CHP R14-2-2404(F)			500,000
Self-direction R14-2-2404(G)			100,000
Energy Efficiency R14-2-2404(A)			17,297,325
Total			21,997,058
*The total pre-rules savings credit is capped at 4% of 2005 retail energy sales, and the total credit is allocated over five years from 2016 to 2020. The credit shown above represents an estimate of the portion of the total credit that can be taken in 2020, or 32.5% of the total credit allowed.			

Historical Note

New Section, including Tables 1 through 4, made by final rulemaking at 16 A.A.R. 2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2405. Implementation Plans

- A.** Except as provided in R14-2-2418, on June 1 of each odd year, or annually at the election of each affected utility, each affected utility shall file with Docket Control, for Commission review and approval, an implementation plan describing how the affected utility intends to meet the energy efficiency standard for the next one or two calendar years, as applicable,
- except that the initial implementation plan shall be filed within 30 days of the effective date of this Article.
- B.** The implementation plan shall include the following information:
1. Except for the initial implementation plan, a description of the affected utility's compliance with the requirements of this Article for the previous calendar year;

2. Except for the initial implementation plan, which shall describe only the next calendar year, a description of how the affected utility intends to comply with this Article for the next two calendar years, including an explanation of any modification to the rates of an existing DSM adjustment mechanism or tariff that the affected utility believes is necessary;
 3. Except for the initial implementation plan, which shall describe only the next calendar year, a description of each DSM program to be newly implemented or continued in the next two calendar years and an estimate of the annual kWh and kW savings projected to be obtained through each DSM program;
 4. The estimated total cost and cost per kWh reduction of each DSM measure and DSM program described in subsection (B)(3);
 5. A DSM tariff filing complying with R14-2-2406(A) or a request to modify and reset an adjustment mechanism complying with R14-2-2406(C), as applicable; and
 6. For each new DSM program or DSM measure that the affected utility desires to implement, a program proposal complying with R14-2-2407.
- C.** An affected utility shall notify its customers of its annual implementation plan filing through a notice in its next regularly scheduled customer bills.
- D.** The Commission may hold a hearing to determine whether an affected utility's implementation plan satisfies the requirements of this Article.
- E.** An affected utility's Commission-approved implementation plan, and the DSM programs authorized thereunder, shall continue in effect until the Commission takes action on a new implementation plan for the affected utility.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2406. DSM Tariffs

- A.** An affected utility's DSM tariff filing shall include the following:
1. A detailed description of each method proposed by the affected utility to recover the reasonable and prudent costs associated with implementing the affected utility's intended DSM programs;
 2. Financial information and supporting data sufficient to allow the Commission to determine the affected utility's fair value, including, at a minimum, the information required to be submitted in a utility annual report filed under R14-2-212(G)(4);
 3. Data supporting the level of costs that the affected utility believes will be incurred in order to comply with this Article; and
 4. Any other information that the Commission believes is relevant to the Commission's consideration of the tariff filing.
- B.** The Commission shall approve, modify, or deny a tariff filed pursuant to subsection (A) within 180 days after the tariff has been filed. The Commission may suspend this deadline or adopt an alternative procedural schedule for good cause.
- C.** If an affected utility has an existing adjustment mechanism to recover the reasonable and prudent costs associated with implementing DSM programs, the affected utility may, in lieu of making a tariff filing under subsection (A), file a request to

modify and reset its adjustment mechanism by submitting the information required under subsections (A)(1) and (3).

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2407. Commission Review and Approval of DSM Programs and DSM Measures

- A.** An affected utility shall obtain Commission approval before implementing a new DSM program or DSM measure.
- B.** An affected utility may apply for Commission approval of a DSM program or DSM measure by submitting a program proposal either as part of its implementation plan submitted under R14-2-2405 or through a separate application.
- C.** A program proposal shall include the following:
1. A description of the DSM program or DSM measure that the affected utility desires to implement,
 2. The affected utility's objectives and rationale for the DSM program or DSM measure,
 3. A description of the market segment at which the DSM program or DSM measure is aimed,
 4. An estimated level of customer participation in the DSM program or DSM measure,
 5. An estimate of the baseline,
 6. The estimated societal benefits and savings from the DSM program or DSM measure,
 7. The estimated societal costs of the DSM program or DSM measure,
 8. The estimated environmental benefits to be derived from the DSM program or DSM measure,
 9. The estimated benefit-cost ratio of the DSM program or DSM measure,
 10. The affected utility's marketing and delivery strategy,
 11. The affected utility's estimated annual costs and budget for the DSM program or DSM measure,
 12. The implementation schedule for the DSM program or DSM measure,
 13. A description of the affected utility's plan for monitoring and evaluating the DSM program or DSM measure, and
 14. Any other information that the Commission believes is relevant to the Commission's consideration of the tariff filing.
- D.** In determining whether to approve a program proposal, the Commission shall consider:
1. The extent to which the Commission believes the DSM program or DSM measure will meet the goals set forth in R14-2-2403(A), and
 2. All of the considerations set forth in R14-2-2403(B).
- E.** Staff may request modifications of on-going DSM programs to ensure consistency with this Article. The Commission shall allow affected utilities adequate time to notify customers of DSM program modifications.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2408. Parity and Equity

- A.** An affected utility shall develop and propose DSM programs for residential, non-residential, and low-income customers.
- B.** An affected utility shall allocate DSM funds collected from residential customers and from non-residential customers proportionately to those customer classes to the extent practicable.
- C.** The affected utility costs of DSM programs for low-income customers shall be borne by all customer classes, except where

Corporation Commission - Fixed Utilities

a customer or customer class is specifically exempted by Commission order.

- D. DSM funds collected by an affected utility shall be used, to the extent practicable, to benefit that affected utility's customers.
- E. All customer classes of an affected utility shall bear the costs of DSM programs by payment through a non-bypassable mechanism, unless a customer or customer class is specifically exempted by Commission order.

Historical Note

New Section made by final rulemaking at 16 A.A.R. 2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2409. Reporting Requirements

- A. By March 1 of each year, an affected utility shall submit to the Commission, in a Commission-established docket for that year, a DSM progress report providing information for each of the affected utility's Commission-approved DSM programs and including at least the following:
 1. An analysis of the affected utility's progress toward meeting the annual energy efficiency standard;
 2. A list of the affected utility's current Commission-approved DSM programs and DSM measures, organized by customer segment;
 3. A description of the findings from any research projects completed during the previous year; and
 4. The following information for each Commission-approved DSM program or DSM measure:
 - a. A brief description;
 - b. Goals, objectives, and savings targets;
 - c. The level of customer participation during the previous year;
 - d. The costs incurred during the previous year, disaggregated by type of cost, such as administrative costs, rebates, and monitoring costs;
 - e. A description and the results of evaluation and monitoring activities during the previous year;
 - f. Savings realized in kW, kWh, therms, and BTUs, as appropriate;
 - g. The environmental benefits realized, including reduced emissions and water savings;
 - h. Incremental benefits and net benefits, in dollars;
 - i. Performance-incentive calculations for the previous year;
 - j. Problems encountered during the previous year and proposed solutions;
 - k. A description of any modifications proposed for the following year; and
 - l. Whether the affected utility proposes to terminate the DSM program or DSM measure and the proposed date of termination.
- B. By September 1 of each year, an affected utility shall file a status report including a tabular summary showing the following for each current Commission-approved DSM program and DSM measure of the affected utility:
 1. Semi-annual expenditures compared to annual budget, and
 2. Participation rates.
- C. An affected utility shall file each report required by this Section with Docket Control, where it will be available to the public, and shall make each such report available to the public upon request.

- D. An affected utility may request within its implementation plan that these reporting requirements supersede specific existing DSM reporting requirements.

Historical Note

New Section made by final rulemaking at 16 A.A.R. 2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2410. Cost Recovery

- A. An affected utility may recover the costs that it incurs in planning, designing, implementing, and evaluating a DSM program or DSM measure if the DSM program or DSM measure is all of the following:
 1. Approved by the Commission before it is implemented,
 2. Implemented in accordance with a Commission-approved program proposal or implementation plan, and
 3. Monitored and evaluated for cost-effectiveness pursuant to R14-2-2415.
- B. An affected utility shall monitor and evaluate each DSM program and DSM measure, as provided in R14-2-2415, to determine whether the DSM program or DSM measure is cost-effective and otherwise meets expectations.
- C. If an affected utility determines that a DSM program or DSM measure is not cost-effective or otherwise does not meet expectations, the affected utility shall include in its annual DSM progress report filed under R14-2-2409 a proposal to modify or terminate the DSM program or DSM measure.
- D. An affected utility shall recover its DSM costs concurrently, on an annual basis, with the spending for a DSM program or DSM measure, unless the Commission orders otherwise.
- E. An affected utility may recover costs from DSM funds for any of the following items, if the expenditures will enhance DSM:
 1. Incremental labor attributable to DSM development,
 2. A market study,
 3. A research and development project such as applied technology assessment,
 4. Consortium membership, or
 5. Another item that is difficult to allocate to an individual DSM program.
- F. The Commission may impose a limit on the amount of DSM funds that may be used for the items in subsection (E).
- G. If goods and services used by an affected utility for DSM have value for other affected utility functions, programs, or services, the affected utility shall divide the costs for the goods and services and allocate funding proportionately.
- H. An affected utility shall allocate DSM costs in accordance with generally accepted accounting principles.
- I. The Commission shall review and address financial disincentives, recovery of fixed costs, and recovery of net lost income/revenue, due to Commission-approved DSM programs, if an affected utility requests such review in its rate case and provides documentation/records supporting its request in its rate application.
- J. An affected utility, at its own initiative, may submit to the Commission twice-annual reports on the financial impacts of its Commission-approved DSM programs, including any unrecovered fixed costs and net lost income/revenue resulting from its Commission-approved DSM programs.

Historical Note

New Section made by final rulemaking at 16 A.A.R. 2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2411. Performance Incentives

In the implementation plans required by R14-2-2405, an affected utility may propose for Commission review a performance incentive to assist in achieving the energy efficiency standard set forth in

Corporation Commission - Fixed Utilities

R14-2-2404. The Commission may also consider performance incentives in a general rate case.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2412. Cost-effectiveness

- A. An affected utility shall ensure that the incremental benefits to society of the affected utility's overall DSM portfolio exceed the incremental costs to society of the DSM portfolio.
- B. The Societal Test shall be used to determine cost-effectiveness.
- C. The analysis of a DSM program's or DSM measure's cost-effectiveness may include:
 - 1. Costs and benefits associated with reliability, improved system operations, environmental impacts, and customer service;
 - 2. Savings of both natural gas and electricity; and
 - 3. Any uncertainty about future streams of costs or benefits.
- D. An affected utility shall make a good faith effort to quantify water consumption savings and air emission reductions, while other environmental costs or the value of environmental improvements shall be estimated in physical terms when practical but may be expressed qualitatively. An affected utility, Staff, or any party may propose monetized benefits and costs if supported by appropriate documentation or analyses.
- E. Market transformation programs shall be analyzed for cost-effectiveness by measuring market effects compared to program costs.
- F. Educational programs shall be analyzed for cost-effectiveness based on estimated energy and peak demand savings resulting from increased awareness about energy use and opportunities for saving energy.
- G. Research and development and pilot programs are not required to demonstrate cost-effectiveness.
- H. An affected utility's low-income customer program portfolio shall be cost-effective, but costs attributable to necessary health and safety measures shall not be used in the calculation.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2413. Baseline Estimation

- A. To determine the baseline, an affected utility shall estimate the level of electric demand and consumption and the associated costs that would have occurred in the absence of a DSM program or DSM measure.
- B. For demand response programs, an affected utility shall use customer load profile information to verify baseline consumption patterns and the peak demand savings resulting from demand response actions.
- C. For installations or applications that have multiple fuel choices, an affected utility shall determine the baseline using the same fuel source actually used for the installation or application.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2414. Fuel Neutrality

- A. Ratepayer-funded DSM shall be developed and implemented in a fuel-neutral manner.
- B. An affected utility shall use DSM funds collected from electric customers for electric DSM programs, unless otherwise ordered by the Commission.

- C. An affected utility may use DSM funds collected from electric customers for thermal envelope improvements.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2415. Monitoring, Evaluation, and Research

- A. An affected utility shall monitor and evaluate each DSM program and DSM measure to:
 - 1. Ensure compliance with the cost-effectiveness requirements of R14-2-2412;
 - 2. Determine participation rates, energy savings, and demand reductions;
 - 3. Assess the implementation process for the DSM program or DSM measure;
 - 4. Obtain information on whether to continue, modify, or terminate a DSM program or DSM measure; and
 - 5. Determine the persistence and reliability of the affected utility's DSM.
- B. An affected utility may conduct evaluation and research, such as market studies, market research, and other technical research, for DSM program planning, product development, and DSM program improvement.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2416. Program Administration and Implementation

- A. An affected utility may use an energy service company or other external resource to implement a DSM program or DSM measure.
- B. The Commission may, at its discretion, establish independent program administrators who would be subject to the relevant requirements of this Article.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2417. Leveraging and Cooperation

- A. An affected utility shall, to the extent practicable, participate in cost sharing, leveraging, or other lawful arrangements with customers, vendors, manufacturers, government agencies, other electric utilities, or other entities if doing so will increase the effectiveness or cost-effectiveness of a DSM program or DSM measure.
- B. An affected utility shall participate in a DSM program or DSM measure with a natural gas utility when doing so is practicable and if doing so will increase the effectiveness or cost-effectiveness of a DSM program or DSM measure.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2418. Compliance by Electric Distribution Cooperatives

- A. An electric distribution cooperative that is an affected utility shall comply with the requirements of this Section instead of meeting the requirements of R14-2-2404(A) and (B) and R14-2-2405(A).
- B. An electric distribution cooperative shall, on June 1 of each odd year, or annually at its election:
 - 1. File with Docket Control, for Commission review and approval, an implementation plan for each DSM program to be implemented or maintained during the next one or two calendar years, as applicable; and

Corporation Commission - Fixed Utilities

2. Submit to the Director of the Commission's Utilities Division an electronic copy of its implementation plan in a format suitable for posting on the Commission's web site.
- C. An implementation plan submitted under subsection (B) shall set forth an energy efficiency goal for each year of at least 75% of the savings requirement specified in R14-2-2404 and shall include the information required under R14-2-2405(B).

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

R14-2-2419. Waiver from the Provisions of this Article

- A. The Commission may waive compliance with any provision of this Article for good cause.
- B. An affected utility may petition the Commission to waive its compliance with any provision of this Article for good cause.
- C. A petition filed pursuant to this Section shall have priority over other matters filed under this Article.

Historical Note

New Section made by final rulemaking at 16 A.A.R.
2254, effective January 1, 2011 (Supp. 10-4).

ARTICLE 25. GAS UTILITY ENERGY EFFICIENCY STANDARDS**R14-2-2501. Definitions**

In this Article, unless otherwise specified:

1. "Adjustment mechanism" means a Commission-approved provision in an affected utility's rate schedule allowing the affected utility to increase and decrease a certain rate or rates, in an established manner, when increases and decreases in specific costs are incurred by the affected utility.
2. "Affected utility" means a public service corporation that provides gas utility service to retail customers in Arizona.
3. "Baseline" means the level of gas demand, gas consumption, and associated expenses estimated to occur in the absence of a specific DSM program, determined as provided in R14-2-2513.
4. "CHP" means combined heat and power, which is using a primary energy source to simultaneously produce electrical energy and useful process heat.
5. "Commission" means the Arizona Corporation Commission.
6. "Cost-effective" means that total incremental benefits from a DSM measure or DSM program exceed total incremental costs over the life of the DSM measure, as determined under R14-2-2512.
7. "Customer" means the person or entity in whose name service is rendered to a single contiguous field, location, or facility, regardless of the number of meters at the field, location, or facility.
8. "Delivery system" means the infrastructure through which an affected utility transmits and then distributes gas energy to its customers.
9. "DSM" means demand-side management, the implementation and maintenance of one or more DSM programs.
10. "DSM measure" means any material, device, technology, educational program, practice, or facility alteration designed to result in increased energy efficiency and includes CHP used to displace space heating, water heating, or another load.
11. "DSM program" means one or more DSM measures provided as part of a single offering to customers.
12. "DSM tariff" means a Commission-approved schedule of rates designed to recover an affected utility's reasonable and prudent costs of complying with this Article.
13. "Energy efficiency" means the production or delivery of an equivalent level and quality of end-use gas service using less energy, or the conservation of energy by end-use customers.
14. "Energy efficiency standard" means the reduction in retail energy sales, in percentage of therms or therm equivalents, required to be achieved through an affected utility's approved DSM and RET programs as prescribed in R14-2-2504.
15. "Energy savings" means the reduction in a customer's energy consumption, expressed in therms or therm equivalents.
16. "Energy service company" means a company that provides a broad range of services related to energy efficiency, including energy audits, the design and implementation of energy efficiency projects, and the installation and maintenance of energy efficiency measures.
17. "Environmental benefits" means avoidance of costs for compliance, or reduction in environmental impacts, for things such as, but not limited to:
 - a. Water use and water contamination;
 - b. Monitoring storage and disposal of solid waste, such as coal ash (bottom and fly);
 - c. Health effects from burning fossil fuels; and
 - d. Emissions from transportation and production of fuels.
18. "Fuel-neutral" means without promoting or otherwise expressing bias regarding a customer's choice of one fuel over another.
19. "Gas" means either natural gas or propane.
20. "Gas utility" means a public service corporation providing natural gas service or propane service to the public.
21. "Incremental benefits" means amounts saved through avoiding costs for gas purchases, delivery system, and other cost items necessary to provide gas utility service, along with other improvements in societal welfare, such as through avoided environmental impacts, including, but not limited to, water consumption savings, water contamination reduction, air emission reduction, reduction in coal ash, and reduction of nuclear waste.
22. "Incremental costs" means the additional expenses of DSM measures, relative to baseline.
23. "Independent program administrator" means an impartial third party employed to provide objective oversight of DSM and RET programs.
24. "kWh" means kilowatt-hour.
25. "Leveraging" means combining resources to more effectively achieve an energy efficiency goal, or to achieve greater energy efficiency savings, than would be achieved without combining resources.
26. "Low-income customer" means a customer with a below average level of household income, as defined in an affected utility's Commission-approved DSM program description.
27. "Market transformation" means strategic efforts to induce lasting structural or behavioral changes in the market that result in increased energy efficiency.
28. "Net benefits" means the incremental benefits resulting from DSM minus the incremental costs of DSM.
29. "Non-market benefits" means improvements in societal welfare that are not bought or sold.

Corporation Commission - Fixed Utilities

30. "Program costs" means the expenses incurred by an affected utility as a result of developing, marketing, implementing, administering, and evaluating Commission-approved DSM programs.
31. "RET" means a renewable energy resource technology application utilizing an energy resource that is replaced rapidly by a natural, ongoing process and that displaces conventional energy resources otherwise used to provide energy to an affected utility's Arizona customers.
32. "RET program" means one or more RETs provided as part of a single offering to customers.
33. "Revenue decoupling" means a mechanism that reduces or eliminates the connection between sales volume and the recovery of an affected utility's Commission-approved cost of service.
34. "Self-direction" means an option made available to qualifying customers of sufficient size, in which the amount of money paid by each qualifying customer toward DSM costs is tracked for the customer and made available for use by the customer for approved DSM investments upon application by the customer.
35. "Societal Test" means a cost-effectiveness test of the net benefits of DSM programs that starts with the Total Resource Cost Test, but includes non-market benefits and costs to society.
36. "Staff" means individuals working for the Commission's Utilities Division, whether as employees or through contract.
37. "Therm" means a unit of heat energy equal to 100,000 British Thermal Units.
38. "Thermal envelope" means the collection of building surfaces, such as walls, windows, doors, floors, ceilings, and roofs, that separate interior conditioned (heated or cooled) spaces from the exterior environment.
39. "Therm equivalent" means a unit of energy, such as kWh, converted and stated in terms of therms.
40. "Total Resource Cost Test" means a cost-effectiveness test that measures the net benefits of a DSM program as a resource option, including incremental measure costs, incremental affected utility costs, and carrying costs as a component of avoided capacity cost, but excluding incentives paid by affected utilities and non-market benefits to society.
- A. An affected utility shall design each DSM program to be cost-effective.
- B. An affected utility shall consider the following when planning and implementing a DSM or RET program:
1. Whether the DSM or RET program will advance market transformation and achieve sustainable savings, reducing the need for future market interventions;
 2. Whether the affected utility can ensure a level of funding adequate to sustain the DSM or RET program and allow the program to achieve its targeted goals; and
 3. If a DSM program, whether the DSM program will achieve cost-effective energy savings.
- C. An affected utility shall:
1. Offer DSM programs that will provide an opportunity for all affected utility customer segments to participate, and
 2. Allocate a portion of DSM resources specifically to low-income customers.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2504. Energy Efficiency Standards

- A. Except as provided in R14-2-2518 and R14-2-2519, in order to ensure reliable gas service at reasonable ratepayer rates and costs, by December 31, 2020, an affected utility shall, through DSM and RET programs, achieve cumulative annual energy savings, expressed as therms or therm equivalents, equal to at least 6% of the affected utility's retail gas energy sales for calendar year 2019.
- B. An affected utility shall, by the end of each calendar year, meet at least the cumulative annual energy efficiency standard listed in Table 1 for that calendar year. An illustrative example of how the required energy savings would be calculated is shown in Table 2. An illustrative example of how the standard can be met in 2020 is shown in Table 4.

Table 1. Energy Efficiency Standard

CALENDAR YEAR	ENERGY EFFICIENCY STANDARD (Cumulative Annual Energy Savings by the End of Each Calendar Year as a Percentage of the Retail Energy Sales in the Prior Calendar Year)
2011	0.50%
2012	1.20%
2013	1.80%
2014	2.40%
2015	3.00%
2016	3.60%
2017	4.20%
2018	4.80%
2019	5.40%
2020	6.00%

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2502. Applicability

This Article applies to each affected utility classified as Class A according to R14-2-103(A)(3)(q).

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2503. Goals and Objectives**Table 2. Illustrative Example of Calculating Required Energy Savings**

CALENDAR YEAR	A RETAIL SALES (therms)	B ENERGY EFFICIENCY STANDARD	C REQUIRED CUMULATIVE ENERGY SAVINGS (therms or therm equivalents) (B of current year × A of prior year)
2010	100,000,000		0
2011	97,500,000	0.50%	500,000
2012	94,870,000	1.20%	1,170,000

Corporation Commission - Fixed Utilities

2013	92,411,540	1.80%	1,707,660
2014	90,018,939	2.40%	2,217,877
2015	87,691,512	3.00%	2,700,568
2016	85,427,344	3.60%	3,156,894
2017	83,224,605	4.20%	3,587,948
2018	81,081,521	4.80%	3,994,781
2019	78,996,374	5.40%	4,378,402
2020	76,967,498	6.00%	4,739,782

- C. An affected utility may count energy savings resulting from DSM and RET programs to meet the energy efficiency standard. At least 75% of the energy efficiency standard for each year listed in Table 1 shall be achieved through DSM energy efficiency programs.
- D. An affected utility's energy savings resulting from DSM energy efficiency programs implemented before the effective date of this Article, but after 2004, may be credited toward meeting the energy efficiency standard set forth in subsection (B). The total energy savings credit for these pre-rules DSM programs shall not exceed 1% of the affected utility's retail energy sales in calendar year 2005. A portion of the total energy savings credit for these pre-rules programs may be applied each year, from 2016 through 2020, as listed in Table 3, Column A.

Table 3. Credit for Pre-rules Energy Savings

CALENDAR YEAR	A CREDIT FOR THE PRE-RULES ENERGY SAVINGS APPLIED IN EACH YEAR (Percentage of the Total Eligible Pre-rules Cumulative Annual Energy Savings That Shall Be Applied in the Year)	B CUMULATIVE APPLICATION OF THE CREDIT FOR THE PRE-RULES ENERGY SAVINGS IN 2016-2020 (Percentage of the Total Eligible Pre-rules Cumulative Annual Energy Savings That Are Credited by the End of Each Year)
2016	7.5%	7.5%
2017	15.0%	22.5%
2018	20.0%	42.5%
2019	25.0%	67.5%
2020	32.5%	100.0%

- E. An affected utility may count toward meeting the energy efficiency standard up to one-third of the energy savings resulting from energy efficiency building codes and up to one-third of the energy savings resulting from energy efficiency appliance standards, if the energy savings are quantified and reported through a measurement and evaluation study undertaken by the affected utility, and the affected utility demonstrates and documents its efforts in support of the adoption or implementation of the energy efficiency building codes and appliance standards.
- F. An affected utility may count a customer's energy savings resulting from self-direction toward meeting the energy efficiency standard.
- G. An affected utility may count toward meeting the energy efficiency standard all energy savings resulting from the affected utility's sponsorship of RET projects that displace gas. An affected utility may also count toward meeting the energy efficiency standard all energy savings resulting from other RET projects that are not sponsored by the affected utility, if the affected utility can demonstrate that its efforts facilitated the placement and completion of the RET project.
- H. An affected utility's energy savings resulting from efficiency improvements to its delivery system may not be counted toward meeting the energy efficiency standard.
- I. An affected utility's energy savings used to meet the energy efficiency standard will be assumed to continue through the year 2020 or, if expiring before the year 2020, to be replaced with a DSM measure or RET having at least the same level of efficiency.

Table 4. Illustrative Example of How the Energy Standard Could be Met in 2020

	2020 Energy Efficiency Standard	2019 Retail Sales (therms)	Required Cumulative Annual Energy Savings (therms or therm equivalents)
Total	6.00%	78,996,374	4,739,782
Breakdown of Savings and Credits Used To Meet 2020 Standard:			
			Cumulative Annual Energy Savings Or Credit (therms)
Pre-rules Savings Credit R14-2-2504(D)			359,545*
Building Codes and Appliance Standards R14-2-2504(E)			425,000
Self-direction R14-2-2504(F)			27,000
RET R14-2-2504(G)			25,000
CHP R14-2-2501(10) and R14-2-2504(C)			135,000
Energy Efficiency R14-2-2504(C)	At least 75%		3,768,237
Total			4,739,782

*The total pre-rules savings credit shall be capped at 1% of 2005 retail energy sales, and the total credit is allocated over five years from 2016 to 2020. The credit shown above represents an estimate of the portion of the total credit that can be taken in 2020, or 32.5% of the total credit allowed.

Historical Note

New Section R14-2-2504 and Tables 1 through 4 made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2505. Implementation Plans

- A.** Except as provided in R14-2-2518 and R14-2-2519, on June 1 of each odd year, or annually at the election of each affected utility, each affected utility shall file with Docket Control, for Commission review and approval, an implementation plan describing how the affected utility intends to meet the energy efficiency standard for the next one or two calendar years, as applicable, except that the initial implementation plan shall be filed within 30 days of the effective date of this Article.
- B.** The implementation plan shall include the following information:
1. Except for the initial implementation plan, a description of the affected utility's compliance with the requirements of this Article for the previous calendar year;
 2. Except for the initial implementation plan, which shall describe only the next calendar year, a description of how the affected utility intends to comply with this Article for the next two calendar years, including an explanation of any modification to the rates of an existing DSM adjustment mechanism or tariff that the affected utility believes is necessary;
 3. Except for the initial implementation plan, which shall describe only the next calendar year, a description of each DSM and RET program to be newly implemented or continued in the next two calendar years and an estimate of the annual therm or therm equivalent savings projected to be obtained through each DSM and RET program;
 4. The estimated total cost and cost per therm reduction of each DSM measure and program and each RET and RET program described in subsection (B)(3);
 5. A DSM tariff filing complying with R14-2-2506(A) or a request to modify and reset an adjustment mechanism complying with R14-2-2506(C), as applicable; and

6. For each new DSM measure and program and each RET and RET program that the affected utility desires to implement, a program proposal complying with R14-2-2507.
- C.** An affected utility shall notify its customers of its implementation plan filing through a notice in its next regularly scheduled customer bills following the filing of the implementation plan.
- D.** The Commission may hold a hearing to determine whether an affected utility's implementation plan satisfies the requirements of this Article.
- E.** An affected utility's Commission-approved implementation plan, and the DSM and RET programs authorized thereunder, shall continue in effect until the Commission takes action on a new implementation plan for the affected utility.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2506. DSM Tariffs

- A.** An affected utility's DSM tariff filing shall include the following:
1. A detailed description of each method proposed by the affected utility to recover the reasonable and prudent costs associated with implementing the affected utility's intended DSM and RET programs;
 2. Financial information and supporting data sufficient to allow the Commission to determine the affected utility's fair value, including, at a minimum, the information required to be submitted in a utility annual report filed under R14-2-312(G)(4);
 3. Data supporting the level of costs that the affected utility believes will be incurred in order to comply with this Article; and

Corporation Commission - Fixed Utilities

4. Any other information that the Commission believes is relevant to the Commission's consideration of the tariff filing.
- B. The Commission shall approve, modify, or deny a tariff filed pursuant to subsection (A) within 180 days after the tariff has been filed. The Commission may suspend this deadline or adopt an alternative procedural schedule for good cause.
- C. If an affected utility has an existing adjustment mechanism to recover the reasonable and prudent costs associated with implementing DSM and RET programs, the affected utility may, in lieu of making a tariff filing under subsection (A), file a request to modify and reset its adjustment mechanism by submitting the information required under subsections (A)(1) and (3).

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2507. Commission Review and Approval of DSM and RET Programs

- A. An affected utility shall obtain Commission approval before implementing a new DSM program or measure or a new RET program or RET.
- B. An affected utility may apply for Commission approval of a DSM program or measure or an RET program or RET by submitting a program proposal either as part of its implementation plan submitted under R14-2-2505 or through a separate application.
- C. A program proposal shall include the following:
 1. A description of the DSM program or measure or RET program or RET that the affected utility desires to implement;
 2. The affected utility's objectives and rationale for the DSM program or measure or RET program or RET;
 3. A description of the market segment at which the DSM program or measure or RET program or RET is aimed;
 4. An estimated level of customer participation in the DSM program or measure or RET program or RET;
 5. An estimate of the baseline;
 6. For a DSM program or measure:
 - a. The estimated societal benefits and savings from the DSM program or measure,
 - b. The estimated societal costs of the DSM program or measure, and
 - c. The estimated benefit-cost ratio of the DSM program or measure;
 7. The estimated environmental benefits to be derived from the DSM program or measure or RET program or RET;
 8. The affected utility's marketing and delivery strategy;
 9. The affected utility's estimated annual costs and budget for the DSM program or measure or RET program or RET;
 10. The implementation schedule for the DSM program or measure or RET program or RET;
 11. A description of the affected utility's plan for monitoring and evaluating the DSM program or measure or RET program or RET; and
 12. Any other information that the Commission believes is relevant to the Commission's consideration of the filing.
- D. In determining whether to approve a program proposal, the Commission shall consider:
 1. The extent to which the Commission believes the DSM program or measure will meet the goal set forth in R14-2-2503(A), and
 2. All of the considerations set forth in R14-2-2503(B).

- E. Staff may request modifications of on-going DSM and RET programs to ensure consistency with this Article. The Commission shall allow affected utilities adequate time to notify customers of DSM and RET program modifications.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2508. Parity and Equity

- A. An affected utility shall develop and propose DSM programs for residential, non-residential, and low-income customers.
- B. An affected utility shall allocate DSM funds collected from residential customers and from non-residential customers proportionately to those customer classes to the extent practicable.
- C. The affected utility costs of DSM and RET programs for low-income customers shall be borne by all customer classes, except where a customer or customer class is specifically exempted by Commission order.
- D. DSM funds collected by an affected utility shall be used, to the extent practicable, to benefit that affected utility's customers.
- E. All customer classes of an affected utility shall bear the costs of DSM and RET programs by payment through a non-bypassable mechanism, unless a customer or customer class is specifically exempted by Commission order.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2509. Reporting Requirements

- A. By April 1 of each year, an affected utility shall submit to the Commission, in a Commission-established docket for that year, a DSM progress report providing information for each of the affected utility's Commission-approved DSM and RET programs including at least the following:
 1. An analysis of the affected utility's progress toward meeting the annual energy efficiency standard;
 2. A list of the affected utility's current Commission-approved DSM and RET programs, organized by customer segment;
 3. A description of the findings from any research projects completed during the previous year; and
 4. The following information for each Commission-approved DSM program and measure and RET program and RET:
 - a. A brief description;
 - b. Goals, objectives, and savings targets;
 - c. The level of customer participation during the previous year;
 - d. The costs incurred during the previous year, disaggregated by type of cost, such as administrative costs, rebates, and monitoring costs;
 - e. A description and the results of evaluation and monitoring activities during the previous year;
 - f. Savings realized in kW, kWh, therms, and therm equivalents, as appropriate;
 - g. The environmental benefits realized;
 - h. Incremental benefits and net benefits, in dollars;
 - i. Performance-incentive calculations for the previous year;
 - j. Problems encountered during the previous year and proposed solutions;
 - k. A description of any modifications proposed for the following year; and

Corporation Commission - Fixed Utilities

1. Whether the affected utility proposes to terminate the DSM program or measure or RET program or RET and the proposed date of termination.
- B. By October 1 of each year, an affected utility shall file a status report including a tabular summary showing the following for each current Commission-approved DSM program and measure and RET program and RET of the affected utility:
 1. Semi-annual expenditures compared to annual budget, and
 2. Participation rates.
- C. An affected utility shall file each report required by this Section with Docket Control, where it will be available to the public, and shall make each such report available to the public upon request.
- D. An affected utility may request within its implementation plan that these reporting requirements supersede specific existing DSM reporting requirements.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2510. Cost Recovery

- A. An affected utility may recover the costs that it incurs in planning, designing, implementing, and evaluating a DSM program or measure or RET program or RET if the DSM program or measure or RET program or RET is all of the following:
 1. Approved by the Commission before it is implemented;
 2. Implemented in accordance with a Commission-approved program proposal or implementation plan; and
 3. Monitored and evaluated, pursuant to R14-2-2515.
- B. An affected utility shall monitor and evaluate each DSM program or measure and each RET program or RET, as provided in R14-2-2515.
- C. If an affected utility determines that a DSM program or measure is not cost-effective or that a DSM program or measure or RET program or RET does not meet expectations, the affected utility shall include in its annual DSM progress report filed under R14-2-2509 a proposal to modify or terminate the DSM program or measure or RET program or RET.
- D. An affected utility shall recover its DSM and RET costs concurrently, on an annual basis, with the spending for DSM and RET programs, unless the Commission orders otherwise.
- E. An affected utility may recover costs from DSM funds for any of the following items, if the expenditures will enhance DSM or RET programs:
 1. Incremental labor attributable to DSM and RET development,
 2. A market study,
 3. A research and development project such as applied technology assessment,
 4. Consortium membership, or
 5. Other items that are difficult to allocate to an individual DSM or RET program.
- F. The Commission may impose a limit on the amount of DSM funds that may be used for the items in subsection (E).
- G. If goods and services used by an affected utility for DSM or RET have value for other affected utility functions, programs, or services, the affected utility shall divide the costs for the goods and services and allocate funding proportionately.
- H. An affected utility shall allocate DSM and RET costs in accordance with generally accepted accounting principles.
- I. An affected utility, at its own initiative, may submit to the Commission twice-annual reports on the financial impacts of its Commission-approved DSM and RET programs, including any unrecovered fixed costs and net lost income/revenue

resulting from its Commission-approved DSM and RET programs.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2511. Revenue Decoupling

The Commission shall review and address financial or other disincentives, recovery of fixed costs, and recovery of net lost income/revenue, including, but not limited to, implementation of a revenue decoupling mechanism, due to Commission-approved DSM and RET programs, if an affected utility requests such review in its rate case and provides adequate documentation/records supporting its request in its rate application.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2512. Cost-effectiveness

- A. An affected utility shall ensure that the incremental benefits to society of the affected utility's overall group of DSM programs exceed the incremental costs to society of the overall group of DSM programs.
- B. The Societal Test shall be used to determine cost-effectiveness.
- C. The analysis of a DSM program's or DSM measure's cost-effectiveness may include:
 1. Costs and benefits associated with reliability, improved system operations, environmental impacts, and customer service;
 2. Savings of both gas and electricity; and
 3. Any uncertainty about future streams of costs or benefits.
- D. An affected utility shall make a good faith effort to quantify water consumption savings and air emission reductions resulting from implementation of DSM programs, while other environmental costs or the value of environmental improvements shall be estimated in physical terms when practical but may be expressed qualitatively. An affected utility, Staff, or any party may propose monetized benefits and costs if supported by appropriate documentation or analyses.
- E. Market transformation programs shall be analyzed for cost-effectiveness by measuring market effects compared to program costs.
- F. Educational programs shall be analyzed for cost-effectiveness based on estimated energy and peak demand savings resulting from increased awareness about energy use and opportunities for saving energy.
- G. Research and development and pilot programs are not required to demonstrate cost-effectiveness.
- H. An affected utility's low-income customer program portfolio shall be cost-effective, but costs attributable to necessary health and safety measures shall not be used in the calculation.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2513. Baseline Estimation

- A. To determine the baseline, an affected utility shall estimate the level of gas demand and consumption and the associated costs that would have occurred in the absence of a DSM program.
- B. For installations or applications that have multiple fuel choices, an affected utility shall determine the baseline using the same fuel source that would have actually been used for

the installation or application in the absence of a DSM program.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2514. Fuel Neutrality

- A. Ratepayer-funded DSM shall be developed and implemented in a fuel-neutral manner.
- B. An affected utility shall use DSM funds collected from gas customers for gas DSM programs, unless otherwise ordered by the Commission.
- C. An affected utility may use DSM funds collected from gas customers for thermal envelope improvements.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2515. Monitoring, Evaluation, and Research

- A. An affected utility shall monitor and evaluate each DSM program and measure and each RET program and RET to:
 1. Ensure compliance with the cost-effectiveness requirements for DSM programs in R14-2-2512;
 2. Determine participation rates, energy savings, and demand reductions;
 3. Assess the implementation process for the DSM program or measure or RET program or RET;
 4. Obtain information on whether to continue, modify, or terminate a DSM program or measure or RET program or RET; and
 5. Determine the persistence and reliability of the affected utility's DSM programs and measures and RET programs and RETs.
- B. An affected utility may conduct evaluation and research, such as market studies, market research, and other technical research, for DSM and RET program planning, product development, and DSM and RET program improvement.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2516. Program Administration and Implementation

- A. An affected utility may use an energy service company or other external resource to implement a DSM program or measure or RET program or RET.
- B. The Commission may, at its discretion, establish independent program administrators who would be subject to the relevant requirements of this Article.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2517. Leveraging and Cooperation

- A. An affected utility shall, to the extent practicable, participate in cost sharing, leveraging, or other lawful arrangements with customers, vendors, manufacturers, government agencies, other gas utilities, or other entities if doing so will increase the effectiveness of a DSM program or measure or RET program or RET.
- B. An affected utility shall participate in a DSM program or measure or RET program or RET with an electric utility when doing so is practicable and if doing so will increase the effectiveness of the DSM program or measure or RET program or RET.

effectiveness of the DSM program or measure or RET program or RET.

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2518. Compliance by Gas Distribution Cooperatives

- A. A gas distribution cooperative that is an affected utility shall comply with the requirements of this Section instead of meeting the requirements of R14-2-2504(A) and (B) and R14-2-2505(A).
- B. A gas distribution cooperative shall, on June 1 of each odd year, or annually at its election:
 1. File with Docket Control, for Commission review and approval, an implementation plan providing information for each DSM and RET program to be implemented or maintained during the next one or two calendar years, as applicable; and
 2. Submit to the Director of the Commission's Utilities Division an electronic copy of its implementation plan in a format suitable for posting on the Commission's web site.
- C. A gas distribution cooperative's initial implementation plan shall be filed with Docket Control within 30 days of the effective date of this Article.
- D. An implementation plan submitted under subsection (B) or (C) shall set forth an energy efficiency goal for each year of at least 75% of the savings requirement specified in R14-2-2504 and shall include the information required under R14-2-2505(B).

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2519. Compliance by Propane Companies

- A. A propane company that is an affected utility shall comply with the requirements of this Section instead of meeting the requirements of R14-2-2504(A) and (B) and R14-2-2505(A).
- B. A propane company shall, on June 1 of each odd year, or annually at its election:
 1. File with Docket Control, for Commission review and approval, an implementation plan providing information for each DSM and RET program to be implemented or maintained during the next one or two calendar years, as applicable; and
 2. Submit to the Director of the Commission's Utilities Division an electronic copy of its implementation plan in a format suitable for posting on the Commission's web site.
- C. A propane company's initial implementation plan shall be filed with Docket Control within 30 days of the effective date of this Article.
- D. An implementation plan submitted under subsection (B) or (C) shall set forth an energy efficiency goal for each year of at least 50% of the savings requirement specified in R14-2-2504 and shall include the information required under R14-2-2505(B).

Historical Note

New Section made by final rulemaking at 17 A.A.R. 72, effective March 4, 2011 (Supp. 11-1).

R14-2-2520. Waiver from the Provisions of this Article

- A. The Commission may waive compliance with any provision of this Article for good cause.

- B. An affected utility may petition the Commission to waive its compliance with any provision of this Article for good cause.

Historical Note

New Section made by final rulemaking at 17 A.A.R.
72, effective March 4, 2011 (Supp. 11-1).

Supplement to the
Arizona Administrative Code
The official compilation of Arizona Rules
Replacement Check List

For rules filed in the third quarter between
July 1 - September 30
2017

Within the stated calendar quarter, this Title contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law. These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information. Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

TITLE 15. Revenue

Chapter 05. Department of Revenue - Transaction Privilege and Use Tax Section

Sections Expired

R15-5-2212, R15-5-2313, R15-5-2321, R15-5-3035

☐ REMOVE Supp. 16-3
Pages: 1 - 45

☐ REPLACE with Supp. 17-3
Pages: 1 - 44

The contact person who can answer questions about the expired rules in this Chapter:

Name: Governor's Regulatory Review Council
Address: 100 N. 15th Ave #305
Phoenix, AZ 85007
Telephone: (602) 542-2058

Disclaimer: Please be advised the person listed is the contact of record as submitted in the rulemaking package for this supplement. The contact and other information may change and is provided as a public courtesy.

PUBLISHER
Arizona Department of State
Office of the Secretary of State, Administrative Rules Division

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION
September 30, 2017

RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2017 is cited as Supp. 17-1.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, www.azsos.gov/services/legislative-filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at www.azsos.gov/rules, click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.

TITLE 15. REVENUE

CHAPTER 5. DEPARTMENT OF REVENUE - TRANSACTION PRIVILEGE AND USE TAX SECTION

Authority: A.R.S. § 42-1004

Editor's Note: The provisions in these rules became effective August 1, 1976, unless otherwise noted in the Historical Note following the rule.

ARTICLE 1. RETAIL CLASSIFICATION

New Article 1, consisting of Section R15-5-151, adopted effective April 15, 1993 (Supp. 93-2).

Former Article 1, consisting of Sections R15-5-101 through R15-5-104, repealed effective April 13, 1987.

Section					
R15-5-101.	Sales for Resale or Lease	6	R15-5-147.	Reserved	9
R15-5-102.	Casual Sales.....	6	R15-5-148.	Reserved	9

ARTICLE 1. RETAIL CLASSIFICATION**R15-5-101. Sales for Resale or Lease**

- A. Gross receipts from the sale of tangible personal property to be resold by the purchaser in the ordinary course of business are not subject to tax under the retail classification.
- B. Gross receipts from the sale of tangible personal property to be leased by a person in the business of leasing such personal property are not subject to tax under the retail classification.
- C. Gross receipts from the sale of tangible personal property to a lessor of real property are subject to tax if:
 1. The tangible personal property is incorporated into, or leased in conjunction with, the real property; and
 2. The rental of the tangible personal property is not separately stated as part of the real property lease transaction.
- D. Gross receipts from the sale of repair or replacement parts for tangible personal property that is to be leased by a person engaged in the business of leasing such tangible personal property are not subject to tax under the retail classification.

Historical Note

Amended effective November 7, 1978 (Supp. 78-6).
 Renumbered from R15-5-1811 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-102. Casual Sales

Gross receipts from a casual sale, as defined in R15-5-2001, are not taxable under the retail classification.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-103. Sale of Business Enterprises

Gross receipts from the sale of a business as a going concern are not subject to tax if the sale is for the business as an operating enterprise.

Historical Note

Renumbered from R15-5-1817 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-104. Service Businesses

- A. Gross receipts from the sale of tangible personal property to a person engaged in a professional or personal service occupation or business are subject to tax if the tangible personal property is used or consumed in the performance of the service or is sold only as an inconsequential element of the nontaxable service provided.
- B. Gross receipts from the sale of tangible personal property, by a person engaged in a professional or personal service occupation or business, are not subject to tax if the property is sold only as an inconsequential element of the nontaxable service provided.
- C. Sales of tangible personal property are inconsequential elements of the service if:
 1. The purchase price of the tangible personal property to the person rendering the services represents less than 15% of the charge, billing, or statement rendered to the purchaser in connection with the transaction;
 2. At the time of the sale, the tangible personal property transferred is not in a form that is subject to retail sale; and
 3. The charge for the tangible personal property is not separately stated on the invoice.
- D. A person engaged in both a retail business and a service business shall keep records of purchases of tangible personal prop-

erty sufficient to establish whether the property was resold as a taxable retail sale.

Historical Note

Renumbered from R15-5-1805 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-105. Services in Connection with Retail Sales

Gross receipts from services rendered in addition to selling tangible personal property at retail are subject to tax unless the charge for service is shown separately on the sales invoice and records.

Historical Note

Renumbered from R15-5-1815 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-106. Finance Charges in Connection with Retail Sales

Gross receipts from finance, carrying charges, or interest charges incurred in connection with a retail sale of tangible personal property are not subject to tax if:

1. The charges are separately stated as part of the sales transaction; and
2. The charges result from the sale of such property on credit or under an installment contract.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).
 Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-107. Reserved**R15-5-108. Reserved****R15-5-109. Reserved****R15-5-110. Lease-purchase Agreements**

- A. Gross income derived from the leasing of tangible personal property under a lease-purchase agreement is subject to tax under the personal property rental classification.
- B. Payments received after the conversion from a lease to a purchase are subject to tax under the retail classification.
- C. Gross receipts from the sale of tangible personal property include conversion charges paid or incurred at the time the lease is converted to a purchase.

Historical Note

Renumbered from R15-5-1809 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-111. Consignment Sales

- A. The following definitions apply for purposes of this rule:
 1. "Consignee" means the party that is in the business of selling tangible personal property belonging to a consignor.
 2. "Consignor" means the party with the legal right to contract the services of the consignee to sell tangible personal property on behalf of the consignor.
- B. Gross receipts from consignment sales are subject to tax under the retail classification.
- C. A consignee shall obtain a transaction privilege tax license before making consignment sales.

Historical Note

Renumbered from R15-5-1808 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking

ing at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-112. Sales by Auctioneers

- A. Gross receipts from the sales of tangible personal property by an auctioneer are subject to tax under the retail classification.
- B. An auctioneer shall obtain a transaction privilege tax license prior to conducting an auction.

Historical Note

Renumbered from R15-5-1834 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-113. Sales by Trustees, Receivers, and Assignees

- A. Gross receipts from the sale of tangible personal property by a trustee, receiver, or assignee are subject to tax if the sale of the property in the hands of the owner would be subject to tax.
- B. Gross receipts from the sale of tangible personal property by a trustee, receiver, or assignee are not subject to tax if the sale of the property in the hands of the owner would not be subject to tax.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).
Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-120. Exempt Sales of Machinery or Equipment

- A. Machinery or equipment used in manufacturing or processing includes machinery or equipment that constitutes the entire primary manufacturing or processing operation from the initial stage where actual processing begins through the completion of the finished end product, processing, finishing, or packaging of articles of commerce. Manufacturing is the performance as a business of an integrated series of operations which place tangible personal property in a form, composition, or character different from that in which it was acquired and transforms it into a different product with a distinctive name, character, or use.
- B. Gross receipts from the sale of repair or replacement parts for exempt machinery or equipment are not subject to the tax under the retail classification. Repair or replacement parts are defined as those individual component and constituent items which, together, comprise exempt machinery or equipment.
- C. In establishing the exempt sale of machinery or equipment, the seller shall keep adequate documentation, pursuant to statutory requirements and as delineated in R15-5-2214, for the statutorily required period of time.

Historical Note

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Amended paragraphs (9) and (10) effective March 18, 1981 (Supp. 81-2). Renumbered from R15-5-1822 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-121. Sales of Fuel Used in Manufacturing

The sale of fuel used or consumed in a manufacturing process is taxable. The fuel is not considered to be incorporated into the manufactured product.

Historical Note

Renumbered from R15-5-1830 effective August 9, 1993 (Supp. 93-3).

R15-5-122. Articles Incorporated into a Manufactured Product

- A. Sales of articles to be incorporated into a fabricated or manufactured product are considered to be sales for resale and, therefore, exempt. For example, the sale of wood to a furniture manufacturer is a sale for resale.
- B. In order for the exemption to apply, the materials must actually become a part of the finished product. Supplies which are consumed in the manufacturing process do not qualify.

Historical Note

Renumbered from R15-5-1839 effective August 9, 1993 (Supp. 93-3).

R15-5-123. Sale of Tools and Supplies to Businesses

The sale of tools, supplies, and other articles to be used or consumed by persons in the operation of their businesses, and not for resale, are taxable as retail sales.

Historical Note

Renumbered from R15-5-1849 effective August 9, 1993 (Supp. 93-3).

R15-5-124. Reserved

R15-5-125. Reserved

R15-5-126. Manufacturing Labor

The cost of labor employed in manufacturing, processing, or fabricating tangible personal property shall not be allowed as a deduction from the gross receipts derived from a sale of such property.

Historical Note

Renumbered from R15-5-1848 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-127. Sales of Fuel

- A. In this Section, "aviation fuel" and "dyed diesel fuel" have the same meanings as prescribed in A.R.S. §§ 28-101 and 28-5601.
- B. Gross receipts from the sale of dyed diesel fuel are subject to transaction privilege tax.
- C. Gross receipts from the sale of liquefied petroleum gas or natural gas used to propel a motor vehicle are exempt from transaction privilege tax.
- D. Aviation fuel is subject to tax under A.R.S. § 28-8344 only.
- E. Gross receipts from the retail sale of jet fuel are subject to the jet fuel excise and use tax under A.R.S. § 42-5352.

Historical Note

Renumbered from R15-5-3004 and amended effective August 9, 1993 (Supp. 93-3). Section amended by final rulemaking at 10 A.A.R. 4480, effective December 4, 2004 (Supp. 04-4).

R15-5-128. Electric Power Transmission and Distribution

- A. Gross receipts from the sale of machinery, equipment, or transmission lines for direct use in a transmission system are deductible from the tax base. Gross receipts from the sale of machinery, equipment, or lines for use in a distribution system are taxable.
- B. Machinery and equipment used to facilitate the production of voltage up to and including 34,500 volts shall be considered part of a distribution system.
 - 1. Gross receipts from the sale of such equipment are subject to transaction privilege tax.

Department of Revenue - Transaction Privilege and Use Tax Section

2. If tangible personal property was purchased as exempt, subsequent nonexempt use shall subject the gross purchase price to use tax according to statutory provisions.
- C. Machinery and equipment used to facilitate the production of voltage above 34,500 volts shall be categorized as part of a transmission or distribution system based on the following definitions.
 1. "Transmission system" means:
 - a. All land, conversion structures, and equipment employed at a primary source of supply to change the voltage or frequency of electricity for the purpose of its more efficient or convenient transmission;
 - b. All land, structures, lines, switching and conversion stations, high tension apparatus and their control and protective equipment between a generating or receiving point and the entrance to a distribution center or wholesale point; and
 - c. All lines and equipment whose primary purpose is to augment, integrate, or tie together the sources of power supply.
 2. "Distribution system" means all land, structures, conversion equipment, lines, line transformers, and other facilities employed between the primary source of supply and of delivery to customers, which are not includible in a transmission system whether or not such land, structures, and facilities are operated as part of a transmission system or as part of a distribution system. Stations which change electricity from transmission to distribution voltage shall be classified as distribution stations.
 3. "Primary source of supply" means a generating station or point of receipt in the case of purchased power.
 4. Dual-use equipment shall be designated as follows:
 - a. If poles or towers support both transmission and distribution conductors, the poles, towers, anchors, guys, and rights-of-way shall be classified as a transmission system. The conductors, crossarms, braces, grounds, tie wire, insulators, and other similar tangible personal property shall be classified as transmission or distribution facilities, according to the purpose for which they are used.
 - b. If underground conduit contains both transmission and distribution conductors, the underground conduit and the right-of-way shall be classified as a distribution system. The conductors shall be classified as transmission or distribution facilities according to the purpose for which they are used.
 - c. Based on statutory provisions, transformers and control equipment utilized operationally at transmission substation sites are considered to be a part of a transmission system and, therefore, are exempt from transaction privilege and use tax.
- D. Machinery, equipment, or transmission lines for direct use in a transmission system are only those which are recorded as being part of a transmission system in accordance with the definitions in subsection (C).
 1. Gross receipts from the sale of such equipment are exempt from the tax.
 2. If such machinery and equipment is removed from inventory to be used as part of a distribution system, the purchase price is subject to use tax.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-129. Discounts, Refunds, and Coupon Redemption

- A. Cash discounts allowed the purchaser for timely payment are permissible as deductions from the sale price.
- B. Refunds in cash or credit given on returned merchandise are considered to be a reduction of sales.
- C. When coupons issued by a manufacturer are redeemed by a retailer the amounts refunded to the purchaser are not permissible as deductions from the selling price of articles sold by the retailer. In these cases, the gross selling price is taxable.
- D. Coupons issued by a retailer and later redeemed by the retailer as a discount on the price of merchandise sold by him are considered a reduction of the selling price. In such cases the net selling price is subject to tax.

Historical Note

Renumbered from R15-5-1840 effective August 9, 1993 (Supp. 93-3).

R15-5-130. Reserved**R15-5-131. Lay-away Sales**

Gross receipts from lay-away agreements shall be taxable when title or possession transfers to the purchaser or at the time receipts from the transaction are determined to be nonrefundable, whichever occurs first.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-132. Retail Sales with Trade-ins

- A. When a retailer accepts tangible personal property as a trade-in for part or full payment on the sale of tangible personal property, the dollar amount of the payment represented by the trade-in is deductible from the retailer's gross receipts from that sale.
- B. A trade-in deduction shall be limited to the amount of the retailer's gross receipts on that sale.
- C. When the property traded in is subsequently sold at retail, the gross receipts from the transaction are taxable.

Historical Note

Renumbered from R15-5-1818 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-133. Delivery Charges in Connection with Retail Sales

- A. A charge by a retailer for delivery from the retailer's location to the purchaser's location, if separately stated on the sales invoice, is not taxable.
- B. When the freight cost is incurred any time prior to the time of the retail sale, such cost is part of the gross sale and, therefore, subject to the tax.

Historical Note

Renumbered from R15-5-1820 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-134. Sales of Containers, Bottles, and Labels

- A. The sale of containers and bottles is considered a sale for resale only when the purchaser is to transfer the containers with their contents in future sales.
- B. In cases where the containers are not subsequently sold as part of the merchandise, such sales are deemed to be taxable retail sales.
- C. The sale of labels to a purchaser who affixes them to nonreturnable containers to be resold is considered to be a sale for resale and is not taxable.
- D. In cases where the containers are returnable and a new label is to be affixed, each time the container is refilled, the sale of the labels is also considered to be a sale for resale.

- E. The sale of analysis tags or other labels to be attached to containers of feed and sold along as part of the article is a sale for resale.
- F. However, the sale of items such as price tags, shipping tags, and advertising matter used in connection with the subsequent sale is taxable as a retail sale.

Historical Note

Renumbered from R15-5-1829 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-135. Sales of Restaurant Accessories

- A. Gross receipts from the sale of disposable containers, paper napkins, and other similar food accessories to a person engaged in the restaurant business, who, in the regular course of business, transfers these accessories to facilitate the consumption of the food, drink, or condiment provided, are considered gross receipts from sales for resale.
- B. Gross receipts from the sale of matchbooks, advertisement fliers, and other similar tangible personal property to a person engaged in the restaurant business, who transfers this property for the convenience, operation, or benefit of the restaurant business, are subject to tax.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).
Amended by final rulemaking at 13 A.A.R. 679, effective April 7, 2007 (Supp. 07-1).

R15-5-136. Returnable Containers

- A. Gross receipts from deposits on sales of returnable containers which contain taxable food shall be taxable.
- B. Deposit refunds paid to purchasers on the return of such containers shall be deductible from the retailer's tax base in the month refunded.
- C. Gross receipts from deposits received on returnable containers which contain non-taxable food shall not be taxable. Therefore refunds paid on such deposits shall not reduce the tax base.

Historical Note

Renumbered from R15-5-1833 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-137. Warranty or Service Provisions and Tangible Personal Property Used in Conjunction with Warranty or Service Provisions

- A. For purposes of this rule, the following definitions apply:
 1. "Covered" means included in the warranty or service provision.
 2. "Warranty or service provision" means a manufacturer's or vendor's warranty that is sold automatically with tangible personal property and, for no extra charge, applies to any tangible personal property used in the servicing of the provision.
- B. An exclusion from gross receipts is not allowed for a warranty or service provision on the sale of tangible personal property if the property cannot be sold without the acceptance of the warranty or service provision.
- C. A warranty or service provision is not considered a warranty or service contract under A.R.S. § 42-5061(A).
- D. Tangible personal property sold in conjunction with the servicing of a warranty or service provision, but not covered by the provision, is a sale of tangible personal property that is subject to tax under the retail classification unless statutorily exempt.
- E. Tangible personal property that is covered under a warranty or service provision and used in the servicing of the provision is not subject to use tax as the transaction privilege tax was paid when the tangible personal property was acquired.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).
Amended by final rulemaking at 13 A.A.R. 679, effective April 7, 2007 (Supp. 07-1).

R15-5-138. Warranty or Service Contracts and Tangible Personal Property Used in Conjunction with Warranty or Service Contracts

- A. For purposes of this rule, the following definition applies: "Covered" means included in the warranty or service contract for which the warranty or service contract holder does not pay a separate charge for any tangible personal property used in the servicing of the contract.
- B. Gross receipts from the sale of warranty or service contracts are not subject to tax when the contracts are sold as a distinct and separate item and the charge for the warranty or service contract is stated separately on a sales invoice.
- C. Tangible personal property sold in conjunction with the servicing of a warranty or service contract, but not covered by the contract, is a sale of tangible personal property that is subject to tax under the retail classification unless statutorily exempt.
- D. Tangible personal property that is covered under a warranty or service contract, and used in the servicing of the contract, is subject to use tax unless transaction privilege tax was paid when the tangible personal property was acquired or the tangible personal property is otherwise statutorily exempt.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).
Amended by final rulemaking at 13 A.A.R. 679, effective April 7, 2007 (Supp. 07-1).

R15-5-139. Reserved**R15-5-140. Reserved****R15-5-141. Reserved****R15-5-142. Reserved****R15-5-143. Reserved****R15-5-144. Reserved****R15-5-145. Reserved****R15-5-146. Reserved****R15-5-147. Reserved****R15-5-148. Reserved****R15-5-149. Reserved****R15-5-150. Sale of Photography**

- A. In this Section:
 1. "Motion picture" has the same meaning as prescribed in A.R.S. § 41-1517.
 2. "Motion picture production company" has the same meaning as prescribed in A.R.S. § 41-1517.
 3. "Photography" means the process of taking and supplying images to customers, using film, video, or another data storage medium.
 4. "Qualified motion picture production company" means a motion picture production company that holds a valid certificate issued pursuant to A.R.S. § 42-5009(H), establishing the company's qualification for the A.R.S. § 42-5061(B)(23) exemption.
- B. Gross income or gross proceeds derived from a sale of photography are subject to tax under this Article, unless, under A.A.C. R15-5-104(C), the sale of such photography is considered an inconsequential element of nontaxable activities that

are associated with the sale. Examples of nontaxable activities that are associated with a sale of photography include research; script consulting; director, crew, and equipment charges; preproduction or postproduction charges; location scouting fees; and music charges. Activities that are associated with the sale of photography are nontaxable if one of the following applies:

1. The vendor is engaged in both a professional or personal service occupation or a service business under A.R.S. § 42-5061(A)(1) and the business of selling photography at retail; or
 2. The activities are not part of the manufacture, creation, or fabrication of photography and are not otherwise subject to tax under another Article of this Chapter.
- C. Gross income or gross proceeds derived from a sale of photography used directly in motion picture production by a qualified motion picture production company are exempt from tax under this Article pursuant to A.R.S. § 42-5061(B)(23).

Historical Note

Renumbered from R15-5-1836 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-151. Artists

- A. Gross receipts from the sale of paintings, drawings, etchings, sculptures, craftwork, other artwork or reproductions of such items to final consumers shall be taxable under the retail classification if the person is making regular sales of these items.
- B. Gross receipts from the sale of paints, canvasses, frames, sculpture ingredients, and other items which will become an integral part of the finished product shall not be taxable if sold to a creating artist who is regularly engaged in the business of creating and selling paintings, drawings, etchings, sculptures, craftwork, other artwork, or reproductions of such items. Sales of brushes, easels, tools, and similar items to be consumed by the creating artist shall be taxable.
- C. Gross receipts from the sale by the creating artist of a painting, drawing, etching, sculpture, or a piece of craftwork that is not a reproduction of an original work shall not be taxable if:
 1. The sale is a casual sale pursuant to the definition in R15-5-1812; or
 2. The sale is of commissioned artwork by an individual artist. For purposes of this rule, "commissioned artwork" is a custom, one-of-a-kind art creation made by the individual artist pursuant to the particular requirements of a specific purchaser.

Historical Note

Adopted effective April 15, 1993 (Supp. 93-2). Section heading amended effective August 9, 1993 (Supp. 93-3).

Editor's Note: R15-5-1812, referenced in subsection (C)(1) above, was repealed. Please refer to R15-5-2001 for information about casual sales.

R15-5-152. Tangible Personal Property Used in Soil Remediation Activities

The gross receipts from the sale of tangible personal property incorporated or fabricated into any real property, structure, project, development or improvement under a contract specified in A.R.S. § 42-1310.16 (B)(6) are exempt from tax. The gross receipts from the sale of tangible personal property used in soil remediation activities but not incorporated or fabricated into any real property, structure, project, development or improvement are taxable.

Historical Note

Adopted effective December 11, 1998 (Supp. 98-4).

R15-5-153. Four-inch Pipes or Valves

Gross receipts from the sale of pipes, valves, or fire hydrants with an inside diameter of four inches or more are deductible from the tax base if the pipes, valves, or fire hydrants are to be used to transport oil, natural gas, artificial gas, water, or coal slurry.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-154. Computer Hardware and Software

- A. Gross receipts derived from services rendered in whole or in part in connection with the sale of computer hardware are exempt, including gross receipts derived from charges imposed for professional and technological services such as analysis, design, support engineering services, classroom instruction, and data conversion services.
- B. Except as provided in subsection (C), gross receipts derived from the sale of computer software programs are taxable, regardless of the method that a retail business uses to transfer the programs to its customers.
- C. Gross receipts derived from charges imposed for the following business activities originate from nontaxable service activities and are therefore not taxable:
 1. The original creation of an electronic data processing program for the specific use of an individual customer, or
 2. The modification of a prewritten computer software program for the specific use of an individual customer, if the charge for the modification is shown separately on the sales invoice and records.

Historical Note

Renumbered from R15-5-1853 effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 11 A.A.R. 2950, effective September 10, 2005 (Supp. 05-3).

R15-5-155. Reserved

R15-5-156. Sales of Prescription Drugs and Prosthetic Appliances

A. In this Section:

1. "Drug" means an article that, according to federal or state law, is:
 - a. Recognized in the official United States Pharmacopeia, official Homeopathic Pharmacopeia of the United States, official National Formulary, or any supplement to these documents; or
 - b. Intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals; or
 - c. Not food and is intended to affect the structure or any function of the body of humans or animals; or
 - d. Intended for use as a component of any article specified in subsections (a), (b), or (c).
2. "Drug on a prescription" means prescription drug.
3. "Food" means an article used for food or drink for humans or animals, chewing gum, or an article used as a component of such an article.
4. "Hearing aid" means any wearable device designed as a remedy or to compensate for defective human hearing, including parts, attachments, accessories, and earmolds.
5. "Legend drug" means a drug that 21 U.S.C. 353(b)(4)(A) requires to bear the symbol "Rx only" before dispensing.
6. "Nonprescription product" means a drug or other article that can be purchased by the final consumer of the drug or article without a prescription, regardless of whether purchased on the advice or recommendation of a member of the medical, dental, or veterinarian profession. Examples include over-the-counter drugs and those dietary supple-

Department of Revenue - Transaction Privilege and Use Tax Section

ments, vitamins, minerals, herbs, and other similar supplements that do not qualify as prescription drugs.

7. "Over-the-counter drug" means a drug that is subject to federal labeling requirements in 21 CFR 201.66.
 8. "Prescriber" means a member of the medical, dental, or veterinary profession authorized by federal or state law to prescribe a drug.
 9. "Prescription" means an order for a drug issued in any form.
 10. "Prescription drug" means a legend drug or a drug that, according to federal or state law, can be dispensed only:
 - a. Upon a written prescription of a prescriber for the drug;
 - b. Upon an oral prescription by the prescriber for the drug that federal or state law requires be reduced promptly to a form of writing by the prescriber and then filed by a pharmacist or the prescriber; or
 - c. By refilling a written or oral prescription if refilling is authorized by the prescriber for the drug either in the original prescription or by oral order that is reduced promptly to writing and then filed by a pharmacist or the prescriber.
 11. "Prescription eyeglasses" includes frames and other component parts of eyeglasses if purchased for use with prescription lenses.
 12. "Prosthetic appliance" means an artificial device that fully or partially replaces a part or function of the human body or increases the acuity of a sense organ.
- B.** Gross receipts from sales of the following kinds of tangible personal property are not subject to tax:
1. Prescription drugs, including those used in the course of treating patients;
 2. Medical oxygen, pursuant to A.R.S. § 42-5061(A)(8);
 3. Insulin, insulin syringes, and glucose strips, whether or not prescribed;
 4. Prosthetic appliances, prescribed or recommended by a statutorily-authorized individual;
 5. Durable medical equipment, pursuant to A.R.S. § 42-5061(A)(13);
 6. Prescription eyeglasses and contact lenses; and
 7. Hearing aids. Batteries and cords are subject to tax.
- C.** Gross receipts from the sale of component and repair parts for any tangible personal property that is exempt under either subsection (B) or (F) are not subject to tax.
- D.** If a written prescription or recommendation is required to purchase tangible personal property, a vendor of the property shall maintain the prescription or recommendation as part of the vendor's records. The vendor's records for documenting sales shall provide reasonable detail to allow the Department, upon inspection, to identify property as exempt.
- E.** Gross receipts from the sale to the final consumer of nonprescription products and those medical supplies or appliances not provided for under subsection (B) are subject to tax.
- F.** Gross receipts from the sale of nonprescription products or other medical supplies or appliances to doctors, dentists, or veterinarians are subject to tax unless the sale qualifies as a sale for resale and the doctor, dentist, or veterinarian is a retailer in the business of reselling the property.

Historical Note

Renumbered from R15-5-1819 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 11 A.A.R. 2952, effective September 10, 2005 (Supp. 05-3).

R15-5-157. Membership Fees

- A.** Membership, admission, or other fees charged by a limited-access retail business shall be considered part of the taxable gross income of the business activity.
- B.** For purposes of this rule, "a limited-access retail business" means a business which does not sell to the general public but which charges a membership fee or a membership due in order to obtain access to the business or to obtain discounts or preferential treatment in the purchase or rental of tangible personal property from or through the business.
- C.** Gross income shall not include separately billed amounts paid to secure ownership interests or rights in the business which can be transferred or assigned.

Historical Note

Renumbered from R15-5-3036 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-158. Postage Stamps

- A.** A retailer's gross receipts from the sale of postage stamps are not included in the tax base under the retail classification if the stamps are sold for the purpose of transporting mail.
- B.** A retailer's gross receipts from the sale of postage stamps are included in the tax base under the retail classification if the stamps are sold for any purpose other than transporting mail.
- C.** The Department shall presume that a postage stamp is sold for a purpose other than transporting mail if the postage stamp is sold for at least 50% more than its face value. A retailer may overcome the presumption; however, the burden of proof will remain on the retailer.
- D.** A retailer's gross receipts from the sale of cancelled postage stamps are included in the tax base under the retail classification.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 4112, effective October 4, 2000 (Supp. 00-4).

R15-5-159. Reserved**R15-5-160. Reserved****R15-5-161. Reserved****R15-5-162. Reserved****R15-5-163. Reserved****R15-5-164. Reserved****R15-5-165. Reserved****R15-5-166. Reserved****R15-5-167. Reserved****R15-5-168. Reserved****R15-5-169. Reserved****R15-5-170. Interstate and Foreign Transactions**

- A.** Gross receipts from sales of tangible personal property made in interstate or foreign commerce are deductible from the tax base if all of the following apply:
 1. The order is received from a location outside of Arizona; and
 2. The retailer ships or delivers the tangible personal property to a location outside of Arizona for use outside of Arizona.
- B.** In meeting the above requirements, if delivery is made by the retailer to a common carrier for transportation to a location outside Arizona, the common carrier is deemed to be the agent of the retailer for purposes of this rule regardless of who is responsible for payment of the freight charges.

Department of Revenue - Transaction Privilege and Use Tax Section

C. Suitable records shall be kept to substantiate the deduction for a sale made in interstate commerce. As such, records shall identify the tangible personal property sold and the delivery destination. The following records may be sufficient to substantiate the exemption:

1. Suitable records for substantiating the receipt of an order from out-of-state may include purchase orders, letters, or written memoranda on the receipt of orders placed by telephone.
2. Suitable records for substantiating out-of-state shipments include:
 - a. Internal delivery orders supported by receipts of expenses incurred in delivering the property and signed on the delivery date by the person who delivers the property;
 - b. Common carrier's receipt or bill of lading;
 - c. Parcel post receipt;
 - d. Export declaration;
 - e. Receipt from a licensed broker; or
 - f. Proof of export or import signed by a customs officer.

Historical Note

Renumbered from R15-5-1814 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-171. Sales to a Common Carrier

Gross receipts from sales made to a common carrier, engaged in interstate business, for delivery by the common carrier to a location outside of Arizona and for use outside of Arizona shall not be taxable if the order is received from a location outside of Arizona and the Arizona retailer prepays the freight charge.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-172. Sales by Florists

- A. Gross receipts from sales made by florists are taxable. Delivery and relay or transmittal charges, when separately stated, are deductible from the tax base.
- B. Orders received by an Arizona florist from an out-of-state customer for delivery within Arizona are taxable. Orders received by an Arizona florist by an out-of-state customer for delivery out-of-state are not taxable.
- C. When the florist conducts transactions through a delivery association, the following shall apply:
 1. Gross receipts from sales made by an Arizona florist, where the order is subsequently transmitted to another florist for filling and delivery, whether inside or outside of Arizona, are taxable.
 2. Gross receipts from sales by Arizona florists who deliver from a transmitted order of another florist, whether the ordering florist is inside or outside of Arizona, are not taxable.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-173. Sales of Property Subsequently Taken Out-of-state

Gross receipts from sales of tangible personal property by Arizona vendors made to purchasers who subsequently take the property out-of-state do not qualify as exempt unless otherwise specifically exempted by statute.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-174. Sales to Non-U.S. Citizens

Gross receipts from sales to non-U.S. citizens are subject to the tax unless otherwise exempt.

Historical Note

Adopted effective August 9, 1993 (Supp. 93-3).

R15-5-175. Expired**Historical Note**

Adopted effective August 9, 1993 (Supp. 93-3). Section expired under A.R.S. § 41-1056(J) at 22 A.A.R. 2054, effective March 31, 2016 (Supp. 16-3).

R15-5-176. Expired**Historical Note**

Adopted effective August 9, 1993 (Supp. 93-3). Section expired under A.R.S. § 41-1056(E) at 7 A.A.R. 2012, effective March 31, 2001 (Supp. 01-2).

R15-5-177. Reserved**R15-5-178. Reserved****R15-5-179. Reserved****R15-5-180. Sales by Businesses in Federal Areas**

Gross receipts from sales by businesses not operated by or as an agency of the Federal Government, located on military bases or other federal areas, are subject to tax.

Historical Note

Renumbered from R15-5-1825 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 13 A.A.R. 682, effective April 7, 2007 (Supp. 07-1).

R15-5-181. Governmental Organizations

- A. Gross receipts from the sale of tangible personal property to the state or its political subdivisions are taxable unless otherwise exempt. Gross receipts from the sale of tangible personal property to the Federal Government or its departments and agencies are taxable at the rate prescribed by statute, unless otherwise exempt.
- B. Gross receipts from the sale of tangible personal property by the state or its political subdivisions, when acting in a proprietary capacity, are taxable unless otherwise exempt.
- C. Gross receipts from the sale of tangible personal property by the Federal Government are not taxable.

Historical Note

Renumbered from R15-5-1803 and amended effective August 9, 1993 (Supp. 93-3).

R15-5-182. Nonprofit Organizations

- A. Gross receipts from the sale of tangible personal property to nonprofit churches, schools, and other nonprofit organizations are subject to tax unless otherwise exempt.
- B. Gross receipts from the sale of tangible personal property by a charitable nonprofit organization, recognized as such for income tax purposes by the Internal Revenue Service, are not subject to tax.
- C. For purposes of the statutory exemption and this rule, the Internal Revenue Service recognition of a charitable nonprofit organization is defined in Internal Revenue Code § 501(c)(3).

Historical Note

Renumbered from R15-5-1804 and amended effective August 9, 1993 (Supp. 93-3). Amended by final rulemaking at 13 A.A.R. 682, effective April 7, 2007 (Supp. 07-1).

R15-5-183. Exempt Sales to Health Organizations

Department of Revenue - Transaction Privilege and Use Tax Section

- A. Gross receipts from the sale of tangible personal property to qualifying hospitals, qualifying health care organizations, rehabilitation programs for mentally or physically handicapped persons, and qualifying community health centers are exempt from tax if such purchases are exempt from tax pursuant to statutory provisions.
- B. The Department may, upon review of the written request and any other information requested by the Department to make a proper determination, provide an Exemption Letter to organization meeting the statutory criteria. The Exemption Letter shall be valid for a period of 12 months from the first day of the month following the issue date of the Exemption Letter unless the organization's tax exempt status changes prior to the end of the 12-month period, or the organization misrepresented or omitted material information in its exemption request.
- C. Qualifying hospitals, qualifying health care organizations, rehabilitation programs for mentally or physically handicapped persons, and qualifying community health centers shall annually submit to the Department a written request for an Exemption Letter. The request shall be submitted at least 30 days prior to the first day of the exemption period. For purposes of this rule, "exemption period" means the 12-month period beginning on the first day of the month following the issue date of the Exemption Letter or the 12-month period requested by the organization.
1. Qualifying hospitals shall attach to their annual exemption request a copy of their current license issued by the Department of Health Services.
 2. Qualifying health care organizations shall attach to their exemption request letter the statutorily required annual financial audit and a copy of their Internal Revenue Code 501(c) recognition unless the Department has previously received a copy of this recognition.
 3. Rehabilitation programs for mentally or physically handicapped persons shall attach to their exemption request a copy of their Internal Revenue Code 501(c)(3) recognition unless the Department has previously received a copy of this recognition.
 4. Qualifying community health centers shall attach to their exemption request documentation supporting the statutory criteria and a copy of their Internal Revenue Code 501(c)(3) recognition unless the Department has previously received a copy of this recognition.

Historical Note

Renumbered from R15-5-1821 and amended effective August 9, 1993 (Supp. 93-3). Amended effective April 21, 1995 (Supp. 95-2).

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-402. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-403. Amusement Devices

Gross proceeds of sales or gross income from the operation of coin-operated and other devices that provide amusement are included in the tax base under the amusement classification. Examples include: devices that play prerecorded music, electronic games, pinball games, and billiard tables.

1. The tax base from the business of operating amusement devices is the gross amount received from the amusement devices without deduction for commissions paid, rental cost for the equipment, or other expenses.
2. The individual having direct control of the funds generated by the amusement devices shall pay the tax to the Department.

Historical Note

Amended effective September 22, 1997 (Supp. 97-3).
Amended by final rulemaking at 13 A.A.R. 682, effective April 7, 2007 (Supp. 07-1).

R15-5-404. Other Income

Gross receipts from the sale of programs, souvenirs, or any other items of tangible personal property are included in the tax base under the retail classification.

Historical Note

Amended effective April 21, 1995 (Supp. 95-2).
Amended effective September 22, 1997 (Supp. 97-3).

R15-5-405. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-406. Health or Fitness Establishments and Private Recreational Establishments

- A. The operator of a "health or fitness establishment" or a "private recreational establishment," as defined in A.R.S. § 42-5073(C), shall exclude from the tax base under the amusement classification all gross proceeds of sales or gross income from membership fees and initiation fees charged for the use of the establishment, or any portion of the establishment, for 28 days or more, and fees charged for the use of the establishment by bona fide accompanied guests of members. Any other fees for the use of a health or fitness establishment or a private recre-

ational establishment, or any portion of the establishment, are included in the tax base of the amusement classification.

- B. Gross proceeds of sales or gross income derived from other businesses that are located on the premises of a health, fitness, or recreational business shall not be considered when determining whether a health, fitness, or recreational business is a "health or fitness establishment" or a "private recreational establishment" if the other businesses are separate and independent from the health, fitness, or recreational business. Whether the other businesses are separate and independent depends upon the facts in each case. The Department considers several factors in making this determination including but not limited to the following:

1. Whether the business is open to both members and non-members;
2. Whether the primary purpose of the business is closely related to the primary purpose of the health, fitness, or recreational business;
3. Whether the business could exist without the health, fitness, or recreational business; and
4. Whether the business shares assets or employees with the health, fitness, or recreational business.

Historical Note

Amended effective September 22, 1997 (Supp. 97-3).
Amended by final rulemaking at 13 A.A.R. 682, effective April 7, 2007 (Supp. 07-1).

Repealed effective April 13, 1987 (Supp. 87-2).

ARTICLE 6. PRIME CONTRACTING CLASSIFICATION**R15-5-601. Taxpayer Bonds for Contractors**

- A.** For the purpose of this rule:
1. The principal place of business shall be Arizona if the licensee has continuously operated a facility with at least one full-time employee in Arizona for 12 consecutive months preceding the determination.
 2. A surety bond shall include a bond issued by a company authorized to execute and write bonds in Arizona as a surety or composed of securities or cash which are deposited with the Department of Revenue.
- B.** The businesses subject to these bonds are grouped in accordance with the standard industry classifications by average business activity. The business classes and bond amounts are as follows:
1. Two thousand dollars for:
 - a. General contractors of residential buildings other than single family;
 - b. Operative builders;
 - c. Plumbing, air conditioning, and heating, except electric;
 - d. Painting, paper hanging;
 - e. Decorating;
 - f. Electrical work;
 - g. Masonry stonework and other stonework;
 - h. Plastering, drywall, acoustical and insulation work;
 - i. Terrazzo, tile, marble and mosaic work;
 - j. Carpentry;
 - k. Floor laying and other floor work;
 - l. Roofing and sheet metal work;
 - m. Concrete work;
 - n. Water well drilling;
 - o. Structural steel erection;
 - p. Glass and glazing work;
 - q. Excavating and foundation work;
 - r. Wrecking and demolition work;
 - s. Installation and erection of building equipment;
 - t. Special trade contractors; and
 - u. Manufacturers of mobile homes.
 2. Seven thousand dollars for:
 - a. General contractors of single family housing;
 - b. Water, sewer, pipeline, communication and power-line construction.
 3. Seventeen thousand dollars for:
 - a. General contractors of industrial buildings and warehouses;
 - b. General contractors nonresidential buildings other than single family;
 - c. Highways and street construction except elevated highways.
 4. Twenty-two thousand dollars for heavy construction.
 5. One-hundred two thousand dollars for bridge, tunnel and elevated highway construction.
- C.** Except as provided in subsection (D) of this rule, any applicant whose principal place of business is outside Arizona or who has conducted business in Arizona for less than one year shall post a bond before the transaction privilege tax license shall be issued.
- D.** Any taxpayer subject to bonding requirements may submit a written request to the Director of the Department of Revenue for an exemption from the bond. The exemption request shall provide at least one of the following:
1. Any taxpayer who has been actively engaged in business for at least two years immediately preceding the exemption request may submit statements from an authorized state employee from each state in which the business has

been licensed in the last two years verifying that the taxpayer has, for at least two years immediately preceding the date of the statement, made timely payment of all sales taxes and other transaction privilege taxes incurred.

2. Two-year reporting history as described above in subsection (D)(1) and an explanation of good cause for late or insufficient payment of the tax;
 3. Documentation which verifies that no potential for Arizona tax liability exists;
 4. Bond for a previously issued Arizona transaction privilege license that adequately covers the licensee's expected transaction privilege tax liability for Arizona for both the previously issued license and for this license.
- E.** The bond shall not expire prior to two years after the transaction privilege license is issued. Upon lapse or forfeiture of any bond by any licensee, the licensee shall deposit with the Department another bond within five business days of the licensee's receipt of written notification by the Department.
- F.** Any licensee, who has had a bond posted for at least two years and fulfills any exception listed in subsection (D), or whose principal place of business becomes Arizona, may request a written waiver and that the bond be returned.

Historical Note

Former Section R15-5-601 repealed effective August 13, 1987 (Supp. 87-3). New Section R15-5-601 renumbered from R15-10-202 (Supp. 94-1).

R15-5-602. Expired**Historical Note**

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Correction, subsection (C), paragraph (2) as filed effective November 7, 1978, unless otherwise noted (Supp. 82-1). Section expired under A.R.S. 41-1056(E) at 17 A.A.R. 2692, effective September 28, 2011 (Supp. 11-4).

R15-5-603. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-804. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

ARTICLE 9. MINING CLASSIFICATION**R15-5-901. Definitions**

In addition to the definitions provided in A.R.S. § 42-5001, the following definitions apply to this Article:

1. "Mining" means operations involving the extraction of nonmetalliferous mineral products from beneath or at the surface of the earth for commercial use and includes underground, surface, and open-pit operations.
2. "Nonmetalliferous mineral product" has the same meaning as prescribed in A.R.S. § 42-5072.

