3). Former Section R17-4-203 renumbered without change as Section R17-4-408 (Supp. 87-2). Section recodified to R17-4-452 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-709.10 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-409. Application for Nonoperating Identification License; Fee**

- A. This Section does not apply to applicants for a travel-compliant nonoperating identification license. Except as provided under R17-4-407, this Section applies to applicants for a nonoperating identification license.
- B. An applicant shall apply to the Department, on a form provided by the Department, for a nonoperating identification license, and shall comply with the requirements under A.R.S. § 28-3165.
- C. An applicant may obtain a listing of satisfactory proof of an applicant's name and date of birth from the Department's web-site at [www.azdot.gov](http://www.azdot.gov).
- D. Except as provided under A.R.S. § 28-3165, an applicant shall pay a \$12 fee for a nonoperating identification license.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-204 and Appendix B adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Former Section R17-4-204 renumbered without change as Section R17-4-409 (Supp. 87-2). Section recodified to R17-4-453 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-508 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 12 A.A.R. 4446, effective November 7, 2006 (Supp. 06-4). Amended by final rulemaking at 16 A.A.R. 2448, effective February 5, 2011 (Supp. 10-4). Amended by final exempt rulemaking under Laws 2015, Ch. 294, § 5 at 22 A.A.R. 819, effective March 28, 2016 (Supp. 16-1).

**R17-4-410. Voter Registration Through the Motor Vehicle Division**

- A. For purposes of this Section:
  - 1. "License" has the same meaning as "driver's license" under A.R.S. § 16-111(2).
  - 2. "MVD" means the Arizona Department of Transportation, Motor Vehicle Division.
- B. To register to vote in Arizona through the MVD as provided for in A.R.S. § 16-112, a person who completes a transaction listed in subsection (C) shall complete and return to MVD:
  - 1. A Secretary of State-approved hardcopy voter registration form for the county of the person's residence, or
  - 2. An electronic voter registration form through MVD's ServiceArizona web site or through MVD's driver license system along with an electronic verification that the person meets voter eligibility criteria under A.R.S. § 16-101.
- C. Subsection (B) applies to the following license transactions:
  - 1. Initial licensee application;
  - 2. License renewal;
  - 3. Duplicate driver license; or
  - 4. Licensee personal information update.
- D. MVD shall transfer the voter registration forms and the data collected under this Section by:
  - 1. Mailing the completed hardcopy forms to the appropriate county recorder; and
  - 2. Transmitting the data from completed electronic voter registration forms and licensee personal information updates to the Secretary of State as prescribed under A.A.C. R2-12-605 for further distribution to the appropriate county recorder.
- E. MVD shall maintain the confidentiality of applicant information as required under A.R.S. Title 16, Chapter 1.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-205 adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Former Section R17-4-205 renumbered without change as Section R17-4-410 (Supp. 87-2). Section recodified to R17-4-454 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 8 A.A.R. 2394, effective May 9, 2002 (Supp. 02-2). Amended by final rulemaking at 12 A.A.R. 1329, effective June 4, 2006 (Supp. 06-2).

**R17-4-411. Special Ignition Interlock Restricted Driver License: Application, Restrictions, Reporting, Fee**

- A. In addition to the requirements prescribed in A.R.S. § 28-3158, an person applying for a special ignition interlock restricted driver license shall:
  - 1. If the person is suspended for a first offense of A.R.S. § 28-1321:
    - a. Complete at least 90 consecutive days of the period of the suspension, and
    - b. Maintain a functioning certified ignition interlock device during the remaining period of the suspension.
  - 2. If the person is revoked for a first offense of A.R.S. § 28-1383(A)(3):
    - a. Complete at least 90 consecutive days of the suspension under A.R.S. § 28-1385,
    - b. Submit proof to the Division that the person has completed an approved alcohol or drug screening or treatment program, and
    - c. Maintain a functioning certified ignition interlock device during the remaining period of the revocation.
  - 3. If the person has a court-ordered restriction under A.R.S. §§ 28-3320 or 28-3322:
    - a. Comply with the restrictions in subsection (C), and
    - b. Maintain a functioning certified ignition interlock device during the remaining period of the court-ordered restriction.
- B. The Division shall not issue a special ignition interlock restricted driver license if the person's driver license or driving privilege is suspended or revoked for a reason not under subsections (A)(1), (2), or (3).
- C. A person applying for a special ignition interlock restricted driver license shall pay the following fees:
 

1. Age 50 or older	\$10.00
2. Age 45 – 49	\$15.00
3. Age 40 – 44	\$20.00
4. Age 39 or younger	\$25.00
- D. A special ignition interlock restricted driver license issued under subsection (A), permits a person to operate a motor vehicle equipped with a functioning certified ignition interlock device as prescribed in A.R.S. § 28-1402(A).
- E. Reporting. On the eleventh month after the initial date of installation and each eleventh month thereafter for as long as the person is required to maintain a functioning certified ignition interlock device, each installer shall electronically provide the Division all of the following information as recorded by the certified ignition interlock device:
  - 1. Date installed;
  - 2. Person's full name;
  - 3. Person's date of birth;
  - 4. Person's customer or driver license number;
  - 5. Installer and manufacturer name;

6. Installer fax number;
  7. Date report interpreted;
  8. Report period;
  9. Any tampering of the device within the meaning of A.R.S. § 28-1301(9);
  10. Any failure of the person to provide proof of compliance or inspection as prescribed in A.R.S. § 28-1461;
  11. Any attempts to operate the vehicle with an alcohol concentration exceeding the presumptive limit prescribed in A.R.S. § 28-1381(G)(3), or if the person is younger than 21 years of age, attempts to operate the vehicle with any spirituous liquor in the person's body; and
  12. Any other information required by the Director.
- F. A person applying for a special ignition interlock restricted driver license shall provide proof of financial responsibility prescribed in Title 28, Arizona Revised Statutes, Chapter 9, Article 3.

#### Historical Note

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-206 and Appendices C and E adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Former Section R17-4-206 renumbered without change as Section R17-4-411 (Supp. 87-2). Section recodified to R17-4-455 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 12 A.A.R. 871, effective March 7, 2006 (Supp. 06-1).

#### R17-4-412. Extension of a Special Ignition Interlock Restricted Driver License: Hearing, Burden of Proof and Presumptions

- A. Extension. The Division shall extend a person's special ignition interlock restricted driver license for a period of one year if the Division has reasonable grounds to believe:
1. The person tampered with the certified ignition interlock device within the meaning of A.R.S. § 28-1301(9),
  2. The person fails to provide proof of compliance prescribed in A.R.S. § 28-1461, or
  3. The person attempted to operate the vehicle with an alcohol concentration exceeding the presumptive limit prescribed in A.R.S. § 28-1381(G)(3) three or more times during the period of license restriction or limitation, or if the person is younger than 21 years of age, attempted to operate the vehicle with any spirituous liquor in the person's body three or more times during the period of license restriction or limitation.
- B. Hearing. If a person's special ignition interlock restricted driver license is extended under subsection (A), the person may submit, within 15 days of the date of the order of extension of the restriction, a written request to the Division requesting a hearing. A request for hearing stays the extension of the restriction.
- C. Burden of proof and presumptions.
1. The hearing office shall presume that the person's whose special ignition interlock restricted driver license is extended under subsection (A)(3), was the person in control of the vehicle and the person attempted to operate the vehicle with an alcohol concentration exceeding the presumptive limit in A.R.S. § 28-1381, or tampered with the device within the meaning of A.R.S. § 28-1301(9).
  2. The person may be rebut the presumption by a showing of clear and convincing evidence that the person whose special ignition interlock restricted driver license being extended, was not the person in control of the vehicle or

attempted to operate the vehicle with an alcohol concentration exceeding the presumptive limit in A.R.S. § 28-1381, or tampered with the device within the meaning of A.R.S. § 28-1301(9).

- D. Except for subsection (A)(2), if the Division suspends, revokes, cancels, or otherwise rescinds a person's special ignition interlock restricted driver license for any reason, the Division shall not issue a new license or reinstate the special ignition interlock restricted driver license during the original period of suspension or revocation or while the person is otherwise ineligible to receive a license.

#### Historical Note

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-207 adopted as an emergency effective August 18, 1983, now adopted as a permanent rule effective November 30, 1983 (Supp. 83-6). Correction, (A)(3) as certified effective November 30, 1983 (Supp. 84-3). Former Section R17-4-207 renumbered without change as Section R17-4-412. Correction: subsection (F), paragraph (6), "overweight" corrected to read: "overheight" (Supp. 87-2). Section recodified to R17-4-456 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 12 A.A.R. 871, effective March 7, 2006 (Supp. 06-1).

#### R17-4-413. Lifetime Disqualification Reinstatement

- A. Definitions. In addition to the definitions prescribed under A.R.S. §§ 28-101 and 28-3001, the following definitions apply to this Section, unless otherwise specified:
- "CDL" means Commercial Driver License.
- "Lifetime disqualification" means the individual is disqualified for life from operating a commercial motor vehicle as prescribed under 49 CFR 391.15.
- "Permanently disqualified" means the individual will never be able to obtain a commercial driver license.
- B. Eligibility. An individual with a lifetime disqualification may request reinstatement of the individual's commercial driving privilege if:
1. Ten years have passed since the date of the lifetime disqualification.
  2. The individual:
    - a. Is otherwise eligible for licensure.
    - b. Has continuously been eligible for a driver license during the most recent 10-year period.
    - c. Has not previously reinstated CDL privileges for another lifetime disqualification.
    - d. Has no record of a conviction for any of the following violations, in any state, within the previous 10-year period:
      - i. Driving while under the influence of alcohol or a controlled substance.
      - ii. Having a blood alcohol concentration of .04 or greater while driving a commercial motor vehicle.
      - iii. Refusal to submit to a blood alcohol concentration test.
      - iv. Leaving the scene of an accident.
      - v. Using a vehicle in the commission of a felony.
      - vi. Operating a commercial motor vehicle as defined under A.R.S. § 28-3001 while his or her commercial driving privileges are canceled, disqualified, suspended, or revoked.
      - vii. Causing a fatality through the negligent operation of a commercial motor vehicle.

## Department of Transportation – Title, Registration, and Driver Licenses

- C. Application after lifetime disqualification. If the Division determines that the individual is eligible to reinstate his or her commercial driving privilege, the individual may obtain a new CDL by paying all required fees, submitting the medical examination form prescribed under Section R17-4-508(A)(1), and successfully completing all CDL written, vision, and demonstration-skill testing applicable to the type of CDL, including any endorsements, for which the individual is applying.
- D. Permanent disqualification.
1. An individual who reinstated his or her commercial driving privilege in accordance with this Section and who is subsequently given a lifetime disqualification under A.R.S. § 28-3312 is permanently disqualified.
  2. An individual convicted of using any vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance is permanently disqualified.
  3. An individual who more than once refuses a test in violation of A.R.S. § 28-1321 if the refusals involve more than one incident is permanently disqualified.
  4. An individual who more than once is convicted of violating A.R.S. § 28, Chapter 4, Article 3 is permanently disqualified.

**Historical Note**

Adopted as an emergency effective August 18, 1983, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 83-4). Former Section R17-4-208 adopted as an emergency effective August 18, 1983, now adopted without change as a permanent rule effective November 30, 1983 (Supp. 83-6). Former Section R17-4-208 renumbered without change as Section R17-4-413 (Supp. 87-2). Section recodified to R17-4-457 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 2155, effective August 4, 2007 (Supp. 07-2).

**R17-4-414. Commercial Driver License Applicant Driver History Check; Required Action; Hearing**

- A. Applicability. The provisions of this Section shall apply to all applicants requesting an original, renewal, reinstatement, transfer, or upgrade of a commercial driver license or commercial driver license instruction permit.
- B. Driver History Check. In compliance with 49 CFR 384.206, 384.210, 384.225, and 384.232:
1. The Department shall require each applicant for a commercial driver license to supply the names of all states where the applicant has previously been licensed to operate a motor vehicle.
  2. The Department shall request the complete driver history record from all states where the applicant was licensed to operate a motor vehicle within the previous 10 years. The Department shall make a driver history request no earlier than:
    - a. Twenty-four hours prior to the issuance of a commercial driver license or commercial driver license instruction permit for an applicant who does not currently possess a valid Arizona commercial driver license; or
    - b. Ten days prior to the issuance of a commercial driver license or commercial driver license instruction permit for an applicant who currently possesses a valid Arizona commercial driver license.
  3. The Department shall record and maintain as part of the driver history all convictions, disqualifications, and other licensing actions for violations of any state or local law

relating to motor vehicle traffic control, other than a parking violation, committed in any type of vehicle by a commercial driver licensee or any driver operating a commercial motor vehicle.

- C. Required Action. In compliance with 49 CFR 384.210 and 384.231:
1. The Department shall, based on the findings of the driver history checks, issue a commercial driver license or commercial driver license instruction permit to a qualified applicant.
  2. In the case of a reported conviction, disqualification, or other licensing action, the Department shall promptly cancel, disqualify, suspend, or revoke the person's commercial driving privilege as prescribed under A.R.S. Title 28, Chapters 4, 6, 8, and 14 and A.A.C. Title 17.
  3. The Department shall send written notification of the action to the person describing the action taken by the Department.
- D. Hearing. A hearing may be allowed when the driver history information received by the Department is a result of a case of mistaken identity or identity theft.
1. The person shall submit a hearing request in writing and comply with A.A.C. R17-1-502.
  2. The hearing request shall be submitted within 20 days from the date the notice of action was mailed.
  3. The hearing request shall indicate whether the request for the hearing is based on a case of identity theft or mistaken identity.
  4. The hearing shall be held in accordance with the procedures prescribed under A.R.S. § 28-3317 and 17 A.A.C. 1, Article 5.
  5. It shall be presumed that the information received from the driver history check belongs to the person. The person may overcome this presumption if the person is able to present evidence that either:
    - a. The person is not the driver convicted of the reported violation as in a case of mistaken identity; or
    - b. The person's identity was stolen and the applicant or licensee was not the driver convicted of the violation.
  6. The scope of the hearing is limited to determining whether the person is the driver convicted of the reported driver history information, not the validity of the underlying conviction or licensing action that occurred in another licensing jurisdiction.

**ARTICLE 5. SAFETY****R17-4-501. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101, 28-3001, 28-3005, and 32-1601, in this Article, unless otherwise specified:

“Adaptation” means a modification of or addition to the standard operating controls or equipment of a motor vehicle.

“Applicant” or “licensee” means a person:

Applying for an Arizona driver license or driver license renewal, or

Required by the Division to complete an examination successfully or to obtain an evaluation.

“Application” means the Division form required to be completed by or for an applicant for a driver license or driver license renewal.

“Arizona Driver License Manual” or “manual” means the reference booklet for applicants, issued by the Division, containing non-technical explanations of the Arizona motor vehicle laws.

“Aura” means a sensation experienced before the onset of a neurological disorder.

“Commercial Driver License physical qualifications” means driver medical qualification standards for a person licensed in class A, B, or C to operate a commercial vehicle as prescribed under 49 CFR 391, incorporated by reference under R17-5-202 and R17-5-204.

“Director” means the Division Director or the Division Director’s designee.

“Disqualifying medical condition” means a visual, physical, or psychological condition, including substance abuse, that impairs functional ability.

“Division” means the Arizona Department of Transportation, Motor Vehicle Division.

“Evaluation” means a medical assessment of an applicant or licensee by a specialist as defined below to determine whether a disqualifying medical condition exists.

“Examination” means testing or evaluating an applicant’s or licensee’s:

Ability to read and understand official traffic control devices,

Knowledge of safe driving practices and the traffic laws of this state, and

Functional ability.

“Functional ability” means the ability to operate safely a motor vehicle of the type permitted by an Arizona driver license class or endorsement.

“Identification number” means a distinguishing number assigned by the Division to a person for a license or instruction permit.

“Licensee” means a person issued a driver license by this state.

“Licensing action” means an action by the Division to:

Issue, deny, suspend, revoke, cancel, or restrict a driver license; or

Require an examination or evaluation of an applicant or licensee.

“Medical code” means a system of numerals or letters indicating the licensee suffers from some type of adverse medical condition.

“Medical screening questions and certification” means the questions and certification on the application.

“Neurological disorder” means a malfunction or disease of the nervous system.

“Seizure” means a neurological disorder characterized by a sudden alteration in consciousness, sensation, motor control, or behavior, due to an abnormal electrical discharge in the brain.

“Specialist” means:

A physician who is a surgeon or a psychiatrist;

A physician whose practice is limited to a particular anatomical or physiological area or function of the human body, patients with a specific age range; or

A psychologist.

“Substance abuse” means:

Use of alcohol in a manner that makes the user an alcoholic as defined in A.R.S. § 36-2021, or

Use of controlled substance in a manner that makes the user a drug dependent person as defined in A.R.S. § 36-2501.

“Substance abuse counselor” is defined in A.R.S. § 28-3005.

“Substance abuse evaluation” means an assessment by a physician, specialist, or certified substance abuse counselor to determine whether the use of alcohol or a drug impairs functional ability.

## Department of Transportation – Title, Registration, and Driver Licenses

“Successful completion of an examination” means an applicant or licensee:

Establishes the visual, physical, and psychological ability to operate a motor vehicle safely, or

Achieves a score of at least 80% on any required tests.

#### Historical Note

Adopted effective December 14, 1995 (Supp. 95-4). Section recodified to R17-5-706 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 8 A.A.R. 3241, effective July 12, 2002 (Supp. 02-3). Amended by final rulemaking at 8 A.A.R. 5223, effective December 5, 2002 (Supp. 02-4). Amended by final rulemaking at 10 A.A.R. 2829, effective August 7, 2004 (Supp. 04-2). Amended by final rulemaking at 13 A.A.R. 1127, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 227, effective March 8, 2008 (Supp. 08-1).

#### R17-4-502. General Provisions for Visual, Physical, and Psychological Ability to Operate a Motor Vehicle Safely

A. Applicant's or licensee's responsibility. To comply with the Division's screening process for safe operation of a motor vehicle, an applicant or licensee shall:

1. Provide the Division with all requested information about the applicant's or licensee's visual, physical, or psychological condition;
2. Successfully complete all required examinations;
3. Obtain all required evaluations;
4. Ensure timely submission of evaluation reports to the Division; and
5. Appear at all required interviews.

B. Screening process for safe operation of a motor vehicle. This subsection and subsections (C) through subsection (E) state the screening process for safe operation of a motor vehicle.

1. An applicant shall complete the application, including the medical screening questions and certification.
2. An applicant without a valid driver license, who successfully completes all required examinations, shall obtain an evaluation if:
  - a. The Division informs the applicant that the applicant's responses to the medical screening questions indicate the existence of a disqualifying medical condition; or
  - b. The applicant comes under subsection (C)(1)(a), subsection (C)(1)(c), or subsection (C)(1)(d).
3. An applicant for license renewal shall successfully complete an examination if the applicant's responses to the medical screening questions indicate that since the applicant's last driver license renewal:
  - a. The applicant has developed a visual, physical, or psychological condition that may constitute a disqualifying medical condition; or
  - b. There has been a change in an existing visual, physical, or psychological condition that may constitute a disqualifying medical condition.
4. As soon as an applicant's medical condition allows, the applicant shall notify the Division, in writing or by telephone, that the applicant has or may have a medical condition not previously reported to the Division that affects the applicant's functional ability.
5. Upon receipt of the notification required under subsection (B)(4), the Division shall require the applicant to:
  - a. Complete the medical screening questions and certification on the application, and
  - b. Continue with the screening process for safe operation of a motor vehicle.

C. Evaluation, interview, and additional evaluation. An applicant or licensee shall submit to an evaluation, attend an interview, or submit to an additional evaluation as required by the Division.

1. The Division shall require an evaluation if the Director notifies the applicant or licensee in writing that:
  - a. The applicant or licensee comes under the provisions of R17-4-503 or R17-4-506;
  - b. The applicant or licensee reports a possible disqualifying medical condition or fails to successfully complete an examination;
  - c. The applicant or licensee shows unexplained confusion, loss of consciousness, or incoherence that is observed by Division personnel; or
  - d. A person with direct knowledge submits to the Division written information about specific events or conduct indicating the applicant or licensee may have a disqualifying medical condition.
2. The applicant or licensee shall have the physician, appropriate specialist, or certified substance abuse counselor who performs an evaluation submit, to the Division's Medical Review Program, an evaluation report on a form provided by the Division.
3. If the evaluation report on the applicant or licensee is inconclusive regarding the existence of a disqualifying medical condition, the Division shall require the applicant or licensee to appear for an interview to explain information in the evaluation report.
4. If the Division is unable to determine whether a disqualifying medical condition exists after an interview with the applicant or licensee, the Division shall require an additional evaluation, performed by an appropriate specialist and reported to the Division's Medical Review Program, on a form provided by the Division.
5. An applicant or licensee shall pay for any expense incurred by the applicant or licensee to show compliance with the visual, physical, and psychological standards for a driver license.

D. Licensing action. The Division shall take a licensing action after requiring an applicant or licensee to complete an examination successfully, obtain an evaluation and submit an evaluation report, or appear at an interview.

1. The Division shall deny a driver license if an applicant:
  - a. Fails to complete successfully an examination; or
  - b. Fails to:
    - i. Obtain an evaluation;
    - ii. Have a physician, appropriate specialist, or certified substance abuse counselor submit an evaluation report to the Division within 30 days after the Division notifies the applicant that an evaluation is required; or
    - iii. Appear at an interview; or
  - c. Has an evaluation report submitted that indicates a disqualifying medical condition.
2. The Division shall summarily suspend a licensee's driver license under A.R.S. §§ 28-3306 and 41-1064 for a reason stated in subsection (D)(1).
3. The Division shall issue a revocation notice with a notice of summary suspension. The revocation notice shall inform the licensee that:
  - a. Unless the Division receives the licensee's timely hearing request under subsection (F), the revocation becomes effective:
    - i. Fifteen days after the date the licensee is personally served with the notice; or

## Department of Transportation – Title, Registration, and Driver Licenses

- ii. Twenty days after the date the notice is mailed to the licensee.
  - b. A person who wishes to obtain a license after suspension or revocation shall reapply for a license as specified in A.R.S. § 28-3315.
- 4. The Division shall issue a driver license to an applicant or shall not suspend or revoke a licensee's driver license if:
  - a. The applicant or licensee successfully completes all required examinations and the Division does not require an evaluation, or
  - b. The applicant or licensee obtains all required evaluations and the most recent evaluation report submitted on behalf of the applicant or licensee conclusively indicates no disqualifying medical condition.
- E. Driver license restrictions. If an applicant or licensee uses an adaptation, including those listed below to demonstrate functional ability during an examination, the Division shall indicate the adaptation as a restriction on a driver license issued to the applicant or licensee and on the applicant's or licensee's driving record.
  - 1. Automatic transmission,
  - 2. Hand dimmer switch,
  - 3. Left-foot gas pedal,
  - 4. Parking-brake extension,
  - 5. Power steering,
  - 6. Power brakes,
  - 7. Six-way power seat,
  - 8. Right-side directional signal,
  - 9. A device that enables an operator to spin the steering wheel,
  - 10. A device that enables full foot control,
  - 11. Dual outside mirrors,
  - 12. Chest restraints,
  - 13. Shoulder restraints,
  - 14. A device that extends pedals,
  - 15. A device that enables full hand control, and
  - 16. Adapted seat.
- F. Hearings. This subsection states the hearing procedure for licensing actions taken by the Division after the screening process for safe operation of a motor vehicle.
  - 1. If the Division takes an adverse licensing action under this Section, an applicant or licensee may request a hearing with the Division's Executive Hearing Office. A hearing request is timely if received by the Division:
    - a. Within 15 days after the date the notice is delivered to the applicant or licensee, or
    - b. Within 20 days after the date the notice is mailed to the applicant or licensee.
  - 2. A.A.C. R17-1-501 through R17-1-511 and R17-1-513 govern a hearing conducted under this subsection.
  - 3. The administrative law judge shall sustain, modify, or void the Division's licensing action.
- G. The Division shall not release information required to be submitted to the Division under this Section by an applicant or licensee except to a person or entity qualified under A.R.S. § 28-455.

**Historical Note**

New Section recodified from R17-4-520 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3241, effective July 12, 2002 (Supp. 02-3). Amended by final rulemaking at 9 A.A.R. 1861, effective June 3, 2003 (Supp. 03-2). Amended by final rulemaking at 13 A.A.R. 1127, effective May 5, 2007 (Supp. 07-1).

**Exhibit A. Repealed****Historical Note**

New Exhibit made by final rulemaking at 8 A.A.R. 3241, effective July 12, 2002 (Supp. 02-3). Section repealed by final rulemaking at 13 A.A.R. 1127, effective May 5, 2007 (Supp. 07-1).

**R17-4-503. Vision standards**

- A. Definitions.
  - 1. "Binocular vision" means the ability to see in both eyes.
  - 2. "Biotopic Telescopic Lens System" means a bioptic, spectacle-mounted corrective lens prescribed by a physician or optometrist for meeting vision acuity requirements for driving that uses magnification as the main method of obtaining minimal visual acuity.
  - 3. "Corrected visual acuity" means distance vision corrected by eyeglasses, contact lenses, or a bioptic telescopic lens system.
  - 4. "Corrective lens" means eyeglasses, contact lenses, or a bioptic telescopic lens system used to correct distance vision.
  - 5. "Diplopia" means double vision.
  - 6. "Field of vision" means the area in which objects may be seen when the eye is fixed.
  - 7. "Impaired night vision" means below normal ability to see in reduced light.
  - 8. "Monocular vision" means the ability to see in one eye only.
  - 9. "Optometrist" means a person licensed to practice optometry in any state, territory, or possession of the United States or the Commonwealth of Puerto Rico.
  - 10. "Retinitis pigmentosa" means a chronic progressive inflammation of the retina with atrophy and pigmentary infiltration of the inner layers of the retina.
  - 11. "Snellen Chart" means a chart imprinted with lines of black letters of decreasing size for testing visual acuity.
  - 12. "Visual acuity" means the clarity of a person's vision.
- B. Standard.
  - 1. Visual acuity. A person shall have binocular or monocular vision and visual acuity of 20/40 in at least one eye.
  - 2. Field of vision. Field of vision shall be 70 degrees temporally, and 35 degrees nasally, in at least one eye.
- C. Restrictions.
  - 1. A person with corrected vision shall wear corrective lenses at all times when driving if the corrective lens is required to achieve the vision standards in subsection (B).
  - 2. The Division shall restrict a person with diagnosed impaired night vision to daytime driving only.
  - 3. The Division shall restrict a person with binocular vision and corrected or uncorrected visual acuity of 20/50 or 20/60, when using both eyes, to daytime driving only.
  - 4. The Division shall not license a person with monocular vision and visual acuity of 20/50 or greater.
  - 5. The Division shall not license a person with binocular vision and visual acuity of 20/70 or greater.
- D. Screening process.
  - 1. The Division, a physician, or an optometrist may administer visual acuity and field of vision screening through the use of visual screening equipment to determine if a person's visual acuity and field of vision meets minimum standards.
  - 2. A person may use a bioptic telescopic lens system during vision screening.
    - a. Beginning on the date of a initial application and every year thereafter, a person using a bioptic telescopic lens system shall submit to the Division an

## Department of Transportation – Title, Registration, and Driver Licenses

annual exam performed by a physician or optometrist to ascertain whether the person has a progressive eye disease.

- b. The Division shall not license a person using a bioptic telescopic lens system unless the person submits to the Division a written statement from a physician or an optometrist that the individual meets the visual acuity standard as prescribed in subsection (B).
- c. The Division shall not license a person using a bioptic telescopic lens system with magnification of the lens that is more than 4X.
- 3. The Division shall conduct visual acuity screening through the use of visual screening equipment or the Snellen Chart to determine whether a person's corrected vision is 20/40 in at least one eye.
- E. Reporting requirements.
  - 1. A person choosing to have initial visual acuity and visual field screening done by a physician or an optometrist shall submit the results to the Division.
  - 2. If the Division does initial visual acuity and visual field screening and the person does not meet vision standards of subsection (B), the Division shall require the person to submit the results of the person's visual acuity and vision field screening by a physician or an optometrist.
  - 3. The Division shall require a person diagnosed with any of the following conditions to file the results of the person's visual acuity and visual field screening completed by the physician or optometrist:
    - a. Any progressive eye disease,
    - b. Diplopia, or
    - c. Impaired night vision.
- F. Results of visual acuity and visual field screening shall contain the following.
  - 1. An examination date no more than three months before the submission date to the Division;
  - 2. Visual acuity and field of vision;
  - 3. If applicable, specification that the person is monocular;
  - 4. If applicable, diagnosis of any condition described in subsection (E)(3);
  - 5. Any recommendations on frequency of reporting requirements for the person, in addition to those required by the Division;
  - 6. Suggested restrictions on driving, in addition to those required by the Division; and
  - 7. Any recommendations on the person's ability to safely operate a motor vehicle.
- G. The Division shall require a driving test if a person's eye disease is determined by a physician or optometrist to be progressive.

**Historical Note**

New Section recodified from R17-4-521 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 12 A.A.R. 221, effective January 10, 2006 (Supp. 06-1).

**R17-4-504. Medical Alert Conditions**

- A. Definition. In this Section, "license" means any class driver license, commercial driver license, non-operating identification license, or instruction permit.
- B. Medical alert condition displayed on license. The Division will provide on each license a space to indicate a medical alert condition. A list of recognized medical alert conditions is available at all Motor Vehicle Division Customer Service offices and Authorized Third Party Driver License offices.

- C. Retention of medical alert condition authorization. The Division will not maintain the medical alert code on the Division computer record unless written authorization is submitted.
- D. A person shall submit a signed statement, from a physician or registered nurse practitioner, stating that the person is diagnosed with a medical condition. The signed statement is required every time the person requests a license unless the person authorizes the Division to maintain the medical code in the Division computer.

**Historical Note**

Adopted effective September 25, 1991 (Supp. 91-3). Section repealed by final rulemaking at 7 A.A.R. 3831, effective August 10, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 1127, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 227, effective March 8, 2008 (Supp. 08-1).

**R17-4-505. Repealed****Historical Note**

Adopted effective May 2, 1990 (Supp. 90-2). Section repealed by final rulemaking at 7 A.A.R. 3831, effective August 10, 2001 (Supp. 01-3).

**R17-4-506. Neurological Standards**

- A. Driver license application.
  - 1. A person who has a seizure in the three months before applying for a driver license shall undergo a medical examination as provided in R17-4-502.
  - 2. After the medical examination under R17-4-502, the person or the person's physician shall submit the medical examination report to the Division.
  - 3. The Division shall not issue a driver license to a person if the medical examination report shows that the person has a neurological disorder that affects the person's ability to operate a motor vehicle safely.
- B. Driver license revocation.
  - 1. A person with a driver license or non-resident driving privileges who experiences a seizure shall cease driving and:
    - a. Undergo a medical examination as provided in R17-4-502;
    - b. Submit the medical examination report to the Division; and
    - c. Undergo a follow-up medical examination within one year after the seizure or within a shorter time, as recommended by a physician.
  - 2. After each medical examination, the person or the person's physician shall submit the applicable medical examination report to the Division.
  - 3. The Division shall revoke a person's driver license or nonresident driver privileges if any medical examination report shows the person has a neurological disorder that affects the person's ability to operate a motor vehicle safely.
- C. Medical examination report. A medical examination report under this Section shall include the following information:
  - 1. Age at onset of seizures, diagnosis, and history;
  - 2. Aftereffects of seizures;
  - 3. EEG findings, if any;
  - 4. Description, cause, frequency, duration, and date of most recent seizure;
  - 5. Current medications, including dosage, side effects, and serum level; and
  - 6. A physician's medical opinion as to whether the neurological disorder will affect the person's ability to operate a motor vehicle safely.

## Department of Transportation – Title, Registration, and Driver Licenses

**D.** Physician's medical opinion. A neurological disorder does not affect a person's ability to operate a motor vehicle safely if a physician concludes with reasonable medical certainty that:

1. Any seizure that occurred within the last three months was due to a change in anticonvulsant medication ordered by a physician and that seizures are under control after the change in medication;
2. Any seizure that occurred within the last three months was a single event that will not recur in the future;
3. Any seizure is likely to occur but has an established pattern of occurring only during sleep; or
4. There is an established pattern of an aura of sufficient duration to allow the person to cease operating a motor vehicle immediately at the onset of the aura.

**Historical Note**

Former Rule, General Order 107; Amended effective April 28, 1981 (Supp. 81-2). Amended effective July 1, 1985 (Supp. 85-4). Former Section R17-4-46 renumbered without change as Section R17-4-506 (Supp. 87-2).

Emergency amendment adopted effective December 31, 1998, pursuant to A.R.S. § 28-366, for a maximum of 180 days (Supp. 98-4). Emergency amendment expired June 29, 1999 pursuant to A.R.S. § 41-1026(C) (Supp. 99-3).

Emergency amendment adopted effective October 1, 1999, pursuant to A.R.S. § 28-366, for a maximum of 180 days (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 1172, effective March 9, 2000 (Supp. 00-1).

Amended by final rulemaking at 7 A.A.R. 3221, effective July 12, 2001 (Supp. 01-3). Section recodified to R17-4-404 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-522 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 7 A.A.R. 5440, effective November 14, 2001 (Supp. 01-4). Amended by final rulemaking at 8 A.A.R. 5223, effective December 5, 2002 (Supp. 02-4).

**R17-4-507. Driver License Identification Number**

- A.** The Division shall assign an identification number to each person who receives a driver license, nonoperating identification license, or instruction permit. The Division shall place a person's identification number on the person's license, nonoperating identification, or instruction permit.
- B.** The Division shall not use a person's Social Security Number as the person's identification number unless:
1. The person's current driver license or nonoperating identification license has a Social Security Number as the identification number, or
  2. The person requests that the person's Social Security Number be used as the identification number.

**Historical Note**

Adopted effective July 24, 1985 (Supp. 85-4). Amended effective March 13, 1986 (Supp. 86-2). Former Section R17-4-50 renumbered without change as Section R17-4-507 (Supp. 87-2). Amended by final rulemaking at 7 A.A.R. 4355, effective September 14, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 5223, effective December 5, 2002 (Supp. 02-4).

**R17-4-508. Commercial Driver License Physical Qualifications****A. Requirements.**

1. A Commercial Driver License applicant shall submit to the Division a U.S. Department of Transportation medical examination form completed as prescribed under 49 CFR 391.43:

- a. Except as provided in subsection (A)(1)(c) of this Section, by a professional licensed to practice by the federal government, any state, or U.S. territory with one of the following credentials:
  - i. Medical Doctor,
  - ii. Doctor of Osteopathy,
  - iii. Doctor of Chiropractic,
  - iv. Nurse Practitioner, or
  - v. Physician Assistant, and
- b. Upon the applicant's initial application and at the time of each 24-month renewal.
- c. An optometrist, licensed to practice by the federal government, any state, or U.S. territory, may perform the medical examination as it pertains to visual acuity, field of vision, and the ability to recognize colors as specified in 49 CFR 391.43(b)(10).

2. As prescribed under 49 CFR 391.41(a), a licensee who possesses a Commercial Driver License shall keep an original or photographic copy of the licensee's current medical examination form required under subsection (A)(1) available for law enforcement inspection upon request.

3. A licensee who possesses a Commercial Driver License shall notify the Division of a physical condition that develops or worsens causing noncompliance with the Commercial Driver License physical qualifications as soon as the licensee's medical condition allows.

**B.** Commercial Driver License suspension and revocation notification procedure. To notify a licensee of any Commercial Driver License suspension and revocation under subsection (C), the Division shall simultaneously mail two notices within 15 days after a medical examination form's due or actual submission date to the licensee's address of record that:

1. Suspends the licensee's Commercial Driver License beginning on the notice's date; and
2. Revokes the licensee's Commercial Driver License 15 days after the date of the suspension notice issued under subsection (B)(1).

**C.** Noncompliance actions.

1. Initial application denial. If an applicant's initial medical examination form required under subsection (A)(1) shows that the applicant does not comply with the Commercial Driver License physical qualifications, the Division shall immediately mail the Commercial Driver License denial notification to the applicant's address of record.
2. Twenty-four month renewal suspension and revocation. If a renewing Commercial Driver licensee submits:
  - a. No medical examination form required under subsection (A)(1) or a form indicating noncompliance with Commercial Driver License physical qualifications, the Division shall follow the suspension and revocation notification procedure prescribed under subsection (B).
  - b. An incomplete medical examination form required under subsection (A)(1), the Division shall immediately return the incomplete form with a letter requesting that the licensee provide missing information to the Division within 45 days after the date of the Division's letter. The Division shall follow the suspension and revocation notification procedure prescribed under subsection (B) if the licensee fails to return requested information in the time-frame prescribed in this subsection.
  - c. A medical examination form required under subsection (A)(1) that indicates the licensee's blood pres-

## Department of Transportation – Title, Registration, and Driver Licenses

sure is greater than 140 systolic or 90 diastolic, the Division shall mail notice to the licensee requiring three additional blood pressure evaluations:

- i. Made on three different days,
  - ii. Performed by a qualified professional as prescribed under subsection (A)(1)(a), and
  - iii. Returned to the Division within 90 days after the Division's written notification. The Division shall follow the suspension and revocation notification procedure prescribed under subsection (B) if the licensee fails to return requested information prescribed under this subsection.
- d. A medical examination form required under subsection (A)(1) that indicates the licensee's blood pressure is greater than 180 systolic or 110 diastolic, the Division shall follow the suspension and revocation notification procedure prescribed under subsection (B).

- D. A Commercial Driver License that remains revoked for longer than 12 months expires. The holder of an expired Commercial Driver License may obtain a new Commercial Driver License by successfully completing all Commercial Driver License original-application written, vision, and demonstration-skill testing and submitting the medical examination form prescribed under subsection (A)(1).
- E. Administrative hearing. A person who is denied a Commercial Driver License or whose Commercial Driver License is suspended or revoked under this Section may request a hearing according to the procedure prescribed under 17 A.A.C. 1, Article 5. The hearing is held in accordance with the procedures prescribed under A.A.C. R17-1-501 through R17-1-511 and R17-1-513.

**Historical Note**

Adopted effective October 31, 1975 (Supp. 75-1). Former Section R17-4-57 renumbered without change as Section R17-4-508 (Supp. 87-2). Emergency amendments adopted effective July 30, 1993, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 93-3). Emergency amendments permanently adopted effective October 27, 1993 (Supp. 93-4). Section recodified to R17-4-409 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-802 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-1). Amended by final rulemaking at 10 A.A.R. 2829, effective August 7, 2004 (Supp. 04-2). Amended by final rulemaking at 13 A.A.R. 1127, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 14 A.A.R. 395, effective March 8, 2008 (Supp. 08-1).

**R17-4-509. Repealed****Historical Note**

Adopted effective February 14, 1984 (Supp. 84-1). Former Section R17-4-56 renumbered without change as Section R17-4-509 (Supp. 87-2). Repealed effective December 17, 1993 (Supp. 93-4).

**R17-4-510. Motorcycle noise level limits**

- A. No person shall operate any motorcycle on the streets or highways of the state of Arizona at any time or under any condition of grade, load, acceleration or deceleration in such a manner as to exceed the following noise limits. For the purpose of this

Section, "dBA" shall mean "A" weighted decibel, a sound level measurement unit.

Model year of motorcycle	Speed limit of 35 m.p.h. or less	Speed limit of more than 35 m.p.h. and less than or equal to 45 m.p.h.	Speed limit of more than 45 m.p.h.
Before 1972	84 dBA	88 dBA	88 dBA
1972-1980	79 dBA	82 dBA	86 dBA
After 1980	76 dBA	80 dBA	83 dBA

- B. The noise limits established by this Section shall be based on measurements taken at a distance of 50 feet from the center of the lane of travel within the specified speed limit. Noise measurements can be made at distances other than 50 feet from the center of the lane of travel. In such cases, the measurement shall be corrected to what it would be at the standard distance of 50 feet, for comparison with the standard.
- C. For speed zones of 35 miles per hour or less, notwithstanding the provisions stated above, measurement shall not be made within 200 feet of any intersection controlled by an official traffic device or within 20 feet of the beginning or end of any grade in excess of plus or minus 1%. Measurements shall be made when it is reasonable to assume that the vehicle flow is at a constant rate of speed and measurement shall not be made under congested traffic conditions which require notice able acceleration or deceleration.

**Historical Note**

Adopted effective October 17, 1986 (Supp. 86-5). Former Section R17-4-76 renumbered without change as Section R17-4-510 (Supp. 87-2). Section recodified to R17-4-406 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section recodified from R17-4-705 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-511. Repealed****Historical Note**

Adopted effective April 21, 1980 (Supp. 80-2). Former Section R17-4-62 renumbered without change as Section R17-4-511 (Supp. 87-2). Section repealed by final rulemaking at 7 A.A.R. 3831, effective August 10, 2001 (Supp. 01-3).

**R17-4-512. Child-restraint Systems in Motor Vehicles**

The Motor Vehicle Division incorporates 49 CFR 571.213, Federal Motor Vehicle Safety Standard number 213 of the October 1, 2003, edition and no later amendments or editions. The incorporated material is available from the U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington, D.C. 20402-0001, and is on file with the Division.

**Historical Note**

Former Rule, General Order 92. Former Section R17-4-37 renumbered without change as Section R17-4-512 (Supp. 87-2). Section recodified to R17-5-302 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). New Section R17-4-512 recodified from R17-4-704 at 7 A.A.R. 4157, effective September 7, 2001 (Supp. 01-3). Amended by final rulemaking at 14 A.A.R. 397, effective March 8, 2008 (Supp. 08-1).

**R17-4-513. Emergency Expired****Historical Note**

Emergency rule adopted effective January 4, 1990, pursuant to

ant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-1). Emergency expired. Emergency rule re-adopted effective May 2, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-2). Emergency expired.

**R17-4-514. Emergency Expired**

**Historical Note**

Emergency rule adopted effective January 4, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-1). Emergency expired. Emergency rule re-adopted effective April 25, 1990, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 90-2). Emergency expired.

Emergency amendments re-adopted with changes effective November 14, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired. Repealed by summary rulemaking with an interim effective date of March 8, 1996; filed in the Office of the Secretary of State February 16, 1996 (Supp. 96-1).

**R17-4-608. Expired**

**Historical Note**

Adopted effective August 18, 1983 (Supp. 83-4). Former Section R17-4-504 renumbered without change as Section R17-4-608 (Supp. 87-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2855, effective June 28, 2013 (Supp. 13-3).

**R17-4-609. Expired**

**Historical Note**

Adopted effective March 7, 1983, to apply to chassis and bodies placed in production after May 1, 1983 (Supp. 83-2). Former Section R17-4-502 renumbered without change as Section R17-4-609 (Supp. 87-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2855, effective June 28, 2013 (Supp. 13-3).

**R17-4-610. Expired**

**Historical Note**

Adopted effective February 11, 1983 (Supp. 83-1). Former Section R17-4-503 renumbered without change as Section R17-4-610 (Supp. 87-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2855, effective June 28, 2013 (Supp. 13-3).

**R17-4-611. Expired**

**Historical Note**

Adopted effective August 24, 1983 (Supp. 83-4). Former Section R17-4-506 renumbered without change as Section R17-4-611 (Supp. 87-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2855, effective June 28, 2013 (Supp. 13-3).

**R17-4-612. Expired**

**Historical Note**

Adopted effective August 18, 1983 (Supp. 83-4). Former Section R17-4-505 renumbered without change as Section R17-4-612 (Supp. 87-2). R17-4-612 amended by summary action; Appendices A and B repealed by summary action with an interim effective date March 8, 1996; filed in the Office of the Secretary of State February 16, 1996 (Supp. 96-1). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2855, effective June 28, 2013 (Supp. 13-3).

**ARTICLE 7. HAZARDOUS MATERIALS ENDORSEMENT****R17-4-701. Definitions**

In addition to the definitions contained in 49 CFR 1572.3, the following words and phrases apply to this Article:

1. “Applicant” means an individual who applies to obtain an original or renewal HME.
2. “CDL” means Commercial Driver License.
3. “HME” means Hazardous Materials Endorsement.
4. “Transfer applicant” means an individual with an existing HME issued by another state, applying to the state of Arizona for an HME.
5. “TSA” means the U.S. Transportation Security Administration.
6. “Security Threat Assessment” means a check by TSA that includes a fingerprint-based criminal history records check, an intelligence-related background check, and final disposition.

**Historical Note**

Adopted effective February 1, 1994 (Supp. 94-1). Section recodified to R17-4-309 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1). Amended by final rulemaking at 13 A.A.R. 3368, effective November 10, 2007 (Supp. 07-3).

**Appendix A. Recodified****Historical Note**

Adopted effective February 1, 1994 (Supp. 94-1). Appendix recodified to 17 A.A.C. 4, Article 3 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-702. Scope**

This Article applies to commercial drivers who are applying for an original HME or to renew or transfer an existing HME, in accordance with 49 CFR Part 1572 (November 24, 2004) incorporated by reference, on file with the Arizona Department of Transportation and available from the U.S. Government Printing Office’s web page at [www.gpo.gov](http://www.gpo.gov). This incorporation by reference contains no future additions or amendments.

**Historical Note**

Adopted effective November 15, 1989 (Supp. 89-4). Amended effective October 11, 1995 (Supp. 95-4). Section recodified to R17-1-202 at 7 A.A.R. 3477, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1). Amended by final rulemaking at 13 A.A.R. 3368, effective November 10, 2007 (Supp. 07-3).

**R17-4-703. Expired****Historical Note**

New Section made by exempt rulemaking at 7 A.A.R. 2518, effective May 25, 2001 (Supp. 01-2). Section recodified to R17-1-204 at 7 A.A.R. 3477, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 34, effective June 30, 2016 (Supp. 16-4).

**R17-4-704. Requirements for an HME**

To receive an HME an applicant shall:

1. Possess a valid Arizona CDL,
2. Be at least 21 years of age,
3. Successfully complete all required testing under R17-4-705,
4. Pay all applicable fees under R17-4-706,

5. Make application to TSA for a Security Threat Assessment, and
6. Receive a Determination of No Security Threat from TSA.

**Historical Note**

Adopted effective October 6, 1983 (Supp. 83-5). Former Section R17-4-49 renumbered without change as Section R17-4-704 (Supp. 87-2). Amended by final rulemaking at 7 A.A.R. 3834, effective August 10, 2001 (Supp. 01-3). Section recodified to R17-4-512 at 7 A.A.R. 4157, effective September 7, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-705. Required Testing**

- A. Original and renewal applicants shall successfully complete the testing requirements under A.R.S. § 28-3223.
- B. A transfer applicant with an existing HME shall be required to comply with HME knowledge test requirements under A.R.S. § 28-3223, and pay applicable fee under R17-4-706.

**Historical Note**

Adopted effective August 2, 1978 (Supp. 78-4). Former Section R17-4-61 renumbered without change as Section R17-4-705 (Supp. 87-2). Section recodified to R17-4-510 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1). Amended by final rulemaking at 13 A.A.R. 3368, effective November 10, 2007 (Supp. 07-3).

**R17-4-706. Fees**

All applicable fees shall be paid as prescribed by:

1. TSA for a Security Threat Assessment, and
2. A.R.S. § 28-3002.

**Historical Note**

Former Rule, General Order 96. Former Section R17-4-39 renumbered without change as Section R17-4-706 (Supp. 87-2). Section recodified to R17-4-407 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-707. 60-Day Notice to Apply**

- A. The Division shall notify an existing HME holder 60 days prior to expiration of a Security Threat Assessment that a new Security Threat Assessment shall be successfully passed to retain the HME.
- B. Upon expiration of the Division’s 60 Day Notice to Apply, the Division shall cancel the Arizona Driver License privileges of an applicant who fails to apply for a Security Threat Assessment and fails to remove the HME.

**Historical Note**

Adopted as an emergency effective April 24, 1985, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 85-2). Emergency expired. Former Section R17-4-66 renumbered and reserved as R17-4-707 (Supp. 87-2). New Section R17-4-66 adopted and renumbered as Section R17-4-707 effective August 11, 1987 (Supp. 87-3). Amended by final rulemaking at 6 A.A.R. 4668, November 14, 2000 (Supp. 00-4). Section recodified to R17-1-203 at 7 A.A.R. 3477, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-708. Security Threat Assessment**

- A. An applicant for an HME shall successfully pass a Security Threat Assessment every five years.
- B. An applicant subject to any of the following actions, as defined under A.R.S. § 28-3001, shall obtain a new Security Threat Assessment and HME:
1. Cancellation,
  2. Suspension for a period of one year or more,
  3. Expiration for a period of one year or more, and
  4. Revocation for a period of one year or more.

**Historical Note**

Adopted effective January 13, 1993 (Supp. 93-1). Section recodified to R17-4-310 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-709. Determination of Security Threat**

Upon notification by TSA that an applicant has failed to successfully pass the Security Threat Assessment:

1. For an original applicant:
  - a. The Division will deny the request for an HME; and
  - b. If otherwise qualified, the applicant may apply for a CDL without an HME.
2. For a renewal applicant:
  - a. The Division shall immediately cancel the HME.
  - b. The Division will notify an HME applicant with a Notice of Action that the applicant has 15 days from the notice date to have the HME removed.
  - c. The applicant shall visit a designated CDL office for removal of the HME.
  - d. If the applicant fails to comply with the Division's Notice of Action, the Division shall cancel the applicant's Arizona Driver License privilege.
  - e. Upon removal of an HME by the Division under this Section, an applicant, if otherwise qualified, may continue to hold a CDL.

**Historical Note**

Adopted by an emergency action effective December 1, 1998, pursuant to A.R.S. § 41-1026, effective for a maximum of 180 days (Supp. 98-4). Emergency expired May 29, 1999; Section renewed and amended by emergency rulemaking, pursuant to A.R.S. § 41-1026, at 5 A.A.R. 2433, effective July 7, 1999 for a maximum of 180 days (Supp. 99-3). Emergency Section expired January 3, 2000, pursuant to A.R.S. § 1026(C); new Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Amended by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Section recodified to R17-5-601 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-709.01. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-602 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.02. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-603 at 7 A.A.R. 3483, effective July

20, 2001 (Supp. 01-3).

**R17-4-709.03. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-604 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.04. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Amended by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Section recodified to R17-5-605 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.05. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-606 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.06. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-607 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**Appendix A. Recodified****Historical Note**

Appendix A adopted by an emergency action effective December 1, 1998, pursuant to A.R.S. § 41-1026, effective for a maximum of 180 days (Supp. 98-4). Emergency expired May 29, 1999; Appendix A renewed and amended by emergency rulemaking, pursuant to A.R.S. § 41-1026, at 5 A.A.R. 2433, effective July 7, 1999 for a maximum of 180 days (Supp. 99-3). Emergency Appendix A expired January 3, 2000, pursuant to A.R.S. § 1026(C); new Appendix A adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Amended by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Appendix recodified to 17 A.A.C. 5, Article 6 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**Appendix B. Recodified****Historical Note**

Appendix B adopted by an emergency action effective December 1, 1998, pursuant to A.R.S. § 41-1026, effective for a maximum of 180 days (Supp. 98-4). Emergency expired May 29, 1999; Appendix B renewed and amended by emergency rulemaking, pursuant to A.R.S. § 41-1026, at 5 A.A.R. 2433, effective July 7, 1999 for a maximum of 180 days (Supp. 99-3). Emergency Appendix B expired January 3, 2000, pursuant to A.R.S. § 1026(C); new Appendix B adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Appendix recodified to 17 A.A.C. 5, Article 6 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**Appendix C. Recodified****Historical Note**

Appendix C adopted by an emergency action effective

## Department of Transportation – Title, Registration, and Driver Licenses

December 1, 1998, pursuant to A.R.S. § 41-1026, effective for a maximum of 180 days (Supp. 98-4). Emergency expired May 29, 1999; Appendix C renewed by emergency rulemaking, pursuant to A.R.S. § 41-1026, at 5 A.A.R. 2433, effective July 7, 1999 for a maximum of 180 days (Supp. 99-3). Emergency Appendix C expired January 3, 2000, pursuant to A.R.S. § 1026(C); new Appendix C adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Appendix recodified to 17 A.A.C. 5, Article 6 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.07. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Amended by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Section recodified to R17-5-608 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.08. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 549, effective January 11, 2000 (Supp. 00-1). Section recodified to R17-5-609 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.09. Recodified****Historical Note**

New Section adopted by final rulemaking at 6 A.A.R. 654, effective January 11, 2000 (Supp. 00-1). Amended by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Section recodified to R17-5-610 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**Exhibit A. Recodified****Historical Note**

New Form adopted by final rulemaking at 6 A.A.R. 654, effective January 11, 2000 (Supp. 00-1). Heading “Form A” changed to “Exhibit A” to conform with R1-1-412 (Supp. 00-3). Exhibit recodified to 17 A.A.C. 5, Article 6 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**Exhibit B. Recodified****Historical Note**

New Exhibit adopted by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Exhibit recodified to 17 A.A.C. 5, Article 6 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

**R17-4-709.10. Recodified****Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 59, effective December 7, 2000 (Supp. 00-4). Section recodified to R17-4-408 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3).

**R17-4-710. Requests for Administrative Hearing**

- A.** The Division shall not accept a request for hearing for failure to qualify for an HME. In the event an applicant has failed to successfully complete the Security Threat Assessment, the applicant shall make appeal directly through TSA.
- B.** An applicant whose Arizona driving privileges have been canceled under R17-4-707 or R17-4-709 may request an administrative hearing under 17 A.A.C. 1, Article 5.

**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 2928, effective August 5, 1999 (Supp. 99-3). Section recodified to R17-1-101 at 7 A.A.R. 919, effective January 24, 2001 (Supp. 01-1). New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1).

**R17-4-711. Expired****Historical Note**

New Section made by final rulemaking at 13 A.A.R. 684, effective April 9, 2007 (Supp. 07-1). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 34, effective June 30, 2016 (Supp. 16-4).

**R17-4-712. Transfer Applicant**

- A.** Applicability. A transfer applicant shall comply with the provisions of this Article except otherwise required by this Section.
- B.** Existing TSA approval.
  - 1. Upon application by a transfer applicant who has an existing HME and who has successfully passed a STA prior to application in Arizona, the Division shall:
    - a. Issue a five-year Arizona CDL with an HME;
    - b. Validate the CDL with an HME upon verification of TSA approval, and the transfer applicant shall not be required to return to a designated CDL office unless otherwise required; and
    - c. Consider an applicant who has been subject to any action under R17-4-708(B) an original applicant and shall require applicant to undergo a new STA and testing requirements under R17-4-705.
  - 2. The Division shall not require that a transfer applicant who has received STA approval undergo an additional STA prior to expiration of existing TSA approval, unless required under federal or state law or these rules,
  - 3. If the Division is unsuccessful in verifying successful completion of STA, the Division shall immediately cancel the HME, and require that the applicant return to designated CDL office to have HME removed from license.
  - 4. The Division shall mail to the transfer applicant a Notice of Action that the applicant has 15 days from the notice date to visit a designated CDL office to have the HME removed.
- C.** No existing TSA approval.
  - 1. Upon application by a transfer applicant with an existing HME, who has not undergone a STA prior to application in Arizona, the Division shall:
    - a. Require that the transfer applicant successfully undergo a STA; and
    - b. Upon verification of successful completion of STA, issue an Arizona CDL with an HME.
  - 2. If a transfer applicant fails to successfully complete a STA or the Division is unsuccessful in verifying successful completion of STA, the Division shall deny the application for HME.
  - 3. If the applicant fails to comply with the Division’s Notice of Action, the Division shall cancel the applicant’s Arizona Driver License privilege.
- D.** CDL eligibility. The Division may grant an application for a CDL, if an applicant is otherwise qualified to hold CDL.

**Historical Note**

New Section made by final rulemaking at 13 A.A.R. 3368, effective November 10, 2007 (Supp. 07-3).

**Table A. Recodified****Historical Note**

Table A adopted by final rulemaking at 5 A.A.R. 2928, effective August 5, 1999 (Supp. 99-3). Table recodified to 17 A.A.C. 1, Article 1 at 7 A.A.R. 919, effective January 24, 2001 (Supp. 01-1).

**ARTICLE 8. MOTOR VEHICLE RECORDS****R17-4-801. Definitions**

In addition to the definitions under A.R.S. §§ 28-101 and 28-440, the following definitions apply to this Article, unless otherwise specified:

“Certified record” means a copy of a document designated as a true copy by the agency officer entrusted with custody of the original to be used for purposes prescribed under A.R.S. § 28-442.

“Customer number” means the system-generated, or other distinguishing number, assigned by the Division to each person conducting business with the Division.

“Director” means the Arizona Department of Transportation’s Motor Vehicle Division Director or the Director’s designee.

“Division” means the Arizona Department of Transportation’s Motor Vehicle Division.

“Driver license number” means the system-generated, or other distinguishing number, assigned by the Division to a person for a driver license, identification card, or instruction permit record.

“Driver record” means a motor vehicle record more specifically defined to include any data that pertains to a driver license, identification card, instruction permit, or driver related activities.

“Requester” means the person, as defined under A.R.S. § 41-1001, requesting a motor vehicle record.

“Special MVR” means a motor vehicle record that is comprised of the least possible subset of information necessary to respond to the type of request received.

“Title and registration record” means a motor vehicle record more specifically defined to include any data that pertains to a vehicle title or registration record.

**Historical Note**

Adopted effective June 29, 1990 (Supp. 90-2). Section recodified to R17-5-701 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 4376, effective February 2, 2008 (Supp. 07-4).

**R17-4-802. Motor Vehicle Record Request**

- A.** Identification requirements. The requester of a motor vehicle record shall present valid photo identification at the time a motor vehicle record request is made.
- B.** Charges and exemptions. The requester of a motor vehicle record shall pay the appropriate motor vehicle record copy charge under A.A.C. R17-1-202, unless exempt under A.R.S. § 28-446.
- C.** Motor vehicle record types. Under this Article, the Division may release any of the following motor vehicle record types:
  1. Title and Registration record, uncertified;
  2. Title and Registration record, certified;
  3. Driver 39-month record, uncertified;
  4. Driver five-year record, certified;
  5. Driver history record, certified; and
  6. Special MVR, uncertified.
- D.** Permissible use record request. A requester who has a permissible use under A.R.S. § 28-455 shall provide at least one of

the items of information listed in this subsection when requesting a motor vehicle record.

1. For a title and registration motor vehicle record:
  - a. Vehicle identification number,
  - b. License plate number, or
  - c. Vehicle owner’s full name.
2. For a driver motor vehicle record:
  - a. The name of the person whose record is requested,
  - b. Driver license number, or
  - c. Customer number.
- E.** Non-permissible use record request. A requester who does not have a permissible use under A.R.S. § 28-455, but who presents either a notarized Consent To Release Motor Vehicle Record - General form #96-0276 or a Consent To Release Motor Vehicle Record - One-Time form #96-0463 from the person whose motor vehicle record is requested shall provide the items of information listed in this subsection when requesting a motor vehicle record. The Consent To Release Motor Vehicle Record forms are available at all Customer Service and Third Party Provider offices and online at <http://mvd.azdot.gov/mvd/FormsandPub/mvd.asp>.
  1. For a title and registration motor vehicle record:
    - a. The vehicle identification number and license plate number, and
    - b. The vehicle owner’s full name, or
    - c. The vehicle owner’s residence address.
  2. For a driver motor vehicle record:
    - a. The name and driver license number or customer number of the person whose record is requested, and
    - b. The person’s date of birth, or
    - c. The person’s address, or
    - d. The person’s Arizona driver license expiration date.
- F.** General consent to release information. The Division shall record a person’s general consent to release information on the person’s driver and title and registration records.
  1. The general consent to release information is valid until revoked, in writing, by the person.
  2. A person may submit the written notice of revocation:
    - a. In person, at a Customer Service office or Authorized Third Party Provider; or
    - b. By mail, at Motor Vehicle Division, 1801 W. Jefferson St., P.O. Box 2100, Phoenix, Arizona 85007-2100.
- G.** Insurance companies requesting a driver or title and registration record. The Division shall not release to an insurer, broker, managing general agent, authorized agent or insurance producer any information in a person’s driving record pertaining to a traffic violation that occurred 40 months or more before the date of a request for the release of the information.

**Historical Note**

Adopted effective August 16, 1991 (Supp. 91-3). Section repealed, new Section adopted effective April 19, 1994 (Supp. 94-2). Section recodified to R17-4-508 at 7 A.A.R. 3479, effective July 20, 2001 (Supp. 01-3). New Section made by final rulemaking at 13 A.A.R. 4376, effective February 2, 2008 (Supp. 07-4).

**R17-4-803. Reserved****R17-4-804. Repealed****Historical Note**

Adopted effective June 29, 1990 (Supp. 90-2). Repealed effective November 21, 1995 (Supp. 95-4).

## Department of Transportation – Title, Registration, and Driver Licenses

**R17-4-805. Recodified****Historical Note**

Adopted effective June 29, 1990 (Supp. 90-2). Section recodified to R17-5-702 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

## **Replacement Check List**

For rules filed within the

4th Quarter

October 1 – December 31, 2016

# **THE ARIZONA ADMINISTRATIVE CODE**

Within the stated calendar quarter, this Chapter contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law.

These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information.

Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
PUBLIC SERVICES DIVISION  
December 31, 2016

---

### RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

### ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2016 is cited as Supp. 16-1.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

### ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

### HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, [www.azsos.gov/services/legislative-filings](http://www.azsos.gov/services/legislative-filings).

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.*

**TITLE 18. ENVIRONMENTAL QUALITY****CHAPTER 2. DEPARTMENT OF ENVIRONMENTAL QUALITY - AIR POLLUTION CONTROL****ARTICLE 1. GENERAL**

*Article 1 consisting of Section R9-3-101 renumbered as Article 1, Section R18-2-101 (Supp. 87-3).*

## Section

R18-2-101.	Definitions .....	7
R18-2-102.	Incorporated Materials .....	19
R18-2-103.	Applicable Implementation Plan; Savings .....	19

**ARTICLE 2. AMBIENT AIR QUALITY STANDARDS; AREA DESIGNATIONS; CLASSIFICATIONS**

*Article 2, consisting of Sections R18-2-201 through R18-2-290, adopted effective August 8, 1991 (Supp. 91-3).*

*Article 2, consisting of Sections R18-2-201 through R18-2-220, repealed effective August 8, 1991 (Supp. 91-3).*

*Article 2 consisting of Sections R9-3-201, R9-3-202, R9-3-204 through R9-3-207, and R9-3-215 through R9-3-219 renumbered as Article 2, Sections R18-2-201, R18-2-202, R18-2-204 through R18-2-207, and R18-2-215 through R18-2-219 (Supp. 87-3).*

**ARTICLE 1. GENERAL****R18-2-101. Definitions**

The following definitions apply to this Chapter. Where the same term is defined in this Section and in the definitions Section for an Article of this Chapter, the Article-specific definition shall apply.

1. “Act” means the Clean Air Act of 1963 (P.L. 88-206; 42 U.S.C. 7401 through 7671q) as amended through December 31, 2011 (and no future editions).
2. “Actual emissions” means the actual rate of emissions of a regulated NSR pollutant from an emissions unit, as determined in subsections (2)(a) through (e).
  - a. In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a consecutive 24-month period that precedes the particular date and that is representative of normal source operation. The Director may allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit’s actual operating hours, production rates, and types of materials processed, stored or combusted during the selected time period.
  - b. The Director may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.
  - c. For any emissions unit at a Class I source that has not begun normal operations on the particular date, actual emissions shall equal the unit’s potential to emit on that date.
  - d. For any emissions unit at a Class II source that has not begun normal operations on the particular date, actual emissions shall be based on applicable control equipment requirements and projected conditions of operation.
  - e. This definition shall not apply for calculating whether a significant emissions increase has occurred, or for establishing a PAL. Instead, the definitions of projected actual emissions and baseline actual emissions in R18-2-401 shall apply for those purposes.
3. “Administrator” means the Administrator of the United States Environmental Protection Agency.
4. “Affected facility” means, with reference to a stationary source, any apparatus to which a standard is applicable.
5. “Affected source” means a source that includes one or more units which are subject to emission reduction requirements or limitations under Title IV of the Act.
6. “Affected state” means any state whose air quality may be affected by a source applying for a permit, permit revision, or permit renewal and that is contiguous to Arizona or that is within 50 miles of the permitted source.
7. “Afterburner” means an incinerator installed in the secondary combustion chamber or stack for the purpose of incinerating smoke, fumes, gases, unburned carbon, and other combustible material not consumed during primary combustion.
8. “Air contaminants” means smoke, vapors, charred paper, dust, soot, grime, carbon, fumes, gases, sulfuric acid mist aerosols, aerosol droplets, odors, particulate matter, wind-borne matter, radioactive materials, or noxious chemicals, or any other material in the outdoor atmosphere.
9. “Air curtain destructor” means an incineration device designed and used to secure, by means of a fan-generated air curtain, controlled combustion of only wood waste and slash materials in an earthen trench or refractory-lined pit or bin.
10. “Air pollution” means the presence in the outdoor atmosphere of one or more air contaminants or combinations thereof in sufficient quantities, which either alone or in connection with other substances by reason of their concentration and duration are or tend to be injurious to human, plant or animal life, or cause damage to property, or unreasonably interfere with the comfortable enjoyment of life or property of a substantial part of a community, or obscure visibility, or which in any way degrade the quality of the ambient air below the standards established by the director. A.R.S. § 49-421(2).
11. “Air pollution control equipment” means equipment used to eliminate, reduce or control the emission of air pollutants into the ambient air.
12. “Air quality control region” (AQCR) means an area so designated by the Administrator pursuant to Section 107 of the Act and includes the following regions in Arizona:
  - a. Maricopa Intrastate Air Quality Control Region which is comprised of the County of Maricopa.
  - b. Pima Intrastate Air Quality Control Region which is comprised of the County of Pima.
  - c. Northern Arizona Intrastate Air Quality Control Region which encompasses the counties of Apache, Coconino, Navajo, and Yavapai.
  - d. Mohave-Yuma Intrastate Air Quality Control Region which encompasses the counties of La Paz, Mohave, and Yuma.
  - e. Central Arizona Intrastate Air Quality Control Region which encompasses the counties of Gila and Pinal.
  - f. Southeast Arizona Intrastate Air Quality Control Region which encompasses the counties of Cochise, Graham, Greenlee, and Santa Cruz.
13. “Allowable emissions” means the emission rate of a stationary source calculated using both the maximum rated capacity of the source, unless the source is subject to federally enforceable limits which restrict the operating rate or hours of operation, and the most stringent of the following:
  - a. The applicable standards as set forth in 40 CFR 60, 61 or 63;
  - b. The applicable existing source performance standard, as approved for the SIP and contained in Article 7 of this Chapter; or,
  - c. The emissions rate specified in any federally promulgated rule or federally enforceable permit conditions applicable to the stationary source.
14. “Ambient air” means that portion of the atmosphere, external to buildings, to which the general public has access.
15. “Applicable implementation plan” means those provisions of the state implementation plan approved by the Administrator or a federal implementation plan promulgated for Arizona or any portion of Arizona in accordance with Title I of the Act.
16. “Applicable requirement” means any of the following:
  - a. Any federal applicable requirement.
  - b. Any other requirement established pursuant to this Chapter or A.R.S. Title 49, Chapter 3.
17. “Arizona Testing Manual” means sections 1 and 7 of the Arizona Testing Manual for Air Pollutant Emissions amended as of March 1992 (and no future editions).
18. “ASTM” means the American Society for Testing and Materials.
19. “Attainment area” means any area in the state that has been identified in regulations promulgated by the Admin-

- istrator as being in compliance with national ambient air quality standards.
20. *“Begin actual construction” means, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. With respect to a change in method of operation this term refers to those onsite activities, other than preparatory activities, which mark the initiation of the change.*
    - a. *For purposes of title I, parts C and D and section 112 of the clean air act, and for purposes of applicants that require permits containing limits designed to avoid the application of title I, parts C and D and section 112 of the clean air act, these activities include installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures but do not include any of the following, subject to subsection (20)(c):*
      - i. *Clearing and grading, including demolition and removal of existing structures and equipment, stripping and stockpiling of topsoil.*
      - ii. *Installation of access roads, driveways and parking lots.*
      - iii. *Installation of ancillary structures, including fences, office buildings and temporary storage structures, that are not a necessary component of an emissions unit or associated air pollution control equipment for which the permit is required.*
      - iv. *Ordering and onsite storage of materials and equipment.*
    - b. *For purposes other than those identified in subsection (20)(a), these activities do not include any of the following, subject to subsection (20)(c):*
      - i. *Clearing and grading, including demolition and removal of existing structures and equipment, stripping and stockpiling of topsoil and earthwork cut and fill for foundations.*
      - ii. *Installation of access roads, parking lots, driveways and storage areas.*
      - iii. *Installation of ancillary structures, including fences, warehouses, storerooms and office buildings, provided none of these structures impacts the design of any emissions unit or associated air pollution control equipment.*
      - iv. *Ordering and onsite storage of materials and equipment.*
      - v. *Installation of underground pipework, including water, sewer, electric and telecommunications utilities.*
      - vi. *Installation of building and equipment supports, including concrete forms, footers, pilings, foundations, pads and platforms, provided none of these supports impacts the design of any emissions unit or associated air pollution control equipment.*
    - c. *An applicant’s performance of any activities that are excluded from the definition of “begin actual construction” under subsection (20)(a) or (b) shall be at the applicant’s risk and shall not reduce the applicant’s obligations under this Chapter. The director shall evaluate an application for a permit or permit revision and make a decision on the same basis as if the activities allowed under subsection (20)(a) or (b) had not occurred. A.R.S. § 49-401.01(7).*
  21. *“Best available control technology” (BACT) means an emission limitation, including a visible emissions standard, based on the maximum degree of reduction for each air regulated NSR pollutant which would be emitted from any proposed major source or major modification, taking into account energy, environmental, and economic impact and other costs, determined by the Director in accordance with R18-2-406(A)(4) to be achievable for such source or modification.*
  22. *“Btu” means British thermal unit, which is the quantity of heat required to raise the temperature of one pound of water 1°F.*
  23. *“Categorical sources” means the following classes of sources:*
    - a. Coal cleaning plants with thermal dryers;
    - b. Kraft pulp mills;
    - c. Portland cement plants;
    - d. Primary zinc smelters;
    - e. Iron and steel mills;
    - f. Primary aluminum ore reduction plants;
    - g. Primary copper smelters;
    - h. Municipal incinerators capable of charging more than 250 tons of refuse per day;
    - i. Hydrofluoric, sulfuric, or nitric acid plants;
    - j. Petroleum refineries;
    - k. Lime plants;
    - l. Phosphate rock processing plants;
    - m. Coke oven batteries;
    - n. Sulfur recovery plants;
    - o. Carbon black plants using the furnace process;
    - p. Primary lead smelters;
    - q. Fuel conversion plants;
    - r. Sintering plants;
    - s. Secondary metal production plants;
    - t. Chemical process plants, which shall not include ethanol production facilities that produce ethanol by natural fermentation included in North American Industry Classification System codes 325193 or 312140;
    - u. Fossil-fuel boilers, combinations thereof, totaling more than 250 million Btus per hour heat input;
    - v. Petroleum storage and transfer units with a total storage capacity more than 300,000 barrels;
    - w. Taconite preprocessing plants;
    - x. Glass fiber processing plants;
    - y. Charcoal production plants;
    - z. Fossil-fuel-fired steam electric plants and combined cycle gas turbines of more than 250 million Btus per hour heat input.
  24. *“Categorically exempt activities” means any of the following:*
    - a. Any combination of diesel-, natural gas- or gasoline-fired engines with cumulative power equal to or less than 145 horsepower.
    - b. Natural gas-fired engines with cumulative power equal to or less than 155 horsepower.
    - c. Gasoline-fired engines with cumulative power equal to or less than 200 horsepower.
    - d. Any of the following emergency or stand-by engines used for less than 500 hours in each calendar year, provided the permittee keeps records documenting the hours of operation of the engines:
      - i. Any combination of diesel-, natural gas- or gasoline-fired emergency engines with cumulative power equal to or less than 2,500 horsepower.

## Department of Environmental Quality – Air Pollution Control

- ii. Natural gas-fired emergency engines with cumulative power equal to or less than 2,700 horsepower.
    - iii. Gasoline-fired emergency engines with cumulative power equal to or less than 3,700 horsepower.
  - e. Any combination of boilers with a cumulative maximum design heat input capacity of less than 10 million Btu/hr.
25. “CFR” means the Code of Federal Regulations, amended as of July 1, 2011, (and no future editions), with standard references in this Chapter by Title and Part, so that “40 CFR 51” means Title 40 of the Code of Federal Regulations, Part 51.
  26. “Charge” means the addition of metal bearing materials, scrap, or fluxes to a furnace, converter or refining vessel.
  27. “Clean coal technology” means any technology, including technologies applied at the precombustion, combustion, or post-combustion stage, at a new or existing facility that will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam, that was not in widespread use as of November 15, 1990.
  28. “Clean coal technology demonstration project” means a project using funds appropriated under the heading “Department of Energy - Clean Coal Technology,” up to a total amount of \$2,500,000,000 for commercial demonstration of clean coal technology or similar projects funded through appropriations for the Environmental Protection Agency. The federal contribution for a qualifying project shall be at least 20% of the total cost of the demonstration project.
  29. “Coal” means all solid fossil fuels classified as anthracite, bituminous, subbituminous, or lignite by ASTM D-388-91, (Classification of Coals by Rank).
  30. “Combustion” means the burning of matter.
  31. “Commence” means, as applied to construction of a source, or a major modification as defined in Article 4 of this Chapter, that the owner or operator has all necessary preconstruction approvals or permits and either has:
    - a. Begun, or caused to begin, a continuous program of actual onsite construction of the source, to be completed within a reasonable time; or
    - b. Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.
  32. “Construction” means any physical change or change in the method of operation, including fabrication, erection, installation, demolition, or modification of an emissions unit, which would result in a change in actual emissions.
  33. “Continuous monitoring system” means a CEMS, CERMS, or CPMS.
  34. “Continuous emissions monitoring system” or “CEMS” means the total equipment, required under the emission monitoring provisions in this Chapter, used to sample, condition (if applicable), analyze, and to provide, on a continuous basis, a permanent record of emissions.
  35. “Continuous emissions rate monitoring system” or “CERMS” means the total equipment required for the determination and recording of the pollutant mass emissions rate (in terms of mass per unit of time).
  36. “Continuous parameter monitoring system” or “CPMS” means the total equipment, required under the emission monitoring provisions in this Chapter, to monitor process or control device operational parameters or other information and to provide, on a continuous basis, a permanent record of monitored values.
  37. “Controlled atmosphere incinerator” means one or more refractory-lined chambers in which complete combustion is promoted by recirculation of gases by mechanical means.
  38. “Conventional air pollutant” means any pollutant for which the Administrator has promulgated a primary or secondary national ambient air quality standard. A.R.S. § 49-401.01(12).
  39. “Department” means the Department of Environmental Quality. A.R.S. § 49-101(2)
  40. “Director” means the director of environmental quality who is also the director of the department. A.R.S. § 49-101(3).
  41. “Discharge” means the release or escape of an effluent from a source into the atmosphere.
  42. “Dust” means finely divided solid particulate matter occurring naturally or created by mechanical processing, handling or storage of materials in the solid state.
  43. “Dust suppressant” means a chemical compound or mixture of chemical compounds added with or without water to a dust source for purposes of preventing air entrainment.
  44. “Effluent” means any air contaminant which is emitted and subsequently escapes into the atmosphere.
  45. “Electric utility steam generating unit” means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.
  46. “Emission” means an air contaminant or gas stream, or the act of discharging an air contaminant or a gas stream, visible or invisible.
  47. “Emission standard” or “emission limitation” means a requirement established by the state, a local government, or the Administrator which limits the quantity, rate, or concentration of emissions of air pollutants on a continuous basis, including any requirements which limit the level of opacity, prescribe equipment, set fuel specifications, or prescribe operation or maintenance procedures for a source to assure continuous emission reduction.
  48. “Emissions unit” means any part of a stationary source which emits or would have the potential to emit any regulated air pollutant and includes an electric steam generating unit.
  49. “Equivalent method” means any method of sampling and analyzing for an air pollutant which has been demonstrated under R18-2-311(D) to have a consistent and quantitatively known relationship to the reference method, under specified conditions.
  50. “Excess emissions” means emissions of an air pollutant in excess of an emission standard as measured by the compliance test method applicable to such emission standard.
  51. “Federal applicable requirement” means any of the following (including requirements that have been promulgated or approved by EPA through rulemaking at the time of issuance but have future effective compliance dates):

## Department of Environmental Quality – Air Pollution Control

- a. Any standard or other requirement provided for in the applicable implementation plan approved or promulgated by EPA through rulemaking under Title I of the Act that implements the relevant requirements of the Act, including any revisions to that plan promulgated in 40 CFR 52.
  - b. Any term or condition of any preconstruction permits issued pursuant to regulations approved or promulgated through rulemaking under Title I, including parts C or D, of the Act.
  - c. Any standard or other requirement under section 111 of the Act, including 111(d).
  - d. Any standard or other requirement under section 112 of the Act, including any requirement concerning accident prevention under section 112(r)(7) of the Act.
  - e. Any standard or other requirement of the acid rain program under Title IV of the Act or the regulations promulgated thereunder and incorporated pursuant to R18-2-333.
  - f. Any requirements established pursuant to section 504(b) or section 114(a)(3) of the Act.
  - g. Any standard or other requirement governing solid waste incineration, under section 129 of the Act.
  - h. Any standard or other requirement for consumer and commercial products, under section 183(e) of the Act.
  - i. Any standard or other requirement for tank vessels under section 183(f) of the Act.
  - j. Any standard or other requirement of the program to control air pollution from outer continental shelf sources, under section 328 of the Act.
  - k. Any standard or other requirement of the regulations promulgated to protect stratospheric ozone under Title VI of the Act, unless the Administrator has determined that such requirements need not be contained in a Title V permit.
  - l. Any national ambient air quality standard or increment or visibility requirement under Part C of Title I of the Act, but only as it would apply to temporary sources permitted pursuant to section 504(e) of the Act.
52. "Federal Land Manager" means, with respect to any lands in the United States, the secretary of the department with authority over such lands.
53. "Federally enforceable" means all limitations and conditions which are enforceable by the Administrator under the Act, including all of the following:
- a. The requirements of the New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants contained in Articles 9 and 11 of this Chapter.
  - b. The requirements of such other state or county rules or regulations approved by the Administrator, including the requirements of state and county operating and new source review permit and registration programs that have been approved by the Administrator. Notwithstanding this subsection, the condition of any permit or registration designated as being enforceable only by the state is not federally enforceable.
  - c. The requirements of any applicable implementation plan.
  - d. Emissions limitations, controls, and other requirements, and any associated monitoring, recordkeeping, and reporting requirements, other than those designated as enforceable only by the state, that are included in a permit pursuant to R18-2-306.01 or R18-2-306.02.
54. "Federally listed hazardous air pollutant" means a pollutant listed pursuant to R18-2-1701(9).
55. "Final permit" means the version of a permit issued by the Department after completion of all review required by this Chapter.
56. "Fixed capital cost" means the capital needed to provide all the depreciable components.
57. "Fuel" means any material which is burned for the purpose of producing energy.
58. "Fuel burning equipment" means any machine, equipment, incinerator, device or other article, except stationary rotating machinery, in which combustion takes place.
59. "Fugitive emissions" means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.
60. "Fume" means solid particulate matter resulting from the condensation and subsequent solidification of vapors of melted solid materials.
61. "Fume incinerator" means a device similar to an afterburner installed for the purpose of incinerating fumes, gases and other finely divided combustible particulate matter not previously burned.
62. "Good engineering practice (GEP) stack height" means a stack height meeting the requirements described in R18-2-332.
63. "Hazardous air pollutant" means any federally listed hazardous air pollutant.
64. "Heat input" means the quantity of heat in terms of Btus generated by fuels fed into the fuel burning equipment under conditions of complete combustion.
65. "Incinerator" means any equipment, machine, device, contrivance or other article, and all appurtenances thereof, used for the combustion of refuse, salvage materials or any other combustible material except fossil fuels, for the purpose of reducing the volume of material.
66. "Indian governing body" means the governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of self-government.
67. "Indian reservation" means any federally recognized reservation established by Treaty, Agreement, Executive Order, or Act of Congress.
68. "Insignificant activity" means any of the following activities:
- a. Liquid Storage and Piping
    - i. Petroleum product storage tanks containing the following substances, provided the applicant lists and identifies the contents of each tank with a volume of 350 gallons or more and provides threshold values for throughput or capacity or both for each such tank: diesel fuels and fuel oil in storage tanks with capacity of 40,000 gallons or less, lubricating oil, transformer oil, and used oil.
    - ii. Gasoline storage tanks with capacity of 10,000 gallons or less.
    - iii. Storage and piping of natural gas, butane, propane, or liquified petroleum gas, provided the applicant lists and identifies the contents of each stationary storage vessel with a volume of 350 gallons or more and provides threshold values for throughput or capacity or both for each such vessel.

## Department of Environmental Quality – Air Pollution Control

- iv. Piping of fuel oils, used oil and transformer oil, provided the applicant includes a system description.
  - v. Storage and handling of drums or other transportable containers where the containers are sealed during storage, and covered during loading and unloading, including containers of waste and used oil regulated under the federal Resource Conservation and Recovery Act, 42 U.S.C. 6901-6992k. Permit applicants must provide a description of material in the containers and the approximate amount stored.
  - vi. Storage tanks of any size containing exclusively soaps, detergents, waxes, greases, aqueous salt solutions, aqueous solutions of acids that are not regulated air pollutants, or aqueous caustic solutions, provided the permit applicant specifies the contents of each storage tank with a volume of 350 gallons or more.
  - vii. Electrical transformer oil pumping, cleaning, filtering, drying and the re-installation of oil back into transformers.
  - b. Internal combustion engine-driven compressors, internal combustion engine-driven electrical generator sets, and internal combustion engine-driven water pumps used for less than 500 hours per calendar year for emergency replacement or standby service, provided the permittee keeps records documenting the hours of operation of this equipment.
  - c. Low Emitting Processes
    - i. Batch mixers with rated capacity of 5 cubic feet or less.
    - ii. Wet sand and gravel production facilities that obtain material from subterranean and subaqueous beds, whose production rate is 200 tons/hour or less, and whose permanent in-plant roads are paved and cleaned to control dust. This does not include activities in emissions units which are used to crush or grind any non-metallic minerals.
    - iii. Powder coating operations.
    - iv. Equipment using water, water and soap or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing.
    - v. Blast-cleaning equipment using a suspension of abrasive in water and any exhaust system or collector serving them exclusively.
    - vi. Plastic pipe welding.
  - d. Site Maintenance
    - i. Housekeeping activities and associated products used for cleaning purposes, including collecting spilled and accumulated materials at the source, including operation of fixed vacuum cleaning systems specifically for such purposes.
    - ii. Sanding of streets and roads to abate traffic hazards caused by ice and snow.
    - iii. Street and parking lot striping.
    - iv. Architectural painting and associated surface preparation for maintenance purposes at industrial or commercial facilities.
  - e. Sampling and Testing
    - i. Noncommercial (in-house) experimental, analytical laboratory equipment which is bench scale in nature, including quality control/quality assurance laboratories supporting a stationary source and research and development laboratories.
    - ii. Individual sampling points, analyzers, and process instrumentation, whose operation may result in emissions but that are not regulated as emission units.
  - f. Ancillary Non-Industrial Activities
    - i. General office activities, such as paper shredding, copying, photographic activities, and blueprinting, but not to include incineration.
    - ii. Use of consumer products, including hazardous substances as that term is defined in the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) where the product is used at a source in the same manner as normal consumer use.
    - iii. Activities directly used in the diagnosis and treatment of disease, injury or other medical condition.
  - g. Miscellaneous Activities
    - i. Installation and operation of potable, process and waste water observation wells, including drilling, pumping, filtering apparatus.
    - ii. Transformer vents.
69. "Kraft pulp mill" means any stationary source which produces pulp from wood by cooking or digesting wood chips in a water solution of sodium hydroxide and sodium sulfide at high temperature and pressure. Regeneration of the cooking chemicals through a recovery process is also considered part of the kraft pulp mill.
70. "Lead" means elemental lead or alloys in which the predominant component is lead.
71. "Lime hydrator" means a unit used to produce hydrated lime product.
72. "Lime plant" includes any plant which produces a lime product from limestone by calcination. Hydration of the lime product is also considered to be part of the source.
73. "Lime product" means any product produced by the calcination of limestone.
74. "Major modification" is defined as follows:
- a. A major modification is any physical change in or change in the method of operation of a major source that would result in both a significant emissions increase of any regulated NSR pollutant and a significant net emissions increase of that pollutant from the stationary source.
  - b. Any emissions increase or net emissions increase that is significant for nitrogen oxides or volatile organic compounds is significant for ozone.
  - c. For the purposes of this definition, none of the following is a physical change or change in the method of operation:
    - i. Routine maintenance, repair, and replacement;
    - ii. Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 792, or by reason of a natural gas curtailment plan under the Federal Power Act, 16 U.S.C. 792 - 825r;
    - iii. Use of an alternative fuel by reason of an order or rule under section 125 of the Act;
    - iv. Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;
    - v. Use of an alternative fuel or raw material by a stationary source that either:

## Department of Environmental Quality – Air Pollution Control

- (1) The source was capable of accommodating before December 12, 1976, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter; or
    - (2) The source is approved to use under any permit issued under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
  - vi. An increase in the hours of operation or in the production rate, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
  - vii. Any change in ownership at a stationary source;
  - viii. [Reserved.]
  - ix. The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, if the project complies with:
    - (1) The SIP, and
    - (2) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated;
  - x. For electric utility steam generating units located in attainment and unclassifiable areas only, the installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, if the project does not result in an increase in the potential to emit any regulated pollutant emitted by the unit. This exemption applies on a pollutant-by-pollutant basis; and
  - xi. For electric utility steam generating units located in attainment and unclassifiable areas only, the reactivation of a very clean coal-fired electric utility steam generating unit.
  - d. This definition shall not apply with respect to a particular regulated NSR pollutant when the major source is complying with the requirements of R18-2-412 for a PAL for that regulated NSR pollutant. Instead, the definition of PAL major modification in R18-2-401(17) shall apply.
75. "Major source" means:
- a. A major source as defined in R18-2-401.
  - b. A major source under section 112 of the Act:
    - i. For pollutants other than radionuclides, any stationary source that emits or has the potential to emit, in the aggregate, including fugitive emission 10 tons per year (tpy) or more of any hazardous air pollutant which has been listed pursuant to section 112(b) of the Act, 25 tpy or more of any combination of such hazardous air pollutants, or such lesser quantity as described in Article 11 of this Chapter. Notwithstanding the preceding sentence, emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor or pump station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources; or
    - ii. For radionuclides, "major source" shall have the meaning specified by the Administrator by rule.
  - c. A major stationary source, as defined in section 302 of the Act, that directly emits or has the potential to emit, 100 tpy or more of any air pollutant including any major source of fugitive emissions of any such pollutant. The fugitive emissions of a stationary source shall not be considered in determining whether it is a major stationary source for the purposes of section 302(j) of the Act, unless the source belongs to a section 302(j) category.
76. "Malfunction" means any sudden and unavoidable failure of air pollution control equipment, process equipment or a process to operate in a normal and usual manner, but does not include failures that are caused by poor maintenance, careless operation or any other upset condition or equipment breakdown which could have been prevented by the exercise of reasonable care.
77. "Minor source" means a source of air pollution which is not a major source for the purposes of Article 4 of this Chapter and over which the Director, acting pursuant to A.R.S. § 49-402(B), has asserted jurisdiction.
78. "Minor source baseline area" means the air quality control region in which the source is located.
79. "*Mobile source*" means any combustion engine, device, machine or equipment that operates during transport and that emits or generates air contaminants whether in motion or at rest. A.R.S. § 49-401.01(23).
80. "*Modification*" or "*modify*" means a physical change in or change in the method of operation of a source that increases the emissions of any regulated air pollutant emitted by such source by more than any relevant de minimis amount or that results in the emission of any regulated air pollutant not previously emitted by more than such de minimis amount. An increase in emissions at a minor source shall be determined by comparing the source's potential to emit before and after the modification. The following exemptions apply:
- a. A physical or operational change does not include routine maintenance, repair or replacement.
  - b. An increase in the hours of operation or if the production rate is not considered an operational change unless such increase is prohibited under any permit condition that is legally and practically enforceable by the department.
  - c. A change in ownership at a source is not considered a modification. A.R.S. § 49-401.01(24).
81. "Monitoring device" means the total equipment, required under the applicable provisions of this Chapter, used to measure and record, if applicable, process parameters.
82. "Motor vehicle" means any self-propelled vehicle designed for transporting persons or property on public highways.
83. "Multiple chamber incinerator" means three or more refractory-lined combustion chambers in series, physically separated by refractory walls and interconnected by gas passage ports or ducts.
84. "Natural conditions" includes naturally occurring phenomena that reduce visibility as measured in terms of light extinction, visual range, contrast, or coloration.
85. "*National ambient air quality standard*" means the ambient air pollutant concentration limits established by the

*Administrator pursuant to section 109 of the Act. A.R.S. § 49-401.01(25).*

86. “Necessary preconstruction approvals or permits” means those permits or approvals required under the Act and those air quality control laws and rules which are part of the SIP.
87. “Net emissions increase” means:
- The amount by which the sum of subsections (87)(a)(i) and (ii) exceeds zero:
    - The increase in emissions of a regulated NSR pollutant from a particular physical change or change in the method of operation at a stationary source as calculated pursuant to R18-2-402(D); and
    - Any other increases and decreases in actual emissions of the regulated NSR pollutant at the source that are contemporaneous with the particular change and are otherwise creditable.
    - For purposes of calculating increases and decreases in actual emissions under subsection (87)(a)(ii), baseline actual emissions shall be determined as provided in the definition of baseline actual emissions in R18-2-401(2), except that subsections R18-2-401(a)(iii) and (b)(iv) shall not apply.
  - An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:
    - The date five years before construction on the particular change commences, and
    - The date that the increase from the particular change occurs.
  - An increase or decrease in actual emissions is creditable only if the Director has not relied on it in issuing a permit, which is in effect when the increase in actual emissions from the particular change occurs.
  - An increase or decrease in actual emissions of sulfur dioxide, nitrogen oxides, or PM<sub>10</sub> which occurs before the applicable baseline date, as described in R18-2-218, is creditable only if it is required to be considered in calculating the amount of maximum allowable increases remaining available.
  - An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.
  - A decrease in actual emissions is creditable only to the extent that it satisfies all of the following conditions:
    - The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions.
    - It is enforceable as a practical matter at and after the time that actual construction on the particular change begins.
    - It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.
    - The emissions unit was actually operated and emitted the specific pollutant.
    - For a source located in an area designated as nonattainment for the regulated NSR pollutant, the Director has not relied on it in issuing any permit under Article 4 or R18-2-334, and the

state has not relied on it in demonstrating attainment or reasonable further progress.

- An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any emissions unit that replaces an existing emissions unit and that requires shutdown becomes operational only after a reasonable shutdown period, not to exceed 180 days.
88. “New source” means any stationary source of air pollution which is subject to an applicable new source performance standard under Article 9 of this Chapter.
89. “Nitric acid plant” means any facility producing nitric acid 30% to 70% in strength by either the pressure or atmospheric pressure process.
90. “Nitrogen oxides” means all oxides of nitrogen except nitrous oxide, as measured by test methods set forth in the Appendices to 40 CFR 60.
91. “Nonattainment area” means an area so designated by the Administrator acting pursuant to section 107 of the Act as exceeding national primary or secondary ambient air standards for a particular pollutant or pollutants.
92. “Nonpoint source” means a source of air contaminants which lacks an identifiable plume or emission point.
93. “Opacity” means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.
94. “Operation” means any physical or chemical action resulting in the change in location, form, physical properties, or chemical character of a material.
95. “Owner or operator” means any person who owns, leases, operates, controls, or supervises an affected facility or a stationary source.
96. “Particulate matter” means any airborne finely divided solid or liquid material with an aerodynamic diameter smaller than 100 micrometers.
97. “Particulate matter emissions” means all finely divided solid or liquid materials other than uncombined water, emitted to the ambient air as measured by applicable test methods and procedures described in R18-2-311.
98. “Permitting authority” means the department or a county department, agency or air pollution control district that is charged with enforcing a permit program adopted pursuant to A.R.S. § 49-480(A). A.R.S. § 49-401.01(28).
99. “Permitting exemption thresholds” for a regulated minor NSR pollutant means the following:

Regulated Air Pollutant	Emission Rate in tons per year (TPY)
PM <sub>2.5</sub> (primary emissions only; levels for precursors are set below)	5
PM <sub>10</sub>	7.5
SO <sub>2</sub>	20
NO <sub>x</sub>	20
VOC	20
CO	50
Pb	0.3

100. “Person” means any public or private corporation, company, partnership, firm, association or society of persons, the federal government and any of its departments or

- agencies, the state and any of its agencies, departments or political subdivisions, as well as a natural person.
101. “*Planning agency*” means an organization designated by the governor pursuant to 42 U.S.C. 7504. A.R.S. § 49-401.01(29).
  102. “*Predictive Emissions Monitoring System*” or “*PEMS*” means the total equipment, required under the emission monitoring provisions in this Chapter, to monitor process and control device operational parameters and other information, and calculate and record the mass emissions rate on a continuous basis.
  103. “*PM<sub>2.5</sub>*” means particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53.
  104. “*PM<sub>10</sub>*” means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53.
  105. “*PM<sub>10</sub> emissions*” means finely divided solid or liquid material, with an aerodynamic diameter less than or equal to a nominal 10 micrometers emitted to the ambient air as measured by applicable test methods and procedures described in R18-2-311.
  106. “*Plume*” means visible effluent.
  107. “*Pollutant*” means an air contaminant the emission or ambient concentration of which is regulated pursuant to this Chapter.
  108. “*Portable source*” means any building, structure, facility, or installation subject to regulation pursuant to A.R.S. § 49-426 which emits or may emit any air pollutant and is capable of being operated at more than one location.
  109. “*Potential to emit*” or “*potential emission rate*” means the maximum capacity of a stationary source to emit a pollutant, excluding secondary emissions, under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is legally and practically enforceable by the Department or a county under A.R.S. Title 49, Chapter 3; any rule, ordinance, order or permit adopted or issued under A.R.S. Title 49, Chapter 3 or the state implementation plan.
  110. “*Primary ambient air quality standards*” means the ambient air quality standards which define levels of air quality necessary, with an adequate margin of safety, to protect the public health, as specified in Article 2 of this Chapter.
  111. “*Process*” means one or more operations, including equipment and technology, used in the production of goods or services or the control of by-products or waste.
  112. “*Project*” means a physical change in, or change in the method of operation of, an existing major source.
  113. “*Proposed permit*” means the version of a permit for which the Director offers public participation under R18-2-330 or affected state review under R18-2-307(D).
  114. “*Proposed final permit*” means the version of a Class I permit or Class I permit revision that the Department proposes to issue and forwards to the Administrator for review in compliance with R18-2-307(A).
  115. “*Reactivation of a very clean coal-fired electric utility steam generating unit*” means any physical change or change in the method of operation associated with commencing commercial operations by a coal-fired utility unit after a period of discontinued operation if the unit:
    - a. Has not been in operation for the two-year period before enactment of the Clean Air Act Amendments of 1990, and the emissions from the unit continue to be carried in the Director’s emissions inventory at the time of enactment;
    - b. Was equipped before shutdown with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85% and a removal efficiency for particulates of no less than 98%;
    - c. Is equipped with low-NO<sub>x</sub> burners before commencement of operations following reactivation; and
    - d. Is otherwise in compliance with the Act.
  116. “*Reasonable further progress*” means the schedule of emission reductions defined within a nonattainment area plan as being necessary to come into compliance with a national ambient air quality standard by the primary standard attainment date.
  117. “*Reasonably available control technology*” (RACT) means devices, systems, process modifications, work practices or other apparatus or techniques that are determined by the Director to be reasonably available taking into account:
    - a. The necessity of imposing the controls in order to attain and maintain a national ambient air quality standard;
    - b. The social, environmental, energy and economic impact of the controls;
    - c. Control technology in use by similar sources; and
    - d. The capital and operating costs and technical feasibility of the controls.
  118. “*Reclaiming machinery*” means any machine, equipment device or other article used for picking up stored granular material and either depositing this material on a conveyor or reintroducing this material into the process.
  119. “*Reference method*” means the methods of sampling and analyzing for an air pollutant as described in the Arizona Testing Manual; 40 CFR 50, Appendices A through K; 40 CFR 51, Appendix M; 40 CFR 52, Appendices D and E; 40 CFR 60, Appendices A through F; and 40 CFR 61, Appendices B and C, as incorporated by reference in 18 A.A.C. 2, Appendix 2.
  120. “*Regulated air pollutant*” means any of the following:
    - a. Any conventional air pollutant.
    - b. Nitrogen oxides and volatile organic compounds.
    - c. Any air contaminant that is subject to a standard contained in Article 9 of this Chapter.
    - d. Any hazardous air pollutant as defined in Article 17 of this Chapter.
    - e. Any Class I or II substance listed in section 602 of the Act.
  121. “*Regulated minor NSR pollutant*” means any pollutant for which a national ambient air quality standard has been promulgated and the following precursors for such pollutants:
    - a. VOC and nitrogen oxides as precursors to ozone.
    - b. Nitrogen oxides and sulfur dioxide as precursors to PM<sub>2.5</sub>.
  122. “*Regulated NSR pollutant*” means any of the following:
    - a. Any pollutant for which a national ambient air quality standard has been promulgated and any pollutant identified under this subsection as a constituent or

- precursor to such pollutant. Precursors for purposes of NSR are the following:
- i. Volatile organic compounds and nitrogen oxides are precursors to ozone in all areas.
  - ii. Sulfur dioxide is a precursor to PM<sub>2.5</sub> in all areas.
  - iii. Nitrogen oxides are precursors to PM<sub>2.5</sub> in all areas.
- b. Any pollutant that is subject to any standard promulgated under Article 9 of this Chapter.
  - c. Any Class I or II substance subject to a standard promulgated under or established by Title VI of the Act as of July 1, 2011.
  - d. [Reserved.]
  - e. Notwithstanding subsections (122)(a) through (d), the term regulated NSR pollutant shall not include any or all hazardous air pollutants listed under R18-2-1101, unless the listed hazardous air pollutant is also regulated as a constituent or precursor of a general pollutant listed under section 108 of the Act as of July 1, 2010.
  - f. Particulate matter emissions, PM<sub>2.5</sub> emissions, and PM<sub>10</sub> emissions shall include gaseous emissions from a source or activity which condense to form particulate matter at ambient temperatures. On and after January 1, 2011, condensable particulate matter shall be accounted for in applicability determinations and in establishing emissions limitations for particulate matter, PM<sub>2.5</sub> and PM<sub>10</sub> in permits issued under Article 4.
123. "Repowering" means:
- a. Replacing an existing coal-fired boiler with one of the following clean coal technologies:
    - i. Atmospheric or pressurized fluidized bed combustion;
    - ii. Integrated gasification combined cycle;
    - iii. Magnetohydrodynamics;
    - iv. Direct and indirect coal-fired turbines;
    - v. Integrated gasification fuel cells; or
    - vi. As determined by the Administrator, in consultation with the United States Secretary of Energy, a derivative of one or more of the above technologies; and
    - vii. Any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.
  - b. Repowering also includes any oil, gas, or oil and gas-fired unit that has been awarded clean coal technology demonstration funding as of January 1, 1991, by the United States Department of Energy.
  - c. The Director shall give expedited consideration to permit applications for any source that satisfies the requirements of this subsection and is granted an extension under section 409 of the Act.
124. "Run" means the net period of time during which an emission sample is collected, which may be, unless otherwise specified, either intermittent or continuous within the limits of good engineering practice.
125. "SCREEN model" means the AERSCREEN air dispersion model published by the Administrator in April 2011 and available on the Support Center for Regulatory Atmospheric Modeling web site: <http://www.epa.gov/ttn/scram>.
126. "Secondary ambient air quality standards" means the ambient air quality standards which define levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant, as specified in Article 2 of this Chapter.
127. "Secondary emissions" means emissions which are specific, well defined, quantifiable, occur as a result of the construction or operation of a major source or major modification, but do not come from the major source or major modification itself, and impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions include emissions from any offsite support facility which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major source or major modification. Secondary emissions do not include any emissions which come directly from a mobile source, such as emissions from the tailpipe of a motor vehicle, from a train, or from a vessel.
128. "Section 302(j) category" means:
- a. Any of the classes of sources listed in the definition of categorical source in subsection (23); or
  - b. Any category of affected facility which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act.
129. "Shutdown" means the cessation of operation of any air pollution control equipment or process equipment for any purpose, except routine phasing out of process equipment.
130. "Significant" means, in reference to a significant emissions increase, a net emissions increase or a stationary source's potential to emit a regulated NSR pollutant:
- a. A rate of emissions that would equal or exceed any of the following rates:

Pollutant	Emissions Rate
Carbon monoxide	100 tons per year (tpy)
Nitrogen oxides	40 tpy
Sulfur dioxide	40 tpy
Particulate matter	25 tpy
PM <sub>10</sub>	15 tpy
PM <sub>2.5</sub>	10 tpy of direct PM <sub>2.5</sub> emissions; 40 tpy of sulfur dioxide emissions; 40 tpy of nitrogen oxide emissions.
VOC	40 tpy
Lead	0.6 tpy
Fluorides	3 tpy
Sulfuric acid mist	7 tpy
Hydrogen sulfide (H <sub>2</sub> S)	10 tpy
Total reduced sulfur (including H <sub>2</sub> S)	10 tpy
Reduced sulfur compounds (including H <sub>2</sub> S)	10 tpy

## Department of Environmental Quality – Air Pollution Control

- |   |                            |  |
|---|----------------------------|--|
| Municipal waste combustor organics (measured as total tetra-through octa-chlorinated dibenzo-p-dioxins and dibenzofurans) | 3.5 x 10 <sup>-6</sup> tpy |  |
| Municipal waste combustor metals (measured as particulate matter)   | 15 tpy                     |  |
| Municipal waste combustor acid gases (measured as sulfur dioxide and hydrogen chloride)                                   | 40 tpy                     |  |
| Municipal solid waste landfill emissions (measured as nonmethane organic compounds)                                       | 50 tpy                     |  |
- b. In ozone nonattainment areas classified as serious or severe, significant emissions of nitrogen oxides and VOC shall be determined under R18-2-405.
  - c. In a carbon monoxide nonattainment area classified as serious, a rate of emissions that would equal or exceed 50 tons per year, if the Administrator has determined that stationary sources contribute significantly to carbon monoxide levels in that area.
  - d. For a regulated NSR pollutant that is not listed in subsection (130)(a), any emission rate.
  - e. Notwithstanding the emission rates listed in subsection (130)(a), any emissions rate or any net emissions increase associated with a major source or major modification, which would be constructed within 10 kilometers of a Class I area and have an impact on the ambient air quality of such area equal to or greater than 1 mg/m<sup>3</sup> (24-hour average).
131. "Significant emissions increase" means, for a regulated NSR pollutant, an increase in emissions that is significant as defined in this Section for that pollutant.
  132. "Smoke" means particulate matter resulting from incomplete combustion.
  133. "Source" means any building, structure, facility or installation that may cause or contribute to air pollution or the use of which may eliminate, reduce or control the emission of air pollution. A.R.S. § 49-401.01(23).
  134. "Stack" means any point in a source designed to emit solids, liquids, or gases into the air, including a pipe or duct but not including flares.
  135. "Stack in existence" means that the owner or operator had either:
    - a. Begun, or caused to begin, a continuous program of physical onsite construction of the stack;
    - b. Entered into binding agreements or contractual obligations, which could not be cancelled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed in a reasonable time.
  136. "Start-up" means the setting into operation of any air pollution control equipment or process equipment for any purpose except routine phasing in of process equipment.
  137. "State implementation plan" or "SIP" means the accumulated record of enforceable air pollution control measures, programs and plans adopted by the Director and submitted to and approved by the Administrator pursuant to 42 U.S.C. 7410.
  138. "Stationary rotating machinery" means any gas engine, diesel engine, gas turbine, or oil fired turbine operated from a stationary mounting and used for the production of electric power or for the direct drive of other equipment.
  139. "Stationary source" means any building, structure, facility or installation subject to regulation pursuant to A.R.S. § 49-426(A) which emits or may emit any air pollutant. "Building," "structure," "facility," or "installation" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person or persons under common control. Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" as described in the "Standard Industrial Classification Manual, 1987."
  140. "Sulfuric acid plant" means any facility producing sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, or acid sludge, but does not include facilities where conversion to sulfuric acid is utilized as a means of preventing emissions of sulfur dioxide or other sulfur compounds to the atmosphere.
  141. "Temporary clean coal technology demonstration project" means a clean coal technology demonstration project operated for five years or less, and that complies with the applicable implementation plan and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after the project is terminated.
  142. "Temporary source" means a source which is portable, as defined in A.R.S. § 49-401.01(23) and which is not an affected source.
  143. "Total reduced sulfur" (TRS) means the sum of the sulfur compounds, primarily hydrogen sulfide, methyl mercaptan, dimethyl sulfide, and dimethyl disulfide, that are released during kraft pulping and other operations and measured by Method 16 in 40 CFR 60, Appendix A.
  144. "Trivial activities" means activities and emissions units, such as the following, that may be omitted from a permit or registration application. Certain of the following listed activities include qualifying statements intended to exclude similar activities:
    - a. Low-Emitting Combustion
      - i. Combustion emissions from propulsion of mobile sources;
      - ii. Emergency or backup electrical generators at residential locations;
      - iii. Portable electrical generators that can be moved by hand from one location to another. "Moved by hand" means capable of being moved without the assistance of any motorized or non-motorized vehicle, conveyance, or device;
    - b. Low- Or Non-Emitting Industrial Activities
      - i. Blacksmith forges;
      - ii. Hand-held or manually operated equipment used for buffing, polishing, carving, cutting, drilling, sawing, grinding, turning, routing or machining of ceramic art work, precision parts, leather, metals, plastics, fiberboard, masonry, carbon, glass, or wood;
      - iii. Brazing, soldering, and welding equipment, and cutting torches related to manufacturing and construction activities that do not result in

## Department of Environmental Quality – Air Pollution Control

- emission of HAP metals. Brazing, soldering, and welding equipment, and cutting torches related to manufacturing and construction activities that emit HAP metals are insignificant activities based on size or production level thresholds. Brazing, soldering, and welding equipment, and cutting torches directly related to plant maintenance and upkeep and repair or maintenance shop activities that emit HAP metals are treated as trivial and listed separately in this definition;
- iv. Drop hammers or hydraulic presses for forging or metalworking;
  - v. Air compressors and pneumatically operated equipment, including hand tools;
  - vi. Batteries and battery charging stations, except at battery manufacturing plants;
  - vii. Drop hammers or hydraulic presses for forging or metalworking;
  - viii. Equipment used exclusively to slaughter animals, not including other equipment at slaughterhouses, such as rendering cookers, boilers, heating plants, incinerators, and electrical power generating equipment;
  - ix. Hand-held applicator equipment for hot melt adhesives with no VOC in the adhesive formulation;
  - x. Equipment used for surface coating, painting, dipping, or spraying operations, except those that will emit VOC or HAP;
  - xi. CO<sub>2</sub> lasers used only on metals and other materials that do not emit HAP in the process;
  - xii. Electric or steam-heated drying ovens and autoclaves, but not the emissions from the articles or substances being processed in the ovens or autoclaves or the boilers delivering the steam;
  - xiii. Salt baths using nonvolatile salts that do not result in emissions of any regulated air pollutants;
  - xiv. Laser trimmers using dust collection to prevent fugitive emissions;
  - xv. Process water filtration systems and demineralizers;
  - xvi. Demineralized water tanks and demineralizer vents;
  - xvii. Oxygen scavenging or de-aeration of water;
  - xviii. Ozone generators;
  - xix. Steam vents and safety relief valves;
  - xx. Steam leaks; and
  - xxi. Steam cleaning operations and steam sterilizers;
  - xxii. Use of vacuum trucks and high pressure washer/cleaning equipment within the stationary source boundaries for cleanup and in-source transfer of liquids and slurried solids to waste water treatment units or conveyances;
  - xxiii. Equipment using water, water and soap or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing.
  - xxiv. Electric motors.
- c. Building and Site Maintenance Activities
    - i. Plant and building maintenance and upkeep activities, including grounds-keeping, general repairs, cleaning, painting, welding, plumbing, re-tarring roofs, installing insulation, and paving parking lots, if these activities are not conducted as part of a manufacturing process, are not related to the source's primary business activity, and do not otherwise trigger a permit revision. Cleaning and painting activities qualify as trivial activities if they are not subject to VOC or hazardous air pollutant control requirements;
    - ii. Repair or maintenance shop activities not related to the source's primary business activity, not including emissions from surface coating, de-greasing, or solvent metal cleaning activities, and not otherwise triggering a permit revision;
    - iii. Janitorial services and consumer use of janitorial products;
    - iv. Landscaping activities;
    - v. Routine calibration and maintenance of laboratory equipment or other analytical instruments;
    - vi. Sanding of streets and roads to abate traffic hazards caused by ice and snow;
    - vii. Street and parking lot striping;
    - viii. Caulking operations which are not part of a production process.
  - d. Incidental, Non-Industrial Activities
    - i. Air-conditioning units used for human comfort that do not have applicable requirements under Title VI of the Act;
    - ii. Ventilating units used for human comfort that do not exhaust air pollutants into the ambient air from any manufacturing, industrial or commercial process;
    - iii. Tobacco smoking rooms and areas;
    - iv. Non-commercial food preparation;
    - v. General office activities, such as paper shredding, copying, photographic activities, pencil sharpening and blueprinting, but not including incineration;
    - vi. Laundry activities, except for dry-cleaning and steam boilers;
    - vii. Bathroom and toilet vent emissions;
    - viii. Fugitive emissions related to movement of passenger vehicles, if the emissions are not counted for applicability purposes under subsection (144)(c) of the definition of major source in this Section and any required fugitive dust control plan or its equivalent is submitted with the application;
    - ix. Use of consumer products, including hazardous substances as that term is defined in the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) where the product is used at a source in the same manner as normal consumer use;
    - x. Activities directly used in the diagnosis and treatment of disease, injury or other medical condition;
    - xi. Circuit breakers;
    - xii. Adhesive use which is not related to production.
  - e. Storage, Piping and Packaging
    - i. Storage tanks, vessels, and containers holding or storing liquid substances that will not emit any VOC or HAP;
    - ii. Storage tanks, reservoirs, and pumping and handling equipment of any size containing soaps, vegetable oil, grease, animal fat, and

- nonvolatile aqueous salt solutions, if appropriate lids and covers are used;
- iii. Chemical storage associated with water and wastewater treatment where the water is treated for consumption and/or use within the permitted facility;
- iv. Chemical storage associated with water and wastewater treatment where the water is treated for consumption and/or use within the permitted facility;
- v. Storage cabinets for flammable products;
- vi. Natural gas pressure regulator vents, excluding venting at oil and gas production facilities;
- vii. Equipment used to mix and package soaps, vegetable oil, grease, animal fat, and nonvolatile aqueous salt solutions, if appropriate lids and covers are used;
- f. Sampling and Testing
  - i. Vents from continuous emissions monitors and other analyzers;
  - ii. Bench-scale laboratory equipment used for physical or chemical analysis, but not laboratory fume hoods or vents;
  - iii. Equipment used for quality control, quality assurance, or inspection purposes, including sampling equipment used to withdraw materials for analysis;
  - iv. Hydraulic and hydrostatic testing equipment;
  - v. Environmental chambers not using HAP gases;
  - vi. Soil gas sampling;
  - vii. Individual sampling points, analyzers, and process instrumentation, whose operation may result in emissions but that are not regulated as emission units;
- g. Safety Activities
  - i. Fire suppression systems;
  - ii. Emergency road flares;
- h. Miscellaneous Activities
  - i. Shock chambers;
  - ii. Humidity chambers;
  - iii. Solar simulators;
  - iv. Cathodic protection systems;
  - v. High voltage induced corona; and
  - vi. Filter draining.
- 145. "Unclassified area" means an area which the Administrator, because of a lack of adequate data, is unable to classify as an attainment or nonattainment area for a specific pollutant, and which, for purposes of this Chapter, is treated as an attainment area.
- 146. "Uncombined water" means condensed water containing analytical trace amounts of other chemical elements or compounds.
- 147. "Urban or suburban open area" means an unsubdivided tract of land surrounding a substantial urban development of a residential, industrial, or commercial nature and which, though near or within the limits of a city or town, may be uncultivated, used for agriculture, or lie fallow.
- 148. "Vacant lot" means a subdivided residential or commercial lot which contains no buildings or structures of a temporary or permanent nature.
- 149. "Vapor" means the gaseous form of a substance normally occurring in a liquid or solid state.
- 150. "Visibility impairment" means any humanly perceptible change in visibility (light extinction, visual range, contrast, coloration) from that which would have existed under natural conditions.
- 151. "Visible emissions" means any emissions which are visually detectable without the aid of instruments and which contain particulate matter.
- 152. "Volatile organic compounds" or "VOC" means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions. This includes any such organic compound other than the following:
  - a. Methane;
  - b. Ethane;
  - c. Methylene chloride (dichloromethane);
  - d. 1,1,1-trichloroethane (methyl chloroform);
  - e. 1,1,2-trichloro-1,2,2-trifluoroethane (CFC-113);
  - f. Trichlorofluoromethane (CFC-11);
  - g. Dichlorodifluoromethane (CFC-12);
  - h. Chlorodifluoromethane (HCFC-22);
  - i. Trifluoromethane (HFC-23);
  - j. 1,2-dichloro 1,1,2,2-tetrafluoroethane (CFC-114);
  - k. Chloropentafluoroethane (CFC-115);
  - l. 1,1,1-trifluoro 2,2-dichloroethane (HCFC-123);
  - m. 1,1,1,2-tetrafluoroethane (HFC-134a);
  - n. 1,1-dichloro 1-fluoroethane (HCFC-141b);
  - o. 1-chloro 1,1-difluoroethane (HCFC-142b);
  - p. 2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124);
  - q. Pentafluoroethane (HFC-125);
  - r. 1,1,2,2-tetrafluoroethane (HFC-134);
  - s. 1,1,1-trifluoroethane (HFC-143a);
  - t. 1,1-difluoroethane (HFC-152a);
  - u. Parachlorobenzotrifluoride (PCBTF);
  - v. Cyclic, branched, or linear completely methylated siloxanes;
  - w. Acetone;
  - x. Perchloroethylene (tetrachloroethylene);
  - y. 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca);
  - z. 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb);
  - aa. 1,1,1,2,3,4,4,5,5,5-decafluoropentane (HFC 43-10mee);
  - bb. Difluoromethane (HFC-32);
  - cc. Ethylfluoride (HFC-161);
  - dd. 1,1,1,3,3,3-hexafluoropropane (HFC-236fa);
  - ee. 1,1,2,2,3-pentafluoropropane (HFC-245ca);
  - ff. 1,1,2,3,3-pentafluoropropane (HFC-245ea);
  - gg. 1,1,1,2,3-pentafluoropropane (HFC-245eb);
  - hh. 1,1,1,3,3-pentafluoropropane (HFC-245fa);
  - ii. 1,1,1,2,3,3-hexafluoropropane (HFC-236ea);
  - jj. 1,1,1,3,3-pentafluorobutane (HFC-365mfc);
  - kk. Chlorofluoromethane (HCFC-31);
  - ll. 1 chloro-1-fluoroethane (HCFC-151a);
  - mm. 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a);
  - nn. 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxy-butane (C<sub>4</sub>F<sub>9</sub>OCH<sub>3</sub>);
  - oo. 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF<sub>3</sub>)<sub>2</sub>CFCF<sub>2</sub>OCH<sub>3</sub>);
  - pp. 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane (C<sub>4</sub>F<sub>9</sub>OC<sub>2</sub>H<sub>5</sub>);
  - qq. 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF<sub>3</sub>)<sub>2</sub>CFCF<sub>2</sub>OC<sub>2</sub>H<sub>5</sub>);
  - rr. Methyl acetate; and
  - ss. 1,1,1,2,2,3,3-heptafluoro-3-methoxypropane (n-C<sub>3</sub>F<sub>7</sub>OCH<sub>3</sub>, HFE—7000);
  - tt. 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl) hexane (HFE – 7500);
  - uu. 1,1,1,2,3,3,3-hentafluoropropane (HFC 227ea);

- vv. Methyl formate (HCOOCH<sub>3</sub>); and
- ww. (1) 1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethyl-pentane (HFE-7300);
- xx. Propylene carbonate; and
- yy. Dimethyl carbonate; and
- zz. Perfluorocarbon compounds that fall into these classes:

- i. Cyclic, branched, or linear, completely fluorinated alkanes.
- ii. Cyclic, branched, or linear, completely fluorinated ethers with no unsaturations.
- iii. Cycle, branched, or linear, completely fluorinated tertiary amines with no unsaturations; or
- iv. Sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine.

aaa. The following compound is VOC for purposes of all recordkeeping, emissions reporting, photochemical dispersion modeling and inventory requirements which apply to VOC and shall be uniquely identified in emission reports, but are not VOC for purposes of VOC emissions limitations or VOC content requirements: t-butyl acetate.

153. “Wood waste burner” means an incinerator designed and used exclusively for the burning of wood wastes consisting of wood slabs, scraps, shavings, barks, sawdust or other wood material, including those that generate steam as a by-product.

#### Historical Note

Former Section R9-3-101 repealed, new Section R9-3-101 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, paragraph (133) (Supp. 80-1). Editorial correction, paragraph (58) (Supp. 80-2). Amended effective July 9, 1980. Amended by adding new paragraphs (24), (55), (102), and (115) and renumbering accordingly, effective August 29, 1980 (Supp. 80-4). Amended effective May 28, 1982 (Supp. 82-3). Amended effective September 22, 1983 (Supp. 83-5). Amended paragraph (133), added paragraph (156) and renumbered accordingly effective September 28, 1984 (Supp. 84-5). Amended paragraph (29) by deleting (aa) and (bb) effective August 9, 1985 (Supp. 85-4). Former Section R9-3-101 renumbered without change as R18-2-101 (Supp. 87-3). Amended paragraph (98) effective December 1, 1988 (Supp. 88-4). Amended effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective October 7, 1994 (Supp. 94-4). Amended effective February 28, 1995 (Supp. 95-1). Amended effective August 1, 1995 (Supp. 95-3). Amended effective January 31, 1997; filed with the Office of Secretary of State January 10, 1997 (Supp. 97-1). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August

7, 2012 (Supp. 12-2).

#### R18-2-102. Incorporated Materials

The following documents are incorporated by reference and are on file with the Office of the Secretary of State (1700 W. Washington St., Suite 103, Phoenix, AZ 85007) and the Department (1110 W. Washington St., Phoenix, AZ 85007):

- Sections 1 and 7 of the Department’s “Arizona Testing Manual for Air Pollutant Emissions,” amended as of March 1992 (and no future editions).
- All ASTM test methods referenced in this Chapter as of the year specified in the reference (and no future amendments). They are available from the American Society for Testing and Materials, 1916 Race St., Philadelphia, PA 19103-1187.
- The U.S. Government Printing Office’s “Standard Industrial Classification Manual, 1987” (and no future editions).

#### Historical Note

Adopted effective September 26, 1990 (Supp. 90-3).

Amended effective February 3, 1993 (Supp. 93-1).

Amended effective November 15, 1993 (Supp. 93-4).

Amended effective June 10, 1994 (Supp. 94-2). Amended

effective December 7, 1995 (Supp. 95-4). Amended by

final rulemaking at 5 A.A.R. 3221, effective August 12,

1999 (Supp. 99-3). Amended by final rulemaking at 18

A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-103. Applicable Implementation Plan; Savings

No rule adopted in this Chapter shall preempt or nullify any applicable requirement or emission standard in an applicable implementation plan unless the Director revises the applicable implementation plan in conformance with the requirements of 40 CFR 51, Subpart F, and the Administrator approves the revision.

#### Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November

15, 1993 (Supp. 93-4).

### ARTICLE 2. AMBIENT AIR QUALITY STANDARDS; AREA DESIGNATIONS; CLASSIFICATIONS

#### R18-2-201. Particulate Matter: PM<sub>10</sub> and PM<sub>2.5</sub>

##### A. PM<sub>10</sub> Standards

- The level of the primary and secondary ambient air quality standards for PM<sub>10</sub> is 150 micrograms per cubic meter of PM<sub>10</sub> – 24-hour average concentration.
- To determine attainment of the primary and secondary standards, a person shall measure PM<sub>10</sub> in the ambient air by:
  - A reference method based on 40 CFR 50, Appendix J, and designated according to 40 CFR 53; or
  - An equivalent method designated according to 40 CFR 53.
- The primary and secondary 24-hour ambient air quality standards for PM<sub>10</sub> are attained when the expected number of days per calendar year with a 24-hour average concentration above 150 micrograms per cubic meter, determined according to 40 CFR 50, Appendix K, is less than or equal to one.