Historical Note

Amended effective November 7, 1978 (Supp. 78-6).
Repealed effective August 13, 1987 (Supp. 87-3). New Section R15-5-901 renumbered from R15-5-903 and amended by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-902. General

- A. A person engaged in the business of mining is subject to tax under the mining classification on the gross proceeds of sales or gross income received from the sale of a nonmetalliferous mineral product to a purchaser that resells the product in the ordinary course of business.
- B. A person engaged in the business of mining is not subject to tax under the mining classification on the gross proceeds of sales or gross income received from the sale of a nonmetalliferous mineral product to a person engaged in business classified under the prime contracting classification if the nonmetalliferous mineral product is to be incorporated into a structure or project as part of the business.
- C. A person engaged in the business of mining is subject to tax under the retail classification on the gross income received from the sale of a nonmetalliferous mineral product to a final consumer.
- D. A person engaged in the business of mining shall not deduct from the tax base amounts paid as royalties.

Historical Note

Amended by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-903. Renumbered**Historical Note**

Section R15-5-903 renumbered to R15-5-901 by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-904. Manufacturing or Processing Service Charges

- A. A person engaged in the business of mining is subject to tax on the gross proceeds of sales or gross income from refining petroleum products, producing a combination of nonmetalliferous mineral products, as well as other manufacturing or pro-

cessing service charges derived from contracts with the owner of the products.

- B. A person who mines and processes nonmetalliferous mineral products is subject to tax on the gross proceeds of sales or gross income from the sale of the first marketable product. For example, a person who mines clay and processes the material into bricks is taxable on the gross proceeds of sales or gross income from the sale of the bricks.

Historical Note

Amended by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-905. Products Shipped Out of Arizona

- A. A person engaged in the business of mining that ships a nonmetalliferous mineral product out-of-state without making a sale in Arizona shall include in the tax base the market value of the nonmetalliferous mineral product before it enters interstate commerce.
- B. Unless otherwise provided in subsection (D), the taxpayer shall calculate the market value of a nonmetalliferous mineral product shipped out-of-state in the following manner:
 1. Establish the total selling price of the product outside Arizona.
 2. Deduct, from the total selling price, costs incurred out-of-state that increase the value of the product. These costs include:
 - a. The cost of actual freight paid, as provided in R15-5-908, to the point of sale outside Arizona;
 - b. The refining or processing cost incurred before the first sale; and
 - c. The cost of sales commissions, paid or accrued, in connection with the sale.
- C. The market value of the product shipped out-of-state shall not include the cost of processing if the processor has paid the Arizona transaction privilege tax on the gross proceeds of sales or gross income derived from the processing. (See R15-5-904.)
- D. A taxpayer may compute the market value of a nonmetalliferous mineral product shipped out-of-state in any manner that accurately reflects the value of the nonmetalliferous mineral product at the point it enters interstate commerce if the taxpayer gives prior written notification to the Department and the Department approves the computation method.

Historical Note

Amended effective March 18, 1981 (Supp. 81-2).
Amended effective June 18, 1987 (Supp. 87-2). Amended by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-906. Repealed**Historical Note**

Section repealed by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-907. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-908. Actual Freight Paid

- A. A person engaged in the business of mining may deduct from the tax base under the mining classification actual freight costs incurred in connection with the sale that are included in the sales price if the actual freight costs incurred are separately stated in the billing to its customer.
- B. A person engaged in the business of mining that does not separately state the actual freight costs incurred in the billing to the customer may still deduct the actual freight costs paid to a

Department of Revenue - Transaction Privilege and Use Tax Section

third party, provided the person keeps books and records to show separately the actual freight paid to the third party.

- C. A taxpayer shall not deduct the cost incurred by the taxpayer before a sale for freight from the mining or production location to the sales location.

Historical Note

Section repealed; new Section adopted by final rulemaking at 6 A.A.R. 2952, effective July 18, 2000 (Supp. 00-3).

R15-5-909. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

ARTICLE 10. TRANSACTION PRIVILEGE TAX -- TRANSIENT LODGING CLASSIFICATION

R15-5-1001. Application of the Definition of Transient for Purposes of Taxation under the Transient Lodging Classification

- A. Effective January 1, 1979, the leasing or renting of dwelling units and lodging facilities to a person shall not be taxable under the transient lodging classification if the lodging is obtained for a continuous block of time for 30 or more consecutive days except as provided under A.R.S. § 42-1310.10(B). For purposes of this rule, "person" has the same meaning as under A.R.S. § 42-1301.
- B. Gross receipts from providing lodging obtained for a continuous block of time for 30 or more consecutive days shall not be taxable under the transient lodging classification from the first day of occupancy.
1. Lodging obtained for 30 or more consecutive days in increments of time for a period of less than 30 consecutive days rather than for a continuous block of time shall be taxable under the transient lodging classification except as provided under A.R.S. § 42-1310.10(B).
 2. A lodger may originally acquire lodging on an incremental basis for a period of less than 30 consecutive days and subsequently change to a continuous block of time for 30 or more consecutive days; however, the lodging originally obtained on an incremental basis of less than 30 consecutive days shall remain subject to tax regardless of any subsequent action on the part of the lodger.
- C. If lodging is obtained on a continuous basis for 30 or more consecutive days but the person obtaining the lodging leaves before the 30-day period ends and only pays for a period of 29 days or less, the exclusion shall not apply. The gross receipts from providing lodging for 29 days or less shall be subject to tax under the transient lodging classification.
- D. The following situations are indicative of the application of the provisions in this rule:
1. A person rents a motel room on a weekly basis for 10 consecutive weeks. The total rental period is greater than 30 consecutive days; however, the method of renting by the week meets the definition of "transient." Gross receipts from renting lodging space on such a basis are subject to tax under the transient lodging classification.
 2. A motion picture company contracts with a hotel to rent a block of 15 rooms for a three-month period during which filming will occur in the area. During that three-month period, a variety of crew members and actors will occupy the rooms. Any one room may have a different occupant during the three-month time period as filming progresses and different actors or crew members are involved in the production of the film. The rental by the motion picture company for the three-month period is not subject to tax under the transient lodging classification since the motion

picture company contracted with the hotel to rent for a three-month period and, therefore, does not meet the definition of a transient.

3. An individual reserves a room in a rooming house for two weeks. The individual decides to stay another two weeks. The total number of days' stay is now at 28 days. Once again, the individual extends the stay by two weeks. Each time period is less than 30 days. Even though the total period of time is over 29 days, after the third extension of two weeks, the individual continues to be a transient for purposes of taxation under the transient lodging classification. If the individual had rented the room for 30 days or more after the first two weeks, gross receipts from the additional time would not be subject to tax. However, the first two-week block of time would remain taxable since that time period falls under the definition of transient.
4. An individual is not sure how long he will be staying at a hotel so, upon registration, gets the room for 35 days. After 21 days the individual decides to leave and pays only for the 21-day stay. Gross receipts are subject to tax under the transient lodging classification. If the individual had a contractual agreement in which, regardless of length of occupancy, he was required to pay for the entire 35 days, the gross receipts from such a transaction would not be taxable.

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3). New Section R15-5-1001 renumbered from R15-5-1614 (Supp. 94-2). Amended effective April 21, 1995 (Supp. 95-2).

R15-5-1002. Activities in Addition to Providing Lodging

- A. If a transient lodging facility is engaged in the business of providing lodging and engages in the business of providing meals, the gross receipts from lodging shall be separately stated and reported from the gross receipts from restaurant activities.
- B. Gross receipts from the providing of meals or room service shall be subject to tax under the restaurant classification.
- C. Gross receipts from the sale of tangible personal property by transient lodging facilities such as from magazine stands, gift shops, or in-room food or beverage bars shall be subject to tax under the retail classification.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section R15-5-1002 renumbered from R15-5-1615 (Supp. 94-2). Amended effective April 21, 1995 (Supp. 95-2).

R15-5-1003. Providing Lodging to Government Agencies

Gross receipts from providing transient lodging to the United States Government, the state or its political subdivisions, or any other government agency or its employees shall be taxable under the transient lodging classification unless otherwise exempt.

Historical Note

Adopted effective April 21, 1995 (Supp. 95-2).

ARTICLE 11. TRANSACTION PRIVILEGE TAX -- JOB PRINTING CLASSIFICATION

R15-5-1101. Definitions

For purposes of this Article, the following definitions apply:

1. "Image developing" means the copying or reproducing by a printer of an image by any means from film, paper, video, or another data storage medium to photographic print paper or another storage medium that can visually display the image.

2. "Job printing" means the copying or reproducing by a printer of documents or data directly or indirectly provided by the printer's customer, including by another person at the customer's direction, for the ultimate purpose of producing a physical or electronic copy of the document or data. The document or data can be textual or pictorial, and may be received by the printer in physical or electronic form. Examples of methods of job printing include dye sublimation, electrostatic printing, flexography, gravure, inkjet printing, laser printing, lithography, offset printing, optical scanning, photocopying, photofinishing, reprographic printing, screen printing, thermography, xerography, and similar means of duplication.
3. "Photography" means the process of taking and supplying images to customers, using film, video, or another data storage medium.
4. "Printer" means a person that copies or reproduces textual or pictorial material by any means, process, or method of job printing, engraving, embossing, or copying, but that does not distribute the copied or reproduced material on the person's own behalf.
5. "Printing" means a finished product in physical or electronic form produced by a printer through job printing, engraving, embossing, or copying and that is held for sale by the printer.
6. "Qualifying health care organization" has the same meaning as prescribed in A.R.S. § 42-5001(10).
7. "Qualifying hospital" has the same meaning as prescribed in A.R.S. § 42-5001(11).

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3). New Section made by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1102. Printer's Sale of Printing

- A. Except as otherwise provided in subsection (F) or other applicable A.R.S. § 42-5066(B) exemptions, gross income or gross proceeds derived from all of a printer's costs or expenses of filling a customer's printing order are subject to tax under this Article. Examples of costs or expenses include charges for set-up, die cutting, embossing, folding, and binding operations.
- B. Gross income or gross proceeds derived from an Arizona printer's sale of printing within Arizona are subject to tax even when the printer conducts the job printing, engraving, embossing, or copying activity outside the state, unless the printing is shipped or delivered outside the state for use outside the state.
- C. If a printer ships or delivers printing to be used outside the state to a common carrier for transportation to a location outside the state, the common carrier is deemed to be the agent of the printer for purposes of determining whether the printing has been shipped or delivered outside the state, regardless of who is responsible for payment of the freight charges.
- D. A printer may substantiate a shipment or delivery of printing outside the state by one of the following records:
 1. An internal delivery order that is supported by receipts for expenses incurred in delivery of printing and signed on the delivery date by the person who delivers the printing;
 2. A common carrier's receipt or bill of lading;
 3. A parcel post receipt;
 4. An export declaration;
 5. A receipt from a licensed broker; or
 6. Proof of export or import, signed by a customs officer.
- E. Except as provided in subsection (F) or other applicable A.R.S. § 42-5066(B) exemptions, gross income or gross proceeds derived from an Arizona printer's charges for the distribution of printing are generally subject to tax under this Article. In the absence of documentation listed in subsection (D), it remains the taxpayer's burden to substantiate that the gross income or gross proceeds derived from a sale of printing are not taxable because the printing is shipped or delivered outside the state for use outside the state, pursuant to A.R.S. § 42-5066(B)(2). A printer substantiates that printing is shipped or delivered outside the state for use outside the state if the printer shows that the address or number to which the printer distributes the printing does not identify or is incapable of identifying an in-state location.

tion of printing are generally subject to tax under this Article. In the absence of documentation listed in subsection (D), it remains the taxpayer's burden to substantiate that the gross income or gross proceeds derived from a sale of printing are not taxable because the printing is shipped or delivered outside the state for use outside the state, pursuant to A.R.S. § 42-5066(B)(2). A printer substantiates that printing is shipped or delivered outside the state for use outside the state if the printer shows that the address or number to which the printer distributes the printing does not identify or is incapable of identifying an in-state location.

- F. Pursuant to A.R.S. § 42-5066(B)(4), a printer may deduct its gross income or gross proceeds derived from charges for postage and freight if the printer separately states the charges on a customer's invoice and in the printer's records, except that the amount deducted shall not exceed the amount paid by the printer to the United States Postal Service or a commercial delivery service. A printer may not deduct its gross income or gross proceeds derived from charges for delivery of the printing using the printer's own conveyance.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section made by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 470, effective February 6, 2007 (Supp. 07-1).

R15-5-1103. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1104. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1105. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1106. Sale of Materials to a Printer

Sales to a printer of materials that do not become an ingredient or component part of a printing fall under the retail classification (see Article 1 of this Chapter) and are subject to tax unless otherwise exempt under A.R.S. § 42-5061. Examples of such materials include color process plates, electrotypes, film processing chemicals, printing plates, and wood mounts. In contrast, sales by the printer of any such materials that are job printed, engraved, embossed, or copied by the printer for the printer's customer constitute sales of printing and fall under this Article. An example is a printer's sale to a customer of a printing plate upon which the printer has performed job printing, engraving, embossing, or copying activity for the customer.

Historical Note

Amended by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1107. Repealed**Historical Note**

Amended effective November 7, 1978 (Supp. 78-6). Section repealed by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1108. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1109. Repealed**Historical Note**

Former Section R15-5-1109 repealed, new Section R15-5-1109 adopted effective March 18, 1981 (Supp. 81-2). Amended effective June 25, 1993 (Supp. 93-2). Section repealed by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1110. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1111. Miscellaneous Costs of a Printer Are Not Deductions

- A. A printer shall not deduct the cost of subletting job printing, engraving, embossing, or copying activities.
- B. A printer shall not deduct the cost of labor or materials employed in the job printing, engraving, embossing, or copying activity of another person.

Historical Note

Amended by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

R15-5-1112. Sale of Image Developing

- A. Gross income or gross proceeds derived from a sale of image developing in which the image developing is not part of a sale of photography are subject to tax under this Article.
- B. Gross income or gross proceeds derived from a sale of image developing to a business that resells the image developing are nontaxable under this Article.
- C. Gross income or gross proceeds derived from a sale of image developing either to a qualifying health care organization that uses the image developing solely to provide health and medical related educational and charitable services or to a qualifying hospital are nontaxable under this Article. An example is image developing of x-ray film or photographs.

Historical Note

Section repealed; new Section made by final rulemaking at 11 A.A.R. 5493, effective February 6, 2006 (Supp. 05-4).

ARTICLE 12. REPEALED**R15-5-1201. Repealed****Historical Note**

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-1202. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

ARTICLE 13. SALES TAX -- PUBLISHING CLASSIFICATION**R15-5-1301. Repealed****Historical Note**

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-1302. General

- A. The gross income derived from the business of publishing within the state is taxable under this classification. Gross income includes revenue from subscriptions, notices, and local advertising.

- B. Subscription income includes all circulation revenue. In determining the taxable base, however, there shall be excluded from such revenue those actual amounts retained by or credited to carriers and other vendors as compensation for delivery or sale of newspapers.

1. Carriers are defined as those persons who deliver newspapers to individual subscribers. Such deliveries are confined to a specific area or route.
2. Other vendors are defined as those persons who deliver newspapers to retailers such as news stands, convenience markets, drug stores and to coin-operated vending machines located in or near commercial establishments such as office buildings, hotels, motels, grocery and department stores.

- C. Income of publishers from sales of newspapers, whether directly or through other vendors, to news stands, convenience markets, drug stores or other retailers are taxable under this classification. The sales of newspapers by such retailers to consumers are taxable as retail sales. (See R15-5-1802(C))

Historical Note

Amended effective March 18, 1981 (Supp. 81-2).

R15-5-1303. Definitions

- A. A "publisher" is one who manufactures and distributes a publication from a point within this state.
- B. The term "publication" includes books, newspapers, magazines, music, periodicals, and any other literary work.
- C. Effective 9/12/75, the term "publication" shall specifically exclude books. Sales of books directly to a final consumer, however, are taxable under the retail classification (see Article 18).

R15-5-1304. Printing costs

The cost of printing a publication, including the subletting of printing to another person, is not deductible from the gross income.

R15-5-1305. Out-of-state distribution

Income from publications, other than books, mailed or distributed from a point within this state to a point outside the state is subject to the tax under this classification.

R15-5-1306. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

ARTICLE 14. TRANSPORTING CLASSIFICATION**R15-5-1401. Repealed****Historical Note**

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-1402. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1403. Repealed**Historical Note**

Repealed effective January 16, 1997 (Supp. 97-1).

R15-5-1404. Excess Baggage Charges

- A. Gross proceeds of sales or gross income from charges for excess baggage shipped from one point to another point in this state is included in the tax base under the transporting classification except as provided in subsection (B).
- B. Gross proceeds of sales or gross income from charges for excess baggage shipped by motor vehicle from one point to another point in this state is not included in the tax base under the transporting classification if a light motor vehicle fee imposed under A.R.S. § 28-5492 or a motor carrier fee

imposed under A.R.S. § 28-5852 is paid to the Department of Transportation on the vehicle used in the transporting.

Historical Note

Amended by final rulemaking at 6 A.A.R. 2594, effective June 12, 2000 (Supp. 00-2).

R15-5-1405. Demurrage Charges

Gross proceeds of sales or gross income from demurrage charges is included in the tax base under the transporting classification unless the transporting to which it relates is excluded from the transporting classification.

Historical Note

Amended by final rulemaking at 6 A.A.R. 2594, effective June 12, 2000 (Supp. 00-2).

R15-5-1406. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1407. Repealed

Historical Note

Repealed effective January 16, 1997 (Supp. 97-1).

R15-5-1408. Rental of Aircraft

- A. Gross proceeds of sales or gross income from transporting by aircraft freight or property from one point to another point in this state is included in the tax base under the transporting classification.
- B. A charge for the use of an aircraft when a pilot is not provided is rent. Gross proceeds of sales or gross income from the rental or leasing of aircraft is included in the tax base under the personal property rental classification unless a specific deduction or exclusion applies.

Historical Note

Amended by final rulemaking at 6 A.A.R. 2594, effective June 12, 2000 (Supp. 00-2).

ARTICLE 15. PERSONAL PROPERTY RENTAL CLASSIFICATION

R15-5-1501. Repealed

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-1502. General

- A. Gross income derived from the rental of tangible personal property is included in the tax base under the personal property rental classification unless a specific statutory exemption, exclusion, or deduction applies. Examples of tangible personal property include: televisions, cars, trucks, lawnmowers, floor polishers, tuxedos, uniforms, furniture, towels, and linens.
- B. In this Article, the terms "lease," "rental," and "leasing" are used synonymously.
- C. Gross income from the lease of tangible personal property to a lessee who subleases the property is not taxable under the personal property rental classification if the lessee is engaged in the business of leasing the property under the personal property rental classification.
- D. Gross income from the rental of tangible personal property includes charges for installation, labor, insurance, maintenance, repairs, pick-up, delivery, assembly, set-up, personal property taxes, and penalty fees even if these charges are billed as separate items, unless a specific statutory exemption, exclusion, or deduction applies.

Historical Note

Amended subsection (D) and added subsection (E) effective

March 18, 1981 (Supp. 81-2). Amended by final rulemaking at 6 A.A.R. 3091, effective July 18, 2000 (Supp. 00-3).

R15-5-1503. Sourcing of Leased Tangible Personal Property

A. In this Section:

1. "Business location" means the business address that appears on a lessor's privilege license, but if the lessor does not have a business address in Arizona, business location means the lessee's residential or primary business street address.
2. "Source" means to determine the location of leasing or renting activity for tax purposes.

- B. The personal property rental classification applies to a person who is engaging or continuing in the business of leasing or renting tangible personal property in Arizona for a consideration. Gross receipts from leasing or renting tangible personal property in Arizona are taxable under this classification.
- C. The Department shall source gross receipts from leasing or renting tangible personal property to the business location. Thus, gross receipts of a lessor without a business address in Arizona, derived from leasing or renting tangible personal property, are sourced to the lessee's residential or primary business street address and are taxable when the property is shipped, delivered, or otherwise brought into the state for use in Arizona.
- D. Gross receipts from leasing or renting tangible personal property are not taxable if the property is shipped or delivered outside of the state and intended, at the inception of the lease, for use exclusively outside of the state.
- E. Gross receipts from leasing or renting tangible personal property are not taxable if the property is removed from the state and used exclusively outside of the state. Intermittent use of tangible personal property outside of the state does not constitute removal of the property from the state for use exclusively outside of the state, and therefore does not change the business location of the property or liability for the tax. For example, use of a business's leased tangible personal property by its employees at different locations on business trips and service calls does not change liability for the tax.
- F. The burden of proof for establishing the applicability of subsection (D) or (E) is on the lessor.
- G. For leasing or renting activity related to a motor vehicle, the Department shall examine whether the motor vehicle is licensed, registered, or primarily used in Arizona.
- H. A taxpayer shall not take a deduction or credit for taxes paid in another state on a lease or rental of tangible personal property.

Historical Note

Amended by final rulemaking at 10 A.A.R. 3071, effective September 11, 2004 (Supp. 04-3).

R15-5-1504. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1505. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1506. Rental of Tangible Personal Property to Government Agencies

A lessor's gross income from the rental of tangible personal property to the United States Government, the state of Arizona, or other governmental subdivisions is taxable under the personal property rental classification unless a specific statutory exemption, exclusion, or deduction applies.

Historical Note

Amended by final rulemaking at 6 A.A.R. 3091, effective July 18, 2000 (Supp. 00-3).

R15-5-1507. Rental of Tangible Personal Property to Schools, Churches, and Other Nonprofit Organizations

A lessor's gross income from the rental of tangible personal property to a school, church, or other nonprofit organization is taxable under the personal property rental classification unless a specific statutory exemption, exclusion, or deduction applies.

Historical Note

Amended by final rulemaking at 6 A.A.R. 3091, effective July 18, 2000 (Supp. 00-3).

R15-5-1508. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1509. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1510. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1511. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-1512. Lease -- Purchase Agreements

- A. A lessor's gross income from the leasing of tangible personal property that includes an option to purchase the tangible personal property is taxable under the personal property rental classification until the lessee exercises the purchase option.
- B. Gross income received after the lessee exercises the purchase option is taxable under the retail classification.

Historical Note

Amended by final rulemaking at 6 A.A.R. 3091, effective July 18, 2000 (Supp. 00-3).

R15-5-1513. Repealed**Historical Note**

Adopted effective November 7, 1978 (Supp. 78-6). Section repealed by final rulemaking at 6 A.A.R. 3091, effective July 18, 2000 (Supp. 00-3).

ARTICLE 16. COMMERCIAL LEASE CLASSIFICATION**R15-5-1601. Definitions**

The following definitions apply for purposes of the rules in this Article, unless the context requires otherwise or unless otherwise defined.

1. "Agricultural property" means land or structures which are used for the purposes of growing crops or raising animals including agronomy, horticulture, viticulture, or animal husbandry.
2. "Economic unit of agricultural property" means agricultural property which is rented to the same lessee under one lease or rental agreement but may include more than one parcel or location which is functionally integrated.
3. "Real property used for commercial purposes" means land or structures, including parking lots but not including agricultural property or land or structures used for residential purposes.
4. "Rental" means renting or leasing

5. "Unit" means a single real property location rented or leased to a single tenant under one lease or rental agreement.

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3). New Section R15-5-1601 renumbered from R15-5-1603 and amended effective April 21, 1995 (Supp. 95-2).

R15-5-1602. Casual Leasing Activity

- A. For purposes of taxation under the commercial lease classification, there shall be no general exclusion for a casual rental of real property unless delineated under A.R.S. § 42-5059 except as provided in subsection (B) of this rule.
- B. For periods ending on or before July 31, 1988, the rental of one unit or real property shall have been deemed to be a casual activity and not subject to transaction privilege tax if:
 1. A lessor had income from another source which was unrelated to the income from the rental of real property and such income was of a significant amount so as to indicate that the rental activity was not the sole or main support of the lessor and
 2. The scope and degree of the rental activity clearly indicated that the rental activity was an investment activity rather than income from a business.
- C. For periods beginning on or after August 1, 1988, gross income from the rental of one or more units of real property used for commercial purposes shall be deemed to be a business activity and shall be taxable under the commercial lease classification.
- D. For periods prior to July 17, 1993, gross income from the rental of one economic unit of agricultural property shall not be taxable if the following conditions exist:
 1. A lessor had income from another source which was unrelated to the income from the rental of one economic unit of agricultural property and such income was of a significant amount so as to indicate that the rental activity was not the sole or main support of the lessor and
 2. The scope and degree of the rental activity clearly indicated that the rental activity was an investment activity rather than income from a business.
- E. For periods from and after July 17, 1993, gross income from the rental of agricultural property shall not be subject to tax if the conditions of A.R.S. § 42-5069(C)(12) are met.
- F. The following situations are indicative of the application of the general provisions of the commercial lease classification:
 1. A three-story office building is lease in its entirety to a large law firm. The building is one unit of property. Prior to August 1, 1988, the lessor of the office building was not considered to be engaged in business under the commercial lease classification if the conditions of subsection (A) existed. Commencing on or after August 1, 1988, the single rental of commercial real property is subject to tax under the commercial lease classification.
 2. Individual spaces in a small medical building are rented to three different members of the medical profession on separate leases. The property consists of three units. Regardless of the time period in which the rental occurred, the lessor in this situation has always been engaged in business under the commercial lease classification.
 3. A partnership is formed to hold one unit of real property for purposes of leasing. Income received from this activity is taxable since the partnership was formed for business purposes.
 4. Two hundred acres of farmland are leased to one tenant. The acreage is one economic unit of agricultural property.

Department of Revenue - Transaction Privilege and Use Tax Section

The lessor is employed as an engineer and leases the property as an investment. Regardless of the time period in which the lease occurred, the lessor of the property is not engaged in business under the commercial lease classification.

5. Two hundred acres of agricultural property are leased to five unrelated parties on separate leases. The property consists of five economic units of agricultural property. Regardless of the time period in which the leases occurred, the lessor is engaged in business under the commercial lease classification. Five separate lease agreements are not a casual activity and the lessor does not fall within any of the current exemptions under A.R.S. § 42-5069(C)(12).

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section R15-5-1602 renumbered from R15-5-1607 and amended effective April 21, 1995 (Supp. 95-2). R15-5-1602(A), (E) and (F)(5) corrected to reflect updated citation references to Arizona Revised Statutes (Supp. 06-4).

R15-5-1603. Renumbered**Historical Note**

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Section R15-5-1603 renumbered to R15-5-1601 effective April 21, 1995 (Supp. 95-2).

R15-5-1604. Gross Income

- A. Gross income under the commercial lease classification shall include all amounts paid to or on behalf of the lessor including but not limited to the following items:
 1. Rent;
 2. Property tax paid by the lessee either as reimbursement to the lessor or paid directly to the county assessor on the lessor's behalf;
 3. Insurance paid by the lessee either as reimbursement to the lessor or directly on the lessor's behalf;
 4. Common area maintenance charges paid by the lessee;
 5. Payments by the lessee for the promotion of the facility or of the lessee;
 6. Flat fees paid by the lessee for telephone and reception services, clerical services, library services, reproduction services or facsimile services when such services are contracted for as part of the lease or are obligatory under the lease;
 7. Utility connect/disconnect charges;
 8. Improvements to the leased property made on behalf of the lessor; or
 9. Reimbursement for utility service in excess of the actual amount charged by the utility company.
- B. Refundable deposits shall not be subject to tax at the time of receipt if such deposits are separate from gross receipts from commercial leasing and are maintained on the books and records of the lessor as a liability and not as income.
 1. Any portion of a refundable deposit which is retained by the lessor as a forfeited deposit shall be included in gross receipts subject to tax.
 2. Any portion of a refundable deposit which is not claimed by the tenant at the time the tenant departs shall be presumed to be abandoned property if not claimed within five years from the date of departure pursuant to A.R.S. Title 44, Chapter 3 and shall be reported and delivered as unclaimed property to the Department after the five-year period of time has elapsed.
 3. If amounts reported as income are claimed as refundable deposits, the burden of proof shall be on the taxpayer to

show that the income reported is not gross receipts subject to tax.

- C. Nonrefundable charges, such as cleaning charges, shall be included in gross income at the time of receipt.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). Adopted effective April 21, 1995 (Supp. 95-2).

R15-5-1605. Rental to Government Agencies

- A. Gross receipts from the rental of real property to the United States Government, state of Arizona, or any other government agency shall be taxable under the commercial lease classification unless otherwise exempt.
- B. For periods beginning May 24, 1990, and ending on March 31, 1993, the gross receipts from the rental of a single unit of real property to the United States Government shall not be subject to tax if the lessor did not have any other commercial lease income and either of the following conditions existed:
 1. The real property was listed on the National Register of Historic Places; or
 2. The real property was leased to the United States Postal Service for use as a postal facility.

Historical Head

Amended effective April 21, 1995 (Supp. 95-2).

R15-5-1606. Nonprofit Organizations

- A. Nonprofit organizations shall be subject to tax under the commercial lease classification for gross receipts from the rental of real property unless otherwise exempt.
- B. Leases of real property to nonprofit organizations shall be subject to tax under the commercial lease classification unless otherwise exempt.

Historical Head

Amended effective April 21, 1995 (Supp. 95-2).

R15-5-1607. Renumbered**Historical Note**

Amended effective November 1, 1976 (Supp. 76-5).
Amended effective November 7, 1978 (Supp. 78-6). Section R15-5-1607 renumbered to R15-5-1602 effective April 21, 1995 (Supp. 95-2).

R15-5-1608. Commercial property -- storage facilities

Income from the rental of storage facilities is taxable, provided the lessee retains the right of direct access to the stored goods. Conversely, the storage of property by a warehouse, when the warehouse proprietor maintains full control over the specific location of the stored goods within the building, is not taxable. Such storage is deemed to be a service rather than rental of real property.

R15-5-1609. Commercial property -- licensee agreements

When a department store enters into an agreement with a licensee to provide space within the store which does not give the licensee exclusive right to any specific area within the store, the income from such an agreement is not subject to tax. The transaction is deemed to be a licensee agreement rather than the subleasing of real property.

R15-5-1610. Expired**Historical Note**

Amended effective April 21, 1995 (Supp. 95-2). Section expired under A.R.S. § 41-1056(E) at 12 A.A.R. 4742, effective September 30, 2006 (Supp. 06-4).

ARTICLE 17. RESTAURANT CLASSIFICATION**R15-5-1701. Repealed****Historical Note**

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-1702. Repealed**Historical Note**

Amended effective November 7, 1978 (Supp. 78-6).

Repealed April 21, 1995 (Supp. 95-2).

R15-5-1703. Repealed**Historical Note**

Repealed effective March 18, 1981 (Supp. 81-2).

R15-5-1704. Providing Food or Drink to Government Agencies

A restaurant's gross proceeds of sales or gross income from sales of food or drink to the United States Government, the state or its political subdivisions, or any other government agency, or its employees is included in the tax base under the restaurant classification unless exempt as a sale to a qualifying hospital under A.R.S. § 42-5074(B)(7) or as a sale *for consumption within the premises of a prison, jail or other institution under the jurisdiction of the state department of corrections, the department of public safety, the department of juvenile corrections or a county sheriff* under A.R.S. § 42-5074(B)(9).

Historical Note

Amended effective December 16, 1997 (Supp. 97-4).

R15-5-1704 corrected to reflect updated citation references to Arizona Revised Statutes (Supp. 06-4).

R15-5-1705. Amusement Devices

A restaurant's gross proceeds of sales or gross income from the operation of amusement devices is included in the tax base under the amusement classification (see Article 4).

Historical Note

Amended effective December 16, 1997 (Supp. 97-4).

R15-5-1706. Cover Charges

A restaurant's gross proceeds of sales or gross income from a cover charge or other minimum charge is included in the tax base under the restaurant classification.

Historical Note

Amended effective December 16, 1997 (Supp. 97-4).

R15-5-1707. Repealed**Historical Note**

Repealed effective January 16, 1997 (Supp. 97-1).

R15-5-1708. Gratuities (Tips)

A. A restaurant's gross receipts from gratuities that are separately stated on the check or bill are not included in the restaurant's tax base if:

1. The exact amount charged on a check for gratuities is segregated on the seller's records for the account of the employees actually providing the services; and
2. The amounts so segregated are distributed directly to the employees providing the services for which the charges were made.

B. If a restaurant cannot specifically segregate the charges for gratuities or if any portion of the amounts charged for gratuities is not distributed to the employees involved, the total gross receipts from the gratuities are included in the tax base under the restaurant classification.

Historical Note

Amended effective December 16, 1997 (Supp. 97-4).

R15-5-1709. Coupon Redemption

A restaurant that accepts coupons is subject to transaction privilege tax on the full sales price of the food or beverage before the coupon value is deducted if the restaurant receives advertising, services, or products in exchange for providing the discounts.

Historical Note

Adopted effective November 7, 1978 (Supp. 78-6).

Amended effective December 16, 1997 (Supp. 97-4).

ARTICLE 18.1. SALES OF FOOD**R15-5-1860. Definitions**

For the purpose of these rules, unless the context requires otherwise, the following definitions will apply:

1. "Accessory food items" means coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments and spices, and other non-staple foods.
2. "Attendant" means a person, generally the employee of the retailer, who waits on the customers, or tends to their needs.
3. "Automatic retailer" means a coin operated mechanical device or system which sells tangible personal property. Such device or system must itself vend or sell the items, i.e., a device or system which delivers the subject of the sale, or by automatic action physically delivers the thing sold. Vending machines are considered automatic retailers.

Department of Revenue - Transaction Privilege and Use Tax Section

4. "Caterer" means a person engaged in the business of serving meals, food and drinks on the premises used by his customer, but does not include employees hired by the hour of day.
5. "Delicatessen" means a business which sells specialty food items, such as prepared cold meats, perishable food and grocery items kept under refrigeration.
6. "Facilities for the consumption of food" means appropriate furniture, tableware, or parking areas for sitting both in or on the premises of the business, either in or out of a motor vehicle.
7. "Food"
 - a. Under A.R.S. § 42-1387, the Department is required to promulgate rules defining food as those items that may be purchased from an eligible grocery business with food coupons, but in no event may such definition of food include food for consumption on the premises, alcoholic beverages or tobacco. Even though alcoholic beverages and food for consumption on the premises may be intended for human consumption, such items are not considered food by the statutory provisions. In these rules, items that are considered food by the Statutes, and therefore tax exempt if sold by a qualified retailer, shall be referred to as "tax exempt foods." Other items that may be intended for human consumption but are excluded from the definition of food by the Statute, and are therefore subject to the Sales Tax, shall be referred to herein as "taxable foods."
 - b. "Food" means: Items intended for human consumption. Food is deemed to be intended for human consumption when its intended or ordinary use is as a food for human consumption or is an ingredient used in preparing food for human consumption. For example, even though animal food may be used by some humans, its ordinary or intended use is not for human consumption. Also, even though vitamins and other medication may be ingested, its intended or ordinary use is as a health aid or therapeutic agent or a deficiency corrector and is not intended for use as food. Following is a numeration of items which the Department does not consider food for human consumption:
 - i. Pet food and supplies
 - ii. Cosmetics and grooming items
 - iii. Tobacco products
 - iv. Soaps and paper products and household supplies
 - v. Dietary supplements such as vitamins or protein supplements
 - vi. Medicines
 - vii. Fertilizer
8. "Food for consumption on the premises"
 - a. "Food for consumption on the premises" means the following:
 - i. Hot prepared food, including products, items or ingredients of food which are prepared and sold or are intended to be sold in a heated condition. This also includes a combination of hot and cold food items or ingredients if a single price is charged by the retailer.
 - ii. Hot or cold sandwiches including frozen sandwiches.
 - iii. Food served by an attendant to be eaten at tables, chairs, benches, booths, stools, counters and within parking areas (for in-car consumption).
 - iv. Food served with trays, glasses, dishes or other tableware. Food which is generally selected by the customer from available displays and then taken by the customer to a checkout stand for payment is not considered to be served by the retailer.
 - v. Beverages sold in cups, glasses or open containers. Beverages shall include items such as milk shakes and ice cream floats.
 - vi. Food sold by caterers.
 - vii. Food sold within the premises of theaters, exhibitions, fairs, amusement parks, bowling alleys, athletic events, and other shows or contests and any businesses which charge admission, entrance or cover fees for exhibition, amusement, entertainment or instruction. While food for consumption on the premises includes any food sold within the premises of certain businesses, including businesses that charge admission, entrance or cover fees for exhibition, amusement, entertainment or instruction, food for consumption on premises does not include sales of tax exempt food by a qualified retailer within the premises of a full time educational institution that charges tuition for a full course of studies.
 - b. Any item enumerated in subparagraph (a) which is sold on a take-out or to-go basis is still considered to be food for consumption on the premises and therefore taxable.
9. "Food intended for home consumption" means food, other than food for consumption on the premises, which is usually intended to be consumed at home. Unless the taxpayer can establish to the contrary, food delivered by a retailer to an office or other business establishment shall not be considered food intended for home consumption.
10. "Home" means a natural person's usual or habitual dwelling place, including rest homes, nursing homes, jails and other such institutions.
11. "Premises" means the total space and facilities, including buildings, grounds and parking lot that are made available for use by the retailer for the purpose of consuming food sold by such retailer.
12. "Qualified retailer"
 - a. A qualified retailer or qualified retail business is one that may be eligible to sell tax exempt food without including the sale of tax exempt food items in its taxable base. A retailer other than a qualified retailer must pay a tax measured by the sale of otherwise exempt food even though the sale of such items would be exempt if sold by a qualified retailer.
 - b. Qualified retailers are:
 - i. An eligible grocery business, which includes retailers who are eligible to participate in the United States Department of Agriculture Food Stamp Program, whether such retailer actually participates in the food stamp program. If a retailer is eligible to participate in the food stamp program, but does not participate in such program, such retailer may only be an eligible grocery business if the retailer first makes application to the Department to sell food tax exempt. Examples of retailers that might be considered eligible grocery businesses include:

Department of Revenue - Transaction Privilege and Use Tax Section

- (1) Grocery stores;
 - (2) Convenience stores;
 - (3) Butcher shops;
 - (4) Bakeries;
 - (5) Dairy stores;
 - (6) Cheese stores;
 - (7) Farmer's markets.
 - ii. Retailers whose primary business is not the sale of food, but who sell food in a manner similar to grocery stores. This category includes stores such as department stores, drug stores, and gas stations.
 - iii. Retailers who sell food and who do not provide any facilities for consumption of food on the premises. This category may include certain health food stores, and certain outlets retailing soda and other similar beverages in bottles or cans, but not cups.
 - iv. Delicatessen business, if such retailer conducts his business so that the sale of tax exempt foods and other taxable items may be separately accounted for, through, for example, the use of two (2) cash registers, or a cash register with at least two (2) tax computing keys which are used to record taxable and tax exempt sales.
 - v. A retailer who is a street or sidewalk vendor who uses a pushcart, mobile facility, motor vehicle, or other such conveyance. Such retailers include:
 - (1) Snackmobile;
 - (2) Chuck wagon;
 - (3) Mobile hot dog stands.
 - vi. Vending machines and other automatic retailers.
13. "Staple food" means those food items intended for home preparation and consumption, which includes meat, poultry, fish, bread and bread stuffs, cereals, vegetables, fruits, fruit and vegetable juices, and dairy products.
14. "Taxable foods" are items which may be intended for human consumption, but are still subject to the Sales Tax when sold. Examples of taxable foods would be alcoholic beverages, and food for consumption on the premises.
15. Tax-exempt foods
- a. "Tax exempt foods" are generally those items of food intended for home consumption which, if purchased from an eligible grocery business, would be eligible as of January 1, 1979, to be purchased with food coupons issued by the United States Department of Agriculture.
 - b. Tax-exempt food shall also include any new items of food intended for human consumption which would have been eligible for purchase with food coupons issued by the United States Department of Agriculture if such items would have existed for sale on January 1, 1979.
 - c. The following are examples of items which the Department will consider as tax exempt food:
 - bread and flour products
 - vegetables and vegetable products
 - candy and confectionery
 - sugar, sugar products and substitutes
 - cereal and cereal products
 - butter, oleomargarine, shortening and cooking oils
 - cocoa and cocoa products
 - coffee and coffee substitutes
 - milk and milk products
 - eggs and egg products
 - tea
 - meat and meat products
 - spices, condiments, extracts and food colorings
 - fish and fish products
 - frozen foods
 - soft drinks and soda (including bottles on which a deposit is required to be paid)
 - fruit and fruit products
 - packaged ice cream products
 - dietary substitutes
 - ice cubes and bottled water including carbonated and mineral water
 - purchases of seed and plants for use in gardens to produce food items for personal consumption
16. "Two tax computing keys" shall mean the mechanical or electronic function in a cash register which can separately record and accumulate taxable and nontaxable items without having the items presorted.
- Historical Note**
Adopted as an emergency effective June 30, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-3). Former emergency adoption now amended and adopted effective October 15, 1980 (Supp. 80-5).
- R15-5-1861. Repealed**
- Historical Note**
Repealed effective April 13, 1987 (Supp. 87-2).
- R15-5-1862. Restaurant food sales**
- A. Restaurants are generally not qualified retailers, and therefore cannot sell food tax free, but are taxable upon all of their gross income or gross proceeds of sale.
 - B. If a qualified retailer also operates a restaurant, the gross income or gross receipts of a sale from the two (2) activities must be kept separate. The gross receipts or gross income from the operation of the restaurant shall always be taxable, as will the income from all sales of taxable food and nonfood items. Except for items which may be exempt under some other provision, only tax-exempt foods sold by a qualified retailer not in connection with its restaurant operation shall be exempt.
 - C. To the extent that a delicatessen may sell taxable food, such as hot or cold sandwiches, such delicatessen will be required to report under this classification. Since a delicatessen business may constitute a qualified retailer, such business may still be eligible to sell tax exempt food, if such sales are separately accounted for.
- Historical Note**
Adopted as an emergency effective June 30, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-3). Former emergency adoption now amended and adopted effective October 15, 1980 (Supp. 80-5).

ARTICLE 20. GENERAL**R15-5-2001. Definitions**

The following definitions apply for the purposes of the rules in this Chapter, unless the context requires otherwise or unless otherwise defined. An individual rule may contain definitions which are specific to the context of that rule.

1. "Casual sale" means an occasional transaction of an isolated nature made by a person who is not engaged in the business of selling, within or without the state, the same type or character of property as that which was sold.
2. "Department" means the Arizona Department of Revenue.

3. "Gross income" means all receipts of a trade or business from sales or services. It includes the total consideration received or constructively received. The value of all services which are part of the sale is considered part of the gross income, unless statutorily excluded.
4. "Gross receipts" means gross receipts as defined in A.R.S. § 42-5001.
5. "Real property" means land and anything permanently affixed to land.
6. "Taxpayer" means any person required by law to file returns or to pay transaction privilege tax, use tax, rental occupancy tax, or excise taxes to the Department.
7. "Vendor" means any person engaged in a business which is subject to Arizona tax.

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3). New Section R15-5-2001 renumbered from R15-5-202 and amended effective October 14, 1993 (Supp. 93-4). R15-5-2001(4) corrected to reflect an updated citation reference to Arizona Revised Statutes (Supp. 06-4).

R15-5-2002. Liability for Transaction Privilege Tax

The transaction privilege tax is imposed directly on the person engaging in a taxable business within Arizona. The vendor shall be liable for the tax, regardless of whether or not the vendor passes on the economic burden of the tax to the customer.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section R15-5-2002 renumbered from R15-5-204 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2003. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-2004. Multi-location and Multi-business Taxpayers

- A. A taxpayer with multiple licenses for separate businesses shall maintain separate records for each licensed business.
- B. A tax is levied upon the privilege of engaging in specified businesses within Arizona. Class codes for reporting gross receipts subject to tax have been determined by the Department based on statutory provisions. Each business classification is independent of the others even when transacted under one license. A person who engages in more than one type of business under each license shall maintain books and records so that the gross proceeds of sales or gross income of each taxable business classification is shown separately.
- C. Failure to maintain appropriate books and records shall result in the imposition of the tax at the highest tax rate on gross proceeds of sales or gross income applicable to a classification under which the taxpayer is doing business.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section R15-5-2004 renumbered from R15-5-2215 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2005. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-2006. Repealed**Historical Note**

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-2007. Credit for Accounting and Reporting Expenses

- A. For purposes of this rule, the following definitions apply:

Department of Revenue - Transaction Privilege and Use Tax Section

1. "Reporting period" means a calendar month unless another period is authorized pursuant to A.R.S. § 42-1322.
 2. "Statutory delinquency date" means the date by which a payment of tax is considered delinquent pursuant to A.R.S. § 42-1322.
 3. "Tax return" means the Transaction Privilege, Use, and Severance Tax Return (TPT-1).
 4. "Taxable business" means a business which is subject to either transaction privilege or severance tax.
 5. "Taxpayer" means taxpayer as defined in A.R.S. § 42-1322.04(C), including an entity which is exempt from state income tax. The following are considered a single taxpayer:
 - a. Members of an Arizona affiliated group filing a consolidated corporate income tax return under A.R.S. § 43-947;
 - b. Corporations in a unitary business filing a combined corporate income tax return under A.A.C. R15-2-1131(E);
 - c. Married taxpayers operating separate sole proprietorships and filing a joint income tax return under A.A.C. R15-2-1131(E); or
 - d. Partnerships, S Corporations, trusts, or estates conducting multiple businesses, filing a single income tax return.
- B.** A taxpayer shall compute the credit, using the full amount of tax as required to be reported on the tax return, including any excess tax collected. The Department shall not allow a credit against taxes other than the state transaction privilege tax and the severance tax.
- C.** Except as provided in subsection (D), the Department shall not allow a credit if the taxpayer fails to pay the tax due before the statutory delinquency date. Failure to pay the tax due includes the following circumstances:
1. The taxpayer makes an underpayment of tax due, including any estimated tax due, or,
 2. The taxpayer's check is dishonored.
- D.** In the case of taxpayer computational error, the Department shall allow the credit based on the amounts originally filed, if the computational error resulted in the overpayment or underpayment of the tax actually due:
1. In the case of an overpayment, the Department shall allow the credit on the actual amount of tax due for the reporting period.
 2. In the case of an underpayment, the Department shall allow the credit on the amount of the tax paid prior to the statutory delinquency date.
- E.** To receive the credit for each reporting period, the taxpayer shall claim the credit on the tax return. If the taxpayer understates the amount of the credit on the tax return, the Department shall allow the amount of credit which the taxpayer has claimed. The taxpayer may file an amended return to claim any unclaimed portion of the credit if the taxpayer timely paid the tax upon which the credit is based. If the taxpayer overstates the amount of the credit, the Department shall allow the amount of credit actually permitted for the reporting period.
- F.** A taxpayer is entitled to one credit, regardless of the number of licenses, businesses, or locations the taxpayer may have. Taxpayers with multiple licenses for separate businesses or separate locations shall elect the manner in which to allocate the credit among their licenses within the \$10,000 annual limitation. The election shall be made on a form 51-T. The taxpayer shall file the election on or before January 15 of the first year for which an election is being made or within 30 days prior to beginning operations if the taxpayer is a new business entity. The taxpayer is required to file an election one time; however, a new election may be filed under the following circumstances:
1. If a taxpayer does not claim the entire \$10,000 credit during the calendar year, the taxpayer may amend the election at the end of the calendar year to reallocate the unclaimed portion of the credit for that particular year. This amended election shall be filed on or before January 31 of the following year. To claim the reallocated credit, the taxpayer shall file an amended tax return for each reporting period in which a sufficient tax was due and timely paid. For example: an individual owns three separate businesses with different transaction privilege tax licenses. At the beginning of the year, the individual allocates the \$10,000 credit as follows: \$3,000 to Company A; \$2,000 to Company B; and \$5,000 to Company C. At the end of the year, Companies A and B have claimed the credit up to their allocated amounts. However, Company C has only claimed \$1,000 of its allocated credit. Company A timely paid a sufficient amount of tax during the months of August and September to qualify for an additional \$4,000 credit. The individual may amend the election to reallocate the unclaimed credit to Company A. To claim the \$4,000 credit, the individual must file an amended tax return for Company A for the months of August and September.
 2. If a taxpayer acquires, sells, or terminates a taxable business during the calendar year, the taxpayer may amend the election at that time to reallocate the credit. The taxpayer shall only reallocate the portion of the credit which has not been claimed by the date on which the taxpayer acquires, sells, or terminates the business. The taxpayer shall ensure that the election relates to the acquired, sold, or terminated business and is made on a prospective basis only. The taxpayer shall notify the Department of the reallocation 30 days prior to the due date of the tax return for the reporting period to which the reallocation applies. For example: Corporation A is the common parent of Corporations B and C and elects to file a consolidated corporate state income tax return. Each of the three corporations conducts a taxable business activity. Since the three corporations file state income tax as one entity, Corporation A is required to allocate the \$10,000 credit among the three corporations. At the beginning of the year, Corporation A elects to allocate the entire \$10,000 credit to Corporation B. On July 1, Corporation A acquires Corporation D which also conducts a taxable business activity. Corporation A may amend its election at this time to take into account Corporation D. Corporation A may reallocate the portion of the credit not already claimed by Corporation B to Corporation D.
- G.** Where a taxpayer is allocating the \$10,000 credit, the following rules apply:
1. The Department shall allow a unitary business, filing a combined corporate state income tax return, or an Arizona affiliated group, filing a consolidated corporate state income tax return, one \$10,000 credit. The unitary business or affiliated group may allocate the credit among its members. If the unitary business or affiliated group fails to allocate the \$10,000 credit, the Department shall allocate the credit to the corporation in whose name the unitary business or affiliated group files its state income tax return regardless of whether the corporation conducts a taxable business.
 - a. If a corporation joins an Arizona affiliated group or unitary business during the calendar year, the

Department of Revenue - Transaction Privilege and Use Tax Section

Department shall classify the corporation as a separate taxpayer for the period before it joins the affiliated group or unitary business. The Department shall classify the corporation as the same taxpayer, an affiliated group, or unitary business for the period after it joins the affiliated group or unitary business. An affiliated group or unitary business may allocate the \$10,000 credit, even if a member corporation claimed the credit before it joined the affiliated group or unitary business.

- b. If a corporation leaves an affiliated group or unitary business during the calendar year, the Department shall classify the corporation as the same taxpayer, an affiliated group, or unitary business for the period before it leaves the affiliated group or unitary business. The Department shall not classify the corporation as the same taxpayer for the period after it leaves the affiliated group or unitary business. The corporation, as a separate taxpayer or part of a separate taxpayer, may allocate the \$10,000 credit, even if the corporation claimed the credit before it left an affiliated group or unitary business.
2. If a partnership, S corporation, trust, or estate conducts multiple taxable businesses, the Department shall allow the partnership, S corporation, trust, or estate one \$10,000 credit. The partnership, S corporation, trust, or estate may allocate the credit among its businesses. The credit shall not be allocated to the partners of a partnership, shareholders of an S corporation, or beneficiaries of a trust or estate.
3. In cases where the taxpayers are married and each spouse conducts a taxable business, the Department shall allow one \$10,000 credit per income tax return. If the married taxpayers file separate individual income tax returns, the Department shall allow each spouse one \$10,000 credit. If the married taxpayers file a joint income tax return, the Department shall allow one \$10,000 credit for the couple.

Historical Note

Renumbered from R15-5-3025 (Supp. 94-2). Amended effective August 13, 1996 (Supp. 96-3).

R15-5-2008. Reserved**R15-5-2009. Reserved****R15-5-2010. Transactions Between Affiliated Persons**

- A. For purposes of this rule, the following definitions apply:
 1. "Actual ownership" means direct ownership and control but does not include ownership by or through affiliated persons.
 2. "Affiliated persons" means members of the individual's family or persons who have ownership or control of a business entity.
 3. "Constructive purchase price" means the fair market value or, if the fair market value cannot be determined, the value established by expert appraisal that takes into consideration all factors relevant to the transaction.
 4. "Control of a business entity" means direct or indirect ownership or control of more than 50% of the business entity. The following guidelines, as to indirect ownership, shall apply for purposes of determining control of a business entity.
 - a. A corporation, partnership, estate, or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries.

- b. An individual shall be considered as owning directly or indirectly that portion which is owned by or for members of the individual's family.
- c. The ownership of stock by a corporation, partnership, estate, or trust shall be considered actual ownership to its shareholders, partners, or beneficiaries for purposes of making another individual a constructive owner.
- d. Ownership based on a family relationship shall not be treated as actual ownership by the related party for the purpose of making another individual a constructive owner.
5. "Fair market value" means the gross receipts that the transaction would have brought in the open market at a time and location similar to that of the affiliated party transaction and between a willing purchaser and a willing seller, who are not affiliated and have reasonable knowledge of the relevant facts.
6. "Members of the individual's family" means the relationship of spouse, brothers, and sisters, whether by whole or half blood and including adopted persons, ancestors, and lineal descendants.
- B. The tax shall be computed upon the constructive purchase price when:
 1. The transaction is between affiliated persons, and
 2. The facts and circumstances indicate that the reported gross receipts from the transaction are not indicative of the fair market value of the transaction.

Historical Note

Renumbered from Section R15-5-1850 and amended effective October 14, 1993 (Supp. 93-4). Corrected typographical error to reflect what was filed with the Office of Secretary of State October 14, 1993; changed "owner" to "owned" in subsection (A)(4)(a) (Supp. 97-1).

R15-5-2011. Bad Debts

- A. The deduction of a bad debt shall be allowed from gross receipts if the following conditions apply:
 1. The gross receipts from the transaction on which the bad debt deduction is being taken have been reported as taxable;
 2. The debt arose from a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money; and
 3. All or part of the debt is worthless.
- B. A debt shall be considered worthless if:
 1. The surrounding circumstances indicate that the debt is uncollectible; and
 2. Legal action to enforce payment has not or, in all probability, would not result in the satisfaction of the debt.
- C. The bad debt deduction shall be computed by subtracting the amounts received on the debt from the amount originally reported as taxable. The portion of the amounts received on the debt representing carrying charges, interest, and repossession expenses, which have not been reported as taxable, shall not be allowed as a bad debt deduction.
- D. A bad debt deduction shall be taken in the month in which the conditions of subsection (A) apply.
- E. A bad debt deduction shall be allowed, pursuant to the provisions in this rule, on conditional or installment sales if:
 1. The tax liability is paid on the full sales price of the tangible personal property at the time of the sale; or
 2. A contract or other financial obligation is sold to a third party as a sale with recourse and principal payments are made by the vendor to the third party, pursuant to the default of the original payor. Such principal payments

may be taken as a bad debt deduction if the tax was paid by the vendor on the original sale of the tangible personal property or on the subsequent sale of the financing contract.

3. For purposes of the bad debt deduction in situations of default on conditional or installment sales, a "sale with recourse" means that a vendor sells a contract or other financial obligation to a third party but retains liability for payment upon default of the original payor.

- F. Any recovery of a bad debt subsequent to a bad debt deduction shall be reported as taxable gross receipts when received.

Historical Note

Renumbered from Section R15-5-1813 and amended effective October 14, 1993 (Supp. 93-4). Corrected misspelling in subsection (E)(3) from "retails" to "retains" (Supp. 94-2).

ARTICLE 21. UTILITIES CLASSIFICATION

R15-5-2101. Repealed

Historical Note

Repealed effective August 13, 1987 (Supp. 87-3).

R15-5-2102. Renumbered

Historical Note

Renumbered to R15-5-3024 (Supp. 86-6).

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-2104. Interstate and Foreign Sales

A person engaged in business under the utilities classification may deduct from the tax base gross receipts from sales of electricity, gas, or water, delivered through transmission lines or pipelines to a point in another state or country, from a point in this state and used outside this state.

Historical Note

Amended effective October 17, 1997 (Supp. 97-4).

R15-5-2105. Locally Delivered Utilities

A person engaged in business under the utilities classification is subject to tax on the gross receipts from sales of electricity, gas, or water, produced outside this state that is delivered through transmission lines or pipelines to a point in this state, for use in this state unless an exemption applies.

Historical Note

Amended effective October 17, 1997 (Supp. 97-4).

R15-5-2106. Compressed and Bottled Liquids

The gross receipts from sales of bottled gases and bottled water are subject to tax under the retail classification unless otherwise exempt.

Historical Note

Amended effective March 18, 1981 (Supp. 81-2).

Amended effective October 17, 1997 (Supp. 97-4).

R15-5-2107. Sales to Irrigation Districts

A person engaged in business under the utilities classification is subject to tax on the gross receipts from producing and furnishing or furnishing electricity or gas to an irrigation district for the purpose of producing water for irrigation of farm lands or of lands subdivided for residential purposes which are entitled to irrigation water unless an exemption applies.

Historical Note

Repealed effective October 17, 1997 (Supp. 97-4).

R15-5-2109. Repealed

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2).

R15-5-2110. Security Deposits

Gross receipts from customer deposits that are held as security for payment of utility billings are not subject to tax until recognized as income. A deposit that is not applied to a customer's bill or refunded to a customer when utility services are discontinued shall be presumed to be abandoned property if the customer does not claim it within the period established under A.R.S. Title 44, Chapter 3. Customer deposits that are presumed to be abandoned property under A.R.S. Title 44, Chapter 3, shall be reported and delivered to the Department as unclaimed property. Amounts delivered to the Department as unclaimed property are not included in the tax base. For example:

1. A utility company requires a new customer to deposit \$150 before it provides utility service. The customer moves and notifies the utility company to discontinue service. The customer's final bill is \$130. The utility applies the deposit to the final bill and refunds \$20 to the customer. The amount applied to the utility bill is recognized as income and subject to tax. The amount refunded to the customer is not recognized by the utility as income and is not subject to tax.
2. A utility company requires a new customer to deposit \$150 before it provides utility service. The customer notifies the utility company to discontinue service. The customer's final bill is \$130. The utility applies the deposit to the final bill. The customer does not provide a forwarding address to the utility. Therefore, the utility company is not able to refund the remaining \$20 to the customer. The amount applied to the utility bill is recognized as income and subject to tax. The remaining \$20 is presumed to be abandoned property if not claimed under A.R.S. Title 44, Chapter 3. The amount presumed to be abandoned property shall be reported and delivered to the Department as unclaimed property under A.R.S. Title 44, Chapter 3. The amount delivered to the Department as unclaimed property is not recognized as income by the utility and is not subject to tax.

Historical Note

Amended effective October 17, 1997 (Supp. 97-4).

ARTICLE 22. TRANSACTION PRIVILEGE TAX - ADMINISTRATION

R15-5-2201. Display of License

- A. A person maintaining a public place of business in Arizona shall display the transaction privilege tax license in a location conspicuous to the public.
- B. If a person maintains more than one place of business in Arizona, a transaction privilege tax license shall be displayed at each location.
- C. For lessors engaged in the business of commercial leasing, a transaction privilege tax license shall be displayed in each location from which the lessor engages in business transactions.

Historical Note

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Amended effective October 15, 1980 (Supp. 80-5). Repealed effective February 22, 1989

Department of Revenue - Transaction Privilege and Use Tax Section

(Supp. 89-1). Section R15-5-2201 renumbered from R15-5-2203 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2202. Change in Ownership

- A. A transaction privilege tax or use tax license is issued to a specific person. The license shall not be transferred to the new owner when selling a business. The new owner shall apply to the state for a new license before engaging in business transactions.
- B. Court-appointed trustees, receivers, and others in cases of liquidation or operational bankruptcies shall obtain a transaction privilege tax or use tax license.
- C. If a licensee has any change in ownership, the licensee shall apply for a new license.

Historical Note

Repealed effective February 22, 1989 (Supp. 89-1). Section R15-5-2202 renumbered from R15-5-2205 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2203. Change of Name or Trade Name

If a change is made in the name or trade name under which the business is operating and the ownership remains the same, the taxpayer shall apply for a new license.

Historical Note

Section R15-5-2203 renumbered to R15-5-2201, new Section R15-5-2203 renumbered from R15-5-2206 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2204. Change of Business Location or Mailing Address

- A. The taxpayer shall apply for a new transaction privilege tax or use tax license if the physical location of the business changes.
- B. The taxpayer shall notify the Department in writing of a change in mailing address.

Historical Note

Amended effective October 15, 1980 (Supp. 80-5). Section R15-5-2204 repealed, new Section R15-5-2204 renumbered from R15-5-2207 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2205. Surrender of License upon Sale or Termination of Business

If a business is sold or terminated, the taxpayer shall notify the Department in writing of the date of sale or termination and shall surrender the transaction privilege tax or use tax license to the Department.

Historical Note

Amended effective November 7, 1978 (Supp. 78-6). Section R15-5-2205 renumbered to R15-5-2202, new Section R15-5-2205 renumbered from R15-5-2209 effective October 14, 1993 (Supp. 93-4).

R15-5-2206. Cancellation of License

- A. The Department may cancel a license if:
 - 1. During any consecutive 12-month period, the licensee reports no taxable transaction; and
 - 2. The licensee is not a subcontractor or wholesaler.
- B. The Department shall notify a licensee in writing of its intention to cancel the license. The notice shall explain the action the licensee may take to contest cancellation of the license and when cancellation is final.
- C. The Department shall cancel a license 30 days after the notice of intention to cancel is mailed unless, within 30 days, the licensee objects to the cancellation in writing and produces documentation that the licensee is actively engaged in a tax-

able business. Suitable documentation includes, but is not limited to, the following:

- 1. Evidence that the licensee holds an inventory of raw or finished tangible personal property for sale or resale;
- 2. Evidence that the licensee maintains segregated bank accounts for the purpose of transacting business;
- 3. Bona fide contracts for future sale or resale of tangible personal property;
- 4. Profit and loss statements for federal or state income tax purposes; or
- 5. Evidence that the licensee otherwise actually engages in bona fide business activities.

- D. Within 30 days of receipt of the licensee's objections and documentation, the Department shall notify the licensee in writing of its decision to cancel or retain the license. If the decision is to cancel the license, the licensee may request an administrative hearing.

Historical Note

Section R15-5-2206 renumbered to R15-5-2203, new Section R15-5-2206 renumbered from R15-5-3018 effective October 14, 1993 (Supp. 93-4).

R15-5-2207. Taxpayer Bonds

- A. The amount of the bond required under A.R.S. § 42-112 shall be the greater of five hundred dollars, or:
 - 1. For licensees reporting monthly, four times the average monthly tax liability;
 - 2. For licensees reporting quarterly, six times the average monthly tax liability; or
 - 3. For licensees reporting annually, fourteen times the average monthly tax liability.
- B. For purposes of determining the bond amount, the average monthly tax liability is equal to the average monthly tax due from the licensee for the preceding six consecutive months. If an applicant does not have a six-month payment history, the bond amount shall be a minimum of five hundred dollars.
- C. If a licensee provides a surety bond and the bond lapses, the licensee must deposit with the Department cash or other security in an amount equal to the lapsed surety bond within five business days of the licensee's receipt of written notification by the Department.
- D. The bond amount may be increased or decreased as necessary based upon a change in the licensee's previous filing period, filing compliance record, or payment history. If the bond amount has been increased above the amount computed under subsection (B) of this rule, the licensee may request a hearing pursuant to A.R.S. § 42-112 to show why the order increasing the bond amount is in error.

Historical Note

Former Section R15-5-2207 renumbered to R15-5-2204 effective October 14, 1993 (Supp. 93-4). New Section R15-5-2207 renumbered from R15-10-201 (Supp. 94-1).

R15-5-2208. Expired**Historical Note**

Repealed effective October 14, 1993 (Supp. 93-4). New Section made by exempt rulemaking at 16 A.A.R. 1226, effective June 15, 2010; Section number corrected at request of Department, Office File No. M11-118, filed March 31, 2011 (Supp. 10-2). Section expired under A.R.S. § 41-1056(E) at 18 A.A.R. 1652, effective March 31, 2012 (Supp. 12-2).

R15-5-2209. Renumbered

Department of Revenue - Transaction Privilege and Use Tax Section

Historical Note

Section R15-5-2209 renumbered to R15-5-2205 effective October 14, 1993 (Supp. 93-4).

R15-5-2210. Collection of Tax by the Vendor

- A.** The vendor may pass on the economic burden of the transaction privilege tax, either as an unspecified portion of the overall selling price or as a separate and distinct item of charge.
1. If a vendor elects to pass on the economic burden of the tax as a separate and distinct item of charge, the vendor's tax base shall not include any collected state, county, city, or town taxes.
 2. If the vendor does not pass on the tax as a separate and distinct item of charge, the vendor may factor out the tax. See R15-5-2210.01.
 3. The amount of tax on a transaction shall be the same whether the tax is stated as a separate and distinct item of charge or the tax is calculated using the factoring method.
 4. Calculation of the amount of the tax using the separate and distinct item of charge method shall be as follows:

Price of tangible personal property	\$100
Multiply the price by the applicable tax rate	
\$100 times 5% equals the tax as calculated	\$5
Total cost to the consumer	\$105
- B.** All taxes collected shall be remitted to the Department and applicable taxing jurisdictions. If a vendor has collected tax in excess of the tax liability for the reporting period, the excess tax shall also be remitted.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section adopted effective October 14, 1993 (Supp. 93-4). Reference correction (Supp. 95-2).

R15-5-2210.01. Factoring

"Factoring" means a method by which the taxpayer may determine the amount of the tax when the tax is collected as an unspecified part of the selling price.

1. The taxpayer may use any factoring method resulting in a tax amount equal to the tax as calculated using the separate and distinct item of charge method.
2. The following factoring method is approved and recommended by the Department.

To calculate the tax under the factoring method, the total cost to the consumer is divided by one plus the cumulative amount of the state and applicable county, city, and town tax rates, stated as a decimal. The result of this calculation is then multiplied by the cumulative tax rate to arrive at the amount of the tax on the sale. The gross receipts subject to tax, plus the cumulative tax on that amount, shall equal the total cost to the consumer.

To factor:

Total cost to the consumer	\$105
Divide the total cost to the consumer by 1 plus the tax rate (1.00 plus .05)	
\$105 divided by 1.05 equals the price of tangible personal property	\$100
Tax as calculated (\$100 times 5%)	\$5

Historical Note

New Section adopted effective October 14, 1993 (Supp. 93-4).

R15-5-2211. Election of Basis to Report and Pay Taxes

- A.** For purposes of this Section, the following definitions apply:

1. "Accrual method" means that a sale is reported in the reporting period in which the sale occurs regardless of when payment is received.
 2. "Cash receipts method" means that a sale is reported in the reporting period in which payment is received.
 3. "Method of reporting" means a method to report and pay transaction privilege tax.
 4. "Payment" means all consideration received including cash, credit, property, and services.
 5. "Reporting period" means a calendar month or as prescribed by A.R.S. § 42-5014.
- B.** A taxpayer shall elect a method of reporting based on either the accrual or the cash receipts method at the time of making the application for a transaction privilege tax license or use tax registration.
- C.** A taxpayer shall report allowable exclusions, deductions, and exemptions in a manner consistent with the method of reporting elected under subsection (B).
- D.** A taxpayer shall provide written notification to the Department prior to changing its method of reporting elected under subsection (B). The Department may audit the books of the taxpayer to adjust any tax liability resulting from the change in the method of reporting.

Historical Note

Repealed effective July 23, 1985 (Supp. 85-4). New Section renumbered from R15-5-2213 and amended effective October 14, 1993 (Supp. 93-4). Amended by final rulemaking at 14 A.A.R. 3616, effective November 8, 2008 (Supp. 08-3).

R15-5-2212. Expired**Historical Note**

Repealed effective July 23, 1987 (Supp. 85-4). New Section R15-5-2212 renumbered from Section R15-5-3005 and amended effective October 14, 1993 (Supp. 93-4). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 2207, effective March 30, 2017 (Supp. 17-3).

R15-5-2213. Alternative Reporting

- A.** The Department shall authorize taxpayers to report on an annual or quarterly basis, if the taxpayer has established a filing history that shows that the taxpayer is not currently delinquent and that the taxpayer's annual tax liability is between \$500 and \$1,250 for quarterly reporting or \$500 or less for annual reporting.
- B.** The Department shall authorize new businesses that reasonably estimate their annual tax liability for the succeeding 12 months will be between \$500 and \$1,250 to report and remit tax on a quarterly basis.
- C.** A taxpayer shall increase the reporting frequency to monthly and notify the Department of the change in reporting if the taxpayer's annual tax liability equals or exceeds or can reasonably be expected to equal or exceed \$1,250. The taxpayer shall increase the reporting frequency to quarterly and notify the Department of the change in reporting if the taxpayer's annual tax liability exceeds or can reasonably be expected to exceed \$500, but is or will be less than \$1,250. Failure to increase reporting frequency will subject the taxpayer to interest. Failure to increase reporting frequency will also subject the taxpayer to penalties unless the taxpayer can show that the failure was due to reasonable cause and not willful neglect.
- D.** A taxpayer shall begin to report on a monthly basis at any time during a 12-month period if the annualized tax liability for the taxpayer reporting on an annual or quarterly basis equals or exceeds \$1,250. A taxpayer shall begin to report on a quarterly basis at any time during a 12-month period if the annualized

Department of Revenue - Transaction Privilege and Use Tax Section

tax liability for the taxpayer reporting on an annual basis is expected to exceed \$500, but be less than \$1,250.

Historical Note

Former Section R15-5-2213 renumbered to R15-5-2211, new Section R15-5-2213 adopted effective October 14, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 5065, effective October 5, 2001 (Supp. 01-4).

R15-5-2214. Establishing the Right to a Deduction by Use of a Certificate or Other Documentation

- A.** The vendor is responsible for the payment of tax and therefore shall provide sufficient documentation in support of all deductions.
- B.** The vendor may establish a deduction or exclusion from the tax base pursuant to A.R.S. § 42-1316 or 42-1328.
 1. If the purchaser does not have a valid license number, the purchaser shall indicate the reason on any certificate.
 2. Marking an invoice may be done either by recording the purchaser's transaction privilege tax license number on the invoice or by cross referencing the specific transaction to the specific exemption certificate of the specific purchaser.
 3. The Department has prescribed a certificate for establishing entitlement to statutory deductions. Reproductions of the blank prescribed original certificate shall be acceptable for use.
 4. The appropriate certificate shall be accurately and fully completed by the purchaser.
 5. If the vendor has reason to believe that the information contained in the certificate is not accurate, complete, or applicable to the transaction, the vendor may refuse to accept the certificate.
 6. If at any time the vendor has reason to believe that the certificate is not applicable to a transaction, the vendor may refuse to honor the certificate for that transaction.
 7. The Department may challenge the certificate as accepted by the vendor if the Department has reason to believe that the information in the certificate is incomplete, inaccurate, or if the exemption claimed is not based on statutory provisions. The burden of proof lies with the Department when a vendor accepts a completed departmental certificate and marks the applicable invoice pursuant to statute.
- C.** A blanket certificate may be accepted if the vendor and purchaser agree. The blanket certificate may continue in force, for applicable transactions, for a period of time as set forth on the certificate. For purposes of this rule, a blanket certificate is one which covers the indicated type of transaction over a specified period of time.
 1. The vendor may refuse to honor a blanket certificate and shall cancel such a certificate if, at any time, the vendor has reason to believe that the information contained in the certificate is no longer accurate or complete or no longer applies.
 2. A new, accurate, and complete certificate may then be accepted.
- D.** Documentation, including a certificate other than a departmental certificate, may be accepted by the vendor to establish the right to a deduction.
 1. If the vendor accepts a form of documentation other than a completed departmental certificate, the burden of proof remains with the vendor to establish the right to the deduction.
 2. Other documentation necessary to establish a deduction from the tax base shall contain the information required by A.R.S. § 42-1316(A).

- E.** Documentation or a certificate to establish a deduction from the tax base shall be provided for each transaction or if a blanket certificate is used for each different exemption category.
- F.** The vendor shall retain all documentation for the required statutory period pursuant to A.R.S. § 42-113.

Historical Note

Repealed effective April 13, 1987 (Supp. 87-2). New Section R15-5-2214 adopted effective October 14, 1993 (Supp. 93-4).

R15-5-2215. Return and Payment of Tax-estimated Tax

- A.** For purposes of this rule, the following definitions apply:
 1. "Annual estimated tax payment" means ½ of the total tax liability for the entire month of May or the total tax liability for the first 15 days of the month of June.
 2. "Annual tax liability" means a total tax liability of \$100,000.00 or more in the preceding calendar year or a reasonable anticipation of a total tax liability of \$100,000.00 or more in the current year.
 3. "Taxpayer" has the meaning set forth in A.R.S. § 42-1322(J). The following are considered a single taxpayer:
 - a. Members of an Arizona-affiliated group filing a consolidated corporate income tax return under A.R.S. § 43-947;
 - b. Corporations in a unitary business filing a combined corporate income tax return under A.A.C. R15-2-1131(E);
 - c. Married taxpayers operating separate sole proprietorships and filing a joint income tax return; or
 - d. Partnerships, Limited Liability Companies, S Corporations, trusts, or estates conducting multiple businesses, filing a single income tax return.
 4. "Total tax liability" means the combined total of the transaction privilege tax, telecommunications services excise tax, and county excise tax liabilities.
- B.** The requirement to make an annual estimated tax payment is based on the annual tax liability. Use tax and severance tax are not subject to the estimated tax provisions.
 1. A taxpayer shall make an annual estimated tax payment if during the current calendar year the taxpayer, through use of ordinary business care and prudence, can anticipate incurring the annual tax liability. For example:

ABC Company has been selling home electronics for several years. Its tax liability for previous calendar years has averaged between \$60,000 and \$70,000. In February of the current year, ABC Company begins selling computers and accessories as well. Early sales reports show an increase in total sales of approximately 50%. Based on these facts, ABC Company can reasonably anticipate incurring the annual tax liability.
 2. Taxpayers with multiple locations shall make the annual estimated tax payment based on the combined actual or anticipated annual tax liability from all locations. Taxpayers with multiple locations, shall make a single estimated payment each June.
- C.** A taxpayer shall not amend an annual estimated tax payment except to increase the amount of the payment.
- D.** The annual estimated tax payment shall not be applied, credited, or refunded until a Transaction Privilege, Use, and Severance Tax Return (TPT-1) for the month of June is filed.
- E.** Late payment, underpayment, or non-payment of the annual estimated tax payment shall result in the following:
 1. Application of the penalty provisions under A.R.S. § 42-136;

Department of Revenue - Transaction Privilege and Use Tax Section

2. Accrual of interest beginning from the due date of the annual estimated tax payment as prescribed in A.R.S. § 42-1322(D); and
3. Loss of the accounting credit, as defined in A.R.S. § 42-1322.04 for the June reporting period.

F. Taxpayers who are not required to make the annual estimated tax payment but make a voluntary annual estimated payment are not subject to subsection (E).

Repealed effective September 24, 1986 (Supp. 86-5).

R15-5-2219. Renumbered**Historical Note**

Renumbered to R15-5-3005 effective July 23, 1985 (Supp. 85-4).

R15-5-2220. Registration and Licensing

- A.** Out-of-state vendors making sales to Arizona purchasers shall obtain a use tax license from the Department.
- B.** Use tax collected on an isolated sale to an Arizona customer may be remitted under a cover letter rather than on a standard report form.

Historical Note

Repealed effective July 23, 1985 (Supp. 85-4). New Section R15-5-2220 renumbered from R15-5-2363 and amended effective October 14, 1993 (Supp. 93-4).

R15-5-2221. Remittal of Use Tax on Purchases from Unlicensed Retailers

- A.** Arizona purchasers regularly making purchases from unlicensed vendors, where the purchases are subject to use tax, shall obtain a use tax license and remit payments directly to the Department.
- B.** An Arizona purchaser who is licensed in Arizona shall remit the use tax to the Department on the purchaser's Sales, Use, and Severance Tax Return (ST-1) if tangible personal property is purchased from an out-of-state retailer who is not licensed to collect the use tax.
- C.** An Arizona purchaser who is not licensed in Arizona shall remit the use tax to the Department under a cover letter if tangible personal property is purchased from an out-of-state retailer who is not licensed to collect the use tax.

Historical Note

Amended effective March 18, 1981 (Supp. 81-2). Repealed effective February 22, 1989 (Supp. 89-1). New Section adopted effective October 14, 1993 (Supp. 93-4).

R15-5-2222. Record Retention

A vendor collecting use tax from a purchaser shall keep and preserve suitable records and other books and accounts necessary to determine the tax collected for the statutorily prescribed limitation

period. For purposes of this rule, the limitation period is the period of time for which the Department may assess tax, penalties, or interest pursuant to A.R.S. § 42-113. Records, books, and accounts shall be open for inspection at any reasonable time by the Department or its authorized agent.

Historical Note

Repealed effective February 22, 1989 (Supp. 89-1). New Section adopted effective October 14, 1993 (Supp. 93-4).

R15-5-2238. Reserved**R15-5-2239. Reserved****R15-5-2240. Repealed****Historical Note**

Adopted effective April 21, 1994 (Supp. 94-2). Section repealed by final rulemaking at 9 A.A.R. 5042, effective January 3, 2004 (Supp. 03-4).

R15-5-2241. Repealed**Historical Note**

Adopted effective April 21, 1994 (Supp. 94-2). Section repealed by final rulemaking at 11 A.A.R. 5214, effective November 10, 2005 (Supp. 05-4).

R15-5-2242. Repealed**Historical Note**

Adopted effective April 21, 1994 (Supp. 94-2). Section repealed by final rulemaking at 11 A.A.R. 5214, effective November 10, 2005 (Supp. 05-4).

ARTICLE 23. USE TAX**R15-5-2301. Definitions**

The following definitions apply for the Department's administration of use tax:

1. "Mail order retailer" means a retailer who solicits orders by mail, notwithstanding the fact that orders may be received by telephone or by mail or that goods may be delivered by mail or by private delivery system.
2. "Purchases" means purchase for storage, use, or consumption in Arizona.
3. "Retailer" includes any retailer located outside this state who solicits orders for tangible personal property by mail from points in this state if the solicitations are substantial and recurring.

Historical Note

Repealed effective July 23, 1985 (Supp. 85-4). New Section R15-5-2301 adopted effective December 6, 1990 (Supp. 90-4). Amended effective September 29, 1993 (Supp. 93-3).

R15-5-2302. General

- A. In this Section, "retailer" and "utility business" have the same meanings as prescribed in A.R.S. § 42-5151.
- B. A.R.S. § 42-5155 imposes Arizona use tax upon a purchaser that purchases tangible personal property from an out-of-state retailer or utility business if the retailer or utility business's gross receipts from the sale have not already been included in the measure of Arizona transaction privilege tax. Because Arizona transaction privilege tax and Arizona use tax are complementary taxes, only one of the taxes is imposed on a given transaction.
- C. Arizona use tax generally applies to the use, storage, or consumption in this state of tangible personal property purchased from an out-of-state retailer or utility business.
- D. If a purchaser pays to an out-of-state retailer or utility business a tax of another state levied on the sale or use of tangible personal property that is subject to Arizona use tax, the purchaser may apply the amount of tax paid to the other state against the purchaser's use tax liability.

- E. A purchaser that purchases tangible personal property exempt from tax because the property is purchased for resale in the ordinary course of business but subsequently uses or consumes the tangible personal property shall pay Arizona use tax.

Historical Note

Amended by final rulemaking at 11 A.A.R. 2293, effective August 6, 2005 (Supp. 05-2).

R15-5-2303. Repealed**Historical Note**

Repealed effective January 16, 1997 (Supp. 97-1).

R15-5-2304. Presumption of Taxability of Property Brought into Arizona

- A. If tangible personal property is purchased outside Arizona and is subsequently brought into this state for use, storage, or consumption, the purchaser of such property shall be subject to the Arizona use tax unless the purchaser establishes to the satisfaction of the Department:
 1. That the property is not used in conducting a business in Arizona; and
 2. That the property was purchased for bona fide use or consumption outside Arizona. Unless shown otherwise, it shall be presumed that the property was purchased for bona fide use or consumption outside of Arizona if the property was purchased at least three months prior to its initial entry into Arizona; or
 3. If the property was purchased by a nonresident individual, that the first actual use or consumption of the property occurred outside Arizona.
- B. It shall be presumed that property brought into the state is subject to the use tax. The burden of proof that a purchase is not subject to use tax rests upon the purchaser.

Historical Note

Former Section R15-5-2311 repealed, new Section R15-5-2311 adopted effective August 7, 1985 (Supp. 85-4). Former Section R15-5-2304 repealed, new Section R15-5-2304 renumbered from R15-5-2311 and amended effective September 29, 1993 (Supp. 93-3).

R15-5-2305. Expired**Historical Note**

Section expired under A.R.S. § 41-1056(E) at 13 A.A.R. 1744, effective March 31, 2007 (Supp. 07-2).

R15-5-2306. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 2293, effective August 6, 2005 (Supp. 05-2).

R15-5-2307. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 2293, effective August 6, 2005 (Supp. 05-2).

R15-5-2308. Repealed**Historical Note**

Section repealed by final rulemaking at 11 A.A.R. 2293, effective August 6, 2005 (Supp. 05-2).

R15-5-2309. Exemptions -- Purchases for Resale or Lease

- A. Purchases of tangible personal property from a retailer for resale in the ordinary course of the purchaser's business are not subject to use tax.

Department of Revenue - Transaction Privilege and Use Tax Section

- B.** Purchases of tangible personal property from a retailer for subsequent leasing or renting in the ordinary course of the purchaser's business are not subject to use tax.

Historical Note

Former Section R15-5-2309 renumbered to R15-5-2363, new Section R15-5-2309 renumbered from R15-5-2322 and amended effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-2310. Payment of Use Tax by Purchaser

- A.** The Use Tax must be paid to:
1. An out-of-state vendor holding a certificate of authority for the collection of Use Tax, or
 2. The Arizona Department of Revenue in cases where the vendor is not registered for the collection of the tax.
- B.** Arizona purchasers making recurring purchases from out of state may apply to the Department for a registration certificate and remit payment directly to the state on a monthly report form in lieu of making payment to the vendor.
- C.** The purchaser will be relieved of his liability for the tax when payment is made directly to the out-of-state vendor registered and a receipt of the tax paid is obtained by him.

R15-5-2311. Renumbered**Historical Note**

Former Section R15-5-2311 repealed, new Section R15-5-2311 adopted effective August 7, 1985 (Supp. 85-4). Former Section R15-5-2311 renumbered to R15-5-2304 effective September 29, 1993 (Supp. 93-3).

R15-5-2312. Casual Sales

Tangible personal property purchased in a casual sale, as defined in R15-5-2001, is not taxable.

Historical Note

Former Section R15-5-2312 repealed, new Section R15-5-2312 adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2313. Expired**Historical Note**

Former Section R15-5-2313 repealed, new Section R15-5-2313 adopted effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 2207, effective March 30, 2017 (Supp. 17-3).

R15-5-2314. Purchases from Trustees, Receivers, and Assignees

- A.** Tangible personal property purchased for storage, use, or consumption in Arizona from a trustee, receiver, or assignee is subject to use tax if the purchase of the tangible personal property in the hands of the owner would be subject to use tax.
- B.** Tangible personal property purchased for storage, use, or consumption in Arizona from a trustee, receiver, or assignee is not subject to use tax if the purchase of the property from the owner would not be subject to use tax.

Historical Note

Former Section R15-5-2314 renumbered to R15-5-2321, new Section adopted effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 12 A.A.R. 4099, effective December 4, 2006 (Supp. 06-4).

R15-5-2315. Renumbered**Historical Note**

Former Section R15-5-2315 renumbered to R15-5-3006 effective July 23, 1985 (Supp. 85-4).

R15-5-2316. Repealed**Historical Note**

Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2317. Renumbered**Historical Note**

Former Section R15-5-2317 renumbered to R15-5-2352 effective September 29, 1993 (Supp. 93-3).

R15-5-2318. Repealed**Historical Note**

Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2319. Renumbered**Historical Note**

Former Section R15-5-2319 renumbered to R15-5-2353 effective September 29, 1993 (Supp. 93-3).

R15-5-2320. Exemptions -- Machinery or Equipment

- A.** Machinery or equipment used in manufacturing or processing includes machinery or equipment that constitutes the entire primary manufacturing or processing operation from the initial stage where actual processing begins through the completion of the finished end product, and that is used in the production, manufacture, fabrication, processing, finishing, or packaging of articles of commerce. Manufacturing is the performance as a business of an integrated series of operations which place tangible personal property in a form, composition, or character different from that in which it was acquired, and transforms it into a different product with a distinctive name, character, or use.
- B.** Purchase of repair or replacement parts for exempt machinery or equipment is not subject to the use tax. Repair or replacement parts are defined as those individual component and constituent items which, together, comprise exempt machinery or equipment.

Historical Note

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Amended subsection (B) effective March 18, 1981 (Supp. 81-2). Former Section R15-5-2320 renumbered to R15-5-2362, new Section R15-5-2320 renumbered from R15-5-2321 and amended effective September 29, 1993 (Supp. 93-3).

R15-5-2321. Expired**Historical Note**

Amended effective November 7, 1978, unless otherwise noted (Supp. 78-6). Amended paragraphs (9) and (10) effective March 18, 1981 (Supp. 81-2). Former Section R15-5-2321 renumbered to R15-5-2320, new Section R15-5-2321 renumbered from R15-5-2314 effective September 29, 1993 (Supp. 93-3). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 2207, effective March 30, 2017 (Supp. 17-3).

R15-5-2322. Renumbered**Historical Note**

Former Section R15-5-2322 renumbered to R15-5-2309 effective September 29, 1993 (Supp. 93-3).

R15-5-2323. Repealed

Historical Note

Amended effective November 7, 1978 (Supp. 78-6).
Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2324. Repealed**Historical Note**

Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2325. Repealed**Historical Note**

Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2326. Manufacturing Labor

The cost of labor employed in the manufacturing, processing, or fabricating of tangible personal property shall not be allowed as a deduction from the sales price on a purchase of such property.

Historical Note

Former Section R15-5-2326 repealed, new Section R15-5-2326 adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2327. Fuels

- A. In this Section, “aviation fuel,” “dyed diesel fuel,” and “use fuel” have the same meanings as prescribed in A.R.S. §§ 28-101 and 28-5601.
- B. Except as provided in subsection (D), a purchase of use fuel is subject to use tax under A.R.S. § 42-5155 on the date the consumer is issued a refund because the use fuel is not subject to the use fuel tax under A.R.S. § 28-5606.
- C. Dyed diesel fuel is subject to use tax if transaction privilege tax is not imposed by the Department.
- D. Liquefied petroleum gas or natural gas used to propel a motor vehicle is exempt from use tax.
- E. Aviation fuel is subject to tax under A.R.S. § 28-8344 only.
- F. A purchase of jet fuel is subject to the jet fuel excise and use tax under A.R.S. § 42-5352.

Historical Note

Former Section R15-5-2327 renumbered to R15-5-2360, new Section R15-5-2327 renumbered from R15-5-3006 and amended effective September 29, 1993 (Supp. 93-3). Section amended by final rulemaking at 10 A.A.R. 4480, effective December 4, 2004 (Supp. 04-4).

R15-5-2328. Electric Power Transmission and Distribution

Purchases of machinery, equipment, or transmission lines for direct use in producing or transmitting power but not including distribution are subject to use tax based on the same definitions as in R15-5-128.

Historical Note

Former Section R15-5-2328 renumbered to R15-5-2361, new Section R15-5-2328 adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2329. Repealed**Historical Note**

Former Section R15-5-2329 repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2330. Tangible Personal Property Used in Conjunction with Warranty or Service Contracts or Provisions

- A. For purposes of this rule, the following definition applies: “Covered” means covered as defined in R15-5-138 for tangible personal property under a warranty or service contract, or covered as defined in R15-5-137 for tangible personal property under a warranty or service provision.

- B. A warrantor or service person is subject to use tax on the cost of covered tangible personal property that is purchased for resale but subsequently taken out of inventory and used in the servicing of a warranty or service contract.
- C. Tangible personal property that is covered under a warranty or service contract and used in the servicing of the contract is subject to use tax unless transaction privilege tax was paid when the tangible personal property was acquired or the tangible personal property is otherwise statutorily exempt.
- D. Tangible personal property that is covered under a warranty or service provision and used in the servicing of the provision is not subject to use tax as the transaction privilege tax was paid when the tangible personal property was acquired.

Historical Note

Adopted effective September 3, 1978 (Supp. 78-6). Former Section R15-5-2330 renumbered to R15-5-2343, new Section R15-5-2330 adopted effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 13 A.A.R. 679, effective April 7, 2007 (Supp. 07-1).

R15-5-2331. Repealed**Historical Note**

Adopted as an emergency effective July 1, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-3). Former emergency adoption now adopted effective October 15, 1980 (Supp. 80-5). Repealed effective September 29, 1993 (Supp. 93-3).

R15-5-2332. Delivery Charges

A charge by a retailer for delivery from the retailer’s location to the purchaser’s location, if separately stated on the sales invoice, is not taxable.

Historical Note

Adopted effective December 6, 1990 (Supp. 90-4). Former Section R15-5-2332 renumbered to R15-5-2350, new Section R15-5-2332 adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2333. Reserved**R15-5-2334. Purchases of Restaurant Accessories**

- A. If a person engaged in the restaurant business purchases disposable containers, paper napkins, and other similar food accessories and, transfers these accessories in the regular course of business to facilitate the consumption of the food, drink, or condiment provided, the purchases are considered purchases for resale.
- B. If a person engaged in the restaurant business purchases matchbooks, advertisement fliers, and other similar tangible personal property and transfers this property for the convenience, operation, or benefit of the restaurant business, the purchases are subject to tax.

Historical Note

Adopted effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 13 A.A.R. 679, effective April 7, 2007 (Supp. 07-1).

R15-5-2335. Reserved**R15-5-2336. Reserved****R15-5-2337. Reserved****R15-5-2338. Reserved****R15-5-2339. Reserved****R15-5-2340. Tangible Personal Property Used in Soil Remedi-**

ation Activities

The purchase of tangible personal property for incorporation or fabrication into any real property, structure, project, development or improvement under a contract specified in A.R.S. § 42-5075(B)(6) is exempt from tax. The purchase of tangible personal property used in soil remediation activities but not incorporated or fabricated into any real property, structure, project, development or improvement is taxable.

Historical Note

Adopted effective December 11, 1998 (Supp. 98-4).
R15-5-2340 corrected to reflect updated citation reference to Arizona Revised Statutes (Supp. 07-2).

R15-5-2341. Four-inch Pipes or Valves

Purchases of pipes, valves, or fire hydrants with an inside diameter of four inches or more are not taxable if the pipes, valves, or fire hydrants are to be used to transport oil, natural gas, artificial gas, water, or coal slurry.

Historical Note

Adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2342. Computer Hardware and Software

Purchases of computer hardware and software are subject to the use tax based on the same provisions as delineated in R15-5-154.

Historical Note

Adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2343. Purchases of Prescription Drugs and Prosthetic Appliances**A. In this Section:**

1. "Drug" means an article that, according to federal or state law, is:
 - a. Recognized in the official United States Pharmacopeia, official Homeopathic Pharmacopeia of the United States, official National Formulary, or any supplement to these documents; or
 - b. Intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals; or
 - c. Not food and is intended to affect the structure or any function of the body of humans or animals; or
 - d. Intended for use as a component of any article specified in subsections (a), (b), or (c).
2. "Drug on a prescription" means a prescription drug.
3. "Food" means an article used for food or drink for humans or animals, chewing gum, or an article used as a component of such an article.
4. "Hearing aid" means any wearable device designed as a remedy or to compensate for defective human hearing, including parts, attachments, accessories, and earmolds.
5. "Legend drug" means a drug that 21 U.S.C. 353(b)(4)(A) requires to bear the symbol "Rx only" before dispensing.
6. "Nonprescription product" means a drug or other article that can be purchased by the final consumer of the drug or article without a prescription, regardless of whether purchased on the advice or recommendation of a member of the medical, dental, or veterinarian profession. Examples include over-the-counter drugs and those dietary supplements, vitamins, minerals, herbs, and other similar supplements that do not qualify as prescription drugs.
7. "Over-the-counter drug" means a drug that is subject to federal labeling requirements in 21 CFR 201.66.
8. "Prescriber" means a member of the medical, dental, or veterinary profession authorized by federal or state law to prescribe a drug.

9. "Prescription" means an order for a drug issued in any form.
10. "Prescription drug" means a legend drug or a drug that, according to federal or state law, can be dispensed only:
 - a. Upon a written prescription of a prescriber for the drug;
 - b. Upon an oral prescription by the prescriber for the drug that federal or state law requires be reduced promptly to a form of writing by the prescriber and then filed by a pharmacist or the prescriber; or
 - c. By refilling a written or oral prescription if refilling is authorized by the prescriber for the drug either in the original prescription or by oral order that is first reduced promptly to writing and then filed by a pharmacist or the prescriber.
11. "Prescription eyeglasses" includes frames and other component parts of eyeglasses if purchased for use with the prescription lenses.
12. "Prosthetic appliance" means an artificial device that fully or partially replaces a part or function of the human body or increases the acuity of a sense organ.

- B. The storage, use, or consumption in this state of the following kinds of tangible personal property is not subject to tax:
 1. Prescription drugs, including those used in the course of treating patients;
 2. Medical oxygen, pursuant to A.R.S. § 42-5159(A)(16);
 3. Insulin, insulin syringes, and glucose strips, whether or not prescribed;
 4. Prosthetic appliances, prescribed or recommended by a statutorily-authorized individual;
 5. Durable medical equipment, pursuant to A.R.S. § 42-5159(A)(21);
 6. Prescription eyeglasses and contact lenses; and
 7. Hearing aids. Batteries and cords are subject to tax.
- C. The purchase of component and repair parts for any tangible personal property that is exempt under either subsection (B) or (F) is not subject to tax.
- D. If a written prescription or recommendation is required to purchase tangible personal property, a taxpayer shall maintain the prescription or recommendation as part of the taxpayer's records. The taxpayer's records for documenting purchases shall provide reasonable detail to allow the Department, upon inspection, to identify property as exempt.
- E. Purchases by a final consumer of nonprescription products and those medical supplies or appliances not provided for under subsection (B) are subject to tax.
- F. Purchases of nonprescription products or other medical supplies or appliances by doctors, dentists, or veterinarians are subject to tax unless the purchase qualifies as a purchase for resale and the doctor, dentist, or veterinarian is a retailer in the business of reselling the property.

Historical Note

Renumbered from R15-5-2330 and amended effective September 29, 1993 (Supp. 93-3). Amended by final rulemaking at 11 A.A.R. 2952, effective September 10, 2005 (Supp. 05-3).

R15-5-2344. Postage Stamps

- A. The purchase of postage stamps is not subject to use tax if the stamps are purchased for the purpose of transporting mail.
- B. The purchase of postage stamps is subject to use tax if the stamps are purchased for any purpose other than transporting mail.
- C. The Department shall presume that a postage stamp is purchased for a purpose other than transporting mail if the postage stamp is purchased for at least 50% more than its face value. A

Department of Revenue - Transaction Privilege and Use Tax Section

purchaser may overcome the presumption; however, the burden of proof will remain on the purchaser.

- D. The purchase of cancelled postage stamps is subject to use tax.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 4112, effective October 4, 2000 (Supp. 00-4).

R15-5-2350. Mail Order Retailers

This rule is not a limitation on other provisions of Arizona Revised Statutes, Title 42, Chapter 8. Article 2. A mail order retailer's transactions are substantial and recurring if the following conditions are satisfied:

1. The sale of tangible personal property would be subject to transaction privilege taxation if the transaction would have occurred in this state, and
2. During any 12-month period:
 - a. The retailer's total sales in this state exceed \$100,000.00; or
 - b. Two or more mailings, aggregating 5,000 or more solicitations, are made to points in this state.

Historical Note

Adopted effective December 6, 1990 (Supp. 90-4).
Renumbered from R15-5-2332 effective September 29, 1993 (Supp. 93-3).

R15-5-2351. Purchases by Non-U.S. Citizens

Purchases of tangible personal property by non-U.S. citizens shall be subject to the use tax unless otherwise exempt.

Historical Note

Adopted effective September 29, 1993 (Supp. 93-3).

R15-5-2352. Expired**Historical Note**

Section R15-5-2352 renumbered from R15-5-2317 and amended effective September 29, 1993 (Supp. 93-3). Section expired under A.R.S. § 41-1056(E) at 18 A.A.R. 1652, effective March 31, 2012 (Supp. 12-2).

R15-5-2353. Property Purchased Outside of the United States

- A. Tangible personal property purchased outside of the United States is taxable when purchased for business use.
- B. In any one calendar month, tangible personal property purchases with a cumulative purchase price of \$200 or less are not taxable if purchased for nonbusiness use. Purchases in excess of the \$200 exemption are taxable on the excess amount.

Historical Note

Section R15-5-2353 renumbered from R15-5-2319 and amended effective September 29, 1993 (Supp. 93-3).

R15-5-2355. Reserved

R15-5-2356. Reserved

R15-5-2357. Reserved

R15-5-2358. Reserved

R15-5-2359. Reserved

R15-5-2360. Government Purchases

- A. Purchases of tangible personal property by any state or its political subdivisions are taxable.
- B. Purchases by the Federal Government are not taxable.

Historical Note

Section R15-5-2360 renumbered from R15-5-2327 and amended effective September 29, 1993 (Supp. 93-3).

R15-5-2361. Nonprofit Organizations

- A. Purchases of tangible personal property by nonprofit churches, schools, and other nonprofit organizations are taxable unless otherwise exempt.
- B. Purchases of tangible personal property from a charitable nonprofit organization recognized as having tax-exempt status for income tax purposes with the Internal Revenue Service and the Department are not taxable.
- C. If an organization wishes to obtain tax-exempt status by being recognized by the Department as a nonprofit charitable organization, it shall submit a letter to the Department requesting tax-exempt status and shall include a copy of its Internal Revenue Service recognition.
- D. For purposes of the statutory exemption and for this rule, the Internal Revenue Service recognition of a charitable nonprofit organization is as defined in Internal Revenue Code § 501(c)(3).

Historical Note

Section R15-5-2361 renumbered from R15-5-2328 and amended effective September 29, 1993 (Supp. 93-3).

R15-5-2362. Exempt Purchases by Health Organizations

- A. Purchases by qualifying hospitals, nursing care institutions, qualifying health care organizations, rehabilitation programs for mentally or physically handicapped persons, and qualifying community health centers are exempt from tax pursuant to statutory provisions.
- B. The Department may, upon review of the written request and any other information requested by the Department to make a proper determination, provide an Exemption Letter to organizations meeting the statutory criteria. The Exemption Letter shall be valid for a period of 12 months from the first day of the month following the issue date of the Exemption Letter unless the organization's tax exempt status changes prior to the end of the 12-month period, or the organization misrepresented or omitted material information in its exemption request.
- C. Qualifying hospitals, qualifying health care organizations, rehabilitation programs for mentally or physically handicapped persons, and qualifying community health centers shall annually submit to the Department a written request for an Exemption Letter. The request shall be submitted at least 30 days prior to the first day of the exemption period. For purposes of this rule, "exemption period" means the 12-month period beginning on the first day of the month following the issue date of the Exemption Letter or the 12-month period requested by the organization.
 1. Qualifying hospitals shall attach to their annual exemption request a copy of their current license issued by the Department of Health Services.
 2. Qualifying health care organizations shall attach to their exemption request letter the statutorily required annual financial audit and a copy of their Internal Revenue Code 501(c) recognition unless the Department has previously received a copy of this recognition.
 3. Rehabilitation programs for mentally or physically handicapped persons shall attach to their exemption request a copy of their Internal Revenue Code 501(c)(3) recogni-

Department of Revenue - Transaction Privilege and Use Tax Section

tion unless the Department has previously received a copy of this recognition.

4. Qualifying community health centers shall attach to their exemption request documentation supporting the statutory criteria and a copy of their Internal Revenue Code 501(c)(3) recognition unless the Department has previously received a copy of this recognition.

Supplement to the
Arizona Administrative Code
 The official compilation of Arizona Rules
Replacement Check List

For rules filed in the third quarter between
 July 1 - September 30
 2017

Within the stated calendar quarter, this Title contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law. These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information. Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

TITLE 17. Transportation

Chapter 05. Department of Transportation - Commercial Programs

PUBLISHER
Arizona Department of State
Office of the Secretary of State, Administrative Rules Division

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION
September 30, 2017

RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2017 is cited as Supp. 17-1.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, www.azsos.gov/services/legislative-filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at www.azsos.gov/rules, click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.

TITLE 17. TRANSPORTATION**CHAPTER 5. DEPARTMENT OF TRANSPORTATION - COMMERCIAL PROGRAMS**

Editor's Note: The Department was given an exemption to the provisions in the Arizona Administrative Procedure Act to make rules under Laws 2015, Ch. 235, § 14. Refer to the historical notes in Article 9 for more information (Supp. 15-3).

Editor's Note: The Department was given an exemption to the provisions in the Arizona Administrative Procedure Act to make or amend rules under Laws 2013, Ch. 129, § 27. Refer to the historical notes in Article 3 for more information (Supp. 15-2).

Editor's Note: 17 A.A.C. 5 was created from Sections recodified from 17 A.A.C. 4 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3).

ARTICLE 1. GENERAL PROVISIONS**ARTICLE 2. MOTOR CARRIERS****R17-5-201. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-3001 and 28-5201, the following definitions apply to this Article unless otherwise specified:

“Audit” means any inspection of a transporter’s motor vehicle, equipment, books, or records to determine compliance with this Article and A.R.S. Title 28, Chapter 14.

“Co-applicant” means an employer or potential employer.

“Danger to public safety” means any condition of a transporter likely to result in serious peril to the public if not discontinued immediately.

“Director” means the Director of the Arizona Department of Transportation or the Director’s designated agent.

“Executive Hearing Office” means the Arizona Department of Transportation’s Executive Hearing Office.

“Medical waiver evaluation summary” means the form, provided by the Department, to be completed by either a board qualified or board certified orthopedic surgeon or physiatrist and mailed to the Department, at the address provided on the form, on behalf of an Arizona intrastate medical waiver applicant.

“Physiatrist” means a doctor of medicine specialized in physical medicine and rehabilitation.

“Transporter” means any person, driver, motor carrier, shipper, manufacturer, or motor vehicle, including any motor vehicle transporting a hazardous material, hazardous substance, or hazardous waste, subject to this Article and A.R.S. Title 28, Chapter 14.

“Violation” means any conduct, act, or failure to act required or prohibited under this Article and A.R.S. Title 28, Chapter 14.

“Vision examination report” means a form provided by the Department to be completed by an ophthalmologist or a licensed optometrist on behalf of a driver or driver applicant and mailed to the Department, at the address provided on the form, for use in determining whether or not a medical condition affects the driver’s, or driver applicant’s, ability to safely perform the functional skills involved with driving a motor vehicle.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3).

R17-5-202. Motor Carrier Safety: Incorporation of Federal Regulations; Applicability

- A. The Department incorporates by reference 49 CFR 40, 379, 382, 383, 385, 390, 391, 392, 393, 395, 396, 397, and 399, revised as of October 1, 2012, and no later amendments or editions, as amended under this Article. The incorporated material is on file with the Department and is available from the U.S. Government Printing Office, P.O. Box 979050, St. Louis, Missouri 63197-9000. The incorporated material can be ordered online by visiting the U.S. Government Online Bookstore at <http://bookstore.gpo.gov>.
- B. The sections of 49 CFR incorporated under subsection (A) apply as amended under this Article to all intrastate and interstate motor carriers operating in Arizona and persons operat-

ing a commercial motor vehicle, except as provided under subsection (C).

- C. The intrastate operator of a tow truck with a gross vehicle weight rating of 26,000 pounds or less is exempt from the requirements of 49 CFR 390 through 399, except that the driver is subject to the physical qualifications and examination requirements of 49 CFR 391, subpart E.

Historical Note

New Section recodified from R17-4-435 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Amended by final rulemaking at 9 A.A.R. 1867, effective June 3, 2003 (Supp. 03-2). Amended by final rulemaking at 10 A.A.R. 2679, effective June 8, 2004 (Supp. 04-2). Amended by final rulemaking at 12 A.A.R. 1559, effective May 2, 2006 (Supp. 06-2). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-203. Motor Carrier Safety: 49 CFR 390 - Federal Motor Carrier Safety Regulations; General

- A. 49 CFR 390.3, General applicability. Paragraph (a) is amended to read:
Regulations incorporated in this section are applicable to all motor carriers operating in Arizona and any vehicle owned or operated by the state, a political subdivision, or a state public authority that is used to transport a hazardous material in an amount requiring the vehicle to be placarded as prescribed under R17-5-209.
- B. 49 CFR 390.5, Definitions. The definitions listed under 49 CFR 390.5 are amended as follows:
“Commercial Motor Vehicle” or “CMV” has the same meaning as prescribed under A.R.S. § 28-5201.
“Special agent” means an officer or agent of the Department, the Department of Public Safety, or a political subdivision, who is trained and certified by the Department of Public Safety to enforce Arizona’s Motor Carrier Safety requirements.
“State” means a state of the United States or the District of Columbia.
“Tow truck,” as used in the definition of emergency under 49 CFR 390.5, has the same meaning as prescribed under A.A.C. R13-3-701.
- C. 49 CFR 390.19, Motor carrier, hazardous material shipper, and intermodal equipment provider identification reports. Paragraph (a)(1) is amended to read:
A U.S.-, Canada-, Mexico-, or non-North America-domiciled motor carrier conducting operations in interstate commerce or in intrastate commerce in a CMV, except for intrastate commerce in a farm vehicle as defined under A.R.S. § 28-2514, must file a Motor Carrier Identification Report, Form MCS-150.
- D. 49 CFR 390.23, Relief from regulations.
 1. Paragraph (a)(2), Local emergencies, is amended by adding:
When a local emergency exists that justifies an exemption from parts 390 through 399 of this chapter, a motor carrier may request the exemption by contacting Commercial Vehicle Enforcement at the Arizona Department of Public Safety, Highway Patrol Division, P.O. Box 6638, Phoenix, Arizona 85005. The Arizona Department of Public Safety may grant the exemption with or without

restrictions as necessary to provide vital service to the public.

2. Paragraph (a)(2)(i)(A) is amended to read:
An emergency has been declared by a federal, state or local government official having authority to declare an emergency; or an emergency situation exists under A.R.S. § 28-5234(B); or

E. 49 CFR 390.25, Extension of relief from regulations - emergencies, is amended by adding:

A motor carrier seeking to extend a period of relief from these regulations may request the extension by contacting Commercial Vehicle Enforcement at the Arizona Department of Public Safety, Highway Patrol Division, P.O. Box 6638, Phoenix, Arizona 85005. The Arizona Department of Public Safety may grant the extension with any restrictions it considers necessary to provide vital service to the public.

Historical Note

New Section recodified from R17-4-435.01 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Amended by final rulemaking at 9 A.A.R. 1867, effective June 3, 2003 (Supp. 03-2). Amended by final rulemaking at 11 A.A.R. 862, effective February 1, 2005 (Supp. 05-1). Amended by final rulemaking at 12 A.A.R. 1559, effective May 2, 2006 (Supp. 06-2). Amended by final rulemaking at 13 A.A.R. 2636, effective July 10, 2007 (Supp. 07-3). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-204. Motor Carrier Safety: 49 CFR 391 - Qualifications of Drivers and Longer Combination Vehicle (LCV) Driver Instructors

- A.** 49 CFR 391.11, General qualifications of drivers. Paragraph (b)(1) is amended to read:
Is at least 21 years of age for interstate operation or is at least 18 years of age for operations restricted to intrastate transportation not involving the transportation of a reportable quantity of hazardous substance, hazardous waste required to be manifested, or hazardous material in an amount requiring a vehicle to be placarded as prescribed under R17-5-209;
- B.** 49 CFR 391.51, General requirements for driver qualification files. Paragraph (b)(8) is amended to read:
A Skill Performance Evaluation Certificate obtained from a Field Administrator, Division Administrator, or state Director issued in accordance with § 391.49; or the Medical Exemption document, issued by a Federal medical program in accordance with part 381 of this chapter; or a copy of the Arizona intrastate medical waiver, if a waiver is granted by the Director as prescribed under R17-5-208.

Historical Note

New Section recodified from R17-4-435.02 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-205. Motor Carrier Safety: 49 CFR 383 - Commercial Driver's License Standards; Requirements and Penalties

- A.** 49 CFR 383.5, Definitions. The definitions listed under 49 CFR 383.5 are amended as follows:

"Commercial motor vehicle" or "CMV" has the same meaning as prescribed under A.R.S. § 28-3001.

"Conviction" has the same meaning as prescribed under A.R.S. § 28-3001.

"Disqualification" has the same meaning as prescribed under A.R.S. § 28-3001.

"Motor vehicle" has the same meaning as prescribed under A.R.S. § 28-101.

"Out-of-service order" has the same meaning as prescribed under A.R.S. § 28-5241.

"School bus" has the same meaning as prescribed under A.R.S. § 28-101.

"Tank vehicle" has the same meaning as prescribed under A.R.S. § 28-3103.

- B.** 49 CFR 383.71, Driver application and certification procedures. Paragraphs (b)(1)(ii), Excepted interstate, and (b)(1)(iv), Excepted intrastate, are deleted.

C. 49 CFR 383.73, State procedures.

1. Paragraph (a)(2)(vi) is amended to read:
Require compliance with the standards for providing proof of citizenship or lawful permanent residency specified in § 383.71(a)(2)(v) and proof of state of domicile specified in § 383.71(a)(2)(vi). Exception: A state is required to check the proof of citizenship or legal presence specified in this paragraph only for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade or transfer of a CDL or non-domiciled CDL for the first time after July 8, 2011, provided a notation is made on the driver's record confirming that the proof of citizenship or legal presence check required by this paragraph has been made and noting the date it was done;
2. Paragraph (b)(6) is amended to read:
Require compliance with the standards for providing proof of citizenship or lawful permanent residency specified in § 383.71(b)(9) and proof of state of domicile specified in § 383.71(b)(10). Exception: A state is required to check the proof of citizenship or legal presence specified in this paragraph only for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade or transfer of a CDL or non-domiciled CDL for the first time after July 8, 2011, provided a notation is made on the driver's record confirming that the proof of citizenship or legal presence check required by this paragraph has been made and noting the date it was done;
3. Paragraph (c)(4) is amended to read:
If such applicant wishes to retain a hazardous materials endorsement, require compliance with standards for such endorsement specified in §§ 383.71(b)(8) and 383.141 and ensure that the driver has successfully completed a new test for such endorsement specified in § 383.121.
4. Paragraphs (c)(4)(i) and (c)(4)(ii) are deleted.
5. Paragraph (c)(7) is amended to read:
Require compliance with the standards for providing proof of citizenship or lawful permanent residency specified in § 383.71(b)(9) and proof of state of domicile specified in § 383.71(b)(10). Exception: A state is required to check the proof of citizenship or legal presence specified in this paragraph only for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade or transfer of a CDL or non-domiciled CDL for the first time after July 8, 2011, provided a notation is made on the driver's record confirm-

Department of Transportation - Commercial Programs

ing that the proof of citizenship or legal presence check required by this paragraph has been made and noting the date it was done;

6. Paragraph (d)(7) is amended to read:
Require compliance with the standards for providing proof of citizenship or lawful permanent residency specified in § 383.71(b)(9) and proof of state of domicile specified in § 383.71(b)(10). Exception: A state is required to check the proof of citizenship or legal presence specified in this paragraph only for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade or transfer of a CDL or non-domiciled CDL for the first time after July 8, 2011, provided a notation is made on the driver's record confirming that the proof of citizenship or legal presence check required by this paragraph has been made and noting the date it was done; and
7. Paragraph (e)(5) is amended to read:
Require compliance with the standards for providing proof of citizenship or lawful permanent residency specified in § 383.71(b)(9) and proof of state of domicile specified in § 383.71(b)(10). Exception: A state is required to check the proof of citizenship or legal presence specified in this paragraph only for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade, or transfer of a CDL or non-domiciled CDL for the first time after July 8, 2011, provided a notation is made on the driver's record confirming that the proof of citizenship or legal presence check required by this paragraph has been made and noting the date it was done;
8. Paragraph (f)(2)(ii) is amended to read:
The state must add the word "non-domiciled" to the face of the CLP or CDL, in accordance with § 383.153(c); and
9. Paragraph (m), Document verification, is amended to read:
The state must require at least two persons within the driver licensing agency to participate substantively in the processing and verification of the documents involved in the licensing process for initial issuance, renewal or upgrade of a CLP or non-domiciled CLP and for initial issuance, renewal, upgrade or transfer of a CDL or non-domiciled CDL. The documents being processed and verified must include, at a minimum, those provided by the applicant to prove legal presence and domicile, the information filled out on the application form, and knowledge and skills test scores. This section does not require two people to process or verify each document involved in the licensing process. Exception: For offices with only one staff member, at least some of the documents must be processed or verified by a supervisor before issuance or, when a supervisor is not available, copies must be made of some of the documents involved in the licensing process and a supervisor must verify them within one business day of issuance of the CLP, non-domiciled CLP, CDL or non-domiciled CDL.

D. 49 CFR 383.75, Third party testing.

1. Paragraph (a)(7) is amended to read:
A skills test examiner who is also a skills instructor either as a part of a school, training program or otherwise is prohibited from administering a skills test to an applicant who received skills training by that skills test examiner; and
2. Paragraph (a)(8)(v) is amended to read:
Require the third party tester to initiate and maintain a bond in an amount pursuant to A.R.S. Title 28, Chapter

13 to be sufficient to pay for re-testing drivers in the event that the third party or one or more of its examiners is involved in fraudulent activities related to conducting skills testing of applicants for a CDL. Exception: A third party tester that is a government entity is not required to maintain a bond.

E. 49 CFR 383.153, Information on the CLP and CDL documents and applications.

1. Paragraph (b)(1) is amended to read:
A CLP may, but is not required to, contain a digital color image or photograph or black and white laser engraved photograph.
2. Paragraph (e) is amended to read:
Before a CLP or CDL may be issued:
 - a. A driver applicant must provide the driver applicant's Social Security Number on the application of a CLP or CDL.
 - b. The state must provide the Social Security Number to the CDLIS.
 - c. The state must not display the Social Security Number on the CLP or CDL.
3. Paragraph (h) is amended to read:
On or after July 8, 2014 current CLP and CDL holders who do not have the standardized endorsement and restriction codes and applicants for a CLP or CDL are to be issued CLPs with the standardized codes upon initial issuance, renewal or upgrade and CDLs with the standardized codes upon initial issuance, renewal, upgrade or transfer.

Historical Note

New Section recodified from R17-4-435.03 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Section repealed by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). New Section made by final rulemaking at 20 A.A.R. 2382, effective August 5, 2016 (Supp. 14-3).

R17-5-206. Motor Carrier Safety: 49 CFR 392 - Driving of Commercial Motor Vehicles

49 CFR 392.5, Alcohol prohibition. Paragraph (e) is amended by adding:

Drivers who violate the terms of an out-of-service order as prescribed under this section are also subject to the provisions and sanctions of A.R.S. § 28-5241.

Historical Note

New Section recodified from R17-4-435.04 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 1867, effective June 3, 2003 (Supp. 03-2). Amended by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3).

R17-5-207. Civil Penalties

To determine the amount of civil penalty for repeat findings of responsibility for the same class of violations involving vehicles required to be placarded, the higher level of civil penalty as prescribed under A.R.S. § 28-5238 applies.

Department of Transportation - Commercial Programs

final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3).

R17-5-208. Commercial Driver License Intrastate Medical Waiver; Intrastate Alternative Physical Qualification Standards for the Loss or Impairment of Limbs, an Insulin-Dependent Diabetic Condition, or Monocular Vision

- A. A person who is not physically qualified to drive a commercial motor vehicle in interstate commerce due to loss of limb, limb impairment, an insulin-dependent diabetic condition, or monocular vision, as provided under 49 CFR 391.41(b)(1), (b)(2), (b)(3), or (b)(10), but otherwise meets all other requirements under 49 CFR 391.41, may operate a commercial motor vehicle in intrastate commerce if granted an intrastate medical waiver by the Director. Application for an intrastate medical waiver shall be submitted according to subsection (B).
- B. A driver applicant, or a driver applicant jointly with the motor carrier co-applicant that will employ the driver applicant, may complete and submit an intrastate medical waiver application to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, which shall:
 1. Identify the applicant:
 - a. Name and complete address of the driver applicant;
 - b. Name and complete address of the motor carrier co-applicant;
 - c. U.S. Department of Transportation motor carrier identification number, if known; and
 - d. A description of the driver applicant's limb or visual impairment or insulin-dependent diabetic condition as applicable to the type of waiver being requested;
 2. Describe the type of operation the driver applicant will be employed to perform, including the following information (if known):
 - a. Average period of time the driver will be driving or on duty, per day;
 - b. Type of commodities or cargo to be transported;
 - c. Type of driver operation (i.e., sleeper team, relay, owner operator, etc.); and
 - d. Number of years experience operating each type of commercial motor vehicle requested in the intrastate medical waiver application and total years of experience operating all types of commercial motor vehicles;
 3. Describe the commercial motor vehicles the driver applicant intends to drive:
 - a. Truck, truck tractor, or bus make, model, and year (if known);
 - b. Drive train:
 - i. Transmission type (automatic or manual - if manual, designate number of forward speeds);
 - ii. Auxiliary transmission (if any) and number of forward speeds; and
 - iii. Rear axle (designate single speed, two-speed, or three-speed);
 - c. Type of brake system;
 - d. Steering, manual or power assisted;
 - e. Description of types of trailers (i.e., van, flatbed, cargo tank, drop frame, lowboy, or pole);
 - f. Number of semitrailers or full trailers to be towed at one time;
 - g. For commercial motor vehicles designed to transport passengers, indicate the seating capacity of the commercial motor vehicle; and
 - h. Description of any modifications made to the commercial motor vehicle for the driver applicant, attach photographs where applicable;
 4. Include a certification statement:
 - a. The driver applicant shall certify that the driver applicant is otherwise qualified to drive a commercial motor vehicle under the regulations of 49 CFR 391 as adopted by the Department; and
 - b. In case of a co-applicant, the co-applicant motor carrier shall certify that the driver applicant is otherwise qualified to drive a commercial motor vehicle under the regulations of 49 CFR 391 as adopted by the Department; and
5. Contain signature of each applicant and date signed:
 - a. The driver applicant's signature; and
 - b. The motor carrier official's signature and title if the application has a co-applicant. Depending on the motor carrier's organizational structure (corporation, partnership, or proprietorship), the signer of the application shall be an officer, partner, or the proprietor.
- C. The completed intrastate medical waiver application for a driver applicant not physically qualified to drive under 49 CFR 391.41(b)(1) or (2) shall be accompanied by:
 1. A copy of the medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43;
 2. The Department's medical waiver evaluation summary completed by either a board-qualified or board-certified physiatrist or orthopedic surgeon. The co-applicant motor carrier or the driver applicant shall provide the physiatrist or orthopedic surgeon with a description of the job-related tasks the driver applicant will be required to perform:
 - a. The medical waiver evaluation summary for a driver applicant not physically qualified to drive under 49 CFR 391.41(b)(1) shall include:
 - i. An assessment of the functional capabilities of the driver as they relate to the ability of the driver to perform normal tasks associated with operating a commercial motor vehicle; and
 - ii. A statement by a board-qualified or board-certified physiatrist or orthopedic surgeon that the applicant is capable of demonstrating precision prehension (e.g., manipulating knobs and switches) and power grasp prehension (e.g., holding and maneuvering the steering wheel) with each upper limb separately;
 - b. The medical waiver evaluation summary for a driver applicant not physically qualified to drive under 49 CFR 391.41(b)(2) shall include:
 - i. An explanation as to how and why the impairment interferes with the ability of the applicant to perform normal tasks associated with operating a commercial motor vehicle;
 - ii. An assessment and medical opinion of whether the condition will likely remain medically stable over the lifetime of the driver applicant; and
 - iii. A statement by a board-qualified or board-certified physiatrist or orthopedic surgeon that the applicant is capable of demonstrating precision prehension (e.g., manipulating knobs and switches) and power grasp prehension (e.g., holding and maneuvering the steering wheel) with each upper limb separately;
 3. A description of the driver applicant's prosthetic or orthotic device worn, if any; and
 4. A copy of the driver applicant's state motor vehicle driving record for the past three years from each state in

Department of Transportation - Commercial Programs

which a motor vehicle driver license or permit has been obtained.

D. The completed intrastate medical waiver application for a driver applicant not physically qualified to drive under 49 CFR 391.41(b)(3) shall be accompanied by:

1. A copy of the medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43;
2. An evaluation by a board-certified or board-eligible endocrinologist. A complete endocrinologist evaluation shall consist of:
 - a. A comprehensive evaluation of the applicant's five-year medical history and current status. The applicant shall provide the examining endocrinologist with a complete medical history as it pertains to the applicant's diabetes or its complications or both, including, the date insulin use began, all hospitalization reports, consultation notes for diagnostic examinations, special studies, follow-up reports, reports of any hypoglycemic insulin reactions within the 12 months prior to the date of application, and other reports as requested by the endocrinologist. The evaluation shall also include a review of:
 - i. Daily glucose monitoring logs, glycosylated hemoglobin (A1c) indicating a result in the range of 7% to 10%, including lab reference page performed during the last six months unless recently diagnosed;
 - ii. Insulin dosages and types, diet utilized for control, and all medications taken; and
 - iii. Examinations to detect any peripheral neuropathy or circulatory insufficiency of the extremities;
 - b. A statement that the applicant is free from insulin reactions. Insulin reactions include any severe hypoglycemic reaction, which can be a reaction that results in seizure, loss of consciousness, requiring the assistance of another person, or a period of impaired cognitive function that occurs without warning. To be eligible the applicant must not have hypoglycemia unawareness and must have had no more than one documented severe hypoglycemic reaction in the previous 12 months and must have had:
 - i. No recurrent (two or more) severe hypoglycemic reactions resulting in a loss of consciousness or seizure within the past five years;
 - ii. No recurrent severe hypoglycemic reactions requiring the assistance of another person within the past five years;
 - iii. No recurrent severe hypoglycemic reactions resulting in impaired cognitive functions that occurred without warning symptoms within the past five years; and
 - iv. A period of one year of demonstrated stability following the first period of severe hypoglycemia;
 - c. A statement prepared and signed by the examining endocrinologist whose status as board-certified or board-eligible is indicated. The signed statement shall include separate declarations indicating the following medical determinations:
 - i. The endocrinologist is familiar with the applicant's medical history for the past five years through a records review, treating the patient, or consultation with the treating physician;

- ii. The applicant is able to safely operate a commercial motor vehicle while using insulin; and
- iii. The applicant has been educated in diabetes, including the last education date, and its management and is informed of and understands how to individually manage and monitor the applicant's diabetes mellitus and has demonstrated the ability and willingness to properly monitor and manage the applicant's diabetes and procedures to follow if complications arise;

3. A separate signed vision evaluation report from an ophthalmologist or optometrist indicating that the applicant has been examined and does not have diabetic retinopathy and meets the vision standard of 49 CFR 391.41(b)(10), or has been issued a valid intrastate medical waiver for monocular vision. If the applicant has any evidence of diabetic retinopathy, the applicant must be examined by an ophthalmologist and submit a separate signed statement from the ophthalmologist that the applicant does not have unstable proliferative diabetic retinopathy (i.e. unstable advancing disease of blood vessels in the retina); and
4. A copy of the driver applicant's state motor vehicle driving record for the past three years from each state in which a motor vehicle driver license or permit has been obtained.

E. The completed intrastate medical waiver application for a driver applicant not physically qualified to drive under 49 CFR 391.41(b)(10) shall be accompanied by:

1. A copy of the medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43;
2. A current vision examination report issued within the last 90 days from the date the report is received by the Department, completed by an ophthalmologist or optometrist. The report shall indicate that the applicant has distant visual acuity of at least 20/40 (Snellen), with or without a corrective lens, in one eye, and the applicant's dominant eye has a visual field of at least 70° peripheral measurement in one direction and 35° in the opposite direction of the horizontal meridian and the ability to distinguish the colors of a traffic signal or device showing standard red, green, and amber, as applicable to the type of medical waiver being requested;
3. A copy of the driver applicant's state motor vehicle driving record for the past three years from each state in which a motor vehicle driver license or permit has been obtained; and
4. A statement from the employer that the driver applicant has driven the type of vehicle for which the waiver is being requested for at least two of the previous five years.

F. Agreement. A motor carrier that employs a driver subject to an intrastate medical waiver granted by the Director under subsection (A), whether the waiver was granted unilaterally to the driver, or to the driver and co-applicant motor carrier, shall agree to:

1. Report to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, in writing, any suspension, revocation, disqualification, or withdrawal of the subject driver's driver license or permit, and any accident, arrest, or conviction involving the driver within 30 days after the occurrence;
2. Provide to the Department's Medical Review Program, on request, any documents and information pertaining to the driving activities, accidents, arrests, convictions, and driver license or permit suspensions, revocations, dis-

Department of Transportation - Commercial Programs

- qualifications, or withdrawals involving the subject driver;
 - 3. Evaluate the subject driver with a road test using the trailer types the motor carrier intends the driver to transport, or alternatively accept a certificate of a trailer road test from another motor carrier if the trailer types are similar, or accept the trailer road test completed during the skill performance evaluation if trailer types are similar to that of the prospective motor carrier;
 - 4. Evaluate the subject driver for those non-driving safety related job tasks associated with each type of trailer that will be used and any other non-driving safety related or job related tasks unique to the operations of the employing motor carrier; and
 - 5. Use the subject driver to operate the type of commercial motor vehicle indicated on the intrastate medical waiver only when the driver is in compliance with the conditions and limitations of the waiver.
- G.** A driver subject to an intrastate medical waiver, issued by the Director under subsection (A), shall supply each employing motor carrier with a copy of the intrastate medical waiver.
- H.** The Department may require the driver applicant to demonstrate the driver applicant's ability to safely operate the commercial motor vehicle the driver intends to drive.
- I.** If required by the Department during the application process, a driver applicant shall have a skill performance evaluation performed by a federally-certified state commercial driver license examiner at a Department commercial driver license facility when directed.
- J.** If the Director grants an intrastate medical waiver under subsection (A) to the driver applicant, the Department shall mail to the driver applicant and co-applicant motor carrier (if applicable) written approval of the intrastate medical waiver describing the terms, conditions, and limitations of the waiver.
- K.** The intrastate medical waiver granted by the Director under subsection (A) shall identify:
- 1. The power unit (bus, truck, truck tractor) for which the waiver is granted; and
 - 2. The trailer type used in the skill performance evaluation, if applicable, without limiting the waiver to that specific trailer type.
- L.** A subject driver may use the intrastate medical waiver with other trailer types if the driver successfully completes:
- 1. A trailer road test administered by the motor carrier under subsection (F)(3) for each type of trailer, and
 - 2. A non-driving safety related or job related task evaluation administered by the motor carrier under subsection (F)(4).
- M.** The intrastate medical waiver granted by the Director under subsection (A) is:
- 1. Valid for a period of not more than two years from the date of issuance;
 - 2. Renewable 30 days prior to the expiration date; and
 - 3. Transferable from an original motor carrier co-applicant employer to a new motor carrier employer or to the subject driver, as a unilateral applicant if becoming self-employed, upon written notification to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, stating the new employer's name and the type of equipment to be driven.
- N.** An intrastate medical waiver granted by the Director under subsection (A) to a driver applicant for monocular vision under subsection (E), shall prohibit the subject driver from transporting:
- 1. Passengers for hire; and
 - 2. Reportable quantities of hazardous substances, manifested hazardous wastes, and hazardous material required to be placarded.
- O.** A driver subject to an intrastate medical waiver, issued by the Director under subsection (A), shall have the intrastate medical waiver (or a legible copy) in the subject driver's possession while on duty.
- P.** The motor carrier employing a subject driver shall maintain a copy of the intrastate medical waiver in its driver qualification file and retain the copy in the motor carrier's file for a period of three years after the driver's employment is terminated.
- Q.** A driver subject to an intrastate medical waiver, issued by the Director under subsection (A) to an applicant for insulin-dependent diabetes under subsection (D), must comply with the following conditions:
- 1. Maintain appropriate medical supplies for glucose management while preparing for the operation of a commercial motor vehicle and during its operation. The supplies shall include the following:
 - a. A digital glucose monitor with computerized memory,
 - b. Supplies needed to obtain adequate blood samples and to measure blood glucose,
 - c. Insulin to be used as necessary, and
 - d. An amount of rapidly absorbable glucose to be used as necessary;
 - 2. Maintain a daily record of actual driving time to correlate with the daily glucose measurements;
 - 3. Monitor and maintain blood glucose levels in the range of 100 to 400 milligrams per deciliter (mg/dl) prior to and while driving.
 - a. Check glucose before starting to drive and take corrective action if necessary. If glucose is less than 100 mg/dl, take glucose or food and recheck in 30 minutes. Repeat the process until glucose is greater than 100 mg/dl. Do not drive if glucose is less than 100 mg/dl;
 - b. While driving, stop the vehicle in a safe location and check glucose every two to four hours and take appropriate action to maintain it in the range of 100 to 400 mg/dl;
 - c. Have food available at all times when driving. If glucose is less than 100 mg/dl, stop driving and eat. Recheck in 30 minutes and repeat procedure until glucose is greater than 100 mg/dl; and
 - d. If glucose is greater than 400 mg/dl, stop driving until glucose returns to the 100 to 400 mg/dl range. If more than two hours have passed since last insulin injection and eating, take additional insulin. Recheck blood glucose in 30 minutes. Do not resume driving until glucose is less than 400 mg/dl;
 - 4. Participate in a diabetes education program annually;
 - 5. Undergo the following evaluations and examinations and submit to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, within 10 days of the date of the evaluation or exam:
 - a. A quarterly evaluation completed by a board-certified or board-eligible endocrinologist. A quarterly endocrinologist evaluation shall include a review of the driver's daily glucose logs and glucose levels (from the subject driver's required monitoring device), a comparison of monitoring dates to the driving log to ensure that the subject driver is checking glucose levels prior to operating a commercial motor vehicle, a certifying statement indicating that

Department of Transportation - Commercial Programs

the subject driver is maintaining a glucose level in the range of 100 to 400 mg/dl while driving a commercial motor vehicle, a certifying statement indicating that the subject driver is maintaining a stable insulin regimen and that the subject driver's quarterly A1c result continues to reflect stable control, reports of any severe hypoglycemic episodes, any hypoglycemic-related hospitalization, and any treatment regimen changes since the last hypoglycemic episode;

- b. An annual evaluation completed by a board-certified or board-eligible endocrinologist. In addition to the requirements of a quarterly endocrinologist evaluation under subsection (Q)(5)(a), an annual endocrinologist evaluation shall also include a general physical examination, an indication that the driver has continued to participate in a diabetes education program with the last education date provided, a certifying statement indicating that the driver understands how to individually manage and monitor the driver's diabetes mellitus, an indication of the development of, or progression, or both, in diabetes complications (i.e. renal disease, cardiovascular disease, and neurological disease), a list of all medications taken and whether any of the medications may compromise the driver's ability to operate a commercial motor vehicle, the endocrinologist's belief that the driver has demonstrated the ability and willingness to properly manage the driver's diabetes, and a certifying statement indicating that the driver is able to safely operate a commercial motor vehicle while using insulin;
 - c. An annual vision evaluation report, as prescribed under subsection (D)(3). If there is any evidence of diabetic retinopathy, provide annual documentation by an ophthalmologist that the driver does not have unstable proliferative diabetic retinopathy; and
 - d. An annual medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43. Provide copies of the endocrinologist evaluation and the vision evaluation report to the medical examiner for review; and
6. Report the following information to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, within two days of occurrence:
 - a. All episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; and
 - b. Any involvement in an accident or any other adverse event in a commercial motor vehicle or personal vehicle, related to an episode of hypoglycemia or hyperglycemia.
- R.** A driver subject to an intrastate medical waiver, issued by the Director under subsection (A) to an applicant for monocular vision under subsection (E), must be physically examined every year and shall submit the following to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100:
1. A vision examination report issued within the last 90 days from the date the report is received by the Department, as prescribed under subsection (E)(2); and
 2. A current medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43 within the past year.
- S.** A driver subject to an intrastate medical waiver, or a driver subject to an intrastate medical waiver jointly with a motor carrier co-applicant, may renew an intrastate medical waiver by submitting to the Department's Medical Review Program, P.O. Box 2100, Mail Drop 818Z, Phoenix, Arizona 85001-2100, a new intrastate medical waiver application. The intrastate medical waiver application shall contain the following:
1. Name and complete address of the motor carrier currently employing the applicant;
 2. Name and complete address of the subject driver;
 3. Total miles driven under the current intrastate medical waiver;
 4. Number of accidents incurred while driving under the current intrastate medical waiver, including the date of each accident, number of fatalities, number of injuries, and the estimated dollar amount of any property damage;
 5. A current medical examination report and medical examination certificate completed pursuant to 49 CFR 391.43;
 6. A current medical examination or evaluation as applicable to the medical condition:
 - a. A current medical waiver evaluation summary, as prescribed under subsection (C)(2), for a driver with a loss of limb or limb impairment;
 - b. A current endocrinologist evaluation, as prescribed under subsection (D)(2), and a current vision evaluation report, as prescribed under subsection (D)(3), for a driver who is an insulin-dependent diabetic; or
 - c. A current vision examination report, as prescribed under subsection (E)(2), for a driver with monocular vision;
 7. A copy of the subject driver's current state motor vehicle driving record for the period of time the current intrastate medical waiver has been in effect;
 8. Notification of any change in the type of tractor the driver will operate;
 9. Subject driver's signature and date signed; and
 10. Motor carrier co-applicant's signature and date signed (if applicable).
- T.** The Director may deny an application for the intrastate medical waiver or may grant the waiver in whole or in part and issue the waiver subject to such terms, conditions, and limitations as the Director deems consistent with the public interest.
- U.** The Director may revoke an intrastate medical waiver after providing the driver subject to an intrastate medical waiver written notice of the proposed revocation and a reasonable opportunity to request a hearing pursuant to the procedure prescribed under 17 A.A.C. 1, Article 5. The Director may revoke an intrastate medical waiver if the:
1. Driver subject to an intrastate medical waiver, or co-applicant (if applicable), or both provided false information in the application,
 2. Driver subject to an intrastate medical waiver, or co-applicant (if applicable), or both failed to comply with the terms and conditions of the intrastate medical waiver, or
 3. Issuance of the intrastate medical waiver resulted in a lower level of safety than before the waiver was granted.
- V.** If the enforcement of any provision of this Section would result in the loss or disqualification of federal funding for any state agency or program, that provision is invalid.

Historical Note

New Section recodified from R17-4-435.06 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Section repealed; new Section made by final rulemaking at 14 A.A.R. 3797, effective November 8, 2008 (Supp. 08-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3).

Department of Transportation - Commercial Programs

Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-209. Hazardous Materials Transportation: Incorporation of Federal Regulations; Applicability

A. Incorporation of federal regulations.

1. As relevant to the transportation of hazardous materials by highway, the Department incorporates by reference, as amended under this Section, the following Parts of the Federal Hazardous Materials Regulations; revised as of October 1, 2012, and no later amendments or editions, as 49 CFR - Transportation, Subtitle B - Other Regulations Relating to Transportation, Chapter I - Pipeline and Hazardous Materials Safety Administration, Department of Transportation:
 - a. Subchapter A - Hazardous Materials and Oil Transportation; Part 107 - Hazardous materials program procedures; and
 - b. Subchapter C - Hazardous Materials Regulations; Parts:
 - i. 171 - General information, regulations, and definitions;
 - ii. 172 - Hazardous materials table, special provisions, hazardous materials communications, emergency response information, training requirements, and security plans;
 - iii. 173 - Shippers - general requirements for shipments and packagings;
 - iv. 177 - Carriage by public highway;
 - v. 178 - Specifications for packagings; and
 - vi. 180 - Continuing qualification and maintenance of packagings.
2. The material incorporated by reference under this subsection is on file with the Department and is available from the U.S. Government Printing Office, P.O. Box 979050, St. Louis, Missouri 63197-9000. The incorporated material can be ordered online by visiting the U.S. Government Online Bookstore at <http://bookstore.gpo.gov>.

B. Application and exceptions.

1. Application.
 - a. Regulations incorporated under subsection (A) apply as amended by subsection (C) to motor carriers, shippers, and manufacturers as defined under A.R.S. § 28-5201.
 - b. Regulations incorporated under subsection (A) also apply to any vehicle owned or operated by the state, a political subdivision, or a state public authority, used to transport a hazardous material, including hazardous substances and hazardous waste.
2. Exceptions. An authorized emergency vehicle, as defined under A.R.S. § 28-101, is excepted from the provisions of this Section.

C. Amendments. The following sections of the Federal Hazardous Materials Regulations, incorporated under subsection (A), are amended as follows:

1. Part 171, General information, regulations, and definitions. Section 171.8, Definitions and abbreviations. Section 171.8 is amended by revising the definitions for "Carrier," "Hazmat employer," and "Person," and adding a definition for "Highway" as follows:

"'Carrier' means a person engaged in the transportation of passengers or property by highway as a common, contract, or private carrier and also includes the state, a political subdivision, and a state public authority engaged in the transportation of hazardous material."

"'Hazmat employer' means a person who uses one or more employees in connection with: transporting hazard-

ous material; causing hazardous material to be transported or shipped; or representing, marking, certifying, selling, offering, reconditioning, testing, repairing, or modifying containers, drums, or packagings as qualified for use in the transportation of hazardous material. This term includes motor carriers, shippers, and manufacturers defined under A.R.S. § 28-5201 and includes the state, political subdivisions, and state public authorities."

"'Highway' means a public highway defined under A.R.S. § 28-5201."

"'Person' has the same meaning as defined under A.R.S. § 28-5201."

2. Part 172, Hazardous materials table, special provisions, hazardous materials communications, emergency response information, training requirements, and security plans. Section 172.3, Applicability. Paragraph (a)(2) is amended to read: "Each motor carrier that transports hazardous materials, and each state agency, political subdivision, and state public authority that transports hazardous material by highway."
3. Part 177, Carriage by public highway.
 - a. Section 177.800, Purpose and scope of this part and responsibility for compliance and training. In paragraph (a), the phrase "by private, common, or contract carriers by motor vehicle" is amended to read, "by a motor carrier operating in Arizona, a state agency, a political subdivision, or a state public authority that transports hazardous material by highway."
 - b. Section 177.802, Inspection. Section 177.802 is amended to read: "Records, equipment, packagings, and containers under the control of a motor carrier or other persons subject to this part, affecting safety in transportation of hazardous material by motor vehicle, must be made available for examination and inspection by an authorized representative of the Department as prescribed under A.R.S. §§ 28-5204 and 28-5231."

Historical Note

New Section recodified from R17-4-436 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). Amended by final rulemaking at 9 A.A.R. 1867, effective June 3, 2003 (Supp. 03-2). Amended by final rulemaking at 13 A.A.R. 1262, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-210. Motor Carrier Safety: Public Service Corporation, Political Subdivision of this State that is Engaged in Rendering Public Utility Service, or Railroad Contacting State Officials in an Emergency

- #### **A.**
- A public service corporation, a political subdivision of this state that is engaged in rendering public utility service, or a railroad shall notify Commercial Vehicle Enforcement, through the Arizona Department of Public Safety Duty Office, that an emergency situation under A.R.S. § 28-5234(B) exists. Notification shall be made on a form provided by the Arizona Department of Public Safety and sent by fax transmission to (602) 223-2929 immediately, but in no case longer than three hours from the time the public service corporation, political subdivision of this state that is engaged in rendering public utility service, or railroad determines that the emergency situation exists. The information to be provided includes:

Department of Transportation - Commercial Programs

1. Date of the emergency situation,
 2. Time that the emergency situation started,
 3. Description of the emergency situation,
 4. Location of the emergency situation,
 5. Projected duration of the emergency situation,
 6. Authorized party's signature for determining that an emergency situation exists,
 7. Name and contact number of responsible party in the field, and
 8. The utility's self-generated Emergency ID or tracking number.
- B.** A public service corporation, a political subdivision of this state that is engaged in rendering public utility service, or a railroad shall maintain supporting documentation for no less than three years from the date of an emergency situation and shall make the supporting documentation available to a special agent upon request. Supporting documentation includes:
1. A list of drivers involved in the emergency situation;
 2. The duration of the emergency situation;
 3. The off-duty time provided for the affected drivers after the emergency situation concluded; and
 4. Any United States Department of Transportation recordable accidents, as defined under 49 CFR 390.5, which occurred during the emergency situation.
- C.** After an emergency situation terminates and a driver returns to the principal place of business, the driver shall not drive a commercial motor vehicle unless the driver remains off duty under 49 CFR 395.

Historical Note

New Section recodified from R17-4-438 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 7 A.A.R. 4259, effective September 13, 2001 (Supp. 01-3). Section repealed by final rulemaking at 8 A.A.R. 3249, effective July 10, 2002 (Supp. 02-3). New Section made by final rulemaking at 11 A.A.R. 862, effective February 1, 2005 (Supp. 05-1). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3).

R17-5-211. Motor Carrier Safety: Inspection, Enforcement, Sanction

- A.** Scope. This Section applies to any transporter subject to:
1. R17-5-201 through R17-5-209; and
 2. A.R.S. Title 28, Chapter 14.
- B.** Audits.
1. The Department may conduct an audit for cause or without cause.
 2. The Department may enter the premises of any transporter for the purpose of conducting an audit.
 3. The Department may inspect a motor vehicle:
 - a. Within Arizona at:
 - i. A transporter's place of business, or
 - ii. Any other in-state location, or
 - b. Outside Arizona at a transporter's place of business.
 4. A transporter shall make records available for audit:
 - a. During the transporter's normal business hours, and
 - b. In a specific location as follows:
 - i. The transporter's Arizona place of business, or
 - ii. Either an Arizona location designated by the Director or the transporter's out-of-state place of business.
 5. The Department shall charge a transporter in advance for all expenses to be incurred in performance of an out-of-state audit.
- C.** Violation notification. Within five days after audit completion, the Department shall notify an audited transporter in writing of

all violations. The notification shall specify a deadline date for remedy of all violations.

- D.** Obligation to remedy violations. After receipt of a violation notification, a transporter shall remedy all violations by the specified date to comply with:
1. R17-5-201 through R17-5-209; and
 2. A.R.S. Title 28, Chapter 14.
- E.** Noncompliance: Failure to remedy violations. If the Department determines a transporter does not remedy a violation by the date specified in a violation notice, the Department shall initiate further enforcement action as prescribed under A.R.S. §§ 28-5237 and 28-5238.
- F.** Danger to public safety. If the Director determines a written violation report establishes probable cause of danger to public safety, the Director shall issue an order by 5:00 p.m. the next business day suspending the Arizona registration of the motor vehicle owned or leased by the transporter, or a driver's Arizona driver license or nonresident driving privilege.

Historical Note

New Section recodified from R17-4-439 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 7 A.A.R. 4259, effective September 13, 2001 (Supp. 01-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3). Amended by final rulemaking at 20 A.A.R. 2382, effective August 5, 2014 (Supp. 14-3).

R17-5-212. Motor Carrier Safety: Hearing Procedure

- A.** Scope.
1. This Section applies only to a motor carrier enforcement action under:
 - a. R17-5-201 through R17-5-209; and
 - b. A.R.S. Title 28, Chapter 14.
 2. In an enforcement hearing involving a manufacturer, motor carrier, shipper, or driver under this Section, the Department shall follow the procedures prescribed under 17 A.A.C. 1, Article 5, except as modified under subsections (B) through (I).
- B.** Initiation of proceedings, pleadings.
1. The Director shall initiate a hearing under this Section by:
 - a. Signing and serving a complaint in the form prescribed under subsection (G) that cites a manufacturer, motor carrier, shipper, or driver for an alleged infraction; and
 - b. Serving the cited manufacturer, motor carrier, shipper, or driver with a hearing notice within 15 days after the date the complaint is signed.
 2. After the Director signs a complaint, the Executive Hearing Office shall act on the Director's behalf through completion of an administrative proceeding under this Section.
- C.** Order to show cause.
1. When a complaint is served, the Executive Hearing Office shall immediately issue a summons for a respondent to appear at an administrative hearing to explain why the Executive Hearing Office should not grant the requested relief.
 2. The Executive Hearing Office shall hold a hearing under this Section within 60 days after the date the complaint is served.
 3. The parties may resolve a complaint before the hearing date.
 - a. The respondent shall file any settlement condition with the Executive Hearing Office.

Department of Transportation - Commercial Programs

- b. Complaint settlement terminates the right of both petitioner and respondent to receive additional administrative review.
- D. Service.**
 - 1. The Executive Hearing Office shall:
 - a. Send an order to show cause by certified mail as prescribed under A.R.S. § 28-5232(B), and
 - b. Maintain a proof-of-service file.
 - 2. The date of service is the date of mailing.
- E. Answer.**
 - 1. Within 15 days after service of a complaint, a respondent shall respond to the complaint by:
 - a. Filing a written answer with the Executive Hearing Office; and
 - b. Serving the Assistant Attorney General, Transportation Division, representing the Department with a copy of the answer.
 - 2. A respondent's written answer shall contain:
 - a. An admission or denial of each complaint allegation, and
 - b. A list of all defenses that the respondent intends to raise during the hearing.
 - 3. In a hearing, the Executive Hearing Office shall consider any allegation not denied in the answer as an admission to the allegation.
- F. Default.**
 - 1. The Executive Hearing Office shall find in default a respondent that fails to file an answer within 15 days after the service date of a complaint.
 - 2. If the Executive Hearing Office finds a respondent in default, the Executive Hearing Office shall:
 - a. Consider the respondent's default as an admission of all complaint allegations unless the default is cured under subsection (F)(3), and
 - b. Enter an order granting the relief requested in the Department's complaint.
 - 3. A respondent may cure a default by following Rule 60(c) of the Arizona Rules of Civil Procedure.
- G. Emergency motor carrier hearings; scope.**
 - 1. The Director shall initiate an emergency motor carrier hearing process according to R17-5-211(E) by:
 - a. Issuing a complaint and order to show cause according to the hearing scope under A.R.S. § 28-5232(C); and
 - b. Ordering immediate suspension of the registration of the motor vehicle owned or leased by the manufacturer, shipper, or motor carrier, or the driver license or driver's nonresident operating privilege, as prescribed under A.R.S. § 28-5232(A).
 - 2. The Executive Hearing Office shall set an emergency hearing date to occur within 30 days after the date on the complaint.
 - 3. The complaint and order to show cause shall contain the following:
 - a. The Department as the designated petitioner on the state's behalf;
 - b. The respondent's name and the basis of fact for the complaint, including a listing of any alleged violation of Department statute or rule;
 - c. The relief sought by the Department; and
 - d. An original copy of the written violation notice issued by a law enforcement agency that was served upon the respondent.
 - 4. At an emergency motor carrier hearing, an Executive Hearing Office administrative law judge shall determine whether the respondent:
 - a. Was operating on a public highway and the operation created a danger to the public safety,
 - b. Was responsible for the danger, and
 - c. Is responsible for preventing or remedying further danger to public safety.
 - 5. Upon a finding that the factors in subsection (G)(4) are present, the administrative law judge shall order that the motor carrier's registration and operator's driver license or driver's nonresident operating privilege suspension continue.
 - 6. If a respondent fails to appear at an emergency motor carrier hearing, any suspension previously ordered remains in effect until the respondent appears and meets all requirements under A.R.S. § 28-5232(F).
- H.** Upon a finding that the factors in subsection (G)(4) are present, the Director shall impose a civil penalty as prescribed under A.R.S. §§ 28-5232, 28-5237 and 28-5238.
- I.** A respondent may request judicial review of a motor carrier safety hearing as prescribed under A.R.S. § 28-5239.

Historical Note

New Section recodified from R17-4-440 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 4230, effective November 15, 2002 (Supp. 02-3). Amended by final rulemaking at 17 A.A.R. 1691, effective August 2, 2011 (Supp. 11-3).

ARTICLE 3. PROFESSIONAL DRIVER SERVICES**R17-5-301. Definitions**

In addition to the definitions under A.R.S. §§ 28-101 and 32-2351, the following definitions apply to this Article, unless otherwise specified:

"Activity" means a function or service that is provided by a licensed professional driver training school pursuant to A.R.S. Title 32, Chapter 23 or licensed traffic survival school pursuant to A.R.S. Title 28, Chapter 8, Article 7.1 and that is performed by a professional driver training school instructor or traffic survival school qualified instructor as defined in this Article.

"Applicant" means an individual or school, including principals, requesting in the manner set forth in this Article the issuance or renewal of a license or to become a qualified instructor under A.R.S. Title 28, Chapter 8, Article 7.1 or Title 32, Chapter 23 and this Article.

"Application date" means the date the Department or private entity receives a signed application from an applicant.

"Audit" means a review of the operations, facilities, equipment, and records of a licensee under this Article, which is performed by the Department or private entity under A.R.S. § 28-3411 or 32-2352 to assess and ensure compliance with all applicable federal and state laws and rules.

"Branch" means a licensed professional driver training school's or licensed traffic survival school's business location that is an additional established place of business, but not the school's principal place of business.

"Business day" means a day other than a Saturday, Sunday, or legal state holiday.

"Business manager" means an owner or employee of a licensed school who has primary and sufficient oversight, supervision, and responsibility for all operations necessary to ensure full compliance with all applicable federal or state laws, rules, and school guidelines.

Department of Transportation - Commercial Programs

“Certificate of completion” means an electronic or paper document that is approved by the Department or private entity and that is issued by a traffic survival school or high school qualified instructor to a student who has demonstrated successful completion of a training or educational session or both conducted under this Article.

“Character and reputation” means a person:

- Has not been convicted of a class 1 or 2 felony by a court of competent jurisdiction,
- Has not within five years of application date been convicted of any other felony or misdemeanor offense having a reasonable relationship to the functions of the activity or the employment or category for which the qualification is sought, and
- Has not within 12 months of application date had an application or an examination required for license or qualification under this Chapter denied or revoked due to fraud or misrepresentation.

“Commercial driver license motor vehicle record” has the same meaning as a CDLIS motor vehicle record as defined in 49 CFR 384.105.

“Department-approved inventory” means educational media and related items or other resources provided and approved by the Department or private entity that are deemed necessary or useful for traffic survival school instruction, which includes curriculum, computer disks or drives, classroom training materials, instructor workbooks, instructor training manuals, or other materials, whether stored in paper or electronic formats.

“Established place of business” means a licensed professional driver training school’s or licensed traffic survival school’s business location that is:

- Approved by the Department,
- Located in Arizona,
- Not used as a residence, and
- Where the licensed school performs licensed activities.

“Good standing” means an applicant:

- Has not had a similar business license, qualification, or approval suspended, revoked, canceled, or denied within the previous three years of the application date;
- Does not have any pending corrective action, as defined under R17-5-323, relating to a Department-issued business license, qualification, or approval;
- Has not had a fingerprint clearance card required for licensure under this Article suspended, revoked, or canceled;
- Does not owe delinquent fees, taxes, or unpaid balances to the Department or private entity;
- Has not had any substantiated derogatory information relevant to the requested license reported to the Department about the applicant from any state agency contacted by the Department; or
- Has not been dismissed, or resigned in lieu of dismissal, from a position for cause following allegations of misconduct having a reasonable relationship to the person’s proposed area of licensure or qualification, if the applicant is a former Department employee or a former principal or employee of a licensed professional driver training school or licensed traffic survival school.

“Immediate family member” has the same meaning as prescribed in A.R.S. § 28-2401.

“Inactivation” or “inactive” means a temporary or permanent status, assigned by the Department to a school previously

licensed under this Article, which prohibits the school from further engaging in the previously licensed activity after the occurrence of any of the following actions:

- Cancellation of license, as defined in R17-5-323;
- Suspension of license, as defined in R17-5-323;
- Revocation of license, as defined in R17-5-323;
- Non-renewal of license; or
- Relinquishment of license.

“Licensee” means a school licensed by the Department or private entity under A.R.S. § 28-3413 or 32-2371 and this Article, to perform a licensed activity.

“Principal” means any of the following:

- If a sole proprietorship, the sole proprietor;
- If a partnership, limited partnership, limited liability partnership, limited liability company or corporation, the:
 - Partner;
 - Manager;
 - Member;
 - Officer;
 - Director;
 - Agent; or
- If a limited liability company or corporation, each stockholder owning 20 percent or more of the limited liability company or corporation; or
- If a political subdivision or government agency, the political subdivision or agency head.

“Principal place of business” means a licensed professional driver training school’s or licensed traffic survival school’s administrative headquarters, which shall not be used as a residence.

“Private entity” means an entity that contracts with the Department under A.R.S. § 28-3411 or 32-2352.

“Professional driver training school instructor” means an individual meeting the qualifications under R17-5-303 who can present specific training and educational curriculum to professional driver training school students as provided under this Article.

“Satisfactory driver record” means an applicant has not had within the past 39 months:

- A conviction for driving under the influence, reckless or aggressive driving, racing on a highway, or leaving the scene of an accident;
- A driver license previously canceled, suspended, revoked, or disqualified for any reason except for failing to meet or maintain the commercial driver license physical qualifications under 49 CFR 391.41 and A.A.C. R17-4-508; and
- More than three previous assignments to attend traffic survival school and no pending assignment.

“Traffic survival school qualified instructor” means an individual deemed qualified by the Department or private entity under this Article to conduct instruction of an education session on behalf of a licensed traffic survival school.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-302. Professional Driver Training School and Traffic Survival School Licensing; Eligibility and Application Require-

Department of Transportation - Commercial Programs

ments

- A.** An applicant for a professional driver training school or traffic survival school license, issued by the Department or private entity under A.R.S. § 28-3411 or 32-2371 and this Section, shall meet all applicable licensing requirements under state law and this Article when applying for an original or renewal license.
- B.** An applicant for a professional driver training school or traffic survival school license shall complete and submit to the Department or private entity an application packet that contains all of the following:
 - 1. An application, completed on a form approved by the Department;
 - 2. Certification that each classroom used for the instruction of students is maintained in compliance with all applicable fire codes and local zoning ordinances;
 - 3. Certification that each classroom used for the instruction of students meets the accessibility requirements of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.), as amended;
 - 4. A copy of the following documents relating to the applicant's business if the applicant is a:
 - a.** Corporation:
 - i. A copy of the articles of incorporation, including any amendments filed with the Arizona Corporation Commission; and
 - ii. Any other official documents, including copies of board meeting minutes and annual reports that reflect the most recent change to the corporate name, structure, or officers;
 - b.** Limited liability company:
 - i. A copy of the articles of organization, including any amendments filed with the Arizona Corporation Commission; or
 - ii. A copy of the application for registration as a foreign limited liability company filed with the Arizona Corporation Commission and a copy of the certificate of registration issued by the Arizona Corporation Commission to a foreign limited liability company;
 - c.** Limited partnership or a limited liability partnership:
 - i. A copy of a valid certificate of existence issued by the Arizona Office of the Secretary of State;
 - ii. A copy, stamped "filed" by the Arizona Office of the Secretary of State, of a certificate of limited partnership, certificate of foreign limited partnership, limited liability partnership form, foreign limited liability partnership form, or statement of qualification for conversion of limited partnership or limited liability partnership; or
 - iii. A copy of a valid trade name certificate issued by the Arizona Office of the Secretary of State; or
 - d.** Sole proprietor:
 - i. A copy of a valid certificate of existence issued by the Arizona Office of the Secretary of State, or
 - ii. A copy of a valid trade name certificate issued by the Arizona Office of the Secretary of State;
 - 5. The name and Arizona address of the school's statutory agent, as designated in the articles of incorporation, if the applicant is a corporation;
 - 6. Documentation prescribed under A.R.S. § 41-1080 indicating that each applicant's presence in the United States is authorized under federal law if the applicant is an individual, a sole proprietor, or part of a general partnership;
 - 7. Payment of the license fees prescribed under A.R.S. § 28-3415 or 32-2374 for each activity requested; and
 - 8. A form, approved by the Department, completed for each branch license, if applicable, and accompanied by payment of any applicable branch license fees prescribed under A.R.S. § 28-3415 or 32-2374.
- C.** An applicant shall not use the following in any part of its school name, which is subject to approval by the Department or private entity:
 - 1. The terms "Arizona Department of Transportation," "Department of Transportation," "Motor Vehicle Division," "Motor Vehicle Department," "Division of Motor Vehicles," or "Department of Motor Vehicles;" or
 - 2. The acronyms "ADOT," "DOT," "MVD," or "DMV."
- D.** Professional driver training school applicants must provide the following additional documents with the school's application packet:
 - 1. A copy of the school's complete curriculum, including a sample of all written examinations and answer keys, unless the curriculum is provided by the Department or private entity;
 - 2. Verification of liability insurance coverage reflecting at least the minimum amount prescribed under A.R.S. § 32-2393 for each motor vehicle used to provide instruction; and
 - 3. Diagrams detailing a minimum of three separate behind-the-wheel final evaluation routes with a written narrative indicating all required maneuvers, if the applicant will be providing behind-the-wheel driver training.

Historical Note

New Section recodified from R17-4-512 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section amended by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-303. Professional Driver Training School Instructor Qualifications and Requirements

- A.** A professional driver training school instructor shall:
 - 1. Work for a professional driver training school licensed by the Department or private entity under A.R.S. § 32-2371 and R17-5-302,
 - 2. Possess a valid Arizona commercial driver license with applicable endorsements representative of the vehicle to be used in training,
 - 3. Meet the character and reputation requirements as defined in R17-5-301, and
 - 4. Meet all applicable instructor requirements under state law and this Article.
- B.** Each professional driver training school licensed under A.R.S. § 32-2371 and this Article shall maintain a file for each professional driver training school instructor that contains the following:
 - 1. A copy of a valid Arizona commercial driver license with applicable endorsements representative of the vehicle to be used in training, and
 - 2. An annual commercial driver license motor vehicle record which indicates the instructor has maintained a satisfactory driver record as defined in R17-5-301.
- C.** A business manager of a professional driver training school licensed under A.R.S. § 32-2371 and this Article shall submit to the Department or private entity a list of all of its professional driver training school instructors, including full name

Department of Transportation - Commercial Programs

and commercial driver license number, at the time of hiring the instructors, within 10 calendar days of making any changes to the instructors as required under R17-5-310, and when renewing the school license as required under R17-5-309.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-304. Fingerprint Background Check; Fingerprint Clearance Card

- A. An applicant for a license issued under A.R.S. Title 28, Chapter 8, Article 7.1 or Title 32, Chapter 23, Article 2 and this Article, as applicable, shall:
 1. Successfully complete a fingerprint background check conducted by the Arizona Department of Public Safety under A.R.S. § 41-1758.01, and
 2. Submit to the Department or private entity a copy of the fingerprint clearance card issued to the applicant under A.R.S. § 41-1758.03 as part of the application packet.
- B. An applicant is responsible for all costs associated with obtaining the fingerprint clearance card.
- C. A licensee, as applicable, shall maintain a valid fingerprint clearance card while licensed under this Article, and shall provide written notice to the Department or private entity within 10 calendar days if the fingerprint clearance card is cancelled, suspended, or revoked.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-305. Traffic Survival School Qualified Instructor Status; Eligibility and Application Requirements

- A. An applicant for traffic survival school qualified instructor status shall:
 1. Apply through a traffic survival school licensed by the Department or private entity under A.R.S. § 28-3413 and this Article,
 2. Possess a valid Arizona driver license,
 3. Meet all applicable requirements under this Article, and
 4. Meet the good standing and character and reputation requirements as defined in R17-5-301.
- B. Each traffic survival school qualified instructor applicant shall complete an application packet that contains the following:
 1. An application, completed on a form approved by the Department;
 2. A copy of a valid Arizona driver license;
 3. Documentation prescribed under A.R.S. § 41-1080 indicating that the applicant's presence in the United States is authorized under federal law;
 4. A motor vehicle record, dated within 30 days of the application date, which indicates that the applicant maintained a satisfactory driver record as defined in R17-5-301;
 5. An affidavit from the business manager of the traffic survival school certifying that the qualified instructor applicant has the necessary skills and abilities to give instruction at a professional level; and
 6. Payment of authorized fees as required by the private entity for application and administration of the instructor qualification process and for required instructor continuing education, which shall be negotiated by the Department and the private entity and shall be set forth in their contract.