##### B. PM<sub>2.5</sub> Standards

- The primary ambient air quality standards for PM<sub>2.5</sub> are:
  - 15 micrograms per cubic meter of PM<sub>2.5</sub> – annual arithmetic mean concentration.
  - 35 micrograms per cubic meter of PM<sub>2.5</sub> – 24-hour average concentration.

2. The secondary ambient air quality standards for PM<sub>2.5</sub> are:
  - a. 15 micrograms per cubic meter of PM<sub>2.5</sub> – annual arithmetic mean concentration.
  - b. 35 micrograms per cubic meter of PM<sub>2.5</sub> – 24-hour average concentration.
3. To determine attainment of the primary and secondary standards, a person shall measure PM<sub>2.5</sub> in the ambient air by:
  - a. A reference method based on 40 CFR 50, Appendix L, and designated according to 40 CFR 53; or
  - b. An equivalent method designated according to 40 CFR 53.
4. The primary and secondary annual ambient air quality standards for PM<sub>2.5</sub> are met when the annual arithmetic mean concentration, determined according to 40 CFR 50, Appendix N, is less than or equal to 15 micrograms per cubic meter.
5. The primary and secondary 24-hour ambient air quality standards for PM<sub>2.5</sub> are met when the 98th percentile 24-hour concentration, determined according to 40 CFR 50, Appendix N, is less than or equal to 35 micrograms per cubic meter.

**Historical Note**

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-201 repealed, new Section R9-3-201 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (E) (Supp. 80-2). Amended effective August 29, 1980 (Supp. 80-4). Amended subsection(B)(1) and deleted subsections (C) through (E) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-201 renumbered without change as Section R18-2-201 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Section corrected to include subsection (B), which was inadvertently omitted in Supp. 05-3 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

**R18-2-202. Sulfur Oxides (Sulfur Dioxide)**

- A. The primary ambient air quality standards for sulfur oxides, measured as sulfur dioxide, are:
  1. 0.03 parts per million (ppm) (80 µg/m<sup>3</sup>) -- annual arithmetic mean.
  2. 0.14 parts per million (ppm) (365 µg/m<sup>3</sup>) – maximum 24-hour concentration not to be exceeded more than once per calendar year.
  3. 75 parts per billion (ppb) – maximum one-hour concentration. The one-hour primary standard is met at an ambient air quality monitoring site when the three-year average of the annual 99th percentile of the daily maximum one-hour average concentrations is less than or equal to 75 parts per billion, as determined according to 40 CFR 50, Appendix T.
- B. The secondary ambient air quality standard for sulfur oxides, measured as sulfur dioxide, is 0.5 parts per million (ppm) (1300 µg/m<sup>3</sup>) -- maximum three-hour concentration not to be exceeded more than once per year.
- C. The level of the standards shall be measured by a reference method based on 40 CFR 50, Appendix A or A-1, or by a Federal Equivalent Method designated according to 40 CFR 53.
- D. The standards in subsections (A)(1) and (2) shall apply:
  1. In an area designated nonattainment for a standard in subsection (A)(1) or (2) as of August 23, 2011, and areas not

meeting a state implementation plan call for a standard in subsection (A)(1) or (2), until the state submits pursuant to section 191 of the Act, and the Administrator approves, a state implementation plan providing for attainment the standard in subsection (A)(3) in that area.

2. In areas other than those identified in subsection (D)(1), until the effective date of the designation of that area, pursuant to section 107 of the act, for the standard in subsection (A)(3).

**Historical Note**

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-202 repealed, new Section R9-3-202 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended by deleting subsections (C) through (E) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-202 renumbered without change as Section R18-2-202 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

**R18-2-203. Ozone: One-hour Standard and Eight-hour Average Standard**

- A. One-hour standard. Until June 15, 2005:
  1. The one-hour ambient air quality standard for ozone is 0.12 ppm (235 micrograms per cubic meter).
  2. The one-hour secondary ambient air quality standard for ozone is 0.12 ppm (235 micrograms per cubic meter).
  3. The one-hour standards are attained when the expected number of days per calendar year with maximum hourly average concentrations above 0.12 ppm (235 micrograms per cubic meter) is less than or equal to 1, determined by 40 CFR 50, Appendix H.
- B. Eight-hour averaged standard.
  1. The eight-hour average primary ambient air quality standard for ozone is 0.075 ppm.
  2. The eight-hour average secondary ambient air quality standard for ozone is 0.075 ppm.
  3. To determine attainment of the primary and secondary standards, a person shall measure ozone in the ambient air by:
    - a. A reference method based on 40 CFR 50, Appendix D, and designated according to 40 CFR 53; or
    - b. An equivalent method designated according to 40 CFR 53.
  4. Eight-hour average primary and secondary ambient air quality standards for ozone are met at an ambient air quality monitoring site when the three-year average of the annual fourth highest daily maximum eight-hour average ozone concentration is less than or equal to 0.075 ppm, determined according to 40 CFR 50, Appendix P.

**Historical Note**

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-204 repealed, new Section R9-3-204 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-204 renumbered without change as Section R18-2-204 (Supp. 87-3). Section R18-2-103 renumbered from R18-2-204 and amended effective September 26, 1990

(Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-204. Carbon monoxide**

- A.** The primary ambient air quality standards for carbon monoxide are:
1. 9 parts per million (10 milligrams per cubic meter) -- maximum eight-hour concentration not to be exceeded more than once per year.
  2. 35 parts per million (40 milligrams per cubic meter) -- maximum one-hour concentration not to be exceeded more than once per year.
- B.** An eight-hour average shall be considered valid if at least 75% of the hourly averages for the eight-hour period are available. In the event that only six or seven hourly averages are available, the eight-hour average shall be computed on the basis of the hours available using 6 or 7 as the divisor.
- C.** When summarizing data for comparison with the standards, averages shall be stated to one decimal place. Comparison of the data with the levels of the standards in parts per million shall be made in terms of integers with fractional parts of 0.5 or greater rounding up.

#### **Historical Note**

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-205 repealed, new Section R9-3-205 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-205 renumbered without change as Section R18-2-205 (Supp. 87-3). Former Section R18-2-204 renumbered to R18-2-203, new Section R18-2-204 renumbered from R18-2-205 and amended effective September 26, 1990 (Supp. 90-3).

#### **R18-2-205. Nitrogen Oxides (Nitrogen Dioxide)**

- A.** The primary ambient air quality standards for oxides of nitrogen, measured in the ambient air as nitrogen dioxide, are:
1. 53 parts per billion – annual average concentration.
  2. 100 parts per billion – one-hour average concentration.
- B.** The secondary ambient air quality standard for nitrogen dioxide is 0.053 (parts per million (100 micrograms per cubic meter) -- annual arithmetic mean.
- C.** The levels of the standards shall be measured by a reference method based on 40 CFR 50, Appendix F or a federal equivalent method designated in accordance with 40 CFR 53.
- D.** The annual primary standard is met when the annual average concentration in a calendar year is less than or equal to 53 ppb, as determined in accordance with 40 CFR, Appendix S for the annual standard.
- E.** The one-hour primary standard is met when the three-year average of the annual 98th percentile of the daily maximum one-hour average concentration is less than or equal to 100 parts per billion, as determined in accordance with 40 CFR 50, Appendix S.
- F.** The secondary standard is attained when the annual arithmetic mean concentration in a calendar year is less than or equal to 0.053 ppm, rounded to three decimal places, with fractional parts equal to or greater than 0.0005 ppm rounded up. To demonstrate attainment, an annual mean shall be based upon hourly data that is at least 75% complete or upon data derived from the manual methods, that is at least 75% complete for the scheduled sampling days in each calendar quarter.

#### **Historical Note**

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-206 repealed, new Section R9-3-206 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-206 renumbered without change as Section R18-2-206 (Supp. 87-3). Former Section R18-2-205 renumbered to R18-2-204, new Section R18-2-205 renumbered from R18-2-206 and amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-206. Lead**

- A.** The primary ambient air quality standard for lead and its compounds, measured as elemental lead, is 0.15 micrograms per cubic meter – maximum arithmetic mean averaged over a three-month period.
- B.** The secondary ambient air quality standard for lead and its compounds, measured as elemental lead, is 0.15 micrograms per cubic meter – maximum arithmetic mean averaged over a three-month period.
- C.** The level of the standards shall be measured by a reference method based on 40 CFR 50, Appendix G and designated in accordance with 40 CFR 53, or by an equivalent designated in accordance with part 53 of this chapter.
- D.** The national primary and secondary ambient air quality standards for lead are met when the maximum arithmetic three-month mean concentration for a three-year period, as determined in accordance with 40 CFR 50, Appendix R, is less than or equal to 0.15 micrograms per cubic meter.
- E.** The former primary and secondary ambient air quality standards for lead of 1.5 micrograms per cubic meter averaged over a calendar quarter shall apply to an area until one year after the effective date of the designation of that area, pursuant to section 107 of the Act, for the standards in subsections (A) and (B).

#### **Historical Note**

Former Section R9-3-207 repealed effective May 14, 1979 (Supp. 79-1). New Section R9-3-207 adopted effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-207 renumbered without change as Section R18-2-207 (Supp. 87-3). Former Section R18-2-206 renumbered to R18-2-205, new Section R18-2-206 renumbered from R18-2-207 and amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-207. Renumbered**

#### **Historical Note**

Former Section R9-3-207 renumbered to R18-2-206 effective September 26, 1990 (Supp. 90-3).

#### **R18-2-208. Reserved**

#### **R18-2-209. Reserved**

#### **R18-2-210. Attainment, Nonattainment, and Unclassifiable Area Designations**

40 CFR 81.303 as amended as of July 1, 2014 (and no future amendments or editions) is incorporated by reference as an applicable requirement and on file with the Department of Environmental

Quality. 40 CFR 81.303 is available from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).  
Amended effective December 7, 1995 (Supp. 95-4).  
Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3).  
Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

**R18-2-213. Reserved**

**R18-2-214. Reserved**

#### **R18-2-215. Ambient air quality monitoring methods and procedures**

- A. Only those methods which have been either designated by the Administrator as reference or equivalent methods or approved by the Director shall be used to monitor ambient air.
- B. Quality assurance, monitor siting, and sample probe installation procedures shall be in accordance with procedures described in the Appendices to 40 CFR 58.
- C. The Director may approve other procedures upon a finding that the proposed procedures are substantially equivalent or superior to procedures in the Appendices to 40 CFR 58.

#### Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-215 renumbered without change as Section R18-2-215 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3).

#### **R18-2-216. Interpretation of Ambient Air Quality Standards and Evaluation of Air Quality Data**

Unless otherwise specified, interpretation of all ambient air quality standards contained in this Article shall be in accordance with 40 CFR 50, incorporated by reference in Appendix 2 of this Chapter.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-216 repealed, new Section R9-3-216 adopted effective August 29, 1980 (Supp. 80-4). Former Section R9-3-216 renumbered without change as Section R18-2-216 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### **R18-2-217. Designation and Classification of Attainment Areas**

- A. All attainment and unclassified areas or parts thereof shall be classified as either Class I, Class II or Class III.
- B. All of the following areas which were in existence on August 7, 1977, including any boundary changes to those areas which occurred subsequent to the date of enactment of the Clean Air Act Amendments of 1977 and before March 12, 1993, shall be Class I areas irrespective of attainment status and shall not be redesignated:
  1. International parks;
  2. National wilderness areas which exceed 5,000 acres in size;
  3. National memorial parks which exceed 5,000 acres in size; and
  4. National parks which exceed 6,000 acres in size.

- C. The following areas shall be designated only as Class I or II:
  1. An area which as of August 7, 1977, exceeds 10,000 acres in size and is one of the following:
    - a. A national monument,
    - b. A national primitive area,
    - c. A national preserve,
    - d. A national recreational area,
    - e. A national wild and scenic river,
    - f. A national wildlife refuge,
    - g. A national lakeshore or seashore.
  2. A national park or national wilderness area established after August 7, 1977, which exceeds 10,000 acres in size.
- D. All other areas shall be Class II areas unless redesignated under subsections (E) or (F).
- E. The Governor or the Governor's designee may redesignate areas of the state as Class I or Class II, provided that the following requirements are fulfilled:
  1. At least one public hearing is held in or near the area affected;
  2. Other states, Indian governing bodies and Federal Land Managers, whose land may be affected by the proposed redesignation are notified at least 30 days prior to the public hearing.
  3. A discussion document of the reasons for the proposed redesignation including a description and analysis of health, environmental, economic, social and energy effects of the proposed redesignation is prepared by the Governor or the Governor's designee. The discussion document shall be made available for public inspection at least 30 days prior to the hearing and the notice announcing the hearing shall contain appropriate notification of the availability of such discussion document.
  4. Prior to the issuance of notice respecting the redesignation of an area which includes any federal lands, the Governor or the Governor's designee has provided written notice to the appropriate Federal Land Manager and afforded the Federal Land Manager adequate opportunity, not in excess of 60 days, to confer with the state respecting the redesignation and to submit written comments and recommendations. The Governor or the Governor's designee shall publish a list of any inconsistency between such redesignation and such recommendations, together with the reasons for making such redesignation against the recommendation of the Federal Land Manager, if any Federal Land Manager has submitted written comments and recommendations.
  5. The redesignation is proposed after consultation with the elected leadership of local governments in the area covered by the proposed redesignation.
  6. The redesignation is submitted to the Administrator as a revision to the SIP.
- F. The Governor or the Governor's designee may redesignate areas of the state as Class III if all of the following criteria are met:
  1. Such redesignation meets the requirements of subsection (E);
  2. Such redesignation has been approved after consultation with the appropriate committee of the legislature if it is in session or with the leadership of the legislature if it is not in session.

## Department of Environmental Quality – Air Pollution Control

3. The general purpose units of local government representing a majority of the residents of the area to be redesignated concur in the redesignation;
  4. Such redesignation shall not cause, or contribute to, concentration of any air pollutant which exceeds any maximum allowable increase or maximum allowable concentration permitted under the classification of any area;
  5. For any new major source as defined in R18-2-401 or a major modification of such source which may be permitted to be constructed and operated only if the area in question is redesignated as Class III, any permit application or related materials shall be made available for public inspection prior to a public hearing.
  6. The redesignation is submitted to the Administrator as a revision to the SIP.
- G.** A redesignation shall not be effective until approved by the Administrator as part of an applicable implementation plan.
- H.** Lands within the exterior boundaries of Indian reservations may be redesignated only by the appropriate Indian governing body.

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (5), subparagraph (d) (Supp. 80-2). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-217 renumbered without change as Section R18-2-217 (Supp. 87-3). Amended and subsection (B) renumbered to Section R18-2-218 effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4).

**R18-2-218. Limitation of Pollutants in Classified Attainment Areas**

- A.** Areas designated as Class I, II, or III shall be limited to the following increases in air pollutant concentrations occurring over the baseline concentration; provided that for any period other than an annual period, the applicable maximum allowable increase may be exceeded once per year at any one location:

**CLASS I**

Maximum Allowable Increase (Micrograms per cubic meter)

Particulate matter: PM<sub>2.5</sub>

Annual arithmetic mean	1
24-hr maximum	2

Particulate matter: PM<sub>10</sub>

Annual arithmetic mean	4
24-hour maximum	8

Sulfur dioxide:

Annual arithmetic mean	2
24-hour maximum	5
3-hour maximum	25

Nitrogen dioxide:

Annual arithmetic mean	2.5
------------------------	-----

**CLASS II**

Particulate matter: PM<sub>2.5</sub>

Annual arithmetic mean	4
24-hr maximum	9

Particulate matter: PM<sub>10</sub>

Annual arithmetic mean	17
24-hour maximum	30

Sulfur dioxide:

Annual arithmetic mean	20
24-hour maximum	91
3-hour maximum	512

Nitrogen dioxide:

Annual arithmetic mean	25
------------------------	----

**CLASS III**

Particulate matter: PM<sub>2.5</sub>

Annual arithmetic mean	8
24-hr maximum	18

Particulate matter: PM<sub>10</sub>

Annual arithmetic mean	34
24-hour maximum	60

Sulfur dioxide:

Annual arithmetic mean	40
24-hour maximum	182
3-hour maximum	700

Nitrogen dioxide:

Annual arithmetic mean	50
------------------------	----

- B.** The baseline concentration shall be that ambient concentration level which exists in the baseline area at the time of the applicable minor source baseline data.
1. The major source baseline date is:
    - a. January 6, 1975, for sulfur dioxide and PM<sub>10</sub>.
    - b. February 8, 1988, for nitrogen dioxide.
    - c. October 20, 2010, for PM<sub>2.5</sub>.
  2. The minor source baseline date shall be the earliest date after the trigger date on which a major source as defined in R18-2-401 or major modification subject to 40 CFR 52.21 or R18-2-406 submits a complete application under the relevant regulations. The trigger date is:
    - a. August 7, 1977, for PM<sub>10</sub> and sulfur dioxide.
    - b. February 8, 1988, for nitrogen dioxide.
    - c. October 20, 2011, for PM<sub>2.5</sub>.
  3. A baseline concentration shall be determined for each pollutant for which there is a minor source baseline date and shall include both:
    - a. The actual emissions representative of sources in existence on the minor source baseline date, except as provided in subsection (B)(4); and
    - b. The allowable emissions of major sources as defined in R18-2-401 which commenced construction before the major source baseline date but were not in operation by the applicable minor source baseline date.
  4. The following shall not be included in the baseline concentration and shall affect the applicable maximum allowable increase:
    - a. Actual emissions from any major source as defined in R18-2-401 on which construction commenced after the major source baseline date; and
    - b. Actual emissions increases and decreases at any stationary source occurring after the minor source baseline date.
- C.** The baseline date shall be established for each pollutant for which maximum allowable increases or other equivalent measures have been established if both:
1. The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under section 107(d)(1)(A)(ii) or (iii) of the Act for the pollutant on the date of its complete application under 40 CFR 52.21 or R18-2-406; and
  2. In the case of a major source as defined in R18-2-401, the pollutant would be emitted in significant amounts, or in

the case of a major modification, there would be a significant net emissions increase of the pollutant.

- D. The baseline area shall be the AQCR that contains the area, designated as attainment or unclassifiable under section 107(d)(1)(A)(ii) or (iii) of the Act, in which the major source as defined in R18-2-401 or major modification establishing the minor source baseline date would construct or would have an air quality impact for the pollutant for which the minor source baseline date is established, as follows: greater than or equal to 1 microgram per cubic meter (annual average) for sulfur dioxide, nitrogen dioxide or PM<sub>10</sub>; or greater than or equal to 0.3 microgram per cubic meter (annual average) for PM<sub>2.5</sub>. Area redesignations under R18-2-217 that would redesignate a baseline area may not intersect or be smaller than the area of impact of any new major source as defined in R18-2-401 or a major modification which either:
  1. Establishes a minor source baseline date, or
  2. Is subject to either 40 CFR 52.21 or R18-2-406 and would be constructed in Arizona.
- E. The maximum allowable concentration of any air pollutant in any area to which subsection (A) applies shall not exceed a concentration for each pollutant equal to the concentration permitted under the ambient air quality standards contained in this Article.
- F. For purposes of determining compliance with the maximum allowable increases in ambient concentrations of an air pollutant, the following concentrations of such pollutant shall not be taken into account:
  1. Concentration of such pollutant attributable to the increase in emissions from major and stationary sources which have converted from the use of petroleum products, or natural gas, or both, by reason of a natural gas curtailment order which is in effect under the provisions of sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 792, over the emissions from such sources before the effective date of such order;
  2. The concentration of such pollutant attributable to the increase in emissions from major and stationary sources which have converted from using gas by reason of a natural gas curtailment plan in effect pursuant to the Federal Power Act, 16 U.S.C. 792 - 825r, over the emissions from such sources before the effective date of the natural gas curtailment plan;
  3. Concentrations of PM<sub>10</sub> attributable to the increase in emissions from construction or other temporary activities of a new or modified source;
  4. The increase in concentrations attributable to new sources outside the United States over the concentrations attributable to existing sources which are included in the baseline concentration; and
  5. Concentrations attributable to the temporary increase in emissions of sulfur dioxide, nitrogen oxides, or PM<sub>10</sub> from major sources as defined in R18-2-401 when the following conditions are met:
    - a. The operating permit issued to such sources specifies the time period during which the temporary emissions increase of sulfur dioxide, nitrogen oxides, or PM<sub>10</sub> would occur. Such time period shall not be renewable and shall not exceed two years unless a longer period is specifically approved by the Director.
    - b. No emissions increase shall be approved which would either:
      - i. Impact any portion of any Class I area or any portion of any other area where an applicable incremental ambient standard is known to be violated in that portion; or
      - ii. Cause or contribute to the violation of a state ambient air quality standard.
- c. The operating permit issued to such sources specifies that, at the end of the time period described in subsection (F)(5)(a), the emissions levels from the sources would not exceed the levels occurring before the temporary emissions increase was approved.
6. The exception granted with respect to increment consumption under subsections (F)(1) and (2) shall not apply more than five years after the effective date of the order or natural gas curtailment plan on which the exception is based.
- G. If the Director or the Administrator determines that the SIP is substantially inadequate to prevent significant deterioration or that an applicable maximum allowable increase as specified in subsection (A) is being violated, the SIP shall be revised to correct the inadequacy or the violation. The SIP shall be revised within 60 days of such a finding by the Director or within 60 days following notification by the Administrator, or by such later date as prescribed by the Administrator after consultation with the Director.
- H. The Director shall review the adequacy of the SIP on a periodic basis and within 60 days of such time as information becomes available that an applicable maximum allowable increase is being violated.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (5), subparagraph (d) (Supp. 80-2). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-217 renumbered without change as Section R18-2-217 (Supp. 87-3). Former Section R18-2-218 renumbered to R18-2-219, new Section R18-2-218 renumbered from R18-2-217(B) and amended effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-219. Repealed

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-218 repealed, new Section R9-3-218 adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-218 renumbered without change as Section R18-2-218 (Supp. 87-3). Former Section R18-2-219 renumbered to R18-2-220, new Section R18-2-219 renumbered from R18-2-218 and amended effective September 26, 1990 (Supp. 90-3). Section repealed by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-220. Air pollution emergency episodes

- A. Procedures shall be implemented by the Director in order to prevent the occurrence of ambient air pollutant concentrations which would cause significant harm to the health of persons, as specified in subsection (B)(4). The procedures and actions required for each stage are described in the Department's "Procedures for Prevention of Emergency Episodes," amended as of October 18, 1988 (and no future edition), which is incorporated herein by reference and on file with the Office of the Secretary of State.

B. The following stages are identified by air quality criteria in order to provide for sequential emissions reductions, public notification and increased Department monitoring and forecast responsibilities. The declaration of any stage, and the area of the state affected, shall be based on air quality measurements and meteorological analysis and forecast.

1. A Stage I air pollution alert shall be declared when any of the alert level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of alert level concentrations for the same pollutant during the subsequent 24-hour period. If, 48 hours after an alert has been initially declared, air pollution concentrations and meteorological conditions do not improve, the warning stage control actions shall be implemented but no warning shall be declared, unless air quality has deteriorated to the extent described in subsection (B)(2).
2. A Stage II air pollution warning shall be declared when any of the warning level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of concentrations of the same pollutant exceeding the warning level during the subsequent 24-hour period. If, 48 hours after a warning has been initially declared, air pollution concentrations and meteorological conditions do not improve, the emergency stage shall be declared and its control actions implemented.
3. A Stage III air pollution emergency shall be declared when any of the emergency level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of concentrations of the same pollutant exceeding the emergency level during the subsequent 24-hour period.
4. Summary of emergency episode and significant harm levels:

Pollutant	Averaging Time	Alert	Warning	Emergency	Significant Harm
Carbon monoxide (mg/m <sup>3</sup> )	1-hr	--	--	--	144
	4-hr	--	--	--	86.3
	8-hr	17	34	46	57.5
Nitrogen dioxide (ug/m <sup>3</sup> )	1-hr	1,130	2,260	3,000	3,750
	24-hr	282	565	750	938
Ozone (ppm)	1-hr	.2	.4	.5	.6
PM <sub>10</sub> (ug/m <sup>3</sup> )	24-hr	350	420	500	600
Sulfur dioxide (ug/m <sup>3</sup> )	24-hr	800	1,600	2,100	2,620

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Editorial correction, subsection (B), paragraph (2) (Supp. 80-1). Editorial correction, subsection (A) (Supp. 80-2). Former Section R9-3-219 repealed, new Section R9-3-219 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-219 renumbered without change as Section R18-2-219 (Supp. 87-3). Section R18-2-220 renumbered from R18-2-219 and amended effective September 26, 1990 (Supp. 90-3).

### ARTICLE 3. PERMITS AND PERMIT REVISIONS

#### R18-2-301. Definitions

The following definitions apply to this Article:

1. "Alternative method" means any method of sampling and analyzing for an air pollutant which is not a reference or equivalent method but which has been demonstrated to produce results adequate for the Director's determination of compliance in accordance with R18-2-311(D).
2. "Billable permit action" means the issuance or denial of a new permit, significant permit revision, or minor permit revision, or the renewal of an existing permit.
3. "Capacity factor" means the ratio of the average load on a machine or equipment for the period of time considered to the capacity rating of the machine or equipment.
4. "CEM" means a continuous emission monitoring system as defined in R18-2-101.
5. "Complete" means, in reference to an application for a permit, permit revision or registration, that the application contains all the information necessary for processing the application. Designating an application complete for purposes of a permit, permit revisions or registration processing does not preclude the Director from requesting or accepting any additional information.
6. "Dispersion technique" means any technique which attempts to affect the concentration of a pollutant in the ambient air by any of the following:
  - a. Using that portion of a stack which exceeds good engineering practice stack height;
  - b. Varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or
  - c. Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust gases from several existing stacks into one stack; or other selective handling of exhaust gas streams so as to increase the exhaust gas plume rise. This shall not include any of the following:
    - i. The reheating of a gas stream, following use of a pollution control system, for the purpose of returning the gas to the temperature at which it was originally discharged from the facility generating the gas stream.
    - ii. The merging of exhaust gas streams under any of the following conditions:
      - (1) The source owner or operator demonstrates that the facility was originally designed and constructed with such merged gas streams;
      - (2) After July 8, 1985, such merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant, applying only to the emission limitation for that pollutant; or
      - (3) Before July 8, 1985, such merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, an increase in the quantity of pollutants actually emitted prior to the

- merging, the reviewing agency shall presume that merging was significantly motivated by an intent to gain emissions credit for greater dispersion. Absent a demonstration by the source owner or operator that merging was not significantly motivated by such intent, the reviewing agency shall deny credit for the effects of such merging in calculating the allowable emissions for the source.
- iii. Smoke management in agricultural or silvicultural prescribed burning programs.
  - iv. Episodic restrictions on residential woodburning and open burning.
  - v. Techniques which increase final exhaust gas plume rise where the resulting allowable emissions of sulfur dioxide from the facility do not exceed 5,000 tons per year.
7. "Emissions allowable under the permit" means a permit term or condition determined at issuance to be required by an applicable requirement that establishes an emissions limit (including a work practice standard) or an emissions cap that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject.
  8. "Fossil fuel-fired steam generator" means a furnace or boiler used in the process of burning fossil fuel for the primary purpose of producing steam by heat transfer.
  9. "Fuel oil" means Number 2 through Number 6 fuel oils as specified in ASTM D-396-90a (Specification for Fuel Oils), gas turbine fuel oils Numbers 2-GT through 4-GT as specified in ASTM D-2880-90a (Specification for Gas Turbine Fuel Oils), or diesel fuel oils Numbers 2-D and 4-D as specified in ASTM D-975-90a (Specification for Diesel Fuel Oils).
  10. "Itemized bill" means a breakdown of the permit processing time into the categories of pre-application activities, completeness review, substantive review, and public involvement activities, and within each category, a further breakdown by employee name.
  11. "Major source threshold" means the lowest applicable emissions rate for a pollutant that would cause the source to be a major source at the particular time and location, under the definition of major source in R18-2-101.
  12. "Minor NSR Modification" means any of the following changes that do not qualify as a major source or major modification:
    - a. Any physical change in or change in the method of operation of an emission unit or a stationary source that either:
      - i. Increases the potential to emit of a regulated minor NSR pollutant by an amount greater than the permitting exemption thresholds, or
      - ii. Results in emissions of a regulated minor NSR pollutant not previously emitted by such emission unit or stationary source in an amount greater than the permitting exemption thresholds.
    - b. Construction of one or more new emissions units that have the potential to emit regulated minor NSR pollutants at an amount greater than the permitting exemption threshold.
    - c. A change covered by subsection (12)(a) or (b) of this Section constitutes a minor NSR modification regardless of whether there will be a net decrease in total source emissions or a net increase in total source emissions that is less than the permitting exemption threshold as a result of decreases in the potential to emit of other emission units at the same stationary source.
  - d. For the purposes of this subsection the following do not constitute a physical change or change in the method of operation:
    - i. A change consisting solely of the construction of, or changes to, a combination of emissions units qualifying as a categorically exempt activity.
    - ii. For a stationary source that is required to obtain a Class II permit under R18-2-302 and that is subject to source-wide emissions caps under R18-2-306.01 or R18-2-306.02, a change that will not result in the violation of the existing emissions cap for that regulated minor NSR pollutant.
    - iii. Replacement of an emission unit by a unit with a potential to emit regulated minor NSR pollutants that is less than or equal to the potential to emit of the existing unit, provided the replacement does not cause an increase in emissions at other emission units at the stationary source. A unit installed under this provision is subject to any limits applicable to the unit it replaced.
    - iv. Routine maintenance, repair, and replacement.
    - v. Use of an alternative fuel or raw material by reason of an order under Sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 792, or by reason of a natural gas curtailment plan under the Federal Power Act, 16 U.S.C. 792 to 825r.
    - vi. Use of an alternative fuel by reason of an order or rule under Section 125 of the Act.
    - vii. Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste.
    - viii. Use of an alternative fuel or raw material by a stationary source that either:
      - (1) The source was capable of accommodating before December 12, 1976, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter; or
      - (2) The source is approved to use under any permit issued under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
    - ix. An increase in the hours of operation or in the production rate, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
    - x. Any change in ownership at a stationary source
    - xi. The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, if the project complies with:
      - (1) The SIP, and
      - (2) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.

- xii. For electric utility steam generating units located in attainment and unclassifiable areas only, the installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, if the project does not result in an increase in the potential to emit any regulated pollutant emitted by the unit. This exemption applies on a pollutant-by-pollutant basis.
- xiii. For electric utility steam generating units located in attainment and unclassifiable areas only, the reactivation of a very clean coal-fired electric utility steam generating unit.
- e. For purposes of this subsection:
  - i. “Potential to emit” means the lower of a source’s or emission unit’s potential to emit or its allowable emissions.
  - ii. In determining potential to emit, the fugitive emissions of a stationary source shall not be considered unless the source belongs to a section 302(j) category.
  - iii. All of the roadways located at a stationary source constitute a single emissions unit.
- 13. “NAICS” means the five- or six-digit North American Industry Classification System-United States, 1997, number for industries used by the U.S. Department of Commerce.
- 14. “Permit processing time” means all time spent by Air Quality Division staff or consultants on tasks specifically related to the processing of an application for the issuance or renewal of a particular permit or permit revision, including time spent processing an application that is denied.
- 15. “Quantifiable” means, with respect to emissions, including the emissions involved in equivalent emission limits and emission trades, capable of being measured or otherwise determined in terms of quantity and assessed in terms of character. Quantification may be based on emission factors, stack tests, monitored values, operating rates and averaging times, materials used in a process or production, modeling, or other reasonable measurement practices.
- 16. “Registration” means a registration under R18-2-302.01.
- 17. “Replicable” means, with respect to methods or procedures, sufficiently unambiguous that the same or equivalent results would be obtained by the application of the method or procedure by different users.
- 18. “Responsible official” means one of the following:
  - a. For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either:
    - i. The facilities employ more than 250 persons or have gross annual sales or expenditures exceeding \$25 million (in second quarter 1980 dollars); or
    - ii. The delegation of authority to such representatives is approved in advance by the permitting authority;
  - b. For a partnership or sole proprietorship: a general partner or the proprietor, respectively;
  - c. For a municipality, state, federal, or other public agency: Either a principal executive officer or ranking elected official. For the purposes of this Article, a principal executive officer of a federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a Regional Administrator of EPA); or
  - d. For affected sources:
    - i. The designated representative in so far as actions, standards, requirements, or prohibitions under Title IV of the Act or the regulations promulgated thereunder are concerned; and
    - ii. The designated representative for any other purposes under 40 CFR 70.
- 19. “Small source” means a source with a potential to emit, without controls, less than the rate defined as permitting exemption thresholds in R18-2-101, but required to obtain a permit solely because it is subject to a standard under 40 CFR 63.
- 20. “Startup” means the setting in operation of a source for any purpose.
- 21. “Synthetic minor” means a source with a permit that contains voluntarily accepted emissions limitations, controls, or other requirements (for example, a cap on production rates or hours of operation, or limits on the type of fuel) under R18-2-306.01 to reduce the potential to emit to a level below the major source threshold.
- 22. “Uncontrolled potential to emit” means the maximum capacity of a stationary source to emit a pollutant, excluding secondary emissions, under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design only if the limitation or the effect it would have on emissions is subject to an elective limit under R18-2-302.01(F).

#### Historical Note

Former Section R18-2-301 renumbered to R18-2-302, new Section R18-2-301 adopted effective September 26, 1990 (Supp. 90-3). Correction to table in subsection (A)(13) (Supp. 93-1). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

Amended effective August 1, 1995 (Supp. 95-3).

Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-302. Applicability; Registration; Classes of Permits

- A. Except as otherwise provided in this Article, no person shall begin actual construction of, operate, or make a modification to any stationary source subject to regulation under this Article, without obtaining a registration, permit or permit revision from the Director.
- B. Class I and II permits and registrations shall be required as follows:
  - 1. A Class I permit shall be required for a person to begin actual construction of or operate any of the following:
    - a. Any major source,

## Department of Environmental Quality – Air Pollution Control

- b. Any solid waste incineration unit required to obtain a permit pursuant to Section 129(e) of the Act,
  - c. Any affected source, or
  - d. Any stationary source in a source category designated by the Administrator pursuant to 40 CFR 70.3 and adopted by the Director by rule.
2. Unless a Class I permit is required, a Class II permit shall be required for:
- a. A person to begin actual construction of or operate any stationary source that emits or has the uncontrolled potential to emit, significant quantities of regulated NSR pollutants;
  - b. A person to make a physical or operational change to a stationary source that would cause the source to emit, or have the uncontrolled potential to emit significant quantities of regulated NSR pollutants.
  - c. A person to begin actual construction of a source subject to Article 17 of this Chapter.
  - d. A person to make a modification subject to Article 17 of this Chapter to a source for which a permit has not been issued under this Article.
  - e. A person to begin actual construction of or modify a stationary source that otherwise would be subject to registration but that the Director has determined requires a permit under R18-2-302.01(B)(3)(b).
3. Until the effective date of the Administrator's approval of the registration program in R18-2-302.01 into the state implementation plan, unless a Class I permit is required, a Class II permit shall be required for any of the activities that would require a registration under subsections (B)(4)(b) and (c).
4. After the effective date of the Administrator's approval of R18-2-302.01 into the state implementation plan, unless a Class I or II permit is required, registration shall be required for:
- a. A person to begin actual construction of or operate any stationary source that emits or has the maximum capacity to emit under its physical and operational design, without taking any limitations on operations or air pollution controls into account, any regulated minor NSR pollutant in an amount greater than or equal to a permitting exemption threshold.
  - b. A person to begin actual construction of or operate any stationary source subject to a standard under section 111 of the Act, except that a stationary source is not required to register solely because it is subject to any of the following standards:
    - i. 40 CFR 60, Subpart AAA (Residential Wood Heaters).
    - ii. 40 CFR 60, Subpart IIII (Stationary Compression Ignition Internal Combustion Engines).
    - iii. 40 CFR 60, Subpart JJJJ (Stationary Spark Ignition Internal Combustion Engines).
  - c. A person to begin actual construction of or operate any stationary source, including an area source, subject to a standard under section 112 of the Act, except that a stationary source is not required to register solely because it is subject to any of the following standards:
    - i. 40 CFR 61.145.
    - ii. 40 CFR 63, Subpart ZZZZ (Reciprocating Internal Combustion Engines).
    - iii. 40 CFR 63, Subpart WWWW (Ethylene Oxide Sterilizers).
    - iv. 40 CFR 63, Subpart CCCCC (Gasoline Distribution).
    - v. 40 CFR 63, Subpart HHHHHH (Paint Stripping and Miscellaneous Surface Coating Operations).
    - vi. 40 CFR 63, Subpart JJJJJ (Industrial, Commercial, and Institutional Boilers Area Sources), published at 76 FR 15554 (March 21, 2011).
    - vii. A regulation or requirement under section 112(r) of the Act.
  - d. A physical or operational change to a source that would cause the source to emit or have the maximum capacity to emit under its physical and operational design, without taking any limitations on operations or air pollution control into account, any regulated minor NSR pollutant in excess of a permitting exemption threshold.
- C. Notwithstanding subsections (A) and (B), the following stationary sources do not require a permit or registration unless the source is a major source, or unless operation without a permit would result in a violation of the Act:
- 1. A stationary source that consists solely of a single categorically exempt activity plus any combination of trivial activities.
  - 2. Agricultural equipment used in normal farm operations. "Agricultural equipment used in normal farm operations" does not include equipment classified as a source that requires a permit under Title V of the Act, or that is subject to a standard under 40 CFR 60, 61 or 63.
- D. No person may construct or reconstruct any major source of hazardous air pollutants, unless the Director determines that maximum achievable control technology emission limitation (MACT) for new sources under Section 112 of the Act will be met. If MACT has not been established by the Administrator, such determination shall be made on a case-by-case basis pursuant to 40 CFR 63.40 through 63.44, as incorporated by reference in R18-2-1101(B). For purposes of this subsection, constructing and reconstructing a major source shall have the meaning prescribed in 40 CFR 63.41.
- E. Elective limits or controls adopted under R18-2-302.01(F) shall not be considered in determining whether a source requires registration but shall be considered in determining any of the following:
- 1. Whether the registration is subject to the public participation requirements of R18-2-330, as provided in R18-2-302.01(B)(3)(a).
  - 2. Whether review for possible interference with attainment or maintenance of ambient standards is required under R18-2-302.01(C).
  - 3. Whether the source requires a Class II permit, as provided in subsection (B)(2)(a) or (b).
- F. The fugitive emissions of a stationary source shall not be considered in determining whether the source requires a Class II permit under subsection (B)(2)(a) or (b) or a registration under subsection (B)(4)(a) or (e), unless the source belongs to a section 302(j) category. If a permit is required for a stationary source, the fugitive emissions of the source shall be subject to all of the requirements of this Article.
- G. Notwithstanding subsections (A) and (B) of this Section, a person may begin actual construction, but not operation, of a source requiring a Class I permit or Class I permit revision upon the Director's issuance of the proposed final permit or proposed final permit revision.

**Historical Note**

Amended effective August 7, 1975 (Supp. 75-1).

Amended as an emergency effective December 15, 1975

(Supp. 75-2). Amended effective May 10, 1976 (Supp.

76-3). Amended effective April 12, 1977 (Supp. 77-2). Amended effective March 24, 1978 (Supp. 78-2). Former

Section R9-3-301 repealed, new Section R9-3-301 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended effective May 28, 1982 (Supp. 82-3). Amended subsections (B) and (C) effective September 22, 1983 (Supp. 83-5). Amended subsection (B), paragraph (3) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-301 renumbered without change as Section R18-2-301 (Supp. 87-3). Former Section R18-2-302 renumbered to R18-2-302.01, new Section R18-2-302 renumbered from R18-2-301 and amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-302.01. Source Registration Requirements**

**A.** Application. An application for registration shall be submitted on the form specified by the Director and shall include the following information:

1. The name of the applicant.
2. The physical location of the source, including the street address, city, county, zip code and latitude and longitude coordinates.
3. The source's uncontrolled potential to emit each regulated minor NSR pollutant calculated in accordance with R18-2-327(C).
4. Identification of any elective limits or controls adopted under subsection (F).
5. In the case of a modification, each increase in the source's potential to emit that exceeds the applicable threshold in subsection (G)(1)(a).
6. Identification of the method used to determine the potential to emit or change in potential to emit specified under R18-2-302(B)(4)(a) or (d) or subsection (G)(1)(a) of this Section.
7. Process information for the source, including a list of emission units, design capacity, operations schedule, and identification of emissions control devices.

**B.** Registration Processing Procedures.

1. The Department shall complete a review of a registration application for administrative completeness within 30 calendar days, calculated in accordance with A.A.C. R18-1-503, after its receipt.
2. The Department shall complete a substantive review and take final action on a registration application within 60 calendar days if no hearing is requested, and 90 calendar days if a hearing is requested, calculated in accordance with A.A.C. R18-1-504, after the application is administratively complete.
3. Public Participation.
  - a. Except as provided in subsection (B)(3)(b), a registration for construction of a source shall be subject to the public notice and participation requirements of R18-2-330. The materials relevant to the registration decision made available to the public under R18-2-330(D)(11) shall include any determination made or modeling conducted by the Director under subsection (C).
  - b. A registration for construction of a source shall not be subject to the public notice and participation requirements of R18-2-330, if the source's uncon-

trolled potential to emit each regulated minor NSR pollutant is less than the applicable permitting exemption threshold.

**C.** Review for NAAQS Compliance; Requirement to Obtain a Permit.

1. The Director shall review each application for registration of a source with the uncontrolled potential to emit any regulated minor NSR pollutant in an amount equal to or greater than the permitting exemption threshold. The purpose of the review shall be to determine whether the new or modified source may interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter. In making the determination required by this subsection, the Director shall take into account the following factors:
    - a. The source's emission rates, including fugitive emission rates, taking into account any elective limits or controls adopted under subsection (F).
    - b. The location of emission units within the facility and their proximity to the ambient air.
    - c. The terrain in which the source is or will be located.
    - d. The source type.
    - e. The location and emissions of nearby sources.
    - f. Background concentrations of regulated minor NSR pollutants.
  2. The Director may undertake the review specified in subsection (C)(1) for a source with the uncontrolled potential to emit regulated minor NSR pollutants in an amount less than the permitting exemption threshold.
  3. If the Director determines under subsection (C)(1) or (C)(2) that a source's emissions may interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter, the Director shall perform a SCREEN model run for each regulated minor NSR pollutant for which that determination has been made.
  4. If the Director determines, based on performance of the SCREEN model pursuant to subsection (C)(3), that a source's emissions, taking into account any elective limits or controls adopted under subsection (F), will interfere with attainment of a standard imposed in Article 2 of this Chapter, the Director shall deny the application for registration. Notwithstanding R18-2-302(B)(4), the owner or operator of the source shall be required to obtain a permit under R18-2-302 and shall comply with R18-2-334 before beginning actual construction of the source or modification.
- D.** Notwithstanding R18-2-302(B)(4)(b) and (c), the Director shall deny an application for registration for a source subject to a standard under section 111 or 112 of the Act and require the owner or operator to obtain a permit under R18-2-302, if the Director determines based on the following factors that the requirement to obtain a permit is warranted:
1. The size and complexity of the source.
  2. The complexity of the section 111 or 112 standard applicable to the source.
  3. The public health or environmental risks posed by the pollutants subject to regulation under the section 111 or 112 standard.
- E.** Registration Contents. A registration shall contain the following elements:
1. Identification of each emission unit subject to an applicable requirement and all applicable requirements that apply to the unit, including any testing, monitoring, recordkeeping and reporting obligations imposed by the applicable requirement or by R18-2-312.

2. Any elective limits or controls and associated operating, maintenance, monitoring and recordkeeping requirements adopted pursuant to subsection (F).
  3. A requirement to retain any records required by the registration at the source for at least three years in a form that is suitable for expeditious inspection and review.
  4. For any source that has adopted elective limits or controls under subsection (F), a requirement to submit an annual compliance report on the form provided by the Director in the registration.
- F. Elective Limits or Controls.** The owner or operator of a source requiring registration may elect to include any of the following emission limitations in the registration, provided the registration also includes the operating, maintenance, monitoring and recordkeeping requirements specified below for the limitation.
1. A limitation on the hours of operation of any process or combination of processes. The owner or operator shall maintain a log or readily available business records showing actual operating hours through the preceding operating day for the process or processes subject to the limitation.
  2. A limitation on the production rate for any process or combination of processes. The owner or operator shall maintain a log or readily available business records showing the actual production rate through the preceding operating day for the process or processes subject to the limitation.
  3. A requirement to operate a fabric filter for the control of particulate matter emissions.
    - a. The owner or operator shall operate the fabric filter at all times that the emission unit controlled by the fabric filter is operated.
    - b. The owner or operator shall inspect the fabric filter at least once per month for tears and leaks and shall promptly repair any tears or leaks identified.
    - c. The owner or operator shall operate and maintain the fabric filter in substantial compliance with the manufacturer's operation and maintenance recommendations.
    - d. The owner or operator shall keep a log or readily available business records of the inspections required by subsection (F)(3)(b) and the maintenance activities required by subsection (F)(3)(c).
  4. Limitations on the concentration of VOC or hazardous air pollutants in process materials. The owner or operator shall maintain a log or readily available business records showing the VOC or hazardous air pollutant concentration in each material subject to such a limitation used during the current calendar year.
- G. Revised Registrations.**
1. Unless a Class II permit is required under R18-2-302(B)(2)(b), the owner or operator of a registered source shall file a revised registration on the occurrence of any of the following:
    - a. A modification to the source that would result in an increase in the source's uncontrolled potential to emit exceeding any of the following amounts:
      - i. 2.5 tons per year for NO<sub>x</sub>, SO<sub>2</sub>, PM<sub>10</sub>, PM<sub>2.5</sub>, VOC or CO.
      - ii. 0.3 tons per year for lead.
    - b. Relocation of a portable source.
    - c. The transfer of the source to a new owner.
  2. The requirements of subsection (B) shall not apply to a revised registration. The owner or operator may begin actual construction and operation of the modified, relocated or transferred source on filing the revised registration.
- H. Registration Term.**
1. A source's registration shall expire five years after the date of issuance of the last registration for the source or any modification to the source.
  2. A source shall submit an application for renewal of a registration not later than six months before expiration of the registration's term.
  3. If a source submits a timely and complete application for renewal of a registration, the source's authorization to operate under its existing registration shall continue until the Director takes final action on the application.
  4. The Director may terminate a registration under R18-2-321(C). If the Director terminates a registration under R18-2-321(C)(3), the owner or operator shall be required to apply for a permit for the source under R18-2-302.
- I. Delayed Effective Date.** This Section shall take effect on the effective date of the Administrator's action approving it as part of the state implementation plan.
- Historical Note**
- Amended effective August 7, 1975 (Supp. 75-1); Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective October 2, 1979 (Supp. 79-5). Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-302 renumbered without change as Section R18-2-302 (Supp. 87-3). Section R18-2-302.01 renumbered from Section R18-2-302 and amended effective September 26, 1990 (Supp. 90-3). Section repealed effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).
- R18-2-303. Transition from Installation and Operating Permit Program to Unitary Permit Program; Registration Transition; Minor NSR Transition**
- A.** An installation or operating permit issued before September 1, 1993, and the authority to operate, as provided in Laws 1992, Ch. 299, § 65, continues in effect until the installation or operating permit is terminated, or until the Director issues or denies a Class I or Class II permit to the source, whichever is earlier.
  - B.** The terms and conditions of installation permits issued before September 1, 1993, or in permits or permit revisions issued under R18-2-302 and authorizing the construction or modification of a stationary source, remain federal applicable requirements unless modified or revoked by the Director.
  - C.** All sources in existence on September 1, 2012, requiring a registration shall provide notice to the Director by no later than December 1, 2012, on a form provided by the Director.
  - D.** All sources requiring a registration that are in existence on the date R18-2-302.01 becomes effective under R18-2-302.01(I) may submit applications for registration at any time after R18-2-302.01 is effective and shall submit an application no later than 180 days after receipt of written notice from the Director that an application is required. Applications to register the construction or modification of a source must be submitted, and the registration must be issued, before the applicant begins actual construction of the source or modification.
  - E.** Sources in existence on the date R18-2-334 becomes effective under R18-2-334(I) are not subject to R18-2-334, unless the source undertakes a minor NSR modification. Notwithstanding any other provision of this Chapter, R18-2-334 shall apply

only to applications for permits or permit revisions filed after the date R18-2-334 takes effect under R18-2-334(I).

#### Historical Note

Amended effective August 7, 1975 (Supp. 75-1).  
Amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-303 repealed, new Section R9-3-303 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-303 repealed, new Section R9-3-303 adopted effective October 2, 1979 (Supp. 79-5).  
Amended effective May 28, 1982 (Supp. 82-3). Amended subsection (D), paragraph (1) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-303 renumbered without change as Section R18-2-303 (Supp. 87-3).  
Amended effective September 26, 1990 (Supp. 90-3).  
Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-304. Permit Application Processing Procedures

A. Unless otherwise noted, this Section applies to each source requiring a Class I or II permit or permit revision.

B. Standard Application Form and Required Information. To apply for any permit in this Chapter, applicants shall complete the "Standard Permit Application Form" and supply all information required by the "Filing Instructions" as shown in Appendix 1. The Director, either upon the Director's own initiative or on the request of a permit applicant, may waive a requirement that specific information or data be submitted in the application for a Class II permit for a particular source or category of sources if the Director determines that the information or data would be unnecessary to determine all of the following:

1. The applicable requirements to which the source may be subject;
2. That the source is so designed, controlled, or equipped with such air pollution control equipment that it may be expected to operate without emitting or without causing to be emitted air contaminants in violation of the provisions of A.R.S. Title 49, Chapter 3, Article 2 and this Chapter;
3. The fees to which the source may be subject;
4. A proposed emission limitation, control, or other requirement that meets the requirements of R18-2-306.01 or R18-2-306.02.

C. A timely application is:

1. For a source, that becomes subject to the permit program as a result of a change in regulation and not as a result of construction or a physical or operational change, one that is submitted within 12 months after the source becomes subject to the permit program.
2. For purposes of permit renewal, a timely application is one that is submitted at least six months, but not more than 18 months, prior to the date of permit expiration.
3. Any source under R18-2-326(A)(3) which becomes subject to a standard promulgated by the Administrator pursuant to section 112(d) of the Act shall, within 12 months of the date on which the standard is promulgated, submit an application for a permit revision demonstrating how the source will comply with the standard.

D. If an applicable implementation plan allows the determination of an alternative emission limit, a source may, in its application, propose an emission limit that is equivalent to the emission limit otherwise applicable to the source under the applicable implementation plan. The source shall also demonstrate that the equivalent limit is quantifiable, accountable,

enforceable, and subject to replicable compliance determination procedures.

E. A complete application shall comply with all of the following:

1. To be complete, an application shall provide all information required by subsection (B) (standard application form section). An application for permit revision only need supply information related to the proposed change, unless the source's proposed permit revision will change the permit from a Class II permit to a Class I permit. A responsible official shall certify the submitted information consistent with subsection (H) (Certification of Truth, Accuracy, and Completeness).
2. An application for a new permit or permit revision shall contain an assessment of the applicability of the requirements of Article 4 of this Chapter. If the applicant determines that the proposed new source is a major source as defined in R18-2-401, or the proposed permit revision constitutes a major modification as defined in R18-2-101, then the application shall comply with all applicable requirements of Article 4.
3. An application for a new permit or permit revision shall contain an assessment of the applicability of Minor New Source Review requirements in R18-2-334. If the applicant determines that the proposed new source is subject to R18-2-334, or the proposed permit revision constitutes a Minor NSR Modification, then the application shall comply with all applicable requirements of R18-2-334.
4. An application for a new permit or a permit revision shall contain an assessment of the applicability of the requirements established under Article 17 of this Chapter. If the applicant determines that the proposed new source permit or permit revision is subject to the requirements of Article 17 of this Chapter, the application shall comply with all applicable requirements of that Article.
5. Except for proposed new major sources or major modifications subject to the requirements of Article 4 of this Chapter, an application for a new permit, a permit revision, or a permit renewal shall be deemed to be complete unless, within 60 days of receipt of the application, the Director notifies the applicant by certified mail that the application is not complete.
6. If a source wishes to voluntarily enter into an emissions limitation, control, or other requirement pursuant to R18-2-306.01, the source shall describe that emissions limitation, control, or other requirement in its application, along with proposed associated monitoring, recordkeeping, and reporting requirements necessary to demonstrate that the emissions limitation, control, or other requirement is permanent, quantifiable, and otherwise enforceable as a practical matter.
7. If, while processing an application that has been determined or deemed to be complete, the Director determines that additional information is necessary to evaluate or take final action on that application, the Director may request such information in writing and set a reasonable deadline for a response. Except for minor permit revisions as set forth in R18-2-319, a source's ability to continue operating without a permit, as set forth in subsection (J), shall be in effect from the date the application is determined to be complete until the final permit is issued, provided that the applicant submits any requested additional information by the deadline specified by the Director.
7. The completeness determination shall not apply to revisions processed through the minor permit revision process.

9. Activities which are insignificant pursuant to the definition of insignificant activities in R18-2-101 shall be listed in the application. The application need not provide emissions data regarding insignificant activities. If the Director determines that an activity listed as insignificant does not meet the requirements of the definition of insignificant activities in R18-2-101, the Director shall notify the applicant in writing and specify additional information required.
  10. If a permit applicant requests terms and conditions allowing for the trading of emission increases and decreases in the permitted facility solely for the purpose of complying with a federally enforceable emission cap that is established in the permit independent of otherwise applicable requirements, the permit applicant shall include in its application proposed replicable procedures and permit terms that ensure the emissions trades are quantifiable and enforceable.
  11. The Director is not in disagreement with a notice of confidentiality submitted with the application pursuant to A.R.S. § 49-432.
- F.** A source applying for a Class I permit that has submitted information with an application under a claim of confidentiality pursuant to A.R.S. § 49-432 and R18-2-305 shall submit a copy of such information directly to the Administrator.
- G.** Duty to Supplement or Correct Application. Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a proposed permit.
- H.** Certification of Truth, Accuracy, and Completeness. Any application form, report, or compliance certification submitted pursuant to this Chapter shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this Article shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- I.** Action on Application.
1. The Director shall issue or deny each permit according to the provisions of A.R.S. § 49-427. The Director may issue a permit with a compliance schedule for a source that is not in compliance with all applicable requirements at the time of permit issuance.
  2. In addition, a permit may be issued, revised, or renewed only if all of the following conditions have been met:
    - a. The application received by the Director for a permit, permit revision, or permit renewal shall be complete according to subsection (E).
    - b. Except for revisions qualifying as administrative or minor under R18-2-318 and R18-2-319, all of the requirements for public notice and participation under R18-2-330 shall have been met.
    - c. For Class I permits, the Director shall have complied with the requirements of R18-2-307 for notifying and responding to affected states, and if applicable, other notification requirements of R18-2-402(D)(2) and R18-2-410(C)(2).
    - d. For Class I and II permits, the conditions of the permit shall require compliance with all applicable requirements.
    - e. For permits for which an application is required to be submitted to the Administrator under R18-2-307(A), and to which the Administrator has properly objected to its issuance in writing within 45 days of receipt of the proposed final permit and all necessary supporting information from the Department, the Director has revised and submitted a proposed final permit in response to the objection and EPA has not objected to this proposed final permit within 45 days of receipt.
    - f. For permits to which the Administrator has objected to issuance pursuant to a petition filed under 40 CFR 70.8(d), the Administrator's objection has been resolved.
    - g. For a Class II permit that contains voluntary emission limitations, controls, or other requirements established pursuant to R18-2-306.01, the Director shall have complied with the requirement of R18-2-306.01(C) to provide the Administrator with a copy of the proposed permit.
  3. If the Director denies a permit under this Section, a notice shall be served on the applicant by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the denial and a statement that the permit applicant is entitled to a hearing.
  4. The Director shall provide a statement that sets forth the legal and factual basis for the proposed permit conditions including references to the applicable statutory or regulatory provisions. The Director shall send this statement to any person who requests it and, for Class I permits, to the Administrator.
  5. Priority shall be given by the Director to taking action on applications for construction or modification submitted pursuant to Title I, Parts C (Prevention of Significant Deterioration) and D (New Source Review) of the Act.
- J.** Requirement for a Permit. Except as noted under the provisions in R18-2-317 and R18-2-319, no source may operate after the time that it is required to submit a timely and complete application, except in compliance with a permit issued pursuant to this Chapter. However, if a source under R18-2-326(A)(3) submits a timely and complete application for continued operation under a permit revision or renewal, the source's failure to have a permit is not a violation of this Article until the Director takes final action on the application. This protection shall cease to apply if, subsequent to the completeness determination, the applicant fails to submit, by the deadline specified in writing by the Director, any additional information identified as being needed to process the application. This subsection does not affect a source's obligation to obtain a permit revision before making a modification to the source.

#### Historical Note

Amended effective August 7, 1975 (Supp. 75-1). Former Section R9-3-304 repealed, new Section R9-3-304 formerly Section R9-3-305 renumbered and amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-304 repealed, new Section R9-3-304 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-304 repealed, new Section R9-3-304 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-304 renumbered without change as Section R18-2-304 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp.

95-3). The reference to R18-2-101(54) in subsection (E)(8) corrected to reference R18-2-101(57) (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-305. Public Records; Confidentiality**

- A. The Director shall make all permits, including all elements required to be in the permit pursuant to R18-2-306, available to the public. No permit shall be issued unless the information required by R18-2-306 is present in the permit.
- B. A notice of confidentiality pursuant to A.R.S. § 49-432(C) shall:
  1. Precisely identify the information in the documents submitted which is considered confidential.
  2. Contain sufficient supporting information to allow the Director to evaluate whether such information satisfies the requirements related to trade secrets or, if applicable, how the information, if disclosed, is likely to cause substantial harm to the person's competitive position.
- C. Within 30 days of receipt of a notice of confidentiality that complies with subsection (B) above, the Director shall make a determination as to whether the information satisfies the requirements for trade secret or competitive position pursuant to A.R.S. § 49-432(C)(1) and so notify the applicant in writing. If the Director agrees with the applicant that the information covered by the notice of confidentiality satisfies the statutory requirements, the Director shall include a notice in the file for the permit or permit application that certain information has been considered confidential.
- D. If the Director takes action pursuant to A.R.S. § 49-432(D) and obtains a final order authorizing disclosure, the Director shall place the information in the public file and shall notify any person who has requested disclosure. If the court determines that the information is not subject to disclosure, the Director shall provide the notice specified in subsection (C) above.

#### **Historical Note**

Amended effective August 7, 1975 (Supp. 75-1).  
 Amended as an emergency effective December 15, 1975 (Supp. 75-2). Amended effective May 10, 1976 (Supp. 76-3). Former Section R9-3-306 renumbered as Section R9-3-305 effective August 6, 1976. References changed to conform (Supp. 76-4). Amended effective April 12, 1977 (Supp. 77-2). Amended effective March 24, 1978 (Supp. 78-2). Former Section R9-3-305 repealed, new Section R9-3-305 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-305 repealed, new Section R9-3-305 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-305 renumbered without change as R18-2-305 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### **R18-2-306. Permit Contents**

- A. Each permit issued by the Director shall include the following elements:
  1. The date of issuance and the permit term.
  2. Enforceable emission limitations and standards, including operational requirements and limitations that ensure compliance with all applicable requirements at the time of issuance and operational requirements and limitations that have been voluntarily accepted under R18-2-306.01.
    - a. The permit shall specify and reference the origin of and authority for each term or condition and identify any difference in form as compared to the applicable requirement upon which the term or condition is based.
- B. The permit shall state that, if an applicable requirement of the Act is more stringent than an applicable requirement of regulations promulgated under Title IV of the Act, both provisions shall be incorporated into the permit and shall be enforceable by the Administrator.
- C. Any permit containing an equivalency demonstration for an alternative emission limit submitted under R18-2-304(D) shall contain provisions to ensure that any resulting emissions limit has been demonstrated to be quantifiable, accountable, enforceable, and based on replicable procedures.
- D. The permit shall specify applicable requirements for fugitive emission limitations, regardless of whether the source category in question is included in the list of sources contained in the definition of major source in R18-2-101.
- E. Each permit shall contain the following requirements with respect to monitoring:
  - a. All monitoring and analysis procedures or test methods required under applicable monitoring and testing requirements, including:
    - i. Monitoring and analysis procedures or test methods under 40 CFR 64;
    - ii. Other procedures and methods promulgated under sections 114(a)(3) or 504(b) of the Act; and
    - iii. Monitoring and analysis procedures or test methods required under R18-2-306.01.
  - b. 40 CFR 64 as adopted July 1, 1998, is incorporated by reference and on file with the Department and the Office of the Secretary of State. This incorporation by reference contains no future editions or amendments. If more than one monitoring or testing requirement applies, the permit may specify a streamlined set of monitoring or testing provisions if the specified monitoring or testing is adequate to assure compliance at least to the same extent as the monitoring or testing applicable requirements not included in the permit as a result of such streamlining;
  - c. If the applicable requirement does not require periodic testing or instrumental or noninstrumental monitoring (which may consist of recordkeeping designed to serve as monitoring), periodic monitoring sufficient to yield reliable data from the relevant time period that are representative of the source's compliance with the permit as reported under subsection (A)(4). The monitoring requirements shall ensure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the applicable requirement, and as otherwise required under R18-2-306.01. Recordkeeping provisions may be sufficient to meet the requirements of this subsection; and
  - d. As necessary, requirements concerning the use, maintenance, and, if appropriate, installation of monitoring equipment or methods.
- F. The permit shall incorporate all applicable recordkeeping requirements including recordkeeping requirements established under R18-2-306.01, for the following:
  - a. Records of required monitoring information that include the following:

## Department of Environmental Quality – Air Pollution Control

- i. The date, place as defined in the permit, and time of sampling or measurement;
    - ii. The date any analyses was performed;
    - iii. The name of the company or entity that performed the analysis;
    - iv. A description of the analytical technique or method used;
    - v. The results of any analysis; and
    - vi. The operating conditions existing at the time of sampling or measurement;
  - b. Retention of records of all required monitoring data and support information for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by the permit.
5. The permit shall incorporate all applicable reporting requirements including reporting requirements established under R18-2-306.01 and require the following:
- a. Submittal of reports of any required monitoring at least every six months. All instances of deviations from permit requirements shall be clearly identified in the reports. All required reports shall be certified by a responsible official consistent with R18-2-304(H) and R18-2-309(A)(5).
  - b. Prompt reporting of deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of the deviations, and any corrective actions or preventive measures taken. Notice that complies with subsection (E)(3)(d) shall be considered prompt for the purposes of this subsection (A)(5)(b).
6. A permit condition prohibiting emissions exceeding any allowances the source lawfully holds under Title IV of the Act or the regulations promulgated thereunder.
- a. A permit revision is not required for increases in emissions that are authorized by allowances acquired under the acid rain program, if the increases do not require a permit revision under any other applicable requirement.
  - b. A limit shall not be placed on the number of allowances held by the source. The source shall not, however, use allowances as a defense to noncompliance with any other applicable requirement.
  - c. Any allowance shall be accounted for according to the procedures established in regulations promulgated under Title IV of the Act.
  - d. Any permit issued under the requirements of this Chapter and Title V of the Act to a unit subject to the provisions of Title IV of the Act shall include conditions prohibiting all of the following:
    - i. Annual emissions of sulfur dioxide in excess of the number of allowances to emit sulfur dioxide held by the owner or operator of the unit or the designated representative of the owner or operator,
    - ii. Exceedances of applicable emission rates,
    - iii. Use of any allowance before the year for which it is allocated, and
    - iv. Contravention of any other provision of the permit.
7. A severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portion of the permit.
8. Provisions stating the following:
- a. The permittee shall comply with all conditions of the permit including all applicable requirements of Arizona air quality statutes A.R.S. Title 49, Chapter 3, and the air quality rules, 18 A.A.C. 2. Any permit noncompliance is grounds for enforcement action; for a permit termination, revocation and reissuance, or revision; or for denial of a permit renewal application. Noncompliance with any federally enforceable requirement in a permit is a violation of the Act.
  - b. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit.
  - c. The permit may be revised, reopened, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit revision, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
  - d. The permit does not convey any property rights of any sort, or any exclusive privilege to the permit holder.
  - e. The permittee shall furnish to the Director, within a reasonable time, any information that the Director may request in writing to determine whether cause exists for revising, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon the Director's request, the permittee shall also furnish to the Director copies of records required to be kept by the permit. For information claimed to be confidential, the permittee shall furnish a copy of the records directly to the Administrator along with a claim of confidentiality.
  - f. For any major source operating in a nonattainment area for all pollutants for which the source is classified as a major source, the source shall comply with reasonably available control technology.
9. A provision to ensure that the source pays fees to the Director under A.R.S. § 49-426(E), R18-2-326, and R18-2-511.
10. A provision stating that a permit revision shall not be required under any approved economic incentives, marketable permits, emissions trading, and other similar programs or processes for changes provided for in the permit.
11. Terms and conditions for reasonably anticipated operating scenarios identified by the source in its application as approved by the Director. The terms and conditions shall:
- a. Require the source, contemporaneously with making a change from one operating scenario to another, to record in a log at the permitted facility a record of the scenario under which it is operating;
  - b. Extend the permit shield described in R18-2-325 to all terms and conditions under each such operating scenario; and
  - c. Ensure that the terms and conditions of each such alternative scenario meet all applicable requirements and the requirements of this Chapter.
12. Terms and conditions, if the permit applicant requests them, and as approved by the Director, for the trading of emissions increases and decreases in the permitted facility, to the extent that the applicable requirements provide for trading the increases and decreases without a case-by-

case approval of each emissions trade. The terms and conditions:

- a. Shall include all terms required under subsections (A) and (C) to determine compliance;
  - b. Shall not extend the permit shield in subsection (D) to all terms and conditions that allow the increases and decreases in emissions;
  - c. Shall not include trading that involves emission units for which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades; and
  - d. Shall meet all applicable requirements and requirements of this Chapter.
13. Terms and conditions, if the permit applicant requests them and they are approved by the Director, setting forth intermittent operating scenarios including potential periods of downtime. If the terms and conditions are included, the state's emissions inventory shall not reflect the zero emissions associated with the periods of downtime.
14. Upon request of a permit applicant, the Director shall issue a permit that contains terms and conditions allowing for the trading of emission increases and decreases in the permitted facility solely for the purpose of complying with a federally enforceable emission cap established in the permit independent of otherwise applicable requirements. The permit applicant shall include in its application proposed replicable procedures and permit terms that ensure the emissions trades are quantifiable and enforceable. The Director shall not include in the emissions trading provisions any emissions units for which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades. The permit shall also require compliance with all applicable requirements. Changes made under this subsection shall not include modifications under any provision of Title I of the Act and shall not exceed emissions allowable under the permit. The terms and conditions shall provide, for Class I sources, for notice that conforms to R18-2-317(D) and (E), and for Class II sources, for logging that conforms to R18-2-317.02(B)(5). In addition, the notices for Class I and Class II sources shall describe how the increases and decreases in emissions will comply with the terms and conditions of the permit.
15. Other terms and conditions as are required by the Act, A.R.S. Title 49, Chapter 3, Articles 1 and 2, and the rules adopted in 18 A.A.C. 2.

**B. Federally-enforceable Requirements.**

1. The following permit conditions shall be enforceable by the Administrator and citizens under the Act:
  - a. Except as provided in subsection (B)(2), all terms and conditions in a Class I permit, including any provision designed to limit a source's potential to emit;
  - b. Terms or conditions in a Class II permit setting forth federal applicable requirements; and
  - c. Terms and conditions in any permit entered into voluntarily under R18-2-306.01, as follows:
    - i. Emissions limitations, controls, or other requirements; and
    - ii. Monitoring, recordkeeping, and reporting requirements associated with the emissions limitations, controls, or other requirements in subsection (B)(1)(c)(i).
2. Notwithstanding subsection (B)(1)(a), the Director shall specifically designate as not being federally enforceable

under the Act any terms and conditions included in a Class I permit that are not required under the Act or under any of its applicable requirements.

- C. Each permit shall contain a compliance plan as specified in R18-2-309.
- D. Each permit shall include the applicable permit shield provisions under R18-2-325.
- E. Emergency provision.
  1. An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, that requires immediate corrective action to restore normal operation and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.
  2. An emergency constitutes an affirmative defense to an action brought for noncompliance with technology-based emission limitations if the conditions of subsection (E)(3) are met.
  3. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:
    - a. An emergency occurred and the permittee can identify the cause or causes of the emergency;
    - b. At the time of the emergency the permitted facility was being properly operated;
    - c. During the period of the emergency, the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards or other requirements in the permit; and
    - d. The permittee submitted notice of the emergency to the Director by certified mail, facsimile, or hand delivery within two working days of the time when emission limitations were exceeded due to the emergency. This notice shall contain a description of the emergency, any steps taken to mitigate emissions, and corrective action taken.
  4. In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof.
  5. This provision is in addition to any emergency or upset provision contained in any applicable requirement.
- F. A Class I permit issued to a major source shall require that revisions be made under R18-2-321 to incorporate additional applicable requirements adopted by the Administrator under the Act that become applicable to a source with a permit with a remaining permit term of three or more years. A revision shall not be required if the effective date of the applicable requirement is after the expiration of the permit. The revisions shall be made as expeditiously as practicable, but not later than 18 months after the promulgation of the standards and regulations. Any permit revision required under this subsection shall comply with R18-2-322 for permit renewal and shall reset the five-year permit term.

**Historical Note**

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-307 renumbered as Section R9-3-306 effective August 6, 1976. Reference changed to conform (Supp. 76-4). Former Section R9-3-306 repealed, new Section R9-3-306 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended

subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-306 renumbered without change as R18-2-306 (Supp. 87-3). Amended subsection (I) effective December 1, 1988 (Supp. 88-4). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective August 1, 1995 (Supp. 95-3). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4).

#### **R18-2-306.01. Permits Containing Voluntarily Accepted Emission Limitations and Standards**

- A.** A source may voluntarily propose in its application, and accept in its permit, emissions limitations, controls, or other requirements that are permanent, quantifiable, and otherwise enforceable as a practical matter in order to avoid classification as a source that requires a Class I permit or to avoid one or more other applicable requirements. For the purposes of this Section, “enforceable as a practical matter” means that specific means to assess compliance with an emissions limitation, control, or other requirement are provided for in the permit in a manner that allows compliance to be readily determined by an inspection of records and reports.
- B.** In order for a source to obtain a permit containing voluntarily-accepted emissions limitations, controls, or other requirements, the source shall demonstrate all of the following in its permit application:
  - 1. The emissions limitations, controls, or other requirements to be imposed for the purpose of avoiding an applicable requirement are at least as stringent as the emissions limitations, controls, or other requirements that would otherwise be applicable to that source, including those that originate in an applicable implementation plan; and the permit does not waive, or make less stringent, any limitations or requirements contained in or issued pursuant to an applicable implementation plan, or that are otherwise federally enforceable.
  - 2. All voluntarily accepted emissions limitations, controls, or other requirements will be permanent, quantifiable, and otherwise enforceable as a practical matter.
- C.** At the same time as notice of proposed issuance is first published pursuant to A.R.S. § 49-426(D), the Director shall send a copy of any Class II permit proposed to be issued pursuant to this Section to the Administrator for review during the comment period described in the notice pursuant to R18-2-330(D).
- D.** The Director shall send a copy of each final permit issued pursuant to this Section to the Administrator.

#### **Historical Note**

Adopted effective August 1, 1995 (Supp. 95-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

#### **R18-2-306.02. Expired**

#### **Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 22 A.A.R. 2982, effective September 15, 2016 (Supp. 16-3).

#### **R18-2-307. Permit Review by the EPA and Affected States**

- A.** Except as provided in R18-2-304(F) and as waived by the Administrator, for each Class I permit, a copy of each of the following shall be provided to the Administrator as follows:
  - 1. The applicant shall provide a complete copy of the application including any attachments, compliance plans, and other information required by R18-2-304(E) at the time of submittal of the application to the Director.
  - 2. The Director shall provide the proposed final permit after public and affected state review.
  - 3. The Director shall provide the final permit at the time of issuance.
- B.** The Director shall keep all records associated with all permits for a minimum of five years from issuance.
- C.** No permit for which an application is required to be submitted to the Administrator under subsection (A) shall be issued if the Administrator properly objects to its issuance in writing within 45 days of receipt of the proposed final permit from the Department and all necessary supporting information.
- D.** Review by Affected States.
  - 1. For each Class I permit, the Director shall provide notice of each proposed permit to any affected state on or before the time that the Director provides this notice to the public as required under R18-2-330 except to the extent R18-2-319 requires the timing of the notice to be different.
  - 2. If the Director refuses to accept a recommendation of any affected state submitted during the public or affected state review period, the Director shall notify the Administrator and the affected state in writing. The notification shall include the Director’s reasons for not accepting any such recommendation and shall be provided to the Administrator as part of the submittal of the proposed final permit. The Director shall not be required to accept recommendations that are not based on federal applicable requirements or requirements of state law.
- E.** Any person who petitions the Administrator pursuant to 40 CFR 70.8(d) shall notify the Department by certified mail of such petition as soon as possible, but in no case more than 10 days following such petition. Such notice shall include the grounds for objection and whether such objections were raised during the public comment period. If the Administrator objects to the permit as a result of a petition filed under this subsection, the Director shall not issue the permit until EPA’s objection has been resolved, except that a petition for review does not stay the effectiveness of a permit or its requirements if the permit was issued after the end of the 45-day administrative review period and prior to the Administrator’s objection.
- F.** If the Director has issued a permit prior to receipt of the Administrator’s objection under subsection (E), and the Administrator indicates that it should be revised, terminated, or revoked and reissued, the Director shall reopen the permit in accordance with R18-2-321 and may thereafter issue only a revised permit that satisfies the Administrator’s objection. In any case, the source shall not be in violation of the requirement to have submitted a timely and complete application.
- G.** Prohibition on Default Issuance.
  - 1. No Class I permit including a permit renewal or revision shall be issued until affected states and the Administrator have had an opportunity to review the proposed permit.
  - 2. No permit or renewal shall be issued unless the Director has acted on the application.

#### **Historical Note**

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-307 renumbered as Section R9-3-306 effective August 6, 1976 (Supp. 76-4). New Section R9-3-307 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section

R9-3-307 repealed, new Section R9-3-307 adopted effective May 28, 1982 (Supp. 82-3). Amended subsection (B)(4)(b) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-307 renumbered without change as R18-2-307 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

### **R18-2-308. Emission Standards and Limitations**

Wherever applicable requirements apply different standards or limitations to a source for the same item, all applicable requirements shall be included in the permit.

#### **Historical Note**

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-308 repealed, new Section R9-3-308 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-308 renumbered without change as R18-2-308 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

### **R18-2-309. Compliance Plan; Certification**

All permits shall contain the following elements with respect to compliance:

1. The elements required by R18-2-306(A)(3), (4), and (5).
2. Requirements for certifications of compliance with terms and conditions contained in the permit, including emissions limitations, standards, and work practices. Permits shall include each of the following:
  - a. The frequency of submissions of compliance certifications, which shall not be less than annually;
  - b. The means to monitor the compliance of the source with its emissions limitations, standards, and work practices;
  - c. A requirement that the compliance certification include all of the following (the identification of applicable information may cross-reference the permit or previous reports, as applicable):
    - i. The identification of each term or condition of the permit that is the basis of the certification;
    - ii. The identification of the methods or other means used by the owner or operator for determining the compliance status with each term and condition during the certification period. The methods and other means shall include, at a minimum, the methods and means required under R18-2-306(A)(3). If necessary, the owner or operator also shall identify any other material information that must be included in the certification to comply with section 113(c)(2) of the Act, which prohibits knowingly making a false certification or omitting material information;
    - iii. The status of compliance with the terms and conditions of the permit for the period covered by the certification, including whether compliance during the period was continuous or intermittent. The certification shall be based on the methods or means designated in subsection (2)(c)(ii). The certification shall identify each deviation and take it into account in the compliance certification. For emission units subject to 40 CFR 64, the certification shall also identify as possible exceptions to compliance any period during which compliance is required and in which an excursion or exceedance defined under 40 CFR 64 occurred; and
- iv. Other facts the Director may require to determine the compliance status of the source.
- d. A requirement that permittees submit all compliance certifications to the Director. Class I permittees shall also submit compliance certifications to the Administrator.
- e. Additional requirements specified in sections 114(a)(3) and 504(b) of the Act or pursuant to R18-2-306.01.
3. A requirement for any document required to be submitted by a permittee, including reports, to contain a certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this Section shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
4. Inspection and entry provisions that require that upon presentation of proper credentials, the permittee shall allow the Director to:
  - a. Enter upon the permittee's premises where a source is located, emissions-related activity is conducted, or records are required to be kept under the conditions of the permit;
  - b. Have access to and copy, at reasonable times, any records that are required to be kept under the conditions of the permit;
  - c. Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit;
  - d. Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or other applicable requirements; and
  - e. Record any inspection by use of written, electronic, magnetic, or photographic media.
5. A compliance plan that contains all the following:
  - a. A description of the compliance status of the source with respect to all applicable requirements;
  - b. A description as follows:
    - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with the requirements;
    - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet the requirements on a timely basis; and
    - iii. For requirements for which the source is not in compliance at the time of permit issuance, a narrative description of how the source will achieve compliance with such requirements;
  - c. A compliance schedule as follows:
    - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with the requirements;
    - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet in a timely manner applicable requirements that become effective during the permit term shall satisfy this provision, unless a more

- detailed schedule is expressly required by the applicable requirement;
- iii. A schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. The schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirement for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. The schedule of compliance shall supplement, and shall not sanction noncompliance with, the applicable requirements on which it is based.
  - d. A schedule for submission of certified progress reports no less frequently than every six months for sources required to have a schedule of compliance to remedy a violation. The progress reports shall contain:
    - i. Dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones, or compliance were achieved; and
    - ii. An explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
  6. The compliance plan content requirements specified in subsection (5) shall apply and be included in the acid rain portion of a compliance plan for an affected source, except as specifically superseded by regulations promulgated under Title IV of the Act, and incorporated under R18-2-333 with regard to the schedule and each method the source will use to achieve compliance with the acid rain emissions limitations.
  7. If there is a Federal Implementation Plan (FIP) applicable to the source, a provision that compliance with the FIP is required.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amendment filed September 18, 1979, effective following the adoption of Article 7. Nonferrous Smelter Orders. Amended effective October 2, 1979 (Supp. 79-5). Article 7. Nonferrous Smelter Orders adopted effective January 8, 1980. Amendment filed September 18, 1979 effective January 8, 1980 (Supp. 80-2). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-309 renumbered without change as R18-2-309 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 10 A.A.R. 2833, effective June 17, 2004 (Supp. 04-2).

#### **R18-2-310. Affirmative Defenses for Excess Emissions Due to Malfunctions, Startup, and Shutdown**

##### **A. Applicability.**

This rule establishes affirmative defenses for certain emissions in excess of an emission standard or limitation and applies to

all emission standards or limitations except for standards or limitations:

1. Promulgated pursuant to Sections 111 or 112 of the Act,
2. Promulgated pursuant to Titles IV or VI of the Clean Air Act,
3. Contained in any Prevention of Significant Deterioration (PSD) or New Source Review (NSR) permit issued by the U.S. E.P.A.,
4. Contained in R18-2-715(F), or
5. Included in a permit to meet the requirements of R18-2-406(A)(5).

##### **B. Affirmative Defense for Malfunctions.**

Emissions in excess of an applicable emission limitation due to malfunction shall constitute a violation. The owner or operator of a source with emissions in excess of an applicable emission limitation due to malfunction has an affirmative defense to a civil or administrative enforcement proceeding based on that violation, other than a judicial action seeking injunctive relief, if the owner or operator of the source has complied with the reporting requirements of R18-2-310.01 and has demonstrated all of the following:

1. The excess emissions resulted from a sudden and unavoidable breakdown of process equipment or air pollution control equipment beyond the reasonable control of the operator;
2. The air pollution control equipment, process equipment, or processes were at all times maintained and operated in a manner consistent with good practice for minimizing emissions;
3. If repairs were required, the repairs were made in an expeditious fashion when the applicable emission limitations were being exceeded. Off-shift labor and overtime were utilized where practicable to ensure that the repairs were made as expeditiously as possible. If off-shift labor and overtime were not utilized, the owner or operator satisfactorily demonstrated that the measures were impracticable;
4. The amount and duration of the excess emissions (including any bypass operation) were minimized to the maximum extent practicable during periods of such emissions;
5. All reasonable steps were taken to minimize the impact of the excess emissions on ambient air quality;
6. The excess emissions were not part of a recurring pattern indicative of inadequate design, operation, or maintenance;
7. During the period of excess emissions there were no exceedances of the relevant ambient air quality standards established in Article 2 of this Chapter that could be attributed to the emitting source;
8. The excess emissions did not stem from any activity or event that could have been foreseen and avoided, or planned, and could not have been avoided by better operations and maintenance practices;
9. All emissions monitoring systems were kept in operation if at all practicable; and
10. The owner or operator's actions in response to the excess emissions were documented by contemporaneous records.

##### **C. Affirmative Defense for Startup and Shutdown.**

1. Except as provided in subsection (C)(2), and unless otherwise provided for in the applicable requirement, emissions in excess of an applicable emission limitation due to startup and shutdown shall constitute a violation. The owner or operator of a source with emissions in excess of an applicable emission limitation due to startup and shutdown has an affirmative defense to a civil or administrative

tive enforcement proceeding based on that violation, other than a judicial action seeking injunctive relief, if the owner or operator of the source has complied with the reporting requirements of R18-2-310.01 and has demonstrated all of the following:

- a. The excess emissions could not have been prevented through careful and prudent planning and design;
- b. If the excess emissions were the result of a bypass of control equipment, the bypass was unavoidable to prevent loss of life, personal injury, or severe damage to air pollution control equipment, production equipment, or other property;
- c. The source's air pollution control equipment, process equipment, or processes were at all times maintained and operated in a manner consistent with good practice for minimizing emissions;
- d. The amount and duration of the excess emissions (including any bypass operation) were minimized to the maximum extent practicable during periods of such emissions;
- e. All reasonable steps were taken to minimize the impact of the excess emissions on ambient air quality;
- f. During the period of excess emissions there were no exceedances of the relevant ambient air quality standards established in Article 2 of this Chapter that could be attributed to the emitting source;
- g. All emissions monitoring systems were kept in operation if at all practicable; and
- h. The owner or operator's actions in response to the excess emissions were documented by contemporaneous records.

2. If excess emissions occur due to a malfunction during routine startup and shutdown, then those instances shall be treated as other malfunctions subject to subsection (B).

**D. Affirmative Defense for Malfunctions During Scheduled Maintenance.**

If excess emissions occur due to a malfunction during scheduled maintenance, then those instances will be treated as other malfunctions subject to subsection (B).

**E. Demonstration of Reasonable and Practicable Measures.**

For an affirmative defense under subsection (B) or (C), the owner or operator of the source shall demonstrate, through submission of the data and information required by this Section and R18-2-310.01, that all reasonable and practicable measures within the owner or operator's control were implemented to prevent the occurrence of the excess emissions.

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective June 19, 1981 (Supp. 81-3). Amended Arizona Testing Manual for Air Pollutant Emissions, effective September 22, 1983 (Supp. 83-5). Amended Arizona Testing Manual for Air Pollutant Emissions, as of September 15, 1984, effective August 9, 1985 (Supp. 85-4). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-310 renumbered without change as R18-2-310 (Supp. 87-3). Amended effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1).

**R18-2-310.01. Reporting Requirements**

- A.** The owner or operator of any source shall report to the Director any emissions in excess of the limits established by this

Chapter or the applicable permit. The owner or operator of any registered source may report excess emissions in accordance with this Section in order to qualify for the affirmative defense established in R18-2-310. The report shall be in two parts as specified below:

1. Notification by telephone or facsimile within 24 hours of the time the owner or operator first learned of the occurrence of excess emissions that includes all available information from subsection (B).
2. Detailed written notification by submission of an excess emissions report within 72 hours of the notification under subsection (A)(1).

**B.** The excess emissions report shall contain the following information:

1. The identity of each stack or other emission point where the excess emissions occurred;
2. The magnitude of the excess emissions expressed in the units of the applicable emission limitation and the operating data and calculations used in determining the magnitude of the excess emissions;
3. The time and duration or expected duration of the excess emissions;
4. The identity of the equipment from which the excess emissions emanated;
5. The nature and cause of the emissions;
6. The steps taken, if the excess emissions were the result of a malfunction, to remedy the malfunction and the steps taken or planned to prevent the recurrence of the malfunctions;
7. The steps that were or are being taken to limit the excess emissions; and
8. If the source's permit contains procedures governing source operation during periods of startup or malfunction and the excess emissions resulted from startup or malfunction, a list of the steps taken to comply with the permit procedures.

- C.** In the case of continuous or recurring excess emissions, the notification requirements of this Section shall be satisfied if the source provides the required notification after excess emissions are first detected and includes in the notification an estimate of the time the excess emissions will continue. Excess emissions occurring after the estimated time period or changes in the nature of the emissions as originally reported shall require additional notification pursuant to subsections (A) and (B).

**Historical Note**

New Section adopted by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

**R18-2-311. Test Methods and Procedures**

- A.** Except as otherwise specified in this Chapter, the applicable procedures and testing methods contained in the Arizona Testing Manual; 40 CFR 52, Appendices D and E; 40 CFR 60, Appendices A through F; and 40 CFR 61, Appendices B and C shall be used to determine compliance with the requirements established in this Chapter or contained in permits issued pursuant to this Chapter.
- B.** Except as otherwise provided in this subsection the opacity of visible emissions shall be determined by Reference Method 9 of the Arizona Testing Manual. A permit may specify a method, other than Method 9, for determining the opacity of emissions from a particular emissions unit, if the method has been promulgated by the Administrator in 40 CFR 60, Appendix A.

- C. Except as otherwise specified in this Chapter, the heat content of solid fuel shall be determined according to ASTM method D-3176-89, (Practice for Ultimate Analysis of Coal and Coke) and ASTM method D-2015-91, (Test Method for Gross Calorific Value of Coal and Coke by the Adiabatic Bomb Calorimeter).
- D. Except for ambient air monitoring and emissions testing required under Articles 9 and 11 of this Chapter, alternative and equivalent test methods in any test plan submitted to the Director may be approved by the Director for the duration of that plan provided that the following three criteria are met:
1. The alternative or equivalent test method measures the same chemical and physical characteristics as the test method it is intended to replace.
  2. The alternative or equivalent test method has substantially the same or better reliability, accuracy, and precision as the test method it is intended to replace.
  3. Applicable quality assurance procedures are followed in accordance with the Arizona Testing Manual, 40 CFR 60 or other quality assurance methods which are consistent with principles contained in the Arizona Testing Manual or 40 CFR 60 as approved by the Director.
- E. The owner or operator of a permitted source shall provide, or cause to be provided, performance testing facilities as follows:
1. Sampling ports adequate for test methods applicable to such facility.
  2. Safe sampling platform(s).
  3. Safe access to sampling platform(s).
  4. Utilities for sampling and testing equipment.
- F. Each performance test shall consist of three separate runs using the applicable test method. Each run shall be conducted for the time and under the conditions specified in the applicable standard. For the purpose of determining compliance with an applicable standard, the arithmetic means of results of the three runs shall apply. In the event that a sample is accidentally lost or conditions occur in which one of the three runs is required to be discontinued because of forced shutdown, failure of an irreplaceable portion of the sample train, extreme meteorological conditions, or other circumstances beyond the owner or operator's control, compliance may, upon the Director's approval, be determined using the arithmetic means of the results of the two other runs. If the Director, or the Director's designee is present, tests may only be stopped with the Director's or such designee's approval. If the Director, or the Director's designee is not present, tests may only be stopped for good cause, which includes forced shutdown, failure of an irreplaceable portion of the sample train, extreme meteorological conditions, or other circumstances beyond the operator's control. Termination of testing without good cause after the first run is commenced shall constitute a failure of the test.
- G. Except as provided in subsection (H) compliance with the emission limits established in this Chapter or as prescribed in permits issued pursuant to this Chapter shall be determined by the performance tests specified in this Section or in the permit.
- H. In addition to performance tests specified in this Section, compliance with specific emission limits may be determined by:
1. Opacity tests.
  2. Emission limit compliance tests specifically designated as such in the regulation establishing the emission limit to be complied with.
  3. Continuous emission monitoring, where applicable quality assurance procedures are followed and where it is designated in the permit or in an applicable requirement to show compliance.
- I. Nothing in this Section shall be so construed as to prevent the utilization of measurements from emissions monitoring devices or techniques not designated as performance tests as evidence of compliance with applicable good maintenance and operating requirements.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-311 renumbered without change as R18-2-311 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-312. Performance Tests

- A. Within 60 days after a source subject to the permit requirements of this Article has achieved the capability to operate at its maximum production rate on a sustained basis but no later than 180 days after initial start-up of such source and at such other times as may be required by the Director, the owner or operator of such source shall conduct performance tests and furnish the Director a written report of the results of the tests.
- B. Performance tests shall be conducted and data reduced in accordance with the test method and procedures contained in the Arizona Testing Manual unless the Director:
1. Specifies or approves, in specific cases, the use of a reference method with minor changes in methodology;
  2. Approves the use of an equivalent method;
  3. Approves the use of an alternative method the results of which he has determined to be adequate for indicating whether a specific source is in compliance; or
  4. Waives the requirement for performance tests because the owner or operator of a source has demonstrated by other means to the Director's satisfaction that the source is in compliance with the standard.
  5. Nothing in this Section shall be construed to abrogate the Director's authority to require testing.
- C. Performance tests shall be conducted under such conditions as the Director shall specify to the plant operator based on representative performance of the source. The owner or operator shall make available to the Director such records as may be necessary to determine the conditions of the performance tests. Operations during periods of start-up, shutdown, and malfunction shall not constitute representative conditions of performance tests unless otherwise specified in the applicable standard.
- D. The owner or operator of a permitted source shall provide the Director two weeks prior notice of the performance test to afford the Director the opportunity to have an observer present.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-312 renumbered without change as R18-2-312 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-313. Existing Source Emission Monitoring

- A. Every source subject to an existing source performance standard as specified in this Chapter shall install, calibrate, operate, and maintain all monitoring equipment necessary for continuously monitoring the pollutants and other gases specified in this Section for the applicable source category.
1. Applicability.
    - a. Fossil-fuel fired steam generators, as specified in subsection (C)(1), shall be monitored for opacity, nitrogen oxides emissions, sulfur dioxide emissions, and oxygen or carbon dioxide.

## Department of Environmental Quality – Air Pollution Control

- b. Fluid bed catalytic cracking unit catalyst regenerators, as specified in subsection (C)(4), shall be monitored for opacity.
  - c. Sulfuric acid plants, as specified in subsection (C)(3) of this Section, shall be monitored for sulfur dioxide emissions.
  - d. Nitric acid plants, as specified in subsection (C)(2), shall be monitored for nitrogen oxides emissions.
- 2. Emission monitoring shall not be required when the source of emissions is not operating.
- 3. Variations.
  - a. Unless otherwise prohibited by the Act, the Director may approve, on a case-by-case basis, alternative monitoring requirements different from the provisions of this Section if the installation of a continuous emission monitoring system cannot be implemented by a source due to physical plant limitations or extreme economic reasons. Alternative monitoring procedures shall be specified by the Director on a case-by-case basis and shall include, as a minimum, annual manual stack tests for the pollutants identified for each type of source in this Section. Extreme economic reasons shall mean that the requirements of this Section would cause the source to be unable to continue in business.
  - b. Alternative monitoring requirements may be prescribed when installation of a continuous emission monitoring system or monitoring device specified by this Section would not provide accurate determinations of emissions (e.g., condensed, uncombined water vapor may prevent an accurate determination of opacity using commercially available continuous emission monitoring systems).
  - c. Alternative monitoring requirements may be prescribed when the affected facility is infrequently operated (e.g., some affected facilities may operate less than one month per year).
- 4. Monitoring system malfunction: A temporary exemption from the monitoring and reporting requirements of this Section may be provided during any period of monitoring system malfunction, provided that the source owner or operator demonstrates that the malfunction was unavoidable and is being repaired expeditiously.
- B.** Installation and performance testing required under this Section shall be completed and monitoring and recording shall commence within 18 months of the effective date of this Section.
- C.** Minimum monitoring requirements:
  - 1. Fossil-fuel fired steam generators: Each fossil-fuel fired steam generator, except as provided in the following subsections, with an annual average capacity factor of greater than 30%, as reported to the Federal Power Commission for calendar year 1976, or as otherwise demonstrated to the Department by the owner or operator, shall conform with the following monitoring requirements when such facility is subject to an emission standard for the pollutant in question.
    - a. A continuous emission monitoring system for the measurement of opacity which meets the performance specifications of this Section shall be installed, calibrated, maintained, and operated in accordance with the procedures of this Section by the owner or operator of any such steam generator of greater than 250 million Btu per hour heat input except where:
      - i. Gaseous fuel is the only fuel burned; or
      - ii. Oil or a mixture of gas and oil are the only fuels burned and the source is able to comply with the applicable particulate matter and opacity regulations without utilization of particulate matter collection equipment, and where the source has never been found to be in violation through any administrative or judicial proceedings, or accepted responsibility for any violation of any visible emission standard.
    - b. A continuous emission monitoring system for the measurement of sulfur dioxide which meets the performance specifications of this Section shall be installed, calibrated, using sulfur dioxide calibration gas mixtures or other gas mixtures approved by the Director, maintained and operated on any fossil-fuel fired steam generator of greater than 250 million Btu per hour heat input which has installed sulfur dioxide pollutant control equipment.
    - c. A continuous emission monitoring system for the measurement of nitrogen oxides which meets the performance specification of this Section shall be installed, calibrated using nitric oxide calibration gas mixtures or other gas mixtures approved by the Director, maintained and operated on fossil-fuel fired steam generators of greater than 1000 million Btu per hour heat input when such facility is located in an air quality control region where the Director has specifically determined that a control strategy for nitrogen dioxide is necessary to attain the ambient air quality standard specified in R18-2-205, unless the source owner or operator demonstrates during source compliance tests as required by the Department that such a source emits nitrogen oxides at levels 30% or more below the emission standard within this Chapter.
    - d. A continuous emission monitoring system for the measurement of the percent oxygen or carbon dioxide which meets the performance specifications of this Section shall be installed, calibrated, operated, and maintained on fossil-fuel fired steam generators where measurements of oxygen or carbon dioxide in the flue gas are required to convert either sulfur dioxide or nitrogen oxides continuous emission monitoring data, or both, to units of the emission standard within this Chapter.
  - 2. Nitric acid plants: Each nitric acid plant of greater than 300 tons per day production capacity, the production capacity being expressed as 100% acid located in an air quality control region where the Director has specifically determined that a control strategy for nitrogen dioxide is necessary to attain the ambient air quality standard specified in R18-2-205, shall install, calibrate using nitrogen dioxide calibration gas mixtures, maintain, and operate a continuous emission monitoring system for the measurement of nitrogen oxides which meets the performance specifications of this Section for each nitric acid producing facility within such plant.
  - 3. Sulfuric acid plants: Each sulfuric acid plant as defined in R18-2-101, of greater than 300 tons per day production capacity, the production being expressed as 100% acid, shall install, calibrate using sulfur dioxide calibration gas mixtures or other gas mixtures approved by the Director, maintain and operate a continuous emission monitoring system for the measurement of sulfur dioxide which meets the performance specifications of this Section for each sulfuric acid producing facility within such a plant.

4. Fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries. Each catalyst regenerator for fluid bed catalytic cracking units of greater than 20,000 barrels per day fresh-feed capacity shall install, calibrate, maintain and operate a continuous emission monitoring system for the measurement of opacity which meets the performance specifications of this Section for each regenerator within such refinery.
- D. Minimum specifications:** Owners or operators of monitoring equipment installed to comply with this Section shall demonstrate compliance with the following performance specifications.
1. The performance specifications set forth in Appendix B of 40 CFR 60 are incorporated herein by reference and shall be used by the Director to determine acceptability of monitoring equipment installed pursuant to this Section. However where reference is made to the Administrator in Appendix B of 40 CFR 60, the Director may allow the use of either the state-approved reference method or the federally approved reference method as published in 40 CFR 60. The performance specifications to be used with each type of monitoring system are listed below.
    - a. Continuous emission monitoring systems for measuring opacity shall comply with performance specification 1.
    - b. Continuous emission monitoring systems for measuring nitrogen oxides shall comply with performance specification 2.
    - c. Continuous emission monitoring systems for measuring sulfur dioxide shall comply with performance specification 2.
    - d. Continuous emission monitoring systems for measuring sulfur dioxide shall comply with performance specification 3.
    - e. Continuous emission monitoring systems for measuring carbon dioxide shall comply with performance specification 3.
  2. Calibration gases: Span and zero gases shall be traceable to National Bureau of Standards reference gases whenever these reference gases are available. Every six months from date of manufacture, span and zero gases shall be reanalyzed by conducting triplicate analyses using the reference methods in Appendix A of 40 CFR 60 (Chapter 1) as amended: For sulfur dioxide, use Reference Method 6; for nitrogen oxides, use Reference method 7; and for carbon dioxide or oxygen, use Reference Method 3. The gases may be analyzed at less frequent intervals if longer shelf lives are guaranteed by the manufacturer.
  3. Cycling time: Time includes the total time required to sample, analyze, and record an emission measurement.
    - a. Continuous emission monitoring systems for measuring opacity shall complete a minimum of one cycle of sampling and analyzing for each successive six-minute period.
    - b. Continuous emission monitoring systems for measuring oxides of nitrogen, carbon dioxide, oxygen, or sulfur dioxide shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive 15-minute period.
  4. Monitor location: All continuous emission monitoring systems or monitoring devices shall be installed such that representative measurements of emissions of process parameter (i.e., oxygen, or carbon dioxide) from the affected facility are obtained. Additional guidance for location of continuous emission monitoring systems to obtain representative samples are contained in the applicable performance specifications of Appendix B of 40 CFR 60.
5. Combined effluents: When the effluents from two or more affected facilities of similar design and operating characteristics are combined before being released to the atmosphere through more than one point, separate monitors shall be installed.
  6. Zero and drift: Owners or operators of all continuous emission monitoring systems installed in accordance with the requirements of this Section shall record the zero and span drift in accordance with the method prescribed by the manufacturer's recommended zero and span check at least once daily, using calibration gases specified in subsection (C) as applicable, unless the manufacturer has recommended adjustments at shorter intervals, in which case such recommendations shall be followed; shall adjust the zero span whenever the 24-hour zero drift or 24-hour calibration drift limits of the applicable performance specifications in Appendix B of Part 60, Chapter 1, Title 40 CFR are exceeded.
  7. Span: Instrument span should be approximately 200% of the expected instrument data display output corresponding to the emission standard for the source.
- E. Minimum data requirement:** The following subsections set forth the minimum data reporting requirements for sources employing continuous monitoring equipment as specified in this Section. These periodic reports do not relieve the source operator from the reporting requirements of R18-2-310.01.
1. The owners or operators of facilities required to install continuous emission monitoring systems shall submit to the Director a written report of excess emissions for each calendar quarter and the nature and cause of the excess emissions, if known. The averaging period used for data reporting shall correspond to the averaging period specified in the emission standard for the pollutant source category in question. The required report shall include, as a minimum, the data stipulated in this subsection.
  2. For opacity measurements, the summary shall consist of the magnitude in actual percent opacity of all six-minute opacity averages greater than any applicable standards for each hour of operation of the facility. Average values may be obtained by integration over the averaging period or by arithmetically averaging a minimum of four equally spaced, instantaneous opacity measurements per minute. Any time periods exempted shall be deleted before determining any averages in excess of opacity standards.
  3. For gaseous measurements the summary shall consist of emission averages in the units of the applicable standard for each averaging period during which the applicable standard was exceeded.
  4. The date and time identifying each period during which the continuous emission monitoring system was inoperative, except for zero and span checks and the nature of system repair or adjustment shall be reported. The Director may require proof of continuous emission monitoring system performance whenever system repairs or adjustments have been made.
  5. When no excess emissions have occurred and the continuous emission monitoring system(s) have not been inoperative, repaired, or adjusted, such information shall be included in the report.
  6. Owners or operators of affected facilities shall maintain a file of all information reported in the quarterly summaries, and all other data collected either by the continuous emission monitoring system or as necessary to convert

monitoring data to the units of the applicable standard for a minimum of two years from the date of collection of such data or submission of such summaries.

**F. Data reduction:** Owners or operators of affected facilities shall use the following procedures for converting monitoring data to units of the standard where necessary.

1. For fossil-fuel fired steam generators the following procedures shall be used to convert gaseous emission monitoring data in parts per million to g/million cal (lb/million Btu) where necessary.

- a. When the owner or operator of a fossil-fuel fired steam generator elects under subsection (C)(1)(d) to measure oxygen in the flue gases, the measurements of the pollutant concentration and oxygen concentration shall each be on a consistent basis (wet or dry).

- i. When measurements are on a wet basis, except where wet scrubbers are employed or where moisture is otherwise added to stack gases, the following conversion procedure shall be used:

$$E(Q) = C(ws)F(w) \left[ \frac{20.9}{20.9(1 - B(wa)) - \%O(2ws)} \right]$$

- ii. When measurements are on a wet basis and the water vapor content of the stack gas is determined at least once every 15 minutes the following conversion procedure shall be used:

$$E(Q) = C(ws)F \left[ \frac{20.9}{20.9(1 - B(wa))\%O(2ws)} \right]$$

Use of this equation is contingent upon demonstrating the ability to accurately determine B(ws) such that any absolute error in B(ws) will not cause an error of more than  $\pm 1.5\%$  in the term:

$$\left[ \frac{20.9}{20.9(1 - B(wa)) - \%O(2ws)} \right]$$

- iii. When measurements are on a dry basis, the following conversion procedure shall be used:

$$E(Q) = CF \left[ \frac{20.9}{20.9 - \%O(2ws)} \right]$$

- b. When the owner or operator elects under subsection (C)(1)(d) to measure carbon dioxide in the flue gases, the measurement of the pollutant concentration and the carbon dioxide concentration shall each be on a consistent basis (wet or dry) and the following conversion procedure used;

$$E(Q) = CF(c) \left[ \frac{100}{\%CO(2)} \right]$$

- c. The values used in the equations under subsection (F)(1) above are derived as follows:

$E(Q)$  = pollutant emission, g/million cal (lb/million Btu).

$C$  = pollutant concentration, g/dscm (lb/dscf), determined by multiplying the average concentration (ppm) for each hourly period by  $4.16 \times 10^{-5}$  M g/dscm per ppm ( $2.64 \times 10^{-9}$  M lb/dscf per ppm) where  $M$  = pollutant molecular weight, g/g-mole (lb/lb-mole),  $M = 64$  for sulfur dioxide and 46 for oxides of nitrogen.

$C(ws)$  = pollutant concentrations at stack conditions, g/wscm (lb/wscf), determined by multiplying the average concentration (ppm) for each one-hour period by  $4.15 \times 10^{-5}$  M lb/wscm per ppm ( $2.59 \times 10^{-5}$  M lb/wscf per ppm) where  $M$  = pollutant molecular weight, g/g mole (lb/lb mole),  $M = 64$  for sulfur dioxide and 46 for nitrogen oxides.

$\%O(2), \%CO(2)$  = Oxygen or carbon dioxide volume (expressed as percent) determined with equipment specified under subsection (D)(1)(d).

$F, F(c)$  = A factor representing a ratio of the volume of dry flue gases generated to the calorific value of the fuel combusted ( $F$ ), a factor representing a ratio of the volume of carbon dioxide generated to the calorific value of the fuel combusted ( $F(c)$ ), respectively. Values of  $F$  and  $F(c)$  are given in 40 CFR 60.45(f) (Chapter 1).

$F(w)$  = A factor representing a ratio of the volume of wet flue gases generated to the caloric value of the fuel combusted. Values of  $F(w)$  are given in Reference Method 19 of the Arizona Testing Manual.

$B(wa)$  = Proportion by volume of water vapor in the ambient air. Approval may be given for determination of  $B(wa)$  by on-site instrumental measurement provided that the absolute accuracy of the measurement technique can be demonstrated to be within  $\pm 0.7\%$  water vapor. Estimation methods for  $B(wa)$  are given in Reference Method 19 of the Arizona Testing Manual.

$B(ws)$  = Proportion by volume of water vapor in the stack gas.

2. For sulfuric acid plants as defined in R18-2-101, the owner or operator shall:
  - a. Establish a conversion factor three times daily according to the procedures of 40 CFR 60.84(b) (Chapter 1),
  - b. Multiply the conversion factor by the average sulfur dioxide concentration in the flue gases to obtain average sulfur dioxide emissions in Kg/metric ton (lb/short ton), and
  - c. Report the average sulfur dioxide emission for each averaging period in excess of the applicable emission standard in the quarterly summary.
3. For nitric acid plants, the owner or operator shall:
  - a. Establish a conversion factor according to the procedures of 40 CFR 60.73(b) (Chapter 1),
  - b. Multiply the conversion factor by the average nitrogen oxides concentration in the flue gases to obtain the nitrogen oxides emissions in the units of the applicable standard,
  - c. Report the average nitrogen oxides emission for each averaging period in excess of applicable emission standard in the quarterly summary.

4. The Director may allow data reporting or reduction procedures varying from those set forth in this Section if the owner or operator of a source shows to the satisfaction of the Director that his procedures are at least as accurate as those in this Section. Such procedures may include but are not limited to the following:
  - a. Alternative procedures for computing emission averages that do not require integration of data (e.g., some facilities may demonstrate that the variability of their emissions is sufficiently small to allow accurate reduction of data based upon computing averages from equally spaced data points over the averaging period).
  - b. Alternative methods of converting pollutant concentration measurements to the units of the emission standards.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (C), paragraph (1), subparagraph (d) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-313 renumbered without change as R18-2-313 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1).

#### R18-2-314. Quality Assurance

Facilities subject to the permit requirements of this Article shall submit a quality assurance plan to the Director that meets the requirements of R18-2-311(D)(3) within 12 months of the effective date of this Section. Facilities subject to the requirements of R18-2-313 shall submit a quality assurance plan as specified in the permit.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-314 renumbered without change as R18-2-314 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-315. Posting of Permit

- A. Any person who has been granted an individual or general permit shall post such permit or a certificate of permit issuance on location where the equipment is installed in such a manner as to be clearly visible and accessible. All equipment covered by the permit shall be clearly marked with one of the following:
  1. The current permit number,
  2. A serial number or other equipment number that is also listed in the permit to identify that piece of equipment.
- B. A copy of the complete permit shall be kept on the site.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-315 renumbered without change as R18-2-315 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-316. Notice by Building Permit Agencies

All agencies of the county or political subdivisions of the county that issue or grant building permits or approvals shall examine the plans and specifications submitted by an applicant for a permit or approval to determine if an air pollution permit will possibly be required under the provisions of this Chapter. If it appears that an air pollution permit will be required, the agency or political subdi-

vision shall give written notice to the applicant to contact the Director and shall furnish a copy of that notice to the Director.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-316 renumbered without change as R18-2-316 (Supp. 87-3).

#### R18-2-317. Facility Changes Allowed Without Permit Revisions - Class I

- A. A facility with a Class I permit may make changes that contravene an express permit term without a permit revision if all of the following apply:
  1. The changes are not modifications under any provision of Title I of the Act or under A.R.S. § 49-401.01(24);
  2. The changes do not exceed the emissions allowable under the permit whether expressed therein as a rate of emissions or in terms of total emissions;
  3. The changes do not violate any applicable requirements or trigger any additional applicable requirements;
  4. The changes satisfy all requirements for a minor permit revision under R18-2-319(A);
  5. The changes do not contravene federally enforceable permit terms and conditions that are monitoring (including test methods), recordkeeping, reporting, or compliance certification requirements; and
  6. The changes do not constitute a minor NSR modification.
- B. The substitution of an item of process or pollution control equipment for an identical or substantially similar item of process or pollution control equipment shall qualify as a change that does not require a permit revision, if the substitution meets all of the requirements of subsections (A), (D), and (E).
- C. Except for sources with authority to operate under general permits, permitted sources may trade increases and decreases in emissions within the permitted facility, as established in the permit under R18-2-306(A)(12), if an applicable implementation plan provides for the emissions trades without applying for a permit revision and based on the seven working days notice prescribed in subsection (D). This provision is available if the permit does not provide for the emissions trading as a minor permit revision.
- D. For each change under subsections (A) through (C), a written notice by certified mail or hand delivery shall be received by the Director and the Administrator a minimum of seven working days in advance of the change. Notifications of changes associated with emergency conditions, such as malfunctions necessitating the replacement of equipment, may be provided less than seven working days in advance of the change but must be provided as far in advance of the change or, if advance notification is not practicable, as soon after the change as possible.
- E. Each notification shall include:
  1. When the proposed change will occur;
  2. A description of the change;
  3. Any change in emissions of regulated air pollutants;
  4. The pollutants emitted subject to the emissions trade, if any;
  5. The provisions in the implementation plan that provide for the emissions trade with which the source will comply and any other information as may be required by the provisions in the implementation plan authorizing the trade;
  6. If the emissions trading provisions of the implementation plan are invoked, then the permit requirements with which the source will comply; and
  7. Any permit term or condition that is no longer applicable as a result of the change.

- F. The permit shield described in R18-2-325 shall not apply to any change made under subsections (A) through (C). Compliance with the permit requirements that the source will meet using the emissions trade shall be determined according to requirements of the implementation plan authorizing the emissions trade.
- G. Except as otherwise provided for in the permit, making a change from one alternative operating scenario to another as provided under R18-2-306(A)(11) shall not require any prior notice under this Section.
- H. The Director shall make available to the public monthly summaries of all notices received under this Section.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-317 renumbered without change as R18-2-317 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-317.01. Facility Changes that Require a Permit Revision - Class II

- A. The following changes at a source with a Class II permit shall require a permit revision:
  1. A change that would trigger a new applicable requirement or violate an existing applicable requirement.
  2. Establishment of, or change in, an emissions cap under R18-2-306.02;
  3. A change that will require a case-by-case determination of an emission limitation or other standard, or a source-specific determination of ambient impacts, or a visibility or increment analysis;
  4. A change that results in emissions that are subject to monitoring, recordkeeping or reporting under R18-2-306(A)(3), (4), or (5) if the emissions cannot be measured or otherwise adequately quantified by monitoring, recordkeeping, or reporting requirements already in the permit;
  5. A change that will authorize the burning of used oil, used oil fuel, hazardous waste, or hazardous waste fuel, or any other fuel not currently authorized by the permit;
  6. A change that requires the source to obtain a Class I permit;
  7. Replacement of an item of air pollution control equipment listed in the permit with one that does not have the same or better pollutant removal efficiency;
  8. Establishment or revision of a limit under R18-2-306.01;
  9. Increasing operating hours or rates of production above the permitted level;
  10. A change that relaxes monitoring, recordkeeping, or reporting requirements, except when the change results:
    - a. From removing equipment that results in a permanent decrease in actual emissions, if the source keeps onsite records of the change in a log that satisfies Appendix 3 of this Chapter and if the requirements that are relaxed are present in the permit solely for the equipment that was removed; or
    - b. From a change in an applicable requirement; and
  11. A minor NSR modification.
- B. A source with a Class II permit may make any physical change or change in the method of operation without revising the source's permit unless the change is specifically prohibited in the source's permit or is a change described in subsection (A).

A change that does not require a permit revision may still be subject to requirements in R18-2-317.02.

#### Historical Note

New Section adopted by final rulemaking at 5 A.A.R.

4074, effective September 22, 1999 (Supp. 99-3).

Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-317.02. Procedures for Certain Changes that Do Not Require a Permit Revision - Class II

- A. Except for a physical change or change in the method of operation at a Class II source requiring a permit revision under R18-2-317.01, or a change subject to logging or notice requirements in subsection (B) or (C), a change at a Class II source shall not be subject to revision, notice, or logging requirements under this Chapter.
- B. Except as otherwise provided in the conditions applicable to an emissions cap created under R18-2-306.02, the following changes may be made if the source keeps onsite records of the changes according to Appendix 3:
  1. Implementing an alternative operating scenario, including raw material changes;
  2. Changing process equipment, operating procedures, or making any other physical change if the permit requires the change to be logged;
  3. Engaging in any new insignificant activity listed in the definition of insignificant activities in R18-2-101 but not listed in the permit;
  4. Replacing an item of air pollution control equipment listed in the permit with an identical (same model, different serial number) item. The Director may require verification of efficiency of the new equipment by performance tests; and
  5. A change that results in a decrease in actual emissions if the source wants to claim credit for the decrease in determining whether the source has a net emissions increase for any purpose. The logged information shall include a description of the change that will produce the decrease in actual emissions. A decrease that has not been logged is creditable only if the decrease is quantifiable, enforceable, and otherwise qualifies as a creditable decrease.
- C. Except as provided in the conditions applicable to an emissions cap created under R18-2-306.02, the following changes may be made if the source provides written notice to the Department in advance of the change as provided below:
  1. Replacing an item of air pollution control equipment listed in the permit with one that is not identical but that is substantially similar and has the same or better pollutant removal efficiency: seven days. The Director may require verification of efficiency of the new equipment by performance tests;
  2. A physical change or change in the method of operation that increases actual emissions more than 10% of the major source threshold for any conventional pollutant but does not require a permit revision: seven days;
  3. Replacing an item of air pollution control equipment listed in the permit with one that is not substantially similar but that has the same or better efficiency: 30 days. The Director may require verification of efficiency of the new equipment by performance tests;
  4. A change that would trigger an applicable requirement that already exists in the permit: 30 days unless otherwise required by the applicable requirement;
  5. A change that amounts to reconstruction of the source or an affected facility: seven days. For purposes of this subsection, reconstruction of a source or an affected facility

shall be presumed if the fixed capital cost of the new components exceeds 50% of the fixed capital cost of a comparable entirely new source or affected facility and the changes to the components have occurred over the 12 consecutive months beginning with commencement of construction; and

6. A change that will result in the emissions of a new regulated air pollutant above an applicable regulatory threshold but that does not trigger a new applicable requirement for that source category: 30 days. For purposes of this requirement, an applicable regulatory threshold for a conventional air pollutant shall be 10% of the applicable major source threshold for that pollutant.
- D. For each change under subsection (C), the written notice shall be by certified mail or hand delivery and shall be received by the Director the minimum amount of time in advance of the change. Notifications of changes associated with emergency conditions, such as malfunctions necessitating the replacement of equipment, may be provided with less than required notice, but must be provided as far in advance of the change, or if advance notification is not practicable, as soon after the change as possible. The written notice shall include:
  1. When the proposed change will occur,
  2. A description of the change,
  3. Any change in emissions of regulated air pollutants, and
  4. Any permit term or condition that is no longer applicable as a result of the change.
- E. A source may implement any change in subsection (C) without the required notice by applying for a minor permit revision under R18-2-319 and complying with R18-2-319(D)(2) and (G).
- F. The permit shield described in R18-2-325 shall not apply to any change made under this Section, other than implementation of an alternate operating scenario under subsection (B)(1).
- G. Notwithstanding any other part of this Section, the Director may require a permit to be revised for any change that, when considered together with any other changes submitted by the same source under this Section over the term of the permit, constitutes a change under R18-317.01(A).
- H. If a source change is described under both subsections (B) and (C), the source shall comply with subsection (C). If a source change is described under both subsection (C) and R18-2-317.01(B), the source shall comply with R18-2-317.01(B).
- I. A copy of all logs required under subsection (B) shall be filed with the Director within 30 days after each anniversary of the permit issue date. If no changes were made at the source requiring logging, a statement to that effect shall be filed instead.

#### Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3).

Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-318. Administrative Permit Amendments

- A. Except for provisions pursuant to Title IV of the Act, an administrative permit amendment is a permit revision that does any of the following:
  1. Corrects typographical errors;
  2. Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;
  3. Requires more frequent monitoring or reporting by the permittee;
  4. Allows for a change in ownership or operational control of a source as approved under R18-2-323 where the

Director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility coverage, and liability between the current and new permittee has been submitted to the Director;

- B. Administrative permit amendments to Title IV provisions of the permit shall be governed by regulations promulgated by the Administrator under Title IV of the Act.
- C. The Director shall take no more than 60 days from receipt of a request for an administrative permit amendment to take final action on such request, and for Class I permits may incorporate such changes without providing notice to the public or affected states provided that it designates any such permit revisions as having been made pursuant to this Section.
- D. The Director shall submit a copy of Class I permits revised under this Section to the Administrator.
- E. Except for administrative permit amendments involving a transfer under R18-2-323, the source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-318 renumbered without change as R18-2-318 (Supp. 87-3). Amended subsection (A) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-318.01. Annual Summary Permit Amendments for Class II Permits

The Director may amend any Class II permit annually without following R18-2-321 in order to incorporate changes reflected in logs or notices filed under R18-2-317.02. The amendment shall be effective to the anniversary date of the permit. The Director shall make available to the public for any source:

1. A complete record of logs and notices sent to the Department under R18-2-317.02; and
2. Any amendments or revisions to the source's permit.

#### Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3).

#### R18-2-319. Minor Permit Revisions

- A. Minor permit revision procedures may be used only for those changes at a Class I source that satisfy all of the following:
  1. Do not violate any applicable requirement;
  2. Do not involve substantive changes to existing monitoring, reporting, or recordkeeping requirements in the permit;
  3. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination of ambient impacts, or a visibility or increment analysis;
  4. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed in order to avoid an applicable requirement to which the source would otherwise be subject. The terms and conditions include:
    - a. A federally enforceable emissions cap that the source would assume to avoid classification as a modification under any provision of Title I of the Act; and
    - b. An alternative emissions limit approved under regulations promulgated under the section 112(i)(5) of the Act.