- C. An applicant for instructor qualification shall have successfully completed a traffic survival school educational workshop or similar curriculum approved by the Department or private entity before being permitted to instruct any traffic survival school course.
- D. An applicant for instructor qualification shall have successfully completed an examination given for qualification of instructors by the Department or private entity as required under R17-5-306 before being permitted to instruct any traffic survival school course.
- E. A business manager of a traffic survival school licensed under A.R.S. § 28-3413 and this Article shall submit to the Department or private entity the complete application packet for each qualified instructor applicant.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-306. Required Training and Examination of School and Instructor Applicants

- A. An applicant for traffic survival school instructor qualification under this Article shall attend Department-approved training and shall pass one or more required examinations administered by the Department or private entity.
- B. The Department or private entity shall limit a traffic survival school qualified instructor applicant to three opportunities within 90 days, based on scheduling, to successfully complete and achieve a passing score or grade on each examination required under this Section.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-307. Approval or Denial of Application; Hearing; Appeal

- A. An application will not be approved by the Department or private entity unless it is properly and fully completed with all required supporting documents and applicable fees as identified in this Article.
- B. The Department or private entity shall provide written notification to the professional driver training school or traffic survival school of the approval or denial of a license or traffic survival school instructor qualification. A notice denying the applicant a license or qualification under this Article shall specify the basis for denial and indicate that the applicant may request a hearing on the denial with the Department's Executive Hearing Office within 30 calendar days of the date on the notice unless the application is withdrawn by the applicant.
- C. The Department or private entity may deem a traffic survival school instructor applicant qualified when a completed application is received and the applicant has successfully completed all required training and examinations.
- D. Unless the application is withdrawn by the applicant, the Department or private entity may deny an application in which the applicant has:
 1. Failed to have or to document a satisfactory driver record as required under R17-5-305, as applicable;
 2. Failed to meet the good standing or character and reputation requirements of the Department as defined in R17-5-301;

Department of Transportation - Commercial Programs

3. Failed to meet the fingerprint clearance card requirement under R17-5-304, as applicable;
 4. Made a material misrepresentation or misstatement on the application;
 5. Violated a federal or state law or rule reasonably related in a business context to the authority applied for; or
 6. Failed to complete all applicable application requirements under this Article.
- E. If timely requested by an applicant under subsection (B), the Department shall schedule and conduct a hearing as prescribed under A.R.S. Title 41, Chapter 6, Article 6 and 17 A.A.C. 1, Article 5 for denial of a license.
- F. An applicant whose application was previously denied by the Department or private entity for making a material misrepresentation or misstatement on the application is not eligible to reapply for 12 months from the date of previous denial.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-308. License Issuance; Effective Date; Expiration; Display

- A. The Department or private entity may issue the following licenses upon determining an applicant meets all eligibility and application requirements provided under A.R.S. Title 28, Chapter 8, Article 7.1 or Title 32, Chapter 23 and this Article:
1. Professional driver training school,
 2. Traffic survival school, and
 3. Established place of business (branch).
- B. The Department or private entity shall license only a school that employs or contracts at least one professional driver training school instructor who meets the qualifications under this Article or at least one currently qualified traffic survival school instructor, as applicable.
- C. A license issued under this Article is:
1. Effective on the date of issuance;
 2. Effective until its expiration on the last day of each calendar year, except:
 - a. A license subject to an active duty military extension shall expire as provided under A.R.S. § 32-4301, and
 - b. A license subject to an individual's limited length of authorized stay shall expire immediately if the individual's presence in the United States is no longer authorized under federal law; and
 3. Nontransferable under any circumstances.
- D. A licensed school shall prominently and publicly display all licenses currently in effect at the school's principal place of business.
- E. A school shall surrender to the Department or private entity within three business days after the date of any license inactivation, as defined in R17-5-301, all:
1. Licenses;
 2. Records pertaining to the school's operations and the training of students; and
 3. Department-approved inventory, as applicable and as defined in this Article.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking

at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-309. Renewal of License

- A. A completed renewal, consisting of the following, shall be submitted to the Department or private entity a minimum of 30 calendar days prior to license expiration, notwithstanding A.A.C. R17-1-102, failure to submit a renewal prior to December 1st shall result in the applicant being subject to all original licensing requirements:
1. A renewal application, completed on a form approved by the Department, including:
 - a. An updated list of all principals, instructors, contracted personnel, and employees of the school who are responsible for Arizona school operations, including full name and driver license number; and
 - b. The signature of all current principals on the completed application; and
 2. Payment of applicable license fees prescribed under A.R.S. § 28-3415 or 32-2374, for each activity and branch.
- B. Notwithstanding A.R.S. § 28-3415 or 32-2374, an annual license issued by the Department or private entity under this Article during the month of December shall not expire until the last day of the subsequent calendar year.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-310. Modifications of Original Application Information

- A. A licensee or traffic survival school qualified instructor, making or learning of any change in the content of its original application information, other than ownership, shall provide written notification of the change, completed on a form approved by the Department and signed by a principal or business manager, to the Department or private entity within two business days of making the change.
- B. A licensed school making a change to a principal or corporate structure shall submit to the Department or private entity a new application for licensing under this Article and all applicable fees, as a new applicant for licensure, within 10 calendar days of making the change.
- C. A licensed school submitting a new application to the Department or private entity, as provided under subsection (B), is subject to the fingerprint clearance card requirement under R17-5-304 unless a valid fingerprint clearance card is already on file with the Department.
- D. A licensed school shall provide written or electronic notification on a form, approved by the Department, to the Department or private entity within 10 calendar days of making any changes to the licensee's contact person, business manager, or instructors.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-311. Professional Conduct; Conflicts of Interest; Advertising

- A. A professional driver training school or traffic survival school representative or instructor shall not:

Department of Transportation - Commercial Programs

1. Accompany a student into any Department office or office of an authorized third party driver license or driver license training provider; or
 2. Solicit an individual for any purpose on any premises rented, leased, operated, or owned by the Department or by an authorized third party driver license or driver license training provider.
- B.** A licensee or traffic survival school qualified instructor shall maintain good standing with the Department at all times while licensed or qualified by the Department or private entity under this Article.
- C.** A licensee shall not delegate or subcontract any licensed activity authorized by the Department or private entity under this Article.
- D.** The Department may take corrective action as provided under R17-5-321 and R17-5-323 if the Department or private entity determines or has reason to believe that a licensee or instructor has demonstrated unethical conduct in the performance of official duties, including:
1. Verbally abusing, intimidating, or sexually harassing a student or potential student; or
 2. Making a false statement that is material to the activities regulated in this Article to any personnel of the Department or private entity.
- E.** A school shall use for all licensed activities and related advertising purposes only its official business name or its doing-business-as name as indicated on the license issued under this Article.
- F.** A licensee shall not represent or imply that it is the state of Arizona, the Department, the Motor Vehicle Division, or any government agency in any printed or electronic advertising or promotional material, except to the extent expressly authorized by the Department.
- G.** Licensee advertising shall not in any way:
1. Contain false, deceptive, or misleading information;
 2. Imply that the licensee can issue or guarantee issuance of a driver license or endorsement;
 3. Imply that the licensee can influence the Department or an authorized third party provider in the issuance of a driver license or endorsement;
 4. Imply that the licensee can provide any activity the licensee is not licensed by the Department or private entity to perform;
 5. Imply that preferential or advantageous treatment by the Department can be obtained; or
 6. Use or contain a term prohibited under R17-5-302(C).
- H.** A school licensed by the Department or private entity under this Article may state in its advertising that it is "licensed" or "qualified" by the Department, but shall not indicate that the school is approved, sanctioned, or in any other way endorsed or recommended by the Department.
- I.** All printed or electronic advertising or promotional material used, issued, or published by a licensee must be pre-approved by the Department or private entity.
- J.** An instructor, in any official capacity as an instructor or for compensation, shall not provide any classroom instruction or skills training for an immediate family member or a principal or employee of any school that employs the instructor.
- K.** A full-time employee of the state of Arizona shall not receive any direct pecuniary payments from any fees paid by those who attend a licensed school.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking

at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-312. Cancellation and Continuity of Services to Participants

- A.** A principal of a school ceasing operations or cancelling courses for any reason shall ensure continuity of services to each student currently enrolled in courses as follows:
1. A principal shall notify each student currently scheduled for, or enrolled in, a course that the school will be unable to provide the services previously offered 72 hours before the scheduled course; and
 2. A principal shall refund within four business days any payment received by the school for a course not yet provided.
- B.** A principal of a school ceasing operations shall provide to the Department or private entity, upon request, a written list of all students notified under subsection (A) with an explanation of the final resolution reached as a result of the principal's contact with the student.
- C.** A principal's failure to provide continuity of services to enrolled students as provided under this Section may result in the loss of the principal's status of good standing with the Department.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-313. Method of Instruction; Curriculum

- A.** An instructor shall teach only curriculum approved by the Department or private entity to a student attending a class.
- B.** An instructor shall not conduct personal business during a time designated for instruction.
- C.** An instructor shall not solicit students during training classes for businesses other than those licensed by the Department or private entity.
- D.** A school or instructor shall ensure that a student has both fully attended and successfully completed a course before issuing a certificate of completion to the student.
- E.** A licensed traffic survival school must use all equipment required by the Department or private entity to present the curriculum to the students, including at a minimum, a computer, a PowerPoint compatible projector, a DVD player, and a display monitor visible to all students.
- F.** Professional driver training school approved curriculum. The Department shall approve, and may modify, in writing, a uniform curriculum that the professional driver training school shall teach as applicable for each activity the licensee is authorized to perform. The curriculum shall be a standard course of instruction used by a professional driver training school for the training and education of students.
- G.** Traffic survival school approved curriculum. The Department shall approve, and may modify, in writing a uniform curriculum that the traffic survival school shall teach. The curriculum shall be selected and approved on the basis of effectiveness in improving the safety and habits of drivers.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-314. Certificate of Completion

Department of Transportation - Commercial Programs

- A. A qualified instructor for traffic survival school or high school driver education program shall accurately complete all required information on a certificate of completion:
 - 1. The instructor providing the training listed on the certificate of completion shall sign the document once training is complete, or
 - 2. The instructor providing the final instruction or test shall sign the certificate of completion if training is provided by multiple instructors.
- B. A qualified instructor shall provide a certificate of completion to the student at the conclusion of the course. A traffic survival school qualified instructor shall print the certificate of completion from the web site of the Department's private entity or the Department's web site, as applicable.
- C. A high school qualified instructor shall not make a correction to a certificate of completion. If an error is made, the high school qualified instructor shall:
 - 1. Void the certificate of completion,
 - 2. Write the word "VOID" or "VOIDED" clearly on the face of each voided certificate of completion, and
 - 3. Issue a new certificate of completion.
- D. The Department may elect not to accept a certificate of completion that contains an alteration, erasure, correction, or illegible information.
- E. A school or qualified instructor shall not withhold timely issuance of a certificate of completion due to a payment dispute between the school and the student.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-315. Record Retention

- A. A licensed traffic survival school shall electronically transmit proof of course completion immediately following each student's satisfactory completion of a traffic survival school course in a manner and with the basic computer equipment prescribed by the Department or private entity. At a minimum, the computer equipment must be able to temporarily store, and electronically transmit over the internet, the certificates of completion required by the Department or private entity.
- B. All records pertaining to a licensed school's operations and training of students shall be:
 - 1. Stored and securely maintained at the licensee's principal place of business,
 - 2. Available for inspection by the Department or private entity during business hours, and
 - 3. Retained by the school for three years from the date of course completion.
- C. A licensed school shall establish and maintain separate records for each authorized activity.
- D. A licensed school shall maintain, for three years, attendance records for each class conducted.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-316. Traffic Survival School Department-Approved Inventory

- A. A traffic survival school licensed under this Article shall:
 - 1. Prohibit public or other unauthorized access to all Department-approved inventory, and

- 2. Submit to the Department or private entity a written report detailing the circumstances surrounding the loss or theft of any missing or stolen Department-approved inventory.
- B. A licensee shall use only Department-approved inventory.
- C. A school principal or business manager shall submit to the Department or private entity a written or electronic request for any additional Department-approved inventory the school may require.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-317. School Responsibilities

While licensed by the Department or private entity under A.R.S. § 28-3413 or 32-2371 and this Article, the school shall:

- 1. Comply with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and applicable federal regulations by providing appropriate auxiliary aids and services to students with disabilities requesting reasonable accommodation;
- 2. Comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and applicable federal regulations. As a requirement of compliance, the school shall:
 - a. Provide public notification of its compliance with Title VI by displaying a Department-approved notice to the public;
 - b. Take reasonable steps to ensure that Limited English Proficient (non-English speaking) customers have meaningful access to the services or activities performed under this Article, which includes, providing the school's services and authorized transactions in languages other than English and providing these services at no additional cost to the customer or student;
 - c. Report promptly any customer complaints alleging discrimination or failure to meet the requirements of this Section to the Department's Civil Rights office for processing and investigation. The school shall immediately upon receipt of such complaints provide access to its facilities, books, records, accounts, and other sources of information as may be determined or requested by the Department to be pertinent, in order to ascertain compliance with Title VI; and
 - d. Inform and formally train all school officers, principals, employees, and contractors on the requirements to comply with Title VI; and
- 3. Provide written notice to the Department or private entity within twenty-four hours if the driver license of any of the school's principals, managers, or instructors is suspended, revoked, cancelled, or disqualified.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-318. Instructor Responsibilities

A professional driver training school instructor or traffic survival school qualified instructor shall:

- 1. Attend all ongoing training and continuing education as required by the Department or private entity;
- 2. Provide written notice to the licensed professional driver training school or traffic survival school within twenty-

Department of Transportation - Commercial Programs

- four hours if the instructor's driver license is suspended, revoked, cancelled, or disqualified;
- 3. Conduct training and courses only at training sites approved by the Department or private entity;
- 4. Conduct the final evaluation on behind-the-wheel final evaluation routes approved by the Department or private entity;
- 5. Follow and complete the curriculum approved by the Department or private entity for each course conducted; and
- 6. Conduct at least two courses in a calendar year.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

R17-5-319. Traffic Survival Schools

- A. The Department shall assign an individual only to a traffic survival school licensed by the Director under this Article.
- B. A traffic survival school or qualified instructor shall allow only students who provide acceptable proof of traffic survival school assignment to register for and attend a traffic survival school course. The following documents are acceptable proof of assignment:
 - 1. Notice of traffic survival school assignment or suspension for failure to attend traffic survival school,
 - 2. An order from a court or other appropriate tribunal from Arizona or another state indicating traffic survival school assignment,
 - 3. Traffic survival school proof of assignment form obtained from the Department,
 - 4. Electronic verification of traffic survival school assignment through the Department's private entity, or
 - 5. Motor vehicle record.
- C. On enrollment of a student in, or on a student's attendance of, a traffic survival school course, a licensed traffic survival school shall collect the statutory enrollee fee provided in A.R.S. § 28-3411, unless the student has paid the enrollee fee in advance. The licensed traffic survival school also shall collect the records fee prescribed by A.R.S. § 28-446, if applicable, before the student attends the traffic survival school course. The licensed traffic survival school shall fully remit these fees to the private entity within four business days after a student completes the traffic survival school course. If a licensed traffic survival school does not timely remit the enrollee fees, the Department or private entity may notify the traffic survival school that its prospective future students will be required to prepay the enrollee fees until remittances are current. The amount of the enrollee fee charged by the private entity shall be negotiated by the Department and the private entity and shall be set forth in their contract.
- D. A traffic survival school or qualified instructor shall not:
 - 1. Conduct courses with a number of students in excess of the classroom's fire safety capacity reported to the Department or private entity by the licensee under R17-5-321;
 - 2. Conduct courses with more than 30 students per qualified instructor;
 - 3. Exclude a translator, the Director, the private entity, or Department personnel from attending courses;
 - 4. Issue a certificate of completion to a student who has not fully completed the required curriculum; or
 - 5. Issue a certificate of completion for a student whom the instructor did not personally instruct.

- E. A licensee shall retain for three years all copies of the student's acceptable proof of assignment and the signed class roster of attending students.
- F. The private entity may develop and administer a web site that allows individuals who are assigned to traffic survival school to locate and enroll online in traffic survival school courses.
- G. Only an individual who meets the qualifications under R17-5-305, remains in compliance with this Article, and who is granted and retains traffic survival school qualified instructor status, may be allowed to teach individuals assigned by the Department to attend a licensed traffic survival school.
- H. A licensed traffic survival school must hold at least one course every 60 days at the school's established place of business and each branch, as applicable.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-320. High School Driver Education Program

- A. The following definitions apply to this Section:
 - 1. "Accountable forms inventory" means a series of distinctly and consecutively numbered documents provided by the Department to an instructor qualified under this Section for:
 - a. Recording in a log, the assigned number of each document completed, issued, or voided by a high school qualified instructor; and
 - b. Reporting to the Department the assigned number of each document completed, issued, or voided by a high school qualified instructor.
 - 2. "Certified instructor report" means a report prepared and certified monthly by each high school qualified instructor listing all certificates of completion that were issued and voided.
- B. The Department shall cooperate with the Arizona Department of Education, under A.R.S. §§ 28-3174 and 32-2353, to enable the issuance of a certificate of completion to a regularly enrolled full-time student as part of a high school driver education program.
- C. The Director or private entity shall qualify an instructor approved by the Arizona Department of Education to issue a certificate of completion.
- D. A high school qualified instructor may issue a certificate of completion to a regularly enrolled full-time student who:
 - 1. Successfully completes the classroom course of instruction required by the Arizona Department of Education, which may waive the student's requirement to take the Department's written test; or
 - 2. Successfully completes the skills course of instruction required by the Arizona Department of Education, which may waive the student's requirement to take the Department's skills test.
- E. A high school qualified instructor shall submit to the Department, no later than the fifth day of each month, all certified instructor reports and certificates of completion issued by the school during the preceding month. A high school qualified instructor who does not issue any certificates of completion during the preceding month shall submit to the Department a certified instructor report indicating "no activity."
- F. A high school qualified instructor shall provide the status of certificates of completion to the Department, upon request, by identifying the certificates by number as either issued, not issued, lost, or stolen.

Department of Transportation - Commercial Programs

- G. A high school representative shall promptly return all unused or un-issued certificates of completion to the Department, upon request.
 - H. A certificate of completion constitutes accountable forms inventory to be secured at all times by the high school qualified instructor or other designee of the high school and any misuse, fraud, or negligence by a high school qualified instructor involving the form in consultation with the Arizona Department of Education pursuant to A.R.S. § 28-3174 may lead to Department disqualification of the instructor's authorization to issue the form.
 - I. A high school qualified instructor shall submit to the Department all reports required under this Article by regular mail, certified mail, registered mail, electronic mail, or personal delivery. The following dates shall be used to determine whether a report was received within the required timeframes established under this Section:
 - 1. For regular mail, the postmark date;
 - 2. For certified or registered mail, the date of receipt by the designated delivery service;
 - 3. For electronic mail, the send date; and
 - 4. For personal delivery, the Department's time and date stamp of receipt.
 - J. If a high school qualified instructor fails to timely or accurately submit to the Department a certified instructor report required under this Section, the Department may initiate corrective action. The Department may:
 - 1. Provide an oral or written warning for a first untimely or inaccurate report,
 - 2. Send a letter of concern for a second untimely or inaccurate report in a 12-month period, and
 - 3. Request that the Arizona Department of Education disqualify a high school qualified instructor from issuing a certificate of completion under this Article for a third untimely or inaccurate report in a 12-month period.
 - K. A high school shall develop and maintain a driver education class training record for each student, which shall include at least the following information:
 - 1. Student's name;
 - 2. Student's phone number;
 - 3. Student's driver license or instruction permit number and its expiration date;
 - 4. Fee amounts collected for any related services;
 - 5. Date, type, and duration of all classroom lessons and practical instruction;
 - 6. Make, model, and license plate number of any motor vehicle used to conduct training, as applicable;
 - 7. Date and results of all tests administered;
 - 8. Number of certificates of completion issued; and
 - 9. Name and Department-issued number of each instructor who conducted a lesson or test.
- Historical Note**
- New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).
- R17-5-321. Periodic Audits, Monitoring, Inspections, and Investigations**
- A. To determine compliance with license requirements, qualification requirements and applicable federal and state laws and rules, the Department or private entity may:
 - 1. Monitor for compliance by attending any licensed school's course or other activities on a scheduled or unscheduled basis;
 - 2. Audit for compliance by performing periodic reviews of the operations, facilities, equipment, and records;
 - 3. Inspect for compliance by making random, on-site visits during posted business hours; or
 - 4. Investigate for compliance by interviewing or submitting questions to school owners, instructors, and former or current students.
 - B. Failure of a school or instructor to allow or cooperate in an audit, monitoring, inspection, or investigation may result in the Department issuing an immediate cease and desist order or requesting a hearing for suspension or revocation of a license issued under this Article.
 - C. During an audit, monitoring, inspection, or investigation of a licensee, the Department, the private entity, a law enforcement agency, or employee of the Federal Motor Carrier Safety Administration may:
 - 1. Review and copy paper and electronic records;
 - 2. Examine the licensee's principal and established place of business, all branches, training, or road training sites; and
 - 3. Interview the school's employees, instructors, and customers.
 - D. A licensee shall make records available for audit, monitoring, inspection, or investigation at the licensee's principal place of business.
 - E. After an audit or monitoring, the Department or private entity shall send a report of the results in writing to the school.
 - F. If instances of non-compliance are found as a result of an audit, monitoring, inspection, or investigation, the Department or private entity may determine if either of the following actions is required:
 - 1. An informal meeting to discuss findings, or
 - 2. A written compliance plan addressing findings.
 - G. If greater instances of non-compliance are found as a result of an audit, monitoring, inspection, or investigation, the Department may determine if either of the following actions is required:
 - 1. A probationary period; or
 - 2. A request for a hearing to cancel, suspend, or revoke a license to operate a school or conduct instruction under this Article.
 - H. The Department or private entity may issue a notice of corrective action to a licensee if the licensee fails to comply with a warning letter, with an audit, inspection or investigation request, a monitoring request, or with written findings provided by the Department or private entity. Only the Department may initiate a corrective action provided under subsection (G).
 - I. Each site used by a school as an office, training location, or classroom location shall:
 - 1. Be inspected and approved by the Department or private entity prior to initial use or relocation,
 - 2. Be licensed by the Department or private entity, and
 - 3. Have office hours displayed in a conspicuous location at each site open to the public during the posted hours.
 - J. There shall be a clearly defined and visible separation between a school and any other business if a professional driver training school or traffic survival school is located in an office building, store, or other physical structure shared with any other business or enterprise.
 - K. Any request by a school for inspection and approval of a site on a recognized Indian reservation shall contain the written permission of the appropriate Tribal authority.
 - L. Any request by a school for inspection and approval of a site on a military base shall contain the written permission of the appropriate military authority.
 - M. A school shall submit to the Department or private entity a copy of the written lease or contract agreement or deed of

Department of Transportation - Commercial Programs

ownership, if the site is owned by the school, for each site, as applicable.

- N. Any request by a traffic survival school for inspection and approval of a site to be used for educational sessions shall include the approved fire safety capacity of the classroom(s) at that site and shall be signed by a principal of the traffic survival school.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-322. Cease and Desist Order; Hearing and Appeal

- A. The Department may immediately issue and serve a cease and desist order on a licensee, as prescribed under A.R.S. § 28-3417 or 32-2394, if the Department or private entity has reasonable cause to believe that the licensee has violated or is violating a federal or state law or rule relating to a duty prescribed under this Article.
- B. A cease and desist order issued by the Department to a licensee under this Article shall:
1. Require the person on receipt of the order to cease and desist from further engaging in the prohibited conduct or in any activity authorized under this Article as specified in the cease and desist order, and
 2. Provide information regarding the person's right to request a hearing to show cause as to why the Department's order should not be upheld.
- C. On failure or refusal of a licensee to comply with a cease and desist order, or after a requested hearing, the Department may cancel, suspend, or revoke the license of the licensee under A.R.S. § 28-3416 or 32-2391 and R17-5-323.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2).

R17-5-323. Non-compliance; Notice of Corrective Action; Cancellation, Suspension, or Revocation of a Professional Driver Training School License or Traffic Survival School License or Qualification of a Traffic Survival School Instructor; Hearing and Appeal

- A. The following definitions apply to this Section:
1. "Cancellation" means a Department action that withdraws a license or qualification of a traffic survival school instructor issued under A.R.S. Title 28, Chapter 8, Article 7.1 or Title 32, Chapter 23 and this Article.
 2. "Revocation" means a Department action that terminates, for an indefinite period of time, a licensee's or traffic survival school qualified instructor's privilege to operate a school or conduct instruction under this Article.
 3. "Suspension" means a Department action that prohibits, for a stated period of time, a licensee or traffic survival school qualified instructor from operating as a school or instructor under this Article.
- B. The Department or private entity may initiate corrective action on a licensee or a traffic survival school qualified instructor as provided under A.R.S. Title 28, Chapter 8, Article 7.1, Title 32, Chapter 23, Article 3, or Title 41, Chapter 6, Article 6, and this Article, if satisfactory evidence shows that a licensee or instructor, individually or collectively:
1. Violated a federal or state law or rule reasonably relating in a business context to a duty prescribed under this Article;
 2. Failed to maintain a status of good standing or character and reputation as defined in R17-5-301; or

3. Provided false, deceptive, or misleading information to the Department or private entity in either an application or in response to an audit or inspection conducted pursuant to R17-5-321.

- C. A corrective action initiated under subsection (B), depending on the severity or number of violations, may include the Department imposing a term of probation; issuing a cease and desist order under A.R.S. § 28-3417 or 32-2394; or requesting a hearing to cancel, suspend, or revoke an existing license under A.R.S. § 28-3416 or 32-2391.
- D. A notice of corrective action issued by the Department requesting a hearing to cancel, suspend, or revoke an existing school license shall include:
1. The grounds for the Department's action; and
 2. A brief written statement explaining that it will request that a hearing be held before the Department's Executive Hearing Office on the proposed cancellation, suspension, or revocation of a professional driver training school license or a traffic survival school license, as provided under A.R.S. § 28-3416 or 32-2391.
- E. A notice of corrective action issued by the Department to cancel, suspend, or revoke an existing qualification of a traffic survival school instructor shall include:
1. The grounds for the Department's action; and
 2. A brief written statement of the hearing and appeal rights, including that the instructor may request a hearing with the Department's Executive Hearing Office within 30 calendar days of the date on the notice for the cancellation, suspension, or revocation of the qualification of a traffic survival school instructor, as provided in A.R.S. §§ 41-1001(12) and 41-1064.
- F. The Department shall provide notice and conduct hearings as prescribed under A.R.S. Title 41, Chapter 6, Article 6, and 17 A.A.C. 1, Article 5, as applicable.

Historical Note

New Section made by exempt rulemaking under Laws 2013, Ch. 129, § 27 at 21 A.A.R. 1096, effective September 1, 2015 (Supp. 15-2). Amended by final rulemaking at 23 A.A.R. 2045, effective September 5, 2017 (Supp. 17-3).

ARTICLE 4. DEALERS**R17-5-401. Definitions**

In addition to the definitions in A.R.S. §§ 28-4301 and 28-4410, the following definitions apply to this Article unless otherwise specified:

"Dealer" or "motor vehicle dealer" has the same meaning as "motor vehicle dealer" in A.R.S. § 28-4301.

"Director" has the same meaning as in A.R.S. § 28-101.

"Owner" means a person who holds the legal title of a motor vehicle.

"Principal place of business" means a licensed place of business from which a wholesale motor vehicle dealer or a broker conducts business and keeps the records of the business.

"State" means the state of Arizona and all its agencies and political subdivisions, their officers and agents.

"Taxpayer identification number" means a number used for tax purposes that is assigned by the Social Security Administration or the Internal Revenue Service.

"VIN" or "Vehicle Identification Number" means the unique code, including serial number, used by an automobile manufacturer to identify a specific motor vehicle.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 1434, effective July 4, 2017 (Supp. 17-2).

R17-5-402. Bond Amounts; Dealers, Brokers, and Automotive Recyclers' Business Licenses

- A. As prescribed under A.R.S. § 28-4362, the Department shall require a bond in the amount specified for the following motor vehicle business license applicants:
1. \$100,000 for:
 - a. A new motor vehicle dealer,
 - b. A used motor vehicle dealer, or
 - c. A public consignment auction dealer.
 2. \$25,000 for:
 - a. A broker,
 - b. A wholesale motor vehicle dealer, or
 - c. A wholesale motor vehicle auction dealer.
 3. \$20,000 for an automotive recycler.
- B. An applicant shall submit a bond on the original vehicle dealer bond form prescribed by the Director that meets the requirements in A.R.S. § 28-4362 and these rules. An applicant shall submit a separate, original bond for each application and for each county in which an applicant or licensee has an established place of business or a principle place of business. A power of attorney for the attorney-in-fact shall be attached to the dealer bond, if applicable.
- C. An applicant shall sign the dealer bond, in addition to all partners for a partnership, or one officer for an incorporation.
- D. The completed bond form shall contain an embossed stamp, seal, or sticker from the bond company.
- E. The Department shall not accept a handwritten bond.

Historical Note

New Section recodified from R17-4-240 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 9 A.A.R. 1864, effective August 2, 2003 (Supp. 03-2). Section amended by final rulemaking at 23 A.A.R. 1434, effective July 4, 2017 (Supp. 17-2).

R17-5-403. Expired**Historical Note**

New Section made by final rulemaking at 9 A.A.R. 1864, effective August 2, 2003 (Supp. 03-2). Section expired under A.R.S. 1056(J) at 22 A.A.R. 3195, effective October 5, 2016 (Supp. 16-3).§

R17-5-404. Dealer Title Requirement for Vehicle Sale

For purposes of A.R.S. § 28-4409(A), the dealer's name shall be recorded on a title certificate as transferee or purchaser.

Historical Note

New Section recodified from R17-4-241 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section heading corrected as recodified at 7 A.A.R. 3483 (Supp. 09-2).

R17-5-405. Dealer Acquisition Contract

- A. For the purposes of A.R.S. § 28-4410, a dealer shall prepare a dealer acquisition contract on a Department form with contents as prescribed under subsection (B).
- B. A dealer acquisition contract shall contain the following information:
1. The heading "Dealer Acquisition Contract;"
 2. The dealer's name and dealer license number;
 3. The dealer's business address and telephone number;
 4. The owner's name, address, telephone number; driver license number or taxpayer identification number, as applicable; and type of ownership;

5. The VIN; license plate number; licensing state; and model, make, and year of the motor vehicle that has a dealer acquisition contract;
6. If there is a lien holder, for each lien holder:
 - a. The lien holder's name, address, and telephone number;
 - b. The lien balance;
 - c. The prepayment penalties, if any; and
 - d. Other information on the terms and conditions of the lien repayment.
7. A statement by the owner that the motor vehicle is free and clear of all liens and encumbrances, except those disclosed under subsection (B)(6)(a) and the unpaid lien balance is no greater than disclosed under subsection (B)(6)(b);
8. The contracted purchase price and a recital that this amount has been either paid directly to the owner or credited to the owner against the purchase price of another motor vehicle;
9. A statement indicating that the owner is selling and transferring the described motor vehicle to the dealer;
10. An authorization by the owner permitting the dealer to obtain all information necessary to verify the accuracy of the lien balance and assure that the balance is paid and the lien is released;
11. A statement by the owner that the registration document provided to the dealer is the original and most recent registration issued for the vehicle;
12. An agreement indicating whether the owner or dealer is responsible to satisfy the lien balance;
13. An authorization by the owner permitting the dealer to obtain the original title certificate from the lien holder; endorse the owner's name on the title; and if necessary, transfer the title to the dealer;
14. A statement that if the owner receives the certificate of title, the owner shall immediately deliver the title to the dealer and provide any signature and acknowledgment necessary to complete the title transfer to the dealer;
15. The date when the dealer acquisition contract is executed by each party;
16. The dealer's signature; and
17. The owner's signature.

- C. A dealer or an owner who adds to a dealer acquisition contract a provision not described in this Section shall ensure that the provision does not conflict with or alter the meaning of a provision of this Section.
- D. When a dealer prepares a dealer acquisition contract as prescribed under this Section, the dealer shall give a copy to the owner and keep the original at the dealer's established place of business for three years after the date that the contract expires or terminates, or the date the motor vehicle is sold.
- E. In complying with this Section, a dealer shall not interpret or claim compliance to be an approval by the state of the fairness, validity, or legality of a dealer acquisition contract. This Section furnishes only information required in a dealer acquisition contract. This Section does not detail any additional contractual requirements that may be defined under other Arizona statutes.

Historical Note

New Section recodified from R17-4-245 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 4234, effective November 15, 2002 (Supp. 02-3). Section amended by final

Department of Transportation - Commercial Programs

rulemaking at 23 A.A.R. 1434, effective July 4, 2017
(Supp. 17-2).

R17-5-406. Dealer Consignment Contract

- A. For the purposes of A.R.S. § 28-4410, a motor vehicle dealer shall prepare a dealer consignment contract on a form with contents as prescribed under subsection (B).
- B. A dealer consignment contract shall contain the following information:
 1. The heading "Dealer Consignment Contract;"
 2. The dealer's name and dealer license number;
 3. The dealer's business address and telephone number;
 4. The owner's name, address, telephone number, driver license number or taxpayer identification number, and type of ownership;
 5. The VIN; license plate number; licensing state; and model, make, and year of the motor vehicle that has a dealer consignment contract;
 6. If there is a lien holder, for each lienholder:
 - a. The lien holder's name, address, and telephone number;
 - b. The lien balance;
 - c. The prepayment penalties, if any; and
 - d. Other information on the terms and conditions of the lien repayment;
 7. A statement by the owner that the vehicle is free and clear of all liens and encumbrances, except those disclosed under subsection (B)(6)(a) and the lien balance is no greater than that disclosed under subsection (B)(6)(b);
 8. An authorization by the owner permitting the dealer to market and sell the vehicle on behalf of the owner at a mutually-agreed upon, specified, minimum price;
 9. An agreement by the dealer to inform any prospective purchaser that the vehicle is on consignment;
 10. An agreement by the dealer that, upon receiving the sale proceeds, the dealer shall immediately satisfy all disclosed liens and ensure that the liens are released;
 11. An agreement by the owner that, upon the completion of the sale and after receiving the sale proceeds, the owner shall promptly deliver and endorse the title certificate for reassignment to the purchaser;
 12. The expiration date of the consignment contract;
 13. An agreement by the dealer to deliver the motor vehicle to the owner at a specified location on the date that the contract expires or terminates;
 14. An agreement by the owner to pay any specified fees due to the motor vehicle dealer on the return of the vehicle, after the expiration or termination of the consignment contract;
 15. The date the contract is executed;
 16. The dealer's signature; and
 17. The owner's signature.
- C. A dealer or an owner who adds to a dealer consignment contract a provision not described in this Section shall ensure that the provision does not conflict with or alter the meaning of a provision of this Section.
- D. When a dealer prepares a dealer consignment contract as prescribed under this Section, the dealer shall give a copy to the owner and keep the original at the dealer's established place of business for three years after the date that the dealer consignment contract expires or terminates, or the vehicle is sold.
- E. In complying with this Section, a dealer shall not interpret or claim compliance to be an approval by the state of the fairness, validity, or legality of a dealer consignment contract. This Section furnishes only information required in a dealer consignment contract. This Section does not detail any additional

contractual requirements that may be defined under other Arizona statutes.

Historical Note

New Section recodified from R17-4-246 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 8 A.A.R. 4234, effective November 15, 2002 (Supp. 02-3). Section amended by final rulemaking at 23 A.A.R. 1434, effective July 4, 2017 (Supp. 17-2).

R17-5-407. Motor Vehicle Repossession

- A. The Department shall not transfer a title when the ownership of a motor vehicle titled in this state or another state reverts through operation of state law to a lienholder of record through repossession unless the following conditions are met:
 1. The motor vehicle is physically located in this state;
 2. A notice of lien is filed with the Department;
 3. A completed affidavit from the lienholder is submitted to the Department stating that the motor vehicle is physically located in this state and was repossessed on default pursuant to the terms of the lien and applicable law and that this state, its agencies, employees, and agents shall not be held liable for relying on the contents of the affidavit; and
 4. In addition to the information required in subsection (A)(3), the affidavit contains the following information:
 - a. The (VIN),
 - b. The vehicle model year,
 - c. The vehicle make,
 - d. The registered owner's name,
 - e. The date of repossession,
 - f. The state in which the vehicle is titled,
 - g. The lienholder company name,
 - h. The lienholder agent or representative name,
 - i. The lienholder signature, and
 - j. The notary or Department agent signature.
- B. The Department shall accept out-of-state affidavits of repossession that comply with the requirements in subsections (A)(3), (A)(4), and subsection (C) if all of the following apply:
 1. The affidavit is submitted by an Arizona licensed dealer, and
 2. The Arizona licensed dealer is transferring the title into the dealership's name.
- C. A lienholder may sell a repossessed motor vehicle without transferring the title into the lienholder's name by completing a Bill of Sale for submission to the Department. The Bill of Sale may be combined with the affidavit of repossession and shall contain the following information:
 1. The buyer's name;
 2. The sale date;
 3. The buyer's street address, including the city, state, and zip code;
 4. The name of the new lienholder, if applicable;
 5. The new lien date, if applicable;
 6. The odometer certification statement, if required by A.R.S. § 28-2058, including odometer reading, and an acknowledgment with the buyer's name and signature;
 7. A statement that the buyer is aware of the odometer certification made by the seller;
 8. The seller's name;
 9. The seller's notarized signature; and
 10. The seller's address, including city, state, and zip code.
- D. A completed repossession affidavit as prescribed in this Section is proof of ownership, right of possession, and right of transfer.

Department of Transportation - Commercial Programs

- E. The Department has no responsibility relating to foreclosure on real property under A.R.S. Title 33, Chapter 7.

Historical Note

New Section recodified from R17-4-260 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 10 A.A.R. 3399, effective October 2, 2004 (Supp. 04-3). Section amended by final rulemaking at 23 A.A.R. 1434, effective July 4, 2017 (Supp. 17-2).

R17-5-408. Resale of a New Motor Vehicle

- A. A motor vehicle dealer that sells a new motor vehicle that was delivered to a previous purchaser, shall provide written notice to the new purchaser under subsection (B).
- B. A motor vehicle dealer shall ensure that the notice under A.R.S. § 28-4422 contains the following information:
1. The name of the dealership;
 2. A vehicle description, including year, make, and VIN;
 3. A statement that the new motor vehicle was delivered to a previous purchaser;
 4. The printed name of the new purchaser; and
 5. The signature of the new purchaser (initials are not acceptable) indicating that the new purchaser has received the notice.
- C. The motor vehicle dealer shall:
1. Provide a copy of the notice under subsection (B) to the new purchaser, and
 2. Keep a copy of the signed notice under subsection (B) at the new motor vehicle dealer's established place of business for at least three years.
- D. The motor vehicle dealer is not required to submit the notice to the Department under subsection (B) unless otherwise required by state or federal law.
- E. A new motor vehicle dealer shall not add additional language to the notice that would conflict with, or alter the intent of the provisions specified in subsection (B).

Historical Note

New Section made by final rulemaking at 12 A.A.R. 225, effective March 11, 2006 (Supp. 06-1). Section amended by final rulemaking at 23 A.A.R. 1434, effective July 4, 2017 (Supp. 17-2).

ARTICLE 5. MOTOR CARRIER FINANCIAL RESPONSIBILITY**R17-5-501. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-4001, 28-4031, 28-5201, and 28-5431, the following terms apply to this Article, unless the context otherwise requires:

"Binder" means a contract for temporary insurance as described in A.R.S. § 20-1120.

"Initial motor vehicle registration" means the first time a motor carrier registers a specific motor vehicle or a vehicle combination in Arizona.

"Insurance company" means an entity that is in the business of issuing motor carrier liability insurance policies.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 235, effective March 11, 2003 (Supp. 03-1). Amended by final rulemaking at 18 A.A.R. 2365, effective November 10, 2012 (Supp. 12-3).

R17-5-502. Repealed**Historical Note**

New Section recodified from R17-4-226 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section

repealed by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-503. Repealed**Historical Note**

New Section recodified from R17-4-226.01 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-504. Requirement to Submit Proof of Financial Responsibility; Applicability; Procedure; Exception

- A. If a person or motor carrier subject to financial responsibility requirements under A.R.S. § 28-4032 does not insure its motor vehicle or vehicle combination through an insurance company that electronically reports to the Department under A.R.S. § 28-4148 and Article 8 of this Chapter, the person or motor carrier shall submit proof of financial responsibility as prescribed in this Section, and in the amount required under A.R.S. § 28-4033(A):
1. On initial motor vehicle registration, or
 2. On written request by the Department.
- B. An insurance company, its managing general agent, broker, or agent may submit proof of financial responsibility to the Department on behalf of a person or motor carrier.
- C. As proof of financial responsibility, a person or motor carrier shall submit to the Department a photocopy of:
1. A valid liability insurance policy;
 2. A binder dated within 90 days of filing with the Department;
 3. A completed and signed Form E Uniform Motor Carrier Bodily Injury and Property Damage Liability Certificate of Insurance, issued by an insurer that holds a valid certificate of authority or that is permitted to transact surplus lines insurance in this state, naming the Arizona Department of Transportation as the agency;
 4. A completed and signed Certificate of Liability Insurance form, issued by an insurer that holds a valid certificate of authority or that is permitted to transact surplus lines insurance in this state, naming the Arizona Department of Transportation as the certificate holder; or
 5. A certificate of self-insurance issued by the Department after a person or motor carrier meets the requirements of R17-5-810 and A.R.S. §§ 28-4007 and 28-4135.
- D. Before a binder submitted as proof of financial responsibility expires, a motor carrier shall submit:
1. A binder from an insurance company other than the insurance company named in the first binder; or
 2. Proof of financial responsibility listed in subsections (C)(1) or (C)(3) through (5).
- E. A person or motor carrier that maintains a valid USDOT number and files proof of financial responsibility with the Federal Motor Carrier Safety Administration under 49 CFR 387 is not required to submit additional proof of financial responsibility under this Section, except on written request by the Department.

Historical Note

ARTICLE 6. IGNITION INTERLOCK DEVICE MANUFACTURERS**R17-5-601. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-1301, in this Article, unless the context otherwise requires, the following terms apply:

“Alcohol” means ethyl alcohol, also called ethanol.

“Alcohol concentration” means the weight amount of alcohol contained in a unit volume of breath or air, measured in grams of ethanol/210 liters of breath or air and expressed as grams/210 liters.

“Alveolar breath sample” means the last portion of a prolonged, uninterrupted exhalation from which breath alcohol concentrations can be determined.

“Anticircumvention feature” means any feature or circuitry incorporated into the ignition interlock device that is designed to prevent human activity that would cause the device not to operate as intended.

“Authorized installer” means a person or entity appointed by a manufacturer, and certified by the Department, to install and service a certified ignition interlock device model provided by the manufacturer.

“Breath alcohol test” means analysis of a sample of the participant’s expired alveolar breath to determine alcohol concentration.

“Business day” means a day other than a Saturday, Sunday, or state holiday.

“Calibration” means the testing, adjustment, or systematic standardization of an ignition interlock device to determine and verify its accuracy.

“Cancellation” means the withdrawal of a certification granted by the Department under this Article, which prohibits a previously certified ignition interlock device manufacturer, its authorized installer, or the authorized installer’s service center from offering, installing, or servicing an ignition interlock device under Arizona law.

“Certification” means a status granted by the Department under this Article, which permits a certified ignition interlock device manufacturer, an authorized installer, or an authorized

installer’s service center to offer, install, or service an ignition interlock device under Arizona law.

“Corrective action” means an action specified in or reasonably implied from Title 28, Chapter 4, Arizona Revised Statutes, that the Department takes in relation to a participant’s driving privilege and the usage or discontinuation of usage of a certified ignition interlock device, or an action that the Department takes in relation to the performance of the duties of a manufacturer or an installer in Articles 6 or 7 of this Chapter to deny or cancel manufacturer or installer certification.

“Customer number” means the system-generated, or other distinguishing number, assigned by the Department to each person conducting business with the Department. The customer number of a private individual is generally the person’s driver license or non-operating identification license number.

“Data storage system” means a computerized recording of all events monitored by an installed ignition interlock device, which may be reproduced in the form of specific reports.

“Emergency bypass” means an event that permits a vehicle equipped with an ignition interlock device to be started without requiring successful completion of a required breath alcohol test.

“Emergency situation” means a circumstance in which the participant declares to the installer that the vehicle needs to be moved to comply with the law or the participant has a valid and urgent need to operate the vehicle.

“Established place of business” means a business location that is:

Approved by the Department;

Located in Arizona;

Not used as a residence; and

Where a manufacturer’s authorized installer performs authorized activities.

“False sample” means any sample other than the unaltered, undiluted, or unfiltered alveolar breath sample coming from the participant.

“Filtered breath sample” means any mechanism by which there is an attempt to remove alcohol from the human breath sample.

“Fixed-site service center” means a permanent location operated by an installer for conducting business and providing services related to a certified ignition interlock device.

“Free restart” means a function of a certified ignition interlock device that will allow a participant to restart the vehicle, under the conditions provided in R17-5-603, without completing another breath alcohol test.

“Ignition interlock period” means the period in which a participant is required to use a certified ignition interlock device that is installed in a vehicle. “Improper reporting” means any of the following:

Failure of a manufacturer or its authorized reporting installer to report any violations to the Department within 24 hours as required in R17-5-610(D)(2), or failure to send participant ignition interlock reporting records, including records relating to a violation, to the Department as required in R17-5-612(B)(1);

Failure of a manufacturer or its authorized reporting installer to provide copies of participant certified ignition interlock device records to the Department within 10 days after the Department’s request;

Department of Transportation - Commercial Programs

Failure of a manufacturer or its authorized reporting installer to provide quarterly reports as required in accordance with the schedule prescribed in R17-5-612(B);

Failure of a manufacturer or its authorized reporting installer to screen and remove invalid or unsubstantiated reporting data from a participant's ignition interlock reporting records prior to submitting these reporting records to the Department;

Failure of a manufacturer or its authorized reporting installer to electronically send each Certified Ignition Interlock Summarized Reporting Record to the Department within 24 hours, after performing an accuracy and compliance check, that results in the Department mailing a driver license suspension to a driver;

Electronic reporting by a manufacturer or its authorized reporting installer to the Department of data that is an exact duplicate of a single violation that occurs on a particular day and time and is reported multiple times;

An incident that occurs when a participant's vehicle has high or low voltage;

An incident that occurs when a participant has a free restart test to start the participant's vehicle;

An incident that occurs in which an installer downloads data from the device during an accuracy check and tampers with a certified ignition interlock device; or

An incident that occurs after the participant's vehicle is turned off.

"Independent laboratory" means a testing facility, not owned or operated by a manufacturer, that can test an ignition interlock device according to the Model Specifications for Breath Alcohol Ignition Interlock Devices (BAIIDs), Appendix A-Quality Assurance Plan Template, and Appendix B-Sample Format For Downloaded Data From The Interlock Data Logger, NHTSA, published at 78 FR 26862 to 26867, May 8, 2013.

"Installer-certified service representative" means any individual who has successfully completed all requirements under R17-5-705, and has received certification from an installer to install, inspect, download, calibrate, repair, monitor, maintain, service, or remove a specific certified ignition interlock device.

"Lock-out condition" means the operational status of a certified ignition interlock device, which after recording any violation of A.R.S. Title 28, Chapter 4, Article 5, immobilizes a participant's vehicle by disallowing further operation of the device. The lock-out feature is built into a certified ignition interlock device through manufacturer software or firmware, and once activated, the device must be re-set by the manufacturer's authorized installer.

"Manufacturer's authorized representative" means an individual or entity designated by a manufacturer to represent or act on behalf of the manufacturer of a certified ignition interlock device.

"Material modification" means a change to a certified ignition interlock device that affects the functionality of the device.

"Missed rolling retest" means the participant refused or failed to provide a valid and substantiated breath sample in response to a requested rolling retest within the time period described in R17-5-610(H).

"Mobile service center" means the portable operation of an installer, whether contained within a vehicle or temporarily

erected at a publicly accessible commercial location, including a kiosk, which includes all personnel and equipment necessary for an installer to conduct certified ignition interlock device related business and services, separately and simultaneously, with its parent fixed-site service center.

"NHTSA" means the United States Department of Transportation's National Highway Traffic Safety Administration.

"NHTSA specifications" means the specifications for breath alcohol ignition interlock devices published at 78 FR 26862 to 26867, May 8, 2013.

"Participant" means a person who is ordered by an Arizona court or the Department to equip each motor vehicle operated by the person with a functioning certified ignition interlock device and who becomes a customer of an installer for installation and servicing of the certified ignition interlock device.

"Positive result" means a test result indicating that the alcohol concentration meets or exceeds the startup set point value.

"Principal place of business" means the administrative headquarters of a manufacturer or a manufacturer's authorized installer that is located in Arizona and is not used as a residence.

"Purge" means any mechanism that cleanses or removes a previous breath or reference sample from the device and specifically removes alcohol.

"Reference sample device" means a device containing a sample of known alcohol concentration.

"Retest set point" has the same meaning as startup set point.

"Rolling retest" means an additional breath alcohol test required of the participant at random intervals after the start of the vehicle that is in addition to the initial test required to start the vehicle.

"Service center" means a certified ignition interlock device service center operated by an installer and considered an installer under this Section, who meets and maintains all Department certification and inspection requirements under R17-5-707, whether operated on a fixed-site or mobile.

"Startup set point" means the alcohol concentration value, established by the Department under R17-5-603(A), which is determined by the Department to be the point at which, or above, a certified ignition interlock device shall disable the ignition of a motor vehicle.

"Violation" includes, but is not limited to any of the following reportable activities performed by a participant against whom the Department shall take corrective action against the participant's driving privilege:

Tampering with the certified ignition interlock device as defined in A.R.S. § 28-1301;

Failing to provide proof of compliance or inspection of the certified ignition interlock device under A.R.S. § 28-1461(E)(4);

Attempting to operate the vehicle with an alcohol concentration of 0.08 or more as prescribed in A.R.S. § 28-1461(E) if the participant is at least 21 years of age;

Attempting to operate the vehicle with an alcohol concentration value in excess of the startup set point if the participant is under 21 years of age;

Refusing or failing to provide any set of four valid and substantiated breath samples in response to a requested

Department of Transportation - Commercial Programs

rolling retest during a participant's ignition interlock period; or

Disconnecting or removing a certified ignition interlock device, except:

On receipt of Department authorization to remove the device;

On repair of the vehicle, if the participant provided to the manufacturer, installer, or service center advanced notice of the repair and the anticipated completion date; or

On replacement of one vehicle with another vehicle if replacement of the device is accomplished within 72 hours of device removal.

"Violation reset" means the unplanned servicing of a certified ignition interlock device and the downloading of information from its data storage system by a service center when required as a result of an over-accumulation of violations.

Historical Note

New Section recodified from R17-4-709 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-602. Ignition Interlock Device Manufacturer Certification; Expiration; Cancellation of Certification; Notice

- A. An ignition interlock device manufacturer shall obtain certification by the Department under this Article before offering an ignition interlock device model for installation under Arizona law.
- B. After receiving Department certification for an ignition interlock device model and meeting all the requirements under R17-5-604, the ignition interlock device manufacturer is effectively certified by the Department to offer its certified ignition interlock device model for installation under Arizona law.
- C. An ignition interlock device manufacturer shall submit a new application to the Department under R17-5-604 for the certification of each new ignition interlock device model the manufacturer intends to offer for installation.
- D. Manufacturer certification issued by the Department under this Article shall automatically expire if:
 1. The manufacturer no longer provides at least one currently certified ignition interlock device model for installation under Arizona law; and
 2. The manufacturer has no pending application on file with the Department for the certification of a device under R17-5-604.
- E. If the Department determines that a reporting manufacturer fails to properly report ignition interlock information and data to the Department in the manner prescribed in these rules, the Department may immediately provide written notice to the authorized reporting manufacturer with the following information:
 1. The name of the participant and the date of the improper reporting; and
 2. The reporting manufacturer shall send the required record or report to the Department within ten business days, if applicable.
- F. If the reporting manufacturer fails to remedy the issues identified in the notice within ten business days, the Department may cancel the manufacturer device certification.
- G. If the Director cancels a manufacturer's device certification, the Director shall notify each participant with the manufacturer's certified ignition interlock device that the participant has 30 days to obtain another installer.

- H. After the one-year cancellation period ends, a manufacturer may reapply to the Department for certification by completing a new application for the certification of a device and meeting all certification requirements under this Article.
- I. If a manufacturer's certification expires as a result of subsections (D)(1) and (D)(2), the manufacturer may reapply for certification by submitting a new application to the Department for the certification of a device under R17-5-604.

Historical Note

New Section recodified from R17-4-709.01 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-602 renumbered to R17-5-604; new R17-5-602 made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-603. Device Requirements, Technical Specifications, and Standards for Setup and Calibration

- A. The startup set point value for a certified ignition interlock device shall be an alcohol concentration of 0.020 g/210 liters of breath. The accuracy of a device shall be 0.020 g/210 liters plus or minus 0.010 g/210 liters. The accuracy shall be determined by analysis of an external standard generated by a reference sample device.
- B. A device shall have a demonstrable feature designed to assure that a breath sample measured is essentially alveolar.
- C. A test of alcohol-free samples shall not yield a positive result. Endogenously produced substances capable of being present in the breath shall not yield or significantly contribute to a positive result.
- D. All devices, including those with cameras, shall meet the requirements of subsection (A) when used at ambient temperatures of -20° Celsius to 83° Celsius.
- E. A device shall be designed so that anticircumvention features will be difficult to bypass.
 1. Anticircumvention provisions shall include, but are not limited to, prevention or preservation of any evidence of cheating by attempting to use a false or filtered breath sample or electronically bypassing the breath sampling requirements of a device.
 2. A device shall use special seals or other methods that reveal attempts to bypass lawful device operation.
- F. A device shall:
 1. Allow a free restart of a motor vehicle's ignition, within three minutes after the ignition is switched off, without requiring another breath alcohol test.
 2. Automatically purge alcohol before allowing analysis.
 3. Have a data storage system with the capacity to sufficiently record and maintain a record of the participant's daily driving activities that occur between each regularly scheduled accuracy and compliance check referenced under R17-5-610 and R17-5-706. A manufacturer or its authorized installer shall download any digital images taken during a participant's accuracy and compliance check. A manufacturer or its authorized installer shall make these digital images available to the Department on request.
 4. Use the most current version of the manufacturer's software and firmware to ensure compliance with this Article and any other applicable rule or statute, and the manufacturer's software and firmware:
 - a. Shall require device settings and operational features to include, but are not limited to, sample delivery requirements, startup and retest set points, free restart, rolling retest requirements, violation settings and lock-out conditions; and

Department of Transportation - Commercial Programs

- b. Shall not allow modification of the device settings or operational features by a service center or service representative unless the Department approves the modification under subsection (G).
- 5. Record all emergency bypasses in its data storage system.
- 6. Require a participant to perform a rolling retest within five to 15 minutes after the initial test required to start an engine, and the device shall continuously require additional rolling retests at random intervals of up to 30 minutes after each previously requested retest as follows:
 - a. A device shall emit a warning light, tone, or both, to alert a participant that a rolling retest is required.
 - b. A device shall allow a period of six minutes after the warning light, tone, or both, to allow a participant to take a rolling retest.
 - c. A device shall require a participant to perform a new test to restart an engine if it is inadvertently switched off during or after a rolling retest warning.
 - d. A device shall use the startup set point value as its retest set point value.
 - e. A device shall record, in its data storage system, the result of each rolling retest performed by a participant during the participant's ignition interlock period and any valid and substantiated missed rolling retests; and
 - f. A device shall immediately require another rolling retest each time a participant refuses to perform a requested rolling retest.
- 7. Until a participant successfully performs a rolling retest, or the engine is switched off, a device shall record in its data storage system, each subsequent refusal or failure of the participant to perform the requested rolling retest.
- 8. On recording a violation of A.R.S. Title 28, Chapter 4, Article 5, emit a unique cue, either auditory, visual, or both, to warn a participant that the device will enter into a lock-out condition in 72 hours unless reset by the installer.
- 9. When a violation results in a lock-out condition, the device shall:
 - a. Immobilize the participant's vehicle;
 - b. Uniquely record the event in the data storage system; and
 - c. Require a violation reset by the installer.
- G. No modification shall be made to the design or operational concept of a device model after the Department has certified the device for installation under Arizona law, except that:
 - 1. A software or firmware update required to maintain a device model is permissible if the update does not modify the design or operational concept of the device.
 - 2. Replacement, substitution, or repair of a part required to maintain a device model is permissible if the part does not modify the design or operational concept of the device.
 - 3. If a manufacturer determines that an existing Department-certified ignition interlock device model requires a modification that may affect the operational concept of a device, the manufacturer shall immediately notify the Department.

Historical Note

New Section recodified from R17-4-709.02 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-603 renumbered to R17-5-606; new R17-5-603 made by final rulemaking at 13 A.A.R. 3499, effective Decem-

ber 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-604. Ignition Interlock Device Certification; Application Requirements

- A. A manufacturer shall offer for installation only an ignition interlock device that is certified by the Department under this Section.
- B. For certification of an ignition interlock device model, a manufacturer shall submit to the Department a properly completed application form that provides:
 - 1. The manufacturer's name;
 - 2. The manufacturer's principal place of business in this state, established places of business in this state, and telephone numbers;
 - 3. The manufacturer's status as a sole proprietorship, partnership, limited liability company, or corporation;
 - 4. The name of the sole proprietor or of each partner, officer, director, manager, member, agent, or 20% or more stockholder;
 - 5. The name and model number of the ignition interlock device and the name under which the ignition interlock device will be marketed; and
 - 6. The following statements, signed by the manufacturer's authorized representative and acknowledged by a notary public or Department agent:
 - a. A statement that all information provided on the application form, including all information provided on any attachment to the application form, is complete, true, and correct;
 - b. A statement that the manufacturer agrees to indemnify and hold harmless the state of Arizona and any department, division, agency, officer, employee, or agent of the state of Arizona from all liability for:
 - i. Damage to property or injury to people arising, directly or indirectly, out of any act or omission by the manufacturer or its authorized installer relating to the installation and operation of the ignition interlock device; and
 - ii. All court costs, expenses of litigation, and reasonable attorneys' fees;
 - c. A statement that the manufacturer agrees to comply with all requirements under this Article; and
 - d. A statement that the manufacturer agrees to immediately notify the Department of any change to the information provided on the application form.
- C. A manufacturer shall submit the following additional items with the application form:
 - 1. A document that provides a detailed description of the ignition interlock device and a photograph, drawing, or other graphic depiction of the device;
 - 2. A document that contains the complete technical specifications for the accuracy, reliability, security, data collection, recording, and tamper detection capabilities of the ignition interlock device;
 - 3. An independent laboratory's report that:
 - a. Presents supporting data to demonstrate that the ignition interlock device meets or exceeds the test results required by the Model Specifications For Breath Alcohol Ignition Interlock Devices (BAIIDs), Appendix A-Quality Assurance Plan Template, and Appendix B-Sample Format For Downloaded Data From The Interlock Data Logger, NHTSA, published at 78 FR 26862 to 26867, May 8, 2013. The NHTSA specifications are incorporated by reference and are on file with the Department and the NHTSA Office of Research and Technology

Department of Transportation - Commercial Programs

- (NTS-131), 400 7th St. S.W., Washington, D.C. 20590. This incorporation by reference contains no future editions or amendments;
- b. Provides the independent laboratory's name, address, and telephone number; and
 - c. Provides the name and model number of the ignition interlock device tested.
4. A laboratory certification form, signed by an authorized representative of the independent laboratory that prepared the report required under subsection (C)(3) and acknowledged by a notary public or Department agent, that states:
 - a. The laboratory is not owned or operated by a manufacturer and no other conflict of interest exists;
 - b. The laboratory tested the ignition interlock device in accordance with the Model Specifications For Breath Alcohol Ignition Interlock Devices (BAIIDs), Appendix A-Quality Assurance Plan Template, and Appendix B-Sample Format For Downloaded Data From The Interlock Data Logger, NHTSA, published at 78 FR 26862 to 26867, May 8, 2013.
 - c. The laboratory confirms that the ignition interlock device meets or exceeds the test results required under the Model Specifications For Breath Alcohol Ignition Interlock Devices (BAIIDs), Appendix A-Quality Assurance Plan Template, and Appendix B-Sample Format For Downloaded Data From The Interlock Data Logger, NHTSA, published at 78 FR 26862 to 26867, May 8, 2013;
 - d. The laboratory used properly maintained equipment and trained personnel to test the ignition interlock device; and
 - e. The laboratory presented accurate test results to the Department;
 5. A list of all authorized installers of the ignition interlock device, including the name, location, telephone number, contact person, and hours of operation of each authorized installer;
 6. A copy of the complete written instructions the manufacturer will provide to its authorized installers under R17-5-609 for installation and operation of the ignition interlock device for which the manufacturer seeks certification. The written instructions shall include a requirement for the installer to affix, to each certified ignition interlock device installed, a warning label that conforms to the criteria prescribed under R17-5-609, as illustrated on the application form provided by the Department;
 7. A copy of the complete written instructions the manufacturer shall provide to its authorized installers under R17-5-609 for distribution under R17-5-704 to participants and other operators of a vehicle equipped with the ignition interlock device for which the manufacturer seeks certification; and
 8. A certificate of insurance, issued by an insurance company authorized to transact business in Arizona, specifying:
 - a. A product liability policy with a current effective date;
 - b. The name and model number of the ignition interlock device model covered by the policy;
 - c. Policy coverage of at least \$1,000,000;
 - d. The manufacturer as the insured and the state of Arizona as an additional insured;
 - e. Product liability coverage for defects in manufacture, materials, design, calibration, installation, and operation of the ignition interlock device; and
 - f. The insurance company shall notify the Department at least 30 days before canceling the product liability policy.
- D. On or before April 1, 2015, a manufacturer shall submit a new application form and all the information required in this Section to the Department to certify any new ignition interlock device, or recertify an existing ignition interlock device, to the NHTSA specifications in subsection (E). For each ignition interlock device, a manufacturer shall submit a new laboratory report from an independent laboratory to the Department that presents supporting data to demonstrate that the ignition interlock device meets or exceeds the test results required by the NHTSA specifications.
 - E. Beginning on April 1, 2015, for any new installation of an ignition interlock device or replacement of a device on a participant's vehicle, a manufacturer or its authorized installer shall install only a certified ignition interlock device that meets or exceeds the test results required by the Model Specifications for Breath Alcohol Ignition Interlock Devices (BAIIDs), Appendix A - Quality Assurance Plan Template, and Appendix B - Sample Format For Downloaded Data from the Interlock Data Logger, NHTSA, published at 78 FR 26862 to 26868, May 8, 2013.

Historical Note

New Section recodified from R17-4-709.03 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-604 renumbered to R17-5-607; new R17-5-604 renumbered from R17-5-602 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-605. Application Processing; Time-frames; Exception

- A. The Department shall process an application for certification under this Article or Article 7, or an application for recertification under R17-5-702, only if an applicant meets all applicable application requirements.
- B. The Department shall, within 10 days of receiving an application for certification or recertification provide notice to the applicant that the application is either complete or incomplete.
 1. The date of receipt is the date the Department stamps on the application when received.
 2. If an application is incomplete, the notice shall specifically identify what required information is missing.
- C. An applicant with an incomplete application shall provide all missing information to the Department within 15 days of the date indicated on the notice provided by the Department under subsection (B).
 1. After receiving all of the required information, the Department shall notify the applicant that the application is complete.
 2. The Department may deny certification or recertification if the applicant fails to provide the required information within 15 days of the date indicated on the notice provided by the Department under subsection (B).
- D. Except as provided under subsection (F), the Department shall render a decision on an application for certification or recertification under this Article or Article 7, within 30 days of the date indicated on the notice acknowledging receipt of a complete application under subsection (B) or provided to the applicant under subsection (C).
- E. For the purpose of A.R.S. § 41-1073, the Department establishes the following time-frames for processing an application for certification or recertification under this Article or Article 7:

Department of Transportation - Commercial Programs

1. Administrative completeness review time-frame: 10 days.
2. Substantive review time-frame: 30 days.
3. Overall time-frame: 40 days.

F. Established time-frames may be suspended by the Department under A.R.S. § 41-1074 until all external agency approvals required for certifying a new ignition interlock device model are submitted by a manufacturer under R17-5-604.

Historical Note

New Section recodified from R17-4-709.04 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-605 renumbered to R17-5-608; new R17-5-605 made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-606. Application Completeness; Denial of Ignition Interlock Device Certification; Hearing

- A. An application for certification of an ignition interlock device model is complete when the Department receives:
1. From the manufacturer, a properly prepared application form;
 2. From the manufacturer, all additional items required under R17-5-604(C); and
 3. From the Arizona Department of Public Safety, under A.R.S. § 28-1462, written confirmation or disapproval of the independent laboratory's report that the ignition interlock device meets the NHTSA specifications in R17-5-604(C).
- B. The Director shall deny an application for certification of an ignition interlock device model if all requirements of subsection (A) are not met, or on finding any of the following:
1. The design, materials, or workmanship contains a defect that causes the ignition interlock device model to fail to function as intended;
 2. The manufacturer's liability insurance coverage is terminated or canceled;
 3. The manufacturer no longer offers the ignition interlock device model for installation under Arizona law;
 4. The manufacturer or independent laboratory provided false or inaccurate information to the Department relating to the performance of the ignition interlock device model;
 5. The components, design, or installation and operating instructions have undergone a modification that causes the ignition interlock device model to be out of compliance with the NHTSA specifications in R17-5-604(C); or
 6. The Department receives a report of device disapproval from an independent laboratory or other external reviewer.
- C. The Department shall mail to the manufacturer, written notification of the certification or denial of certification of an ignition interlock device model. A notice denying certification of an ignition interlock device model shall specify the basis for the denial and indicate that the applicant may, within 15 days of the date on the notice, request a hearing on the Director's decision to deny certification by filing a written request with the Department's Executive Hearing Office as prescribed under 17 A.A.C. 1, Article 5.
- D. If a manufacturer timely requests a hearing on the Director's decision to deny certification of an ignition interlock device model, the Department's Executive Hearing Office shall conduct the hearing as provided under A.R.S. Title 41, Chapter 6, Article 6, and 17 A.A.C. 1, Article 5.

Historical Note

New Section recodified from R17-4-709.05 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-

5-606 renumbered to R17-5-609; new R17-5-606 renumbered from R17-5-603 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-607. Cancellation of Certification; Hearing

- A. The Director shall cancel an ignition interlock device model certification and remove the device from its list of certified ignition interlock devices on finding any of the following:
1. The design, materials, or workmanship contains a defect that causes the ignition interlock device model to fail to function as intended;
 2. The manufacturer's liability insurance coverage is terminated or canceled;
 3. The manufacturer no longer offers the ignition interlock device model for installation under Arizona law;
 4. The manufacturer or independent laboratory provided false or inaccurate information to the Department relating to the performance of the ignition interlock device model;
 5. The components, design, or installation and operating instructions have undergone a modification that causes the ignition interlock device model to be out of compliance with the NHTSA specifications in R17-5-604(C);
 6. The manufacturer instructs the Department to cancel its certification of the ignition interlock device model; or
 7. The manufacturer, its authorized installer, or the device does not comply with this Article or any other applicable rule or statute.
- B. The Department, on finding any of the conditions described under subsection (A), or on finding that the reporting manufacturer failed to timely remedy the issues identified in the notice provided under R17-5-602(E), shall mail to the manufacturer a notice and order of cancellation of certification for the specific ignition interlock device model. The notice and order of cancellation shall:
1. Specify the basis for the action;
 2. Specify the date when the one-year decertification begins and ends; and
 3. State that the manufacturer may, within 15 days after receipt of a notice and order of manufacturer device model cancellation, file a written request for a hearing with the Department's Executive Hearing Office as prescribed under 17 A.A.C. 1, Article 5, to show cause as to why the ignition interlock device certification should not be cancelled.
- C. If a hearing to show cause is timely requested, the Department's Executive Hearing Office shall conduct the hearing as prescribed under A.R.S. Title 41, Chapter 6, Article 6, and 17 A.A.C. 1, Article 5. The request for a hearing stays the summary cancellation of manufacturer device model certification.
- D. Within 10 days after a hearing, the hearing officer shall issue to the manufacturer a written decision, which shall:
1. Provide findings of fact and conclusions of law; and
 2. Grant or cancel the certification.
- E. If the hearing officer affirms the manufacturer device model cancellation, the manufacturer may seek judicial review under A.R.S. Title 12, Chapter 7, Article 6, within 35 days of the date when a copy of the decision sought to be reviewed is served upon the party affected unless the court grants a stay while the appeal is pending.
- F. Within 60 days after the effective date of an order of cancellation, the manufacturer shall, at the manufacturer's own expense, ensure the removal of all ignition interlock devices that are not certified and facilitate the replacement of each device with a certified ignition interlock device.

Department of Transportation - Commercial Programs

- G. The manufacturer of a previously decertified ignition interlock device model may reapply to the Department for certification of the ignition interlock device model under R17-5-604 after the one-year device decertification period ends.
- H. During the period of cancellation, the Department shall notify each authorized installer of the manufacturer and each service representative that each of them is prohibited from installing the ignition interlock device for which the device certification was cancelled.
- I. Cancellation of a manufacturer's device model certification prohibits the manufacturer from performing its duties with respect to the device model that has been cancelled and making the device model available for installation in the state for a period of one year from the latest of the following dates when:
 1. The Department cancels a manufacturer's device model certification, or
 2. The Department's Executive Hearing Office cancels the manufacturer's device model certification.

R17-5-608. Modification of a Certified Ignition Interlock Device Model

- A. A manufacturer shall notify the Department in writing at least 10 days before a material modification is made to a certified ignition interlock device model.
- B. Before providing a previously certified but materially modified ignition interlock device model for installation in a motor vehicle under an order of an Arizona court or the Department, a manufacturer shall:
 1. Submit to the Department a completed application form and all additional items required under R17-5-604(C), and
 2. Obtain certification of the materially modified ignition interlock device from the Department.

- C. The Department's certification of a materially modified ignition interlock device model does not affect the original certification of the unmodified model.

Historical Note

New Section recodified from R17-4-709.07 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-608 renumbered to R17-5-611; new R17-5-608 renumbered from R17-5-605 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-609. Manufacturer Referral to Authorized Installers; Manufacturer Oversight of its Authorized Installers

- A. A manufacturer shall perform a background records check on a manufacturer's authorized installer to determine:
 1. Each authorized installer's past employment history,
 2. That each authorized installer provides good customer service and adequately serves the public interest,
 3. That each authorized installer has certified that the authorized installer has not had a felony conviction in the five years preceding the individual's request for certification, and
 4. The authorized installer's motor vehicle record, driver license status, and the existence of any driving under the influence convictions.
- B. In this Section, conviction means that a court of competent jurisdiction, after adjudication, found the individual guilty.
- C. A manufacturer shall refer a participant only to an authorized installer.
- D. A manufacturer shall provide the Department with a toll-free telephone number for a participant to call to obtain names, locations, telephone numbers, contact persons, and hours of operation for its authorized installers.
- E. A manufacturer shall notify the Department within 10 days of a change of address of its principal or established place of business in this state.
- F. A manufacturer shall ensure that its authorized installer follows the installation and operation procedures established by the manufacturer.
- G. A manufacturer shall ensure that its authorized installer receives and maintains all necessary training and skills required to install, troubleshoot, examine, and verify proper operation of the certified ignition interlock device.
- H. A manufacturer shall ensure that its authorized installer:
 1. Complies with the manufacturer's procedures for removing a certified ignition interlock device from a vehicle, and
 2. Electronically notifies the Department within 24 hours after removing a certified ignition interlock device.
- I. A manufacturer shall ensure that its authorized installer distributes and makes available for every participant operating a motor vehicle equipped with a certified ignition interlock device, the manufacturer's written instructions for the following:
 1. Operating a motor vehicle equipped with the certified ignition interlock device,
 2. Cleaning and caring for the certified ignition interlock device, and
 3. Identifying and addressing any vehicle malfunctions or repairs that may affect the certified ignition interlock device.
- J. A manufacturer shall ensure that its authorized installer provides to every participant, and makes available for any participant operating a motor vehicle equipped with a certified

Department of Transportation - Commercial Programs

ignition interlock device, the manufacturer's specified training on how to operate a motor vehicle equipped with the device.

- K. A manufacturer or installer shall provide a warning label, for each certified ignition interlock device installed, which shall:
 1. Be of a size appropriate to each device model;
 2. Have an orange background; and
 3. Contain the following language in black lettering: "Warning! Any person tampering with, circumventing, or otherwise misusing this Ignition Interlock Device, is guilty of a Class 1 misdemeanor."
- L. A manufacturer shall ensure that its authorized installer affixes conspicuously to each installed certified ignition interlock device the warning label described under subsection (K).

Historical Note

New Section recodified from R17-4-709.08 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Former R17-5-609 renumbered to R17-5-612; new R17-5-609 renumbered from R17-5-606 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-610. Installation Verification; Accuracy Check; Non-compliance and Removal Reporting; Report Review

- A. A participant shall have installed in a motor vehicle, only an ignition interlock device certified by the Department under R17-5-604.
- B. A manufacturer shall comply, and ensure that its authorized installer complies, with its written procedures for the installation of a certified ignition interlock device.
- C. Certified ignition interlock device installation verification.
 1. A manufacturer shall electronically transmit, or ensure that its authorized installer electronically transmits, a Certified Ignition Interlock Device Summarized Reporting Record to the Department within 24 hours of installing a certified ignition interlock device.
 2. The electronic Certified Ignition Interlock Device Summarized Reporting Record for installation verification shall contain all of the following information:
 - a. Installer ID;
 - b. Participant's full name (first, middle, last and suffix);
 - c. Date of birth;
 - d. Driver license or customer number;
 - e. Report date;
 - f. Install date;
 - g. Removal date; and
 - h. Report type.
- D. Certified ignition interlock device accuracy and compliance check.
 1. A manufacturer shall ensure that its authorized installer schedules a participant for accuracy and compliance checks as follows:
 - a. 30 days, 60 days, and 90 days after installation of a certified ignition interlock device; and
 - b. At least once every 90 days after the first 90-day accuracy and compliance check until the participant is eligible for device removal.
 2. A manufacturer shall electronically transmit, or ensure that the manufacturer's authorized reporting installer electronically transmits, a Certified Ignition Interlock Device Summarized Reporting Record to the Department within 24 hours after performing an accuracy and compliance check on an installed certified ignition interlock device.
- 3. A manufacturer or the manufacturer's authorized reporting installer shall submit to the Department the following valid and substantiated proof or evidence of a reportable activity related to a violation, as prescribed in subsection (F), within 10 days by electronic means or by regular mail, which shall include:
 - a. A report summarizing why the data logger or any other evidence confirms the occurrence of a violation; and
 - b. A data logger that shows at least 12 hours of data before and after the violation.
- 4. A manufacturer or the manufacturer's authorized reporting installer may submit to the Department the following additional valid and substantiated proof or evidence of a reportable activity related to a violation, as prescribed in subsection (F), if available, within 10 days by electronic means or by regular mail, which may include:
 - a. Photographs;
 - b. Video recordings;
 - c. Written statements; and
 - d. Any other evidence relevant to a violation.
- 5. The electronic Certified Ignition Interlock Device Summarized Reporting Record for the accuracy and compliance check shall contain all of the following information:
 - a. Installer ID;
 - b. Participant's full name (first, middle, last and suffix);
 - c. Date of birth;
 - d. Driver license or customer number;
 - e. Report date;
 - f. Install date;
 - g. Removal date;
 - h. Report type;
 - i. Missed rolling retest count and dates;
 - j. Noncompliance code;
 - k. Alcohol concentration violation count and dates;
 - l. Tampering violation date;
 - m. Device download date; and
 - n. Device download time.
- E. Certified ignition interlock device removal report.
 1. A manufacturer shall electronically transmit, or ensure that its authorized installer electronically transmits, a Certified Ignition Interlock Device Summarized Reporting Record to the Department within 24 hours if a certified ignition interlock device is removed before the end of a participant's certified ignition interlock device period.
 2. The electronic Certified Ignition Interlock Device Summarized Reporting Record for removal of a device shall indicate the condition of noncompliance and contain all of the following information:
 - a. Installer ID;
 - b. Participant's full name (first, middle, last and suffix);
 - c. Date of birth;
 - d. Driver license or customer number;
 - e. Report date;
 - f. Install date;
 - g. Removal date;
 - h. Report type; and
 - i. Noncompliance code.
- F. Reportable activity for a participant's noncompliance with these rules and A.R.S. Title 28, Chapter 4, Article 5, shall be limited to valid and substantiated instances by a participant of any of the following:

Department of Transportation - Commercial Programs

1. Tampering with a certified ignition interlock device as defined in A.R.S. § 28-1301;
 2. A missed rolling retest as defined in R17-5-601;
 3. Failing to provide proof of compliance or inspection of the certified ignition interlock device as required under A.R.S. § 28-1461(E)(4);
 4. Attempting to operate the vehicle with an alcohol concentration of 0.08 or more as prescribed in A.R.S. § 28-1381(A) if the participant is at least 21 years of age;
 5. Attempting to operate the vehicle with an alcohol concentration in excess of the startup set point if the participant is under 21 years of age; or
 6. Disconnecting or removing a certified ignition interlock device, except:
 - a. On receipt of Department authorization to remove the device;
 - b. On repair of the vehicle, if the participant provided to the manufacturer, installer, or service center advance notice of the repair and the anticipated completion date; or
 - c. On replacement of one vehicle with another vehicle if replacement of the device is accomplished within 72 hours of device removal.
- G.** A participant shall not avoid compliance with the rolling retest requirement by turning off a motor vehicle's ignition. A missed rolling retest is reportable activity for a participant's noncompliance under subsection (F).
- H.** The Department shall count one missed rolling retest for a participant who refuses or fails to provide a valid and substantiated breath sample in response to a requested rolling retest if not followed by the participant providing a valid and substantiated breath sample within six minutes.
- I.** Beginning on April 1, 2015, the Department shall extend the ignition interlock period for six months, as provided in A.R.S. § 28-1461(E) for any set of four missed rolling retests that occur during the participant's ignition interlock period.
- J.** A manufacturer or its authorized reporting installer shall screen a participant's data loggers to ensure that there is no improper reporting. A manufacturer or its authorized reporting installer shall report to the Department any valid and substantiated missed rolling retests, as defined in R17-5-601, that occur during a participant's ignition interlock period.
- K.** A manufacturer shall provide written notice, as requested, to the Department of each authorized reporting installer who is authorized to send data loggers, reports, and other participant records to the Department.
- L.** A manufacturer or its authorized installer shall ensure that a certified ignition interlock device has the necessary programming to identify each participant's ignition interlock period and to report and send data and violations to the Department as required by these rules.
- M.** A manufacturer or its authorized reporting installer shall review within 10 days all reports generated by the Department and returned to the manufacturer or installer for verification of accurate reporting. If a manufacturer or its authorized installer finds that the reported information does not indicate valid and substantiated evidence of a violation, the manufacturer or its authorized installer shall immediately contact the Department to correct the participant's record before corrective action is initiated against a participant as a result of misreported ignition interlock data.
- N.** A manufacturer or its authorized reporting installer shall immediately contact the Department if the manufacturer or its authorized reporting installer finds that the reported information indicates:

1. An obvious mechanical failure of a certified ignition interlock device;
2. Obvious errors in the recorded, certified ignition interlock device data that cannot be attributed to a participant's actions; or
3. Obvious errors in the transmission of certified ignition interlock device data to the Department, including misreported instances of tampering.

R17-5-611. Emergency Assistance by Manufacturers and Authorized Installers; Continuity of Serviceto Participants

- A.** A manufacturer shall ensure that its authorized installer provides to each participant a 24-hour emergency phone number for assistance in the event a certified ignition interlock device fails to operate properly or a vehicle experiences a problem relating to the installation, operation, or failure of a certified ignition interlock device.
1. Within two hours after receiving a participant's call for emergency assistance, if the authorized installer determines that a vehicle is experiencing a problem relating to the installation, operation, or failure of a certified ignition interlock device, the authorized installer shall either:
 - a. Provide telephonically, the technical information required for the participant to resolve the issue; or

Department of Transportation - Commercial Programs

- b. Provide or arrange for appropriate towing or roadside assistance services if unable to resolve the issue telephonically.
2. Within 48 hours after receiving a participant's call for emergency assistance, the authorized installer shall either:
- a. Make the certified ignition interlock device functional, or
- b. Replace the certified ignition interlock device.
- B.** A manufacturer shall ensure uninterrupted service to a participant for the duration of the participant's certified ignition interlock period, which shall include facilitating the immediate replacement of an authorized installer if the installer goes out of business, its recertification is denied, or its certification is cancelled by the Department under R17-5-708.
1. If a manufacturer terminates its authorized installer's appointment, or the Department cancels the installer's certification or denies recertification under R17-5-708, the manufacturer shall:
- a. Obtain participant records from its formerly authorized installer; and
- b. Provide the participant records to a new authorized installer for retention according to R17-5-612; or
- c. Retain the participant records according to R17-5-612, if a new authorized installer is not appointed.
2. If a manufacturer appoints a new authorized installer, the manufacturer shall:
- a. Ensure that the new authorized installer operates either:
- i. A mobile service center that is located within 75 miles of the Arizona residence of each participant with an installed certified ignition interlock device provided by the manufacturer; or
- ii. A service center that is a permanent facility located within 125 miles of the Arizona residence of each participant with an installed certified ignition interlock device provided by the manufacturer; and
- b. Notify each participant affected by the appointment of the new authorized installer at least 30 days before the appointment becomes effective.
3. If a manufacturer does not appoint a new authorized installer, or its new authorized installer cannot provide service as prescribed under subsection (B)(2), the manufacturer, at no cost to the participant, shall:
- a. Provide written notification to all participants affected by the change of authorized installers at least 30 days before the authorized installer is to discontinue service. The written notification shall inform the participant of the manufacturer's responsibility to facilitate removal and replacement of the certified ignition interlock device and shall provide all of the instructions necessary for the participant to successfully exchange the device;
- b. Remove the device from the vehicle of each affected participant; and
- c. Facilitate the replacement of each device through a manufacturer with an authorized installer that can provide service as prescribed under subsection (B)(2).
4. A manufacturer shall notify the Department within 72 hours of replacing its authorized installer.
5. A manufacturer shall submit to the Department an updated list of its authorized installers within 10 days after making a change to the list provided to the Department under R17-5-604.
- C.** Except in an emergency situation, a manufacturer or its authorized installer shall not remove another manufacturer's certified ignition interlock device without the express permission of that manufacturer.
1. If in an emergency situation a manufacturer or its authorized installer removes another manufacturer's certified ignition interlock device, that manufacturer or authorized installer shall return the device to the original installer within 72 hours of the emergency removal; and
2. The original installer, on receipt of the device, shall provide to the Department an electronic report of the device removal under R17-5-610, which shall include the transmission of all data stored in its data storage system.
- D.** A manufacturer shall facilitate the immediate replacement of its authorized installer's service center if the service center goes out of business or the installer's certification is cancelled or recertification is denied under R17-5-708. The manufacturer shall notify the Department within 72 hours of replacing a service center.
1. If an out-of-business or cancelled service center is replaced, the manufacturer shall make all reasonable efforts to obtain, from the service center being replaced, all participant records and data required to be retained under R17-5-612. The records shall be provided to, and maintained by the new service center.
2. If an out-of-business or cancelled service center is not replaced, the manufacturer shall retain the records and data as required under R17-5-612. The Department shall be notified of this event within 72 hours.
- a. The manufacturer shall facilitate removal of all installed certified ignition interlock devices no longer serviced by the out-of-business or cancelled service center, and shall bear the cost of replacing each device with a serviceable certified ignition interlock device, even if the replacement device must be provided through an alternate manufacturer.
- b. The manufacturer shall, within 30 days, make a reasonable effort to notify its customers of the change of service center or replacement of a device.
3. If the manufacturer cannot comply with subsection (D)(1) or subsection (D)(2) within 60 days, the manufacturer shall:
- a. Notify its customers and the Department that service will be terminated; and
- b. Remove each device at no cost to the customer.
- Historical Note**
- Section R17-5-611 renumbered from R17-5-608 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).
- R17-5-612. Records Retention; Submission of Copies and Quarterly Reports**
- A.** Records retention. A manufacturer shall retain, or ensure that its authorized installer retains, a participant's records in an electronic or a paper format for three years after the removal of a certified ignition interlock device. The retained records shall consist of every document relating to installation and operation of the certified ignition interlock device. The installer and the service center shall maintain all daily participant driving activity records in the device's data storage system, and shall make participant records available to the Department on

Historical Note

Section R17-5-611 renumbered from R17-5-608 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-612. Records Retention; Submission of Copies and Quarterly Reports

- A. Records retention. A manufacturer shall retain, or ensure that its authorized installer retains, a participant's records in an electronic or a paper format for three years after the removal of a certified ignition interlock device. The retained records shall consist of every document relating to installation and operation of the certified ignition interlock device. The installer and the service center shall maintain all daily participant driving activity records in the device's data storage system, and shall make participant records available to the Department on request at the principal place of business.

Department of Transportation - Commercial Programs

B. Copies of records and quarterly reports.

1. A manufacturer shall ensure that its authorized reporting installer or the manufacturer provides copies of participants' records to the Department within 10 days after Department personnel make a request for copies of records, including records relating to installation and operation of the certified ignition interlock device.
2. A manufacturer shall ensure that its authorized installer mails or e-mails to the Department, by the 10th day of January, April, July, and October, a quarterly report containing the following information for the previous three months:
 - a. The number of certified ignition interlock devices the authorized installer currently has in service;
 - b. The number of certified ignition interlock devices installed since the previous quarterly report; and
 - c. The number of certified ignition interlock devices removed by the authorized installer since the previous quarterly report.

Historical Note

Section R17-5-612 renumbered from R17-5-609 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-613. Inspections

- A. The Department shall investigate any complaint or report of misconduct brought against a certified ignition interlock device manufacturer, installer, or installer-certified service representative, or against a service center for noncompliance with a provision of Articles 6 or 7 of this Chapter or A.R.S. Title 28, Chapter 4, Article 5.
- B. To comply with certification and the enforcement provisions of A.R.S. § 28-1465, the Department may request the consent of a manufacturer or a manufacturer's authorized installer for periodic onsite inspections at the established place of business of a manufacturer, a manufacturer's authorized installer, or a service center to determine whether a manufacturer or a manufacturer's authorized installer is in compliance with the Department's ignition interlock program requirements established under Articles 6 and 7 of this Chapter and A.R.S. Title 28, Chapter 4, Article 5.
- C. The Department shall conduct an inspection of a manufacturer, an installer, or a service center under the provisions of A.R.S. § 41-1009. The inspection shall include an examination of participant records and verification of an adequate supply of the warning labels that meet the requirements of A.R.S. § 28-1462, R17-5-609, and R17-5-704.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

ARTICLE 7. IGNITION INTERLOCK DEVICE INSTALLERS**R17-5-701. Definitions**

In addition to the definitions provided under A.R.S. §§ 28-101 and 28-1301, the definitions provided under R17-5-601 apply to this Article unless the context otherwise requires.