5. Are not modifications under any provision of Title I of the Act;
  6. Are not changes in fuels not represented in the permit application or provided for in the permit;
  7. Are not minor NSR modifications subject to R18-2-334, except that minor NSR modifications subject to R18-2-334(G) may be processed as minor permit revisions; and
  8. Are not required to be processed as a significant permit revision under R18-2-320.
- B.** Minor permit revision procedures shall be used for the following changes at a Class II source:
1. A change that triggers a new applicable requirement if all of the following apply:
    - a. The change is not a minor NSR modification subject to R18-2-334, except that minor NSR modifications subject to R18-2-334(G) may be processed as minor permit revisions;
    - b. A case-by-case determination of an emission limitation or other standard is not required; and
    - c. The change does not require the source to obtain a Class I permit;
  2. A change that increases emissions above the permitted level unless the increase otherwise creates a condition that requires a significant permit revision;
  3. A change in fuel from fuel oil or coal, to natural gas or propane, if not authorized in the permit;
  4. A change that results in emissions subject to monitoring, recordkeeping, or reporting under R18-2-306(A)(3),(4), or (5) and that cannot be measured or otherwise adequately quantified by monitoring, recordkeeping, or reporting requirements already in the permit;
  5. A decrease in the emissions permitted under an emissions cap unless the decrease requires a change in the conditions required to enforce the cap or to ensure that emissions trades conducted under the cap are quantifiable and enforceable; and
  6. Replacement of an item of air pollution control equipment listed in the permit with one that does not have the same or better efficiency.
- C.** As approved by the Director, minor permit revision procedures may be used for permit revisions involving the use of economic incentives, marketable permits, emissions trading, and other similar approaches, to the extent that the minor permit revision procedures are explicitly provided for in an applicable implementation plan or in applicable requirements promulgated by the Administrator.
- D.** An application for minor permit revision shall be on the standard application form contained in Appendix 1 and include the following:
1. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
  2. For Class I sources, and any source that is making the change immediately after it files the application, the source's suggested draft permit;
  3. Certification by a responsible official, consistent with standard permit application requirements, that the proposed revision meets the criteria for use of minor permit revision procedures and a request that the procedures be used;
- E.** EPA and affected state notification. For Class I permits, within five working days of receipt of an application for a minor permit revision, the Director shall notify the Administrator and affected states of the requested permit revision in accordance with R18-2-307.
- F.** For Class I permits, the Director shall not issue a final permit revision until after the Administrator's 45-day review period or until the Administrator has notified the Director that the Administrator will not object to issuance of the permit revision, whichever is first, although the Director may approve the permit revision before that time. Within 90 days of the Director's receipt of an application under minor permit revision procedures, or 15 days after the end of the Administrator's 45-day review period, whichever is later, the Director shall do one or more of the following:
1. Issue the permit revision as proposed,
  2. Deny the permit revision application,
  3. Determine that the proposed permit revision does not meet the minor permit revision criteria and should be reviewed under the significant revision procedures, or
  4. Revise the proposed permit revision and transmit to the Administrator the new proposed permit revision as required in R18-2-307.
- G.** The source may make the change proposed in its minor permit revision application immediately after it files the application. After a Class I source makes a change allowed by the preceding sentence, and until the Director takes any of the actions specified in subsection (F), the source shall comply with both the applicable requirements governing the change and the proposed revised permit terms and conditions. During this time period, the Class I source need not comply with the existing permit terms and conditions it seeks to modify. However, if the Class I source fails to comply with its proposed permit terms and conditions during this time period, the existing permit terms and conditions it seeks to revise may be enforced against it.
- H.** The permit shield under R18-2-325 shall not extend to minor permit revisions.
- I.** Notwithstanding any other part of this Section, the Director may require a permit to be revised under R18-2-320 for any change that, when considered together with any other changes submitted by the same source under this Section or R18-2-317.02 over the life of the permit, do not satisfy subsection (A) for Class I sources or subsection (B) for Class II sources.
- J.** The Director shall make available to the public monthly summaries of all applications for minor permit revisions.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-319 renumbered without change as R18-2-319 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-320. Significant Permit Revisions

- A.** For Class I sources, a significant revision shall be used for an application requesting a permit revision that does not qualify as a minor permit revision or as an administrative amendment. A significant revision that is only required because of a change described in R18-2-319(A)(6) or (7) shall not be considered a significant permit revision under part 70 for the purposes of 40 CFR 64.5(a)(2). Every significant change in existing monitoring permit terms or conditions and every relaxation of reporting or recordkeeping permit terms or conditions shall follow significant revision procedures.
- B.** A source with a Class II permit shall make the following changes only after the permit is revised following the public participation requirements of R18-2-330:
1. Establishing or revising a voluntarily accepted emission limitation or standard as described by R18-2-306.01 or

R18-2-306.02, except a decrease in the limitation authorized by R18-2-319(B)(5);

2. Making any change in fuel not authorized by the permit and that is not fuel oil or coal, to natural gas or propane;
  3. A change that is a minor NSR modification subject to R18-2-334, except for a minor modification subject to R18-2-334(G);
  4. A change that relaxes monitoring, recordkeeping, or reporting requirements, except when the change results from:
    - a. Removing equipment that results in a permanent decrease in actual emissions, if the source keeps onsite records of the change in a log that satisfies Appendix 3 of this Chapter and if the requirements that are relaxed are present in the permit solely for the equipment that was removed; or
    - b. A change in an applicable requirement.
  5. A change that will cause the source to violate an existing applicable requirement including the conditions establishing an emissions cap;
  6. A change that will require any of the following:
    - a. A case-by-case determination of an emission limitation or other standard;
    - b. A source-specific determination of ambient impacts, or a visibility or increment analysis; or
    - c. A case-by-case determination of a monitoring, recordkeeping, and reporting requirement.
  7. A change that requires the source to obtain a Class I permit.
- C. Any modification to a major source of federally listed hazardous air pollutants, and any reconstruction of a source, or a process or production unit, under section 112(g) of the Act and regulations promulgated thereunder, shall follow significant permit revision procedures and any rules adopted under A.R.S. § 49-426.03.
- D. Significant permit revisions shall meet all requirements of this Article for applications, public participation, review by affected states, and review by the Administrator that apply to permit issuance and renewal. Notwithstanding R18-2-330(C), the Director may provide notice for changes requiring a significant permit revision solely under subsection (B)(2), (4) or (6)(c) by posting a notice on the Department's web site, sending e-mails to persons who have requested electronic notification of the Department's proposed air quality permit actions and by mailing a copy of the notice as provided in R18-2-330(C)(1).
- E. When an existing source applies for a significant permit revision to revise its permit from a Class II permit to a Class I permit, it shall submit a Class I permit application in accordance with R18-2-304. The Director shall issue the entire permit, and not just the portion being revised, in accordance with Class I permit content and issuance requirements, including requirements for public, affected state, and EPA review, contained in R18-2-307 and R18-2-330.

#### Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-321. Permit Reopenings; Revocation and Reissuance;

#### Termination

##### A. Reopening for Cause.

1. Each issued permit shall include provisions specifying the conditions under which the permit shall be reopened prior to the expiration of the permit. A permit shall be reopened and revised under any of the following circumstances:
    - a. Additional applicable requirements under the Act become applicable to a major source with a remaining permit term of three or more years. Such a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to R18-2-322(B). Any permit revision required pursuant to this subsection shall comply with provisions in R18-2-322 for permit renewal and shall reset the five-year permit term.
    - b. Additional requirements, including excess emissions requirements, become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the Class I permit.
    - c. The Director or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
    - d. The Director or the Administrator determines that the permit needs to be revised or revoked to assure compliance with the applicable requirements.
  2. Proceedings to reopen and issue a permit, including appeal of any final action relating to a permit reopening, shall follow the same procedures as apply to initial permit issuance and shall, except for reopenings under subsection (A)(1)(a), affect only those parts of the permit for which cause to reopen exists. Such reopening shall be made as expeditiously as practicable.
  3. Reopenings under subsection (A)(1) shall not be initiated before a notice of such intent is provided to the source by the Director at least 30 days in advance of the date that the permit is to be reopened, except that the Director may provide a shorter time period in the case of an emergency.
  4. When a permit is reopened and revised pursuant to this Section, the Director may make appropriate revisions to the permit shield established pursuant to R18-2-325.
- B. Within 10 days of receipt of notice from the Administrator that cause exists to reopen a Class I permit, the Director shall notify the source. The source shall have 30 days to respond to the Director. Within 90 days of receipt of notice from the Administrator that cause exists to reopen a permit, or within any extension to the 90 days granted by EPA, the Director shall forward to the Administrator and the source a proposed determination of termination, revision, or revocation and reissuance of the permit. Within 90 days of receipt of an EPA objection to the Director's proposal, the Director shall resolve the objection and act on the permit.
- C. The Director may issue a notice of termination of a permit or registration issued pursuant to this Chapter if:
1. The Director has reasonable cause to believe that the permit or registration was obtained by fraud or misrepresentation.

2. The person applying for the permit or registration failed to disclose a material fact required by the application form or the regulation applicable to the permit or registration, of which the applicant had or should have had knowledge at the time the application was submitted.
  3. The terms and conditions of the permit or registration have been or are being violated.
- D.** If the Director issues a notice of termination under this Section, the notice shall be served on the permittee by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the revocation and a statement that the permittee is entitled to a hearing.

#### Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-321 renumbered without change as R18-2-321 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-322. Permit Renewal and Expiration

- A.** A permit being renewed is subject to the same procedural requirements, including any for public participation and affected states and Administrator review, that would apply to that permit's initial issuance.
- B.** Except as provided in R18-2-303(A), permit expiration terminates the source's right to operate unless a timely application for renewal that is sufficient under A.R.S. § 41-1064 has been submitted in accordance with R18-2-304. Any testing that is required for renewal shall be completed before the proposed permit is issued by the Director.
- C.** The Director shall act on an application for a permit renewal within the same time-frames as on an initial permit.

#### Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-322 renumbered without change as R18-2-322 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-323. Permit Transfers

- A.** Except as provided in A.R.S. § 49-429 and subsection (B), a Class I or II permit may be transferred to another person if the person who holds the permit gives notice to the Director in writing at least 30 days before the proposed transfer. The notice shall contain the following:
1. The permit number and expiration date;
  2. The name, address, and telephone number of the current permit holder;
  3. The name, address and telephone number of the person to receive the permit;
  4. The name and title of the individual within the organization who is accepting responsibility for the permit along with a signed statement by that person indicating such acceptance;
  5. A description of the equipment to be transferred;
  6. A written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee;
  7. Provisions for the payment of any fees pursuant to R18-2-326 or R18-2-501 that will be due and payable before the effective date of transfer;
  8. Sufficient information about the source's technical and financial capabilities of operating the source to allow the Director to make the decision in subsection (B) including:

- a. The qualifications of each person principally responsible for the operation of the source;
- b. A statement by the chief financial officer of the new permittee that it is financially capable of operating the facility in compliance with the law, and the information that provides the basis for that statement;
- c. A brief description of any action for the enforcement of any federal or state law, or any county, city, or local government ordinance relating to the protection of the environment, instituted against any person employed by the new permittee and principally responsible for operating the facility during the five years preceding the date of application. In lieu of this description, the new permittee may submit a copy of the certificate of disclosure or 10-K form required under A.R.S. § 49-109, or a statement that this information has been filed in compliance with A.R.S. § 49-109.

- B.** The Director shall deny the transfer if the Director determines that the organization receiving the permit is not capable of operating the source in compliance with A.R.S. Title 49, Chapter 3, Article 2, the provisions of this Chapter or the provisions of the permit. Notice of the denial shall be sent to the original permit holder by certified mail stating the reason for the denial within 10 working days of the Director's receipt of the application. If the transfer is not denied within 10 working days after receipt of the notice, it shall be deemed approved.
- C.** To appeal the transfer denial:
1. Both the transferor and transferee shall petition the Office of Administrative Hearings in writing for a public hearing; and
  2. All parties shall follow the appeal process for a permit.
- D.** The Director shall make available to the public monthly summaries of all notices received under this Section.

#### Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-323 renumbered without change as R18-2-323 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4698, effective February 3, 2007 (Supp. 06-4).

#### R18-2-324. Portable Sources

- A.** A portable source that will operate for the duration of its permit solely in one county that has established a local air pollution control program pursuant to A.R.S. § 49-479 shall obtain a permit from that county. A portable source with a county permit shall not operate in any other county. A portable source that has a permit issued by the Director and obtains a county permit shall request that the Director terminate the permit. Upon issuance of the county permit, the permit issued by the Director is no longer valid.
- B.** A portable source which has a county permit but proposes to operate outside that county shall obtain a permit from the Director. A portable source that has a permit issued by a county and obtains a permit issued by the Director shall request that the county terminate the permit. Upon issuance of a permit by the Director, the county permit is no longer valid. Before commencing operation in the new county, the source shall notify the Director and the control officer who has jurisdiction in the county that includes the new location according to subsection (D).
- C.** An owner of portable source equipment which requires a permit under this Chapter shall obtain the permit prior to renting

or leasing said equipment. This permit shall be provided by the owner to the renter or lessee, and the renter or lessee shall be bound by the permit provisions. In the event a copy of the permit is not provided to the renter or lessee, both the owner and the lessee or renter shall be responsible for the operation of this equipment in compliance with the permit conditions and any violations thereof.

- D.** A portable source may be transferred from one location to another provided that the owner or operator of such equipment notifies the Director and any control officer who has jurisdiction over the geographic area that includes the new location of the transfer by certified mail at least 10 working days before the transfer. The notification required under this subsection shall include:
1. A description of the equipment to be transferred including the permit number for such equipment;
  2. A description of the present location;
  3. A description of the location to which the equipment is to be transferred, including the availability of all utilities, such as water and electricity, necessary for the proper operation of all control equipment;
  4. The date on which the equipment is to be moved; and
  5. The date on which operation of the equipment will begin at the new location.
- E.** Any permit for a portable source shall contain conditions that will assure compliance with all applicable requirements at all authorized locations.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).  
Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-325. Permit Shields

- A.** Each Class I or II permit issued under this Chapter shall specifically identify all federal, state, and local air pollution control requirements applicable to the source at the time the permit is issued. The permit shall state that compliance with the conditions of the permit shall be deemed compliance with any applicable requirement as of the date of permit issuance, provided that such applicable requirements are included and expressly identified in the permit. The Director may include in a permit determinations that other requirements specifically identified are not applicable. Any permit under this Chapter that does not expressly state that a permit shield exists shall not provide such a shield.
- B.** Nothing in this Section or in any permit shall alter or affect the following:
1. The provisions of Section 303 of the Act (emergency orders), including the authority of the Administrator under that Section;
  2. The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
  3. The applicable requirements of the acid rain program, consistent with Section 408(a) of the Act;
  4. The ability of the Administrator or the Director to obtain information from a source pursuant to Section 114 of the Act, or any provision of state law;
  5. The authority of the Director to require compliance with new applicable requirements adopted after the permit is issued.
- C.** In addition to the provisions of R18-2-321, a permit may be reopened by the Director and the permit shield revised when it is determined that standards or conditions in the permit are based on incorrect information provided by the applicant.

#### Historical Note

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-326. Fees Related to Individual Permits

- A.** Source Categories. The owner or operator of a source required to have an air quality permit from the Director shall pay the fees described in this Section unless authorized to operate under a general permit issued under Article 5. The fees are based on a source being classified in one of the following three categories:
1. Class I Title V sources are those required or that elect to have a permit under R18-2-302(B)(1).
  2. Class II Title V sources are those required to have a permit under R18-2-302(B)(2) and for which either R18-2-302(B)(2)(a)(i) or (ii) applies.
  3. Class II Non-Title V sources are those required to have a permit under R18-2-302(B)(2) and for which neither R18-2-302(B)(2)(a)(i) nor (ii) applies.
- B.** Fees for Permit Actions.
1. The owner or operator of a Class I Title V source, Class II Title V source, or Class II Non-Title V source shall pay to the Director the following:
    - a. \$133.50 per hour, adjusted annually under subsection (H), for all permit processing time required for a billable permit action; and
    - b. The actual costs of public notice conducted according to R18-2-330.
  2. The Director may require periodic payment of permit processing fees based on the most recent accounting of time spent processing the permit including any fees for contractors.
  3. Upon completion of permit processing activities other than issuance or denial of the permit or permit revision, the Director shall send notice of the decision to the applicant along with a final itemized bill. The maximum fee for any billable permit action for a non-Title V source is \$25,000. Except as provided in subsection (G), the Director shall not issue a permit or permit revision until the final bill is paid in full.
- C.** Class I Title V Fees. The owner or operator of a Class I Title V source that has undergone initial startup by January 1 shall annually pay to the Director an administrative fee plus an emissions-based fee as follows:
1. The applicable administrative fee from the table below, as adjusted annually under subsection (H). The fee is due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.

Class I Title V Source Category	Administrative Fee
Aerospace	\$20,800
Air Curtain Destructors	\$750
Cement Plants	\$63,690
Combustion/Boilers	\$15,480
Compressor Stations	\$12,730
Electronics	\$20,490
Expandable Foam	\$14,680
Foundries	\$19,520
Landfills	\$15,960

## Department of Environmental Quality – Air Pollution Control

Lime Plants	\$60,160
Copper & Nickel Mines	\$15,000
Gold Mines	\$15,000
Mobile Home Manufacturing	\$14,830
Paper Mills	\$20,480
Paper Coaters	\$15,480
Petroleum Products Terminal Facilities	\$22,730
Polymeric Fabric Coaters	\$20,480
Reinforced Plastics	\$15,480
Semiconductor Fabrication	\$26,930
Copper Smelters	\$63,690
Utilities - Fossil Fuel Fired Except Coal	\$16,440
Utilities - Coal Fired	\$32,570
Vitamin/Pharmaceutical Manufacturing	\$15,800
Wood Furniture	\$15,480
Others	\$20,490
Others with Continuous Emissions Monitoring	\$20,490

2. An emissions-based fee of \$38.25 per ton of actual emissions of all regulated pollutants emitted during the previous calendar year ending 12 months earlier. The fee is adjusted annually under subsection (d) and due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.
  - a. For purposes of this Section, “actual emissions” means the quantity of all regulated pollutants emitted during the calendar year, as determined by the annual emissions inventory under R18-2-327.
  - b. For purposes of this Section, regulated pollutants consist of the following:
    - i. Nitrogen oxides and any volatile organic compounds;
    - ii. Conventional air pollutants, except carbon monoxide and ozone;
    - iii. Any pollutant that is subject to any standard promulgated under Section 111 of the Act, including fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, and reduced sulfur compounds; and
    - iv. Any federally listed hazardous air pollutant.
  - c. For purposes of this Section, the following emissions of regulated pollutants are excluded from a source’s actual emissions:
    - i. Emissions of any regulated pollutant from the source in excess of 4,000 tons per year;
    - ii. Emissions of any regulated pollutant already included in the actual emissions for the source, such as a federally listed hazardous air pollutant that is already accounted for as a VOC or as PM<sub>10</sub>;
    - iii. Emissions from insignificant activities listed in the permit application for the source under R18-2-304(E)(8);
    - iv. Fugitive emissions of PM<sub>10</sub> from activities other than crushing, belt transfers, screening, or stacking; and
    - v. Fugitive emissions of VOC from solution-extraction units.
  - d. The Director shall adjust the rate for emission-based fees every November 1, after December 4, 2007, by multiplying \$38.25 by the Consumer Price Index (CPI) for the most recent year, and then dividing by

the CPI for the year 2007. The Consumer Price Index for any year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of that year.

- D. Class II Title V Fees. The owner or operator of a Class II Title V source that has undergone initial startup by January 1 shall pay the applicable administrative fee from the table below, adjusted under subsection (H), for that calendar year, and annually thereafter. The fee is due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.

Class II Title V Source Category	Administrative Fee
Synthetic minor sources, except portable sources	Administrative fee from Class I Title V table for category
Stationary	\$8,070
Portables	\$8,070
Small Source	\$750

- E. Class II Non-Title V Fees. The owner or operator of a Class II Non-Title V source that has undergone initial startup by January 1 shall pay the applicable inspection fee from the table below, adjusted under subsection (H), for that calendar year, and annually thereafter. The fee is due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.

Class II Non-Title V Source Category	Inspection Fee
Stationary	\$5,230
Portables	\$5,230
Gasoline Service Stations	\$750

- F. The Director shall mail the owner or operator of each source an invoice for all fees due under subsections (C), (D), or (E) by December 1.
- G. Any person who receives a final itemized bill from the Director under this Section for a billable permit action may request an informal review of the hours billed and may pay the bill under protest as provided below:
  1. The request shall be made in writing, and received by the Director within 30 days of the date of the final bill. Unless the Director and person agree otherwise, the informal review shall take place within 30 days after the Director’s receipt of the request. The Director shall arrange the date and location of the informal review with the person at least 10 business days before the informal review. The Director shall review whether the amounts of time billed are correct and reasonable for the tasks involved. The Director shall mail his or her decision on the informal review to the person within 10 business days after the informal review date.
  2. The Director’s decision after informal review shall become final unless, within 30 days after person’s receipt of the informal review decision, the person requests a hearing under R18-1-202.
  3. If the final itemized bill is paid under protest, the Director shall take final action on the permit or permit revision.
- H. The Director shall adjust the hourly rate every November 1, to the nearest 10 cents per hour, after December 4, 2007, by multiplying \$133.50 by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2007. The Director shall adjust the administrative or inspection fees listed in subsections (C), (D), and (E) every Novem-

## Department of Environmental Quality – Air Pollution Control

ber 1, to the nearest \$10, beginning December 4, 2007, by multiplying the administrative or inspection fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2007. The Consumer Price Index for any year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of that year.

- I.** An applicant for a Class I or Class II permit or permit revision may request that the Director provide accelerated processing of the application by providing the Director written notice 60 days before filing the application. The request shall be accompanied by an initial fee of \$15,000. The fee is non-refundable to the extent of the Director's costs for accelerating the processing if the Director undertakes the accelerated processing described below:

1. If an applicant requests accelerated permit processing, the Director may, to the extent practicable, undertake to process the permit or permit revision according to the following schedule:
  - a. For applications for initial Class I and II permits under R18-2-302 or significant permit revisions under R18-2-320, the Director shall issue or deny the proposed permit or permit revision within 120 days after the Director determines that the application is complete.
  - b. For minor permit revisions under R18-2-319, the Director shall issue or deny the permit revision within 60 days after receiving a complete application.
2. At any time after an applicant requests accelerated permit processing, the Director may require additional advance payments based on the most recent estimate of additional costs.
3. Upon completion of permit processing activities but before issuance or denial of the permit or permit revision, the Director shall send notice of the decision to the applicant along with a final bill. The maximum fee for any billable permit action for a non-Title V source is \$25,000. The final bill shall include all regular permit processing and other fees due, and, in addition, the difference between the cost of accelerating the permit application, including any costs incurred by the Director in contracting for, hiring, or supervising the work of outside consultants, and all advance payments submitted for accelerated processing. In the event all payments made exceed actual accelerated permit costs, the Director shall refund the excess advance payments. Nothing in this subsection affects the public participation requirements of R18-2-330, or EPA and affected state review as required under R18-2-307 or R18-2-319.

- J.** Inactive Sources. The owner or operator of a permitted source that has undergone initial startup but was shut down for the entire preceding year shall pay 50 percent of the administrative or inspection fee required under subsection (C), (D), or (E). The owner or operator of a source claiming inactive status under this subsection shall submit a letter to the Director by December 15 of the calendar year for which the source was inactive. Termination of a permit does not relieve a source of any past fees due.

- K.** If an applicant uses the Tier 4 method for conducting a risk management analysis (RMA) according to R18-2-1708(B), the applicant shall pay any costs incurred by the Director in contracting for, hiring or supervising work of outside consultants.

- M.** Transition.

1. Subsections (A) through (J) of this Section are effective December 4, 2007. The first administrative or inspection fees are due on February 1, 2008.
2. Except as provided in subsection (b), all fees incurred after December 4, 2007, are payable in accordance with the rates contained in this Section.
  - a. Emission-based fees for calendar year 2006 shall be billed at \$38.25 per ton and be due February 1, 2008.
  - b. The hourly rates and maximum fees for a new permit or permit revision are those in effect when the application for the permit or revision is determined to be complete.
  - c. Fees accrued but not yet paid before the effective date of this Section remain as obligations to be paid to the Department.

**Historical Note**

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 10 A.A.R. 4767, effective November 4, 2004 (Supp. 04-4). Amended by final rulemaking at 13 A.A.R. 4379, effective December 4, 2007 (Supp. 07-4).

**R18-2-326.01. Emissions-Based Fee Increase Related to Individual Permits for Fiscal Year 2011**

In addition to the emissions-based fees required under R18-2-326(C) for Class I Title V sources for Calendar Year 2008, a one-time emissions-based fee of \$20.82 per ton of actual emissions of all regulated pollutants emitted during Calendar Year 2008 shall be due within 30 days of the invoice postmark date for the increased fee.

**Historical Note**

New Section made by exempt rulemaking at 16 A.A.R. 844, effective July 1, 2010 (Supp. 10-2).

**R18-2-327. Annual Emissions Inventory Questionnaire**

- A.** Every source subject to permit requirements under this Chapter shall complete and submit to the Director an annual emissions inventory questionnaire. The questionnaire is due by March 31 or 90 days after the Director makes the inventory form available, whichever occurs later, and shall include emission information for the previous calendar year. These requirements apply whether or not a permit has been issued and whether or not a permit application has been filed.
- B.** The questionnaire shall be on a form provided by the Director and shall include the following information:
1. The source's name, description, mailing address, contact person and contact person phone number, and physical address and location, if different than the mailing address.
  2. Process information for the source, including design capacity, operations schedule, and emissions control devices, their description and efficiencies.
  3. The actual quantity of emissions from permitted emission points and fugitive emissions as provided in the permit, including documentation of the method of measurement, calculation, or estimation, determined pursuant to subsection (C), of the following regulated air pollutants:
    - a. Any single regulated air pollutant in a quantity greater than 1 ton or the amount listed for the pollutant.

## Department of Environmental Quality – Air Pollution Control

ant in the definition of “significant” in R18-2-101(130)(a), whichever is less.

- b. Any combination of regulated air pollutants in a quantity greater than 2 1/2 tons.

**C.** Actual quantities of emissions shall be determined using the following emission factors or data:

1. Whenever available, emissions estimates shall either be calculated from continuous emissions monitors certified pursuant to 40 CFR 75, Subpart C and referenced appendices, or data quality assured pursuant to Appendix F of 40 CFR 60.
2. When sufficient data pursuant to subsection (C)(1) is not available, emissions estimates shall be calculated from data from source performance tests conducted pursuant to R18-2-312 in the calendar year being reported or, when not available, conducted in the most recent calendar year representing the operating conditions of the year being reported.
3. When sufficient data pursuant to subsection (C)(1) or (2) is not available, emissions estimates shall be calculated using emissions factors from EPA Publication No. AP-42 “Compilation of Air Pollutant Emission Factors,” Volume I: Stationary Point and Area Sources, Fifth Edition, 1995, U.S. Environmental Protection Agency, Research Triangle Park, NC, including Supplements A through F and all updates published through July 1, 2011 (and no future editions). AP-42 is incorporated by reference and is on file with the Department of Environmental Quality and can be obtained from the Government Printing Office, 732 North Capitol Street, NW, Washington, D.C. 20401, telephone (202) 512-1800, or by downloading the document from the web site for the EPA Clearinghouse for Emission Inventories and Emission Factors.
4. When sufficient data pursuant to subsections (C)(1) through (C)(3) is not available, emissions estimates shall be calculated from material balance using engineering knowledge of process.
5. When sufficient data pursuant to subsections (C)(1) through (4) is not available, emissions estimates shall be calculated by equivalent methods approved by the Director. The Director shall only approve methods that are demonstrated as accurate and reliable as one of the methods in subsections (C)(1) through (4).

**D.** Actual quantities of emissions calculated under subsection (C) shall be determined on the basis of actual operating hours, production rates, in-place process control equipment, operational process control data, and types of materials processed, stored, or combusted.

**E.** An amendment to an annual emission inventory questionnaire, containing the documentation required by subsection (B)(3), shall be submitted to the Director by any source whenever it discovers or receives notice, within two years of the original submittal, that incorrect or insufficient information was submitted to the Director by a previous questionnaire. If the incorrect or insufficient information resulted in an incorrect annual emissions fee, the Director shall require that additional payment be made or shall apply an amount as a credit to a future annual emissions fee. The submittal of an amendment under this subsection shall not subject the owner or operator to an enforcement action or a civil or criminal penalty if the original submittal of incorrect or insufficient information was due to reasonable cause and not willful neglect.

**F.** The Director may require submittal of supplemental emissions inventory questionnaires for air contaminants pursuant to A.R.S. §§ 49-422, 49-424, and 49-426.03 through 49-426.08.

### Historical Note

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective December 7, 1995 (Supp. 95-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

### R18-2-328. Conditional Orders

**A.** The Director may grant to any person a conditional order for each air pollution source which allows such person to vary from any provision of A.R.S. Title 49, Chapter 3, Article 2, or this Chapter, for any non-federally enforceable requirement of a permit issued pursuant to this Chapter if the Director makes each of the following findings:

1. Issuance of the conditional order will not endanger public health or the environment, impede attainment or maintenance of the national ambient air quality standards, or constitute a violation of the Act; and
2. Either of the following is true:
  - a. There has been a breakdown of equipment or upset of operations beyond the control of the petitioner which causes the source to be out of compliance with the requirements of this Chapter; the source was in compliance with the requirements of this Chapter before the breakdown or upset, and the breakdown or upset may be corrected within a reasonable time;
  - b. There is no reasonable relationship between the economic and social cost of, and benefits to be obtained from, achieving compliance.

**B.** The following procedures shall apply to a person seeking a conditional order:

1. The person shall file a petition for a conditional order with the Director. The petition shall contain at a minimum:
  - a. A description of the breakdown or upset;
  - b. A description of corrective action being undertaken to bring the source back into compliance;
  - c. An estimate of emissions related to the breakdown or upset;
  - d. A compliance schedule with a date of final compliance and interim dates as appropriate;
  - e. A detailed analysis of the economic and social costs and benefits of achieving compliance with the requirement for which the variance is sought, if the petition is based on subsection (A)(2)(b).
2. If the issuance of the conditional order requires a public hearing pursuant to R18-2-330, the Director shall set the hearing date within 30 days after the filing of the petition and the hearing shall be held within 60 days after the filing of the petition.
3. Notice of the filing of a petition for a conditional order and of the hearing date on said petition shall be published in the manner provided in A.R.S. § 49-444 and R18-2-330.

**C.** Decisions on petitions for a conditional order shall be made as follows:

1. For any conditional order that requires a revision to the SIP, the Director shall comply with the requirements contained in 40 CFR 51, Subpart F.
2. For any other conditional order, the Director shall grant or deny the petition with such terms and conditions as are

listed in subsection (E)(2) within 30 days after the conclusion of any required hearing, or, if no hearing is held, within 60 days after the filing of the petition.

- D. A fee to cover the costs of processing conditional orders may be charged by the Director prior to issuance consistent with R18-2-326(I) or (J). The fee shall be deposited in the permit administration fund established in A.R.S. § 49-455.
- E. The terms of a conditional order or its renewal shall conform to the following:
  - 1. A conditional order issued by the Director shall be valid for such period as the Director prescribes but in no event for more than one year in the case of a source that is required to obtain a permit pursuant to this Chapter and Title V of the Act, and three years in the case of any other source that is required to obtain a permit pursuant to this Chapter.
  - 2. The terms and conditions which are imposed as a condition to the granting or the continued existence of a conditional order shall include:
    - a. A detailed plan for completion of corrective steps needed to conform to the provisions of A.R.S. Title 49, Chapter 3, Article 2, this Chapter, and the requirements of any permit issued pursuant to this Chapter;
    - b. A requirement that necessary construction shall begin as expeditiously as practicable and proceed as specified in the compliance schedule;
    - c. Written reports, at least quarterly, of the status of the source and construction progress;
    - d. The right of the Director to make periodic inspection of the facilities for which the conditional order is granted;
    - e. Such additional terms and conditions as the Director finds necessary to meet the requirements of this Section and A.R.S. § 49-437.
  - 3. A holder of a conditional order may petition the Director to renew the order. The total term of the initial period and all renewals shall not exceed three years from the date of initial issuance of the order. Petitions for renewal may be filed at any time not more than 60 days nor less than 30 days prior to the expiration of the order. The Director, within 30 days of receipt of a petition, shall renew the conditional order for one year if the petitioner is in compliance and conforming with the terms and conditions imposed. The Director may refuse to renew the conditional order if, after a public hearing held within 30 days of receipt of a petition, the Director finds that the petitioner is not in compliance and conforming with the terms and conditions of the conditional order. If, after a period of three years from the date of original issuance, the petitioner is not in compliance and conforming with the terms and conditions, the Director may renew a conditional order for a total term of two additional years only if the Director finds that failure to comply and conform is due to conditions beyond the control of such petitioner.
  - 4. If the Director amends or adopts any rule imposing conditions on the operation of an air pollution source which have become effective as to the source by reason of the action of the Director or otherwise, and which require the implementation of control strategies necessitating the installation of additional or different air pollution control equipment, the Director may renew a conditional order for an additional term. The term of the renewal shall be governed by the preceding subsections of this Section, except that the total term of the renewal shall not exceed two years.

- 5. A conditional order issued by the Director shall be effective when issued unless:

- a. The conditional order varies from the requirements of the applicable implementation plan, in which case the conditional order shall be submitted to the Administrator as a revision to the applicable implementation plan pursuant to Section 110(I) of the Act and shall become effective upon approval by the Administrator.
- b. The conditional order varies from the requirements of a permit issued for a facility that is required to obtain a permit pursuant to Title V of the Act, in which case the conditional order shall be submitted to the Administrator if required by Section 505 of the Act and shall be effective at the end of the review period specified in such section, unless objected to within such period by the Administrator.

- F. Violation of the terms and conditions of the conditional order shall subject the source to suspension or revocation of the conditional order in accordance with A.R.S. § 49-441.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).

#### **R18-2-329. Permits Containing the Terms and Conditions of Federal Delayed Compliance Orders (DCO) or Consent Decrees**

- A. The terms and conditions of either a delayed compliance order (DCO) or consent decree shall be incorporated into a permit through a permit revision. In the event the permit expires prior to the expiration of the DCO or consent decree, the DCO or consent decree shall be incorporated into any permit renewal.
- B. The owner or operator of a source subject to a DCO or consent decree shall submit to the Director a quarterly report of the status of the source and construction progress and copies of any reports to the Administrator required under the order or decree. The Director may require additional reporting requirements and conditions in permits issued under this Article.
- C. For the purpose of this Chapter, sources subject to a consent decree issued by a federal court shall meet the same requirements as those subject to a DCO.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).

#### **R18-2-330. Public Participation**

- A. The Director shall provide public notice, an opportunity for public comment, and an opportunity for a hearing before taking any of the following actions:
  - 1. A permit issuance or renewal of a permit,
  - 2. A significant permit revision,
  - 3. Revocation and reissuance or reopening of a permit,
  - 4. Any conditional orders pursuant to R18-2-328,
  - 5. Granting a variance from a general permit under R18-2-507 and R18-2-1705.
- B. The Director shall provide public notice of receipt of complete applications for permits or permit revisions subject to Article 4 of this Chapter by publishing a notice in a newspaper of general circulation in the county where the source is or will be located.
- C. The Director shall provide the notice required pursuant to subsection (A) as follows:
  - 1. The Director shall publish the notice once each week for two consecutive weeks in two newspapers of general circulation in the county where the source is or will be located.
  - 2. The Director shall mail a copy of the notice to persons on a mailing list developed by the Director consisting of

those persons who have requested in writing to be placed on such a mailing list.

- D. The notice required by subsection (C) shall include the following:
1. Identification of the affected facility;
  2. Name and address of the permittee or applicant;
  3. Name and address of the permitting authority processing the permit action;
  4. The activity or activities involved in the permit action;
  5. The emissions change involved in any permit revisions;
  6. The air contaminants to be emitted;
  7. If applicable, that a notice of confidentiality has been filed under R18-2-305;
  8. If applicable, that the source has submitted a risk management analysis under R18-2-1708;
  9. A statement that any person may submit written comments, or a written request for a public hearing, or both, on the proposed permit action, along with the deadline for such requests or comments;
  10. The name, address, and telephone number of a person from the Department from whom additional information may be obtained;
  11. Locations where copies of the permit or permit revision application, the proposed permit, and all other materials available to the Director that are relevant to the permit decision may be reviewed, including the closest Department office, and the times at which they shall be available for public inspection.
  12. The Director shall include a statement in the public notice if the permit or permit revision would result in the generation of emission reduction credits under R18-2-1204, or the utilization of emission reduction credits under R18-2-1206.
- E. The Director shall hold a public hearing to receive comments on petitions for conditional orders which would vary from requirements of the applicable implementation plan. For all other actions involving a proposed permit, the Director shall hold a public hearing only upon written request. If a public hearing is requested, the Director shall schedule the hearing and publish notice as described in A.R.S. § 49-444 and subsection (D). The Director shall give notice of any public hearing at least 30 days in advance of the hearing.
- F. At the time the Director publishes the first notice under subsection (C)(1), the applicant shall post a notice containing the information required in subsection (D) at the site where the source is or may be located. Consistent with federal, state, and local law, the posting shall be prominently placed at a location under the applicant's legal control, adjacent to the nearest public roadway, and visible to the public using the public roadway. If a public hearing is to be held, the applicant shall place an additional posting providing notice of the hearing. Any posting shall be maintained until the public comment period is closed.
- G. The Director shall provide at least 30 days from the date of its first notice for public comment to receive comments and requests for a hearing. The Director shall keep a record of the commenters and of the issues raised during the public participation process and shall prepare written responses to all comments received. At the time a final proposed permit is submitted to EPA, in the case of a Class I permit, or a final decision is made, in the case of a Class II permit, the record and copies of the Director's responses shall be made available to the applicant and all commenters.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).  
Amended by final rulemaking at 8 A.A.R. 1815, effective

March 18, 2002 (Supp. 02-1). R18-2-330 has been corrected to include subsection (D)(12), which was omitted when the Section was amended in the 02-1 supplement (Supp. 05-1). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (supp. 12-2).

#### R18-2-331. Material Permit Conditions

- A. For the purposes of A.R.S. §§ 49-464(G) and 49-514(G), a "material permit condition" shall mean a condition which satisfies all of the following:
1. The condition is in a permit or permit revision issued by the Director or a control officer after November 15, 1993.
  2. The condition is identified within the permit as a material permit condition.
  3. The condition is one of the following:
    - a. An enforceable emission standard imposed to avoid classification as a major modification or major source or to avoid triggering any other applicable requirement;
    - b. A requirement to install, operate, or maintain a maximum achievable control technology or hazardous air pollutant reasonably available control technology required under Article 17 of this Chapter;
    - c. A requirement for the installation or certification of a monitoring device;
    - d. A requirement for the installation of air pollution control equipment;
    - e. A requirement for the operation of air pollution control equipment;
    - f. An opacity standard required by Section 111 or Title I, Part C or D of the Act.
  4. Violation of the condition is not covered by A.R.S. § 49-464(A) through (F), or (H) through (J) or A.R.S. § 49-514(A) through (F), or (H) through (J).
- B. For the purposes of subsections (A)(3)(c), (d), and (e), a permit condition shall not be material where the failure to comply resulted from circumstances which were outside the control of the source. As used in this Section, "circumstances outside the control of the source" shall mean circumstances where the violation resulted from a sudden and unavoidable breakdown of the process or the control equipment, resulted from unavoidable conditions during a start up or shut down or resulted from upset of operations.
- C. For purposes of this Section, the term "emission standard" shall have the meaning specified in A.R.S. §§ 49-464(U) and 49-514(T).

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).  
Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

#### R18-2-332. Stack Height Limitation

- A. The limitations set forth herein shall not apply to stacks or dispersion techniques used by the owner or operator prior to December 31, 1970, for which the owner or operator had:
1. Begun, or caused to begin, a continuous program of physical on-site construction of the stack;
  2. Entered into building agreements or contractual obligations, which could not be cancelled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed in a reasonable time; or
  3. Coal-fired steam electric generating units, subject to the provisions of Section 118 of the Act which commenced

operation before July 1, 1975, with stacks constructed under a construction contract awarded before February 8, 1974.

**B.** GEP stack height is calculated as the greater of the following four numbers in subsections (1) through (4):

1. 213.25 feet (65 meters);
2. For stacks in existence on January 12, 1979, and for which the owner or operator had obtained all applicable preconstruction permits or approvals required under 40 CFR Parts 51 and 52 and R18-2-403,  $H_g = 2.5H$ ;
3. For all other stacks,  $H_g = H + 1.5L$ , where  
 $H_g$  = good engineering practice stack height, measured from the ground-level elevation at the base of the stack;  
 $H$  = height of nearby structure measured from the ground-level elevation at the base of the stack;  
 $L$  = lesser dimension (height or projected width) of nearby structure;

provided that the EPA, the Director, or local control agency may require the use of a field study or fluid model to verify GEP stack height for the source; or

4. The height demonstrated by a fluid model or a field study approved by the reviewing agency, which ensures that the emissions from a stack do not result in excessive concentrations of any air pollutant as a result of atmospheric downwash, wakes, or eddy effects created by the source itself, nearby structures, or nearby terrain obstacles;
5. For a specific structure or terrain feature, "nearby" shall be:
  - a. For purposes of applying the formulae in subsections (B)(2) and (3), that distance up to five times the lesser of the height or the width dimension of a structure but not greater than 0.8 km (1/2 mile).
  - b. For conducting demonstrations under subsection (B)(4), means not greater than 0.8 km (1/2 mile). An exception is that the portion of a terrain feature may be considered to be nearby which falls within a distance of up to 10 times the maximum height ( $H_+$ ) of the feature, not to exceed 2 miles if such feature achieved a height ( $H_+$ ) 0.8 km from the stack. The height shall be at least 40% of the GEP stack height determined by the formula provided in subsection (B)(3), or 85 feet (26 meters), whichever is greater, as measured from the ground-level elevation at the base of the stack.
6. "Excessive concentrations" means, for the purpose of determining good engineering practice stack height under subsection (B)(4):
  - a. For sources seeking credit for stack height exceeding that established under subsections (B)(2) and (3), a maximum ground-level concentration due to emissions from a stack due in whole or in part to downwash, wakes, and eddy effects produced by nearby structures or nearby terrain features which individually is at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects and which contributes to a total concentration due to emissions from all sources that is greater than an ambient air quality standard. For sources subject to the requirements for permits or permit revisions under Article 4 of this Chapter, an excessive concentration alternatively means a maximum ground-level concentration due to emissions from a stack due in whole or part to downwash, wakes or eddy effects produced by nearby structures or nearby terrain features which

individually is at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects and greater than the applicable maximum allowable increase contained in R18-2-218. The allowable emission rate to be used in making demonstrations under subsection (B)(4) shall be prescribed by the new source performance standard which is applicable to the source category unless the owner or operator demonstrates that this emission rate is infeasible. Where such demonstrations are approved by the Director, an alternative emission rate shall be established in consultation with the source owner or operator;

- b. For sources seeking credit after October 11, 1983, for increases in existing stack heights up to the heights established under subsections (B)(2) and (3), either:
  - i. A maximum ground-level concentration due in whole or in part to downwash, wakes, or eddy effects as provided in subsection (B)(6)(a), except that emission rate specified by any applicable SIP shall be used; or
  - ii. The actual presence of a local nuisance caused by the existing stack, as determined by the Director; and
- c. For sources seeking credit after January 12, 1979, for a stack height determined under subsections (B)(2) and (3), where the Director requires the use of a field study or fluid model to verify GEP stack height, for sources seeking stack height credit after November 9, 1984, based on the aerodynamic influence of cooling towers, and for sources seeking stack height credit after December 31, 1970, based on the aerodynamic influence of structures not adequately represented by the equations in subsections (B)(2) and (3), a maximum ground-level concentration due in whole or in part to downwash, wakes, or eddy effects that is at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects.
- C.** The degree of emission limitation required of any source after the respective date given in subsection (A) above for control of any pollutant shall not be affected by so much of any source's stack height that exceeds good engineering practice or by any other dispersion technique.
- D.** The good engineering practice (GEP) stack height for any source seeking credit because of plume impaction which results in concentrations in violation of national ambient air quality standards or applicable maximum allowable increases under R18-2-218 can be adjusted by determining the stack height necessary to predict the same maximum air pollutant concentration on any elevated terrain feature as the maximum concentration associated with the emission limit which results from modelling the source using the GEP stack height as determined herein and assuming the elevated terrain features to be equal in elevation to the GEP stack height. If this adjusted GEP stack height is greater than stack height the source proposes to use, the source's emission limitation and air quality impact shall be determined using the proposed stack height and the actual terrain heights.
- E.** Before the Director issues a permit or permit revision under this Article to a source based on a good engineering practice stack height that exceeds the height allowed by subsection (B), the Director shall notify the public of the availability of the

demonstration study and provide opportunity for a public hearing in accordance with the requirements of R18-1-402.

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-333. Acid Rain

- A. 40 CFR 72, 74, 75 and 76 and all accompanying appendices, adopted as of June 28, 2013, (and no future amendments) are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.
- B. When used in 40 CFR 72, 74, 75 or 76, “Permitting Authority” means the Arizona Department of Environmental Quality and “Administrator” means the Administrator of the United States Environmental Protection Agency.
- C. If the provisions or requirements of the regulations incorporated in this Section conflict with any of the remaining portions of this Title, the regulations incorporated in this Section apply and take precedence.

#### Historical Note

Adopted effective October 7, 1994 (Supp. 94-4).  
 Amended effective December 7, 1995 (Supp. 95-4).  
 Amended effective December 4, 1997 (Supp. 97-4).  
 Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expeditious rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

#### R18-2-334. Minor New Source Review

- A. Applicability.
  1. Except as provided in subsection (A)(4), this Section shall apply to the following activities:
    - a. Construction of any new Class I or Class II source, including the construction of any source requiring a Class II permit under R18-2-302.01(C)(4); or
    - b. Any minor NSR modification to a Class I or Class II source.
  2. This Section shall apply to a regulated minor NSR pollutant emitted by a new stationary source, if the source will have the potential to emit that pollutant at an amount equal to or greater than the permitting exemption threshold.
  3. This Section shall apply to an increase in emissions of a regulated minor NSR pollutant from a minor NSR modification, if the modification would increase the source’s potential to emit that pollutant by an amount equal to or greater than the permitting exemption threshold.
  4. This Section shall not apply to the emissions of a pollutant from any of the activities identified in this subsection, if the emissions of that pollutant are subject to Article 4 of this Chapter.
- B. No person shall begin actual construction of a new stationary source, or minor NSR modification, subject to this Section without first obtaining a permit, a permit revision, a proposed

final permit, or a proposed final permit revision from the Director in accordance with R18-2-304.

- C. The Director shall not issue a proposed final Class I permit or permit revision or a Class II permit or permit revision subject to this Section to a person proposing to construct a new source or make a minor NSR modification unless the source or modification meets one of the following conditions for each regulated minor NSR pollutant subject to this section:
  1. The owner or operator elects to implement RACT.
    - a. In the case of a new source, the owner or operator shall implement RACT for each emissions unit that has the potential to emit a regulated minor NSR pollutant in an amount equal to or greater than 20% of the permitting exemption threshold.
    - b. In the case of a minor NSR modification, the owner or operator shall implement RACT for each emissions unit that will experience an increase in the potential to emit a regulated minor NSR pollutant equal to or greater than 20% of the permitting exemption threshold.
    - c. When it is technically feasible and otherwise consistent with the definition of RACT to apply the same devices, systems, process modifications, work practices or other apparatus or techniques to a group of emissions units, that group of emissions units shall be treated as a single emissions unit for purposes of subsections (C)(1)(a) and (b). The following are examples of situations to which this subsection may apply:
      - i. Emissions from a group of emissions units can be vented to a single control device.
      - ii. A low-VOC coating can be used in several spray-painting booths.
  2. An ambient air quality assessment demonstrates that emissions from the source or minor NSR modification will not interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter.
    - a. An owner or operator may elect to have the Director perform a SCREEN model of its emissions. If the results of the SCREEN model indicate that the source or minor NSR modification will interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter, the owner or operator may perform a more refined model to make the demonstration required by this subsection.
    - b. The requirements of this subsection shall be satisfied, if the results of the SCREEN or more refined modeling conducted pursuant to subsection (B)(2)(a) demonstrate either of the following:
      - i. Ambient concentrations resulting from emissions from the source or modification combined with existing concentrations of regulated minor NSR pollutants will not cause or exacerbate the violation of a standard imposed in Article 2 of this Chapter.
      - ii. Emissions from the source or minor modification will have an ambient impact below the significance levels as defined in R18-2-401.
    - c. The assessment required by this subsection shall take into account any limitations, controls or emissions decreases that are or will be enforceable in the permit or permit revision for the source.
- D. RACT Determinations.
  1. Except as otherwise provided in this subsection, the Director shall determine RACT on the basis of a case-by-case analysis performed by the permit applicant of the

emission reduction methods available for each emission unit subject to the RACT requirement under subsection (C)(1).

2. The Director shall accept a requirement proposed by a permit applicant as RACT under subsection (C)(1) if it complies with the most recently adopted of the following guidelines or standards in effect at the time of the application:
  - a. A control technique guideline issued by the Administrator under section 108(f)(1) of the Act.
  - b. An emissions standard established or revised by the Administrator for the same type of source under section 111 or 112 of the Act after November 15, 1990.
  - c. An applicable requirement of this Chapter or of air quality control regulations adopted by a County under A.R.S. § 49-479 that has been specifically identified as constituting RACT.
  - d. A RACT standard imposed on the same type of source by a general permit.
  - e. A RACT standard imposed on the same type of source under this Section no more than 10 years before submission of the application by the permit applicant. To facilitate identification of previously imposed RACT standards, the Director shall establish an online database of RACT determinations made under this Section.
- E. Notwithstanding an election to adopt RACT under subsection (C)(1), a permit applicant subject to this Section shall conduct an ambient air quality impact assessment under subsection (C)(2) upon the Director's request. The Director shall make such a request, if there is reason to believe that a source or minor NSR modification could interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter. In making that determination, the Director shall take into consideration:
  1. The source's emission rates.
  2. The location of emission units within the facility and their proximity to the ambient air.
  3. The terrain in which the source is or will be located.
  4. The source type.
  5. The location and emissions of nearby sources.
  6. Background concentrations of regulated minor NSR pollutants.
- F. The Director shall deny an application for a Class I permit or permit revision or a Class II permit or permit revision subject to this Section, if an assessment conducted pursuant to subsection (C)(2) demonstrates that the source or modification will interfere with attainment or maintenance of a standard imposed in Article 2 of this Chapter.
- G. An application for a permit or permit revision subject to this Section may be processed as a minor permit revision if one of the following conditions is satisfied for each pollutant subject to subsection (C):
  1. A RACT standard is imposed under subsection (D)(2) on each emissions unit that requires such a standard under subsection (C)(1).
  2. The results of the SCREEN model for a regulated minor NSR pollutant show expected concentrations, including background concentrations, that are less than 75% of the applicable standard imposed in Article 2 of this Chapter.
- H. A copy of the notice required by R18-2-330 for permits or significant permit revisions subject to this Section must also be sent to the Administrator through the appropriate regional office, and to all other state and local air pollution control agencies having jurisdiction in the region in which the source subject to the permit or permit revision will be located. The

notice also must be sent to any other agency in the region having responsibility for implementing the procedures required under this subpart.

- I. All modeling required pursuant to this Section shall be conducted in accordance with 40 CFR 51, Appendix W.
- J. The Director shall specify those conditions in the permit that are implemented pursuant to this Section. The specified conditions shall be included in subsequent permit renewals unless modified pursuant to this Section or Article 4 of this Chapter.
- K. The issuance of a permit or permit revision under this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.
- L. Delayed Effective Date. This Section shall take effect on the effective date of the Administrator's action approving it as part of the state implementation plan.

#### Historical Note

New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

### ARTICLE 4. PERMIT REQUIREMENTS FOR NEW MAJOR SOURCES AND MAJOR MODIFICATIONS TO EXISTING MAJOR SOURCES

#### R18-2-401. Definitions

The following definitions apply to this Article:

1. "Adverse impact on visibility" means visibility impairment that interferes with the management, protection, preservation, or enjoyment of the visitor's visual experience of a Class I area, as determined according to R18-2-410.
2. "Baseline actual emissions" means the rate of emissions, in tons per year, of a regulated NSR pollutant, as determined in accordance with subsections (2)(a) through (c).
  - a. For any existing electric utility steam generating unit, baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the five-year period immediately preceding when the owner or operator begins actual construction of the project. The Director shall allow the use of a different time period upon a determination that it is more representative of normal source operation.
    - i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
    - ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive 24-month period.
    - iii. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period must be used to determine the baseline actual emissions for the emissions units being changed. A different consecutive 24-month period can be used for each regulated NSR pollutant.
    - iv. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by subsection (2)(a)(ii).

- b. For any existing emissions unit (other than an electric utility steam generating unit), baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the 10-year period immediately preceding either the date the owner or operator begins actual construction of the project, or the date a complete permit application is received by the Administrator for a permit required under 40 CFR 52.21 or by the Director for a permit required under the state implementation plan, whichever is earlier, except that the 10-year period shall not include any period earlier than November 15, 1990.
    - i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
    - ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive 24-month period. This provision applies to excess emissions associated with a malfunction.
    - iii. The average rate shall be adjusted downward to exclude any emissions that would have exceeded an emission limitation with which the major source must currently comply, had such major source been required to comply with such limitations during the consecutive 24-month period. However, if an emission limitation is part of a maximum achievable control technology standard that the Administrator proposed or promulgated under 40 CFR 63, the baseline actual emissions need only be adjusted if the state of Arizona has taken credit for such emissions reductions in an attainment demonstration or maintenance plan submitted to the Administrator pursuant to section 110(a)(1) of the Act.
    - iv. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period must be used to determine the baseline actual emissions for all existing emissions units affected by the project. A different consecutive 24-month period may be used for each regulated NSR pollutant.
    - v. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by subsection (2)(b)(ii) or (iii).
  - c. For a new emissions unit, the baseline actual emissions for purposes of determining the emissions increase that will result from the initial construction and operation of such unit shall equal zero; and thereafter, for all other purposes, shall equal the unit's potential to emit.
  - d. For a PAL for a stationary source, the baseline actual emissions shall be calculated for existing electric utility steam generating units in accordance with the procedures in subsection (2)(a), for other existing emissions units in accordance with the procedures contained in subsection (2)(b), and for new emissions units in accordance with the procedures contained in subsection (2)(c).
3. "Basic design parameter" means:
    - a. Except as provided in subsection (3)(c), for a process unit at a steam electric generating facility, the owner or operator may select as its basic design parameters either maximum hourly heat input and maximum hourly fuel consumption rate or maximum hourly electric output rate and maximum steam flow rate. When establishing fuel consumption specifications in terms of weight or volume, the minimum fuel quality based on Btu content shall be used for determining the basic design parameters for a coal-fired electric utility steam generating unit.
    - b. Except as provided in subsection (3)(c), the basic design parameters for any process unit that is not at a steam electric generating facility are maximum rate of fuel or heat input, maximum rate of material input, or maximum rate of product output. Combustion process units will typically use maximum rate of fuel input. For sources having multiple end products and raw materials, the owner or operator should consider the primary product or primary raw material when selecting a basic design parameter.
    - c. If the owner or operator believes the basic design parameters in subsections (3)(a) and (b) are not appropriate for a specific industry or type of process unit, the owner or operator may propose to the Director an alternative basic design parameters for the source's process unit. If the Director approves of the use of an alternative basic design parameters, the Director shall issue a permit that is legally enforceable that records such basic design parameters and requires the owner or operator to comply with such parameters.
    - d. The owner or operator shall use credible information, such as results of historic maximum capability tests, design information from the manufacturer, or engineering calculations, in establishing the magnitude of the basic design parameters specified in subsections (3)(a) and (b).
    - e. If design information is not available for a process unit, then the owner or operator shall determine the process unit's basic design parameters using the maximum value achieved by the process unit in the five-year period immediately preceding the planned activity.
    - f. Efficiency of a process unit is not a basic design parameter.
    - g. The replacement activity shall not cause the process unit to exceed any emission limitation, or operational limitation that has the effect of constraining emissions, that applies to the process unit and that is legally enforceable.
  4. "Complete" means, in reference to an application for a permit or permit revision, that the application contains all the information necessary for processing the application.
  5. "Dispersion technique" means any technique that attempts to affect the concentration of a pollutant in the ambient air by any of the following:
    - a. Using that portion of a stack that exceeds good engineering practice stack height;
    - b. Varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or

## Department of Environmental Quality – Air Pollution Control

- c. Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust gases from several existing stacks into one stack; or other selective handling of exhaust gas streams that increases the exhaust gas plume rise. This shall not include any of the following:
- The reheating of a gas stream, following use of a pollution control system, for the purpose of returning the gas to the temperature at which it was originally discharged from the facility generating the gas stream.
  - The merging of exhaust gas streams under any of the following conditions:
    - The source owner or operator demonstrates that the facility was originally designed and constructed with the merged gas streams;
    - After July 18, 1985, the merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant, applying only to the emission limitation for that pollutant; or
    - Before July 8, 1985, the merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, an increase in the quantity of pollutants actually emitted prior to the merging, the Department shall presume that merging was significantly motivated by an intent to gain emissions credit for greater dispersion. Absent a demonstration by the source owner or operator that merging was not significantly motivated by such intent, the Department shall deny credit for the effects of the merging in calculating the allowable emissions for the source.
  - Smoke management in agricultural or silvicultural prescribed burning programs.
  - Episodic restrictions on residential woodburning and open burning.
  - Techniques that increase final exhaust gas plume rise if the resulting allowable emissions of sulfur dioxide from the facility do not exceed 5,000 tons per year.
6. "Existing emissions unit" is any emissions unit that is currently in existence and that is not a new emissions unit. A replacement unit is an existing emissions unit.
7. "High terrain" means any area having an elevation of 900 feet or more above the base of a source.
8. "Innovative control technology" means any system of air pollution control that has not been adequately demonstrated in practice but would have a substantial likelihood of achieving greater continuous emissions reduction than any control system in current practice, or of achieving at least comparable reductions at lower cost in terms of energy, economics, or nonair quality environmental impacts.
9. "Low terrain" means any area other than high terrain.
10. "Lowest achievable emission rate" (LAER) means, for any source, the more stringent rate of emissions based on one of the following:
- The most stringent emissions limitation that is contained in any implementation plan approved or promulgated under sections 110 or 172 of the Act for the class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that the limitation is not achievable; or
  - The most stringent emissions limitation that is achieved in practice by the class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. The application of this term shall not permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under applicable standards of performance in Articles 9 and 11 of this Chapter.
11. "Major source" means:
- Any stationary source located in a nonattainment area that emits, or has the potential to emit, 100 tons per year or more of any regulated NSR pollutant, except that the following thresholds shall apply in areas subject to subpart 2, subpart 3 or subpart 4 of part D, Title I of the Act:

Pollutant Emitted	Nonattainment Pollutant and Classification	Quantity Threshold tons/year or more
Carbon Monoxide (CO)	CO, Serious, if stationary sources contribute significantly to CO levels in the area as determined under rules issued by the Administrator	50
VOC	Ozone, Serious	50
VOC	Ozone, Severe	25
PM <sub>10</sub>	PM <sub>10</sub> , Serious	70
NO <sub>x</sub>	Ozone, Serious	50
NO <sub>x</sub>	Ozone, Severe	25

- Any stationary source located in an attainment or unclassifiable area that emits, or has the potential to emit, 100 tons per year or more of any regulated NSR pollutant if the source is classified as a Categorical Source, or 250 tons per year or more of any regulated NSR pollutant if the source is not classified as a Categorical Source;
  - Any stationary source that emits, or has the potential to emit, five or more tons of lead per year;
  - A major source that is major for VOC or nitrogen oxides shall be considered major for ozone; or
  - The fugitive emissions of a stationary source shall not be included in determining for any of the purposes of this Section whether it is a major stationary source, unless the source belongs to a section 302(j) category.
12. "New emissions unit" means any emissions unit which is (or will be) newly constructed and which has existed for less than two years from the date such emissions unit first operated.

## Department of Environmental Quality – Air Pollution Control

13. “Plantwide applicability limitation” or “PAL” means an emission limitation that is based on the baseline actual emissions of all emissions units at the stationary source that emit or have the potential to emit the PAL pollutant, expressed in tons per year, for a pollutant at a major source, that is enforceable as a practical matter and established source-wide in accordance with this Section.
14. “PAL allowable emissions” means “allowable emissions” as defined in R18-2-101, except that the allowable emissions for any emissions unit shall be calculated considering any emission limitations that are enforceable as a practical matter on the emissions unit’s potential to emit.
15. PAL effective date generally means the date of issuance of the PAL permit. However, the PAL effective date for an increased PAL is the date any emissions unit that is part of the PAL major modification becomes operational and begins to emit the PAL pollutant.
16. “PAL effective period” means the period beginning with the PAL effective date and ending 10 years later.
17. “PAL major modification” means any physical change in or change in the method of operation of the PAL source that causes it to emit the PAL pollutant at a level equal to or greater than the PAL.
18. “PAL permit” means the permit issued by the Director that establishes a PAL for a major source.
19. “PAL pollutant” means the pollutant for which a PAL is established at a major source.
20. “Projected actual emissions” means:
  - a. The maximum annual rate, in tons per year, at which an existing emissions unit is projected to emit a regulated NSR pollutant during any 12-month period in the 60 calendar months following the date the unit resumes regular operation after the project, or in any 12-month period in the 120 calendar months following that date if the project involves increasing the design capacity or potential to emit of any emissions unit for that regulated NSR pollutant and full utilization of the unit would result in a significant emissions increase or a significant net emissions increase at the major source.
  - b. In determining the projected actual emissions before beginning actual construction, the owner or operator of the major source:
    - i. Shall consider all relevant information, including but not limited to, historical operational data, the company’s own representations, the company’s expected business activity and the company’s highest projections of business activity, the company’s filings with the county, state or federal regulatory authorities, and compliance plans under these regulations; and
    - ii. Shall include fugitive emissions to the extent quantifiable;
    - iii. Shall include emissions associated with start-ups and shutdowns, except emissions from a shutdown associated with a malfunction; and
    - iv. Shall exclude, only for calculating any increase in emissions that results from the particular project, that portion of the unit’s emissions following the project that an existing unit could have accommodated during the consecutive 24-month period used to establish the baseline actual emissions and that are also unrelated to the particular project, including any increased utilization due to product demand growth; or
  - c. In lieu of using the method set out subsections (20)(b)(i) through (iv), the owner or operator may elect to use the emissions unit’s potential to emit, in tons per year.
21. “Reconstruction” of sources located in nonattainment areas shall be presumed to have taken place if the fixed capital cost of the new components exceeds 50% of the fixed capital cost of a comparable entirely new stationary source, as determined in accordance with the provisions of 40 CFR 60.15(f)(1) through (3).
22. “Replacement unit” means an emissions unit for which all the criteria listed in subsections (22)(a) through (d) are met. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.
  - a. The emissions unit is a reconstructed unit within the meaning of 40 CFR 60.15(b)(1), or the emissions unit completely takes the place of an existing emissions unit.
  - b. The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
  - c. The replacement does not alter the basic design parameters of the process unit.
  - d. The replaced emissions unit is permanently removed from the major source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought back into operation, it shall constitute a new emissions unit.
23. “Resource recovery project” means any facility at which solid waste is processed for the purpose of extracting, converting to energy, or otherwise separating and preparing solid waste for reuse. Only energy conversion facilities that utilize solid waste that provides more than 50% of the heat input shall be considered a resource recovery project under this Article.
24. “Significant emissions unit” means an emissions unit that emits or has the potential to emit a PAL pollutant in an amount that is equal to or greater than the significant level for that PAL pollutant, but less than the amount that would qualify the unit as a major emissions unit.
25. “Significance levels” means the following ambient concentrations for the enumerated pollutants:

Averaging Time					
Pollutant	Annual	24-Hour	8-Hour	3-Hour	1-Hour
SO <sub>2</sub>	1 µg/m <sup>3</sup>	5 µg/m <sup>3</sup>		25 µg/m <sup>3</sup>	
NO <sub>2</sub>	1 µg/m <sup>3</sup>				
CO			0.5 mg/m <sup>3</sup>		2 mg/m <sup>3</sup>
PM <sub>10</sub>	1 µg/m <sup>3</sup>	5 µg/m <sup>3</sup>			
PM <sub>2.5</sub>	0.06 µg/m <sup>3</sup>	0.07 µg/m <sup>3</sup>			
Class I area					
PM <sub>2.5</sub>	0.3 µg/m <sup>3</sup>	1.2 µg/m <sup>3</sup>			
Class II area					
PM <sub>2.5</sub>	0.3 µg/m <sup>3</sup>	1.2 µg/m <sup>3</sup>			
Class III area					

Except for the annual pollutant concentrations, the Department shall deem that exceedance of significance levels has occurred when the ambient concentration of the above pollutant is exceeded more than once per year at any one location. If the concentration occurs at a specific location and at a time when Arizona ambient air quality standards for the pollutant are not violated, the significance level does not apply.

26. “Small emissions unit” means an emissions unit that emits or has the potential to emit the PAL pollutant in an amount less than the significant level for that PAL pollutant.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-401 renumbered without change as Section R18-2-401 (Supp. 87-3). Section R18-2-401 renumbered to R18-2-601. New Section R18-2-401 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Typographical error corrected in R18-2-401(9)(a) (Supp. 00-4). Amended by final rulemaking at 13 A.A.R. 1134, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-402. General

- A. The preconstruction review requirements of this Article shall apply to the construction of any new major source or any project at an existing major source.
- B. The requirements of R18-2-403 through R18-2-410 apply to the construction of a major source or a major modification of any existing stationary source, except as this Article otherwise provides.
- C. No person shall begin actual construction of a new major source or a major modification subject to the requirements of R18-2-403 through R18-2-410 without first obtaining a proposed final permit from the Director, pursuant to R18-2-307(A)(2), stating that the major source or major modification shall meet those requirements.
- D. The requirements of this Article apply to projects at major sources in accordance with the following principles.
  1. Except as otherwise provided in subsection (E), a project is a major modification for a regulated NSR pollutant if it causes both a significant emissions increase and a significant net emissions increase. The project is not a major modification if it does not cause a significant emissions increase. If the project causes a significant emissions increase, then the project is a major modification only if it also results in a significant net emissions increase.
  2. The procedure for calculating before beginning actual construction whether a significant emissions increase will occur depends upon the types of emissions units being modified as set forth in subsections (D)(3) through (6). The procedure for calculating before beginning actual construction whether a significant net emissions increase will occur at the major source is set forth in the definition of net emissions increase in R18-2-101. Regardless of any such preconstruction projections, a major modification results if the project causes a significant emissions increase and a significant net emissions increase.
  3. Actual-to-projected-actual applicability test for projects that only involve existing emissions units. A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the projected actual emissions and the baseline actual emissions, for each existing emissions unit, equals or exceeds the significant amount for that pollutant.
  4. Actual-to-potential applicability test for projects that only involve new emissions units. A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the potential to emit from each new emissions unit following completion of the project and the baseline actual emissions of these units before the project equals or exceeds the significant amount for that pollutant.
- E. Any major source with a PAL for a regulated NSR pollutant shall comply with R18-2-412.
- F. This subsection applies with respect to any regulated NSR pollutant emitted from projects at existing emissions units at a major stationary source (other than projects at a source with a PAL) in circumstances where there is a reasonable possibility, within the meaning of subsection (F)(6) of this Section, that a project that is not a part of a major modification may result in a significant emissions increase of such pollutant and the owner or operator elects to use the method specified in R18-2-401(20)(b)(i) through (iv) of the definition of projected actual emissions for calculating projected actual emissions.
  1. Before beginning actual construction of the project, the owner or operator shall document and maintain a record of the following information:
    - a. A description of the project;
    - b. Identification of the emissions unit(s) with emissions of a regulated NSR pollutant that could be affected by the project;
    - c. A description of the applicability test used to determine that the project is not a major modification for any regulated NSR pollutant, including the baseline actual emissions, the projected actual emissions, the amount of emissions excluded under R18-2-401(20)(b)(iii) of the definition of projected actual emissions and an explanation for why such amount was excluded; and
    - d. Any netting calculations, if applicable.
  2. If the emissions unit is an existing electric utility steam generating unit, before beginning actual construction, the owner or operator shall provide a copy of the information set out subsection (F)(1) to the Director. Nothing in this subsection shall be construed to require the owner or operator of such a unit to obtain any determination from the Director before beginning actual construction.
  3. The owner or operator shall monitor the emissions of any regulated NSR pollutant that could increase as a result of the project and that is emitted by any emissions unit identified in subsection (F)(1)(b); and calculate and maintain a record of the annual emissions, in tons per year on a calendar year basis, for a period of five years following resumption of regular operations after the change, or for a period of 10 years following resumption of regular operations after the change if the project increases the design capacity or potential to emit of that regulated NSR pollutant at such emissions unit. For purposes of this subsection, fugitive emissions (to the extent quantifiable) shall be monitored if the emissions unit is part of a section 302(j) category or if the emissions unit is located at a major stationary source that belongs to a section 302(j) category.
  4. The owner or operator shall submit a report to the Director if for a calendar year the annual emissions, in tons per year, from the project identified in subsection (F)(1)(a) exceed the sum of the baseline actual emissions, as docu-

mented and maintained under subsection (F)(1)(c), by a significant amount for that regulated NSR pollutant, and if the emissions differ from the preconstruction projection as documented and maintained under subsection (F)(1)(c). The owner or operator shall submit the report to the Director within 60 days after the end of the calendar year. The report shall contain the following:

- a. The name, address and telephone number of the major source;
  - b. The annual emissions as calculated pursuant to subsection (F)(3); and
  - c. Any other information that the owner or operator wishes to include in the report, such as an explanation as to why the emissions differ from the preconstruction projection.
5. Notwithstanding subsection (F)(4), if any existing emissions unit identified in subsection (F)(1)(b) is an electric utility steam generating unit, the owner or operator shall submit a report to the Director within 60 days after the end of each calendar year during which the owner or operator must generate records under subsection (F)(3). The report shall document the unit's post-project annual emissions during the calendar year that preceded submission of the report.
  6. A "reasonable possibility" under subsection (F) occurs when the owner or operator calculates the project to result in one of the following:
    - a. A projected actual emissions increase of at least 50% of the amount that is a significant emissions increase (without reference to the amount that is a significant net emissions increase) for the regulated NSR pollutant.
    - b. A projected actual emissions increase that, added to the amount of emissions excluded under subsection R18-2-401(20)(b)(iv) of the definition of projected actual emissions, sums to at least 50% of the amount that is a significant emissions increase (without reference to the amount that is a significant net emissions increase) for the regulated NSR pollutant. For a project for which a reasonable possibility occurs only within the meaning of subsection (F)(6)(b), and not also within the meaning of subsection (F)(6)(a), subsections (F)(2) through (5) do not apply to the project.
- G.** An application for a permit or permit revision under this Article, other than a PAL permit pursuant to R18-2-412, shall not be considered complete unless the application demonstrates that:
1. The requirements in subsection (H) are met;
  2. The more stringent of the applicable new source performance standards in Article 9 of this Chapter or the existing source performance standards in Article 7 of this Chapter are applied to the proposed new major source or major modification of a major source;
  3. The visibility requirements contained in R18-2-410 are satisfied;
  4. All applicable provisions of Article 3 of this Chapter are met;
  5. The new major source or major modification will be in compliance with whatever emission limitation, design, equipment, work practice or operational standard, or combination thereof is applicable to the source or modification. The degree of emission limitation required for control of any pollutant under this Article shall not be affected in any manner by:
    - a. Stack height in excess of GEP stack height except as provided in R18-2-332; or
    - b. Any other dispersion technique, unless implemented prior to December 31, 1970;
6. The new major source or major modification will not exceed the applicable standards for hazardous air pollutants contained in this Chapter;
  7. The new major source or major modification will not exceed the limitations, if applicable, on emission from nonpoint sources contained in Article 6 of this Chapter;
  8. A stationary source that will emit five or more tons of lead per year will not violate the ambient air quality standards for lead contained in R18-2-206;
  9. The new major source or major modification will not have an adverse impact on visibility, as determined according to R18-2-410.
- H.** Except for assessing air quality impacts within Class I areas, the air impact analysis required to be conducted as part of a permit application shall initially consider only the geographical area located within a 50 kilometer radius from the point of greatest emissions for the new major source or major modification. The Director, on his own initiative or upon receipt of written notice from any person shall have the right at any time to request an enlargement of the geographical area for which an air quality impact analysis is to be performed by giving the person applying for the permit or permit revision written notice thereof, specifying the enlarged radius to be so considered. In performing an air impact analysis for any geographical area with a radius of more than 50 kilometers, the person applying for the permit or permit revision may use monitoring or modeling data obtained from major sources having comparable emissions or having emissions which are capable of being accurately used in such demonstration, and which are subjected to terrain and atmospheric stability conditions which are comparable or which may be extrapolated with reasonable accuracy for use in such demonstration.
- I.** Unless the requirement has been satisfied pursuant to Article 3 of this Chapter, the Director shall comply with following requirements:
1. Within 60 days after receipt of an application for a permit or permit revision subject to this Article, or any addition to such application, the Director shall advise the applicant of any deficiency. The date of receipt of the application shall be, for the purpose of this Section, the date on which the Director received all required information. The permit application shall not be deemed complete if the Director fails to meet the requirements of this subsection.
  2. A copy of any notice required by R18-2-330 shall be sent to the permit applicant, to the Administrator, and to the following officials and agencies having cognizance over the location where the proposed major source or major modification would occur:
    - a. The air pollution control officer, if one exists, for the county wherein the proposed or existing source that is the subject of the permit or permit revision application is located;
    - b. The county manager for the county wherein the proposed or existing source that is the subject of the permit or permit revision application is located;
    - c. The city or town managers of the city or town which contains, and any city or town the boundaries of which are within 5 miles of, the location of the proposed or existing source that is the subject of the permit or permit revision application;
    - d. Any regional land use planning agency with authority for land use planning in the area where the pro-

- posed or existing source that is the subject of the permit or permit revision application is located; and
- e. Any state, Federal Land Manager, or Indian governing body whose lands may be affected by emissions from the proposed source or modification.
3. The Director shall take final action on the application within one year of the proper filing of the completed application. The Director shall notify the applicant in writing of his approval or denial.
  4. The authority to construct and operate a new major source or major modification under a permit or permit revision issued under this Article shall terminate if the owner or operator does not commence the proposed construction or major modification within 18 months of issuance or if, during the construction or major modification, the owner or operator suspends work for more than 18 months. The Director may extend the 18-month period upon a satisfactory showing that an extension is justified. This provision does not apply to the time period between construction of the approved phases of a phased construction project; each phase must commence construction within 18 months of the projected and approved commencement date.

#### Historical Note

Amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-402 repealed, new Section R9-3-402 adopted effective May 14, 1979 (Supp. 79-1). Amended and adopted by reference Open Burning Guidelines for Air Pollution Control effective September 22, 1983 (Supp. 83-5). Former Section R9-3-402 renumbered without change as Section R18-2-402 (Supp. 87-3). Section R18-2-402 renumbered to R18-2-602, new Section R18-2-402 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-403. Permits for Sources Located in Nonattainment Areas**

- A. Except as provided in subsections (C) through (G) below, no permit or permit revision shall be issued under this Article to a person proposing to construct a new major source or make a major modification that is major for the pollutant for which the area is designated nonattainment unless:
  1. The person demonstrates that the new major source or the major modification will meet an emission limitation which is the lowest achievable emission rate (LAER) for that source for that regulated NSR pollutant.
  2. The person demonstrates that all existing major sources owned or operated by that person (or any entity controlling, controlled by, or under common control with that person) in the state are in compliance with, or on a schedule of compliance for, all conditions contained in permits of each of the sources and all other applicable emission limitations and standards under the Act and this Chapter.
  3. The person demonstrates that emission reductions for the specific pollutant(s) from source(s) in existence in the allowable offset area of the new major source or major modification (whether or not under the same ownership) meet the offset requirements of R18-2-404.
- B. No permit or permit revision under this Article shall be issued to a person proposing to construct a new major source or make a major modification to a major source located in a nonattainment area unless:
  1. The person performs an analysis of alternative sites, sizes, production processes, and environmental control

techniques for such new major source or major modification; and

2. The Director determines that the analysis demonstrates that the benefits of the new major source or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification.
- C. At such time that a particular source or modification becomes a major source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as restriction on hours of operation, then the requirements of this Section shall apply to the source or modification as though construction had not yet commenced on the source or modification.
  - D. Secondary emissions shall not be considered in determining the potential to emit of a new source or modification and therefore whether the new source or modification is major. However, if a new source or modification is subject to this Section on the basis of its direct emissions, a permit or permit revision under this Article to construct the new source or modification shall be denied unless the requirements of R18-2-403(A)(3) and R18-2-404 are met for reasonably quantifiable secondary emissions caused by the new source or modification.
  - E. A permit to construct a new major source or major modification shall be denied unless the conditions specified in subsections (A)(1), (2), and (3) are met for fugitive emissions caused by the new source or modification. However, these conditions shall not apply to a new major source or major modification that would be a major source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential emissions of the source or modification, and the source does not belong to a section 302(j) category.
  - F. The requirements of subsection (A)(3) shall not apply to temporary emissions units, such as pilot plants, portable facilities that will be relocated outside of the nonattainment area and the construction phase of a new source, if those units will operate for no more than 24 months in the nonattainment area, are otherwise in compliance with the requirement to obtain a permit under this Chapter and are in compliance with the conditions of that permit.
  - G. A decrease in actual emissions shall be considered in determining the potential of a new source or modification to emit only to the extent that the Director has not relied on it in issuing any permit or permit revision under this Article or the state has not relied on it in demonstrating attainment or reasonable further progress.
  - H. Within 30 days of the issuance of any permit under this Section, the Director shall submit control technology information from the permit to the Administrator for the purposes listed in Section 173(d) of the Act.
  - I. The issuance of a permit or permit revision under this Article in accordance with this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.

#### Historical Note

Former Section R9-3-403 repealed, new Section R9-3-403 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-403 renumbered without change as Section R18-2-403 (Supp. 87-3). Section R18-2-403 renumbered to R18-2-603, new Section R18-2-403 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012

(Supp. 12-2).

**R18-2-404. Offset Standards**

- A.** Increased emissions by a major source or major modification subject to R18-2-403 shall be offset by real reductions in the actual emissions of each pollutant for which the area has been designated as nonattainment and for which the source or modification is classified as major. Except as provided in R18-2-405, emissions increases shall be offset by decreases at a ratio of at least 1 to 1.
- B.** Except as provided in subsection (B)(1) or (2), for sources and modifications subject to this Section, the baseline for determining credit for emissions reductions is the emissions limit for the source generating the offset credit under the applicable implementation plan in effect at the time the application for a permit or permit revision is filed.
1. The offset baseline shall be the actual emissions of the source from which offset credit is obtained where either of the following conditions is satisfied:
    - a. The demonstration of reasonable further progress and attainment of ambient air quality standards is based upon the actual emissions of sources located within a designated nonattainment area for which the preconstruction review program was adopted.
    - b. The applicable implementation plan does not contain an emissions limitation for that source or source category.
  2. Where the emissions limit under the applicable implementation plan allows greater emissions than the potential to emit of the source, emissions offset credit will be allowed only for control below this potential.
- C.** For an existing fuel combustion source, emissions offset credit shall be based on the allowable emissions under the applicable implementation plan for the type of fuel being burned at the time the application to construct is filed. If the existing source commits to switch to a cleaner fuel at some future date, emissions offset credit based on the allowable or actual emissions for the fuels involved is not acceptable, unless the permit for the existing source is conditioned to require the use of a specified alternative control measure which would achieve the same degree of emissions reduction should the source switch back to a fuel generating higher emissions. The owner or operator of the existing source must demonstrate that adequate long-term supplies of the new fuel are available before granting emissions offset credit for fuel switches.
- D.** Offset Credit for Shutdowns.
1. Emissions reductions achieved by shutting down an existing emission unit or curtailing production or operating hours may be credited for offsets if they meet both of the following conditions.
    - a. The reductions are surplus, permanent, quantifiable, and federally enforceable.
    - b. The shutdown or curtailment occurred after the last day of the base year for the SIP planning process. For purposes of this subsection, the Director may choose to consider a prior shutdown or curtailment to have occurred after the last day of the base year if the projected emissions inventory used to develop the attainment demonstration explicitly includes the emissions from such previously shutdown or curtailed emission units. However, in no event may credit be given for shutdowns that occurred before August 7, 1977.
  2. Emissions reductions achieved by shutting down an existing emissions unit or curtailing production or operating hours and that do not meet the requirements in subsection

(D)(1)(b) may be credited only if one of the following conditions is satisfied:

- a. The shutdown or curtailment occurred on or after the date the construction permit application is filed.
  - b. The applicant can establish that the proposed new emissions unit is a replacement for the shutdown or curtailed emissions unit, and the emissions reductions achieved by the shutdown or curtailment met the requirements of subsection (D)(1)(a).
- E.** No emissions credit may be allowed for replacing one hydrocarbon compound with another of lesser reactivity, except for those compounds listed in Table 1 of EPA's "Recommended Policy on Control of Volatile Organic Compounds," 42 FR 35314 (July 8, 1977).
- F.** All emission reductions claimed as offset credits shall be federally enforceable by the time a permit is issued to the owner or operator of the major source subject to this Section and shall be in effect by the time the new or modified source subject to the permit commences operation.
- G.** The owner or operator of a major source or major modification subject to this Section must obtain offset credits from the same source or from other sources in the same nonattainment area, except that the Director may allow the owner or operator to obtain offset credits from another nonattainment area if both of the following conditions are satisfied:
1. The other area has an equal or higher nonattainment classification than the area in which the source is located.
  2. Emissions from such other area contribute to a violation of the national ambient air quality standard in the nonattainment area in which the source is located.
- H.** Credit for an emissions reduction can be claimed to the extent that the Director has not relied on it in issuing any permit under this Article or the state has not relied on it in a demonstration of attainment or reasonable further progress.
- I.** The total tonnage of increased emissions, in tons per year, resulting from a major modification that must be offset under this Section shall be determined by summing the difference between the allowable emissions after the modification and the actual emissions before the modification for each emissions unit.
- J.** In ozone nonattainment areas classified as marginal, total emissions of VOC and oxides of nitrogen from other sources shall offset those proposed or permitted from the major source or major modification by a ratio of at least 1.10 to 1. In ozone nonattainment areas classified as moderate, total emissions of VOC and oxides of nitrogen from other sources shall offset those proposed or permitted from the major source or major modification by a ratio of at least 1.15 to 1. New major sources and major modifications in serious and severe ozone nonattainment areas shall comply with this Section and R18-2-405.

**Historical Note**

Former Section R9-3-404 repealed, new Section R9-3-404 adopted effective May 14, 1979 (Supp. 79-1). Amended by adding subsection (C) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-404 renumbered without change as Section R18-2-404 (Supp. 87-3). Amended subsection (C) effective December 1, 1988 (Supp. 88-4). Section R18-2-404 renumbered to R18-2-604, new Section R18-2-404 adopted effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012

(Supp. 12-2).

**R18-2-405. Special Rule for Major Sources of VOC or Nitrogen Oxides in Ozone Nonattainment Areas Classified as Serious or Severe**

- A. Applicability. The provisions of this Section only apply to stationary sources of VOC or nitrogen oxides in ozone nonattainment areas classified as serious or severe. Unless otherwise provided in this Section, all requirements of Articles 3 and 4 of this Chapter apply.
- B. “Significant” means, for the purposes of a major modification of any major stationary source of VOC or nitrogen oxides, or for determining whether an otherwise minor source is major under the definition of major source in R18-2-401, any physical change or change in the method of operations that results in net increases in emissions of either pollutant by more than 25 tons when aggregated with all other creditable increases and decreases in emissions from the source over the previous five consecutive calendar years, including the calendar year in which the increase is proposed.
- C. For any major source that emits or has the potential to emit less than 100 tons of VOC or oxides of nitrogen per year, a physical or operational change that results in a significant increase in VOC or oxides of nitrogen, respectively, from any discrete operation, unit, or other pollutant emitting activity at the source shall constitute a major modification, except that the increase shall not constitute a major modification, if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of VOC or oxides of nitrogen, as applicable, from other operations, units or activities at the source at an internal offset ratio of at least 1.3 to 1. If the owner or operator does not make such an election, the change shall constitute a major modification but BACT shall be substituted for LAER when applying R18-2-403(A)(1) to the major modification.
- D. For any stationary source that emits or has the potential to emit 100 tons or more of VOC or oxides of nitrogen per year, a physical or operational change that results in any significant increase in VOC from any discrete operation, unit or other pollutant emitting activity at the source or oxides of nitrogen, respectively, shall constitute a major modification except that if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of VOC or oxides of nitrogen, as applicable, from other operations, units or activities within the source at an internal offset ratio of at least 1.3 to 1, R18-2-403(A)(1) shall not apply to the change.
- E. For any new major source or major modification that is classified as major because of emissions or potential to emit VOC or nitrogen oxides in an ozone nonattainment area classified as serious, the increase in emissions of these pollutants from the source or modification shall be offset at a ratio of 1.2 to 1. The offset shall be made in accordance with the provisions of R18-2-404.
- F. For any new major source or major modification that is classified as such because of emissions or potential to emit VOC or nitrogen oxides in an ozone nonattainment area classified as severe, the increase in emissions of these pollutants from the source or modification shall be offset at a ratio of 1.3 to 1. These offsets shall be made in accordance with the provisions of R18-2-404.

**Historical Note**

Former R9-3-405, Other industries, renumbered R9-3-406, new Section adopted effective September 17, 1975 (Supp. 75-1). Former Section R9-3-405 repealed, new Section R9-3-405 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5).

Former Section R9-3-405 renumbered without change as Section R18-2-405 (Supp. 87-3). Section R18-2-405 renumbered to R18-2-605, new Section R18-2-405 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

**R18-2-406. Permit Requirements for Sources Located in Attainment and Unclassifiable Areas**

- A. Except as provided in subsections (B) through (G) below and R18-2-408 (Innovative control technology), no permit or permit revision under this Article shall be issued to a person proposing to construct a new major source or make a major modification to a major source that would be constructed in an area designated as attainment or unclassifiable for any regulated NSR pollutant unless the source or modification meets the following conditions:
1. A new major source shall apply best available control technology (BACT) for each regulated NSR pollutant for which the potential to emit is significant.
  2. A major modification shall apply BACT for each regulated NSR pollutant for which the project would result in a significant net emissions increase at the source. This requirement applies to each proposed emissions unit at which a net emissions increase in the pollutant would occur as a result of a physical change or change in the method of operation in the unit.
  3. For phased construction projects, the determination of BACT shall be reviewed and modified as appropriate at the latest reasonable time which occurs no later than 18 months prior to commencement of construction of each independent phase of the project. At such time the owner or operator of the applicable stationary source may be required to demonstrate the adequacy of any previous determination of BACT for the source.
  4. BACT shall be determined on a case-by-case basis and may constitute application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment, clean fuels, or innovative fuel combustion techniques, for control of such pollutant. In no event shall such application of BACT result in emissions of any pollutant, which would exceed the emissions allowed by any applicable new source performance standard or national emission standard for hazardous air pollutants under Articles 9 and 11 of this Chapter or by the applicable implementation plan. If the Director determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emissions standard infeasible, a design, equipment, work practice, operational standard, or combination thereof may be prescribed instead to satisfy the requirement for the application of BACT. Such standard shall, to the degree possible, set forth the emissions reduction achievable by implementation of such design, equipment, work practice, or operation and shall provide for compliance by means which achieve equivalent results.
  5. The person applying for the permit or permit revision under this Article performs an air impact analysis and monitoring as specified in R18-2-407, and such analysis demonstrates that allowable emission increases from the proposed new major source or major modification, in conjunction with all other applicable emission increases or reductions, including secondary emissions, for all pol-

lutants listed in R18-2-218(A), and including minor and mobile source emissions of nitrogen oxides and PM<sub>10</sub>:

- a. Would not cause or contribute to concentrations of conventional air pollutants in violation of any ambient air quality standard in Article 2 of this Chapter in any air quality control region or any applicable maximum allowable increase under R18-2-218 over the baseline concentration for any attainment or unclassified area; or
  - b. Would not contribute to an increase in ambient concentrations for a pollutant by an amount in excess of the significance level for such pollutant in any adjacent area in which Arizona primary or secondary ambient air quality standards for that pollutant are being violated. A new major source of volatile organic compounds or nitrogen oxides, or a major modification to a major source of volatile organic compounds or nitrogen oxides shall be presumed to contribute to violations of the Arizona ambient air quality standards for ozone if it will be located within 50 kilometers of a nonattainment area for ozone. The presumption may be rebutted for a new major source or major modification if it can be satisfactorily demonstrated to the Director that emissions of volatile organic compounds or nitrogen oxides from the new major source or major modification will not contribute to violations of the Arizona ambient air quality standards for ozone in adjacent nonattainment areas for ozone. Such a demonstration shall include a showing that topographical, meteorological, or other physical factors in the vicinity of the new major source or major modification are such that transport of volatile organic compounds emitted from the source are not expected to contribute to violations of the ozone standards in the adjacent nonattainment areas.
6. Air quality models:
- a. All estimates of ambient concentrations required under this Section shall be based on the applicable air quality models, data basis, and other requirements specified in 40 CFR 51, Appendix W, "Guideline On Air Quality Models," as of July 1, 2011 (and no future amendments or editions), which shall be referred to hereinafter as "Guideline" and is adopted by reference and is on file with the Department.
  - b. Where an air quality impact model specified in the "Guideline" is not applicable, the model may be modified or another model substituted. Such a change shall be subject to notice and opportunity for public comment. Written approval of the EPA Administrator shall be obtained for any modification or substitution.
- B. The requirements of this Section shall not apply to a new major source or major modification to a source with respect to a particular pollutant if the person applying for the permit or permit revision under this Article demonstrates that, as to that pollutant, the source or modification is located in an area designated as nonattainment for the pollutant.
- C. The requirements of this Section shall not apply to a new major source or a major modification if such source or modification would be a major source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential emissions of the source or modification, and the source 1980 does not belong to a section 302(j) category.
- D. The requirements of this Section shall not apply to a new major source or major modification to a source when the

owner of such source is a nonprofit health or educational institution.

- E. The requirements of this Section shall not apply to a portable source which would otherwise be a new major source or major modification to an existing source if such portable source will operate for no more than 24 months, is under a permit or permit revision under this Article, is in compliance with the conditions of that permit or permit revision under this Article, the emissions from the source will not impact a Class I area nor an area where an applicable increment is known to be violated, and reasonable notice is given to the Director prior to the relocation identifying the proposed new location and the probable duration of operation at the new location. Such notice shall be given to the Director not less than 10 calendar days in advance of the proposed relocation unless a different time duration is previously approved by the Director.
- F. Special rules applicable to Federal Land Managers:
1. Notwithstanding any other provision of this Section, a Federal Land Manager may present to the Director a demonstration that the emissions attributed to such new major source or major modification to a source would have an adverse impact on visibility or other specifically defined air quality related values of any Federal Mandatory area designated in R18-2-217(B) regardless of the fact that the change in air quality resulting from emissions attributable to such new major source or major modification to a source in existence will not cause or contribute to concentrations which exceed the maximum allowable increases for the area in R18-2-218. If the Director concurs with such demonstrations, the permit or permit revision under this Article shall be denied.
  2. If the owner or operator of a proposed new major source or a source for which major modification is proposed demonstrates to the Federal Land Manager that the emissions attributable to such major source or major modification will have no significant adverse impact on the visibility or other specifically defined air quality-related values of such areas and the Federal Land Manager so certifies to the Director, the Director may issue a permit or permit revision under this Article, notwithstanding the fact that the change in air quality resulting from emissions attributable to such new major source or major modification will cause or contribute to concentrations which exceed the maximum allowable increases for a Class I area. Such a permit or permit revision under this Article shall require that such new major source or major modification comply with such emission limitations as may be necessary to assure that emissions will not cause increases in ambient concentrations greater than the following maximum allowable increases over baseline concentrations for such pollutants:

Pollutant	Maximum allowable increase (micrograms per cubic meter)
PM <sub>2.5</sub> :	
Annual arithmetic mean	4
24-hr maximum	9
PM <sub>10</sub> :	
Annual arithmetic mean	17
24-hr maximum	30
Sulfur dioxide:	
Annual arithmetic mean	20
24-hr maximum	91

3-hr maximum	325
Nitrogen dioxide	
Annual arithmetic mean	25

- G.** The issuance of a permit or permit revision under this Article in accordance with this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.
- H.** At such time that a particular source or modification becomes a major source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of this Section shall apply to the source or modification as though construction had not yet commenced on the source or modification.

#### Historical Note

Former Section R9-3-405, renumbered effective September 17, 1975 (Supp. 75-1). Former Section R9-3-406 repealed, new Section R9-3-406 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-406 renumbered without change as Section R18-2-406 (Supp. 87-3). Section R18-2-406 renumbered to R18-2-606, new Section R18-2-406 adopted effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). The references to R18-2-101(97)(a) in subsection (A)(1) and (2) amended to reference R18-2-101(104)(a) (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-407. Air Quality Impact Analysis and Monitoring Requirements

- A.** Any application for a permit or permit revision under this Article to construct a new major source or major modification to a major source shall contain an analysis of ambient air quality in the area that the new major source or major modification would affect for each of the following pollutants:
- For the new source, each pollutant that it would have the potential to emit in a significant amount;
  - For the modification, each pollutant for which it would result in a significant net emissions increase.
- B.** With respect to any such pollutant for which no Arizona ambient air quality standard exists, the analysis shall contain all air quality monitoring data as the Director determines is necessary to assess ambient air quality for that pollutant in any area that the emissions of the pollutant would affect.
- C.** With respect to any such pollutant (other than nonmethane hydrocarbons) for which such a standard does exist, the analysis shall contain continuous air quality monitoring data gathered for purposes of determining whether emissions of that pollutant would cause or contribute to a violation of the standard or any maximum allowable increase.
- D.** In general, the continuous air quality monitoring data that is required shall have been gathered over a period of at least one year and shall represent at least the year preceding receipt of the application, except that, if the Director determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one year (but not to be less than four months), the data that is required shall have been gathered over at least that shorter period.
- E.** The owner or operator of a proposed stationary source or modification to a source of volatile organic compounds who satisfies all conditions of 40 CFR 51, Appendix S, Section IV, may

provide post-approval monitoring data for ozone in lieu of providing preconstruction data as required under subsections (B), (C), and (D) above.

- F.** Post-construction monitoring. The owner or operator of a new major source or major modification shall, after construction of the source or modification, conduct such ambient monitoring as the Director determines is necessary to determine the effect emissions from the new source or modification may have, or are having, on air quality in any area.
- G.** Operations of monitoring stations. The owner or operator of a new major source or major modification shall meet the requirements of 40 CFR 58, Appendix B, during the operation of monitoring stations for purposes of satisfying subsections (B) through (F) above.
- H.** The requirements of subsections (B) through (G) above shall not apply to a new major source or major modification to an existing source with respect to monitoring for a particular pollutant if:
- The emissions increase of the pollutant from the new source or the net emissions increase of the pollutant from the modification would cause, in any area, air quality impacts less than the following amounts:
    - Carbon Monoxide - 575  $\mu\text{g}/\text{m}^3$ , eight-hour average;
    - Nitrogen dioxide - 14  $\mu\text{g}/\text{m}^3$ , annual average;
    - $\text{PM}_{2.5}$  - 4  $\mu\text{g}/\text{m}^3$ , 24-hour average;
    - $\text{PM}_{10}$  - 10  $\mu\text{g}/\text{m}^3$ , 24-hour average;
    - Sulfur dioxide - 13  $\mu\text{g}/\text{m}^3$ , 24-hour average;
    - Lead - 0.1  $\mu\text{g}/\text{m}^3$ , 24-hour average;
    - Fluorides - 0.25  $\mu\text{g}/\text{m}^3$ , 24-hour average;
    - Total reduced sulfur - 10  $\mu\text{g}/\text{m}^3$ , one-hour average;
    - Hydrogen sulfide - 0.04  $\mu\text{g}/\text{m}^3$ , one-hour average;
    - Reduced sulfur compounds - 10  $\mu\text{g}/\text{m}^3$ , one-hour average;
    - Ozone - increased emissions of less than 100 tons per year of volatile organic compounds or oxides of nitrogen; or
  - The concentrations of the pollutant in the area that the new source or modification would affect are less than the concentrations listed in subsection (H)(1) above.
- I.** Any application for permit or permit revision under this Article to construct a new major source or major modification to a source shall contain:
- An analysis of the impairment to visibility, soils, and vegetation that would occur as a result of the new source or modification and general commercial, residential, industrial, and other growth associated with the new source or modification. The applicant need not provide an analysis of the impact on vegetation having no significant commercial or recreational value.
  - An analysis of the air quality impact projected for the area as a result of general commercial, residential, industrial, and other growth associated with the new source or modification.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-407 renumbered without change as Section R18-2-407 (Supp. 87-3). Section R18-2-407 renumbered to R18-2-607, new Section R18-2-407 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-408. Innovative Control Technology

- A.** Notwithstanding the provisions of R18-2-406(A)(1) through (3), the owner or operator of a proposed new major source or major modification may request that the Director approve a

system of innovative control technology rather than the best available control technology requirements otherwise applicable to the new source or modification.

- B.** The Director shall approve the installation of a system of innovative control technology if the following conditions are met:
1. The owner or operator of the proposed source or modification satisfactorily demonstrates that the proposed control system would not cause or contribute to an unreasonable risk to public health, welfare, or safety in its operation or function;
  2. The owner or operator agrees to achieve a level of continuous emissions reduction equivalent to that which would have been required under R18-2-406(A)(2) by a date specified in the permit or permit revision under this Article for the source. Such date shall not be later than four years from the time of start-up or seven years from the issuance of a permit or permit revision under this Article;
  3. The source or modification would meet requirements equivalent to those in R18-2-406(A) based on the emissions rate that the stationary source employing the system of innovative control technology would be required to meet on the date specified in the permit or permit revision under this Article.
  4. Before the date specified in the permit or permit revision under this Article, the source or modification would not:
    - a. Cause or contribute to any violation of an applicable state ambient air quality standard; or
    - b. Impact any area where an applicable increment is known to be violated.
  5. All other applicable requirements including those for public participation have been met.
  6. The Director receives the consent of the governors of other affected states.
  7. The limits on pollutants contained in R18-2-218 for Class I areas will be met for all periods during the life of the source or modification.
- C.** The Director shall withdraw any approval to employ a system of innovative control technology made under this Section if:
1. The proposed system fails by the specified date to achieve the required continuous emissions reduction rate; or
  2. The proposed system fails before the specified date so as to contribute to an unreasonable risk to public health, welfare, or safety; or
  3. The Director decides at any time that the proposed system is unlikely to achieve the required level of control or to protect the public health, welfare, or safety.
- D.** If the new source or major modification fails to meet the required level of continuous emissions reduction within the specified time period, or if the approval is withdrawn in accordance with subsection (C) above, the Director may allow the owner or operator of the source or modification up to an additional three years to meet the requirement for the application of best available control technology through use of a demonstrated system of control.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-408 renumbered without change as Section R18-2-408 (Supp. 87-3). Section R18-2-408 renumbered to R18-2-608, new Section R18-2-408 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-409. Air Quality Models

- A.** Where the Director requires a person requesting a permit or permit revision under this Article to perform air quality impact

modeling to obtain such permit or permit revision under this Article, the modeling shall be performed in a manner consistent with the Guideline specified in R18-2-406(A)(6)(a).

- B.** Where the person requesting a permit or permit revision under this Article can demonstrate that an air quality impact model specified in the Guideline is inappropriate, the model may be modified or another model substituted. However, before such modification or substitution can occur, the Director shall make a written finding that:
1. No model in the Guideline is appropriate for a particular permit or permit revision under this Article under consideration, or
  2. The data base required for the appropriate model in the Guideline is not available, and
  3. The model proposed as a substitute or modification is likely to produce results equal or superior to those obtained by models in the Guideline, and
  4. The model proposed as a substitute or modification has been approved by the Administrator.
- C.** The substitution or modification of an air quality model under this Section shall be included in the public notice under R18-2-330(C).

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-409 renumbered without change as Section R18-2-409 (Supp. 87-3). Section R18-2-409 renumbered to R18-2-609, new Section R18-2-409 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-410. Visibility Protection

- A.** For any new major source or major modification subject to the provisions of this Chapter, no permit or permit revision under this Article shall be issued to a person proposing to construct or modify the source unless the applicant has provided:
1. An analysis of the anticipated impacts of the proposed source on visibility in any Class I areas which may be affected by the emissions from that source; and
  2. Results of monitoring of visibility in any area near the proposed source for such purposes and by such means as the Director determines is necessary and appropriate.
- B.** A determination of an adverse impact on visibility shall be made based on consideration of all of the following factors:
1. The times of visitor use of the area;
  2. The frequency and timing of natural conditions in the area that reduce visibility;
  3. All of the following visibility impairment characteristics:
    - a. Geographic extent,
    - b. Intensity,
    - c. Duration,
    - d. Frequency,
    - e. Time of day;
  4. The correlation between the characteristics listed in subsection (B)(3) and the factors described in subsections (B)(1) and (2).
- C.** The Director shall not issue a permit or permit revision pursuant to this Article or Article 3 of this Chapter for any new major source or major modification subject to this Chapter unless the following requirements have been met:
1. The Director shall notify the individuals identified in subsection (C)(2) within 30 days of receipt of any advance notification of any such permit or permit revision under this Article.
  2. Within 30 days of receipt of an application for a permit or permit revision under this Article for a source whose emissions may affect a Class I area, the Director shall provide written notification of the application to the Fed-

eral Land Manager and the federal official charged with direct responsibility for management of any lands within any such area. The notice shall:

- a. Include a copy of all information relevant to the permit or permit revision under this Article,
  - b. Include an analysis of the anticipated impacts of the proposed source on visibility in any area which may be affected by emissions from the source, and
  - c. Provide for no less than a 30-day period within which written comments may be submitted.
3. The Director shall consider any analysis provided by the Federal Land Manager that is received within the comment period provided in subsection (C)(2).
- a. Where the Director finds that the analysis provided by the Federal Land Manager does not demonstrate to the satisfaction of the Director that an adverse impact on visibility will result in the area, the Director shall, within the public notice required under R18-2-330, either explain the decision or specify where the explanation can be obtained.
  - b. When the Director finds that the analysis provided by the Federal Land Manager demonstrates to the satisfaction of the Director that an adverse impact on visibility will result in the area, the Director shall not issue a permit or permit revision under this Article for the proposed major new source or major modification.
4. When the proposed permit decision is made, pursuant to R18-2-304(J), and available for public review, the Director shall provide the individuals identified in subsection (C)(2) with a copy of the proposed permit decision and shall make available to them any materials used in making that determination.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-410 renumbered without change as Section R18-2-410 (Supp. 87-3). Section R18-2-410 renumbered to R18-2-610, new Section R18-2-410 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-411. Repealed

#### Historical Note

Adopted effective November 15, 1993 (Supp. 93-4). Section repealed by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-412. PALs

##### A. Applicability.

1. The Director may approve the use of a PAL for any existing major source if the PAL meets the requirements of this Section.
2. Any physical change in or change in the method of operation of a major stationary source that maintains its total source-wide emissions below the PAL level, meets the requirements of this Section, and complies with the PAL permit:
  - a. Is not a major modification for the PAL pollutant,
  - b. Does not have to be approved through the PSD program, and
  - c. Is not subject to the provisions in R18-2-403(C) or R18-2-406(H).
3. Except as provided under subsection (A)(2)(c), a major stationary source shall continue to comply with all applicable federal or state requirements, emission limitations, and work practice requirements that were established prior to the effective date of the PAL.

**B.** Permit application requirements. As part of a permit application requesting a PAL, the owner or operator of a major source shall submit the following information to the Director for approval:

1. A list of all emissions units at the source designated as small, significant or major based on their potential to emit. In addition, the owner or operator of the source shall indicate which, if any, federal or state applicable requirements, emission limitations, or work practices apply to each unit.
2. Calculations of the baseline actual emissions (with supporting documentation).
3. The calculation procedures that the major source owner or operator proposes to use to convert the monitoring system data to monthly emissions and annual emissions based on a 12-month rolling total for each month as required by subsection (L)(1).

**C.** General requirements for establishing PALs.

1. The Director is allowed to establish a PAL at a major source, provided that at a minimum, the following requirements are met:
  - a. The PAL shall impose an annual emission limitation in tons per year, that is enforceable as a practical matter, for the entire major source. For each month during the PAL effective period after the first 12 months of establishing a PAL, the major source owner or operator shall show that the sum of the monthly emissions from each emissions unit under the PAL for the previous 12 consecutive months is less than the PAL (a 12-month sum, rolled monthly). For each month during the first 11 months from the PAL effective date, the major source owner or operator shall show that the sum of the preceding monthly emissions from the PAL effective date for each emissions unit under the PAL is less than the PAL.
  - b. The PAL shall be established in a PAL permit that meets the requirements in subsection (D).
  - c. The PAL permit shall contain all the requirements of subsection (F).
  - d. The PAL shall include fugitive emissions, to the extent quantifiable, from all emissions units that emit or have the potential to emit the PAL pollutant at the major source.
  - e. Each PAL shall regulate emissions of only one pollutant.
  - f. Each PAL shall have a PAL effective period of 10 years.
  - g. The owner or operator of the major source with a PAL shall comply with the monitoring, recordkeeping, and reporting requirements provided in subsections (K) through (M) for each emissions unit under the PAL through the PAL effective period.
2. At no time (during or after the PAL effective period) are emissions reductions of a PAL pollutant that occur during the PAL effective period creditable as decreases for purposes of offsets under R18-2-404 unless the level of the PAL is reduced by the amount of such emissions reductions and such reductions would be creditable in the absence of the PAL.

**D.** Action on PAL permit application. A PAL permit application shall be processed in accordance with one of the following:

1. As an initial Class I permit pursuant to R18-2-304.
2. As a renewal of a Class I permit pursuant to R18-2-322.
3. As a significant revision to a Class I permit pursuant to R18-2-320.

- E.** Setting the 10-year actuals PAL level.
1. Except as provided in subsection (E)(2), the PAL level for a major source shall be established as the sum of the baseline actual emissions of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant. When establishing the PAL level, only one consecutive 24-month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive 24-month period may be used for each different PAL pollutant. Emissions associated with units that were permanently shut down after this 24-month period must be subtracted from the PAL level. The Director shall specify a reduced PAL level(s) (in tons/yr) in the PAL permit to become effective on the future compliance date(s) of any applicable federal or state regulatory requirement(s) that the Director is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of 60 ppm NO<sub>x</sub> to a new rule limit of 30 ppm, then the permit shall contain a future effective PAL level that is equal to the current PAL level reduced by half of the original baseline emissions of such unit(s).
  2. For newly constructed units (which do not include modifications to existing units) on which actual construction began after the 24-month period, in lieu of adding the baseline actual emissions as specified in subsection (E)(1), the emissions must be added to the PAL level in an amount equal to the potential to emit of the units.
- F.** Contents of the PAL permit. The PAL permit must contain, at a minimum, the following information:
1. The PAL pollutant and the applicable source-wide emission limitation in tons per year.
  2. The PAL permit effective date and the expiration date of the PAL (PAL effective period).
  3. Specification in the PAL permit that if a major source owner or operator applies to renew a PAL in accordance with subsection (I) before the end of the PAL effective period, then the PAL shall not expire at the end of the PAL effective period. It shall remain in effect until a revised PAL permit is issued by the Director.
  4. A requirement that emission calculations for compliance purposes must include emissions from startups, shutdowns, and malfunctions.
  5. A requirement that, once the PAL expires, the major source is subject to the requirements of subsection (H).
  6. The calculation procedures that the major source owner or operator shall use to convert the monitoring system data to monthly emissions and annual emissions based on a 12-month rolling total as required by subsection (L)(1).
  7. A requirement that the major source owner or operator monitor all emissions units in accordance with the provisions under subsection (K).
  8. A requirement to retain the records required under subsection (L) onsite. Such records may be retained in an electronic format.
  9. A requirement to submit the reports required under subsection (M) by the required deadlines.
  10. Any other requirements that the Director deems necessary to implement and enforce the PAL.
- G.** PAL effective period and reopening of the PAL permit.
1. PAL effective period. The Director shall specify a PAL effective period of 10 years.
  2. Reopening of the PAL permit.
    - a. During the PAL effective period, the Director must reopen the PAL permit to:
      - i. Correct typographical/calculation errors made in setting the PAL or reflect a more accurate determination of emissions used to establish the PAL,
      - ii. Reduce the PAL if the owner or operator of the major source creates creditable emissions reductions for use as offsets under R18-2-404, and
      - iii. Revise the PAL to reflect an increase in the PAL as provided under subsection (J).
    - b. The Director shall have discretion to reopen the PAL permit for the following:
      - i. Reduce the PAL to reflect new federal applicable requirements with compliance dates after the PAL effective date;
      - ii. Reduce the PAL consistent with any other requirement, that is enforceable as a practical matter, and that the state may impose on the major source under the State Implementation Plan; and
      - iii. Reduce the PAL if the Director determines that a reduction is necessary to avoid causing or contributing to a NAAQS or PSD increment violation, or to an adverse impact on an air quality related value that has been identified for a Federal Class I area by a Federal Land Manager and for which information is available to the general public.
    - c. Except for the permit reopening in subsection (G)(2)(a)(i) for the correction of typographical/calculation errors that do not increase the PAL level, all other reopenings shall be carried out in accordance with the public participation requirements of subsection (D).
- H.** Expiration of a PAL. Any PAL that is not renewed in accordance with the procedures in subsection (I) shall expire at the end of the PAL effective period, and the following requirements shall apply.
1. Each emissions unit (or each group of emissions units) that existed under the PAL shall comply with an allowable emission limitation under a revised permit established according to the following procedures.
    - a. Within the time-frame specified for PAL renewals in subsection (I)(2), the major source shall submit a proposed allowable emission limitation for each emissions unit (or each group of emissions units, if such a distribution is more appropriate) by distributing the PAL allowable emissions for the major source among each of the emissions units that existed under the PAL. If the PAL had not yet been adjusted for an applicable requirement that became effective during the PAL effective period, as would be required under subsection (I)(5), such distribution shall be made as if the PAL had been adjusted.
    - b. The Director shall decide how the PAL allowable emissions will be distributed and issue a revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as the Director determines is appropriate.
  2. Each emissions unit(s) shall comply with the allowable emission limitation on a 12-month rolling basis. The Director may approve the use of monitoring systems (source testing, emission factors, etc.) other than CEMS,

- CERMS, PEMS, or CPMS to demonstrate compliance with the allowable emission limitation.
3. Until the Director issues the revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as required under subsection (H)(1)(b), the source shall continue to comply with a source-wide, multi-unit emissions cap equivalent to the level of the PAL emission limitation.
  4. Any physical change or change in the method of operation at the major source will be subject to the applicability criteria set forth at subsection (C).
  5. The major source owner or operator shall continue to comply with any applicable requirements that may have applied during the PAL effective period. Emission limitations that were eliminated by the PAL in accordance with subsection (A)(2)(c) shall not be reinstated.
- I. Renewal of a PAL.**
1. The Director shall follow the procedures specified in subsection (F) in approving any request to renew a PAL for a major source, and shall provide both the proposed PAL level and a written rationale for the proposed PAL level to the public for review and comment. During such public review, any person may propose a PAL level for the source for consideration by the Director.
  2. Application deadline. A major source owner or operator shall submit a timely application to the Director to request renewal of a PAL. A timely application is one that is submitted at least six months prior to, but not earlier than 18 months from, the date of permit expiration. This deadline for application submittal is to ensure that the permit will not expire before the permit is renewed. If the owner or operator of a major source submits a complete application to renew the PAL within this time period, then the PAL shall continue to be effective until the revised permit with the renewed PAL is issued.
  3. Application requirements. The application to renew a PAL permit shall contain the following information.
    - a. The information required in subsections (B)(1) through (3).
    - b. A proposed PAL level.
    - c. The sum of the potential to emit of all emissions units under the PAL (with supporting documentation).
    - d. Any other information the owner or operator wishes the Director to consider in determining the appropriate level for renewing the PAL.
  4. PAL adjustment. In determining whether and how to adjust the PAL, the Director shall consider the options outlined in subsections (I)(4)(a) and (b). However, in no case may any such adjustment fail to comply with subsection (I)(4)(c).
    - a. If the emissions level calculated in accordance with subsection (F) is equal to or greater than 80% of the PAL level, the Director may renew the PAL at the same level without considering the factors set forth in subsection (I)(4)(b); or
    - b. The Director may set the PAL at a level that the Director determines to be more representative of the source's baseline actual emissions, or that the Director determines to be more appropriate considering air quality needs, advances in control technology, anticipated economic growth in the area, desire to reward or encourage the source's voluntary emissions reductions, or other factors as specifically identified by the Director in the Director's written rationale.
  5. Notwithstanding subsections (I)(4)(a) and (b):
    - i. If the potential to emit of the major source is less than the PAL, the Director shall adjust the PAL to a level no greater than the potential to emit of the source; and
    - ii. The Director shall not approve a renewed PAL level higher than the current PAL, unless the PAL has been increased in accordance with subsection (J).
- J. Increasing a PAL during the PAL effective period.**
1. The Director may increase a PAL emission limitation only if the following requirements are met:
    - a. The owner or operator of the major source shall submit a complete application to request an increase in the PAL limit for a PAL major modification. Such application shall identify the emissions unit(s) contributing to the increase in emissions so as to cause the major source's emissions to equal or exceed its PAL.
    - b. As part of this application, the major source owner or operator shall demonstrate that the sum of the baseline actual emissions of the small emissions units, plus the sum of the baseline actual emissions of the significant and major emissions units assuming application of BACT or LAER equivalent controls, plus the sum of the PAL allowable emissions of the new or modified emissions unit(s) exceeds the PAL. The level of control that would result from BACT or LAER equivalent controls on each significant or major emissions unit shall be determined by conducting a new BACT or LAER analysis at the time the application is submitted, as applicable for the particular PAL pollutant, unless the emissions unit is currently required to comply with a BACT or LAER requirement that was established within the preceding 10 years. In such a case, the assumed control level for that emissions unit shall be equal to the level of BACT or LAER with which that emissions unit must currently comply.
    - c. The owner or operator obtains a major NSR permit for all emissions unit(s) identified in subsection (J)(1)(a), regardless of the magnitude of the emissions increase resulting from them (that is, no significant levels apply). These emissions unit(s) shall comply with any emissions requirements resulting from the major NSR process (for example, BACT), even though they have also become subject to the PAL or continue to be subject to the PAL.
    - d. The PAL permit shall require that the increased PAL level shall be effective on the day any emissions unit that is part of the PAL major modification becomes operational and begins to emit the PAL pollutant.
  2. The Director shall calculate the new PAL level as the sum of the PAL allowable emissions for each modified or new emissions unit, plus the sum of the baseline actual emissions of the significant and major emissions units (assuming application of BACT or LAER equivalent controls as determined in accordance with subsection (J)(1)(b), plus the sum of the baseline actual emissions of the small emissions units.

3. The PAL permit shall be revised to reflect the increased PAL level pursuant to the public notice requirements of subsection (D).
- K. Monitoring requirements for PALs.**
1. General requirements.
    - a. Each PAL permit must contain enforceable requirements for the monitoring system that accurately determines plantwide emissions of the PAL pollutant in terms of mass per unit of time. Any monitoring system authorized for use in the PAL permit must be based on sound science and meet generally acceptable scientific procedures for data quality and manipulation. Additionally, the information generated by such system must meet minimum legal requirements for admissibility in a judicial proceeding to enforce the PAL permit.
    - b. The PAL monitoring system must employ one or more of the four general monitoring approaches meeting the minimum requirements set forth in subsections (K)(2)(a) through (d) and must be approved by the Director.
    - c. Notwithstanding subsection (K)(1)(b), the owner or operator may also employ an alternative monitoring approach if approved by the Director as meeting the requirements of subsection (K)(1)(a).
    - d. Failure to use a monitoring system that meets the requirements of this Section renders the PAL invalid.
  2. Minimum performance requirements for approved monitoring approaches. The following are acceptable general monitoring approaches when conducted in accordance with the minimum requirements in subsections (K)(3) through (9):
    - a. Mass balance calculations for activities using coatings or solvents,
    - b. CEMS,
    - c. CPMS or PEMS, and
    - d. Emission factors.
  3. Mass balance calculations. An owner or operator using mass balance calculations to monitor PAL pollutant emissions from activities using coating or solvents shall meet the following requirements:
    - a. Provide a demonstrated means of validating the published content of the PAL pollutant that is contained in or created by all materials used in or at the emissions unit;
    - b. Assume that the emissions unit emits all of the PAL pollutant that is contained in or created by any raw material or fuel used in or at the emissions unit, if it cannot otherwise be accounted for in the process; and
    - c. Where the vendor of a material or fuel, which is used in or at the emissions unit, publishes a range of pollutant content from such material, the owner or operator must use the highest value of the range to calculate the PAL pollutant emissions unless the Director determines there is site-specific data or a site-specific monitoring program to support another content within the range.
  4. CEMS. An owner or operator using CEMS to monitor PAL pollutant emissions shall meet the following requirements:
    - a. CEMS must comply with applicable Performance Specifications found in 40 CFR 60, Appendix B; and
    - b. CEMS must sample, analyze and record data at least every 15 minutes while the emissions unit is operating.
  5. CPMS or PEMS. An owner or operator using CPMS or PEMS to monitor PAL pollutant emissions shall meet the following requirements:
    - a. The CPMS or the PEMS must be based on current site-specific data demonstrating a correlation between the monitored parameter(s) and the PAL pollutant emissions across the range of operation of the emissions unit; and
    - b. Each CPMS or PEMS must sample, analyze, and record data at least every 15 minutes, or at another less frequent interval approved by the Director, while the emissions unit is operating.
  6. Emission factors. An owner or operator using emission factors to monitor PAL pollutant emissions shall meet the following requirements:
    - a. All emission factors shall be adjusted, if appropriate, to account for the degree of uncertainty or limitations in the factors' development;
    - b. The emissions unit shall operate within the designated range of use for the emission factor, if applicable; and
    - c. If technically practicable, the owner or operator of a significant emissions unit that relies on an emission factor to calculate PAL pollutant emissions shall conduct validation testing to determine a site-specific emission factor within six months of PAL permit issuance, unless the Director determines that testing is not required.
  7. A source owner or operator must record and report maximum potential emissions without considering enforceable emission limitations or operational restrictions for an emissions unit during any period of time that there is no monitoring data, unless another method for determining emissions during such periods is specified in the PAL permit.
  8. Notwithstanding the requirements in subsections (K)(3) through (7), where an owner or operator of an emissions unit cannot demonstrate a correlation between the monitored parameter(s) and the PAL pollutant emissions rate at all operating points of the emissions unit, the Director shall, at the time of permit issuance:
    - a. Establish default value(s) for determining compliance with the PAL based on the highest potential emissions reasonably estimated at such operating point(s), or
    - b. Determine that operation of the emissions unit during operating conditions when there is no correlation between monitored parameter(s) and the PAL pollutant emissions is a violation of the PAL.
  9. Re-validation. All data used to establish the PAL pollutant must be re-validated through performance testing or other scientifically valid means approved by the Director. Such testing must occur at least once every five years after issuance of the PAL.
- L. Recordkeeping requirements.**
1. The PAL permit shall require an owner or operator to retain a copy of all records necessary to determine compliance with any requirement of this Section and with the PAL, including a determination of each emissions unit's 12-month rolling total emissions, for five years from the date of such record.

2. The PAL permit shall require an owner or operator to retain a copy of the following records for the duration of the PAL effective period plus five years:
  - a. A copy of the PAL permit application and any applications for revisions to the PAL, and
  - b. Each annual certification of compliance pursuant to R18-2-309(2) and the data relied on in certifying compliance.
- M. Reporting and notification requirements. The owner or operator shall submit semi-annual monitoring reports and prompt deviation reports to the Director in accordance with R18-2-306(A)(5). The reports shall meet the following requirements:
  1. Semi-annual report. The semi-annual report shall be submitted to the Director within 30 days of the end of each reporting period. This report shall contain the following information:
    - a. The identification of owner and operator and the permit number.
    - b. Total annual emissions (tons/year) based on a 12-month rolling total for each month in the reporting period recorded pursuant to subsection (L)(1).
    - c. All data relied upon, including, but not limited to, any Quality Assurance or Quality Control data, in calculating the monthly and annual PAL pollutant emissions.
    - d. A list of any emissions units modified or added to the major source during the preceding six-month period.
    - e. The number, duration, and cause of any deviations or monitoring malfunctions (other than the time associated with zero and span calibration checks), and any corrective action taken.
    - f. A notification of a shutdown of any monitoring system, whether the shutdown was permanent or temporary, the reason for the shutdown, the anticipated date that the monitoring system will be fully operational or replaced with another monitoring system, and whether the emissions unit monitored by the monitoring system continued to operate, and the calculation of the emissions of the pollutant or the number determined by method included in the permit, as provided by subsection (K)(7).
    - g. A certification by the responsible official consistent with R18-2-304(H).
  2. Deviation report. The major source owner or operator shall promptly submit reports of any deviations or exceedance of the PAL permit requirements, including periods where no monitoring is available, in accordance with R18-2-306(A)(5). The reports shall contain the following information:
    - a. The identification of owner and operator and the permit number,
    - b. The PAL permit requirement that experienced the deviation or that was exceeded,
    - c. Emissions resulting from the deviation or the exceedance, and
    - d. A certification by the responsible official consistent with R18-2-304(H).
  3. Re-validation results. The owner or operator shall submit to the Director the results of any re-validation test or method within three months after completion of such test or method.

#### Historical Note

New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

## ARTICLE 5. GENERAL PERMITS

### R18-2-501. Applicability

- A. The Director may issue general permits for a facility class that contains 10 or more facilities that are similar in nature, have substantially similar emissions, and would be subject to the same or substantially similar requirements governing operations, emissions, monitoring, reporting, or recordkeeping. "Similar in nature" refers to facility size, processes, and operating conditions.
- B. The Director may issue general permits, in accordance with subsection (A), with emission limitations, controls, or other requirements that meet the requirements of R18-2-306.01. A source that seeks to vary from such a general permit, and obtain an emission limitation, control, or other requirement not contained in that general permit, shall apply for a permit pursuant to Article 3 of this Chapter.
- C. General permits shall not be issued for affected sources except as provided in regulations promulgated by the Administrator under Title IV of the Act.
- D. Unless otherwise stated, the provisions of Article 3 shall apply to general permits.

#### Historical Note

Former Section R18-2-501 renumbered to R18-2-502, new Section R18-2-501 adopted effective September 26, 1990 (Supp. 90-3). Former Section R18-2-501 renumbered to R18-2-701; new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective August 1, 1995 (Supp. 95-3).

### R18-2-502. General Permit Development

- A. The Director may issue a general permit on the Director's own initiative or in response to a petition.
- B. Any person may submit a petition to the Director requesting the issuance of a general permit for a defined class of facilities. The petition shall propose a particular class of facilities, and list the approximate number of facilities in the proposed class along with their size, processes, and operating conditions, and demonstrate how the class meets the criteria for a general permit as specified in R18-2-501 and A.R.S. § 49-426(H). The Director shall provide a written response to the petition within 120 days of receipt.
- C. General permits shall be issued for classes of facilities using the same engineering principles that applies to permits for individual sources and following the public notice requirements of R18-2-504.
- D. General permits shall include all of the following:
  1. All elements contained in R18-2-306(A) except R18-2-306(A)(2)(b) and (6).
  2. The process for individual sources to apply for coverage under the general permit.
- E. General permits developed by the Director shall require sources that are covered under the general permit to install and operate reasonably available control technology for any regulated Minor NSR pollutants allowed under the general permit at an amount equal to or greater than the permitting exemption threshold. This requirement shall not apply to any pollutants subject to an emissions standard established or revised by the Administrator under section 111 or 112 of the Act after November 15, 1990.

#### Historical Note

Former Section R9-3-501 repealed, new Section R9-3-501 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (D) effective June 19, 1981 (Supp. 81-3).

Amended subsections (C) and (D) effective February 2, 1982 (Supp. 82-1). Amended subsection (D) effective May 25, 1982 (Supp. 82-3). Former Section R9-3-501 renumbered without change as Section R18-2-501 (Supp. 87-3). Former Section R18-2-502 repealed, new Section R18-2-502 renumbered from R18-2-501 and amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-502 renumbered to R18-2-702; new Section R18-2-502 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-503. Application for Coverage under General Permit**

- A. Once the Director has issued a general permit, any source which is a member of the class of facilities covered by the general permit may apply to the Director for authority to operate under the general permit. At the time the Director issues a general permit, the Director may also establish a specific application form with filing instructions for sources in the category covered by the general permit. Applicants shall complete the specific application form or, if none has been adopted, the standard application form contained in Appendix 1 to this Chapter. The specific application form shall, at a minimum, require the applicant to submit the following information:
  1. Information identifying and describing the source, its processes, and operating conditions in sufficient detail to allow the Director to determine qualification for, and to assure compliance with, the general permit.
  2. A compliance plan that meets the requirements of R18-2-309.
- B. For sources required to obtain a permit under Title V of the Act, the Director shall provide the Administrator with a permit application summary form and any relevant portion of the permit application and compliance plan. To the extent possible, this information shall be provided in computer-readable format compatible with the Administrator's national database management system.
- C. The Director shall act on the application for coverage under a general permit as expeditiously as possible. The source may operate under the terms of the applicable general permit during that time. The Director may defer acting on an application under this subsection (if) the Director has provided notice of intent to renew or not renew the permit.
- D. The Director shall deny an application for coverage from any Class I source that is subject to case-by-case standards or requirements.

#### **Historical Note**

Former Section R9-3-503 repealed, new Section R9-3-503 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (C), paragraph (6) effective June 19, 1981 (Supp. 81-3). Amended subsection (C) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-503 renumbered without change as Section R18-2-503 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-503 renumbered to R18-2-703; new Section R18-2-503 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-504. Public Notice**

- A. This Section applies to issuance, revision, or renewal of a general permit.
- B. The Director shall provide public notice for any proposed new general permit, for any revision of an existing general permit, and for renewal of an existing general permit.

- C. The Director shall publish notice of the proposed general permit once each week for two consecutive weeks in a newspaper of general circulation in each county and shall provide at least 30 days from the date of the first notice for public comment. The notice shall describe the following:
  1. The proposed permit;
  2. The category of sources that would be affected;
  3. The air contaminants which the Director expects to be emitted by a typical facility in the class and the class as a whole;
  4. The Director's proposed actions and effective date for the actions;
  5. Locations where documents relevant to the proposed permit will be available during normal business hours;
  6. The name, address, and telephone number of a person within the Department who may be contacted for further information;
  7. The address where any person may submit comments or request a public hearing and the date and time by which comments or a public hearing request are required to be received;
  8. The process by which sources may obtain authorization to operate under the general permit.
- D. For general permits under which operation may be authorized in lieu of Class I permits, the Director shall give notice of the proposed general permit to each affected state at the same time that the proposed general permit goes out for public notice. The Director shall provide the proposed final permit to the Administrator after public and affected state review. No Class I permit shall be issued if the Administrator properly objects to its issuance in writing within 45 days from receipt of the proposed final permit and any necessary supporting information from the Director.
- E. Written comments to the Director shall include the name of the person and the person's agent or attorney and shall clearly set forth reasons why the general permit should or should not be issued pursuant to the criteria for issuance in A.R.S. §§ 49-426 and 49-427 and this Chapter.
- F. At the time a general permit is issued, the Director shall make available a response to all relevant comments on the proposed permit raised during the public comment period and during any requested public hearing. The response shall specify which provisions, if any, of the proposed permit have been changed and the reason for the changes. The Director shall also notify in writing any petitioner and each person who has submitted written comments on the proposed general permit or requested notice of the final permit decision.

#### **Historical Note**

Former Section R9-3-504 repealed, new Section R9-3-504 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-504 renumbered without change as Section R18-2-504 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-504 renumbered to R18-2-704; new Section R18-2-504 adopted effective November 15, 1993 (Supp. 93-4).

#### **R18-2-505. General Permit Renewal**

- A. The Director shall review and may renew general permits every five years. A source's authorization to operate under a general permit shall coincide with the term of the general permit regardless of when the authorization began during the five-year period, except as provided in R18-2-510(C). In addition to the public notice required to issue a proposed permit under R18-2-504, the Director shall notify in writing all sources who

have been granted, or who have applications pending for, authorization to operate under the permit. The written notice shall describe the source's duty to reapply and may include requests for information required under the proposed permit.

- B.** At the time a general permit is renewed, the Director shall notify in writing all sources who were granted coverage under the previous permit and shall require them to submit a timely renewal application. For purposes of general permits, a timely application is one that is submitted within the time-frame specified by the Director in the written notification. Until such time that a timely application is submitted, the source shall continue to comply with the previously issued general permit coverage. Upon submittal of a timely application, the source shall comply with the renewed permit. Failure to submit a timely application terminates the source's right to operate.

#### Historical Note

Former Section R9-3-1007 renumbered effective January 13, 1976 (Supp. 76-1). Former Section R9-3-505 repealed, new Section R9-3-505 adopted effective May 14, 1979 (Supp. 79-1). Editorial corrections, subsection (B), paragraph (5), and subsection (D), paragraph (1), subparagraph (d) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended subsection (B) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-505 renumbered without change as Section R18-2-505 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-505 renumbered to R18-2-705; new Section R18-2-505 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### R18-2-506. Relationship to Individual Permits

Any source covered under a general permit may request to be excluded from coverage by applying for an individual source permit. Coverage under the general permit shall terminate on the date the individual permit is issued.

#### Historical Note

Former Section R9-3-1008 renumbered effective January 13, 1976 (Supp. 76-1). Former Section R9-3-506 repealed, new Section R9-3-506 adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (C), paragraph (1) effective June 19, 1981 (Supp. 81-3). Former Section R9-3-506 renumbered without change as Section R18-2-506 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-506 renumbered to R18-2-706; new Section R18-2-506 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-507. General Permit Variances

- A.** Where MACT (maximum achievable control technology) or HAPRACT (hazardous air pollutant reasonably available control technology) has been established in a general permit for a source category designated under R18-2-1702, the owner or operator of a source within that source category may apply for a variance from the standard by demonstrating compliance with R18-2-1708 at the time the source applies for coverage under the general permit.
- B.** If the owner or operator makes the showing required by R18-2-1708 and otherwise qualifies for the general permit, the Director shall, in accordance with the procedures established pursuant to this Article, approve the application and authorize operation under a variance from the standard of the general permit.

- C.** Except as modified by the variance, the source shall comply with all conditions of the general permit.
- D.** A proposed variance to a standard in a general permit shall be subject to the public notice requirements of R18-2-330.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-507 renumbered without change as Section R18-2-507 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-507 renumbered to R18-2-707; new Section R18-2-507 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

#### R18-2-508. General Permit Shield

Each general permit issued under this Article shall specifically identify all federal, state, and local air pollution control requirements applicable to the source at the time the permit is issued. The permit shall state that, as of the date authority to operate for a source is granted, compliance with the conditions of the permit shall be deemed compliance with any applicable requirement in effect on the date of permit issuance. Any permit under this Article that does not expressly state that a permit shield exists shall be presumed not to provide such a shield. Notwithstanding the above provisions, the source shall be subject to enforcement action for operation without a permit if the source is later determined not to qualify for the conditions and terms of the general permit. A permit shield provided for a general permit shall meet all the requirements of R18-2-325.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended subsection (B) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-508 renumbered without change as Section R18-2-508 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-508 renumbered to R18-2-708; new Section R18-2-508 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-509. General Permit Appeals

Any person who filed a comment on a proposed general permit as provided in R18-2-504 may appeal the terms and conditions of the general permit, as they apply to the facility class covered under a general permit, by filing an appeal with the Office of Administrative Hearings within 30 days after receipt of notice that the general permit has been issued.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-509 renumbered without change as Section R18-2-509 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-509 renumbered to R18-2-709; new Section R18-2-509 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4698, effective February 3, 2007 (Supp. 06-4).

#### R18-2-510. Terminations of General Permits and Revocations of Authority to Operate under a General Permit

- A.** The Director may terminate a general permit at any time if:
1. The Director has determined that the emissions from the sources in the facility class cause or contribute to ambient

air quality standard violations which are not adequately addressed by the requirements in the general permit, or

2. The Director has determined that the terms and conditions of the general permit no longer meet the requirements of A.R.S. §§ 49-426 and 49-427.

- B. The Director shall provide written notice to all sources operating under a general permit prior to termination of a general permit. Such notice shall include an explanation of the basis for the proposed action. Within 180 days of receipt of the notice of the expiration, termination or cancellation of any general permit, sources notified shall submit an application to the Director for an individual permit.
- C. The Director may require a source authorized to operate under a general permit to apply for and obtain an individual source permit at any time if the source is not in compliance with the terms and conditions of the general permit.
- D. If the Director revokes a source's authority to operate under a general permit pursuant to subsection (C), the Director shall notify the permittee by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the revocation of authority and a statement that the permittee is entitled to a hearing. A source previously authorized to operate under a general permit may operate under the terms of the general permit until the earlier of the date it submits a complete application for an individual permit, at which time it may operate under that application, or 180 days after receipt of the notice of revocation of authority to operate under the general permit.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsections (E)(3) and (E)(4) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-510 renumbered without change as Section R18-2-510 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-510 renumbered to R18-2-710; new Section R18-2-510 adopted effective November 15, 1993 (Supp. 93-4).

#### R18-2-511. Fees Related to General Permits

- A. Permit Processing Fee. The owner or operator of a source that applies for authority to operate under a general permit shall pay to the Director \$500 with the submittal of each application. This fee applies to the owner or operator of any source who intends to continue operating under the authority of a general permit that has been proposed for renewal. This fee also applies to requests for new Authorizations to Operate (ATOs) for new equipment.
- B. Administrative or Inspection Fee. The owner or operator of a source required to have a general permit, that has undergone initial startup by January 1, shall pay, for each calendar year, the applicable administrative or inspection fee from the table below, by February 1 or 60 days after the Director mails the invoice, whichever is later.

General Permit Source Category	Administrative Fee
--------------------------------	--------------------

Class I Title V General Permits	Administrative fee for category from R18-2-326(C)
Class II Title V Small Source	\$750
Other Class II Title V General Permits	\$4,520
	<b>Inspection Fee</b>
Class II Non-Title V Crematories	\$1,500
Other Class II Non-Title V General Permits	\$3,020

#### Historical Note

Former Section R18-2-511 renumbered to R18-2-711; new Section R18-2-511 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 10 A.A.R. 4767, effective November 4, 2004 (Supp. 04-4). Amended by final rulemaking at 13 A.A.R. 4379, effective December 4, 2007 (Supp. 07-4).

#### R18-2-512. Changes to Facilities Granted Coverage under General Permits

- A. This Section applies to changes made at a facility that has been granted coverage under a general permit.
- B. Facility Changes that Require New Authorization to Operate. The following changes at a source that has been granted coverage under a general permit shall be made only after the source requests new authorization to operate from the Director:
  1. Adding new emissions units that require new authorization to operate,
  2. Installing replacement emissions units that require authorization to operate.
- C. Facility Changes that Do Not Require Authorization to Operate. The following changes at a source that has been granted coverage under a general permit shall be made only after the source provides written notification to the Department:
  1. Adding new emissions units that do not require authorization to operate,
  2. Installing a replacement emissions unit with a higher capacity that does not require authorization to operate,
  3. Adding or replacing air pollution control equipment.
- D. A source that has been granted coverage under a general permit shall keep a record of any physical change or change in the method of operation that could affect emissions. The record shall include a description of the change and the date the change occurred.
- E. For sources that submit a request or notification under subsection (B) or (C), the applicant shall provide information identifying and describing the source, its processes, and operating conditions in sufficient detail to allow the Director to determine continued qualification for, and to assure compliance with, the general permit. The Director shall act on a request for new authority to operate under a general permit as expeditiously as possible. The source may operate under the terms of the applicable general permit during that time.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-512 renumbered without change as Section R18-2-512 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-712 effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August

7, 2012 (Supp. 12-2).

**R18-2-513. Portable Sources Covered under a General Permit**

- A. This Section applies to sources that have been granted coverage under a general permit that allows for the operation of a source at more than one location.
- B. General permits developed by the Director for portable sources shall contain conditions that will assure compliance with all applicable requirements at all authorized locations.
- C. Owners and operators that hold multiple coverages under the same general permit may interchange equipment between sources without obtaining new authorization to operate. At no time shall an owner or operator interchange equipment that would cause the combined facility to exceed emission limitations in the general permit. Equipment covered under different general permits shall not be interchanged except that a new authorization to operate is obtained in accordance with this Article.
- D. Owners and operators that operate multiple portable sources under a general permit shall have an equivalent number of coverages under a general permit as the number of locations at which each portable source operates.
- E. A portable source that will operate for the duration of its permit solely in one county that has established a local air pollution control program pursuant to A.R.S. § 49-479 shall obtain a permit from that county. A portable source with a county permit shall not operate in any other county. A portable source that has been granted coverage under a general permit that subsequently obtains a county permit shall request that the Director terminate the coverage under the general permit. Upon issuance of the county permit, the coverage under the general permit issued by the Director is no longer valid.
- F. A portable source which has a county permit but proposes to operate outside that county may obtain coverage under a general permit from the Director. A portable source that has a permit issued by a county and obtains coverage under a general permit issued by the Director shall request that the county terminate the permit. Upon issuance of coverage under a general permit by the Director, the county permit is no longer valid. Before commencing operation in the new county, the source shall notify the Director and the control officer who has jurisdiction in the county that includes the new location according to subsection (G).
- G. A portable source granted coverage under a general permit may be transferred from one location to another provided that the owner or operator of such equipment notifies the Director and any control officer who has jurisdiction over the geographic area that includes the new location of the transfer prior to the transfer. The notification required under this subsection shall include:
  1. A description of the equipment to be transferred including the permit number and as appropriate the Authorization-to-Operate number for each piece of equipment;
  2. A description of the present location;
  3. A description of the location to which the equipment is to be transferred, including the availability of all utilities, such as water and electricity, necessary for the proper operation of all control equipment;
  4. The date on which the equipment is to be moved;
  5. The date on which operation of the equipment will begin at the new location;
  6. A complete equipment list of all equipment that will be located at the new location; and
  7. Revised emissions calculations demonstrating that the equipment at the new location continues to qualify for the general permit under which the source has coverage.

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (2) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-513 renumbered without change as Section R18-2-513 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-713 effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

**R18-2-514. Renumbered**

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-514 renumbered without change as Section R18-2-514 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-714 effective November 14, 1993 (Supp. 93-4).

**R18-2-515. Renumbered**

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Section R9-3-515 will be repealed and new Section R9-3-515 adopted effective following the adoption of Article 7. Nonferrous Smelter Orders, filed September 18, 1979 for public hearing (Supp. 79-5). Section R9-3-515 adopted effective May 14, 1979, amended effective October 2, 1979 (Supp. 79-5). Article 7. Nonferrous Smelter Orders adopted effective January 8, 1980. Section R9-3-515 filed September 18, 1979 for public hearing and effective following the adoption of Article 7 now amended and effective January 8, 1980 (Supp. 80-1). Amended as an emergency effective March 6, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-2). Emergency adoption effective March 6, 1980 now adopted and amended effective July 9, 1980. Amended subsection (C), paragraph (1) effective August 29, 1980 (Supp. 80-4). Amended as an emergency effective October 9, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-5). Former emergency adoption effective October 9, 1980, now adopted and amended effective June 19, 1981 (Supp. 81-3). Amended subsection (B), paragraph (1) effective February 2, 1982 (Supp. 82-1). Amended effective May 25, 1982 (Supp. 82-3). Amended subsections ((C)(3) and (C)(5) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-515 renumbered without change as Section R18-2-515 (Supp. 87-3). Section amended and subsections (C)(1)(h) through (C)(7) renumbered to R18-2-515.01 and subsections (C)(8) through (C)(9) renumbered to R18-2-515.02 effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715 effective November 15, 1993 (Supp. 93-4).

**R18-2-515.01. Renumbered**

**Historical Note**

Section R18-2-515.01 renumbered from R18-2-515(C)(1)(h) through (C)(7) and amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715.01 effective November 15, 1993 (Supp. 93-4).

**R18-2-515.02. Renumbered**

**Historical Note**

R18-2-515.02 renumbered from R18-2-515(C)(8) through (C)(9) and amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715.02 effective November 15, 1993 (Supp. 93-4).

**R18-2-516. Renumbered****Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-4). Former Section R9-3-516 renumbered without change as Section R18-2-516 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-716 effective November 15, 1993 (Supp. 93-4).

**R18-2-517. Renumbered****Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (C), paragraph (1) (Supp. 80-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-517 renumbered without change as Section R18-2-517 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-2). ##### **Historical Note**

Adopted effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-730 effective November 15, 1993 (Supp. 93-4).

### **ARTICLE 6. EMISSIONS FROM EXISTING AND NEW NONPOINT SOURCES**

#### **R18-2-601. General**

For purposes of this Article, any source of air contaminants which due to lack of an identifiable emission point or plume cannot be considered a point source, shall be classified as a nonpoint source. In applying this criteria, such items as air-curtain destructors, heater-planners, and conveyor transfer points shall be considered to have identifiable plumes. Any affected facility subject to regulation under Article 7 of this Chapter or Title 18, Chapter 2, Article 9, shall not be subject to regulation under this Article.

##### **Historical Note**

Former Section R9-3-601 repealed, new Section R9-3-601 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-601 renumbered without change as Section R18-2-601 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-601 renumbered to R18-2-801, new Section R18-2-601 renumbered from R18-2-401 and amended effective November 15, 1993 (Supp. 93-4). Section updated to reflect corrected citation reference (Supp. 08-1).

#### **R18-2-602. Unlawful Open Burning**

A. In addition to the definitions contained in A.R.S. § 49-501, in this Section:

1. "Agricultural burning" means burning vegetative materials related to producing and harvesting crops and raising animals for the purpose of marketing for profit, or providing a livelihood, but does not include burning of household waste or prohibited materials. A person may conduct agricultural burns in fields, piles, ditch banks, fence rows, or canal laterals for purposes such as weed control, waste disposal, disease and pest prevention, or site preparation.
2. "Approved waste burner" means an incinerator constructed of fire resistant material with a cover or screen that is closed when in use, and has openings in the sides or top no greater than one inch in diameter.
3. "Class I Area" means any one of the Arizona mandatory federal Class I areas defined in A.R.S. § 49-401.01.

4. "Construction burning" means burning wood or vegetative material from land clearing, site preparation, or fabrication, erection, installation, demolition, or modification of any buildings or other land improvements, but does not include burning household waste or prohibited material.
5. "Dangerous material" means any substance or combination of substances that is capable of causing bodily harm or property loss unless neutralized, consumed, or otherwise disposed of in a controlled and safe manner.
6. "Delegated authority" means any of the following:
  - a. A county, city, town, air pollution control district, or fire district that has been delegated authority to issue open burning permits by the Director under A.R.S. § 49-501(E); or
  - b. A private fire protection service provider that has been assigned authority to issue open burning permits by one of the authorities in subsection (A)(6)(a).
7. "Director" means the Director of the Department of Environmental Quality, or designee.
8. "Emission reduction techniques" means methods for controlling emissions from open outdoor fires to minimize the amount of emissions output per unit of area burned.
9. "Flue," as used in this Section, means any duct or passage for air or combustion gases, such as a stack or chimney.
10. "Household waste" means any solid waste including garbage, rubbish, and sanitary waste from a septic tank that is generated from households including single and multiple family residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas, but does not include construction debris, landscaping rubble, or demolition debris.
11. "Independent authority to permit fires" means the authority of a county to permit fires by a rule adopted under Arizona Revised Statutes, Title 49, Chapter 3, Article 3, and includes only Maricopa, Pima, and Pinal counties.
12. "Open outdoor fire or open burning" means the combustion of material of any type, outdoors and in the open, where the products of combustion are not directed through a flue. Open outdoor fires include agricultural, residential, prescribed, and construction burning, and fires using air curtain destructors.
13. "Prohibited materials" means nonpaper garbage from the processing, storage, service, or consumption of food; chemically treated wood; lead-painted wood; linoleum flooring, and composite counter-tops; tires; explosives or ammunition; oleanders; asphalt shingles; tar paper; plastic and rubber products, including bottles for household chemicals; plastic grocery and retail bags; waste petroleum products, such as waste crankcase oil, transmission oil, and oil filters; transformer oils; asbestos; batteries; anti-freeze; aerosol spray cans; electrical wire insulation; thermal insulation; polyester products; hazardous waste products such as paints, pesticides, cleaners and solvents, stains and varnishes, and other flammable liquids; plastic pesticide bags and containers; and hazardous material containers including those that contained lead, cadmium, mercury, or arsenic compounds.
14. "Residential burning" means open burning of vegetative materials conducted by or for the occupants of residential dwellings, but does not include burning household waste or prohibited material.
15. "Prescribed burning" has the same meaning as in R18-2-1501.

- B.** Unlawful open burning. Notwithstanding any other rule in this Chapter, a person shall not ignite, cause to be ignited, permit to be ignited, allow, or maintain any open outdoor fire in a county without independent authority to permit fires except as provided in A.R.S. § 49-501 and this Section.
- C.** Open outdoor fires exempt from a permit. The following fires do not require an open burning permit from the Director or a delegated authority:
1. Fires used only for:
    - a. Cooking of food,
    - b. Providing warmth for human beings,
    - c. Recreational purposes,
    - d. Branding of animals,
    - e. Orchard heaters for the purpose of frost protection in farming or nursery operations, and
    - f. The proper disposal of flags under 4 U.S.C. 1, § 8.
  2. Any fire set or permitted by any public officer in the performance of official duty, if the fire is set or permission given for the following purpose:
    - a. Control of an active wildfire; or
    - b. Instruction in the method of fighting fires, except that the person setting these fires must comply with the reporting requirements of subsection (D)(3)(f).
  3. Fire set by or permitted by the Director of Department of Agriculture for the purpose of disease and pest prevention in an organized, area-wide control of an epidemic or infestation affecting livestock or crops.
  4. Prescribed burns set by or assisted by the federal government or any of its departments, agencies, or agents, or the state or any of its agencies, departments, or political subdivisions, regulated under Article 15 of this Chapter.
- D.** Open outdoor fires requiring a permit.
1. The following open outdoor fires are allowed with an open burning permit from the Director or a delegated authority:
    - a. Construction burning;
    - b. Agricultural burning;
    - c. Residential burning;
    - d. Prescribed burns conducted on private lands without the assistance of a federal or state land manager as defined under R18-2-1501;
    - e. Any fire set or permitted by a public officer in the performance of official duty, if the fire is set or permission given for the purpose of weed abatement, or the prevention of a fire hazard, unless the fire is exempt from the permit requirement under subsection (C)(3);
    - f. Open outdoor fires of dangerous material under subsection (E);
    - g. Open outdoor fires of household waste under subsection (F); and
    - h. Open outdoor fires that use an air curtain destructor, as defined in R18-2-101.
  2. A person conducting an open outdoor fire in a county without independent authority to permit fires shall obtain a permit from the Director or a delegated authority unless exempted under subsection (C). Permits may be issued for a period not to exceed one year. A person shall obtain a permit by completing an ADEQ-approved application form.
  3. Open outdoor fire permits issued under this Section shall include:
    - a. A list of the materials that the permittee may burn under the permit;
    - b. A means of contacting the permittee authorized by the permit to set an open fire in the event that an order to extinguish the open outdoor fire is issued by the Director or the delegated authority;
- c. A requirement that burns be conducted during the following periods, unless otherwise waived or directed by the Director on a specific day basis:
    - i. Year-round: ignite fire no earlier than one hour after sunrise; and
    - ii. Year-round: extinguish fire no later than two hours before sunset;
  - d. A requirement that the permittee conduct all open burning only during atmospheric conditions that:
    - i. Prevent dispersion of smoke into populated areas;
    - ii. Prevent visibility impairment on traveled roads or at airports that result in a safety hazard;
    - iii. Do not create a public nuisance or adversely affect public safety;
    - iv. Do not cause an adverse impact to visibility in a Class I area; and
    - v. Do not cause uncontrollable spreading of the fire;
  - e. A list of the types of emission reduction techniques that the permittee shall use to minimize fire emissions.;
  - f. A reporting requirement that the permittee shall meet by providing the following information in a format provided by the Director for each date open burning occurred, on either a daily basis on the day of the fire, or an annual basis in a report to the Director or delegated authority due on March 31 for the previous calendar year:
    - i. The date of each burn;
    - ii. The type and quantity of fuel burned for each date open burning occurred;
    - iii. The fire type, such as pile or pit, for each date open burning occurred; and
    - iv. For each date open burning occurred, the legal location, to the nearest section, or latitude and longitude, to the nearest degree minute, or street address for residential burns;
  - g. A requirement that the person conducting the open burn notify the local fire-fighting agency or private fire protection service provider, if the service provider is a delegated authority, before burning. If neither is in existence, the person conducting the burn shall notify the state forester.;
  - h. A requirement that the permittee start each open outdoor fire using items that do not cause the production of black smoke;
  - i. A requirement that the permittee attend the fire at all times until it is completely extinguished;
  - j. A requirement that the permittee provide fire extinguishing equipment on-site for the duration of the burn;
  - k. A requirement that the permittee ensure that a burning pit, burning pile, or approved waste burner be at least 50 feet from any structure;
  - l. A requirement that the permittee have a copy of the burn permit on-site during open burning;
  - m. A requirement that the permittee not conduct open burning when an air stagnation advisory, as issued by the National Weather Service, is in effect in the area of the burn or during periods when smoke can be expected to accumulate to the extent that it will significantly impair visibility in Class I areas;

- n. A requirement that the permittee not conduct open burning when any stage air pollution episode is declared under R18-2-220;
  - o. A statement that the Director, or any other public officer, may order that the burn be extinguished or prohibit burning during periods of inadequate smoke dispersion, excessive visibility impairment, or extreme fire danger; and
  - p. A list of the activities prohibited and the criminal penalties provided under A.R.S. § 13-1706.
4. The Director or a delegated authority shall not issue an open burning permit under this Section:
- a. That would allow burning prohibited materials other than under a permit for the burning of dangerous materials;
  - b. If the applicant has applied for a permit under this Section to burn a dangerous material which is also hazardous waste under 40 CFR 261, but does not have a permit to burn hazardous waste under 40 CFR 264, or is not an interim status facility allowed to burn hazardous waste under 40 CFR 265; or
  - c. If the burning would occur at a solid waste facility in violation of 40 CFR 258.24 and the Director has not issued a variance under A.R.S. § 49-763.01.
- E. Open outdoor fires of dangerous material. A fire set for the disposal of a dangerous material is allowed by the provisions of this Section, when the material is too dangerous to store and transport, and the Director has issued a permit for the fire. A permit issued under this subsection shall contain all provisions in subsection (D)(3) except for subsections (D)(3)(e) and (D)(3)(f). The Director shall permit fires for the disposal of dangerous materials only when no safe alternative method of disposal exists, and burning the materials does not result in the emission of hazardous or toxic substances either directly or as a product of combustion in amounts that will endanger health or safety.
- F. Open outdoor fires of household waste. An open outdoor fire for the disposal of household waste is allowed by provisions of this Section when permitted in writing by the Director or a delegated authority. A permit issued under this subsection shall contain all provisions in subsection (D)(3) except for subsections (D)(3)(e) and (D)(3)(f). The permittee shall conduct open outdoor fires of household waste in an approved waste burner and shall either:
- 1. Burn household waste generated on-site on farms or ranches of 40 acres or more where no household waste collection or disposal service is available; or
  - 2. Burn household waste generated on-site where no household waste collection and disposal service is available and where the nearest other dwelling unit is at least 500 feet away.
- G. Permits issued by a delegated authority. The Director may delegate authority for the issuance of open burning permits to a county, city, town, air pollution control district, or fire district. A delegated authority may not issue a permit for its own open burning activity. The Director shall not delegate authority to issue permits to burn dangerous material under subsection (E). A county, city, town, air pollution control district, or fire district with delegated authority from the Director may assign that authority to one or more private fire protection service providers that perform fire protection services within the county, city, town, air pollution control district, or fire district. A private fire protection provider shall not directly or indirectly condition the issuance of open burning permits on the applicant being a customer. Permits issued under this subsection shall comply with the requirements in subsection (D)(3) and be in a format prescribed by the Director. Each delegated authority shall:
- 1. Maintain a copy of each permit issued for the previous five years available for inspection by the Director;
  - 2. For each permit currently issued, have a means of contacting the person authorized by the permit to set an open fire if an order to extinguish open burning is issued; and
  - 3. Annually submit to the Director by May 15 a record of daily burn activity, excluding household waste burn permits, on a form provided by the Director for the previous calendar year containing the information required in subsections (D)(3)(e) and (D)(3)(f).
- H. The Director shall hold an annual public meeting for interested parties to review operations of the open outdoor fire program and discuss emission reduction techniques.
- I. Nothing in this Section is intended to permit any practice that is a violation of any statute, ordinance, rule, or regulation.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Correction, subsection (C) repealed effective October 2, 1979, not shown (Supp. 80-1). Former Section R9-3-602 renumbered without change as Section R18-2-602 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-602 renumbered from R18-2-401 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-603. Repealed

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-603 renumbered without change as Section R18-2-603 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-603 renumbered to R18-2-803, new Section R18-2-603 renumbered from R18-2-403 effective November 15, 1993 (Supp. 93-4). Repealed effective October 8, 1996 (Supp. 96-4).

#### R18-2-604. Open Areas, Dry Washes, or Riverbeds

- A. No person shall cause, suffer, allow, or permit a building or its appurtenances, or a building or subdivision site, or a driveway, or a parking area, or a vacant lot or sales lot, or an urban or suburban open area to be constructed, used, altered, repaired, demolished, cleared, or leveled, or the earth to be moved or excavated, without taking reasonable precautions to limit excessive amounts of particulate matter from becoming airborne. Dust and other types of air contaminants shall be kept to a minimum by good modern practices such as using an approved dust suppressant or adhesive soil stabilizer, paving, covering, landscaping, continuous wetting, detouring, barring access, or other acceptable means.
- B. No person shall cause, suffer, allow, or permit a vacant lot, or an urban or suburban open area, to be driven over or used by motor vehicles, trucks, cars, cycles, bikes, or buggies, or by animals such as horses, without taking reasonable precautions to limit excessive amounts of particulates from becoming airborne. Dust shall be kept to a minimum by using an approved dust suppressant, or adhesive soil stabilizer, or by paving, or by barring access to the property, or by other acceptable means.
- C. No person shall operate a motor vehicle for recreational purposes in a dry wash, riverbed or open area in such a way as to cause or contribute to visible dust emissions which then cross

property lines into a residential, recreational, institutional, educational, retail sales, hotel or business premises. For purposes of this subsection “motor vehicles” shall include, but not be limited to trucks, cars, cycles, bikes, buggies and 3-wheelers. Any person who violates the provisions of this subsection shall be subject to prosecution under A.R.S. § 49-463.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-604 renumbered without change as Section R18-2-604 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-604 renumbered to R18-2-804, new Section R18-2-604 renumbered from R18-2-404 and amended effective November 15, 1993 (Supp. 93-4).

#### R18-2-605. Roadways and Streets

- A. No person shall cause, suffer, allow or permit the use, repair, construction or reconstruction of a roadway or alley without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne. Dust and other particulates shall be kept to a minimum by employing temporary paving, dust suppressants, wetting down, detouring or by other reasonable means.
- B. No person shall cause, suffer, allow or permit transportation of materials likely to give rise to airborne dust without taking reasonable precautions, such as wetting, applying dust suppressants, or covering the load, to prevent particulate matter from becoming airborne. Earth or other material that is deposited by trucking or earth moving equipment shall be removed from paved streets by the person responsible for such deposits.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-605 renumbered without change as Section R18-2-605 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-605 renumbered to R18-2-805, new Section R18-2-605 renumbered from R18-2-405 effective November 15, 1993 (Supp. 93-4).

#### R18-2-606. Material Handling

No person shall cause, suffer, allow or permit crushing, screening, handling, transporting or conveying of materials or other operations likely to result in significant amounts of airborne dust without taking reasonable precautions, such as the use of spray bars, wetting agents, dust suppressants, covering the load, and hoods to prevent excessive amounts of particulate matter from becoming airborne.

#### Historical Note

Section R18-2-606 renumbered from R18-2-406 effective November 15, 1993 (Supp. 93-4).

#### R18-2-607. Storage Piles

- A. No person shall cause, suffer, allow, or permit organic or inorganic dust producing material to be stacked, piled, or otherwise stored without taking reasonable precautions such as chemical stabilization, wetting, or covering to prevent excessive amounts of particulate matter from becoming airborne.
- B. Stacking and reclaiming machinery utilized at storage piles shall be operated at all times with a minimum fall of material and in such manner, or with the use of spray bars and wetting agents, as to prevent excessive amounts of particulate matter from becoming airborne.

#### Historical Note

Section R18-2-607 renumbered from R18-2-407 effective November 15, 1993 (Supp. 93-4).

#### R18-2-608. Mineral Tailings

No person shall cause, suffer, allow, permit construction of, or otherwise own or operate, mineral tailing piles without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne. Reasonable precautions shall mean wetting, chemical stabilization, revegetation or such other measures as are approved by the Director.

#### Historical Note

Section R18-2-608 renumbered from R18-2-408, new Section R18-2-408 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 228, effective March 7, 2009 (Supp. 09-1).

#### R18-2-609. Agricultural Practices

A person shall not cause, suffer, allow, or permit the performance of agricultural practices outside the Phoenix and Yuma planning areas, as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210, including tilling of land and application of fertilizers without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne.

#### Historical Note

Section R18-2-609 renumbered from R18-2-409 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Amended by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2).

#### R18-2-610. Definitions for R18-2-610.01, R18-2-610.02, and R18-2-610.03

The definitions in R18-2-101 and the following definitions apply to R18-2-610.01, R18-2-610.02, and R18-2-610.03:

1. “Access restriction” means reducing PM emissions by reducing the number of trips driven on agricultural aprons and access roads by restricting or eliminating public access to noncropland or commercial farm roads with signs or physical obstruction at locations that effectively control access to the area.
2. “Aggregate cover” means reducing PM emissions and wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to noncropland or commercial farm roads. The aggregate should be clean, hard and durable, and should be applied and maintained to a depth sufficient to reduce PM emissions.
3. “Area A” means the area delineated according to A.R.S. § 49-541(1).
4. “Best management practice” (BMP) means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM emissions from a regulated agricultural activity.
5. “Cessation of Night Tilling” means the discontinuation of tillage from sunset to sunrise on a day identified by the Maricopa or Pinal County Dust Control Forecast as being high risk of dust generation.
6. “Chemical irrigation” means reducing a minimum of one ground operation across a commercial farm by applying a fertilizer, pesticide, or other agricultural chemical to cropland through an irrigation system, which reduces soil disturbance and increases efficiency of application.
7. “Chips/ mulches” means reducing PM emissions and soil movement and preserving soil moisture by applying and maintaining nontoxic chemical or organic dust suppressants to a depth sufficient to reduce PM emissions. Materials shall meet all specifications required by federal, state, or local water agencies, and is not prohibited for use by any applicable regulations.

8. “Combining tractor operations” means reducing soil compaction and a minimum of one tillage or ground operation across a commercial farm by using a tractor, implement, harvester, or other farming support vehicle to perform two or more tillage, cultivation, planting, or harvesting operations at the same time. If Equipment modification is also chosen as a BMP, and uses the same practices as described in this BMP, this action is considered one BMP.
9. “Commercial farm” means 10 or more contiguous acres of land used for agricultural purposes within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
10. “Commercial farm road” means a road that is unpaved, owned by a commercial farmer, and is used exclusively to service a commercial farm.
11. “Commercial farmer” means an individual, entity, or joint operation in general control of a commercial farm.
12. “Committee” means the Governor’s Agricultural Best Management Practices Committee as established by A.R.S. § 49-457.
13. “Conservation Tillage” means a tillage system that reduces a minimum of three tillage operations. This system reduces soil and water loss by planting into existing plant stubble on the field after harvest as well as managing the stubble so that it remains intact during the planting season.
14. “Cover crop” means establishing cover crops that maintain a minimum of 60 percent ground cover. Native or volunteer vegetation that meets the minimum ground cover requirement is acceptable. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
15. “Critical area planting” means reducing PM<sub>10</sub> emissions and wind erosion by planting trees, shrubs, vines, grasses, or other vegetative cover on noncropland in order to maintain at least 60 percent ground cover. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
16. “Cropland” means land on a commercial farm that:
  - a. Is within the time-frame of final harvest to plant emergence, but does not include tillage activities;
  - b. Has been tilled in a prior year and is suitable for crop production, but is currently fallow; or
  - c. Is a turn-row.
17. “Cross-wind ridges” means stabilizing soil and reducing PM emissions and wind erosion by creating soil ridges in a commercial farm by tillage or planting operations. Ridges should be at least four inches in height, and be aligned as perpendicular as possible to the prevailing wind direction.
18. “Dust Control Forecast” means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
  - a. Projected meteorological conditions, including:
    - i. Wind speed and direction,
    - ii. Stagnation,
    - iii. Recent precipitation, and
    - iv. Potential for precipitation;
  - b. Existing concentrations of air pollution at the time of the forecast; and
  - c. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
19. “Equipment modification” means reducing PM emissions and soil erosion during tillage or ground operations by modifying and maintaining an existing piece of agricultural equipment, installing shielding equipment, modifying land planting and land leveling, matching the equipment to row spacing, or grafting to new varieties or technological improvements. If combining tractor operations is also chosen as a BMP, and uses the same practices as described in this BMP, this action is considered one BMP.
20. “Fallow Field” means an area of land that is routinely cultivated, planted and harvested and is unplanted for one or more growing seasons or planting cycles, but is intended to be placed back in agricultural production.
21. “Field Capacity” means the amount of water remaining in the soil two days after having been saturated and after free drainage has ceased.
22. “Forage Crop” means a product grown for consumption by any domestic animal.
23. “Genetically Modified” (GMO) means a living organism whose genetic material has been altered, changing one or more of its characteristics.
24. “GPS: Global Position Satellite System” means using a satellite navigation system on farm equipment to calculate position in the field.
25. “Green chop” means reducing soil compaction, soil disturbance and a minimum of one ground operation across a commercial farm by harvesting a Forage Crop without allowing it to dry in the field.
26. “Ground operation” means an agricultural operation that is not a tillage operation, which involves equipment passing across the field. A ground operation includes harvest activities. A pass through the field may be a subset of a ground operation.
27. “Harvest” means the time after planting up through harvest, including gathering mature crops from a commercial farm, as well as all actions taken immediately after crop removal, such as cooling, sorting, cleaning, and packing.
28. “Integrated Pest Management” means reducing soil compaction and a minimum of one ground operation across a commercial farm for spraying by using a combination of techniques including organic, conventional, and biological farming practices to suppress pest problems.
29. “Limited harvest activity” means performing no ground operations on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation.
30. “Limited tillage activity” means performing no tillage operations on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation.
31. “Maricopa PM nonattainment area” means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
32. “Multi-year crop” means reducing PM emissions from wind erosion and a minimum of one tillage and ground operation across a commercial farm, by protecting the

- soil surface by growing a crop, pasture, or orchard that is grown, or will be grown, on a continuous basis for more than one year.
33. “Noncropland” means any commercial farm land that:
    - a. Is no longer used for agricultural production;
    - b. Is no longer suitable for production of crops;
    - c. Is subject to a restrictive easement or contract that prohibits use for the production of crops; or
    - d. Includes a ditch, ditch bank, equipment yard, storage yard, or well head.
  34. “NRCS” means the Natural Resource Conservation Service.
  35. “Organic material cover” means reducing PM emissions and wind erosion and preserving soil moisture by applying and maintaining cover material such as animal waste or plant residue, to a soil surface to reduce soil movement. Material shall be evenly applied and maintained to a depth sufficient to reduce PM emissions and coverage should be a minimum of 70 percent.
  36. “Permanent cover” means reducing PM emissions and wind erosion by maintaining a long-term perennial vegetative cover on cropland that is temporarily not producing a major crop. Perennial species such as grasses and/or legumes shall be used to establish at least 60 percent cover. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
  37. “Pinal County PM Nonattainment Area” means the West Pinal PM<sub>10</sub> planning area and the West Central PM<sub>2.5</sub> planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
  38. “Plant stubble” means stubble on the soil surface, which insulates soil to reduce evaporation of moisture, and also protects the soil from wind and water erosion.
  39. “Planting based on soil moisture” means reducing PM emissions and wind erosion by applying water or having enough moisture in the soil to germinate the seed prior to planting. Soil must have a minimum soil moisture content of 60% of field capacity at planting depth. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions).
  40. “PM” includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
  41. “Precision Farming” means reducing the number of passes across a commercial farm by at least 12 inches per pass by using GPS to precisely guide farm equipment in the field.
  42. “Reduce vehicle speed” means reducing PM emissions and soil erosion from the operation of farm vehicles or farm equipment on noncropland or commercial farm roads at speeds not to exceed 15. This can be achieved through installation of engine speed governors, signage, or speed control devices.
  43. “Reduced harvest activity” means reducing soil disturbance, soil and water loss, and the number of mechanical harvest passes by a minimum of one ground operation across a commercial farm, by means other than equipment modification or combining tractor operations.
  44. “Reduced tillage system” means reducing soil disturbance, soil and water loss, by using a single piece of equipment that reduces a minimum of three tillage operations, by means other than equipment modification or combining tractor operations.
  45. “Regulated agricultural activity” means a regulated agricultural activity as defined in A.R.S. § 49-457(P)(1)(a) through (P)(1)(d).
  46. “Regulated area” means the regulated area as defined in A.R.S. § 49-457(P)(6).
  47. “Residue management” means reducing PM emissions and wind erosion by maintaining a minimum of 60 percent ground cover of crop and other plant residues on a soil surface between the time of harvest of one crop and the commencement of tillage for a new crop. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
  48. “Sequential cropping” means reducing PM emissions and wind erosion by growing crops in a sequence or close rotation that limits the amount of time bare soil is exposed on a commercial farm to 30 days or less.
  49. “Shuttle System/Larger Carrier” means reducing one out of every four trips across a commercial farm by using multiple or larger bins/trailers to haul commodity from the field.
  50. “Significant Agricultural Earth Moving Activities” means either leveling activities conducted on a commercial farm that disturb the soil more than 4 inches below the surface, or the creation, maintenance and relocation of: ditches, canals, ponds, irrigation lines, tailwater recovery systems (agricultural sumps) and other water conveyances, not to include activities performed on cropland for tillage, ground operations or harvest.
  51. “Silt content test method” means the test method as described in Appendix 2.
  52. “Stabilization of soil prior to plant emergence” means reducing PM emissions by applying water to soil prior to crop emergence in order to cause the soil to form a visible crust.
  53. “Surface roughening” means reducing PM emissions or wind erosion by manipulating a soil surface by means such as rough discing or tillage in order to produce or maintain clods on the land surface. Compliance shall be determined by NRCS Practice Code 609, Surface Roughening, amended through November 2008 (and no future editions).
  54. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on noncropland or commercial farm roads with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
  55. “Tillage” means any mechanical practice that physically disturbs the soil, and includes preparation for planting, such as plowing, ripping, or discing.
  56. “Tillage based on soil moisture” means reducing PM emissions by irrigating fields to the depth of the proposed cut prior to soil disturbances or conducting tillage to coincide with precipitation. Soil must have a minimum soil moisture content of 40-60% of field capacity at planting depth. Compliance shall be determined by NRCS Esti-

- inating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions).
57. "Timing of a tillage operation" means reducing wind erosion and PM emissions by performing tillage operations that minimize the amount of time within 45 days.
  58. "Tillage operation" means an agricultural operation that mechanically manipulates the soil for the enhancement of crop production. Examples include disking or bedding. A pass through the field may be a subset of a tillage operation.
  59. "Track-out control system" means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment from noncropland or commercial farm roads or and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
  60. "Transgenic Crops" means reducing a minimum of one tillage or ground operation, the number of chemical spray applications, or soil disturbances by using plants that are genetically modified.
  61. "Transplanting" means reducing a minimum of one ground operation across a commercial farm and minimizing soil disturbance by utilizing plants already in a growth state as compared to seeding.
  62. "VDT" (Vehicle trips per day) means trips per day made by one vehicle, in one direction.
  63. "Watering" means reducing PM emissions and wind erosion by applying water to noncropland or commercial farm road bare soil surfaces during periods of high traffic until the surfaces are visibly moist.
  64. "Watering on a high risk day" means reducing PM emissions and wind erosion by applying water to commercial farm road bare soil surfaces until the surfaces are visibly moist, on a day forecast to be high risk for dust generation by the Maricopa or Pinal County Dust Control Forecast.
  65. "Wind barrier" means reducing PM emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).

#### Historical Note

Former Section R18-2-610 renumbered to R18-2-612; new Section R18-2-610 adopted by final rulemaking at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 13 A.A.R. 4326, effective November 14, 2007 (Supp. 07-4). Amended by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4). Subsection (A) corrected at the request of the Department, Office File No. M12-133, filed April 5, 2012 (Supp. 11-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-610.01. Agricultural PM General Permit for Crop Operations; Maricopa County PM Nonattainment Area

- A. A commercial farmer within the Maricopa County PM Nonattainment Area shall implement at least two best management practices from each category to reduce PM emissions.
- B. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions during tillage, harvest or ground operation activities:
  1. Chemical irrigation,
  2. Combining tractor operations,
  3. Equipment modification,
  4. Green Chop,
  5. Integrated Pest Management,
  6. Limited harvest activity ,
  7. Limited tillage activity ,
  8. Multi-year crop,
  9. Cessation of Night Tilling,
  10. Planting based on soil moisture,
  11. Precision Farming,
  12. Reduced harvest activity,
  13. Reduced tillage system,
  14. Tillage based on soil moisture,
  15. Timing of a tillage operation,
  16. Transgenic Crops,
  17. Transplanting,
  18. Shuttle System/Larger Carrier, or
  19. Conservation Tillage.
- C. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from noncropland and commercial farm roads:
  1. Access restriction,
  2. Aggregate cover,
  3. Wind barrier,
  4. Critical area planting,
  5. Organic material cover,
  6. Reduce vehicle speed,
  7. Synthetic particulate suppressant,
  8. Track-out control system, or
  9. Watering.
- D. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from cropland:
  1. Wind barrier,
  2. Cover crop,
  3. Cross-wind ridges,
  4. Chips/mulches,
  5. Multi-year crop,
  6. Permanent cover,
  7. Stabilization of soil prior to plant emergence,
  8. Residue management,
  9. Sequential cropping, or
  10. Surface roughening.
- E. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
  1. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);

2. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
  3. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
  4. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- F.** From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete and maintain a Best Management Practices Program General Permit Record Form demonstrating compliance with this Section. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
1. The name of the commercial farmer, signature, and date signed;
  2. The mailing address or physical address of the commercial farm; and
  3. The best management practices selected for tillage, harvest, and ground operation activities, cropland, noncropland and commercial farm roads, and significant earth moving activities (if applicable).
- G.** Records of any changes to the Best Management Practices identified in the most recently submitted Best Management Practices Program General Permit Record Form shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- H.** A person may develop different practices to control PM emissions not contained in subsections (B), (C), (D), or (E) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I.** A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- J.** The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM<sub>10</sub> general permit.
- K.** A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- L.** The Director shall document noncompliance with this Section before issuing a compliance order.
- M.** A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).
- Historical Note**
- New Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4).  
Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).
- ations; Moderate PM Nonattainment Areas, Designated After June 1, 2009**
- A.** A commercial farmer within a PM Moderate Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each category to reduce PM emissions.
- B.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions during tillage, harvest and ground operation activities:
1. Chemical irrigation,
  2. Combining tractor operations,
  3. Equipment modification,
  4. Green Chop,
  5. Integrated Pest Management,
  6. Limited harvest activity,
  7. Limited tillage activity,
  8. Multi-year crop,
  9. Cessation of Night Tilling,
  10. Planting based on soil moisture,
  11. Precision Farming,
  12. Reduced harvest activity,
  13. Reduced tillage system,
  14. Tillage based on soil moisture,
  15. Timing of a tillage operation,
  16. Transgenic Crops,
  17. Transplanting, or
  18. Shuttle System/Larger Carrier, or
  19. Conservation Tillage.
- C.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from noncropland and commercial farm roads:
1. Access restriction,
  2. Aggregate cover,
  3. Wind barrier,
  4. Critical area planting,
  5. Organic material cover,
  6. Reduce vehicle speed,
  7. Synthetic particulate suppressant,
  8. Track-out control system, or
  9. Watering.
- D.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from cropland:
1. Wind barrier,
  2. Cover crop,
  3. Cross-wind ridges,
  4. Chips/mulches,
  5. Multi-year crop,
  6. Permanent cover,
  7. Stabilization of soil prior to plant emergence,
  8. Residue management,
  9. Sequential cropping, or
  10. Surface roughening.
- E.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
1. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance

**R18-2-610.02. Agricultural PM General Permit for Crop Oper-**

Method, amended through April 1998 (and no future editions);

2. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
  3. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
  4. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- F.** From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete and maintain a Best Management Practices Program General Permit Record Form demonstrating compliance with this Section. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
1. The name of the commercial farmer, signature, and date signed;
  2. The mailing address or physical address of the commercial farm; and
  3. The best management practice selected for tillage, harvest and ground operation activities, cropland, noncropland and commercial farm roads, and significant earth moving activities (if applicable).
- G.** Records of any changes to the Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- H.** A person may develop different practices to control PM emissions not contained in subsections (B), (C), (D), or (E) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I.** A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- J.** The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM general permit.
- K.** A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- L.** The Director shall document noncompliance with this Section before issuing a compliance order.
- M.** A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

#### Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-610.03. Agricultural PM General Permit for Crop Oper-

#### ations; Pinal County PM Nonattainment Area

- A.** On the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of best management practices as described in sections (B)(1)(b), (B)(2)(b), (B)(3)(b), (B)(4)(b), and (B)(5)(b).
- B.** On all days, a commercial farmer shall implement at least one best management practice from each category to reduce PM emissions, as described below in subsections (1)(a), (2)(a), (3)(a), (4)(a), and (6), and at least two best management practices from subsection (5)(a). If a commercial farmer implements the Conservation tillage or Reduced tillage system best management practice for the tillage category, they do not have to implement a best management practice from the subsections (2)(a), (2)(b), (5)(a) and (5)(b).
1. Tillage:
    - a. A commercial farmer shall implement at least one of the following:
      - i. Combining tractor operations,
      - ii. Equipment modification,
      - iii. Multi-year crop,
      - iv. Cessation of night tilling,
      - v. Planting based on soil moisture,
      - vi. Precision farming,
      - vii. Tillage based on soil moisture,
      - viii. Timing of a tillage operation,
      - ix. Transgenic crops,
      - x. Transplanting,
      - xi. Reduced tillage system, or
      - xii. Conservation tillage.
    - b. Unless choosing limited tillage activity (subsection iv, below), on the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
      - i. Multi-year crop,
      - ii. Planting based on soil moisture,
      - iii. Tillage based on soil moisture,
      - iv. Limited tillage activity,
      - v. Reduced tillage system, or
      - vi. Conservation tillage.
  2. Ground Operations and Harvest:
    - a. A commercial farmer shall implement at least one of the following:
      - i. Combining tractor operations,
      - ii. Equipment modification,
      - iii. Chemical irrigation,
      - iv. Green chop,
      - v. Integrated pest management,
      - vi. Multi-year crop,
      - vii. Precision farming,
      - viii. Reduced harvest activity,
      - ix. Transgenic crops, or
      - x. Shuttle System/Larger Carrier.
    - b. Unless choosing limited harvest activity (subsection iv, below), on the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
      - i. Green chop,
      - ii. Integrated pest management,
      - iii. Multi-year crop, or
      - iv. Limited harvest activity.
  3. Noncropland:

- a. A commercial farmer shall implement at least one of the following best management practices:
    - i. Access restriction,
    - ii. Aggregate cover,
    - iii. Wind barrier,
    - iv. Critical area planting,
    - v. Organic material cover,
    - vi. Reduce vehicle speed,
    - vii. Synthetic particulate suppressant, or
    - viii. Watering.
  - b. Unless choosing watering on a high risk day (subsection vi, below), on the day before and during a day forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, on a non-cropland area that experiences more than 20 VDT from 2 or more axle vehicles, commercial farmer shall ensure implementation of at least one of the following best management practices:
    - i. Aggregate cover,
    - ii. Wind barrier,
    - iii. Critical area planting,
    - iv. Organic material cover,
    - v. Synthetic particulate suppressant, or
    - vi. Watering on a high risk day.
4. Commercial farm roads:
- a. A commercial farmer shall implement at least one of the following best management practices:
    - i. Access restriction,
    - ii. Reduce vehicle speed,
    - iii. Track-out control system,
    - iv. Aggregate cover,
    - v. Synthetic particulate suppressant,
    - vi. Watering, or,
    - vii. Organic material cover.
  - b. Unless choosing watering on a high risk day (subsection vi, below), on the day before and during a day forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, on a road that experiences more than 20 VDT from 2 or more axle vehicles, a commercial farmer shall ensure implementation of at least one of the following best management practices:
    - i. Aggregate cover,
    - ii. Synthetic particulate suppressant,
    - iii. Wind barrier,
    - iv. Organic material cover,
    - v. Roads are stabilized as determined by the silt content test method,
    - vi. Watering on a high risk day.
5. Cropland:
- a. A commercial farmer shall implement at least two of the following best management practices, one from subsection (i) through (vii), and one from subsection (viii) through (xi), to reduce PM emissions from cropland:
    - i. Wind barrier,
    - ii. Cover crop,
    - iii. Cross-wind ridges,
    - iv. Chips/mulches,
    - v. Sequential cropping
    - vi. Residue management,
    - vii. Surface roughening,
    - viii. Multi-year crop,
    - ix. Permanent cover, or
    - x. Stabilization of soil prior to plant emergence.
  - b. On the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
    - i. Wind barrier,
    - ii. Cover crop,
    - iii. Cross-wind ridges,
    - iv. Chips/mulches,
    - v. Surface roughening,
    - vi. Multi-year crop,
    - vii. Permanent cover,
    - viii. Stabilization of soil prior to plant emergence, or
    - ix. Residue management.
6. A commercial farmer shall implement at least one of the following best management practices, when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
- a. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
  - b. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
  - c. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
  - d. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- C. From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form demonstrating compliance with this rule. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
- 1. The name of the commercial farmer, signature, and date signed;
  - 2. The mailing address or physical address of the commercial farm; and
  - 3. The best management practices selected for tillage, ground operations and harvest, cropland, noncropland, commercial farm roads, and significant earth moving activities (if applicable); and
  - 4. Any additional best management practices selected for high risk days as predicted by the Pinal County Dust Control Forecast.
- D. Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director, in conjunction with the Arizona Department of Agriculture, shall provide the commercial farmer with a Best Management Practices Pro-

gram 3-year Survey. The commercial farmer shall complete the Survey with data from the preceding calendar year and submit the Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA without reference to a commercial farmer's name, shall aggregate the data from the Surveys received, and be submitted to the Department. The 3-year Survey shall include the following information:

1. The name, business address, and phone number of the commercial farmer responsible for the preparation and implementation of the best management practices;
  2. The signature of the commercial farmer and the date the form was signed;
  3. The acreage of each crop type planted/growing during the calendar year that the survey is conducted;
  4. The total miles of commercial farm roads at the commercial farm;
  5. The total acreage of the noncropland at the commercial farm;
  6. The best management practices selected for tillage, ground operations and harvest, cropland, noncropland, commercial farm roads, and significant earth moving activities (if applicable); and
  7. Any additional best management practices selected for high risk days as predicted by the Pinal County Dust Control Forecast.
- E.** Records of any changes to the Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- F.** A person may develop different practices to control PM emissions not contained in subsections (B)(1) through (B)(6) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- G.** A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- H.** The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM general permit.
- I.** A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- J.** The Director shall document noncompliance with this Section before issuing a compliance order.
- K.** A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).
- a. "Animal waste handling and transporting" means the processes by which any animal excretions and mixtures containing animal excretions are collected and transported.
  - b. "Arenas, corrals and pens" means areas where animals are confined for the purposes of, but not limited to, feeding, displaying, safety, racing, exercising, or husbandry.
  - c. "Commercial animal operation" means a commercial dairy operation, a commercial beef feedlot, a commercial poultry facility, and a commercial swine facility, as defined in this Section.
  - d. "Commercial animal operator" means an individual, entity, or joint operation in general control of a commercial animal operation.
  - e. "Dust Control Forecast" means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
    - i. Projected meteorological conditions, including:
      - (1) Wind speed and direction,
      - (2) Stagnation,
      - (3) Recent precipitation, and
      - (4) Potential for precipitation;
    - ii. Existing concentrations of air pollution at the time of the forecast; and
    - iii. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
  - f. "High traffic areas" means areas that experience more than 20 VDT from 2 or more axle vehicles.
  - g. "Maricopa PM nonattainment area" means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
  - h. "Paved Public Road" means any paved roadways that are open to public travel and maintained by a City, County, State, or Federal entities.
  - i. "Pinal County PM Nonattainment Area" means the West Pinal PM<sub>10</sub> planning area and the West Central PM<sub>2.5</sub> planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
  - j. "PM" includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
  - k. "Regulated agricultural activity" means a regulated agricultural activity as defined in A.R.S. § 49-457(P)(5).
  - l. "Regulated area" means the regulated area as defined in A.R.S. § 49-457(P)(6).
  - m. "Track-out control device" means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment from unpaved access connections and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or

#### Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### **R18-2-611. Definitions for R18-2-611.01, R18-2-611.02, and R18-2-611.03**

The definitions in R18-2-101 and the following definitions apply to R18-2-611.01, R18-2-611.02, and R18-611.03:

1. The following definitions apply to a commercial dairy operation, a commercial beef feedlot, a commercial poultry facility, and commercial swine facility:

## Department of Environmental Quality – Air Pollution Control

- equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
- n. “Unpaved access connections” means any unpaved road connection which connects to a paved public road.
  - o. “Unpaved roads or feed lanes” means roads and feed lanes that are unpaved, owned by a commercial animal operator, and used exclusively to service a commercial animal operation.
  - p. “VDT” (Vehicle trips per day) means trips per day made by one vehicle, in one direction.
2. The following definitions apply to a commercial dairy operation:
- a. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
  - b. “Apply a fibrous layer” means reducing PM emissions and soil movement, and preserving soil moisture by spreading shredded or deconstructed plant materials to cover loose soil in high animal traffic areas. Material shall be consistently applied to a minimum depth of two inches above the soil surface and coverage should be a minimum of 70 percent.
  - c. “Bunkers” means below ground level storage systems for storing large amount of silage, which is covered with a plastic tarp.
  - d. “Calves” means young dairy stock under two months of age.
  - e. “Cement cattle walkways to milk barn” means reducing PM emissions by fencing pathways from the corrals to the milking barn, restricting dairy cattle to surfaces with concrete floors.
  - f. “Commercial dairy operation” means a dairy operation with more than 150 dairy cattle within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
  - g. “Cover manure hauling trucks” means reducing PM emissions by completely covering the top of the loaded area.
  - h. “Covers for silage” means reducing PM emissions and wind erosion by using large plastic tarps to completely cover silage.
  - i. “Do not run cattle” means reducing PM emissions by walking dairy cattle to the milking barn.
  - j. “Feed higher moisture feed to dairy cattle” means reducing PM emissions by feeding dairy cattle one or any combination of the following:
    - i. Add water to ration mix to achieve a 20% minimum moisture level,
    - ii. Add molasses or tallow to ration mix at a minimum of 1%,
    - iii. Add silage, or
    - iv. Add green chop.
  - k. “Feed green chop” means feeding high moisture feed that contains at least 30% moisture directly to dairy cattle.
  - l. “Groom manure surface” means reducing PM emissions and wind erosion by:
    - i. Flushing or vacuuming lanes daily,
    - ii. Scraping and harrowing pens on a weekly basis, and
    - iii. Removing manure every four months with equipment that leaves an even corral surface of compacted manure on top of the soil.
  - m. “Hutches” means raised, roofed enclosures that protect the calves from the elements.
  - n. “Pile manure between cleanings” means reducing PM emissions by collecting loose surface materials within the confines of the surface area of the occupied feed pen every two weeks.
  - o. “Provide cooling in corral” means reducing PM emissions by using cooling systems under the corral shades to reduce the ambient air temperature, thereby increasing stocking density in the cool areas of the corrals.
  - p. “Provide shade in corral” means reducing PM emissions by increasing stocking density and reducing animal movement by using a permanent structure, which provides at least 16 square feet per animal of shaded pen surface.
  - q. “Push equipment” means manure harvesting equipment pushed in front of a tractor.
  - r. “Silage” means fermented, high-moisture fodder that can be fed to ruminants, such as cattle and sheep; usually made from grass crops including corn, sorghum or other cereals, by using the entire green plant.
  - s. “Store and maintain feed stock” means reducing PM emissions and wind erosion by storing feed stock in a covered area where the commodity is surrounded on at least three sides by a structure.
  - t. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial dairy operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
  - u. “Use drag equipment to maintain pens” means reducing PM emissions by using manure equipment pulled behind a tractor instead of using push equipment, which avoids dust accumulation in floor depressions.
  - v. “Use free stall housing” means reducing PM emissions by enclosing one cow per stall, which are outfitted with concrete floors.
  - w. “Water misting systems” means reducing PM emissions from dry manure by using systems that project a cloud of very small water particles onto the manure surface, keeping the surface visibly moist.
  - x. “Wind barrier” means reducing PM10 emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establish-

- ment, amended through August 21, 2009 (and no future editions).
3. The following definitions apply to a commercial beef cattle feedlot:
    - a. "Add moisture to pen surface" means reducing PM emissions and wind erosion by applying at least three to six gallons of water per head/per day in pens occupied by beef cattle.
    - b. "Add molasses or tallow to feed" means reducing PM emissions by adding molasses or tallow so that it equals three percent of the total ration.
    - c. "Aggregate cover" means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
    - d. "Apply a fibrous layer in working areas" means reducing PM emissions and soil movement, and preserving soil moisture by spreading shredded or deconstructed plant materials to cover loose soil in high animal traffic areas. Material shall be consistently applied to a minimum depth of two inches above the soil surface and coverage should be a minimum of 70 percent.
    - e. "Bulk materials" means reducing PM emissions by using a closed conveyor system instead of vehicular means to move grain or other.
    - f. "Commercial beef cattle feedlot" means a beef cattle feedlot with more than 500 beef cattle within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
    - g. "Concrete apron" means reducing PM emissions by using solidly formed concrete surface, at least 4 inches thick on top of the soil surface, inside the feed pen for 8 feet approaching the feed bunk or water trough.
    - h. "Control cattle during movements" means reducing PM emissions by suppressing the animal's ability to run by driving them forward while intruding on their "flight zones" or restraining the animal's movement.
    - i. "Cover manure hauling trucks" means reducing PM emissions by completely covering the top of the loaded area.
    - j. "Feed higher moisture feed to beef cattle" means reducing PM emissions by feeding beef cattle feed that contains at least 30% moisture.
    - k. "Frequent manure removal" means reducing PM emissions and wind erosion by harvesting loose manure on top of the pen surface at least once every six months.
    - l. "Pile manure between cleanings" means reducing PM emissions by collecting loose manure surface materials, by scraping or pushing, within the confines of the surface area of the occupied feed pen at least four times per year.
    - m. "Provide shade in corral" means reducing PM emissions by increasing stocking density and reducing animal movement by using a permanent structure, which provides at least 16 square feet per animal of shaded pen surface.
    - n. "Push equipment" means manure harvesting equipment pushed in front of a tractor.
    - o. "Store and maintain feed stock" means reducing PM emissions and wind erosion by storing feed stock in a covered area where the commodity is surrounded on at least three sides by a structure.
    - p. "Synthetic particulate suppressant" means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial beef feedlot with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
    - q. "Use drag equipment to maintain pens" means reducing PM emissions by using manure harvesting equipment pulled behind a tractor instead of using push equipment, which avoids dust accumulation in floor depressions.
    - r. "Wind barrier" means reducing PM10 emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).
  4. The following definitions apply to a commercial poultry facility:
    - a. "Add moisture through ventilation systems" means reducing PM emissions by using a ventilation system that is designed to allow stock to maintain their normal body temperature without difficulty while maintaining a minimum of 20% moisture in the air within the housing system to bind small particles to larger particles.
    - b. "Add oil and/or moisture to the feed" means reducing PM emissions by adding a minimum of 1% edible oil and/or moisture to feed rations to bind small particles to larger particles.
    - c. "Aggregate cover" means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
    - d. "Clean aisles between cage rows" means reducing PM emissions by cleaning the aisles between cage rows at least twice every 14 days to prevent dried manure, spilled feed, and debris accumulation.
    - e. "Clean fans, louvers, and soffit inlets in a commercial poultry facility" means reducing PM emissions by cleaning fans, louvers, and soffit inlets when the facility is empty between depopulating and populating the facility.
    - f. "Clean floors and walls in a commercial poultry facility" means reducing PM emissions by cleaning floors and walls to prevent dried manure, spilled

- feed, and debris accumulation when the facility is empty between depopulating and populating the facility.
- g. “Commercial poultry facility” means a poultry operation with more than 25,000 egg laying hens within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
  - h. “Control vegetation on building exteriors” means reducing PM emissions by removing, cutting, or trimming vegetation that accumulates PM and restricts ventilation of the building, so as to leave approximately 3 feet between the vegetation and building.
  - i. “Enclose transfer points” means reducing PM emissions by enclosing the points of transfer between the enclosed, weatherproof storage structure and the enclosed feed distribution system, which reduce air contact with the feed rations during feed conveyance.
  - j. “House in fully enclosed ventilated buildings” means reducing PM emissions by utilizing fully enclosed buildings with sufficient ventilation.
  - k. “Maintain moisture in manure solids” means reducing PM emissions by maintaining a moisture content of a minimum of 15% in the solids sufficient to bind small particles to larger particles.
  - l. “Minimize drop distance” means reducing PM emissions by designing the feed distribution system so that the distance the feed ration drops from the feed distribution system into feeders is approximately 1 foot or less, which reduces air contact with the feed rations during feed conveyance.
  - m. “Poultry” means any domesticated bird including chickens, turkeys, ducks, geese, guineas, ratites and squabs.
  - n. “Remove spilled feed” means reducing PM emissions by removing spilled feed from the housing facility at least once every 14 days.
  - o. “Stack separated manure solids” means reducing PM emissions and wind erosion by reducing the amount of exposed surface area of manure solids.
  - p. “Store feed” means reducing PM emissions by storing feed in a structure that is enclosed and weatherproof, which reduces air contact with the feed rations during feed storage.
  - q. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial poultry operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
  - r. “Use enclosed feed distribution system” means reducing PM emissions by using an enclosed feed conveyance system that distributes feed rations throughout the housing facility, which reduces air contact with the feed rations during feed conveyance.
  - s. “Use a flexible discharge spout” means reducing PM emissions and wind erosion at the time of bulk feed deliveries to the housing units by using a flexible discharge spout on the end of the feed truck transfer auger.
  - t. “Use no bedding in the production facility” means reducing PM emissions by not using bedding such as wood shavings, sawdust, peanut hulls, straw, or other organic material.
  - u. “Use of a rotary dryer to dry manure waste” means reducing PM10 emissions by drying the manure waste in a rotary dryer fitted with a baghouse or wet scrubber. A commercial poultry facility using a rotary dryer must comply with all of the following:
    - i. Install, maintain, and operate the baghouse or wet scrubber in a manner consistent with the manufacturer’s specifications at all times the rotary dryer is operated. The manufacturer specifications must be available on site upon request.
    - ii. Conduct monthly observations using EPA Method 22 on the control equipment to ensure proper operation. If improper operation is observed through EPA Method 22, the dryer must stop immediately and the equipment repaired before resuming operations.
    - iii. For baghouses, conduct an annual black light inspection of the bags to detect broken or leaking bags. If broken or leaking bags are detected it must be repaired or replaced immediately.
    - iv. Maintain a record of all repair activity required under (ii) and (ii) that must be made available within two days of Director’s request for inspection.
5. The following definitions apply to a commercial swine facility:
- a. “Add oil and/or moisture to the feed” means reducing PM emissions by adding a minimum of 0.5% edible oil and/or moisture to feed rations to bind small particles to larger particles.
  - b. “Add moisture through ventilation systems” means reducing PM emissions by using a ventilation system that is designed to allow stock to maintain their normal body temperature without difficulty while maintaining minimum of 15% moisture in the air within the housing system to bind small particles to larger particles.
  - c. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
  - d. “Clean aisles between pens and stalls” means reducing PM emissions by cleaning the aisles between pens and stalls at least twice every 14 days to prevent dried manure, spilled feed, and debris accumulation.
  - e. “Clean fans, louvers, and soffit inlets in a commercial swine facility” means reducing PM emissions by cleaning fans, louvers, and soffit inlets between transfer of animal groups, but in any case, at least every 6 months.
  - f. “Clean pens, floors and walls in a commercial swine facility” means reducing PM emissions by cleaning pens, floors, and walls between transfer of animal groups to prevent dried manure, spilled feed, and

- debris accumulation, but in any case, at least every 6 months.
- g. “Commercial swine facility” means a swine operation with more than 50 animal units for more than 30 consecutive days within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area. One thousand pounds equals one animal unit.
  - h. “Control vegetation on building exteriors” means reducing PM emissions by removing, cutting, or trimming vegetation that accumulates PM and restricts ventilation of the building, so as to leave approximately 3 feet between the vegetation and the building.
  - i. “Enclose transfer points” means reducing PM emissions by enclosing the points of transfer between the enclosed, weatherproof storage structure and the enclosed feed distribution system, which reduces air contact with the feed rations during feed conveyance.
  - j. “House in fully enclosed ventilated buildings” means reducing PM emissions by utilizing fully enclosed buildings with sufficient ventilation.
  - k. “Lagoon” means a liquid manure storage and treatment pond.
  - l. “Maintain moisture in manure solids” means reducing PM<sub>10</sub> emissions by maintaining a minimum moisture content of 10% in the solids sufficient to bind small particles to larger particles.
  - m. “Minimize drop distance” means reducing PM emissions by designing the feed distribution system so that the distance the feed ration drops from the feed distribution system into feeders is 3 feet or less, which reduces air contact with the feed rations during feed conveyance.
  - n. “Remove spilled feed” means reducing PM emissions by removing spilled feed from the housing facility at least once every 14 days.
  - o. “Slatted flooring” means reducing PM emissions by using flooring that is a slotted concrete or wire-mesh floor set above a liquid manure collection pit, which allows the excrement to fall through the flooring into the liquid pit below, which prevents solids build-up. Slats 4 to 8 inches wide with spacing of about 1 inch in between are recommended.
  - p. “Sloped concrete flooring” means reducing PM emissions by pouring concrete with a minimum of 0.25% grade inside of the barns which provides drainage and easier cleaning of floor areas.
  - q. “Stack separated manure solids” means reducing PM emissions and wind erosion by reducing the amount of exposed surface area of manure solids.
  - r. “Store feed” means reducing PM emissions by storing feed in a structure that is enclosed and weatherproof, which reduces air contact with the feed rations during feed storage.
  - s. “Store separated manure solids” means reducing PM emissions by storing manure solids in a wind-blocked area behind a wall, structure, or area with natural wind protection to minimize blowing air movement over the manure stack.
  - t. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial swine operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
  - u. “Use a flexible discharge spout” means reducing PM emissions and wind erosion at the time of bulk feed deliveries to the housing units by using a flexible discharge spout on the end of the feed truck transfer auger.
  - v. “Use enclosed feed distribution system” means reducing PM emissions by using an enclosed feed conveyance system that distributes feed rations throughout the housing facility, which reduces air contact with the feed rations during the feed conveyance.
  - w. “Use no bedding in the production facility” means reducing PM emissions by not using bedding such as wood shavings, sawdust, peanut hulls, straw, or other organic material.

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 13 A.A.R. 4326, effective November 14, 2007 (Supp. 07-4). Section repealed; new Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4). Subsection (2)(a) corrected at request of the Department, Office File No. M12-133, filed April 5, 2012 (Supp. 11-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 22 A.A.R. 987, effective April 5, 2016 (Supp. 16-2).

#### R18-2-611.01. Agricultural PM General Permit for Animal Operations; Maricopa County Serious PM Nonattainment Areas

- A. A commercial animal operator within a Serious PM Nonattainment Area shall implement at least two best management practices from each category to reduce PM emissions.
- B. A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Use free stall housing,
    - b. Provide shade in corral,
    - c. Provide cooling in corral,
    - d. Cement cattle walkways to milk barn,
    - e. Groom manure surface,
    - f. Water misting systems,
    - g. Use drag equipment to maintain pens,
    - h. Pile manure between cleanings,
    - i. Feed green chop,
    - j. Keep calves in barns or hutches,
    - k. Do not run cattle,
    - l. Apply a fibrous layer, or
    - m. Wind barrier.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Feed higher moisture feed to dairy cattle,
    - b. Store and maintain feed stock,
    - c. Covers for silage,
    - d. Store silage in bunkers,
    - e. Cover manure hauling trucks, or
    - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
  - 3. Unpaved Access Connections:

## Department of Environmental Quality – Air Pollution Control

- a. Install signage to limit vehicle speed to 15 mph,
  - b. Install speed control devices,
  - c. Restrict access to through traffic,
  - d. Install and maintain a track-out control device,
  - e. Apply and maintain pavement in high traffic areas,
  - f. Apply and maintain aggregate cover,
  - g. Apply and maintain synthetic particulate suppressant, or
  - h. Apply and maintain water as a dust suppressant.
- 4. Unpaved Roads or Feed Lanes:
  - a. Install engine speed governors on feed truck to 15 mph,
  - b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict access to through traffic,
  - e. Apply and maintain pavement in high traffic areas,
  - f. Apply and maintain aggregate cover,
  - g. Apply and maintain synthetic particulate suppressant,
  - h. Apply and maintain water as a dust suppressant,
  - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
  - j. Apply and maintain pavement or cement feed lanes.
- C. A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Concrete aprons,
    - b. Provide shade in corral,
    - c. Add moisture to pen surface,
    - d. Manure removal,
    - e. Pile manure between cleanings,
    - f. Feed higher moisture feed to beef cattle,
    - g. Control cattle during movements,
    - h. Use drag equipment to maintain pens,
    - i. Apply a fibrous layer, or
    - j. Wind barrier.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Feed higher moisture feed to beef cattle,
    - b. Add molasses or tallow to feed,
    - c. Store and maintain feed stock,
    - d. Bulk materials,
    - e. Use drag equipment to maintain pens,
    - f. Cover manure hauling trucks, or
    - g. Do not load manure when wind exceeds 15 mph.
  - 3. Unpaved Access Connections:
    - a. Install and maintain a track-out control device,
    - b. Apply and maintain pavement in high traffic areas,
    - c. Apply and maintain aggregate cover,
    - d. Apply and maintain synthetic particulate suppressant, or
    - e. Apply and maintain water as a dust suppressant.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed truck to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict access to through traffic,
    - e. Apply and maintain pavement in high traffic areas,
    - f. Apply and maintain aggregate cover,
    - g. Apply and maintain synthetic particulate suppressant,
    - h. Apply and maintain water as a dust suppressant, or
    - i. Apply and maintain oil on roads or feed lanes.
- D. A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens (Housing):
    - a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
    - b. Use no bedding,
    - c. Control vegetation on building exteriors,
    - d. Add moisture through ventilation systems, or
    - e. House in fully enclosed ventilated buildings.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Remove spilled feed,
    - b. Store feed,
    - c. Add oil and/or moisture to the feed,
    - d. Use enclosed feed distribution system,
    - e. Use flexible discharge spout,
    - f. Minimize drop distance,
    - g. Enclose transfer points,
    - h. Clean floors and walls in a commercial poultry facility,
    - i. Clean aisles between cage rows,
    - j. Stack separated manure solids,
    - k. Maintain moisture in manure solids, or
    - l. Use of a rotary dryer to dry manure waste.
  - 3. Unpaved Access Connections:
    - a. Install speed control devices,
    - b. Restrict traffic access,
    - c. Install and maintain a track-out control system, or
    - d. Install signage to limit vehicle speed to 15 mph.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed trucks to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict traffic access,
    - e. Apply and maintain aggregate cover,
    - f. Apply and maintain synthetic particulate suppressant,
    - g. Apply and maintain water, or
    - h. Apply and maintain oil on roads or feed lanes.
- E. A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens (Housing):
    - a. House in fully enclosed ventilated buildings,
    - b. Use no bedding,
    - c. Use a slatted floor system,
    - d. Use sloped concrete flooring,
    - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
    - f. Control vegetation on building exteriors, or
    - g. Add moisture through ventilation systems.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Remove spilled feed,
    - b. Store feed,
    - c. Add oil and/or moisture to feed,
    - d. Use enclosed feed distribution system,
    - e. Use flexible discharge spout,
    - f. Minimize drop distance,
    - g. Enclose transfer points,
    - h. Clean pens, floors, and walls in a commercial swine facility,
    - i. Clean aisles between pens and stalls,
    - j. Store separated manure solids in a wind-blocked area,
    - k. Stack separated manure solids,

- l. Maintain moisture in manure solids, or
- m. Maintain liquid lagoon level.
- 3. Unpaved Access Connections:
  - a. Install speed control devices,
  - b. Restrict traffic access,
  - c. Install and maintain a track-out control system,
  - d. Install signage to limit vehicle speed to 15 mph.
- 4. Unpaved Roads or Feed Lanes:
  - a. Install engine speed governors on feed trucks to 15 mph,
  - b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict traffic access,
  - e. Apply and maintain aggregate cover,
  - f. Apply and maintain synthetic particulate suppressant,
  - g. Apply and maintain water,
  - h. Apply and maintain oil on roads or feed lanes, or
  - i. Wind barrier.
- F. From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practice Program General Permit Record form shall include the following information:
  - 1. The name of the commercial animal operator, signature, and date signed,
  - 2. The mailing address or physical address of the commercial animal operation, and
  - 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- G. Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.
- H. A person may develop different practices not contained in subsection (B), (C), (D), or (E), that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee.
- I. The Director shall not assess a fee to a commercial animal operator for coverage under the Best Management Practice Program General Permit Record Form.
- J. A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- K. The Director shall document noncompliance with this Section before issuing a compliance order.
- L. A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

#### Historical Note

New Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4).  
Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015

(Supp. 15-3). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 22 A.A.R. 987, effective April 5, 2016 (Supp. 16-2).

#### R18-2-611.02. Agricultural PM General Permit for Animal Operations; Moderate PM Nonattainment Areas Designated After June 1, 2009, Except Pinal County PM Nonattainment Area

- A. A commercial animal operator within a Moderate PM Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each category to reduce PM emissions.
- B. A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Use free stall housing,
    - b. Provide shade in corral,
    - c. Provide cooling in corral,
    - d. Cement cattle walkways to milk barn,
    - e. Groom manure surface,
    - f. Water misting systems,
    - g. Use drag equipment to maintain pens,
    - h. Pile manure between cleanings,
    - i. Feed green chop,
    - j. Keep calves in barns or hutches,
    - k. Do not run cattle,
    - l. Apply a fibrous layer, or
    - m. Wind barrier.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Feed higher moisture feed to dairy cattle,
    - b. Store and maintain feed stock,
    - c. Covers for silage,
    - d. Store silage in bunkers,
    - e. Cover manure hauling trucks, or
    - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
  - 3. Unpaved Access Connections:
    - a. Install signage to limit vehicle speed to 15 mph,
    - b. Install speed control devices,
    - c. Restrict access to through traffic,
    - d. Install and maintain a track-out control device,
    - e. Apply and maintain pavement in high traffic areas,
    - f. Apply and maintain aggregate cover,
    - g. Apply and maintain synthetic particulate suppressant, or
    - h. Apply and maintain water as a dust suppressant.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed truck to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict access to through traffic,
    - e. Apply and maintain pavement in high traffic areas,
    - f. Apply and maintain aggregate cover,
    - g. Apply and maintain synthetic particulate suppressant,
    - h. Apply and maintain water as a dust suppressant,
    - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
    - j. Apply and maintain pavement or cement feed lanes.
- C. A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Concrete aprons,
    - b. Provide shade in corral,

## Department of Environmental Quality – Air Pollution Control

- c. Add moisture to pen surface,
  - d. Manure removal,
  - e. Pile manure between cleanings,
  - f. Feed higher moisture feed to beef cattle,
  - g. Control cattle during movements,
  - h. Use drag equipment to maintain pens,
  - i. Apply a fibrous layer, or
  - j. Wind barrier.
2. Animal Waste (and Feed) Handling and Transporting:
- a. Feed higher moisture feed to beef cattle,
  - b. Add molasses or tallow to feed,
  - c. Store and maintain feed stock,
  - d. Bulk materials,
  - e. Use drag equipment to maintain pens,
  - f. Cover manure hauling trucks, or
  - g. Do not load manure when wind exceeds 15 mph.
3. Unpaved Access Connections:
- a. Install and maintain a track-out control device,
  - b. Apply and maintain pavement in high traffic areas,
  - c. Apply and maintain aggregate cover,
  - d. Apply and maintain synthetic particulate suppressant, or
  - e. Apply and maintain water as a dust suppressant.
4. Unpaved Roads or Feed Lanes:
- a. Install engine speed governors on feed truck to 15 mph,
  - b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict access to through traffic,
  - e. Apply and maintain pavement in high traffic areas,
  - f. Apply and maintain aggregate cover,
  - g. Apply and maintain synthetic particulate suppressant,
  - h. Apply and maintain water as a dust suppressant, or
  - i. Apply and maintain oil on roads or feed lanes.
- D.** A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
- a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
  - b. Use no bedding,
  - c. Control vegetation on building exteriors;
  - d. Add moisture through ventilation systems, or
  - e. House in fully enclosed ventilated buildings.
2. Animal Waste (and Feed) Handling and Transporting:
- a. Remove spilled feed,
  - b. Store feed,
  - c. Add oil and/or moisture to the feed,
  - d. Use enclosed feed distribution system,
  - e. Use flexible discharge spout,
  - f. Minimize drop distance,
  - g. Enclose transfer points,
  - h. Clean floors and walls in a commercial poultry facility,
  - i. Clean aisles between cage rows,
  - j. Stack separated manure solids, or
  - k. Maintain moisture in manure solids.
3. Unpaved Access Connections:
- a. Install speed control devices,
  - b. Restrict traffic access,
  - c. Install and maintain a track-out control system, or
  - d. Install signage to limit vehicle speed to 15 mph.
4. Unpaved Roads or Feed Lanes:
- a. Install engine speed governors on feed trucks to 15 mph,
- b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict traffic access,
  - e. Apply and maintain aggregate cover,
  - f. Apply and maintain synthetic particulate suppressant,
  - g. Apply and maintain water,
  - h. Apply and maintain oil on roads or feed lanes, or
  - i. Wind barrier.
- E.** A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
- a. House in fully enclosed ventilated buildings,
  - b. Use no bedding,
  - c. Use a slatted floor system,
  - d. Use sloped concrete flooring,
  - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
  - f. Control vegetation on building exteriors, or
  - g. Add moisture through ventilation systems.
2. Animal Waste (and Feed) Handling and Transporting:
- a. Remove spilled feed,
  - b. Store feed,
  - c. Add oil and/or moisture to feed,
  - d. Use enclosed feed distribution system,
  - e. Use flexible discharge spout,
  - f. Minimize drop distance,
  - g. Enclose transfer points,
  - h. Clean pens, floors, and walls in a commercial swine facility,
  - i. Clean aisles between pens and stalls,
  - j. Store separated manure solids in a wind-blocked area,
  - k. Stack separated manure solids,
  - l. Maintain moisture in manure solids, or
  - m. Maintain liquid lagoon level.
3. Unpaved Access Connections:
- a. Install speed control devices,
  - b. Restrict traffic access,
  - c. Install and maintain a track-out control system,
  - d. Install signage to limit vehicle speed to 15 mph.
4. Unpaved Roads or Feed Lanes:
- a. Install engine speed governors on feed trucks to 15 mph,
  - b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict traffic access,
  - e. Apply and maintain aggregate cover,
  - f. Apply and maintain synthetic particulate suppressant,
  - g. Apply and maintain water,
  - h. Apply and maintain oil on roads or feed lanes, or
  - i. Wind barrier.
- F.** From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practices Program General Permit Record Form shall include the following information:
1. The name of the commercial animal operator, signature, and date signed,

- 2. The mailing address or physical address of the commercial animal operation, and
- 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- G.** Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.
- H.** A person may develop different practices not contained in subsection (B), (C), (D), or (F) that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee. The new best management practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I.** The Director shall not assess a fee to a commercial animal operator for coverage under the agricultural PM general permit.
- J.** A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- K.** The Director shall document noncompliance with this Section before issuing a compliance order.
- L.** A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

#### Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### **R18-2-611.03. Agricultural PM General Permit for Animal Operations; Pinal County PM Nonattainment Area**

- A.** A commercial animal operator within the Pinal County PM Nonattainment Area shall implement at least one best management practice from each category to reduce PM emissions.
- B.** In addition to subsection (A), on the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, commercial dairy operations within the Pinal County PM Nonattainment Area shall apply and maintain one of the four following BMPs on unpaved roads that experience more than 20 VDT from 2 or more axle vehicles:
  - 1. Apply and maintain pavement in high traffic areas,
  - 2. Apply and maintain aggregate cover,
  - 3. Apply and maintain synthetic particulate suppressant, or
  - 4. Apply and maintain water as a dust suppressant.
- C.** In addition to subsection (A), commercial beef feedlots within the Pinal County PM Nonattainment Area, shall add water to pen surface, as defined in R18-2-611(3)(a), on the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast.
- D.** A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Use free stall housing,
    - b. Provide shade in corral,
    - c. Provide cooling in corral,
    - d. Cement cattle walkways to milk barn,
    - e. Groom manure surface,
    - f. Water misting systems,
    - g. Use drag equipment to maintain pens,
    - h. Pile manure between cleanings,
    - i. Feed green chop,
    - j. Keep calves in barns or hutches,
    - k. Do not run cattle,
    - l. Apply a fibrous layer, or
    - m. Wind barrier.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Feed higher moisture feed to dairy cattle,
    - b. Store and maintain feed stock,
    - c. Covers for silage,
    - d. Store silage in bunkers,
    - e. Cover manure hauling trucks, or
    - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
  - 3. Unpaved Access Connections:
    - a. Install signage to limit vehicle speed to 15 mph,
    - b. Install speed control devices,
    - c. Restrict access to through traffic,
    - d. Install and maintain a track-out control device,
    - e. Apply and maintain pavement in high traffic areas,
    - f. Apply and maintain aggregate cover,
    - g. Apply and maintain synthetic particulate suppressant, or
    - h. Apply and maintain water as a dust suppressant.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed truck to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict access to through traffic,
    - e. Apply and maintain pavement in high traffic areas,
    - f. Apply and maintain aggregate cover,
    - g. Apply and maintain synthetic particulate suppressant,
    - h. Apply and maintain water as a dust suppressant,
    - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
    - j. Apply and maintain pavement or cement feed lanes.
- E.** A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens:
    - a. Concrete aprons,
    - b. Provide shade in corral,
    - c. Add water to pen surface,
    - d. Manure removal,
    - e. Pile manure between cleanings,
    - f. Feed higher moisture feed to beef cattle,
    - g. Control cattle during movements,
    - h. Use drag equipment to maintain pens,
    - i. Apply a fibrous layer, or
    - j. Wind barrier.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Feed higher moisture feed to beef cattle;
    - b. Add molasses or tallow to feed,
    - c. Store and maintain feed stock,
    - d. Bulk materials,
    - e. Use drag equipment to maintain pens,
    - f. Cover manure hauling trucks, or
    - g. Do not load manure when wind exceeds 15 mph.
  - 3. Unpaved Access Connections:
    - a. Install and maintain a track-out control device,
    - b. Apply and maintain pavement in high traffic areas,
    - c. Apply and maintain aggregate cover,

- d. Apply and maintain synthetic particulate suppressant, or
  - e. Apply and maintain water as a dust suppressant.
- 4. Unpaved Roads or Feed Lanes:
  - a. Install engine speed governors on feed truck to 15 mph,
  - b. Install signage to limit vehicle speed to 15 mph,
  - c. Install speed control devices,
  - d. Restrict access to through traffic,
  - e. Apply and maintain pavement in high traffic areas,
  - f. Apply and maintain aggregate cover,
  - g. Apply and maintain synthetic particulate suppressant,
  - h. Apply and maintain water as a dust suppressant, or
  - i. Apply and maintain oil on roads or feed lanes.
- F. A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens (Housing):
    - a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
    - b. Use no bedding,
    - c. Control vegetation on building exteriors,
    - d. Add moisture through ventilation systems, or
    - e. House in fully enclosed ventilated buildings.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Remove spilled feed,
    - b. Store feed,
    - c. Add oil and/or moisture to the feed,
    - d. Use enclosed feed distribution system,
    - e. Use flexible discharge spout,
    - f. Minimize drop distance,
    - g. Enclose transfer points,
    - h. Clean floors and walls in a commercial poultry facility,
    - i. Clean aisles between cage rows,
    - j. Stack separated manure solids, or
    - k. Maintain moisture in manure solids.
  - 3. Unpaved Access Connections:
    - a. Install speed control devices,
    - b. Restrict traffic access,
    - c. Install and maintain a track-out control system, or
    - d. Install signage to limit vehicle speed to 15 mph.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed trucks to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict traffic access,
    - e. Apply and maintain aggregate cover,
    - f. Apply and maintain synthetic particulate suppressant,
    - g. Apply and maintain water, or
    - h. Apply and maintain oil on roads or feed lanes.
- G. A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
  - 1. Arenas, Corrals, and Pens (Housing):
    - a. House in fully enclosed ventilated buildings,
    - b. Use no bedding,
    - c. Use a slatted floor system,
    - d. Use sloped concrete flooring,
    - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
    - f. Control vegetation on building exteriors, or
    - g. Add moisture through ventilation systems.
  - 2. Animal Waste (and Feed) Handling and Transporting:
    - a. Remove spilled feed,
    - b. Store feed,
    - c. Add oil and/or moisture to feed,
    - d. Use enclosed feed distribution system,
    - e. Use flexible discharge spout,
    - f. Minimize drop distance,
    - g. Enclose transfer points,
    - h. Clean pens, floors, and walls in a commercial swine facility,
    - i. Clean aisles between pens and stalls,
    - j. Store separated manure solids in a wind-blocked area,
    - k. Stack separated manure solids,
    - l. Maintain moisture in manure solids, or
    - m. Maintain liquid lagoon level.
  - 3. Unpaved Access Connections:
    - a. Install speed control devices,
    - b. Restrict traffic access,
    - c. Install and maintain a track-out control system,
    - d. Install signage to limit vehicle speed to 15 mph.
  - 4. Unpaved Roads or Feed Lanes:
    - a. Install engine speed governors on feed trucks to 15 mph,
    - b. Install signage to limit vehicle speed to 15 mph,
    - c. Install speed control devices,
    - d. Restrict traffic access,
    - e. Apply and maintain aggregate cover,
    - f. Apply and maintain synthetic particulate suppressant,
    - g. Apply and maintain water,
    - h. Apply and maintain oil on roads or feed lanes, or
    - i. Wind barrier.
- H. From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practices Program General Permit Record Form shall include the following information:
  - 1. The name of the commercial animal operator, signature, and date signed,
  - 2. The mailing address or physical address of the commercial animal operation, and
  - 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- I. Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director shall provide the commercial animal operator with a Best Management Practices Program 3-year Survey. The commercial animal operator shall complete the Survey with data from the preceding calendar year and submit the Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA in a format that does not refer to a commercial animal operator's name, shall aggregate the data from the Surveys received, and be submitted to the Department. The 3-year Survey shall include the following information:

1. The name, business address, and phone number of the commercial farmer responsible for the preparation and implementation of the best management practices;
  2. The signature of the commercial farmer and the date the form was signed;
  3. The number of animals in a commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
  4. The total miles of unpaved roads at the commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
  5. The total acreage of the unpaved access connections and equipment areas at the commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
  6. The best management practices selected for each category; and
  7. For commercial dairy operations and beef cattle feedlots, an acknowledgement that water was applied on the day of a high risk day as predicted by the Pinal County Dust Control Forecast.
- J.** Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.
- K.** A person may develop different practices not contained in subsection (D), (E), (F), or (G) that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee. The new best management practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- L.** The Director shall not assess a fee to a commercial animal operator for coverage under the agricultural PM general permit.
- M.** A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- N.** The Director shall document noncompliance with this Section before issuing a compliance order.
- O.** A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).
- Historical Note**
- New Section made by exempt rulemaking pursuant to  
Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective  
July 2, 2015 (Supp. 15-3).
- R18-2-612. Definitions for R18-2-612.01**
- The definitions in R18-2-101 and the following definitions apply to R18-2-612.01:
1. "Access restriction" means reducing PM emission by reducing the number of trips driven on unpaved operation and maintenance and unpaved utility roads by restricting or eliminating public access by the use of signs or physical obstruction at locations that effectively control access to roads.
  2. "Aggregate cover" means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads. The aggregate should be clean, hard and durable, and should be applied a depth sufficient to create soil stabilization in accordance with material specifications. A minimum depth of three inches is the standard in the absence of such specifications.
  3. "Apply and maintain water" means reducing PM emissions and wind erosion by applying water to bare soil surfaces until the surfaces are visibly moist.
  4. "Best management practice" means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM emissions from a regulated agricultural activity.
  5. "Biological control of aquatic weeds" means reducing at least one trip, or to one trip if only one trip is needed, per treatment, made by vehicles for the purposes of removing aquatic weeds from canals by using fish, and other biologic means, within the canal through the use of to control the growth of aquatic weeds that reduce operating capacities and create debris that causes other operational issues.
  6. "Canals" means facilities constructed for the sole purpose of the control, conveyance, and delivery of water. These facilities may be either open earthen channels, lined or unlined, or buried pipelines, which are used to convey water uphill and under obstructions, such as roadways and wash and river channels. These facilities include, but are not limited to, gate, inlet, outlet, safety, and measuring structures required to control water along the canals and deliver water to irrigation district customers, as well as compacted earthen banks constructed to protect these facilities from storm runoff events.
  7. "Committee" means the Governor's Agricultural Best Management Practices Committee.
  8. "Debris" means trash, rubble, and other non-soil materials.
  9. "Dredge canals" means reducing PM emissions by mechanically removing muck, debris, and other foreign objects from canals while material is still wet or damp.
  10. "Dust Control Forecast" means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
    - a. Projected meteorological conditions, including:
      - i. Wind speed and direction,
      - ii. Stagnation,
      - iii. Recent precipitation, and
      - iv. Potential for precipitation;
    - b. Existing concentrations of air pollution at the time of the forecast; and
    - c. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
  11. "Earth materials" means natural materials covering the ground surface, which includes, but are not limited to, dirt, rocks, or soil.
  12. "Grading roadways" means mechanically smoothing and compacting the roadway surface.
  13. "Irrigation District" means a political subdivision, governed by title 48, chapter 19.
  14. "Limit activity" means performing only critical operational or emergency activity on a day forecast to be high risk for dust generation as forecasted by the Pinal County Dust Control Forecast.
  15. "Major earth moving activities" means the mechanical movement of earth materials to reconstruct, relocate, reshape, reconfigure canals, including operation and maintenance roads and utility access roads.

16. "Maricopa PM nonattainment area" means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
17. "Minor earth moving activities" means the mechanical movement of earth materials to repair and maintain the existing configuration, location, bank slopes, or inclines of canals.
18. "Muck" means water that is saturated with mud, dirt, and soil, which accumulates over time along the bottom of canals.
19. "Paved Public Road" means any paved roadways that are open to public travel and maintained by a City, County, or the State.
20. "Pinal County PM Nonattainment Area" means the West Pinal PM<sub>10</sub> planning area and the West Central PM<sub>2.5</sub> planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
21. "PM" includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
22. "Reduce vehicle speed" means reducing PM emissions and soil erosion from the use of vehicles owned or operated by the irrigation district on unpaved operation, maintenance, and utility access roads, at speeds not to exceed 25 mph. This can be achieved through worker behavior modifications, signage, or any other necessary means.
23. "Regulated agricultural activity" means activities of an irrigation district, which affects those lands and facilities that are under the jurisdiction and control of an irrigation district, as described in § 49-457(P)(1)(f) and A.R.S. § 49-457(P)(5)(b).
24. "Regulated area" means a regulated area as defined in A.R.S. § 49-457(P)(6)(c).
25. "Sediment" means muck that has dried after removal from canals.
26. "Supervisory control system" means a system that allows the irrigation district to control operational structures from a remote computer location in order to reduce at least one trip made by vehicles to access structures for operational purposes.
27. "Synthetic or natural particulate suppressant" means reducing PM emissions and wind erosion by providing a stabilized soil surface with organic material, such as muck, animal waste or biosolids, or with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide.
28. "Track-out control system" means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
29. "Unauthorized use" means any travel or access by non-district personnel in non-district vehicles along roadways under the control of an irrigation district without the permission of the irrigation district.
30. "Unpaved operation and maintenance roads" means unpaved roadways that lay adjacent to canals, which provide access for irrigation district personnel and equipment for direct operation and maintenance of canals, and are under the control of the irrigation district.
31. "Unpaved utility access roads" means unpaved roadways used to provide access to canals, and also includes office and shop facilities, equipment yards, staging areas and other lands under the control of the irrigation district.
32. "Weed management" means reducing at least one trip made by vehicles for the purposes of removing weeds by using a combination of techniques, including organic, chemical, or biological means, to control weeds along canal banks and land surfaces not used for conveying water, excluding unpaved roadways.
33. "Wind barrier" means reducing PM<sub>10</sub> emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).

#### Historical Note

New Section R18-2-612 renumbered from R18-2-610 at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Former Section R18-2-612 renumbered to R18-2-614; new Section R18-2-612 made by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-612.01. Agricultural PM General Permit For Irrigation Districts; PM Nonattainment Areas Designated After June 1, 2009

- A. An irrigation district within a PM Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each of the following categories to reduce PM emissions:
  1. Unpaved operation and maintenance roads:
    - a. Access restriction,
    - b. Apply and maintain aggregate cover,
    - c. Install supervisory control system to limit vehicle travel,
    - d. Limit activity,
    - e. Install signage to limit vehicle speed to 25 mph,
    - f. Post warning signs for unauthorized use at point of entry to roads,
    - g. Reduce vehicle speed,
    - h. Install and maintain a track-out control system,
    - i. Apply and maintain synthetic or natural particulate suppressant,
    - j. Apply and maintain water before, during, and after major and minor earth moving activities,
    - k. Apply and maintain water when grading roadways,
    - l. Use paved non-district or paved public roads to access structures, or
    - m. Install wind barriers.
  2. Canals:

- a. Dredge canals while muck or debris is still wet,
  - b. Dispose of muck or debris while still damp,
  - c. Weed management,
  - d. Biological control of aquatic weeds, or
  - e. Apply and maintain water before, during and after major and minor earth moving activities.
- 3. Unpaved utility access roads:
  - a. Access restriction,
  - b. Apply and maintain aggregate cover,
  - c. Limit activity,
  - d. Install signage to limit vehicle speed to 25 mph,
  - e. Post warning signs for unauthorized use at points of entry to roads,
  - f. Reduce vehicle speed,
  - g. Install and maintain a track-out control system,
  - h. Apply and maintain pavement,
  - i. Apply and maintain synthetic or natural particulate suppressant,
  - j. Apply and maintain water before, during and after major and minor earth moving activities,
  - k. Apply and maintain water when grading roadways,
  - l. Use paved non-district or paved public roads to access structures, or
  - m. Install wind barriers.
- B. From and after December 31, 2015, an irrigation district engaged in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the irrigation district. The Best Management Practice Program General Permit Record form shall include the following information:
  - 1. The name, business address, and the irrigation district representative responsible for the preparation and implementation of the best management practices;
  - 2. The signature of the irrigation district representative and the date the form was signed; and
  - 3. The best management practice selected for unpaved operation and utility roads, canals, and unpaved utility access roads.
- C. Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director, in conjunction with the Arizona Department of Agriculture, shall provide the irrigation district with a Best Management Practices Program 3-year Survey. The irrigation district shall complete the Survey with data from the preceding calendar year and submit the Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA then be submitted to the Department. The 3-year Survey shall include the following information:
  - 1. The name, business address, and phone number of the irrigation district representative responsible for the preparation and implementation of the best management practices;
  - 2. The signature of the irrigation district representative and the date the form was signed;
  - 3. The total miles of canals that the irrigation district controls;
  - 4. The total miles of unpaved operation and maintenance roads;
  - 5. The total miles of the unpaved utility access roads; and
  - 6. The best management practices selected for unpaved operation and utility roads, canals, and unpaved utility access roads.
- D. Records of any changes to those Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the irrigation district onsite and made available for review by the Director within two business days of notice to the irrigation district by the Department.
- E. An irrigation district may develop different practices not contained in either of the categories of subsection (A)(1), (A)(2), or (A)(3) that reduce PM and may submit such practices that are proven effective through in-district trials. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- F. An irrigation district shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- G. The Director shall not assess a fee to an irrigation district for coverage under the agricultural PM general permit.
- H. An irrigation district shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- I. The Director shall document noncompliance with this Section before issuing a compliance order.
- J. An irrigation district that is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

#### Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-613. Definitions for R18-2-613.01

- 1. "Access restriction" means restricting or eliminating public access to noncropland with signs or physical obstruction.
- 2. "Aggregate cover" means gravel, concrete, recycled road base, caliche, or other similar material applied to noncropland.
- 3. "Artificial wind barrier" means a physical barrier to the wind.
- 4. "Bed row spacing" means increasing or decreasing the size of a planting bed area to reduce the number of passes and soil disturbance by increasing plant density.
- 5. "Best management practice" means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM<sub>10</sub> emissions from a regulated agricultural activity.
- 6. "Chemical irrigation" means applying a fertilizer, pesticide, or other agricultural chemical to cropland through an irrigation system.
- 7. "Combining tractor operations" means performing two or more tillage, cultivation, planting, or harvesting operations with a single tractor or harvester pass.
- 8. "Commercial farm" means 10 or more contiguous acres of land used for agricultural purposes within the boundary of the Yuma PM<sub>10</sub> nonattainment area.
- 9. "Commercial farmer" means an individual, entity, or joint operation in general control of a commercial farm.
- 10. "Conservation irrigation" means the use of drips, sprinklers, or underground lines to conserve water, and to reduce the weed population, the need for tillage, and soil compaction.
- 11. "Conservation tillage" means types of tillage that reduce the number of passes and the amount of soil disturbance.
- 12. "Cover crop" means plants or a green manure crop grown for seasonal soil protection or soil improvement.

13. "Critical area planting" means using trees, shrubs, vines, grasses, or other vegetative cover on noncropland.
14. "Cropland" means land on a commercial farm that:
  - a. Is within the time-frame of final harvest to plant emergence;
  - b. Has been tilled in a prior year and is suitable for crop production, but is currently fallow; or
  - c. Is a turn-row.
15. "Cross-wind ridges" means soil ridges formed by a tillage operation.
16. "Cross-wind strip-cropping" means planting strips of alternating crops within the same field.
17. "Cross-wind vegetative strips" means herbaceous cover established in one or more strips within the same field.
18. "Equipment modification" means modifying agricultural equipment to prevent or reduce particulate matter generation from cropland.
19. "Limited activity during a high-wind event" means performing no tillage or soil preparation activity when the measured wind speed at six feet in height is more than 25 mph at the commercial farm site.
20. "Manure application" means applying animal waste or biosolids to a soil surface.
21. "Mulching" means applying plant residue or other material that is not produced onsite to a soil surface.
22. "Multi-year crop" means a crop, pasture, or orchard that is grown, or will be grown, on a continuous basis for more than one year.
23. "Night farming" means performing regulated agricultural activities at night when moisture levels are higher and winds are lighter.
24. "Noncropland" means any commercial farmland that:
  - a. Is no longer used for agricultural production;
  - b. Is no longer suitable for production of crops;
  - c. Is subject to a restrictive easement or contract that prohibits use for the production of crops; or
  - d. Includes a private farm road, ditch, ditch bank, equipment yard, storage yard, or well head.
25. "Permanent cover" means a perennial vegetative cover on cropland.
26. "Planting based on soil moisture" means applying water to soil before performing planting operations.
27. "Precision farming" means use of satellite navigation to calculate position in the field, to reduce overlap during field operations, and allow operations to occur during nighttime and inclement weather, thus generating less PM<sub>10</sub>.
28. "Reduce vehicle speed" means operating farm vehicles or farm equipment on unpaved farm roads at speeds not to exceed 20 mph.
29. "Reduced harvest activity" means reducing the number of harvest passes using a mechanized method to cut and remove crops from a field.
30. "Regulated agricultural activity" means a commercial farming practice that may produce PM<sub>10</sub> within the Yuma PM<sub>10</sub> nonattainment area.
31. "Residue management" means managing the amount and distribution of crop and other plant residues on a soil surface.
32. "Sequential cropping" means growing crops in a sequence that minimizes the amount of time bare soil is exposed on a field.
33. "Surface roughening" means manipulating a soil surface to produce or maintain clods.
34. "Synthetic particulate suppressant" means a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, and polyacrylamide, an emulsion of a petroleum product, and an enzyme product that is used to control particulate matter.
35. "Tillage and harvest" means any mechanical practice that physically disturbs cropland or crops on a commercial farm.
36. "Tillage based on soil moisture" means applying water to soil before or during tillage, or delaying tillage to coincide with precipitation.
37. "Timing of a tillage operation" means performing tillage operations at a time that will minimize the soil's susceptibility to generate PM<sub>10</sub>.
38. "Transgenic crops" means the use of genetically modified crops such as "herbicide ready" crops, which reduces the need for tillage or cultivation operations, and reduces soil disturbance.
39. "Track-out control system" means a device to remove mud or soil from a vehicle before the vehicle enters a paved public road.
40. "Tree, shrub, or windbreak planting" means providing a woody vegetative barrier to the wind.
41. "Watering" means applying water to noncropland.
42. "Yuma PM<sub>10</sub> nonattainment area" means the Yuma PM<sub>10</sub> planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.

#### Historical Note

New Section made by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Section R18-2-313 renumbered to R18-2-313.01; new Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-613.01.Yuma PM<sub>10</sub> Nonattainment Area; Agricultural Best Management Practices

- A. A commercial farmer shall comply with this Section by August 1, 2005.
- B. A commercial farmer who begins a regulated agricultural activity after August 1, 2005, shall comply with this Section within 60 days after beginning the regulated agricultural activity.
- C. A commercial farmer shall implement at least one of the best management practices from each of the following categories at each commercial farm:
  1. Tillage and harvest, subsection (E);
  2. Noncropland, subsection (F); and
  3. Cropland, subsection (G).
- D. A commercial farmer shall ensure that the implementation of each selected best management practice does not violate any other local, state, or federal law.
- E. A commercial farmer shall implement at least one of the following best management practices to reduce PM<sub>10</sub> emissions from tillage and harvest:
  1. Bed row spacing,
  2. Chemical irrigation,
  3. Combining tractor operations,
  4. Conservation irrigation,
  5. Conservation tillage,
  6. Equipment modification,
  7. Limited activity during a high-wind event,
  8. Multi-year crop,
  9. Night farming,
  10. Planting based on soil moisture,
  11. Precision farming,
  12. Reduced harvest activity,
  13. Tillage based on soil moisture,
  14. Timing of a tillage operation, or

15. Transgenic crops.
- F. A commercial farmer shall implement at least one of the following best management practices to reduce PM<sub>10</sub> emissions from noncropland:
  1. Access restriction;
  2. Aggregate cover;
  3. Artificial wind barrier;
  4. Critical area planting;
  5. Manure application;
  6. Reduce vehicle speed;
  7. Synthetic particulate suppressant;
  8. Track-out control system;
  9. Tree, shrub, or windbreak planting; or
  10. Watering.
- G. A commercial farmer shall implement at least one of the following best management practices to reduce PM<sub>10</sub> emissions from cropland:
  1. Artificial wind barrier;
  2. Cover crop;
  3. Cross-wind ridges;
  4. Cross-wind strip-cropping;
  5. Cross-wind vegetative strips;
  6. Manure application;
  7. Mulching;
  8. Multi-year crop;
  9. Permanent cover;
  10. Planting based on soil moisture;
  11. Precision farming;
  12. Residue management;
  13. Sequential cropping;
  14. Surface roughening; or
  15. Tree, shrub, or windbreak planting.
- H. A person may develop different practices not contained in subsections (E), (F), or (G) that reduce PM<sub>10</sub>. A person may submit practices that are proven effective through demonstration trials to the Director. The Director shall review the submitted practices.
- I. A commercial farmer shall maintain records demonstrating compliance with this Section. The commercial farmer shall provide the records to the Director within two business days of written notice to the commercial farmer. The records shall contain:
  1. The name of the commercial farmer,
  2. The mailing address or physical location of the commercial farm, and
  3. The best management practices selected for tillage and harvest, noncropland, and cropland by the commercial farmer, and the date each best management practice was implemented.

#### Historical Note

New Section R18-2-313.01 renumbered from Section R18-2-313 by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

#### R18-2-614. Evaluation of Nonpoint Source Emissions

Opacity of an emission from any nonpoint source shall not be greater than 40% measured according to the 40 CFR 60, Appendix A, Reference Method 9. An open fire permitted under R18-2-602 or regulated under Article 15 is exempt from this requirement.

#### Historical Note

Section R18-2-614 renumbered from R18-2-612; amended by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

### ARTICLE 7. EXISTING STATIONARY SOURCE PERFORMANCE STANDARDS

#### R18-2-701. Definitions

For purposes of this Article:

1. "Acid mist" means sulfuric acid mist as measured in the Arizona Testing Manual and 40 CFR 60, Appendix A.
2. "Architectural coating" means a coating used commercially or industrially for residential, commercial or industrial buildings and their appurtenances, structural steel, and other fabrications such as storage tanks, bridges, beams and girders.
3. "Asphalt concrete plant" means any facility used to manufacture asphalt concrete by heating and drying aggregate and mixing with asphalt cements. This is limited to facilities, including drum dryer plants that introduce asphalt into the dryer, which employ two or more of the following processes:
  - a. A dryer.
  - b. Systems for screening, handling, storing, and weighing hot aggregate.
  - c. Systems for loading, transferring, and storing mineral filler.
  - d. Systems for mixing asphalt concrete.
  - e. The loading, transferring, and storage systems associated with emission control systems.
4. "Black liquor" means waste liquor from the brown stock washer and spent cooking liquor which have been concentrated in the multiple-effect evaporator system.
5. "Calcine" means the solid materials produced by a lime plant.
6. "Coal" means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite by the ASTM Method D388-05 "Standard Classification of Coals by Rank" and coal refuse. Synthetic fuels derived from coal for the purpose of creating useful heat including but not limited to, coal derived gases (not meeting the definition of natural gas), solvent-refined coal, coal-oil mixtures, and coal-water mixtures, are considered "coal" for the purposes of this subpart.
7. "Coal refuse" means any by-product of coal mining, physical coal cleaning, and coal preparation operations (e.g., culm, gob, etc.) containing coal, matrix material, clay, and other organic and inorganic material with an ash content greater than 50 percent (by weight) and a heating value less than 13,900 kilojoules per kilogram (6,000 Btu per pound) on a dry basis.
8. "Concentrate" means enriched copper ore recovered from the froth flotation process.
9. "Concentrate dryer" means any facility in which a copper sulfide ore concentrate charge is heated in the presence of air to eliminate a portion of the moisture from the charge, provided less than 5% of the sulfur contained in the charge is eliminated in the facility.
10. "Concentrate roaster" means any facility in which a copper sulfide ore concentrate is heated in the presence of air to eliminate 5% or more of the sulfur contained in the charge.
11. "Condensate stripper system" means a column, and associated condensers, used to strip, with air or steam, TRS compounds from condensate streams from various processes within a kraft pulp mill.
12. "Control device" means the air pollution control equipment used to remove particulate matter or gases generated by a process source from the effluent gas stream.
13. "Converter" means any vessel to which copper matte is charged and oxidized to copper.

14. "Electric generating plant" means all electric generating units located at a stationary source.
15. "Electric generating unit" means a combustion unit of more than 25 megawatts electric that serves a generator that produces electricity for sale and that burns coal for more than 10.0 percent of the average annual heat input during any three consecutive calendar years or for more than 15.0 percent of the annual heat input during any one calendar year. A unit that cogenerates steam and electricity and supplies more than one-third of its potential electric output capacity and more than 25 megawatts electric output to any utility power distribution system for sale is considered an electric generating unit.
16. "Existing source" means any source which does not have an applicable new source performance standard under Article 9 of this Chapter.
17. "Facility" means an identifiable piece of stationary process equipment along with all associated air pollution equipment.
18. "Federal mercury standards" means the emissions limits, monitoring, testing, recordkeeping, reporting and notification requirements applicable or relating to emissions of mercury from electric generating units under 40 CFR Part 63, Subpart UUUUU.
19. "Fugitive dust" means fugitive emissions of particulate matter.
20. "High sulfur oil" means fuel oil containing 0.90% or more by weight of sulfur.
21. "Inlet mercury" means the average concentration of mercury in the coal burned at an electric generating unit, as determined by ASTM methods, EPA-approved methods or alternative methods approved by the Director.
22. "Lime kiln" means a unit used to calcinate lime rock or kraft pulp mill lime mud, which consists primarily of calcium carbonate, into quicklime, which is calcium oxide.
23. "Low sulfur oil" means fuel oil containing less than 0.90% by weight of sulfur.
24. "Matte" means a metallic sulfide made by smelting copper sulfide ore concentrate or the roasted product of copper sulfide ores.
25. "Mercury" means mercury or mercury compounds in either a gaseous or particulate form.
26. "Miscellaneous metal parts and products" for purposes of industrial coating include all of the following:
  - a. Large farm machinery, such as harvesting, fertilizing and planting machines, tractors, and combines;
  - b. Small farm machinery, such as lawn and garden tractors, lawn mowers, and rototillers;
  - c. Small appliances, such as fans, mixers, blenders, crock pots, dehumidifiers, and vacuum cleaners;
  - d. Commercial machinery, such as office equipment, computers and auxiliary equipment, typewriters, calculators, and vending machines;
  - e. Industrial machinery, such as pumps, compressors, conveyor components, fans, blowers, and transformers;
  - f. Fabricated metal products, such as metal-covered doors and frames;
  - g. Any other industrial category which coats metal parts or products under the Code in the "Standard Industrial Classification Manual, 1987" of Major Group 33 (primary metal industries), Major Group 34 (fabricated metal products), Major Group 35 (non-electric machinery), Major Group 36 (electrical machinery), Major Group 37 (transportation equipment), Major Group 38 (miscellaneous instruments), and Major Group 39 (miscellaneous manufacturing industries), except all of the following:
    - i. Automobiles and light-duty trucks;
    - ii. Metal cans;
    - iii. Flat metal sheets and strips in the form of rolls or coils;
    - iv. Magnet wire for use in electrical machinery;
    - v. Metal furniture;
    - vi. Large appliances;
    - vii. Exterior of airplanes;
    - viii. Automobile refinishing;
    - ix. Customized top coating of automobiles and trucks, if production is less than 35 vehicles per day;
    - x. Exterior of marine vessels.
27. "Multiple-effect evaporator system" means the multiple-effect evaporators and associated condenser and hotwell used to concentrate the spent cooking liquid that is separated from the pulp.
28. "Neutral sulfite semichemical pulping" means any operation in which pulp is produced from wood by cooking or digesting wood chips in a solution of sodium sulfite and sodium bicarbonate, followed by mechanical defibrating or grinding.
29. "Petroleum liquids" means petroleum, condensate, and any finished or intermediate products manufactured in a petroleum refinery but does not mean Number 2 through Number 6 fuel oils as specified in ASTM D396-90a (Specification for Fuel Oils), gas turbine fuel oils Numbers 2-GT through 4-GT as specified in ASTM D2880-90a (Specification for Gas Turbine Fuel Oils), or diesel fuel oils Numbers 2-D and 4-D as specified in ASTM D975-90 (Specification for Diesel Fuel Oils).
30. "Potential electric output capacity" means 33% of a unit's maximum design heat input, divided by 3,413 Btu per kilowatt-hour, divided by 1,000 kilowatt-hours per megawatt-hour, and multiplied by 8,760 hours per year.
31. "Process source" means the last operation or process which produces an air contaminant resulting from either:
  - a. The separation of the air contaminants from the process material, or
  - b. The conversion of constituents of the process materials into air contaminants which is not an air pollution abatement operation.
32. "Process weight" means the total weight of all materials introduced into a process source, including fuels, where these contribute to pollution generated by the process.
33. "Process weight rate" means a rate established pursuant to R18-2-702(E).
34. "Recovery furnace" means the unit, including the direct-contact evaporator for a conventional furnace, used for burning black liquor to recover chemicals consisting primarily of sodium carbonate and sodium sulfide.
35. "Reid vapor pressure" means the absolute vapor pressure of volatile crude oil and volatile non-viscous petroleum liquids, except liquified petroleum gases, as determined by ASTM D-323-90 (Test Method for Vapor Pressure of Petroleum Products) (Reid Method).
36. "Reveratory smelting furnace" means any vessel in which the smelting of copper sulfide ore concentrates or calcines is performed and in which the heat necessary for smelting is provided primarily by combustion of a fossil fuel.
37. "Rotary lime kiln" means a unit with an included rotary drum which is used to produce a lime product from limestone by calcination.