Historical Note

New Section recodified from R17-4-801 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). New Section made by final

rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-702. Ignition Interlock Device Installer Certification; Application Requirements; Recertification

- A. A manufacturer's authorized installer shall be certified by the Department before installing a certified ignition interlock device, and shall be recertified annually by the Department to continue to install a certified ignition interlock device under Arizona law.
- B. The Department may establish a system of staggered recertification for authorized installers throughout the twelve months of the year. If the Department approves an installer's certification or recertification, the certification or recertification shall extend for one year from the date of Department approval. A manufacturer's authorized installer shall submit to the Department the information required in subsection (D) on an annual basis for recertification. The Department may accept documents submitted with the initial application for certification, subject to Department approval.
- C. A manufacturer's authorized installer shall obtain from the manufacturer, as provided under R17-5-609, all necessary training and skills required to install, troubleshoot, examine, and verify proper operation of the manufacturer's certified ignition interlock device.
- D. A manufacturer's authorized installer shall submit to the Department a properly completed application for installer certification or recertification. The application for installer certification or recertification shall provide:
 1. The authorized installer's name;
 2. The authorized installer's business address and telephone number;
 3. The authorized installer's status as a sole proprietorship, partnership, limited liability company, or corporation;
 4. The name of the sole proprietor or of each partner, officer, director, manager, member, agent, or 20% or more stockholder;
 5. The name and model number of each certified ignition interlock device the authorized installer intends to install; and
 6. The following statements, signed by the authorized installer and acknowledged by a notary public or Department agent:
 - a. A statement that all information provided on the application form, including all information provided on any attachment to the application form, is complete, true, and correct;
 - b. A statement that the authorized installer agrees to indemnify and hold harmless from all liability the state of Arizona and any department, division, agency, officer, employee, or agent of the state of Arizona;
 - c. A statement that the authorized installer agrees to comply with all requirements under this Article; and
 - d. A statement that the authorized installer agrees to immediately notify the Department of any change to the information provided on the application form.
- E. The Department shall process an application for installer certification or recertification as provided under R17-5-605.
- F. Department certification issued to an authorized installer under this Article shall not expire as long as the installer remains authorized by a manufacturer to install its certified ignition interlock device model under Arizona law and the installer completes all requirements for annual recertification in the time period prescribed in this Section.

Department of Transportation - Commercial Programs

1. If a Department-certified installer is no longer authorized by a manufacturer to install its certified ignition interlock device, the manufacturer shall notify the Department within 24 hours that an installer is no longer authorized by the manufacturer.
2. If the installer again becomes authorized by a manufacturer to install its certified ignition interlock device, the installer may reapply to the Department for certification under this Article by submitting a new application.

- G.** A Department-certified ignition interlock device installer shall notify the Department within 24 hours of making a decision to relocate a fixed-site service center.
- H.** A Department-certified installer shall train and certify each of its service representatives on the proper installation of a certified ignition interlock device before allowing the service representative to install the certified ignition interlock device.
- I.** A Department-certified ignition interlock device installer shall provide to the Department a current list of the names of each of its certified service representatives on a quarterly basis. The installer shall electronically notify the Department within 24 hours after making a change to its list.

Historical Note

New Section recodified from R17-4-805 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). New Section made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-703. Ignition Interlock Device Installer Bond Requirements; Recertification

- A.** Before installing, servicing, or removing a certified ignition interlock device, an installer shall:
1. Be appointed by a manufacturer as an authorized installer of its certified ignition interlock device;
 2. Obtain an ignition interlock installer bond from a surety company authorized by the Arizona Department of Insurance to conduct general surety business in Arizona. The ignition interlock installer bond shall be:
 - a. In the amount of \$25,000;
 - b. On the approved form provided by the Department; and
 - c. Maintained for as long as the installer intends to install, service, or remove Department-certified ignition interlock devices under Arizona law;
 3. Submit the original completed ignition interlock installer bond to the Arizona Department of Transportation, Motor Vehicle Division, Ignition Interlock Program, 1801 W. Jefferson St. MD530M, Phoenix, AZ 85007; and
 4. Receive Department certification or recertification under R17-5-702.
- B.** An installer authorized by a manufacturer and certified or recertified by the Department to install, service, or remove more than one certified ignition interlock device model needs only one bond, which shall extend as long as the installer is certified or recertified.

Historical Note

New Section recodified from R17-4-806 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). Section R17-5-703 renumbered from R17-5-610 and amended by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132,

effective April 1, 2015 (Supp. 14-4).

Exhibit A. Repealed**Historical Note**

Exhibit A renumbered from R17-5-610, Exhibit A, and repealed by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4).

Exhibit B. Repealed**Historical Note**

Exhibit B renumbered from R17-5-610, Exhibit B, and repealed by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4).

R17-5-704. Authorized Installer Responsibilities

- A.** An authorized installer certified by the Department to install a certified ignition interlock device shall:
1. Follow the installation and operating procedures established and provided by the manufacturer;
 2. Acquire and maintain all necessary training and skills specified by the manufacturer for installing, troubleshooting, examining, and verifying the proper operation of its certified ignition interlock device;
 3. Comply with all of the manufacturer's procedures for removing the certified ignition interlock device from a vehicle;
 4. Electronically notify the Department within 24 hours after removing a certified ignition interlock device under R17-5-610;
 5. Provide to the manufacturer, or to the Department if delegated by the manufacturer, an accurate electronic reporting of all applicable information required of the manufacturer under R17-5-610 and R17-5-612;
 6. Provide to every participant, and make available for every person operating a motor vehicle equipped with the certified ignition interlock device, a copy of the manufacturer's written instructions for the following:
 - a. Operating a motor vehicle equipped with the certified ignition interlock device;
 - b. Cleaning and caring for the certified ignition interlock device; and
 - c. Identifying and addressing vehicle malfunctions or repairs that may affect the certified ignition interlock device;
 7. Ensure that each participant receives an operator's manual and is further instructed regarding all of the following:
 - a. How to use the system;
 - b. How to obtain service for the system;
 - c. How to find answers to any additional questions;
 - d. How the alcohol retest feature works;
 - e. How drinking alcohol before a test may result in a reading of sensitive or fail;
 - f. How the device shall not be removed, except by an installer-certified service representative;
 - g. How missing an appointment for a regularly scheduled accuracy check will cause the certified ignition interlock device to enter into a lock-out condition that will emit a unique cue, either auditory, visual, or both, to warn the driver that after 72 hours the vehicle will not start. It shall be the responsibility of each participant to have the car towed to the service center if a lock-out condition occurs;
 - h. How noncompliance with a regularly scheduled accuracy check shall result in suspension under A.R.S. § 28-1463 of the participant's driver license

Department of Transportation - Commercial Programs

until proof of compliance is submitted to the Department under A.R.S. § 28-1461; and the duration of the participant's certified ignition interlock device requirement shall be extended under A.R.S. § 28-1461;

- i. What the penalties are for tampering with or misusing the system;
 - j. What will happen after failing a start-up breath alcohol test;
 - k. What will happen after a participant has a set of four valid and substantiated missed rolling retests during the participant's ignition interlock period; and that a participant shall not avoid compliance with the rolling retest requirement by turning off a motor vehicle's ignition; and
 - l. What events or actions will result in a lock-out of the certified ignition interlock device.
8. Ensure that each participant demonstrates:
 - a. A properly delivered alveolar breath sample; and
 - b. An understanding of how the abort test feature works.
 9. Affix conspicuously, the warning label provided by the manufacturer under R17-5-609.
 10. Check each device for evidence of tampering at least once every 90 days or more frequently if needed. This anticircumvention check shall be conducted at each participant's regularly scheduled accuracy and compliance check required under R17-5-610.
 11. Notify the Department electronically under R17-5-610 if any evidence of tampering is discovered and submit valid and substantiated proof or evidence of a reportable activity.

- B. An installer shall not permit a service representative whose driving privilege is limited pursuant to A.R.S. §§ 28-1381, 28-1382, 28-1383, or 28-3319, or restricted under A.R.S. § 28-1402 to install, inspect, download, calibrate, repair, monitor, maintain, service, or remove a certified ignition interlock device until the restrictive period of the service representative's driving privilege ends. An installer whose driving privilege is limited pursuant to A.R.S. §§ 28-1381, 28-1382, 28-1383, or 28-3319, or restricted under A.R.S. § 28-1402 shall not install, inspect, download, calibrate, repair, monitor, maintain, service, or remove a certified ignition interlock device until the restrictive period of the installer's driving privilege ends.

Historical Note

New Section recodified from R17-4-807 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). New Section made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-705. Installer-certified Service Representatives**A. Certification requirements.**

1. To achieve certification as a service representative, an individual shall obtain written documentation from a Department-certified ignition interlock device installer documenting that the individual is currently trained in each aspect involved with the specific certified ignition interlock device for which the individual seeks certification to install or service.
2. An installer shall not certify as a service representative, any individual with a felony conviction in the five years preceding the individual's request for certification. In this

Section, conviction means that a court of competent jurisdiction adjudicated the individual guilty.

B. Proficiency requirements.

1. It is the responsibility of the installer to ensure that its certified service representatives maintain proficiency in each aspect involved with each specific certified ignition interlock device model the individual is certified to install or service.
2. The Department may at any time require an installer-certified service representative to demonstrate competency in the installation, inspection, downloading, calibrating, repairing, monitoring, maintaining, servicing or removal of a specific certified ignition interlock device. Failure of the installer-certified service representative to demonstrate proficiency to the Department may result in corrective action against the installer as provided under R17-5-601.

Historical Note

New Section recodified from R17-4-808 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). New Section made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-706. Accuracy and Compliance Check; Requirements

- A. An installer-certified service representative shall inspect, maintain, and check each certified ignition interlock device for calibration accuracy and operational performance before the device is placed into, or returned to service.
- B. The installer-certified service representative shall perform each accuracy and compliance check in accordance with NHTSA specifications as referenced in R17-5-604(C) at a service center authorized by an installer certified by the Department under R17-5-702.
- C. The accuracy and compliance check performed under R17-5-610 shall include an inspection of the device to verify that it is properly functioning in accordance with all of the following criteria:
 1. Accuracy standards as prescribed under R17-5-603;
 - a. The device shall be calibrated before placed into, or returned to service.
 - b. The calibration test shall consist of introducing to the device a known alcohol concentration from a reference sample device, the analysis of which indicates the device's agreement with the known concentration. The installer's software shall be capable of performing, documenting, and reporting the result of this calibration test. The calibration test result shall verify the accuracy of the ignition interlock device according to the standards prescribed under R17-5-603; and
 2. Anticircumvention standards and operational features as prescribed under R17-5-603.
- D. The calibration test referenced under subsection (C) shall be performed when the information uploaded from a device indicates that the device has experienced an interruption in service or was completely disconnected. Additionally, the complete device shall be examined for evidence of tampering while it is still attached to the vehicle.
- E. If calibration confirmation test results reveal that the device is not properly calibrated, the device shall be recalibrated to restore the accuracy standards prescribed under R17-5-603 before the device is returned to service.

Department of Transportation - Commercial Programs

- F. At least once every 90 days, an installer-certified service representative shall perform a physical inspection of the ignition interlock device while it is still attached to the vehicle.
- G. An installer-certified service representative shall perform a physical inspection of the ignition interlock device at other times when the data logger indicates that tampering has occurred and shall maintain a log showing the findings.
- H. If at any time an individual device fails to meet the provisions of this Section, the manufacturer, installer, service center, or installer-certified service representative shall either:
 1. Repair, recalibrate, and retest the device to ensure that it does meet all applicable standards; or
 2. Remove the device from service.

Historical Note

New Section recodified from R17-4-501 at 7 A.A.R. 3483, effective July 20, 2001 (Supp. 01-3). Section repealed by final rulemaking at 12 A.A.R. 2297, effective August 5, 2006 (Supp. 06-2). New Section made by final rulemaking at 13 A.A.R. 3499, effective December 1, 2007 (Supp. 07-4). Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-707. Inspection of Service Centers; Application

- A. A service center, whether located on a fixed site or mobile, shall meet the requirements necessary to maintain installer certification under this Article before it is used by an installer to conduct certified ignition interlock device related business in this state.
 - B. An installer shall submit to the Department a separate application for each individual service center the installer intends to use for conducting certified ignition interlock device related business in this state.
 - C. On an application for a service center, available from the Department, an installer shall identify:
 1. The physical location of the service center;
 2. The certified ignition interlock device, or devices, to be merchandised and serviced at the location; and
 3. The reference sample device, or devices, that will be used at the location.
 - D. An installer shall attach to the application submitted to the Department under subsection (B), a statement from the manufacturer acknowledging that the installer is authorized to install the certified ignition interlock device, or devices, described on the application.
 - E. The Department may request an installer applying to meet the requirements for a service center to consent to allow the Department access to the service center for inspection under subsection (H).
 - F. An installer applying for a service center shall agree to comply with all provisions under this Article and A.R.S. Title 28, Chapter 4, Article 5.
 - G. To operate a service center, the installer's ignition interlock device testing facilities, equipment, and the procedures used in the service center shall meet the following conditions:
 1. A fixed-site service center shall be located in a facility that accommodates installing, inspecting, downloading, calibrating, repairing, monitoring, maintaining, servicing, and removing a specific ignition interlock device consistent with the requirements of this Article. The installer shall:
 - a. Provide a designated waiting area for the participant that is separate from the installation area; and
 - b. Ensure that no participant witnesses installation of the certified ignition interlock device.
 2. A mobile service center shall be equipped with the same materials and capacities prescribed under subsection (G)(1). An installer or service representative operating a mobile service center shall:
 - a. Provide a designated waiting area for the participant that is separate from the area used for the installation area; and
 - b. Ensure that no participant witnesses installation of the certified ignition interlock device.
3. The installer, whether operating a fixed-site service center, or mobile, shall ensure that its certified service representatives utilize all of the following:
 - a. The analysis of a reference sample such as head-space gas from a mixture of water and alcohol, the results of which shall agree with the reference sample predicted value, or other methodologies approved by the Department. The preparatory documentation on the reference sample solution, such as a certificate of analysis, shall be made available to the Department on request.
 - b. The startup set point value established under R17-5-603(A). All analytical results shall be expressed in grams of alcohol per 210 liters of breath (g/210L).
 - c. The most current versions of manufacturer software and firmware to ensure continuous compliance under this Article and A.R.S. Title 28, Chapter 4, Article 5.
 4. Only a properly trained installer-certified service representative shall perform certified ignition interlock device related services rendered through a service center.
 - a. The installer shall maintain sufficient staff at each service center to ensure an acceptable level of service. The service center shall always be staffed with at least one installer-certified service representative.
 - b. The installer shall schedule accuracy and compliance checks at each service center in a manner that will not deprive a participant of an acceptable level of service.
 - c. The installer's software shall document the certified service representative performing each accuracy and compliance check and shall record the date each service is performed.
 - d. Department-certified installers may train potential certified service representatives in the service center only under the direct supervision of a currently certified service representative.
 5. The installer shall agree to:
 - a. Submit a violation as defined in R17-5-601 regarding a participant's noncompliance to the Department by providing valid and substantiated proof or evidence of a reportable activity as required in R17-5-610(D) no later than 24 hours after the installer discovers the violation;
 - b. Maintain complete records in an electronic or paper format of each device installation for three years from the date of its removal;
 - c. Require each applicant seeking installer certification as a service representative to certify that the applicant has not been convicted of a felony within the five years preceding the date of application;
 - d. Retain the five-year felony certification required of each installer-certified service representative under subsection (G)(5)(c) for five years after the date of the employee's separation from employment; and
 - e. Make available to the Department on request, either by inspection or in hard copy form, all records relating to the installer's ignition interlock device operations.

Department of Transportation - Commercial Programs

6. The installer shall ensure that all anticircumvention features are activated on each installed certified ignition interlock device.
7. The installer shall install and inspect each certified ignition interlock device as provided under this Article.
 - a. Each time an installer uploads the information from a participant's certified ignition interlock device, the installer-certified service representative shall perform a visual inspection of the vehicle, the device, and the device's wiring to ensure that no tampering has occurred during the monitoring period.
 - b. The calibration test referenced under R17-5-706 shall be performed if the downloaded device information indicates that the device has experienced an interruption in service or was completely disconnected.
8. The installer shall agree to abide by conditions for the removal of a certified ignition interlock device, including but not limited to the following:
 - a. Provide electronic notification to the Department of device removal under R17-5-610(E) within 24 hours and electronically submit the required reporting record.
 - b. A service representative or service center shall not remove the certified ignition interlock device of another manufacturer, except in an emergency, or other special circumstance authorized by the Department. All removals shall be documented and reported to the Department. All device removal records shall be retained as prescribed under R17-5-612.
 - c. When a participant makes a request to exchange one manufacturer's device for the device of another manufacturer, the installer of the original device shall notify the Department of the device removal under R17-5-610(E).
- H. The Department may cancel the certification of an installer, prohibiting operation of its service center if the installer or service center is not complying with any provision under this Article, engaging in improper reporting as defined in R17-5-601, not complying with reporting provisions in R17-5-610, or not complying with A.R.S. Title 28, Chapter 4, Article 5. To ensure continuous compliance with the Department's certified ignition interlock program requirements, the Department may inspect an installer's service center and take corrective action against the installer as provided under R17-5-601 if a deficiency is identified during an inspection conducted under R17-5-613.
- I. An installer shall designate a custodian of records who shall, if required in an administrative hearing or court proceeding, provide testimony concerning the interpretation of data storage system records and answer questions concerning the installer's certification and compliance with the Department's ignition interlock program requirements.
- J. Before issuing certification, the Department may perform an onsite inspection of a service center to verify compliance with this Article.
- K. After verifying compliance with subsections (A) through (G), the Department shall provide evidence of approval to the installer that shall remain valid until cancelled by the Department or terminated by the installer or service center. Evidence of approval provided to an installer or service center under this Section demonstrates that the installer's service center has met all of the criteria necessary for approval by the Department.
- L. Approval of the installer's service center is contingent on the installer's agreement to conform with and abide by all directives, orders, and policies issued by the Department regarding any service center activities regulated by the Department under this Article and A.R.S. Title 28, Chapter 4, Article 5, which may include:
 1. Program administration,
 2. Reports,
 3. Records and forms,
 4. Inspections,
 5. Methods of operations and testing protocol,
 6. Personnel training and qualifications,
 7. Criminal history considerations for installer-certified service representatives, and
 8. Records custodian.
- M. Certification of an installer issued under this Article may be cancelled by the Department if the installer's service center, or installer-certified service representative is not in compliance with a provision of this Article, provisions regarding reporting in R17-5-610 and R17-5-601, or A.R.S. Title 28, Chapter 4, Article 5, or the certified ignition interlock device equipment it is authorized by the manufacturer to install no longer meets the requirements provided under Article 6 of this Chapter.

Historical Note

New Section made by final rulemaking at 13 A.A.R.

3499, effective December 1, 2007 (Supp. 07-4).

Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

R17-5-708. Notice; Denial or Cancellation of Certification; Appeal; Hearing

- A. If the Department determines that an authorized reporting installer fails to properly report ignition interlock information and data to the Department in the manner prescribed in these rules, the Department may immediately provide written notice to the authorized reporting installer with the following information:
 1. The name of the participant and the date of the improper reporting; and
 2. The authorized reporting installer shall send the required record or report to the Department within ten business days, if applicable.
- B. If the authorized reporting installer fails to remedy the issues identified in the notice provided under R17-5-708(A) within ten business days, the Department may cancel the authorized reporting installer's certification.
- C. If the Department denies a pending application for certification or recertification of an installer, or cancels a certification previously issued to an installer, the installer may appeal the action as follows:
 1. Within 15 days after receipt of a notice of denial of application or a notice of cancellation of certification or a notice of denial of recertification of an installer, the installer may file a written request for a hearing on the issue of the denial or cancellation with the Department's Executive Hearing Office as prescribed under 17 A.A.C. 1, Article 5.
 2. If a hearing on the issue of the denial or cancellation is timely requested, the Department's Executive Hearing Office shall conduct the hearing as prescribed under A.R.S. Title 41, Chapter 6, Article 6, and 17 A.A.C. 1, Article 5. The request for a hearing stays the summary cancellation of an installer's certified activities.
 3. Within 10 days after a hearing, the hearing officer shall issue to the installer a written decision, which shall:
 - a. Provide findings of fact and conclusions of law; and
 - b. Grant the application, deny the application, deny recertification, or cancel the certification.

Department of Transportation - Commercial Programs

4. If the hearing officer affirms the denial of application or recertification or cancellation of certification, the installer may seek judicial review under A.R.S. Title 12, Chapter 7, Article 6, within 35 days of the date when a copy of the decision sought to be reviewed is served upon the party affected unless the court grants a stay pending the outcome of judicial review.
- D. If an installer's certification is cancelled or denied, or recertification is denied, the installer is prohibited from performing its duties and operating under these rules for a period of one year from the latest of the following dates when:
 1. The Department denies an application or recertification, or cancels a certification of an installer, or
 2. The Department's Executive Hearing Office denies the application or recertification, or cancels a certification of an installer.
- E. After the one-year decertification period ends, an installer may reapply to the Department for certification by completing a new application and meeting all certification requirements under this Article.

Historical Note

New Section made by final rulemaking at 13 A.A.R.

3499, effective December 1, 2007 (Supp. 07-4).

Amended by final rulemaking at 20 A.A.R. 3132, effective April 1, 2015 (Supp. 14-4).

ARTICLE 8. MANDATORY INSURANCE AND FINANCIAL RESPONSIBILITY**R17-5-801. Definitions**

In addition to the definitions under A.R.S. §§ 28-101 and 28-4001, in this Chapter, unless otherwise specified:

"Company" means an insurance or indemnity company authorized to write motor vehicle liability coverage in Arizona.

"Customer number" means the system-generated, or other distinguishing number, assigned by the Division to each person conducting business with the Division. The customer number of a private individual is generally the person's driver license or non-operating identification license number. The customer number of a business is generally its federal employer identification number.

"Division" means the Arizona Department of Transportation's Motor Vehicle Division.

"EDI" means electronic data interchange, which is the transmission of data in a standardized format from one computer to another without the use of magnetic tape.

"EDI reporting" means the weekly computer-to-computer transmission of data from a company to the Division.

"Error return" means the immediate computer-to-computer transmission, from the Division to a company, of all data reporting errors received during EDI reporting.

"FEIN" means the federal employer identification number or federal tax identification number used to identify a business entity.

"FTP" means file transfer protocol, which is a common protocol used by the Division for exchanging files over any network that supports EDI reporting transmitted through the Internet or Intranet.

"Information exchange" means EDI reporting where a company or service provider transmits a report to the Division through a connection to a private information network.

"MVD" means the Arizona Department of Transportation's Motor Vehicle Division.

"NAIC" means the National Association of Insurance Commissioners.

"Private information network" means the value-added network used by a company or service provider to facilitate EDI transmissions to the Division and to provide other network services where fees are charged for the network connection based on the number of characters and messages transmitted.

"Reportable activity" means the information required to be transmitted to the Division under A.R.S. § 28-4148 and this Article.

"Self-insurer" means a person or entity that has met the qualifications, completed the application process, and received a certificate of self-insurance issued by the Division under Section R17-5-810.

"Service provider" means a person or entity that provides the connection to a private information network for EDI reporting.

"SR22" means a certification filed, by a company duly authorized to transact business in this state, as proof of financial responsibility for the future, which guarantees that the insured owner or operator has in effect at least the minimum motor vehicle liability insurance coverage required under A.R.S. Title 28, Chapter 9, Article 3.

"SR26" means a certification filed by a company duly authorized to transact business in this state, which notifies the Division that an insured owner or operator required to maintain proof of financial responsibility for the future, under A.R.S. Title 28, Chapter 9, Article 3, is no longer covered under a previously reported SR22.

"Value-added Network" means a private network provider that is hired by a company to facilitate EDI or provide other network services.

"X12" means the American National Standards Institute, Accredited Standards Committee, uniform standards for the inter-industry electronic exchange of business transactions by EDI.

"X12 (TS811)" means X12 Transaction Set 811, Consolidated Service Invoice – Statement, version 3050, which is the specific set of EDI transactions developed for the insurance industry in the X12 standard format for automobile liability insurance reporting.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-802. Insurance Company Electronic Reporting Requirement; Applicability

- A. A company that provides motor vehicle liability insurance coverage for an Arizona vehicle shall electronically transmit to the Division all reportable activity under A.R.S. § 28-4148 and R17-5-803 using one of the authorized EDI reporting methods identified in R17-5-806. Each transmission shall include all of the applicable record matching criteria prescribed under R17-5-804 or R17-5-805.
- B. Effective May 1, 2007, a company that issues 1,000 or more SR22 policies per calendar year shall electronically transmit to the Division all SR22 and SR26 activity using one of the Division-authorized EDI reporting methods identified in R17-5-806. Each transmission shall include all of the applicable

Department of Transportation - Commercial Programs

record matching criteria prescribed under R17-5-804 or R17-5-805.

- C. The Division shall not accept or record an out-of-state motor vehicle liability insurance policy for a passenger vehicle, even if written by a company authorized to transact business in this state.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-803. Insurance Company Reportable Activity

- A. A company shall transmit to the Division:
1. All reportable activity, not previously reported, that was processed by the company seven or fewer days before each reporting date; or
 2. A statement of inactivity, if no reportable activity occurred by the reporting date.
- B. For the purpose of this Article, reportable activity shall include:
1. A policy cancellation;
 2. A policy non-renewal;
 3. A new policy issuance;
 4. A vehicle added to a policy;
 5. A vehicle deleted from a policy;
 6. A policy reinstatement; and
 7. Effective May 1, 2007, all SR22 and SR26 filings by insurance companies issuing 1,000 or more SR22 policies per calendar year.
- C. Reportable activity does not include the addition or deletion of a vehicle to or from a non-vehicle-specific commercial policy.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-804. Record Matching Criteria for a Vehicle-specific Policy

For each vehicle-specific policy transmitted to the Division, a company shall include all of the following information to assist with the matching of policies to MVD customers:

1. The complete and valid vehicle identification number;
2. The policy number; and
3. The NAIC number of the reporting company.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-805. Record Matching Criteria for a Non-vehicle-specific Commercial Policy

- A. For each non-vehicle-specific commercial policy transmitted to the Division, a company shall include all of the following information to assist with the matching of policies to MVD customers:
1. The MVD Customer number of the insured:
 - a. If a policy covers all vehicles registered in the name of a business or organization, the Customer number is the FEIN of the business or organization; or
 - b. If a policy covers all vehicles registered in the name of a private individual, the Customer number is the Arizona Driver License number of the private individual;
 2. The policy number; and
 3. The NAIC number of the reporting company.
- B. If the MVD Customer number required under subsection (A)(1) is not available to a company, the company may provide the complete and valid vehicle identification number of

each vehicle covered under the policy in-lieu of the MVD Customer number.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-806. Division-authorized EDI Reporting Methods; Reporting Schedule

- A. A company shall transmit to the Division all reportable activity listed in R17-5-803 using one of the following Division-authorized EDI reporting methods:
1. EDI reporting by information exchange; or
 2. EDI reporting by encrypted FTP.
- B. A company shall transmit all reportable activity to the Division at least once every seven days.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-807. X12 Data Format for Policy Receipt and Error Return

- A. Reporting format. A company shall transmit to the Division all reportable activity using the format prescribed in the Arizona Mandatory Insurance Reporting System Guide for Insurance Companies provided by the Division.
- B. Error return format. The Division shall return to a company all reporting errors received during a transmission of reportable activity using the format prescribed in the Arizona Mandatory Insurance Reporting System Guide for Insurance Companies.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-808. Insurance Company Reporting Errors; Resolution; Noncompliance

- A. The Division shall:
1. Return to a company, using the X12 Error Return format provided in R17-5-807(B), all reporting errors received during a transmission; and
 2. Instruct the company to correct all reporting errors affecting the Division's processing of the required data.
- B. All companies reporting electronic policy information shall notify the Division prior to making changes to any reporting systems, or previously established policy reporting formats, that may affect the Division's ability to match and process the information received.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-809. Insurance Company Failure to Submit Required Data; Request for Hearing

If a company fails to submit the data required under A.R.S. § 28-4148, and this Article, the Division shall:

1. Send to the company, a dated written notice, which:
 - a. Identifies the business week or reporting period in which the company did not submit the required information;
 - b. Instructs the company to submit the information for the identified business week or reporting period within seven days of the date of the notice;
 - c. Informs the company that a failure to respond to the Division's request within the allotted time-frame, shall result in a referral of the matter to the Arizona Department of Insurance, under A.R.S. § 20-237, which may result in a civil penalty of up to \$250 per

Department of Transportation - Commercial Programs

- day for each day the insurer is in violation of A.R.S. § 28-4148; and
- d. Provides notice of the company's right to request a hearing with the Arizona Department of Insurance under A.R.S. § 20-237; and
 2. Advise the Arizona Department of Insurance if the company fails to comply with the Division's written notice provided under this Section.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-810. Self-insurance as Alternate Proof of Financial Responsibility; Provisions; Applicability

- A. Self-insurance applicant qualification. A person or entity may apply for self-insurance under this Section if the applicant:
 1. Owns the minimum number of vehicles prescribed under A.R.S. § 28-4007(A) with current Arizona registration;
 2. Demonstrates minimum assets of \$1 million on documentation required under subsections (C) and (D);
 3. Meets any additional financial responsibility requirements under A.R.S. § 28-4033(A), according to the insured vehicle's weight and/or intended use; and
 4. Provides a business office contact for the company with a current phone number and mailing information.
- B. A self-insurance applicant shall provide, on a self-insurance application form provided by the Division, the following information:
 1. Applicant's name;
 2. Business name, if applicable;
 3. Mailing address, city, state, and ZIP code;
 4. A selection of coverage type:
 - a. Public liability only; or
 - b. Public liability and property damage;
 5. Number of vehicles in the applicant's fleet;
 6. A selection list that describes the nature of the applicant's business;
 7. A description of any hazardous materials transported by type, class, and weight;
 8. A report of all accidents in the prior 39-month period before the application date;
 9. The applicant's signature and official business title to certify that all information is true and correct; and
 10. Acknowledgment by a notary public or by the signature of an authorized Motor Vehicle Division agent.
- C. Supplementary documentation. In addition to a completed self-insurance application form, the applicant shall submit a profit and loss statement certified by a Certified Public Accountant for the 12-month period before the application date. The profit and loss statement shall include one of the following:
 1. A balance sheet; or
 2. An annual financial report.
- D. On approval of an application, the Division shall issue a certificate of self-insurance that is continuously valid but shall require the self-insurer to submit a 12-month update of supplementary documentation prescribed under subsection (C) on or before July 1 of each successive year.
- E. An initial self-insurance applicant or a self-insurer making an annual update shall submit documentation required under subsections (B) through (D) to the following address:

Motor Vehicle Division
Financial Responsibility Unit
P.O. Box 2100, Mail Drop 535M
Phoenix, AZ 85001-2100

- F. A self-insurer shall keep a copy of the self-insurance certificate in each covered vehicle at all times.
- G. A self-insurer shall submit written notification to the Division of each vehicle to be added or removed from self-insurance coverage. The written notification shall include the vehicle identification number of each vehicle.
- H. A self-insurer that terminates self-insurance shall provide new evidence of financial responsibility as required under A.R.S. § 28-4135 for each vehicle previously covered under a self-insurance certificate.
- I. In addition to the reasonable grounds prescribed under A.R.S. § 28-4007(C), the Division may cancel a self-insurance certificate under the following circumstances:
 1. A self-insurer fails to comply with provisions of the Division's annual update requirement under subsection (D), or
 2. A self-insurer no longer owns the covered business or fleet.
- J. For the purpose of A.R.S. § 28-4007(C) and this Section, the Division shall conduct a self-insurance cancellation hearing according to the provisions prescribed under 17 A.A.C. 1, Article 5.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

R17-5-811. Certificate of Deposit as Alternate Proof of Financial Responsibility; Applicability

For the purpose of A.R.S. §§ 28-4076(2) and 28-4084, a person depositing a \$40,000 certificate of deposit with the state treasurer as alternate proof of financial responsibility may apply the certificate to a maximum of 25 non-commercial vehicles registered in the person's name.

Historical Note

New Section made by final rulemaking at 13 A.A.R. 858, effective March 6, 2007 (Supp. 07-1).

ARTICLE 9. TRANSPORTATION NETWORK COMPANIES**R17-5-901. Definitions**

In addition to the definitions provided under A.R.S. § 28-9551, when applicable to a transportation network company, the following definitions apply to this Article unless otherwise specified:

"Applicant" means a person that meets the statutory requirements of a transportation network company as prescribed under A.R.S. Title 28, Chapter 30, Article 3.

"Designated point of contact" means a person employed by a transportation network company who has the authority to gather and provide records to the Department on request.

"Transportation network company permit" means a document issued by the Department to an applicant that meets the requirements prescribed under A.R.S. Title 28, Chapter 30, Article 3, as authorization to conduct transportation network services in this state.

"Violation" means a failure to maintain or make available to the Department any records the transportation network company is required to maintain and provide to the Department on request as provided under A.R.S. §§ 28-9554 through 28-9556.

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective

Department of Transportation - Commercial Programs

March 6, 2017 (Supp. 17-1).

R17-5-902. Transportation Network Company Permit - Initial Application; Issuance; Fee

- A. An applicant for a transportation network company permit issued by the Department under A.R.S. § 28-9552, shall apply to the Department by:
1. Completing and submitting online the application form provided by the Department at www.azdot.gov;
 2. Providing the full name and contact information of the applicant's agent for service of process in this state;
 3. Certifying that the transportation network company meets the requirements of A.R.S. Title 28, Chapter 30, Article 3;
 4. Filing a legible illustration of the applicant's trade dress; and
 5. Paying a \$1,000 application fee as provided under A.R.S. § 28-9552(A).
- B. Upon receipt and acceptance of all required documents, fees, and certifications, the Department shall issue to an applicant a transportation network company permit.
- C. The application fee paid to the Department under subsection (A) is refundable in full if the transportation network company permit application is:
1. Denied by the Department, or
 2. Withdrawn by the applicant before the Department issues a transportation network company permit.
- D. A transportation network company permit issued by the Department under this Section expires three years after issuance and may be renewed as provided under R17-5-903.

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-903. Transportation Network Company Permit - Renewal Application; Issuance; Fee

- A. A transportation network company shall apply to the Department for renewal of a transportation network company permit issued by the Department under A.R.S. § 28-9552 and R17-5-902, no earlier than 90 days, and no later than 30 days, before the permit expires by:
1. Completing and submitting online the renewal application form provided by the Department at <https://secure.servicearizona.com>;
 2. Filing with the Department a legible illustration of the applicant's trade dress if different than the illustration already on file with the Department;
 3. Certifying that the transportation network company meets the requirements of A.R.S. Title 28, Chapter 30, Article 3; and
 4. Paying a \$1,000 renewal application fee as provided under A.R.S. § 28-9552(A).
- B. Upon receipt and acceptance of all required documents, fees, and certifications, the Department shall issue to an applicant a transportation network company permit renewal.
- C. A transportation network company permit renewal issued by the Department expires three years after the date the existing transportation network company permit expires.
- D. The holder of an expired transportation network company permit may apply to the Department for a new transportation network company permit using the renewal application procedure provided under R17-5-903(A).

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-904. Transportation Network Company Permit or Renewal - General Provisions

- A. A transportation network company permit or renewal issued by the Department under this Article shall include an assigned number that remains effective until either withdrawn by the Department or until it expires.
- B. A transportation network company permit or renewal issued by the Department under this Article shall not be transferred or assigned, in whole or in part, to any person other than the person to whom the permit is issued, except upon a merger, change in control, or sale of substantially all of the transportation network company's assets to an entity that assumes the duties and obligations of the permit. The transportation network company shall notify the Department within 30 days of such a transfer or assignment, and the Department shall have 30 days beginning on such notification to nullify the transfer or assignment based on the criteria set forth in this Article. An initial public offering shall not be deemed to trigger a transfer or assignment under this Section.

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-905. Transportation Network Company - Record Review

- A. The Department, after providing reasonable notice to a transportation network company, may review with or without cause all records a transportation network company is required to make available to the Department on request as provided under A.R.S. §§ 28-9554 through 28-9556.
- B. A transportation network company shall make all records described under subsection (A) available to the Department for review at an Arizona location.
- C. The Department shall conduct a record review during the transportation network company's normal business hours.
- D. The Department shall provide a copy of its review report to the transportation network company's designated point of contact. The report shall include the review results and indicate any violations found.

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-906. Transportation Network Company - Designated Point of Contact

- A. A transportation network company shall provide to the Department the name and contact information of the transportation network company's designated point of contact in this state.
- B. A transportation network company shall notify the Department within 10 business days of making a change to the name or contact information of the transportation network company's designated point of contact in this state.

Department of Transportation - Commercial Programs

Historical Note

New Section made by exempt rulemaking under Laws 2015, Ch. 235, § 14, at 21 A.A.R. 1825, effective August 21, 2015 (Supp. 15-3). Section repealed; new Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

ARTICLE 10. VEHICLE FOR HIRE**R17-5-1001. Definitions**

In addition to the definitions in A.R.S. §§ 28-101 and 28-9501, the following terms apply to this Article unless otherwise specified:

“Appealable agency action” has the meaning prescribed in A.R.S. § 41-1092.

“Applicant” means a company that applies to the Department for a vehicle for hire company permit as prescribed under A.R.S. Title 28, Chapter 30, Article 1, and these rules.

“Application” means forms designated as an application and all documents and additional information the Department requires a vehicle for hire company applicant to submit to obtain a vehicle for hire company permit.

“Contested case” has the meaning prescribed in A.R.S. § 41-1001.

“Designated point of contact” means a person employed by a vehicle for hire company who has the authority to gather and provide records to the Department on request.

“Good standing” means that an applicant does not have:

- Any outstanding civil penalties owed to the Department;
- Any suspension, revocation, or cancellation of a vehicle for hire company permit issued by the Department;
- Any delinquent fees, taxes, or unpaid balances owed to the Department; or
- Any open complaints submitted to the Department regarding compliance with vehicle for hire statutes or rules.

“Government agency” means this state and any political subdivision of this state that receives and uses tax revenues.

“*Handbook 44*” means the U. S. Department of Commerce, National Institute of Standards and Technology (NIST) *Handbook 44*, Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices, Section 5.54. Taximeters, revised as of 2016.

“NIST” means the National Institute of Standards and Technology of the U.S. Department of Commerce.

“Permittee” means the owner or responsible party in the vehicle for hire company that meets all permit requirements and holds a vehicle for hire company permit.

“Trade dress” means a removable and distinct logo, insignia or emblem attached to, or visible from the exterior of a taxi while providing vehicle for hire services as a taxi, and that includes the word “taxi” or “cab.”

“Vehicle for hire company permit” means the permit required in A.R.S. § 28-9503 for a vehicle for hire company to operate in this state.

“Violation” means the failure of a vehicle for hire company to:

- Provide to the Department any records the vehicle for hire company is required to maintain and provide on request, as provided in A.R.S. § 28-9507;

Follow these rules; or

Follow A.R.S. Title 28, Chapter 30, Articles 1 and 2.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1002. Incorporation by Reference

The Department incorporates by reference the U. S. Department of Commerce, National Institute of Standards and Technology (NIST) *Handbook 44*, Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices, Section 5.54. Taximeters, revised as of 2016, and no later amendments or editions. The incorporated material is available at www.nist.gov/pml/pubs/hb44.cfm. The incorporated material is on file with the Department at 206 S. 17th Ave., Phoenix, AZ.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1003. Vehicle for Hire Company Permit; Good Standing; Handbook 44

- A. An applicant to the Department for a vehicle for hire company permit shall be in good standing with the Department at the time the vehicle for hire company applies for or renews a vehicle for hire company permit.
- B. A vehicle for hire company that operates a vehicle for hire as a taxi shall have an operating taxi meter installed in each taxi by a person or company that uses *Handbook 44*.
- C. A vehicle for hire company operating a taxi shall maintain, and make available to the Department, records for the installation and calibration of each taxi meter for the duration of the three-year vehicle for hire company permit.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1004. Vehicle for Hire Company Permit - Initial Application; Issuance; Fee

- A. A vehicle for hire company shall apply to the Department for a vehicle for hire company permit by:
 1. Completing and submitting the application form to the Department that is located at: www.azdot.gov;
 2. Providing the full name and contact information of the vehicle for hire company’s agent for service of process in this state;
 3. Submitting a clear illustration of the vehicle for hire company’s trade dress, if operating as a taxi;
 4. Paying the application fee of \$24 per vehicle that is used as a taxi by the vehicle for hire company at the time of application, not to exceed a total of \$1,000 per applicant, as required by A.R.S. § 28-9503;
 5. Certifying that the vehicle for hire company meets all vehicle for hire company requirements in A.R.S. Title 28, Chapter 30, Article 1; and
 6. Stating the total number of vehicles for hire in the vehicle for hire company fleet at the time of application.
- B. A vehicle for hire company shall provide to the Department the name and contact information of the vehicle for hire company’s designated point of contact in this state.
- C. After the Department receives and accepts a completed application, all certifications, and the application fee, if applicable, the Department shall issue to an applicant a vehicle for hire company permit.
- D. A vehicle for hire company permit issued by the Department expires three years after the date of issuance.

Department of Transportation - Commercial Programs

- E. A vehicle for hire company may apply to renew a vehicle for hire company permit as provided in R17-5-1005.
- F. A vehicle for hire company shall notify the Department within 10 business days of making a change to the name or contact information of the vehicle for hire company's designated point of contact in this state.
- G. A vehicle for hire company permit or renewal issued by the Department under this Article may be transferred to a person other than the person to whom the permit is issued, if ownership of the vehicle for hire company changes. The vehicle for hire company shall notify the Department within 30 days of such a transfer.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1005. Vehicle for Hire Company Permit - Renewal Application; Issuance; Fee

- A. A vehicle for hire company shall apply to the Department for renewal of an existing vehicle for hire company permit under A.R.S. § 28-9503, no earlier than 90 days and no later than 30 days before the three-year permit expires by:
 1. Completing and submitting the required information, all certifications, and the application fee, if applicable, to the Department at: <https://secure.servicearizona.com>;
 2. Submitting a clear illustration of the vehicle for hire company's trade dress, if operating as a taxi, and if different than the illustration already on file with the Department;
 3. Paying the renewal application fee of \$24 per vehicle that is used as a taxi at the time of permit renewal, not to exceed a total of \$1,000 per applicant, as required by A.R.S. § 28-9503; and
 4. Certifying that the vehicle for hire company meets all the vehicle for hire company requirements in A.R.S. Title 28, Chapter 30, Article 1.
- B. Upon receipt and acceptance of all required documents, fees, if applicable, and certifications, the Department shall issue to an applicant a vehicle for hire company permit renewal.
- C. A vehicle for hire company permit renewal issued by the Department expires three years after the existing vehicle for hire company permit expires.
- D. The holder of an expired vehicle for hire company permit may apply to the Department for a new vehicle for hire company permit using the renewal application procedure provided under R17-5-1005(A).

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1006. Vehicle for Hire Company Permit or Renewal - General Provisions

A vehicle for hire company permit issued by the Department shall include an assigned number that remains effective until either withdrawn by the Department or until the permit expires.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1007. Vehicle for Hire Company; Record Review; Inspection

- A. The Department, after providing reasonable notice to a company with a vehicle for hire company permit, may review, with or without cause, all records of a vehicle for hire company as prescribed in A.R.S. § 28-9507, at intervals determined by the Department.
- B. A vehicle for hire company shall make all records described under subsection (A) available to the Department for review at an Arizona location.
- C. The Department shall conduct a record review during the vehicle for hire company's normal business hours.
- D. The Department may conduct a periodic, random inspection of a taxi meter and any vehicle for hire, or in response to a complaint by the public. An inspection may include an inspection of the taxi meter in a taxi and the signage required by A.R.S. § 28-9506.
- E. After the inspection, the Department shall provide a copy of the inspection report to the vehicle for hire company or the designated point of contact. The report shall include any deficiencies or violations indicated during the inspection.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1008. Posting of Fares

- A. When a livery vehicle provides local transportation at fares that are established in a contract with a government agency, the livery vehicle interior signage shall indicate that fares are determined by contract with a government agency when providing those services.
- B. When a livery vehicle provides local transportation services at fares that are not established in a contract with a government agency, the livery vehicle interior signage shall post fares in accordance with A.R.S. § 28-9506(A)(2).

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

R17-5-1009. Appealable Agency Actions; Rehearing; Judicial Review

- A. A.R.S. Title 41, Chapter 6, Article 10 applies to all contested cases and all appealable agency actions of the Department under A.R.S. Title 28, Chapter 30, Article 2.
- B. A vehicle for hire company whose permit, renewal, or authority is denied has a right to a hearing, an opportunity for rehearing under A.R.S. Title 41, Chapter 6, Articles 6 and 10, and if the denial is upheld, judicial review under A.R.S. Title 12, Chapter 7, Article 6.

Historical Note

New Section made by final rulemaking at 23 A.A.R. 223, effective March 6, 2017 (Supp. 17-1).

Supplement Separator Page

Supplement to the
Arizona Administrative Code
The official compilation of Arizona Rules
Replacement Check List

For rules filed in the third quarter between
July 1 - September 30
2017

Within the stated calendar quarter, this Title contains all rules made, amended, repealed, renumbered, and recodified; or rules that have expired or were terminated due to an agency being eliminated under sunset law. These rules were either certified by the Governor's Regulatory Review Council or the Attorney General's Office; or exempt from the rulemaking process, and filed with the Office of the Secretary of State. Refer to the historical notes for more information. Please note that some rules you are about to remove may still be in effect after the publication date of this Supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

TITLE 18. Environmental Quality
Chapter 02. Department of Environmental Quality - Air Pollution Control

PUBLISHER
Arizona Department of State
Office of the Secretary of State, Administrative Rules Division

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the Administrative Code. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION
September 30, 2017

RULES

A.R.S. § 41-1001(17) states: “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The Arizona Administrative Code is where the official rules of the state of Arizona are published. The Code is the official codification of rules that govern state agencies, boards, and commissions. Virtually everything in your life is affected in some way by rules published in the Arizona Administrative Code, from the quality of air you breathe to the licensing of your dentist. This chapter is one of more than 230 in the Code compiled in 21 Titles.

ADMINISTRATIVE CODE SUPPLEMENTS

Rules filed by an agency to be published in the Administrative Code are updated quarterly. Supplement release dates are printed on the footers of each chapter:

First Quarter: January 1 - March 31
Second Quarter: April 1 - June 30
Third Quarter: July 1 - September 30
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2017 is cited as Supp. 17-1.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the Arizona Administrative Register for recent updates to rule Sections.

ARTICLES AND SECTIONS

Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering system separated into subsections.

HISTORICAL NOTES AND EFFECTIVE DATES

Historical notes inform the user when the last time a Section was updated in the Administrative Code. Be aware, since the Office publishes each quarter by entire chapters, not all Sections are updated by an agency in a supplement release. Many times just one Section or a few Sections may be updated in the entire chapter.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in the introduction of a chapter can be found at the Secretary of State’s website, www.azsos.gov/services/legislative-filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the Arizona Administrative Register online at www.azsos.gov/rules, click on the Administrative Register link.

In the Administrative Code the Office includes editor’s notes at the beginning of a chapter indicating that certain rulemaking Sections were made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

If you are researching rules and come across rescinded chapters on a different paper color, this is because the agency filed a Notice of Exempt Rulemaking. At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Public Services managing rules editor, Rhonda Paschal, assisted with the editing of this chapter.

TITLE 18. ENVIRONMENTAL QUALITY**CHAPTER 2. DEPARTMENT OF ENVIRONMENTAL QUALITY - AIR POLLUTION CONTROL****ARTICLE 1. GENERAL**

Article 1 consisting of Section R9-3-101 renumbered as Article 1, Section R18-2-101 (Supp. 87-3).

Section

R18-2-101.	Definitions	7
R18-2-102.	Incorporated Materials	20
R18-2-103.	Applicable Implementation Plan; Savings	20

ARTICLE 2. AMBIENT AIR QUALITY STANDARDS; AREA DESIGNATIONS; CLASSIFICATIONS

Article 2, consisting of Sections R18-2-201 through R18-2-290, adopted effective August 8, 1991 (Supp. 91-3).

Article 2, consisting of Sections R18-2-201 through R18-2-220, repealed effective August 8, 1991 (Supp. 91-3).

Article 2 consisting of Sections R9-3-201, R9-3-202, R9-3-204 through R9-3-207, and R9-3-215 through R9-3-219 renumbered as Article 2, Sections R18-2-201, R18-2-202, R18-2-204 through R18-2-207, and R18-2-215 through R18-2-219 (Supp. 87-3).

Section

R18-2-201.	Particulate Matter: PM ₁₀ and PM _{2.5}	20
R18-2-202.	Sulfur Oxides (Sulfur Dioxide)	21
R18-2-203.	Ozone	21
R18-2-204.	Carbon monoxide	22
R18-2-205.	Nitrogen Oxides (Nitrogen Dioxide)	22
R18-2-206.	Lead	22
R18-2-207.	Renumbered	22

ARTICLE 1. GENERAL**R18-2-101. Definitions**

The following definitions apply to this Chapter. Where the same term is defined in this Section and in the definitions Section for an Article of this Chapter, the Article-specific definition shall apply.

1. “Act” means the Clean Air Act of 1963 (P.L. 88-206; 42 U.S.C. 7401 through 7671q) as amended through December 31, 2011 (and no future editions).
2. “Actual emissions” means the actual rate of emissions of a regulated NSR pollutant from an emissions unit, as determined in subsections (2)(a) through (e), except that this definition shall not apply for calculating whether a significant emissions increase as defined in R18-2-401 has occurred, or for establishing a plantwide applicability limitation as defined in R18-2-401. Instead, the definitions of projected actual emissions and baseline actual emissions in R18-2-401 shall apply for those purposes.
 - a. In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a consecutive 24-month period that precedes the particular date and that is representative of normal source operation. The Director may allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit’s actual operating hours, production rates, and types of materials processed, stored or combusted during the selected time period.
 - b. The Director may presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.
 - c. For any emissions unit that is or will be located at a source with a Class I permit and has not begun normal operations on the particular date, actual emissions shall equal the unit’s potential to emit on that date.
 - d. For any emissions unit that is or will be located at a source with a Class II permit and has not begun normal operations on the particular date, actual emissions shall be based on applicable control equipment requirements and projected conditions of operation.
 - e. This definition shall not apply for calculating whether a significant emissions increase has occurred, or for establishing a PAL. Instead, the definitions of projected actual emissions and baseline actual emissions in R18-2-401 shall apply for those purposes.
3. “Administrator” means the Administrator of the United States Environmental Protection Agency.
4. “Affected facility” means, with reference to a stationary source, any apparatus to which a standard is applicable.
5. “Affected source” means a source that includes one or more units which are subject to emission reduction requirements or limitations under Title IV of the Act.
6. “Affected state” means any state whose air quality may be affected by a source applying for a permit, permit revision, or permit renewal and that is contiguous to Arizona or that is within 50 miles of the permitted source.
7. “Afterburner” means an incinerator installed in the secondary combustion chamber or stack for the purpose of incinerating smoke, fumes, gases, unburned carbon, and other combustible material not consumed during primary combustion.
8. “Air contaminants” means smoke, vapors, charred paper, dust, soot, grime, carbon, fumes, gases, sulfuric acid mist aerosols, aerosol droplets, odors, particulate matter, wind-borne matter, radioactive materials, or noxious chemicals, or any other material in the outdoor atmosphere.
9. “Air curtain destructor” means an incineration device designed and used to secure, by means of a fan-generated air curtain, controlled combustion of only wood waste and slash materials in an earthen trench or refractory-lined pit or bin.
10. “Air pollution” means the presence in the outdoor atmosphere of one or more air contaminants or combinations thereof in sufficient quantities, which either alone or in connection with other substances by reason of their concentration and duration are or tend to be injurious to human, plant or animal life, or cause damage to property, or unreasonably interfere with the comfortable enjoyment of life or property of a substantial part of a community, or obscure visibility, or which in any way degrade the quality of the ambient air below the standards established by the director. A.R.S. § 49-421(2).
11. “Air pollution control equipment” means equipment used to eliminate, reduce or control the emission of air pollutants into the ambient air.
12. “Air quality control region” (AQCR) means an area so designated by the Administrator pursuant to Section 107 of the Act and includes the following regions in Arizona:
 - a. Maricopa Intrastate Air Quality Control Region which is comprised of the County of Maricopa.
 - b. Pima Intrastate Air Quality Control Region which is comprised of the County of Pima.
 - c. Northern Arizona Intrastate Air Quality Control Region which encompasses the counties of Apache, Coconino, Navajo, and Yavapai.
 - d. Mohave-Yuma Intrastate Air Quality Control Region which encompasses the counties of La Paz, Mohave, and Yuma.
 - e. Central Arizona Intrastate Air Quality Control Region which encompasses the counties of Gila and Pinal.
 - f. Southeast Arizona Intrastate Air Quality Control Region which encompasses the counties of Cochise, Graham, Greenlee, and Santa Cruz.
13. “Allowable emissions” means the emission rate of a stationary source calculated using both the maximum rated capacity of the source, unless the source is subject to federally enforceable limits which restrict the operating rate or hours of operation, and the most stringent of the following:
 - a. The applicable standards as set forth in 40 CFR 60, 61 and 63;
 - b. The applicable emissions limitations approved into the state implementation plan, including those with a future compliance date; or,
 - c. The emissions rate specified as a federally enforceable permit condition, including those with a future compliance date.
14. “Ambient air” means that portion of the atmosphere, external to buildings, to which the general public has access.
15. “Applicable implementation plan” means those provisions of the state implementation plan approved by the Administrator or a federal implementation plan promulgated for Arizona or any portion of Arizona in accordance with Title I of the Act.
16. “Applicable requirement” means any of the following:
 - a. Any federal applicable requirement.

- b. Any other requirement established pursuant to this Chapter or A.R.S. Title 49, Chapter 3.
- 17. "Arizona Testing Manual" means sections 1 and 7 of the Arizona Testing Manual for Air Pollutant Emissions amended as of March 1992 (and no future editions).
- 18. "ASTM" means the American Society for Testing and Materials.
- 19. "Attainment area" means any area that has been identified in regulations promulgated by the Administrator as being in compliance with national ambient air quality standards.
- 20. "Begin actual construction" means, initiation of physical on-site construction activities on an emissions unit which are of a permanent nature. With respect to a change in method of operation this term refers to those onsite activities, other than preparatory activities, which mark the initiation of the change.
 - a. For purposes of title I, parts C and D and section 112 of the clean air act, and for purposes of applicants that require permits containing limits designed to avoid the application of title I, parts C and D and section 112 of the clean air act, these activities include installation of building supports and foundations, laying of underground pipework, and construction of permanent storage structures but do not include any of the following, subject to subsection (20)(c):
 - i. Clearing and grading, including demolition and removal of existing structures and equipment, stripping and stockpiling of topsoil.
 - ii. Installation of access roads, driveways and parking lots.
 - iii. Installation of ancillary structures, including fences, office buildings and temporary storage structures, that are not a necessary component of an emissions unit or associated air pollution control equipment for which the permit is required.
 - iv. Ordering and onsite storage of materials and equipment.
 - b. For purposes other than those identified in subsection (20)(a), these activities do not include any of the following, subject to subsection (20)(c):
 - i. Clearing and grading, including demolition and removal of existing structures and equipment, stripping and stockpiling of topsoil and earthwork cut and fill for foundations.
 - ii. Installation of access roads, parking lots, driveways and storage areas.
 - iii. Installation of ancillary structures, including fences, warehouses, storerooms and office buildings, provided none of these structures impacts the design of any emissions unit or associated air pollution control equipment.
 - iv. Ordering and onsite storage of materials and equipment.
 - v. Installation of underground pipework, including water, sewer, electric and telecommunications utilities.
 - vi. Installation of building and equipment supports, including concrete forms, footers, pilings, foundations, pads and platforms, provided none of these supports impacts the design of any emissions unit or associated air pollution control equipment.
- c. *An applicant's performance of any activities that are excluded from the definition of "begin actual construction" under subsection (20)(a) or (b) shall be at the applicant's risk and shall not reduce the applicant's obligations under this Chapter. The director shall evaluate an application for a permit or permit revision and make a decision on the same basis as if the activities allowed under subsection (20)(a) or (b) had not occurred.* A.R.S. § 49-401.01(7).
- 21. "Best available control technology" (BACT) means an emission limitation, including a visible emissions standard, based on the maximum degree of reduction for each regulated NSR pollutant which would be emitted from any proposed major source or major modification, taking into account energy, environmental, and economic impact and other costs, determined by the Director in accordance with R18-2-406(A)(4) to be achievable for such source or modification.
- 22. "Btu" means British thermal unit, which is the quantity of heat required to raise the temperature of one pound of water 1°F.
- 23. "Categorical sources" means the following classes of sources:
 - a. Coal cleaning plants with thermal dryers;
 - b. Kraft pulp mills;
 - c. Portland cement plants;
 - d. Primary zinc smelters;
 - e. Iron and steel mills;
 - f. Primary aluminum ore reduction plants;
 - g. Primary copper smelters;
 - h. Municipal incinerators capable of charging more than 250 tons of refuse per day;
 - i. Hydrofluoric, sulfuric, or nitric acid plants;
 - j. Petroleum refineries;
 - k. Lime plants;
 - l. Phosphate rock processing plants;
 - m. Coke oven batteries;
 - n. Sulfur recovery plants;
 - o. Carbon black plants using the furnace process;
 - p. Primary lead smelters;
 - q. Fuel conversion plants;
 - r. Sintering plants;
 - s. Secondary metal production plants;
 - t. Chemical process plants, which shall not include ethanol production facilities that produce ethanol by natural fermentation included in North American Industry Classification System codes 325193 or 312140;
 - u. Fossil-fuel boilers, combinations thereof, totaling more than 250 million Btus per hour heat input;
 - v. Petroleum storage and transfer units with a total storage capacity more than 300,000 barrels;
 - w. Taconite ore processing plants;
 - x. Glass fiber processing plants;
 - y. Charcoal production plants;
 - z. Fossil-fuel-fired steam electric plants and combined cycle gas turbines of more than 250 million Btus per hour heat input.
- 24. "Categorically exempt activities" means any of the following:
 - a. Any combination of diesel-, natural gas- or gasoline-fired engines with cumulative power equal to or less than 145 horsepower.
 - b. Natural gas-fired engines with cumulative power equal to or less than 155 horsepower.

Department of Environmental Quality – Air Pollution Control

- c. Gasoline-fired engines with cumulative power equal to or less than 200 horsepower.
 - d. Any of the following emergency or stand-by engines used for less than 500 hours in each calendar year, provided the permittee keeps records documenting the hours of operation of the engines:
 - i. Any combination of diesel-, natural gas- or gasoline-fired emergency engines with cumulative power equal to or less than 2,500 horsepower.
 - ii. Natural gas-fired emergency engines with cumulative power equal to or less than 2,700 horsepower.
 - iii. Gasoline-fired emergency engines with cumulative power equal to or less than 3,700 horsepower.
 - e. Any combination of boilers with a cumulative maximum design heat input capacity of less than 10 million Btu/hr.
25. “CFR” means the Code of Federal Regulations, amended as of July 1, 2011, (and no future editions), with standard references in this Chapter by Title and Part, so that “40 CFR 51” means Title 40 of the Code of Federal Regulations, Part 51.
 26. “Charge” means the addition of metal bearing materials, scrap, or fluxes to a furnace, converter or refining vessel.
 27. “Clean coal technology” means any technology, including technologies applied at the precombustion, combustion, or post-combustion stage, at a new or existing facility that will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam, that was not in widespread use as of November 15, 1990.
 28. “Clean coal technology demonstration project” means a project using funds appropriated under the heading “Department of Energy - Clean Coal Technology,” up to a total amount of \$2,500,000,000 for commercial demonstration of clean coal technology or similar projects funded through appropriations for the Environmental Protection Agency. The federal contribution for a qualifying project shall be at least 20% of the total cost of the demonstration project.
 29. “Coal” means all solid fossil fuels classified as anthracite, bituminous, subbituminous, or lignite by ASTM D-388-91, (Classification of Coals by Rank).
 30. “Combustion” means the burning of matter.
 31. “Commence” means, as applied to construction of a source, or a major modification as defined in Article 4 of this Chapter, that the owner or operator has all necessary preconstruction approvals or permits and either has:
 - a. Begun, or caused to begin, a continuous program of actual onsite construction of the source, to be completed within a reasonable time; or
 - b. Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.
 32. “Construction” means any physical change or change in the method of operation, including fabrication, erection, installation, demolition, or modification of an emissions unit, which would result in a change in emissions.
 33. “Continuous monitoring system” means a CEMS, CERMS, or CPMS.
 34. “Continuous emissions monitoring system” or “CEMS” means the total equipment, required under the emission monitoring provisions in this Chapter, used to sample, condition (if applicable), analyze, and provide, on a continuous basis, a permanent record of emissions.
 35. “Continuous emissions rate monitoring system” or “CERMS” means the total equipment required for the determination and recording of the pollutant mass emissions rate (in terms of mass per unit of time).
 36. “Continuous parameter monitoring system” or “CPMS” means the total equipment, required under the emission monitoring provisions in this Chapter, to monitor process or control device operational parameters (for example, control device secondary voltages and electric currents) or other information (for example, gas flow rate, O₂ or CO₂ concentrations) and to provide, on a continuous basis, a permanent record of monitored values.
 37. “Controlled atmosphere incinerator” means one or more refractory-lined chambers in which complete combustion is promoted by recirculation of gases by mechanical means.
 38. “Conventional air pollutant” means any pollutant for which the Administrator has promulgated a primary or secondary national ambient air quality standard. A.R.S. § 49-401.01(12).
 39. “Department” means the Department of Environmental Quality. A.R.S. § 49-101(2)
 40. “Director” means the director of environmental quality who is also the director of the department. A.R.S. § 49-101(3)
 41. “Discharge” means the release or escape of an effluent from a source into the atmosphere.
 42. “Dust” means finely divided solid particulate matter occurring naturally or created by mechanical processing, handling or storage of materials in the solid state.
 43. “Dust suppressant” means a chemical compound or mixture of chemical compounds added with or without water to a dust source for purposes of preventing air entrainment.
 44. “Effluent” means any air contaminant which is emitted and subsequently escapes into the atmosphere.
 45. “Electric utility steam generating unit” means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than 25 MW electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.
 46. “Emission” means an air contaminant or gas stream, or the act of discharging an air contaminant or a gas stream, visible or invisible.
 47. “Emission standard” or “emission limitation” means a requirement established by the state, a local government, or the Administrator which limits the quantity, rate, or concentration of emissions of air pollutants on a continuous basis, including any requirements which limit the level of opacity, prescribe equipment, set fuel specifications, or prescribe operation or maintenance procedures for a source to assure continuous emission reduction.
 48. “Emissions unit” means any part of a stationary source which emits or would have the potential to emit any regulated air pollutant and includes an electric steam generating unit.
 49. “Equivalent method” means any method of sampling and analyzing for an air pollutant which has been demon-

- strated under R18-2-311(D) to have a consistent and quantitatively known relationship to the reference method, under specified conditions.
50. “Excess emissions” means emissions of an air pollutant in excess of an emission standard as measured by the compliance test method applicable to such emission standard.
51. “Federal applicable requirement” means any of the following (including requirements that have been promulgated or approved by EPA through rulemaking at the time of issuance but have future effective compliance dates):
- Any standard or other requirement provided for in the applicable implementation plan approved or promulgated by EPA through rulemaking under Title I of the Act that implements the relevant requirements of the Act, including any revisions to that plan promulgated in 40 CFR 52.
 - Any term or condition of any preconstruction permits issued pursuant to regulations approved or promulgated through rulemaking under Title I, including parts C or D, of the Act.
 - Any standard or other requirement under section 111 of the Act, including 111(d).
 - Any standard or other requirement under section 112 of the Act, including any requirement concerning accident prevention under section 112(r)(7) of the Act.
 - Any standard or other requirement of the acid rain program under Title IV of the Act or the regulations promulgated thereunder and incorporated pursuant to R18-2-333.
 - Any requirements established pursuant to section 504(b) or section 114(a)(3) of the Act.
 - Any standard or other requirement governing solid waste incineration, under section 129 of the Act.
 - Any standard or other requirement for consumer and commercial products, under section 183(e) of the Act.
 - Any standard or other requirement for tank vessels under section 183(f) of the Act.
 - Any standard or other requirement of the program to control air pollution from outer continental shelf sources, under section 328 of the Act.
 - Any standard or other requirement of the regulations promulgated to protect stratospheric ozone under Title VI of the Act, unless the Administrator has determined that such requirements need not be contained in a Title V permit.
 - Any national ambient air quality standard or maximum increase allowed under R18-2-218 or visibility requirement under Part C of Title I of the Act, but only as it would apply to temporary sources permitted pursuant to section 504(e) of the Act.
52. “Federal Land Manager” means, with respect to any lands in the United States, the secretary of the department with authority over such lands.
53. “Federally enforceable” means all limitations and conditions which are enforceable by the Administrator under the Act, including all of the following:
- The requirements of the new source performance standards and national emission standards for hazardous air pollutants.
 - The requirements of such other state or county rules or regulations approved by the Administrator, including the requirements of state and county operating and new source review permit and registration programs that have been approved by the Administrator. Notwithstanding this subsection, the condition of any permit or registration designated as being enforceable only by the state is not federally enforceable.
- The requirements of any applicable implementation plan.
 - Emissions limitations, controls, and other requirements, and any associated monitoring, recordkeeping, and reporting requirements that are included in a permit pursuant to R18-2-306.01 or R18-2-306.02.
54. “Federally listed hazardous air pollutant” means a pollutant listed pursuant to R18-2-1701(9).
55. “Final permit” means the version of a permit issued by the Department after completion of all review required by this Chapter.
56. “Fixed capital cost” means the capital needed to provide all the depreciable components.
57. “Fuel” means any material which is burned for the purpose of producing energy.
58. “Fuel burning equipment” means any machine, equipment, incinerator, device or other article, except stationary rotating machinery, in which combustion takes place.
59. “Fugitive emissions” means those emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.
60. “Fume” means solid particulate matter resulting from the condensation and subsequent solidification of vapors of melted solid materials.
61. “Fume incinerator” means a device similar to an afterburner installed for the purpose of incinerating fumes, gases and other finely divided combustible particulate matter not previously burned.
62. “Good engineering practice (GEP) stack height” means a stack height meeting the requirements described in R18-2-332.
63. “Hazardous air pollutant” means any federally listed hazardous air pollutant.
64. “Heat input” means the quantity of heat in terms of Btus generated by fuels fed into the fuel burning equipment under conditions of complete combustion.
65. “Incinerator” means any equipment, machine, device, contrivance or other article, and all appurtenances thereof, used for the combustion of refuse, salvage materials or any other combustible material except fossil fuels, for the purpose of reducing the volume of material.
66. “Indian governing body” means the governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of self-government.
67. “Indian reservation” means any federally recognized reservation established by Treaty, Agreement, Executive Order, or Act of Congress.
68. “Insignificant activity” means any of the following activities:
- Liquid Storage and Piping
 - Petroleum product storage tanks containing the following substances, provided the applicant lists and identifies the contents of each tank with a volume of 350 gallons or more and provides threshold values for throughput or capacity or both for each such tank: diesel fuels and fuel oil in storage tanks with capacity of 40,000 gallons or less, lubricating oil, transformer oil, and used oil.

Department of Environmental Quality – Air Pollution Control

- ii. Gasoline storage tanks with capacity of 10,000 gallons or less.
 - iii. Storage and piping of natural gas, butane, propane, or liquified petroleum gas, provided the applicant lists and identifies the contents of each stationary storage vessel with a volume of 350 gallons or more and provides threshold values for throughput or capacity or both for each such vessel.
 - iv. Piping of fuel oils, used oil and transformer oil, provided the applicant includes a system description.
 - v. Storage and handling of drums or other transportable containers where the containers are sealed during storage, and covered during loading and unloading, including containers of waste and used oil regulated under the federal Resource Conservation and Recovery Act, 42 U.S.C. 6901-6992(k). Permit applicants must provide a description of material in the containers and the approximate amount stored.
 - vi. Storage tanks of any size containing exclusively soaps, detergents, waxes, greases, aqueous salt solutions, aqueous solutions of acids that are not regulated air pollutants, or aqueous caustic solutions, provided the permit applicant specifies the contents of each storage tank with a volume of 350 gallons or more.
 - vii. Electrical transformer oil pumping, cleaning, filtering, drying and the re-installation of oil back into transformers.
 - b. Internal combustion engine-driven compressors, internal combustion engine-driven electrical generator sets, and internal combustion engine-driven water pumps used for less than 500 hours per calendar year for emergency replacement or standby service, provided the permittee keeps records documenting the hours of operation of this equipment.
 - c. Low Emitting Processes
 - i. Batch mixers with rated capacity of 5 cubic feet or less.
 - ii. Wet sand and gravel production facilities that obtain material from subterranean and subaqueous beds, whose production rate is 200 tons/hour or less, and whose permanent in-plant roads are paved and cleaned to control dust. This does not include activities in emissions units which are used to crush or grind any non-metallic minerals.
 - iii. Powder coating operations.
 - iv. Equipment using water, water and soap or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing.
 - v. Blast-cleaning equipment using a suspension of abrasive in water and any exhaust system or collector serving them exclusively.
 - vi. Plastic pipe welding.
 - d. Site Maintenance
 - i. Housekeeping activities and associated products used for cleaning purposes, including collecting spilled and accumulated materials at the source, including operation of fixed vacuum cleaning systems specifically for such purposes.
 - ii. Sanding of streets and roads to abate traffic hazards caused by ice and snow.
 - iii. Street and parking lot striping.
 - iv. Architectural painting and associated surface preparation for maintenance purposes at industrial or commercial facilities.
 - e. Sampling and Testing
 - i. Noncommercial (in-house) experimental, analytical laboratory equipment which is bench scale in nature, including quality control/quality assurance laboratories supporting a stationary source and research and development laboratories.
 - ii. Individual sampling points, analyzers, and process instrumentation, whose operation may result in emissions but that are not regulated as emission units.
 - f. Ancillary Non-Industrial Activities
 - i. General office activities, such as paper shredding, copying, photographic activities, and blueprinting, but not to include incineration.
 - ii. Use of consumer products, including hazardous substances as that term is defined in the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) where the product is used at a source in the same manner as normal consumer use.
 - iii. Activities directly used in the diagnosis and treatment of disease, injury or other medical condition.
 - g. Miscellaneous Activities
 - i. Installation and operation of potable, process and waste water observation wells, including drilling, pumping, filtering apparatus.
 - ii. Transformer vents.
69. "Kraft pulp mill" means any stationary source which produces pulp from wood by cooking or digesting wood chips in a water solution of sodium hydroxide and sodium sulfide at high temperature and pressure. Regeneration of the cooking chemicals through a recovery process is also considered part of the kraft pulp mill.
70. "Lead" means elemental lead or alloys in which the predominant component is lead.
71. "Lime hydrator" means a unit used to produce hydrated lime product.
72. "Lime plant" includes any plant which produces a lime product from limestone by calcination. Hydration of the lime product is also considered to be part of the source.
73. "Lime product" means any product produced by the calcination of limestone.
74. "Major modification" is defined as follows:
- a. A major modification is any physical change in or change in the method of operation of a major source that would result in both a significant emissions increase of any regulated NSR pollutant and a significant net emissions increase of that pollutant from the stationary source.
 - b. Any emissions increase or net emissions increase that is significant for nitrogen oxides or volatile organic compounds is significant for ozone.
 - c. For the purposes of this definition, none of the following is a physical change or change in the method of operation:
 - i. Routine maintenance, repair, and replacement;
 - ii. Use of an alternative fuel or raw material by reason of an order under sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act.

- dination Act of 1974, 15 U.S.C. 792, or by reason of a natural gas curtailment plan under the Federal Power Act, 16 U.S.C. 792 - 825r;
- iii. Use of an alternative fuel by reason of an order or rule under section 125 of the Act;
 - iv. Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;
 - v. For purposes of determining the applicability of R18-2-403 through R18-2-405 or R18-2-411, any of the following:
 - (1) Use of an alternative fuel or raw material by a stationary source that the source was capable of accommodating before December 21, 1976, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976 under 40 CFR 52.21 or under Articles 3 or 4 of this Chapter; or
 - (2) Use of an alternative fuel or raw material by a stationary source that the source is approved to use under any permit issued under R18-2-403;
 - (3) An increase in the hours of operation or in the production rate, unless the change would be prohibited under any federally enforceable permit condition established after December 21, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
 - vi. For purposes of determining the applicability of R18-2-406 through R18-2-408 or R18-2-410, any of the following:
 - (1) Use of an alternative fuel or raw material by a stationary source that the source was capable of accommodating before January 6, 1975, unless the change would be prohibited under any federally enforceable permit condition established after January 6, 1975 under 40 CFR 52.21 or under Articles 3 or 4 of this Chapter;
 - (2) Use of an alternative fuel or raw material by a stationary source that the source is approved to use under any permit issued under 40 CFR 52.21, or under R18-2-406; or
 - (3) An increase in the hours of operation or in the production rate, unless the change would be prohibited under any federally enforceable permit condition established after January 6, 1975, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
 - vii. Any change in ownership at a stationary source;
 - viii. [Reserved.]
 - ix. The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, if the project complies with:
 - (1) The SIP, and
 - (2) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated;
 - x. For electric utility steam generating units located in attainment and unclassifiable areas only, the installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, if the project does not result in an increase in the potential to emit any regulated pollutant emitted by the unit. This exemption applies on a pollutant-by-pollutant basis; and
 - xi. For electric utility steam generating units located in attainment and unclassifiable areas only, the reactivation of a very clean coal-fired electric utility steam generating unit.
 - d. This definition shall not apply with respect to a particular regulated NSR pollutant when the major source is complying with the requirements of R18-2-412 for a PAL for that regulated NSR pollutant. Instead, the definition of PAL major modification in R18-2-401(20) shall apply.
75. "Major source" means:
- a. A major source as defined in R18-2-401.
 - b. A major source under section 112 of the Act:
 - i. For pollutants other than radionuclides, any stationary source that emits or has the potential to emit, in the aggregate, including fugitive emission 10 tons per year (tpy) or more of any hazardous air pollutant which has been listed pursuant to section 112(b) of the Act, 25 tpy or more of any combination of such hazardous air pollutants, or such lesser quantity as described in Article 11 of this Chapter. Notwithstanding the preceding sentence, emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor or pump station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control, to determine whether such units or stations are major sources; or
 - ii. For radionuclides, "major source" shall have the meaning specified by the Administrator by rule.
 - c. A major stationary source, as defined in section 302 of the Act, that directly emits or has the potential to emit, 100 tpy or more of any air pollutant including any major source of fugitive emissions of any such pollutant. The fugitive emissions of a stationary source shall not be considered in determining whether it is a major stationary source for the purposes of section 302(j) of the Act, unless the source belongs to a section 302(j) category.
76. "Malfunction" means any sudden and unavoidable failure of air pollution control equipment, process equipment or a process to operate in a normal and usual manner, but does not include failures that are caused by poor maintenance, careless operation or any other upset condition or equipment breakdown which could have been prevented by the exercise of reasonable care.
77. "Minor source" means a source of air pollution which is not a major source for the purposes of Article 4 of this Chapter and over which the Director, acting pursuant to A.R.S. § 49-402(B), has asserted jurisdiction.
78. "Minor source baseline area" means the air quality control region in which the source is located.

79. “Mobile source” means any combustion engine, device, machine or equipment that operates during transport and that emits or generates air contaminants whether in motion or at rest. A.R.S. § 49-401.01(23).
80. “Modification” or “modify” means a physical change in or change in the method of operation of a source that increases the emissions of any regulated air pollutant emitted by such source by more than any relevant de minimis amount or that results in the emission of any regulated air pollutant not previously emitted by more than such de minimis amount. An increase in emissions at a minor source shall be determined by comparing the source’s potential to emit before and after the modification. The following exemptions apply:
- A physical or operational change does not include routine maintenance, repair or replacement.
 - An increase in the hours of operation or if the production rate is not considered an operational change unless such increase is prohibited under any permit condition that is legally and practically enforceable by the department.
 - A change in ownership at a source is not considered a modification. A.R.S. § 49-401.01(24).
81. “Monitoring device” means the total equipment, required under the applicable provisions of this Chapter, used to measure and record, if applicable, process parameters.
82. “Motor vehicle” means any self-propelled vehicle designed for transporting persons or property on public highways.
83. “Multiple chamber incinerator” means three or more refractory-lined combustion chambers in series, physically separated by refractory walls and interconnected by gas passage ports or ducts.
84. “Natural conditions” includes naturally occurring phenomena that reduce visibility as measured in terms of light extinction, visual range, contrast, or coloration.
85. “National ambient air quality standard” means the ambient air pollutant concentration limits established by the Administrator pursuant to section 109 of the Act. A.R.S. § 49-401.01(25).
86. “National emission standards for hazardous air pollutants” or “NESHAP” means standards adopted by the Administrator under section 112 of the Act.
87. “Necessary preconstruction approvals or permits” means those permits or approvals required under the Act and those air quality control laws and rules which are part of the SIP.
88. “Net emissions increase” means:
- The amount by which the sum of subsections (88)(a)(i) and (ii) exceeds zero:
 - The increase in emissions of a regulated NSR pollutant from a particular physical change or change in the method of operation at a stationary source as calculated pursuant to R18-2-402(D); and
 - Any other increases and decreases in actual emissions of the regulated NSR pollutant at the source that are contemporaneous with the particular change and are otherwise creditable.
 - For purposes of calculating increases and decreases in actual emissions under subsection (88)(a)(ii), baseline actual emissions shall be determined as provided in the definition of baseline actual emissions in R18-2-401(2), except that R18-2-401(2)(a)(iii) and (b)(iv) shall not apply.
 - An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between:
 - The date five years before a complete application for a permit or permit revision authorizing the particular change is submitted or actual construction of the particular change begins, whichever occurs earlier, and
 - The date that the increase from the particular change occurs.
 - For purposes of determining the applicability of R18-2-403 through R18-2-405 or R18-2-411, an increase or decrease in actual emissions is creditable only if the Director has not relied on it in issuing a permit or permit revision under R18-2-403, which permit is in effect when the increase in actual emissions from the particular change occurs. For purposes of determining the applicability of R18-2-406 through R18-2-408 or R18-2-410, an increase or decrease in actual emissions is creditable only if the Director has not relied on it in issuing a permit under R18-2-406, which permit is in effect when the increase in actual emissions from the particular change occurs.
 - An increase or decrease in actual emissions of sulfur dioxide, nitrogen oxides, PM₁₀, or PM_{2.5} which occurs before the applicable minor source baseline date, as defined in R18-2-218, is creditable only if it is required to be considered in calculating the amount of maximum allowable increases remaining available.
 - An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level.
 - A decrease in actual emissions is creditable only to the extent that it satisfies all of the following conditions:
 - The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions.
 - It is enforceable as a practical matter at and after the time that actual construction on the particular change begins.
 - It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change.
 - The emissions unit was actually operated and emitted the specific pollutant.
 - For purposes of determining the applicability of R18-2-403 through R18-2-405 or R18-2-411, the Director has not relied on it in issuing any permit, permit revision, or registration under Article 4, R18-2-302.01, or R18-2-334, and the state has not relied on it in demonstrating attainment or reasonable further progress.
 - An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit, as defined in R18-2-401(24), that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed 180 days.
 - Subsection (2)(a) shall not apply for determining creditable increases and decreases.