38. “Slag” means fused and vitrified matter separated during the reduction of a metal from its ore.
  39. “Smelt dissolving tank” means a vessel used for dissolving the smelt collected from the kraft mill recovery furnace.
  40. “Smelter feed” means all materials utilized in the operation of a copper smelter, including metals or concentrates, fuels and chemical reagents, calculated as the aggregate sulfur content of all fuels and other feed materials whose products of combustion and gaseous by-products are emitted to the atmosphere.
  41. “Smelting” means processing techniques for the smelting of a copper sulfide ore concentrate or calcine charge leading to the formation of separate layers of molten slag, molten copper, or copper matte.
  42. “Smelting furnace” means any vessel in which the smelting of copper sulfide ore concentrates or calcines is performed and in which the heat necessary for smelting is provided by an electric current, rapid oxidation of a portion of the sulfur contained in the concentrate as it passes through an oxidizing atmosphere, or the combustion of a fossil fuel.
  43. “Standard conditions” means a temperature of 293K (68°F or 20°C) and a pressure of 101.3 kilopascals (29.92 in. Hg or 1013.25 mb).
  44. “Supplementary control system” (SCS) means a system by which sulfur dioxide emissions are curtailed during periods when meteorological conditions conducive to ground-level concentrations in excess of ambient air quality standards for sulfur dioxide either exist or are anticipated.
  45. “Vapor pressure” means the pressure exerted by the gaseous form of a substance in equilibrium with its liquid or solid form.
3. After April 23, 2006, greater than 20% in any area that is attainment or unclassifiable for each particulate matter standard except as provided in subsections (D) and (E).
  - C. If the presence of uncombined water is the only reason for an exceedance of any visible emissions requirement in this Article, the exceedance shall not constitute a violation of the applicable opacity limit.
  - D. A person owning or operating a source may petition the Director for an alternative applicable opacity limit. The petition shall be submitted to ADEQ by May 15, 2004.
    1. The petition shall contain:
      - a. Documentation that the affected facility and any associated air pollution control equipment are incapable of being adjusted or operated to meet the applicable opacity standard. This includes:
        - i. Relevant information on the process operating conditions and the control devices operating conditions during the opacity or stack tests;
        - ii. A detailed statement or report demonstrating that the source investigated all practicable means of reducing opacity and utilized control technology that is reasonably available considering technical and economic feasibility; and
        - iii. An explanation why the source cannot meet the present opacity limit although it is in compliance with the applicable particulate mass emission rule.
      - b. If there is an opacity monitor, any certification and audit reports required by all applicable subparts in 40 CFR 60 and in Appendix B, Performance Specification 1.
      - c. A verification by a responsible official of the source of the truth, accuracy, and completeness of the petition. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
    2. If the unit for which the alternative opacity standard is being applied is subject to a stack test, the petition shall also include:
      - a. Documentation that the source conducted concurrent EPA Reference Method stack testing and visible emissions readings or is utilizing a continuous opacity monitor. The particulate mass emission test results shall clearly demonstrate compliance with the applicable particulate mass emission limitation by being at least 10% below that limit. For multiple units that are normally operated together and whose emissions vent through a single stack, the source shall conduct simultaneous particulate testing of each unit. Each control device shall be in good operating condition and operated consistent with good practices for minimizing emissions.
      - b. Evidence that the source conducted the stack tests according to R18-2-312, and that they were witnessed by the Director or the Director’s agent or representative.
      - c. Evidence that the affected facility and any associated air pollution control equipment were operated and maintained to the maximum extent practicable to minimize the opacity of emissions during the stack tests.
    3. If the source for which the alternative opacity standard is being applied is located in a nonattainment area, the petitioner shall include all the information listed in subsections (D)(1) and (D)(2), and in addition:

#### Historical Note

Former Section R18-2-701 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-701 renumbered from R18-2-501 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

#### R18-2-702. General Provisions

- A. The provisions of this Article shall only apply to a source that is all of the following:
  1. An existing source, as defined in R18-2-101;
  2. A point source. For the purposes of this Section, “point source” means a source of air contaminants that has an identifiable plume or emissions point; and
  3. A stationary source, as defined in R18-2-101.
- B. Except as otherwise provided in this Chapter relating to specific types of sources, the opacity of any plume or effluent, from a source described in subsection (A), as determined by Reference Method 9 in 40 CFR 60, Appendix A, shall not be:
  1. Greater than 20% in an area that is nonattainment or maintenance for any particulate matter standard, unless an alternative opacity limit is approved by the Director and the Administrator as provided in subsections (D) and (E), after February 2, 2004;
  2. Greater than 40% in an area that is attainment or unclassifiable for each particulate matter standard; and

- a. In subsection (D)(1)(a)(ii), the detailed statement or report shall demonstrate that the alternative opacity limit fulfills the Clean Air Act requirement for reasonably available control technology; and
  - b. In subsection (D)(2)(b), the stack tests shall be conducted with an opportunity for the Administrator or the Administrator's agent or representative to be present.
- E.** If the Director receives a petition under subsection (D) the Director shall approve or deny the petition as provided below by October 15, 2004:
1. If the petition is approved under subsection (D)(1) or (D)(2), the Director shall include an alternative opacity limit in a proposed significant permit revision for the source under R18-2-320 and R18-2-330. The proposed alternative opacity limit shall be set at a value that has been demonstrated during, and not extrapolated from, testing, except that an alternative opacity limit under this Section shall not be greater than 40%. For multiple units that are normally operated together and whose emissions vent through a single stack, any new alternative opacity limit shall reflect the opacity level at the common stack exit, and not individual in-duct opacity levels.
  2. If the petition is approved under subsection (D)(3), the Director shall include an alternative opacity limit in a proposed revision to the applicable implementation plan, and submit the proposed revision to EPA for review and approval. The proposed alternative opacity limit shall be set at a value that has been demonstrated during, and not extrapolated from, testing, except that the alternative opacity limit shall not be greater than 40%.
  3. If the petition is denied, the source shall either comply with the 20% opacity limit or apply for a significant permit revision to incorporate a compliance schedule under R18-2-309(5)(c)(iii) by April 23, 2006.
  4. A source does not have to petition for an alternative opacity limit under subsection (D) to enter into a revised compliance schedule under R18-2-309(5)(c).
- F.** The Director, Administrator, source owner or operator, inspector or other interested party shall determine the process weight rate, as used in this Article, as follows:
1. For continuous or long run, steady-state process sources, the process weight rate is the total process weight for the entire period of continuous operation, or for a typical portion of that period, divided by the number of hours of the period, or portion of hours of that period.
  2. For cyclical or batch process sources, the process weight rate is the total process weight for a period which covers a complete operation or an integral number of cycles, divided by the hours of actual process operation during the period.
- Historical Note**
- Former Section R18-2-702 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-702 renumbered from R18-2-502 and amended effective November 15, 1993 (Supp. 93-4). Amended by exempt rulemaking at 9 A.A.R. 5550, effective February 3, 2004 (Supp. 03-4).
- R18-2-703. Standards of Performance for Existing Fossil-fuel Fired Steam Generators and General Fuel-burning Equipment**
- A.** This Section applies to the following:
1. Installations in which fuel is burned for the primary purpose of producing power, steam, hot water, hot air or other liquids, gases or solids and in the course of doing so the products of combustion do not come into direct contact with process materials. When any products or by-products of a manufacturing process are burned for the same purpose or in conjunction with any fuel, the same maximum emission limitation shall apply, except for wood waste burners as regulated under R18-2-704.
  2. All fossil-fuel fired steam generating units or general fuel burning equipment which are greater than or equal to 73 megawatts capacity.
- B.** For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. The heat content of solid fuel shall be determined in accordance with R18-2-311. Compliance tests shall be conducted during operation at the nominal rated capacity of each unit.
- C.** No person shall cause, allow or permit the emission of particulate matter in excess of the amounts calculated by one of the following equations:
1. For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 1.02Q^{0.769}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 Q = the heat input in million Btu per hour.
  2. For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:  

$$E = 17.0Q^{0.432}$$
 where "E" and "Q" have the same meaning as in subsection (C)(1).
- D.** Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- E.** When low sulfur oil is fired:
1. Existing fuel-burning equipment or steam-power generating installations which commenced construction or a major modification prior to May 30, 1972, shall not emit more than 1.0 pounds sulfur dioxide maximum three-hour average, per million Btu (430 nanograms per joule) heat input.
  2. Existing fuel-burning equipment or steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit more than 0.80 pounds of sulfur dioxide maximum three-hour average per million Btu (340 nanograms per joule) heat input.
- F.** When high sulfur oil is fired, all existing steam-power generating and general fuel-burning installations which are subject to the provisions of this Section shall not emit more than 2.2 pounds of sulfur dioxide maximum three-hour average per million Btu (946 nanograms per joule) heat input.
- G.** When solid fuel is fired:
1. Existing general fuel-burning equipment and steam-power generating installations which commenced construction or a major modification prior to May 30, 1972, shall not emit more than 1.0 pounds of sulfur dioxide maximum three-hour average, per million Btu (430 nanograms per joule) heat input.
  2. Existing general fuel-burning equipment and steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit more than 0.80 pounds of sulfur dioxide, maximum three-hour average, per million Btu (340 nanograms per joule) heat input.
- H.** Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permit-

tee, unless the applicant demonstrates to the satisfaction of the Director that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.

1. The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
  2. In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
  3. When the conditions justifying the use of high sulfur oil no longer exists, the permit shall be modified accordingly.
  4. Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.
- I.** Existing steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit nitrogen oxides in excess of the following amounts:
1. 0.20 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when gaseous fossil fuel is fired.
  2. 0.30 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when liquid fossil fuel is fired.
  3. 0.70 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when solid fossil fuel is fired.
- J.** Emission and fuel monitoring systems, where deemed necessary by the Director for sources subject to the provisions of this Section shall, conform to the requirements of R18-2-313.
- K.** The applicable reference methods given in the Appendices to 40 CFR 60 shall be used to determine compliance with the standards as prescribed in subsections (C) through (G) and (I). All tests shall be run at the heat input calculated under subsection (B).

#### Historical Note

Former Section R18-2-703 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-703 renumbered from R18-2-503 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-704. Standards of Performance for Incinerators

- A.** No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator, smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 20% opacity except during the times specified in subsection (D).
- B.** No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any incinerator, in excess of the following limits:
1. For multiple chamber incinerators, controlled atmosphere incinerators, fume incinerators, afterburners or other unspecified types of incinerators, emissions shall not exceed 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
  2. For wood waste burners other than air curtain destructors, emissions discharged from the stack or burner top opening shall not exceed 0.2 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.

- C.** Air curtain destructors shall not be used within 500 feet of the nearest dwelling.
- D.** Incinerators shall be exempt from the opacity and emission requirements described in subsections (A) and (B) as follows:
1. For multiple chamber incinerators, controlled atmosphere incinerators, fume incinerators, afterburners or other unspecified types of incinerators, such exemption shall be for not more than 30 seconds in any 60-minute period.
  2. Wood waste burners shall be exempt both:
    - a. For a period once each day for the purpose of building a new fire but not to exceed 60 minutes, and
    - b. For an upset of operations not to exceed three minutes in any 60-minute period.
- E.** The owner or operator of any incinerator subject to the provisions of this Section shall record the daily charging rates and hours of operation.
- F.** The test methods and procedures required by this Section are as follows:
1. The reference methods in 40 CFR 60, Appendix A, shall be used to determine compliance with the standards prescribed in subsection (B) as follows:
    - a. Method 5 for the concentration of particulate matter and the associated moisture content;
    - b. Method 1 for sample and velocity traverses;
    - c. Method 2 for velocity and volumetric flow rate;
    - d. Method 3 for gas analysis and calculation of excess air, using the integrated sampling technique.
  2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 0.85 dscm (30.0 dscf) except that smaller sampling times or sample volumes, when necessitated by process variables or other factors, may be approved by the Director.

#### Historical Note

Former Section R18-2-704 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-704 renumbered from R18-2-504 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

#### R18-2-705. Standards of Performance for Existing Portland Cement Plants

- A.** The provisions of this Section are applicable to the following affected facilities in portland cement plants: kiln, clinker cooler, raw mill system, finish mill system, raw mill dryer, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems.
- B.** No person shall cause, allow or permit the discharge of particulate matter from any identifiable process source within any existing cement plant subject to the provisions of this Section which exceeds the amounts calculated by one of the following equations:
1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:
 
$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
  2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the max-

imum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where “E” and “P” are defined as indicated in subsection (B)(1).

- C. No process source within any portland cement plant shall exceed 20% opacity.
- D. No person shall cause, allow or permit discharge into the atmosphere of an amount in excess of 6 pounds of sulfur oxides, calculated as sulfur dioxide, per ton cement kiln feed from cement plants subject to the provisions of this Section.
- E. The owner or operator of any portland cement plant subject to the provisions of this Section shall record the daily production rates and the kiln feed rates.
- F. The test methods and procedures required by this Section are as follows:
  - 1. The reference methods in 40 CFR 60, Appendix A, except as provided for in R18-2-312 shall be used to determine compliance with the standards prescribed in subsection (B) as follows:
    - a. Method 5 for the concentration of particulate matter and the associated moisture content;
    - b. Method 1 for sample and velocity traverses;
    - c. Method 2 for velocity and volumetric flow rate;
    - d. Method 3 for gas analysis.
  - 2. For Method 5, the minimum sampling time and minimum sample volume for each run except when process variables or other factors justifying otherwise to the satisfaction of the Director, shall be as follows:
    - a. 60 minutes and 0.85 dscm (30.0 dscf) for the kiln,
    - b. 60 minutes and 1.15 dscm (40.6 dscf) for the clinker cooler.
  - 3. Total kiln feed rate, except fuels, expressed in metric tons per hour on a dry basis, shall be both:
    - a. Determined during each testing period by suitable methods; and
    - b. Confirmed by a material balance over the production system.
  - 4. For each run, particulate matter emissions, expressed in g/metric ton of kiln feed, shall be determined by dividing the emission rate in g/hr by the kiln feed rate. The emission rate shall be determined by the equation,  $g/hr = Q_s \times c$ , where  $Q_s$  = volumetric flow rate of the total effluent in dscm/hr as determined in accordance with subsection (F)(1)(c), and  $c$  = particulate concentration in g/dscm as determined in accordance with subsection (F)(1)(a).

#### Historical Note

Former Section R18-2-705 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-705 renumbered from R18-2-505 effective November 15, 1993 (Supp. 93-4).

#### R18-2-706. Standards of Performance for Existing Nitric Acid Plants

- A. No person shall cause, allow or permit discharge from any nitric acid plant producing weak nitric acid, which is either:
  - 1. 30 to 70% in strength by either the increased pressure or atmospheric pressure process, or
  - 2. More than 1.5 kg of total oxides of nitrogen per metric ton (3.0 lbs/ton) of acid produced expressed as nitrogen dioxide.
- B. The opacity of any plume subject to the provisions of this Section shall not exceed 10%.
- C. A continuous monitoring system for the measurement of nitrogen oxides shall be installed, calibrated, maintained and oper-

ated by the owner or operator, in accordance with Section R18-2-313.

- D. The test methods and procedures required by this Section are as follows:
  - 1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with the standard prescribed in subsection (A) as follows:
    - a. Method 7 for the concentration of  $NO_x$ ;
    - b. Method 1 for sample and velocity traverses;
    - c. Method 2 for velocity and volumetric flow rate;
    - d. Method 3 for gas analysis.
  - 2. For Method 7, the sample site shall be selected according to Method 1 and the sampling point shall be the centroid of the stack or duct or at a point no closer to the walls than 1 m (3.28 ft.). Each run shall consist of at least four grab samples taken at approximately 15-minute intervals. The arithmetic mean of the samples shall constitute the run value. A velocity traverse shall be performed once per run.
  - 3. Acid production rate, expressed in metric tons per hour of 100% nitric acid, shall be both:
    - a. Determined during each testing period by suitable methods, and
    - b. Confirmed by a material balance over the production system.
  - 4. For each run, nitrogen oxides, expressed in g/metric ton of 100% nitric acid, shall be determined by dividing the emission rate in g/hr by the acid production rate. The emission rate shall be determined by the equation:
 
$$g/hr = Q_s \times c$$
 where  $Q_s$  = volumetric flow rate of the effluent in dscm/hr, as determined in accordance with subsection (D)(1)(c), and  $c$  =  $NO_x$  concentration in g/dscm, as determined in accordance with subsection (D)(1)(a).

#### Historical Note

Former Section R18-2-706 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-706 renumbered from R18-2-506 effective November 15, 1993 (Supp. 93-4).

#### R18-2-707. Standards of Performance for Existing Sulfuric Acid Plants

- A. Facilities that produce sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfide and mercaptans or acid sludge shall not discharge into the atmosphere:
  - 1. Greater than 2 kg of sulfur dioxide per metric ton (4 lbs/ton) of sulfuric acid produced (calculated as 100%  $H_2SO_4$ ), or
  - 2. Greater than 0.075 kg of sulfuric acid mist per metric ton (0.15 lbs/ton) or sulfuric acid produced (calculated as 100%  $H_2SO_4$ ).
- B. This Section shall not apply to metallurgical plants or other facilities where conversion to sulfuric acid is utilized as a means of controlling emissions to the atmosphere of sulfur dioxide or other sulfur compounds.
- C. A continuous monitoring system for the measurement of sulfur dioxide shall be installed, calibrated, maintained and operated by the owner or operator, in accordance with R18-2-313.
- D. The test methods and procedures required by this Section are as follows:
  - 1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with standards prescribed in subsection (A) as follows:
    - a. Method 8 for concentration of  $SO_2$  and acid mist;

- b. Method 1 for sample and velocity traverses;
  - c. Method 2 for velocity and volumetric flow rate;
  - d. Method 3 for gas analysis.
2. The moisture content can be considered to be zero. For Method 8 the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 1.15 dscm (40.6 dscf) except that smaller sampling times or sample volumes, when necessitated by process variables or other factors, may be approved by the Director.
  3. Acid production rate, expressed in metric tons per hour of 100% H<sub>2</sub>SO<sub>4</sub>, shall be both:
    - a. Determined during each testing period by suitable methods, and
    - b. Confirmed by a material balance over the production system.
  4. Acid mist and sulfur dioxide emissions, expressed in g/metric ton of 100% H<sub>2</sub>SO<sub>4</sub>, shall be determined by dividing the emission rate in g/hr by the acid production rate. The emission rate shall be determined by the equation, g/hr-Q<sub>s</sub> x c, where Q<sub>s</sub> = volumetric flow rate of the effluent in dscm/hr as determined in accordance with subsection (D)(1)(c), and c = acid mist and SO<sub>2</sub> concentrations in g/dscm as determined in accordance with subsection (D)(1)(a).

#### Historical Note

Former Section R18-2-707 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-707 renumbered from R18-2-507 effective November 15, 1993 (Supp. 93-4).

#### R18-2-708. Standards of Performance for Existing Asphalt Concrete Plants

- A. Fixed asphalt concrete plants and portable asphalt concrete plants shall meet the standards set forth in this Section.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any existing asphalt concrete plant in total quantities in excess of the amounts calculated by one of the following equations:
  1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emission rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
  2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:  

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (B)(1).
- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- E. Liquid fuel containing greater than 0.9% sulfur by weight shall not be utilized for asphalt concrete plants subject to this Section.
- F. Solid fuel containing greater than 0.5% sulfur by weight shall not be utilized for asphalt concrete plants subject to this Section.

#### G. The test methods and procedures required under this Section are:

1. The referenced methods given in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in subsection (B).
  - a. Method 5 for the concentration of particulate matter and the associated moisture content,
  - b. Method 1 for sample and velocity traverses,
  - c. Method 2 for velocity and volumetric flow rate,
  - d. Method 3 for gas analysis.
2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.9 dscm/hr (0.53 dscf/min) except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.
3. Percent sulfur in liquid fuel shall be determined by ASTM method D-129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method), and the percent sulfur in solid fuel shall be determined by ASTM method D-3177-89 (Test Method for Total Sulfur in the Analysis Sample of Coal and Coke).

#### Historical Note

Former Section R18-2-708 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-708 renumbered from R18-2-508 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-709. Expired

#### Historical Note

Former Section R18-2-709 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-709 renumbered from R18-2-509 and amended effective November 15, 1993 (Supp. 93-4). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

#### R18-2-710. Standards of Performance for Existing Storage Vessels for Petroleum Liquids

- A. No person shall place, store or hold in any reservoir, stationary tank or other container having a capacity of 40,000 (151,400 liters) or more gallons any petroleum liquid having a vapor pressure of 1.5 pounds per square inch absolute or greater under actual storage conditions, unless such tank, reservoir or other container is a pressure tank maintaining working pressure sufficient at all times to prevent hydrocarbon vapor or gas loss to the atmosphere, or is equipped with one of the following vapor loss control devices, properly installed, in good working order and in operation:
  1. A floating roof consisting of a pontoon type double-deck type roof resting on the surface of the liquid contents and equipped with a closure seal to close the space between the roof eave and tank wall and a vapor balloon or vapor dome, designed in accordance with accepted standards of the petroleum industry. The control equipment shall not be used if the petroleum liquid has a vapor pressure of 12 pounds per square inch absolute or greater under actual storage conditions.
    - a. All tank gauging and sampling devices shall be gas-tight except when gauging or sampling is taking place.
    - b. There shall be no visible holes, tears, or other openings in the seal or any seal fabric. Where applicable, all openings except drains shall be equipped with a cover, seal, or lid. The cover, seal, or lid shall be in a

closed position at all times, except when the device is in actual use.

- c. Automatic bleeder vents shall be closed at all times, except when the roof is floated off or landed on the roof leg supports.
  - d. Rim vents, if provided, shall be set to open when the roof is being floated off the roof leg supports, or at the manufacturer's recommended setting.
2. Other equipment proven to be of equal efficiency for preventing discharge of hydrocarbon gases and vapors to the atmosphere.
- B.** Any other petroleum liquid storage tank shall be equipped with a submerged filling device, or acceptable equivalent, for the control of hydrocarbon emissions.
- C.** All facilities for dock loading of petroleum products, having a vapor pressure of 1.5 pounds per square inch absolute or greater at loading pressure, shall provide for submerged filling or acceptable equivalent for control of hydrocarbon emissions.
- D.** All pumps and compressors which handle volatile organic compounds shall be equipped with mechanical seals or other equipment of equal efficiency to prevent the release of organic contaminants into the atmosphere.
- E.** The monitoring of operations required by this Section is as follows:
1. The owner or operator of any petroleum liquid storage vessel to which this Section applies shall for each such storage vessel maintain a file of each type of petroleum liquid stored, of the typical Reid vapor pressure of each type of petroleum liquid stored and of dates of storage. Dates on which the storage vessel is empty shall be shown.
  2. The owner or operator of any petroleum liquid storage vessel to which this Section applies shall for such storage vessel determine and record the average monthly storage temperature and true vapor pressure of the petroleum liquid stored at such temperature if either:
    - a. The petroleum liquid has a true vapor pressure, as stored, greater than 26 mm Hg (0.5 psia) but less than 78 mm Hg (1.5 psia) and is stored in a storage vessel other than one equipped with a floating roof, a vapor recovery system or their equivalents; or
    - b. The petroleum liquid has a true vapor pressure, as stored, greater than 470 mm Hg (9.1 psia) and is stored in a storage vessel other than one equipped with a vapor recovery system or its equivalent.
  3. The average monthly storage temperature shall be an arithmetic average calculated for each calendar month, or portion thereof, if storage is for less than a month, from bulk liquid storage temperatures determined at least once every seven days.
  4. The true vapor pressure shall be determined by the procedures in American Petroleum Institute Bulletin 2517, amended as of February 1980 (and no future editions), which is incorporated herein by reference and on file with the Office of the Secretary of State. This procedure is dependent upon determination of the storage temperature and the Reid vapor pressure, which requires sampling of the petroleum liquids in the storage vessels. Unless the Director requires in specific cases that the stored petroleum liquid be sampled, the true vapor pressure may be determined by using the average monthly storage temperature and the typical Reid vapor pressure. For those liquids for which certified specifications limiting the Reid vapor pressure exist, the Reid vapor pressure may be used. For other liquids, supporting analytical data must be

made available upon request to the Director when typical Reid vapor pressure is used.

#### R18-2-714. Standards of Performance for Existing Sewage Treatment Plants

- A.** No person shall cause, allow or permit to be emitted into the atmosphere, from any municipal sewage treatment plant sludge incinerator:
1. Smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 20% opacity for more than 30 seconds in any 60-minute period.
  2. Particulate matter in concentrations in excess of 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
- B.** The owner or operator of any sludge incinerator subject to the provisions of this Section shall monitor operations by doing all of the following:
1. Install, calibrate, maintain and operate a flow measuring device which can be used to determine either the mass or volume of sludge charged to the incinerator. The flow measuring device shall have an accuracy of  $\pm 5\%$  over its operating range.
  2. Provide access to the sludge charged so that a well-mixed representative grab sample of the sludge can be obtained.
  3. Install, calibrate, maintain and operate a weighing device for determining the mass of any municipal solid waste charged to the incinerator when sewage sludge and municipal solid wastes are incinerated together. The weighing device shall have an accuracy of  $\pm 5\%$  over its operating range.
- C.** The test methods and procedures required by this Section are as follows:
1. The reference methods set forth in 40 CFR 60, Appendix A shall be used to determine compliance with the standards prescribed in subsection (A) as follows:

- a. Method 5 for concentration of particulate matter and associated moisture content;
  - b. Method 1 for sample and velocity traverses;
  - c. Method 2 for volumetric flow rate; and
  - d. Method 3 for gas analysis.
2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.015 dscm/min (0.53 dscf/min), except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.

**Historical Note**

Section R18-2-714 renumbered from R18-2-514 effective November 15, 1993 (Supp. 93-4).

**R18-2-715. Standards of Performance for Existing Primary Copper Smelters; Site-specific Requirements**

- A. No owner or operator of a primary copper smelter shall cause, allow or permit the discharge of particulate matter into the atmosphere from any process in total quantities in excess of the amount calculated by one of the following equations:
  1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 4.10P^{0.67}$$
 where  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
  2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:  

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (A)(1).
- B. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- C. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter for that process.
- D. The opacity of emissions subject to the provisions of this Section shall not exceed 20%.
- E. The reference methods set forth in the Arizona Testing Manual and 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in this Section as follows:
  1. Method A1 or Reference Method 5 for concentration of particulate matter and associated moisture content,
  2. Reference Method 1 for sample and velocity traverses,
  3. Reference Method 2 for volumetric flow rate,
  4. Reference Method 3 for gas analysis.
- F. Except as provided in a consent decree or a delayed compliance order, the owner or operator of any primary copper smelter shall not discharge or cause the discharge of sulfur dioxide into the atmosphere from any stack required to be monitored by R18-2-715.01(K) in excess of the following:
  1. For the copper smelter located near Hayden, Arizona at latitude 33°0'29"N and longitude 110°47'17" W:
    - a. Annual average emissions, as calculated under R18-2-715.01(C), shall not exceed 6,882 pounds per hour.
    - b. The number of three-hour average emissions, as calculated under R18-2-715.01(C), shall not exceed n cumulative occurrences in excess of E, the emission

level, shown in the following table in any compliance period as defined in R18-2-715.01(J):

n, Cumulative Occurrences	E, (lb/hr)
0	24,641
1	22,971
2	21,705

- G. Except as provided in a consent decree or a delayed compliance order, for the copper smelter located near Hayden, Arizona at latitude 33°0'29"N and longitude 110°47'17"W, annual average fugitive emissions calculated under R18-2-715.01(T) shall not exceed 295 pounds per hour.
- H. In addition to the limits in subsection (F)(3), except as provided in a consent decree or a delayed compliance order, the owner or operator of the copper smelter located near Miami, Arizona at latitude 33°24'50"N and longitude 110°51'25"W shall not discharge or cause the discharge of sulfur dioxide into the atmosphere from combined stack and fugitive emissions units in excess of the 2420 pounds per hour annual average calculated under R18-2-715.01(U).

#### Historical Note

Section R18-2-715 renumbered from R18-2-515 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 575, effective January 15, 2002 (Supp. 02-1). Amended by final rulemaking at 8 A.A.R. 3365, effective July 18, 2002 (Supp. 02-3). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-715.01. Standards of Performance for Existing Primary Copper Smelters; Compliance and Monitoring

- A. The cumulative occurrence and emission limits in R18-2-715(F) apply to the total of sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not uncaptured fugitive emissions or emissions due solely to the use of fuel for space heating or steam generation.
- B. The owner or operator shall include periods of malfunction, startup, shutdown or other upset conditions when determining compliance with the cumulative occurrence or annual average emission limits in R18-2-715(F), (G), or (H).
- C. The owner or operator shall determine compliance with the cumulative occurrence and emission limits contained in R18-2-715(F) as follows:
- The owner or operator shall calculate annual average emissions at the end of each day by averaging the emissions for all hours measured during the compliance period defined in subsection (J) ending on that day. An annual emissions average in excess of the allowable annual average emission limit is a violation of R18-2-715(F) if either:
    - The annual average is greater than the annual average computed for the preceding day; or
    - The annual averages computed for the five preceding days all exceed the allowable annual average emission limit.
  - The owner or operator shall calculate a three-hour emissions average at the end of each clock hour by averaging the hourly emissions for the preceding three consecutive hours provided each hour was measured according to the requirements in subsection (K).
- D. For purposes of this Section, the compliance date, unless otherwise provided in a consent decree or a delayed compliance order, shall be January 14, 1986, except that:
- The compliance date for the cumulative occurrence and emissions limits in R18-2-715(F)(1) and R18-2-715(G)(1) is January 15, 2002, and
  - The compliance date for the cumulative occurrence and emissions limits in R18-2-715(F)(2), (F)(3), (G)(2), and (H) is the effective date of this rule.
- E. For purposes of subsection (C), a three-hour emissions average in excess of an emission level E violates the associated cumulative occurrence limit n listed in R18-2-715(F) if:
- The number of all three-hour emissions averages calculated during the compliance period in excess of that emission level exceeds the cumulative occurrence limit associated with the emission level; and
  - The average is calculated during the last operating day of the compliance period being reported.
- F. A three-hour emissions average only violates the cumulative occurrence limit n of an emission level E on the day containing the last hour in the average.
- G. Multiple violations of the same cumulative occurrence limit on the same day and violations of different cumulative occurrence limits on the same day constitute a single violation of R18-2-715(F).
- H. The violation of any cumulative occurrence limit and an annual average emission limit on the same day constitutes only a single violation of the requirements of R18-2-715(F).
- I. Multiple violations of a cumulative occurrence limit by different three-hour emissions averages containing any common hour constitutes a single violation of R18-2-715(F).
- J. To determine compliance with subsections (C) through (I), the compliance period consists of the 365 calendar days immediately preceding the end of each day of the month being reported unless that period includes less than 300 operating days, in which case the number of days preceding the last day of the compliance period shall be increased until the compliance period contains 300 operating days. For purposes of this Section, an operating day is any day on which sulfur-containing feed is introduced into the smelting process.
- K. To determine compliance with R18-2-715(F) or (H), the owner or operator of any smelter subject to R18-2-715(F) or (H) shall install, calibrate, maintain, and operate a measurement system for continuously monitoring sulfur dioxide concentrations and stack gas volumetric flow rates in each stack that could emit five percent or more of the allowable annual average sulfur dioxide emissions from the smelter.
- The owner or operator shall continuously monitor sulfur dioxide concentrations and stack gas volumetric flow rates in the outlet of each piece of sulfur dioxide control equipment.
  - The owner or operator shall continuously monitor captured fugitive emissions for sulfur dioxide concentrations and stack gas volumetric flow rates and include these emissions as part of total plant emissions when determining compliance with the cumulative occurrence and emission limits in R18-2-715(F) and (H).
  - If the owner or operator demonstrates to the Director that measurement of stack gas volumetric flow in the outlet of any particular piece of sulfur dioxide control equipment would yield inaccurate results once operational or would be technologically infeasible, then the Director may allow measurement of the flow rate at an alternative sampling point.

4. For purposes of this subsection, continuous monitoring means the taking and recording of at least one measurement of sulfur dioxide concentration and stack gas flow rate reading from the effluent of each affected stack, outlet, or other approved measurement location in each 15-minute period. Fifteen-minute periods start at the beginning of each clock hour, and run consecutively. An hour of smelter emissions is considered continuously monitored if the emissions from all monitored stacks, outlets, or other approved measurement locations are measured for at least 45 minutes of any hour according to the requirements of this subsection.
5. The owner or operator shall demonstrate that the continuous monitoring system meets all of the following requirements:
  - a. The sulfur dioxide continuous emission monitoring system installed and operated under this Section meets the requirements of 40 CFR 60, Appendix B, Performance Specification 6.
  - b. The sulfur dioxide continuous emission monitoring system installed and operated under this Section meets the quality assurance requirements of 40 CFR 60, Appendix F.
  - c. The owner or operator shall notify the Director in writing at least 30 days in advance of the start of relative accuracy test audit (RATA) procedures performed on the continuous monitoring system.
  - d. The Director shall approve the location of all sampling points for monitoring sulfur dioxide concentrations and stack gas volumetric flow rates in writing before installation and operation of measurement instruments.
  - e. The measurement system installed and used under this subsection is subject to the manufacturer's recommended zero adjustment and calibration procedures at least once per 24-hour operating period unless the manufacturer specifies or recommends calibration at shorter intervals, in which case specifications or recommendations shall be followed. The owner or operator shall make available a record of these procedures that clearly shows instrument readings before and after zero adjustment and calibration.
- L. The owner or operator of a smelter subject to this Section shall measure at least 95 percent of the hours during which emissions occurred in any month.
- M. Failure of the owner or operator of a smelter subject to this Section to measure any 12 consecutive hours of emissions according to the requirements of subsection (K) or (S) is a violation of this Section.
- N. The owner or operator of any smelter subject to this Section shall maintain on hand and ready for immediate installation sufficient spare parts or duplicate systems for the continuous monitoring equipment required by this Section to allow for the replacement within six hours of any monitoring equipment part that fails or malfunctions during operation.
- O. To determine total overall emissions, the owner or operator of any smelter subject to this Section shall perform material balances for sulfur according to the procedures prescribed by Appendix 8 of this Chapter.
- P. The owner or operator of any smelter subject to this Section shall maintain a record of all average hourly emissions measurements and all calculated average monthly emissions required by this Section. The record of the emissions shall be retained for at least five years following the date of measurement or calculation. The owner or operator shall record the measurement or calculation results as pounds per hour of sulfur dioxide. The owner or operator shall summarize the following data monthly and submit the summary to the Director within 20 days after the end of each month:
  1. For all periods described in subsection (C) and (R), the annual average emissions as calculated at the end of each day of the month;
  2. The total number of hourly periods during the month in which measurements were not taken and the reason for loss of measurement for each period;
  3. The number of three-hour emissions averages that exceeded each of the applicable emissions levels listed in R18-2-715(F) and (G)(1)(b) for the compliance periods ending on each day of the month being reported;
  4. The date on which a cumulative occurrence limit listed in R18-2-715(F) or (G)(1)(b) was exceeded if the exceedance occurred during the month being reported; and
  5. For all periods described in subsection (T) and (U), the annual average emissions as calculated at the end of the last day of each month.
- Q. An owner or operator shall install instrumentation to monitor each point in the smelter facility where a means exists to bypass the sulfur removal equipment, to detect and record all periods that the bypass is in operation. An owner or operator of a copper smelter shall report to the Director, not later than the 15th day of each month, the recorded information required by this Section, including an explanation for the necessity of the use of the bypass.
- R. The owner or operator shall determine compliance with the cumulative occurrence and fugitive emission limits contained in R18-2-715(G)(1) as follows:
  1. The owner or operator shall calculate annual average emissions at the end of each day by averaging the emissions for all hours measured during the compliance period, as defined in subsection (R)(8), ending on that day. An annual emissions average in excess of the allowable annual average emission limit is a violation of R18-2-715(G)(1)(a) if either:
    - a. The annual average is greater than the annual average computed for the preceding day; or
    - b. The annual averages computed for the five preceding days all exceed the allowable annual average emission limit.
  2. The owner or operator shall calculate a three-hour emissions average at the end of each clock hour by averaging the hourly emissions for the preceding three consecutive hours provided each hour was measured according to the requirements contained in subsection (S).
  3. For purposes of subsection (R)(2), a three-hour emissions average in excess of an emission level  $E_f$  violates the associated cumulative occurrence limit  $n$  listed in R18-2-715(G)(1)(b) if:
    - a. The number of all three-hour emissions averages calculated during the compliance period in excess of that emission level exceeds the cumulative occurrence limit associated with the emission level; and
    - b. The average is calculated during the last operating day of the compliance period being reported.
  4. A three-hour emissions average only violates the cumulative occurrence limit  $n$  of an emission level  $E_f$  on the day containing the last hour in the average.
  5. Multiple violations of the same cumulative occurrence limit on the same day and violations of different cumulative occurrence limits on the same day constitute a single violation of R18-2-715(G)(1)(b).

6. The violation of any cumulative occurrence limit and an annual average emission limit on the same day constitutes only a single violation of the requirements of R18-2-715(G)(1).
  7. Multiple violations of a cumulative occurrence limit by different three-hour emissions averages containing any common hour constitutes a single violation of R18-2-715(G)(1)(b).
  8. To determine compliance with subsections (R)(1) through (7), the compliance period consists of the 365 calendar days immediately preceding the end of each day of the month being reported unless that period includes less than 300 operating days, in which case the number of days preceding the last day of the compliance period shall be increased until the compliance period contains 300 operating days. For purposes of this Section, an operating day is any day on which sulfur-containing feed is introduced into the smelting process.
- S. To determine compliance with R18-2-715(G)(1), the owner or operator of the smelter subject to R18-2-715(G)(1) shall install, calibrate, maintain, and operate a measurement system for continuously monitoring sulfur dioxide concentrations of the converter roof fugitive emissions.
1. For purposes of this subsection, continuous monitoring means the taking and recording of at least one measurement of sulfur dioxide concentration from an approved measurement location in each 15-minute period. Fifteen-minute periods start at the beginning of each clock hour, and run consecutively. An hour of smelter emissions is considered continuously monitored if the emissions from all approved measurement locations are measured for at least 45 minutes of any hour according to the requirements of this subsection.
  2. The owner or operator of a smelter subject to the requirements of this subsection shall conduct quality assurance procedures on the continuous monitoring system according to the methods in 40 CFR 60, Appendix F, except that an annual relative accuracy test audit (RATA) is not required.
- T. The emission limit in R18-2-715(G)(2) applies to the total of uncaptured fugitive sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not emissions due solely to the use of fuel for space heating or steam generation. The owner or operator shall determine compliance with the emission limit contained in R18-2-715(G)(2) as follows:
1. The owner or operator shall calculate annual average fugitive emissions at the end of the last day of each month by averaging the monthly emissions for the previous 12-month period ending on that day. To determine monthly fugitive emissions, the owner or operator shall perform material balances for sulfur according to the sulfur balance procedures prescribed in Appendix 8 of this Chapter.
  2. An annual emissions average in excess of the allowable annual average emission limit violates R18-2-715(G)(2) if the fugitive annual average computed at the end of each month exceeds the allowable annual average emission limit.
- U. The emission limit in R18-2-715(H) applies to the total of stack and uncaptured fugitive sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not emissions due solely to the use of fuel for space heating or steam generation. The owner or operator shall determine compliance with the emission limit contained in R18-2-715(H) as follows:
1. The owner or operator shall calculate annual average stack emissions at the end of the last day of each month by averaging the emissions for all hours measured during the previous 12-month period ending on that day according to the requirements contained in subsection (K).
  2. The owner or operator shall calculate annual average fugitive emissions at the end of the last day of each month by averaging the monthly emissions for the previous 12-month period ending on that day. To determine monthly fugitive emissions, the owner or operator shall perform material balances for sulfur according to the sulfur balance procedures prescribed in Appendix 8 of this Chapter.
  3. An annual emissions average in excess of the allowable annual average emission limit violates R18-2-715(H) if the total of the stack and fugitive annual averages computed at the end of each month exceeds the allowable annual average emission limit.

#### Historical Note

Section R18-2-715.01 renumbered from R18-2-515.01 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 575, effective January 15, 2002 (Supp. 02-1). Amended by final rulemaking at 8 A.A.R. 3365, effective July 18, 2002 (Supp. 02-3).

#### R18-2-715.02. Standards of Performance for Existing Primary Copper Smelters; Fugitive Emissions

- A. For purposes of this Section, the compliance date, unless otherwise provided in a consent decree or a delayed compliance order, shall be January 14, 1986.
- B. No later than 24 months before the compliance date, the owner or operator of a smelter subject to R18-2-715 shall submit to the Director the results of an evaluation of the fugitive emissions from the smelter. The evaluation results shall contain all of the following information:
1. A measurement or accurate estimate of total fugitive emissions from the smelter during typical operations, including planned start-up and shutdown. The measurement or estimate shall contain the amount of both average short-term (24 hours) and average long-term (monthly) fugitive emissions from the smelter. The evaluation plan shall be approved in advance by the Department and shall specify the method used to determine the fugitive emission amounts, including the conditions determined to be "typical operations" for the smelter.
  2. A measurement or accurate estimate of the relative proportion, expressed as a percentage, of total fugitive emissions during typical operations, including planned start-up and shutdown, produced by any of the following smelter processes:
    - a. Roaster or dryer operation;
    - b. Calcine or dried concentrate transfer;
    - c. Reverberatory furnace operations, including feeding, slag return, matte and slag tapping;
    - d. Matte transfer; and
    - e. Converter operations.
  3. The measurement technique or method of estimation used to fulfill the requirement in subsection (B)(2) shall be approved in advance by the Department.
  4. The results of at least a six-month fugitive emission impact analysis conducted during that part of the year when fugitive emissions are expected to have the greatest ambient air quality impact. The study shall utilize sufficient measurements of fugitive emissions, meteorological conditions and ambient sulfur dioxide concentrations to

associate fugitive emissions with specific measured ambient concentrations of sulfur dioxide. The study shall describe in detail the techniques used to make the required determinations. The design of the study shall be approved in advance by the Department.

- C. On the basis of the results of the evaluation as well as other data and information contained in the records of the Department, the Director shall determine whether fugitive emissions from a particular smelter have the potential to cause or significantly contribute to violations of the ambient sulfur dioxide standards in the vicinity of the smelter. If the Director finds that fugitive emissions from a particular smelter have the potential to cause or significantly contribute to violations of ambient sulfur dioxide standards in the vicinity of a smelter, then the Director shall adopt rules specifying the emission limits and undertake other appropriate measures necessary to maintain ambient sulfur dioxide standards.
- D. The requirements of subsection (B) shall not apply to a smelter subject to this Section if the owner or operator of that smelter can demonstrate to the Director both that:
  - 1. Compliance with the applicable cumulative occurrence and emission limits listed in R18-2-715(F) will require the smelter to undergo major modifications to its physical configuration or work practices prior to the compliance date, and
  - 2. That the modification will reduce fugitive emissions to such an extent that such emissions will not cause or significantly contribute to violations of ambient sulfur dioxide standards in the vicinity of the smelter.
- E. In order to assess the sufficiency of the cumulative occurrence and emission limits contained in R18-2-715(F) to maintain the ambient air quality standards for sulfur dioxide set forth in R18-2-202, an owner or operator of a smelter subject to this Section shall continue to calibrate, maintain and operate any ambient sulfur dioxide monitoring equipment owned by the smelter owner or operator and in operation within the area of the smelter enclosed by a circle with 10-mile radius as calculated from a center point which shall be the point of the smelter's greatest sulfur dioxide emissions, for a period of at least three years after the compliance date.
  - 1. Such monitors shall be operated and maintained in accordance with 40 CFR 50 and 58 and such other conditions as the Director deems necessary.
  - 2. The location of ambient sulfur dioxide monitors and length of time such monitors remain at a location shall be determined by the Director.

#### Historical Note

Section R18-2-715.02 renumbered from R18-2-515.02 and amended effective November 15, 1993 (Supp. 93-4).

#### R18-2-716. Standards of Performance for Existing Coal Preparation Plants

- A. The provisions of this Section are applicable to any of the following affected facilities in coal preparation plants: thermal dryers, pneumatic coal-cleaning equipment, coal processing and conveying equipment including breakers and crushers, coal storage systems, and coal transfer and loading systems. For purposes of this Section, the definitions contained in 40 CFR 60.251 are adopted by reference and incorporated herein.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any existing coal preparation plant in total quantities in excess of the amounts calculated by one of the following equations:
  - 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the

maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$

where:

E = the maximum allowable particulate emissions rate in pounds-mass per hour.

P = the process weight rate in tons-mass per hour.

- 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where "E" and "P" are defined as indicated in subsection (B)(1).

- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- E. Fugitive emissions from coal preparation plants shall be controlled in accordance with R18-2-604 through R18-2-607.
- F. The test methods and procedures required by this Section are as follows:
  - 1. The reference methods in the 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, are used to determine compliance with standards prescribed in subsection (B) as follows:
    - a. Method 5 for the concentration of particulate matter and associated moisture content,
    - b. Method 1 for sample and velocity traverses,
    - c. Method 2 for velocity and volumetric flow rate,
    - d. Method 3 for gas analysis.
  - 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume is 0.85 dscm (30 dscf) except that short sampling times or smaller volumes, when necessitated by process variables or other factors, may be approved by the Director. Sampling shall not be started until 30 minutes after start-up and shall be terminated before shutdown procedures commence. The owner or operator of the affected facility shall eliminate cyclonic flow during performance tests in a manner acceptable to the Director.
  - 3. The owner or operator shall construct the facility so that particulate emissions from thermal dryers or pneumatic coal cleaning equipment can be accurately determined by applicable test methods and procedures under subsection (F)(1).

#### Historical Note

Section R18-2-716 renumbered from R18-2-516 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-717. Expired

#### Historical Note

Section R18-2-717 renumbered from R18-2-517 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

#### R18-2-718. Repealed

#### Historical Note

Section R18-2-718 renumbered from R18-2-518 effective

November 15, 1993 (Supp. 93-4). Section repealed by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

#### **R18-2-719. Standards of Performance for Existing Stationary Rotating Machinery**

- A.** The provisions of this Section are applicable to the following affected facilities: all stationary gas turbines, oil-fired turbines, or internal combustion engines. This Section also applies to an installation operated for the purpose of producing electric or mechanical power with a resulting discharge of sulfur dioxide in the installation's effluent gases.
- B.** For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. Compliance tests shall be conducted during operation at the normal rated capacity of each unit. The total heat input of all operating fuel-burning units on a plant or premises shall be used for determining the maximum allowable amount of particulate matter which may be emitted.
- C.** No person shall cause, allow or permit the emission of particulate matter, caused by combustion of fuel, from any stationary rotating machinery in excess of the amounts calculated by one of the following equations:
- For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 1.02Q^{0.769}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 Q = the heat input in million Btu per hour.
  - For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:  

$$E = 17.0Q^{0.432}$$
 where "E" and "Q" have the same meaning as in subsection (C)(1).
- D.** Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- E.** No person shall cause, allow or permit to be emitted into the atmosphere from any stationary rotating machinery, smoke for any period greater than 10 consecutive seconds which exceeds 40% opacity. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- F.** When low sulfur oil is fired, stationary rotating machinery installations shall burn fuel which limits the emission of sulfur dioxide to 1.0 pound per million Btu heat input.
- G.** When high sulfur oil is fired, stationary rotating machinery installations shall not emit more than 2.2 pounds of sulfur dioxide per million Btu heat input.
- H.** Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee. This condition may not be included in the permit if the applicant demonstrates to the satisfaction of the Director both that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.
- The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
  - In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
  - When the conditions justifying the use of high sulfur oil no longer exist, the permit shall be modified accordingly.

4. Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.

- I.** The owner or operator of any stationary rotating machinery subject to the provisions of this Section shall record daily the sulfur content and lower heating value of the fuel being fired in the machine.
- J.** The owner or operator of any stationary rotating machinery subject to the provisions of this Section shall report to the Director any daily period during which the sulfur content of the fuel being fired in the machine exceeds 0.8%.
- K.** The test methods and procedures required by this Section are as follows:
- To determine compliance with the standards prescribed in subsections (C) through (H), the following reference methods shall be used:
    - Reference Method 20 in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, for the concentration of sulfur dioxide and oxygen.
    - ASTM Method D129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method) for the sulfur content of liquid fuels.
    - ASTM Method D1072-90 (Test Method for Total Sulfur in Fuel Gases for the sulfur content of gaseous fuels).
  - To determine compliance with the standards prescribed in subsection (J), the following reference methods shall be used:
    - ASTM Method D129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method) for the sulfur content of liquid fuels.
    - ASTM Method D1072-90 (Test Method for Total Sulfur in Fuel Gases) for the sulfur content of gaseous fuels.

#### **Historical Note**

Section R18-2-719 renumbered from R18-2-519 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

#### **R18-2-720. Standards of Performance for Existing Lime Manufacturing Plants**

- A.** The provisions of this Section are applicable to the following affected facilities used in the manufacture of lime: rotary lime kilns, vertical lime kilns, lime hydrators, and limestone crushing facilities. This Section is also applicable to limestone crushing equipment which exists apart from other lime manufacturing facilities.
- B.** No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any lime manufacturing or limestone crushing facility in total quantities in excess of the amounts calculated by one of the following equations:
- For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.

## Department of Environmental Quality – Air Pollution Control

2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:  

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (B)(1).
  - C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
  - D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
  - E. Fugitive emissions from lime plants shall be controlled in accordance with R18-2-604 through R18-2-607.
  - F. The owner or operator subject to the provisions of this Section shall install, calibrate, maintain, and operate a continuous monitoring system, except as provided in subsection (G), to monitor and record the opacity of the gases discharged into the atmosphere from any rotary lime kiln. The span of this system shall be set at 70% opacity.
  - G. The owner or operator of any rotary lime kiln using a wet scrubbing emission control device subject to the provisions of this Section shall not be required to monitor the opacity of the gases discharged as required in subsection (F).
  - H. The test methods and procedures required by this Section are as follows:
    1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with this Section as follows:
      - a. Method 5 for the measurement of particulate matter,
      - b. Method 1 for sample and velocity traverses,
      - c. Method 2 for velocity and volumetric flow rate,
      - d. Method 3 for gas analysis,
      - e. Method 4 for stack gas moisture,
      - f. Method 9 for visible emissions.
    2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.85 dscm/hr (0.53 dscf/min), except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.
    3. Because of the high moisture content of the exhaust gases from the hydrators, in the range of 40 to 85% by volume, the Method 5 sample train may be modified to include a calibrated orifice immediately following the sample nozzle when testing lime hydrators. In this configuration, the sampling rate necessary for maintaining isokinetic conditions can be directly related to exhaust gas velocity without a correction for moisture content.
- Historical Note**  
 Section R18-2-720 renumbered from R18-2-520 and amended effective November 15, 1993 (Supp. 93-4).  
 Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).
- R18-2-721. Standards of Performance for Existing Nonferrous Metals Industry Sources**
- A. The provisions of this Section are applicable to the following affected facilities:
    1. Mines,
    2. Mills,
    3. Concentrators,
    4. Crushers,
    5. Screens,
    6. Material handling facilities,
    7. Fine ore storage,
    8. Dryers,
    9. Roasters, and
    10. Loaders.
  - B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any process source subject to the provisions of this Section in total quantities in excess of the amounts calculated by one of the following equations:
    1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
    2. For process sources having a process weight greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:  

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (B)(1).
  - C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
  - D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
  - E. No person shall cause, allow or permit to be discharged into the atmosphere from any dryer or roaster the operating temperature of which exceeds 700°F, reduced sulfur in excess of 10% of the sulfur entering the process as feed. Reduced sulfur includes sulfur equivalent from all sulfur emissions including sulfur dioxide, sulfur trioxide, and sulfuric acid.
  - F. The owner or operator of any mining property subject to the provisions of this Section shall record the daily process rates and hours of operation of all material handling facilities.
  - G. A continuous monitoring system for measuring sulfur dioxide emissions shall be installed, calibrated, maintained and operated by the owner or operator where dryers or roasters are not expected to achieve compliance with the standard under subsection (E).
  - H. The test methods and procedures required by this Section are as follows:
    1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standard prescribed in this Section as follows:
      - a. Method 5 for the concentration of particulate matter and the associated moisture content;
      - b. Method 1 for sample and velocity traverses;
      - c. Method 2 for velocity and volumetric flow rate;
      - d. Method 3 for gas analysis and calculation of excess air, using the integrated sample technique;
      - e. Method 6 for concentration of SO<sub>2</sub>.
    2. For Method 5, Method 1 shall be used to select the sampling site and the number of traverse sampling points. The sampling time for each run shall be at least 60 minutes and the minimum sampling volume shall be 0.85 dscm (30 dscf), except that smaller sampling times or volumes, when necessitated by process variables or other factors, may be approved by the Director. The probe and filter holder heating systems in the sampling train shall be

set to provide a gas temperature no greater than 160°C. (320°F.).

3. For Method 6, the sampling site shall be the same as that selected for Method 5. The sampling point in the duct shall be at the centroid of the cross section or at a point no closer to the walls than 1 m (3.28 ft.). For Method 6, the sample shall be extracted at a rate proportional to the gas velocity at the sampling point.
4. For Method 6, the minimum sampling time shall be 20 minutes and the minimum sampling volume 0.02 dscm (0.71 dscf) for each sample. The arithmetic mean of two samples shall constitute one run. Samples shall be taken at approximately 30-minute intervals.

#### Historical Note

Section R18-2-721 renumbered from R18-2-521 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-722. Standards of Performance for Existing Gravel or Crushed Stone Processing Plants

- A. The provisions of this Section are applicable to the following affected facilities: primary rock crushers, secondary rock crushers, tertiary rock crushers, screens, conveyors and conveyor transfer points, stackers, reclaimers, and all gravel or crushed stone processing plants and rock storage piles.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere except as fugitive emissions in any one hour from any gravel or crushed stone processing plant in total quantities in excess of the amounts calculated by one of the following equations:
  1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:
 
$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
  2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:
 
$$E = 55.0P^{0.11} - 40$$
 where "E" and "P" are defined as indicated in subsection (B)(1).
- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. Spray bar pollution controls shall be utilized in accordance with "EPA Control of Air Emissions From Process Operations In The Rock Crushing Industry" (EPA 340/1-79-002), "Wet Suppression System" (pages 15-34, amended as of January 1979 (and no future amendments or editions)), as incorporated herein by reference and on file with the Office of the Secretary of State, with placement of spray bars and nozzles as required by the Director to minimize air pollution.
- E. Fugitive emissions from gravel or crushed stone processing plants shall be controlled in accordance with R18-2-604 through R18-2-607.
- F. The owner or operator of any affected facility subject to the provisions of this Section shall install, calibrate, maintain, and operate monitoring devices which can be used to determine daily the process weight of gravel or crushed stone produced. The weighing devices shall have an accuracy of  $\pm 5\%$  over their operating range.

- G. The owner or operator of any affected facility shall maintain a record of daily production rates of gravel or crushed stone produced.

- H. The test methods and procedures required by this Section are as follows:

1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in this Section as follows:
  - a. Method 5 for concentration of particulate matter and moisture content,
  - b. Method 1 for sample and velocity traverses,
  - c. Method 2 for velocity and volumetric flow rate,
  - d. Method 3 for gas analysis.
2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume is 0.85 dscm (30 dscf), except that shorter sampling times or smaller volumes, when necessitated by process variables or other factors, may be approved by the Director. Sampling shall not be started until 30 minutes after start-up and shall be terminated before shutdown procedures commence. The owner or operator of the affected facility shall eliminate cyclonic flow during performance tests in a manner acceptable to the Director.

#### Historical Note

Section R18-2-722 renumbered from R18-2-522 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-723. Standards of Performance for Existing Concrete Batch Plants

Fugitive dust emitted from concrete batch plants shall be controlled in accordance with R18-2-604 through R18-2-607.

#### Historical Note

Section R18-2-723 renumbered from R18-2-523 and amended effective November 15, 1993 (Supp. 93-4).

#### R18-2-724. Standards of Performance for Fossil-fuel Fired Industrial and Commercial Equipment

- A. This Section applies to industrial and commercial installations which are less than 73 megawatts capacity (250 million Btu per hour), but in the aggregate on any premises are rated at greater than 500,000 Btu per hour (0.146 megawatts), and in which fuel is burned for the primary purpose of producing steam, hot water, hot air or other liquids, gases or solids and in the course of doing so the products of combustion do not come into direct contact with process materials. When any products or by-products of a manufacturing process are burned for the same purpose or in conjunction with any fuel, the same maximum emission limitations shall apply.
- B. For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. The heat content of solid fuel shall be determined in accordance with R18-2-311. Compliance tests shall be conducted during operation at the nominal rated capacity of each unit. The total heat input of all fuel-burning units on a plant or premises shall be used for determining the maximum allowable amount of particulate matter which may be emitted.
- C. No person shall cause, allow or permit the emission of particulate matter, caused by combustion of fuel, from any fuel-burning operation in excess of the amounts calculated by one of the following equations:

1. For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:  

$$E = 1.02Q^{0.769}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 Q = the heat input in million Btu per hour.
  2. For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:  

$$E = 17.0Q^{0.432}$$
 where "E" and "Q" have the same meanings as in subsection (C)(1).
- D.** Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- E.** Fossil-fuel fired industrial and commercial equipment installations shall not emit more than 1.0 pounds of sulfur dioxide per million Btu heat input when low sulfur oil is fired.
- F.** Fossil-fuel fired industrial and commercial equipment installations shall not emit more than 2.2 pounds of sulfur dioxide per million Btu heat input when high sulfur oil is fired.
- G.** Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee. This condition may be omitted from the permit if the applicant demonstrates to the satisfaction of the Director both that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.
1. The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
  2. In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
  3. When the conditions justifying the use of high sulfur oil no longer exist, the permit shall be modified accordingly.
  4. Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.
- H.** When coal is fired, fossil-fuel fired industrial and commercial equipment installations shall not emit more than 1.0 pounds of sulfur dioxide per million Btu heat input.
- I.** The owner or operator subject to the provisions of this Section shall install, calibrate, maintain and operate a continuous monitoring system for measurement of the opacity of emissions discharged into the atmosphere from the control device.
- J.** For the purpose of reports required under excess emissions reporting required by R18-2-310.01, the owner or operator shall report all six-minute periods in which the opacity of any plume or effluent exceeds 15%.
- K.** The test methods and procedures required by this Section are as follows:
1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards as prescribed in this Section.
    - a. Method 1 for selection of sampling site and sample traverses,
    - b. Method 3 for gas analysis to be used when applying Reference Methods 5 and 6,
    - c. Method 5 for concentration of particulate matter and the associated moisture content,
    - d. Method 6 for concentration of SO<sub>2</sub>.
  2. For Method 5, Method 1 shall be used to select the sampling site and the number of traverse sampling points. The sampling time for each run shall be at least 60 minutes and the minimum sampling volume shall be 0.85 dscm (30 dscf), except that smaller sampling times or volumes, when necessitated by process variables or other factors, may be approved by the Director. The probe and filter holder heating systems in the sampling train shall be set to provide a gas temperature no greater than 160°C. (320°F).
  3. For Method 6, the sampling site shall be the same as that selected for Method 5. The sampling point in the duct shall be at the centroid of the cross section or at a point no closer to the walls than 1 m (3.28 ft). For Method 6, the sample shall be extracted at a rate proportional to the gas velocity at the sampling point.
  4. For Method 6, the minimum sampling time shall be 20 minutes and the minimum sampling volume 0.02 dscm (0.71 dscf) for each sample. The arithmetic mean of two samples shall constitute one run. Samples shall be taken at approximately 30-minute intervals.
  5. Gross calorific value shall be determined in accordance with the applicable ASTM methods: D-2015-91 (Test for Gross Calorific Value of Solid Fuel by the Adiabatic Bomb Calorimeter) for solid fuels; D-240-87 (Test Method for Heat of Combustion of Liquid Hydrocarbon Fuels by Bomb Calorimeter) for liquid fuels; and D-1826-88 (Test Method for Calorific Value of Gases in Natural Gas Range by Continuous Recording Calorimeter) for gaseous fuels. The rate of fuels burned during each testing period shall be determined by suitable methods and shall be confirmed by a material balance over the fossil-fuel fired system.

#### Historical Note

Section R18-2-724 renumbered from R18-2-524 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-725. Standards of Performance for Existing Dry Cleaning Plants

- A.** No person shall conduct any dry cleaning operation using chlorinated synthetic solvents without minimizing organic solvent emissions by good modern practices including but not limited to the use of an adequately sized and properly maintained activated carbon absorber or other equally effective control device.
- B.** No person shall operate any dry cleaning establishment using petroleum solvents other than non-photochemically reactive solvents without reducing solvent emissions by at least 90%. For purposes of this subsection, a photochemically reactive solvent shall be any solvent with an aggregate of more than 20% of its total volume composed of the chemical compounds classified in subsections (B)(1) through (3), or which exceeds any of the following percentage composition limitations, referred to the total volume of solvent:
1. A combination of the following types of compounds having an olefinic or cyclo-olefinic type of unsaturation -- hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones: 5%.
  2. A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene: 8%.
  3. A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichlorethylene or toluene: 20%.

- C. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution is discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to the adjoining property.

#### Historical Note

Section R18-2-725 renumbered from R18-2-525 effective November 15, 1993 (Supp. 93-4).

#### R18-2-726. Standards of Performance for Sandblasting Operations

No person shall cause or permit sandblasting or other abrasive blasting without minimizing dust emissions to the atmosphere through the use of good modern practices. Examples of good modern practices include wet blasting and the use of effective enclosures with necessary dust collecting equipment.

#### Historical Note

Section R18-2-726 renumbered from R18-2-526 effective November 15, 1993 (Supp. 93-4).

#### R18-2-727. Standards of Performance for Spray Painting Operations

- A. No person shall conduct any spray paint operation without minimizing organic solvent emissions. Such operations other than architectural coating and spot painting, shall be conducted in an enclosed area equipped with controls containing no less than 96% of the overspray.
- B. No person shall either:
1. Employ, apply, evaporate or dry any architectural coating containing photochemically reactive solvents for industrial or commercial purposes; or
  2. Thin or dilute any architectural coating with a photochemically reactive solvent.
- C. For purposes of subsection (B), a photochemically reactive solvent shall be any solvent with an aggregate of more than 20% of its total volume composed of the chemical compounds classified in subsections (1) through (3), or which exceeds any of the following percentage composition limitations, referred to the total volume of solvent:
1. A combination of the following types of compounds having an olefinic or cyclo-olefinic type of unsaturation -- hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones: 5%.
  2. A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene: 8%.
  3. A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichlorethylene or toluene: 20%.
- D. Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the groups or organic compounds described in subsection (C)(1) through (3), it shall be considered to be a member of the group having the least allowable percent of the total volume of solvents.

#### Historical Note

Section R18-2-727 renumbered from R18-2-527 effective November 15, 1993 (Supp. 93-4).

#### R18-2-728. Standards of Performance for Existing Ammonium Sulfide Manufacturing Plants

- A. The provisions of this Section are applicable to the following affected facilities in ammonium sulfide manufacturing plants: sulfide unloading facilities, reactor-absorbers, bubble cap scrubbers, and fume incinerators.

- B. No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator or other outlet smoke, fumes, gases, particulate matter or other gas-borne material, the opacity of which exceeds 20%.
- C. No person shall cause, allow or permit to be emitted into the atmosphere from any emission point from any incinerator, or to pass a convenient measuring point near such emission point, particulate matter of concentrations in excess of 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
- D. No person shall allow hydrogen sulfide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.03 parts per million by volume for any averaging period of 30 minutes or more.
- E. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution are discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to adjoining property.
- F. The owner or operator of any ammonium sulfide tailgas incinerator subject to the provisions of this Section shall do both of the following:
1. Install, calibrate, maintain, and operate a flow measuring device which can be used to determine either the mass or volume of tailgas charged to the incinerator. The flow measuring device shall have an accuracy of  $\pm 5\%$  over its operating range.
  2. Provide access to the tailgas charged so that a well-mixed representative grab sample can be obtained.
- G. The test methods and procedures required by this Section are as follows:
1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with the standards prescribed in this Section as follows:
    - a. Method 5 for the concentration of particulate matter and the associated moisture content;
    - b. Method 1 for sample and velocity traverse;
    - c. Method 2 for velocity and volumetric flow rate;
    - d. Method 3 for gas analysis and calculation of excess air, using the integrated sample technique;
    - e. Method 11 shall be used to determine the concentration of  $H_2S$  and Method 6 shall be used to determine the concentration of  $SO_2$ .
  2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 0.85 dscm (30.0 dscf) except that shorter sampling times and smaller sample volumes, when necessitated by process variables or other factors, may be approved by the Director.
  3. Particulate matter emissions, expressed in g/dscm, shall be corrected to 12%  $CO_2$  by using the following formula:

$$C_{12} = \frac{12c}{\%CO_2}$$

where:

$C_{12}$  = the concentration of particulate matter corrected to 12%  $CO_2$ ,

$c$  = the concentration of particulate matter as measured by Method 5, and

$\%CO_2$  = the percentage of  $CO_2$  as measured by Method 3, or, when applicable, the adjusted outlet  $CO_2$  percentage.

4. If Method 11 is used, the gases sampled shall be introduced into the sampling train at approximately atmospheric pressure. Where fuel gas lines are operating at pressures substantially above atmosphere, this may be accomplished with a flow control valve. If the line pressure is high enough to operate the sampling train without a vacuum pump, the pump may be eliminated from the sampling train. The sample shall be drawn from a point near the centroid of the fuel gas line. The minimum sampling time shall be 10 minutes and the minimum sampling volume 0.01 dscm (0.35 dscf) for each sample. The arithmetic average of two samples of equal sampling time shall constitute one run. Samples shall be taken at approximately one-hour intervals. For most fuel gases, sample times exceeding 20 minutes may result in depletion of the collecting solution, although fuel gases containing low concentrations of hydrogen sulfide may necessitate sampling for longer periods of time.
5. If Method 5 is used, Method 1 shall be used for velocity traverses and Method 2 for determining velocity and volumetric flow rate. The sampling site for determining CO<sub>2</sub> concentration by Method 3 shall be the same as for determining volumetric flow rate by Method 2. The sampling point in the duct for determining SO<sub>2</sub> concentration by Method 3 shall be at the centroid of the cross section if the cross sectional area is less than 5 m<sup>2</sup> (54 ft<sup>2</sup>) or at a point no closer to the walls than 1 m (3.28 feet) if the cross sectional area is 5 m<sup>2</sup> or more and the centroid is more than 1 meter from the wall. The sample shall be extracted at a rate proportional to the gas velocity at the sampling point. The minimum sampling time shall be 10 minutes and the minimum sampling volume 0.01 dscm (0.36 dscf) for each sample. The arithmetic average of two samples of equal sampling time shall constitute one run. Samples shall be taken at approximately one-hour intervals.

#### Historical Note

Section R18-2-728 renumbered from R18-2-528 effective November 15, 1993 (Supp. 93-4).

#### R18-2-729. Standards of Performance for Cotton Gins

- A. Fugitive dust, lint, bolls, cotton seed or other material emitted from a cotton gin or lying loose in a yard shall be collected and disposed of in an efficient manner or shall be treated in accordance with R18-2-604 through R18-2-607.
- B. No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator, smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 40% opacity.
- C. No person shall cause, allow, or permit the discharge of particulate matter into the atmosphere in any one hour from any cotton gin in total quantities in excess of the amounts calculated by one of the following equations:
  1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:
 
$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
  2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where "E" and "P" are defined as indicated in subsection (C)(1).

- D. The test methods and procedures required by this Section are as follows:
  1. The reference methods in the Arizona Testing Manual and 40 CFR 60, Appendix A shall be used to determine compliance with this Section as follows:
    - a. Method A-2 for the measurement of particulate matter,
    - b. Method 1 for sample and velocity traverses,
    - c. Method 2 for velocity and volumetric flow rate,
    - d. Method 3 for gas analysis,
    - e. Method 9 for visible emissions.
  2. For Method A-2, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.85 dry standard cubic meters per hour (0.53 dry standard cubic feet per minute), except that shorter sampling times, when necessitated by progress variables or other factors, may be approved by the Director.

#### Historical Note

Section R18-2-729 renumbered from R18-2-529 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

#### R18-2-730. Standards of Performance for Unclassified Sources

- A. No existing source which is not otherwise subject to standards of performance under this Article or Article 9 or 11 of this Chapter, shall cause or permit the emission of pollutants at rates greater than the following:
  1. For particulate matter discharged into the atmosphere in any one hour from any unclassified process source in total quantities in excess of the amounts calculated by one of the following equations:
    - a. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:
 
$$E = 4.10P^{0.67}$$
 where:  
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.  
 P = the process weight rate in tons-mass per hour.
    - b. For process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:
 
$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (A)(1)(a).
  2. Sulfur dioxide – 600 parts per million.
  3. Nitrogen oxides expressed as NO<sub>2</sub> – 500 parts per million.
- B. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. No person shall emit gaseous or odorous materials from equipment, operations or premises under the person's control in such quantities or concentrations as to cause air pollution.

- E. No person shall operate or use any machine, equipment, or other contrivance for the treatment or processing of animal or vegetable matter, separately or in combination, unless all gaseous vapors and gas entrained effluents from such operations, equipment, or contrivance have been either:
1. Incinerated to destruction, as indicated by a temperature measuring device, at not less than 1,200°F if constructed or reconstructed prior to January 1, 1989, or 1,600°F with a minimum residence time of 0.5 seconds if constructed or reconstructed thereafter; or
  2. Passed through such other device which is designed, installed and maintained to prevent the emission of odors or other air contaminants and which is approved by the Director.
- F. Materials including solvents or other volatile compounds, paints, acids, alkalies, pesticides, fertilizers and manure shall be processed, stored, used and transported in such a manner and by such means that they will not evaporate, leak, escape or be otherwise discharged into the ambient air so as to cause or contribute to air pollution. Where means are available to reduce effectively the contribution to air pollution from evaporation, leakage or discharge, the installation and use of such control methods, devices, or equipment shall be mandatory.
- G. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution is discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to adjoining property.
- H. No person shall allow hydrogen sulfide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.03 parts per million by volume for any averaging period of 30 minutes or more.
- I. No person shall cause, allow or permit discharge from any stationary source carbon monoxide emissions without the use of complete secondary combustion of waste gases generated by any process source.
- J. No person shall allow hydrogen cyanide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.3 parts per million by volume for any averaging period of eight hours.
- K. No person shall allow sodium cyanide dust or dust from any other solid cyanide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 140 micrograms per cubic meter for any averaging period of eight hours.
- L. No owner or operator of a facility engaged in the surface coating of miscellaneous metal parts and products may operate a coating application system subject to this Section that emits volatile organic compounds in excess of any of the following:
1. 4.3 pounds per gallon (0.5 kilograms per liter) of coating, excluding water, delivered to a coating applicator that applies clear coatings.
  2. 3.5 pounds per gallon (0.42 kilograms per liter) of coating, excluding water delivered to a coating applicator in a coating application system that is air dried or forced warm air dried at temperatures up to 194°F (90°C).
  3. 3.5 pounds per gallon (0.42 kilograms per liter) of coating, excluding water, delivered to a coating applicator that applies extreme performance coatings.
  4. 3.0 pounds per gallon (0.36 kilograms per liter) of coating, excluding water, delivered to a coating applicator for all other coatings and application systems.
- M. If more than one emission limitation in subsection (L) applies to a specific coating, then the least stringent emission limitation shall be applied.
- N. All VOC emissions from solvent washings shall be considered in the emission limitations in subsection (L), unless the solvent is directed into containers that prevent evaporation into the atmosphere.

#### Historical Note

Renumbered from R18-2-530 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

#### R18-2-731. Standards of Performance for Existing Municipal Solid Waste Landfills

- A. This Section applies to each municipal solid waste landfill (MSW landfill) at which:
1. Construction, reconstruction, or modification began before May 30, 1991; and
  2. Waste was accepted at any time since November 8, 1987, or additional design capacity is available for future waste deposition.
- B. For the purposes of this Section, "Municipal solid waste landfill or MSW landfill" means an entire disposal facility in a contiguous geographical space where household waste is placed in or on land. An MSW landfill may also receive other types of RCRA (Resource Conservation and Recovery Act) Subtitle D wastes such as commercial solid waste, nonhazardous sludge, conditionally exempt small quantity generator waste, and industrial solid waste. Portions of an MSW landfill may be separated by access roads. An MSW landfill may be publicly or privately owned.
- C. MSW landfills covered by this Section shall comply with 40 CFR 60, Subpart WWW, as modified by this subsection. 40 CFR 60, Subpart WWW, "Standards of Performance for Municipal Solid Waste Landfills," is incorporated by reference in R18-2-901.
1. Definitions. In addition to the definitions in 40 CFR 60.751, "Administrator" means the Director of the Department of Environmental Quality.
  2. Reporting. Each MSW landfill shall comply with the reporting requirements of 40 CFR 60.757. The initial design capacity report and initial NMOC emission rate report shall be due 90 days after the effective date of this rule.
  3. Design plan. An MSW landfill that is required to install a collection and control system shall submit a design plan for the system to the Director with a Standard Permit Application Form not later than 12 months after it submitted or should have submitted a NMOC emission rate report indicating emissions greater than 50 Mg per year. The design plan shall be prepared by a professional engineer registered in Arizona. The Director shall not approve the design plan if it does not meet the requirements of 40 CFR 60.752(b)(2)(ii).
  4. System installation. An MSW landfill that is required to install a collection and control system shall complete installation of the system not later than 30 months after the effective date of this rule.

5. An MSW landfill that first becomes subject to the collection and control system requirement after the effective date of this rule shall submit a design plan for the system to the Director not later than 12 months after it submitted or should have submitted an NMOC emission rate report indicating emissions greater than 50 Mg per year.

#### Historical Note

Adopted effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1).

#### R18-2-732. Expired

#### Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

#### R18-2-733. Repealed

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Section repealed by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

#### R18-2-733.01. Repealed

#### Historical Note

New Section made by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Section repealed by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

#### R18-2-734. Standards of Performance for Mercury Emissions from Electric Generating Units

- A. Applicability and Purpose. The requirements of this Section apply to owners and operators of electric generating units. The purpose of this Section is to establish:
  1. Interim standards for mercury emissions from electric generating units that shall apply until compliance with the emissions limits in the federal mercury standards is required.
  2. State standards for mercury emissions from electric generating units that shall apply if the federal mercury standards are vacated by a federal court or repealed by the administrator.
- B. Interim Standards. The following requirements shall apply until the date that compliance with the federal mercury standards or subsection (G) is required:
  1. The owners and operators shall comply with the mercury control strategy operations and maintenance plan approved as part of the permit for the electric generating plant.
  2. The owners and operators shall operate and maintain the electric generating plant, including any associated air pollution control equipment, in a manner consistent with good air pollution control practices for minimizing mercury emissions. This requirement shall apply to any air pollution control equipment installed pursuant to subsection (B)(1) or to any new air pollution control equipment installed to comply with the federal mercury standards if such equipment replaces equipment installed pursuant to subsection (B)(1).
- C. Incorporation of Federal Mercury Standards. The federal mercury standards in 40 CFR Part 63, Subpart UUUUU, as of July

1, 2013 (and no future amendments or editions) are incorporated by reference and shall remain effective to the extent specified in this Section regardless of whether they are vacated by a federal court or repealed by the administrator. Subpart UUUUU of 40 C.F.R. Part 63 is published by the United States Government Printing Office, 732 North Capital Street, NW, Washington, DC 20401-0001, is on file with the Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007, and is available at the Arizona State Library, Archives & Public Records, 1700 West Washington Street, Phoenix, Arizona 85007 and at other Federal depository libraries in the state (see [http://catalog.gpo.gov/fdlpdire/FDLPdir.jsp?st\\_12=AZ&flag=searchp](http://catalog.gpo.gov/fdlpdire/FDLPdir.jsp?st_12=AZ&flag=searchp)). It is also available online at <http://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR>. The owners and operators shall provide to the director a copy of all notices and reports submitted to the Administrator under the federal mercury standards, except for any reports or data submitted to the Administrator through electronic systems (for example, Compliance and Emissions Data Reporting Interface (CEDRI), Emission Collection Monitoring Plan System Client Tool (ECMPS) or the Emissions Reporting Tool (ERT)).

- D. Notice of State Standard Applicability. The director shall provide notice to the responsible official for each electric generating plant of any repeal or federal court vacatur of the federal mercury standards. If the repeal or vacatur occurred after the date the electric generating plant was required to comply with the emission limits in the federal mercury standards, the plant shall continue to comply with the federal mercury standards until the date that compliance with subsection (G) is required.
- E. Application for Permit Revision. Within 120 days of receipt of written notice from the director under subsection (D), the owners and operators shall submit an application for a permit revision that proposes:
  1. The mercury emission limit or limits in subsection (G) that shall apply to the electric generating plant.
  2. A date for demonstrating compliance with the mercury emission limit consistent with subsection (F)(2).
  3. A mercury monitoring plan consistent with subsection (H)(2).
- F. Permit Revision Setting State Standard. A permit revision granted in response to the application submitted under subsection (E) shall contain the following conditions:
  1. The mercury emission limit or limits in subsection (G) that shall apply to the electric generating plant.
  2. The date compliance with the emission limit or limits shall be required. Unless the application requests an earlier date, the compliance date shall be the later of December 31, 2016 or the end of the first averaging period commencing no later than 180 days after permit issuance.
  3. The date for demonstrating initial compliance with the emission limit or limits, which shall be 45 days after completion of the first full averaging period after the compliance date established under subsection (F)(2).
  4. The date on which compliance with subsection (B), or the obligation to comply with the federal mercury standards in subsection (D), as applicable, shall no longer be required.
  5. A mercury monitoring plan consistent with subsection (H).
  6. Compliance reporting requirements consistent with subsection (I).
- G. State Mercury Emission Limits. Emissions from an electric generating unit shall comply with one or more of the emission

## Department of Environmental Quality – Air Pollution Control

limits specified in the following table, as selected by the owners and operators under subsection (F).

No.	Limit	Averaging Period	Applicable To
1.	10 percent of inlet mercury	Rolling 12-month	Electric generating plant
2.	0.0087 pounds per gigawatt-hour	Rolling 12-month	Electric generating plant
3.	0.011 pounds per gigawatt-hour	Rolling 90-boiler operating days	EGUs identified in averaging group
4.	1.0 pounds per Trillion Btu	Rolling 90-boiler operating days	EGUs identified in averaging group
5.	0.013 pounds per gigawatt-hour	Rolling 30-boiler operating days	Individual electric generating unit
6.	1.2 pounds per Trillion Btu	Rolling 30-boiler operating days	Individual electric generating unit

#### H. Compliance Monitoring and Recordkeeping.

1. Compliance with subsection (G) shall be determined using a mercury CEMS or sorbent trap monitoring system pursuant to Appendix A of the federal mercury standards and in accordance with an approved mercury monitoring plan.
2. The mercury monitoring plan shall include the following elements:
  - a. Identification of the emission limit or limits in subsection (G) for which compliance will be demonstrated.
  - b. Identification of whether a mercury CEMS or sorbent trap monitoring system will be used as the primary compliance method. Backup methods may be identified and approved in the plan.
  - c. Description of the parameters that will be monitored, including mercury concentration, stack flow, fuel mercury content, fuel rate, electricity generation rate, moisture percent, and any diluent or other gas or process parameters necessary to calculate compliance in terms of the applicable emission limit.
  - d. Description and example of the calculations required to convert monitored parameters to mercury emissions in terms of the emission limit.
  - e. Establishment of CEMS analyzer data availability, and QA/QC requirements.
  - f. Procedures for completing an initial demonstration of compliance, except as otherwise provided in subsection (I)(1).
2. At least once per month, the mercury emissions data shall be compiled into a record demonstrating compliance with the emission limit or limits established in the permit revision issued under subsection (F). This record shall be completed no later than the 15th day of the following month.
3. Records shall be maintained as follows:
  - a. Records demonstrating compliance with the emissions limits shall be maintained for five years.

- b. If a mercury CEMS is used, daily CEMS data, QA/QC data identified in the mercury monitoring plan, any maintenance work conducted on the CEMS or data logging system, and a calculation of all mercury CEMS downtime shall be maintained for five years.
- c. If a sorbent trap monitoring system is used, all sorbent monitoring data and any maintenance work conducted on the system shall be maintained for five years.

#### I. Reporting. The owners and operators shall submit to the director the following reports:

1. An initial demonstration of compliance, which must be submitted to the director within 180 days after completion of the first full averaging period. This requirement shall not apply to an electric generating unit if an initial demonstration of compliance has been completed for that unit under 40 C.F.R. 63.10005(d)(3) and the demonstration shows compliance with subsection (G) for that unit. The report shall include:
  - a. The name of the electric generating plant and electric generating units.
  - b. The applicable emission limit or limits for the plant or the electric generating units.
  - c. The mercury emissions for the plant, group of averaged units, or each unit, as applicable, during the initial compliance demonstration in terms of the applicable standard.
  - d. A certification by a responsible official.
2. Semiannual compliance reports, which must be submitted to the director on the dates established in the electric generating plant's air quality permit. The report shall include:
  - a. The name of the electric generating plant and electric generating units;
  - b. The applicable emission limit or limits for the plant or the electric generating units.
  - c. The mercury emissions for the plant, or each unit, as applicable, for each month during the six month period ending the month prior to the semiannual report in terms of the applicable standard.
  - d. An explanation of any excess emissions, the duration of the excess emissions, and corrective actions taken, if any, to resolve those excess emissions.
  - e. A certification by a responsible official.

#### J. Exemption. After receipt of notice under subsection (D), in lieu of submitting the permit revision application required by subsection (E), the owners and operators may notify the director in writing that they elect to comply with the vacated or repealed federal mercury standards at an electric generating plant. If the owners and operators for an electric generating plant make this election, the plant shall be exempt from subsections (E) through (I). If the owners and operators of an electric plant elect this option:

1. "Administrator" shall mean "Director" whenever it appears in the federal mercury standards or regulations referenced therein.
2. "EPA" shall mean "ADEQ, Air Quality Division" whenever it appears in the federal mercury standards or regulations referenced therein.
3. In lieu of reports submitted to the Administrator through electronic systems (for example, Compliance and Emissions Data Reporting Interface (CEDRI), Emission Collection Monitoring Plan System Client Tool (ECMPS) or Emissions Reporting Tool (ERT)) pursuant to the federal mercury standards, the owners or operators shall submit to the Director, semiannually at the time required by permit, the RATA or the rolling 30-day

## Department of Environmental Quality – Air Pollution Control

or rolling 90-day average mercury value for each EGU or the plant, as applicable.

4701, effective January 29, 2007 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

**Historical Note**

New Section made by final rulemaking at 12 A.A.R.

**Table 1. Emission Limitations for Small, Medium, and Large HMIWI**

Pollutant	Units (7% oxygen, dry basis)	Emission Limitation		
		Small HMIWI	Medium HMIWI	Large HMIWI
Particulate matter	Milligrams per dry standard cubic meter (grains per dry standard cubic foot).	115 (0.05)	69 (0.03)	34 (0.015)
Carbon monoxide	Parts per million by volume	40	40	40
Dioxin/furans	Nanograms per dry standard cubic meter total dioxin/furans (grains per billion dry standard cubic feet) or nanograms per dry standard cubic meter toxic equivalent quantity (grains per billion dry standard cubic feet).	125 (55) or 2.3 (1.0)	125 (55) or 2.3 (1.0)	125 (55) or 2.3 (1.0)
Hydrogen chloride	Parts per million by volume or percent reduction.	100 or 93%	100 or 93%	100 or 93%
Sulfur dioxide	Parts per million by volume	55	55	55
Nitrogen oxides	Parts per million by volume	250	250	250
Lead	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet) or percent reduction	1.2 (0.52) or 70%	1.2 (0.52) or 70%	1.2 (0.52) or 70%
Cadmium	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet) or percent reduction	0.16 (0.07) or 65%	0.16 (0.07) or 65%	0.16 (0.07) or 65%
Mercury	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet) or percent reduction	0.55 (0.24) or 85%	0.55 (0.24) or 85%	0.55 (0.24) or 85%

**Historical Note**

Table 1 adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3).

**Table 2. Emissions Limitations for Rural HMIWI**

<b>Pollutant</b>	<b>Units (7% oxygen, dry basis)</b>	<b>Emission Limitation</b>
Particulate matter	Milligrams per dry standard cubic meter (grains per dry standard cubic foot)	197 (0.086)
Carbon monoxide	Parts per million by volume	40
Dioxin/furans	Nanograms per dry standard cubic meter total dioxin/ furans (grains per billion dry standard cubic feet) or nanograms per dry standard cubic meter toxic equivalent quantity (grains per billion dry standard cubic feet)	800 (350) or 15 (6.6)
	Parts per million by volume	3100 (1.0)
Hydrogen chloride	Parts per million by volume	55
Sulfur dioxide	Parts per million by volume	250
Nitrogen oxides	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet)	10 (4.4)
Lead	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet)	4 (1.7)
Cadmium	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic feet)	7.5 (3.3)
Mercury		

**Historical Note**

Table 2 adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3).

**ARTICLE 8. EMISSIONS FROM MOBILE SOURCES (NEW AND EXISTING)**

602 effective November 15, 1993 (Supp. 93-4).

**R18-2-801. Classification of Mobile Sources**

- A.** This Article is applicable to mobile sources which either move while emitting air contaminants or are frequently moved during the course of their utilization but are not classified as motor vehicles, agricultural vehicles, or agricultural equipment used in normal farm operations.
- B.** Unless otherwise specified, no mobile source shall emit smoke or dust the opacity of which exceeds 40%.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1).  
Amended effective September 26, 1990 (Supp. 90-3).  
Amended effective February 3, 1993 (Supp. 93-1). Former Section R18-2-801 renumbered to Section R18-2-901, new Section R18-2-801 renumbered from R18-2-601 effective November 15, 1993 (Supp. 93-4).

**R18-2-802. Off-road Machinery**

- A.** No person shall cause, allow or permit to be emitted into the atmosphere from any off-road machinery, smoke for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- B.** Off-road machinery shall include trucks, graders, scrapers, rollers, locomotives and other construction and mining machinery not normally driven on a completed public roadway.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1).  
Amended effective September 26, 1990 (Supp. 90-3).  
Former Section R18-2-802 renumbered to Section R18-2-902, new Section R18-2-802 renumbered from R18-2-

**R18-2-803. Heater-planer Units**

No person shall cause, allow or permit to be emitted into the atmosphere from any heater-planer operated for the purpose of reconstructing asphalt pavements smoke the opacity of which exceeds 20%. However three minutes' upset time in any one hour shall not constitute a violation of this Section.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1).  
Amended effective September 26, 1990 (Supp. 90-3).  
Former Section R18-2-803 renumbered to Section R18-2-903, new Section R18-2-803 renumbered from R18-2-603 effective November 15, 1993 (Supp. 93-4).

**R18-2-804. Roadway and Site Cleaning Machinery**

- A.** No person shall cause, allow or permit to be emitted into the atmosphere from any roadway and site cleaning machinery smoke or dust for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- B.** In addition to complying with subsection (A), no person shall cause, allow or permit the cleaning of any site, roadway, or alley without taking reasonable precautions to prevent particulate matter from becoming airborne. Reasonable precautions may include applying dust suppressants. Earth or other material shall be removed from paved streets onto which earth or other material has been transported by trucking or earth moving equipment, erosion by water or by other means.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1).  
Amended effective September 26, 1990 (Supp. 90-3).  
Amended effective February 3, 1993 (Supp. 93-1). Former Section R18-2-804 renumbered to Section R18-2-

904, new Section R18-2-804 renumbered from R18-2-604 effective November 15, 1993 (Supp. 93-4).

#### **R18-2-805. Asphalt or Tar Kettles**

- A.** No person shall cause, allow or permit to be emitted into the atmosphere from any asphalt or tar kettle smoke for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%.
- B.** In addition to complying with subsection (A), no person shall cause, allow or permit the operation of an asphalt or tar kettle without minimizing air contaminant emissions by utilizing all of the following control measures:
  1. The control of temperature recommended by the asphalt or tar manufacturer;
  2. The operation of the kettle with lid closed except when charging;
  3. The pumping of asphalt from the kettle or the drawing of asphalt through cocks with no dipping;
  4. The dipping of tar in an approved manner;
  5. The maintaining of the kettle in clean, properly adjusted, and good operating condition;
  6. The firing of the kettle with liquid petroleum gas or other fuels acceptable to the Director.

#### **Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1).  
 Amended effective September 26, 1990 (Supp. 90-3).  
 Former Section R18-2-805 renumbered to Section R18-2-905, new Section R18-2-805 renumbered from R18-2-605 effective November 15, 1993 (Supp. 93-4).

### **ARTICLE 9. NEW SOURCE PERFORMANCE STANDARDS**

#### **R18-2-901. Standards of Performance for New Stationary Sources**

Except as provided in R18-2-902 through R18-2-905, the following subparts of 40 CFR 60, New Source Performance Standards (NSPS), and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

1. Subpart A - General Provisions.
2. Subpart D - Standards of Performance for Fossil-Fuel-Fired Steam Generators for Which Construction is Commenced After August 17, 1971.
3. Subpart Da - Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced After September 18, 1978.
4. Subpart Db - Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units.
5. Subpart Dc - Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units.
6. Subpart E - Standards of Performance for Incinerators.
7. Subpart Ea - Standards of Performance for Municipal Waste Combustors for Which Construction is Commenced after December 20, 1989 and on or Before September 20, 1994.
8. Subpart Eb - Standards of Performance for Large Municipal Waste Combustors for Which Construction is Commenced after September 20, 1994 or for Which Modification or Reconstruction is Commenced After June 19, 1996.

9. Subpart Ec - Standards of Performance for Hospital/Medical/Infectious Waste Incinerators for Which Construction is Commenced After June 20, 1996.
10. Subpart F - Standards of Performance for Portland Cement Plants.
11. Subpart G - Standards of Performance for Nitric Acid Plants.
12. Subpart Ga - Standards of Performance for Nitric Acid Plants for which Construction, Reconstruction, or Modification Commenced after October 14, 2011.
13. Subpart H - Standards of Performance for Sulfuric Acid Plants.
14. Subpart I - Standards of Performance for Hot Mix Asphalt Facilities.
15. Subpart J - Standards of Performance for Petroleum Refineries.
16. Subpart Ja - Standards of Performance for Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After May 14, 2007.
17. Subpart K - Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After June 11, 1973, and Prior to May 19, 1978.
18. Subpart Ka - Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After May 18, 1978, and Prior to July 23, 1984.
19. Subpart Kb - Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced after July 23, 1984.
20. Subpart L - Standards of Performance for Secondary Lead Smelters.
21. Subpart M - Standards of Performance for Secondary Brass and Bronze Production Plants.
22. Subpart N - Standards of Performance for Primary Emissions from Basic Oxygen Process Furnaces for Which Construction is Commenced After June 11, 1973.
23. Subpart Na - Standards of Performance for Secondary Emissions from Basic Oxygen Process Steelmaking Facilities for Which Construction is Commenced After January 20, 1983.
24. Subpart O - Standards of Performance for Sewage Treatment Plants.
25. Subpart P - Standards of Performance for Primary Copper Smelters.
26. Subpart Q - Standards of Performance for Primary Zinc Smelters.
27. Subpart R - Standards of Performance for Primary Lead Smelters.
28. Subpart S - Standards of Performance for Primary Aluminum Reduction Plants.
29. Subpart T - Standards of Performance for Phosphate Fertilizer Industry: Wet-Process Phosphoric Acid Plants.
30. Subpart U - Standards of Performance for Phosphate Fertilizer Industry: Superphosphoric Acid Plants.
31. Subpart V - Standards of Performance for Phosphate Fertilizer Industry: Diammonium Phosphate Plants.
32. Subpart W - Standards of Performance for Phosphate Fertilizer Industry: Triple Superphosphate Plants.
33. Subpart X - Standards of Performance for Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities.
34. Subpart Y - Standards of Performance for Coal Preparation Plants.

## Department of Environmental Quality – Air Pollution Control

35. Subpart Z - Standards of Performance for Ferroalloy Production Facilities.
36. Subpart AA - Standards of Performance for Steel Plants: Electric Arc Furnaces Constructed After October 21, 1974, and On or Before August 17, 1983.
37. Subpart AAa - Standards of Performance for Steel Plants: Electric Arc Furnaces and Argon-Oxygen Decarburization Vessels Constructed After August 7, 1983.
38. Subpart BB - Standards of Performance for Kraft Pulp Mills.
39. Subpart CC - Standards of Performance for Glass Manufacturing Plants.
40. Subpart DD - Standards of Performance for Grain Elevators.
41. Subpart EE - Standards of Performance for Surface Coating of Metal Furniture.
42. Subpart GG - Standards of Performance for Stationary Gas Turbines.
43. Subpart HH - Standards of Performance for Lime Manufacturing Plants.
44. Subpart KK - Standards of Performance for Lead-Acid Battery Manufacturing Plants.
45. Subpart LL - Standards of Performance for Metallic Mineral Processing Plants.
46. Subpart MM - Standards of Performance for Automobile and Light Duty Truck Surface Coating Operations.
47. Subpart NN - Standards of Performance for Phosphate Rock Plants.
48. Subpart PP - Standards of Performance for Ammonium Sulfate Manufacture.
49. Subpart QQ - Standards of Performance for Graphic Arts Industry: Publication Rotogravure Printing.
50. Subpart RR - Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations.
51. Subpart SS - Standards of Performance for Industrial Surface Coating: Large Appliances.
52. Subpart TT - Standards of Performance for Metal Coil Surface Coating.
53. Subpart UU - Standards of Performance for Asphalt Processing and Asphalt Roofing Manufacture.
54. Subpart VV - Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry.
55. Subpart VVa - Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry for Which Construction, Reconstruction, or Modification Commenced after November 7, 2006.
56. Subpart WW - Standards of Performance for Beverage Can Surface Coating Industry.
57. Subpart XX - Standards of Performance for Bulk Gasoline Terminals.
58. Subpart AAA - Standards of Performance for New Residential Wood Heaters.
59. Subpart BBB - Standards of Performance for Rubber Tire Manufacturing Industry.
60. Subpart DDD - Standards of Performance for Volatile Organic Compound (VOC) Emissions from the Polymer Manufacturing Industry.
61. Subpart FFF - Standards of Performance for Flexible Vinyl and Urethane Coating and Printing.
62. Subpart GGG - Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries.
63. Subpart GGGa - Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After November 7, 2006.
64. Subpart HHH - Standards of Performance for Synthetic Fiber Production Facilities.
65. Subpart III - Standards of Performance for Volatile Organic Compound (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Air Oxidation Unit Processes.
66. Subpart JJJ - Standards of Performance for Petroleum Dry Cleaners.
67. Subpart KKK - Standards of Performance for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants.
68. Subpart LLL - Standards of Performance for Onshore Natural Gas Processing; SO<sub>2</sub> Emissions.
69. Subpart NNN - Standards of Performance for Volatile Organic Compound (VOC) Emissions From Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation Operations.
70. Subpart OOO - Standards of Performance for Nonmetallic Mineral Processing Plants.
71. Subpart PPP - Standards of Performance for Wool Fiberglass Insulation Manufacturing Plants.
72. Subpart QQQ - Standards of Performance for VOC Emissions From Petroleum Refinery Wastewater Systems.
73. Subpart RRR - Standards of Performance for Volatile Organic Compound Emissions From Synthetic Organic Chemical Manufacturing Industry (SOCMI) Reactor Processes.
74. Subpart SSS - Standards of Performance for Magnetic Tape Coating Facilities.
75. Subpart TTT - Standards of Performance for Industrial Surface Coating: Surface Coating of Plastic Parts for Business Machines.
76. Subpart UUU - Standards of Performance for Calciners and Dryers in Mineral Industries.
77. Subpart VVV - Standards of Performance for Polymeric Coating of Supporting Substrates Facilities.
78. Subpart WWW - Standards of Performance for Municipal Solid Waste Landfills.
79. Subpart AAAA - Standards of Performance for Small Municipal Waste Combustion Units for Which Construction Is Commenced after August 30, 1999, or for Which Modification or Reconstruction Is Commenced after June 6, 2001.
80. Subpart CCCC - Standards of Performance for Commercial and Industrial Solid Waste Incineration Units for Which Construction Is Commenced after November 30, 1999, or for Which Modification or Reconstruction Is Commenced on or after June 1, 2001.
81. Subpart EEEE - Standards of Performance for Other Solid Waste Incineration Units for Which Construction is Commenced After December 9, 2004, or for Which Modification or Reconstruction is Commenced on or After June 16, 2006.
82. Subpart IIII - Standards of Performance for Stationary Compression Ignition Combustion Engines.
83. Subpart JJJJ - Standards of Performance for Stationary Spark Ignition Internal Combustion Engines.
84. Subpart KKKK - Standards of Performance for Stationary Combustion Turbines.
85. Subpart LLLL - Standards of Performance for New Sewage Sludge Incineration Units.
86. Subpart OOOO - Standards of Performance for Crude Oil and Natural Gas Production, Transmission and Distribution.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Amended effective February 3, 1993 (Supp. 93-1). Section R18-2-901 renumbered to R18-2-1101, new Section R18-2-901 renumbered from R18-2-801 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999, and at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expediated rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

**R18-2-902. General Provisions**

- A.** As used in 40 CFR 60: “Administrator” means the Director of the Arizona Department of Environmental Quality, except that the Director shall not be authorized to approve alternate or equivalent test methods or alternative standards or work practices.
- B.** From the general standards identified in R18-2-901, delete the following:
- 40 CFR 60.4. All requests, reports, applications, submittals, and other communications to the Director pursuant to this Article shall be submitted to the Arizona Department of Environmental Quality, Air Quality Division, 1110 West Washington Street, Phoenix, Arizona 85007.
  - 40 CFR 60.5 and 60.6.
- C.** The Director shall not be delegated authority to deal with equivalency determinations or innovative technology waivers as covered in Sections 111(h)(3) and 111(j) of the Act.

**Historical Note**

Adopted effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Section R18-2-902 renumbered to R18-2-1102, new Section R18-2-902 renumbered from R18-2-802 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4).

**R18-2-903. Standards of Performance for Fossil-fuel Fired Steam Generators**

As exceptions to 40 CFR 60.40 through 60.47:

- In place of 40 CFR 60.43(a)(2), the following language shall be substituted: 340 nanograms per joule heat input (0.8 pounds per million Btu) derived from solid fossil fuel or solid fossil fuel and wood residue.
- Delete 40 CFR 60.43(b).
- If an owner or operator of a fossil-fuel fired steam generator obtained an installation permit for two or more fuel-burning equipment or steam-power generating installations before May 14, 1979, that permitted the installation to comply with the sulfur dioxide emission standards

specified in R18-2-901 and this Section as if the equipment or installations were one emission discharge point:

- The owner or operator shall comply with the applicable sulfur dioxide emission standards in the manner specified in the installation permit;
  - The Department shall incorporate the emission standards under subsection (3)(a) into each owner’s or operator’s operating permit as an enforceable permit condition;
  - No single fuel-burning equipment or steam-power generating installation shall emit sulfur dioxide in excess of:
    - 520 nanograms per joule heat input (1.2 pounds per million BTU) for solid fossil fuel or solid fossil fuel and wood residue; or
    - 340 nanograms per joule heat input (0.8 pounds per million BTU) for liquid fossil fuel or liquid fossil fuel and wood residue.
4. When an owner or operator subject to subsection (3) changes the equipment configuration so that each fuel-burning equipment or steam-powered generating installation constitutes one emission discharge point:
- The owner or operator shall comply with the emissions standards specified in subsection (1) and R18-2-901; and
  - The Department shall incorporate the emissions standards into the owner’s or operator’s operating permit as enforceable permit conditions.

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-903 renumbered without change as Section R18-2-903 (Supp. 87-3). Repealed effective February 26, 1988 (Supp. 88-1). New Section R18-2-903 renumbered from R18-2-803 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 14 A.A.R. 230, effective March 8, 2008 (Supp. 08-1).

**R18-2-904. Standards of Performance for Incinerators**

- A.** Incinerators with a charging rate of more than 45 metric tons or 49.6 tons per day shall conform to the requirements of 40 CFR 60.50 through 60.54.
- B.** Incinerators with a charging rate of 45 metric tons or 49.6 tons per day or less that commence construction or modification after May 14, 1979, shall conform to the requirements of 40 CFR 60.52 through 60.54 and of R18-2-704(A).

**Historical Note**

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-904 renumbered without change as Section R18-2-904 (Supp. 87-3). Repealed effective February 26, 1988 (Supp. 88-1). New Section R18-2-904 renumbered from R18-2-804 and amended effective November 15, 1993 (Supp. 93-4).

**R18-2-905. Standards of Performance for Storage Vessels for Petroleum Liquids**

In addition to 40 CFR 60.110 - 60.113:

- Any petroleum liquid storage tank of less than 40,000 gallons (151,412 liters) capacity shall be equipped with a submerged filling device or acceptable equivalent as determined by the Director for the control of hydrocarbon emissions.
- All facilities for dock loading of petroleum products having a vapor pressure of 2.0 pounds per square inch absolute, or greater, at loading pressure shall provide for

submerged filling or other acceptable equivalent for control of hydrocarbon emissions.

3. All pumps and compressors which handle volatile organic compounds shall be equipped with mechanical seals or other equipment of equal efficiency to prevent the release of organic contaminants into the atmosphere.

#### Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-905 renumbered without change as Section R18-2-905 (Supp. 87-3). Repealed effective February 26, 1988 (Supp. 88-1). New Section R18-2-905 renumbered from R18-2-805 effective November 15, 1993 (Supp. 93-4).

### ARTICLE 10. MOTOR VEHICLES; INSPECTIONS AND MAINTENANCE

#### R18-2-1001. Definitions

In this Article, unless the context otherwise requires:

1. Abbreviations and symbols are as follows:
  - a. "A/F" means air/fuel,
  - b. "CO" means carbon monoxide.
  - c. "CO<sub>2</sub>" means carbon dioxide.
  - d. "EGR" means exhaust gas recirculation.
  - e. "GVWR" means gross vehicle weight rating.
  - f. "HC" means hydrocarbon.
  - g. "HP" means horsepower.
  - h. "LNG" means liquefied natural gas.
  - i. "LPG" means liquid petroleum gas.
  - j. "MIL" means Malfunction Indicator Lamp.
  - k. "MPH" means miles per hour.
  - l. "MVD" means the Motor Vehicle Division of the Arizona Department of Transportation.
  - m. "NDIR" means nondispersive infrared.
  - n. "NO<sub>x</sub>" means the sum of nitrogen oxide and nitrogen dioxide.
  - o. "%" means percent.
  - p. "OEM" means original equipment manufacturer.
  - q. "OBD" means On-Board Diagnostics.
  - r. "PCV" means positive crankcase ventilation.
  - s. "PPM" means parts per million by volume.
  - t. "RPM" means revolutions per minute.
  - u. "VIN" means vehicle identification number.
2. "Annual test" means any vehicle emissions test that is not a biennial test.
3. "Apportioned vehicle" means a vehicle that is subject to the proportional registration provisions of A.R.S. § 28-2233.
4. "Area A" has the meaning in A.R.S. § 49-541.
5. "Area A vehicle" means a motor vehicle subject to emissions inspection and that is:
  - a. Registered or to be registered within area A;
  - b. Owned by or leased to a person having a valid fleet permit and customarily kept in area A;
  - c. A government vehicle customarily kept in area A;
  - d. Used to commute to the driver's principal place of employment located in area A; or
  - e. Parked, will be parked, or is the subject of a parking permit application at an institution located in area A and subject to the requirements of A.R.S. §§ 15-1444(C) or 15-1627(G).
6. "Area B" has the meaning in A.R.S. § 49-541.
7. "Area B vehicle" means a motor vehicle subject to emissions inspection and that is:
  - a. Registered or to be registered within area B;
  - b. Owned by or leased to a person having a valid fleet permit and customarily kept in area B;
  - c. A government vehicle customarily kept in area B;
  - d. Used to commute to the driver's principal place of employment located in area B; or
  - e. Parked, will be parked, or is the subject of a parking permit application at an institution located in area B and subject to the requirements of A.R.S. §§ 15-1444(C) or 15-1627(G).
8. "Biennial test" means the transient loaded emissions test and evaporative system tests required under R18-2-1006(E)(2), or the OBD test for area A vehicles under R18-1006(E)(3).
9. "Calibration gas" means a gas with assigned concentrations of CO, hexane, or CO<sub>2</sub> that is used by a state inspector to check the accuracy of emissions analyzers.
10. "Certificate of compliance" means a serially numbered document issued by a state station at the time of a vehicle

- inspection indicating that the vehicle has met the emissions standards.
11. "Certificate of exemption" means a serially numbered document issued by the Director exempting a vehicle from inspection that is not available within the state for an inspection during the 90 days before the emissions compliance expiration date.
  12. "Certificate of inspection" means a serially numbered document issued by the Director indicating that a vehicle has been inspected under A.R.S. § 49-546 and has passed inspection.
  13. "Certificate of waiver" means a serially numbered document issued by the Department or a fleet inspector other than an auto dealer licensed to sell used motor vehicles under A.R.S. Title 28, indicating that the requirement of passing reinspection has been waived for a vehicle under A.R.S. § 49-542.
  14. "Conditioning mode" means either a fast idle condition or a loaded condition as defined in this Section.
  15. "Constant 4-wheel drive vehicle" means any 4-wheel drive vehicle that cannot be converted to 2-wheel drive except by disconnecting one of the vehicle's drive shafts.
  16. "Constant volume sampler" means a system that dilutes engine exhaust to be sampled with ambient air so that the total combined flow rate of exhaust and dilution air mix is nearly constant for all engine operating conditions.
  17. "Contractor" means a person, business, firm, partnership, or corporation with whom the Director has a contract that provides for the operation of one or more official emissions inspection stations.
  18. "Curb idle test" means an exhaust emissions test conducted with the engine of the vehicle running at the manufacturer's idle speed  $\pm$  100 RPM but without pressure exerted on the accelerator.
  19. "Curb weight" means a vehicle's unloaded weight without fuel and oil plus 300 pounds.
  20. "Dealer" means a person or organization licensed by the Arizona Department of Transportation as a new motor vehicle dealer, used motor vehicle dealer, or motorcycle dealer.
  21. "Department" means the Department of Environmental Quality.
  22. "Director" means the Director of the Department of Environmental Quality.
  23. "Director's certificate" means a serially numbered document issued by the Director in certain circumstances for the vehicle to show evidence of meeting the minimum standards for registration or reregistration under R18-2-1019 or R18-2-1022.
  24. "Electrically-powered vehicle" means a vehicle that uses electricity as the means of propulsion and does not require the combustion of fossil fuel within the confines of the vehicle to generate electricity.
  25. "Emissions compliance expiration date" means:
    - a. Each registration expiration date for a vehicle subject to an annual test; and
    - b. The registration expiration date in the second year after the initial biennial test required under this Article or R18-2-1005(B) for a vehicle subject to a biennial test.
  26. "Emissions inspection station permit" means a certificate issued by the Director authorizing the holder to perform vehicle emissions inspections under this Article.
  27. "Exhaust emissions" means products of combustion emitted into the atmosphere from any opening in the exhaust system downstream of the exhaust ports of a motor vehicle engine.
  28. "Exhaust pipe" means the pipe that attaches to the muffler and exits the vehicle.
  29. "Fast idle condition" means to operate a vehicle by running the engine at 2,500 RPM,  $\pm$  300 RPM, for up to 30 seconds, with the transmission in neutral, to prepare the vehicle for a subsequent curb idle test.
  30. "Fast pass or fast fail algorithm" means a procedure in a vehicle emissions testing system that logically determines whether a vehicle will pass or fail the transient loaded emissions test under R18-2-1006(E)(2) before the test is over.
  31. "Fleet emissions inspection station" or "fleet station" means any vehicle emissions inspection facility operated under a permit issued under A.R.S. § 49-546.
  32. "Fuel" means any material that is burned within the confines of a vehicle to propel the vehicle.
  33. "Four-stroke vehicle" means a vehicle equipped with an engine that requires two revolutions of the crankshaft for each piston power stroke.
  34. "Golf cart" means a motor vehicle that has not less than three wheels in contact with the ground, has an unladen weight less than 1,300 pounds, is designed to be and is operated at not more than 15 MPH, and is designed to carry golf equipment and persons.
  35. "Government vehicle" means a registered motor vehicle exempt from the payment of a registration fee, or a federally owned or leased vehicle.
  36. "Gross vehicle weight rating" (GVWR) means the maximum vehicle weight that a vehicle is designed for as established by the manufacturer.
  37. "Inspection" means the mandatory vehicle emissions inspection including the tampering inspection.
  38. "Inspection sticker" means a self-adhesive, serially numbered rectangular sticker indicating a government vehicle has met Arizona emissions inspection requirements.
  39. "Loaded condition" means to condition a vehicle by running the vehicle on a chassis dynamometer at a specified speed and load for no more than 30 seconds to prepare the vehicle for a subsequent curb idle test.
  40. "Loaded cruise test" means an exhaust emissions test conducted on a chassis dynamometer under R18-2-1006(E)(1)(a) and (F)(2)(a).
  41. "Mass emissions measurement" means measurement of a vehicle's exhaust in mass units such as grams.
  42. "Model year" means the date of manufacture of the original vehicle within the annual production period of the vehicle as designated by the manufacturer or, if a reconstructed vehicle, the first year of titling.
  43. "MOL percent" means the percent, by volume, that a particular gas occupies in a mixture of gases at a uniform temperature.
  44. "Motorcycle" means a motor vehicle, other than a tractor, having a seat or saddle for use of the rider and designed to travel on not more than three wheels in contact with the ground.
  45. "Motorhome" means a vehicle built on a truck or bus chassis and equipped as a self-contained traveling home.
  46. "New aftermarket catalytic converter" or "new aftermarket converter" means a catalytic converter, except for an OEM, that meets the standards under 40 CFR 86.
  47. "Official emissions inspection station" means an inspection facility, other than a fleet emissions inspection station, whether placed in a permanent structure or in a mobile unit for conveyance to various locations within

- the state, for the purpose of conducting inspections under A.R.S. § 49-542.
48. “On-board diagnostics test” means a method of emissions testing using the on-board computer systems of a 1996 or newer vehicle, to diagnose and report on the status of the engine’s emissions systems by connecting a scan tool to the vehicle’s data link connector.
  49. “Opacity” means the degree of absorption of transmitted light.
  50. “Operational air pump” means an air injection system to supply additional air into the exhaust system to promote further oxidation of HC and CO gases and to assist in catalytic reaction.
  51. “Person” means the federal government, state, or any federal or state agency or institution, any municipality, political subdivision, public or private corporation, individual, partnership, association, or other entity, and includes any officer or governing or managing body of any municipality, political subdivision, or public or private corporation.
  52. “Reconditioned OEM catalytic converter” or “reconditioned OEM converter” means a used OEM reconditioned equivalent or an OEM converter that has had the pellets replaced with new or used OEM equivalent pellets and that also meets the standards under 40 CFR 86.
  53. “Recognized repair facility” means a business with an Arizona transaction privilege tax license whose primary purpose is vehicle repair, and who has at least one employee with a nationally recognized certification for emissions-related diagnosis and repair.
  54. “Reconstructed vehicle” means:
    - a. A reconstructed special as identified by the code letters “SP” on the section of the vehicle’s Arizona registration card or Arizona certificate of title reserved for identification of the vehicle’s style; or
    - b. A vehicle in which the vehicle style is not shown on the Arizona registration card or certificate of title, and the original manufacturer of the complete vehicle cannot be identified from the body.
  55. “Standard gases” means gases maintained as a primary standard for determining the composition of working gases, calibration gases, or the accuracy of an emissions analyzer.
  56. “State inspector” means an employee of the Department designated to perform quality assurance or waiver functions under this Article.
  57. “State station” means an official emissions inspection station operated by a contractor.
  58. “Tampering” means removing, defeating, or altering an emissions control device that was installed on a vehicle at the time the vehicle was manufactured. For the purposes of this Article, defeating includes failure to repair any malfunctioning emission control system or device.
  59. “Two-stroke vehicle” means a vehicle equipped with an engine that requires one revolution of the crankshaft for each power stroke.
  60. “Unloaded fast idle test” means an exhaust emissions test conducted with the engine of the vehicle running at 2,500 RPM.
  61. “Vehicle” means any automobile, truck, truck tractor, motor bus, or self-propelled or motor-driven vehicle registered or to be registered in this state and used upon the public highways of this state for the purpose of transporting persons or property, except implements of husbandry, roadrollers, or road machinery temporarily operated upon the highway.
  62. “Vehicle emissions inspector” means an individual who is licensed by the Director to perform vehicle emissions inspections under this Article.
  63. “Working gases” means gases maintained to perform periodic calibration of an emissions analyzer.
- Historical Note**
- Former Section R9-3-1001 repealed, new Section R9-3-1001 adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1001 repealed, former Section R9-3-1002 renumbered and amended as Section R9-3-1001 effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1001 renumbered as Section R18-2-1001 and amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).
- R18-2-1002. Reserved**
- R18-2-1003. Vehicles to be Inspected by the Mandatory Vehicle Emissions Inspection Program**
- A.** The following vehicles shall be inspected according to this Article at a state station or a fleet station unless exempted by subsection (B):
1. A vehicle to be registered or reregistered within area A or area B for highway use. For the purposes of this Article, registration or reregistration within area A or area B shall be determined by the vehicle owner’s permanent and actual residence. The permanent address in the MVD database shall be presumed to be the owner’s permanent and actual residence. A post office box address listed on a title or registration document under A.R.S. § 28-2051(C) is not evidence of the owner’s permanent and actual residence;
  2. Each vehicle delivered to a retail purchaser by a dealer licensed to sell used motor vehicles for highway use under A.R.S. Title 28 and whose place of business is located in area A or area B;
  3. Each vehicle registered outside area A and area B but used to commute to the driver’s principal place of employment located within area A or area B;
  4. Each vehicle owned by a person who is subject to A.R.S. §§ 15-1444(C) or 15-1627(G); and
  5. An area A or area B vehicle located out-of-state for more than 90 days before vehicle registration expiration shall be emissions tested at an official emissions inspection testing center in the area where it is located. If no official emissions testing program is available in the area for that vehicle, the vehicle shall meet the testing requirements under this Article within 15 calendar days of returning to Arizona.
- B.** The following vehicles are exempt from the inspection requirements of this Article:
1. A vehicle manufactured in or before the 1966 model year;
  2. A vehicle leased to a person residing outside area A and area B by a leasing company whose place of business is in area A or area B, except as provided in subsection (A)(3);
  3. A vehicle sold between motor vehicle dealers;
  4. An electrically-powered vehicle;
  5. An apportioned vehicle;
  6. A golf cart;

## Department of Environmental Quality – Air Pollution Control

7. A vehicle with an engine displacement of less than 90 cubic centimeters;
  8. A vehicle registered at the time of change of name of ownership except when:
    - a. The change in registration is accompanied by the required fee for the year following expiration of the prior registration, or
    - b. The change results from the sale by a dealership whose place of business is located in area A or area B;
  9. A vehicle for which a current certificate of exemption or Director's certificate is issued;
  10. A vehicle of a model year the same as, or newer than, the current calendar year and a vehicle of the prior four model years, except:
    - a. A reconstructed vehicle;
    - b. An alternative fuel vehicle, as defined in A.R.S. § 43-1086, and
    - c. A vehicle failing an emissions inspection the owner chooses to have under A.R.S. § 49-543.
  11. A vehicle designed to operate exclusively on hydrogen, as defined in A.R.S. § 1-215.
- C.** Government vehicles operated in area A or area B and not exempted by this Article shall be emissions inspected according to R18-2-1017.

**Historical Note**

Former Section R9-3-1003 repealed, new Section R9-3-1003 adopted effective January 13, 1976; Amended as an emergency effective January 19, 1976 (Supp. 76-1). Amended effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1003 as amended effective January 3, 1979 and amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1003 renumbered as Section R18-2-1003 and amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended effective October 15, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 2722, effective June 28, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

**R18-2-1004. Repealed****Historical Note**

Former Section R9-3-1004 repealed, new Section R9-3-1004 adopted effective January 13, 1976 (Supp. 76-1). Amended effective January 3, 1977 (Supp. 77-1). Former Section R9-3-1004 renumbered as Section R18-2-1004 and amended effective August 1, 1988 (Supp. 88-3). Section repealed by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

**R18-2-1005. Time of Inspection**

- A.** Area A vehicles subject to an annual test, all area B vehicles, and vehicles sold or offered for sale by dealers required to be inspected under R18-2-1003, shall be inspected at the following times:

1. For a vehicle not covered by a fleet station permit, within 90 days before each registration expiration date;
  2. For a vehicle sold by a dealer licensed to sell used motor vehicles under A.R.S. Title 28, whose place of business is located in area A or area B, before delivery of the vehicle to the retail purchaser;
  3. For a consignment vehicle offered for sale by a dealer licensed to sell used motor vehicles under A.R.S. Title 28 whose place of business is located in area A or area B, before delivery of the vehicle to the retail purchaser. The consignment vehicle shall be inspected at a state station according to R18-2-1006;
  4. For government vehicles:
    - a. For a vehicle not exempt under R18-2-1003(B)(10), within 12 months after acquisition by the operating entity and then annually on or before the anniversary date of the previous inspection;
    - b. For a vehicle exempt under R18-2-1003(B)(10), within 90 days after the vehicle becomes subject to testing, and then annually on or before the anniversary date of the previous inspection and;
    - c. A vehicle is subject to testing on the anniversary of its date of acquisition;
  5. For a vehicle owned by or leased to a person having a valid fleet station permit, at least once within each 12-month period following any original registration or reregistration;
  6. For a vehicle to be registered in area A or area B under conditions not specified in subsection (1) through (5), within 90 days before registration;
  7. For a vehicle registered outside area A and area B and used to commute to the driver's principal place of work located in area A or area B, upon vehicle registration or reregistration;
  8. For a vehicle owned by a person subject to A.R.S. §§ 15-1444(C) or 15-1627(G), within 30 calendar days following the date of initial registration at the institution located in area A or area B and annually thereafter; and
  9. For a vehicle issued a certificate of exemption under R18-2-1023, within 15 calendar days after returning to Arizona, unless an official emissions inspection document from the out-of-state emissions inspection station is submitted with the request for exemption.
- B.** An area A vehicle subject to a biennial test shall be inspected at the following times:
1. For a vehicle not covered by a fleet station permit, within 90 days before the vehicle's emissions compliance expiration date.
  2. For a government vehicle;
    - a. For a vehicle not exempt under R18-2-1003(B)(10), within 12 months after acquisition by the operating entity, and biennially thereafter, on or before the anniversary date of the previous inspection;
    - b. For a vehicle exempt under R18-2-1003(B)(10), within 90 days after the vehicle becomes subject to testing, and biennially thereafter, on or before the anniversary date of the previous inspection; and
    - c. The vehicle becomes subject to testing on the anniversary of its date of acquisition;
  3. For a vehicle owned by or leased to a person having a valid fleet station permit, at least once within each successive 24-month period following original registration;
  4. For a vehicle registered outside area A but used to commute to the driver's principal place of work located in area A, upon vehicle registration and biennially thereafter;

5. For a vehicle owned by a person subject to A.R.S. §§ 15-1444(C) or 15-1627(G), within 30 days following the date of initial registration at the institution located in area A and biennially thereafter;
  6. For a vehicle to be registered as area A vehicles under conditions not specified in subsections (1) through (5), upon initial registration and within 90 days before the vehicle's emissions compliance expiration date thereafter and;
  7. For a vehicle issued a certificate of exemption under R18-2-1023, within 15 calendar days after returning to Arizona, unless an official emissions inspection document indicating compliance with the emissions requirements from the out-of-state emissions inspection station is submitted with the request for exemption.
- C.** A used vehicle not registered as an area A or area B vehicle shall be inspected according to this Article before registration as an area A or area B vehicle unless exempted by R18-2-1003(B).
- D.** An area B vehicle being registered in area A is subject to the appropriate annual or biennial test from area A before registration even if the emissions compliance period for area B has not yet expired.
- E.** A new vehicle that is exempt from emissions testing under R18-2-1003(B)(10), and subject to either an annual or biennial test, shall be tested before registration in the calendar year that exceeds the vehicle's model year by five years.
- F.** Nothing in this Section shall be construed to waive a late registration fee because of failure to meet inspection requirements by the registration deadline, except that a motor vehicle that fails the initial or subsequent test shall not be subject to a penalty fee for late registration renewal if:
1. The initial test is accomplished before the emissions compliance expiration date, and
  2. The registration renewal is received by MVD within 30 days of the initial test.
- G.** An owner of a vehicle subject to subsection (A)(1), (A)(6), (B)(1), or (B)(6) may submit the vehicle for emissions inspection more than 90 days before the emissions compliance expiration date but the inspection does not satisfy the registration or reregistration testing requirement under R18-2-1003.

#### Historical Note

Former Section R9-3-1005 repealed, new Section R9-3-1005 adopted effective January 31, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended effective February 20, 1980 (Supp. 80-1).  
 Amended as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-2). Former Section R9-3-1005 as amended effective February 20, 1980 and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1005 renumbered as Section R18-2-1005 and subsections (A) and (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### R18-2-1006. Emissions Test Procedures

- A.** Each vehicle inspected at a state station shall be visually inspected before the emissions test for the following unsafe or untestable conditions:
1. A fuel leak that causes wetness or pooling of fuel;
  2. A continuous engine or transmission oil leak onto the floor;
  3. A continuous engine coolant leak onto the floor such that the engine is overheating or may overheat within a short time;
  4. A vehicle with a tire on a driving wheel with less than 2/32-inch tread, with metal protuberances, unmatched tire size, with obviously low tire pressure as determined by visual inspection, or any other condition that precludes a loaded test for reasons of personnel, equipment, or vehicle safety;
  5. An exhaust pipe that does not exit the rear or side of the vehicle to allow for safe exhaust probe insertion;
  6. An exhaust pipe on a diesel-powered vehicle that does not allow for safe exhaust probe insertion and attachment of opacity meter sensor units;
  7. Improperly operating brakes;
  8. Any vehicle modification or mechanical condition that prevents dynamometer operation; and
  9. Any other condition deemed unsafe or untestable by the inspector, including loud internal engine noise or an obvious exhaust leak.
- B.** A vehicle emissions inspection shall not be performed by an official emissions inspection station on any vehicle towing a heavily loaded trailer, carrying a heavy load, loaded with explosives, or loaded with any hazardous material not used as fuel for the vehicle.
- C.** Any vehicle unsafe or otherwise untestable as determined by the visual inspection shall be rejected without an emissions test. The inspector shall notify the vehicle owner or operator of all unsafe conditions found on rejected vehicles. The state station shall not charge a fee if the vehicle is rejected. The contractor shall not conduct an emissions test on a vehicle rejected for a safety reason or any other untestable condition until the cause for rejection is repaired.
- D.** When conducting the emissions test required by this Section, the vehicle emissions inspector shall meet all of the following requirements:
1. The vehicle shall be tested in the condition presented, unless rejected under subsection (A), (B), or (C). The vehicle's engine shall be operating at normal temperature and not be overheating as indicated by a gauge, warning light, or boiling radiator. All of the vehicle's accessories shall be turned off during testing.
  2. A vehicle designed to operate with more than one fuel shall be tested on the fuel in use when the vehicle is presented for inspection, except alternative fuel vehicles, as defined in A.R.S. § 43-1086. The inspector shall test the alternative fuel vehicle on each fuel for which it is intended to operate, using the appropriate emissions test procedure and standards for that vehicle. The alternative fuel vehicle shall:
    - a. Be operated a minimum of 30 seconds before testing, after switching fuels;
    - b. Be rejected if it is not able to operate on both fuels; and
    - c. Be rejected if the vehicle operator cannot switch fuels.
  3. A vehicle operated exclusively on propane or natural gas, as defined in A.R.S. § 1-215, shall be exempt from the gas cap and evaporative pressure testing described in subsection (E)(6)(b)(ii), (E)(7)(a), and (F)(7)(a).