Department of Environmental Quality – Air Pollution Control

89. “New source” means any stationary source of air pollution which is subject to a new source performance standard.
90. “New source performance standards” or “NSPS” means standards adopted by the Administrator under section 111(b) of the Act.
91. “Nitric acid plant” means any facility producing nitric acid 30% to 70% in strength by either the pressure or atmospheric pressure process.
92. “Nitrogen oxides” means all oxides of nitrogen except nitrous oxide, as measured by test methods set forth in the Appendices to 40 CFR 60.
93. “Nonattainment area” means an area so designated by the Administrator acting pursuant to section 107 of the Act as exceeding national primary or secondary ambient air standards for a particular pollutant or pollutants.
94. “Nonpoint source” means a source of air contaminants which lacks an identifiable plume or emission point.
95. “Opacity” means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.
96. “Operation” means any physical or chemical action resulting in the change in location, form, physical properties, or chemical character of a material.
97. “Owner or operator” means any person who owns, leases, operates, controls, or supervises an affected facility or a stationary source.
98. “Particulate matter” means any airborne finely divided solid or liquid material with an aerodynamic diameter smaller than 100 micrometers.
99. “Particulate matter emissions” means all finely divided solid or liquid materials other than uncombined water, emitted to the ambient air as measured by applicable test methods and procedures described in R18-2-311.
100. “Permitting authority” means the department or a county department, agency or air pollution control district that is charged with enforcing a permit program adopted pursuant to A.R.S. § 49-480(A). A.R.S. § 49-401.01(28).
101. “Permitting exemption thresholds” for a regulated minor NSR pollutant means the following:

Regulated Air Pollutant	Emission Rate in tons per year (TPY)
PM _{2.5} (primary emissions only; levels for precursors are set below)	5
PM ₁₀	7.5
SO ₂	20
NO _x	20
VOC	20
CO	50
Pb	0.3

102. “Person” means any public or private corporation, company, partnership, firm, association or society of persons, the federal government and any of its departments or agencies, the state and any of its agencies, departments or political subdivisions, as well as a natural person.
103. “Planning agency” means an organization designated by the governor pursuant to 42 U.S.C. 7504. A.R.S. § 49-401.01(29).
104. “PM_{2.5}” means particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53.
105. “PM₁₀” means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53.
106. “PM₁₀ emissions” means finely divided solid or liquid material, with an aerodynamic diameter less than or equal to a nominal 10 micrometers emitted to the ambient air as measured by applicable test methods and procedures described in R18-2-311.
107. “Plume” means visible effluent.
108. “Pollutant” means an air contaminant the emission or ambient concentration of which is regulated pursuant to this Chapter.
109. “Portable source” means any stationary source that is capable of being operated at more than one location.
110. “Potential to emit” or “potential emission rate” means the maximum capacity of a stationary source to emit a pollutant, excluding secondary emissions, under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is legally and practically enforceable by the Department or a county under A.R.S. Title 49, Chapter 3; any rule, ordinance, order or permit adopted or issued under A.R.S. Title 49, Chapter 3 or the state implementation plan.
111. “Predictive Emissions Monitoring System” or “PEMS” means the total equipment, required under the emission monitoring provisions in this Chapter, to monitor process and control device operational parameters (for example, control device secondary voltages and electric currents) and other information (for example, gas flow rate, O₂ or CO₂ concentrations), and calculate and record the mass emissions rate (for example, lb/hr) on a continuous basis.
112. “Primary ambient air quality standards” means the ambient air quality standards which define levels of air quality necessary, with an adequate margin of safety, to protect the public health, as specified in Article 2 of this Chapter.
113. “Process” means one or more operations, including equipment and technology, used in the production of goods or services or the control of by-products or waste.
114. “Project” means a physical change in, or change in the method of operation of, an existing major source.
115. “Proposed final permit” means the version of a Class I permit or Class I permit revision that the Department proposes to issue and forwards to the Administrator for review in compliance with R18-2-307(A). A proposed final permit constitutes a final and enforceable authorization to begin actual construction of, but not to operate, a new Class I source or a modification to a Class I source.
116. “Proposed permit” means the version of a permit for which the Director offers public participation under R18-2-330 or affected state review under R18-2-307(D).
117. “Reactivation of a very clean coal-fired electric utility steam generating unit” means any physical change or change in the method of operation associated with com-

- mencing commercial operations by a coal-fired utility unit after a period of discontinued operation if the unit:
- a. Has not been in operation for the two-year period before enactment of the Clean Air Act Amendments of 1990, and the emissions from the unit continue to be carried in the Director's emissions inventory at the time of enactment;
 - b. Was equipped before shutdown with a continuous system of emissions control that achieves a removal efficiency for sulfur dioxide of no less than 85% and a removal efficiency for particulates of no less than 98%;
 - c. Is equipped with low-NO_x burners before commencement of operations following reactivation; and
 - d. Is otherwise in compliance with the Act.
118. "Reasonable further progress" means the schedule of emission reductions defined within a nonattainment area plan as being necessary to come into compliance with a national ambient air quality standard by the primary standard attainment date.
119. "Reasonably available control technology" (RACT) means devices, systems, process modifications, work practices or other apparatus or techniques that are determined by the Director to be reasonably available taking into account:
- a. The necessity of imposing the controls in order to attain and maintain a national ambient air quality standard;
 - b. The social, environmental, energy and economic impact of the controls;
 - c. Control technology in use by similar sources; and
 - d. The capital and operating costs and technical feasibility of the controls.
120. "Reclaiming machinery" means any machine, equipment device or other article used for picking up stored granular material and either depositing this material on a conveyor or reintroducing this material into the process.
121. "Reference method" means the methods of sampling and analyzing for an air pollutant as described in the Arizona Testing Manual; 40 CFR 50, Appendices A through K; 40 CFR 51, Appendix M; 40 CFR 52, Appendices D and E; 40 CFR 60, Appendices A through F; and 40 CFR 61, Appendices B and C, as incorporated by reference in 18 A.A.C. 2, Appendix 2.
122. "Regulated air pollutant" means any of the following:
- a. Any conventional air pollutant.
 - b. Nitrogen oxides and volatile organic compounds.
 - c. Any pollutant that is subject to a new source performance standard.
 - d. Any pollutant that is subject to a national emission standard for hazardous air pollutants or other requirements established under section 112 of the Act, including sections 112(g), (j), and (r), including the following:
 - i. Any pollutant subject to requirements under section 112(j) of the act. If the administrator fails to promulgate a standard by the date established pursuant to section 112(e) of the act, any pollutant for which a subject source would be major shall be considered to be regulated on the date 18 months after the applicable date established pursuant to section 112(e) of the Act; and
 - ii. Any pollutant for which the requirements of section 112(g)(2) of the Act have been met, but only with respect to the individual source subject to the section 112(g)(2) requirement.
 - e. Any Class I or II substance subject to a standard promulgated under title VI of the Act.
123. "Regulated minor NSR pollutant" means any pollutant for which a national ambient air quality standard has been promulgated and the following precursors for such pollutants:
- a. VOC and nitrogen oxides as precursors to ozone.
 - b. Nitrogen oxides and sulfur dioxide as precursors to PM_{2.5}.
124. "Regulated NSR pollutant" is defined as follows:
- a. For purposes of determining the applicability of R18-2-403 through R18-2-405 and R18-2-411, regulated NSR pollutant means any pollutant for which a national ambient air quality standard has been promulgated and any pollutant identified under this subsection as a constituent of or precursor to such pollutant, provided that such constituent or precursor pollutant may only be regulated under NSR as part of the regulation of the general pollutant. Precursors for purposes of NSR are the following:
 - i. Volatile organic compounds and nitrogen oxides are precursors to ozone in all areas.
 - ii. Sulfur dioxide is a precursor to PM_{2.5} in all areas.
 - iii. Nitrogen oxides are precursors to PM_{2.5} in all areas.
 - iv. VOC and ammonia are precursors to PM_{2.5} in PM_{2.5} nonattainment areas.
 - b. For all other purposes, regulated NSR pollutant means the pollutants identified in subsection (a) and the following:
 - i. Any pollutant that is subject to any new source performance standard except greenhouse gases as defined in 40 CFR 86.1818-12(a).
 - ii. Any Class I or II substance subject to a standard promulgated under or established by Title VI of the Act as of July 1, 2011.
 - iii. Any pollutant that is otherwise subject to regulation under the Act, except greenhouse gases as defined in 40 CFR 86.1818-12(a).
 - c. Notwithstanding subsections (124)(a) and (b), the term regulated NSR pollutant shall not include any or all hazardous air pollutants either listed in section 112 of the Act, or added to the list pursuant to section 112(b)(2) of the Act, unless the listed hazardous air pollutant is also regulated as a constituent or precursor of a general pollutant listed under section 108 of the Act.
 - d. PM_{2.5} emissions and PM₁₀ emissions shall include gaseous emissions from a source or activity which condense to form particulate matter at ambient temperatures. On and after January 1, 2011, condensable particulate matter shall be accounted for in applicability determinations and in establishing emissions limitations for PM_{2.5} and PM₁₀ in permits issued under Article 4.
125. "Repowering" means:
- a. Replacing an existing coal-fired boiler with one of the following clean coal technologies:
 - i. Atmospheric or pressurized fluidized bed combustion;
 - ii. Integrated gasification combined cycle;
 - iii. Magnetohydrodynamics;
 - iv. Direct and indirect coal-fired turbines;

- v. Integrated gasification fuel cells; or
- vi. As determined by the Administrator, in consultation with the United States Secretary of Energy, a derivative of one or more of the above technologies; and
- vii. Any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.
- b. Repowering also includes any oil, gas, or oil and gas-fired unit that has been awarded clean coal technology demonstration funding as of January 1, 1991, by the United States Department of Energy.
- c. The Director shall give expedited consideration to permit applications for any source that satisfies the requirements of this subsection (and) is granted an extension under section 409 of the Act.
126. "Run" means the net period of time during which an emission sample is collected, which may be, unless otherwise specified, either intermittent or continuous within the limits of good engineering practice.
127. "Secondary ambient air quality standards" means the ambient air quality standards which define levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant, as specified in Article 2 of this Chapter.
128. "Secondary emissions" means emissions which are specific, well defined, quantifiable, occur as a result of the construction or operation of a major source or major modification, but do not come from the major source or major modification itself, and impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions include emissions from any offsite support facility which would not otherwise be constructed or increase its emissions except as a result of the construction or operation of the major source or major modification. Secondary emissions do not include any emissions which come directly from a mobile source, such as emissions from the tailpipe of a motor vehicle, from a train, or from a vessel.
129. "Section 302(j) category" means:
- a. Any of the classes of sources listed in the definition of categorical source in subsection (23); or
- b. Any category of affected facility which, as of August 7, 1980, is being regulated under section 111 or 112 of the Act.
130. "Shutdown" means the cessation of operation of any air pollution control equipment or process equipment for any purpose, except routine phasing out of process equipment.
131. "Significant" means, in reference to a significant emissions increase, a net emissions increase, a stationary source's potential to emit or a stationary source's maximum capacity to emit with any elective limits as defined in R18-2-301(13):
- a. A rate of emissions of conventional pollutants that would equal or exceed any of the following:
- | Pollutant | Emissions Rate |
|-----------------|-------------------------|
| Carbon monoxide | 100 tons per year (tpy) |
| Nitrogen oxides | 40 tpy |
| Sulfur dioxide | 40 tpy |
- PM₁₀ 15 tpy
- PM_{2.5} 10 tpy of direct PM_{2.5} emissions; 40 tpy of sulfur dioxide emissions; 40 tpy of nitrogen oxide emissions.
- Ozone 40 tpy of VOC or nitrogen oxides
- Lead 0.6 tpy
- b. For purposes of determining the applicability of R18-2-302(B)(2) or R18-2-406, in addition to the rates specified in subsection (131)(a), a rate of emissions of non-conventional pollutants that would equal or exceed any of the following:
- | Pollutant | Emissions Rate |
|---|----------------------------|
| Particulate matter | 25 tpy |
| Fluorides | 3 tpy |
| Sulfuric acid mist | 7 tpy |
| Hydrogen sulfide (H ₂ S) | 10 tpy |
| Total reduced sulfur (including H ₂ S) | 10 tpy |
| Reduced sulfur compounds (including H ₂ S) | 10 tpy |
| Municipal waste combustor organics (measured as total tetra-through octa-chlorinated dibenzo-p-dioxins and dibenzofurans) | 3.5 x 10 ⁻⁶ tpy |
| Municipal waste combustor metals (measured as particulate matter) | 15 tpy |
| Municipal waste combustor acid gases (measured as sulfur dioxide and hydrogen chloride) | 40 tpy |
| Municipal solid waste landfill emissions (measured as nonmethane organic compounds) | 50 tpy |
| Any regulated NSR pollutant not specifically listed in this subsection (or) subsection (131)(a). | Any emission rate |
- c. In ozone nonattainment areas classified as serious or severe, the emission rate for nitrogen oxides or VOC determined under R18-2-405.
- d. In a carbon monoxide nonattainment area classified as serious, a rate of emissions that would equal or exceed 50 tons per year, if the Administrator has determined that stationary sources contribute significantly to carbon monoxide levels in that area.
- e. In PM_{2.5} nonattainment areas, 40 tons per year of VOC as a precursor of PM_{2.5}.
- f. Notwithstanding the emission rates listed in subsection (131)(a) or (b), for purposes of determining the applicability of R18-2-406, any emissions rate or

- any net emissions increase associated with a major source or major modification, which would be constructed within 10 kilometers of a Class I area and have an impact on the ambient air quality of such area equal to or greater than $1 \mu\text{g}/\text{m}^3$ (24-hour average).
132. "Significant emissions increase" means, for a regulated NSR pollutant, an increase in emissions that is significant as defined in this Section for that pollutant.
 133. "Smoke" means particulate matter resulting from incomplete combustion.
 134. "Source" means any building, structure, facility or installation that may cause or contribute to air pollution or the use of which may eliminate, reduce or control the emission of air pollution. A.R.S. § 49-401.01(23).
 135. "Stack" means any point in a source designed to emit solids, liquids, or gases into the air, including a pipe or duct but not including flares.
 136. "Stack in existence" means that the owner or operator had either:
 - a. Begun, or caused to begin, a continuous program of physical onsite construction of the stack;
 - b. Entered into binding agreements or contractual obligations, which could not be cancelled or modified without substantial loss to the owner or operator, to undertake a program of construction of the stack to be completed in a reasonable time.
 137. "Start-up" means the setting into operation of any air pollution control equipment or process equipment for any purpose except routine phasing in of process equipment.
 138. "State implementation plan" or "SIP" means the accumulated record of enforceable air pollution control measures, programs and plans adopted by the Director and submitted to and approved by the Administrator pursuant to 42 U.S.C. 7410.
 139. "Stationary rotating machinery" means any gas engine, diesel engine, gas turbine, or oil fired turbine operated from a stationary mounting and used for the production of electric power or for the direct drive of other equipment.
 140. "Stationary source" means any building, structure, facility or installation which emits or may emit any regulated NSR pollutant, any regulated air pollutant or any pollutant listed under section 112(b) of the act. "Building," "structure," "facility," or "installation" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person or persons under common control. Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" as described in the "Standard Industrial Classification Manual, 1987."
 141. "Subject to regulation" means, for any air pollutant, that the pollutant is subject to either a provision in the Act, or a nationally-applicable regulation codified by the administrator in 40 CFR chapter I, subchapter C, that requires actual control of the quantity of emissions of that pollutant, and that such a control requirement has taken effect and is operative to control, limit or restrict the quantity of emissions of that pollutant released from the regulated activity.
 142. "Sulfuric acid plant" means any facility producing sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, or acid sludge, but does not include facilities where conversion to sulfuric acid is utilized as a means of preventing emissions of sulfur dioxide or other sulfur compounds to the atmosphere.
 143. "Temporary clean coal technology demonstration project" means a clean coal technology demonstration project operated for five years or less, and that complies with the applicable implementation plan and other requirements necessary to attain and maintain the national ambient air quality standards during the project and after the project is terminated.
 144. "Temporary source" means a source which is portable, as defined in A.R.S. § 49-401.01(23) and which is not an affected source.
 145. "Total reduced sulfur" (TRS) means the sum of the sulfur compounds, primarily hydrogen sulfide, methyl mercaptan, dimethyl sulfide, and dimethyl disulfide, that are released during kraft pulping and other operations and measured by Method 16 in 40 CFR 60, Appendix A.
 146. "Trivial activities" means activities and emissions units, such as the following, that may be omitted from a permit or registration application. Certain of the following listed activities include qualifying statements intended to exclude similar activities:
 - a. Low-Emitting Combustion
 - i. Combustion emissions from propulsion of mobile sources;
 - ii. Emergency or backup electrical generators at residential locations;
 - iii. Portable electrical generators that can be moved by hand from one location to another. "Moved by hand" means capable of being moved without the assistance of any motorized or non-motorized vehicle, conveyance, or device;
 - b. Low- Or Non-Emitting Industrial Activities
 - i. Blacksmith forges;
 - ii. Hand-held or manually operated equipment used for buffing, polishing, carving, cutting, drilling, sawing, grinding, turning, routing or machining of ceramic art work, precision parts, leather, metals, plastics, fiberboard, masonry, carbon, glass, or wood;
 - iii. Brazing, soldering, and welding equipment, and cutting torches related to manufacturing and construction activities that do not result in emission of HAP metals. Brazing, soldering, and welding equipment, and cutting torches related to manufacturing and construction activities that emit HAP metals are insignificant activities based on size or production level thresholds. Brazing, soldering, and welding equipment, and cutting torches directly related to plant maintenance and upkeep and repair or maintenance shop activities that emit HAP metals are treated as trivial and listed separately in this definition;
 - iv. Drop hammers or hydraulic presses for forging or metalworking;
 - v. Air compressors and pneumatically operated equipment, including hand tools;
 - vi. Batteries and battery charging stations, except at battery manufacturing plants;
 - vii. Drop hammers or hydraulic presses for forging or metalworking;
 - viii. Equipment used exclusively to slaughter animals, not including other equipment at slaughterhouses, such as rendering cookers, boilers,

Department of Environmental Quality – Air Pollution Control

- heating plants, incinerators, and electrical power generating equipment;
- ix. Hand-held applicator equipment for hot melt adhesives with no VOC in the adhesive formulation;
- x. Equipment used for surface coating, painting, dipping, or spraying operations, except those that will emit VOC or HAP;
- xi. CO₂ lasers used only on metals and other materials that do not emit HAP in the process;
- xii. Electric or steam-heated drying ovens and autoclaves, but not the emissions from the articles or substances being processed in the ovens or autoclaves or the boilers delivering the steam;
- xiii. Salt baths using nonvolatile salts that do not result in emissions of any regulated air pollutants;
- xiv. Laser trimmers using dust collection to prevent fugitive emissions;
- xv. Process water filtration systems and demineralizers;
- xvi. Demineralized water tanks and demineralizer vents;
- xvii. Oxygen scavenging or de-aeration of water;
- xviii. Ozone generators;
- xix. Steam vents and safety relief valves;
- xx. Steam leaks; and
- xxi. Steam cleaning operations and steam sterilizers;
- xxii. Use of vacuum trucks and high pressure washer/cleaning equipment within the stationary source boundaries for cleanup and in-source transfer of liquids and slurried solids to waste water treatment units or conveyances;
- xxiii. Equipment using water, water and soap or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing.
- xxiv. Electric motors.
- c. Building and Site Maintenance Activities
 - i. Plant and building maintenance and upkeep activities, including grounds-keeping, general repairs, cleaning, painting, welding, plumbing, re-tarring roofs, installing insulation, and paving parking lots, if these activities are not conducted as part of a manufacturing process, are not related to the source's primary business activity, and do not otherwise trigger a permit revision. Cleaning and painting activities qualify as trivial activities if they are not subject to VOC or hazardous air pollutant control requirements;
 - ii. Repair or maintenance shop activities not related to the source's primary business activity, not including emissions from surface coating, de-greasing, or solvent metal cleaning activities, and not otherwise triggering a permit revision;
 - iii. Janitorial services and consumer use of janitorial products;
 - iv. Landscaping activities;
 - v. Routine calibration and maintenance of laboratory equipment or other analytical instruments;
 - vi. Sanding of streets and roads to abate traffic hazards caused by ice and snow;
 - vii. Street and parking lot striping;
 - viii. Caulking operations which are not part of a production process.
- d. Incidental, Non-Industrial Activities
 - i. Air-conditioning units used for human comfort that do not have applicable requirements under Title VI of the Act;
 - ii. Ventilating units used for human comfort that do not exhaust air pollutants into the ambient air from any manufacturing, industrial or commercial process;
 - iii. Tobacco smoking rooms and areas;
 - iv. Non-commercial food preparation;
 - v. General office activities, such as paper shredding, copying, photographic activities, pencil sharpening and blueprinting, but not including incineration;
 - vi. Laundry activities, except for dry-cleaning and steam boilers;
 - vii. Bathroom and toilet vent emissions;
 - viii. Fugitive emissions related to movement of passenger vehicles, if the emissions are not counted for applicability purposes under subsection (146)(c) of the definition of major source in this Section and any required fugitive dust control plan or its equivalent is submitted with the application;
 - ix. Use of consumer products, including hazardous substances as that term is defined in the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) where the product is used at a source in the same manner as normal consumer use;
 - x. Activities directly used in the diagnosis and treatment of disease, injury or other medical condition;
 - xi. Circuit breakers;
 - xii. Adhesive use which is not related to production.
- e. Storage, Piping and Packaging
 - i. Storage tanks, vessels, and containers holding or storing liquid substances that will not emit any VOC or HAP;
 - ii. Storage tanks, reservoirs, and pumping and handling equipment of any size containing soaps, vegetable oil, grease, animal fat, and nonvolatile aqueous salt solutions, if appropriate lids and covers are used;
 - iii. Chemical storage associated with water and wastewater treatment where the water is treated for consumption and/or use within the permitted facility;
 - iv. Chemical storage associated with water and wastewater treatment where the water is treated for consumption and/or use within the permitted facility;
 - v. Storage cabinets for flammable products;
 - vi. Natural gas pressure regulator vents, excluding venting at oil and gas production facilities;
 - vii. Equipment used to mix and package soaps, vegetable oil, grease, animal fat, and nonvolatile aqueous salt solutions, if appropriate lids and covers are used;
- f. Sampling and Testing
 - i. Vents from continuous emissions monitors and other analyzers;

- ii. Bench-scale laboratory equipment used for physical or chemical analysis, but not laboratory fume hoods or vents;
 - iii. Equipment used for quality control, quality assurance, or inspection purposes, including sampling equipment used to withdraw materials for analysis;
 - iv. Hydraulic and hydrostatic testing equipment;
 - v. Environmental chambers not using HAP gases;
 - vi. Soil gas sampling;
 - vii. Individual sampling points, analyzers, and process instrumentation, whose operation may result in emissions but that are not regulated as emission units;
 - g. Safety Activities
 - i. Fire suppression systems;
 - ii. Emergency road flares;
 - h. Miscellaneous Activities
 - i. Shock chambers;
 - ii. Humidity chambers;
 - iii. Solar simulators;
 - iv. Cathodic protection systems;
 - v. High voltage induced corona; and
 - vi. Filter draining.
147. "Unclassified area" means an area which the Administrator, because of a lack of adequate data, is unable to classify as an attainment or nonattainment area for a specific pollutant, and which, for purposes of this Chapter, is treated as an attainment area.
148. "Uncombined water" means condensed water containing analytical trace amounts of other chemical elements or compounds.
149. "Urban or suburban open area" means an unsubdivided tract of land surrounding a substantial urban development of a residential, industrial, or commercial nature and which, though near or within the limits of a city or town, may be uncultivated, used for agriculture, or lie fallow.
150. "Vacant lot" means a subdivided residential or commercial lot which contains no buildings or structures of a temporary or permanent nature.
151. "Vapor" means the gaseous form of a substance normally occurring in a liquid or solid state.
152. "Visibility impairment" means any humanly perceptible change in visibility (light extinction, visual range, contrast, coloration) from that which would have existed under natural conditions.
153. "Visible emissions" means any emissions which are visually detectable without the aid of instruments and which contain particulate matter.
154. "Volatile organic compounds" or "VOC" means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions. This includes any such organic compound other than the following:
- a. Methane;
 - b. Ethane;
 - c. Methylene chloride (dichloromethane);
 - d. 1,1,1-trichloroethane (methyl chloroform);
 - e. 1,1,2-trichloro-1,2,2-trifluoroethane (CFC-113);
 - f. Trichlorofluoromethane (CFC-11);
 - g. Dichlorodifluoromethane (CFC-12);
 - h. Chlorodifluoromethane (HCFC-22);
 - i. Trifluoromethane (HFC-23);
 - j. 1,2-dichloro 1,1,2,2-tetrafluoroethane (CFC-114);
 - k. Chloropentafluoroethane (CFC-115);
 - l. 1,1,1-trifluoro 2,2-dichloroethane (HCFC-123);
 - m. 1,1,1,2-tetrafluoroethane (HFC-134(a));
 - n. 1,1-dichloro 1-fluoroethane (HCFC-141(b));
 - o. 1-chloro 1,1-difluoroethane (HCFC-142(b));
 - p. 2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124);
 - q. Pentafluoroethane (HFC-125);
 - r. 1,1,2,2-tetrafluoroethane (HFC-134);
 - s. 1,1,1-trifluoroethane (HFC-143(a));
 - t. 1,1-difluoroethane (HFC-152(a));
 - u. Parachlorobenzotrifluoride (PCBTF);
 - v. Cyclic, branched, or linear completely methylated siloxanes;
 - w. Acetone;
 - x. Perchloroethylene (tetrachloroethylene);
 - y. 3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225(ca));
 - z. 1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225(cb));
 - aa. 1,1,1,2,3,4,4,5,5,5-decafluoropentane (HFC 43-10mee);
 - bb. Difluoromethane (HFC-32);
 - cc. Ethylfluoride (HFC-161);
 - dd. 1,1,1,3,3,3-hexafluoropropane (HFC-236(fa));
 - ee. 1,1,2,2,3-pentafluoropropane (HFC-245(ca));
 - ff. 1,1,2,3,3-pentafluoropropane (HFC-245(ea));
 - gg. 1,1,1,2,3-pentafluoropropane (HFC-245(eb));
 - hh. 1,1,1,3,3-pentafluoropropane (HFC-245(fa));
 - ii. 1,1,1,2,3,3-hexafluoropropane (HFC-236(ea));
 - jj. 1,1,1,3,3-pentafluorobutane (HFC-365(mfc));
 - kk. Chlorofluoromethane (HCFC-31);
 - ll. 1-chloro-1-fluoroethane (HCFC-151(a));
 - mm. 1,2-dichloro-1,1,2-trifluoroethane (HCFC-123(a));
 - nn. 1,1,1,2,2,3,3,4,4-nonafluoro-4-methoxy-butane (C₄F₉OCH₃);
 - oo. 2-(difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CFCF₂OCH₃);
 - pp. 1-ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane (C₄F₉OC₂H₅);
 - qq. 2-(ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane ((CF₃)₂CFCF₂OC₂H₅);
 - rr. Methyl acetate; and
 - ss. 1,1,1,2,2,3,3-heptafluoro-3-methoxypropane (n-C₃F₇OCH₃, HFE—7000);
 - tt. 3-ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl) hexane (HFE – 7500);
 - uu. 1,1,1,2,3,3,3-hentafluoropropane (HFC 227ea);
 - vv. Methyl formate (HCOOCH₃); and
 - ww. (1) 1,1,1,2,2,3,4,5,5,5-decafluoro-3-methoxy-4-trifluoromethyl-pentane (HFE—7300);
 - xx. Propylene carbonate;
 - yy. Dimethyl carbonate; and
 - zz. Trans -1,3,3,3-tetrafluoropropene;
 - aaa. HCF₂OCF₂H (HFE-134);
 - bbb. HCF₂OCF₂OCF₂H (HFE-236(cal2));
 - ccc. HCF₂OCF₂CF₂OCF₂H (HFE-338(pcc13));
 - ddd. HCF₂OCF₂OCF₂CF₂OCF₂H (H-Galden 1040x or H-Galden ZT 130 (or 150 or 180));
 - eee. Trans 1-chloro-3,3,3-trifluoroprop-1-ene;
 - fff. 2,3,3,3-tetrafluoropropene;
 - ggg. 2-amino-2-methyl-1-propanol; and
 - hhh. Perfluorocarbon compounds that fall into these classes:
 - i. Cyclic, branched, or linear, completely fluorinated alkanes.
 - ii. Cyclic, branched, or linear, completely fluorinated ethers with no unsaturations.

- iii. Cycle, branched, or linear, completely fluorinated tertiary amines with no unsaturations; or
 - iv. Sulfur containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine.
 - iii. The following compound is VOC for purposes of all recordkeeping, emissions reporting, photochemical dispersion modeling and inventory requirements which apply to VOC and shall be uniquely identified in emission reports, but is not VOC for purposes of VOC emissions limitations or VOC content requirements: t-butyl acetate.
155. “Wood waste burner” means an incinerator designed and used exclusively for the burning of wood wastes consisting of wood slabs, scraps, shavings, barks, sawdust or other wood material, including those that generate steam as a by-product.

Historical Note

Former Section R9-3-101 repealed, new Section R9-3-101 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, paragraph (133) (Supp. 80-1). Editorial correction, paragraph (58) (Supp. 80-2). Amended effective July 9, 1980. Amended by adding new paragraphs (24), (55), (102), and (115) and renumbering accordingly, effective August 29, 1980 (Supp. 80-4). Amended effective May 28, 1982 (Supp. 82-3). Amended effective September 22, 1983 (Supp. 83-5). Amended paragraph (133), added paragraph (156) and renumbered accordingly effective September 28, 1984 (Supp. 84-5). Amended paragraph (29) by deleting (aa) and (bb) effective August 9, 1985 (Supp. 85-4). Former Section R9-3-101 renumbered without change as R18-2-101 (Supp. 87-3). Amended paragraph (98) effective December 1, 1988 (Supp. 88-4). Amended effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective October 7, 1994 (Supp. 94-4). Amended effective February 28, 1995 (Supp. 95-1). Amended effective August 1, 1995 (Supp. 95-3). Amended effective January 31, 1997; filed with the Office of Secretary of State January 10, 1997 (Supp. 97-1). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-102. Incorporated Materials

- A. The following documents are incorporated by reference and are on file with the Office of the Secretary of State (1700 W. Washington St., Suite 103, Phoenix, AZ 85007) and the Department (1110 W. Washington St., Phoenix, AZ 85007):
 1. Sections 1 and 7 of the Department’s “Arizona Testing Manual for Air Pollutant Emissions,” amended as of March 1992 (and no future editions).

2. All ASTM test methods referenced in this Chapter as of the year specified in the reference (and no future amendments). They are available from the American Society for Testing and Materials, 1916 Race St., Philadelphia, PA 19103-1187.
 3. The U.S. Government Printing Office’s “Standard Industrial Classification Manual, 1987” (and no future editions).
- B. The Code of Federal Regulations is published by the United States Government Printing Office, 732 North Capital Street, NW, Washington, DC 20401-0001, is on file with the Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007, and is available at the Arizona State Library, Archives & Public Records, 1700 West Washington Street, Phoenix, Arizona 85007 and at other Federal depository libraries in the state (see http://catalog.gpo.gov/fdlpdire/FDLP-dir.jsp?st_12=AZ&flag=searchp). It is also available online at <http://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR>.

Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Amended effective February 3, 1993 (Supp. 93-1). Amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective December 7, 1995 (Supp. 95-4). Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-103. Applicable Implementation Plan; Savings

No rule adopted in this Chapter shall preempt or nullify any applicable requirement or emission standard in an applicable implementation plan unless the Director revises the applicable implementation plan in conformance with the requirements of 40 CFR 51, Subpart F, and the Administrator approves the revision.

Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

ARTICLE 2. AMBIENT AIR QUALITY STANDARDS; AREA DESIGNATIONS; CLASSIFICATIONS

R18-2-201. Particulate Matter: PM₁₀ and PM_{2.5}

- A. PM₁₀ Standards
 1. The level of the primary and secondary ambient air quality standards for PM₁₀ is 150 micrograms per cubic meter of PM₁₀ – 24-hour average concentration.
 2. To determine attainment of the primary and secondary standards, a person shall measure PM₁₀ in the ambient air by:
 - a. A reference method based on 40 CFR 50, Appendix J, and designated according to 40 CFR 53; or
 - b. An equivalent method designated according to 40 CFR 53.
 3. The primary and secondary 24-hour ambient air quality standards for PM₁₀ are attained when the expected number of days per calendar year with a 24-hour average concentration above 150 micrograms per cubic meter, determined according to 40 CFR 50, Appendix K, is less than or equal to one.
- B. PM_{2.5} Standards
 1. The primary ambient air quality standards for PM_{2.5} are:
 - a. 12 micrograms per cubic meter of PM_{2.5} – annual arithmetic mean concentration.

- b. 35 micrograms per cubic meter of PM_{2.5} – 24-hour average concentration.
- 2. The secondary ambient air quality standards for PM_{2.5} are:
 - a. 15 micrograms per cubic meter of PM_{2.5} – annual arithmetic mean concentration.
 - b. 35 micrograms per cubic meter of PM_{2.5} – 24-hour average concentration.
- 3. To determine attainment of the primary and secondary standards, a person shall measure PM_{2.5} in the ambient air by:
 - a. A reference method based on 40 CFR 50, Appendix L, and designated according to 40 CFR 53; or
 - b. An equivalent method designated according to 40 CFR 53.
- 4. The primary annual ambient air quality standard for PM_{2.5} is met when the annual arithmetic mean concentration, determined according to 40 CFR 50, Appendix N, is less than or equal to 12 micrograms per cubic meter.
- 5. The secondary annual ambient air quality standard for PM_{2.5} is met when the annual arithmetic mean concentration, determined according to 40 CFR 50, Appendix N, is less than or equal to 15 micrograms per cubic meter.
- 6. The primary and secondary 24-hour ambient air quality standards for PM_{2.5} are met when the 98th percentile 24-hour concentration, determined according to 40 CFR 50, Appendix N, is less than or equal to 35 micrograms per cubic meter.

Historical Note

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-201 repealed, new Section R9-3-201 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (E) (Supp. 80-2). Amended effective August 29, 1980 (Supp. 80-4). Amended subsection(B)(1) and deleted subsections (C) through (E) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-201 renumbered without change as Section R18-2-201 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Section corrected to include subsection (B), which was inadvertently omitted in Supp. 05-3 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-202. Sulfur Oxides (Sulfur Dioxide)

- A. The primary ambient air quality standards for sulfur oxides, measured as sulfur dioxide, are:
 - 1. 0.03 parts per million (ppm) (80 µg/m³) -- annual arithmetic mean.
 - 2. 0.14 parts per million (ppm) (365 µg/m³) – maximum 24-hour concentration not to be exceeded more than once per calendar year.
 - 3. 75 parts per billion (ppb) – maximum one-hour concentration. The one-hour primary standard is met at an ambient air quality monitoring site when the three-year average of the annual 99th percentile of the daily maximum one-hour average concentrations is less than or equal to 75 parts per billion, as determined according to 40 CFR 50, Appendix T.
- B. The secondary ambient air quality standard for sulfur oxides, measured as sulfur dioxide, is 0.5 parts per million (ppm)

(1300 µg/m³) -- maximum three-hour concentration not to be exceeded more than once per year.

- C. The level of the standards shall be measured by a reference method based on 40 CFR 50, Appendix A or A-1, or by a Federal Equivalent Method designated according to 40 CFR 53.
- D. The standards in subsections (A)(1) and (2) shall apply:
 - 1. In an area designated nonattainment for a standard in subsection (A)(1) or (2) as of August 23, 2011, and areas not meeting a state implementation plan call for a standard in subsection (A)(1) or (2), until the state submits pursuant to section 191 of the Act, and the Administrator approves, a state implementation plan providing for attainment the standard in subsection (A)(3) in that area.
 - 2. In areas other than those identified in subsection (D)(1), until the effective date of the designation of that area, pursuant to section 107 of the act, for the standard in subsection (A)(3).

Historical Note

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-202 repealed, new Section R9-3-202 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended by deleting subsections (C) through (E) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-202 renumbered without change as Section R18-2-202 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-203. Ozone

- A. The eight-hour average primary ambient air quality standard for ozone is 0.070 ppm.
- B. The eight-hour average secondary ambient air quality standard for ozone is 0.070 ppm.
- C. To determine attainment of the primary and secondary standards, a person shall measure ozone in the ambient air by:
 - 1. A reference method based on 40 CFR 50, Appendix D, and designated according to 40 CFR 53; or
 - 2. An equivalent method designated according to 40 CFR 53.
- D. The eight-hour average primary ambient air quality standard for ozone is met at an ambient air quality monitoring site when the three-year average of the annual fourth highest daily maximum eight-hour average ozone concentration is less than or equal to 0.070 ppm, determined according to 40 CFR 50, Appendix U.

Historical Note

Amended effective December 22, 1976 (Supp. 76-5). Former Section R9-3-204 repealed, new Section R9-3-204 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-204 renumbered without change as Section R18-2-204 (Supp. 87-3). Section R18-2-103 renumbered from R18-2-204 and amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23

A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-204. Carbon monoxide

- A. The primary ambient air quality standards for carbon monoxide are:
1. 9 parts per million (10 milligrams per cubic meter) -- maximum eight-hour concentration not to be exceeded more than once per year.
 2. 35 parts per million (40 milligrams per cubic meter) -- maximum one-hour concentration not to be exceeded more than once per year.
- B. An eight-hour average shall be considered valid if at least 75% of the hourly averages for the eight-hour period are available. In the event that only six or seven hourly averages are available, the eight-hour average shall be computed on the basis of the hours available using 6 or 7 as the divisor.
- C. When summarizing data for comparison with the standards, averages shall be stated to one decimal place. Comparison of the data with the levels of the standards in parts per million shall be made in terms of integers with fractional parts of 0.5 or greater rounding up.

Historical Note

Amended effective December 22, 1976 (Supp. 76-5).
Former Section R9-3-205 repealed, new Section R9-3-205 adopted effective May 14, 1979 (Supp. 79-1).
Amended effective October 2, 1979 (Supp. 79-5).
Amended effective August 29, 1980 (Supp. 80-4).
Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-205 renumbered without change as Section R18-2-205 (Supp. 87-3). Former Section R18-2-204 renumbered to R18-2-203, new Section R18-2-204 renumbered from R18-2-205 and amended effective September 26, 1990 (Supp. 90-3).

R18-2-205. Nitrogen Oxides (Nitrogen Dioxide)

- A. The primary ambient air quality standards for oxides of nitrogen, measured in the ambient air as nitrogen dioxide, are:
1. 53 parts per billion – annual average concentration.
 2. 100 parts per billion – one-hour average concentration.
- B. The secondary ambient air quality standard for nitrogen dioxide is 0.053 (parts per million (100 micrograms per cubic meter) -- annual arithmetic mean.
- C. The levels of the standards shall be measured by a reference method based on 40 CFR 50, Appendix F or a federal equivalent method designated in accordance with 40 CFR 53.
- D. The annual primary standard is met when the annual average concentration in a calendar year is less than or equal to 53 ppb, as determined in accordance with 40 CFR, Appendix S for the annual standard.
- E. The one-hour primary standard is met when the three-year average of the annual 98th percentile of the daily maximum one-hour average concentration is less than or equal to 100 parts per billion, as determined in accordance with 40 CFR 50, Appendix S.
- F. The secondary standard is attained when the annual arithmetic mean concentration in a calendar year is less than or equal to 0.053 ppm, rounded to three decimal places, with fractional parts equal to or greater than 0.0005 ppm rounded up. To demonstrate attainment, an annual mean shall be based upon hourly data that is at least 75% complete or upon data derived from the manual methods, that is at least 75% complete for the scheduled sampling days in each calendar quarter.

Historical Note

Amended effective December 22, 1976 (Supp. 76-5).
Former Section R9-3-206 repealed, new Section R9-3-

206 adopted effective May 14, 1979 (Supp. 79-1).
Amended effective October 2, 1979 (Supp. 79-5).
Amended effective August 29, 1980 (Supp. 80-4).
Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-206 renumbered without change as Section R18-2-206 (Supp. 87-3). Former Section R18-2-205 renumbered to R18-2-204, new Section R18-2-205 renumbered from R18-2-206 and amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-206. Lead

- A. The primary ambient air quality standard for lead and its compounds, measured as elemental lead, is 0.15 micrograms per cubic meter – maximum arithmetic mean averaged over a three-month period.
- B. The secondary ambient air quality standard for lead and its compounds, measured as elemental lead, is 0.15 micrograms per cubic meter – maximum arithmetic mean averaged over a three-month period.
- C. The level of the standards shall be measured by a reference method based on 40 CFR 50, Appendix G and designated in accordance with 40 CFR 53, or by an equivalent designated in accordance with part 53 of this chapter.
- D. The national primary and secondary ambient air quality standards for lead are met when the maximum arithmetic three-month mean concentration for a three-year period, as determined in accordance with 40 CFR 50, Appendix R, is less than or equal to 0.15 micrograms per cubic meter.
- E. The former primary and secondary ambient air quality standards for lead of 1.5 micrograms per cubic meter averaged over a calendar quarter shall apply to an area until one year after the effective date of the designation of that area, pursuant to section 107 of the Act, for the standards in subsections (A) and (B).

Historical Note

Former Section R9-3-207 repealed effective May 14, 1979 (Supp. 79-1). New Section R9-3-207 adopted effective October 2, 1979 (Supp. 79-5). Amended effective August 29, 1980 (Supp. 80-4). Amended by deleting subsections (B) through (D) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-207 renumbered without change as Section R18-2-207 (Supp. 87-3). Former Section R18-2-206 renumbered to R18-2-205, new Section R18-2-206 renumbered from R18-2-207 and amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-207. Renumbered

R18-2-210. Attainment, Nonattainment, and Unclassifiable Area Designations

40 CFR 81.303 as amended as of July 1, 2014 (and no future amendments or editions) is incorporated by reference as an applicable requirement and on file with the Department of Environmental Quality. 40 CFR 81.303 is available from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).
 Amended effective December 7, 1995 (Supp. 95-4).
 Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3).
 Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-211. Reserved**R18-2-212. Reserved****R18-2-213. Reserved****R18-2-214. Reserved****R18-2-215. Ambient air quality monitoring methods and procedures**

- A. Only those methods which have been either designated by the Administrator as reference or equivalent methods or approved by the Director shall be used to monitor ambient air.
- B. Quality assurance, monitor siting, and sample probe installation procedures shall be in accordance with procedures described in the Appendices to 40 CFR 58.
- C. The Director may approve other procedures upon a finding that the proposed procedures are substantially equivalent or superior to procedures in the Appendices to 40 CFR 58.

Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-215 renumbered without change as Section R18-2-215 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3).

R18-2-216. Interpretation of Ambient Air Quality Standards and Evaluation of Air Quality Data

Unless otherwise specified, interpretation of all ambient air quality standards contained in this Article shall be in accordance with 40 CFR 50, incorporated by reference in Appendix 2 of this Chapter.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-216 repealed, new Section R9-3-216 adopted effective August 29, 1980 (Supp. 80-4). Former Section R9-3-216 renumbered without change as Section R18-2-216 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-217. Designation and Classification of Attainment Areas

- A. All areas shall be classified as either Class I, Class II or Class III.
- B. All of the following areas which were in existence on August 7, 1977 shall be Class I areas irrespective of attainment status and shall not be redesignated:
 - 1. International parks;
 - 2. National wilderness areas which exceed 5,000 acres in size;
 - 3. National memorial parks which exceed 5,000 acres in size; and
 - 4. National parks which exceed 6,000 acres in size.

- C. Areas which were redesignated as Class I under regulations promulgated before August 7, 1977, shall remain Class I, but may be redesignated as provided in this Section.
- D. Any other area, unless otherwise specified in the legislation creating such an area, is initially designated Class II, but may be redesignated as provided in this Section.
- E. The following areas shall be designated only as Class I or II:
 - 1. An area which as of August 7, 1977, exceeds 10,000 acres in size and is one of the following:
 - a. A national monument,
 - b. A national primitive area,
 - c. A national preserve,
 - d. A national recreational area,
 - e. A national wild and scenic river,
 - f. A national wildlife refuge,
 - g. A national lakeshore or seashore.
 - 2. A national park or national wilderness area established after August 7, 1977, which exceeds 10,000 acres in size.
- F. Except as otherwise provided in subsections (B) to (E), the Governor may redesignate areas of the state as Class I or Class II, provided that the following requirements are fulfilled:
 - 1. At least one public hearing is held in or near the area affected in accordance with 40 CFR 51.102;
 - 2. Other states, Indian governing bodies and Federal Land Managers, whose land may be affected by the proposed redesignation are notified at least 30 days prior to the public hearing.
 - 3. A discussion document of the reasons for the proposed redesignation including a description and analysis of health, environmental, economic, social and energy effects of the proposed redesignation is prepared by the Governor or the Governor's designee. The discussion document shall be made available for public inspection at least 30 days prior to the hearing and the notice announcing the hearing shall contain appropriate notification of the availability of such discussion document.
 - 4. Prior to the issuance of notice respecting the redesignation of an area which includes any federal lands, the Governor or the Governor's designee has provided written notice to the appropriate Federal Land Manager and afforded the Federal Land Manager adequate opportunity, not in excess of 60 days, to confer with the state respecting the redesignation and to submit written comments and recommendations. The Governor or the Governor's designee shall publish a list of any inconsistency between such redesignation and such recommendations, together with the reasons for making such redesignation against the recommendation of the Federal Land Manager, if any Federal Land Manager has submitted written comments and recommendations.
 - 5. The redesignation is proposed after consultation with the elected leadership of local governments in the area covered by the proposed redesignation.
 - 6. The redesignation is submitted to the Administrator as a revision to the SIP.
- G. Except as otherwise provided in subsections (B) to (E), the Governor may redesignate areas of the state as Class III if all of the following criteria are met:
 - 1. Such redesignation meets the requirements of subsection (F);
 - 2. Such redesignation has been approved after consultation with the appropriate committee of the legislature if it is in session or with the leadership of the legislature if it is not in session.

Department of Environmental Quality – Air Pollution Control

3. The general purpose units of local government representing a majority of the residents of the area to be redesignated concur in the redesignation;
 4. Such redesignation shall not cause, or contribute to, a concentration of any air pollutant which exceeds any national ambient air quality standard or any maximum increase allowed under R18-2-218;
 5. For any new major source as defined in R18-2-401 or a major modification of such source which may be permitted to be constructed and operated only if the area in question is redesignated as Class III, any permit application and materials submitted as part of the application shall be available for public inspection prior to any public hearing on the redesignation of the area as Class III.
 6. The redesignation is submitted to the Administrator as a revision to the SIP.
- H.** A redesignation shall not be effective until approved by the Administrator as part of an applicable implementation plan. If the Administrator disapproves the redesignation, the classification of the area shall be that which was in effect before the disapproved redesignation.
- I.** Lands within the exterior boundaries of Indian reservations may be redesignated only by the appropriate Indian governing body.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (5), subparagraph (d) (Supp. 80-2). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-217 renumbered without change as Section R18-2-217 (Supp. 87-3). Amended and subsection (B) renumbered to Section R18-2-218 effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-218. Limitation of Pollutants in Classified Attainment Areas

- A.** Areas designated as Class I, II, or III shall be limited to the following increases in air pollutant concentrations occurring over the baseline concentration; provided that for any period other than an annual period, the applicable maximum allowable increase may be exceeded once per year at any one location:

CLASS I

Maximum Allowable Increase (Micrograms per cubic meter)

Particulate matter: PM_{2.5}

Annual arithmetic mean 1

24-hr maximum 2

Particulate matter: PM₁₀

Annual arithmetic mean 4

24-hour maximum 8

Sulfur dioxide:

Annual arithmetic mean 2

24-hour maximum 5

3-hour maximum 25

Nitrogen dioxide:

Annual arithmetic mean 2.5

CLASS II

Particulate matter: PM_{2.5}

Annual arithmetic mean 4

24-hr maximum 9

Particulate matter: PM₁₀

Annual arithmetic mean 17

24-hour maximum 30

Sulfur dioxide:

Annual arithmetic mean 20

24-hour maximum 91

3-hour maximum 512

Nitrogen dioxide:

Annual arithmetic mean 25

CLASS III

Particulate matter: PM_{2.5}

Annual arithmetic mean 8

24-hr maximum 18

Particulate matter: PM₁₀

Annual arithmetic mean 34

24-hour maximum 60

Sulfur dioxide:

Annual arithmetic mean 40

24-hour maximum 182

3-hour maximum 700

Nitrogen dioxide:

Annual arithmetic mean 50

- B.** The baseline concentration is that ambient concentration level which exists in the baseline area at the time of the applicable minor source baseline data.

1. The major source baseline date is:
 - a. January 6, 1975, for sulfur dioxide and PM₁₀.
 - b. February 8, 1988, for nitrogen dioxide.
 - c. October 20, 2010, for PM_{2.5}.
2. The minor source baseline date shall be the earliest date after the trigger date on which a major source as defined in R18-2-401 or major modification subject to 40 CFR 52.21 or R18-2-406 submits a complete application under the relevant regulations.
 - a. The trigger date is:
 - i. August 7, 1977, for PM₁₀ and sulfur dioxide.
 - ii. February 8, 1988, for nitrogen dioxide.
 - iii. October 20, 2011, for PM_{2.5}.
 - b. Any minor source baseline date established originally for total suspended particulates shall remain in effect and shall apply for purposes of determining the amount of available PM-10 increments, except that the Department may rescind any such minor source baseline date where it can be shown, to the satisfaction of the Department, that the emissions increase from the major source, or the net emissions increase from the major modification, responsible for triggering that date did not result in a significant amount of PM-10 emissions.
3. A baseline concentration shall be determined for each pollutant for which there is a minor source baseline date and shall include both:

- a. The actual emissions representative of sources in existence on the minor source baseline date, except as provided in subsection (B)(4); and
 - b. The allowable emissions of major sources as defined in R18-2-401 which commenced construction before the major source baseline date but were not in operation by the applicable minor source baseline date.
4. The following shall not be included in the baseline concentration and shall affect the applicable maximum allowable increase:
 - a. Actual emissions from any major source as defined in R18-2-401 on which construction commenced after the major source baseline date; and
 - b. Actual emissions increases and decreases at any stationary source occurring after the minor source baseline date.
- C. The baseline date shall be established for each pollutant for which maximum allowable increases or other equivalent measures have been established if both:
 1. The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under section 107(d)(1)(A)(ii) or (iii) of the Act for the pollutant on the date of its complete application under 40 CFR 52.21 or R18-2-406; and
 2. In the case of a major source as defined in R18-2-401, the pollutant would be emitted in significant amounts, or in the case of a major modification, there would be a significant net emissions increase of the pollutant.
- D. The baseline area shall be the AQCR that contains the area, designated as attainment or unclassifiable under section 107(d)(1)(A)(ii) or (iii) of the Act, in which the major source as defined in R18-2-401 or major modification establishing the minor source baseline date would construct or would have an air quality impact for the pollutant for which the minor source baseline date is established, as follows: greater than or equal to 1 microgram per cubic meter (annual average) for sulfur dioxide, nitrogen dioxide or PM₁₀; or greater than or equal to 0.3 microgram per cubic meter (annual average) for PM_{2.5}.
 1. Area redesignations under section 107(d)(1)(A)(ii) or (iii) of the Act that would redesignate a baseline area may not intersect or be smaller than the area of impact of any new major source as defined in R18-2-401 or a major modification which either:
 - a. Establishes a minor source baseline date, or
 - b. Is subject to either 40 CFR 52.21 or R18-2-406 and would be constructed in Arizona.
 2. Any baseline area established originally for total suspended particulates shall remain in effect and shall apply for purposes of determining the amount of available PM₁₀ increments, except that such baseline area shall not remain in effect if the Department rescinds the corresponding minor source baseline date in accordance with subsection (B)(2)(b).
- E. The maximum allowable concentration of any air pollutant in any area to which subsection (A) applies shall not exceed a concentration for each pollutant equal to the concentration permitted under the national ambient air quality standards.
- F. For purposes of determining compliance with the maximum allowable increases in ambient concentrations of an air pollutant, the following concentrations of such pollutant shall not be taken into account:
 1. Concentration of such pollutant attributable to the increase in emissions from major and stationary sources which have converted from the use of petroleum products, or natural gas, or both, by reason of a natural gas curtailment order which is in effect under the provisions of sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 792, over the emissions from such sources before the effective date of such order;
2. The concentration of such pollutant attributable to the increase in emissions from major and stationary sources which have converted from using gas by reason of a natural gas curtailment plan in effect pursuant to the Federal Power Act, 16 U.S.C. 792 - 825r, over the emissions from such sources before the effective date of the natural gas curtailment plan;
3. Concentrations of PM₁₀ or PM_{2.5} attributable to the increase in emissions from construction or other temporary emission related activities of a new or modified source;
4. The increase in concentrations attributable to new sources outside the United States over the concentrations attributable to existing sources which are included in the baseline concentration; and
5. Concentrations attributable to the temporary increase in emissions of sulfur dioxide, nitrogen oxides, PM_{2.5}, or PM₁₀ from major sources as defined in R18-2-401 when the following conditions are met:
 - a. The permits issued to such sources specify the time period during which the temporary emissions increase of sulfur dioxide, nitrogen oxides, PM_{2.5} or PM₁₀ would occur. Such time period shall not be renewable and shall not exceed two years.
 - b. The temporary emissions increase will not:
 - i. Impact any Class I area or any area where a maximum increase allowed by subsection (A) is known to be violated; or
 - ii. Cause or contribute to the violation of a national ambient air quality standard.
 - c. The operating permit issued to such sources specifies that, at the end of the time period described in subsection (F)(5)(a), the emissions levels from the sources would not exceed the levels occurring before the temporary emissions increase was approved.
6. The exception granted by subsections (F)(1) and (2) with respect to maximum increases allowed under subsection (A) shall not apply more than five years after the effective date of the order or natural gas curtailment plan on which the exception is based.
- G. If the Director or the Administrator determines that the SIP is substantially inadequate to prevent significant deterioration or that an applicable maximum allowable increase as specified in subsection (A) is being violated, the SIP shall be revised to correct the inadequacy or the violation. The SIP shall be revised within 60 days of such a finding by the Director or within 60 days following notification by the Administrator, or by such later date as prescribed by the Administrator after consultation with the Director.
- H. The Director shall review the adequacy of the SIP on a periodic basis and within 60 days of such time as information becomes available that an applicable maximum allowable increase is being violated.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (5), subparagraph (d) (Supp. 80-2). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-217 renumbered without change as Section R18-2-217 (Supp. 87-3). Former Section R18-2-218 renumbered to R18-2-219, new Section

R18-2-218 renumbered from R18-2-217(B) and amended effective September 26, 1990 (Supp. 90-3). Amended effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-219. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-218 repealed, new Section R9-3-218 adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-218 renumbered without change as Section R18-2-218 (Supp. 87-3). Former Section R18-2-219 renumbered to R18-2-220, new Section R18-2-219 renumbered from R18-2-218 and amended effective September 26, 1990 (Supp. 90-3). Section repealed by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-220. Air pollution emergency episodes

- A. Procedures shall be implemented by the Director in order to prevent the occurrence of ambient air pollutant concentrations which would cause significant harm to the health of persons, as specified in subsection (B)(4). The procedures and actions required for each stage are described in the Department's "Procedures for Prevention of Emergency Episodes," amended as of October 18, 1988 (and no future edition), which is incorporated herein by reference and on file with the Office of the Secretary of State.
- B. The following stages are identified by air quality criteria in order to provide for sequential emissions reductions, public notification and increased Department monitoring and forecast responsibilities. The declaration of any stage, and the area of the state affected, shall be based on air quality measurements and meteorological analysis and forecast.
 1. A Stage I air pollution alert shall be declared when any of the alert level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of alert level concentrations for the same pollutant during the subsequent 24-hour period. If, 48 hours after an alert has been initially declared, air pollution concentrations and meteorological conditions do not improve, the warning stage control actions shall be implemented but no warning shall be declared, unless air quality has deteriorated to the extent described in subsection (B)(2).
 2. A Stage II air pollution warning shall be declared when any of the warning level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of concentrations of the same pollutant exceeding the warning level during the subsequent 24-hour period. If, 48 hours after a warning has been initially declared, air pollution concentrations and meteorological conditions do not improve, the emergency stage shall be declared and its control actions implemented.
 3. A Stage III air pollution emergency shall be declared when any of the emergency level concentrations listed in subsection (B)(4) are exceeded at any monitoring site and when meteorological conditions indicate that there will be a continuance or recurrence of concentrations of the

same pollutant exceeding the emergency level during the subsequent 24-hour period.

4. Summary of emergency episode and significant harm levels:

Pollutant	Averaging Time	Alert	Warning	Emergency	Significant Harm
Carbon monoxide (mg/m ³)	1-hr	--	--	--	144
	4-hr	--	--	--	86.3
	8-hr	17	34	46	57.5
Nitrogen dioxide (ug/m ³)	1-hr	1,130	2,260	3,000	3,750
	24-hr	282	565	750	938
	1-hr	.2	.4	.5	.6
Ozone (ppm)	1-hr				
PM ₁₀ (ug/m ³)	24-hr	350	420	500	600
Sulfur dioxide (ug/m ³)	24-hr	800	1,600	2,100	2,620

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Editorial correction, subsection (B), paragraph (2) (Supp. 80-1). Editorial correction, subsection (A) (Supp. 80-2). Former Section R9-3-219 repealed, new Section R9-3-219 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-219 renumbered without change as Section R18-2-219 (Supp. 87-3). Section R18-2-220 renumbered from R18-2-219 and amended effective September 26, 1990 (Supp. 90-3).

ARTICLE 3. PERMITS AND PERMIT REVISIONS

R18-2-301. Definitions

The following definitions apply to this Article:

1. "Alternative method" means any method of sampling and analyzing for an air pollutant which is not a reference or equivalent method but which has been demonstrated to produce results adequate for the Director's determination of compliance in accordance with R18-2-311(D).
2. "Billable permit action" means the issuance or denial of a new permit, significant permit revision, or minor permit revision, or the renewal of an existing permit.
3. "Capacity factor" means the ratio of the average load on a machine or equipment for the period of time considered to the capacity rating of the machine or equipment.
4. "CEM" means a continuous emission monitoring system as defined in R18-2-101.
5. "Complete" means, in reference to an application for a permit, permit revision or registration, that the application contains all the information necessary for processing the application. Designating an application complete for purposes of a permit, permit revisions or registration processing does not preclude the Director from requesting or accepting any additional information.
6. "Dispersion technique" means any technique which attempts to affect the concentration of a pollutant in the ambient air by any of the following:
 - a. Using that portion of a stack which exceeds good engineering practice stack height;
 - b. Varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or
 - c. Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust

gases from several existing stacks into one stack; or other selective handling of exhaust gas streams so as to increase the exhaust gas plume rise. This shall not include any of the following:

- i. The reheating of a gas stream, following use of a pollution control system, for the purpose of returning the gas to the temperature at which it was originally discharged from the facility generating the gas stream.
 - ii. The merging of exhaust gas streams under any of the following conditions:
 - (1) The source owner or operator demonstrates that the facility was originally designed and constructed with such merged gas streams;
 - (2) After July 8, 1985, such merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant, applying only to the emission limitation for that pollutant; or
 - (3) Before July 8, 1985, such merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, an increase in the quantity of pollutants actually emitted prior to the merging, the reviewing agency shall presume that merging was significantly motivated by an intent to gain emissions credit for greater dispersion. Absent a demonstration by the source owner or operator that merging was not significantly motivated by such intent, the reviewing agency shall deny credit for the effects of such merging in calculating the allowable emissions for the source.
 - iii. Smoke management in agricultural or silvicultural prescribed burning programs.
 - iv. Episodic restrictions on residential woodburning and open burning.
 - v. Techniques which increase final exhaust gas plume rise where the resulting allowable emissions of sulfur dioxide from the facility do not exceed 5,000 tons per year.
7. "Emissions allowable under the permit" means a permit term or condition determined at issuance to be required by an applicable requirement that establishes an emissions limit (including a work practice standard) or an emissions cap that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject.
 8. "Fossil fuel-fired steam generator" means a furnace or boiler used in the process of burning fossil fuel for the primary purpose of producing steam by heat transfer.
 9. "Fuel oil" means Number 2 through Number 6 fuel oils as specified in ASTM D-396-90a (Specification for Fuel Oils), gas turbine fuel oils Numbers 2-GT through 4-GT as specified in ASTM D-2880-90a (Specification for Gas Turbine Fuel Oils), or diesel fuel oils Numbers 2-D and 4-D as specified in ASTM D-975-90a (Specification for Diesel Fuel Oils).
 10. "Itemized bill" means a breakdown of the permit processing time into the categories of pre-application activities, completeness review, substantive review, and public involvement activities, and within each category, a further breakdown by employee name.
 11. "Major source threshold" means the lowest applicable emissions rate for a pollutant that would cause the source to be a major source at the particular time and location, under the definition of major source in R18-2-101.
 12. "Maximum capacity to emit" means the maximum amount a source is capable of emitting under its physical and operational design without taking any limitations on operations or air pollution controls into account.
 13. "Maximum capacity to emit with any elective limits" means the maximum amount a source is capable of emitting under its physical and operational design taking into account the effect on emissions of any elective limits included in the source's registration under R18-2-302.01(F).
 14. "Minor NSR Modification" means any of the following changes that do not qualify as a major source or major modification:
 - a. Any physical change in or change in the method of operation of an emission unit or a stationary source that either:
 - i. Increases the potential to emit of a regulated minor NSR pollutant by an amount greater than or equal to the permitting exemption thresholds, or
 - ii. Results in emissions of a regulated minor NSR pollutant not previously emitted by such emission unit or stationary source in an amount greater than or equal to the permitting exemption thresholds.
 - b. Construction of one or more new emissions units that have the potential to emit regulated minor NSR pollutants at an amount greater than or equal to the permitting exemption threshold.
 - c. A change covered by subsection (12)(a) or (b) of this Section constitutes a minor NSR modification regardless of whether there will be a net decrease in total source emissions or a net increase in total source emissions that is less than the permitting exemption threshold as a result of decreases in the potential to emit of other emission units at the same stationary source.
 - d. For the purposes of this subsection (the) following do not constitute a physical change or change in the method of operation:
 - i. A change consisting solely of the construction of, or changes to, a combination of emissions units qualifying as a categorically exempt activity.
 - ii. For a stationary source that is required to obtain a Class II permit under R18-2-302 and that is subject to source-wide emissions caps under R18-2-306.01 or R18-2-306.02, a change that will not result in the violation of the existing emissions cap for that regulated minor NSR pollutant.
 - iii. Replacement of an emission unit by a unit with a potential to emit regulated minor NSR pollutants that is less than or equal to the potential to emit of the existing unit, provided the replace-

Department of Environmental Quality – Air Pollution Control

- ment does not cause an increase in emissions at other emission units at the stationary source. A unit installed under this provision is subject to any limits applicable to the unit it replaced.
- iv. Routine maintenance, repair, and replacement.
 - v. Use of an alternative fuel or raw material by reason of an order under Sections 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 792, or by reason of a natural gas curtailment plan under the Federal Power Act, 16 U.S.C. 792 to 825r.
 - vi. Use of an alternative fuel by reason of an order or rule under Section 125 of the Act.
 - vii. Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste.
 - viii. Use of an alternative fuel or raw material by a stationary source that either:
 - (1) The source was capable of accommodating before December 12, 1976, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter; or
 - (2) The source is approved to use under any permit issued under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
 - ix. An increase in the hours of operation or in the production rate, unless the change would be prohibited under any federally enforceable permit condition established after December 12, 1976, under 40 CFR 52.21, or under Articles 3 or 4 of this Chapter.
 - x. Any change in ownership at a stationary source
 - xi. The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, if the project complies with:
 - (1) The SIP, and
 - (2) Other requirements necessary to attain and maintain the national ambient air quality standards during the project and after it is terminated.
 - xii. For electric utility steam generating units located in attainment and unclassifiable areas only, the installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, if the project does not result in an increase in the potential to emit any regulated pollutant emitted by the unit. This exemption applies on a pollutant-by-pollutant basis.
 - xiii. For electric utility steam generating units located in attainment and unclassifiable areas only, the reactivation of a very clean coal-fired electric utility steam generating unit.
- e. For purposes of this subsection:
- i. “Potential to emit” means the lower of a source’s or emission unit’s potential to emit or its allowable emissions.
 - ii. In determining potential to emit, the fugitive emissions of a stationary source shall not be considered unless the source belongs to a section 302(j) category.
 - iii. All of the roadways located at a stationary source constitute a single emissions unit.
15. “NAICS” means the five- or six-digit North American Industry Classification System-United States, 1997, number for industries used by the U.S. Department of Commerce.
 16. “Permit processing time” means all time spent by Air Quality Division staff or consultants on tasks specifically related to the processing of an application for the issuance or renewal of a particular permit or permit revision, including time spent processing an application that is denied.
 17. “Quantifiable” means, with respect to emissions, including the emissions involved in equivalent emission limits and emission trades, capable of being measured or otherwise determined in terms of quantity and assessed in terms of character. Quantification may be based on emission factors, stack tests, monitored values, operating rates and averaging times, materials used in a process or production, modeling, or other reasonable measurement practices.
 18. “Registration” means a registration under R18-2-302.01.
 19. “Replicable” means, with respect to methods or procedures, sufficiently unambiguous that the same or equivalent results would be obtained by the application of the method or procedure by different users.
 20. “Responsible official” means one of the following:
 - a. For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either:
 - i. The facilities employ more than 250 persons or have gross annual sales or expenditures exceeding \$25 million (in second quarter 1980 dollars); or
 - ii. The delegation of authority to such representatives is approved in advance by the permitting authority;
 - b. For a partnership or sole proprietorship: a general partner or the proprietor, respectively;
 - c. For a municipality, state, federal, or other public agency: Either a principal executive officer or ranking elected official. For the purposes of this Article, a principal executive officer of a federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a Regional Administrator of EPA); or
 - d. For affected sources:
 - i. The designated representative in so far as actions, standards, requirements, or prohibitions under Title IV of the Act or the regulations promulgated thereunder are concerned; and
 - ii. The designated representative for any other purposes under 40 CFR 70.
 21. “Screening model” means air dispersion modeling performed with screening techniques in accordance with 40 CFR 51 Appendix W.
 22. “Small source” means a source with a potential to emit, without controls, less than the rate defined as permitting

exemption thresholds in R18-2-101, but required to obtain a permit solely because it is subject to a standard under 40 CFR 63.

23. “Startup” means the setting in operation of a source for any purpose.
24. “Synthetic minor” means a source with a permit that contains voluntarily accepted emissions limitations, controls, or other requirements (for example, a cap on production rates or hours of operation, or limits on the type of fuel) under R18-2-306.01 to reduce the potential to emit to a level below the major source threshold.

Historical Note

Former Section R18-2-301 renumbered to R18-2-302, new Section R18-2-301 adopted effective September 26, 1990 (Supp. 90-3). Correction to table in subsection (A)(13) (Supp. 93-1). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

Amended effective August 1, 1995 (Supp. 95-3). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-302. Applicability; Registration; Classes of Permits

- A. Except as otherwise provided in this Article, no person shall begin actual construction of, operate, or make a modification to any stationary source subject to regulation under this Article, without obtaining a registration, permit or permit revision from the Director.
- B. Class I and II permits and registrations shall be required as follows:
 1. A Class I permit shall be required for a person to begin actual construction of or operate any of the following:
 - a. Any major source,
 - b. Any solid waste incineration unit required to obtain a permit pursuant to Section 129(e) of the Act,
 - c. Any affected source, or
 - d. Any stationary source in a source category designated by the Administrator pursuant to 40 CFR 70.3 and adopted by the Director by rule.
 2. Unless a Class I permit is required, a Class II permit shall be required for:
 - a. A person to begin actual construction of or operate any stationary source that emits, or has the maximum capacity to emit with any elective limits, any regulated NSR pollutant in an amount greater than or equal to the significant level.
 - b. A person to make a physical or operational change to a stationary source that would cause the source to emit, or have the maximum capacity to emit with any elective limits, any regulated NSR pollutant in an amount greater than or equal to the significant level.
 - c. A person to begin actual construction of or modify a stationary source that otherwise would be subject to registration but that the Director has determined requires a permit under R18-2-302.01(C)(4) or (D).
 3. Unless a Class I or II permit is required, registration shall be required for:
 - a. A person to begin actual construction of or operate any stationary source that emits or has the maximum capacity to emit any regulated minor NSR pollutant

in an amount greater than or equal to a permitting exemption threshold.

- b. A person to begin actual construction of or operate any stationary source subject to a standard under section 111 of the Act, except that a stationary source is not required to register solely because it is subject to any of the following standards:
 - i. 40 CFR 60, Subpart AAA (Residential Wood Heaters).
 - ii. 40 CFR 60, Subpart IIII (Stationary Compression Ignition Internal Combustion Engines).
 - iii. 40 CFR 60, Subpart JJJJ (Stationary Spark Ignition Internal Combustion Engines).
 - iv. 40 CFR 60, Subpart QQQQ (Residential Hydronic Heaters and Forced-Air Furnaces).
- c. A person to begin actual construction of or operate any stationary source, including an area source, subject to a standard under section 112 of the Act, except that a stationary source is not required to register solely because it is subject to any of the following standards:
 - i. 40 CFR 61.145.
 - ii. 40 CFR 63, Subpart ZZZZ (Reciprocating Internal Combustion Engines).
 - iii. 40 CFR 63, Subpart WWWW (Ethylene Oxide Sterilizers).
 - iv. 40 CFR 63, Subpart CCCCCC (Gasoline Distribution).
 - v. 40 CFR 63, Subpart HHHHHH (Paint Stripping and Miscellaneous Surface Coating Operations).
 - vi. 40 CFR 63, Subpart JJJJJJ (Industrial, Commercial, and Institutional Boilers Area Sources), published at 76 FR 15554 (March 21, 2011).
 - vii. A regulation or requirement under section 112(r) of the Act.
- d. A physical or operational change to a source that would cause the source to emit or have the maximum capacity to emit any regulated minor NSR pollutant in an amount greater than or equal to the permitting exemption threshold.
- C. Notwithstanding subsections (A) and (B), the following stationary sources do not require a permit or registration unless the source is a major source, or unless operation without a permit would result in a violation of the Act:
 1. A stationary source that consists solely of a single categorically exempt activity plus any combination of trivial activities.
 2. Agricultural equipment used in normal farm operations. “Agricultural equipment used in normal farm operations” does not include equipment classified as a source that requires a permit under Title V of the Act, or that is subject to a standard under 40 CFR 60, 61 or 63.
- D. No person may construct or reconstruct any major source of hazardous air pollutants, unless the Director determines that maximum achievable control technology emission limitation (MACT) for new sources under Section 112 of the Act will be met. If MACT has not been established by the Administrator, such determination shall be made on a case-by-case basis pursuant to 40 CFR 63.40 through 63.44, as incorporated by reference in R18-2-1101(B). For purposes of this subsection, constructing and reconstructing a major source shall have the meaning prescribed in 40 CFR 63.41.
- E. Elective limits or controls adopted under R18-2-302.01(F) shall not be considered in determining whether a source

requires registration or a Class I permit but shall be considered in determining any of the following:

1. Whether the registration is subject to the public participation requirements of R18-2-330, as provided in R18-2-302.01(B)(3).
 2. Whether review for possible interference with attainment or maintenance of ambient standards is required under R18-2-302.01(C).
 3. Whether the source requires a Class II permit, as provided in subsection (B)(2)(a) or (b).
- F.** The fugitive emissions of a stationary source shall not be considered in determining whether the source requires a Class II permit under subsection (B)(2)(a) or (b) or a registration under subsection (B)(3)(a) or (d), unless the source belongs to a section 302(j) category. If a permit is required for a stationary source, the fugitive emissions of the source shall be subject to all of the requirements of this Article.
- G.** Notwithstanding subsections (A) and (B) of this Section, a person may begin actual construction, but not operation, of a source requiring a Class I permit or Class I permit revision upon the Director's issuance of the proposed final permit or proposed final permit revision.

Historical Note

Amended effective August 7, 1975 (Supp. 75-1).
 Amended as an emergency effective December 15, 1975 (Supp. 75-2). Amended effective May 10, 1976 (Supp. 76-3). Amended effective April 12, 1977 (Supp. 77-2).
 Amended effective March 24, 1978 (Supp. 78-2). Former Section R9-3-301 repealed, new Section R9-3-301 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended effective May 28, 1982 (Supp. 82-3). Amended subsections (B) and (C) effective September 22, 1983 (Supp. 83-5). Amended subsection (B), paragraph (3) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-301 renumbered without change as Section R18-2-301 (Supp. 87-3). Former Section R18-2-302 renumbered to R18-2-302.01, new Section R18-2-302 renumbered from R18-2-301 and amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-302.01. Source Registration Requirements

- A.** Application. An application for registration shall be submitted on the form specified by the Director and shall include the following information:
1. The name of the applicant.
 2. The physical location of the source, including the street address, city, county, zip code and latitude and longitude coordinates.
 3. The source's maximum capacity to emit with any elective limits each regulated minor NSR pollutant.
 4. Identification of any elective limits or controls adopted under subsection (F).
 5. In the case of a modification, each increase in the source's maximum capacity to emit with any elective limits that exceeds the applicable threshold in subsection (G)(1)(a).
 6. Identification of the method used to determine the maximum capacity to emit under R18-2-302(B)(3)(a), a

change in the maximum capacity to emit under R18-2-302(B)(3)(d), or the maximum capacity to emit with any elective limits under subsection (G)(1)(a) of this Section.

7. Process information for the source, including a list of emission units, design capacity, operations schedule, and identification of emissions control devices.

B. Registration Processing Procedures.

1. The Department shall complete a review of a registration application for administrative completeness within 30 calendar days, calculated in accordance with A.A.C. R18-1-503, after its receipt.
 2. The Department shall complete a substantive review and take final action on a registration application within 60 calendar days if no hearing is requested, and 90 calendar days if a hearing is requested, calculated in accordance with A.A.C. R18-1-504, after the application is administratively complete.
 3. Except as provided in subsection (B)(5), a registration for construction of a source shall be subject to the public notice and participation requirements of R18-2-330. The materials relevant to the registration decision made available to the public under R18-2-330(D) shall include any determination made or modeling conducted by the Director under subsection (C).
 4. The Department shall also send a copy of the notice required by subsection (B)(3) to the administrator through the appropriate regional office, and to all other state and local air pollution control agencies having jurisdiction in the region in which the source subject to the registration will be located. The notice shall also be sent to any other agency in the region having responsibility for implementing the procedures required under 40 CFR 51, I.
 5. A registration for construction of a source shall not be subject to subsection (B)(3) or (4), if the source's maximum capacity to emit with any elective limits each regulated minor NSR pollutant is less than the applicable permitting exemption threshold.
- C.** Review for National Ambient Air Quality Standards Compliance; Requirement to Obtain a Permit.
1. The Director shall review each application for registration of a source with the maximum capacity to emit with any elective limits any regulated minor NSR pollutant in an amount equal to or greater than the permitting exemption threshold. The purpose of the review shall be to determine whether the new or modified source may interfere with attainment or maintenance of a national ambient air quality standard in Arizona or any affected state or Indian reservation. In making the determination required by this subsection, the Director shall take into account the following factors:
 - a. The source's emission rates, including fugitive emission rates, taking into account any elective limits or controls adopted under subsection (F).
 - b. The location of emission units within the facility and their proximity to the ambient air.
 - c. The terrain in which the source is or will be located.
 - d. The source type.
 - e. The location and emissions of nearby sources.
 - f. Background concentrations of regulated minor NSR pollutants.
 2. The Director may undertake the review specified in subsection (C)(1) for a source with the maximum capacity to emit with any elective limits regulated minor NSR pollutants in an amount less than the permitting exemption threshold.

3. If the Director determines under subsection (C)(1) or (C)(2) that a source's emissions may interfere with attainment or maintenance of a national ambient air quality standard, the Director shall perform a screening model run for each regulated minor NSR pollutant for which that determination has been made.
 4. If the Director determines, based on performance of the screening model pursuant to subsection (C)(3), that a source's emissions, taking into account any elective limits or controls adopted under subsection (F), will interfere with attainment or maintenance of a national ambient air quality standard, the Director shall deny the application for registration. Notwithstanding R18-2-302(B)(3), the owner or operator of the source shall be required to obtain a permit under R18-2-302 and shall comply with R18-2-334 before beginning actual construction of the source or modification.
- D. Requirement to Obtain a Permit.** Notwithstanding R18-2-302(B)(3)(b) and (c), the Director shall deny an application for registration for a source subject to a standard under section 111 or 112 of the Act and require the owner or operator to obtain a permit under R18-2-302, if the Director determines based on the following factors that the requirement to obtain a permit is warranted:
1. The size and complexity of the source.
 2. The complexity of the section 111 or 112 standard applicable to the source.
 3. The public health or environmental risks posed by the pollutants subject to regulation under the section 111 or 112 standard.
- E. Registration Contents.** A registration shall contain the following elements:
1. Enforceable emission limitations and standards, including operational requirements and limitations, that ensure compliance with all applicable SIP requirements at the time of issuance and any testing, monitoring, recordkeeping and reporting obligations imposed by the applicable requirement or by R18-2-312.
 2. Any elective limits or controls and associated operating, maintenance, monitoring and recordkeeping requirements adopted pursuant to subsection (F).
 3. A requirement to retain any records required by the registration at the source for at least three years in a form that is suitable for expeditious inspection and review.
 4. For any source that has adopted elective limits or controls under subsection (F), a requirement to submit an annual compliance report on the form provided by the Director in the registration.
- F. Elective Limits or Controls.** The owner or operator of a source requiring registration may elect to include any of the following emission limitations in the registration, provided the Department approves the limitation and the registration also includes the operating, maintenance, monitoring, and recordkeeping requirements specified below for the limitation.
1. A limitation on the hours of operation of any process or combination of processes.
 - a. The registration shall express the limitation in terms of hours per rolling 12-month period and shall specify the process or combination of processes subject to the limitation.
 - b. The owner or operator shall maintain a log or readily available business records showing actual operating hours through the preceding operating day for the process or processes subject to the limitation.
 2. A limitation on the production rate for any process or combination of processes.
 - a. The registration shall express the limitation in terms of an appropriate unit of mass or production per rolling 12-month period and shall specify the process or combination of processes subject to the limitation.
 - b. The owner or operator shall maintain a log or readily available business records showing the actual production rate through the preceding operating day for the process or processes subject to the limitation. The owner or operator shall update the log or business records at least once per operating day.
3. A requirement to operate a fabric filter for the control of particulate matter emissions.
- a. The owner or operator shall operate the fabric filter at all times that the emission unit controlled by the fabric filter is operated.
 - b. The owner or operator shall inspect the fabric filter at least once per month for tears and leaks and shall promptly repair any tears or leaks identified. If the fabric filter is subject to a limit on the opacity of emissions, the inspection shall include an opacity observation in accordance with the applicable reference method.
 - c. The owner or operator shall operate and maintain the fabric filter in substantial compliance with the manufacturer's operation and maintenance recommendations.
 - d. The owner or operator shall keep a log or readily available business records of the inspections required by subsection (F)(3)(b) and the maintenance activities required by subsection (F)(3)(c). The owner or operator shall update the log or business records within 24 hours after an inspection or maintenance activity is performed.
 - e. The registration shall identify the fabric filters and processes subject to this requirement.
4. Limitations on the total amount of VOC or hazardous air pollutants in solvents, coatings or other process materials used at the registered source.
- a. The registration shall identify the pollutants and processes covered by the limitations and shall express the limitations in terms of pounds per rolling 12-month period.
 - b. The owner or operator shall maintain a log or readily available business records showing the concentration of each covered VOC or hazardous air pollutant in each VOC or hazardous air pollutant containing material used at the source. The owner or operator shall update the records whenever the concentration in any material changes or a new material is used. The presence at the source of a current material safety data sheet for a material used without dilution or other alteration satisfies this requirement.
 - c. The owner or operator shall maintain a spreadsheet or database to record the amount of each material containing a covered VOC or hazardous air pollutant used. The spreadsheet or database shall calculate the total pounds of the VOC or hazardous air pollutant used by multiplying the concentration of VOC or hazardous air pollutant in a material by the amount of material used and shall employ appropriate units of measurement and conversion factors. The owner or operator shall update the spreadsheet or database at least once per operating day.
- G. Revised Registrations.**
1. Unless a Class II permit is required under R18-2-302(B)(2)(b), the owner or operator of a registered source

shall file a revised registration on the occurrence of any of the following:

- a. A modification to the source that would result in an increase in the source's maximum capacity to emit with any elective limits exceeding any of the following amounts:
 - i. 2.5 tons per year for NO_x, SO₂, PM₁₀, PM_{2.5}, VOC or CO.
 - ii. 0.3 tons per year for lead.
 - b. Relocation of a portable source.
 - c. The transfer of the source to a new owner.
2. The requirements of subsection (B) shall not apply to a revised registration. The owner or operator may begin actual construction and operation of the modified, relocated or transferred source on filing the revised registration.

H. Registration Term.

1. A source's registration shall expire five years after the date of issuance of the last registration for the source or any modification to the source.
2. A source shall submit an application for renewal of a registration not later than six months before expiration of the registration's term.
3. If a source submits a timely and complete application for renewal of a registration, the source's authorization to operate under its existing registration shall continue until the Director takes final action on the application.
4. The Director may terminate a registration under R18-2-321(C). If the Director terminates a registration under R18-2-321(C)(3), the owner or operator shall be required to apply for a permit for the source under R18-2-302.

- I. Issuance of a registration shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.

Historical Note

Amended effective August 7, 1975 (Supp. 75-1); Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective October 2, 1979 (Supp. 79-5). Former Section R9-3-302 repealed, new Section R9-3-302 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-302 renumbered without change as Section R18-2-302 (Supp. 87-3). Section R18-2-302.01 renumbered from Section R18-2-302 and amended effective September 26, 1990 (Supp. 90-3). Section repealed effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-303. Transition from Installation and Operating Permit Program to Unitary Permit Program; Registration Transition; Minor NSR Transition

- A. An installation or operating permit issued before September 1, 1993, and the authority to operate, as provided in Laws 1992, Ch. 299, § 65, continues in effect until the installation or operating permit is terminated, or until the Director issues or denies a Class I or Class II permit to the source, whichever is earlier.
- B. The terms and conditions of installation permits issued before September 1, 1993, or in permits or permit revisions issued under R18-2-302 and authorizing the construction or modification of a stationary source, remain federal applicable requirements unless modified or revoked by the Director.

- C. All sources in existence on September 1, 2012, requiring a registration shall provide notice to the Director by no later than December 1, 2012, on a form provided by the Director.
- D. All sources requiring a registration that are in existence on the date R18-2-302.01 becomes effective under R18-2-302.01(I) may submit applications for registration at any time after R18-2-302.01 is effective and shall submit an application no later than 180 days after receipt of written notice from the Director that an application is required.
- E. Sources in existence on December 2, 2015 are not subject to R18-2-334, unless the source undertakes a minor NSR modification after that date. Notwithstanding any other provision of this Chapter, R18-2-334 shall apply only to applications for permits or permit revisions filed after December 2, 2015.

Historical Note

Amended effective August 7, 1975 (Supp. 75-1). Amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-303 repealed, new Section R9-3-303 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-303 repealed, new Section R9-3-303 adopted effective October 2, 1979 (Supp. 79-5). Amended effective May 28, 1982 (Supp. 82-3). Amended subsection (D), paragraph (1) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-303 renumbered without change as Section R18-2-303 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-304. Permit Application Processing Procedures

- A. Unless otherwise noted, this Section applies to each source requiring a Class I or II permit or permit revision.
- B. Standard Application Form and Required Information. To apply for a permit required by this Chapter, applicants shall complete the applicable standard application form provided by the Director and supply all information required by the form's filing instructions. The application forms and filing instructions for Class I Permits shall at a minimum require submission of the following elements:
 1. Identifying information, including company name and address (or plant name and address if different from the company name), owner's name and agent, and telephone number and names of plant site manager/contact.
 2. A description of the source's processes and products (by Standard Industrial Classification (SIC) Code), including those associated with any proposed alternative operating scenarios (AOS) identified by the source.
 3. The following emission-related information:
 - a. All emissions of pollutants for which the source is major, and all emissions of regulated air pollutants. A permit application shall describe all emissions of regulated air pollutants emitted from any emissions unit, except as otherwise provided in R18-2-304(F)(8). The Director shall require additional information related to the emissions of air pollutants sufficient to verify which requirements are applicable to the source, and other information necessary to collect any permit fees owed under R18-2-326.
 - b. Identification and description of all points of emissions described in subsection (B)(3)(a) of this section in sufficient detail to establish the basis for fees and applicability of requirements.

- c. Emissions rate in tons per year (tpy) and in such terms as are necessary to establish compliance consistent with the applicable standard reference test method. For emissions units subject to an annual emissions cap, tpy can be reported as part of the aggregate emissions associated with the cap, except where more specific information is needed, including where necessary to determine and/or assure compliance with an applicable requirement.
- d. The following information to the extent it is needed to determine or regulate emissions: fuels, fuel use, raw materials, production rates, and operating schedules.
- e. Identification and description of air pollution control equipment and compliance monitoring devices or activities.
- f. Limitations on source operation affecting emissions or any work practice standards, where applicable, for all regulated pollutants at the Class I source.
- g. Other information required by any applicable requirement (including information related to stack height limitations in R18-2-332).
- h. Calculations on which the information in subsections (B)(3)(a) through (g) of this section is based.
- 4. The following air pollution control requirements:
 - a. Citation and description of all applicable requirements, and
 - b. Description of or reference to any applicable test method for determining compliance with each applicable requirement.
- 5. Other specific information that may be necessary to implement and enforce other applicable requirements or to determine the applicability of such requirements.
- 6. An explanation of any proposed exemptions from otherwise applicable requirements.
- 7. Additional information as determined to be necessary by the Director to define proposed AOS identified by the source pursuant to R18-2-306(A)(11) or to define permit terms and conditions implementing any AOS under R18-2-306(A)(11) or implementing R18-2-317, R18-2-306(A)(12), R18-2-306(A)(14), or R18-2-306.02. The permit application shall include documentation demonstrating that the source has obtained all authorizations required under the applicable requirements relevant to any proposed AOS, or a certification that the source has submitted all relevant materials to the Director for obtaining such authorizations.
- 8. A compliance plan for all Class I sources that contains all of the following:
 - a. A description of the compliance status of the source with respect to all applicable requirements.
 - b. A description as follows:
 - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements.
 - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis.
 - iii. For requirements for which the source is not in compliance at the time of permit issuance, a narrative description of how the source will achieve compliance with such requirements.
 - iv. For applicable requirements associated with a proposed AOS, a statement that the source will meet such requirements upon implementation of the AOS. If a proposed AOS would implicate an applicable requirement that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis.
- c. A compliance schedule as follows:
 - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements.
 - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet, in a timely manner, applicable requirements that become effective during the permit term shall satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement.
 - iii. A schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. Such a schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction non-compliance with, the applicable requirements on which it is based.
 - iv. For applicable requirements associated with a proposed AOS, a statement that the source will meet such requirements upon implementation of the AOS. If a proposed AOS would implicate an applicable requirement that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet, in a timely manner, applicable requirements that become effective during the permit term will satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement.
- d. A schedule for submission of certified progress reports no less frequently than every 6 months for sources required to have a schedule of compliance to remedy a violation.
- e. The compliance plan content requirements specified in subsection (B)(8) shall apply and be included in the acid rain portion of a compliance plan for an affected source, except as specifically superseded by regulations promulgated under title IV of the Act with regard to the schedule and methods the source will use to achieve compliance with the acid rain emissions limitations.
- 9. Requirements for compliance certification, including the following:
 - a. A certification of compliance with all applicable requirements by a responsible official, which shall include:

- i. Identification of the applicable requirement that is the basis of the certification;
 - ii. The method used for determining the compliance status of the source, including a description of monitoring, recordkeeping, and reporting requirements and test methods;
 - iii. The compliance status; and
 - iv. Such other facts as the Director may require;
 - b. A schedule for submission of compliance certifications during the permit term, to be submitted no less frequently than annually, or more frequently if specified by the underlying applicable requirement or by the permitting authority;
 - c. A statement indicating the source's compliance status with any applicable enhanced monitoring and compliance certification requirements of the Act; and
 - d. A certification of truth, accuracy, and completeness pursuant to R18-2-304(I).
 10. The use of nationally-standardized forms for acid rain portions of permit applications and compliance plans, as required by regulations promulgated under title IV of the act.
- C. The Director, either upon the Director's own initiative or on the request of a permit applicant, may waive a requirement that specific information or data be submitted in the application for a Class II permit for a particular source or category of sources if the Director determines that the information or data would be unnecessary to determine all of the following:
1. The applicable requirements to which the source may be subject;
 2. That the source is so designed, controlled, or equipped with such air pollution control equipment that it may be expected to operate without emitting or without causing to be emitted air contaminants in violation of the provisions of A.R.S. Title 49, Chapter 3, Article 2 and this Chapter;
 3. The fees to which the source may be subject; and
 4. A proposed emission limitation, control, or other requirement that meets the requirements of R18-2-306.01 or R18-2-306.02.
- D. A timely application is:
1. For a source, that becomes subject to the permit program as a result of a change in regulation and not as a result of construction or a physical or operational change, one that is submitted within 12 months after the source becomes subject to the permit program.
 2. For purposes of permit renewal, a timely application is one that is submitted at least six months, but not more than 18 months, prior to the date of permit expiration.
 3. Any source under R18-2-326(A)(3) which becomes subject to a standard promulgated by the Administrator pursuant to section 112(d) of the Act shall, within 12 months of the date on which the standard is promulgated, submit an application for a permit revision demonstrating how the source will comply with the standard.
- E. If an applicable implementation plan allows the determination of an alternative emission limit, a source may, in its application, propose an emission limit that is equivalent to the emission limit otherwise applicable to the source under the applicable implementation plan. The source shall also demonstrate that the equivalent limit is quantifiable, accountable, enforceable, and subject to replicable compliance determination procedures.
- F. A complete application shall comply with all of the following:
1. To be complete, an application shall provide all information required by subsection (B) (standard application form section). An application for permit revision only need supply information related to the proposed change, unless the source's proposed permit revision will change the permit from a Class II permit to a Class I permit. A responsible official shall certify the submitted information consistent with subsection (H) (Certification of Truth, Accuracy, and Completeness).
 2. An application for a new permit or permit revision shall contain an assessment of the applicability of the requirements of Article 4 of this Chapter. If the applicant determines that the proposed new source is a major source as defined in R18-2-401, or the proposed permit revision constitutes a major modification as defined in R18-2-101, then the application shall comply with all applicable requirements of Article 4.
 3. An application for a new permit or permit revision shall contain an assessment of the applicability of Minor New Source Review requirements in R18-2-334. If the applicant determines that the proposed new source is subject to R18-2-334, or the proposed permit revision constitutes a Minor NSR Modification, then the application shall comply with all applicable requirements of R18-2-334.
 4. Except for proposed new major sources or major modifications subject to the requirements of Article 4 of this Chapter, an application for a new permit, a permit revision, or a permit renewal shall be deemed to be complete unless, within 60 days of receipt of the application, the Director notifies the applicant by certified mail that the application is not complete.
 5. If a source wishes to voluntarily enter into an emissions limitation, control, or other requirement pursuant to R18-2-306.01, the source shall describe that emissions limitation, control, or other requirement in its application, along with proposed associated monitoring, recordkeeping, and reporting requirements necessary to demonstrate that the emissions limitation, control, or other requirement is permanent, quantifiable, and otherwise enforceable as a practical matter.
 6. If, while processing an application that has been determined or deemed to be complete, the Director determines that additional information is necessary to evaluate or take final action on that application, the Director may request such information in writing and set a reasonable deadline for a response. Except for minor permit revisions as set forth in R18-2-319, a source's ability to continue operating without a permit, as set forth in subsection (J), shall be in effect from the date the application is determined to be complete until the final permit is issued, provided that the applicant submits any requested additional information by the deadline specified by the Director.
 7. The completeness determination shall not apply to revisions processed through the minor permit revision process.
 8. Activities which are insignificant pursuant to the definition of insignificant activities in R18-2-101 shall be listed in the application. Except as necessary to complete the assessment required by subsection (E)(2) or (3), the application need not provide emissions data regarding insignificant activities. If the Director determines that an activity listed as insignificant does not meet the requirements of the definition of insignificant activities in R18-2-101 or that emissions data for the activity is required to complete the assessment required by subsection (E)(2) or

- (3), the Director shall notify the applicant in writing and specify additional information required.
9. If a permit applicant requests terms and conditions allowing for the trading of emission increases and decreases in the permitted facility solely for the purpose of complying with a federally enforceable emission cap that is established in the permit independent of otherwise applicable requirements, the permit applicant shall include in its application proposed replicable procedures and permit terms that ensure the emissions trades are quantifiable and enforceable.
 10. The Director is not in disagreement with a notice of confidentiality submitted with the application pursuant to A.R.S. § 49-432.
- G.** A source applying for a Class I permit that has submitted information with an application under a claim of confidentiality pursuant to A.R.S. § 49-432 and R18-2-305 shall submit a copy of such information directly to the Administrator.
- H.** Duty to Supplement or Correct Application. Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a proposed permit.
- I.** Certification of Truth, Accuracy, and Completeness. Any application form, report, or compliance certification submitted pursuant to this Chapter shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this Article shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- J.** Action on Application.
1. The Director shall issue or deny each permit according to the provisions of A.R.S. § 49-427. The Director may issue a permit with a compliance schedule for a source that is not in compliance with all applicable requirements at the time of permit issuance.
 2. In addition, a permit may be issued, revised, or renewed only if all of the following conditions have been met:
 - a. The application received by the Director for a permit, permit revision, or permit renewal shall be complete according to subsection (E).
 - b. Except for revisions qualifying as administrative or minor under R18-2-318 and R18-2-319, all of the requirements for public notice and participation under R18-2-330 shall have been met.
 - c. For Class I permits, the Director shall have complied with the requirements of R18-2-307 for notifying and responding to affected states, and if applicable, other notification requirements of R18-2-402(D)(2) and R18-2-410(C)(2).
 - d. For Class I and II permits, the conditions of the permit shall require compliance with all applicable requirements.
 - e. For permits for which an application is required to be submitted to the Administrator under R18-2-307(A), and to which the Administrator has properly objected to its issuance in writing within 45 days of receipt of the proposed final permit and all necessary supporting information from the Department, the Director has revised and submitted a proposed final permit in response to the objection and EPA has not objected to this proposed final permit within 45 days of receipt.
- f. For permits to which the Administrator has objected to issuance pursuant to a petition filed under 40 CFR 70.8(d), the Administrator's objection has been resolved.
- g. For a Class II permit that contains voluntary emission limitations, controls, or other requirements established pursuant to R18-2-306.01, the Director shall have complied with the requirement of R18-2-306.01(C) to provide the Administrator with a copy of the proposed permit.
3. If the Director denies a permit under this Section, a notice shall be served on the applicant by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the denial and a statement that the permit applicant is entitled to a hearing.
 4. The Director shall provide a statement that sets forth the legal and factual basis for the proposed permit conditions including references to the applicable statutory or regulatory provisions. The Director shall send this statement to any person who requests it and, for Class I permits, to the Administrator.
 5. Priority shall be given by the Director to taking action on applications for construction or modification submitted pursuant to Title I, Parts C (Prevention of Significant Deterioration) and D (New Source Review) of the Act.
- K.** Requirement for a Permit. Except as noted under the provisions in R18-2-317 and R18-2-319, no source may operate after the time that it is required to submit a timely and complete application, except in compliance with a permit issued pursuant to this Chapter. However, if a source under R18-2-326(A)(3) submits a timely and complete application for continued operation under a permit revision or renewal, the source's failure to have a permit is not a violation of this Article until the Director takes final action on the application. This protection shall cease to apply if, subsequent to the completeness determination, the applicant fails to submit, by the deadline specified in writing by the Director, any additional information identified as being needed to process the application. This subsection does not affect a source's obligation to obtain a permit revision before making a modification to the source.

Historical Note

Amended effective August 7, 1975 (Supp. 75-1). Former Section R9-3-304 repealed, new Section R9-3-304 formerly Section R9-3-305 renumbered and amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-304 repealed, new Section R9-3-304 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-304 repealed, new Section R9-3-304 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-304 renumbered without change as Section R18-2-304 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp. 95-3). The reference to R18-2-101(54) in subsection (E)(8) corrected to reference R18-2-101(57) (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21,

2017 (Supp. 17-1).

R18-2-305. Public Records; Confidentiality

- A. The Director shall make all permits, including all elements required to be in the permit pursuant to R18-2-306, available to the public. No permit shall be issued unless the information required by R18-2-306 is present in the permit.
- B. A notice of confidentiality pursuant to A.R.S. § 49-432(C) shall:
 1. Precisely identify the information in the documents submitted which is considered confidential.
 2. Contain sufficient supporting information to allow the Director to evaluate whether such information satisfies the requirements related to trade secrets or, if applicable, how the information, if disclosed, is likely to cause substantial harm to the person's competitive position.
- C. Within 30 days of receipt of a notice of confidentiality that complies with subsection (B) above, the Director shall make a determination as to whether the information satisfies the requirements for trade secret or competitive position pursuant to A.R.S. § 49-432(C)(1) and so notify the applicant in writing. If the Director agrees with the applicant that the information covered by the notice of confidentiality satisfies the statutory requirements, the Director shall include a notice in the file for the permit or permit application that certain information has been considered confidential.
- D. If the Director takes action pursuant to A.R.S. § 49-432(D) and obtains a final order authorizing disclosure, the Director shall place the information in the public file and shall notify any person who has requested disclosure. If the court determines that the information is not subject to disclosure, the Director shall provide the notice specified in subsection (C) above.

Historical Note

Amended effective August 7, 1975 (Supp. 75-1).
 Amended as an emergency effective December 15, 1975 (Supp. 75-2). Amended effective May 10, 1976 (Supp. 76-3). Former Section R9-3-306 renumbered as Section R9-3-305 effective August 6, 1976. References changed to conform (Supp. 76-4). Amended effective April 12, 1977 (Supp. 77-2). Amended effective March 24, 1978 (Supp. 78-2). Former Section R9-3-305 repealed, new Section R9-3-305 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-305 repealed, new Section R9-3-305 adopted effective May 28, 1982 (Supp. 82-3). Former Section R9-3-305 renumbered without change as R18-2-305 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-306. Permit Contents

- A. Each permit issued by the Director shall include the following elements:
 1. The date of issuance and the permit term.
 2. Enforceable emission limitations and standards, including operational requirements and limitations that ensure compliance with all applicable requirements at the time of issuance and operational requirements and limitations that have been voluntarily accepted under R18-2-306.01.
 - a. The permit shall specify and reference the origin of and authority for each term or condition and identify any difference in form as compared to the applicable requirement upon which the term or condition is based.
 - b. The permit shall state that, if an applicable requirement of the Act is more stringent than an applicable requirement of regulations promulgated under Title

IV of the Act, both provisions shall be incorporated into the permit and shall be enforceable by the Administrator.

- c. Any permit containing an equivalency demonstration for an alternative emission limit submitted under R18-2-304(E) shall contain provisions to ensure that any resulting emissions limit has been demonstrated to be quantifiable, accountable, enforceable, and based on replicable procedures.
 - d. The permit shall specify applicable requirements for fugitive emission limitations, regardless of whether the source category in question is included in the list of sources contained in the definition of major source in R18-2-101.
3. Each permit shall contain the following requirements with respect to monitoring:
 - a. All monitoring and analysis procedures or test methods required under applicable monitoring and testing requirements, including:
 - i. Monitoring and analysis procedures or test methods under 40 CFR 64;
 - ii. Other procedures and methods promulgated under sections 114(a)(3) or 504(b) of the Act; and
 - iii. Monitoring and analysis procedures or test methods required under R18-2-306.01.
 - b. 40 CFR 64 as adopted July 1, 1998, is incorporated by reference and on file with the Department and the Office of the Secretary of State. This incorporation by reference contains no future editions or amendments. If more than one monitoring or testing requirement applies, the permit may specify a streamlined set of monitoring or testing provisions if the specified monitoring or testing is adequate to assure compliance at least to the same extent as the monitoring or testing applicable requirements not included in the permit as a result of such streamlining;
 - c. If the applicable requirement does not require periodic testing or instrumental or noninstrumental monitoring (which may consist of recordkeeping designed to serve as monitoring), periodic monitoring sufficient to yield reliable data from the relevant time period that are representative of the source's compliance with the permit as reported under subsection (A)(4). The monitoring requirements shall ensure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the applicable requirement, and as otherwise required under R18-2-306.01. Recordkeeping provisions may be sufficient to meet the requirements of this subsection; and
 - d. As necessary, requirements concerning the use, maintenance, and, if appropriate, installation of monitoring equipment or methods.
 4. The permit shall incorporate all applicable recordkeeping requirements including recordkeeping requirements established under R18-2-306.01, for the following:
 - a. Records of required monitoring information that include the following:
 - i. The date, place as defined in the permit, and time of sampling or measurement;
 - ii. The date any analyses was performed;
 - iii. The name of the company or entity that performed the analysis;

- iv. A description of the analytical technique or method used;
- v. The results of any analysis; and
- vi. The operating conditions existing at the time of sampling or measurement;
- b. Retention of records of all required monitoring data and support information for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by the permit.
- 5. The permit shall incorporate all applicable reporting requirements including reporting requirements established under R18-2-306.01 and require the following:
 - a. Submittal of reports of any required monitoring. All instances of deviations from permit requirements shall be clearly identified in the reports. All required reports shall be certified by a responsible official consistent with R18-2-304(I) and R18-2-309(A)(5) and shall be submitted with the following frequency:
 - i. For a Class I permit, at least once every six months;
 - ii. For a Class II permit, at least once per year.
 - b. Prompt reporting of deviations from permit requirements, including those attributable to upset conditions as defined in the permit, the probable cause of the deviations, and any corrective actions or preventive measures taken. Where the applicable requirement contains a definition of prompt or otherwise specifies a timeframe for reporting deviations, that definition or timeframe shall govern. Where the applicable requirement does not address the timeframe for reporting deviations, the permittee shall submit reports of deviations in compliance with the following schedule:
 - i. Notice that complies with timeframe in R18-2-310.01(A) is prompt for deviations that constitute excess emissions;
 - ii. Except as otherwise provided in the permit, notice that complies with subsection (A)(5)(a) is prompt for all other types of deviation.
- 6. A permit condition prohibiting emissions exceeding any allowances the source lawfully holds under Title IV of the Act or the regulations promulgated thereunder.
 - a. A permit revision is not required for increases in emissions that are authorized by allowances acquired under the acid rain program, if the increases do not require a permit revision under any other applicable requirement.
 - b. A limit shall not be placed on the number of allowances held by the source. The source shall not, however, use allowances as a defense to noncompliance with any other applicable requirement.
 - c. Any allowance shall be accounted for according to the procedures established in regulations promulgated under Title IV of the Act.
 - d. Any permit issued under the requirements of this Chapter and Title V of the Act to a unit subject to the provisions of Title IV of the Act shall include conditions prohibiting all of the following:
 - i. Annual emissions of sulfur dioxide in excess of the number of allowances to emit sulfur dioxide held by the owner or operator of the unit or the designated representative of the owner or operator,
 - ii. Exceedances of applicable emission rates,
 - iii. Use of any allowance before the year for which it is allocated, and
 - iv. Contravention of any other provision of the permit.
- 7. A severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portion of the permit.
- 8. Provisions stating the following:
 - a. The permittee shall comply with all conditions of the permit including all applicable requirements of Arizona air quality statutes A.R.S. Title 49, Chapter 3, and the air quality rules, 18 A.A.C. 2. Any permit noncompliance is grounds for enforcement action; for a permit termination, revocation and reissuance, or revision; or for denial of a permit renewal application. Noncompliance with any federally enforceable requirement in a permit is a violation of the Act.
 - b. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit.
 - c. The permit may be revised, reopened, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit revision, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
 - d. The permit does not convey any property rights of any sort, or any exclusive privilege to the permit holder.
 - e. The permittee shall furnish to the Director, within a reasonable time, any information that the Director may request in writing to determine whether cause exists for revising, revoking and reissuing, or terminating the permit, or to determine compliance with the permit. Upon the Director's request, the permittee shall also furnish to the Director copies of records required to be kept by the permit. For information claimed to be confidential, the permittee shall furnish a copy of the records directly to the Administrator along with a claim of confidentiality.
 - f. For any major source operating in a nonattainment area for all pollutants for which the source is classified as a major source, the source shall comply with reasonably available control technology.
- 9. A provision to ensure that the source pays fees to the Director under A.R.S. § 49-426(E), R18-2-326, and R18-2-511.
- 10. A provision stating that a permit revision shall not be required under any approved economic incentives, marketable permits, emissions trading, and other similar programs or processes for changes provided for in the permit.
- 11. Terms and conditions for reasonably anticipated operating scenarios identified by the source in its application as approved by the Director. The terms and conditions shall:
 - a. Require the source, contemporaneously with making a change from one operating scenario to another, to record in a log at the permitted facility a record of the scenario under which it is operating;

- b. Extend the permit shield described in R18-2-325 to all terms and conditions under each such operating scenario; and
 - c. Ensure that the terms and conditions of each such alternative scenario meet all applicable requirements and the requirements of this Chapter.
 - 12. Terms and conditions, if the permit applicant requests them, and as approved by the Director, for the trading of emissions increases and decreases in the permitted facility, to the extent that the applicable requirements provide for trading the increases and decreases without a case-by-case approval of each emissions trade. The terms and conditions:
 - a. Shall include all terms required under subsections (A) and (C) to determine compliance;
 - b. Shall not extend the permit shield in subsection (D) to all terms and conditions that allow the increases and decreases in emissions;
 - c. Shall not include trading that involves emission units for which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades; and
 - d. Shall meet all applicable requirements and requirements of this Chapter.
 - 13. Terms and conditions, if the permit applicant requests them and they are approved by the Director, setting forth intermittent operating scenarios including potential periods of downtime. If the terms and conditions are included, the state's emissions inventory shall not reflect the zero emissions associated with the periods of downtime.
 - 14. Upon request of a permit applicant, the Director shall issue a permit that contains terms and conditions allowing for the trading of emission increases and decreases in the permitted facility solely for the purpose of complying with a federally enforceable emission cap established in the permit independent of otherwise applicable requirements. The permit applicant shall include in its application proposed replicable procedures and permit terms that ensure the emissions trades are quantifiable and enforceable. The Director shall not include in the emissions trading provisions any emissions units for which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades. The permit shall also require compliance with all applicable requirements. Changes made under this subsection (shall) not include modifications under any provision of Title I of the Act and shall not exceed emissions allowable under the permit. The terms and conditions shall provide, for Class I sources, for notice that conforms to R18-2-317(D) and (E), and for Class II sources, for logging that conforms to R18-2-317.02(B)(5). In addition, the notices for Class I and Class II sources shall describe how the increases and decreases in emissions will comply with the terms and conditions of the permit.
 - 15. Other terms and conditions as are required by the Act, A.R.S. Title 49, Chapter 3, Articles 1 and 2, and the rules adopted in 18 A.A.C. 2.
- B. Federally-enforceable Requirements.**
- 1. The following permit conditions shall be enforceable by the Administrator and citizens under the Act:
 - a. Except as provided in subsection (B)(2), all terms and conditions in a Class I permit, including any provision designed to limit a source's potential to emit;
 - b. Terms or conditions in a Class II permit setting forth federal applicable requirements; and
 - c. Terms and conditions in any permit entered into voluntarily under R18-2-306.01, as follows:
 - i. Emissions limitations, controls, or other requirements; and
 - ii. Monitoring, recordkeeping, and reporting requirements associated with the emissions limitations, controls, or other requirements in subsection (B)(1)(c)(i).
 - 2. Notwithstanding subsection (B)(1)(a), the Director shall specifically designate as not being federally enforceable under the Act any terms and conditions included in a Class I permit that are not required under the Act or under any of its applicable requirements.
- C.** Each permit shall contain a compliance plan as specified in R18-2-309.
- D.** Each permit shall include the applicable permit shield provisions under R18-2-325.
- E.** Emergency provision.
- 1. An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, that requires immediate corrective action to restore normal operation and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.
 - 2. An emergency constitutes an affirmative defense to an action brought for noncompliance with technology-based emission limitations if the conditions of subsection (E)(3) are met.
 - 3. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:
 - a. An emergency occurred and the permittee can identify the cause or causes of the emergency;
 - b. At the time of the emergency the permitted facility was being properly operated;
 - c. During the period of the emergency, the permittee took all reasonable steps to minimize levels of emissions that exceeded the emissions standards or other requirements in the permit; and
 - d. The permittee submitted notice of the emergency to the Director by certified mail, facsimile, or hand delivery within two working days of the time when emission limitations were exceeded due to the emergency. This notice shall contain a description of the emergency, any steps taken to mitigate emissions, and corrective action taken.
 - 4. In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof.
 - 5. This provision is in addition to any emergency or upset provision contained in any applicable requirement.
- F.** A Class I permit issued to a major source shall require that revisions be made under R18-2-321 to incorporate additional applicable requirements adopted by the Administrator under the Act that become applicable to a source with a permit with a remaining permit term of three or more years. A revision shall not be required if the effective date of the applicable requirement is after the expiration of the permit. The revisions shall be made as expeditiously as practicable, but not later than 18

months after the promulgation of the standards and regulations. Any permit revision required under this subsection (shall) comply with R18-2-322 for permit renewal and shall reset the five-year permit term.

Historical Note

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-307 renumbered as Section R9-3-306 effective August 6, 1976. Reference changed to conform (Supp. 76-4). Former Section R9-3-306 repealed, new Section R9-3-306 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 28, 1984 (Supp. 84-5). Former Section R9-3-306 renumbered without change as R18-2-306 (Supp. 87-3). Amended subsection (I) effective December 1, 1988 (Supp. 88-4). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective August 1, 1995 (Supp. 95-3). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-306.01. Permits Containing Voluntarily Accepted Emission Limitations and Standards

- A. A source may voluntarily propose in its application, and accept in its permit, emissions limitations, controls, or other requirements that are permanent, quantifiable, and otherwise enforceable as a practical matter in order to avoid classification as a source that requires a Class I permit or to avoid one or more other applicable requirements. For the purposes of this Section, “enforceable as a practical matter” means that specific means to assess compliance with an emissions limitation, control, or other requirement are provided for in the permit in a manner that allows compliance to be readily determined by an inspection of records and reports.
- B. In order for a source to obtain a permit containing voluntarily accepted emissions limitations, controls, or other requirements, the source shall demonstrate all of the following in its permit application:
 1. The emissions limitations, controls, or other requirements to be imposed for the purpose of avoiding an applicable requirement are at least as stringent as the emissions limitations, controls, or other requirements that would otherwise be applicable to that source, including those that originate in an applicable implementation plan; and the permit does not waive, or make less stringent, any limitations or requirements contained in or issued pursuant to an applicable implementation plan, or that are otherwise federally enforceable.
 2. All voluntarily accepted emissions limitations, controls, or other requirements will be permanent, quantifiable, and otherwise enforceable as a practical matter.
- C. At the same time as notice of proposed issuance is first published pursuant to A.R.S. § 49-426(D), the Director shall send a copy of any Class II permit proposed to be issued pursuant to this Section to the Administrator for review during the comment period described in the notice pursuant to R18-2-330(C)(3).
- D. The Director shall send a copy of each final permit issued pursuant to this Section to the Administrator.

Historical Note

Adopted effective August 1, 1995 (Supp. 95-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-306.02. Expired

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Section expired under A.R.S. § 41-1056(J) at 22 A.A.R. 2982, effective September 15, 2016 (Supp. 16-3).

R18-2-307. Permit Review by the EPA and Affected States

- A. Except as provided in R18-2-304(G) and as waived by the Administrator, for each Class I permit, a copy of each of the following shall be provided to the Administrator as follows:
 1. The applicant shall provide a complete copy of the application including any attachments, compliance plans, and other information required by R18-2-304(F) at the time of submittal of the application to the Director.
 2. The Director shall provide the proposed final permit after public and affected state review.
 3. The Director shall provide the final permit at the time of issuance.
- B. The Director shall keep all records associated with all permits for a minimum of five years from issuance.
- C. No permit for which an application is required to be submitted to the Administrator under subsection (A) shall be issued if the Administrator properly objects to its issuance in writing within 45 days of receipt of the proposed final permit from the Department and all necessary supporting information.
- D. Review by Affected States.
 1. For each Class I permit, the Director shall provide notice of each proposed permit to any affected state on or before the time that the Director provides this notice to the public as required under R18-2-330 except to the extent R18-2-319 requires the timing of the notice to be different.
 2. If the Director refuses to accept a recommendation of any affected state submitted during the public or affected state review period, the Director shall notify the Administrator and the affected state in writing. The notification shall include the Director's reasons for not accepting any such recommendation and shall be provided to the Administrator as part of the submittal of the proposed final permit. The Director shall not be required to accept recommendations that are not based on federal applicable requirements or requirements of state law.
- E. Any person who petitions the Administrator pursuant to 40 CFR 70.8(d) shall notify the Department by certified mail of such petition as soon as possible, but in no case more than 10 days following such petition. Such notice shall include the grounds for objection and whether such objections were raised during the public comment period. If the Administrator objects to the permit as a result of a petition filed under this subsection, the Director shall not issue the permit until EPA's objection has been resolved, except that a petition for review does not stay the effectiveness of a permit or its requirements if the permit was issued after the end of the 45-day administrative review period and prior to the Administrator's objection.
- F. If the Director has issued a permit prior to receipt of the Administrator's objection under subsection (E), and the Administrator indicates that it should be revised, terminated, or revoked and reissued, the Director shall reopen the permit in accordance with R18-2-321 and may thereafter issue only a revised permit that satisfies the Administrator's objection. In

any case, the source shall not be in violation of the requirement to have submitted a timely and complete application.

G. Prohibition on Default Issuance.

1. No Class I permit including a permit renewal or revision shall be issued until affected states and the Administrator have had an opportunity to review the proposed permit.
2. No permit or renewal shall be issued unless the Director has acted on the application.

Historical Note

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-307 renumbered as Section R9-3-306 effective August 6, 1976 (Supp. 76-4). New Section R9-3-307 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-307 repealed, new Section R9-3-307 adopted effective May 28, 1982 (Supp. 82-3). Amended subsection (B)(4)(b) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-307 renumbered without change as R18-2-307 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-308. Emission Standards and Limitations

Wherever applicable requirements apply different standards or limitations to a source for the same item, all applicable requirements shall be included in the permit.

Historical Note

Adopted effective August 7, 1975 (Supp. 75-1). Former Section R9-3-308 repealed, new Section R9-3-308 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-308 renumbered without change as R18-2-308 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-309. Compliance Plan; Certification

All permits shall contain the following elements with respect to compliance:

1. The elements required by R18-2-306(A)(3), (4), and (5).
2. Requirements for certifications of compliance with terms and conditions contained in the permit, including emissions limitations, standards, and work practices. Permits shall include each of the following:
 - a. The frequency of submissions of compliance certifications, which shall not be less than annually;
 - b. The means to monitor the compliance of the source with its emissions limitations, standards, and work practices;
 - c. A requirement that the compliance certification include all of the following (the identification of applicable information may cross-reference the permit or previous reports, as applicable):
 - i. The identification of each term or condition of the permit that is the basis of the certification;
 - ii. The identification of the methods or other means used by the owner or operator for determining the compliance status with each term and condition during the certification period. The methods and other means shall include, at a minimum, the methods and means required under R18-2-306(A)(3). If necessary, the owner or operator also shall identify any other material information that must be included in the certification to comply with section 113(c)(2) of the Act, which prohibits knowingly making
- a false certification or omitting material information;
- iii. The status of compliance with the terms and conditions of the permit for the period covered by the certification, including whether compliance during the period was continuous or intermittent. The certification shall be based on the methods or means designated in subsection (2)(c)(ii). The certification shall identify each deviation and take it into account in the compliance certification. For emission units subject to 40 CFR 64, the certification shall also identify as possible exceptions to compliance any period during which compliance is required and in which an excursion or exceedance defined under 40 CFR 64 occurred; and
- iv. Other facts the Director may require to determine the compliance status of the source.
- d. A requirement that permittees submit all compliance certifications to the Director. Class I permittees shall also submit compliance certifications to the Administrator.
- e. Additional requirements specified in sections 114(a)(3) and 504(b) of the Act or pursuant to R18-2-306.01.
3. A requirement for any document required to be submitted by a permittee, including reports, to contain a certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification required under this Section shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
4. Inspection and entry provisions that require that upon presentation of proper credentials, the permittee shall allow the Director to:
 - a. Enter upon the permittee's premises where a source is located, emissions-related activity is conducted, or records are required to be kept under the conditions of the permit;
 - b. Have access to and copy, at reasonable times, any records that are required to be kept under the conditions of the permit;
 - c. Inspect, at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit;
 - d. Sample or monitor, at reasonable times, substances or parameters for the purpose of assuring compliance with the permit or other applicable requirements; and
 - e. Record any inspection by use of written, electronic, magnetic, or photographic media.
5. A compliance plan that contains all the following:
 - a. A description of the compliance status of the source with respect to all applicable requirements;
 - b. A description as follows:
 - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with the requirements;
 - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet the requirements on a timely basis; and

- iii. For requirements for which the source is not in compliance at the time of permit issuance, a narrative description of how the source will achieve compliance with such requirements;
- c. A compliance schedule as follows:
 - i. For applicable requirements with which the source is in compliance, a statement that the source will continue to comply with the requirements;
 - ii. For applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet in a timely manner applicable requirements that become effective during the permit term shall satisfy this provision, unless a more detailed schedule is expressly required by the applicable requirement;
 - iii. A schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. The schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirement for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. The schedule of compliance shall supplement, and shall not sanction noncompliance with, the applicable requirements on which it is based.
- d. A schedule for submission of certified progress reports no less frequently than every six months for sources required to have a schedule of compliance to remedy a violation. The progress reports shall contain:
 - i. Dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones, or compliance were achieved; and
 - ii. An explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- 6. The compliance plan content requirements specified in subsection (5) shall apply and be included in the acid rain portion of a compliance plan for an affected source, except as specifically superseded by regulations promulgated under Title IV of the Act, and incorporated under R18-2-333 with regard to the schedule and each method the source will use to achieve compliance with the acid rain emissions limitations.
- 7. If there is a Federal Implementation Plan (FIP) applicable to the source, a provision that compliance with the FIP is required.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amendment filed September 18, 1979, effective following the adoption of Article 7. Nonferrous Smelter Orders. Amended effective October 2, 1979 (Supp. 79-5). Article 7. Nonferrous Smelter Orders adopted effective January 8, 1980. Amendment filed September 18, 1979 effective January 8, 1980 (Supp. 80-2). Amended effective Sep-

tember 28, 1984 (Supp. 84-5). Former Section R9-3-309 renumbered without change as R18-2-309 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp. 95-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 10 A.A.R. 2833, effective June 17, 2004 (Supp. 04-2).

R18-2-310. Affirmative Defenses for Excess Emissions Due to Malfunctions, Startup, and Shutdown

A. Applicability.

This rule establishes affirmative defenses for certain emissions in excess of an emission standard or limitation and applies to all emission standards or limitations except for standards or limitations:

1. Promulgated pursuant to Sections 111 or 112 of the Act,
2. Promulgated pursuant to Titles IV or VI of the Clean Air Act,
3. Contained in any Prevention of Significant Deterioration (PSD) or New Source Review (NSR) permit issued by the U.S. E.P.A.,
4. Contained in R18-2-715(F), or
5. Included in a permit to meet the requirements of R18-2-406(A)(5).

B. Affirmative Defense for Malfunctions.

Emissions in excess of an applicable emission limitation due to malfunction shall constitute a violation. The owner or operator of a source with emissions in excess of an applicable emission limitation due to malfunction has an affirmative defense to a civil or administrative enforcement proceeding based on that violation, other than a judicial action seeking injunctive relief, if the owner or operator of the source has complied with the reporting requirements of R18-2-310.01 and has demonstrated all of the following:

1. The excess emissions resulted from a sudden and unavoidable breakdown of process equipment or air pollution control equipment beyond the reasonable control of the operator;
2. The air pollution control equipment, process equipment, or processes were at all times maintained and operated in a manner consistent with good practice for minimizing emissions;
3. If repairs were required, the repairs were made in an expeditious fashion when the applicable emission limitations were being exceeded. Off-shift labor and overtime were utilized where practicable to ensure that the repairs were made as expeditiously as possible. If off-shift labor and overtime were not utilized, the owner or operator satisfactorily demonstrated that the measures were impracticable;
4. The amount and duration of the excess emissions (including any bypass operation) were minimized to the maximum extent practicable during periods of such emissions;
5. All reasonable steps were taken to minimize the impact of the excess emissions on ambient air quality;
6. The excess emissions were not part of a recurring pattern indicative of inadequate design, operation, or maintenance;
7. During the period of excess emissions there were no exceedances of the relevant ambient air quality standards established in Article 2 of this Chapter that could be attributed to the emitting source;
8. The excess emissions did not stem from any activity or event that could have been foreseen and avoided, or

planned, and could not have been avoided by better operations and maintenance practices;

9. All emissions monitoring systems were kept in operation if at all practicable; and
10. The owner or operator's actions in response to the excess emissions were documented by contemporaneous records.

C. Affirmative Defense for Startup and Shutdown.

1. Except as provided in subsection (C)(2), and unless otherwise provided for in the applicable requirement, emissions in excess of an applicable emission limitation due to startup and shutdown shall constitute a violation. The owner or operator of a source with emissions in excess of an applicable emission limitation due to startup and shutdown has an affirmative defense to a civil or administrative enforcement proceeding based on that violation, other than a judicial action seeking injunctive relief, if the owner or operator of the source has complied with the reporting requirements of R18-2-310.01 and has demonstrated all of the following:
 - a. The excess emissions could not have been prevented through careful and prudent planning and design;
 - b. If the excess emissions were the result of a bypass of control equipment, the bypass was unavoidable to prevent loss of life, personal injury, or severe damage to air pollution control equipment, production equipment, or other property;
 - c. The source's air pollution control equipment, process equipment, or processes were at all times maintained and operated in a manner consistent with good practice for minimizing emissions;
 - d. The amount and duration of the excess emissions (including any bypass operation) were minimized to the maximum extent practicable during periods of such emissions;
 - e. All reasonable steps were taken to minimize the impact of the excess emissions on ambient air quality;
 - f. During the period of excess emissions there were no exceedances of the relevant ambient air quality standards established in Article 2 of this Chapter that could be attributed to the emitting source;
 - g. All emissions monitoring systems were kept in operation if at all practicable; and
 - h. The owner or operator's actions in response to the excess emissions were documented by contemporaneous records.
2. If excess emissions occur due to a malfunction during routine startup and shutdown, then those instances shall be treated as other malfunctions subject to subsection (B).

D. Affirmative Defense for Malfunctions During Scheduled Maintenance.

If excess emissions occur due to a malfunction during scheduled maintenance, then those instances will be treated as other malfunctions subject to subsection (B).

E. Demonstration of Reasonable and Practicable Measures.

For an affirmative defense under subsection (B) or (C), the owner or operator of the source shall demonstrate, through submission of the data and information required by this Section and R18-2-310.01, that all reasonable and practicable measures within the owner or operator's control were implemented to prevent the occurrence of the excess emissions.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective June 19, 1981 (Supp. 81-3). Amended Arizona Testing Manual for Air Pollutant Emissions, effective

September 22, 1983 (Supp. 83-5). Amended Arizona Testing Manual for Air Pollutant Emissions, as of September 15, 1984, effective August 9, 1985 (Supp. 85-4). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-310 renumbered without change as R18-2-310 (Supp. 87-3). Amended effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Section repealed; new Section adopted by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1).

R18-2-310.01. Reporting Requirements

- A.** The owner or operator of any source shall report to the Director any emissions in excess of the limits established by this Chapter or the applicable permit. The owner or operator of any registered source may report excess emissions in accordance with this Section in order to qualify for the affirmative defense established in R18-2-310. The report shall be in two parts as specified below:
 1. Notification by telephone or facsimile within 24 hours of the time the owner or operator first learned of the occurrence of excess emissions that includes all available information from subsection (B).
 2. Detailed written notification by submission of an excess emissions report within 72 hours of the notification under subsection (A)(1).
- B.** The excess emissions report shall contain the following information:
 1. The identity of each stack or other emission point where the excess emissions occurred;
 2. The magnitude of the excess emissions expressed in the units of the applicable emission limitation and the operating data and calculations used in determining the magnitude of the excess emissions;
 3. The time and duration or expected duration of the excess emissions;
 4. The identity of the equipment from which the excess emissions emanated;
 5. The nature and cause of the emissions;
 6. The steps taken, if the excess emissions were the result of a malfunction, to remedy the malfunction and the steps taken or planned to prevent the recurrence of the malfunctions;
 7. The steps that were or are being taken to limit the excess emissions; and
 8. If the source's permit contains procedures governing source operation during periods of startup or malfunction and the excess emissions resulted from startup or malfunction, a list of the steps taken to comply with the permit procedures.
- C.** In the case of continuous or recurring excess emissions, the notification requirements of this Section shall be satisfied if the source provides the required notification after excess emissions are first detected and includes in the notification an estimate of the time the excess emissions will continue. Excess emissions occurring after the estimated time period or changes in the nature of the emissions as originally reported shall require additional notification pursuant to subsections (A) and (B).

Historical Note

New Section adopted by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-311. Test Methods and Procedures

- A. Except as otherwise specified in this Chapter, the applicable procedures and testing methods contained in the Arizona Testing Manual; 40 CFR 52, Appendices D and E; 40 CFR 60, Appendices A through F; and 40 CFR 61, Appendices B and C shall be used to determine compliance with the requirements established in this Chapter or contained in permits issued pursuant to this Chapter.
- B. Except as otherwise provided in this subsection the opacity of visible emissions shall be determined by Reference Method 9 of the Arizona Testing Manual or by alternative method ALT-082 approved by the Administrator on May 15, 2012. A permit may specify a method, other than Method 9 or ALT-082, for determining the opacity of emissions from a particular emissions unit, if the method has been promulgated by the Administrator in 40 CFR 60, Appendix A or approved by the Administrator as an alternative method.
- C. Except as otherwise specified in this Chapter, the heat content of solid fuel shall be determined according to ASTM method D-3176-89, (Practice for Ultimate Analysis of Coal and Coke) and ASTM method D-2015-91, (Test Method for Gross Calorific Value of Coal and Coke by the Adiabatic Bomb Calorimeter).
- D. Except for ambient air monitoring and emissions testing required under Articles 9 and 11 of this Chapter, alternative and equivalent test methods in any test plan submitted to the Director may be approved by the Director for the duration of that plan provided that the following three criteria are met:
 1. The alternative or equivalent test method measures the same chemical and physical characteristics as the test method it is intended to replace.
 2. The alternative or equivalent test method has substantially the same or better reliability, accuracy, and precision as the test method it is intended to replace.
 3. Applicable quality assurance procedures are followed in accordance with the Arizona Testing Manual, 40 CFR 60 or other quality assurance methods which are consistent with principles contained in the Arizona Testing Manual or 40 CFR 60 as approved by the Director.
- 4. Waives the requirement for performance tests because the owner or operator of a source has demonstrated by other means to the Director's satisfaction that the source is in compliance with the standard.
- 5. Nothing in this Section shall be construed to abrogate the Director's authority to require testing.
- C. Performance tests shall be conducted under such conditions as the Director shall specify to the plant operator based on representative performance of the source. The owner or operator shall make available to the Director such records as may be necessary to determine the conditions of the performance tests. Operations during periods of start-up, shutdown, and malfunction shall not constitute representative conditions of performance tests unless otherwise specified in the applicable standard.
- D. The owner or operator of a permitted source shall provide the Director two weeks prior notice of the performance test to afford the Director the opportunity to have an observer present.
- E. The owner or operator of a permitted source shall provide, or cause to be provided, performance testing facilities as follows:
 1. Sampling ports adequate for test methods applicable to such facility.
 2. Safe sampling platform(s).
 3. Safe access to sampling platform(s).
 4. Utilities for sampling and testing equipment.
- F. Each performance test shall consist of three separate runs using the applicable test method. Each run shall be conducted for the time and under the conditions specified in the applicable standard. For the purpose of determining compliance with an applicable standard, the arithmetic means of results of the three runs shall apply. In the event that a sample is accidentally lost or conditions occur in which one of the three runs is required to be discontinued because of forced shutdown, failure of an irreplaceable portion of the sample train, extreme meteorological conditions, or other circumstances beyond the owner or operator's control, compliance may, upon the Director's approval, be determined using the arithmetic means of the results of the two other runs. If the Director, or the Director's designee is present, tests may only be stopped with the Director's or such designee's approval. If the Director, or the Director's designee is not present, tests may only be stopped for good cause, which includes forced shutdown, failure of an irreplaceable portion of the sample train, extreme meteorological conditions, or other circumstances beyond the operator's control. Termination of testing without good cause after the first run is commenced shall constitute a failure of the test.
- G. Except as provided in subsection (H) compliance with the emission limits established in this Chapter or as prescribed in permits issued pursuant to this Chapter shall be determined by the performance tests specified in this Section or in the permit.
- H. In addition to performance tests specified in this Section, compliance with specific emission limits may be determined by:
 1. Opacity tests.
 2. Emission limit compliance tests specifically designated as such in the regulation establishing the emission limit to be complied with.
 3. Continuous emission monitoring, where applicable quality assurance procedures are followed and where it is designated in the permit or in an applicable requirement to show compliance.
- I. Nothing in this Section shall be so construed as to prevent the utilization of measurements from emissions monitoring devices or techniques not designated as performance tests as evidence of compliance with applicable good maintenance and operating requirements.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-311 renumbered without change as R18-2-311 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-312. Performance Tests

- A. Except as provided in subsection (J), within 60 days after a source subject to the permit requirements of this Article has achieved the capability to operate at its maximum production rate on a sustained basis but no later than 180 days after initial start-up of such source and at such other times as may be required by the Director, the owner or operator of such source shall conduct performance tests and furnish the Director a written report of the results of the tests.
- B. Performance tests shall be conducted and data reduced in accordance with the test method and procedures contained in the Arizona Testing Manual unless the Director:
 1. Specifies or approves, in specific cases, the use of a reference method with minor changes in methodology;
 2. Approves the use of an equivalent method;
 3. Approves the use of an alternative method the results of which he has determined to be adequate for indicating whether a specific source is in compliance; or

- J.** The owner or operator of a source subject to this Section may request an extension to the performance test deadline due to a force majeure event as follows:
1. If a force majeure event is about to occur, occurs, or has occurred for which the owner or operator intends to assert a claim of force majeure, the owner or operator shall notify the Director in writing as soon as practicable following the date the owner or operator first knew, or through due diligence should have known that the event may cause or caused a delay in testing beyond the regulatory deadline. The notification must occur before the performance test deadline unless the initial force majeure or a subsequent force majeure event delays the notice, and in such cases, the notification shall be given as soon as practicable.
 2. The owner or operator shall provide to the Director a written description of the force majeure event and a rationale for attributing the delay in testing beyond the regulatory deadline to the force majeure; describe the measures taken or to be taken to minimize the delay; and identify a date by which the owner or operator proposes to conduct the performance test. The performance test shall be conducted as soon as practicable after the force majeure event occurs.
 3. The decision as to whether or not to grant an extension to the performance test deadline is solely within the discretion of the Director. The Director shall notify the owner or operator in writing of approval or disapproval of the request for an extension as soon as practicable.
 4. Until an extension of the performance test deadline has been approved by the Director under paragraphs (1), (2), and (3) of this subsection, the owner or operator remains subject to the requirements of this Section.
 5. For purposes of this subsection, a “force majeure event” means an event that will be or has been caused by circumstances beyond the control of the source, its contractors, or any entity controlled by the source that prevents the owner or operator from complying with the regulatory requirement to conduct performance tests within the specified timeframe despite the source's best efforts to fulfill the obligation. Examples of such events are acts of nature, acts of war or terrorism, or equipment failure or safety hazard beyond the control of the source.
- c.** Sulfuric acid plants, as specified in subsection (C)(3) of this Section, shall be monitored for sulfur dioxide emissions.
- d.** Nitric acid plants, as specified in subsection (C)(2), shall be monitored for nitrogen oxides emissions.
- 2.** Emission monitoring shall not be required when the source of emissions is not operating.
- 3.** Variations.
- a. Unless otherwise prohibited by the Act, the Director may approve, on a case-by-case basis, alternative monitoring requirements different from the provisions of this Section if the installation of a continuous emission monitoring system cannot be implemented by a source due to physical plant limitations or extreme economic reasons. Alternative monitoring procedures shall be specified by the Director on a case-by-case basis and shall include, as a minimum, annual manual stack tests for the pollutants identified for each type of source in this Section. Extreme economic reasons shall mean that the requirements of this Section would cause the source to be unable to continue in business.
 - b. Alternative monitoring requirements may be prescribed when installation of a continuous emission monitoring system or monitoring device specified by this Section would not provide accurate determinations of emissions (e.g., condensed, uncombined water vapor may prevent an accurate determination of opacity using commercially available continuous emission monitoring systems).
 - c. Alternative monitoring requirements may be prescribed when the affected facility is infrequently operated (e.g., some affected facilities may operate less than one month per year).
- 4.** Monitoring system malfunction: A temporary exemption from the monitoring and reporting requirements of this Section may be provided during any period of monitoring system malfunction, provided that the source owner or operator demonstrates that the malfunction was unavoidable and is being repaired expeditiously.
- B.** Installation and performance testing required under this Section shall be completed and monitoring and recording shall commence within 18 months of the effective date of this Section.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 28, 1984 (Supp. 84-5). Former Section R9-3-312 renumbered without change as R18-2-312 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-313. Existing Source Emission Monitoring

- A.** Every source subject to an existing source performance standard as specified in this Chapter shall install, calibrate, operate, and maintain all monitoring equipment necessary for continuously monitoring the pollutants and other gases specified in this Section for the applicable source category.
1. Applicability.
 - a. Fossil-fuel fired steam generators, as specified in subsection (C)(1), shall be monitored for opacity, nitrogen oxides emissions, sulfur dioxide emissions, and oxygen or carbon dioxide.
 - b. Fluid bed catalytic cracking unit catalyst regenerators, as specified in subsection (C)(4), shall be monitored for opacity.
- c.** A continuous emission monitoring system for the measurement of opacity which meets the performance specifications of this Section shall be installed, calibrated, maintained, and operated in accordance with the procedures of this Section by the owner or operator of any such steam generator of greater than 250 million Btu per hour heat input except where:
- i. Gaseous fuel is the only fuel burned; or
 - ii. Oil or a mixture of gas and oil are the only fuels burned and the source is able to comply with the applicable particulate matter and opacity

- regulations without utilization of particulate matter collection equipment, and where the source has never been found to be in violation through any administrative or judicial proceedings, or accepted responsibility for any violation of any visible emission standard.
- b. A continuous emission monitoring system for the measurement of sulfur dioxide which meets the performance specifications of this Section shall be installed, calibrated, using sulfur dioxide calibration gas mixtures or other gas mixtures approved by the Director, maintained and operated on any fossil-fuel fired steam generator of greater than 250 million Btu per hour heat input which has installed sulfur dioxide pollutant control equipment.
 - c. A continuous emission monitoring system for the measurement of nitrogen oxides which meets the performance specification of this Section shall be installed, calibrated using nitric oxide calibration gas mixtures or other gas mixtures approved by the Director, maintained and operated on fossil-fuel fired steam generators of greater than 1000 million Btu per hour heat input when such facility is located in an air quality control region where the Director has specifically determined that a control strategy for nitrogen dioxide is necessary to attain the ambient air quality standard specified in R18-2-205, unless the source owner or operator demonstrates during source compliance tests as required by the Department that such a source emits nitrogen oxides at levels 30% or more below the emission standard within this Chapter.
 - d. A continuous emission monitoring system for the measurement of the percent oxygen or carbon dioxide which meets the performance specifications of this Section shall be installed, calibrated, operated, and maintained on fossil-fuel fired steam generators where measurements of oxygen or carbon dioxide in the flue gas are required to convert either sulfur dioxide or nitrogen oxides continuous emission monitoring data, or both, to units of the emission standard within this Chapter.
2. Nitric acid plants: Each nitric acid plant of greater than 300 tons per day production capacity, the production capacity being expressed as 100% acid located in an air quality control region where the Director has specifically determined that a control strategy for nitrogen dioxide is necessary to attain the ambient air quality standard specified in R18-2-205, shall install, calibrate using nitrogen dioxide calibration gas mixtures, maintain, and operate a continuous emission monitoring system for the measurement of nitrogen oxides which meets the performance specifications of this Section for each nitric acid producing facility within such plant.
 3. Sulfuric acid plants: Each sulfuric acid plant as defined in R18-2-101, of greater than 300 tons per day production capacity, the production being expressed as 100% acid, shall install, calibrate using sulfur dioxide calibration gas mixtures or other gas mixtures approved by the Director, maintain and operate a continuous emission monitoring system for the measurement of sulfur dioxide which meets the performance specifications of this Section for each sulfuric acid producing facility within such a plant.
 4. Fluid bed catalytic cracking unit catalyst regenerators at petroleum refineries. Each catalyst regenerator for fluid bed catalytic cracking units of greater than 20,000 barrels per day fresh-feed capacity shall install, calibrate, maintain and operate a continuous emission monitoring system for the measurement of opacity which meets the performance specifications of this Section for each regenerator within such refinery.
- D. Minimum specifications:** Owners or operators of monitoring equipment installed to comply with this Section shall demonstrate compliance with the following performance specifications.
1. The performance specifications set forth in Appendix B of 40 CFR 60 are incorporated herein by reference and shall be used by the Director to determine acceptability of monitoring equipment installed pursuant to this Section. However where reference is made to the Administrator in Appendix B of 40 CFR 60, the Director may allow the use of either the state-approved reference method or the federally approved reference method as published in 40 CFR 60. The performance specifications to be used with each type of monitoring system are listed below.
 - a. Continuous emission monitoring systems for measuring opacity shall comply with performance specification 1.
 - b. Continuous emission monitoring systems for measuring nitrogen oxides shall comply with performance specification 2.
 - c. Continuous emission monitoring systems for measuring sulfur dioxide shall comply with performance specification 2.
 - d. Continuous emission monitoring systems for measuring sulfur dioxide shall comply with performance specification 3.
 - e. Continuous emission monitoring systems for measuring carbon dioxide shall comply with performance specification 3.
 2. Calibration gases: Span and zero gases shall be traceable to National Bureau of Standards reference gases whenever these reference gases are available. Every six months from date of manufacture, span and zero gases shall be reanalyzed by conducting triplicate analyses using the reference methods in Appendix A of 40 CFR 60 (Chapter 1) as amended: For sulfur dioxide, use Reference Method 6; for nitrogen oxides, use Reference Method 7; and for carbon dioxide or oxygen, use Reference Method 3. The gases may be analyzed at less frequent intervals if longer shelf lives are guaranteed by the manufacturer.
 3. Cycling time: Time includes the total time required to sample, analyze, and record an emission measurement.
 - a. Continuous emission monitoring systems for measuring opacity shall complete a minimum of one cycle of sampling and analyzing for each successive six-minute period.
 - b. Continuous emission monitoring systems for measuring oxides of nitrogen, carbon dioxide, oxygen, or sulfur dioxide shall complete a minimum of one cycle of operation (sampling, analyzing, and date recording) for each successive 15-minute period.
 4. Monitor location: All continuous emission monitoring systems or monitoring devices shall be installed such that representative measurements of emissions of process parameter (i.e., oxygen, or carbon dioxide) from the affected facility are obtained. Additional guidance for location of continuous emission monitoring systems to obtain representative samples are contained in the applicable performance specifications of Appendix B of 40 CFR 60.

5. Combined effluents: When the effluents from two or more affected facilities of similar design and operating characteristics are combined before being released to the atmosphere through more than one point, separate monitors shall be installed.
 6. Zero and drift: Owners or operators of all continuous emission monitoring systems installed in accordance with the requirements of this Section shall record the zero and span drift in accordance with the method prescribed by the manufacturer's recommended zero and span check at least once daily, using calibration gases specified in subsection (C) as applicable, unless the manufacturer has recommended adjustments at shorter intervals, in which case such recommendations shall be followed; shall adjust the zero span whenever the 24-hour zero drift or 24-hour calibration drift limits of the applicable performance specifications in Appendix B of Part 60, Chapter 1, Title 40 CFR are exceeded.
 7. Span: Instrument span should be approximately 200% of the expected instrument data display output corresponding to the emission standard for the source.
- E. Minimum data requirement:** The following subsections set forth the minimum data reporting requirements for sources employing continuous monitoring equipment as specified in this Section. These periodic reports do not relieve the source operator from the reporting requirements of R18-2-310.01.
1. The owners or operators of facilities required to install continuous emission monitoring systems shall submit to the Director a written report of excess emissions for each calendar quarter and the nature and cause of the excess emissions, if known. The averaging period used for data reporting shall correspond to the averaging period specified in the emission standard for the pollutant source category in question. The required report shall include, as a minimum, the data stipulated in this subsection.
 2. For opacity measurements, the summary shall consist of the magnitude in actual percent opacity of all six-minute opacity averages greater than any applicable standards for each hour of operation of the facility. Average values may be obtained by integration over the averaging period or by arithmetically averaging a minimum of four equally spaced, instantaneous opacity measurements per minute. Any time periods exempted shall be deleted before determining any averages in excess of opacity standards.
 3. For gaseous measurements the summary shall consist of emission averages in the units of the applicable standard for each averaging period during which the applicable standard was exceeded.
 4. The date and time identifying each period during which the continuous emission monitoring system was inoperative, except for zero and span checks and the nature of system repair or adjustment shall be reported. The Director may require proof of continuous emission monitoring system performance whenever system repairs or adjustments have been made.
 5. When no excess emissions have occurred and the continuous emission monitoring system(s) have not been inoperative, repaired, or adjusted, such information shall be included in the report.
 6. Owners or operators of affected facilities shall maintain a file of all information reported in the quarterly summaries, and all other data collected either by the continuous emission monitoring system or as necessary to convert monitoring data to the units of the applicable standard for a minimum of two years from the date of collection of such data or submission of such summaries.
- F. Data reduction:** Owners or operators of affected facilities shall use the following procedures for converting monitoring data to units of the standard where necessary.
1. For fossil-fuel fired steam generators the following procedures shall be used to convert gaseous emission monitoring data in parts per million to g/million cal (lb/million Btu) where necessary.
 - a. When the owner or operator of a fossil-fuel fired steam generator elects under subsection (C)(1)(d) to measure oxygen in the flue gases, the measurements of the pollutant concentration and oxygen concentration shall each be on a consistent basis (wet or dry).
 - i. When measurements are on a wet basis, except where wet scrubbers are employed or where moisture is otherwise added to stack gases, the following conversion procedure shall be used:

$$E(Q) = C(ws)F(w)\left[\frac{20.9}{20.9(1 - B(wa)) - \%O(2ws)}\right]$$
 - ii. When measurements are on a wet basis and the water vapor content of the stack gas is determined at least once every 15 minutes the following conversion procedure shall be used:

$$E(Q) = C(ws)F\left[\frac{20.9}{20.9(1 - B(wa))\%O(2ws)}\right]$$

Use of this equation is contingent upon demonstrating the ability to accurately determine B(ws) such that any absolute error in B(ws) will not cause an error of more than $\pm 1.5\%$ in the term:

$$\left[\frac{20.9}{20.9(1 - B(wa)) - \%O(2ws)}\right]$$
 - iii. When measurements are on a dry basis, the following conversion procedure shall be used:

$$E(Q) = CF\left[\frac{20.9}{20.9 - \%O(2ws)}\right]$$
 - b. When the owner or operator elects under subsection (C)(1)(d) to measure carbon dioxide in the flue gases, the measurement of the pollutant concentration and the carbon dioxide concentration shall each be on a consistent basis (wet or dry) and the following conversion procedure used:

$$E(Q) = CF(c)\left[\frac{100}{\%CO(2)}\right]$$
 - c. The values used in the equations under subsection (F)(1) above are derived as follows:
 $E(Q)$ = pollutant emission, g/million cal (lb/million Btu).

C = pollutant concentration, g/dscm (lb/dscf), determined by multiplying the average concentration (ppm) for each hourly period by 4.16×10^{-5} M g/dscm per ppm (2.64×10^{-9} M lb/dscf per ppm) where M = pollutant molecular weight, g/g-mole (lb/lb-mole), M = 64 for sulfur dioxide and 46 for oxides of nitrogen.

C(ws) = pollutant concentrations at stack conditions, g/wscm (lb/wscf), determined by multiplying the average concentration (ppm) for each one-hour period by 4.15×10^{-5} M lb/wscm per ppm (2.59×10^{-5} M lb/wscf per ppm) where M = pollutant molecular weight, g/g mole (lb/lb mole). M = 64 for sulfur dioxide and 46 for nitrogen oxides.

%O(2), %CO(2) = Oxygen or carbon dioxide volume (expressed as percent) determined with equipment specified under subsection (D)(1)(d).

F, F(c) = A factor representing a ratio of the volume of dry flue gases generated to the calorific value of the fuel combusted (F), a factor representing a ratio of the volume of carbon dioxide generated to the calorific value of the fuel combusted (F(c)), respectively. Values of F and F(c) are given in 40 CFR 60.45(f) (Chapter 1).

F(w) = A factor representing a ratio of the volume of wet flue gases generated to the calorific value of the fuel combusted. Values of F(w) are given in Reference Method 19 of the Arizona Testing Manual.

B(wa) = Proportion by volume of water vapor in the ambient air. Approval may be given for determination of B(wa) by on-site instrumental measurement provided that the absolute accuracy of the measurement technique can be demonstrated to be within $\pm 0.7\%$ water vapor. Estimation methods for B(wa) are given in Reference Method 19 of the Arizona Testing Manual.

B(ws) = Proportion by volume of water vapor in the stack gas.

2. For sulfuric acid plants as defined in R18-2-101, the owner or operator shall:
 - a. Establish a conversion factor three times daily according to the procedures of 40 CFR 60.84(b) (Chapter 1),
 - b. Multiply the conversion factor by the average sulfur dioxide concentration in the flue gases to obtain average sulfur dioxide emissions in Kg/metric ton (lb/short ton), and
 - c. Report the average sulfur dioxide emission for each averaging period in excess of the applicable emission standard in the quarterly summary.
3. For nitric acid plants, the owner or operator shall:
 - a. Establish a conversion factor according to the procedures of 40 CFR 60.73(b) (Chapter 1),
 - b. Multiply the conversion factor by the average nitrogen oxides concentration in the flue gases to obtain the nitrogen oxides emissions in the units of the applicable standard,
 - c. Report the average nitrogen oxides emission for each averaging period in excess of applicable emission standard in the quarterly summary.
4. The Director may allow data reporting or reduction procedures varying from those set forth in this Section if the

owner or operator of a source shows to the satisfaction of the Director that his procedures are at least as accurate as those in this Section. Such procedures may include but are not limited to the following:

- a. Alternative procedures for computing emission averages that do not require integration of data (e.g., some facilities may demonstrate that the variability of their emissions is sufficiently small to allow accurate reduction of data based upon computing averages from equally spaced data points over the averaging period).
- b. Alternative methods of converting pollutant concentration measurements to the units of the emission standards.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (C), paragraph (1), subparagraph (d) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-313 renumbered without change as R18-2-313 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1).

R18-2-314. Quality Assurance

Facilities subject to the permit requirements of this Article shall submit a quality assurance plan to the Director that meets the requirements of R18-2-311(D)(3) within 12 months of the effective date of this Section. Facilities subject to the requirements of R18-2-313 shall submit a quality assurance plan as specified in the permit.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-314 renumbered without change as R18-2-314 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-315. Posting of Permit

- A. Any person who has been granted an individual or general permit shall post such permit or a certificate of permit issuance on location where the equipment is installed in such a manner as to be clearly visible and accessible. All equipment covered by the permit shall be clearly marked with one of the following:
 1. The current permit number,
 2. A serial number or other equipment number that is also listed in the permit to identify that piece of equipment.
- B. A copy of the complete permit shall be kept on the site.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-315 renumbered without change as R18-2-315 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-316. Notice by Building Permit Agencies

All agencies of the county or political subdivisions of the county that issue or grant building permits or approvals shall examine the plans and specifications submitted by an applicant for a permit or approval to determine if an air pollution permit will possibly be required under the provisions of this Chapter. If it appears that an air pollution permit will be required, the agency or political subdivision shall give written notice to the applicant to contact the Director and shall furnish a copy of that notice to the Director.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-316 renumbered without change as R18-2-316 (Supp. 87-3).

R18-2-317. Facility Changes Allowed Without Permit Revisions - Class I

- A.** A facility with a Class I permit may make changes that contravene an express permit term without a permit revision if all of the following apply:
1. The changes are not modifications under any provision of Title I of the Act or under A.R.S. § 49-401.01(24);
 2. The changes do not exceed the emissions allowable under the permit whether expressed therein as a rate of emissions or in terms of total emissions;
 3. The changes do not violate any applicable requirements or trigger any additional applicable requirements;
 4. The changes satisfy all requirements for a minor permit revision under R18-2-319(A);
 5. The changes do not contravene federally enforceable permit terms and conditions that are monitoring (including test methods), recordkeeping, reporting, or compliance certification requirements; and
 6. The changes do not constitute a minor NSR modification.
- B.** The substitution of an item of process or pollution control equipment for an identical or substantially similar item of process or pollution control equipment shall qualify as a change that does not require a permit revision, if the substitution meets all of the requirements of subsections (A), (D), and (E).
- C.** Except for sources with authority to operate under general permits, permitted sources may trade increases and decreases in emissions within the permitted facility, as established in the permit under R18-2-306(A)(12), if an applicable implementation plan provides for the emissions trades without applying for a permit revision and based on the seven working days notice prescribed in subsection (D). This provision is available if the permit does not provide for the emissions trading as a minor permit revision.
- D.** For each change under subsections (A) through (C), a written notice by certified mail or hand delivery shall be received by the Director and the Administrator a minimum of seven working days in advance of the change. Notifications of changes associated with emergency conditions, such as malfunctions necessitating the replacement of equipment, may be provided less than seven working days in advance of the change but must be provided as far in advance of the change or, if advance notification is not practicable, as soon after the change as possible.
- E.** Each notification shall include:
1. When the proposed change will occur;
 2. A description of the change;
 3. Any change in emissions of regulated air pollutants;
 4. The pollutants emitted subject to the emissions trade, if any;
 5. The provisions in the implementation plan that provide for the emissions trade with which the source will comply and any other information as may be required by the provisions in the implementation plan authorizing the trade;
 6. If the emissions trading provisions of the implementation plan are invoked, then the permit requirements with which the source will comply; and
 7. Any permit term or condition that is no longer applicable as a result of the change.
- F.** The permit shield described in R18-2-325 shall not apply to any change made under subsections (A) through (C). Compliance with the permit requirements that the source will meet using the emissions trade shall be determined according to

requirements of the implementation plan authorizing the emissions trade.

- G.** Except as otherwise provided for in the permit, making a change from one alternative operating scenario to another as provided under R18-2-306(A)(11) shall not require any prior notice under this Section.
- H.** The Director shall make available to the public monthly summaries of all notices received under this Section.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-317 renumbered without change as R18-2-317 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-317.01. Facility Changes that Require a Permit Revision - Class II

- A.** The following changes at a source with a Class II permit shall require a permit revision:
1. A change that would trigger a new applicable requirement or violate an existing applicable requirement.
 2. Establishment of, or change in, an emissions cap under R18-2-306.02;
 3. A change that will require a case-by-case determination of an emission limitation or other standard, or a source-specific determination of ambient impacts, or a visibility or increment analysis;
 4. A change that results in emissions that are subject to monitoring, recordkeeping or reporting under R18-2-306(A)(3), (4), or (5) if the emissions cannot be measured or otherwise adequately quantified by monitoring, recordkeeping, or reporting requirements already in the permit;
 5. A change that will authorize the burning of used oil, used oil fuel, hazardous waste, or hazardous waste fuel, or any other fuel not currently authorized by the permit;
 6. A change that requires the source to obtain a Class I permit;
 7. Replacement of an item of air pollution control equipment listed in the permit with one that does not have the same or better pollutant removal efficiency;
 8. Establishment or revision of a limit under R18-2-306.01;
 9. Increasing operating hours or rates of production above the permitted level;
 10. A change that relaxes monitoring, recordkeeping, or reporting requirements, except when the change results:
 - a. From removing equipment that results in a permanent decrease in actual emissions, if the source keeps onsite records of the change in a log that satisfies Appendix 3 of this Chapter and if the requirements that are relaxed are present in the permit solely for the equipment that was removed; or
 - b. From a change in an applicable requirement; and
 11. A minor NSR modification.
- B.** A source with a Class II permit may make any physical change or change in the method of operation without revising the source's permit unless the change is specifically prohibited in the source's permit or is a change described in subsection (A). A change that does not require a permit revision may still be subject to requirements in R18-2-317.02.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R.

4074, effective September 22, 1999 (Supp. 99-3).
Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-317.02. Procedures for Certain Changes that Do Not Require a Permit Revision - Class II

- A. Except for a physical change or change in the method of operation at a Class II source requiring a permit revision under R18-2-317.01, or a change subject to logging or notice requirements in subsection (B) or (C), a change at a Class II source shall not be subject to revision, notice, or logging requirements under this Chapter.
- B. Except as otherwise provided in the conditions applicable to an emissions cap created under R18-2-306.02, the following changes may be made if the source keeps onsite records of the changes according to Appendix 3:
 - 1. Implementing an alternative operating scenario, including raw material changes;
 - 2. Changing process equipment, operating procedures, or making any other physical change if the permit requires the change to be logged;
 - 3. Engaging in any new insignificant activity listed in the definition of insignificant activities in R18-2-101 but not listed in the permit;
 - 4. Replacing an item of air pollution control equipment listed in the permit with an identical (same model, different serial number) item. The Director may require verification of efficiency of the new equipment by performance tests; and
 - 5. A change that results in a decrease in actual emissions if the source wants to claim credit for the decrease in determining whether the source has a net emissions increase for any purpose. The logged information shall include a description of the change that will produce the decrease in actual emissions. A decrease that has not been logged is creditable only if the decrease is quantifiable, enforceable, and otherwise qualifies as a creditable decrease.
- C. Except as provided in the conditions applicable to an emissions cap created under R18-2-306.02, the following changes may be made if the source provides written notice to the Department in advance of the change as provided below:
 - 1. Replacing an item of air pollution control equipment listed in the permit with one that is not identical but that is substantially similar and has the same or better pollutant removal efficiency: seven days. The Director may require verification of efficiency of the new equipment by performance tests;
 - 2. A physical change or change in the method of operation that increases actual emissions more than 10% of the major source threshold for any conventional pollutant but does not require a permit revision: seven days;
 - 3. Replacing an item of air pollution control equipment listed in the permit with one that is not substantially similar but that has the same or better efficiency: 30 days. The Director may require verification of efficiency of the new equipment by performance tests;
 - 4. A change that would trigger an applicable requirement that already exists in the permit: 30 days unless otherwise required by the applicable requirement;
 - 5. A change that amounts to reconstruction of the source or an affected facility: seven days. For purposes of this subsection, reconstruction of a source or an affected facility shall be presumed if the fixed capital cost of the new components exceeds 50% of the fixed capital cost of a comparable entirely new source or affected facility and the changes to the components have occurred over the 12

consecutive months beginning with commencement of construction; and

- 6. A change that will result in the emissions of a new regulated air pollutant above an applicable regulatory threshold but that does not trigger a new applicable requirement for that source category: 30 days. For purposes of this requirement, an applicable regulatory threshold for a conventional air pollutant shall be 10% of the applicable major source threshold for that pollutant.
- D. For each change under subsection (C), the written notice shall be by certified mail or hand delivery and shall be received by the Director the minimum amount of time in advance of the change. Notifications of changes associated with emergency conditions, such as malfunctions necessitating the replacement of equipment, may be provided with less than required notice, but must be provided as far in advance of the change, or if advance notification is not practicable, as soon after the change as possible. The written notice shall include:
 - 1. When the proposed change will occur,
 - 2. A description of the change,
 - 3. Any change in emissions of regulated air pollutants, and
 - 4. Any permit term or condition that is no longer applicable as a result of the change.
- E. A source may implement any change in subsection (C) without the required notice by applying for a minor permit revision under R18-2-319 and complying with R18-2-319(D)(2) and (G).
- F. The permit shield described in R18-2-325 shall not apply to any change made under this Section, other than implementation of an alternate operating scenario under subsection (B)(1).
- G. Notwithstanding any other part of this Section, the Director may require a permit to be revised for any change that, when considered together with any other changes submitted by the same source under this Section over the term of the permit, constitutes a change under R18-317.01(A).
- H. If a source change is described under both subsections (B) and (C), the source shall comply with subsection (C). If a source change is described under both subsection (C) and R18-2-317.01(B), the source shall comply with R18-2-317.01(B).
- I. A copy of all logs required under subsection (B) shall be filed with the Director within 30 days after each anniversary of the permit issue date. If no changes were made at the source requiring logging, a statement to that effect shall be filed instead.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3).
Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-318. Administrative Permit Amendments

- A. Except for provisions pursuant to Title IV of the Act, an administrative permit amendment is a permit revision that does any of the following:
 - 1. Corrects typographical errors;
 - 2. Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;
 - 3. Requires more frequent monitoring or reporting by the permittee;
 - 4. Allows for a change in ownership or operational control of a source as approved under R18-2-323 where the Director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility cover-

age, and liability between the current and new permittee has been submitted to the Director;

- B. Administrative permit amendments to Title IV provisions of the permit shall be governed by regulations promulgated by the Administrator under Title IV of the Act.
- C. The Director shall take no more than 60 days from receipt of a request for an administrative permit amendment to take final action on such request, and for Class I permits may incorporate such changes without providing notice to the public or affected states provided that it designates any such permit revisions as having been made pursuant to this Section.
- D. The Director shall submit a copy of Class I permits revised under this Section to the Administrator.
- E. Except for administrative permit amendments involving a transfer under R18-2-323, the source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-318 renumbered without change as R18-2-318 (Supp. 87-3). Amended subsection (A) effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-318.01. Annual Summary Permit Amendments for Class II Permits

The Director may amend any Class II permit annually without following R18-2-321 in order to incorporate changes reflected in logs or notices filed under R18-2-317.02. The amendment shall be effective to the anniversary date of the permit. The Director shall make available to the public for any source:

- 1. A complete record of logs and notices sent to the Department under R18-2-317.02; and
- 2. Any amendments or revisions to the source's permit.

Historical Note

New Section adopted by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3).

R18-2-319. Minor Permit Revisions

- A. Minor permit revision procedures may be used only for those changes at a Class I source that satisfy all of the following:
 - 1. Do not violate any applicable requirement;
 - 2. Do not involve substantive changes to existing monitoring, reporting, or recordkeeping requirements in the permit;
 - 3. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination of ambient impacts, or an analysis of impacts on visibility or maximum increases allowed under R18-2-218;
 - 4. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed in order to avoid an applicable requirement to which the source would otherwise be subject. The terms and conditions include:
 - a. A federally enforceable emissions cap that the source would assume to avoid classification as a modification under any provision of Title I of the Act; and
 - b. An alternative emissions limit approved under regulations promulgated under the section 112(i)(5) of the Act.
 - 5. Are not modifications under any provision of Title I of the Act;

- 6. Are not changes in fuels not represented in the permit application or provided for in the permit;
- 7. Are not minor NSR modifications subject to R18-2-334; and
- 8. Are not required to be processed as a significant permit revision under R18-2-320.
- B. Minor permit revision procedures shall be used for the following changes at a Class II source:
 - 1. A change that triggers a new applicable requirement if all of the following apply:
 - a. The change is not a minor NSR modification subject to R18-2-334;
 - b. A case-by-case determination of an emission limitation or other standard is not required; and
 - c. The change does not require the source to obtain a Class I permit.
 - 2. A change that increases emissions above the permitted level unless the increase otherwise creates a condition that requires a significant permit revision;
 - 3. A change in fuel from fuel oil or coal, to natural gas or propane, if not authorized in the permit;
 - 4. A change that results in emissions subject to monitoring, recordkeeping, or reporting under R18-2-306(A)(3),(4), or (5) and that cannot be measured or otherwise adequately quantified by monitoring, recordkeeping, or reporting requirements already in the permit;
 - 5. A decrease in the emissions permitted under an emissions cap unless the decrease requires a change in the conditions required to enforce the cap or to ensure that emissions trades conducted under the cap are quantifiable and enforceable; and
 - 6. Replacement of an item of air pollution control equipment listed in the permit with one that does not have the same or better efficiency.
- C. As approved by the Director, minor permit revision procedures may be used for permit revisions involving the use of economic incentives, marketable permits, emissions trading, and other similar approaches, to the extent that the minor permit revision procedures are explicitly provided for in an applicable implementation plan or in applicable requirements promulgated by the Administrator.
- D. An application for minor permit revision shall be on the standard application form provided under R18-2-304(B) and include the following:
 - 1. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
 - 2. For Class I sources, and any source that is making the change immediately after it files the application, the source's suggested draft permit;
 - 3. Certification by a responsible official, consistent with standard permit application requirements, that the proposed revision meets the criteria for use of minor permit revision procedures and a request that the procedures be used;
- E. EPA and affected state notification. For Class I permits, within five working days of receipt of an application for a minor permit revision, the Director shall notify the Administrator and affected states of the requested permit revision in accordance with R18-2-307.
- F. For Class I permits, the Director shall not issue a final permit revision until after the Administrator's 45-day review period or until the Administrator has notified the Director that the Administrator will not object to issuance of the permit revision, whichever is first, although the Director may approve the permit revision before that time. Within 90 days of the Direc-

tor's receipt of an application under minor permit revision procedures, or 15 days after the end of the Administrator's 45-day review period, whichever is later, the Director shall do one or more of the following:

1. Issue the permit revision as proposed,
 2. Deny the permit revision application,
 3. Determine that the proposed permit revision does not meet the minor permit revision criteria and should be reviewed under the significant revision procedures, or
 4. Revise the proposed permit revision and transmit to the Administrator the new proposed permit revision as required in R18-2-307.
- G.** The source may make the change proposed in its minor permit revision application immediately after it files the application. After a Class I source makes a change allowed by the preceding sentence, and until the Director takes any of the actions specified in subsection (F), the source shall comply with both the applicable requirements governing the change and the proposed revised permit terms and conditions. During this time period, the Class I source need not comply with the existing permit terms and conditions it seeks to modify. However, if the Class I source fails to comply with its proposed permit terms and conditions during this time period, the existing permit terms and conditions it seeks to revise may be enforced against it.
- H.** The permit shield under R18-2-325 shall not extend to minor permit revisions.
- I.** Notwithstanding any other part of this Section, the Director may require a permit to be revised under R18-2-320 for any change that, when considered together with any other changes submitted by the same source under this Section or R18-2-317.02 over the life of the permit, do not satisfy subsection (A) for Class I sources or subsection (B) for Class II sources.
- J.** The Director shall make available to the public monthly summaries of all applications for minor permit revisions.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-319 renumbered without change as R18-2-319 (Supp. 87-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-320. Significant Permit Revisions

- A.** For Class I sources, a significant revision shall be used for an application requesting a permit revision that does not qualify as a minor permit revision or as an administrative amendment. A significant revision that is only required because of a change described in R18-2-319(A)(6) or (7) shall not be considered a significant permit revision under part 70 for the purposes of 40 CFR 64.5(a)(2). Every significant change in existing monitoring permit terms or conditions and every relaxation of reporting or recordkeeping permit terms or conditions shall follow significant revision procedures.
- B.** A source with a Class II permit shall make the following changes only after the permit is revised following the public participation requirements of R18-2-330:
1. Establishing or revising a voluntarily accepted emission limitation or standard as described by R18-2-306.01 or R18-2-306.02, except a decrease in the limitation authorized by R18-2-319(B)(5);
 2. Making any change in fuel not authorized by the permit and that is not fuel oil or coal, to natural gas or propane;

3. A change that is a minor NSR modification subject to R18-2-334;
 4. A change that relaxes monitoring, recordkeeping, or reporting requirements, except when the change results from:
 - a. Removing equipment that results in a permanent decrease in actual emissions, if the source keeps onsite records of the change in a log that satisfies Appendix 3 of this Chapter and if the requirements that are relaxed are present in the permit solely for the equipment that was removed; or
 - b. A change in an applicable requirement.
 5. A change that will cause the source to violate an existing applicable requirement including the conditions establishing an emissions cap;
 6. A change that will require any of the following:
 - a. A case-by-case determination of an emission limitation or other standard;
 - b. A source-specific determination of ambient impacts, or an analysis of impacts on visibility or maximum allowable increases allowed under R18-2-218; or
 - c. A case-by-case determination of a monitoring, recordkeeping, and reporting requirement.
 7. A change that requires the source to obtain a Class I permit.
- C.** Any modification to a major source of federally listed hazardous air pollutants, and any reconstruction of a source, or a process or production unit, under section 112(g) of the Act and regulations promulgated thereunder, shall follow significant permit revision procedures and any rules adopted under A.R.S. § 49-426.03.
- D.** Significant permit revisions shall meet all requirements of this Article for applications, public participation, review by affected states, and review by the Administrator that apply to permit issuance and renewal. Notwithstanding R18-2-330(C), the Director may provide notice for changes requiring a significant permit revision solely under subsection (B)(2), (4) or (6)(c) by posting a notice on the Department's web site, sending e-mails to persons who have requested electronic notification of the Department's proposed air quality permit actions and by mailing a copy of the notice as provided in R18-2-330(C)(1).
- E.** When an existing source applies for a significant permit revision to revise its permit from a Class II permit to a Class I permit, it shall submit a Class I permit application in accordance with R18-2-304. The Director shall issue the entire permit, and not just the portion being revised, in accordance with Class I permit content and issuance requirements, including requirements for public, affected state, and EPA review, contained in R18-2-307 and R18-2-330.

Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 343, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-321. Permit Reopenings; Revocation and Reissuance; Termination

- A.** Reopening for Cause.