- E. In area A, the inspection test procedures for a vehicle other than a diesel-powered vehicle or a vehicle held for resale by a fleet-licensed motor vehicle dealer shall consist of the following:
1. A vehicle manufactured with a model year of 1967 through 1980, a nonexempt vehicle with a GVWR greater than 8,500 pounds, and a reconstructed vehicle, except a motorcycle and a constant 4-wheel drive vehicle, is required to annually take and pass a loaded cruise test and a curb idle test, as follows:
    - a. Loaded cruise test. The vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1 of this Article, in drive for automatic transmission or second or higher gear for manual transmission. Overdrive shall not be used for testing. All vehicles shall be driven by the inspector during testing. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. After exhaust emissions are recorded, engine speed shall be returned to idle for a curb idle test.
    - b. Curb idle test. The test shall be performed with the vehicle in neutral for 1981 and newer vehicles. For 1980 and older vehicles, the test shall be performed in neutral, except that if the vehicle has an automatic transmission, drive shall be used. Engine RPM shall be within  $\pm 100$  RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. A CO<sub>2</sub> plus CO reading of 6% or greater shall be registered to establish test validity. A CO<sub>2</sub> plus CO reading of less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired, except when tested at a fleet emissions inspection station.
    - c. Exhaust sampling for a vehicle required to take an annual emissions test under subsection (E)(1) shall comply with subsection (F)(8).
  2. A vehicle with a 1981 or newer model year and a GVWR of 8,500 pounds or less, except a motorcycle, a reconstructed vehicle, a 1996 or newer OBD-equipped vehicle or a constant 4-wheel drive vehicle, is required to biennially take and pass a transient loaded emissions test and an evaporative system pressure test as follows:
    - a. The transient loaded emissions test shall consist of 147 seconds of mass emissions measurement using a constant volume sampler while the vehicle is driven by an inspector through a computer-monitored driving cycle on a dynamometer with inertial weight settings appropriate for the weight of the vehicle. The driving cycle shall include the acceleration, deceleration, and idle operating modes described in Table 4. The 147 second sequence may be ended earlier using a fast pass or fast fail algorithm. A retest algorithm shall be used to determine if a test failure is due to insufficient vehicle preconditioning. As determined by the retest algorithm, up to two additional tests may be performed on a failing vehicle. Drive shall be used for automatic transmissions and first gear shall be used to begin for manual transmissions. Exhaust emissions concentrations in grams per mile for HC, CO, NO<sub>x</sub> and CO<sub>2</sub> shall be recorded continuously beginning with the first second. The inspector shall reject a vehicle with an audible or visible exhaust leak from emissions testing.
    - b. The evaporative system pressure test shall consist of the following steps in sequence:
      - i. Connect the test equipment to either the fuel tank vent hose at the canister or the fuel tank filler neck. The gas cap shall be checked to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge;
      - ii. Pressurize the system to  $14 \pm 0.5$  inches of water without exceeding 26 inches of water system pressure;
      - iii. Close off the pressure source, seal the evaporative system, and monitor pressure decay for no more than two minutes.
    - c. For a vehicle requiring a transient loaded emissions test under subsection (E)(2)(a), all testing and test equipment shall conform to "IM240 & Evap Technical Guidance," EPA420-R-98-010, EPA, August 1998, incorporated by reference, and no future editions or amendments, except that the transient driving cycle in Table 4 of this Article shall be used. A copy of the incorporated material is on file with the Department and the Secretary of State, and may be obtained at EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105-2498.
  3. A vehicle with a 1996 or newer model year and a GVWR of 8500 pounds or less, except a motorcycle or a reconstructed vehicle, is required to biennially take and pass an OBD test and a functional gas cap test as follows:
    - a. The OBD test shall consist of:
      - i. A visual inspection of the MIL function; and
      - ii. An electronic examination of the OBD computer by connecting a scan tool to the data link connector and interrogating the OBD system to determine vehicle readiness status, MIL status, and presence of diagnostic trouble codes.
    - b. The OBD test and test equipment shall conform to "Performing Onboard Diagnostic System Checks as Part of a Vehicle Inspection and Maintenance Program," EPA420-R-01-015, EPA, June 2001, incorporated by reference, and no future editions or amendments. A copy of this incorporated material is on file with the Department and the Secretary of State, and may be obtained at the EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI, 48105-2498; and
    - c. The functional gas cap test shall comply with subsection (E)(7)(a).
  4. A motorcycle, or a constant 4-wheel drive vehicle except one requiring an OBD emissions test under subsection (E)(3), shall take and pass only a curb idle test according to subsection (F)(1). An all-terrain vehicle (ATV), as defined in A.R.S. § 28-101, shall be tested as a motorcycle.
  5. A vehicle with a 1975 or newer model year is required to take and pass a liquid fuel leak inspection annually or biennially according to subsections (E)(1) or (2) as follows:
    - a. For purposes of this subsection, "liquid fuel leak" means any fuel emanating from a vehicle's fuel delivery, metering or evaporation systems in liquid form that has created a visible drop or more of fuel

- on, around, or under a component of a vehicle's fuel delivery, metering, or evaporation system.
- b. With the engine running, the vehicle emissions inspector shall visually inspect the following components of the vehicle, if they are exposed and visually accessible, for liquid fuel leaks:
    - i. Gasoline fuel tanks;
    - ii. Gasoline fill pipes, associated hoses and fuel tank connections;
    - iii. Gas caps;
    - iv. External fuel pumps;
    - v. Fuel delivery and return lines and hoses;
    - vi. Fuel filters;
    - vii. Carburetors;
    - viii. Fuel injectors;
    - ix. Fuel pressure regulators;
    - x. Charcoal canisters; and
    - xi. Fuel vapor hoses.
    - xii. Any valves connected to any other fuel evaporative component.
  - c. The liquid fuel leak inspection required by this subsection is a visual inspection only. The vehicle emissions inspector is not required to perform any disassembly of the vehicle to inspect for liquid fuel leaks. No special tools or equipment, other than a flashlight and mirror, are required and no raising, hoisting, or lifting of the vehicle is required.
  - d. The vehicle emissions inspector shall indicate on the vehicle inspection report the location of any liquid fuel leak.
  - e. Nothing in this subsection shall prohibit a vehicle emissions inspector from refusing to inspect a vehicle under subsections (A), (B), or (C) or from terminating an inspection if a liquid fuel leak presents a safety hazard.
  - f. A vehicle operated exclusively by compressed natural gas (CNG), liquid natural gas (LNG), or liquid petroleum gas (LPG) shall be exempt from the liquid fuel leak inspection.
6. The emissions pass-fail determination for a vehicle tested under subsection (E) shall be made as follows:
- a. A vehicle tested under subsection (E)(1), that does not exceed the loaded cruise mode or curb idle mode HC and CO emissions standards listed in Table 2 for the vehicle, complies with the emissions standards in Table 2. The loaded cruise test standards in Table 2 apply to a fleet vehicle tested with the 2,500 RPM unloaded fast idle test under R18-2-1019(E).
  - b. A vehicle tested under subsection (E)(2) shall meet the standards in Table 3 and pass the evaporative system pressure test as follows:
    - i. Table 3 Standards. A vehicle shall meet either the composite standard for the whole test or the phase 2 standard for seconds 65 to 146. The Department may implement a testing algorithm for fast pass, fast fail, or both, provided that the algorithm is reliable in accurately predicting the final outcome of the entire cycle. A vehicle not meeting either the composite or phase 2 standard shall fail the emissions test.
    - ii. Evaporative System Pressure Test. A vehicle fails the emissions test if the evaporative system cannot maintain a system pressure above eight inches of water for at least two minutes after being pressurized to  $14 \pm 0.5$  inches of water. Additionally, a vehicle fails the evaporative test if the canister is missing or damaged, if a hose or electrical connection is missing, routed incorrectly, or disconnected, according to the vehicle emissions control information label, or if the gas cap is missing.
  - c. A vehicle that operates on natural gas complies with HC emissions standards if the HC emissions value does not exceed the applicable standard in subsection (E)(6)(a) or (b), if:
    - i. Multiplied by 0.19, when using an analyzer with a flame ionization detector, or
    - ii. Multiplied by 0.61, when using an NDIR analyzer.
  - d. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (E)(3), that does not exceed the curb idle mode HC and CO emissions standards listed in Table 2 on either the first curb idle test or the second curb idle test passes the emissions test.
  - e. A vehicle tested under subsection (E)(3) shall:
    - i. Fail if the data link connector is missing, tampered, or otherwise inoperable during any OBD test;
    - ii. Fail if the MIL does not illuminate at all when the ignition key is turned to the key on, engine off position, or does not illuminate briefly during engine start during any OBD test;
    - iii. Fail if the MIL illuminates continuously or flashes after the engine has been started during any OBD test;
    - iv. Fail if a diagnostic trouble code is present and the MIL status, as indicated by the scan tool, is commanded on during any OBD test.
    - v. Be rejected from an initial OBD test and required to take and pass a transient loaded test under subsection (E)(2) if the number of unset readiness indicators, excluding continuous indicators, is three or more for a model year 1996-2000 vehicle, or two or more for a model year 2001 and newer vehicle.
    - vi. Be rejected from an OBD retest if the number of unset readiness indicators, excluding continuous indicators, exceeds the number allowed in subsection (v).
    - vii. Fail the functional gas cap test if the gas cap does not comply with subsection (E)(7)(a).
  - f. A vehicle tested under subsection (E)(5) shall fail the inspection if a vehicle emissions inspector detects a liquid fuel leak.
  - g. A vehicle that exceeds the applicable emissions standards for the tests described in subsections (E)(1) and (E)(2)(a), or fails the OBD test described in subsection (E)(3), fails the emissions test and shall not be reinspected until a low-emissions tune-up is performed as described in R18-2-1010. A vehicle that fails the evaporative system pressure test described in subsection (E)(2)(b) shall not be reinspected until repaired as required in R18-2-1010(D)(1) and (2). A vehicle that fails the functional gas cap test described in subsection (E)(7)(a) shall not be reinspected until repaired as required in R18-2-1009(B). A vehicle that fails the liquid fuel leak test described in subsection (E)(5) shall not be reinspected until repaired as required in R18-2-1010(E).

7. A vehicle required to take an annual emissions test in area A shall, at the time of the test, undergo a tampering inspection based on the original configuration of the vehicle as manufactured. The applicable emissions system requirements shall be verified by the "VEHICLE EMISSION CONTROL INFORMATION" label. A vehicle that fails any portion of the tampering inspection shall be repaired according to R18-2-1009 before reinspection unless the owner provides the written statement required in R18-2-1008(B). "Original configuration" for a foreign-manufactured vehicle means the design and construction of a vehicle produced by the manufacturer for original entry and sale in the United States. The tampering inspection shall consist of the following:
  - a. Any vehicle emissions tested, except one with a vented fuel system, shall have a functional test of the gas cap to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge. A vehicle with a vented fuel system shall be checked for the presence of a properly fitting fuel cap.
  - b. For a 1975 and newer model year vehicle:
    - i. A visual inspection to determine the presence and proper installation of each required catalytic converter, if applicable;
    - ii. An examination to determine the presence of an operational air pump, if applicable; and
    - iii. A visual inspection to determine the presence of an operational positive crankcase ventilation system and evaporative control system, if applicable.
- F. In area B, the inspection test procedures for a vehicle other than a diesel-powered vehicle shall consist of the following:
  1. An area B vehicle with a model year of 1967 through 1980 shall take and pass only a curb idle test. The curb idle test shall be performed with the vehicle in drive for automatic transmissions or in neutral for manual transmissions. Engine RPM shall be within  $\pm 100$  RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. A CO<sub>2</sub> plus CO reading of 6% or greater shall be registered to establish test validity. A CO<sub>2</sub> plus CO reading less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired, except when tested at a fleet emissions inspection station. If the vehicle fails the curb idle test, and if permitted by the vehicle operator, the vehicle shall be conditioned according to one of the following conditioning procedures:
    - a. Fast-idle conditioning procedure. The vehicle shall be conditioned by increasing engine speed to 2,500,  $\pm 300$  RPM, for up to 30 seconds with the transmission in neutral. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. The conditioning procedure standards in Table 2 are for diagnostic and advisory information only. After exhaust emissions are recorded, the engine speed shall be returned to curb idle for a second idle test. The fast-idle conditioning procedure may be used on a vehicle at a state station instead of the loaded conditioning procedure if any of the following occurs:
      - i. The vehicle has a tire on a driving wheel with less than 2/32-inch tread, with metal protrusions, with visibly low tire pressure as determined by visual inspection, or any other condition that precludes loaded conditioning for reasons of personnel, equipment, or vehicle safety;
      - ii. The vehicle is driven by a person who, because of physical incapacity, is unable to yield the driver's seat to the vehicle emissions inspector;
      - iii. The driver refuses to yield the driver's seat to the vehicle emissions inspector; or
      - iv. The vehicle cannot be tested according to Table 1 because of the vehicle's inability to attain the speeds specified.
    - b. Loaded conditioning procedure. For a vehicle other than a motorcycle or a constant 4-wheel drive vehicle, the vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1, in drive for automatic transmission, or second or higher gear for manual transmission. All front wheel drive vehicles shall be driven by the inspector. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. The conditioning procedure standards in Table 2 are for diagnostic and advisory information only. After exhaust emissions are recorded, engine speed shall be returned to curb idle for a second idle test.
    - c. Following one of the conditioning procedures in subsection (F)(1)(a) or (b), the vehicle shall be retested according to the curb idle test procedure in subsection (F)(1).
  2. An area B vehicle with a 1981 or newer model year, except a motorcycle, a constant 4-wheel drive vehicle, or a 1996 and newer vehicle equipped with OBD, shall take and pass a loaded cruise test and curb idle test, as follows:
    - a. Loaded Cruise Test. The vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1, in drive for automatic transmission or second or higher gear for manual transmission. Overdrive shall not be used. All front wheel drive vehicles shall be driven by the inspector. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. After exhaust emissions are recorded, engine speed shall be returned to idle for a curb idle test.
    - b. Curb Idle Test. The test shall be performed with the vehicle in neutral. Engine RPM shall be within  $\pm 100$  RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. A CO<sub>2</sub> plus CO reading of 6% or greater shall be registered to establish test validity, except when tested at a fleet inspection station. A CO<sub>2</sub> plus CO reading less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired.
  3. A vehicle with a model year of 1996 or newer and a GVWR of 8500 pounds or less, except a motorcycle or a reconstructed vehicle, is required to annually take and pass an OBD test and a functional gas cap test as follows:
    - a. The OBD test shall consist of:
      - i. A visual inspection of the MIL function; and

- ii. An electronic examination of the OBD computer by connecting a scan tool to the data link connector and interrogating the OBD system to determine vehicle readiness status, MIL status, and presence of diagnostic trouble codes;
  - b. The OBD test and test equipment shall conform to "Performing Onboard Diagnostic System Checks as Part of a Vehicle Inspection and Maintenance Program," EPA420-R-01-015, EPA, June 2001, incorporated by reference, and no future editions or amendments. A copy of this incorporated material is on file with the Department and the Secretary of State and may be obtained at the EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI, 48105-2498; and
  - c. The functional gas cap test shall comply with subsection (F)(7)(a).
4. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (F)(3), shall take and pass only a curb idle test according to subsection (F)(1). An all-terrain vehicle (ATV), as defined in A.R.S. § 28-101, shall be tested as a motorcycle. If the vehicle fails the curb idle test, and if permitted by the vehicle operator, the vehicle shall be conditioned according to the fast idle conditioning procedure required in subsection (F)(1)(a). Following conditioning, the vehicle shall be retested according to the curb idle test procedure in subsection (F)(1).
5. A vehicle with a 1975 or newer model year and annually tested under subsections (F)(1) or (2) is required to take and pass a liquid fuel leak inspection according to subsections (E)(5)(a) through (f).
6. The emissions pass-fail determination shall be made as follows:
- a. A vehicle with a model year of 1967 through 1980, except a motorcycle or a constant 4-wheel drive vehicle, that does not exceed the curb idle mode HC and CO emissions standards in Table 2 on either the first or second curb idle test, complies with the minimum emissions standards contained in Table 2.
  - b. A vehicle with a 1981 or newer model year, except a motorcycle or a constant 4-wheel drive vehicle, that does not exceed the loaded cruise mode or curb idle mode HC and CO emissions standards listed in Table 2, complies with the minimum emissions standards in Table 2. The loaded cruise test standards specified in Table 2 shall apply to fleet vehicles tested with the 2,500 RPM unloaded fast idle test.
  - c. A vehicle that operates on natural gas complies with HC emissions standards if the HC emissions value, as determined by an NDIR analyzer, multiplied by 0.61 does not exceed the applicable standard in subsection (F)(6)(a) or (b).
  - d. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (F)(3), that does not exceed the curb idle mode HC and CO emissions standards in Table 2 on either the first or second curb idle test complies with the minimum emissions standards in Table 2.
  - e. A vehicle that exceeds the applicable emissions standards, or fails the OBD test described in subsection (F)(3), fails the emissions test and shall have a low emissions tune-up as described in R18-2-1010 before reinspection. A vehicle that fails the functional gas cap test described in subsection (F)(3)(c) shall not be reinspected until repaired as required in R18-2-1009(B).
- f. A vehicle tested under subsection (F)(3) shall:
- i. Fail if the data link connector is missing, tampered, or otherwise inoperable during any OBD test;
  - ii. Fail if the MIL does not illuminate at all when the ignition key is turned to the key on, engine off position, or does not illuminate briefly during engine start during any OBD test;
  - iii. Fail if the MIL illuminates continuously or flashes after the engine has been started during any OBD test;
  - iv. Fail if a diagnostic trouble code is present and the MIL status, as indicated by the scan tool, is commanded on during any OBD test;
  - v. Be rejected from an initial OBD test and required to take and pass a loaded cruise test and curb idle test under subsection (F)(2) if the number of unset readiness indicators, excluding continuous indicators, is three or more for a model year 1996-2000 vehicle, or two or more for a model year 2001 and newer vehicle;
  - vi. Be rejected from an OBD retest if the number of unset readiness indicators, excluding continuous indicators, exceeds the number allowed in subsection (v); and
  - vii. Fail the functional gas cap test if the gas cap does not comply with subsection (F)(7)(a).
- g. A vehicle tested under subsection (F)(5) shall fail the inspection if a vehicle emissions inspector detects a liquid fuel leak. A vehicle that fails the liquid fuel leak test shall not be reinspected until repaired as required in R18-2-1010(E).
7. A vehicle required to take an emissions test in area B, except a vehicle required to take an OBD test as described in subsection (F)(3), shall at the time of the test, undergo a tampering inspection based on the original configuration of the vehicle as manufactured. The applicable emissions system requirements shall be verified by the "VEHICLE EMISSION CONTROL INFORMATION" label. A vehicle that fails any portion of the tampering inspection shall be repaired according to R18-2-1009 before reinspection unless the owner provides the written statement required in R18-2-1008(B). "Original configuration" for a foreign manufactured vehicle means the design and construction of a vehicle produced by the manufacturer for original entry and sale in the United States. The tampering inspection shall consist of the following:
- a. Any vehicle emissions tested, except one with a vented fuel system, shall have a functional test of the gas cap to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge. A vehicle with a non-sealing gas cap shall be checked for the presence of a properly fitting gas cap.
  - b. For a 1975 or newer model year vehicle:
    - i. A visual inspection to determine the presence and proper installation of each required catalytic converter, if applicable; and
    - ii. An examination to determine the presence of an operational air pump, if applicable.
8. Exhaust sampling in area B shall comply with the following:

- a. All CO and HC emissions analyzers shall have water traps incorporated in the sampling lines. Sampling probes shall be capable of taking undiluted exhaust samples from a vehicle exhaust system.
  - b. A vehicle, other than a diesel-powered vehicle, shall be inspected with a NDIR analyzer capable of determining concentrations of CO and HC within the ranges and tolerances specified in Table 5.
  - c. A vehicle with multiple exhaust pipes shall be inspected by collecting and averaging samples by one of the following methods:
    - i. Collect separate samples from each exhaust pipe and use the average concentration to determine the test result;
    - ii. Use manifold exhaust probes to simultaneously sample approximately equal volumes from each pipe; or
    - iii. Use manifold exhaust pipe adapters to collect approximately equal volume samples from each pipe.
- G.** The following apply to all testing under subsection (E) or (F):
- 1. A rotary piston engine shall be inspected as a 4-stroke engine with four cylinders or less;
  - 2. A turbine engine shall be inspected as a 4-stroke engine with more than four cylinders; and
  - 3. A vehicle in which a diesel engine has been replaced with a gas engine shall be inspected as a gas-powered vehicle of the same vehicle model year. The vehicle shall not pass the inspection unless each catalytic converter, air pump, gas cap, and other emissions control device applicable to the vehicle model year and the same or more recent year engine configuration is properly installed and in operating condition.
- H.** In area A, the inspection test procedure for a diesel-powered vehicle is as follows:
- 1. A diesel-powered vehicle with a GVWR greater than 8,500 pounds shall be tested with a procedure that conforms to Society of Automotive Engineers standard J1667, February 1996, incorporated by reference and on file with the Department and the Secretary of State. This incorporation by reference contains no future editions or amendments. A copy of this referenced material may be obtained at Society of Automotive Engineers, 400 Commonwealth Dr., Warrendale, PA 15096-0001. The procedure shall utilize the corrections for ambient test conditions in Appendix B of J1667 for all tests. The test results shall be reported as the percentage of smoke opacity. Emissions pass-fail determinations are as follows:
    - a. A vehicle powered by a 1991 or later model year diesel engine fails if the J1667 final test result is greater than 40%, unless the engine family is exempted from the 40% standard under subsection (H)(1)(e);
    - b. A vehicle powered by a pre-1991 model year diesel engine fails if the J1667 final test result is greater than 55%, unless the engine family is exempted from the 55% standard under subsection (H)(1)(e);
    - c. The engine model year is determined by the emission control label. If the emission control label is missing, illegible, or incorrect, the test standard shall be 40%, unless a correct, legible, emission control label replacement is attached to the vehicle within 30 days of the inspection;
    - d. A vehicle that exceeds the opacity standard in subsection (H)(1)(a) or (b) fails the emissions test.
- Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010(H);
- e. The Director shall exempt any engine family from the standards in subsections (H)(1)(a) or (b) if the engine manufacturer demonstrates either of the following:
    - i. The engine family exhibits smoke opacity greater than the standard when in good operating condition and adjusted to the manufacturer's specifications. The Director shall identify a technologically appropriate less stringent standard based on a review of data obtained from engines in good operating condition and adjusted to manufacturer's specifications; or
    - ii. The engine family is exempted from an equivalent standard based on J1667 by the executive officer of the California Air Resources Board (CARB). The Director shall allow the engine family to comply with any technologically appropriate less stringent standard identified by the executive officer of CARB; and
  - f. A demonstration under subsection (H)(1)(e)(i) shall be based on data from at least three vehicles. Data from official inspections under subsection (H)(1) showing that vehicles in the engine family meet the standard may be used to rebut the demonstration. The Director shall implement any new standard resulting from each exemption as soon as practicable for all subsequent tests and provide notice at all affected test stations and fleets.
2. A diesel-powered vehicle with a GVWR greater than 4,000 pounds and less than or equal to 8,500 pounds shall be tested by a loaded dynamometer test by applying a single load of 30 HP,  $\pm$  2 HP, while operated at 50 MPH. A diesel-powered vehicle with a GVWR of 4,000 pounds or less shall be tested by a loaded dynamometer test by applying a single load of between 6.4 - 8.4 HP while operated at 30 MPH. For all diesel-powered vehicles with a GVWR less than or equal to 8,500 pounds:
- a. The emissions pass-fail determination shall be made as follows:
    - i. The opacity reading for a period of 10 consecutive seconds with the engine under applicable loading shall be compared to the opacity standard in R18-2-1030(B). A vehicle that does not exceed the applicable opacity standard in R18-2-1030(B) complies with the minimum emissions standards.
    - ii. A vehicle that exceeds the applicable opacity standard fails the emissions test. Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010.
  - b. Exhaust sampling shall comply with the following:
    - i. For a diesel-powered vehicle equipped with multiple pipes, separate measurements shall be made on each exhaust pipe. The reading taken from the exhaust pipe that has the highest opacity reading shall be used for comparison with the applicable emissions standard.
    - ii. A vehicle shall be inspected with either a full-flow or sampling-type opacity meter. The opacity meter shall be a direct reading, continuous reading light extinction-type using a collimated light source and photo-electric cell, accurate to a value within  $\pm$  5% of filter value.

- I. In area B, the inspection test procedure for a diesel-powered vehicle is as follows:
1. A diesel-powered vehicle with a GVWR greater than 26,000 pounds or having tandem axles shall be tested according to one of the following methods:
    - a. The vehicle shall be tested on a chassis dynamometer beginning with no power absorption by selecting a gear ratio that produces a maximum vehicle speed of 30-35 MPH at governed or maximum rated RPM. If the vehicle has a manual transmission or an automatic transmission with individual gear selection, the engine shall be operated at governed or maximum rated engine RPM, at normal operating temperature under a power absorption load applied to the dynamometer until the loading reduces the engine RPM to 80% of the governed speed at wide-open throttle position. If the vehicle has an automatic transmission and automatic gear kickdown, the engine shall be loaded to a speed just above the kickdown speed or 80% of the governed speed, whichever is greater. If the chassis dynamometer does not have enough horsepower absorption capability to lug the engine down to these speeds, the vehicle's brakes may be used to assist the dynamometer.
    - b. If a chassis dynamometer is not available, the vehicle shall be tested by being lugged by its own brakes by selecting a gear ratio that produces a maximum speed of 10-15 MPH at governed engine RPM or maximum rated RPM and then loading the engine by applying the brakes until the engine RPM is lugged down to 80% of the governed or maximum rated RPM at wide-open throttle position. If the vehicle does not have a tachometer, the vehicle may be loaded to 80% of governed or maximum rated speed.
  2. A diesel-powered vehicle without tandem axles and having a GVWR greater than 10,500 pounds and less than or equal to 26,000 pounds shall be tested according to one of the following methods:
    - a. The vehicle shall be tested on a chassis dynamometer beginning with no power absorption by selecting a gear ratio that produces a maximum vehicle speed of 30-35 MPH at governed or maximum rated RPM. If the vehicle has a manual transmission or an automatic transmission with individual gear selection, the engine shall be operated at governed or maximum rated engine RPM, at normal operating temperature under a power absorption load applied to the dynamometer until such loading reduces the engine RPM to 80% of the governed speed at wide-open throttle position. If the vehicle has an automatic transmission and automatic gear kickdown, the engine shall be loaded to a speed just above the kickdown speed or 80% of governed speed, whichever is greater. If the chassis dynamometer does not have enough horsepower absorption capability to lug the engine down to these speeds, the vehicle's brakes may be used to assist the dynamometer;
    - b. The vehicle shall be tested by applying a single load of 30 HP,  $\pm$  2 HP, while operated at 50 MPH; or
    - c. The vehicle shall be tested by being lugged by its own brakes by selecting a gear ratio that produces a maximum speed of 10-15 MPH at governed engine RPM or maximum rated RPM and then loading the engine by applying the brakes until the engine RPM is lugged down to 80% of the governed or maximum rated RPM at wide-open throttle position. If the vehicle does not have a tachometer, the vehicle may be loaded to 80% of governed or maximum rated speed.
  3. A diesel-powered vehicle with a GVWR of greater than 4,000 pounds and less than or equal to 10,500 pounds shall be tested by a loaded dynamometer test by applying a single load of 30 HP,  $\pm$  2 HP, while operated at 50 MPH.
  4. A diesel-powered vehicle with a GVWR of 4,000 pounds or less shall be tested by a loaded dynamometer test by applying a single load of between 6.4 - 8.4 HP while operated at 30 MPH.
  5. The emissions pass-fail determination shall be performed:
    - a. The opacity reading during a period of 10 consecutive seconds with the engine under applicable loading specified in subsections (I)(1) through (4) shall be compared to the opacity standard specified in R18-2-1030(B). A vehicle that does not exceed the opacity standard in R18-2-1030(B) complies with the minimum emissions standards.
    - b. A vehicle that exceeds the standard in R18-2-1030(B) fails the emissions test. Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010.
  6. Exhaust sampling shall comply with the following:
    - a. For a diesel-powered vehicle equipped with multiple exhaust pipes, separate measurements shall be made on each exhaust pipe. The reading taken from the exhaust pipe that has the highest opacity reading shall be used for comparison with the standard in R18-2-1030(B).
    - b. A vehicle shall be inspected with either a full-flow or sampling-type opacity meter. The opacity meter shall be a direct reading, continuous reading light extinction-type using a collimated light source and photo-electric cell, accurate to a value within  $\pm$  5% of filter value.
- J. All diesel-powered vehicles shall undergo a tampering inspection under subsection (E)(7).

#### Historical Note

Former Section R9-3-1006 repealed, new Section R9-3-1006 adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective November 1, 1976 (Supp. 76-5).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-3-1006 repealed, new Section R9-3-1006 adopted as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1006 as amended effective February 20, 1980 repealed and a new Section R9-3-1006 adopted as an emergency effective January 2, 1981 now adopted and amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6).  
 Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1006 renumbered as Section R18-2-1006 and subsections (A), (C) and (D) amended effective August 1, 1988 (Supp. 88-3).  
 Amended effective September 19, 1990 (Supp. 90-3).  
 Amended effective November 14, 1994 (Supp. 94-4).  
 Amended effective October 15, 1998 (Supp. 98-4).  
 Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 2722, effective June 28, 2000

(Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

#### **R18-2-1007. Evidence of Meeting State Inspection Requirements**

- A. Vehicles required to be inspected under this Article shall pass inspection before registration by meeting the requirements of R18-2-1006, unless waived under R18-2-1008.
- B. The MVD or its agent may use the MVD motor vehicles emissions database, if available, as evidence that a vehicle complies with the requirements of this Article.
- C. If the MVD motor vehicles emissions database is not available, the MVD or its agent shall accept any of the following documents, when complete, unaltered, and dated no more than 90 days before registration expiration date, as evidence that a vehicle complies with the requirements of this Article unless the MVD or its agent has reason to believe it is false. Documents accompanying a late registration may be dated subsequent to the registration expiration date:
  - 1. Certificate of compliance,
  - 2. Certificate of waiver (except from auto dealers licensed to sell used motor vehicles under Title 28),
  - 3. Certificate of exemption, or
  - 4. Director's certificate,
  - 5. The upper section of the vehicle inspection report with "PASS" in the final results block.
- D. A complete certificate of inspection dated within 12 months of registration for an annually tested vehicle and 24 months for a biennially tested vehicle shall be accepted by the MVD or its agent as evidence that a vehicle is in compliance with the requirements of this Article unless the MVD or its agent has reason to believe it is false. A certificate corrected according to R18-2-1019(F)(1)(a) shall be accepted by the MVD or its agent.
- E. Documents listed in subsection (C) and originating in area B are not acceptable for meeting the inspection requirements in area A.
- F. Government vehicles for which only weight fees are paid shall be registered without evidence of inspection.

#### **Historical Note**

Former Section R9-3-1007 repealed, new Section R9-3-1007 adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1007 repealed, new Section R9-3-1007 adopted effective January 3, 1977 (Supp. 77-1). Amended effective February 20, 1980 (Supp. 80-1). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1007 renumbered without change as Section R18-2-1007 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1008. Procedure for Issuing Certificates of Waiver**

- A. Unless prohibited under subsection (C), (D), or (E), a certificate of waiver shall be issued subsequent to reinspection by a state inspector at a state or Department station to a vehicle that failed the emissions inspection or the emissions and tampering inspections when it is determined by repair receipts, emissions test results, evidence of repairs performed, underhood verification, or similar evidence that the requirements of R18-2-1009 and R18-2-1010 have been met, or for emissions failures only, any further repairs within the repair cost limit would be ineffective. A waiver may be denied if a waiver request is based upon repair estimates and the state inspector demonstrates that

a recognized repair facility can repair or improve the vehicle's test readings within the repair cost limit.

- B. A certificate of waiver may be issued to a vehicle failing the tampering inspection if the vehicle owner provides to the Director a written statement from an automobile parts or repair business that an emission control device necessary to repair the tampering is not available and cannot be obtained from any usual source of supply, and if all requirements of R18-2-1008(A) have been met. All written statements are subject to verification for authenticity and accuracy by the Department. The Department may deny a certificate of waiver if the state inspector has any reason to believe the written statement is false or a usual source of supply exists and the device necessary to repair the tampering is available. Certificates of waiver for tampered vehicles may be issued conditionally for a specified period, not to exceed 90 days, that allows sufficient time for the procurement and installation of a proper emissions control device. A receipt or bill from a vehicle repair facility or automobile parts store shall be an acceptable proof of purchase. Before the end of the specified time period, the vehicle owner shall present to the Director proof of purchase and installation of the device. The Department shall track all issued conditional certificates of waiver and if no proof of purchase and installation is received before the end of the specified time period, the Director shall forward to the Department of Motor Vehicles an order to cancel the vehicle's registration.
- C. The Director shall not issue a waiver to a vehicle that has failed the emissions test due to the catalytic converter system. A vehicle shall have failed the emissions test due to the catalytic converter system if:
  - 1. The converter's oxidation efficiency, as measured by the Catalyst Efficiency Test Procedure in R18-2-1031(A), is less than 75%; and
  - 2. No engine or fuel system malfunctions exist that would prevent the proper operation of a catalytic converter.
- D. The Director shall not issue a waiver to a vehicle failing the emission test with an HC, CO, NO<sub>x</sub>, or opacity emission level greater than two times the pass-fail standard in R18-2-1006, unless the vehicle is repaired so that each emission level is less than two times the pass-fail standard.
- E. After January 1, 1997, the Director shall not issue a certificate of waiver to the same vehicle more than once.
- F. The fee for a certificate of waiver under this Section shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated costs to the state for administering and enforcing the provisions of this Article for issuance of certificates of waiver under this Section. The fee shall be payable directly to the Department of Environmental Quality at the time the certificate of waiver is issued.

#### **Historical Note**

Former Section R9-3-1008 repealed, new Section R9-3-1008 adopted effective January 13, 1976 (Supp. 76-1). Former R9-3-1008 repealed, new Section R9-3-1008 adopted effective January 3, 1977 (Supp. 77-1). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1008 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) and added subsection (D) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1008 renumbered as Section R18-2-1008 and amended effective August 1, 1988 (Supp. 88-3).

Amended effective November 14, 1994 (Supp. 94-4).  
Amended by final rulemaking at 6 A.A.R. 382, effective  
December 20, 1999 (Supp. 99-4).

#### **R18-2-1009. Tampering Repair Requirements**

- A.** If a vehicle fails the visual inspection for properly installed catalytic converters, the converters shall be replaced with new or reconditioned OEM converters or equivalent new aftermarket converters. The Department shall provide names of acceptable aftermarket converters at the time of inspection on the repair requirement list.
- B.** If a vehicle fails the functional gas cap pressure test described in R18-2-1006(E)(7)(a) or (F)(7)(a), the gas cap shall be replaced with one that meets those specifications. If a vehicle designed with a vented system fails a visual inspection for the presence of a gas cap, a properly fitting gas cap shall be installed on the vehicle.
- C.** If a vehicle fails the visual inspection for the presence of an operational air pump, a new, used, or reconditioned, operational air pump shall be properly installed on the vehicle.
- D.** If a vehicle fails the visual inspection for the presence or malfunction of the positive crankcase ventilation system, the system shall be repaired or replaced with OEM or equivalent aftermarket parts.
- E.** If a vehicle fails the visual inspection for the presence or malfunction of the evaporative control system, the system shall be repaired or replaced with OEM or equivalent aftermarket parts.

#### **Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1).  
Repealed effective January 3, 1977 (Supp. 77-1). New  
Section R9-3-1009 adopted effective January 1, 1986  
(Supp. 85-6). Amended effective January 1, 1987, filed  
December 31, 1986 (Supp. 86-6). Former Section R9-3-  
1009 renumbered without change as Section R18-2-1009  
(Supp. 88-3). Amended effective November 14, 1994  
(Supp. 94-4). Amended by final rulemaking at 6 A.A.R.  
382, effective December 20, 1999 (Supp. 99-4).  
Amended by final rulemaking at 8 A.A.R. 90, effective  
January 1, 2002 (Supp. 01-4). Amended by final  
rulemaking at 14 A.A.R. 2834, effective July 1, 2008  
(Supp. 08-3).

#### **R18-2-1010. Low Emissions Tune-up, Emissions and Evaporative System Repair**

- A.** A low emissions tune-up on a nondiesel-powered vehicle consists of the following procedures:
  1. Emissions Failure Diagnosis. For a computer-controlled vehicle, the on-board-diagnostics shall be accessed and any stored trouble codes recorded. For a model year 1996 or newer vehicle equipped with an OBD system, a compatible scan tool shall be used to access and record diagnostic trouble codes. The following instruments or equipment are required to complete a low emissions tune-up:
    - a. Tachometer;
    - b. Timing light;
    - c. Engine analyzer or oscilloscope, and
    - d. A HC/CO NDIR analyzer to make final A/F adjustments, if specified by the manufacturer.
  2. Adjustment. All adjustments shall be made according to the manufacturer's specifications and procedures. Final adjustment shall be made on the vehicle engine only after the engine is at normal operating temperature.
  3. Inspection of Air Cleaner, Choke, and Air Intake System. A dirty or plugged air cleaner, stuck choke, or restricted

air intake system shall be replaced or repaired as required.

4. Dwell and Basic Timing Check. Dwell and basic engine timing shall be checked and adjusted, if necessary, according to manufacturer's specifications.
5. Inspection of PCV Valve. The PCV valve shall be checked to ensure that it is the type recommended by the manufacturer and is correctly operating. Free flow through the PCV system passages and hoses shall be verified. Repair or replace as required.
6. Inspection of Vacuum Hoses. The vacuum hoses shall be inspected for leaks, obstruction, and proper routing and connection. Repair or replace as required.
7. Perform a visual inspection for leaking fuel lines or system components. Repair or replace as required.
8. Idle Speed and A/F Mixture Check. The idle speed and A/F mixture shall be checked and adjusted according to manufacturer's specifications and procedures. If the vehicle is equipped with a fuel injection system or an alternate fuel (LPG or LNG), the manufacturer's recommended adjustment procedure shall be followed.
- B.** A vehicle that fails reinspection does not qualify for a waiver unless a low emissions tune-up and diagnosis is performed on the vehicle.
- C.** If the maximum required repair cost in subsection (F) or (G) is not exceeded after a low emissions tune-up described in subsection (A), then the following procedures apply:
  1. CO failure.
    - a. If a vehicle fails CO only, the vehicle shall be checked for:
      - i. Proper canister purge system operation,
      - ii. High float setting,
      - iii. Leaky power valve, and
      - iv. Faulty or worn needles, seats, jets or improper jet size.
    - b. If applicable, the following shall also be checked:
      - i. Computer,
      - ii. Engine and computer sensors,
      - iii. Engine solenoids,
      - iv. Engine thermostats,
      - v. Engine switches,
      - vi. Coolant switches,
      - vii. Throttle body or port fuel injection system,
      - viii. Fuel injectors,
      - ix. Fuel line routing and integrity,
      - x. Air in fuel system including line and pump,
      - xi. Fuel return system,
      - xii. Injection pump,
      - xiii. Fuel injection timing,
      - xiv. Routing of vacuum hoses, and
      - xv. Electrical connections.
    - c. The items in subsections (C)(1)(a) and (b) shall be repaired or replaced as required.
  2. HC, or HC and CO failure.
    - a. If a vehicle fails HC, or HC and CO, the vehicle shall be checked for:
      - i. Faulty spark plugs and faulty, open, crossed, or disconnected plug wires;
      - ii. Distributor module;
      - iii. Vacuum hose routing and electrical connections;
      - iv. Distributor component malfunctions including vacuum advance;
      - v. Faulty points or condenser;
      - vi. Distributor cap crossfire;
      - vii. Catalytic converter efficiency air supply;

## Department of Environmental Quality – Air Pollution Control

- viii. Vacuum leaks at intake manifold, carburetor base gasket, EGR, and vacuum-operated components.
    - b. The items in subsection (C)(2)(a) shall be repaired or replaced as required.
  - 3. NO<sub>x</sub> failure.
    - a. If a vehicle fails NO<sub>x</sub>, the vehicle shall be checked for:
      - i. Removed, plugged, or malfunctioning EGR valve, exhaust gas ports, lines, and passages;
      - ii. EGR valve electrical and vacuum control circuitry, components, and computer control, as applicable;
      - iii. Above normal engine operating temperature;
      - iv. Proper air management;
      - v. Lean A/F mixture;
      - vi. Catalytic converter efficiency; and
      - vii. Over-advanced off-idle timing.
    - b. The items in subsection (C)(3)(a) shall be repaired or replaced as required.
  - 4. OBD failure. If the vehicle fails the OBD test, the vehicle shall be repaired for the items indicated on the Vehicle Emissions Report as causing the failure. If the failure results from Diagnostic Trouble Codes (DTCs) that caused the Malfunction Indicator Lamp (MIL) to be illuminated, the components or systems causing the DTCs shall be repaired or replaced. After repair of a DTC failure, and before reinspection, the vehicle shall be operated under conditions recommended by the vehicle manufacturer for the OBD computer to evaluate the repaired system.
- D.** For Evaporative System Failures, the following procedures apply:
- 1. If a vehicle fails the evaporative system pressure test, the vehicle shall be checked for leaking or disconnected vapor hoses, line, gas cap, and fuel tank.
  - 2. If a vehicle fails a visual inspection of the evaporative system, the vehicle shall be checked for a missing or damaged canister, canister electrical and vacuum control circuits and components, disconnected, damaged, misrouted or plugged hoses, and damaged or missing purge valves. Repair or replace as necessary.
- E.** If a vehicle fails the liquid fuel leak inspection, the vehicle shall be checked for leaking or disconnected fuel delivery, metering, or evaporation system components including those listed in R18-2-1006(E)(5)(b). Repair or replace as necessary.
- F.** The maximum required repair cost for a vehicle in area A, not including cost to repair the vehicle for failing an evaporative system pressure test due to tampering, or other tampering repair cost, is:
- 1. For a diesel-powered vehicle with a GVWR greater than 26,000 pounds or a diesel-powered vehicle with tandem axles: \$500; and
  - 2. For a vehicle that is not a diesel-powered vehicle with a GVWR greater than 26,000 pounds and is not a diesel-powered vehicle with tandem axles:
    - a. Manufactured in or before the 1974 model year: \$200;
    - b. Manufactured in the 1975 through 1979 model years: \$300; and
    - c. Manufactured in or after the 1980 model year: \$450.
  - 3. Subsection (F) does not prevent a vehicle owner from authorizing or performing more than the required repairs. A vehicle operator who has a vehicle reinspected shall have the repair receipts available when requesting a certificate of waiver.
- G.** The maximum required repair cost for vehicles in area B, not including tampering repair cost, is:
- 1. For a diesel-powered vehicle with a GVWR greater than 26,000 pounds or a diesel-powered vehicle with tandem axles: \$300; and
  - 2. For a vehicle that is not a diesel-powered vehicle with a GVWR greater than 26,000 pounds and is not a diesel-powered vehicle with tandem axles:
    - a. Manufactured in or before the 1974 model year: \$50;
    - b. Manufactured in the 1975 through 1979 model years: \$200; and
    - c. Manufactured in or after the 1980 model year: \$300.
  - 3. Subsection (G) does not prevent a vehicle owner from authorizing or performing more than the required repairs. A vehicle operator who has a vehicle reinspected shall have the repair receipts available when requesting a certificate of waiver.
- H.** A low emissions tune-up on a diesel-powered vehicle consists of the following procedures:
- 1. Inspect for dirty or plugged air cleaner, or restricted air intake system. Repair or replace as required.
  - 2. Check fuel injection system timing according to manufacturer's specifications. Adjust as required.
  - 3. Check for fuel injector fouling, leaking, or mismatch. Repair or replace as required.
  - 4. Check fuel pump and A/F ratio control according to manufacturer's specifications. Adjust as required.
  - 5. If the vehicle fails the J1667 procedure, check smoke-limiting devices, if any, including the aneroid valve and puff limiter. Repair or replace as required.
- I.** Any available warranty coverage for a vehicle shall be used to obtain needed repairs before an expenditure can be counted toward the cost limits in subsection (F) and (G). If the operator of a vehicle within the age and mileage coverage of section 207(b) of the Clean Air Act presents a written denial of warranty coverage from the manufacturer or authorized dealer, warranty coverage is not considered available under this subsection.

**Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1010 repealed, new Section R9-3-1010 adopted effective January 3, 1977 (Supp. 77-1). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended effective February 20, 1980 (Supp. 80-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1010 as amended effective February 20, 1980, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1010 renumbered as Section R18-2-1010 and subsection (D) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended effective October 15, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

**R18-2-1011. Vehicle Inspection Report**

## Department of Environmental Quality – Air Pollution Control

- A.** A vehicle inspected at a state station shall be provided a uniquely numbered vehicle inspection report of a design approved by the Director that contains, at a minimum, the following information:
1. License plate number;
  2. Vehicle identification number;
  3. Model year of vehicle;
  4. Make of vehicle;
  5. Style of vehicle;
  6. Type of fuel;
  7. Odometer reading to the nearest 1000 miles, truncated;
  8. Emissions standards for idle and loaded cruise modes, if applicable;
  9. Emissions measurements during idle and loaded cruise modes, if applicable;
  10. Opacity measurements and standards, if applicable;
  11. Emissions standards and measurements for the transient loaded test, and the evaporative system pressure test, if applicable;
  12. Results of OBD test including all diagnostic trouble codes that commanded the illumination of the malfunction indicator lamp;
  13. Tampering inspection results;
  14. Liquid fuel leak inspection results;
  15. Repair requirements;
  16. Final test results;
  17. Repairs performed;
  18. Cost of emissions-related repairs;
  19. Cost of tampering-related repairs;
  20. Name, address, and telephone number of the business or person making repairs;
  21. Signature and certification number of person certifying repairs;
  22. Date of inspection;
  23. Test results of the previous inspection if the inspection is a reinspection;
  24. Inspection station, lane locators; and
  25. Test number and time of test.
- B.** A vehicle failing the initial inspection shall receive an inspection report supplement approved by the Department containing, at a minimum, the following:
1. Diagnostic and tampering information including acceptable replacement units, and
  2. Applicable maximum repair costs.
- C.** The inspection report shall provide a 3-inch by 5-inch tear-out section that may be used as a certificate of compliance for vehicles passing the inspection or as a certificate of waiver, if applicable.
1. The tear-out section shall be a certificate of compliance when the word “compliance” appears in the appropriate location on the printout.
  2. The tear-out section shall be a certificate of waiver when the word “waiver” appears in the appropriate location on the printout.
  3. The tear-out section shall contain all of the following information:
    - a. License plate number,
    - b. Vehicle identification number,
    - c. Final results,
    - d. Serial number of the inspection report,
    - e. Date of inspection,
    - f. Model year,
    - g. Make,
    - h. Date of initial inspection, and
    - i. Inspection fee.
- D.** At the time of registration or reregistration, the certificate of compliance or certificate of waiver may be submitted to the Arizona Department of Transportation Motor Vehicle Division as evidence of meeting the requirements of this Article.

**Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1011 repealed, new Section R9-3-1011 adopted effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1011 as amended effective January 3, 1979, and as amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsections (A) and (B) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1011 renumbered as Section R18-2-1011 and amended by removing subsection (E) effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

**R18-2-1012. Inspection Procedures and Fee**

- A.** A vehicle that is inspected by a state station must be accompanied by a document such as a registration renewal notice, registration, certificate of title, or bill of sale that identifies the vehicle by make, model year, identification number, and license plate if applicable.
- B.** If the vehicle inspection report from the previous test is used, it shall be retained by the test lane inspector.
- C.** The fees for emissions inspections at a state station shall be specified in the contract between the contractor and the state of Arizona according to A.R.S. § 49-543, and shall include the full cost of the vehicle emissions inspection program including administration, implementation, and enforcement. Each fee is payable directly to the contractor at the time and place of inspection in cash or by check approved by the contractor. The amount collected by the contractor to defray the cost of the inspection shall be retained by the contractor. The amount collected to defray the cost of the administration, implementation, and enforcement of the vehicle emissions inspection program shall be remitted to the Department. Amounts collected shall be recorded and reported to the Department monthly. The contractor shall submit to the state of Arizona on a monthly basis, by the 10th day of each month, a report showing the number of inspections performed and the amount of fees collected.
- D.** Each subsequent inspection, if needed, shall be treated by the state and the contractor in the same manner as an initial inspection and reinspection, providing for a free reinspection according to R18-2-1013, if needed, following a paid inspection. The fee for each paid reinspection shall be the full fee as provided for in the contract with the contractor.
- E.** A state station emissions inspector shall not recommend repairs or repair facilities.

**Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1012 repealed, new Section R9-3-1012 adopted effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S.

§ 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1012 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended subsections (A) and (D) effective November 9, 1982 (Supp. 82-6). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1012 renumbered as Section R18-2-1012 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1013. Reinspections**

- A.** A vehicle failing the initial inspection or any subsequent paid inspection is entitled to one reinspection at no additional charge under the following conditions:
1. The vehicle is presented for inspection within 60 calendar days of the initial or any subsequent paid inspection, if the vehicle operator presents the vehicle inspection report from the previous inspection, indicating the itemization of the repairs performed.
  2. Emissions-related repairs or adjustments and any tampering repairs have been made.
  3. The vehicle is accompanied by the entire vehicle inspection report from the initial or subsequent inspection with the following information filled in on the reverse side:
    - a. Emissions-related and tampering-related repairs made;
    - b. Cost of emissions related and tampering related repairs as reflected by receipts or bills;
    - c. Name, address, telephone number, and type of facility making repairs;
    - d. Signature of person certifying the repairs;
    - e. Date of repairs; and
    - f. The state certification number of the technician making repairs, if applicable.
- B.** A vehicle shall be retested after repair for any portion of the inspection the vehicle failed on the previous test to determine if the repairs are effective. To the extent that repair to correct a previous failure could cause failure of another portion of the test, that portion shall also be retested. Evaporative system repairs shall trigger an exhaust emissions retest.
- C.** A vehicle failing the reinspection shall be provided a vehicle inspection report and a vehicle inspection report supplement.

#### **Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1013 repealed, new Section R9-3-1013 adopted effective January 3, 1977 (Supp. 77-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1013 adopted effective January 3, 1977, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1013 renumbered as Section R18-2-1013 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

#### **R18-2-1014. Repealed**

#### **Historical Note**

Adopted effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Section repealed by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1015. Repealed**

#### **Historical Note**

Adopted effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Section repealed by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1016. Licensing of Inspectors**

- A.** The Department shall license a person as a vehicle emissions inspector if the applicant passes a practical and a written examination with a score equal to or greater than 80% in the following areas:
1. For nondiesel-powered fleet vehicle emissions inspectors:
    - a. Equipment used in the inspection and the control of emissions;
    - b. Types of emission inspection failures;
    - c. Corrective procedures for excessive HC emissions;
    - d. Corrective procedures for excessive CO emissions;
    - e. Corrective procedures for excessive NO<sub>x</sub> emissions, for inspectors in area A;
    - f. Proper fuel system adjustment procedures;
    - g. Computerized engine control systems; and
    - h. Regulations governing fleet stations;
  2. For diesel-powered fleet vehicle emissions inspectors:
    - a. Equipment used in the inspection and the control of opacity and emissions;
    - b. Corrective procedures for excessive opacity;
    - c. Proper fuel injection system adjustment procedures;
    - d. Proper use of tools required by the vehicle manufacturer for field setting of fuel injectors, inlet and exhaust valve clearance, governors, and throttle controls;
    - e. Computerized engine control systems; and
    - f. Regulations governing fleet stations;
  3. For state station vehicle emission inspectors:
    - a. Air pollution causes and effects;
    - b. Purpose, function, and goals of the inspection program;
    - c. State inspection regulations;
    - d. Test procedures and rationale for their design;
    - e. Emission control devices, configuration, and inspection;
    - f. Test equipment operation, calibration, and maintenance;
    - g. Proficiency in driving the transient test cycle in Table 4;
    - h. Quality control procedures;
    - i. Public relations; and
    - j. Safety and health issues related to the inspection process.
  4. For the practical portion of the examination an applicant shall demonstrate the ability to conduct a proper emissions inspection, including proper use of equipment and procedures, to pass. If an inspector fails to demonstrate such ability in an audit, either covert or overt, the inspector's license shall be suspended. The suspended licensee shall demonstrate to the Department the skills required by this subsection within 30 days of suspension or such license shall be revoked.

- B. If an applicant for a nondiesel-powered vehicle emissions inspector license fails the written examination, the applicant shall successfully complete the vehicle emissions inspector state training program before reexamination for licensure.
- C. Applications may be obtained from the Department. The application shall contain the following:
  1. The type of license requested;
  2. The applicant's name;
  3. The applicant's home address;
  4. The applicant's phone number;
  5. The name of the applicant's employer;
  6. The phone number of the applicant's employer;
  7. The applicant's signature; and
  8. The date of the license request.
- D. All completed applications shall be returned to the Department.
- E. Licenses issued to vehicle emissions inspectors shall be renewed annually on or before the expiration date. An inspector whose license has expired may not inspect vehicles.
- F. Applications for renewal of vehicle emissions fleet inspector's licenses shall be submitted within 30 days before the current license expiration date.
- G. The Department may suspend, revoke, or refuse to renew a license if the licensee has violated any provision of A.R.S. Title 49, Chapter 3, Article 5 or any provision of this Article or fails to continue to demonstrate proficiency to the Department as required in subsection (A).
- H. A vehicle emissions inspector shall notify the Department of any change in employment status, due to retirement, resignation or termination, within seven days of the change. The notification shall include the name and license number of the emissions inspector, a statement declaring the employment change, and the effective date of the employment change.
- I. The Department shall assign a single, unique, nontransferable inspector's number to each vehicle emissions inspector.

#### Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1016 as amended effective March 2, 1978, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1016 renumbered as Section R18-2-1016 and subsection (G) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### R18-2-1017. Inspection of Government Vehicles

- A. Inspection of government vehicles operated in areas A and B shall be conducted as follows:
  1. At a licensed fleet station operated by the government entity;
  2. At a state station upon payment of the fee;
  3. At a state station upon payment of the contracted fee, either singly or in combination with other government fleet operators.
- B. A government vehicle except a federally owned vehicle that is excluded from the definition of motor vehicle under 40 CFR

85.1703, shall be inspected according to this Article and shall have a Government Vehicle Certificate of Inspection affixed to the vehicle if in compliance with state inspection requirements.

1. The vehicle emissions inspector performing the inspection shall punch out the appropriate year and month on the Government Vehicle Certificate of Inspection to designate date of the vehicle's next annual or biennial inspection. The vehicle emissions inspector, at the time of inspection, shall record the serial number of the Government Vehicle Certificate of Inspection on the vehicle inspection report. If the vehicle emissions inspection is performed at a fleet station, the emissions inspector, at the time of inspection, shall record the serial number in the block labeled "Certificate of Inspection No." on the "Fleet Vehicle Inspection Report/Monthly Summary." Each Government Vehicle Certificate of Inspection shall be used in serial number order. Presence of a current Government Vehicle Certificate of Inspection indicates a government vehicle has met the state of Arizona emissions inspection requirements.
  2. A government vehicle, with the exception of a motorcycle or an undercover law enforcement vehicle, shall have the Government Vehicle Certificate of Inspection affixed to the lower left side of the rear window as determined from a position facing the window, from outside the vehicle. If a vehicle does not have a rear window, the Government Vehicle Certificate of Inspection shall be affixed to the lower left corner of the windshield as determined from the driver's position.
  3. A government motorcycle shall have the Government Vehicle Certificate of Inspection affixed to the lower left-hand corner of the windscreen as determined from the driver's position. If the Government Vehicle Certificate of Inspection cannot be affixed to the lower left-hand corner of the windscreen, the Government Vehicle Certificate of Inspection may be affixed to a visible position on the front or left side of the left front fork of the motorcycle. The fork shall be determined from the driver's position.
- C. The Government Vehicle Certificate of Inspection shall be purchased from the Department in lots of 25.
    1. The fee for a certificate of inspection shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of certificates of inspections. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
    2. Only the Department may sell or otherwise transfer certificates of inspection.
  - D. All Government Vehicle Certificates of Inspection shall be designed, issued, and administered to ensure compliance with this Article. The Department shall be the only source of supply for Government Vehicle Certificates of Inspection.
  - E. Government entity fleet stations shall inspect the fleet vehicles according to R18-2-1019 except that a government vehicle certificate of inspection shall only be used for government vehicles.
  - F. A government entity fleet station shall send a quarterly statement identifying vehicles and test results to the Department within 10 business days following the end of the quarter.

#### Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).

Amended effective January 3, 1979 (Supp. 79-1).  
 Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1017 renumbered as Section R18-2-1017 and subsection (E) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1018. Certificate of Inspection**

- A.** A fleet station other than a government entity fleet station shall use completed certificates of inspection as evidence that its vehicles meet the requirements of this Article unless inspection data is electronically transmitted to MVD under A.R.S. § 49-542(Q). If a fleet vehicle is inspected at a state station, the vehicle inspection report provided under R18-2-1011 shall be used.
- B.** A certificate of inspection shall contain the following information:
  - 1. VIN,
  - 2. Model year,
  - 3. License number,
  - 4. If applicable, a statement that the inspection meets area A requirements,
  - 5. Owner of vehicle,
  - 6. Date of expiration, according to R18-2-1019(F)(1)(b),
  - 7. Fleet station permit number, and
  - 8. Inspector's signature and license number.
- C.** A certificate of inspection issued to a fleet vehicle is transferable to an auctioneer licensed as a used motor vehicle dealer to sell the vehicle. The certificate of inspection is valid for a period not to exceed 180 days after the transfer unless the vehicle is reregistered with a new owner, in which case the vehicle shall be inspected according to this Article before the reregistration.
- D.** A certificate of inspection, complete or incomplete, is not transferable except as provided in subsection (C) or except when submitted to MVD for the purpose of vehicle registration.
- E.** Only a person who meets the requirements of R18-2-1019(D)(4) is authorized to purchase certificates of inspection, certificates of waiver, or Government Vehicle Certificates of Inspection.

#### **Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1018 renumbered as Section R18-2-1018 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1019. Fleet Station Procedures and Permits**

- A.** The following requirements apply to issuance of fleet station permits:
  - 1. An owner or lessee of a fleet of 25 or more nonexempt vehicles whose place of business is located in area A or B may apply to the Director for a permit to establish a fleet station. A dealer's business inventory of vehicles held for resale, counted cumulatively over the previous 12 months at the time of application review by the Department shall be used to determine compliance with this subsection. A

newly established dealer shall certify that it will comply with the 25 nonexempt vehicles requirement.

- 2. An application form for a fleet station permit shall be obtained from the Department. All completed applications shall be submitted to the Department. An application shall be considered administratively complete when:
  - a. The Department receives a completed application form and fleet agent designation form;
  - b. The applicant or designated employee successfully completes the fleet agent examination; and
  - c. The Department conducts a site inspection.
- 3. Before an application for a fleet station permit may be approved, a state inspector shall inspect the premises to determine compliance with subsections (B) and (C).
- 4. A fleet station permit shall not expire.
- 5. A fleet station permit shall only be applicable to the fleet's inspection facility located at the address shown on the fleet station permit. If a fleet owner or lessee requests a permit for inspection facilities at more than one address, the fleet owner or lessee shall apply for a permit for each facility.
- 6. A fleet station permit issued by the Director is non-transferable.
- 7. If the name or address of the permitted fleet facility changes and the name or address change does not involve a change of ownership, the permit shall be returned to the Department for cancellation and a new permit application shall be submitted. The Director shall cancel the returned permit and issue a new permit.
- 8. In the event of loss, destruction, or mutilation of the permit, the person to whom it was issued may obtain a duplicate upon furnishing satisfactory proof of loss, destruction, or mutilation. If a fleet owner or lessee obtains a duplicate permit and then finds the original, the fleet owner or lessee shall immediately surrender the original permit to the Department.
- B.** A fleet station permit applicant or fleet station permit holder, or its employees, shall own or lease the following equipment for testing and repair of a fleet vehicle, and maintain the equipment in good working condition:
  - 1. If the permit is for the inspection of a vehicle required to take an idle only, or an idle plus 2500 RPM unloaded test:
    - a. An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
    - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a); and
    - c. An ignition-operated tachometer.
  - 2. If the permit is for the inspection of a vehicle required to take a steady-state loaded test:
    - a. An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
    - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a);
    - c. A dynamometer to operate the vehicle under load; and
    - d. An ignition-operated tachometer.
  - 3. If the permit is for the inspection of a vehicle required to take a transient loaded test:
    - a. Equipment to perform a transient loaded emissions test as required in R18-2-1006(E)(2);
    - b. Equipment to perform the evaporative system pressure test as required in R18-2-1006(E)(2)(b);

- c. Equipment to perform the maintenance and quality control requirements of R18-2-1006(E)(2) and “IM240 and Evap Technical Guidance;” and
  - d. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a).
- 4. If the permit is for the inspection of a vehicle required to take an OBD test:
  - a. A scan tool used to perform the OBD test that complies with the Society of Automotive Engineers Recommended Practice J1979, September 1997, incorporated by reference and no future editions or amendments. A copy of this referenced material is on file with the Department and the Secretary of State and may be obtained at Society of Automotive Engineers, 400 Commonwealth Dr., Warrendale, PA 15096-0001; and
  - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a).
- 5. If the permit is for the inspection of a vehicle required to take a diesel test:
  - a. Opacity meter: A meter used in area A shall comply with the requirements of R18-2-1006(H) for the applicable test procedure. A meter used in area B shall comply with the requirements of R18-2-1006(I)(6)(b); and
  - b. A dynamometer for testing any light-duty diesel vehicle in area A or for testing any diesel vehicle in area B.
- C. A fleet’s inspection facility shall comply with the following requirements:
  - 1. The facility shall include space devoted principally to maintaining or repairing the fleet’s motor vehicles. The space shall be large enough to conduct maintenance or repair of at least one fleet motor vehicle.
  - 2. The facility shall be exclusively rented, leased, or owned by the permit applicant or permit holder.
- D. A fleet owner or lessee shall employ the following personnel:
  - 1. If the facility is for the repair of nondiesel-powered vehicles, at least one person to perform tune-ups of engines and replacement or repair of fuel system and ignition components.
  - 2. If the facility is for the repair of diesel-powered vehicles, at least one person to perform tune-ups and replacement or repair of diesel fuel systems in the vehicle fleet.
  - 3. A licensed vehicle emissions inspector who will perform the necessary inspections. This inspector may be the same person required by subsection (D)(1) or (2).
  - 4. A fleet agent, who shall be in charge of the day-to-day operation of the fleet and who demonstrates proficiency by passing a Department-administered examination annually, with a score equal to or greater than 80%, on the statutes and rules governing the operation and administration of a fleet emissions inspection station. The fleet owner or lessee shall designate the fleet agent on a form obtained from the Department.
- E. Unless inspected at a state station, a vehicle owned by or leased to a holder of a fleet emissions inspection station permit shall be inspected according to R18-2-1006(D) through (J), except as follows:
  - 1. A dealer fleet vehicle in area A held for resale and an area B fleet vehicle, with a model year of 1981 or newer, and other than diesel-powered, shall be required to take and pass both the curb idle test specified in R18-2-1006(F)(2)(b) and a 2,500 RPM unloaded fast idle test as follows:
    - a. The vehicle’s engine shall be operated at 2,500, ± 300 RPM, for no more than 30 seconds with the transmission in neutral.
    - b. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized or at the end of 30 seconds, whichever occurs first, and compared to the loaded cruise standards in Table 2. The curb idle test standards in Table 2 shall apply for the idle test.
  - 2. A dealer fleet vehicle in area A held for resale, and an area B vehicle, with a model year of 1980 or older and other than diesel-powered, shall be required to take and pass a curb idle test as specified in R18-2-1006(F)(1). The curb idle test standards in Table 2 shall apply.
  - 3. A dealer fleet vehicle in area A held for resale with a model year of 1975 or newer and other than diesel-powered, shall be required to take and pass a tampering inspection as specified in R18-2-1006(E)(7).
  - 4. A dealer fleet vehicle in area B held for resale with a model year of 1975 or newer and other than diesel-powered, shall be required to take and pass a tampering inspection as specified in R18-2-1006(F)(7).
  - 5. A consignment vehicle shall be tested at a state inspection station according to R18-2-1005(A)(3).
- F. The vehicle emissions inspector shall complete and process the forms for vehicle inspection as follows, except a government entity fleet shall issue and process each government vehicle certificate of inspection under R18-2-1017:
  - 1. A certificate of inspection shall be processed as follows:
    - a. A certificate of inspection shall be completed and signed by the vehicle emissions inspector performing the inspection at the time the vehicle passes inspection. The vehicle emissions inspector who performed the inspection may correct a certificate by drawing a single line through the mistake, writing the correct information directly above the mistake, and initialing and dating the correction. Each certificate shall be issued in numerical order;
    - b. For an inspection that does not include a biennial test, the expiration date shall be one year from the date the vehicle passes the mandatory vehicle emissions inspection. For a vehicle required to pass a biennial test, the expiration date shall be two years after the pass date;
    - c. All copies of a certificate of inspection shall be legible;
    - d. Unless inspection data is electronically transmitted under A.R.S. § 49-542(Q), the original completed certificate shall be presented to MVD for processing the vehicle’s application for title and registration or the Arizona registration card. MVD may accept a signed certificate of inspection as evidence that the vehicle is a fleet-inspected vehicle and meets the inspection requirements of this Article;
    - e. The vehicle emissions inspector shall forward the second copy of each completed certificate of inspection, along with the second copy of the “Fleet Vehicle Inspection Report/Monthly Summary,” to the Department monthly, not later than two weeks after the last day of the month in which the inspection is conducted;
    - f. The third copy of each completed certificate of inspection, along with the original “Fleet Vehicle

## Department of Environmental Quality – Air Pollution Control

- Inspection Report/Monthly Summary,” shall be retained for two years from the date of inspection;
- g. Vehicle emissions certificates shall be purchased from the Department in lots of 25. Excess certificates may be returned to the Department for refund or may be used in subsequent years;
  - h. The fee for a certificate of inspection shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director’s estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of a certificate of inspection. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
  - i. Only the Department shall sell or otherwise transfer a certificate of inspection. This subsection does not apply to the submission of a certificate of inspection to MVD for the purpose of vehicle registration;
  - j. The fleet station owner shall be responsible for the security and accountability of the fleet’s certificates and fleet vehicle emissions inspection records. Certificates and fleet vehicle emissions inspection records shall be maintained at the fleet station and shall be made available for review by a state inspector during normal business hours of the fleet station;
  - k. If any certificate is discovered lost or stolen, the fleet station owner shall notify the Department in writing within 24 hours, indicating the number of certificates lost or stolen and each serial number. The Department may revoke a fleet station permit for refusal or failure to report a lost or stolen certificate within 24 hours;
  - l. In the event of loss, destruction, or mutilation of an original completed certificate of inspection, a Director’s certificate may be obtained from the Department by hand-delivery of the following:
    - i. The second or third copy of the lost, destroyed, or mutilated certificate of inspection;
    - ii. The original of the “Fleet Vehicle Inspection Report/Monthly Summary;”
    - iii. A cover letter from the fleet agent explaining the situation that caused the loss, destruction, or mutilation of the original certificate of inspection; and
    - iv. Payment of a fee to cover the cost of issuance of the Director’s certificate. The fee for a Director’s certificate shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director’s estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a Director’s certificate. Checks shall be made payable to the Department of Environmental Quality; and
    - m. If an original certificate of inspection is voided by a fleet station, the original of the voided certificate shall be matched to the corresponding third copy of the certificate and retained at the fleet station for two years from the date of inspection.
2. The fleet agent or vehicle emissions inspector shall obtain the “Fleet Vehicle Inspection Report/Monthly Summary” form from the Department. The vehicle emissions inspector performing the inspection shall record the following information on the form at the time of inspection:
    - a. The VIN of the vehicle passing inspection;
    - b. The vehicle’s license number, if applicable;
    - c. The HC content of the undiluted exhaust recorded at idle, if applicable;
    - d. The CO content of the undiluted exhaust recorded at idle, if applicable;
    - e. The HC content of the undiluted exhaust recorded at 2,500 rpm, if applicable;
    - f. The CO content of the undiluted exhaust recorded at 2,500 rpm, if applicable;
    - g. Results of a tampering check, if applicable;
    - h. Liquid fuel leak inspection results;
    - i. The vehicle model year;
    - j. The vehicle make;
    - k. The GVWR for a vehicle certified under federal truck standards;
    - l. The date of inspection;
    - m. The license number of the vehicle emissions inspector conducting the inspection;
    - n. The signature of the inspector making the entry;
    - o. The serial number of the certificate of inspection, recorded in numerical order;
    - p. For a vehicle required to take the transient loaded emissions test, the inspector shall record the total HC, CO, CO<sub>2</sub> and NO<sub>x</sub> measured in grams/mile, and the evaporative system pressure test result, if applicable;
    - q. The registration number of the registered analyzer or opacity meter used to perform the inspection;
    - r. For a light-duty diesel vehicle, the inspector shall record opacity rather than undiluted HC and CO;
    - s. For a heavy-duty diesel vehicle, instead of undiluted HC and CO:
      - i. The time of the inspection;
      - ii. The ambient temperature;
      - iii. The corrected barometric pressure;
      - iv. The relative humidity at the time of inspection;
      - v. The engine year and cubic inch or liter displacement;
      - vi. The GVWR;
      - vii. The diameter of the exhaust stack; and
      - viii. The corrected opacity reading.
    - t. For a vehicle required to take an OBD test, the inspector shall record the OBD results rather than HC, CO, and NO<sub>x</sub>.
  3. A certificate of waiver may be issued by a fleet vehicle emissions inspector unless the fleet owner or lessee is an auto dealer licensed to sell used motor vehicles under A.R.S. Title 28. The certificate of waiver may be issued according to the following procedure if the requirements of R18-2-1008(A), R18-2-1009, and R18-2-1010 are met:
    - a. A certificate of waiver shall be completed and signed by the vehicle emissions inspector performing the inspection after completion of a fleet inspection waiver report. The report shall be forwarded to the Department within three business days from the date of issuance of the certificate of waiver. A fleet inspection waiver report shall be provided by the Department with the purchase of each certificate of waiver. The report shall contain a description of the vehicle, test results, and repairs performed.
    - b. The expiration date of the certificate of waiver shall be two years from the date that the waiver is issued for a vehicle required to take the transient loaded emissions test, and one year for all other vehicles.
    - c. All information required on the certificate of waiver shall be legible.

## Department of Environmental Quality – Air Pollution Control

- d. The vehicle emissions inspector issuing the certificate of waiver shall initial all corrections.
- e. Only the vehicle emissions inspector performing the inspection may sign or initial a certificate of waiver.
- f. Unless inspection data is electronically transmitted under A.R.S. § 49-542(Q), the original completed certificate shall be presented to MVD for processing of either the vehicle's application for title and registration or the Arizona registration card. MVD may accept the signed certificate of waiver as evidence that the vehicle is a fleet inspected vehicle and meets the inspection requirements of this Article if the certificate is complete and the expiration date has not passed.
- g. The second copy of each completed certificate of waiver shall accompany the completed fleet inspection waiver report.
- h. The third copy of each completed certificate of waiver, along with a copy of the fleet inspection waiver report, shall be retained by the fleet station owner for two years from the date of inspection.
- i. The fee for a certificate of waiver shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a certificate of waiver. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
- j. Only the Department shall sell or otherwise transfer a certificate of waiver. This subsection does not apply to the submission of a certificate of waiver to MVD for the purpose of vehicle registration.
- k. The fleet station owner shall be responsible for the security and accountability of the fleet's certificates.
- l. If a certificate is discovered lost or stolen, the fleet station owner shall notify the Department in writing within 24 hours and indicate the number of certificates lost or stolen and each serial number. The Department may revoke a fleet station permit for refusal or failure to report a lost or stolen certificate within 24 hours of discovery.
- m. In the event of loss, destruction, or mutilation of an original completed certificate of waiver, a Director's certificate may be obtained from the Department by hand delivery of the following:
  - i. The second or third copy of the lost, destroyed, or mutilated certificate of waiver;
  - ii. The original of the "Fleet Vehicle Inspection Report/Monthly Summary;"
  - iii. A cover letter from the fleet agent explaining the situation that caused the loss, destruction, or mutilation of the original certificate of waiver; and
  - iv. Payment of a fee to cover the cost of issuance of the Director's certificate. The fee for a Director's certificate shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a Director's certificate. Checks shall be made payable to the Department of Environmental Quality.
- n. In the event an original certificate of waiver is voided by a fleet station, the original of the voided certificate shall be matched to the corresponding third copy of the certificate and retained by the fleet for two years from the date of inspection.
- 4. Upon request, a state inspector shall be allowed access to and shall be permitted to photocopy, on or off the premises, any original "Fleet Vehicle Inspection Report/Monthly Summary," the second copy of a certificate of inspection, and any other related documents.
- G. The fleet shall comply with the following general operating requirements:
  - 1. The fleet station permit and the licenses of all inspectors employed at the station shall be prominently displayed at the fleet's inspection facility.
  - 2. A fleet station shall only certify a vehicle owned by or leased to the holder of the fleet station permit.
  - 3. The inspection equipment shall be operated, calibrated, and maintained as follows:
    - a. All test equipment and instrumentation shall be maintained in accurate working condition as required by the manufacturer. An instrument requiring periodic calibration shall be calibrated according to instructions and recommendations of the instrument or equipment manufacturer. An NDIR emissions analyzer shall be registered and calibrated according to R18-2-1027. Calibration records for each instrument, except an NDIR emissions analyzer, shall be maintained by the fleet station. The calibration records shall be signed and dated by the technician performing each calibration.
    - b. The instrument calibration records shall be available for review by the Department.
    - c. Working gases used by the fleet station shall be subject to analysis and comparison to the Department's standard gases at any time.
    - d. Fleet station equipment shall be subject to both scheduled and unscheduled checks for accuracy and condition by the Department.
  - 4. A fleet emissions inspection station that is unable to test at least 25 vehicles according to R18-2-1006 and subsection (A) shall surrender its permit.
  - 5. A motor vehicle dealer with a fleet station permit shall comply with A.R.S. § 49-542.03.
  - 6. If a fleet station fails to meet any requirement of subsection (B), (C), or (D), it shall immediately cease operating as a fleet station until the requirement is met. If the fleet is cited for failure to have the necessary equipment under subsection (B), it shall not resume operation as a fleet emissions inspection station until compliance is verified by the Department.
  - 7. A fleet station shall notify the Department in writing within seven days of the end or start of employment of any vehicle emissions inspector. The written notification shall include the name and license number of the vehicle emissions inspector, a statement declaring the employment change, and the effective date of the employment change. A fleet station that does not employ a vehicle emissions inspector shall immediately cease operating as a fleet station and notify the Department immediately by telephone and within seven days in writing. All unused vehicle certificates of inspection shall be returned to the Department for a refund within seven days after operations cease.
  - 8. A fleet station that does not employ a fleet agent, as described in subsection (D)(4), shall immediately cease

operating as a fleet station and shall notify the Department immediately by telephone and within seven days in writing. The written notification shall include the name and license number of the fleet agent, a statement declaring the employment change, and the effective date of the employment change. The fleet station may resume fleet station operation after the permit applicant or other designated employee takes and passes the examination required in subsection (D)(4), if the responsibility of the day-to-day operation of the fleet station and a fleet agent designation form has been filed with the Department.

- H.** A fleet's activities shall be governed by the following compliance and enforcement rules:
- Subsections (B) through (G) apply at all times after the issuance of a fleet station permit. In addition, subsections (B), (C), and (D) apply before a permit can be issued or removed from suspension.
  - The Director may suspend or revoke a fleet station permit according to A.R.S. § 49-546(F) and A.R.S. Title 41, Chapter 6, if the permittee, or any person employed by the permittee:
    - Violates any provision of A.R.S. Title 49, Chapter 3, Article 5 or any provision of this Article;
    - Misrepresents a material fact in obtaining a permit;
    - Fails to make, keep, and submit to the Department records for a vehicle tested as a permittee; or
    - Does not provide a state inspector access to the information required by this Article.
  - If a fleet station permit is surrendered, suspended or revoked, all unused vehicle certificates of inspection shall be returned to the Department for a refund.
  - A fleet vehicle is subject to inspection by a state inspector.
  - Surrender of a permit under subsection (A)(8) or (G)(4) shall not prevent the Department from carrying out an investigative or disciplinary proceeding against the permit holder for a violation before surrender.

#### Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended effective February 20, 1980 (Supp. 80-1).  
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1019 as amended effective February 20, 1980, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1019 renumbered as Section R18-2-1019 and amended effective August 1, 1988 (Supp. 88-3).  
 Amended effective September 19, 1990 (Supp. 90-3).  
 Amended effective February 4, 1993 (Supp. 93-1).  
 Amended effective November 14, 1994 (Supp. 94-4).  
 Amended effective October 15, 1998 (Supp. 98-4).  
 Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

#### **R18-2-1020. Licensing of Third Party Agents; Issuing Alternative Fuel Certificates**

- A.** Licensing of Third Party Agents. The Department shall accept an application for a third party agent license to issue Alternative Fuel Certificates from any person who demonstrates all of the following:
- The applicant has knowledge of all laws and rules governing the inspection of alternative fuel vehicles;
  - The applicant has training or experience in inspecting alternative fuel vehicles; and
  - The applicant agrees to conduct inspections in accordance with the laws and rules for the inspection of alternative fuel vehicles.
- B.** A third party agent license is valid for a period of five years.
- C.** Issuing Alternative Fuel Certificates. The Department or its agent shall issue an Alternative Fuel Certificate according to A.R.S. § 28-2416 if the vehicle is currently powered by an alternative fuel as defined in A.R.S. § 1-215(4).

#### Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1021. Reserved**

#### **R18-2-1022. Procedure for Waiving Inspections Due to Technical Difficulties**

A vehicle emissions station manager employed by an official emissions inspection station may issue a Director's certificate for a vehicle that cannot be inspected as required by this Article because of technical difficulties inherent in the manufacturer's design or construction of the vehicle.

#### Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended effective January 1, 1986 (Supp. 85-6).  
 Former Section R9-3-1022 renumbered without change as Section R18-2-1022 (Supp. 88-3). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

#### **R18-2-1023. Certificate of Exemption for Out-of-State Vehicles**

- A.** If a vehicle being registered or reregistered in area A or area B requires an emission test and will not be available for inspection within the state during the 90-day period before the emissions compliance expiration date, and an emissions inspection is not available for that class of vehicle at an official inspection station in the area where the vehicle is located, the owner or owner's agent may apply in writing to the Department for a certificate of exemption.
- B.** The owner or owner's agent shall complete the owner portion of the certificate of exemption form, and a law enforcement official shall complete the vehicle verification portion. The owner or owner's agent shall submit the completed form to the Department.
- C.** The Department shall issue a certificate of exemption:
- For a vehicle that meets the requirements of subsection (A) as indicated by the form completed under subsection (B).
  - For a vehicle that has passed an official emissions inspection in another state during the 90 days before emissions compliance expiration upon submission of the inspection compliance document issued by the government entity conducting the inspection program.

## Department of Environmental Quality – Air Pollution Control

- D. The fee for a certificate of exemption shall be fixed by the Director according to A.R.S. § 49-543 and shall be based upon the Director's estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of certificates of exemption. The payment for the certificates shall be included with the application for certificates. Checks shall be made payable to the Department of Environmental Quality.

**Historical Note**

Adopted effective January 13, 1976 (Supp. 76-1).  
 Amended effective January 3, 1977 (Supp. 77-1).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1023 as amended effective January 3, 1979 and amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1023 renumbered without change as Section R18-2-1023 (Supp. 88-3). Amended effective February 4, 1993 (Supp. 93-1). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

**R18-2-1024. Expired****Historical Note**

New Section made by final rulemaking at 8 A.A.R. 84, effective December 14, 2001 (Supp. 01-4). Section expired under A.R.S. § 41-1056(E) at 15 A.A.R. 1128, effective April 30, 2008 (Supp. 09-2).

**R18-2-1025. Inspection of Contractor's Equipment and Personnel**

- A. State stations shall be inspected by state inspectors as follows:
1. In Area A:
    - a. Automated emission analyzers, calibrated and maintained according to "IM240 and Evap Technical Guidance," shall be inspected using state station field calibration gases at least once every other month.
    - b. Opacity meters shall be inspected for accuracy using a neutral density filter at least once each month.
    - c. During audits, a check shall be made for equipment tampering, worn instrumentation, blocked filters, and other conditions that would impair accurate sampling.
  2. In Area B:
    - a. Automated emission analyzers shall be inspected using state station field calibration gases at least two times each month.
    - b. Opacity meters shall be inspected for accuracy using a neutral density filter at least two times each month.
    - c. During audits, a check shall be made for tampering, worn instrumentation, blocked filters, and other conditions that would impair accurate sampling.
    - d. Functional checks of dynamometer accuracy including roll speed and power absorption shall be performed at least quarterly.
- B. Equipment used to perform a transient loaded emissions test, shall be audited at least twice a year for all of the following:
1. Constant volume sampler critical flow and calibration;
  2. Optimization of the flame ionization detector fuel to air ratio using methane;
  3. Proper dynamometer coast down, roll distance, and inertia weight;

4. Ability to detect background pollutant concentrations;
5. Evaporative pressure test system for accuracy, response time, and other criteria consistent with "IM240 and Evap Technical Guidance;" and
6. Functional gas cap analysis equipment.

- C. If an equipment audit of an inspection lane in either area A or area B indicates that a state station analyzer is not operating within contractually specified tolerance, the state inspector shall immediately re-audit the failing equipment. If the equipment fails the second audit, the inspector shall immediately notify the station manager. The station manager shall either replace or repair the failing equipment or close the affected lane until the equipment is repaired and its accuracy verified. The state inspector shall provide a copy of the analyzer's failing results to the station manager.
- D. A state station analyzer removed by the contractor may be returned to service upon its repair and written verification of a passing calibration audit. The contractor shall immediately notify the Department in writing of the analyzer's return to service. The contractor's calibration audit of the analyzer shall be provided to the Department within seven calendar days after the analyzer's return to service.
- E. State inspectors shall conduct performance audits to determine whether vehicle emissions inspectors are correctly performing all inspections and functions related to inspections as follows:
1. Overt audits at least two times each year for each inspection lane:
    - a. Check for proper document security;
    - b. Check for required recordkeeping including vehicle emissions inspector licenses; and
    - c. Observation and written evaluation of each vehicle emissions inspector's ability to perform an inspection.
  2. State station and vehicle emissions inspector records shall be reviewed at least monthly to assess station performance and identify any problems, potential fraud, or incompetence.
  3. If a vehicle emissions inspector fails an audit under subsection (E)(1) or (E)(2), the vehicle emissions inspector's license may be suspended or revoked according to R18-2-1016(A)(4).
- F. On-road emissions analyzers shall be inspected by a state inspector at least monthly using dry-gas analysis equipment.
- G. If an equipment audit indicates that an on-road emissions analyzer is not operating within contractually specified tolerance, the state inspector shall immediately re-audit the failing equipment. If the equipment fails the second audit, the inspector shall immediately notify the contractor and the contractor shall repair or replace the equipment according to subsections (C) and (D).

**Historical Note**

Adopted effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1025 as amended effective March 2, 1978, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1025 renumbered as Section R18-2-1025 and subsection (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

#### **R18-2-1026. Inspection of Fleet Stations**

- A.** Equipment used by fleet stations shall be inspected by state inspectors for accuracy as follows:
  1. Emission analyzers shall be inspected using field calibration gases at least quarterly.
  2. Opacity meters shall be inspected using a neutral density filter at least quarterly.
  3. Equipment for transient loaded emissions tests shall be inspected according to R18-2-1025(A) and (B).
- B.** A fleet station's emissions analyzer shall not be used for an official emissions inspection if:
  1. The state's field calibration gases are not read within the tolerances prescribed by subsection (J);
  2. There is a leak in the sampling systems or the calibration port; or
  3. The sample handling system is restricted.
- C.** The fleet station is responsible for calibration of the fleet station emission analyzer.
- D.** A state inspector may, at the inspector's discretion, allow a fleet station employee, or someone authorized by the fleet station, to calibrate the analyzer utilizing the state's field calibration gases.
- E.** The Department shall assign HC and CO concentrations to a calibration gas submitted by a fleet station emission analyzer technician and purchased from a private source.
- F.** A state inspector shall tag a fleet station emission analyzer if the analyzer does not meet the requirements of this Section. The fleet vehicle emissions inspector shall not use the analyzer for inspection until the tag is removed by a state inspector or an analyzer repair person certified under R18-2-1028. The tag shall be in the form of a U.S. postcard and contain the information listed in R18-2-1027(E).
- G.** An analyzer tagged under subsection (F) shall not be returned to service until its accuracy is verified by a state inspector or an emissions analyzer repair person certified under R18-2-1028.
- H.** A fleet station is responsible for periodic maintenance and calibrations of its emissions analyzers. Repair and maintenance requirements are prescribed in R18-2-1019.
- I.** If a state inspector has approved its use, a fleet station may lease or borrow an emission analyzer for official inspections for up to six months while the station's approved analyzer is being repaired.
- J.** Fleet station analyzers used for transient loaded tests shall comply with and be quality control checked according to "IM240 and Evap Technical Guidance." All other fleet station emission analyzers used for emissions inspections are required to read the calibration gases within the following tolerances:
  1. Within plus 0.50% CO to minus 0.25% CO in the range from 0 to 2% CO;
  2. Within plus 1.00% CO to minus 0.50% CO in the range from 2% to 10% CO;
  3. Within plus 60 PPM HC to minus 30 PPM HC in the range from 0 to 500 PPM HC when read as N-HEXANE; and
  4. Within plus 200 PPM HC to minus 100 PPM HC in the range from 500 to 2,000 PPM HC when read as N-HEXANE.
- K.** A fleet station opacity meter used for emission inspections is required to read the equivalent opacity value of neutral density filter within  $\pm 5\%$  opacity at any point in the range of the meter.
- L.** A state inspector shall conduct performance audits to determine whether a vehicle emissions inspector is correctly per-

forming inspections and functions related to inspections as follows:

1. Overt audits at least two times each year for each facility:
  - a. Check for proper document security;
  - b. Check for required recordkeeping including vehicle emissions inspector licenses; and
  - c. Observe and make a written evaluation of each vehicle emissions inspector's ability to perform an inspection.
2. Fleet station and vehicle emissions inspector records shall be reviewed at least monthly to assess fleet performance and identify any problems, potential fraud, or incompetence.

#### **Historical Note**

Adopted effective January 3, 1977 (Supp. 77-1).  
 Amended effective January 1, 1986 (Supp. 85-6).  
 Amended subsections (A) and (J) and added subsection (K) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1026 renumbered as Section R18-2-1026 and subsections (B), (F), (G) and (H) amended effective August 1, 1988 (Supp. 88-3).  
 Amended effective November 14, 1994 (Supp. 94-4).  
 Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

#### **R18-2-1027. Registration and Inspection of Emissions Analyzers and Opacity Meters**

- A.** An automotive repair facility may apply to the Department at no charge for registration of NDIR HC and CO analyzers, and opacity meters. NDIR emission analyzers and opacity meters used by fleet inspection stations shall be registered for the fleet station permit approval. Application forms for analyzer or opacity meter registration are available from the Department. Completed application forms shall be submitted to the Department. For purposes of 18 A.A.C. 1, the application components for registration of an analyzer or opacity meter are:
  1. The Department receives a completed application form;
  2. The applicant or employee successfully completes the "Certified Technician" examination described in R18-2-1028(A)(2); and
  3. The Department inspects the analyzer.
- B.** A registered analyzer shall be calibrated at least monthly, by a certified technician, with calibration gases approved by the Department. A registered opacity meter shall be calibrated according to manufacturer's specifications before performing the first vehicle emissions inspection in any month.
- C.** A registered analyzer shall meet the requirements of R18-2-1006(F)(8)(a). Calibration shall be verified by a state inspector before the analyzer is registered. The analyzer shall read the value of the calibration gases within the following tolerances:
  1. Plus 0.50% CO to minus 0.25% CO in the range from 0 to 2% CO;
  2. Plus 1.00% CO to minus 0.50% CO in the range from 2% to 10% CO;
  3. Plus 60 PPM HC to minus 30 PPM HC in the range from 0 to 500 PPM HC when read as N-HEXANE; and
  4. Plus 200 PPM HC to minus 100 PPM HC in the range from 500 to 2,000 PPM HC when read as N-HEXANE.
- D.** Each registered opacity meter and analyzer shall have a unique registration number assigned by the Department. The technician shall maintain a repair and calibration log for each registered opacity meter and analyzer on a form provided by the Department. The log shall be made available to a state inspector on request.
- E.** A state inspector shall tag a registered opacity meter or analyzer if the opacity meter or analyzer does not meet the

## Department of Environmental Quality – Air Pollution Control

requirements of this Section. A tagged opacity meter or analyzer shall not be used for the purposes of R18-2-1010 or R18-2-1019 until the tag is removed by a state inspector or an emission analyzer repair person certified under R18-2-1028 after accuracy is verified.

1. The tag shall be in the form of a U.S. postcard and contain the following information:
    - a. Analyzer registration number or opacity meter registration number,
    - b. Brief statement that the analyzer does not meet state operating requirements for registered analyzers,
    - c. Reason for tagging,
    - d. Date the analyzer was tagged and the signature of state inspector issuing the tag,
    - e. Details of repairs performed to correct the failure,
    - f. CO and HC concentrations of calibration gases used to verify analyzer accuracy,
    - g. Analyzer readings when gases were introduced into the analyzer sampling probe, and
    - h. Repair person's certificate number and signature or signature of state inspector removing the tag and date accuracy is verified.
  2. The tag shall be returned to the Department within two business days after accuracy is verified.
- F. An owner of a registered emission analyzer or opacity meter shall notify the Department within seven business days of the retirement, resignation, or termination of any licensed vehicle emissions inspector or certified technician. The Department shall revoke the registration of an emission analyzer or opacity meter if the owner of the analyzer or meter does not employ an inspector licensed under R18-2-1019 or a technician certified under R18-2-1028.

**Historical Note**

Adopted effective January 3, 1977 (Supp. 77-1).  
 Amended effective March 2, 1978 (Supp. 78-2).  
 Amended effective January 3, 1979 (Supp. 79-1).  
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1027 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1027 renumbered as Section R18-2-1027 and subsections (B), (D), (F) and (G) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

**R18-2-1028. Certification of Users of Registered Analyzers and Analyzer Repair Persons**

- A. A person may be certified to use a registered analyzer and opacity meter if:
1. The person completes the application form and submits it to the Department; and
  2. The person demonstrates proficiency by scoring 80% or higher on a Department-administered examination in the following areas:
    - a. Equipment used in the inspection and control of emissions;
    - b. Types of emissions inspection failures;

- c. Correction procedures for excessive HC emissions;
- d. Correction procedures for excessive CO emissions;
- e. Proper carburetor adjustment procedures; and
- f. Diesel fuel injection systems.

- B. Certification under subsection (A) shall be valid for one year from date of issue and may be renewed, under the conditions of subsection (A), by submitting a renewal application to the Department 30 days before the current certification expiration date.
- C. A person certified under subsection (A) shall notify the Department within seven business days of the person's retirement, resignation, or termination from employment.
- D. A person may be certified to repair and remove tags from an emission analyzer under R18-2-1027 if:
1. Application is made to the Department;
  2. The person demonstrates proficiency by scoring 80% or higher on a Department-administered examination in the following areas:
    - a. State and federal regulations governing emissions analyzers,
    - b. Fundamentals of emission analyzer operation, repair and preventive maintenance,
    - c. Theory of operation of vehicle emissions control devices.
- E. Certification under subsection (D) shall be valid for one year from date of issue and may be renewed, under the conditions of subsection (D), by submitting a renewal application to the Department 30 days before the current certification expiration date.
- F. Each person certified under this Section shall receive a unique nontransferable certification number.
- G. The Department may suspend, revoke or refuse to renew the certification issued under subsection (A) if:
1. The person's actions demonstrate a lack of proficiency in the areas listed under subsection (A)(2); or
  2. The person has willfully violated any provision of this Article.
- H. The Department may suspend, revoke, or refuse to renew the certification issued under subsection (D) if:
1. The person's actions demonstrate a lack of proficiency in the areas listed under subsection (D)(2); or
  2. The person has willfully violated any provision of this Article.

**Historical Note**

Adopted effective January 1, 1986 (Supp. 85-6).  
 Amended subsections (A) and (F) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1028 renumbered as Section R18-2-1028 and subsection (D) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

**R18-2-1029. Vehicle Emission Control Devices**

For the purposes of A.R.S. §§ 28-955 and 49-447, a registered motor vehicle shall have in operating condition all emission control devices installed by the vehicle manufacturer to comply with federal requirements for motor vehicle emissions or equivalent after-market replacement parts or devices.

**Historical Note**

Adopted effective January 3, 1977 (Supp. 77-1). Former Section R9-3-1029 renumbered as Section R18-2-1029 and amended effective August 1, 1988 (Supp. 88-3). Amended by final rulemaking at 6 A.A.R. 562, effective

January 14, 2000 (Supp. 00-1).

**R18-2-1030. Visible Emissions; Mobile Sources**

- A. A vehicle other than a diesel-powered vehicle or 2-stroke vehicle that emits any visible emissions for 10 consecutive seconds or more is “excessive” for the purposes of A.R.S. § 28-955(C).
- B. A diesel-powered vehicle shall not emit any visible emissions in excess of:
  - 1. Twenty percent visual opacity for 10 consecutive seconds or more at or below 2,000 feet elevation;
  - 2. Thirty percent visual opacity for 10 consecutive seconds or more above 2,000 feet and at or below 4,000 feet elevation; and
  - 3. Forty percent visual opacity for 10 consecutive seconds above 4,000 feet elevation.
- C. A vehicle that exceeds the standards in subsection (B) fails the inspection under R18-2-1006 and is considered to have “excessive” emissions under A.R.S. § 28-955(C).

**Historical Note**

Adopted effective January 3, 1977 (Supp. 77-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1030 as adopted effective January 3, 1977, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (C) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1030 renumbered as Section R18-2-1030 and subsection (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

**R18-2-1031. Standards for Evaluating the Oxidation Efficiency of a Catalytic Converter**

- A. Except for a vehicle requiring an Idle-Only Inspection, a gasoline-powered vehicle requiring a catalytic converter test under R18-2-1008(C) shall be tested using the following Catalyst Efficiency Test Procedure:
  - 1. Immediately after a vehicle completes an Inspection and Maintenance (I/M) test in the waiver lane, the exhaust sampling cone shall be removed from the tailpipe. The vehicle shall remain on the dynamometer with the engine idling and the transmission in neutral. The vehicle engine must be at normal operating temperature.
  - 2. For the catalyst test, the dynamometer and the constant volume sampler shall remain at the settings used for the vehicle's I/M test.
  - 3. The inspector shall insert the sampling tube for the A/F analyzer into the tailpipe of the vehicle.
  - 4. The inspector shall accelerate the vehicle to  $40 \pm 2.5$  MPH and maintain a steady-state operating mode for the duration of the test. Once the vehicle obtains the test speed, the test shall begin.
  - 5. Once the test begins, a two-minute stabilization period shall take place, during which the inspector shall monitor the A/F analyzer to ensure that the A/F is 14.0 or greater. If the mean A/F is less than 14.0, the inspector shall abort the test.
  - 6. If the A/F is 14.0 or greater, the exhaust sampling cone shall be repositioned for exhaust sampling.
  - 7. After the stabilization period ends, the total hydrocarbon and methane concentrations and the A/F ratio shall be continuously recorded for two minutes.
  - 8. At the end of the two-minute sampling period, the inspector shall stop the vehicle, remove the exhaust sampling

cone and the A/F analyzer sampling probe from the tailpipe, and remove the vehicle from the dynamometer.

- 9. The mean total hydrocarbon concentration shall be divided by the mean methane concentration for the recorded values of the test, to produce a ratio (R) of total hydrocarbon to methane. The ratio, R, shall be applied to the formula: Catalyst Efficiency (%) =  $-3(R) + 100$ .
- 10. A vehicle passes the test if the Catalyst Efficiency (%) is 75% or greater.
- 11. The test result for a non-passing vehicle with a mean A/F equal to, or less than, 14.3 shall be inconclusive.
- 12. A vehicle fails the Catalyst Efficiency Test Procedure if the A/F is greater than 14.3 and the Catalyst Efficiency (%) is less than 75%. The failing vehicle cannot be granted a waiver according to R18-2-1008(C)(1).
- B. Analytical equipment required to perform the Catalyst Efficiency Test Procedure shall meet the following requirements:
  - 1. Analyzer Specifications:
    - a. An analyzer shall meet performance specifications of 40 CFR 86 subparts B, D, and N with respect to accuracy, precision, drift, interference, and noise. 40 CFR, subparts B, D, and N, adopted as of July 1, 1998, are incorporated by reference and on file with the Department and the Secretary of State. This incorporation contains no future editions or amendments. A copy of this referenced material may be obtained from the U.S. Government Printing Office, Superintendent of Documents, Mail Stop SSOP, Washington D.C. 20402-9328.
    - b. Total hydrocarbon analysis shall be determined by a flame ionization detector. The analyzer shall be single range with a calibration curve covering at least 0 to 300 ppm carbon.
    - c. Methane analysis shall be determined by a flame ionization detector equipped with a non-methane cutter capable of oxidizing 98% of the hydrocarbons (except methane) while more than 90% of the methane remains unchanged. The analyzer shall be single range with a calibration curve covering at least 0 to 30 ppm.
    - d. Engine A/F mixture analysis shall be determined by a Universal Exhaust Gas Oxygen Sensor. The range shall be 8.0 to 25.5 A/F for gasoline with an accuracy of  $\pm 2\%$  of point and a response time of less than 150 milliseconds.
  - 2. Analyzer Performance Verification and Calibration:
    - a. The operator of an analyzer under this Section shall verify analyzer performance according to manufacturer recommendations.
    - b. Upon initial installation, and monthly thereafter, the operator of an analyzer under this Section shall generate a 10-point calibration curve for each total hydrocarbon and methane analyzer. A gas divider employing equally spaced points may be used to generate the calibration curve.
      - i. Each calibration curve generated shall fit the data within  $\pm 2.0\%$  at each calibration point.
      - ii. Each calibration curve shall be verified for each analyzer with a confirming calibration standard between 15-80% of full scale that is not used for curve generation. Each confirming standard shall be measured by the curve within  $\pm 2.5\%$ .

**Historical Note**

Adopted effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1031 renumbered as Section R18-2-1031 and amended effective August 1,

## Department of Environmental Quality – Air Pollution Control

1988 (Supp. 88-3). Amended effective November 14, 1994  
(Supp. 94-4). Amended by final rulemaking at 6 A.A.R.  
382, effective December 20, 1999 (Supp. 99-4).

**ARTICLE 11. FEDERAL HAZARDOUS AIR POLLUTANTS****R18-2-1101. National Emission Standards for Hazardous Air Pollutants (NESHAPs)**

- A. Except as provided in R18-2-1102, the following subparts of 40 CFR 61, National Emission Standards for Hazardous Air Pollutants (NESHAPs), and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.
1. Subpart A - General Provisions.
  2. Subpart B - Radon Emissions from Underground Uranium Mines.
  3. Subpart C - Beryllium.
  4. Subpart D - Beryllium Rocket Motor Firing.
  5. Subpart E - Mercury.
  6. Subpart F - Vinyl Chloride.

7. Subpart H - Radionuclides Other Than Radon from Department of Energy Facilities.
8. Subpart I - Radionuclide Emissions from Federal Other Than Nuclear Regulatory Commission Licensees and Not Covered by Subpart H.
9. Subpart J - Equipment Leaks (Fugitive Emission Sources) of Benzene.
10. Subpart K - Radionuclide Emissions From Elemental Phosphorus Plants.
11. Subpart L - Benzene Emissions from Coke By-Product Recovery Plants.
12. Subpart M - Asbestos.
13. Subpart N - Inorganic Arsenic Emissions from Glass Manufacturing Plants.
14. Subpart O - Inorganic Arsenic Emissions from Primary Copper Smelters.
15. Subpart P - Inorganic Arsenic Emissions from Arsenic Trioxide and Metallic Arsenic Production.
16. Subpart Q - Radon Emissions from Department of Energy Facilities.
17. Subpart R - Radon Emissions from Phosphogypsum Stacks.
18. Subpart T - Radon Emissions from the Disposal of Uranium Mill Tailings.
19. Subpart V - Equipment Leaks (Fugitive Emission Sources).
20. Subpart W - Radon Emissions from Operating Mill Tailings.
21. Subpart Y - Benzene Emissions From Benzene Storage Vessels.
22. Subpart BB - Benzene Emissions from Benzene Transfer Operations.
23. Subpart FF - Benzene Waste Operations.

## Department of Environmental Quality – Air Pollution Control

- B. Except as provided in R18-2-1102, the following subparts of 40 CFR 63, NESHAPs for Source Categories, and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.
1. Subpart A - General Provisions.
  2. Subpart F - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry.
  3. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater.
  4. Subpart H - National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks.
  5. Subpart I - National Emission Standards for Organic Hazardous Air Pollutants for Certain Processes Subject to the Negotiated Regulation for Equipment Leaks.
  6. Subpart J - National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production.
  7. Subpart L - National Emission Standards for Coke Oven Batteries.
  8. Subpart M - National Perchloroethylene Air Emission Standards for Dry Cleaning Facilities.
  9. Subpart N - National Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks.
  10. Subpart O - Ethylene Oxide Emissions Standards for Sterilization Facilities.
  11. Subpart Q - National Emission Standards for Hazardous Air Pollutants for Industrial Process Cooling Towers.
  12. Subpart R - National Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations).
  13. Subpart S - National Emission Standards for Hazardous Air Pollutants from the Pulp and Paper Industry.
  14. Subpart T - National Emission Standards for Halogenated Solvent Cleaning.
  15. Subpart U - National Emission Standards for Hazardous Air Pollutant Emissions: Group I Polymers and Resins.
  16. Subpart W - National Emission Standards for Hazardous Air Pollutants for Epoxy Resins Production and Non-Nylon Polyamides Production.
  17. Subpart Y - National Emission Standards for Marine Tank Vessel Loading Operations.
  18. Subpart AA - National Emission Standards for Hazardous Air Pollutants From Phosphoric Acid Manufacturing Plants.
  19. Subpart BB - National Emission Standards for Hazardous Air Pollutants From Phosphate Fertilizers Production Plants.
  20. Subpart CC - National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries.
  21. Subpart DD - National Emission Standards for Hazardous Air Pollutants from Off-Site Waste and Recovery Operations.
  22. Subpart EE - National Emission Standards for Magnetic Tape Manufacturing Operations.
  23. Subpart GG - National Emission Standards for Aerospace Manufacturing and Rework Facilities.
  24. Subpart HH - National Emission Standards for Hazardous Air Pollutants From Oil and Natural Gas Production Facilities.
  25. Subpart JJ - National Emission Standards for Wood Furniture Manufacturing Operations.
  26. Subpart KK - National Emission Standards for the Printing and Publishing Industry.
  27. Subpart LL - National Emission Standards for Hazardous Air Pollutants for Primary Aluminum Reduction Plants.
  28. Subpart MM - National Emission Standards for Hazardous Air Pollutants for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semi-chemical Pulp Mills.
  29. Subpart OO - National Emission Standards for Tanks - Level 1.
  30. Subpart PP - National Emission Standards for Containers.
  31. Subpart QQ - National Emission Standards for Surface Impoundments.
  32. Subpart RR - National Emission Standards for Individual Drain Systems.
  33. Subpart SS - National Emission Standards for Closed Vent Systems, Control Devices, Recovery Devices and Routing to a Fuel Gas System or a Process.
  34. Subpart TT - National Emission Standards for Equipment Leaks - Control Level 1.
  35. Subpart UU - National Emission Standards for Equipment Leaks - Control Level 2 Standards.
  36. Subpart VV - National Emission Standards for Oil-Water Separators and Organic-Water Separators.
  37. Subpart WW - National Emission Standards for Storage Vessels (Tanks) - Control Level 2.
  38. Subpart XX - National Emission Standards for Ethylene Manufacturing Process Units: Heat Exchange Systems and Waste Operations.
  39. Subpart YY - National Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards.
  40. Subpart CCC - National Emission Standards for Hazardous Air Pollutants for Steel Pickling - HCl Process Facilities and Hydrochloric Acid Regeneration Plants.
  41. Subpart DDD - National Emission Standards for Hazardous Air Pollutants for Mineral Wool Production.
  42. Subpart EEE - National Emission Standards for Hazardous Air Pollutants From Hazardous Waste Combustors.
  43. Subpart GGG - National Emission Standards for Pharmaceuticals Production.
  44. Subpart HHH - National Emission Standards for Hazardous Air Pollutants From Natural Gas Transmission and Storage Facilities.
  45. Subpart III - National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production.
  46. Subpart JJJ - National Emission Standards for Hazardous Air Pollutant Emissions: Group IV Polymers and Resins.
  47. Subpart LLL - National Emission Standards for Hazardous Air Pollutants From the Portland Cement Manufacturing Industry.
  48. Subpart MMM - National Emission Standards for Hazardous Air Pollutants for Pesticide Active Ingredient Production.
  49. Subpart NNN - National Emission Standards for Hazardous Air Pollutants for Wool Fiberglass Manufacturing.
  50. Subpart OOO - National Emission Standards for Hazardous Air Pollutant Emissions: Manufacture of Amino/Phenolic Resins.

## Department of Environmental Quality – Air Pollution Control

51. Subpart PPP - National Emission Standards for Hazardous Air Pollutant Emissions for Polyether Polyols Production.
52. Subpart QQQ - National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting.
53. Subpart RRR - National Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production.
54. Subpart TTT - National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelting.
55. Subpart UUU - National Emission Standards for Hazardous Air Pollutants for Petroleum Refineries: Catalytic Cracking Units, Catalytic Reforming Units, and Sulfur Recovery Units.
56. Subpart VVV - National Emission Standards for Hazardous Air Pollutants: Publicly Owned Treatment Works.
57. Subpart XXX - National Emission Standards for Hazardous Air Pollutants for Ferrous Alloys Production: Ferromanganese and Silicomanganese.
58. Subpart AAAA - National Emission Standards for Hazardous Air Pollutants: Municipal Solid Waste Landfills.
59. Subpart CCCC - National Emission Standards for Hazardous Air Pollutants: Manufacture of Nutritional Yeast.
60. Subpart DDDD - National Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products.
61. Subpart EEEE - National Emission Standards for Hazardous Air Pollutants: Organic Liquids Distribution (Non-Gasoline).
62. Subpart FFFF - National Emission Standards for Hazardous Air Pollutants: Miscellaneous Organic Chemical Manufacturing.
63. Subpart GGGG - National Emission Standards for Hazardous Air Pollutants: Solvent Extraction for Vegetable Oil Production.
64. Subpart HHHH - National Emission Standards for Hazardous Air Pollutants for Wet-Formed Fiberglass Mat Production.
65. Subpart IIII - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks.
66. Subpart JJJJ - National Emission Standards for Hazardous Air Pollutants: Paper and Other Web Coating.
67. Subpart KKKK - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Cans.
68. Subpart MMMM - National Emission Standards for Hazardous Air Pollutants for Surface Coating of Miscellaneous Metal Parts and Products.
69. Subpart NNNN - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Large Appliances.
70. Subpart OOOO - National Emission Standards for Hazardous Air Pollutants: Printing, Coating, and Dyeing of Fabrics and Other Textiles.
71. Subpart PPPP - National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products.
72. Subpart QQQQ - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Wood Building Products.
73. Subpart RRRR - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Furniture.
74. Subpart SSSS - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Coil.
75. Subpart TTTT - National Emission Standards for Hazardous Air Pollutants for Leather Finishing Operations.
76. Subpart UUUU - National Emission Standards for Hazardous Air Pollutants for Cellulose Products Manufacturing.
77. Subpart VVVV - National Emission Standards for Hazardous Air Pollutants for Boat Manufacturing.
78. Subpart WWWW - National Emission Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production.
79. Subpart XXXX - National Emission Standards for Hazardous Air Pollutants: Rubber Tire Manufacturing.
80. Subpart YYYY - National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines.
81. Subpart ZZZZ - National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines.
82. Subpart AAAAA - National Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants.
83. Subpart BBBBB - National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing.
84. Subpart CCCCC - National Emission Standards for Hazardous Air Pollutants for Coke Ovens: Pushing, Quenching, and Battery Stacks.
85. Subpart DDDDD - National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers and Process Heaters.
86. Subpart EEEEE - National Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries.
87. Subpart FFFFF - National Emission Standards for Hazardous Air Pollutants: Integrated Iron and Steel Manufacturing.
88. Subpart GGGGG - National Emission Standards for Hazardous Air Pollutants: Site Remediation.
89. Subpart HHHHH - National Emission Standards for Hazardous Air Pollutants: Miscellaneous Coating Manufacturing.
90. Subpart IIIII - National Emission Standards for Hazardous Air Pollutants: Mercury Emissions From Mercury Cell Chlor-Alkali Plants.
91. Subpart JJJJJ - National Emission Standards for Hazardous Air Pollutants for Brick and Structural Clay Products Manufacturing.
92. Subpart KKKKK - National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing.
93. Subpart LLLLL - National Emission Standards for Hazardous Air Pollutants: Asphalt Processing and Asphalt Roofing Manufacturing.
94. Subpart MMMMM - National Emission Standards for Hazardous Air Pollutants: Flexible Polyurethane Foam Fabrication Operations.
95. Subpart NNNNN - National Emission Standards for Hazardous Air Pollutants: Hydrochloric Acid Production.
96. Subpart PPPPP - National Emission Standards for Hazardous Air Pollutants: Engine Test Cells/Standards.
97. Subpart QQQQQ - National Emission Standards for Hazardous Air Pollutants for Friction Materials Manufacturing Facilities.
98. Subpart RRRRR - National Emission Standards for Hazardous Air Pollutants: Taconite Iron Ore Processing.
99. Subpart SSSSS - National Emission Standards for Hazardous Air Pollutants for Refractory Products Manufacturing.
100. Subpart TTTTT - National Emission Standards for Hazardous Air Pollutants for Primary Magnesium Refining.
101. Subpart WWWW - National Emission Standards for Hospital Ethylene Oxide Sterilizers.

## Department of Environmental Quality – Air Pollution Control

102. Subpart YYYYYY - National Emission Standards for Hazardous Air Pollutants for Area Sources: Electric Arc Furnace Steelmaking Facilities.
103. Subpart ZZZZZZ - National Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries Area Sources.
104. Subpart BBBBBB - National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Distribution Bulk Terminals, Bulk Plants, and Pipeline Facilities.
105. Subpart CCCCCC - National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Dispensing Facilities.
106. Subpart DDDDDD - National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production Area Sources.
107. Subpart EEEEEEE - National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting Area Sources.
108. Subpart FFFFFFF - National Emission Standards for Hazardous Air Pollutants for Secondary Copper Smelting Area Sources.
109. Subpart GGGGGG - National Emission Standards for Hazardous Air Pollutants for Primary Nonferrous Metals Area Sources-Zinc, Cadmium, and Beryllium.
110. Subpart HHHHHH - National Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources.
111. Subpart JJJJJJ - National Emission Standards for Hazardous Air Pollutants for Area Sources: Industrial, Commercial, and Institutional Boilers Area Sources.
112. Subpart LLLLLL - National Emission Standards for Hazardous Air Pollutants for Acrylic and Modacrylic Fibers Production Area Sources.
113. Subpart MMMMMM - National Emission Standards for Hazardous Air Pollutants for Carbon Black Production Area Sources.
114. Subpart NNNNNN - National Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources: Chromium Compounds.
115. Subpart OOOOOO - National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production and Fabrication Area Sources.
116. Subpart PPPPPP - National Emission Standards for Hazardous Air Pollutants for Lead Acid Battery Manufacturing Area Sources.
117. Subpart QQQQQQ - National Emission Standards for Hazardous Air Pollutants for Wood Preserving Area Sources.
118. Subpart RRRRRR - National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing Area Sources.
119. Subpart SSSSSS - National Emission Standards for Hazardous Air Pollutants for Glass Manufacturing Area Sources.
120. Subpart TTTTTT - National Emission Standards for Hazardous Air Pollutants for Secondary Nonferrous Metals Processing Area Sources.
121. Subpart VVVVVV - National Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources.
122. Subpart WWWWWW - National Emission Standards for Hazardous Air Pollutants: Area Source Standards for Plating and Polishing Operations.
123. Subpart XXXXXX - National Emission Standards for Hazardous Air Pollutants Area Source Standards for Nine Metal Fabrication and Finishing Source Categories.
124. Subpart YYYYYY - National Emission Standards for Hazardous Air Pollutants for Area Sources: Ferroalloys Production Facilities.
125. Subpart ZZZZZZ - National Emission Standards for Hazardous Air Pollutants: Area Source Standards for Aluminum, Copper, and other Nonferrous Foundries.
126. Subpart AAAAAA - National Emission Standards for Hazardous Air Pollutants for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing.
127. Subpart BBBBBB - National Emission Standards for Hazardous Air Pollutants for Area Sources: Chemical Preparations Industry.
128. Subpart CCCCCC - National Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing.
129. Subpart DDDDDD - National Emission Standards for Hazardous Air Pollutants for Area Sources: Prepared Feeds Manufacturing.
130. Subpart EEEEEEE - National Emission Standards for Hazardous Air Pollutants: Gold Mine Ore Processing and Production Area Source Category.
131. Subpart HHHHHHH - National Emission Standards for Hazardous Air Pollutant Emissions for Polyvinyl Chloride and Copolymers Production.

**Historical Note**

Former Section R18-2-1101 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-1101 renumbered from R18-2-901 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective February 17, 1995 (Supp. 95-1). Amended effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expediated rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

**R18-2-1102. General Provisions**

- A. When used in 40 CFR 61 or 63, “Administrator” means the Director of the Arizona Department of Environmental Quality except that the Director shall not be authorized to approve alternate or equivalent test methods or alternate standards or work practices, except as specifically provided in Part 63, Subpart B.
- B. From the general standards identified in R18-2-1101(A), delete 40 CFR 61.04. All requests, reports, applications, submittals, and other communications to the Director pursuant to this Article shall be submitted to the Arizona Department of Environmental Quality, Air Quality Division, 1110 West Washington Street, Phoenix, Arizona 85007.

- C. The Director shall not be delegated authority to deal with equivalency determinations that are nontransferable through Section 112(h)(3) of the Act.

#### Historical Note

Former Section R18-2-1102 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-1102 renumbered from R18-2-902 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective February 17, 1995 (Supp. 95-1). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4).

### ARTICLE 12. EMISSIONS BANK

#### R18-2-1201. Definitions

In addition to the definitions contained in Article 1 of this Chapter, and A.R.S. § 49-401.01, the following definitions apply to this Article:

1. "Certified credit" means an emission reduction credit that meets the criteria under R18-2-1205.
2. "Conditional credit" means an emission reduction credit that is in the review process before qualifying for certification under R18-2-1205.
3. "Credit generation" means the process by which a source obtains emission reduction credits for eventual listing in the registry.
4. "Credit retirement" means a person's purchase of a banked emission reduction credit for the purpose of permanent removal from the emissions bank.
5. "Credit utilization" means the use of a certified emission reduction credit.
6. "Credit withdrawal" means the removal of an emission reduction credit from the bank by the source originally depositing the emission reduction credit.
7. "Emission reduction credit" or "credit" means a certified unit that may be banked, sold, transferred, withdrawn, or retired.
8. "Permitting authority" means the state or county that has jurisdiction over a source under A.R.S. § 49-402 and may review, issue, revise, administer, and enforce a permit; and certify a credit under this Article.
9. "Registry" means the location where emission reduction credits are posted for the purpose of public notice, allowing a person to determine the availability of credits for related market transactions.
10. "Surplus" means the amount of a permitted source's emission reduction that is not required by federal, state, or local law.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1202. Applicability

The provisions of this Article apply to permitted sources emitting particulate matter, sulfur dioxide, carbon monoxide, nitrogen oxides, or volatile organic compounds. The provisions of this Article shall not apply to sources granted authority to operate under 18 A.A.C. 2, Article 5.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1203. Emissions Bank Administration

- A. The Director shall place an emission reduction credit in the emissions bank credit registry upon conditional certification, certification, pending use, and final disposition. For each credit, the Director shall place in the registry:

1. Source's contact name and information;
2. Source name and information;
3. Amount and type of pollutant;
4. Date of emission reduction and credit status.

- B. The Director shall issue a certificate of deposit to the reducing source for each certified credit deposited in the bank, and issue a certificate of retirement to a person for each certified credit permanently retired.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1204. Credit Generation

- A. A source wanting to generate an emission reduction for deposit into the bank shall submit a Credit Generation Application (CGA) to the Director on a form prescribed by the Director. The CGA shall contain:

1. The company name;
  2. The company mailing address;
  3. The owner, co-owner, or partner;
  4. The contact person name, title, and telephone number;
  5. The permitted source name, location, permit number, and industry code;
  6. The pollutant;
  7. The attainment status of the area where the source is located;
  8. The amount of actual emissions reduced;
  9. The date of emission reduction to be credited;
  10. The description of emission reduction credit generation activity;
  11. The signature of and verification of truthfulness and accuracy by a responsible official as defined in R18-2-301(17);
  12. The name, title, and telephone number of the responsible official.
- The source shall submit a copy of the CGA to the permitting authority with an application to revise the permit or request to terminate the permit.

- B. Upon receipt by the Director of the CGA with a check for the administrative fee specified in R18-2-1208(A), the Director shall list each conditional credit in the registry.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1205. Credit Certification

- A. A permitting authority may certify an emission credit if the permitting authority verifies the credit is based on:

1. A reduction in actual emissions that occurred after August 17, 1999;
2. A quantifiable reduction in actual emissions;
3. A permanent reduction in actual emissions;
4. An enforceable reduction in actual emissions; and
5. A surplus reduction in actual emissions occurring in addition to any other required emission reduction.

- B. The source must notify the permitting authority when the reduction occurs.

- C. In order for an emission reduction to be quantifiable under this Section:

1. The emission reduction must be quantifiable under R18-2-301(14); and
2. The reducing source shall submit documentation of any testing or monitoring that demonstrates an emission reduction.

- D. The permitting authority shall certify one emission reduction credit for each ton per year of particulate matter, sulfur diox-

ide, carbon monoxide, nitrogen dioxide, or volatile organic compound actually reduced.

- E. At the time of deposit in the emissions bank, the Director shall discount by 10 percent the certified credit total. The 10 percent of certified credit total shall be permanently retired to the bank.
- F. A banked credit does not expire.
- G. The permitting authority shall notify the source and the Director that a credit is certified. Upon receipt of the notice, the Director shall issue a certificate for each certified credit to the applicant identified in R18-2-1204, and list the certified credit in the registry.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1206. Credit Utilization

- A. A source may use a certified emission reduction credit in the same nonattainment area, maintenance area, or modeling domain in which the emission reduction occurred by submitting a Credit Utilization Application (CUA) to the Director on a form prescribed by the Director. The CUA shall contain:
  1. The name and mailing address of the source that generated the credit;
  2. The owner, co-owner, or partner of the source that generated the credit;
  3. The contact person name, title, telephone number of the source that generated the credit;
  4. The name and mailing address of the source utilizing the credit;
  5. The owner, co-owner, or partner of the source utilizing the credit;
  6. The contact person name, title, telephone number of the source utilizing the credit;
  7. The purpose of the utilization;
  8. The pollutant;
  9. The amount of emission reduction credit to be utilized;
  10. Each emission reduction credit certificate number;
  11. The signature of and verification of truthfulness and accuracy by a responsible official as defined in R18-2-301(17); and
  12. The name, title, and telephone number of the responsible official.

The source shall submit a copy of the CUA to the permitting authority at the time the source submits an application for a permit or permit revision.
- B. Upon receipt by the Director of the CUA with a check for the administrative fee specified in R18-2-1208(B), the Director shall list the pending sale in the registry.
- C. The Director shall not list the final sale in the registry until:
  1. The permitting authority evaluates and verifies the authenticity of the credit with the emissions bank;
  2. The permitting authority determines that there will be no adverse impact on air quality; and
  3. The permitting authority completes the permitting action and submits the credit certificate to the Director.
- D. After the permitting authority notifies the Director that the requirements of this Section have been met, the Director shall delist the credits in the registry.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1207. Credit Withdrawal

Any party purchasing certified credits listed in the emissions bank for the purpose of credit retirement, or any source withdrawing its

own credits from the emissions bank, shall submit a CUA specified in R18-2-1204(A) with the surrendered certificates to the Director. Upon receipt of the CUA and surrendered certificates, the Director shall delist the credits in the registry.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### R18-2-1208. Fees

- A. A source generating a credit shall pay a non-refundable administrative fee of \$200.00 to the Director when submitting the CGA. This fee is in addition to the fees specified in R18-2-326.
- B. A source utilizing a credit shall pay a non-refundable administrative fee of \$200.00 to the Director when submitting the CUA. This fee is in addition to the fees specified in R18-2-326.
- C. The Director shall not assess an administrative fee to a person:
  1. Purchasing a credit for retirement;
  2. Amending ownership information contained in the registry; or
  3. Withdrawing a credit from the bank.

#### Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

#### ARTICLE 13. EXPIRED

*Article 13, consisting of Sections R18-2-1301 through R18-2-1307, rules expired under A.R.S. § 41-1056(J), effective April 30, 2013 (Supp. 13-3).*

*Article 13, consisting of Sections R18-2-1301 through R18-2-1307, made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2).*

#### R18-2-1301. Expired

#### **R18-2-1307. Expired**

##### **Historical Note**

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

### **ARTICLE 14. CONFORMITY DETERMINATIONS**

#### **R18-2-1401. Definitions**

Terms used in this Article but not defined in this Article, Article 1 of this Chapter, or A.R.S. § 49-401.01 shall have the meaning given them by the CAA, Titles 23 and 40 U.S.C., other EPA regulations, or other USDOT regulations, in that order of priority. The following definitions and the definitions contained in Article 1 of this Chapter and in A.R.S. § 49-401.01 shall apply to this Article:

1. “ADEQ” means the Arizona Department of Environmental Quality.
2. “ADOT” means the Arizona Department of Transportation.
3. “Applicable implementation plan” is defined in § 302(q) of the CAA and means the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under § 110, or promulgated under § 110(c), or promulgated or approved pursuant to regulations promulgated under § 301(d) and which implements the relevant requirements of the CAA.
4. “CAA” means the Clean Air Act, as amended.
5. “Cause or contribute to a new violation” for a project means either of the following:
  - a. To cause or contribute to a new violation of a standard in the area substantially affected by the project or over a region which would otherwise not be in violation of the standard during the future period in question, if the project were not implemented.
  - b. To contribute to a new violation in a manner that would increase the frequency or severity of a new violation of a standard in such area.
6. “Consultation” means that one party confers with another identified party, provides access to all appropriate information to that party needed for meaningful input, and, prior to taking any action, considers the views of that party and responds in accordance with the procedures established in R18-2-1405.
7. “Control strategy implementation plan revision” is the applicable implementation plan which contains specific strategies for controlling the emissions of and reducing ambient levels of pollutants in order to satisfy CAA requirements for demonstrations of reasonable further progress and attainment (CAA §§ 182(b)(1), 182(c)(2)(A), 182(c)(2)(B), 187(a)(7), 189(a)(1)(B), and 189(b)(1)(A); and §§ 192(a) and 192(b), for nitrogen dioxide).
8. “Control strategy period” with respect to particulate matter less than 10 microns in diameter (PM<sub>10</sub>), carbon monoxide (CO), nitrogen dioxide (NO<sub>2</sub>), or ozone precursors (volatile organic compounds (VOC) and oxides of nitrogen (NO<sub>x</sub>)), means that period of time after EPA approves control strategy implementation plan revisions containing strategies for controlling PM<sub>10</sub>, NO<sub>2</sub>, CO, or ozone, as appropriate. This period ends when the state submits and EPA approves a request under § 107(d) of the CAA for redesignation to an attainment area.
9. “Design concept” means the type of facility identified by the project, e.g., freeway, expressway, arterial highway, grade-separated highway, reserved right-of-way rail transit, mixed traffic rail transit, exclusive busway, etc.
10. “Design scope” means the design aspects of a facility which will affect the proposed facility’s impact on regional emissions, usually as they relate to vehicle or person carrying capacity and control, e.g., number of lanes or tracks to be constructed or added, length of project, signalization, access control including approximate number and location of interchanges, preferential treatment for high-occupancy vehicles, etc.
11. “EPA” means the United States Environmental Protection Agency.
12. “FHWA” means the Federal Highway Administration of USDOT.
13. “FHWA or FTA project” means any highway or transit project which is proposed to receive funding assistance and approval through the Federal-Aid Highway program or the federal mass transit program, or requires Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) approval for some aspect of the project, such as connection to an interstate highway or deviation from applicable design standards on the interstate system.
14. “FTA” means the Federal Transit Administration of USDOT.
15. “Forecast period” with respect to a transportation plan means the period covered by the transportation plan pursuant to 23 CFR 450.
16. “Highway project” means an undertaking to implement or modify a highway facility or highway-related program. Such an undertaking consists of all required phases necessary for implementation. For analytical purposes, it shall be defined sufficiently to:
  - a. Connect logical termini and be of sufficient length to address environmental matters on a broad scope.
  - b. Have independent utility or significance, i.e., be usable and be a reasonable expenditure even if no additional transportation improvements in the area are made.
  - c. Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.
17. “Horizon year” means a year for which the transportation plan describes the envisioned transportation system in accordance with R18-2-1406.
18. “Hot-spot analysis” means an estimation of likely future localized CO and PM<sub>10</sub> pollutant concentrations and a comparison of those concentrations to the national ambient air quality standards. Pollutant concentrations to be estimated should be based on the total emissions burden which may result from the implementation of a single, specific project, summed together with future background concentrations (which can be estimated using the ratio of future to current traffic multiplied by the ratio of future to current emission factors) expected in the area. The total concentration shall be estimated and analyzed at appropriate receptor locations in the area substantially

- affected by the project. Hot-spot analysis assesses impacts on a scale smaller than the entire nonattainment or maintenance area, including, for example, congested roadway intersections and highways or transit terminals, and uses an air quality dispersion model to determine the effects of emissions on air quality.
19. “Incomplete data area” means any ozone nonattainment area which EPA has classified, in 40 CFR 81, as an incomplete data area.
  20. “Increase the frequency or severity of a violation” means to cause a location or region to exceed a standard more often or to cause a violation at a greater concentration than previously existed or would otherwise exist during the future period in question, if the project were not implemented.
  21. “ISTEA” means the Intermodal Surface Transportation Efficiency Act of 1991.
  22. “Local transportation agency” means a city, town, or county.
  23. “Maintenance area” means any geographic region of the United States previously designated nonattainment pursuant to the CAA Amendments of 1990 and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under § 175A of the CAA.
  24. “Maintenance period” with respect to a pollutant or pollutant precursor means that period of time beginning when a state submits and EPA approves a request under § 107(d) of the CAA for redesignation to an attainment area, and lasting for 20 years, unless the applicable implementation plan specifies that the maintenance period shall last for more than 20 years.
  25. “Metropolitan planning organization (MPO)” means the organization designated as being responsible, together with the state, for conducting the continuing, cooperative, and comprehensive planning process under 23 U.S.C. 134 and 49 U.S.C. 1607.
  26. “Milestone” means an emissions level and the date on which it is required to be achieved as described in § 182(g)(1) and § 189(c) of the CAA.
  27. “Motor vehicle emissions budget” means that portion of the total allowable emissions defined in a revision to the applicable implementation plan (or in an implementation plan revision which was endorsed by the Governor or Director of ADEQ, subject to a public hearing, and submitted to EPA, but not yet approved by EPA) for a certain date for the purpose of meeting reasonable further progress milestones or attainment or maintenance demonstrations, for any criteria pollutant or its precursors, allocated by the applicable implementation plan to highway and transit vehicles. The applicable implementation plan for an ozone nonattainment area may also designate a motor vehicle emissions budget for oxides of nitrogen ( $\text{NO}_x$ ) for a reasonable further progress milestone year if the applicable implementation plan demonstrates that this  $\text{NO}_x$  budget will be achieved with measures in the implementation plan (as an implementation plan must do for VOC milestone requirements). The applicable implementation plan for an ozone nonattainment area includes a  $\text{NO}_x$  budget if  $\text{NO}_x$  reductions are being substituted for reductions in volatile organic compounds in milestone years required for reasonable further progress.
  28. “National ambient air quality standards (NAAQS)” means those standards established pursuant to § 109 of the CAA.
  29. “NEPA” means the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.).
  30. “NEPA process completion” with respect to FHWA or FTA, means the point at which there is a specific action to do any of the following:
    - a. Make a formal final determination that a project is categorically excluded.
    - b. Make a Finding of No Significant Impact.
    - c. Issue a record of decision on a Final Environmental Impact Statement under NEPA.
  31. “Nonattainment area” means any geographic region of the United States which has been designated as nonattainment under § 107 of the CAA for any pollutant for which a national ambient air quality standard exists.
  32. “Not classified area” means any carbon monoxide nonattainment area which EPA has not classified as either moderate or serious.
  33. “Phase II of the interim period” with respect to a pollutant or pollutant precursor means that period of time after December 27, 1993, lasting until the earlier of the following:
    1. Submission to EPA of the relevant control strategy implementation plan revisions which have been endorsed by the Governor or the Director of ADEQ and have been subject to a public hearing.
    2. The date that the CAA requires relevant control strategy implementation plans to be submitted to EPA, provided EPA has made a finding of the state’s failure to submit any such plans and the state, MPO, and USDOT have received notice of such finding of the state’s failure to submit any such plans.
  34. “Project” means a highway project or transit project.
  35. “Recipient of funds designated under 23 U.S.C. or the Federal Transit Act” means any agency at any level of state, county, or city government, including any political subdivision or MPO, that routinely receives 23 U.S.C. or Federal Transit Act funds to construct FHWA or FTA projects, operate FHWA or FTA projects or equipment, purchase equipment, or undertake other services or operations via contracts or agreements. This definition does not include private landowners or developers, or contractors or entities that are only paid for services or products created by their own employees.
  36. “Regional transportation agency” means a regional transit authority established pursuant to A.R.S. Title 28, Chapter 20 or Chapter 24, or a formal association of political subdivisions involved in regional transportation issues.
  37. “Regionally significant transportation project” means a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals, as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area’s transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternative to regional highway travel.
  38. “Rural transport ozone nonattainment area” means an ozone nonattainment area that does not include, and is not adjacent to, any part of a Metropolitan Statistical Area or, where one exists, a Consolidated Metropolitan Statistical Area (as defined by the United States Bureau of the Census) and is classified under CAA § 182(h) as a rural transport area.
  39. “Standard” means a national ambient air quality standard.

## Department of Environmental Quality – Air Pollution Control

40. “Statewide transportation improvement program (STIP)” means a staged, multi-year, intermodal program of transportation projects covering the state, which is consistent with the statewide transportation plan and metropolitan transportation plans, and developed pursuant to 23 CFR 450.
41. “Statewide transportation plan” means the official intermodal statewide transportation plan that is developed through the statewide planning process for the state, developed pursuant to 23 CFR 450.
42. “Submarginal area” means any ozone nonattainment area which EPA has classified as submarginal in 40 CFR 81.
43. “Transit” is mass transportation by bus, rail, or other conveyance which provides general or special service to the public on a regular and continuing basis. It does not include school buses or charter or sightseeing services.
44. “Transit project” means an undertaking to implement or modify a transit facility or transit-related program, purchase transit vehicles or equipment, or provide financial assistance for transit operations. It does not include actions that are solely within the jurisdiction of local transit agencies, such as changes in routes, schedules, or fares. It may consist of several phases. For analytical purposes, it shall be defined inclusively enough to:
  - a. Connect logical termini and be of sufficient length to address environmental matters on a broad scope.
  - b. Have independent utility or independent significance, i.e., be a reasonable expenditure even if no additional transportation improvements in the area are made.
  - c. Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.
45. “Transitional area” means any ozone nonattainment area which EPA has classified as transitional in 40 CFR 81.
46. “Transitional period” with respect to a pollutant or pollutant precursor means that period of time which begins after submission to EPA of the relevant control strategy implementation plan which has been endorsed by the Governor or Director of ADEQ and has been subject to a public hearing. The transitional period lasts until EPA takes final approval or disapproval action on the control strategy implementation plan submission or finds it to be incomplete. The precise beginning and end of the transitional period is defined in R18-2-1428.
47. “Transportation control measure (TCM)” means any measure that is specifically identified and committed to in the applicable implementation plan that is either one of the types listed in § 108 of the CAA, or any other measure for the purpose of reducing emissions or concentrations of air pollutants from transportation sources by reducing vehicle use or changing traffic flow or congestion conditions. Notwithstanding the above, vehicle technology-based, fuel-based, and maintenance-based measures which control the emissions from vehicles under fixed traffic conditions are not TCMs for the purposes of this rule.
48. “Transportation improvement program (TIP)” means a staged, multi-year, intermodal program of transportation projects covering a metropolitan planning area which is consistent with the metropolitan transportation plan and developed pursuant to 23 CFR 450.
49. “Transportation plan” means the official intermodal metropolitan transportation plan that is developed through the metropolitan planning process for the metropolitan planning area, developed pursuant to 23 CFR 450.
50. “Transportation project” means a highway project or a transit project.
51. “USDOT” means the United States Department of Transportation.
52. “VMT” means the number of vehicle miles traveled.

**Historical Note**

Adopted effective June 15, 1995 (Supp. 95-2).

**R18-2-1402. Applicability**

- A. Except as provided for in subsection (F) or R18-2-1434, conformity determinations are required for all of the following:
  1. The adoption, acceptance, approval, or support of transportation plans developed pursuant to 23 CFR 450 or 49 CFR 613 by an MPO or USDOT.
  2. The adoption, acceptance, approval, or support of TIPs developed pursuant to 23 CFR 450 or 49 CFR 613 by an MPO or USDOT.
  3. The approval, funding, or implementation of FHWA or FTA projects.
- B. Conformity determinations are not required under this Article for individual projects which are not FHWA or FTA projects. However, R18-2-1429 applies to such projects if they are regionally significant.
- C. The provisions of this Article shall apply in all nonattainment and maintenance areas for transportation-related criteria pollutants for which the area is designated nonattainment or has a maintenance plan.
- D. The provisions of this Article apply with respect to emissions of the following criteria pollutants: ozone, carbon monoxide, nitrogen dioxide, and particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM<sub>10</sub>).
- E. The provisions of this Article apply with respect to emissions of the following precursor pollutants:
  1. Volatile organic compounds and nitrogen oxides in ozone areas (unless the Administrator determines under § 182(f) of the CAA that additional reductions of NO<sub>x</sub> would not contribute to attainment).
  2. Nitrogen oxides in nitrogen dioxide areas.
  3. Volatile organic compounds, nitrogen oxides, and PM<sub>10</sub> in PM<sub>10</sub> areas if either of the following apply:
    - a. During the interim period, the EPA Regional Administrator or the Director of ADEQ has made a finding (including a finding in an applicable implementation plan or a submitted implementation plan revision) that transportation-related precursor emissions within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified ADOT or the MPO where one exists and USDOT.
    - b. During the transitional, control strategy, and maintenance periods, the applicable implementation plan or implementation plan submission establishes a budget for such emissions as part of the reasonable further progress, attainment, or maintenance strategy.
- F. Projects subject to this Article for which the NEPA process and a conformity determination have been completed by FHWA or FTA may proceed toward implementation without further conformity determinations if one of the following major steps has occurred within the most recent three-year period: NEPA process completion; formal start of final design; acquisition of a significant portion of the right-of-way; or approval of the plans, specifications, and estimates. All phases of such projects which were considered in the conformity determination are also included, if those phases were for the

purpose of funding, final design, right-of-way acquisition, construction, or any combination of these phases.

- G.** A new conformity determination for the project will be required if there is a significant change in project design concept and scope, if a supplemental environmental document for air quality purposes is initiated, or if no major steps to advance the project have occurred within the most recent three-year period.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1403. Priority

When assisting or approving any action with air quality-related consequences, FHWA and FTA shall give priority to the implementation of those transportation portions of an applicable implementation plan prepared to attain and maintain the NAAQS. This priority shall be consistent with statutory requirements for allocation of funds among states or other jurisdictions.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1404. Frequency of Conformity Determinations

- A.** Conformity determinations and conformity redeterminations for transportation plans, TIPs, and FHWA or FTA projects shall be made according to the requirements of this Section and the applicable implementation plan.
- B.** Each new transportation plan shall be found to conform before the transportation plan is approved by the MPO or accepted by USDOT.
- C.** All transportation plan revisions shall be found to conform before the transportation plan revisions are approved by the MPO or accepted by USDOT, unless the revision merely adds or deletes exempt projects listed in R18-2-1434 and has been made in accordance with the notification provisions contained in R18-2-1405. The conformity determination shall be based on the transportation plan and the revision taken as a whole.
- D.** An existing conformity determination shall lapse unless conformity of existing transportation plans is redetermined:
- By May 25, 1995, unless previously redetermined consistent with 40 CFR 51, subpart T.
  - Within 18 months after EPA approval of an implementation plan revision which either:
    - Establishes or revises a transportation-related emissions budget (as required by CAA §§ 175A(a), 182(b)(1), 182(c)(2)(A), 182(c)(2)(B), 187(a)(7), 189(a)(1)(B), and 189(b)(1)(A); and §§ 192(a) and 192(b), for nitrogen dioxide); or
    - Adds, deletes, or changes TCMs.
  - Within 18 months after EPA promulgation of an implementation plan which establishes or revises a transportation-related emissions budget or adds, deletes, or changes TCMs.
- E.** In any case, conformity determinations shall be made no less frequently than every three years, or the existing conformity determination will lapse.
- F.** A new TIP shall be found to conform before the TIP is approved by the MPO or accepted by USDOT.
- G.** A TIP amendment requires a new conformity determination for the entire TIP before the amendment is approved by the MPO or accepted by USDOT, unless the amendment merely adds or deletes exempt projects listed in R18-2-1434 and has been made in accordance with the notification procedures under R18-2-1405.
- H.** After an MPO adopts a new or revised transportation plan, TIP conformity shall be redetermined by the MPO and USDOT within six months from the date of adoption of the plan, unless

the new or revised plan merely adds or deletes exempt projects listed in R18-2-1434. Otherwise, the existing conformity determination for the TIP shall lapse.

- I.** In any case, TIP conformity determinations shall be made no less frequently than every three years or the existing TIP conformity determination shall lapse.
- J.** FHWA or FTA projects shall be found to conform before they are adopted, accepted, approved, or funded. Conformity shall be redetermined for any FHWA or FTA project if none of the following major steps has occurred within the most recent three-year period:
- NEPA process completion,
  - Start of final design,
  - Acquisition of a significant portion of the right-of-way,
  - Approval of the plans, specifications, and estimates.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1405. Consultation

- A.** Consultation procedures as described in this Section shall be undertaken by all of the following entities and shall include the public and affected local and regional transportation agencies in preparing for and making conformity determinations and in developing applicable implementation plans:
- An MPO where one exists.
  - The Arizona Department of Transportation (ADOT).
  - The United States Department of Transportation (USDOT).
  - The Arizona Department of Environmental Quality (ADEQ).
  - The county air pollution control agency established pursuant to A.R.S. Title 49 where one exists.
  - The United States Environmental Protection Agency (EPA).
- B.** The following elements shall be used to implement the consultation processes under subsection (M), with the exception of subsection (M)(8), and under subsection (N), with the exception of subsections (N)(2) and (N)(3), and shall include all affected agencies and interested members of the public, and may be conducted at separate times or in combination:
- Providing to the affected agencies and interested members of the public information describing the upcoming decision process,
  - Distributing or providing access to draft documents,
  - Providing an opportunity for informal question and answer on the draft document or proposed decision,
  - Providing an opportunity for formal written comment,
  - Writing and distributing both a response to comments and the final document or decision.
- C.** An MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, and any local transportation agency shall undertake a consultation process in accordance with this Section with each other, with the local or regional offices of EPA, FHWA and FTA, with affected regional transportation agencies, and with the public on the development of the following as described in subsections (D) through (G):
- The implementation plan, including the emission budget and list of TCMs in the applicable implementation plan;
  - The unified planning work program under 23 CFR § 450.314;
  - The transportation plan and TIP;
  - The statewide transportation plan and STIP;
  - Any revisions to the preceding documents;
  - All transportation conformity determinations.

- D.** ADEQ, or the MPO in a county having a population greater than 250,000 persons, shall be the lead agency responsible for preparing an implementation plan, the associated emission budgets, and the list of TCMs in the plan. The lead agency shall also be responsible for assuring the adequacy of the consultation process. The concurrence of ADEQ on each implementation plan is required before ADEQ adopts the plan and transmits it to EPA for inclusion in the state implementation plan pursuant to A.R.S. § 49-406.
- E.** ADOT, or the MPO where one exists, shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the transportation plan and the TIP. The MPO shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the unified planning work program under 23 CFR 450.314.
- F.** ADOT shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the statewide transportation plan and the STIP.
- G.** ADOT, or the MPO where one exists, shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to determinations of transportation conformity, except that the entity authorized to adopt or approve a project shall be the lead agency responsible for project-level conformity determinations for projects outside of the transportation plan or TIP and shall assure the adequacy of the consultation process.
- H.** Each lead agency described in subsections (D) through (G) shall:
1. Confer with all other agencies having an interest in the document or decision to be developed;
  2. Provide access to all information needed for meaningful input;
  3. Solicit early and continuing input from those agencies;
  4. Conduct the public consultation process described in subsection (P);
  5. Assure policy-level contact with agencies;
  6. With the exception of notifications pursuant to subsection (M)(8), prior to taking any action required pursuant to subsections (D) through (G), consider the views of each agency and the public and respond to significant comments in a timely, substantive written manner prior to taking any final action and assure that such views and written response are made part of the record of any action.
- I.** FHWA and FTA shall be responsible for assuring timely action on final findings of conformity for transportation plans, TIPs, and federally funded projects, including the basis for those findings, after consulting with other agencies as provided in this Section. FHWA and FTA shall also be responsible for providing guidance on conformity and the transportation planning process to agencies in consultation. FHWA and FTA may rely on the consultation process initiated by ADOT or the MPO where one exists and shall not be required to duplicate that process.
- J.** EPA shall be responsible for reviewing and approving updated motor vehicle emissions factors and providing guidance on conformity criteria and procedures to agencies in consultation.
- K.** Each lead agency subject to a consultation process under this Section, including any federal agency, shall provide or notice the availability of each final document that is the product of the consultation process, together with all supporting information, to each other agency and members of the public that have participated in the consultation process within 15 days of adopting or approving the document or making the determination. An agency may supply a checklist of available supporting information, which other participating agencies or the public may use to request all or part of the supporting information, in lieu of generally distributing all supporting information.
- L.** A meeting that is scheduled or required for another purpose may be used for the purposes of consultation if the conformity consultation purpose is identified in the public notice for the meeting.
- M.** A consultation process involving an MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, EPA, USDOT, and the public shall be undertaken for the following:
1. Evaluating and choosing each model and associated methods and assumptions to be used in hot-spot analyses and regional emissions analyses including vehicle miles traveled (VMT) forecasting. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
  2. Determining whether the responsible agency identified in R18-2-1433 has demonstrated that the requirements of R18-2-1416, R18-2-1418 and R18-2-1419 are satisfied without a particular mitigation or control measure. The consultation process pursuant to this subsection shall be initiated by the responsible agency.
  3. Making a determination, as required by R18-2-1429(C)(2), whether the project is included in the regional emissions analysis supporting the currently conforming TIP's conformity determination, even if the project is not included in the TIP for the purposes of MPO project selection or endorsement, and whether the project's design concept and scope have changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility. The consultation process pursuant to this subsection shall be initiated by the MPO. In nonattainment areas where no MPO exists, ADOT shall initiate the consultation process for making a determination, as required by R18-2-1429(C)(2), whether a project that is outside of a TIP is included in the regional emissions analysis, and whether the project's design concept and scope have changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility.
  4. Determining pursuant to subsection (R) which minor arterials and other transportation projects should be considered "regionally significant" for the purposes of regional emissions analysis and which projects should be considered to have a significant change in design concept and scope from the transportation plan or TIP. The consultation process pursuant to this subsection shall be initiated by the MPO. In nonattainment areas where no MPO exists, ADOT shall initiate the consultation process for determining pursuant to subsection (R) which minor arterials and other transportation projects should be considered "regionally significant" for the purposes of regional emissions analysis.
  5. Evaluating whether exempt projects as described in R18-2-1434 and R18-2-1435 should be treated as non-exempt in cases where potential adverse emissions impacts may exist for any reason. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.

6. Making a determination, as required by R18-2-1413, whether past obstacles to implementation of TCMs which are behind the schedule established in the applicable implementation plan have been identified and are being overcome, and whether state and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding for TCMs. This consultation process shall also consider whether delays in TCM implementation necessitate revisions to the applicable implementation plan to remove TCMs or to substitute TCMs or other emission reduction measures. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
  7. Identifying, as required by R18-2-1431, projects located at sites in PM<sub>10</sub> nonattainment areas which have vehicle and roadway emission and dispersion characteristics which are essentially identical to those at sites which have violations verified by monitoring, and therefore require quantitative PM<sub>10</sub> hot-spot analysis. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
  8. Notification of transportation plan or TIP revisions or amendments which merely add or delete exempt projects listed in R18-2-1434. Notice shall be provided by the MPO and need not be provided prior to final action. Notice shall be provided by ADOT for revisions and amendments affecting the state transportation plan and the state TIP. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
  9. Project-level conformity determinations pursuant to R18-2-1416. The consultation process pursuant to this subsection shall be initiated by the recipient of the funds designated under 23 U.S.C. or the Federal Transit Act.
- N.** A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, appropriate political subdivisions, regional transportation agencies, if any, and the public shall be undertaken for the following:
1. Evaluating events which will trigger new conformity determinations in addition to those triggering events established in R18-2-1404 and including any changes in planning assumptions that may trigger a new conformity determination. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
  2. Consulting on emissions analysis for transportation activities which cross the borders of MPOs or nonattainment areas or air basins. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
  3. Where the metropolitan planning area does not include the entire nonattainment or maintenance area, a consultation process involving the MPO and ADOT for cooperative planning and analysis for purposes of determining conformity of all projects outside the metropolitan area and within the nonattainment or maintenance area. The consultation process pursuant to this subsection shall be initiated by ADOT. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
  4. The design, schedule, and funding of research and data collection efforts and regional transportation model development. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
- O.** The following consultation processes involve recipients of funds designated under 23 U.S.C. or the Federal Transit Act:
1. A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, recipients of funds designated under 23 U.S.C. or the Federal Transit Act and any agency created under state law that sponsors or approves transportation projects shall be undertaken to assure that plans for construction of regionally significant projects which are not FHWA or FTA projects, including projects for which alternative locations, design concept or scope, or the no-build option are still being considered, are disclosed as soon as practicable to ADOT or the MPO where one exists, so as to assure that any significant changes to the design concept or scope of those plans are disclosed as soon as practicable. The political subdivision having authority to adopt or approve a regionally significant transportation project, and any agency that becomes aware of any such project through applications for approval, permitting, funding, or otherwise shall disclose such project to ADOT or the MPO if one exists as soon as practicable. To help assure timely disclosure, the political subdivision having authority to adopt or approve any potential regionally significant transportation project shall disclose to ADOT or the MPO on a schedule prescribed by ADOT or the MPO, whichever is appropriate, each project for which alternatives have been identified through the NEPA process and, in particular, any preferred alternative that may be a regionally significant project. The consultation process shall include assuming the location, design concept, and scope of the project, where the sponsor has not yet decided these features, in sufficient detail to allow ADOT or the MPO to perform a regional emissions analysis. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
  2. A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, recipients of funds designated under 23 U.S.C. or the Federal Transit Act, any agency created under state law that sponsors or approves transportation projects, and the public shall be undertaken for the development of procedures as described in R18-2-1429. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
- P.** Public involvement processes shall be conducted according to the requirements of this subsection.
1. ADOT or the MPO, where one exists, when making conformity determinations on transportation plans, programs, and projects shall establish and continuously implement a proactive public involvement process which provides opportunity for public review and comment prior to taking formal action on a conformity determination for all transportation plans and TIPs, that meets the following minimum requirements:
    - a. Includes a process that provides complete information, timely public notice, full public access to key decisions and supports early and continuing involvement of the public in developing plans and TIPs.

## Department of Environmental Quality – Air Pollution Control

- b. Requires a minimum public comment period of 45 days before the public involvement process is initially adopted or revised.
  - c. Provides timely information about transportation issues and processes to citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, other interested parties and segments of the community affected by transportation plans, programs, and projects, including but not limited to central city and other local jurisdiction concerns.
  - d. Provides reasonable public access to technical and policy information used in the development of plans and TIPs and open public meetings where matters related to the federal-aid highway and transit programs are being considered.
  - e. Requires adequate public notice of public involvement activities and time for public review and comment at key decision points, including, but not limited to, approval of plans and TIPs and approval of changes in plans and TIPs. In nonattainment areas classified as serious and above, the comment period shall be at least 30 days for the plan, TIP, and major amendments. Public notice shall include mailing of notice to a list of all persons who have requested notice of actions covered by this Article.
  - f. Demonstrates explicit consideration and response to public input received during the planning and program development processes.
  - g. Seeks out and considers the needs of those traditionally underserved by existing transportation systems, including but not limited to low-income and minority households.
  - h. When significant written and oral comments are received on a draft transportation plan or TIP, including the financial plan, as a result of the public involvement process or the consultation process required by this Section, a summary, analysis, and report on the disposition of comments shall be made part of the final plan and TIP.
  - i. If the final transportation plan or TIP differs significantly from the one which was made available for public comment by the MPO and it raises new material issues which interested parties could not reasonably have foreseen from the public involvement efforts, an additional opportunity for public comment on the revised plan or TIP shall be made available.
  - j. ADOT or the MPO where one exists shall specifically address in writing all public comments that known plans for a regionally significant transportation project which is not receiving FHWA or FTA funding or approval have not been properly reflected in the emissions analysis supporting a proposed conformity finding for a transportation plan or TIP.
  - k. Public involvement processes shall be periodically reviewed by ADOT or the MPO in terms of their effectiveness in assuring that the process provides full and open access to all.
  - l. These procedures will be reviewed by the FHWA and the FTA during certification reviews for TMAs, and as otherwise necessary for all MPOs, to assure that full and open access is provided to MPO decisionmaking processes.
  - m. Metropolitan public involvement processes shall be coordinated with statewide public involvement processes wherever possible to enhance public consideration of the issues, plans, and programs and to reduce redundancies and costs.
2. Local and regional transportation agencies when making conformity determinations on regionally significant transportation projects shall establish and implement a public involvement process which meets, at a minimum, the following requirements:
    - a. Provides to the affected agencies and interested members of the public information describing the upcoming decision process.
    - b. Distributes or provides access to draft documents and all information needed for meaningful input.
    - c. Solicits early and continuing input from interested agencies and the public.
    - d. Provides an opportunity for informal question and answer on the draft document or proposed decision.
    - e. Provides an opportunity for formal written comment.
    - f. Provides for writing and distributing both a response to comments and the final document or decision. The response to comments shall consider the views of each agency and the public. The response to comments shall be made in a timely, substantive written manner prior to taking any final action and shall be made part of the record of any action.
- Q.** Any conflict among state agencies or between state agencies and an MPO shall be escalated to the Governor if the conflict cannot be resolved by the directors of the involved agencies. In the first instance, such entities shall make every effort to resolve any differences, including personal meetings between the directors of such entities or their policy-level representatives, to the extent possible. Within 14 calendar days after ADOT or the MPO has notified ADEQ of its decision, ADEQ may appeal a proposed determination of conformity, or other policy decision under this Article, to the Governor. ADEQ must provide notice of any appeal under this subsection to ADOT or the MPO. If ADEQ does not appeal to the Governor within 14 days, ADOT or the MPO may proceed with the final determination or decision. If ADEQ appeals to the Governor, the final conformity determination or policy decision shall have the concurrence of the Governor. The Governor may delegate to another official or agency within the state the role of hearing any appeal under this subsection and of deciding whether to concur in the determination or decision but may not delegate these functions to the director or staff of ADEQ, to any local air quality agency, to ADOT, to any state transportation commission or board, to an MPO, or to any agency that has responsibility for any of these functions.
- R.** The following procedures shall govern the consultation process regarding regionally significant transportation projects as defined in R18-2-1401(37):
1. By September 1, 1995, ADOT or the MPO where one exists shall develop and make available, for each nonattainment or maintenance area, consistent with A.R.S. § 49-408(A), the following:
    - a. A map of the highway or transit facilities in the nonattainment or maintenance area that serve regional transportation needs.
    - b. Guidance on which undertakings to implement or modify a highway facility are not transportation projects as defined in this Article, because they are not of sufficient length to address environmental matters on a broad scope.

- c. Guidance on which types of transportation projects are normally included in the regional transportation model.
- 2. The map and guidance described in subsection (R)(1) shall be produced only after consultation with ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, and the public. The map developed pursuant to subsection (R)(1) shall be updated prior to the commencement of the next TIP or STIP development cycle, unless no changes have occurred. The guidance developed pursuant to subsection (R)(3) shall be revised as necessary to reflect changes in the regional transportation model.
- 3. ADOT or the MPO where one exists shall develop and initiate the consultation process described in subsection (H) for a proposed list of transportation projects to be considered regionally significant. The consultation process shall include the MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, EPA, USDOT, and the public. The list shall include information supporting the proposed classification.
- 4. In determining whether a facility serves regional transportation needs, ADOT or the MPO where one exists shall consider at a minimum whether the facility:
  - a. Would be classified as a principal arterial based on average daily traffic or other factors, if not for limitations that the USDOT places on the percentage of streets that can be so classified.
  - b. For all other roadways, whether the facility:
    - i. Serves regional mobility needs, as opposed to local access.
    - ii. Carries regional traffic from one principal arterial to another.
    - iii. Is a modification that expands a facility such that it would serve regional transportation needs.
- 5. For the purposes of this Article, a street with a lower classification than a collector street, as specified in the most recent federal classification map for the region, does not serve regional transportation needs.
- 6. None of the following attributes, by itself, shall require a transportation project to be included in the modeling of a metropolitan area's transportation network:
  - a. The connection of a facility that does not serve regional transportation needs to a facility that does serve regional transportation needs.
  - b. The addition or modification of a lane other than a through lane.
- S. An agency having a role or responsibility under this Section may delegate that role or responsibility to another entity pursuant to the applicable state law but shall notify all other parties to the consultation process of this fact when the delegation occurs and shall also provide to the other parties the name, address, and telephone number of one or more contact persons representing the entity that is accepting the delegated role or responsibility.
- T. The provisions of this Section apply only to TIP and STIP planning cycles beginning with the cycles next following the effective date of this Section. The provisions of 40 CFR 51, Subpart T, continue to apply to all TIP and STIP planning cycles in progress at the time of the effective date of this Section. The provisions of this Section apply to consultation on

projects and TIP amendments as of the effective date of this Section.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1406. Content of Transportation Plans

- A. For transportation plans adopted after January 1, 1995, in serious, severe, or extreme ozone nonattainment areas and in serious carbon monoxide nonattainment areas, the following shall apply:
  - 1. The transportation plan shall specifically describe the transportation system envisioned for certain future years which shall be called horizon years.
  - 2. The agency or organization developing the transportation plan, after consultation pursuant to R18-2-1405, may choose any years to be horizon years, subject to the following restrictions:
    - a. Horizon years may be no more than 10 years apart.
    - b. The first horizon year may be no more than 10 years from the base year used to validate the transportation demand planning model.
    - c. If the attainment year is in the time span of the transportation plan, the attainment year shall be a horizon year.
    - d. The last horizon year shall be the last year of the transportation plan's forecast period.
  - 3. For these horizon years all of the following apply:
    - a. The transportation plan shall quantify and document the demographic and employment factors influencing expected transportation demand, including land-use forecasts, in accordance with implementation plan provisions and R18-2-1405.
    - b. The highway and transit system shall be described in terms of the regionally significant additions or modifications to the existing transportation network which the transportation plan envisions to be operational in the horizon years. Additions and modifications to the highway network shall be sufficiently identified to indicate intersections with existing regionally significant facilities and to determine their effect on route options between transportation analysis zones. Each added or modified highway segment shall also be sufficiently identified in terms of its design concept and design scope to allow modeling of travel times under various traffic volumes, consistent with the modeling methods for area-wide transportation analysis in use by the MPO. Transit facilities, equipment, and services envisioned for the future shall be identified in terms of design concept, design scope, and operating policies sufficiently to allow modeling of their transit ridership. The description of additions and modifications to the transportation network shall also be sufficiently specific to show that there is a reasonable relationship between expected land use and the envisioned transportation system.
    - c. Other future transportation policies, requirements, services, and activities, including intermodal activities, shall be described.
- B. Ozone or CO nonattainment areas which are reclassified from moderate to serious shall meet the requirements of subsection (A) within two years from the date of reclassification.
- C. Transportation plans for other areas shall meet the requirements of subsection (A) at least to the extent it has been the previous practice of the MPO to prepare plans which meet those requirements. Otherwise, transportation plans shall

describe the transportation system envisioned for the future specifically enough to allow determination of conformity according to the criteria and procedures of R18-2-1409 through R18-2-1427.

- D. The requirements of this Section supplement other requirements of applicable law or regulation governing the format or content of transportation plans.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1407. Relationship of Transportation Plan and TIP Conformity with the NEPA Process

The degree of specificity required in the transportation plan and the specific travel network assumed for air quality modeling do not preclude the consideration of alternatives in the NEPA process or other project development studies. Should the NEPA process result in a project with design concept and scope significantly different from that in the transportation plan or TIP, the project shall meet the criteria in R18-2-1409 through R18-2-1427 for projects not from a TIP before NEPA process completion.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1408. Fiscal Constraints for Transportation Plans and TIPs

Transportation plans and TIPs shall demonstrate that they are fiscally constrained consistent with USDOT's metropolitan planning regulations at 23 CFR 450 in order to be found in conformity.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1409. Criteria and Procedures for Determining Conformity of Transportation Plans, Programs, and Projects: General

- A. In order to be found to conform, each transportation plan, program, and FHWA or FTA project shall satisfy the applicable criteria and procedures in R18-2-1410 through R18-2-1427 as listed in Table 1 of this Section and shall comply with all applicable conformity requirements of implementation plans and of court orders for the area which pertain specifically to conformity determination requirements. The criteria for making conformity determinations differ based on the action under review (transportation plans, TIPs, and FHWA or FTA projects), the time period in which the conformity determination is made, and the relevant pollutant.
- B. The following table indicates the criteria and procedures in R18-2-1410 through R18-2-1427 which apply for each action in each time period:

**Table 1. Conformity Criteria**

DURING ALL PERIODS	
Action	Criteria
Transportation Plan	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(B)
TIP	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(C)
Project (from a conforming plan and TIP)	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1414, R18-2-1415, R18-2-1416, R18-2-1417
Project (not from a conforming plan and TIP)	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(D), R18-2-1414, R18-2-1416, R18-2-1417

#### PHASE II OF THE INTERIM PERIOD

Action	Criteria
Transportation Plan	R18-2-1422, R18-2-1425
TIP	R18-2-1423, R18-2-1426
Project (from a conforming plan and TIP)	R18-2-1421
Project (not from a conforming plan and TIP)	R18-2-1421, R18-2-1424, R18-2-1427

#### TRANSITIONAL PERIOD

Action	Criteria
Transportation Plan	R18-2-1418, R18-2-1422, R18-2-1425
TIP	R18-2-1419, R18-2-1423, R18-2-1426
Project (from a conforming plan and TIP)	R18-2-1421
Project (not from a conforming plan and TIP)	R18-2-1420, R18-2-1421, R18-2-1424, R18-2-1427

#### CONTROL STRATEGY AND MAINTENANCE PERIODS

Action	Criteria
Transportation Plan	R18-2-1418
TIP	R18-2-1419
Project (from a conforming plan and TIP)	No additional criteria
Project (not from a conforming plan and TIP)	R18-2-1420

- R18-2-1410. The conformity determination must be based on the latest planning assumptions.
- R18-2-1411. The conformity determination must be based on the latest emission estimation model available.
- R18-2-1412. The MPO must make the conformity determination according to the consultation procedures of this rule and the implementation plan revision required by 40 CFR 51.396.
- R18-2-1413. The transportation plan, TIP, or FHWA or FTA project which is not from a conforming plan and TIP must provide for the timely implementation of TCMs from the applicable implementation plan.
- R18-2-1414. There must be a currently conforming transportation plan and currently conforming TIP at the time of project approval.
- R18-2-1415. The project must come from a conforming transportation plan and program.
- R18-2-1416. The FHWA or FTA project must not cause or contribute to any new localized CO or PM<sub>10</sub> violations or increase the frequency or severity of any existing CO or PM<sub>10</sub> violations in CO and PM<sub>10</sub> nonattainment and maintenance areas.
- R18-2-1417. The FHWA or FTA project must comply with PM<sub>10</sub> control measures in the applicable implementation plan.
- R18-2-1418. The transportation plan must be consistent with the motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.
- R18-2-1419. The TIP must be consistent with the motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.
- R18-2-1420. The project which is not from a conforming transportation plan and conforming TIP must be consistent with the

motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.

- R18-2-1421. The FHWA or FTA project must eliminate or reduce the severity and number of localized CO violations in the area substantially affected by the project (in CO nonattainment areas).
- R18-2-1422. The transportation plan must contribute to emissions reductions in ozone and CO nonattainment areas.
- R18-2-1423. The TIP must contribute to emissions reductions in ozone and CO nonattainment areas.
- R18-2-1424. The project which is not from a conforming transportation plan and TIP must contribute to emissions reductions in ozone and CO nonattainment areas.
- R18-2-1425. The transportation plan must contribute to emission reductions or must not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas.
- R18-2-1426. The TIP must contribute to emission reductions or must not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas.
- R18-2-1427. The project which is not from a conforming transportation plan and TIP must contribute to emission reductions or must not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1410. Criteria and Procedures: Latest Planning Assumptions

- A. During all periods the conformity determination, with respect to all other applicable criteria in R18-2-1411 through R18-2-1427, shall be based upon the most recent complete planning assumptions in force at the time of the conformity determination. The conformity determination shall satisfy the requirements of subsections (B) through (F).
- B. Assumptions, including vehicle miles traveled per capita or per household, trip generation per household, vehicle occupancy, household size, vehicle fleet mix, vehicle ownership, and the geographic distribution of population growth shall be derived from the estimates of current and future population, employment, travel, and congestion most recently used by ADOT or the MPO where one exists. Population estimates shall be consistent with the estimates developed by the Arizona Department of Economic Security pursuant to A.R.S. § 41-1954(A). The conformity determination shall also be based on the latest assumptions about current and future background concentrations.
- C. The conformity determination for each transportation plan and TIP shall discuss how transit operating policies (including fares and service levels) and assumed transit ridership have changed since the previous conformity determination.
- D. The conformity determination shall include reasonable assumptions about transit service and increases in transit fares and road and bridge tolls over time.
- E. The conformity determination shall use the latest existing information regarding the effectiveness of the TCMs which have already been implemented.
- F. Key assumptions shall be specified and included in the draft documents and supporting materials used for the interagency and public consultation required by R18-2-1405.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1411. Criteria and Procedures: Latest Emissions Model

- A. During all periods the conformity determination shall be based on the latest emission estimation model available. This criterion is satisfied if the most current version of the motor vehicle

emissions model specified by EPA for use in the preparation or revision of implementation plans in that state or area is used for the conformity analysis. Where EMFAC is the motor vehicle emissions model used in preparing or revising the applicable implementation plan, new versions shall be approved by EPA before they are used in the conformity analysis.

- B. Conformity analyses for which the emissions analysis was begun during the grace period or before the Federal Register notice of availability of the latest emission model, or during any grace period announced in such notice, may continue to use the previous version of the model for transportation plans and TIPs. The previous model may also be used for projects if the analysis was begun during the grace period or before the Federal Register notice of availability, provided no more than three years have passed since the draft environmental document was issued.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1412. Criteria and Procedures: Consultation

All conformity determinations shall be made according to the consultation procedures in R18-2-1405. This criterion applies during all periods. Until the implementation plan revision required by 40 CFR 51.396 is approved by EPA, the conformity determination shall be made according to the procedures in R18-2-1405. Once the implementation plan revision has been approved by EPA, this criterion is satisfied if the conformity determination is made consistent with the implementation plan's consultation requirements.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1413. Criteria and Procedures: Timely Implementation of TCMs

- A. During all periods the transportation plan, TIP, or FHWA, or FTA project which is not from a conforming plan and TIP shall provide for the timely implementation of TCMs from the applicable implementation plan.
- B. For transportation plans, this criterion is satisfied if the following two conditions are met:
  1. The transportation plan, in describing the envisioned future transportation system, provides for the timely completion or implementation of all TCMs in the applicable implementation plan which are eligible for funding under 23 U.S.C. or the Federal Transit Act, consistent with schedules included in the applicable implementation plan.
  2. Nothing in the transportation plan interferes with the implementation of any TCM in the applicable implementation plan.
- C. For TIPs, this criterion is satisfied if all of the following conditions are met:
  1. An examination of the specific steps and funding source needed to fully implement each TCM indicates that TCMs which are eligible for funding under 23 U.S.C. or the Federal Transit Act are on or ahead of the schedule established in the applicable implementation plan, or, if such TCMs are behind the schedule established in the applicable implementation plan, the MPO and USDOT have determined that past obstacles to implementation of the TCMs have been identified and have been or are being overcome, and that all state and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding of TCMs over other projects within their control, including projects in locations outside the nonattainment or maintenance area. Maximum priority to approval or funding of TCMs

includes demonstrations with respect to funding acceleration, commitment of staff or other agency resources, diligent efforts to seek approvals, and similar actions.

2. If federal funding intended for TCMs in the applicable implementation plan has previously been programmed but is reallocated to projects in the TIP other than TCMs, (or if there are no other TCMs in the TIP, to projects in the TIP other than projects which are eligible for federal funding under ISTEAs Congestion Mitigation and Air Quality Improvement Program), and the TCMs are behind the schedule in the implementation plan, the TIP cannot be found to conform.
  3. Nothing in the TIP may interfere with the implementation of any TCM in the applicable implementation plan.
- D. For FHWA or FTA projects which are not from a conforming transportation plan and TIP, this criterion is satisfied if the project does not interfere with the implementation of any TCM in the applicable implementation plan.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1414. Criteria and Procedures: Currently Conforming Transportation Plan and TIP

During all periods there shall be a currently conforming transportation plan and currently conforming TIP at the time of project approval. This criterion is satisfied if the current transportation plan and TIP have been found to conform to the applicable implementation plan by the MPO and USDOT according to the procedures of this subpart. Only one conforming transportation plan or TIP may exist in an area at any time; conformity determinations of a previous transportation plan or TIP expire once the current plan or TIP is found to conform by USDOT. The conformity determination on a transportation plan or TIP will also lapse if conformity is not determined according to the frequency requirements of R18-2-1404.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1415. Criteria and Procedures: Projects from a Plan and TIP

- A. During all periods the project shall come from a conforming transportation plan and program. Otherwise, the project shall satisfy all criteria in Table 1 of R18-2-1409 for a project not from a conforming transportation plan and TIP. A project is considered to be from a conforming transportation plan if it meets the requirements of subsection (B) and from a conforming program if it meets the requirements of subsection (C).
- B. A project is considered to be from a conforming transportation plan if one of the following conditions applies:
  1. For projects which are required to be identified in the transportation plan in order to satisfy R18-2-1406, the project is specifically included in the conforming transportation plan and the project's design concept and scope have not changed significantly from those which were described in the transportation plan, or in a manner which would significantly impact use of the facility.
  2. For projects which are not required to be specifically identified in the transportation plan, the project is identified in the conforming transportation plan, or is consistent with the policies and purpose of the transportation plan and will not interfere with other projects specifically included in the transportation plan.
- C. A project is considered to be from a conforming program if all of the following conditions are met:
  1. The project is included in the conforming TIP and the design concept and scope of the project were adequate at the time of the TIP conformity determination to deter-

mine its contribution to the TIP's regional emissions and have not changed significantly from those which were described in the TIP, or in a manner which would significantly impact use of the facility.

2. If the TIP describes a project design concept and scope which includes project-level emissions mitigation or control measures, enforceable written commitments to implement such measures shall be obtained from the project sponsor or operator as required by R18-2-1433 in order for the project to be considered from a conforming program. Any change in these mitigation or control measures that would significantly reduce their effectiveness constitutes a change in the design concept and scope of the project.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1416. Criteria and Procedures: Localized CO and PM<sub>10</sub> Violations (Hot Spots)

- A. During all periods any FHWA or FTA project shall not cause or contribute to any new localized CO or PM<sub>10</sub> violations or increase the frequency or severity of any existing CO or PM<sub>10</sub> violations in CO and PM<sub>10</sub> nonattainment and maintenance areas. This criterion is satisfied if it is demonstrated that no new local violations will be created and the severity or number of existing violations will not be increased as a result of the project.
- B. The demonstration shall be performed according to the requirements of R18-2-1405 and R18-2-1431.
- C. For projects which are not of the type identified by R18-2-1431(A) or R18-2-1431(D), this criterion may be satisfied if consideration of local factors clearly demonstrates that no local violations presently exist and no new local violations will be created as a result of the project. Otherwise, in CO nonattainment and maintenance areas, a quantitative demonstration shall be performed according to the requirements of R18-2-1431(B).

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1417. Criteria and Procedures: Compliance with PM<sub>10</sub> Control Measures

During all periods any FHWA or FTA project shall comply with PM<sub>10</sub> control measures in the applicable implementation plan. This condition is satisfied if control measures (for the purpose of limiting PM<sub>10</sub> emissions from the construction activities or normal use and operation associated with the project) contained in the applicable implementation plan are included in the final plans, specifications, and estimates for the project.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1418. Criteria and Procedures: Motor Vehicle Emissions Budget (Transportation Plan)

- A. The transportation plan shall be consistent with the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. This criterion may be satisfied if the requirements in subsections (B) and (C) are met:
- B. A regional emissions analysis shall be performed as follows:
  1. The regional analysis shall estimate emissions of any of the following pollutants and pollutant precursors for which the area is in nonattainment or maintenance and for

which the applicable implementation plan or implementation plan submission establishes an emissions budget:

- a. VOC as an ozone precursor.
  - b. NO<sub>x</sub> as an ozone precursor, unless the Administrator determines that additional reductions of NO<sub>x</sub> would not contribute to attainment.
  - c. CO.
  - d. PM<sub>10</sub> (and its precursors VOC or NO<sub>x</sub> if the applicable implementation plan or implementation plan submission identifies transportation-related precursor emissions within the nonattainment area as a significant contributor to the PM<sub>10</sub> nonattainment problem or establishes a budget for such emissions).
  - e. NO<sub>x</sub> (in NO<sub>2</sub> nonattainment or maintenance areas).
2. The regional emissions analysis shall estimate emissions from the entire transportation system, including all regionally significant transportation projects contained in the transportation plan and all other regionally significant highway and transit projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.
  3. The emissions analysis methodology shall meet the requirements of R18-2-1430.
  4. For areas with a transportation plan that meets the content requirements of R18-2-1406(A), the emissions analysis shall be performed for each horizon year. Emissions in milestone years which are between the horizon years may be determined by interpolation.
  5. For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), the emissions analysis shall be performed for all of the following:
    - a. The last year of the plan's forecast period.
    - b. The attainment year, if the attainment year is in the time span of the transportation plan.
    - c. Any other years in the time span of the transportation plan such that there is not a gap of more than 10 years between analysis years. Emissions in milestone years which are between these analysis years may be determined by interpolation.
- C. The regional emissions analysis shall demonstrate that for each of the applicable pollutants or pollutant precursors in subsection (B)(1) the emissions are less than or equal to the motor vehicle emissions budget as established in the applicable implementation plan or implementation plan submission as follows:
1. If the applicable implementation plan or implementation plan submission establishes emissions budgets for milestone years, emissions in each milestone year are less than or equal to the motor vehicle emissions budget established for that year.
  2. For nonattainment areas, emissions in the attainment year are less than or equal to the motor vehicle emissions budget established in the applicable implementation plan or implementation plan submission for that year.
  3. For nonattainment areas, emissions in each analysis or horizon year after the attainment year are less than or equal to the motor vehicle emissions budget established by the applicable implementation plan or implementation plan submission for the attainment year. If emissions budgets are established for years after the attainment year, emissions in each analysis year or horizon year shall be less than or equal to the motor vehicle emissions budget for that year, if any, or the motor vehicle emissions budget for the most recent budget year prior to the analysis year or horizon year.

4. For maintenance areas, emissions in each analysis or horizon year are less than or equal to the motor vehicle emissions budget established by the maintenance plan for that year, if any, or the emissions budget for the most recent budget year prior to the analysis or horizon year.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1419. Criteria and Procedures: Motor Vehicle Emissions Budget (TIP)

- A. The TIP shall be consistent with the motor vehicle emissions budgets in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. This criterion may be satisfied if the requirements in subsections (B) and (C) are met.
- B. For areas with a conforming transportation plan that fully meets the content requirements of R18-2-1406(A), this criterion may be satisfied without additional regional emissions analysis if:
1. Each program year of the TIP is consistent with the federal funding which may be reasonably expected for that year, and required state or local matching funds and funds for state or local funding-only projects are consistent with the revenue sources expected over the same period; and
  2. The TIP is consistent with the conforming transportation plan such that the regional emissions analysis already performed for the plan applies to the TIP also. This requires a demonstration that:
    - a. The TIP contains all projects which shall be started in the TIP's time-frame in order to achieve the highway and transit system envisioned by the transportation plan in each of its horizon years;
    - b. All TIP projects which are regionally significant are part of the specific highway or transit system envisioned in the transportation plan's horizon years; and
    - c. The design concept and scope of each regionally significant transportation project in the TIP is not significantly different from that described in the transportation plan.
  3. If the requirements in subsections (B)(1) and (B)(2) are not met, then either:
    - a. The TIP may be modified to meet those requirements; or
    - b. The transportation plan shall be revised so that the requirements in subsections (B)(1) and (B)(2) are met. Once the revised plan has been found to conform, this criterion is met for the TIP with no additional analysis except a demonstration that the TIP meets the requirements of subsections (B)(1) and (B)(2).
- C. For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), a regional emissions analysis shall meet all of the following requirements:
1. The regional emissions analysis shall estimate emissions from the entire transportation system, including all projects contained in the proposed TIP, the transportation plan, and all other regionally significant highway and transit projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.
  2. The analysis methodology shall meet the requirements of R18-2-1430(C).
  3. The regional emissions analysis shall satisfy the requirements of R18-2-1418(B)(1), R18-2-1418(B)(5), and R18-2-1418(C).

**Historical Note**

Adopted effective June 15, 1995 (Supp. 95-2).

**R18-2-1420. Criteria and Procedures: Motor Vehicle Emissions Budget (Project Not from a Plan and TIP)**

- A. The project which is not from a conforming transportation plan and a conforming TIP shall be consistent with the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. It is satisfied if emissions from the implementation of the project, when considered with the emissions from the projects in the conforming transportation plan and TIP and all other regionally significant transportation projects expected in the area, do not exceed the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission.
- B. For areas with a conforming transportation plan that meets the content requirements of R18-2-1406(A):
  1. This criterion may be satisfied without additional regional analysis if the project is included in the conforming transportation plan, even if it is not specifically included in the latest conforming TIP. This requires a demonstration that all of the following apply:
    - a. Allocating funds to the project will not delay the implementation of projects in the transportation plan or TIP which are necessary to achieve the highway and transit system envisioned by the transportation plan in each of its horizon years.
    - b. The project is not regionally significant or is part of the specific highway or transit system envisioned in the transportation plan's horizon years.
    - c. The design concept and scope of the project is not significantly different from that described in the transportation plan.
  2. If the requirements in subsection (B)(1) are not met, a regional emissions analysis shall be performed as follows:
    - a. The analysis methodology shall meet the requirements of R18-2-1430.
    - b. The analysis shall estimate emissions from the transportation system, including the proposed project and all other regionally significant transportation projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan. The analysis shall include emissions from all previously approved projects which were not from a transportation plan and TIP.
    - c. The regional emissions analysis shall meet the requirements of R18-2-1418(B)(1), R18-2-1418(B)(4) and R18-2-1418(C).
- C. For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), a regional emissions analysis shall be performed for the project together with the conforming TIP and all other regionally significant transportation projects expected in the nonattainment or maintenance area. This criterion may be satisfied if all of the following apply:
  1. The analysis methodology meets the requirements of R18-2-1430(C).
  2. The analysis estimates emissions from the transportation system, including the proposed project, and all other regionally significant transportation projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.

3. The regional emissions analysis satisfies the requirements of R18-2-1418(B)(1), R18-2-1418(B)(5), and R18-2-1418(C).

**Historical Note**

Adopted effective June 15, 1995 (Supp. 95-2).

**R18-2-1421. Criteria and Procedures: Localized CO Violations (Hot Spots) in the Interim and Transitional Periods**

- A. Each FHWA or FTA project shall eliminate or reduce the severity and number of localized CO violations in the area substantially affected by the project (in CO nonattainment areas). This criterion applies during the interim and transitional periods only. This criterion is satisfied with respect to existing localized CO violations if it is demonstrated that existing localized CO violations will be eliminated or reduced in severity and number as a result of the project.
- B. The demonstration shall be performed according to the requirements of R18-2-1405 and R18-2-1431.
- C. For projects which are not of the type identified by R18-2-1431(A), this criterion may be satisfied if consideration of local factors clearly demonstrates that existing CO violations will be eliminated or reduced in severity and number. Otherwise, a quantitative demonstration shall be performed according to the requirements of R18-2-1431(B).

**Historical Note**

Adopted effective June 15, 1995 (Supp. 95-2).

**R18-2-1422. Criteria and Procedures: Interim and Transitional Period Reductions in Ozone and CO Areas (Transportation Plan)**

- A. A transportation plan shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise provided in R18-2-1436. It applies to the net effect on emissions of all projects contained in a new or revised transportation plan. This criterion may be satisfied if a regional emissions analysis is performed as described in subsections (B) through (F).
- B. Determine the analysis years for which emissions are to be estimated. Analysis years shall be no more than 10 years apart. The first analysis year shall be no later than the first milestone year (1995 in CO nonattainment areas and 1996 in ozone nonattainment areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
- C. Define the Baseline scenario for each of the analysis years to be the future transportation system that would result from current programs, composed of all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:
  1. All in-place regionally significant highway and transit facilities, services and activities.
  2. All ongoing travel demand management or transportation system management activities.
  3. Completion of all regionally significant transportation projects, regardless of funding source, which are currently under construction or are undergoing right-of-way acquisition (except for hardship acquisition and protective buying); come from the first three years of the previously conforming transportation plan or TIP; or have completed the NEPA process. For the first conformity determination on the transportation plan after November 24, 1993, a project may not be included in the Baseline

scenario and shall be included in the Action scenario as described in subsection (D), if one of the following major steps has not occurred within the most recent three-year period:

- a. NEPA process completion;
- b. Start of final design;
- c. Acquisition of a significant portion of the right-of-way;
- d. Approval of the plans, specifications and estimates.

**D.** Define the Action scenario for each of the analysis years as the transportation system that will result in that year from the implementation of the proposed transportation plan, TIPs adopted under it, and other expected regionally significant transportation projects in the nonattainment area. The Action scenario will include all of the following except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:

1. All facilities, services, and activities in the Baseline scenario;
2. Completion of all TCMs and regionally significant transportation projects, including facilities, services, and activities, specifically identified in the proposed transportation plan which will be operational or in effect in the analysis year, except that regulatory TCMs may not be assumed to begin at a future time unless the regulation is already adopted by the enforcing jurisdiction or the TCM is identified in the applicable implementation plan;
3. All travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which have been fully adopted or funded by the enforcing jurisdiction or sponsoring agency since the last conformity determination on the transportation plan;
4. The incremental effects of any travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which were adopted or funded prior to the date of the last conformity determination on the transportation plan, but which have been modified since then to be more stringent or effective;
5. Completion of all expected regionally significant highway and transit projects which are not from a conforming transportation plan and TIP;
6. Completion of all expected regionally significant non-FHWA/FTA highway and transit projects that have clear funding sources and commitments leading toward their implementation and completion by the analysis year.

**E.** Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios and determine the difference in regional VOC and NO<sub>x</sub> emissions (unless the Administrator determines that additional reductions of NO<sub>x</sub> would not contribute to attainment) between the two scenarios for ozone nonattainment areas and the difference in CO emissions between the two scenarios for CO nonattainment areas. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. Emissions in milestone years which are between the analysis years may be determined by interpolation.

**F.** This criterion is met if the regional VOC and NO<sub>x</sub> emissions (for ozone nonattainment areas) and CO emissions (for CO nonattainment areas) predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and if this can reasonably be expected to be

true in the periods between the first milestone year and the analysis years. The regional analysis shall show that the Action scenario contributes to a reduction in emissions from the 1990 emissions by any nonzero amount.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1423. Criteria and Procedures: Interim Period Reductions in Ozone and CO Areas (TIP)

**A.** A TIP shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise provided in R18-2-1436. It applies to the net effect on emissions of all projects contained in a new or revised TIP. This criterion may be satisfied if a regional emissions analysis is performed as described in subsections (B) through (F).

**B.** Determine the analysis years for which emissions are to be estimated. The first analysis year shall be no later than the first milestone year (1995 in CO nonattainment areas and 1996 in ozone nonattainment areas). The analysis years shall be no more than 10 years apart. The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.

**C.** Define the Baseline scenario as the future transportation system that would result from current programs, composed of all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:

1. All in-place regionally significant highway and transit facilities, services, and activities.
2. All ongoing travel demand management or transportation system management activities.
3. Completion of all regionally significant transportation projects, regardless of funding source, which are currently under construction or are undergoing right-of-way acquisition, except for hardship acquisition and protective buying; come from the first three years of the previously conforming TIP; or have completed the NEPA process. For the first conformity determination on the TIP after November 24, 1993, a project may not be included in the Baseline scenario if one of the following major steps has not occurred within the most recent three-year period:
  - a. NEPA process completion.
  - b. Start of final design.
  - c. Acquisition of a significant portion of the right-of-way.
  - d. Approval of the plans, specifications, and estimates. Such a project shall be included in the Action scenario, as described in subsection (D).

**D.** Define the Action scenario as the future transportation system that will result from the implementation of the proposed TIP and other expected regionally significant transportation projects in the nonattainment area in the time-frame of the transportation plan. It will include all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:

1. All facilities, services, and activities in the Baseline scenario;
2. Completion of all TCMs and regionally significant transportation projects, including facilities, services, and activities, included in the proposed TIP, except that regulatory TCMs may not be assumed to begin at a future time unless the regulation is already adopted by the

enforcing jurisdiction or the TCM is contained in the applicable implementation plan;

3. All travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which have been fully adopted or funded by the enforcing jurisdiction or sponsoring agency since the last conformity determination on the TIP;
  4. The incremental effects of any travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which were adopted or funded prior to the date of the last conformity determination on the TIP, but which have been modified since then to be more stringent or effective;
  5. Completion of all expected regionally significant highway and transit projects which are not from a conforming transportation plan and TIP;
  6. Completion of all expected regionally significant non-FHWA/FTA highway and transit projects that have clear funding sources and commitments leading toward their implementation and completion by the analysis year.
- E. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios, and determine the difference in regional VOC and NO<sub>x</sub> emissions (unless the Administrator determines that additional reductions of NO<sub>x</sub> would not contribute to attainment) between the two scenarios for ozone nonattainment areas and the difference in CO emissions between the two scenarios for CO nonattainment areas. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. Emissions in milestone years which are between analysis years may be determined by interpolation.
- F. This criterion is met if the regional VOC and NO<sub>x</sub> emissions in ozone nonattainment areas and CO emissions in CO nonattainment areas predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and if this can reasonably be expected to be true in the period between the analysis years. The regional analysis shall show that the Action scenario contributes to a reduction in emissions from the 1990 emissions by any nonzero amount.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1424. Criteria and Procedures: Interim Period Reductions for Ozone and CO Areas (Project Not from a Plan and TIP)

A transportation project shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise provided in R18-2-1436. This criterion is satisfied if a regional emissions analysis is performed which meets the requirements of R18-2-1422 and which includes the transportation plan and project in the Action scenario. If the project which is not from a conforming transportation plan and TIP is a modification of a project currently in the plan or TIP, the Baseline scenario shall include the project with its original design concept and scope, and the Action scenario shall include the project with its new design concept and scope.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1425. Criteria and Procedures: Interim Period Reductions for PM<sub>10</sub> and NO<sub>2</sub> Areas (Transportation Plan)

- A. A transportation plan shall contribute to emission reductions or shall not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas. This criterion applies only during the interim and transitional periods. It applies to the net effect on emissions of all projects contained in a new or revised transportation plan. This criterion may be satisfied if the requirements of either subsections (B) or (C) are met.
- B. Demonstrate that implementation of the plan and all other regionally significant transportation projects expected in the nonattainment area will contribute to reductions in emissions of PM<sub>10</sub> in a PM<sub>10</sub> nonattainment area, and of each transportation-related precursor of PM<sub>10</sub> in PM<sub>10</sub> nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified the MPO and USDOT, and of NO<sub>x</sub> in an NO<sub>2</sub> nonattainment area, by performing a regional emissions analysis as follows:
  1. Determine the analysis years for which emissions are to be estimated. Analysis years shall be no more than 10 years apart. The first analysis year shall be no later than 1996 (for NO<sub>2</sub> areas) or four years and six months following the date of designation (for PM<sub>10</sub> areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
  2. Define for each of the analysis years the Baseline scenario, as defined in R18-2-1422(C), and the Action scenario, as defined in R18-2-1422(D).
  3. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios and determine the difference between the two scenarios in regional PM<sub>10</sub> emissions in a PM<sub>10</sub> nonattainment area (and transportation-related precursors of PM<sub>10</sub> in PM<sub>10</sub> nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified ADOT, the MPO where one exists and USDOT) and in NO<sub>x</sub> emissions in an NO<sub>2</sub> nonattainment area. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. The analysis shall address the periods between the analysis years and the periods between 1990, the first milestone year if any, and the first of the analysis years. Emissions in milestone years which are between the analysis years may be determined by interpolation.
  4. Demonstrate that the regional PM<sub>10</sub> emissions and PM<sub>10</sub> precursor emissions, where applicable, (for PM<sub>10</sub> nonattainment areas) and NO<sub>x</sub> emissions (for NO<sub>2</sub> nonattainment areas) predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and that this can reasonably be expected to be true in the periods between the first milestone year (if any) and the analysis years.
- C. Demonstrate that when the projects in the transportation plan and all other regionally significant transportation projects expected in the nonattainment area are implemented, the transportation system's total highway and transit emissions of PM<sub>10</sub> in a PM<sub>10</sub> nonattainment area (and transportation-related precursors of PM<sub>10</sub> in PM<sub>10</sub> nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has

made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified the MPO and USDOT) and of NO<sub>x</sub> in an NO<sub>2</sub> nonattainment area will not be greater than baseline levels, by performing a regional emissions analysis as follows:

1. Determine the baseline regional emissions of PM<sub>10</sub> and PM<sub>10</sub> precursors, where applicable (for PM<sub>10</sub> nonattainment areas) and NO<sub>x</sub> (for NO<sub>2</sub> nonattainment areas) from highway and transit sources. Baseline emissions are those estimated to have occurred during calendar year 1990, unless the control strategy implementation plan for that area includes a baseline emissions inventory for a different year.
2. Estimate the emissions of the applicable pollutant or pollutants from the entire transportation system, including projects in the transportation plan and TIP and all other regionally significant transportation projects in the nonattainment area, according to the requirements of R18-2-1430. Emissions shall be estimated for analysis years which are no more than 10 years apart. The first analysis year shall be no later than 1996 (for NO<sub>2</sub> areas) or four years and six months following the date of designation (for PM<sub>10</sub> areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
3. Demonstrate that for each analysis year the emissions estimated in subsection (C)(2) are no greater than baseline emissions of PM<sub>10</sub> and PM<sub>10</sub> precursors, where applicable (for PM<sub>10</sub> nonattainment areas) or NO<sub>x</sub> (for NO<sub>2</sub> nonattainment areas) from highway and transit sources.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1426. Criteria and Procedures: Interim Period Reductions for PM<sub>10</sub> and NO<sub>2</sub> Areas (TIP)

- A. A TIP shall contribute to emission reductions or shall not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas. This criterion applies only during the interim and transitional periods. It applies to the net effect on emissions of all projects contained in a new or revised TIP. This criterion may be satisfied if the requirements of either subsection (B) or subsection (C) are met.
- B. Demonstrate that implementation of the plan and TIP and all other regionally significant transportation projects expected in the nonattainment area will contribute to reductions in emissions of PM<sub>10</sub> in a PM<sub>10</sub> nonattainment area (and transportation-related precursors of PM<sub>10</sub> in PM<sub>10</sub> nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified the MPO and USDOT) and of NO<sub>x</sub> in an NO<sub>2</sub> nonattainment area, by performing a regional emissions analysis as follows:
  1. Determine the analysis years for which emissions are to be estimated, according to the requirements of R18-2-1425(B)(1).
  2. Define for each of the analysis years the Baseline scenario, as defined in R18-2-1423(C), and the Action scenario, as defined in R18-2-1423(D).
  3. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by

the Baseline and Action scenarios as required by R18-2-1425(B)(3), and make the demonstration required by R18-2-1425(B)(4).

- C. Demonstrate that when the projects in the transportation plan and TIP and all other regionally significant transportation projects expected in the area are implemented, the transportation system's total highway and transit emissions of PM<sub>10</sub> in a PM<sub>10</sub> nonattainment area (and transportation-related precursors of PM<sub>10</sub> in PM<sub>10</sub> nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified the MPO and USDOT) and of NO<sub>x</sub> in an NO<sub>2</sub> nonattainment area will not be greater than baseline levels, by performing a regional emissions analysis as required by R18-2-1425(C).

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1427. Criteria and Procedures: Interim Period Reductions for PM<sub>10</sub> and NO<sub>2</sub> Areas (Project Not from a Plan and TIP)

A transportation project which is not from a conforming transportation plan and TIP shall contribute to emission reductions or shall not increase emissions in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas. This criterion applies during the interim and transitional periods only. This criterion is met if a regional emissions analysis is performed which meets the requirements of R18-2-1425 and which includes the transportation plan and project in the Action scenario. If the project which is not from a conforming transportation plan and TIP is a modification of a project currently in the transportation plan or TIP, and R18-2-1425(B) is used to demonstrate satisfaction of this criterion, the Baseline scenario shall include the project with its original design concept and scope, and the Action scenario shall include the project with its new design concept and scope.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1428. Transition from the Interim Period to the Control Strategy Period

- A. For areas which submit a control strategy implementation plan revision after November 24, 1993:
  1. The transportation plan and TIP shall be demonstrated to conform according to transitional period criteria and procedures by one year from the date the CAA requires submission of such control strategy implementation plan revision. Otherwise, the conformity status of the transportation plan and TIP will lapse, and no new project-level conformity determinations may be made.
    - a. The conformity of new transportation plans and TIPs may be demonstrated according to Phase II interim period criteria and procedures for 90 days following submission of the control strategy implementation plan revision, provided the conformity of such transportation plans and TIPs is redetermined according to transitional period criteria and procedures as required in subsection (A)(1) and such transportation plans and TIPs are consistent with the motor vehicle emissions budget in the applicable implementation plan or any previously submitted control strategy implementation plan revision.
    - b. Beginning 90 days after submission of the control strategy implementation plan revision, new transportation plans and TIPs shall demonstrate conformity according to transitional period criteria and procedures.

2. If EPA disapproves the submitted control strategy implementation plan revision and so notifies the state, the MPO where one exists, and USDOT, which initiates the sanction process under CAA §§ 179 or 110(m), the conformity status of the transportation plan and TIP shall lapse 120 days after EPA's disapproval, and no new project-level conformity determinations may be made. No new transportation plan, TIP, or project may be found to conform until another control strategy implementation plan revision is submitted and conformity is demonstrated according to transitional period criteria and procedures.
  3. Notwithstanding subsection (A)(2), if EPA disapproves the submitted control strategy implementation plan revision but determines that the control strategy contained in the revision would have been considered approvable with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (A)(1) shall apply for 12 months following the date of disapproval. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of disapproval unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
- B.** For areas which have not submitted a control strategy implementation plan revision:
1. For areas whose CAA deadline for submission of the control strategy implementation plan revision is after November 24, 1993, and EPA has notified the state, the MPO where one exists, and USDOT of the state's failure to submit a control strategy implementation plan revision, which initiates the sanction process under CAA §§ 179 or 110(m) all of the following shall apply:
    - a. No new transportation plans or TIPs may be found to conform beginning 120 days after the CAA deadline.
    - b. The conformity status of the transportation plan and TIP shall lapse one year after the CAA deadline, and no new project-level conformity determinations may be made.
  2. For areas whose CAA deadline for submission of the control strategy implementation plan was before November 24, 1993, and EPA has made a finding of failure to submit a control strategy implementation plan revision, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
    - a. No new transportation plans or TIPs may be found to conform beginning March 24, 1994.
    - b. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, and no new project-level conformity determinations may be made.
- C.** For areas which have not submitted a complete control strategy implementation plan revision:
1. For areas where EPA notifies the state, the MPO where one exists, and USDOT after November 24, 1993, that the control strategy implementation plan revision submitted by the state is incomplete, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
    - a. No new transportation plans or TIPs may be found to conform beginning 120 days after EPA's incompleteness finding.
    - b. The conformity status of the transportation plan and TIP shall lapse one year after the CAA deadline, and no new project-level conformity determinations may be made.
    - c. Notwithstanding subsections (C)(1)(a) and (b), if EPA notes in its incompleteness finding that the submittal would have been considered complete with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (A)(1) shall apply for a period of 12 months following the date of the incompleteness determination. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of the incompleteness determination unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
  2. For areas where EPA has determined before November 24, 1993, that the control strategy implementation plan revision is incomplete, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
    - a. No new transportation plans or TIPs may be found to conform beginning March 24, 1994.
    - b. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, and no new project-level conformity determinations may be made.
    - c. Notwithstanding subsections (C)(2)(a) and (b), if EPA notes in its incompleteness finding that the submittal would have been considered complete with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (D)(1) shall apply for a period of 12 months following the date of the incompleteness determination. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of the incompleteness determination unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
- D.** For areas which submitted a control strategy implementation plan before November 24, 1993:
1. The transportation plan and TIP shall have been demonstrated to conform according to transitional period criteria and procedures by November 25, 1994. Otherwise, their conformity status will lapse, and no new project-level conformity determinations may be made. From and after February 22, 1994, new transportation plans and TIPs shall demonstrate conformity according to transitional period criteria and procedures.
  2. If EPA has disapproved the most recent control strategy implementation plan submission, the conformity status of the transportation plan and TIP shall lapse March 24, 1994, and no new project-level conformity determinations may be made. No new transportation plans, TIPs, or projects may be found to conform until another control strategy implementation plan revision is submitted and conformity is demonstrated according to transitional period criteria and procedures.

3. Notwithstanding subsection (D)(2), if EPA has disapproved the submitted control strategy implementation plan revision but determines that the control strategy contained in the revision would have been considered approvable with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (D)(1) shall apply until November 25, 1994. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
- E. If the currently conforming transportation plan and TIP have not been demonstrated to conform according to transitional period criteria and procedures, the requirements of subsections (E)(1) and (2) shall be met.
  1. Before a FHWA or FTA project which is regionally significant and increases single-occupant vehicle capacity (a new general purpose highway on a new location or adding general purpose lanes) may be found to conform, ADEQ shall be consulted on how the emissions which the existing transportation plan and TIP's conformity determination estimates for the Action scenario, as required by R18-2-1422 through R18-2-1427, compare to the motor vehicle emissions budget in the implementation plan submission or the projected motor vehicle emissions budget in the implementation plan under development.
  2. In the event of unresolved disputes on such project-level conformity determinations, ADEQ may escalate the issue to the governor consistent with the procedure in R18-2-1405, which applies for ADEQ comments on a conformity determination.
- F. Redetermination of conformity of the existing transportation plan and TIP according to the transitional period criteria and procedures:
  1. The redetermination of the conformity of the existing transportation plan and TIP according to transitional period criteria and procedures (as required by subsections (A)(1) and (D)(1)) does not require new emissions analysis and does not have to satisfy the requirements of R18-2-1410 and R18-2-1411 if all of the following are met:
    - a. The control strategy implementation plan revision submitted to EPA uses the MPO's modeling of the existing transportation plan and TIP for its projections of motor vehicle emissions.
    - b. The control strategy implementation plan does not include any transportation projects which are not included in the transportation plan and TIP.
  2. A redetermination of conformity as described in subsection (F)(1) is not considered a conformity determination for the purposes of R18-2-1404(E) or R18-2-1404(I) regarding the maximum intervals between conformity determinations. Conformity shall be determined according to all the applicable criteria and procedures of R18-2-1409 within three years of the last determination which did not rely on subsection (F)(1).
- G. Ozone nonattainment areas:
  1. The requirements of subsection (B)(1) apply if a serious or above ozone nonattainment area has not submitted the implementation plan revisions which CAA §§ 182(c)(2)(A) and 182(c)(2)(B) require to be submitted to EPA November 15, 1994, even if the area has submitted the implementation plan revision which CAA § 182(b)(1) requires to be submitted to EPA November 15, 1993.
  2. The requirements of subsection (B)(1) apply if a moderate ozone nonattainment area which is using photochemical dispersion modeling to demonstrate the "specific annual reductions as necessary to attain" required by CAA § 182(b)(1), and which has permission from EPA to delay submission of such demonstration until November 15, 1994, does not submit such demonstration by that date. The requirements of subsection (B)(1) apply in this case even if the area has submitted the 15% emission reduction demonstration required by CAA § 182(b)(1).
  3. The requirements of subsection (A) apply when the implementation plan revisions required by CAA §§ 182(c)(2)(A) and 182(c)(2)(B) are submitted.
- H. Nonattainment areas which are not required to demonstrate reasonable further progress and attainment. If an area listed in R18-2-1436 submits a control strategy implementation plan revision, the requirements of subsections (A) and (E) apply. Because the areas listed in R18-2-1436 are not required to demonstrate reasonable further progress and attainment and therefore have no CAA deadline, the provisions of subsection (B) do not apply to these areas at any time.
- I. If a control strategy implementation plan revision is not submitted to EPA but a maintenance plan required by CAA § 175A is submitted to EPA, the requirements of subsection (A) or (D) apply, with the maintenance plan submission treated as a "control strategy implementation plan revision" for the purposes of those requirements.
- J. This Section does not become effective until June 1, 1996.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1429. Requirements for Adoption or Approval of Projects by Recipients of Funds Designated under 23 U.S.C. or the Federal Transit Act

- A. This Section shall not apply to any of the following:
  1. A transportation project that is a street with a lower classification than a collector street, as specified in the most recent federal classification map for the region.
  2. An exempt project listed in R18-2-1434.
- B. No recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act shall adopt or approve a transportation project, regardless of funding source, without first determining whether the transportation project is regionally significant. In making this determination, the recipient shall not take any action that is inconsistent with the procedures developed by ADOT or the MPO pursuant to R18-2-1405(R).
- C. No recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act shall adopt or approve a regionally significant highway or transit project, regardless of funding source, unless both of the following apply:
  1. There is a currently conforming transportation plan and TIP consistent with the requirements of R18-2-1414.
  2. The requirements of one of the following are met:
    - a. The project comes from a conforming plan and program consistent with the requirements of R18-2-1415.
    - b. The project is included in the regional emissions analysis supporting the currently conforming TIP's conformity determination, even if the project is not strictly "included" in the TIP for the purposes of MPO project selection or endorsement, and the project's design concept and scope have not changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility.
    - c. During the control strategy or maintenance period, the project is consistent with the motor vehicle emis-

sions budget in the applicable implementation plan consistent with the requirements of R18-2-1420.

- d. During Phase II of the interim period, the project contributes to emissions reductions or does not increase emissions consistent with the requirements of R18-2-1424 (in ozone and CO nonattainment areas) or R18-2-1427 (in PM<sub>10</sub> and NO<sub>2</sub> nonattainment areas).
  - e. During the transitional period, the project satisfies the requirements of both subsections (1)(2)(c) and (d).
- D. Pursuant to the consultation process established in R18-2-1405(O), ADOT or the MPO where one exists shall, not later than September 1, 1995, develop and make available the procedures to be used by any recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act to comply with subsections (B) and (C). These procedures may be revised periodically, as needed, using the same consultation process. At a minimum, such procedures shall provide for the following:
1. The minimum information required by the recipient to make determinations in compliance with subsections (B) and (C);
  2. The time-frames for action to be taken by the recipient;
  3. For transportation projects determined to be regionally significant, the documentation necessary to demonstrate that the requirements of 23 CFR 450.324(e), (g), and (h) have been met.
- E. After a transportation project is adopted or approved, no subsequent act defined as adoption or approval under this Section or under procedures developed to implement this Section shall be subject to subsection (B) or (C), unless project's design concept or scope have changed significantly since the project was first adopted or approved.
- F. A regionally significant transportation project found to be in conformity, either as a result of a TIP or a separate project analysis, shall retain such conformity finding, irrespective of subsequent analysis, unless the project fails to meet the conditions of its approval or undergoes a significant change in scope. In any event, a conformity determination shall lapse after three years in the absence of a redetermination; except that a project undergoing NEPA approval shall retain its conformity determination, unless none of the following major steps has occurred within the most recent three-year period:
1. NEPA process completion;
  2. Start of final design;
  3. Acquisition of a significant portion of the right-of-way;
  4. Approval of the plans, specifications, and estimates.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1430. Procedures for Determining Regional Transportation-related Emissions

- A. The following are general requirements for determining regional transportation-related emissions:
1. The regional emissions analysis for the transportation plan, TIP, or project not from a conforming plan and TIP shall include all regionally significant transportation projects expected in the nonattainment or maintenance area, including FHWA or FTA projects proposed in the transportation plan and TIP and all other regionally significant transportation projects which are disclosed to ADOT or the MPO as required by R18-2-1405. Projects which are not regionally significant are not required to be explicitly modeled, but VMT from such projects shall be estimated in accordance with reasonable professional practice. The effects of TCMs and similar projects that are not region-

ally significant may also be estimated in accordance with reasonable professional practice.

2. The emissions analysis may not include for emissions reduction credit any TCMs which have been delayed beyond the scheduled date until such time as implementation has been assured. If the TCM has been partially implemented and it can be demonstrated that it is providing quantifiable emission reduction benefits, the emissions analysis may include that emissions reduction credit.
  3. Emissions reduction credit from projects, programs, or activities which require a regulation in order to be implemented may not be included in the emissions analysis unless the regulation is already adopted by the enforcing jurisdiction. Adopted regulations are required for demand management strategies for reducing emissions which are not specifically identified in the applicable implementation plan, and for control programs which are external to the transportation system itself, such as tailpipe or evaporative emission standards, limits on gasoline volatility, inspection and maintenance programs, and oxygenated or reformulated gasoline or diesel fuel. A regulatory program may also be considered to be adopted if an opt-in to a federally enforced program has been approved by EPA, if EPA has promulgated the program (if the control program is a federal responsibility, such as tailpipe standards), or if the CAA requires the program without need for individual state action and without any discretionary authority for EPA to set its stringency, delay its effective date, or not implement the program.
  4. Notwithstanding subsection (A)(3), during the transitional period, control measures or programs which are committed to in an implementation plan submission as described in R18-2-1418 through R18-2-1420, but which has not received final EPA action in the form of a finding of incompleteness, approval, or disapproval, may be assumed for emission reduction credit for the purpose of demonstrating that the requirements of R18-2-1418 through R18-2-1420 are satisfied.
  5. A regional emissions analysis for the purpose of satisfying the requirements of R18-2-1422 through R18-2-1424 may account for the programs in subsection (A)(4), but the same assumptions about these programs shall be used for both the Baseline and Action scenarios.
  6. Ambient temperatures shall be consistent with those used to establish the emissions budget in the applicable implementation plan. Factors other than temperatures, for example the fraction of travel in a hot stabilized engine mode, may be modified after interagency consultation according to R18-2-1405 if the newer estimates incorporate additional or more geographically specific information or represent a logically estimated trend in such factors beyond the period considered in the applicable implementation plan.
- B. For serious, severe, and extreme ozone nonattainment areas and serious carbon monoxide areas after January 1, 1995, estimates of regional transportation-related emissions used to support conformity determinations shall be made according to procedures which meet the requirements in subsections (B)(1) through (5).
1. A network-based transportation demand model or models relating travel demand and transportation system performance to land-use patterns, population demographics, employment, transportation infrastructure, and transportation policies shall be used to estimate travel within the

- metropolitan planning area of the nonattainment area. Such a model shall possess all of the following attributes:
- a. The modeling methods and the functional relationships used in the model shall in all respects be in accordance with acceptable professional practice and reasonable for purposes of emission estimation.
  - b. The network-based model shall be validated against ground counts for a base year that is not more than 10 years prior to the date of the conformity determination. Land use, population, and other inputs shall be based on the best available information and appropriate to the validation base year.
  - c. For peak-hour or peak-period traffic assignments, a capacity sensitive assignment methodology shall be used.
  - d. Zone-to-zone travel times used to distribute trips between origin and destination pairs shall be in reasonable agreement with the travel times which result from the process of assignment of trips to network links. Where use of transit currently is anticipated to be a significant factor in satisfying transportation demand, these times should also be used for modeling mode splits.
  - e. Free-flow speeds on network links shall be based on empirical observations.
  - f. Peak and off-peak travel demand and travel times shall be provided.
  - g. Trip distribution and mode choice shall be sensitive to pricing, where pricing is a significant factor, if the network model is capable of such determinations and the necessary information is available.
  - h. The model shall utilize and document a logical correspondence between the assumed scenario of land development and use and the future transportation system for which emissions are being estimated. Reliance on a formal land-use model is not specifically required but is encouraged.
  - i. A dependence of trip generation on the accessibility of destinations via the transportation system, including pricing, is strongly encouraged but not specifically required, unless the network model is capable of such determinations and the necessary information is available.
  - j. A dependence of regional economic and population growth on the accessibility of destinations via the transportation system is strongly encouraged but not specifically required, unless the network model is capable of such determinations and the necessary information is available.
  - k. Consideration of emissions increases from construction-related congestion is not specifically required.
2. Highway Performance Monitoring System (HPMS) estimates of vehicle miles traveled shall be considered the primary measure of vehicle miles traveled within the portion of the nonattainment or maintenance area and for the functional classes of roadways included in HPMS, for urban areas which are sampled on a separate urban area basis. A factor or factors shall be developed to reconcile and calibrate the network-based model estimates of vehicle miles traveled in the base year of its validation to the HPMS estimates for the same period, and these factors shall be applied to model estimates of future vehicle miles traveled. In this factoring process, consideration will be given to differences in the facility coverage of the HPMS and the modeled network description. Departure from these procedures is permitted with the concurrence of USDOT and EPA.
  3. Reasonable methods shall be used to estimate nonattainment area vehicle travel on off-network roadways within the urban transportation planning area and on roadways outside the urban transportation planning area.
  4. Reasonable methods in accordance with good practice shall be used to estimate traffic speeds and delays in a manner that is sensitive to the estimated volume of travel on each roadway segment represented in the network model.
- C. For areas which are not serious, severe, or extreme ozone nonattainment areas or serious carbon monoxide areas, or before January 1, 1995:
    1. Procedures which satisfy some or all of the requirements of subsection (A) shall be used in all areas not subject to subsection (A) in which those procedures have been the previous practice of the MPO.
    2. Regional emissions may be estimated by methods which do not explicitly or comprehensively account for the influence of land use and transportation infrastructure on vehicle miles traveled and traffic speeds and congestion. Such methods shall account for VMT growth by extrapolating historical VMT or projecting future VMT by considering growth in population and historical growth trends for vehicle miles travelled per person. These methods shall also consider future economic activity, transit alternatives, and transportation system policies.
  - D. This subsection applies to any nonattainment or maintenance area or any portion thereof which does not have a metropolitan transportation plan or TIP and whose projects are not part of the emissions analysis of any MPO's metropolitan transportation plan or TIP (because the nonattainment or maintenance area or portion thereof does not contain a metropolitan planning area or portion of a metropolitan planning area and is not part of a Metropolitan Statistical Area or Consolidated Metropolitan Statistical Area which is or contains a nonattainment or maintenance area).
    1. Conformity demonstrations for projects in these areas may satisfy the requirements of R18-2-1420, R18-2-1424, and R18-2-1427 with one regional emissions analysis which includes all the regionally significant transportation projects in the nonattainment or maintenance area or portion thereof.
    2. The requirements of R18-2-1420 shall be satisfied according to the procedures in R18-2-1420(C), with references to the "transportation plan" taken to mean the statewide transportation plan.
    3. The requirements of R18-2-1424 and R18-2-1427 which reference "transportation plan" or "TIP" shall be taken to mean those projects in the statewide transportation plan or statewide TIP which are in the nonattainment or maintenance area or portion thereof.
    4. The requirement of R18-2-1429(A)(2) shall be satisfied if all of the following are met:
      - a. The project is included in the regional emissions analysis which includes all regionally significant highway and transportation projects in the nonattainment or maintenance area or portion thereof and supports the most recent conformity determination made according to the requirements of R18-2-1420, R18-2-1424 or R18-2-1427 (as modified by subsections (D)(2) and (D)(3)), as appropriate for the time period and pollutant.
      - b. The project's design concept and scope have not changed significantly from those which were

included in the regional emissions analysis or in a manner which would significantly impact use of the facility.

- E. For areas in which the implementation plan does not identify construction-related fugitive PM<sub>10</sub> as a contributor to the non-attainment problem, the fugitive PM<sub>10</sub> emissions associated with highway and transit project construction are not required to be considered in the regional emissions analysis.
- F. In PM<sub>10</sub> nonattainment and maintenance areas with implementation plans which identify construction-related fugitive PM<sub>10</sub> as a contributor to the nonattainment problem, the regional PM<sub>10</sub> emissions analysis shall consider construction-related fugitive PM<sub>10</sub> and shall account for the level of construction activity, the fugitive PM<sub>10</sub> control measures in the applicable implementation plan, and the dust-producing capacity of the proposed activities.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1431. Procedures for Determining Localized CO and PM<sub>10</sub> Concentrations (Hot-spot Analysis)

- A. In the following cases, CO hot-spot analyses shall be based on the applicable air quality models, data bases, and other requirements specified in 40 CFR 51 Appendix W (“Guideline on Air Quality Models (Revised)” (1988), supplement (A) (1987) and supplement (B) (1993), EPA publication no. 450/2-78-027R, incorporated by reference and on file with the Department and with the Secretary of State), unless, after the interagency consultation process described in R18-2-1405 and with the approval of the EPA Regional Administrator, these models, data bases, and other requirements are determined to be inappropriate:
  1. For projects in or affecting locations, areas, or categories of sites which are identified in the applicable implementation plan as sites of current violation or possible current violation;
  2. For those intersections at Level-of-Service D, E, or F, or those that will change to Level-of-Service D, E, or F because of increased traffic volumes related to a new project in the vicinity;
  3. For any project involving or affecting any of the intersections which the applicable implementation plan identifies as the top three intersections in the nonattainment or maintenance area based on the highest traffic volumes;
  4. For any project involving or affecting any of the intersections which the applicable implementation plan identifies as the top three intersections in the nonattainment or maintenance area based on the worst Level-of-Service;
  5. Where use of the “Guideline” models is practicable and reasonable given the potential for violations.
- B. In cases other than those described in subsection (A), other quantitative methods may be used if they represent reasonable and common professional practice.
- C. CO hot-spot analyses shall include the entire project and may be performed only after the major design features which will significantly impact CO concentrations have been identified. The background concentration may be estimated using the ratio of future to current traffic multiplied by the ratio of future to current emission factors.
- D. PM<sub>10</sub> hot-spot analysis shall be performed for projects which are located at sites at which violations have been verified by monitoring, and at sites which have essentially identical vehicle and roadway emission and dispersion characteristics (including sites near one at which a violation has been monitored). The projects which require PM<sub>10</sub> hot-spot analysis shall be determined through the interagency consultation pro-

cess required in R18-2-1405. In PM<sub>10</sub> nonattainment and maintenance areas, new or expanded bus and rail terminals and transfer points which increase the number of diesel vehicles congregating at a single location require hot-spot analysis. USDOT may choose to make a categorical conformity determination on bus and rail terminals or transfer points based on appropriate modeling of various terminal sizes, configurations, and activity levels. The requirements of this subsection for quantitative hot-spot analysis will not take effect until EPA releases modeling guidance on this subject and announces in the Federal Register that these requirements are in effect.

- E. Hot-spot analysis assumptions shall be consistent with those in the regional emissions analysis for those inputs which are required for both analyses.
- F. PM<sub>10</sub> or CO mitigation or control measures shall be assumed in the hot-spot analysis only where there are enforceable written commitments from the project sponsor or operator to the implementation of such measures, as required by R18-2-1433(A).
- G. CO and PM<sub>10</sub> hot-spot analyses are not required to consider construction-related activities which cause temporary increases in emissions. Each site which is affected by construction-related activities shall be considered separately, using established “Guideline” methods. Temporary increases are defined as those which occur only during the construction phase and last five years or less at any individual site.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1432. Using the Motor Vehicle Emissions Budget in the Applicable Implementation Plan or Implementation Plan Submission

- A. In interpreting an applicable implementation plan or implementation plan submission with respect to its motor vehicle emissions budget, ADOT or the MPO where one exists and USDOT may not infer additions to the budget that are not explicitly intended by the implementation plan or submission. Unless the implementation plan explicitly quantifies the amount by which motor vehicle emissions could be higher while still allowing a demonstration of compliance with the milestone, attainment, or maintenance requirement and explicitly states an intent that some or all of this additional amount should be available to ADOT or the MPO and USDOT in the emission budget for conformity purposes, ADOT or the MPO may not interpret the budget to be higher than the implementation plan’s estimate of future emissions. This applies in particular to applicable implementation plans or submissions which demonstrate that after implementation of control measures in the implementation plan any of the following apply:
  1. Emissions from all sources will be less than the total emissions that would be consistent with a required demonstration of an emissions reduction milestone.
  2. Emissions from all sources will result in achieving attainment prior to the attainment deadline or ambient concentrations in the attainment deadline year will be lower than needed to demonstrate attainment.
  3. Emissions will be lower than needed to provide for continued maintenance.
- B. If an applicable implementation plan submitted before November 24, 1993, demonstrates that emissions from all sources will be less than the total emissions that would be consistent with attainment and quantifies that “safety margin,” the state may submit a SIP revision which assigns some or all of this safety margin to highway and transit mobile sources for the purposes of conformity. Such a SIP revision, once it is endorsed by the governor and has been subject to a public

hearing, may be used for the purposes of transportation conformity before it is approved by EPA.

- C. A conformity demonstration shall not trade emissions among budgets which the applicable implementation plan or implementation plan submission allocates for different pollutants or precursors, or among budgets allocated to motor vehicles and other sources, without a SIP revision or a SIP which establishes mechanisms for such trades.
- D. If the applicable implementation plan or implementation plan submission estimates future emissions by geographic subarea of the nonattainment area, ADOT or the MPO where one exists and USDOT are not required to consider this to establish subarea budgets, unless the applicable implementation plan or implementation plan submission explicitly indicates an intent to create such subarea budgets for the purposes of conformity.
- E. If a nonattainment area includes more than one MPO, the SIP may establish motor vehicle emissions budgets for each MPO. Otherwise, the MPOs shall collectively make a conformity determination for the entire nonattainment area.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1433. Enforceability of Design Concept and Scope and Project-level Mitigation and Control Measures

- A. Prior to determining that a transportation project is in conformity, ADOT, the MPO where one exists, other recipient of funds designated under 23 U.S.C. or the Federal Transit Act, FHWA, or FTA shall obtain from the project sponsor or operator enforceable written commitments to implement in the construction of the project and operation of the resulting facility or service any project-level mitigation or control measures which are identified as conditions for NEPA process completion with respect to local PM<sub>10</sub> or CO impacts. Before making conformity determinations enforceable written commitments shall also be obtained for project-level mitigation or control measures which are conditions for making conformity determinations for a transportation plan or TIP and included in the project design concept and scope which is used in the regional emissions analysis required by R18-2-1418 through R18-2-1420 and R18-2-1422 through R18-2-1424 or used in the project-level hot-spot analysis required by R18-2-1416 and R18-2-1421.
- B. Project sponsors voluntarily committing to mitigation measures to facilitate positive conformity determinations shall provide enforceable written commitments and comply with the obligations of such commitments.
- C. Enforceable written commitments to mitigation or control measures shall be obtained prior to a positive conformity determination, and that project sponsors shall comply with such commitments.
- D. During the control strategy and maintenance periods, if ADOT, the MPO, or project sponsor believes the mitigation or control measure is no longer necessary for conformity, the project sponsor or operator may be relieved of its obligation to implement the mitigation or control measure if it can demonstrate that the requirements of R18-2-1416, R18-2-1418, and R18-2-1419 are satisfied without the mitigation or control measure and so notifies the agencies involved in the inter-agency consultation process required under R18-2-1405. ADOT or the MPO where one exists and USDOT shall confirm that the transportation plan and TIP still satisfy the requirements of R18-2-1418 and R18-2-1419 and that the project still satisfies the requirements of R18-2-1416, and therefore that the conformity determinations for the transportation plan, TIP, and project are still valid.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1434. Exempt Projects

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in Table 2 are exempt from the requirement that a conformity determination be made. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in Table 2 is not exempt if ADOT or the MPO where one exists in consultation with other agencies pursuant to R18-2-1405, the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potentially adverse emissions impacts for any reason. States and MPOs shall ensure that exempt projects do not interfere with TCM implementation.

Table 2.

#### Exempt Projects SAFETY

1. Railroad or highway crossing.
2. Hazard elimination program.
3. Safer non-federal-aid system roads.
4. Shoulder improvements.
5. Increasing sight distance.
6. Safety improvement program.
7. Traffic control devices and operating assistance other than signalization projects.
8. Railroad or highway crossing warning devices.
9. Guardrails, median barriers, crash cushions.
10. Pavement resurfacing or rehabilitation.
11. Pavement marking demonstration.
12. Emergency relief (23 U.S.C. 125).
13. Fencing.
14. Skid treatments.
15. Safety roadside rest areas.
16. Adding medians.
17. Truck climbing lanes outside the urbanized area.
18. Lighting improvements.
19. Widening narrow pavements or reconstructing bridges (no additional travel lanes).
20. Emergency truck pullovers.

#### MASS TRANSIT

1. Operating assistance to transit agencies.
2. Purchase of support vehicles.
3. Rehabilitation of transit vehicles. (In PM<sub>10</sub> nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.)
4. Purchase of office, shop, and operating equipment for existing facilities.
5. Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.).
6. Construction or renovation of power, signal, and communications systems.
7. Construction of small passenger shelters and information kiosks.
8. Reconstruction or renovation of transit buildings and structures (e.g., rail or bus buildings, storage and maintenance facilities, stations, terminals, and ancillary structures).
9. Rehabilitation or reconstruction of track structures, track, and trackbed in existing rights-of-way.
10. Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet. (In PM<sub>10</sub> nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.)

11. Construction of new bus or rail storage or maintenance facilities categorically excluded in 23 CFR 771.

#### AIR QUALITY

1. Continuation of ride-sharing and van-pooling promotion activities at current levels.
2. Bicycle and pedestrian facilities.

#### OTHER

1. Specific activities which do not involve or lead directly to construction, such as:
  - a. Planning and technical studies.
  - b. Grants for training and research programs.
  - c. Planning activities conducted pursuant to Titles 23 and 49 U.S.C.
  - d. Federal-aid systems revisions.
2. Engineering to assess social, economic and environmental effects of the proposed action or alternatives to that action.
3. Noise attenuation.
4. Advance land acquisitions (23 CFR 712 or 23 CFR 771).
5. Acquisition of scenic easements.
6. Plantings, landscaping, etc.
7. Sign removal.
8. Directional and informational signs.
9. Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities).
10. Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1435. Projects Exempt from Regional Emissions Analyses

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in Table 3 are exempt from regional emissions analysis requirements. The local effects of these projects with respect to CO or PM<sub>10</sub> concentrations shall be considered to determine if a hot-spot analysis is required prior to making a project-level conformity determination. These projects may then proceed to the project development process even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in Table 3 is not exempt from regional emissions analysis if the MPO in consultation with other agencies pursuant to R18-2-1405, the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potential regional impacts for any reason.

**Table 3**

#### Projects Exempt From Regional Emissions Analyses

1. Intersection channelization projects.
2. Intersection signalization projects at individual intersections.
3. Interchange reconfiguration projects.
4. Changes in vertical and horizontal alignment.
5. Truck size and weight inspection stations.
6. Bus terminals and transfer points.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1436. Special Provisions for Nonattainment Areas Which are Not Required to Demonstrate Reasonable Further Progress and Attainment

- A. This Section applies in the following areas:
  1. Rural transport ozone nonattainment areas,
  2. Marginal ozone areas,
  3. Submarginal ozone areas,
  4. Transitional ozone areas,

5. Incomplete data ozone areas,
6. Moderate CO areas with a design value of 12.7 ppm or less,
7. Not classified CO areas.

- B. The criteria and procedures in R18-2-1422 through R18-2-1424 will remain in effect throughout the control strategy period for transportation plans, TIPs, and projects (not from a conforming plan and TIP) in lieu of the procedures in R18-2-1418 through R18-2-1420, except as otherwise provided in subsection (C).

- C. The state or MPO may voluntarily develop an attainment demonstration and corresponding motor vehicle emissions budget like those required in areas with higher nonattainment classifications. In this case, the state shall submit an implementation plan revision which contains that budget and attainment demonstration. Once EPA has approved this implementation plan revision, the procedures in R18-2-1418 through R18-2-1420 apply in lieu of the procedures in R18-2-1422 through R18-2-1424.

#### Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

#### R18-2-1437. Reserved

#### R18-2-1438. General Conformity for Federal Actions

The following subparts of 40 CFR 93, Determining Conformity of Federal Actions to State or Federal Implementation Plans, and all accompanying appendices, adopted as of July 1, 1994, and no future editions, are incorporated by reference. These standards are on file with the Office of the Secretary of State and with the Department and shall be applied by the Department.

Subpart B - Determining Conformity of General Federal Actions to State or Federal Implementation Plans (58 FR 63253, November 30, 1993).

#### Historical Note

Adopted effective January 31, 1995 (Supp. 95-1).

### ARTICLE 15. FOREST AND RANGE MANAGEMENT BURNS

#### R18-2-1501. Definitions

In addition to the definitions contained in A.R.S. § 49-501 and R18-2-101, in this Article:

1. "Activity fuels" means those fuels created by human activities such as thinning or logging.
2. "ADEQ" means the Department of Environmental Quality.
3. "Annual emissions goal" means the annual establishment in cooperation with the F/SLMs, under R18-2-1503(G), of a planned quantifiable value of emissions reduction from prescribed fires and fuels management activities.
4. "Burn plan" means the ADEQ form that includes information on the conditions under which a burn will occur with details of the burn and smoke management prescriptions.
5. "Burn prescription" means, with regard to a burn project, the pre-determined area, fuel, and weather conditions required to attain planned resource management objectives.
6. "Burn project" means an active or planned prescribed burn, including a wildland fire use incident.
7. "Duff" means forest floor material consisting of decomposing needles and other natural materials.
8. "Emission reduction techniques (ERT)" means methods for controlling emissions from prescribed fires to minimize the amount of emission output per unit of area burned.

## Department of Environmental Quality – Air Pollution Control

9. “Federal land manager (FLM)” means any department, agency, or agent of the federal government, including the following:
  - a. United States Forest Service,
  - b. United States Fish and Wildlife Service,
  - c. National Park Service,
  - d. Bureau of Land Management,
  - e. Bureau of Reclamation,
  - f. Department of Defense,
  - g. Bureau of Indian Affairs, and
  - h. Natural Resources Conservation Service.
10. “F/SLM” means a federal land manager or a state land manager.
11. “Local fire management officer” means a person designated by a F/SLM as responsible for fire management in a local district or area.
12. “Mop-up” means the act of extinguishing or removing burning material from a prescribed fire to reduce smoke impacts.
13. “National Wildfire Coordinating Group” means the national inter-agency group of federal and state land managers that shares similar wildfire suppression programs and has established standardized inter-agency training courses and qualifications for fire management positions.
14. “Non-burning alternatives to fire” means techniques that replace fire for at least five years as a means to treat activity fuels created to achieve a particular land management objective (e.g., reduction of fuel-loading, manipulation of fuels, enhancement of wildlife habitat, and ecosystem restoration). These alternatives are not used in conjunction with fire. Techniques used in conjunction with fire are referred to as emission reduction techniques (ERTs).
15. “Planned resource management objectives” means public interest goals in support of land management agency objectives including silviculture, wildlife habitat management, grazing enhancement, fire hazard reduction, wilderness management, cultural scene maintenance, weed abatement, watershed rehabilitation, vegetative manipulation, and disease and pest prevention.
16. “Prescribed burning” means the controlled application of fire to wildland fuels that are in either a natural or modified state, under certain burn and smoke management prescription conditions that have been specified by the land manager in charge of or assisting the burn, to attain planned resource management objectives. Prescribed burning does not include a fire set or permitted by a public officer to provide instruction in fire fighting methods, or construction or residential burning under R18-2-602.
17. “Prescribed fire manager” means a person designated by a F/SLM as responsible for prescribed burning for that land manager.
18. “Smoke management prescription” means the predetermined meteorological conditions that affect smoke transport and dispersion under which a burn could occur without adversely affecting public health and welfare.
19. “Smoke management techniques (SMT)” means management and dispersion practices used during a prescribed burn or wildland fire use incident which affect the direction, duration, height, or density of smoke.
20. “Smoke management unit” means any of the geographic areas defined by ADEQ whose area is based on primary watershed boundaries and whose outline is determined by diurnal windflow patterns that allow smoke to follow predictable drainage patterns. A map of the state divided into the smoke management units is on file with ADEQ.
21. “State land manager (SLM)” means any department, agency, or political subdivision of the state government including the following:
  - a. State Land Department,
  - b. Department of Transportation,
  - c. Department of Game and Fish, and
  - d. Parks Department.
22. “Wildfire” means an unplanned wildland fire subject to appropriate control measures. Wildfires include those incidents where suppression may be limited for safety, economic, or resource concerns.
23. “Wildland fire use” means a wildland fire that is ignited by natural causes, such as lightning, and is managed using the same controls and for the same planned resource management objectives as prescribed burning.

**Historical Note**

Adopted effective October 8, 1996 (Supp. 96-4).

Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

**R18-2-1502. Applicability**

- A. A F/SLM that is conducting or assisting a prescribed burn shall follow the requirements of this Article.
- B. A private or municipal burner with whom ADEQ has entered into a memorandum of agreement shall follow the requirements of this Article.
- C. The provisions of this Article apply to all areas of the state except Indian Trust lands. All federally managed lands and all state lands, parks, and forests are under the jurisdiction of ADEQ in matters relating to air pollution from prescribed burning.
- D. Notwithstanding subsection (C), ADEQ and any Indian tribe may enter into a memorandum of agreement to implement this Article.
- E. ADEQ and any private or municipal prescribed burner may enter into a memorandum of agreement to implement this Article.

**Historical Note**

Adopted effective October 8, 1996 (Supp. 96-4).

Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

**R18-2-1503. Annual Registration, Program Evaluation and Planning**

- A. Each F/SLM shall register annually with ADEQ on a form prescribed by ADEQ, all planned burn projects, including areas planned for wildland fire use.
- B. Each planned year extends from January 1 of the registration year to December 31 of the same year. Each F/SLM shall use best efforts to register before December 31 and no later than January 31 of each year.
- C. A F/SLM shall include the following information on the registration form:
  1. The F/SLM’s name, address, and business telephone number;
  2. The name, address, and business telephone number of an air quality representative who will provide technical support to ADEQ for decisions regarding prescribed burning. The same air quality representative may be selected by more than one F/SLM;
  3. All prescribed burn projects and potential wildland fire use areas planned for the next year;
  4. Maximum project and annual acres to be burned, maximum daily acres to be burned, fuel types within project area, and planned use of emission reduction techniques to

- support the annual emissions goal for each prescribed burn project;
  - 5. Planned use of any smoke management techniques for each prescribed burn project;
  - 6. Maximum project and annual acres projected to be burned, maximum daily acres projected to be burned, and a map of the anticipated project area, fuel types and loading within the planned area for an area the F/SLM anticipates for wildland fire use;
  - 7. A list of all burn projects that were completed during the previous year;
  - 8. Project area for treatment, treatment type, fuel types to be treated, and activity fuel loading to support the annual emissions goal for areas to be treated using non-burning alternatives to fire; and
  - 9. The area treated using non-burning alternatives to fire during the previous year including the number of acres, the specific types of alternatives utilized, and the location of these areas.
- D.** After consultation with the F/SLM, ADEQ may request additional information for registration of prescribed burns and wildland fire use to support regional coordination of smoke management, annual emission goal setting using ERTs, and non-burning alternatives to fire.
- E.** A F/SLM may amend a registration at any time with a written submission to ADEQ.
- F.** ADEQ accepts a facsimile or other electronic method as a means of complying with the deadline for registration. If an electronic means is used, the F/SLM shall deliver the original paper registration form to ADEQ for its records. ADEQ shall acknowledge in writing the receipt of each registration.
- G.** ADEQ shall hold a meeting after January 31 and before April 1 of each year between ADEQ and F/SLMs to evaluate the program and cooperatively establish the annual emission goal. The annual emission goal shall be developed to minimize prescribed fire emissions to the maximum extent feasible using emission reduction techniques and alternatives to burning subject to economic, technical, and safety feasibility criteria, and consistent with land management objectives.
- H.** At least once every five years, ADEQ shall request long-term projections of future prescribed fire and wildland fire use activity from the F/SLMs to support planning for visibility impairment and assessment of other air quality concerns by ADEQ.
- 4. The number of acres to be burned, the quantity and type of fuel, type of burn, and the ignition technique to be used;
  - 5. The land management objective or purpose for the burn such as restoration or maintenance of ecological function and indicators of fire resiliency;
  - 6. A map depicting the potential impact of the smoke unless waived either orally or in writing by ADEQ. The potential impact shall be determined by mapping both the daytime and nighttime smoke path and down-drainage flow for 15 miles from the burn site, with smoke-sensitive areas delineated. The map shall use the appropriate scale to show the impacts of the smoke adequately;
  - 7. Modeling of smoke impacts unless waived either orally or in writing by ADEQ, for burns greater than 250 acres per day, or greater than 50 acres per day if the burn is within 15 miles of a Class I Area, an area that is non-attainment for particulates, a carbon monoxide non-attainment area, or other smoke-sensitive area. In consultation with the F/SLM, ADEQ shall provide guidelines on modeling;
  - 8. The name of the official submitting the Burn Plan on behalf of the F/SLM; and
  - 9. After consultation with the F/SLM, any other information to support the Burn Plan needed by ADEQ to assist in the Daily Burn authorization process for smoke management purposes or assessment of contribution to visibility impairment of Class I areas.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).

Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1505. Prescribed Burn Requests and Authorization

- A.** Each F/SLM planning a prescribed burn, shall complete and submit to ADEQ the “Daily Burn Request” form supplied by ADEQ. The Daily Burn Request form shall include:
- 1. The contact information of the F/SLM conducting the burn;
  - 2. Each day of the burn;
  - 3. The area to be burned on the day for which the Burn Request is submitted, with reference to the Burn Plan, including size, legal location to the section, and latitude and longitude to the minute;
  - 4. Projected smoke impacts; and
  - 5. Any local conditions or circumstances known to the F/SLM that, if conveyed to ADEQ, could impact the Daily Burn authorization process.
- B.** After consultation with the F/SLM, ADEQ may request additional information related to the burn, meteorological, smoke dispersion, or air quality conditions to supplement the Daily Burn Request form and to aid in the Daily Burn authorization process.
- C.** The F/SLM shall submit the Daily Burn Request form to ADEQ as expeditiously as practicable, but no later than 2:00 p.m. of the business day preceding the burn. An original form, a facsimile, or an electronic information transfer are acceptable submittals.
- D.** An F/SLM shall not ignite a prescribed burn without receiving the approval of ADEQ, as follows:
- 1. ADEQ shall approve, approve with conditions, or disapprove a burn on the same business day as the Burn Request submittal.
  - 2. If ADEQ fails to address a Burn Request by 10:00 p.m. of the business day on which the request is submitted, the Burn Request is approved by default after the burner

#### R18-2-1504. Prescribed Burn Plan

Each F/SLM planning a prescribed burn shall complete and submit to ADEQ the “Burn Plan” form supplied by ADEQ no later than 14 days before the date on which the F/SLM requests permission to burn. ADEQ shall consider the information supplied on the Burn Plan Form as binding conditions under which the burn shall be conducted. A Burn Plan shall be maintained by ADEQ until notification from the F/SLM of the completion of the burn project. Revisions to the Burn Plan for a burn project shall be submitted in writing no later than 14 days before the date on which the F/SLM requests permission to burn. To facilitate the Daily Burn authorization process under R18-2-1505, the F/SLM shall include on the Burn Plan form:

- 1. An emergency telephone number that is answered 24 hours a day, seven days a week;
- 2. Burn prescription;
- 3. Smoke management prescription;

makes a good faith effort to contact ADEQ to confirm that the Burn Request was received.

3. ADEQ may communicate its decision by verbal, written, or electronic means. ADEQ shall provide a written or electronic reply if requested by the F/SLM.
- E. If weather conditions cease to conform to those in the smoke management prescription of either the Burn Plan or an Approval with Conditions, the F/SLM shall take appropriate action to reduce further smoke impacts, ensure safe and appropriate fire control, and notify the public when necessary. After consultation with ADEQ, the smoke management prescription or burn plan may be modified.
- F. The F/SLM shall ensure that there is appropriate signage and notification to protect public safety on transportation corridors including roadways and airports during a prescribed fire.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).  
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1506. Smoke Dispersion Evaluation

ADEQ shall approve, approve with conditions, or disapprove a Daily Burn Request submitted under R18-2-1505, by using the following factors for each smoke management unit:

1. Analysis of the emissions from burns in progress and residual emissions from previous burns on a day-to-day basis;
2. Analysis of emissions from active wildland fire use incidents, and active multiple-day burns, and consideration of potential long-term emissions estimates;
3. Analysis of the emissions from wildfires greater than 100 acres and consideration of their potential long-term growth;
4. Local burn conditions;
5. Burn prescription and smoke management prescription from the applicable Burn Plan;
6. Existing and predicted local air quality;
7. Local and synoptic meteorological conditions;
8. Type and location of areas to be burned;
9. Protection of the national visibility goal for Class I Areas under § 169A(a)(1) of the Act and 40 CFR 51.309;
10. Assessment of duration and intensity of smoke emissions to minimize cumulative impacts;
11. Minimization of smoke impacts in Class I Areas, areas that are non-attainment for particulate matter, carbon monoxide non-attainment areas, or other smoke-sensitive areas; and
12. Protection of the National Ambient Air Quality Standards.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).  
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1507. Prescribed Burn Accomplishment; Wildfire Reporting

- A. Each F/SLM conducting a prescribed burn shall complete and submit to ADEQ the "Burn Accomplishment" form supplied by ADEQ. For each burn approval, the F/SLM shall submit a Burn Accomplishment form to ADEQ by 2:00 p.m. of the business day following the approved burn. The F/SLM shall include the following information on the Burn Accomplishment form:
  1. Any known conditions or circumstances that could impact the Daily Burn decision process;

2. The date, location, fuel type, fuel loading, and acreage accomplishments;
3. The ERTs and SMTs described in R18-2-1509 and R18-2-1510, respectively, and may include any further ERTs and SMTs that become available, that the F/SLM used to reduce emissions or manage the smoke from the burn.
- B. The F/SLM shall submit the Burn Accomplishment form as an original form, a facsimile, or an electronic information transfer.
- C. ADEQ shall maintain a record of Burn Requests, Burn Approvals/Conditional Approvals/Denials and Burn Accomplishments for five years.
- D. The F/SLM in whose jurisdiction a wildfire occurs shall make available to ADEQ no later than the day after the activity all required information for wildfire incidents that burned more than 100 acres per day in timber or slash fuels or 300 acres per day in brush or grass fuels. For each day of a wildfire incident that exceeds the daily activity threshold, the F/SLM shall provide the location, an estimate of predominant fuel type and quantity consumed, and an estimate of the area blackened that day.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).  
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1508. Wildland Fire Use: Plan, Authorization, Monitoring; Inter-agency Consultation; Status Reporting

- A. In order for ADEQ to participate in the wildland fire use decision-making process, the F/SLM shall notify ADEQ as soon as practicable of any wildland fire use incident projected to attain or attaining a size of 50 acres of timber fuel or 250 acres of brush or grass fuel.
- B. For each wildland fire use incident that has been declared as such by the F/SLM, the F/SLM shall complete and submit to ADEQ a Wildland Fire Use Burn Plan in a format approved by ADEQ in cooperation with the F/SLM. The F/SLM shall submit the Wildland Fire Use Burn Plan to ADEQ as soon as practicable but no later than 72 hours after the wildland fire use incident is declared or under consideration for such designation. The F/SLM shall include the following information in the Wildland Fire Use Burn Plan:
  1. An emergency telephone number that is answered 24 hours a day, seven days a week;
  2. Anticipated burn prescription;
  3. Anticipated smoke management prescription;
  4. The estimated daily number of acres, quantity, and type of fuel to be burned;
  5. The anticipated maximum allowable perimeter or size with map;
  6. Information on the condition of the area to be burned, such as whether it is in maintenance or restoration, its ecological function, and other indicators of fire resiliency;
  7. The anticipated duration of the wildland fire use incident;
  8. The anticipated long-range weather trends for the site;
  9. A map depicting the potential impact of the smoke. The potential impact shall be determined by mapping both the daytime and nighttime smoke path and down-drainage flow for 15 miles from the wildland fire use incident, with smoke-sensitive areas delineated. Mapping is mandatory unless waived either orally or in writing by ADEQ. The map shall use the appropriate scale to show the impacts of the smoke adequately; and
  10. Modeling or monitoring of smoke impacts, if requested by ADEQ after consultation with the F/SLM.

- C. ADEQ shall approve or disapprove a Wildland Fire Use Burn Plan within three hours of receipt. ADEQ shall consult directly with the requesting F/SLM before disapproving a Wildland Fire Use Burn Plan. If ADEQ fails to address the Wildland Fire Use Burn Plan within the time allotted, the Plan is approved by default under the condition that the F/SLM makes a good faith effort to contact ADEQ to confirm that the Plan was received. Approval by ADEQ of a Wildland Fire Use Burn Plan is binding upon ADEQ for the duration of the wildland fire use incident, unless smoke from the incident creates a threat to public health or welfare. If a threat to public health or welfare is created, ADEQ shall consult with the F/SLM regarding the situation and develop a joint action plan for reducing further smoke impacts.
- D. The F/SLM shall submit a Daily Status Report for each wildland fire use incident to ADEQ for each day of the burn that the fire burns more than 100 acres in timber or slash fuels or 300 acres in brush or grass fuels. The F/SLM shall include a synopsis of smoke behavior, future daily anticipated growth, and location of the activity of the wildland fire use incident in the Daily Status Report.
- E. The F/SLM shall consult with ADEQ prior to initiating human-made ignition on the wildland fire use incident when greater than 250 acres is anticipated to be burned by the ignition. Emergency human-made ignition on the incident for protection of public or fire-fighter safety does not require consultation with ADEQ regardless of the size of the area to be burned.
- F. The F/SLM shall ensure that there is appropriate signage and notification to protect public safety on transportation corridors including roadways and airports during a wildland fire use incident.
- 9. Using a backing fire in grass fuels;
- 10. Burning fuels with an air curtain destructor, as defined in R18-2-101, operated according to manufacturer specifications and meeting applicable state or local opacity requirements;
- 11. Extinguishing or mopping-up of smoldering fuels;
- 12. Chunking of piles and other consolidations of burning material to enhance flaming and fuel consumption, and to minimize smoke production;
- 13. Burning before litter fall;
- 14. Burning before green-up of fuels;
- 15. Burning before recently cut large fuels cure in areas with activity; and
- 16. Burning just before precipitation to reduce fuel smoldering and consumption.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).  
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1510. Smoke Management Techniques

- A. Each F/SLM conducting a prescribed burn shall implement as many Smoke Management Techniques as are feasible subject to economic, technical, and safety feasibility criteria, and land management objectives.
- B. Smoke management techniques include:
  - 1. Burning from March 15 through September 15, when meteorological conditions allow for good smoke dispersion;
  - 2. Igniting burns under good-to-excellent ventilation conditions;
  - 3. Suspending operations under poor smoke dispersion conditions;
  - 4. Considering smoke impacts on local community activities and land users;
  - 5. Burning piles when other burns are not feasible, such as when snow or rain is present;
  - 6. Using mass ignition techniques such as aerial ignition by helicopter to produce high intensity fires with short duration impacts;
  - 7. Using all opportunities that meet the burn prescription and all burn locations to spread smoke impacts over a broader time period and geographic area;
  - 8. Burning during optimum mid-day dispersion hours, with all ignitions in a burn unit completed by 3:00 p.m. to prevent trapping smoke in inversions or diurnal windflow patterns;
  - 9. Providing information on the adverse impacts of using green or wet wood as fuel when public firewood access is allowed;
  - 10. Implementing maintenance burning in a periodic rotation to shorten prescribed fire duration and to reduce excessive fuel accumulations that could result in excessive smoke production in a wildfire; and
  - 11. Using wildland fire-use strategies to shift smoke into more favorable smoke dispersion seasons.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1510 renumbered to R18-2-1511; new R18-2-1510 made by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1511. Monitoring

- A. ADEQ may require a F/SLM to monitor air quality before or during a prescribed burn or a wildland fire use incident if necessary to assess smoke impacts. Air quality monitoring may be

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).  
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1509. Emission Reduction Techniques

- A. Each F/SLM conducting a prescribed burn shall implement as many Emission Reduction Techniques as are feasible subject to economic, technical, and safety feasibility criteria, and land management objectives.
- B. Emission Reduction Techniques include:
  - 1. Reducing biomass to be burned by use of techniques such as yarding or consolidation of unmerchandisable material, multi-product timber sales, or public firewood access, when economically feasible;
  - 2. Reducing biomass to be burned by fuel exclusion practices such as preventing the fire from consuming dead snags or dead and downed woody material through lining, application of fire-retardant foam, or water;
  - 3. Using mass ignition techniques such as aerial ignition by helicopter to produce high intensity fires of high fuel density areas such as logging slash decks;
  - 4. Burning only fuels essential to meet resource management objectives;
  - 5. Minimizing consumption and smoldering by burning under conditions of high fuel moisture of duff and litter;
  - 6. Minimizing fuel consumption and smoldering by burning under conditions of high fuel moisture of large woody fuels;
  - 7. Minimizing soil content when slash piles are constructed by using brush blades on material-moving equipment and by constructing piles under dry soil conditions or by using hand piling methods;
  - 8. Burning fuels in piles;

conducted using both federal and non-federal reference method as well as other techniques.

- B. ADEQ may require a F/SLM to monitor weather before or during a prescribed burn or a wildland fire use incident, if necessary to predict or assess smoke impacts. After consultation with the F/SLM, ADEQ may also require the F/SLM to establish burn site or area-representative remote automated weather stations or their equivalent, having telemetry that allows retrieval on a real-time basis by ADEQ. An F/SLM shall give ADEQ notice and an opportunity to comment before making any change to a long-term established remote automated weather station.
- C. A F/SLM shall employ the following types of monitoring, unless waived by ADEQ, for burns greater than 250 acres per day, or greater than 50 acres per day if the burn is within 15 miles of a Class I Area, an area that is non-attainment for particulate matter, carbon monoxide, or ozone, or other smoke-sensitive area:
  1. Smoke plume measurements, using a format supplied by ADEQ; and
  2. The release of pilot balloons (PIBALs) at the burn site to verify needed wind speed, direction, and stability. Instead of pilot balloons, a test burn at the burn site may be used for specific prescribed burns on a case-by-case basis as approved by ADEQ, to verify needed wind speed, direction, and stability.
- D. An F/SLM shall make monitoring information required under subsection (C) available to ADEQ on the business day following the burn ignition.
- E. The F/SLM shall keep on file for one year following the burn date any monitoring information required under this Section.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1511 renumbered to R18-2-1512; new R18-2-1511 renumbered from R18-2-1510 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1512. Burner Qualifications

- A. All burn projects shall be conducted by personnel trained in prescribed fire and smoke management techniques as required by the F/SLM in charge of the burn and established by National Wildfire Coordinating Group training qualifications.
- B. A Prescribed Fire Boss or other local Fire Management Officer of the F/SLM having jurisdiction over prescribed burns shall have smoke management training obtained through one of the following:
  1. Successful completion of a National Wildfire Coordinating Group or F/SLM-equivalent course addressing smoke management; or
  2. Attendance at an ADEQ-approved smoke management workshop.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1512 renumbered to R18-2-1513; new R18-2-1512 renumbered from R18-2-1511 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1513. Public Notification and Awareness Program; Regional Coordination

- A. The Director shall conduct a public education and awareness program in cooperation with F/SLMs and other interested parties to inform the general public of the smoke management program described by this Article. The program shall include

smoke impacts from prescribed fires and the role of prescribed fire in natural ecosystems.

- B. ADEQ shall make annual registration, prescribed burn approval, and wildfire and wildland fire use activity information readily available to the public and to facilitate regional coordination efforts and public notification.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1513 renumbered to R18-2-1514; new R18-2-1513 renumbered from R18-2-1512 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1514. Surveillance and Enforcement

- A. An F/SLM conducting a prescribed burn shall permit ADEQ to enter and inspect burn sites unannounced to verify the accuracy of the Daily Burn Request, Burn Plan, or Accomplishment data as well as matching burn approval with actual conditions, smoke dispersion, and air quality impacts. On-ground site inspection procedures and aerial surveillance shall be coordinated by ADEQ and the F/SLM for safety purposes.
- B. ADEQ may use remote automated weather station data if necessary to verify current and previous meteorological conditions at or near the burn site.
- C. ADEQ may audit burn accomplishment data, smoke dispersion measurements, or weather measurements from previously conducted burns, if necessary to verify conformity with, or deviation from, procedures and authorizations approved by ADEQ.
- D. Deviation from procedures and authorizations approved by ADEQ constitute a violation of this Article. Violations may require containment or mop-up of any active burns and may also require, in the Director's discretion, a five-day moratorium on ignitions by the responsible F/SLM. Violations of this Article are also subject to a civil penalty of not more than \$10,000 per day per violation under A.R.S. § 49-463.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1514 repealed; new R18-2-1514 renumbered from R18-2-1513 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

#### R18-2-1515. Forms; Electronic Copies; Information Transfers

- A. ADEQ shall make available on paper and in electronically readable format any form required to be developed by ADEQ and completed by a F/SLM.
- B. After consultation with an F/SLM, ADEQ may require the F/SLM to provide data in a manner that facilitates electronic transfers of information.

#### Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

### ARTICLE 16. VISIBILITY; REGIONAL HAZE

*Article 16, consisting of Sections R18-2-1601 through R18-2-1606, made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).*

#### R18-2-1601. Definitions

In addition to the definitions contained in Articles 1 and 4 of this Chapter and A.R.S. § 49-401.01, the following definitions apply to this Article:

1. "Best available retrofit technology (BART)" means an emission limitation based on the degree of reduction achievable through the application of the best system of

continuous emission reduction for each pollutant emitted by an existing stationary facility. The emission limitation is established on a case-by-case basis under R18-2-1605.

2. "Existing stationary facility" means any of the following stationary sources of air pollutants, including any reconstructed source, which was not in operation before August 7, 1962, and was in existence on August 7, 1977, and has the potential to emit 250 tons per year or more of any air pollutant. A person who determines potential to emit shall count fugitive emissions to the extent quantifiable.
  - a. Fossil-fuel fired steam electric plants of more than 250 million British thermal units per hour heat input;
  - b. Coal cleaning plants (thermal dryers);
  - c. Kraft pulp mills;
  - d. Portland cement plants;
  - e. Primary zinc smelters;
  - f. Iron and steel mill plants;
  - g. Primary aluminum ore reduction plants;
  - h. Primary copper smelters;
  - i. Municipal incinerators capable of charging more than 250 tons of refuse per day;
  - j. Hydrofluoric, sulfuric, and nitric acid plants;
  - k. Petroleum refineries;
  - l. Lime plants;
  - m. Phosphate rock processing plants;
  - n. Coke oven batteries;
  - o. Sulfur recovery plants;
  - p. Carbon black plants (furnace process);
  - q. Primary lead smelters;
  - r. Fuel conversion plants;
  - s. Sintering plants;
  - t. Secondary metal production facilities;
  - u. Chemical process plants;
  - v. Fossil-fuel boilers of more than 250 million British thermal units per hour heat input;
  - w. Petroleum storage and transfer facilities with a capacity exceeding 300,000 barrels;
  - x. Taconite ore processing facilities;
  - y. Glass fiber processing plants; and
  - z. Charcoal production facilities.
3. "Federal Land Manager" means the secretary of the department, or the secretary's designee, with authority over the Federal Class I area.
4. "Mandatory Federal Class I Area" means any area identified in 40 CFR 81.400 through 81.436.
5. "Reasonably attributable" means ascribable by visual observation or other techniques described in R18-2-1604.
6. "Reasonably attributable visibility impairment" means visibility impairment that is caused by the emission of air pollutants from one source, or a small group of sources.

#### Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

#### R18-2-1602. Applicability

This Article applies to any existing stationary source located in the state that may reasonably be anticipated to cause or contribute to visibility impairment in any mandatory Federal Class I area identified in 40 CFR 81.401 through 81.436. Mandatory Federal Class I areas within Arizona are: Chiricahua National Monument Wilderness, Chiricahua Wilderness, Galiuro Wilderness, Grand Canyon National Park, Mazatzal Wilderness, Mount Baldy Wilderness, Petrified Forest National Park, Pine Mountain Wilderness, Saguaro Wilderness, Sierra Ancha Wilderness, Superstition Wilderness, and Sycamore Canyon Wilderness.

#### Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

#### R18-2-1603. Certification of Impairment

- A. A Federal Land Manager with authority over a mandatory Federal Class I area may certify to the Director, at any time, that a reasonably attributable visibility impairment exists in a mandatory Federal Class I area. The Director may also certify that reasonably attributable visibility impairment exists in any mandatory Federal Class I area to assure reasonable progress under section 169A(b)(2) of the Clean Air Act.
- B. Documentation that supports the Federal Land Manager or Director's certification shall include:
  1. The mandatory Federal Class I area for which visibility impairment is being certified,
  2. Any information documenting the basis for the certification of impairment.

#### Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

#### R18-2-1604. Attribution Analysis; Finding

- A. If a mandatory Federal Class I area is certified as having reasonably attributable visibility impairment, the Director shall conduct an attribution analysis to identify each existing stationary source that may be reasonably anticipated to cause or contribute to visibility impairment. The Director shall notify the Federal Land Manager, affected source or small group of sources, and local air pollution control officer of the intent to conduct an attribution analysis. The attribution analysis shall be based on the following:
  1. Monitoring information obtained through the Arizona Class I Visibility Monitoring Network or special studies approved by ADEQ to ascertain:
    - a. The times visibility impairment occurred, and
    - b. The pollutants contributing to the visibility impairment;
  2. Transport analysis or air quality modeling based upon meteorological records to ascertain whether the pollutants were transported to the mandatory Federal Class I area;
  3. Other available studies, modeling analyses, and emissions inventories of point, area, and mobile source emissions to ascertain:
    - a. The pollutant causing the impairment, and
    - b. The source, or a small group of sources, emitting the pollutant;
  4. Other relevant supporting documentation provided by the Federal Land Manager or Director used to make the draft attribution analysis finding; and
  5. Consideration of any documentation provided by the source, a small group of sources, or other interested parties.
- B. In conducting the attribution analysis, the Director shall use monitoring information, meteorological records, and emissions inventories that represent times and locations reasonably concurrent with the visibility impairment.
- C. The Director shall issue a draft attribution finding that impairment has or has not occurred, and provide public notice of the draft attribution finding. The Director shall publish notice of the draft attribution finding in a newspaper of general circulation in each county containing the mandatory Federal Class I area and the affected source. The Director shall provide at least 30 days from the date of the notice for public comment. Written comments to the Director shall include the name of the person and the person's agent or attorney, if any, and shall clearly set forth reasons why the Director should review the draft attri-

bution finding. The Director shall issue a final attribution finding after the public comment period. If the Director finds existing stationary sources cause or contribute to visibility impairment in a mandatory Federal Class I area, the source shall be subject to a BART Control Analysis under R18-2-1605.

#### Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

#### R18-2-1605. BART Control Analysis; Finding

- A. The Director shall analyze for BART controls each existing stationary source for which a final attribution finding is made under R18-2-1604(C). The Director shall consider the following factors:
1. Available control technology;
  2. New source performance standards (NSPS) in Article 9;
  3. Alternative control systems if retrofitting to comply with applicable NSPS standards in Article 9 is infeasible;
  4. Cost of compliance;
  5. Energy and non-air quality environmental impacts of compliance;
  6. Existing pollution control technology in use at the source or small group of sources;
  7. Remaining useful life of the source or small group of sources;
  8. Net environmental impact associated with the proposed emission control system;
  9. Economic impacts associated with installing and operating the proposed emission control system; and
  10. Degree of improvement in visibility anticipated to result from application of the proposed emission control system.
- B. The Director shall issue a draft BART finding, and provide public notice of the draft BART finding. The Director shall publish notice of the draft BART finding in a newspaper of general circulation in each county containing the mandatory Federal Class I area and the affected source. The Director shall provide at least 30 days from the date of the notice for public comment. Written comments to the Director shall include the name of the person and the person's agent or attorney, and shall clearly set forth reasons why the Director should review the draft BART finding. The Director shall issue a final BART finding after the public comment period.
1. The Director shall submit each final BART finding to the Administrator as a revision to the SIP.
  2. The Director shall require that each existing stationary source meet BART as expeditiously as practicable but in no case later than five years after EPA approval of the SIP revision.
- C. If the Director determines that technological or economic limitations on the applicability of measurement methodology to a particular existing stationary source would make the imposition of an emission standard infeasible, the Director may, as part of the finding under subsection (B), prescribe a design, equipment, work practice, operational standard, or combination of design, equipment, work practice, or operational standard. The standard, to the degree possible, shall set forth the emission reduction to be achieved by implementation of the design, equipment, work practice, or operation, and shall provide for compliance by means that achieve equivalent results.
- D. The Director shall make a finding that the attributable source satisfies the BART requirement if the attributable source:
1. Voluntarily applies best available retrofit technology;
  2. Previously applied emission control standards equivalent to BART; or

3. Agrees to shutdown or curtail operations at the attributable source within five years of the finding. An attributable source that does not shutdown or curtail operations shall meet BART as expeditiously as practicable, but in no case later than five years after EPA's approval of the revision to the SIP.

- E. If the Director determines that the imposition of BART or a standard under subsection (C) is infeasible at the time of the finding, the Director shall require the attributable source to install and operate BART at a later date when the Director determines that BART or equivalent controls are feasible.
- F. The Director shall provide for a BART control analysis of any existing stationary source that might cause or contribute to impairment of visibility in any mandatory Federal Class I area identified under this Article at such time as the Administrator determines new control technology for the pollutant becomes reasonably available:
1. The pollutant is emitted by that existing stationary source,
  2. Controls representing BART for the pollutant have not previously been required under this Article, and
  3. The impairment of visibility in any mandatory Federal Class I area is reasonably attributable to the emissions of that pollutant.

#### Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

#### R18-2-1606. Exemption from BART

Any existing stationary source required to install, operate, and maintain BART under this Article, may apply to the Administrator for an exemption from that requirement according to 40 CFR 51.303. The existing stationary source shall obtain the Director's written concurrence before sending the application for exemption to the Administrator.

**R18-2-1812. Repealed****Historical Note**

New Section made by final rulemaking at 14 A.A.R.

2404, effective July 8, 2008 (Supp. 08-2). Section repealed by final rulemaking at 18 A.A.R. 250, effective January 10, 2012 (Supp. 12-1).

**APPENDIX 1. STANDARD PERMIT APPLICATION FORM AND FILING INSTRUCTIONS****FILING INSTRUCTIONS**

No application shall be considered complete until the Director has determined that all information required by this application form and the applicable statutes and regulations has been submitted. The Director may waive certain application requirements for specific source types, pursuant to R18-2-304(B). For permit revisions, the applicant need only supply information which directly pertains to the revision. The Director shall develop special guidance documents and forms to assist certain sources requiring Class 2 permits in completing the application form and filing instructions. Guidance documents can be requested by contacting the Office of Air Quality at the address and phone number given on the "Standard Permit Application Form."

In addition to the information required on the application form, the applicant shall supply the following:

1. Description of the process to be carried out in each unit (include Source Classification Code, if known).
2. Description of product.
3. Description of alternate operating scenario, if desired by applicant (include Source Classification Code).
4. Description of alternate operating scenario product, if applicable.
5. A flow diagram for all processes.
6. A material balance for all processes (optional, only if emission calculations are based on a material balance).
7. Emissions Related Information:
  - a. The source shall submit the potential emissions of regulated air pollutants as defined in R18-2-101 for all emission sources. Emissions shall be expressed in pounds per hour, tons per year, and such other terms as may be requested. Emissions shall be submitted using the standard "Emission Sources" portion of the "Standard Permit Application Form." Emissions information shall include fugitive emissions in the same manner as stack emissions, regardless of whether the source category in question is included in the list of sources contained in the definition of major source in R18-2-101.
  - b. The source shall identify and describe all points of emissions and to submit additional information related to the emissions of regulated air pollutants sufficient to verify which requirements are applicable to the source and sufficient to determine any fees under this Chapter.
8. Citation and description of all applicable requirements as defined in R18-2-101 including voluntarily accepted limits pursuant to R18-2-306.01.
9. An explanation of any proposed exemptions from otherwise applicable requirements.
10. The following information to the extent it is needed to determine or regulate emissions or to comply with the requirements of R18-2-306.01:
  - a. Maximum annual process rate for each piece of equipment which generates air emissions.
  - b. Maximum annual process rate for the whole plant.
  - c. Maximum rated hourly process rate for each piece of equipment which generates air emissions.
  - d. Maximum rated hourly process rate for the whole plant.

## Department of Environmental Quality – Air Pollution Control

- e. For all fuel burning equipment including generators, a description of fuel use, including the type used, the quantity used per year, the maximum and average quantity used per hour, the percent used for process heat, and higher heating value of the fuel. For solid fuels and fuel oils, state the potential sulfur and ash content.
- f. A description of all raw materials used and the maximum annual and hourly, monthly, or quarterly quantities of each material used.
- g. Anticipated Operating Schedules
  - i. Percent of annual production by season.
  - ii. Days of the week normally in operation.
  - iii. Shifts or hours of the day normally in operation.
  - iv. Number of days per year in operation.
- h. Limitations on source operations and any work practice standards affecting emissions.
- 11. A description of all process and control equipment for which permits are required including:
  - a. Name.
  - b. Make (if available).
  - c. Model (if available).
  - d. Serial number (if available).
  - e. Date of manufacture (if available).
  - f. Size/production capacity.
  - g. Type.
- 12. Stack Information:
  - a. Identification.
  - b. Description.
  - c. Building Dimensions.
  - d. Exit Gas Temperature.
  - e. Exit Gas Velocity.
  - f. Height.
  - g. Inside Dimensions.
- 13. Site diagram which includes:
  - a. Property boundaries.
  - b. Adjacent streets or roads.
  - c. Directional arrow.
  - d. Elevation.
  - e. Closest distance between equipment and property boundary.
  - f. Equipment layout.
  - g. Relative location of emission sources or points.
  - h. Location of emission points and non-point emission areas.
  - i. Location of air pollution control equipment.
- 14. Air Pollution Control Information:
  - a. Description of or reference to any applicable test method for determining compliance with each applicable requirement.
  - b. Identification, description and location of air pollution control equipment, including spray nozzles and hoods, and compliance monitoring devices or activities.
  - c. The rated and operating efficiency of air pollution control equipment.
  - d. Data necessary to establish required efficiency for air pollution control equipment (e.g. air to cloth ratio for baghouses, pressure drop for scrubbers, and warranty information).
  - e. Evidence that operation of the new or modified pollution control equipment will not violate any ambient air quality standards, or maximum allowable increases under R18-2-218.
- 15. Equipment manufacturer's bulletins or shop drawings are acceptable for the purposes of supplying the information required by any item in numbers 11, 12, or 14 of this Appendix.
- 16. Compliance Plan:
  - a. A description of the compliance status of the source with respect to all applicable requirements including, but not limited to:
    - i. A demonstration that the source or modification will comply with the applicable requirements contained in Article 6.
    - ii. A demonstration that the source or modification will comply with the applicable requirements contained in Article 7.
    - iii. A demonstration that the source or modification will comply with the applicable requirements contained in Article 8.
    - iv. A demonstration that the source or modification will comply with the applicable requirements contained in Article 9.
    - v. A demonstration that the source or modification will comply with the applicable requirements contained in Article 11 and in rules promulgated pursuant to A.R.S. § 49-426.03.
    - vi. A demonstration that the source or modification will comply with the applicable requirements contained in Article 17.
    - vii. A demonstration that the source or modification will comply with any voluntarily accepted limitations pursuant to R18-2-306.01.
  - b. A compliance schedule as follows:
    - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements
    - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet in a timely manner applicable requirements that become effective during the permit term shall satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement.
    - iii. A schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. Such a schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction non-compliance with, the applicable requirements on which it is based.
  - c. A schedule for submission of certified progress reports no less frequently than every six months for sources required to have a schedule of compliance to remedy a violation.
  - d. The compliance plan content requirements specified in this subsection shall apply and be included in the

- acid rain portion of a compliance plan for an affected source, except as specifically superseded by regulations promulgated under Title IV of the Act and incorporated pursuant to R18-2-333 with regard to the schedule and method the source will use to achieve compliance with the acid rain emissions limitations.
17. Compliance Certification: A certification of compliance with all applicable requirements including voluntarily accepted limitations pursuant to R18-2-306.01 by a responsible official consistent with R18-2-309(A)(5). The certification shall include:
    - a. Identification of the applicable requirements which are the basis of the certification;
    - b. A statement of methods used for determining compliance, including a description of monitoring, recordkeeping, and reporting requirements and test methods;
    - c. A schedule for submission of compliance certifications during the permit term to be submitted no less frequently than annually, or more frequently if specified by the underlying applicable requirement or by the permitting authority; and
    - d. A statement indicating the source's compliance status with any applicable enhanced monitoring and compliance certification requirements.
    - e. A certification of truth, accuracy, and completeness pursuant to R18-2-304(H).
  18. Acid Rain Program Compliance Plan: Sources subject to the Federal acid rain regulations shall use nationally-standardized forms for acid rain portions of permit applications and compliance plans, as required by regulations promulgated under Title IV of the Act and incorporated pursuant to R18-2-333.
  19. A new major source as defined in R18-2-401 or a major modification shall submit all information required in this Appendix and information necessary to show compliance with Article 4 including, but not limited to:
    - a. For sources located in a Non-Attainment Area:
      - i. In the case of a new major source as defined in R18-2-401 or a major modification subject to an emission limitation which is LAER (Lowest Achievable Emission Rate) for that source or facility, the application shall contain a determination of LAER that is consistent with the requirements of the definition of LAER contained in R18-2-401. The demonstration shall contain the data and information relied upon by the applicant in determining the emission limitation that is LAER for the source or facility for which a permit is sought.
      - ii. In the case of a new major source as defined in R18-2-401 or a major modification subject to the demonstration requirement of R18-2-403(A)(2), the applicant shall submit such demonstration in a form that lists and describes all existing major sources owned or operated by the applicant and a statement of compliance with all conditions contained in the permits or conditional orders of each of the sources.
    - iii. In the case of a new major source as defined in R18-2-401 or a major modification subject to the offset requirements described in R18-2-403(A)(3), the applicant shall demonstrate the manner in which the new major source or major modification meets the requirements of R18-2-404.
    - iv. An applicant for a new major source as defined in R18-2-401 or a major modification for volatile organic compounds or carbon monoxide (or both) which will be located in a nonattainment area for photochemical oxidants or carbon monoxide (or both) shall submit the analysis described in R18-2-403(B).
  - b. For sources located in an Attainment Area:
    - i. A demonstration of the manner in which a new major source or major modification which will be located in an attainment area for a pollutant for which the source is classified as a major source as defined in R18-2-401 or the modification is classified as a major modification will meet the requirements of R18-2-406.
    - ii. In the case of a new major source as defined in R18-2-401 or major modification subject to an emission limitation which is BACT (Best Available Control Technology) for that source or facility, the application shall contain a determination of BACT that is consistent with the requirements of the definition of BACT contained in R18-2-101. The demonstration shall contain the data and information relied upon by the applicant in determining the emission limitation that is BACT for the source or facility for which a permit is sought.
    - iii. In the case of a new major source as defined in R18-2-401 or major modification required to perform and submit an air impact analysis in the form prescribed in R18-2-407, such an analysis shall meet the requirements of R18-2-406. Unless otherwise exempted in writing by the Director, the air impact analysis shall include all of the information and data specified in R18-2-407.
    - iv. If an applicant seeks an exemption from any or all of the requirements of R18-2-406, the applicant shall provide sufficient information and data in the application to demonstrate compliance with the requirements of the subsection(s) under which an exemption is sought.
20. Calculations on which all information requested in this Appendix is based.

## Department of Environmental Quality – Air Pollution Control

## STANDARD PERMIT APPLICATION FORM

(As required by A.R.S. § 49-426, and A.A.C. Title 18, Chapter 2, Article 3)

ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY  
OFFICE OF AIR QUALITY

P.O. Box 600 • Phoenix, AZ 85001-0600 • Phone: (602) 207-2338

1. Permit to be issued to: (Business license name of organization that is to receive permit) \_\_\_\_\_
2. Mailing Address: \_\_\_\_\_  
City: \_\_\_\_\_ State: \_\_\_\_\_ ZIP: \_\_\_\_\_
3. Plant Name (if different item #1 above): \_\_\_\_\_
4. Name (or names) of Owner or Operator: \_\_\_\_\_ Phone: \_\_\_\_\_
5. Name of Owner's Agent: \_\_\_\_\_ Phone: \_\_\_\_\_
6. Plant/Site Manager or Contact Person: \_\_\_\_\_ Phone: \_\_\_\_\_
7. Proposed Equipment/Plant Location Address: \_\_\_\_\_  
City: \_\_\_\_\_ County: \_\_\_\_\_ ZIP: \_\_\_\_\_  
Indian Reservation (if applicable): \_\_\_\_\_  
Section/Township/Range, Latitude/Longitude, Elevation: \_\_\_\_\_
8. General Nature of Business: \_\_\_\_\_  
Standard Industrial Classification Code: \_\_\_\_\_
9. Type of Organization:  
☐ Corporation ☐ Individual Owner  
☐ Partnership ☐ Government Entity (Government Facility Code: \_\_\_\_\_)  
☐ Other \_\_\_\_\_
10. Permit Application Basis: ☐ New Source ☐ Revision ☐ Renewal of Existing Permit  
☐ Portable Source ☐ General Permit (Check all that apply.)  
For renewal or modification, include existing permit number: \_\_\_\_\_  
Date of Commencement of Construction or Modification: \_\_\_\_\_  
Is **any** of the equipment to be leased to another individual or entity? ☐ Yes ☐ No
11. Signature of Responsible Official of Organization: \_\_\_\_\_  
Official Title of Signer: \_\_\_\_\_
12. Typed or Printed Name of Signer: \_\_\_\_\_  
Date: \_\_\_\_\_ Telephone Number: \_\_\_\_\_

1. Identify each emission point with a unique number for this plant site, consistent with emission point identification used on plot plan, previous permits, and Emissions Inventory Questionnaire. Include fugitive emissions. Limit emission point number to eight (8) character spaces. For each emission point use as many lines as necessary to list regulated air pollutant data. Typical emission point names are: heater, vent, boiler, tank, reactor, separator, baghouse, fugitive, etc. Abbreviations are O.K.
2. Components to be listed include regulated air pollutants as defined in R18-2-101. Examples of typical component names are: Carbon Monoxide (CO), Nitrogen Oxides (NOx), Sulfur Dioxide (SO<sub>2</sub>), Volatile Organic Compounds (VOC), particulate matter (PM), particulate less than 10 microns (PM<sub>10</sub>), etc. Abbreviations are O.K.

**PAGE 2 OF 2**

Former Appendix 1 repealed, new Appendix 1 adopted effective October 2, 1979 (Supp. 79-5). Amended effective May 28, 1982 (Supp. 82-3). Amended effective September 22, 1983 (Supp. 83-5). Amended effective December 1, 1988 (Supp. 88-4). Appendix 1 repealed, new Appendix 1 adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp. 95-3). The reference to R18-2-101(80) amended to reference R18-2-101(84) (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

**APPENDIX 2. TEST METHODS AND PROTOCOLS**

The following test methods and protocols are approved for use as directed by the Department under this Chapter. These standards are incorporated by reference as applicable requirements revised as of June 28, 2013, and no future editions or amendments. These standards are on file with the Department, and are also available from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

- A. 40 CFR 50;
  - B. 40 CFR 50, all appendices;
  - C. 40 CFR 51, Appendix M, Section IV of Appendix S, and Appendix W;
  - D. 40 CFR 52, Appendices D and E;
  - E. 40 CFR 53;
  - F. 40 CFR 58;
  - G. 40 CFR 58, all appendices;
  - H. 40 CFR 60, all appendices;
  - I. 40 CFR 61, all appendices;
  - J. 40 CFR 63, all appendices;
  - K. 40 CFR 75, all appendices.
  - L. 40 CFR 51.128, Appendix A(1)(B).
  - M. Silt Content Test Method. The purpose of this test method is to estimate the silt content of the trafficked parts of commercial farm roads, as defined in R18-2-610. The higher the silt content, the more fine dust particles that are released when cars and trucks drive on commercial farm roads.
1. Equipment:
    - a. A set of sieves with the following openings: 4 millimeters (mm), 2mm, 1 mm, 0.5 mm and 0.25 mm and a lid and collector pan
    - b. A small whisk broom or paintbrush with stiff bristles and dustpan 1 ft. in width. (The broom/brush should preferably have one, thin row of bristles no longer than 1.5 inches in length.)
    - c. A spatula without holes A small scale with half ounce increments (e.g. postal/package scale)
    - d. A shallow, lightweight container (e.g. plastic storage container)
    - e. A sturdy cardboard box or other rigid object with a level surface
    - f. Basic calculator
    - g. Cloth gloves (optional for handling metal sieves on hot, sunny days)
    - h. Sealable plastic bags (if sending samples to a laboratory)
    - i. Pencil/pen and paper
  2. Step 1: Look for a routinely-traveled surface, as evidenced by tire tracks. [Only collect samples from surfaces that are not wet or damp due to precipitation, dew or watering.] Use caution when taking samples to ensure personal safety with respect to passing vehicles. Gently press the edge of a dustpan (1 foot in width) into the surface four times to mark an area that is 1 square foot. Collect a sample of loose surface material using a whisk broom or brush and slowly sweep the material into the dustpan, minimizing escape of dust particles. Use a spatula to lift heavier elements such as gravel. Only collect dirt/gravel to an approximate depth of 3/8 inch or 1 cm in the 1 square foot area. If you reach a hard, underlying subsurface that is < 3/8 inch in depth, do not continue collecting the sample by digging into the hard surface. In other words, you are only collecting a surface sample of loose material down to 1 cm. In order to confirm that samples are collected to 1 cm. in depth, a wooden dowel

or other similar narrow object at least one foot in length can be laid horizontally across the survey area while a metric ruler is held perpendicular to the dowel. At this point, you can choose to place the sample collected into a plastic bag or container and take it to an independent laboratory for silt content analysis. A reference to the procedure the laboratory is required to follow is in subsection (10) below.

3. Step 2: Place a scale on a level surface. Place a lightweight container on the scale. Zero the scale with the weight of the empty container on it. Transfer the entire sample collected in the dustpan to the container, minimizing escape of dust particles. Weigh the sample and record its weight.
4. Step 3: Stack a set of sieves in order according to the size openings specified above, beginning with the largest size opening (4 mm) at the top. Place a collector pan underneath the bottom (0.25 mm) sieve.  
Step 4: Carefully pour the sample into the sieve stack, minimizing escape of dust particles by slowly brushing material into the stack with a whisk broom or brush. (On windy days, use the trunk or door of a car as a wind barricade.) Cover the stack with a lid. Lift up the sieve stack and shake it vigorously up, down and sideways for at least 1 minute.
5. Step 5: Remove the lid from the stack and disassemble each sieve separately, beginning with the top sieve. As you remove each sieve, examine it to make sure that all of the material has been sifted to the finest sieve through which it can pass; e.g. material in each sieve (besides the top sieve that captures a range of larger elements) should look the same size. If this is not the case, re-stack the sieves and collector pan, cover the stack with the lid, and shake it again for at least 1 minute. (You only need to reassemble the sieve(s) that contain material which requires further sifting.)
6. Step 6: After disassembling the sieves and collector pan, slowly sweep the material from the collector pan into the empty container originally used to collect and weigh the entire sample. Take care to minimize escape of dust particles. You do not need to do anything with material captured in the sieves -- only the collector pan. Weigh the container with the material from the collector pan and record its weight.
7. Step 7: If the source is an unpaved road, multiply the resulting weight by 0.38. If the source is an unpaved parking lot, multiply the resulting weight by 0.55. The resulting number is the estimated silt loading. Then, divide by the total weight of the sample you recorded earlier in Step 2 and multiply by 100 to estimate the percent silt content.
8. Step 8: Select another two routinely-traveled portions of the unpaved road or unpaved parking lot and repeat this test method. Once you have calculated the silt loading and percent silt content of the 3 samples collected, average your results together.
9. Step 9: Examine Results. If the average silt loading is less than 0.33 oz/ft<sup>2</sup>, the surface is STABLE. If the average silt loading is greater than or equal to 0.33 oz/ft<sup>2</sup>, then proceed to examine the average percent silt content. If the source is an unpaved road and the average percent silt content is 6% or less, the surface is STABLE. If the source is an unpaved parking lot and the average percent silt content is 8% or less, the surface is STABLE. If your field test results are within 2% of the standard (for example, 4%-8% silt content on an unpaved road), it is

recommended that you collect 3 additional samples from the source according to Step 1 and take them to an independent laboratory for silt content analysis.

10. Independent Laboratory Analysis: You may choose to collect 3 samples from the source, according to Step 1, and send them to an independent laboratory for silt content analysis rather than conduct the sieve field procedure. If so, the test method the laboratory is required to use comes from the following text: *Procedures For Laboratory Analysis Of Surface/Bulk Dust Loading Samples*, (Fifth Edition, Volume I, Appendix C.2.3 “Silt Analysis”, 1995), AP-42, Office of air Quality Planning & Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina.

#### Historical Note

Former Appendix 2 repealed, new Appendix 2 adopted effective October 2, 1979 (Supp. 79-5). Amended effective May 28, 1982 (Supp. 82-3). Amended effective December 1, 1988 (Supp. 88-4). Repealed effective November 15, 1993 (Supp. 93-4). New Appendix 2 adopted effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3). Amended by final expedited rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

### APPENDIX 3. LOGGING

1. Each log entry required by a change under R18-2-317.02(B) shall include at least the following information:
  - a. A description of the change, including:
    - i. A description of any process change.
    - ii. A description of any equipment change, including both old and new equipment descriptions, model numbers and serial numbers, or any other unique equipment number.
    - iii. A description of any process material change.
  - b. The date and time that the change occurred.
  - c. The provision of R18-2-317.02(B) that authorizes the change to be made with logging.
  - d. The date the entry was made and the first and last name of the person making the entry.
2. Logs shall be kept for five years from the date created. Logging shall be performed in indelible ink in a bound log book with sequentially numbered pages, or in any other form, including electronic format, approved by the Director.

#### Historical Note

Appendix 3 adopted by final rulemaking at 5 A.A.R.

4074, effective September 22, 1999 (Supp. 99-3).

### APPENDIX 4. RESERVED

### APPENDIX 5. REPEALED

#### Historical Note

Appendix 5 repealed effective November 15, 1993 (Supp. 93-4).

### APPENDIX 6. REPEALED

#### Historical Note

Adopted effective August 7, 1975 (Supp. 75-1). Former Appendix 6 repealed, new Appendix 6 adopted effective July 7, 1978 (Supp. 78-4). Former Appendix 6 repealed effective May 14, 1979 (Supp. 79-1).

### APPENDIX 7. REPEALED

#### Historical Note

Adopted effective December 22, 1976 (Supp. 76-5). Former Appendix 7 repealed, new Appendix 7 adopted effective January 8, 1980 (Supp. 80-1). Editorial correction, Instructions for Schedule 2, paragraph (15) (Supp. 80-2). Repealed effective September 26, 1990 (Supp. 90-3).

### A8. APPENDIX 8

#### PROCEDURES FOR UTILIZING THE SULFUR BALANCE METHOD FOR DETERMINING SULFUR EMISSIONS

##### A8.1. Calculating Input Sulfur

Total sulfur input is the sum of the product of the weight of each sulfur bearing material introduced into the smelting process as calculated in A8.1.1. multiplied by the fraction of sulfur contained in that material as calculated in A8.1.2. plus the amount of sulfur contained in fuel utilized in the smelting process as calculated in A8.1.3.

##### A8.1.1. Material Weight

The owner or operator of a copper smelter shall weigh all sulfur-bearing materials, other than fuels, introduced into the smelting process. The weighing shall be subject to the following conditions:

A8.1.1.1. Weight shall be determined on a belt scale, rail or truck scales, or other weighing device.

A8.1.1.2. Weight shall be determined within an accuracy of  $\pm 5\%$ .

A8.1.1.3. All devices or scales used for weighing shall be calibrated to manufacturer's specifications at least once a month.

A8.1.1.4. Sulfur-bearing materials subject to being weighed include concentrate, cement copper, reverbs that are discarded and not part of the internal circulating load and precipitates. Materials such as limestone and silica flux that are mixed with a charge of sulfur bearing materials shall be weighed and reported by the owner or operator.

##### A8.1.2. Sulfur Content

The owner or operator shall calculate the sulfur content of all sulfur-bearing materials introduced into the smelting process using the following steps or an alternative method approved according to A8.4.1.

##### A8.1.2.1. Sampling

The procedures followed by the owner or operator in sampling are dependent upon the input vehicles for the sulfur-bearing material.

##### A8.1.2.1.1. Beltfeed

The smelter owner or operator shall collect a five-pound sample each hour. The owner or operator shall combine hourly samples for a total daily sample.

##### A8.1.2.1.2. Railcar

The smelter owner or operator shall collect a 24-pound sample from each car by the auger method at a minimum of four locations. The owner or operator shall combine each car sample with all other car samples for a total lot sample.

A8.1.2.1.3. Truck

The owner or operator shall collect a 12-pound sample from each truck load. The owner or operator shall take samples at two locations during unloading. If more than one truck delivers a single lot, the samples from each truck shall be combined for a total lot sample.

A8.1.2.2. Sample Preparation

The owner or operator shall prepare each total sample for analysis in the following manner:

A8.1.2.2.1. The sample shall be crushed to minus  $\frac{1}{4}$  inch particles.

A8.1.2.2.2. 2000 gm of the sample shall be split out using a Jones Riffle Splitter or similar device.

A8.1.2.2.3. The 2000 gm sample shall be pulverized to minus 150 mesh.

A8.1.2.2.4. The pulverized mass shall be mixed using a rolling cloth.

A8.1.2.2.5. 500 gm shall be split out for sample analysis.

A8.1.2.3. Sample Analysis

A8.1.2.3.1. The owner or operator shall analyze the sample to determine sulfur content using the Barium Sulfate ( $\text{BaSO}_4$ ) Gravimetric Method according to A8.4.3. The analysis shall be accurate to within  $\pm 1\%$ .

A8.1.2.3.2. For purposes of comparison, the owner or operator shall analyze the sample for copper content using the Potassium Iodide (KI) Titration Method according to A8.4.3. The analysis shall be accurate to within  $\pm 1\%$ .

A8.1.3. Fuel Sulfur Content

The owner or operator shall calculate sulfur in fuels by multiplying the amount of fuel that enters the process by the fraction of sulfur in the fuel, as reported to the smelter operator by the fuel's supplier. The sulfur content determination shall be accurate to within  $\pm 5\%$ .

A8.2. Calculating Removed Sulfur

Total removed sulfur is the sum of the removed sulfur in each of the following products as determined by each process set forth below, or by other processes approved according to A8.4.1.

A8.2.1. Furnace and Converter Slags

A8.2.1.1. The owner or operator shall determine the weight of each slag using a scale with an accuracy within  $\pm 5\%$ .

A8.2.1.2. The owner or operator shall collect a five-pound sample from each slag pot during tapping operations.

A8.2.1.3. The owner or operator shall prepare the sample and determine the amount of sulfur and copper using the procedures specified in A8.1.2.2. and A8.1.2.3.

A8.2.2. Dust Collection Equipment Dusts

A8.2.2.1. After the owner or operator collects the dust and places it in a rail car or truck they shall weigh it using a scale with an accuracy within  $\pm 5\%$ .

A8.2.2.2. The owner or operator shall sample the dust and prepare and analyze a sample for sulfur and copper using the procedures specified in A8.1.2.1., A8.1.2.2., and A8.1.2.3.

A8.2.3. Strong Acids

A8.2.3.1. The owner or operator shall take an inventory of strong acids daily by means of a manometer or sight glass, and increase the inventory by the amounts of acid shipped or otherwise transferred during that day.

A8.2.3.2. The owner or operator shall ensure the daily inventory will be accurate to within  $\pm 5\%$ .

A8.2.3.3. The owner or operator shall take a sample of each batch of the inventoried acid and analyze the sample for sulfur, according to the procedures in A8.1.2.3.

A8.2.4. Weak Acids

A8.2.4.1. The owner or operator shall determine the amount of weak acid discharged from an acid plant and scrubber systems by a time volumetric method of measurement in gallons per minute and to an accuracy of within  $\pm 20\%$ .

A8.2.4.2. The owner or operator shall analyze a 500 ml sample of the weak acid daily for sulfur content according to the procedures in A8.1.2.3.

A8.2.5. Sulfur in Copper Production

A8.2.5.1. The owner or operator shall determine the weight of copper produced by weight of copper cast to an accuracy of within  $\pm 5\%$ .

A8.2.5.2. The owner or operator shall record the weight and number of castings.

A8.2.5.3. The owner or operator shall obtain a sample of the copper, either by the grab sample method while casting, or by the use of at least three drill holes on a representative casting from each charge.

A8.2.5.4. The owner or operator shall obtain at least one sample from each charge.

A8.2.5.5. The owner or operator shall analyze each sample for sulfur content using the Barium Sulfate ( $\text{BaSO}_4$ ) Gravimetric Method according to A8.4.3. The analysis shall be accurate to within  $\pm 50\%$ .

A8.2.6. Materials in Process

A8.2.6.1. The owner or operator shall determine the total tonnage of materials in process by physical inventory on the first or last day of each month.

A8.2.6.2. The owner or operator shall calculate a monthly change in in-process inventory for each material in process by taking the difference between the inventory from each material in process on the first or last day of the preceding month and multiplying that difference by the monthly composite sulfur assay for that material.

A8.2.6.3. The change in monthly in-process inventory shall be accurate to within  $\pm 50\%$ .

A8.3. Sulfur Dioxide Emissions Monitoring

A8.3.1. The sulfur dioxide emissions monitoring and recording system required under R18-2-715.01(K) through R18-2-715.01(N) shall meet the following specifications:

A8.3.1.1. The monitoring system shall be capable of continuously monitoring sulfur dioxide emissions with an accuracy of within  $\pm 20\%$  and a confidence level of 95%.

A8.3.1.2. The owner or operator shall operate and calibrate the sulfur dioxide emission monitoring and recording equipment according to manufacturer's specifications for the equipment except that calibration shall be done at least once every 24 hours.

A8.3.2. The sulfur removal equipment bypass monitoring required under R18-2-715.01(Q) shall consist of a detector and recorder system capable of producing a permanent record of all periods that the bypass is in operation.

A8.4. General Provisions

A8.4.1. For purposes of this Appendix, an approved alternative method, process, or procedure, must be approved in writing by the Director and the U.S. Environmental Protection Agency.

A8.4.2. The processes and procedures specified in this Appendix shall be available for inspection, review and verification by the Department at all reasonable times.

A8.4.3. The barium sulfate gravimetric test method and potassium iodide titration test method provided in *Standard Methods of Chemical Analysis*, Volume One, *The Elements*, Sixth Edition, N. Howell Furman (ed.), D. Van Nostrand Company, Inc.,

Princeton, New Jersey, 1962, pages 410-411, 1006-1011, and 1342-1343 (and no future editions or amendments) is incorporated by reference and available at the Department.

#### Historical Note

Adopted effective December 22, 1976 (Supp. 76-5). Correction, Appendix 8, A8-2-1.1 (Supp. 77-2). Amended effective May 28, 1982 (Supp. 82-3). Amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 11 A.A.R. 2216, effective July 18, 2005 (Supp. 05-2).

## A9. APPENDIX 9

### MONITORING REQUIREMENTS

- A9.1. Unless otherwise approved by the Director or specified in applicable Sections, the requirements of this Appendix shall apply to all continuous monitoring systems required under applicable Sections.
- A9.2. All continuous monitoring systems and monitoring devices shall be installed and operational prior to conducting performance tests under rule R18-2-312. Verification of operational status shall, as a minimum, consist of the following:
- A9.2.1. For continuous monitoring systems referenced in A9.3.1. below, completion of the conditioning period specified by applicable requirements in the Arizona Testing Manual and 40 CFR 60.
- A9.2.2. For continuous monitoring systems referenced in A9.3.2. below, completion of seven days of operation.
- A9.2.3. For monitoring devices referenced in other applicable Sections, completions of the manufacturer's written requirements or recommendations for checking the operation or calibration of the device.
- A9.3. During any performance tests required under rule R18-2-312 or within 30 days thereafter and at such other times as may be required by the Director, the owner or operator of any affected facility shall conduct continuous monitoring system performance evaluations and furnish the Director within 60 days thereof, 2, or upon request, more copies of a written report of the results of such tests. The continuous monitoring system performance evaluations shall be conducted in accordance with the following specifications and procedures:
- A9.3.1. Continuous monitoring systems listed within this subsection, except as provided in A9.3.2. below shall be evaluated in accordance with the requirements and procedures contained in the applicable performance specification of the Arizona Testing Manual and 40 CFR 60.
- A9.3.1.1. Continuous monitoring systems for measuring opacity of emissions shall comply with Performance Specification 1.
- A9.3.1.2. Continuous monitoring systems for measuring nitrogen oxides emissions shall comply with Performance Specification 2.
- A9.3.1.3. Continuous monitoring systems for measuring sulfur dioxide emissions shall comply with Performance Specification 2.
- A9.3.1.4. Continuous monitoring systems for measuring the oxygen content or carbon dioxide content of effluent gases shall comply with Performance Specification 3.
- A9.3.2. An owner or operator who, prior to September 11, 1974, entered into a binding contractual obligation to purchase specific continuous monitoring system components except as referenced by A9.3.2.3. below shall comply with the following requirements:
- A9.3.2.1. Continuous monitoring systems for measuring opacity of emissions shall be capable of measuring emission levels within  $\pm 20\%$ . The Calibration Error Test and associated calculation procedures set forth in Performance Specification 1 of 40 CFR 60, Appendix B shall be used for demonstrating compliance with this specification.
- A9.3.2.2. Continuous monitoring systems for measurement of nitrogen oxides or sulfur dioxide shall be capable of measuring emission levels within  $\pm 20\%$  with a confidence level of 95%. The Calibration Error Test, the Field Test for Accuracy (Relative), and associated operating and calculation procedures set forth in Performance Specification 2 of 40 CFR 60, Appendix B shall be used for demonstrating compliance with this specification.
- A9.3.2.3. Owners or operators of all continuous monitoring systems installed on an affected facility prior to October 6, 1975, are not required to conduct tests under A9.3.2.1. and/or A9.3.2.2. above unless requested by the Director.
- A9.3.3. All continuous monitoring systems referenced by A9.3.2. above shall be upgraded or replaced (if necessary) with new continuous monitoring systems, and such improved systems shall be demonstrated to comply with applicable performance specifications under A9.3.1. above by September 11, 1979.
- A9.4. Owners or operators of all continuous monitoring systems installed in accordance with the provisions of these rules shall check the zero and span drift at least once daily in accordance with the method prescribed by the manufacturer of such systems unless the manufacturer recommends adjustments at shorter intervals, in which case such recommendations shall be followed. The zero and span shall, as a minimum, be adjusted whenever the 24-hour zero drift or 24-hour calibration drift limits of the applicable performance specifications in 40 CFR 60, Appendix B are exceeded. For continuous monitoring systems measuring opacity of emissions, the optical surfaces exposed to the effluent gases shall be cleaned prior to performing the zero or span drift adjustments except that for systems using automatic zero adjustments, the optical surfaces shall be cleaned when the cumulative automatic zero compensation exceeds 4% opacity. Unless otherwise approved by the Director, the following procedures, as applicable, shall be followed:
- A9.4.1. For extractive continuous monitoring systems measuring gases, minimum procedures shall include introducing applicable zero and span gas mixtures into the measurement system as near the probe as practical. Span and zero gases certified by their manufacturer to be traceable to the National Bureau of Standards reference gases will be used whenever these reference gases are available. The span and zero gas mixtures shall be the same composition as specified in the 40 CFR 60, Appendix B. Every six months from date of manufacture, span and zero gases shall be re-analyzed by conducting triplicate analyses with Reference Methods 6 for SO<sub>2</sub>, 7 for NO<sub>x</sub> and 3 for O<sub>2</sub> and CO<sub>2</sub>, respectively. The gases may be analyzed at less frequent intervals if longer shelf lives are guaranteed by the manufacturer.
- A9.4.2. For nonextractive continuous monitoring systems measuring gases, minimum procedures shall include upscale check(s) using a certified calibration gas cell or test cell which is functionally equivalent to a known gas concentration. The zero check may be performed by computing the zero value from upscale measurements or by mechanically producing a zero condition.
- A9.4.3. For continuous monitoring systems measuring opacity of emissions, minimum procedures shall include a method for producing a simulated zero opacity condition and an upscale (span) opacity condition using a certified neutral density filter or other related technique to produce a known obscuration of the light beam. Such procedures shall provide a system check of the analyzer internal optical surfaces and all electronic circuitry including the lamp and photodetector assembly.

- A9.5. Except for system breakdowns, repairs, calibration checks, and zero and span adjustments required under A9.4. above, all continuous monitoring systems shall be in continuous operation and shall meet minimum frequency of operation requirements as follows:
- A9.5.1. All continuous monitoring systems referenced by A9.3.1. and A9.3.2. above for measuring opacity of emissions shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive 10-second period.
- A9.5.2. All continuous monitoring systems referenced by A9.3.1. above for measuring oxides of nitrogen, sulfur dioxide, carbon dioxide, or oxygen shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive 15-minute period.
- A9.5.3. All continuous monitoring systems referenced by A9.3.2. above, except opacity, shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive one-hour period.
- A9.6. All continuous monitoring systems for monitoring devices shall be installed such that representative measurements of emissions or process parameters from the affected facility are obtained. Additional procedures for location of continuous monitoring systems contained in the applicable Performance Specifications of 40 CFR 60, Appendix B shall be used.
- A9.7. When the effluents from a single affected facility or two or more affected facilities subject to the same emission standards are combined before being released to the atmosphere, the owner or operator may install applicable continuous monitoring systems on each effluent or on the combined effluent. When the affected facilities are not subject to the same emission standards, separate continuous monitoring systems shall be installed on each effluent. When the effluent from one affected facility is released to the atmosphere through more than one point, the owner or operator shall install applicable continuous monitoring systems on each separate effluent unless the installation of fewer systems is approved by the Director.
- A9.8. Owners or operators of all continuous monitoring systems for measurement of opacity shall reduce all data to six-minute averages and for systems other than opacity to one-hour averages, respectively. Six minute opacity averages shall be calculated from 24 or more data points equally spaced over each six-minute period. For systems other than opacity, one-hour averages shall be computed from four or more data points equally spaced over each one-hour period. Data recorded during periods of system breakdowns, repairs, calibration checks, and zero and span adjustments shall not be included in the data averages computed under this subsection. An arithmetic or integrated average of all data may be used. The data output of all continuous monitoring systems may be recorded in reduced or nonreduced form (e.g. ppm pollutant and percent O<sub>2</sub> or lb/million Btu of pollutant). All excess emissions shall be converted into units of the standard using the applicable conversion procedures specified in subparts. After conversion into units of the standard, the data may be rounded to the same number of significant digits used in these rules to specify the applicable standard (e.g., rounded to the nearest 1% opacity).
- A9.9. Upon written application by an owner or operator, the Director may approve alternatives to any monitoring procedures or requirements of these rules including, but not limited to the following:
- A9.9.1. Alternative monitoring requirements when installation of a continuous monitoring system or monitoring device specified by these rules would not provide accurate measurements due to liquid water or other interferences caused by substances with the effluent gases.
- A9.9.2. Alternative monitoring requirements when the affected facility is infrequently operated.
- A9.9.3. Alternative monitoring requirements to accommodate continuous monitoring systems that require additional measurements to correct for stack moisture conditions.
- A9.9.4. Alternative locations for installing continuous monitoring systems or monitoring devices when the owner or operator can demonstrate that installation at alternate locations will enable accurate and representative measurements.
- A9.9.5. Alternative methods of converting pollutant concentration measurements to units of the standards.
- A9.9.6. Alternative procedures for performing daily checks of zero and span drift that do not involve use of span gases or test cells.
- A9.9.7. Alternatives to the ASTM test methods or sampling procedures specified by any subpart.
- A9.9.8. Alternative continuous monitoring systems that do not meet the design or performance requirements in Performance Specification 1 in 40 CFR 60, Appendix B but adequately demonstrate a definite and consistent relationship between its measurements and the measurements of opacity by a system complying with the requirements in Performance Specification 1. The Director may require that such demonstration be performed for each affected facility.
- A9.9.9. Alternative monitoring requirements when the effluent from a single affected facility or the combined effluent from two or more affected facilities are released to the atmosphere through more than one point.
- Historical Note**  
Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 26, 1990 (Supp. 90-3). Amended effective June 15, 1995 (Supp. 95-2).
- APPENDIX 10. REPEALED**
- Historical Note**  
Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended effective June 19, 1981 (Supp. 81-3). Repealed by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).
- APPENDIX 11. REPEALED**
- Historical Note**  
Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 11, 1983 (Supp. 83-5). Repealed by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).
- A12. APPENDIX 12**
- PROCEDURES FOR DETERMINING AMBIENT AIR CONCENTRATIONS FOR HAZARDOUS AIR POLLUTANTS**
- A12.1 The procedure described in this appendix shall be used to develop chronic ambient air concentrations (CAACs) and acute ambient air concentrations (AAACs) for hazardous air pollutants (HAPs) for the following:
- A12.1.1 Any HAP not included in Article 17, Table 3; and
- A12.1.2 Any compound included in a group of HAPs listed in Article 17, Table 3, other than those identified in the group listing as the “selected” compound.
- A12.2 Chronic Ambient Air Concentrations
- A12.2.1 The applicant shall review the following data sources and, except as otherwise provided, shall give them the priority indicated in the development of CAACs:

- A12.2.1.1 Tier 1 Data Sources: Reference Concentrations (RfCs) and air Unit Risk Factors (URFs) as presented in the Integrated Risk Information System (IRIS) of the United States Environmental Protection Agency (EPA).
- A12.2.1.2 Tier 2 Data Sources:
- A12.2.1.2.1 Preliminary Remediation Goals (PRGs) developed by Region 9 of EPA.
- A12.2.1.2.2 Risk-Based Concentrations (RBCs) developed by Region 3 of EPA.
- A12.2.1.3 Tier 3 Data Sources:
- A12.2.1.3.1 Minimal Risk Levels (MRLs) developed by the Agency for Toxic Substances and Disease Registry (ATSDR).
- A12.2.1.3.2 Reference Exposure Levels (RELs) and Unit Risk Factors (CalURFs) developed by the California Environmental Protection Agency.
- A12.2.2 Evaluation of Tier 1 Values
- A12.2.2.1 Calculation of Concentrations
- A12.2.2.1.1 RfCs shall be multiplied by 1.04 to reflect an assumed exposure of 350, rather than 365 days per year.
- A12.2.2.1.2 URFs shall be transformed into concentrations in milligrams per cubic meter (mg/m<sup>3</sup>) by applying the following equation:  

$$TR \times ATc / (EF \times IFA \text{ adj} \times [URF \times BW / IR])$$
 where: TR = 1E-06, ATc = 25,550 days, EF = 350 days/year, IFA adj = 11 m<sup>3</sup>-year/kg-day, BW = 70 kg, IR = 20 m<sup>3</sup>/day
- A12.2.2.2 Comparison to Tier 2 and Tier 3 Concentrations  
 The concentration developed in accordance with section A12.2.2.1 shall be compared to the Tier 2 and Tier 3 concentrations for the compound, if any. URF-based concentrations shall be compared only to concentrations based on CalURFs. RfC-based concentrations shall be compared to concentrations based on PRGs, RBCs, MRLs and RELs.
- A12.2.2.2.1 If there is reasonable agreement between the Tier 1 concentration and the other concentrations for the compound, the Tier 1 concentration shall be selected as the CAAC.
- A12.2.2.2.2 If the Tier 1 concentration is not in reasonable agreement with the other concentrations, and one of the other concentrations is based on more recent or relevant studies, that concentration shall be selected as the CAAC. Otherwise the Tier 1 concentration shall be selected.
- A12.2.2.3 If both an RfC-based and URF-based Tier 1 concentration is selected under section A12.2.2.2, the more stringent of the two shall be used as the CAAC.
- A12.2.2.4 If a Tier 1 value is selected in accordance with this section, no further evaluation of Tier 2 or Tier 3 concentrations is required.
- A12.2.3 Evaluation of Tier 2 Concentrations
- A12.2.3.1 Selection of Tier 2 Values for Further Evaluation
- A12.2.3.1.1 If there is only a PRG or RBC for the compound, it shall be selected for further evaluation in accordance with section A12.2.3.2.
- A12.2.3.1.2 If there is both a PRG and an RBC for the compound, the concentrations shall be compared. If the concentrations are similar, the PRG shall be selected for further evaluation. If the concentrations are not similar, and the RBC is based on more relevant or more recent studies, it shall be selected for further evaluation. Otherwise the PRG shall be selected.
- A12.2.3.2 Comparison to Tier 3 Concentrations  
 The concentration developed in accordance with section A12.2.3.1 shall be compared to the Tier 3 concentrations for the compound, if any. For purposes of this comparison, only MRL- or REL-based concentrations shall be considered.
- A12.2.3.2.1 If there is reasonable agreement between the Tier 2 concentration and the Tier 3 concentrations for the compound, the Tier 2 concentration shall be selected as the CAAC.
- A12.2.3.2.2 If the Tier 2 concentration is not in reasonable agreement with the Tier 3 concentrations, and one of the Tier 3 concentrations is based on more recent or relevant studies, that concentration shall be selected as the CAAC. Otherwise the Tier 2 concentration shall be selected.
- A12.2.3.3 If a Tier 2 concentration is selected in accordance with section A12.2.3, no further evaluation of Tier 3 concentrations is required.
- A12.2.4 Evaluation of Tier 3 Values
- A12.2.4.1 Calculation of Concentrations
- A12.2.4.1.1 MRLs and RELs shall be multiplied by 1.04 to reflect an assumed exposure of 350, rather than 365, days per year.
- A12.2.4.1.2 CalURFs shall be transformed into concentrations in milligrams per cubic meter (mg/m<sup>3</sup>) by applying the following equation:  

$$TR \times ATc / (EF \times IFA \text{ adj} \times [CalURF \times BW / IR])$$
 where: TR = 1E-06, ATc = 25,550 days, EF = 350 days/year, IFA adj = 11 m<sup>3</sup>-year/kg-day, BW = 70 kg, IR = 20 m<sup>3</sup>/day
- A12.2.4.2 Selection of Concentration
- A12.2.4.2.1 If both an MRL and an REL exist for the compound, the most appropriate shall be selected after considering the relevance and timing of the studies on which the levels are based.
- A12.2.4.2.2 If there is both a CalURF-based concentration and a concentration based on an MRL or REL for the compound, the more stringent of the two shall be selected.
- A12.2.5 No Available Data  
 If there is no data available in any of the sources identified in section A12.2.1 for the compound, the applicant must perform a Tier 4 Risk Management Analysis under R18-2-1708 or forego the Risk Management Analysis option.
- A12.3 Acute Ambient Air Concentrations
- A12.3.1 Selection of Concentration  
 The first concentration identified by evaluating the following data sources in the order listed shall be adjusted, where required, and used as the AAAC for the compound:
- A12.3.1.1 The level 2, four-hour average Acute Exposure Guideline Level developed by the EPA Office of Prevention, Pesticides and Toxic Substances.
- A12.3.1.2 The level 2 Emergency Response Planning Guideline (ERPG) developed by the American Industrial Hygiene Association. The AAAC shall be the ERPG divided by 2.
- A12.3.1.3 The level 2 Temporary Emergency Exposure Limit (TEEL) developed by the United States Department of Energy's Emergency Management Advisory Committee's Subcommittee on Consequence Assessment and Protective Action. The AAAC shall be the TEEL divided by 2.
- A12.3.2 No Available Data  
 If there is no data available in any of the sources identified in section A12.3.1, the applicant must perform a Tier 4 Risk Management Analysis under R18-2-1708 or forego the Risk Management Analysis option.

**Historical Note**

New Appendix 12 made by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

**APPENDIX 13. REPEALED****Historical Note**

New Appendix 13 made by final rulemaking at 14 A.A.R. 2404, effective July 8, 2008 (Supp. 08-2). Appendix repealed by final rulemaking at 18 A.A.R. 250, effective January 10, 2012 (Supp. 12-1).

## **Replacement Check List**

For rules filed within the

4th Quarter

October 1 – December 31, 2016

# **THE ARIZONA ADMINISTRATIVE CODE**

Within the stated calendar quarter, this Chapter contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law.

These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information.

Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

## **PUBLISHER**

**Arizona Department of State**

**Office of the Secretary of State, Public Services Division**

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
PUBLIC SERVICES DIVISION  
December 31, 2016

---

### RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

### ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2016 is cited as Supp. 16-1.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

### ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

### HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, [www.azsos.gov/services/legislative-filings](http://www.azsos.gov/services/legislative-filings).

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

### PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

*Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.*

**TITLE 18. ENVIRONMENTAL QUALITY****CHAPTER 11. DEPARTMENT OF ENVIRONMENTAL QUALITY - WATER QUALITY STANDARDS****ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS**

*Tables in Article 1, Appendix A have been updated and now include historical notes (Supp. 16-4).*

*Article 1, consisting of Appendices A through C, repealed April 24, 1996 (Supp. 96-2).*

*Article 1, consisting of Section R18-11-103, reserved effective April 24, 1996 (Supp. 96-2).*

*Article 1, consisting of Sections R18-11-105 and R18-11-106, and Appendices A and B, adopted April 24, 1996 (Supp. 96-2).*

*Article 1, consisting of Sections R18-11-101 and R18-11-102, R18-11-104, R18-11-107 through R18-11-109, R18-11-111 through R18-11-113, R18-11-115, R18-11-117 and R18-11-118, R18-11-120 and R18-11-121, amended effective April 24, 1996 (Supp. 96-2).*

*Article 1, consisting of Sections R18-11-101 through R18-11-121 and Appendices A through C, adopted effective February 18, 1992 (Supp. 92-1).*

*Article 1, consisting of Section R18-11-101, repealed effective February 18, 1992 (Supp. 92-1).*

*Article 1 consisting of Section R9-21-101 renumbered as Article 1, Section R18-11-101 (Supp. 87-3).*

## ARTICLE 1. WATER QUALITY STANDARDS FOR SURFACE WATERS

### R18-11-101. Definitions

The following terms apply to this Article:

1. “Acute toxicity” means toxicity involving a stimulus severe enough to induce a rapid response. In aquatic toxicity tests, an effect observed in 96 hours or less is considered acute.
2. “Agricultural irrigation (AgI)” means the use of a surface water for crop irrigation.
3. “Agricultural livestock watering (AgL)” means the use of a surface water as a water supply for consumption by livestock.
4. “Annual mean” is the arithmetic mean of monthly values determined over a consecutive 12-month period, provided that monthly values are determined for at least three months. A monthly value is the arithmetic mean of all values determined in a calendar month.
5. “Aquatic and wildlife (cold water) (A&Wc)” means the use of a surface water by animals, plants, or other cold-water organisms, generally occurring at an elevation greater than 5000 feet, for habitation, growth, or propagation.
6. “Aquatic and wildlife (effluent-dependent water) (A&Wedw)” means the use of an effluent-dependent water by animals, plants, or other organisms for habitation, growth, or propagation.
7. “Aquatic and wildlife (ephemeral) (A&We)” means the use of an ephemeral water by animals, plants, or other organisms, excluding fish, for habitation, growth, or propagation.
8. “Aquatic and wildlife (warm water) (A&Ww)” means the use of a surface water by animals, plants, or other warm-water organisms, generally occurring at an elevation less than 5000 feet, for habitation, growth, or propagation.
9. “Arizona Pollutant Discharge Elimination System (AZPDES)” means the point source discharge permitting program established under 18 A.A.C. 9, Article 9.
10. “Assimilative capacity” means the difference between the baseline water quality concentration for a pollutant and the most stringent applicable water quality criterion for that pollutant.
11. “Clean Water Act” means the Federal Water Pollution Control Act [33 U.S.C. 1251 to 1387].
12. “Criteria” means elements of water quality standards that are expressed as pollutant concentrations, levels, or narrative statements representing a water quality that supports a designated use.
13. “Critical flow condition” means the lowest flow over seven consecutive days that has a probability of occurring once in 10 years (7 Q 10).
14. “Deep lake” means a lake or reservoir with an average depth of more than 6 meters.
15. “Designated use” means a use specified in Appendix B of this Article for a surface water.
16. “Domestic water source (DWS)” means the use of a surface water as a source of potable water. Treatment of a surface water may be necessary to yield a finished water suitable for human consumption.
17. “Effluent-dependent water (EDW)” means a surface water, classified under R18-11-113, that consists of a point source discharge of wastewater. An effluent-dependent water is a surface water that, without the point source discharge of wastewater, would be an ephemeral water.
18. “Ephemeral water” means a surface water that has a channel that is at all times above the water table and flows only in direct response to precipitation.
19. “Existing use” means a use attained in the waterbody on or after November 28, 1975, whether or not it is included in the water quality standards.
20. “Fish consumption (FC)” means the use of a surface water by humans for harvesting aquatic organisms for consumption. Harvestable aquatic organisms include, but are not limited to, fish, clams, turtles, crayfish, and frogs.
21. “Full-body contact (FBC)” means the use of a surface water for swimming or other recreational activity that causes the human body to come into direct contact with the water to the point of complete submergence. The use is such that ingestion of the water is likely and sensitive body organs, such as the eyes, ears, or nose, may be exposed to direct contact with the water.
22. “Geometric mean” means the  $n$ th root of the product of  $n$  items or values. The geometric mean is calculated using the following formula:
 
$$GM_Y = \sqrt[n]{(Y_1)(Y_2)(Y_3)\dots(Y_n)}$$
23. “Hardness” means the sum of the calcium and magnesium concentrations, expressed as calcium carbonate ( $\text{CaCO}_3$ ) in milligrams per liter.
24. “Igneous lake” means a lake located in volcanic, basaltic, or granite geology and soils.
25. “Intermittent water” means a stream or reach that flows continuously only at certain times of the year, as when it receives water from a spring or from another surface source, such as melting snow.
26. “Mixing zone” means an area or volume of a surface water that is contiguous to a point source discharge where dilution of the discharge takes place.
27. “Oil” means petroleum in any form, including crude oil, gasoline, fuel oil, diesel oil, lubricating oil, or sludge.
28. “Outstanding Arizona water (OAW)” means a surface water that is classified as an outstanding state resource water by the Director under R18-11-112.
29. “Partial-body contact (PBC)” means the recreational use of a surface water that may cause the human body to come into direct contact with the water, but normally not to the point of complete submergence (for example, wading or boating). The use is such that ingestion of the water is not likely and sensitive body organs, such as the eyes, ears, or nose, will not normally be exposed to direct contact with the water.
30. “Perennial water” means a surface water that flows continuously throughout the year.
31. “Pollutant” means fluids, contaminants, toxic wastes, toxic pollutants, dredged spoil, solid waste, substances and chemicals, pesticides, herbicides, fertilizers and other agricultural chemicals, incinerator residue, sewage, garbage, sewage sludge, munitions, petroleum products, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and mining, industrial, municipal, and agricultural wastes or any other liquid, solid, gaseous, or hazardous substance. A.R.S. § 49-201(29)
32. “Practical quantitation limit” means the lowest level of quantitative measurement that can be reliably achieved during a routine laboratory operation.
33. “Reference condition” means a set of ecological measurements from a population of relatively undisturbed waterbodies within a region that establish a basis for making comparisons of biological condition among samples.

34. “Regional Administrator” means the Regional Administrator of Region IX of the U.S. Environmental Protection Agency.
35. “Regulated discharge” means a point-source discharge regulated under an AZPDES permit, a discharge regulated by a § 404 permit, and any discharge authorized by a federal permit or license that is subject to state water quality certification under § 401 of the Clean Water Act.
36. “Riffle habitat” means a stream segment where moderate water velocity and substrate roughness produce moderately turbulent conditions that break the surface tension of the water and may produce breaking wavelets that turn the surface water into white water.
37. “Run habitat” means a stream segment where there is moderate water velocity that does not break the surface tension of the water and does not produce breaking wavelets that turn the surface water into white water.
38. “Sedimentary lake” means a lake or reservoir in sedimentary or karst geology and soils.
39. “Shallow lake” means a lake or reservoir, excluding an urban lake, with a smaller, flatter morphology and an average depth of less than 3 meters and a maximum depth of less than 4 meters.
40. “Significant degradation” means:
  - a. The consumption of 20 percent or more of the available assimilative capacity for a pollutant of concern at critical flow conditions, or
  - b. Any consumption of assimilative capacity beyond the cumulative cap of 50 percent of assimilative capacity.
41. “Surface water” means a water of the United States and includes the following:
  - a. A water that is currently used, was used in the past, or may be susceptible to use in interstate or foreign commerce;
  - b. An interstate water, including an interstate wetland;
  - c. All other waters, such as an intrastate lake, reservoir, natural pond, river, stream (including an intermittent or ephemeral stream), creek, wash, draw, mudflat, sandflat, wetland, slough, backwater, prairie pot-hole, wet meadow, or playa lake, the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce, including any such water:
    - i. That is or could be used by interstate or foreign travelers for recreational or other purposes;
    - ii. From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or
    - iii. That is used or could be used for industrial purposes by industries in interstate or foreign commerce;
  - d. An impoundment of a surface water as defined by this definition;
  - e. A tributary of a surface water identified in subsections (41)(a) through (d); and
  - f. A wetland adjacent to a surface water identified in subsections (41)(a) through (e).
42. “Total nitrogen” means the sum of the concentrations of ammonia (NH<sub>3</sub>), ammonium ion (NH<sub>4</sub><sup>+</sup>), nitrite (NO<sub>2</sub>), and nitrate (NO<sub>3</sub>), and dissolved and particulate organic nitrogen expressed as elemental nitrogen.
43. “Total phosphorus” means all of the phosphorus present in a sample, regardless of form, as measured by a persulfate digestion procedure.
44. “Toxic” means a pollutant or combination of pollutants, that after discharge and upon exposure, ingestion, inhalation, or assimilation into an organism, either directly from the environment or indirectly by ingestion through food chains, may cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions (including malfunctions in reproduction), or physical deformations in the organism or its offspring.
45. “Urban lake” means a manmade lake within an urban landscape.
46. “Use attainability analysis” means a structured scientific assessment of the factors affecting the attainment of a designated use including physical, chemical, biological, and economic factors.
47. “Wadeable” means a surface water can be safely crossed on foot and sampled without a boat.
48. “Wastewater” does not mean:
  - a. Stormwater,
  - b. Discharges authorized under the De Minimus General Permit,
  - c. Other allowable non-stormwater discharges permitted under the Construction General Permit or the Multi-sector General Permit, or
  - d. Stormwater discharges from a municipal storm sewer system (MS4) containing incidental amounts of non-stormwater that the MS4 is not required to prohibit.
49. “Wetland” means an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. A wetland includes a swamp, marsh, bog, cienega, tinaja, and similar areas.
50. “Zone of passage” means a continuous water route of volume, cross-sectional area, and quality necessary to allow passage of free-swimming or drifting organisms with no acutely toxic effect produced on the organisms.

#### Historical Note

Former Section R9-21-101 repealed, new Section R9-21-101 adopted effective January 29, 1980 (Supp. 80-1).  
 Amended effective April 17, 1984 (Supp. 84-2).  
 Amended effective January 7, 1985 (Supp. 85-1).  
 Amended by adding subsection (C) effective August 12, 1986 (Supp. 86-4). Former Section R9-21-101 renumbered without change as Section R18-11-101 (Supp. 87-3). Former Section R18-11-101 repealed, new Section R18-11-101 adopted effective February 18, 1992 (Supp. 92-1). Amended effective April 24, 1996 (Supp. 96-2). Deleted first definition to R18-11-101(32) “Navigable Water”, previously printed in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 9 A.A.R. 716, effective April 8, 2003 (Supp. 03-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

#### R18-11-102. Applicability

- A. The water quality standards prescribed in this Article apply to surface waters.
- B. The water quality standards prescribed in this Article do not apply to the following:
  1. A waste treatment system, including an impoundment, pond, lagoon, or constructed wetland that is a part of the waste treatment system;

## Department of Environmental Quality – Water Quality Standards

2. A man-made surface impoundment and any associated ditch and conveyance used in the extraction, beneficiation, or processing of metallic ores that is not a surface water or is located in an area that once was a surface water but is no longer a surface water because it has been and remains legally converted, including:
  - a. A pit,
  - b. Pregnant leach solution pond,
  - c. Raffinate pond,
  - d. Tailing impoundment,
  - e. Decant pond,
  - f. Pond or a sump in a mine pit associated with dewatering activity,
  - g. Pond holding water that has come into contact with a process or product and that is being held for recycling,
  - h. Spill or upset catchment pond, or
  - i. A pond used for onsite remediation;
3. A man-made cooling pond that is neither created in a surface water nor results from the impoundment of a surface water; or
4. A surface water located on tribal lands.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-103. Repealed****Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Repealed effective April 24, 1996 (Supp. 96-2).

**R18-11-104. Designated Uses**

- A. The Director shall adopt or remove a designated use or subcategory of a designated use by rule.
- B. Designated uses of a surface water may include full-body contact, partial-body contact, domestic water source, fish consumption, aquatic and wildlife (cold water), aquatic and wildlife (warm water), aquatic and wildlife (ephemeral), aquatic and wildlife (effluent-dependent water), agricultural irrigation, and agricultural livestock watering. The designated uses for specific surface waters are listed in Appendix B of this Article.
- C. Numeric water quality criteria to maintain and protect water quality for the designated uses are prescribed in Appendix A, R18-11-109, R18-11-110, and R18-11-112. Narrative water quality standards to protect all surface waters are prescribed in R18-11-108.
- D. If a surface water has more than one designated use listed in Appendix B, the most stringent water quality criterion applies.
- E. The Director shall revise the designated uses of a surface water if water quality improvements result in a level of water quality that permits a use that is not currently listed as a designated use in Appendix B.
- F. In designating uses of a surface water and in establishing water quality criteria to protect the designated uses, the Director shall take into consideration the applicable water quality standards for downstream surface waters and shall ensure that the water quality standards that are established for an upstream surface water also provide for the attainment and maintenance of the water quality standards of downstream surface waters.
- G. A use attainability analysis shall be conducted prior to removal of a designated use or adoption of a subcategory of a designated use that requires less stringent water quality criteria.

- H. The Director may remove a designated use or adopt a subcategory of a designated use that requires less stringent water quality criteria, provided the designated use is not an existing use and it is demonstrated through a use attainability analysis that attaining the designated use is not feasible for any of the following reasons:
  1. A naturally-occurring pollutant concentration prevents the attainment of the use;
  2. A natural, ephemeral, intermittent, or low-flow condition or water level prevents the attainment of the use;
  3. A human-caused condition or source of pollution prevents the attainment of the use and cannot be remedied or would cause more environmental damage to correct than to leave in place;
  4. A dam, diversion, or other type of hydrologic modification precludes the attainment of the use, and it is not feasible to restore the surface water to its original condition or to operate the modification in a way that would result in attainment of the use;
  5. A physical condition related to the natural features of the surface water, such as the lack of a proper substrate, cover, flow, depth, pools, riffles, and the like, unrelated to water quality, precludes attainment of an aquatic life designated use; or
  6. Controls more stringent than those required by § 301 (b) and § 306 of the Clean Water Act [33 U.S.C. § 1311 and § 1316] are necessary to attain the use and implementation of the controls would result in substantial and widespread economic and social impact.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

**R18-11-105. Tributaries; Designated Uses**

The following water quality standards apply to a surface water that is not listed in Appendix B but that is a tributary to a listed surface water.

1. The aquatic and wildlife (ephemeral) and partial-body contact standards apply to an unlisted tributary that is an ephemeral water.
2. The aquatic and wildlife (cold water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is above 5000 feet in elevation.
3. The aquatic and wildlife (warm water), full-body contact, and fish consumption standards apply to an unlisted tributary that is a perennial or intermittent surface water and is below 5000 feet in elevation.

**Historical Note**

Adopted effective April 24, 1996 (Supp. 96-2). Section heading amended per instructions of the Department of Environmental Quality, August 9, 1996 (Supp. 96-3).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

**R18-11-106. Net Ecological Benefit**

- A. The Director may, by rule, modify a water quality standard on the ground that there is a net ecological benefit associated with the discharge of effluent to support or create a riparian and aquatic habitat in an area where water resources are limited. The Director may modify a water quality standard for a pollutant if it is demonstrated that:
  1. The discharge of effluent creates or supports an ecologically valuable aquatic, wetland, or riparian ecosystem in an area where these resources are limited;

2. The ecological benefits associated with the discharge of effluent under a modified water quality standard exceed the environmental costs associated with the elimination of the discharge of effluent;
3. The cost of treatment to achieve compliance with a water quality standard is so high that it is more cost effective to eliminate the discharge of effluent to the surface water. The discharger shall demonstrate that it is feasible to eliminate the discharge of effluent that creates or supports the ecologically valuable aquatic, wetland, or riparian ecosystem;
4. The discharge of effluent to the surface water will not cause or contribute to a violation of a water quality standard that has been established for a downstream surface water;
5. All practicable point source discharge control programs, including local pretreatment, waste minimization, and source reduction programs are implemented; and
6. The discharge of effluent does not produce or contribute to the concentration of a pollutant in the tissues of aquatic organisms or wildlife that is likely to be harmful to humans or wildlife through food chain concentration.

- B.** The Director shall not modify a water quality criterion for a pollutant to be less stringent than a technology-based effluent limitation that applies to the discharge of that effluent. The discharge of effluent shall, at a minimum, comply with applicable technology-based effluent limitations.

#### Historical Note

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

#### R18-11-107. Antidegradation

- A.** The Director shall, using R18-11-107.01 and this Section, determine whether there is degradation of water quality in a surface water on a pollutant-by-pollutant basis.
- B.** Tier 1: The level of water quality necessary to support an existing use shall be maintained and protected. No degradation of existing water quality is permitted in a surface water where the existing water quality does not meet the applicable water quality standards.
- C.** Tier 2: Where existing water quality in a surface water is better than the applicable water quality standard the existing water quality shall be maintained and protected. The Director may allow degradation of existing water quality in the surface water, if the Director makes all of the following findings:
1. The water quality necessary for existing uses is fully protected and water quality is not lowered to a level that does not comply with applicable water quality standards,
  2. The highest statutory and regulatory requirements for new and existing point sources are achieved,
  3. All cost-effective and reasonable best management practices for nonpoint source pollution control are implemented, and
  4. Allowing lower water quality is necessary to accommodate important economic or social development in the area where the surface water is located.
- D.** Tier 3: Existing water quality shall be maintained and protected in a surface water that is classified as an OAW under R18-11-112. Degradation of an OAW under subsection (C) is prohibited.
- E.** The Director shall implement this Section in a manner consistent with § 316 of the Clean Water Act [33 U.S.C. 1326] if a potential water quality impairment associated with a thermal discharge is involved.

#### Historical Note

Adopted effective February 18, 1992 (Supp. 92-1).  
Amended effective April 24, 1996 (Supp. 96-2).  
Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

#### R18-11-107.01. Antidegradation Criteria

- A.** Tier 1 antidegradation protection.
1. Tier 1 antidegradation protection applies to the following surface waters:
    - a. A surface water listed on the 303(d) list for the pollutant that resulted in the listing,
    - b. An effluent dependent water,
    - c. An ephemeral water,
    - d. An intermittent water, and
    - e. A canal listed in Appendix B.
  2. A regulated discharge shall not cause a violation of a surface water quality standard or a wasteload allocation in a total maximum daily load approved by EPA.
  3. Except as provided in subsections (E) and (F), Tier 1 antidegradation review requirements are satisfied for a point-source discharge regulated under an individual AZPDES permit to an ephemeral water, effluent dependent water, intermittent water, or a canal listed in Appendix B, if water quality-based effluent limitations designed to achieve compliance with applicable surface water quality standards are established in the permit and technology-based requirements of the Clean Water Act for the point source discharge are met.
- B.** Tier 2 antidegradation protection.
1. Tier 2 antidegradation protection applies to a perennial water with existing water quality that is better than applicable water quality standards. A perennial water that is not listed in subsection (A)(1) nor classified as an OAW under A.A.C. R18-9-112(G) has Tier 2 antidegradation protection for all pollutants of concern.
  2. A regulated discharge that meets the following criteria, at critical flow conditions, does not cause significant degradation:
    - a. The regulated discharge consumes less than 20 percent of the available assimilative capacity for each pollutant of concern, and
    - b. At least 50 percent of the assimilative capacity for each pollutant of concern remains available in the surface water for each pollutant of concern.
  3. Antidegradation review. Any person proposing a new or expanded regulated discharge under an individual AZPDES permit that may cause significant degradation shall provide the Department with the following information:
    - a. Alternative analysis.
      - i. The person seeking authorization for the discharge shall prepare and submit a written analysis of alternatives to the discharge. The analysis shall provide information on all reasonable, cost-effective, less-degrading or non-degrading discharge alternatives. Alternatives may include wastewater treatment process changes or upgrades, pollution prevention measures, source reduction, water reclamation, alternative discharge locations, groundwater recharge, land application or treatment, local pretreatment programs, improved operation and maintenance of existing systems, seasonal or controlled discharge to avoid critical flow conditions, and zero discharge;

## Department of Environmental Quality – Water Quality Standards

- ii. The alternatives analysis shall include cost information on base pollution control measures associated with the regulated discharge and cost information for each alternative;
    - iii. The person shall implement the alternative that is cost-effective and reasonable, results in the least degradation, and is approved by the Director. An alternative is cost-effective and reasonable if treatment costs associated with the alternative are less than a 10 percent increase above the cost of base pollution control measures;
    - iv. For purposes of this subsection, “base pollution control measures” are water pollution control measures required to meet technology-based requirements of the Clean Water Act and water quality-based effluent limits designed to achieve compliance with applicable water quality standards;
  - b. Social and economic justification. The person shall demonstrate to the Director that significant degradation is necessary to accommodate important economic or social development in the local area. The person seeking authorization for the discharge shall prepare a written social and economic justification that includes a description of the following:
    - i. The geographic area where significant degradation of existing water quality will occur;
    - ii. The current baseline social and economic conditions in the local area;
    - iii. The net positive social and economic effects of development associated with the regulated discharge and allowing significant degradation;
    - iv. The negative social, environmental, and economic effects of allowing significant degradation of existing water quality; and
    - v. Alternatives to the regulated discharge that do not significantly degrade water quality yet may yield comparable social and economic benefits;
  - c. Baseline characterization. A person seeking authorization to discharge under an individual AZPDES permit to a perennial water shall provide baseline water quality data on pollutants of concern where no data exist or there are insufficient data to characterize baseline water quality and to determine available assimilative capacity. A discharger shall characterize baseline water quality at a location upstream of the proposed discharge location; and
  - 4. For purposes of this Section, the term “pollutant of concern” means a pollutant with either a numeric or narrative water quality standard.
  - 5. Public participation. The Director shall provide public notice and an opportunity to comment on an antidegradation review under subsection (B)(3) and shall provide an opportunity for a public hearing under A.A.C. R18-9-A908(B).
- C. Tier 3 antidegradation protection.**
- 1. Tier 3 antidegradation protection applies only to an OAW listed in R18-11-112(G).
  - 2. A new or expanded point-source discharge directly to an OAW is prohibited.
  - 3. A person seeking authorization for a regulated discharge to a tributary to, or upstream of, an OAW shall demonstrate in a permit application or in other documentation submitted to the Department that the regulated discharge will not degrade existing water quality in the downstream OAW.
  - 4. A discharge regulated under a § 404 permit that may affect existing water quality of an OAW requires an individual § 401 water quality certification to ensure that existing water quality is maintained and protected and any water quality impacts are temporary. Temporary water quality impacts are those impacts that occur for a period of six months or less.
- D. Antidegradation review of a § 404 permit.** The Director shall conduct the antidegradation review of any discharge authorized under a nationwide or regional § 404 permit as part of the § 401 water quality certification prior to issuance of the nationwide or regional permit. The Director shall conduct the antidegradation review of an individual § 404 permit if the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters. For regulated discharges that may degrade water quality in an OAW or a water that is on the 303(d) List of impaired waters, the Director shall conduct the antidegradation review as part of the § 401 water quality certification process.
- E. Antidegradation review of an AZPDES stormwater permit.** An individual stormwater permit for a municipal separate storm sewer system (MS4) meets antidegradation requirements if the permittee complies with the permit, including developing a stormwater management plan containing controls that reduce the level of pollutants in stormwater discharges to the maximum extent practicable.
- F. Antidegradation review of a general permit.** The Director shall conduct the antidegradation review of a regulated discharge authorized by a general permit at the time the general permit is issued or renewed. A person seeking authorization to discharge under a general permit is not required to undergo an individual antidegradation review at the time the Notice of Intent is submitted unless the discharge may degrade existing water quality in an OAW or a water listed on the 303(d) List of impaired waters.

**Historical Note**

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-108. Narrative Water Quality Standards**

- A.** A surface water shall not contain pollutants in amounts or combinations that:
- 1. Settle to form bottom deposits that inhibit or prohibit the habitation, growth, or propagation of aquatic life;
  - 2. Cause objectionable odor in the area in which the surface water is located;
  - 3. Cause off-taste or odor in drinking water;
  - 4. Cause off-flavor in aquatic organisms;
  - 5. Are toxic to humans, animals, plants, or other organisms;
  - 6. Cause the growth of algae or aquatic plants that inhibit or prohibit the habitation, growth, or propagation of other aquatic life or that impair recreational uses;
  - 7. Cause or contribute to a violation of an aquifer water quality standard prescribed in R18-11-405 or R18-11-406; or
  - 8. Change the color of the surface water from natural background levels of color.
- B.** A surface water shall not contain oil, grease, or any other pollutant that floats as debris, foam, or scum; or that causes a film or iridescent appearance on the surface of the water; or that causes a deposit on a shoreline, bank, or aquatic vegetation. The discharge of lubricating oil or gasoline associated with the normal operation of a recreational watercraft is not a violation of this narrative standard.

## Department of Environmental Quality – Water Quality Standards

- C. A surface water shall not contain a discharge of suspended solids in quantities or concentrations that interfere with the treatment processes at the nearest downstream potable water treatment plant or substantially increase the cost of handling solids produced at the nearest downstream potable water treatment plant.
- D. A surface water shall not contain solid waste such as refuse, rubbish, demolition or construction debris, trash, garbage, motor vehicles, appliances, or tires.
- E. A wadeable, perennial stream shall support and maintain a community of organisms having a taxa richness, species composition, tolerance, and functional organization comparable to that of a stream with reference conditions in Arizona.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended effective April 24, 1996 (Supp. 96-2).  
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-108.01. Narrative Biological Criteria for Wadeable, Perennial Streams**

- A. The narrative biological criteria in this Section apply to a wadeable, perennial stream with either an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The biological standard in R18-11-108(E) is met when a bioassessment result, as measured by the Arizona Index of Biological Integrity (IBI), for cold or warm water is:
  - 1. Greater than or equal to the 25th percentile of reference condition, or
  - 2. Greater than the 10th percentile of reference condition and less than the 25th percentile of reference condition and a verification bioassessment result is greater than or equal to the 25th percentile of reference condition.
- C. Arizona Index of Biological Integrity (IBI) scores:

Bioassessment Result	Index of Biological Integrity Scores	
	A&Wc	A&Ww
Greater than or equal to the 25th percentile of reference condition	≥52	≥50
Greater than the 10th and less than the 25th percentile of reference condition	46 - 51	40 - 49

**Historical Note**

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-108.02. Narrative Bottom Deposit Criteria for Wadeable, Perennial Streams**

- A. The narrative bottom deposit criteria in this Section apply to wadeable, perennial streams with an aquatic and wildlife (cold water) or an aquatic and wildlife (warm water) designated use.
- B. The narrative water quality standard for bottom deposits at R18-11-108(A)(1) is met when:

- 1. The percentage of fine sediments in the riffle habitats of a wadeable, perennial stream with an A&Wc designated use, as determined by a riffle pebble count, is less than or equal to 30 percent.
- 2. The percentage of fine sediments in all stream habitats of a wadeable, perennial stream with an A&Ww designated use, as determined by a reach level pebble count, is equal to or less than 50 percent.

**Historical Note**

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-108.03. Narrative Nutrient Criteria for Lakes and Reservoirs**

- A. The narrative nutrient criteria in this Section apply to those lakes and reservoirs categorized in Appendix B.
- B. The narrative water quality standard for nutrients at R18-11-108(A)(6) is met when, based on a minimum of two lake sample events conducted during the peak season based on lake productivity, the results show an average chlorophyll-*a* value below the applicable threshold for designated use and lake and reservoir category in subsection (D).
  - 1. The mean chlorophyll-*a* concentration is less than the lower value in the target range chlorophyll-*a* for the lake and reservoir category, or
  - 2. The mean chlorophyll-*a* concentration is within the target range for the lake and reservoir category and:
    - a. The mean blue green algae count is at or below 20,000 per milliliter, and
    - b. The blue green algae count is less than 50 percent of the total algae count, and
    - c. There is no evidence of nutrient-related impairments such as:
      - i. An exceedance of dissolved oxygen or pH standards;
      - ii. A fish kill coincident with a dissolved oxygen or pH exceedance;
      - iii. A fish kill or other aquatic organism mortality coincident with algal toxicity;
      - iv. Secchi depth is less than the lower value prescribed for the lake and reservoir category;
      - v. A nuisance algal bloom is present in the limnetic portion of the lake or reservoir; or
      - vi. The concentration of total phosphorous, total nitrogen, or total Kjeldahl nitrogen (TKN) is greater than the upper value in the range prescribed for the lake and reservoir category; or
  - 3. For a shallow lake. In addition to meeting the mean chlorophyll-*a* concentrations in subsections (B)(1) or (2), submerged aquatic vegetation covers 50 percent or less of the lake bottom and there is less than a 5 mg/L swing in diel-dissolved oxygen concentration measured within the photic zone.
- C. The following threshold ranges apply during the peak season for lake productivity:
  - 1. Warm water lakes peak season, April – October;
  - 2. Cold water lakes peak season, May – September.

## Department of Environmental Quality – Water Quality Standards

D. The following table lists the numeric targets for lakes and reservoirs.

NUMERIC TARGETS FOR LAKES AND RESERVOIRS										
Designated Use	Lake Category	Chl- <i>a</i> (µg/L)	Secchi Depth (m)	Total Phosphorus (µg/L)	Total Nitrogen (mg/L)	Total Kjeldhal Nitrogen (TKN) (mg/L)	Blue-Green Algae (per ml)	Blue-Green Algae (% of total count)	Dissolved Oxygen (mg/L)	pH (SU)
FBC and PBC	Deep	10-15	1.5-2.5	70-90	1.2-1.4	1.0-1.1	20,000			6.5-9.0
	Shallow	10-15	1.5-2.0	70-90	1.2-1.4	1.0-1.1				
	Igneous	20-30	0.5-1.0	100-125	1.5-1.7	1.2-1.4				
	Sedimentary	20-30	1.5-2.0	100-125	1.5-1.7	1.2-1.4				
	Urban	20-30	0.5-1.0	100-125	1.5-1.7	1.2-1.4				
A&Wc	All	5-15	1.5-2.0	50-90	1.0-1.4	0.7-1.1		<50	7 (top m)	6.5-9.0
A&Ww	All (except urban lakes)	25-40	0.8-1.0	115-140	1.6-1.8	1.3-1.6			6 (top m)	
	Urban	30-50	0.7-1.0	125-160	1.7-1.9	1.4-1.7				6.5-9.0
A&Wedw	All	30-50	0.7-1.0	125-160	1.7-1.9	1.4-1.7				
DWS	All	10-20	0.5-1.5	70-100	1.2-1.5	1.0-1.2	20,000			5.0-9.0

**Historical Note**

New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-109. Numeric Water Quality Standards**

A. *E. coli* bacteria. The following water quality standards for *Escherichia coli* (*E. coli*) are expressed in colony forming units per 100 milliliters of water (cfu / 100 ml) or as a Most Probable Number (MPN):

<i>E. coli</i>	FBC	PBC
Geometric mean (minimum of four samples in 30 days)	126	126
Single sample maximum	235	575

B. pH. The following water quality standards for pH are expressed in standard units:

pH	DWS	FBC, PBC, A&W <sup>1</sup>	AgI	AgL
Maximum	9.0	9.0	9.0	9.0
Minimum	5.0	6.5	4.5	6.5

C. The maximum allowable increase in ambient water temperature, due to a thermal discharge is as follows:

A&Ww	A&Wedw	A&Wc
3.0° C	3.0° C	1.0° C

D. Suspended sediment concentration.

1. The following water quality standards for suspended sediment concentration, expressed in milligrams per liter (mg/L), are expressed as a median value determined from a minimum of four samples collected at least seven days apart:

A&Wc	A&Ww
25	80

2. The Director shall not use the results of a suspended sediment concentration sample collected during or within 48 hours after a local storm event to determine the median value.

E. Dissolved oxygen. A surface water meets the water quality standard for dissolved oxygen when either:

1. The percent saturation of dissolved oxygen is equal to or greater than 90 percent, or
2. The single sample minimum concentration for the designated use, as expressed in milligrams per liter (mg/L) is as follows:

Designated Use	Single sample minimum concentration in mg/L
----------------	---

A&Ww 6.0

A&Wc 7.0

A&Wedw for a sample taken 3.0

from three hours after sunrise to sunset

A&Wedw for a sample taken 1.0

from sunset to three hours after sunrise

The single sample minimum concentration is the same for the designated use in a lake, but the sample must be taken from a depth no greater than one meter.

F. Nutrient criteria. The following are water quality standards for total phosphorus and total nitrogen (expressed in milligrams per liter (mg/L)) that apply to the surface waters listed below. A minimum of 10 samples, each taken at least 10 days apart in a consecutive 12-month period, are required to determine a 90th percentile. Not more than 10 percent of the samples may exceed the 90th percentile value listed below. The Director will apply these water quality standards for total phosphorus and total nitrogen to a surface water listed below, and to any source discharging to a tributary (ephemeral, intermittent, effluent dependent water or perennial) based on volume, frequency, magnitude and duration of the discharge and distance to the downstream surface water listed below:

## Department of Environmental Quality – Water Quality Standards

1. Verde River and its perennial tributaries from the Verde headwaters to Bartlett Lake:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.10	0.30	1.00
Total nitrogen	1.00	1.50	3.00

2. Black River, Tonto Creek and their perennial tributaries for any segments that are not located on tribal lands:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.10	0.20	0.80
Total nitrogen	0.50	1.00	2.00

3. Salt River and its perennial tributaries above Roosevelt Lake for any segments that are not located on tribal lands:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.12	0.30	1.00
Total nitrogen	0.60	1.20	2.00

4. Salt River below Stewart Mountain Dam to its confluence with the Verde River:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.05	–	0.20
Total nitrogen	0.60	–	3.00

5. Little Colorado River and its perennial tributaries upstream from:

- The headwaters to River Reservoir,
- South Fork of Little Colorado River at 34°00'49"/109°24'18" to above South Fork Campground at 34°04'49"/109°24'18", and
- The headwaters of Water Canyon Creek to the Apache-Sitgreaves National Forest boundary:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.08	0.10	0.75
Total nitrogen	0.60	0.75	1.10

6. From the Little Colorado River and State Route 260 at 34°06'39"/109°18'55" to Lyman Lake:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.20	0.30	0.75
Total nitrogen	0.70	1.20	1.50

7. Colorado River at the Northern International Boundary near Morelos Dam:

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	–	0.33	–
Total nitrogen	–	2.50	–

8. Oak Creek from its headwaters at 35°01'30"/111°44'12" to its confluence with the Verde River and the West Fork of Oak Creek from its headwaters at 35°02'44"/111°54'48" to its confluence with Oak Creek.

Surface Water	Annual Mean	90th Percentile	Single Sample Maximum
Total phosphorus	0.1	0.25	0.30
Total nitrogen	1.00	1.50	2.50

9. No discharge of wastewater to Show Low Creek or its perennial tributaries upstream of and including Fools Hollow Lake shall exceed 0.16 mg/L total phosphates as P.

10. No discharge of wastewater to the San Francisco River or its perennial tributaries upstream of Luna Lake Dam shall exceed 1.0 mg/L total phosphates as P.

**G. Footnotes:**

1. "1" Includes A&Wc, A&Ww, A&Wedw, and A&We.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
Amended effective April 24, 1996 (Supp. 96-2).  
Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

**R18-11-110. Salinity Standards for the Colorado River**

- A.** The flow-weighted average annual salinity in the lower main stem of the Colorado River shall not exceed the following criteria:

Location	Total Dissolved Solids
Below Hoover Dam	723 mg/L
Below Parker Dam	747 mg/L
At Imperial Dam	879 mg/L

- B.** The plan of implementation contained in the "2014 Review, Water Quality Standards for Salinity, Colorado River System," approved October 2014, is incorporated by reference to preserve the basin-wide approach to salinity control developed by the Colorado River Basin Salinity Control Forum and to ensure compliance with the numeric criteria for salinity in subsection (A). This material does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the Colorado River Basin Salinity Control Forum, 106 West 500 South, Suite 101, Bountiful, Utah 84010-6232 or at <http://www.coloradoriversalinity.org/>.

**R18-11-111. Analytical Methods**

- A.** A person conducting an analysis of a sample taken to determine compliance with a water quality standard shall use an analytical method prescribed in A.A.C. R9-14-610, 40 CFR 136.3, or an alternative analytical method approved under A.A.C. R9-14-610(C).

- B.** A test result from a sample taken to determine compliance with a water quality standard is valid only if the sample is analyzed by a laboratory that is licensed by the Arizona Department of Health Services, an out-of-state laboratory licensed under A.R.S. § 36-495.14, or a laboratory exempted under A.R.S. § 36-495.02, for the analysis performed.

## Department of Environmental Quality – Water Quality Standards

rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-112. Outstanding Arizona Waters**

- A.** The Director shall classify a surface water as an outstanding Arizona water (OAW) by rule.
- B.** The Director may adopt, under R18-11-115, a site-specific standard to maintain and protect existing water quality in an OAW.
- C.** Any person may nominate a surface water for classification as an OAW by filing a nomination with the Director. The nomination shall include:
  1. A map and a description of the surface water;
  2. A written statement in support of the nomination, including specific reference to the applicable criteria for an OAW classification prescribed in subsection (D);
  3. Supporting evidence demonstrating that the criteria prescribed in subsection (D) are met; and
  4. Available water quality data relevant to establishing the baseline water quality of the proposed OAW.
- D.** The Director may classify a surface water as an OAW based upon the following criteria:
  1. The surface water is a perennial or intermittent water;
  2. The surface water is in a free-flowing condition. For purposes of this subsection, “in a free-flowing condition” means that a surface water does not have an impoundment, diversion, channelization, rip-rapping or other bank armor, or another hydrological modification within the reach nominated for an OAW classification;
  3. The surface water has good water quality. For purposes of this subsection, “good water quality” means that the surface water has water quality that meets or is better than applicable surface water quality standards. A surface water that is listed as impaired under R18-11-604(E) is ineligible for OAW classification; and
  4. The surface water meets one or both of the following conditions:
    - a. The surface water is of exceptional recreational or ecological significance because of its unique attributes, such as the geology, flora and fauna, water quality, aesthetic value, or the wilderness characteristic of the surface water;
    - b. An endangered or threatened species is associated with the surface water and the existing water quality is essential to the species' maintenance and propagation or the surface water provides critical habitat for the threatened or endangered species. An endangered or threatened species is identified in “Endangered and Threatened Wildlife,” 50 CFR 17.11 (revised 2005), and “Endangered and Threatened Plants,” 50 CFR 17.12 (revised 2005). This material is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007 or may be obtained from the National Archives and Records Administration at <http://www.access.gpo.gov/nara/cfr/cfr-table-search.html#page1>.
- E.** The Director shall hold at least one public meeting in the local area of a surface water that is nominated for classification as an OAW to solicit public comment on the nomination.
- F.** The Director shall consider the following factors when deciding whether to classify a surface water as an OAW:
  1. Whether there is the ability to manage the surface water and its watershed to maintain and protect existing water quality;
  2. The social and economic impact of Tier 3 antidegradation protection;
  3. The public comments in support of, or in opposition to, an OAW classification;
  4. The timing of the nomination relative to the triennial review of surface water quality standards;
  5. The consistency of an OAW classification with applicable water quality management plans; and
  6. Whether the nominated surface water is located within a national or state park, national monument, national recreation area, wilderness area, riparian conservation area, area of critical environmental concern, or it has another special use designation (for example, Wild and Scenic River).
- G.** The following surface waters are classified as OAWs:
  1. The West Fork of the Little Colorado River, from its headwaters to Government Springs (approximately 9.1 river miles);
  2. Oak Creek, from its headwaters to its confluence with the Verde River (approximately 50.3 river miles);
  3. West Fork of Oak Creek, from its headwaters to its confluence with Oak Creek (approximately 15.8 river miles);
  4. Peebles Canyon Creek, from its headwaters to its confluence with the Santa Maria River (approximately 8.1 river miles);
  5. Burro Creek, from its headwaters to its confluence with Boulder Creek (approximately 29.5 miles);
  6. Francis Creek, from its headwaters to its confluence with Burro Creek (approximately 22.9 river miles);
  7. Bonita Creek, from its boundary of the San Carlos Indian Reservation to its confluence with the Gila River (approximately 14.7 river miles);
  8. Cienega Creek, from its confluence with Gardner Canyon to the USGS gaging station (#09484600) (approximately 28.3 river miles);
  9. Aravaipa Creek, from its confluence with Stowe Gulch to the downstream boundary of the Aravaipa Canyon Wilderness Area (approximately 15.5 river miles);
  10. Cave Creek, from its headwaters to the Coronado National Forest boundary (approximately 10.4 river miles);
  11. South Fork of Cave Creek, from its headwaters to its confluence with Cave Creek (approximately 8.6 river miles);
  12. Buehman Canyon Creek, from its headwaters to its confluence with unnamed tributary at 32°24'31"/110°32'08" (approximately 9.8 river miles);
  13. Lee Valley Creek, from its headwaters to Lee Valley Reservoir (approximately 1.6 river miles);
  14. Bear Wallow Creek, from its headwaters to the boundary of the San Carlos Indian Reservation (approximately 4.25 river miles);
  15. North Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
  16. South Fork of Bear Wallow Creek, from its headwaters to its confluence with Bear Wallow Creek (approximately 3.8 river miles);
  17. Snake Creek, from its headwaters to its confluence with the Black River (approximately 6.2 river miles);
  18. Hay Creek, from its headwaters to its confluence with the West Fork of the Black River (approximately 5.5 river miles);

## Department of Environmental Quality – Water Quality Standards

19. Stinky Creek, from the White Mountain Apache Indian Reservation boundary to its confluence with the West Fork of the Black River (approximately 3.0 river miles);
20. KP Creek, from its headwaters to its confluence with the Blue River (approximately 12.7 river miles);
21. Davidson Canyon, from the unnamed spring at 31°59'00"/110°38'49" to its confluence with Cienega Creek; and
22. Fossil Creek, from its headwaters at the confluence of Sandrock and Calf Pen Canyons above Fossil Springs to its confluence with the Verde River (approximately 17.2 river miles).

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended effective April 24, 1996 (Supp. 96-2). Added "water quality standards" to R18-11-112, previously omitted in error (Supp. 96-3). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

**R18-11-113. Effluent-Dependent Waters**

- A. The Director shall classify a surface water as an effluent-dependent water by rule.
- B. The Director may adopt, under R18-11-115, a site-specific water quality standard for an effluent-dependent water.
- C. Any person may submit a petition for rule adoption requesting that the Director classify a surface water as an effluent-dependent water. The petition shall include:
  1. A map and a description of the surface water;
  2. Information that demonstrates that the surface water consists of a point source discharge of wastewater; and
  3. Information that demonstrates that, without a point source discharge of a wastewater, the receiving water is an ephemeral water.
- D. The Director shall use the water quality standards that apply to an effluent-dependent water to derive water quality-based effluent limits for a point source discharge of wastewater to an ephemeral water.
- E. The Director may use aquatic and wildlife (edw) acute standards only to derive water quality based effluent limits for a sporadic, infrequent, or emergency point source discharge to an ephemeral water or to an effluent-dependent water. The Director shall consider the following factors when deciding whether to apply A&Wedw (acute) standards:
  1. The amount, frequency, and duration of the discharge;
  2. The length of time water may be present in the receiving water;
  3. The distance to a downstream water with aquatic and wildlife chronic standards; and
  4. The likelihood of chronic exposure to pollutants.
- F. The Director may establish alternative water quality-based effluent limits in an AZPDES permit based on seasonal differences in the discharge.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended effective December 18, 1992 (Supp. 92-4).  
 Amended effective April 24, 1996 (Supp. 96-2).  
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-114. Mixing Zones**

- A. The Director may establish a mixing zone for a point source discharge to a surface water as a condition of an AZPDES per-

mit. A mixing zone is prohibited in an ephemeral water or where there is no water for dilution.

- B. The owner or operator of a point source seeking the establishment of a mixing zone shall submit a request to the Director for a mixing zone as part of an application for an AZPDES permit. The request shall include:
  1. An identification of the pollutant for which the mixing zone is requested;
  2. A proposed outfall design;
  3. A definition of the boundary of the proposed mixing zone. For purposes of this subsection, the boundary of a mixing zone means the location where the concentration of wastewater across a transect of the surface water differs by less than five percent; and
  4. A complete and detailed description of the existing physical, biological, and chemical conditions of the receiving water and the predicted impact of the proposed mixing zone on those conditions.
- C. The Director shall review the request for a mixing zone to determine whether the written request is complete. If the request is incomplete, the Director shall provide the applicant with a list of the additional information required.
- D. The Director shall consider the following factors when deciding whether to grant or deny a request for a mixing zone:
  1. The assimilative capacity of the receiving water;
  2. The likelihood of adverse human health effects;
  3. The location of drinking water plant intakes and public swimming areas;
  4. The predicted exposure of biota and the likelihood that resident biota will be adversely affected;
  5. Bioaccumulation;
  6. Whether there will be acute toxicity in the mixing zone, and, if so, the size of the zone of initial dilution;
  7. The known or predicted safe exposure levels for the pollutant for which the mixing zone is requested;
  8. The size of the mixing zone;
  9. The location of the mixing zone relative to biologically sensitive areas in the surface water;
  10. The concentration gradient of the pollutant within the mixing zone;
  11. Sediment deposition;
  12. The potential for attracting aquatic life to the mixing zone; and
  13. The cumulative impacts of other mixing zones and other discharges to the surface water.
- E. Director determination.
  1. The Director shall deny a request to establish a mixing zone if a water quality standard will be violated outside the boundaries of the proposed mixing zone. The Director shall notify the owner or operator of the denial in writing and shall state the reason for the denial.
  2. If the Director approves the request to establish a mixing zone, the Director shall establish the mixing zone as a condition of an AZPDES permit. The Director shall include any mixing zone condition in the AZPDES permit that is necessary to protect human health and the designated uses of the surface water.
- F. Any person who is adversely affected by the Director's decision to grant or deny a request for a mixing zone may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- G. The Director shall reevaluate a mixing zone upon issuance, reissuance, or modification of the AZPDES permit for the point source or a modification of the outfall structure.
- H. Mixing zone requirements.

## Department of Environmental Quality – Water Quality Standards

1. The length of a mixing zone shall not exceed 500 meters in a stream.
  2. The total horizontal area allocated to all mixing zones on a lake shall not exceed 10 percent of the surface area of the lake.
  3. Adjacent mixing zones in a lake shall not overlap or be located closer together than the greatest horizontal dimension of the largest mixing zone.
  4. A mixing zone shall provide for a zone of passage of not less than 50 percent of the cross-sectional area of a river or stream.
  5. The design of any discharge outfall shall maximize initial dilution of the wastewater in a surface water.
  6. The size of the zone of initial dilution in a mixing zone shall prevent lethality to organisms passing through the zone of initial dilution.
- I.** The Director shall not establish a mixing zone in an AZPDES permit for the following persistent, bioaccumulative pollutants:
1. Chlordane,
  2. DDT and its metabolites (DDD and DDE),
  3. Dieldrin,
  4. Dioxin,
  5. Endrin,
  6. Endrin aldehyde,
  7. Heptachlor,
  8. Heptachlor epoxide,
  9. Lindane,
  10. Mercury,
  11. Polychlorinated biphenyls (PCBs), and
  12. Toxaphene.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended effective April 24, 1996 (Supp. 96-2).  
 Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-115. Site-Specific Standards**

- A.** The Director shall adopt a site-specific standard by rule.
- B.** The Director may adopt a site-specific standard based upon a request or upon the Director's initiative for any of the following reasons:
1. Local physical, chemical, or hydrological conditions of a surface water such as pH, hardness, fate and transport, or temperature alters the biological availability or toxicity of a pollutant;
  2. The sensitivity of resident aquatic organisms that occur in a surface water to a pollutant differs from the sensitivity of the species used to derive the numeric water quality standards to protect aquatic life in Appendix A;
  3. Resident aquatic organisms that occur in a surface water represent a narrower mix of species than those in the dataset used by the Department to derive numeric water quality standards to protect aquatic life in Appendix A;
  4. The natural background concentration of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A. "Natural background" means the concentration of a pollutant in a surface water due only to non-anthropogenic sources.
  5. Natural adaptive processes have enabled a viable, balanced population of aquatic life to exist in a surface water where the level of a pollutant is greater than the numeric water quality standard to protect aquatic life prescribed in Appendix A; or

6. Other factors or combination of factors that upon review by the Director warrant changing a numeric water quality standard for a surface water.

**C.** Site-specific standard by request. To request that the Director adopt a site-specific standard, a person must conduct a study to support the development of a site-specific standard using a scientifically-defensible procedure.

1. Before conducting the study, a person shall submit a study outline to the Director for approval that contains the following elements:
  - a. Identifies the pollutant;
  - b. Describes the reach's boundaries;
  - c. Uses one of the following procedures, as defined by the most recent EPA guidance documents:
    - i. The recalculation procedure,
    - ii. The water effects ratio for metals,
    - iii. The streamlined water effects ratio, or
    - iv. The Biotic ligand model.
  - d. Demonstrates that all designated uses are protected.
2. Alternatively, a study outline submitted for the Director's approval must contain the following elements:
  - a. Identifies the pollutant;
  - b. Describes the reach's boundaries;
  - c. Describes the hydrologic regime of the waterbody;
  - d. Describes the scientifically-defensible procedure, which can include relevant aquatic life studies, ecological studies, laboratory tests, biological translators, fate and transport models, and risk analyses;
  - e. Describes and compares the taxonomic composition, distribution and density of the aquatic biota within the reach to a reference reach and describes the basis of any major taxonomic differences;
  - f. Describes the pollutant's effect on the affected species or appropriate surrogate species and on the other designated uses listed for the reach;
  - g. Demonstrates that all designated uses are protected; and
  - h. A person seeking to develop a site-specific standard based on natural background may use statistical or modeling approaches to determine natural background concentration. Modeling approaches include Better Assessment Science Integrating Source and Nonpoint Sources (Basins), Hydrologic Simulation Program-Fortran (HSPF), and Hydrologic Engineering Center (HEC) programs developed by the U.S. Army Corps of Engineers.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended effective April 24, 1996 (Supp. 96-2). Section repealed by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). New Section made by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

**R18-11-116. Resource Management Agencies**

Nothing in this Article prohibits fisheries management activities by the Arizona Game and Fish Department or the U.S. Fish and Wildlife Service. This Article does not exempt fish hatcheries from AZPDES permit requirements.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).  
 Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-117. Canals and Urban Park Lakes**

## Department of Environmental Quality – Water Quality Standards

- A. Nothing in this Article prevents the routine physical or mechanical maintenance of canals, drains, and the urban lakes identified in Appendix B. Physical or mechanical maintenance includes dewatering, lining, dredging, and the physical, biological, or chemical control of weeds and algae. Increases in turbidity that result from physical or mechanical maintenance activities are permitted in canals, drains, and the urban lakes identified in Appendix B.
- B. The discharge of lubricating oil associated with the start-up of well pumps that discharge to canals is not a violation of R18-11-108(B).

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-118. Dams and Flood Control Structures**

Increases in turbidity that result from the routine physical or mechanical maintenance of a dam or flood control structure are not violations of this Article. Nothing in this Article requires the release of water from a dam or a flood control structure.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-119. Natural background**

Where the concentration of a pollutant exceeds a water quality standard and the exceedance is not caused by human activity but is due solely to naturally-occurring conditions, the exceedance shall not be considered a violation of the water quality standard.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

**R18-11-120. Enforcement**

- A. Any person who causes a violation of a water quality standard or any provision of this Article is subject to the enforcement provisions in A.R.S. Title 49, Chapter 2, Article 4.
- B. The Department may establish a numeric water quality standard at a concentration that is below the practical quantitation limit. In such cases, the water quality standard is enforceable at the practical quantitation limit.
- C. The Department shall determine compliance with acute aquatic and wildlife criteria from the analytical result of a grab sample. Compliance with chronic aquatic and wildlife criteria shall be determined from the geometric mean of the analytical results of the last four samples taken at least 24 hours apart.
- D. A person is not subject to penalties for violation of a water quality standard provided that the person is in compliance with the provisions of a compliance schedule issued under R18-11-121.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1).

**R18-11-121. Schedules of Compliance**

A compliance schedule in an AZPDES permit shall require the permittee to comply with a discharge limitation based upon a new or revised water quality standard as soon as possible to achieve compliance. The permittee shall demonstrate that all requirements under § 301(b) and § 306 of the Clean Water Act [33 U.S.C. 1311(b) and 1316] are achieved and that the point source cannot

comply with a discharge limitation based upon the new or revised water quality standard through the application of existing water pollution control technology, operational changes, or source reduction. In establishing a compliance schedule, the Director shall consider:

1. How much time the permittee has already had to meet any effluent limitations under a prior permit;
2. The extent to which the permittee has made good faith efforts to comply with the effluent limitations and other requirements in a prior permit;
3. Whether treatment facilities, operations, or measures must be modified to meet the effluent limitations;
4. How long any necessary modifications would take to implement; and
5. Whether the permittee would be expected to use the same treatment facilities, operations or other measures to meet the effluent limitations as it would have used to meet the effluent limitations in a prior permit.

**Historical Note**

Adopted effective February 18, 1992 (Supp. 92-1).

Amended effective April 24, 1996 (Supp. 96-2).

Amended by final rulemaking at 8 A.A.R. 1264, effective

March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4). Amended by final rulemaking at 22 A.A.R. 2328, effective August 2, 2016 (Supp. 16-4).

**R18-11-122. Variances**

- A. The Director shall consider a variance from a water quality standard for a point source discharge if the discharger demonstrates that treatment more advanced than that required to comply with technology-based effluent limitations is necessary to comply with the water quality standard and:
  1. It is not technically feasible to achieve compliance within the next five years,
  2. The cost of the treatment would result in substantial and widespread economic and social impact, or
  3. Human-caused conditions or sources of pollution prevent attainment of the water quality standard and cannot be remedied within the next five years.
- B. If the Director grants a variance for a point source discharge:
  1. The Director shall issue the variance for a fixed term not to exceed five years,
  2. The variance shall apply only on a pollutant-specific basis. The point source discharge shall meet all other applicable water quality standards for which a variance is not granted, and
  3. The variance shall not modify a water quality standard. Other point source discharges to the surface water shall meet applicable water quality standards.
- C. Upon expiration of a variance, a point source discharger shall either comply with the water quality standard or apply for renewal of the variance. To renew a variance, the applicant shall demonstrate reasonable progress towards compliance with the water quality standard during the term of the variance.
- D. The Director shall reevaluate a variance upon the issuance, reissuance, or modification of the AZPDES permit for the point source discharge.
- E. A person who seeks a variance from a water quality standard shall submit a written request for a variance to the Director. A request for a variance shall include the following information:
  1. Identification of the specific pollutant and water quality standard for which a variance is sought;
  2. Identification of the receiving surface water;
  3. For an existing point source discharge, a detailed description of the existing discharge control technologies that are used to achieve compliance with applicable water quality standards. For a new point source discharge, a detailed

## Department of Environmental Quality – Water Quality Standards

- description of the proposed discharge control technologies that will be used to achieve compliance with applicable water quality standards;
4. Documentation that the existing or proposed discharge control technologies will comply with applicable technology-based effluent limitations and that more advanced treatment technology is necessary to achieve compliance with the water quality standard for which a variance is sought;
  5. A detailed discussion of the reasons why compliance with the water quality standard cannot be achieved;
  6. A detailed discussion of the discharge control technologies that are available for achieving compliance with the water quality standard for which a variance is sought;
  7. Documentation of one of the following:
    - a. That it is not technically feasible to install and operate any of the available discharge control technologies to achieve compliance with the water quality standard for which a variance is sought,
    - b. That installation and operation of each of the available discharge technologies to achieve compliance with the water quality standard would result in substantial and widespread economic and social impact, or
    - c. That human-caused conditions or sources of pollution prevent the attainment of the water quality standard for which the variance is sought and it is not possible to remedy the conditions or sources of pollution within the next five years,
  8. Documentation that the point source discharger has reduced, to the maximum extent practicable, the discharge of the pollutant for which a variance is sought through implementation of a local pretreatment, source reduction, or waste minimization program; and
  9. A detailed description of proposed interim discharge limitations that represent the highest level of treatment achievable by the point source discharger during the term of the variance.
- F.** The Director shall consider the following factors when deciding whether to grant or deny a variance request:
1. Bioaccumulation,
  2. The predicted exposure of biota and the likelihood that resident biota will be adversely affected,
  3. The known or predicted safe exposure levels for the pollutant for which the variance is requested, and
  4. The likelihood of adverse human health effects.
- G.** The Director shall issue a public notice and provide an opportunity for a public hearing on whether the request for a variance should be granted or denied under A.A.C. R18-9-A907 and A.A.C. R18-9-A908. An interested party may request a public hearing on a variance under A.A.C. R18-9-A908(B).
- H.** Any variance granted by the Director is subject to review and approval by the Regional Administrator.
- I.** Any person who is adversely affected by a decision of the Director to grant or deny a variance and who has exercised any right to comment on the decision may appeal the decision under A.R.S. § 49-321 et seq. and A.R.S. § 41-1092 et seq.
- J.** The Director shall not grant a variance for a point source discharge to an OAW listed in R18-11-112(G).

**Historical Note**

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).

**R18-11-123. Discharge Prohibitions**

- A.** The discharge of wastewater to the following surface waters is prohibited:
1. Sabino Canyon Creek;
  2. Vekol Wash, upstream of the Ak-Chin Indian Reservation; and
  3. Smith Wash, upstream of the Ak-Chin Indian Reservation.
- B.** The discharge to Lake Powell of human body wastes and the wastes from toilets and other receptacles intended to receive or retain wastes from a vessel is prohibited.

**Historical Note**

Adopted effective April 24, 1996 (Supp. 96-2). Amended by final rulemaking at 8 A.A.R. 1264, effective March 8, 2002 (Supp. 02-1). Amended by final rulemaking at 14 A.A.R. 4708, effective January 31, 2009 (Supp. 08-4).