1. Each issued permit shall include provisions specifying the conditions under which the permit shall be reopened prior to the expiration of the permit. A permit shall be reopened and revised under any of the following circumstances:
 - a. Additional applicable requirements under the Act become applicable to a major source with a remaining permit term of three or more years. Such a reopening shall be completed not later than 18 months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to R18-2-322(B). Any permit revision required pursuant to this subsection shall comply with provisions in R18-2-322 for permit renewal and shall reset the five-year permit term.
 - b. Additional requirements, including excess emissions requirements, become applicable to an affected source under the acid rain program. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the Class I permit.
 - c. The Director or the Administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
 - d. The Director or the Administrator determines that the permit needs to be revised or revoked to assure compliance with the applicable requirements.
 2. Proceedings to reopen and issue a permit, including appeal of any final action relating to a permit reopening, shall follow the same procedures as apply to initial permit issuance and shall, except for reopenings under subsection (A)(1)(a), affect only those parts of the permit for which cause to reopen exists. Such reopening shall be made as expeditiously as practicable.
 3. Reopenings under subsection (A)(1) shall not be initiated before a notice of such intent is provided to the source by the Director at least 30 days in advance of the date that the permit is to be reopened, except that the Director may provide a shorter time period in the case of an emergency.
 4. When a permit is reopened and revised pursuant to this Section, the Director may make appropriate revisions to the permit shield established pursuant to R18-2-325.
- B.** Within 10 days of receipt of notice from the Administrator that cause exists to reopen a Class I permit, the Director shall notify the source. The source shall have 30 days to respond to the Director. Within 90 days of receipt of notice from the Administrator that cause exists to reopen a permit, or within any extension to the 90 days granted by EPA, the Director shall forward to the Administrator and the source a proposed determination of termination, revision, or revocation and reissuance of the permit. Within 90 days of receipt of an EPA objection to the Director's proposal, the Director shall resolve the objection and act on the permit.
- C.** The Director may issue a notice of termination of a permit or registration issued pursuant to this Chapter if:
1. The Director has reasonable cause to believe that the permit or registration was obtained by fraud or misrepresentation.
 2. The person applying for the permit or registration failed to disclose a material fact required by the application form or the regulation applicable to the permit or registration, of which the applicant had or should have had knowledge at the time the application was submitted.
 3. The terms and conditions of the permit or registration have been or are being violated.
- D.** If the Director issues a notice of termination under this Section, the notice shall be served on the permittee by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the revocation and a statement that the permittee is entitled to a hearing.

Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-321 renumbered without change as R18-2-321 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-322. Permit Renewal and Expiration

- A.** A permit being renewed is subject to the same procedural requirements, including any for public participation and affected states and Administrator review, that would apply to that permit's initial issuance.
- B.** Except as provided in R18-2-303(A), permit expiration terminates the source's right to operate unless a timely application for renewal that is sufficient under A.R.S. § 41-1064 has been submitted in accordance with R18-2-304. Any testing that is required for renewal shall be completed before the proposed permit is issued by the Director.
- C.** The Director shall act on an application for a permit renewal within the same time-frames as on an initial permit.

Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-322 renumbered without change as R18-2-322 (Supp. 87-3). Amended effective December 1, 1988 (Supp. 88-4). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-323. Permit Transfers

- A.** Except as provided in A.R.S. § 49-429 and subsection (B), a Class I or II permit may be transferred to another person if the person who holds the permit gives notice to the Director in writing at least 30 days before the proposed transfer. The notice shall contain the following:
1. The permit number and expiration date;
 2. The name, address, and telephone number of the current permit holder;
 3. The name, address and telephone number of the person to receive the permit;
 4. The name and title of the individual within the organization who is accepting responsibility for the permit along with a signed statement by that person indicating such acceptance;
 5. A description of the equipment to be transferred;
 6. A written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee;
 7. Provisions for the payment of any fees pursuant to R18-2-326 or R18-2-501 that will be due and payable before the effective date of transfer;
 8. Sufficient information about the source's technical and financial capabilities of operating the source to allow the Director to make the decision in subsection (B) including:
 - a. The qualifications of each person principally responsible for the operation of the source;

- b. A statement by the chief financial officer of the new permittee that it is financially capable of operating the facility in compliance with the law, and the information that provides the basis for that statement;
 - c. A brief description of any action for the enforcement of any federal or state law, or any county, city, or local government ordinance relating to the protection of the environment, instituted against any person employed by the new permittee and principally responsible for operating the facility during the five years preceding the date of application. In lieu of this description, the new permittee may submit a copy of the certificate of disclosure or 10-K form required under A.R.S. § 49-109, or a statement that this information has been filed in compliance with A.R.S. § 49-109.
- B.** The Director shall deny the transfer if the Director determines that the organization receiving the permit is not capable of operating the source in compliance with A.R.S. Title 49, Chapter 3, Article 2, the provisions of this Chapter or the provisions of the permit. Notice of the denial shall be sent to the original permit holder by certified mail stating the reason for the denial within 10 working days of the Director's receipt of the application. If the transfer is not denied within 10 working days after receipt of the notice, it shall be deemed approved.
- C.** To appeal the transfer denial:
- 1. Both the transferor and transferee shall petition the Office of Administrative Hearings in writing for a public hearing; and
 - 2. All parties shall follow the appeal process for a permit.
- D.** The Director shall make available to the public monthly summaries of all notices received under this Section.

Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-323 renumbered without change as R18-2-323 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Section repealed, new Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4698, effective February 3, 2007 (Supp. 06-4).

R18-2-324. Portable Sources

- A.** A portable source that will operate for the duration of its permit solely in one county that has established a local air pollution control program pursuant to A.R.S. § 49-479 shall obtain a permit from that county. A portable source with a county permit shall not operate in any other county. A portable source that has a permit issued by the Director and obtains a county permit shall request that the Director terminate the permit. Upon issuance of the county permit, the permit issued by the Director is no longer valid.
- B.** A portable source which has a county permit but proposes to operate outside that county shall obtain a permit from the Director. A portable source that has a permit issued by a county and obtains a permit issued by the Director shall request that the county terminate the permit. Upon issuance of a permit by the Director, the county permit is no longer valid. Before commencing operation in the new county, the source shall notify the Director and the control officer who has jurisdiction in the county that includes the new location according to subsection (C).
- C.** A portable source may be transferred from one location to another provided that the owner or operator of such equipment notifies the Director and any control officer who has jurisdiction over the geographic area that includes the new location of

the transfer prior to the transfer. The notification required under this subsection shall include:

- 1. A description of the equipment to be transferred including the permit number for such equipment;
 - 2. A description of the present location;
 - 3. A description of the new location;
 - 4. The date on which the equipment is to be moved; and
 - 5. The date on which operation of the equipment will begin at the new location.
- D.** Any permit for a portable source shall contain conditions that will assure compliance with all applicable requirements at all authorized locations.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-325. Permit Shields

- A.** Each Class I or II permit issued under this Chapter shall specifically identify all federal, state, and local air pollution control requirements applicable to the source at the time the permit is issued. The permit shall state that compliance with the conditions of the permit shall be deemed compliance with any applicable requirement as of the date of permit issuance, provided that such applicable requirements are included and expressly identified in the permit. The Director may include in a permit determinations that other requirements specifically identified are not applicable. Any permit under this Chapter that does not expressly state that a permit shield exists shall not provide such a shield.
- B.** Nothing in this Section or in any permit shall alter or affect the following:
- 1. The provisions of Section 303 of the Act (emergency orders), including the authority of the Administrator under that Section;
 - 2. The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;
 - 3. The applicable requirements of the acid rain program, consistent with Section 408(a) of the Act;
 - 4. The ability of the Administrator or the Director to obtain information from a source pursuant to Section 114 of the Act, or any provision of state law;
 - 5. The authority of the Director to require compliance with new applicable requirements adopted after the permit is issued.
- C.** In addition to the provisions of R18-2-321, a permit may be reopened by the Director and the permit shield revised when it is determined that standards or conditions in the permit are based on incorrect information provided by the applicant.

Historical Note

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4).

R18-2-326. Fees Related to Individual Permits

- A.** Source Categories. The owner or operator of a source required to have an air quality permit from the Director shall pay the fees described in this Section unless authorized to operate under a general permit issued under Article 5. The fees are

based on a source being classified in one of the following three categories:

1. Class I Title V sources are those required or that elect to have a permit under R18-2-302(B)(1).
2. Class II Title V sources are those required to have a permit under R18-2-302(B)(2) and that are subject to new source performance standards or national emission standards for hazardous air pollutants.
3. Class II Non-Title V sources are those required to have a permit under R18-2-302(B)(2) and that are not subject to new source performance standards or national emission standards for hazardous air pollutants.

B. Fees for Permit Actions.

1. The owner or operator of a Class I Title V source, Class II Title V source, or Class II Non-Title V source shall pay to the Director the following:
 - a. \$133.50 per hour, adjusted annually under subsection (H), for all permit processing time required for a billable permit action; and
 - b. The actual costs of public notice conducted according to R18-2-330.
2. The Director may require periodic payment of permit processing fees based on the most recent accounting of time spent processing the permit including any fees for contractors.
3. Upon completion of permit processing activities other than issuance or denial of the permit or permit revision, the Director shall send notice of the decision to the applicant along with a final itemized bill. The maximum fee for any billable permit action for a non-Title V source is \$25,000. Except as provided in subsection (G), the Director shall not issue a permit or permit revision until the final bill is paid in full.

C. Class I Title V Fees. The owner or operator of a Class I Title V source that has undergone initial startup by January 1 shall annually pay to the Director an administrative fee plus an emissions-based fee as follows:

1. The applicable administrative fee from the table below, as adjusted annually under subsection (H). The fee is due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.

Class I Title V Source Category	Administrative Fee
Aerospace	\$20,800
Air Curtain Destructors	\$750
Cement Plants	\$63,690
Combustion/Boilers	\$15,480
Compressor Stations	\$12,730
Electronics	\$20,490
Expandable Foam	\$14,680
Foundries	\$19,520
Landfills	\$15,960
Lime Plants	\$60,160
Copper & Nickel Mines	\$15,000
Gold Mines	\$15,000
Mobile Home Manufacturing	\$14,830
Paper Mills	\$20,480
Paper Coaters	\$15,480
Petroleum Products Terminal Facilities	\$22,730
Polymeric Fabric Coaters	\$20,480
Reinforced Plastics	\$15,480
Semiconductor Fabrication	\$26,930

Copper Smelters	\$63,690
Utilities - Fossil Fuel Fired Except Coal	\$16,440
Utilities - Coal Fired	\$32,570
Vitamin/Pharmaceutical Manufacturing	\$15,800
Wood Furniture	\$15,480
Others	\$20,490
Others with Continuous Emissions Monitoring	\$20,490

2. An emissions-based fee of \$38.25 per ton of actual emissions of all regulated pollutants emitted during the previous calendar year ending 12 months earlier. The fee is adjusted annually under subsection (C)(2)(d) and due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.
 - a. For purposes of this Section, "actual emissions" means the quantity of all regulated pollutants emitted during the calendar year, as determined by the annual emissions inventory under R18-2-327.
 - b. For purposes of this Section, regulated pollutants consist of the following:
 - i. Nitrogen oxides and any volatile organic compounds;
 - ii. Conventional air pollutants, except carbon monoxide and ozone;
 - iii. Any pollutant that is subject to any standard promulgated under Section 111 of the Act, including fluorides, sulfuric acid mist, hydrogen sulfide, total reduced sulfur, and reduced sulfur compounds; and
 - iv. Any federally listed hazardous air pollutant.
 - c. For purposes of this Section, the following emissions of regulated pollutants are excluded from a source's actual emissions:
 - i. Emissions of any regulated pollutant from the source in excess of 4,000 tons per year;
 - ii. Emissions of any regulated pollutant already included in the actual emissions for the source, such as a federally listed hazardous air pollutant that is already accounted for as a VOC or as PM₁₀;
 - iii. Emissions from insignificant activities listed in the permit application for the source under R18-2-304(F)(8);
 - iv. Fugitive emissions of PM₁₀ from activities other than crushing, belt transfers, screening, or stacking; and
 - v. Fugitive emissions of VOC from solution-extraction units.
 - d. The Director shall adjust the rate for emission-based fees every November 1, after December 4, 2007, by multiplying \$38.25 by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2007. The Consumer Price Index for any year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of that year.
- D. Class II Title V Fees.** The owner or operator of a Class II Title V source that has undergone initial startup by January 1 shall pay the applicable administrative fee from the table below, adjusted under subsection (H), for that calendar year, and annually thereafter. The fee is due by February 1 or 60 days

after the Director mails the invoice under subsection (F), whichever is later.

Class II Title V Source Category	Administrative Fee
Synthetic minor sources, except portable sources	Administrative fee from Class I Title V table for category
Stationary	\$8,070
Portables	\$8,070
Small Source	\$750

- E. Class II Non-Title V Fees. The owner or operator of a Class II Non-Title V source that has undergone initial startup by January 1 shall pay the applicable inspection fee from the table below, adjusted under subsection (H), for that calendar year, and annually thereafter. The fee is due by February 1 or 60 days after the Director mails the invoice under subsection (F), whichever is later.

Class II Non-Title V Source Category	Inspection Fee
Stationary	\$5,230
Portables	\$5,230
Gasoline Service Stations	\$750

- F. The Director shall mail the owner or operator of each source an invoice for all fees due under subsections (C), (D), or (E) by December 1.
- G. Any person who receives a final itemized bill from the Director under this Section for a billable permit action may request an informal review of the hours billed and may pay the bill under protest as provided below:
1. The request shall be made in writing, and received by the Director within 30 days of the date of the final bill. Unless the Director and person agree otherwise, the informal review shall take place within 30 days after the Director's receipt of the request. The Director shall arrange the date and location of the informal review with the person at least 10 business days before the informal review. The Director shall review whether the amounts of time billed are correct and reasonable for the tasks involved. The Director shall mail his or her decision on the informal review to the person within 10 business days after the informal review date.
 2. The Director's decision after informal review shall become final unless, within 30 days after person's receipt of the informal review decision, the person requests a hearing under R18-1-202.
 3. If the final itemized bill is paid under protest, the Director shall take final action on the permit or permit revision.
- H. The Director shall adjust the hourly rate every November 1, to the nearest 10 cents per hour, after December 4, 2007, by multiplying \$133.50 by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2007. The Director shall adjust the administrative or inspection fees listed in subsections (C), (D), and (E) every November 1, to the nearest \$10, beginning December 4, 2007, by multiplying the administrative or inspection fee by the Consumer Price Index (CPI) for the most recent year, and then dividing by the CPI for the year 2007. The Consumer Price Index for any year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of that year.

- I. An applicant for a Class I or Class II permit or permit revision may request that the Director provide accelerated processing of the application by providing the Director written notice 60 days before filing the application. The request shall be accompanied by an initial fee of \$15,000. The fee is non-refundable to the extent of the Director's costs for accelerating the processing if the Director undertakes the accelerated processing described below:
1. If an applicant requests accelerated permit processing, the Director may, to the extent practicable, undertake to process the permit or permit revision according to the following schedule:
 - a. For applications for initial Class I and II permits under R18-2-302 or significant permit revisions under R18-2-320, the Director shall issue or deny the proposed permit or permit revision within 120 days after the Director determines that the application is complete.
 - b. For minor permit revisions under R18-2-319, the Director shall issue or deny the permit revision within 60 days after receiving a complete application.
 2. At any time after an applicant requests accelerated permit processing, the Director may require additional advance payments based on the most recent estimate of additional costs.
 3. Upon completion of permit processing activities but before issuance or denial of the permit or permit revision, the Director shall send notice of the decision to the applicant along with a final bill. The maximum fee for any billable permit action for a non-Title V source is \$25,000. The final bill shall include all regular permit processing and other fees due, and, in addition, the difference between the cost of accelerating the permit application, including any costs incurred by the Director in contracting for, hiring, or supervising the work of outside consultants, and all advance payments submitted for accelerated processing. In the event all payments made exceed actual accelerated permit costs, the Director shall refund the excess advance payments. Nothing in this subsection affects the public participation requirements of R18-2-330, or EPA and affected state review as required under R18-2-307 or R18-2-319.
- J. Inactive Sources. The owner or operator of a permitted source that has undergone initial startup but was shut down for the entire preceding year shall pay 50 percent of the administrative or inspection fee required under subsection (C), (D), or (E). The owner or operator of a source claiming inactive status under this subsection shall submit a letter to the Director by December 15 of the calendar year for which the source was inactive. Termination of a permit does not relieve a source of any past fees due.
- K. If an applicant uses the Tier 4 method for conducting a risk management analysis (RMA) according to R18-2-1708(B), the applicant shall pay any costs incurred by the Director in contracting for, hiring or supervising work of outside consultants.
- L. Transition.
1. Subsections (A) through (J) of this Section are effective December 4, 2007. The first administrative or inspection fees are due on February 1, 2008.
 2. Except as provided in subsection (b), all fees incurred after December 4, 2007, are payable in accordance with the rates contained in this Section.
 - a. Emission-based fees for calendar year 2006 shall be billed at \$38.25 per ton and be due February 1, 2008.

- b. The hourly rates and maximum fees for a new permit or permit revision are those in effect when the application for the permit or revision is determined to be complete.
- c. Fees accrued but not yet paid before the effective date of this Section remain as obligations to be paid to the Department

Historical Note

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 10 A.A.R. 4767, effective November 4, 2004 (Supp. 04-4). Amended by final rulemaking at 13 A.A.R. 4379, effective December 4, 2007 (Supp. 07-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-326.01. Expired

Historical Note

New Section made by exempt rulemaking at 16 A.A.R. 844, effective July 1, 2010 (Supp. 10-2). Section expired under A.R.S. § 41-1056(J) at 23 A.A.R. 613, effective February 14, 2017 (Supp. 17-1).

R18-2-327. Annual Emissions Inventory Questionnaire

- A. Every source subject to permit requirements under this Chapter shall complete and submit to the Director an annual emissions inventory questionnaire. The questionnaire is due by March 31 or 90 days after the Director makes the inventory form available, whichever occurs later, and shall include emission information for the previous calendar year. These requirements apply whether or not a permit has been issued and whether or not a permit application has been filed.
- B. The questionnaire shall be on a form provided by the Director and shall include the following information:
 - 1. The source's name, description, mailing address, contact person and contact person phone number, and physical address and location, if different than the mailing address.
 - 2. Process information for the source, including design capacity, operations schedule, and emissions control devices, their description and efficiencies.
 - 3. The actual quantity of emissions from permitted emission points and fugitive emissions as provided in the permit, including documentation of the method of measurement, calculation, or estimation, determined pursuant to subsection (C), of the following regulated air pollutants:
 - a. Any single regulated air pollutant in a quantity greater than 1 ton or the amount listed for the pollutant in the definition of "significant" in R18-2-101(131)(a) or (b), whichever is less.
 - b. Any combination of regulated air pollutants in a quantity greater than 2 1/2 tons.
- C. Actual quantities of emissions shall be determined using the following emission factors or data:
 - 1. Whenever available, emissions estimates shall either be calculated from continuous emissions monitors certified pursuant to 40 CFR 75, Subpart C and referenced appendices, or data quality assured pursuant to Appendix F of 40 CFR 60.
 - 2. When sufficient data pursuant to subsection (C)(1) is not available, emissions estimates shall be calculated from data from source performance tests conducted pursuant to R18-2-312 in the calendar year being reported or, when not available, conducted in the most recent calendar year representing the operating conditions of the year being reported.
 - 3. When sufficient data pursuant to subsection (C)(1) or (2) is not available, emissions estimates shall be calculated using emissions factors from EPA Publication No. AP-42 "Compilation of Air Pollutant Emission Factors," Volume I: Stationary Point and Area Sources, Fifth Edition, 1995, U.S. Environmental Protection Agency, Research Triangle Park, NC, including Supplements A through F and all updates published through July 1, 2011 (and no future editions). AP-42 is incorporated by reference and is on file with the Department of Environmental Quality and can be obtained from the Government Printing Office, 732 North Capitol Street, NW, Washington, D.C. 20401, telephone (202) 512-1800, or by downloading the document from the web site for the EPA Clearinghouse for Emission Inventories and Emission Factors.
 - 4. When sufficient data pursuant to subsections (C)(1) through (C)(3) is not available, emissions estimates shall be calculated from material balance using engineering knowledge of process.
 - 5. When sufficient data pursuant to subsections (C)(1) through (4) is not available, emissions estimates shall be calculated by equivalent methods approved by the Director. The Director shall only approve methods that are demonstrated as accurate and reliable as one of the methods in subsections (C)(1) through (4).
- D. Actual quantities of emissions calculated under subsection (C) shall be determined on the basis of actual operating hours, production rates, in-place process control equipment, operational process control data, and types of materials processed, stored, or combusted.
- E. An amendment to an annual emission inventory questionnaire, containing the documentation required by subsection (B)(3), shall be submitted to the Director by any source whenever it discovers or receives notice, within two years of the original submittal, that incorrect or insufficient information was submitted to the Director by a previous questionnaire. If the incorrect or insufficient information resulted in an incorrect annual emissions fee, the Director shall require that additional payment be made or shall apply an amount as a credit to a future annual emissions fee. The submittal of an amendment under this subsection (shall) not subject the owner or operator to an enforcement action or a civil or criminal penalty if the original submittal of incorrect or insufficient information was due to reasonable cause and not willful neglect.
- F. The Director may require submittal of supplemental emissions inventory questionnaires for air contaminants pursuant to A.R.S. §§ 49-422, 49-424, and 49-426.03 through 49-426.08.

Historical Note

Emergency rule adopted effective September 17, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-3). Emergency rule re-adopted without change effective December 16, 1991, pursuant to A.R.S. § 41-1026, valid for only 90 days (Supp. 91-4). Emergency expired; text deleted (Supp. 93-1). New Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective December 7, 1995 (Supp. 95-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23

A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-328. Conditional Orders

- A.** The Director may grant to any person a conditional order for each air pollution source which allows such person to vary from any provision of A.R.S. Title 49, Chapter 3, Article 2, or this Chapter, for any non-federally enforceable requirement of a permit issued pursuant to this Chapter if the Director makes each of the following findings:
 1. Issuance of the conditional order will not endanger public health or the environment, impede attainment or maintenance of the national ambient air quality standards, or constitute a violation of the Act; and
 2. Either of the following is true:
 - a. There has been a breakdown of equipment or upset of operations beyond the control of the petitioner which causes the source to be out of compliance with the requirements of this Chapter; the source was in compliance with the requirements of this Chapter before the breakdown or upset, and the breakdown or upset may be corrected within a reasonable time;
 - b. There is no reasonable relationship between the economic and social cost of, and benefits to be obtained from, achieving compliance.
- B.** The following procedures shall apply to a person seeking a conditional order:
 1. The person shall file a petition for a conditional order with the Director. The petition shall contain at a minimum:
 - a. A description of the breakdown or upset;
 - b. A description of corrective action being undertaken to bring the source back into compliance;
 - c. An estimate of emissions related to the breakdown or upset;
 - d. A compliance schedule with a date of final compliance and interim dates as appropriate;
 - e. A detailed analysis of the economic and social costs and benefits of achieving compliance with the requirement for which the variance is sought, if the petition is based on subsection (A)(2)(b).
 2. If the issuance of the conditional order requires a public hearing pursuant to R18-2-330, the Director shall set the hearing date within 30 days after the filing of the petition and the hearing shall be held within 60 days after the filing of the petition.
 3. Notice of the filing of a petition for a conditional order and of the hearing date on said petition shall be published in the manner provided in A.R.S. § 49-444 and R18-2-330.
- C.** Decisions on petitions for a conditional order shall be made as follows:
 1. For any conditional order that requires a revision to the SIP, the Director shall comply with the requirements contained in 40 CFR 51, Subpart F.
 2. For any other conditional order, the Director shall grant or deny the petition with such terms and conditions as are listed in subsection (E)(2) within 30 days after the conclusion of any required hearing, or, if no hearing is held, within 60 days after the filing of the petition.
- D.** A fee to cover the costs of processing conditional orders may be charged by the Director prior to issuance consistent with R18-2-326(I) or (J). The fee shall be deposited in the permit administration fund established in A.R.S. § 49-455.
- E.** The terms of a conditional order or its renewal shall conform to the following:
 1. A conditional order issued by the Director shall be valid for such period as the Director prescribes but in no event for more than one year in the case of a source that is required to obtain a permit pursuant to this Chapter and Title V of the Act, and three years in the case of any other source that is required to obtain a permit pursuant to this Chapter.
 2. The terms and conditions which are imposed as a condition to the granting or the continued existence of a conditional order shall include:
 - a. A detailed plan for completion of corrective steps needed to conform to the provisions of A.R.S. Title 49, Chapter 3, Article 2, this Chapter, and the requirements of any permit issued pursuant to this Chapter;
 - b. A requirement that necessary construction shall begin as expeditiously as practicable and proceed as specified in the compliance schedule;
 - c. Written reports, at least quarterly, of the status of the source and construction progress;
 - d. The right of the Director to make periodic inspection of the facilities for which the conditional order is granted;
 - e. Such additional terms and conditions as the Director finds necessary to meet the requirements of this Section and A.R.S. § 49-437.
 3. A holder of a conditional order may petition the Director to renew the order. The total term of the initial period and all renewals shall not exceed three years from the date of initial issuance of the order. Petitions for renewal may be filed at any time not more than 60 days nor less than 30 days prior to the expiration of the order. The Director, within 30 days of receipt of a petition, shall renew the conditional order for one year if the petitioner is in compliance and conforming with the terms and conditions imposed. The Director may refuse to renew the conditional order if, after a public hearing held within 30 days of receipt of a petition, the Director finds that the petitioner is not in compliance and conforming with the terms and conditions of the conditional order. If, after a period of three years from the date of original issuance, the petitioner is not in compliance and conforming with the terms and conditions, the Director may renew a conditional order for a total term of two additional years only if the Director finds that failure to comply and conform is due to conditions beyond the control of such petitioner.
 4. If the Director amends or adopts any rule imposing conditions on the operation of an air pollution source which have become effective as to the source by reason of the action of the Director or otherwise, and which require the implementation of control strategies necessitating the installation of additional or different air pollution control equipment, the Director may renew a conditional order for an additional term. The term of the renewal shall be governed by the preceding subsections of this Section, except that the total term of the renewal shall not exceed two years.
 5. A conditional order issued by the Director shall be effective when issued unless:
 - a. The conditional order varies from the requirements of the applicable implementation plan, in which case the conditional order shall be submitted to the Administrator as a revision to the applicable implementation plan pursuant to Section 110(I) of the Act and shall become effective upon approval by the Administrator.

- b. The conditional order varies from the requirements of a permit issued for a facility that is required to obtain a permit pursuant to Title V of the Act, in which case the conditional order shall be submitted to the Administrator if required by Section 505 of the Act and shall be effective at the end of the review period specified in such section, unless objected to within such period by the Administrator.
- F. Violation of the terms and conditions of the conditional order shall subject the source to suspension or revocation of the conditional order in accordance with A.R.S. § 49-441.
- d. The activity or activities involved in the permit action;
- e. The emissions change involved in any permit revisions;
- f. The air contaminants to be emitted;
- g. If applicable, that a notice of confidentiality has been filed under R18-2-305;
- h. If applicable, that the source has submitted a risk management analysis under R18-2-1708;
- i. A statement that any person may submit written comments, or a written request for a public hearing, or both, on the proposed permit action, along with the deadline for such requests or comments;
- j. The name, address, and telephone number of a person from the Department from whom additional information may be obtained;
- k. Locations where the materials identified in subsection (D) may be reviewed and the times at which they shall be available for public inspection.
- l. The Director shall include a statement in the public notice if the permit or permit revision would result in the generation of emission reduction credits under R18-2-1204, or the utilization of emission reduction credits under R18-2-1206.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).

R18-2-329. Permits Containing the Terms and Conditions of Federal Delayed Compliance Orders (DCO) or Consent Decrees

- A. The terms and conditions of either a delayed compliance order (DCO) or consent decree shall be incorporated into a permit through a permit revision. In the event the permit expires prior to the expiration of the DCO or consent decree, the DCO or consent decree shall be incorporated into any permit renewal.
- B. The owner or operator of a source subject to a DCO or consent decree shall submit to the Director a quarterly report of the status of the source and construction progress and copies of any reports to the Administrator required under the order or decree. The Director may require additional reporting requirements and conditions in permits issued under this Article.
- C. For the purpose of this Chapter, sources subject to a consent decree issued by a federal court shall meet the same requirements as those subject to a DCO.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).

R18-2-330. Public Participation

- A. The Director shall provide public notice, an opportunity for public comment, and an opportunity for a hearing before taking any of the following actions:
 - 1. The issuance or denial of a permit or permit renewal,
 - 2. The issuance or denial of a significant permit revision,
 - 3. The revocation and reissuance or reopening of a permit,
 - 4. The grant of any conditional orders pursuant to R18-2-328,
 - 5. The issuance or denial of a registration for the construction of a source, except as provided in R18-2-302.01(B)(5).
- B. The Director shall provide public notice of receipt of complete applications for permits or permit revisions subject to Article 4 of this Chapter by publishing a notice in a newspaper of general circulation in the county where the source is or will be located.
- C. The Director shall provide the notice required pursuant to subsection (A) as follows:
 - 1. The Director shall publish the notice once each week for two consecutive weeks in two newspapers of general circulation in the county where the source is or will be located.
 - 2. The Director shall mail a copy of the notice to persons on a mailing list developed by the Director consisting of those persons who have requested in writing to be placed on such a mailing list.
 - 3. The notice shall include the following:
 - a. Identification of the affected facility;
 - b. Name and address of the permittee or applicant;
 - c. Name and address of the permitting authority processing the permit action;
- D. By no later than the date notice is first published under subsection (A), the Department shall make copies of the following materials available at a public location in the same county as the stationary source that is the subject of the application and at the closest Department office:
 - 1. The application;
 - 2. The proposed permit or permit revision, if applicable;
 - 3. The Department's analysis in support of the grant or denial of the permit or permit revision; and
 - 4. All other materials available to the Director that are relevant to the permit decision.
- E. The Director shall hold a public hearing to receive comments on petitions for conditional orders which would vary from requirements of the applicable implementation plan. For all other actions involving a proposed permit, the Director shall hold a public hearing only upon written request. If a public hearing is requested, the Director shall schedule the hearing and publish notice as described in A.R.S. § 49-444 and subsection (D). The Director shall give notice of any public hearing at least 30 days in advance of the hearing.
- F. At the time the Director publishes the first notice under subsection (C)(1), the applicant shall post a notice containing the information required in subsection (C)(3) at the site where the source is or may be located. Consistent with federal, state, and local law, the posting shall be prominently placed at a location under the applicant's legal control, adjacent to the nearest public roadway, and visible to the public using the public roadway. If a public hearing is to be held, the applicant shall place an additional posting providing notice of the hearing. Any posting shall be maintained until the public comment period is closed.
- G. The Director shall provide at least 30 days from the date of its first notice for public comment to receive comments and requests for a hearing. The Director shall keep a record of the commenters and of the issues raised during the public participation process and shall prepare written responses to all comments received. At the time a final proposed permit is submitted to EPA, in the case of a Class I permit, or a final decision is made, in the case of a Class II permit, the record and copies of the Director's responses shall be made available to the applicant and all commenters.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1). R18-2-330 has been corrected to include subsection (D)(12), which was omitted when the Section was amended in the 02-1 supplement (Supp. 05-1). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-331. Material Permit Conditions

- A. For the purposes of A.R.S. §§ 49-464(G) and 49-514(G), a “material permit condition” shall mean a condition which satisfies all of the following:
1. The condition is in a permit or permit revision issued by the Director or a control officer after November 15, 1993.
 2. The condition is identified within the permit as a material permit condition.
 3. The condition is one of the following:
 - a. An enforceable emission standard imposed to avoid classification as a major modification or major source or to avoid triggering any other applicable requirement;
 - b. A requirement to install, operate, or maintain a maximum achievable control technology or hazardous air pollutant reasonably available control technology required under Article 17 of this Chapter;
 - c. A requirement for the installation or certification of a monitoring device;
 - d. A requirement for the installation of air pollution control equipment;
 - e. A requirement for the operation of air pollution control equipment;
 - f. An opacity standard required by Section 111 or Title I, Part C or D of the Act.
 4. Violation of the condition is not covered by A.R.S. § 49-464(A) through (F), or (H) through (J) or A.R.S. § 49-514(A) through (F), or (H) through (J).
- B. For the purposes of subsections (A)(3)(c), (d), and (e), a permit condition shall not be material where the failure to comply resulted from circumstances which were outside the control of the source. As used in this Section, “circumstances outside the control of the source” shall mean circumstances where the violation resulted from a sudden and unavoidable breakdown of the process or the control equipment, resulted from unavoidable conditions during a start up or shut down or resulted from upset of operations.
- C. For purposes of this Section, the term “emission standard” shall have the meaning specified in A.R.S. §§ 49-464(U) and 49-514(T).

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4). Amended effective June 4, 1998 (Supp. 98-2). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

R18-2-332. Stack Height Limitation

- A. The degree of emission limitation required of any source for control of any pollutant shall not be affected by so much of the source’s stack height that exceeds good engineering practice or by any other dispersion technique, except as provided in subsection (B). This section does not require the plan to restrict, in any manner, the actual stack height of any source.
- B. Subsection (A) shall not apply to:

1. Stacks in existence, or dispersion techniques implemented, on or before December 31, 1970, unless the stationary source or emission unit emitting pollutants through the stack, or employing the dispersion technique, was constructed, reconstructed or underwent a major modification after December 31, 1970; or
 2. Coal-fired steam electric generating units, subject to the provisions of Section 118 of the Act which commenced operation before July 1, 1957, with stacks constructed under a construction contract awarded before February 8, 1974.
- C. Good engineering practice stack height is the greater of the following heights:
1. 213.25 feet (65 meters) measured from the ground-level elevation at the base of the stack;
 2. The result of one of the following equations, where “Hg” = good engineering practice stack height measured from the ground-level elevation at the base of the stack; “H” = height of nearby structures measured from the ground-level elevation at the base of the stack; and “L” = lesser dimension (height or projected width) of nearby structures:
 - a. For stacks in existence on January 12, 1979, and for which the owner or operator had obtained all applicable preconstruction permits or approvals required under 40 CFR 51 and 52, $H_g = 2.5H$, provided the owner or operator produces evidence that this equation was actually relied on in establishing an emission limitation; or
 - b. For all other stacks, $H_g = H + 1.5L$, provided that EPA, the Director, or local control agency may require the use of a field study or fluid model to verify good engineering practice stack height for the source;
 3. The height demonstrated by a fluid model or a field study approved by the reviewing agency, which ensures that the emissions from a stack do not result in excessive concentrations of any air pollutant as a result of atmospheric downwash, wakes, or eddy effects created by the source itself, nearby structures, or nearby terrain features.
- D. As used in this Section:
1. For a specific structure or terrain feature, “nearby” means:
 - a. For purposes of applying the formulae in subsection (C)(2), that distance up to five times the lesser of the height or the width dimension of a structure but not greater than 0.8 km (1/2 mile).
 - b. For conducting demonstrations under subsection (C)(3), not greater than 0.8 km (1/2 mile). An exception is that the portion of a terrain feature may be considered to be nearby which falls within a distance of up to 10 times the maximum height (Ht) of the feature, not to exceed 2 miles if such feature achieved a height (Ht) 0.8 km from the stack that is at least 40% of the good engineering practice stack height determined by the formula provided in subsection (C)(2)(b), or 85 feet (26 meters), whichever is greater, as measured from the ground-level elevation at the base of the stack.
 2. “Excessive concentrations” means:
 - a. For sources seeking credit for stack height exceeding that established under subsection (C)(2), a maximum ground-level concentration due to emissions from a stack due in whole or in part to downwash, wakes, and eddy effects produced by nearby structures or nearby terrain features which individually is

at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects and which contributes to a total concentration due to emissions from all sources that is greater than a national ambient air quality standard. For sources subject to R18-2-406, an excessive concentration alternatively means a maximum ground-level concentration due to emissions from a stack due in whole or part to downwash, wakes or eddy effects produced by nearby structures or nearby terrain features which individually is at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects and greater than the applicable maximum allowable increase contained in R18-2-218. The allowable emission rate to be used in making demonstrations under subsection (C)(3) shall be prescribed by the new source performance standard which is applicable to the source category unless the owner or operator demonstrates that this emission rate is infeasible. Where such demonstrations are approved by the Director, an alternative emission rate shall be established in consultation with the source owner or operator;

- b. For sources seeking credit after October 11, 1983, for increases in existing stack heights up to the heights established under subsection (C)(2), either:
 - i. A maximum ground-level concentration due in whole or in part to downwash, wakes, or eddy effects as provided in subsection (D)(2)(a), except that emission rate specified by any applicable SIP (or, in the absence of such a limit, the actual emission rate) shall be used; or
 - ii. The actual presence of a local nuisance caused by the existing stack, as determined by the Director; and
- c. For sources seeking credit after January 12, 1979, for a stack height determined under subsection (C)(2), where the Director requires the use of a field study or fluid model to verify good engineering practice stack height, for sources seeking stack height credit after November 9, 1984, based on the aerodynamic influence of cooling towers, and for sources seeking stack height credit after December 31, 1970, based on the aerodynamic influence of structures not adequately represented by the equations in subsection (C)(2), a maximum ground-level concentration due in whole or in part to downwash, wakes, or eddy effects that is at least 40% in excess of the maximum concentration experienced in the absence of such downwash, wakes, or eddy effects.

- E. Before the Director issues a permit or permit revision under R18-2-334 or Article 4 to a source based on a good engineering practice stack height that exceeds the height allowed by subsection (B)(1) or (2), the Director shall notify the public of the availability of the demonstration study and provide opportunity for a public hearing in accordance with the requirements of R18-2-330.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4).
Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-333. Acid Rain

- A. 40 CFR 72, 74, 75 and 76 and all accompanying appendices, adopted as of June 28, 2013, (and no future amendments) are

incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

- B. When used in 40 CFR 72, 74, 75 or 76, "Permitting Authority" means the Arizona Department of Environmental Quality and "Administrator" means the Administrator of the United States Environmental Protection Agency.
- C. If the provisions or requirements of the regulations incorporated in this Section conflict with any of the remaining portions of this Title, the regulations incorporated in this Section apply and take precedence.

Historical Note

Adopted effective October 7, 1994 (Supp. 94-4).
Amended effective December 7, 1995 (Supp. 95-4).
Amended effective December 4, 1997 (Supp. 97-4).
Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expediated rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

R18-2-334. Minor New Source Review

- A. Applicability.
 1. Except as provided in subsection (A)(4), this Section shall apply to the following activities:
 - a. Construction of any new Class I or Class II source, including the construction of any source requiring a Class II permit under R18-2-302.01(C)(4); or
 - b. Any minor NSR modification to a Class I or Class II source.
 2. This Section shall apply to a regulated minor NSR pollutant emitted by a new stationary source subject to this Section, if the source will have the potential to emit that pollutant at an amount equal to or greater than the permitting exemption threshold.
 3. This Section shall apply to an increase in emissions of a regulated minor NSR pollutant from a minor NSR modification, if the modification would increase the source's potential to emit that pollutant by an amount equal to or greater than the permitting exemption threshold.
 4. This Section shall not apply to the emissions of a pollutant from any of the activities identified in this subsection, if the emissions of that pollutant are subject to Article 4 of this Chapter.
- B. No person shall begin actual construction of a new stationary source, or minor NSR modification, subject to this Section without first obtaining a permit, a permit revision, a proposed final permit, or a proposed final permit revision from the Director in accordance with R18-2-304.
- C. The Director shall not issue a proposed final Class I permit or permit revision or a Class II permit or permit revision subject to this Section to a person proposing to construct a new source or make a minor NSR modification unless the source or modification meets one of the following conditions for each regulated minor NSR pollutant subject to this section:
 1. The owner or operator elects to implement RACT.

- a. In the case of a new source, the owner or operator shall implement RACT for each emissions unit that has the potential to emit a regulated minor NSR pollutant in an amount equal to or greater than 20% of the permitting exemption threshold.
 - b. In the case of a minor NSR modification, the owner or operator shall implement RACT for each emissions unit that will experience an increase in the potential to emit a regulated minor NSR pollutant equal to or greater than 20% of the permitting exemption threshold.
 - c. When it is technically feasible and otherwise consistent with the definition of RACT to apply the same devices, systems, process modifications, work practices or other apparatus or techniques to a group of emissions units, that group of emissions units shall be treated as a single emissions unit for purposes of subsections (C)(1)(a) and (b). The following are examples of situations to which this subsection (may) apply:
 - i. Emissions from a group of emissions units can be vented to a single control device.
 - ii. A low-VOC coating can be used in several spray-painting booths.
2. An ambient air quality assessment demonstrates that emissions from the source or minor NSR modification will not interfere with attainment or maintenance of a national ambient air quality standard in Arizona or any affected state.
 - a. An owner or operator may elect to have the Director perform a screening model of its emissions. If the results of the screening model indicate that the source or minor NSR modification will interfere with attainment or maintenance of a national ambient air quality standard, the owner or operator may perform a more refined model to make the demonstration required by this subsection.
 - b. The requirements of this subsection shall be satisfied, if the results of the screening or more refined model conducted pursuant to subsection (B)(2)(a) demonstrate either of the following:
 - i. Ambient concentrations resulting from emissions from the source or modification combined with existing concentrations of regulated minor NSR pollutants will not interfere with attainment or maintenance of a national ambient air quality standard.
 - ii. Emissions from the source or minor modification will have an ambient impact below the significance levels as defined in R18-2-401.
 - c. The assessment required by this subsection shall take into account any limitations, controls or emissions decreases that are or will be enforceable in the permit or permit revision for the source.
- D. RACT Determinations.**
1. Except as otherwise provided in this subsection, the Director shall determine RACT on the basis of a case-by-case analysis performed by the permit applicant of the emission reduction methods available for each emission unit subject to the RACT requirement under subsection (C)(1).
 2. The Director shall accept a requirement proposed by a permit applicant as RACT under subsection (C)(1) if it complies with the most recently adopted of the following guidelines or standards in effect at the time of the application:
 - a. A control technique guideline issued by the Administrator under section 108(f)(1) of the Act.
 - b. An emissions standard established or revised by the Administrator for the same type of source under section 111 or 112 of the Act after November 15, 1990.
 - c. An applicable requirement of this Chapter or of air quality control regulations adopted by a County under A.R.S. § 49-479 that has been specifically identified as constituting RACT.
 - d. A RACT standard imposed on the same type of source by a general permit.
 - e. A RACT standard imposed on the same type of source under this Section no more than 10 years before submission of the application by the permit applicant. To facilitate identification of previously imposed RACT standards, the Director shall establish an online database of RACT determinations made under this Section.
- E.** Notwithstanding an election to adopt RACT under subsection (C)(1), a permit applicant subject to this Section shall conduct an ambient air quality impact assessment under subsection (C)(2) upon the Director's request. The Director shall make such a request, if there is reason to believe that a source or minor NSR modification could interfere with attainment or maintenance of a national ambient air quality standards. In making that determination, the Director shall take into consideration:
1. The source's emission rates.
 2. The location of emission units within the facility and their proximity to the ambient air.
 3. The terrain in which the source is or will be located.
 4. The source type.
 5. The location and emissions of nearby sources.
 6. Background concentrations of regulated minor NSR pollutants.
- F.** The Director shall deny an application for a Class I permit or permit revision or a Class II permit or permit revision subject to this Section, if an assessment conducted pursuant to subsection (C)(2) demonstrates that the source or modification will interfere with attainment or maintenance of a national ambient air quality standard.
- G.** A copy of the notice required by R18-2-330 for permits or significant permit revisions subject to this Section must also be sent to the Administrator through the appropriate regional office, and to all other state and local air pollution control agencies having jurisdiction in the region in which the source subject to the permit or permit revision will be located. The notice also must be sent to any other agency in the region having responsibility for implementing the procedures required under 40 CFR 51, I.
- H.** All modeling required pursuant to this Section shall be conducted in accordance with 40 CFR 51, Appendix W.
- I.** The Director shall specify those conditions in the permit that are implemented pursuant to this Section. The specified conditions shall be included in subsequent permit renewals unless modified pursuant to this Section or Article 4 of this Chapter.
- J.** The issuance of a permit or permit revision under this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

ARTICLE 4. PERMIT REQUIREMENTS FOR NEW MAJOR SOURCES AND MAJOR MODIFICATIONS TO EXISTING MAJOR SOURCES

R18-2-401. Definitions

The following definitions apply to this Article:

1. “Adverse impact on visibility” means visibility impairment that interferes with the management, protection, preservation, or enjoyment of the visitor’s visual experience of a federal Class I area, as determined according to R18-2-410. This determination must be made on a case-by-case basis taking into account the geographic extent, intensity, duration, frequency and time of visibility impairments, and how these factors correlate with times of visitor use of the federal Class I area and the frequency and timing of natural conditions that reduce visibility. This term does not include effects on integral vistas.
2. “Baseline actual emissions” means the rate of emissions, in tons per year, of a regulated NSR pollutant, as determined in accordance with subsections (2)(a) through (d).
 - a. For any existing electric utility steam generating unit, baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the five-year period immediately preceding when the owner or operator begins actual construction of the project. The Director shall allow the use of a different time period upon a determination that it is more representative of normal source operation.
 - i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
 - ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive 24-month period.
 - iii. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period must be used to determine the baseline actual emissions for the emissions units being changed. A different consecutive 24-month period can be used for each regulated NSR pollutant.
 - iv. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by subsection (2)(a)(ii).
 - b. For any existing emissions unit (other than an electric utility steam generating unit), baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive 24-month period selected by the owner or operator within the 10-year period immediately preceding either the date the owner or operator begins actual construction of the project, or the date a complete permit application is received by the Administrator for a permit required under 40 CFR 52.21 or by the Director for a permit required under the state implementation plan, whichever is earlier, except that the 10-year period shall not include any period earlier than November 15, 1990.
 - i. The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
 - ii. The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive 24-month period. However, if an emission limitation is part of a maximum achievable control technology standard that the Administrator proposed or promulgated under 40 CFR 63, the baseline actual emissions need only be adjusted if the state of Arizona has taken credit for such emissions reductions in an attainment demonstration or maintenance plan consistent with the requirements of 40 CFR 51.165(a)(3)(ii)(G).
 - iii. The average rate shall be adjusted downward to exclude any emissions that would have exceeded an emission limitation with which the major source must currently comply, had such major source been required to comply with such limitations during the consecutive 24-month period.
 - iv. For a regulated NSR pollutant, when a project involves multiple emissions units, only one consecutive 24-month period must be used to determine the baseline actual emissions for all existing emissions units affected by the project. A different consecutive 24-month period may be used for each regulated NSR pollutant.
 - v. The average rate shall not be based on any consecutive 24-month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by subsection (2)(b)(ii) or (iii).
 - c. For a new emissions unit, the baseline actual emissions for purposes of determining the emissions increase that will result from the initial construction and operation of such unit shall equal zero; and thereafter, for all other purposes, shall equal the unit’s potential to emit.
 - d. For a PAL for a stationary source, the baseline actual emissions shall be calculated for existing electric utility steam generating units in accordance with the procedures in subsection (2)(a), for other existing emissions units in accordance with the procedures contained in subsection (2)(b), and for new emissions units in accordance with the procedures contained in subsection (2)(c).
3. “Basic design parameter” means:
 - a. Except as provided in subsection (3)(c), for a process unit at a steam electric generating facility, the owner or operator may select as its basic design parameters either maximum hourly heat input and maximum hourly fuel consumption rate or maximum hourly electric output rate and maximum steam flow rate. When establishing fuel consumption specifications in terms of weight or volume, the minimum fuel quality based on Btu content shall be used for determining the basic design parameters for a coal-fired electric utility steam generating unit.

- b. Except as provided in subsection (3)(c), the basic design parameters for any process unit that is not at a steam electric generating facility are maximum rate of fuel or heat input, maximum rate of material input, or maximum rate of product output. Combustion process units will typically use maximum rate of fuel input. For sources having multiple end products and raw materials, the owner or operator should consider the primary product or primary raw material when selecting a basic design parameter.
 - c. If the owner or operator believes the basic design parameters in subsections (3)(a) and (b) are not appropriate for a specific industry or type of process unit, the owner or operator may propose to the Director an alternative basic design parameters for the source's process unit. If the Director approves of the use of an alternative basic design parameters, the Director shall issue a permit that is legally enforceable that records such basic design parameters and requires the owner or operator to comply with such parameters.
 - d. The owner or operator shall use credible information, such as results of historic maximum capability tests, design information from the manufacturer, or engineering calculations, in establishing the magnitude of the basic design parameters specified in subsections (3)(a) and (b).
 - e. If design information is not available for a process unit, then the owner or operator shall determine the process unit's basic design parameters using the maximum value achieved by the process unit in the five-year period immediately preceding the planned activity.
 - f. Efficiency of a process unit is not a basic design parameter.
 - g. The replacement activity shall not cause the process unit to exceed any emission limitation, or operational limitation that has the effect of constraining emissions, that applies to the process unit and that is legally enforceable.
4. "Complete" means, in reference to an application for a permit or permit revision, that the application contains all the information necessary for processing the application. Designating an application complete for purposes of permit processing does not preclude the Department from requesting or accepting any additional information.
5. "Dispersion technique" means any technique that attempts to affect the concentration of a pollutant in the ambient air by any of the following:
- a. Using that portion of a stack that exceeds good engineering practice stack height;
 - b. Varying the rate of emission of a pollutant according to atmospheric conditions or ambient concentrations of that pollutant; or
 - c. Increasing final exhaust gas plume rise by manipulating source process parameters, exhaust gas parameters, stack parameters, or combining exhaust gases from several existing stacks into one stack; or other selective handling of exhaust gas streams that increases the exhaust gas plume rise. This shall not include any of the following:
 - i. The reheating of a gas stream, following use of a pollution control system, for the purpose of returning the gas to the temperature at which it was originally discharged from the facility generating the gas stream.
 - ii. The merging of exhaust gas streams under any of the following conditions:
 - (1) The source owner or operator demonstrates that the facility was originally designed and constructed with the merged gas streams;
 - (2) After July 8, 1985, the merging is part of a change in operation at the facility that includes the installation of pollution controls and is accompanied by a net reduction in the allowable emissions of a pollutant, applying only to the emission limitation for that pollutant; or
 - (3) Before July 8, 1985, the merging was part of a change in operation at the facility that included the installation of emissions control equipment or was carried out for sound economic or engineering reasons. Where there was an increase in the emission limitation or, in the event that no emission limitation was in existence prior to the merging, an increase in the quantity of pollutants actually emitted prior to the merging, the Department shall presume that merging was significantly motivated by an intent to gain emissions credit for greater dispersion. Absent a demonstration by the source owner or operator that merging was not significantly motivated by such intent, the Department shall deny credit for the effects of the merging in calculating the allowable emissions for the source.
 - iii. Smoke management in agricultural or silvicultural prescribed burning programs.
 - iv. Episodic restrictions on residential woodburning and open burning.
 - v. Techniques that increase final exhaust gas plume rise if the resulting allowable emissions of sulfur dioxide from the facility do not exceed 5,000 tons per year.
6. "Existing emissions unit" is any emissions unit that is currently in existence and that is not a new emissions unit. A replacement unit is an existing emissions unit.
7. "Federal Class I area" means an area designated as Class I under R18-2-217.
8. "High terrain" means any area having an elevation of 900 feet or more above the base of the stack of a source.
9. "Innovative control technology" means any system of air pollution control that has not been adequately demonstrated in practice but would have a substantial likelihood of achieving greater continuous emissions reduction than any control system in current practice, or of achieving at least comparable reductions at lower cost in terms of energy, economics, or nonair quality environmental impacts.
10. "Low terrain" means any area other than high terrain.
11. "Lowest achievable emission rate" (LAER) means, for any source, the more stringent rate of emissions based on one of the following:
- a. The most stringent emissions limitation that is contained in any implementation plan approved or promulgated under sections 110 or 172 of the Act for the class or category of stationary source, unless the owner or operator of the proposed stationary source demonstrates that the limitation is not achievable; or

- b. The most stringent emissions limitation that is achieved in practice by the class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. The application of this term shall not permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under the applicable new source performance standards.
12. “Major emissions unit” means:
- Any emissions unit that emits or has the potential to emit 100 tons per year or more of the PAL pollutant in an attainment area; or
 - Any emissions unit that emits or has the potential to emit the PAL pollutant in an amount that is equal to or greater than the major source threshold for the PAL pollutant for nonattainment areas. For example, in accordance with the definition of major stationary source in section 182(c) of the Act, an emissions unit would be a major emissions unit for VOC if the emissions unit is located in a serious ozone nonattainment area and it emits or has the potential to emit 50 or more tons of VOC per year.
13. “Major source” is defined as follows:
- For purposes of determining the applicability of R18-2-403 through R18-2-405 or R18-2-411, major source means any stationary source that emits, or has the potential to emit, 100 tons per year or more of any regulated NSR pollutant, except that the following thresholds shall apply in areas subject to subpart 2, subpart 3 or subpart 4 of part D, Title I of the Act:
- | Pollutant Emitted | Nonattainment Pollutant and Classification | Quantity Threshold tons/year or more |
|--|--|--------------------------------------|
| Carbon Monoxide (CO) | CO, Serious, if stationary sources contribute significantly to CO levels in the area as determined under rules issued by the Administrator | 50 |
| VOC | Ozone, Serious | 50 |
| VOC | Ozone, Severe | 25 |
| PM ₁₀ | PM ₁₀ , Serious | 70 |
| PM _{2.5} | PM _{2.5} Serious | 70 |
| PM _{2.5} precursors identified in R18-2-101(124)(a) | PM _{2.5} Serious | 70 |
| NO _x | Ozone, Serious | 50 |
| NO _x | Ozone, Severe | 25 |
- For purposes of determining the applicability of R18-2-406 through R18-2-408 or R18-2-410, major source means any stationary source that emits, or has the potential to emit, 100 tons per year or more of any regulated NSR pollutant if the source is classified as a categorical source, or 250 tons per year or more of any regulated NSR pollutant if the source is not classified as a categorical source;
- A major source includes a physical change that would occur at a stationary source, not otherwise qualifying under subsection (13)(a) or (b) as a major source, if the change would constitute a major source by itself.
 - A major source that is major for VOC or nitrogen oxides shall be considered major for ozone.
 - The fugitive emissions of a stationary source shall not be included in determining for any of the purposes of this Article whether it is a major source, unless the source belongs to a section 302(j) category.
14. “Mandatory federal Class I area” means an area identified in R18-2-217(B).
15. “New emissions unit” means any emissions unit which is (or will be) newly constructed and which has existed for less than two years from the date such emissions unit first operated.
16. “Plantwide applicability limitation” or “PAL” means an emission limitation that is based on the baseline actual emissions of all emissions units at the stationary source that emit or have the potential to emit the PAL pollutant, expressed in tons per year, for a pollutant at a major source, that is enforceable as a practical matter and established source-wide in accordance with this Section.
17. “PAL allowable emissions” means “allowable emissions” as defined in R18-2-101, except that the allowable emissions for any emissions unit shall be calculated considering any emission limitations that are enforceable as a practical matter on the emissions unit’s potential to emit.
18. PAL effective date generally means the date of issuance of the PAL permit. However, the PAL effective date for an increased PAL is the date any emissions unit that is part of the PAL major modification becomes operational and begins to emit the PAL pollutant.
19. “PAL effective period” means the period beginning with the PAL effective date and ending 10 years later.
20. “PAL major modification” means any physical change in or change in the method of operation of the PAL source that causes it to emit the PAL pollutant at a level equal to or greater than the PAL.
21. “PAL permit” means the permit issued by the Director that establishes a PAL for a major source under Article 3 or 4 of this Chapter.
22. “PAL pollutant” means the pollutant for which a PAL is established at a major source.
23. “Projected actual emissions” means:
- The maximum annual rate, in tons per year, at which an existing emissions unit is projected to emit a regulated NSR pollutant during any 12-month period in the 60 calendar months following the date the unit resumes regular operation after the project, or in any 12-month period in the 120 calendar months following that date if the project involves increasing the design capacity or potential to emit of any emissions unit for that regulated NSR pollutant and full utilization of the unit would result in a significant emissions increase or a significant net emissions increase at the major source.
 - In determining the projected actual emissions before beginning actual construction, the owner or operator of the major source:
 - Shall consider all relevant information, including but not limited to, historical operational

Department of Environmental Quality – Air Pollution Control

- data, the company's own representations, the company's expected business activity and the company's highest projections of business activity, the company's filings with the county, state or federal regulatory authorities, and compliance plans under these regulations; and
- ii. Shall include fugitive emissions to the extent quantifiable;
 - iii. Shall include emissions associated with start-ups, shutdowns, and malfunctions ; and
 - iv. Shall exclude, only for calculating any increase in emissions that results from the particular project, that portion of the unit's emissions following the project that an existing unit could have accommodated during the consecutive 24-month period used to establish the baseline actual emissions and that are also unrelated to the particular project, including any increased utilization due to product demand growth; or
- c. In lieu of using the method set out subsections 23(b)(i) through (iv), the owner or operator may elect to use the emissions unit's potential to emit, in tons per year.
24. "Replacement unit" means an emissions unit for which all the criteria listed in subsections (24)(a) through (d) are met. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.
- a. The emissions unit is a reconstructed unit within the meaning of 40 CFR 60.15(b)(1), or the emissions unit completely takes the place of an existing emissions unit.
 - b. The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
 - c. The replacement does not alter the basic design parameters of the process unit.
 - d. The replaced emissions unit is permanently removed from the major source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought back into operation, it shall constitute a new emissions unit.
25. "Resource recovery project" means any facility at which solid waste is processed for the purpose of extracting, converting to energy, or otherwise separating and preparing solid waste for reuse. Only energy conversion facilities that utilize solid waste that provides more than 50% of the heat input shall be considered a resource recovery project under this Article.
26. "Significant emissions unit" means an emissions unit that emits or has the potential to emit a PAL pollutant in an amount that is equal to or greater than the significant level for that PAL pollutant, but less than the amount that would qualify the unit as a major emissions unit.
27. "Significance levels" means the following ambient concentrations for the enumerated pollutants:

Averaging Time					
Pollutant	Annual	24-Hour	8-Hour	3-Hour	1-Hour
SO ₂	1 µg/m ³	5 µg/m ³		25 µg/m ³	
NO ₂	1 µg/m ³				

CO			0.5 mg/m ³		2 mg/m ³
PM ₁₀	1 µg/m ³	5 µg/m ³			
PM _{2.5} federal Class I area	0.06 µg/m ³	0.07 µg/m ³			
PM _{2.5} federal Class II area	0.3 µg/m ³	1.2 µg/m ³			
PM _{2.5} federal Class III area	0.3 µg/m ³	1.2 µg/m ³			

Except for the annual pollutant concentrations, the Department shall deem that exceedance of significance levels has occurred when the ambient concentration of the above pollutant is exceeded more than once per year at any one location. If the concentration occurs at a specific location and at a time when the national ambient air quality standards for the pollutant are not violated, the significance level does not apply.

28. "Small emissions unit" means an emissions unit that emits or has the potential to emit the PAL pollutant in an amount less than the significant level for that PAL pollutant.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-401 renumbered without change as Section R18-2-401 (Supp. 87-3). Section R18-2-401 renumbered to R18-2-601. New Section R18-2-401 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Typographical error corrected in R18-2-401(9)(a) (Supp. 00-4). Amended by final rulemaking at 13 A.A.R. 1134, effective May 5, 2007 (Supp. 07-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-402. General

- A. The preconstruction review requirements of this Article shall apply to the construction of any new major source or any project at an existing major source.
- B. The requirements of R18-2-403 through R18-2-410 apply to the construction of any new major source or any major modification of any existing major source, except as this Article otherwise provides.
- C. No person shall begin actual construction of a new major source or a major modification subject to the requirements of R18-2-403 through R18-2-410 without first obtaining a proposed final permit from the Director, pursuant to R18-2-307(A)(2), stating that the major source or major modification shall meet those requirements.
- D. The requirements of this Article apply to projects at major sources in accordance with the following principles.
 1. Except as otherwise provided in subsection (E), a project is a major modification for a regulated NSR pollutant if it causes both a significant emissions increase and a significant net emissions increase. The project is not a major modification if it does not cause a significant emissions

- increase. If the project causes a significant emissions increase, then the project is a major modification only if it also results in a significant net emissions increase.
2. The procedure for calculating before beginning actual construction whether a significant emissions increase will occur depends upon the types of emissions units being modified as set forth in subsections (D)(3) through (6). The procedure for calculating before beginning actual construction whether a significant net emissions increase will occur at the major source is set forth in the definition of net emissions increase in R18-2-101. Regardless of any such preconstruction projections, a major modification results if the project causes a significant emissions increase and a significant net emissions increase.
 3. Actual-to-projected-actual applicability test for projects that only involve existing emissions units. A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the projected actual emissions and the baseline actual emissions, for each existing emissions unit, equals or exceeds the significant amount for that pollutant.
 4. Actual-to-potential applicability test for projects that only involve new emissions units. A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the potential to emit from each new emissions unit following completion of the project and the baseline actual emissions of these units before the project equals or exceeds the significant amount for that pollutant.
 5. [Reserved.]
 6. Hybrid applicability test for projects that involve both new emissions units and existing emissions units. A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the emissions increases for each emissions unit, using the method specified in subsections (D)(3) through (D)(4), as applicable with respect to each emissions unit, equals or exceeds the significant amount for that pollutant.
- E. Any major source with a PAL for a regulated NSR pollutant shall comply with R18-2-412.
- F. This subsection applies with respect to any regulated NSR pollutant emitted from projects at existing emissions units at a major stationary source (other than projects at a source with a PAL) in circumstances where there is a reasonable possibility, within the meaning of subsection (F)(6), that a project that is not a part of a major modification may result in a significant emissions increase of such pollutant and the owner or operator elects to use the method specified in R18-2-401(23)(b)(i) through (iv) of the definition of projected actual emissions for calculating projected actual emissions.
1. Before beginning actual construction of the project, the owner or operator shall document and maintain a record of the following information:
 - a. A description of the project;
 - b. Identification of the emissions unit(s) with emissions of a regulated NSR pollutant that could be affected by the project;
 - c. A description of the applicability test used to determine that the project is not a major modification for any regulated NSR pollutant, including the baseline actual emissions, the projected actual emissions the amount of emissions excluded under R18-2-401(23)(b)(iv) of the definition of projected actual emissions, and an explanation for why such amount was excluded; and
 - d. Any netting calculations, if applicable.
 2. If the emissions unit is an existing electric utility steam generating unit, before beginning actual construction, the owner or operator shall provide a copy of the information set out in subsection (F)(1) to the Director. Nothing in this subsection shall be construed to require the owner or operator of such a unit to obtain any determination from the Director before beginning actual construction.
 3. The owner or operator shall monitor the emissions of any regulated NSR pollutant that could increase as a result of the project and that is emitted by any emissions unit identified in subsection (F)(1)(b); and calculate and maintain a record of the annual emissions, in tons per year on a calendar year basis, for a period of five years following resumption of regular operations after the change, or for a period of 10 years following resumption of regular operations after the change if the project increases the design capacity or potential to emit of that regulated NSR pollutant at such emissions unit. For purposes of this subsection, fugitive emissions (to the extent quantifiable) shall be monitored if the emissions unit is part of a section 302(j) category or if the emissions unit is located at a major stationary source that belongs to a section 302(j) category.
 4. The owner or operator shall submit a report to the Director if for a calendar year the annual emissions, in tons per year, from the project identified in subsection (F)(1) exceed the sum of the baseline actual emissions, as documented and maintained under subsection (F)(1)(c), by a significant amount for that regulated NSR pollutant, and if the emissions differ from the preconstruction projection as documented and maintained under subsection (F)(1)(c). The owner or operator shall submit the report to the Director within 60 days after the end of the calendar year. The report shall contain the following:
 - a. The name, address and telephone number of the major source;
 - b. The annual emissions as calculated pursuant to subsection (F)(3); and
 - c. Any other information that the owner or operator wishes to include in the report, such as an explanation as to why the emissions differ from the preconstruction projection.
 5. Notwithstanding subsection (F)(4), if any existing emissions unit identified in subsection (F)(1)(b) is an electric utility steam generating unit, the owner or operator shall submit a report to the Director within 60 days after the end of each calendar year during which the owner or operator must generate records under subsection (F)(3). The report shall document the unit's post-project annual emissions during the calendar year that preceded submission of the report.
 6. A "reasonable possibility" under subsection (F) occurs when the owner or operator calculates the project to result in one of the following:
 - a. A projected actual emissions increase of at least 50% of the amount that is a significant emissions increase (without reference to the amount that is a significant net emissions increase) for the regulated NSR pollutant.
 - b. A projected actual emissions increase that, added to the amount of emissions excluded under subsection R18-2-401(23)(b)(iv) of the definition of projected actual emissions, sums to at least 50% of the amount that is a significant emissions increase (without reference to the amount that is a significant net emissions increase) for the regulated NSR pollutant. For

- a project for which a reasonable possibility occurs only within the meaning of subsection (F)(6)(b), and not also within the meaning of subsection (F)(6)(a), subsections (F)(2) through (5) do not apply to the project.
7. The owner or operator of the source shall make the information required to be documented and maintained under subsection (F) available for review upon request for inspection by the Department or the general public.
- G.** An application for a permit or permit revision under this Article, other than a PAL permit pursuant to R18-2-412, shall not be considered complete unless the application demonstrates that:
1. The requirements in subsection (H) are met;
 2. The more stringent of the applicable new source performance standards or the existing source performance standards in Article 7 of this Chapter are applied to the proposed new major source or major modification of a major source;
 3. The visibility requirements contained in R18-2-410 are satisfied;
 4. All applicable provisions of Article 3 of this Chapter are met;
 5. The new major source or major modification will be in compliance with whatever emission limitation, design, equipment, work practice or operational standard, or combination thereof is applicable to the source or modification. The degree of emission limitation required for control of any pollutant under this Article shall not be affected in any manner by:
 - a. Stack height in excess of GEP stack height except as provided in R18-2-332; or
 - b. Any other dispersion technique, unless implemented prior to December 31, 1970;
 6. The new major source or major modification will not exceed the applicable standards for hazardous air pollutants contained in this Chapter;
 7. The new major source or major modification will not exceed the limitations, if applicable, on emission from nonpoint sources contained in Article 6 of this Chapter;
 8. The new major source or major modification will not have an adverse impact on visibility, as determined according to R18-2-410.
- H.** Except for assessing air quality impacts within federal Class I areas, the air impact analysis required to be conducted as part of a permit application shall initially consider only the geographical area located within a 50 kilometer radius from the point of greatest emissions for the new major source or major modification. The Director, on his own initiative or upon receipt of written notice from any person shall have the right at any time to request an enlargement of the geographical area for which an air quality impact analysis is to be performed by giving the person applying for the permit or permit revision written notice thereof, specifying the enlarged radius to be so considered. In performing an air impact analysis for any geographical area with a radius of more than 50 kilometers, the person applying for the permit or permit revision may use monitoring or modeling data obtained from major sources having comparable emissions or having emissions which are capable of being accurately used in such demonstration, and which are subjected to terrain and atmospheric stability conditions which are comparable or which may be extrapolated with reasonable accuracy for use in such demonstration.
- I.** The Director shall comply with following requirements with respect to an application for a permit or permit revision subject to this Article:
1. Within 60 days after receipt of the application, or any addition to the application, the Director shall advise the applicant of any deficiency. The date of receipt of a complete application shall be, for the purpose of this Section, the date on which the Director receives all required information. The permit application shall not be deemed complete if the Director fails to meet the requirements of this subsection.
 2. Within one year after receipt of a complete application, the Director shall do all of the following:
 - a. Make a preliminary determination as to whether the permit or permit revision should be granted or denied.
 - b. Make the application, all materials the applicant submitted, the preliminary determination, and materials relating to the application available under R18-2-330(D).
 - c. Notify the public of the application, the preliminary determination and the opportunity for a public hearing and to submit written comments in accordance with R18-2-330(C). In the case of an application subject to R18-2-406, the notice shall include the degree of consumption of the maximum allowable increases allowed under R18-2-218 that is expected to occur as a result of emissions from the proposed source or modification.
 - d. Take final action on the application by denying the permit or permit revision or issuing a proposed final permit or permit revision.
 - e. Notify the applicant in writing of the approval or denial and make the notification, comments on the proposed action, and materials supporting the final action available for public inspection at the location where materials relating to the proposed action were placed under R18-2-330(D).
 3. A copy of any notice required by R18-2-330 and subsection (I)(2)(c) shall be sent to the permit applicant, to the Administrator, and to the following officials and agencies having cognizance over the location where the proposed major source or major modification would occur:
 - a. The air pollution control officer, if one exists, for the county wherein the proposed or existing source that is the subject of the permit or permit revision application is located;
 - b. The county manager for the county wherein the proposed or existing source that is the subject of the permit or permit revision application is located;
 - c. The city or town managers of the city or town which contains, and any city or town the boundaries of which are within 5 miles of, the location of the proposed or existing source that is the subject of the permit or permit revision application;
 - d. Any regional land use planning agency with authority for land use planning in the area where the proposed or existing source that is the subject of the permit or permit revision application is located; and
 - e. Any state, Federal Land Manager, or Indian governing body whose lands may be affected by emissions from the proposed source or modification.
- J.** The authority to construct and operate a new major source or major modification under a permit or permit revision issued under this Article shall terminate if the owner or operator does not commence the proposed construction or major modification within 18 months of issuance or if, during the construction or major modification, the owner or operator suspends work for more than 18

months. The Director may extend the 18-month period upon a satisfactory showing that an extension is justified. This provision does not apply to the time period between construction of the approved phases of a phased construction project; each phase must commence construction within 18 months of the projected and approved commencement date.

Historical Note

Amended effective August 6, 1976 (Supp. 76-4). Former Section R9-3-402 repealed, new Section R9-3-402 adopted effective May 14, 1979 (Supp. 79-1). Amended and adopted by reference Open Burning Guidelines for Air Pollution Control effective September 22, 1983 (Supp. 83-5). Former Section R9-3-402 renumbered without change as Section R18-2-402 (Supp. 87-3). Section R18-2-402 renumbered to R18-2-602, new Section R18-2-402 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-403. Permits for Sources Located in Nonattainment Areas

- A. Except as provided in subsections (C) through (G) below, no permit or permit revision shall be issued under this Article to a person proposing to construct a new major source or make a major modification that is major for the pollutant for which the area is designated nonattainment unless:
1. The person demonstrates that the new major source or the major modification will meet an emission limitation which is the lowest achievable emission rate (LAER) for that source for that regulated NSR pollutant.
 2. The person demonstrates that all existing major sources owned or operated by that person (or any entity controlling, controlled by, or under common control with that person) in the state are in compliance with, or on a schedule of compliance for, all conditions contained in permits of each of the sources and all other applicable emission limitations and standards under the Act and this Chapter.
 3. The person demonstrates that emission reductions for the specific pollutant(s) from source(s) in existence in the allowable offset area of the new major source or major modification (whether or not under the same ownership) meet the offset requirements of R18-2-404.
 4. The Administrator has not determined that the applicable implementation plan is not being adequately implemented for the nonattainment area in which the proposed source is to be constructed or modified in accordance with the requirements in this Section.
- B. No permit or permit revision under this Article shall be issued to a person proposing to construct a new major source or make a major modification to a major source located in a nonattainment area unless:
1. The person performs an analysis of alternative sites, sizes, production processes, and environmental control techniques for such new major source or major modification; and
 2. The Director determines that the analysis demonstrates that the benefits of the new major source or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification.
- C. At such time that a particular source or modification becomes a major source or major modification solely by virtue of a relaxation in any enforceable limitation which was established

after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as restriction on hours of operation, then the requirements of this Section shall apply to the source or modification as though construction had not yet commenced on the source or modification.

- D. Secondary emissions shall not be considered in determining the potential to emit of a new source or modification and therefore whether the new source or modification is major. However, if a new source or modification is subject to this Section on the basis of its direct emissions, a permit or permit revision under this Article to construct the new source or modification shall be denied unless the requirements of R18-2-403(A)(3) and R18-2-404 are met for reasonably quantifiable secondary emissions caused by the new source or modification.
- E. A permit to construct a new major source or major modification shall be denied unless the conditions specified in subsections (A)(1), (2), and (3) are met for fugitive emissions caused by the new source or modification. However, these conditions shall not apply to a new major source or major modification that would be a major source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential emissions of the source or modification, and the source does not belong to a section 302(j) category.
- F. The requirements of subsection (A)(3) shall not apply to temporary emissions units, such as pilot plants, portable facilities that will be relocated outside of the nonattainment area and the construction phase of a new source, if those units will operate for no more than 24 months in the nonattainment area, are otherwise in compliance with the requirement to obtain a permit under this Chapter and are in compliance with the conditions of that permit.
- G. A decrease in actual emissions shall be considered in determining the potential of a new source or modification to emit only to the extent that the Director has not relied on it in issuing any permit or permit revision under this Article or the state has not relied on it in demonstrating attainment or reasonable further progress.
- H. The Director shall transmit to the Administrator a copy of each permit application relating to a major stationary source or major modification under this Section. Within 30 days of the issuance of any permit under this Section, the Director shall also submit control technology information from the permit to the Administrator for the purposes listed in Section 173(d) of the Act.
- I. The issuance of a permit or permit revision under this Article in accordance with this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.

Historical Note

Former Section R9-3-403 repealed, new Section R9-3-403 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-403 renumbered without change as Section R18-2-403 (Supp. 87-3). Section R18-2-403 renumbered to R18-2-603, new Section R18-2-403 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-404. Offset Standards

- A. Increased emissions by a major source or major modification subject to R18-2-403 of each pollutant for which the area has been designated as nonattainment and for which the source or modification is classified as major shall be offset by real

reductions in the actual emissions of the pollutant. Offsets shall be for the same regulated NSR Pollutant, except that emissions of the ozone precursors NO_x and VOC may be offset by reductions in emissions of either of those pollutants, provided that all other applicable requirements of this Section and R18-2-405 are satisfied. Except as provided in R18-2-405 and subsection (J), the ratio of the total actual reductions to the emissions increase shall be at least 1 to 1.

B. Except as provided in subsection (B)(1) or (2), for sources and modifications subject to this Section, the baseline for determining credit for emissions reductions is the emissions limit for the source generating the offset credit under the applicable implementation plan in effect at the time the application for a permit or permit revision is filed.

1. The offset baseline shall be the actual emissions of the source from which offset credit is obtained where either of the following conditions is satisfied:

- a. The demonstration of reasonable further progress and attainment of ambient air quality standards is based upon the actual emissions of sources located within a designated nonattainment area for which the preconstruction review program was adopted.
- b. The applicable implementation plan does not contain an emissions limitation for that source or source category.

2. Where the emissions limit under the applicable implementation plan allows greater emissions than the potential to emit of the source, emissions offset credit will be allowed only for control below this potential.

C. For an existing fuel combustion source, emissions offset credit shall be based on the allowable emissions under the applicable implementation plan for the type of fuel being burned at the time the application to construct is filed. If the existing source commits to switch to a cleaner fuel at some future date, emissions offset credit based on the allowable or actual emissions for the fuels involved is not acceptable, unless the permit for the existing source is conditioned to require the use of a specified alternative control measure which would achieve the same degree of emissions reduction should the source switch back to a fuel generating higher emissions. The owner or operator of the existing source must demonstrate that adequate long-term supplies of the new fuel are available before granting emissions offset credit for fuel switches.

D. Offset Credit for Shutdowns.

1. Emissions reductions achieved by shutting down an existing emission unit or curtailing production or operating hours may be credited for offsets if they meet both of the following conditions.

- a. The reductions are surplus, permanent, quantifiable, and federally enforceable.
- b. The shutdown or curtailment occurred after the last day of the base year for the SIP planning process. For purposes of this subsection, the Director may choose to consider a prior shutdown or curtailment to have occurred after the last day of the base year if the projected emissions inventory used to develop the attainment demonstration explicitly includes the emissions from such previously shutdown or curtailed emission units. However, in no event may credit be given for shutdowns that occurred before August 7, 1977.

2. Emissions reductions achieved by shutting down an existing emissions unit or curtailing production or operating hours and that do not meet the requirements in subsection (D)(1)(b) may be credited only if one of the following conditions is satisfied:

- a. The shutdown or curtailment occurred on or after the date the construction permit application is filed.
- b. The applicant can establish that the proposed new emissions unit is a replacement for the shutdown or curtailed emissions unit, and the emissions reductions achieved by the shutdown or curtailment met the requirements of subsection (D)(1)(a).

E. No emissions credit may be allowed for replacing one hydrocarbon compound with another of lesser reactivity, except for those compounds listed in Table 1 of EPA's "Recommended Policy on Control of Volatile Organic Compounds," 42 FR 35314 (July 8, 1977).

F. All emission reductions claimed as offset credits shall be federally enforceable by the time a proposed final permit is issued to the owner or operator of the major source subject to this Section and shall be in effect by the time the new or modified source subject to the permit commences operation.

G. The owner or operator of a major source or major modification subject to this Section must obtain offset credits from the same source or from other sources in the same nonattainment area, except that the Director may allow the owner or operator to obtain offset credits from another nonattainment area if both of the following conditions are satisfied:

1. The other area has an equal or higher nonattainment classification than the area in which the source is located.
2. Emissions from such other area contribute to a violation of the national ambient air quality standard in the nonattainment area in which the source is located.

H. Credit for an emissions reduction can be claimed to the extent that the Director has not relied on it in issuing any permit under this Article, R18-2-334, or the state has not relied on it in a demonstration of attainment or reasonable further progress.

I. The total tonnage of increased emissions, in tons per year, resulting from a major modification that must be offset under this Section shall be determined by summing the difference between the allowable emissions after the modification and the actual emissions before the modification for each emissions unit.

J. In ozone nonattainment areas classified as marginal, total emissions of VOC and oxides of nitrogen from other sources shall offset those proposed or permitted from the major source or major modification by a ratio of at least 1.10 to 1. In ozone nonattainment areas classified as moderate, total emissions of VOC and oxides of nitrogen from other sources shall offset those proposed or permitted from the major source or major modification by a ratio of at least 1.15 to 1. New major sources and major modifications in serious and severe ozone nonattainment areas shall comply with this Section and R18-2-405.

Historical Note

Former Section R9-3-404 repealed, new Section R9-3-404 adopted effective May 14, 1979 (Supp. 79-1).

Amended by adding subsection (C) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-404 renumbered without change as Section R18-2-404 (Supp. 87-3).

Amended subsection (C) effective December 1, 1988 (Supp. 88-4). Section R18-2-404 renumbered to R18-2-604, new Section R18-2-404 adopted effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R.

333, effective March 21, 2017 (Supp. 17-1).

R18-2-405. Special Rule for Major Sources of VOC or Nitrogen Oxides in Ozone Nonattainment Areas Classified as Serious or Severe

- A. Applicability. The provisions of this Section only apply to stationary sources of VOC or nitrogen oxides in ozone nonattainment areas classified as serious or severe. Unless otherwise provided in this Section, all requirements of Articles 3 and 4 of this Chapter apply.
- B. "Significant" means, in reference to an emissions increase or a net emissions increase, any increase in actual emissions of volatile organic compounds or nitrogen oxides that would result from any physical change in, or change in the method of operation of, a major source, if the emissions increase of volatile organic compounds or nitrogen oxides exceeds 25 tons per year.
- C. For any major source that emits or has the potential to emit less than 100 tons of VOC or oxides of nitrogen per year, a physical or operational change that results in a significant increase in VOC or oxides of nitrogen, respectively, from any discrete operation, unit, or other pollutant emitting activity at the source shall constitute a major modification, except that the increase shall not constitute a major modification, if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of VOC or oxides of nitrogen, as applicable, from other operations, units or activities at the source at an internal offset ratio of at least 1.3 to 1. If the owner or operator does not make such an election, the change shall constitute a major modification but BACT shall be substituted for LAER when applying R18-2-403(A)(1) to the major modification.
- D. For any stationary source that emits or has the potential to emit 100 tons or more of VOC or oxides of nitrogen per year, a physical or operational change that results in any significant increase in VOC from any discrete operation, unit or other pollutant emitting activity at the source or oxides of nitrogen, respectively, shall constitute a major modification except that if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of VOC or oxides of nitrogen, as applicable, from other operations, units or activities within the source at an internal offset ratio of at least 1.3 to 1, R18-2-403(A)(1) shall not apply to the change.
- E. For any new major source or major modification that is classified as major because of emissions or potential to emit VOC or nitrogen oxides in an ozone nonattainment area classified as serious, the increase in emissions of these pollutants from the source or modification shall be offset at a ratio of 1.2 to 1. The offset shall be made in accordance with the provisions of R18-2-404.
- F. For any new major source or major modification that is classified as such because of emissions or potential to emit VOC or nitrogen oxides in an ozone nonattainment area classified as severe, the increase in emissions of these pollutants from the source or modification shall be offset at a ratio of 1.3 to 1. These offsets shall be made in accordance with the provisions of R18-2-404.

Historical Note

Former R9-3-405, Other industries, renumbered R9-3-406, new Section adopted effective September 17, 1975 (Supp. 75-1). Former Section R9-3-405 repealed, new Section R9-3-405 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-405 renumbered without change as Section R18-2-405 (Supp. 87-3). Section R18-2-405 renumbered to R18-2-605, new Section R18-2-405

adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 5 A.A.R. 4074, effective September 22, 1999 (Supp. 99-3). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-406. Permit Requirements for Sources Located in Attainment and Unclassifiable Areas

- A. Except as provided in subsections (B) through (J) below and R18-2-408 (Innovative control technology), no permit or permit revision under this Article shall be issued to a person proposing to construct a new major source or make a major modification to a major source that would be constructed in an area designated as attainment or unclassifiable for any regulated NSR pollutant unless the source or modification meets the following conditions:
 1. A new major source shall apply best available control technology (BACT) for each regulated NSR pollutant for which the potential to emit is significant.
 2. A major modification shall apply BACT for each regulated NSR pollutant for which the project would result in a significant net emissions increase at the source. This requirement applies to each proposed emissions unit at which a net emissions increase in the pollutant would occur as a result of a physical change or change in the method of operation in the unit.
 3. For phased construction projects, the determination of BACT shall be reviewed and modified as appropriate at the latest reasonable time which occurs no later than 18 months prior to commencement of construction of each independent phase of the project. At such time the owner or operator of the applicable stationary source may be required to demonstrate the adequacy of any previous determination of BACT for the source.
 4. BACT shall be determined on a case-by-case basis and may constitute application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment, clean fuels, or innovative fuel combustion techniques, for control of such pollutant. In no event shall such application of BACT result in emissions of any pollutant, which would exceed the emissions allowed by any applicable new source performance standard or national emission standard for hazardous air pollutants or by the applicable implementation plan. If the Director determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emissions standard infeasible, a design, equipment, work practice, operational standard, or combination thereof may be prescribed instead to satisfy the requirement for the application of BACT. Such standard shall, to the degree possible, set forth the emissions reduction achievable by implementation of such design, equipment, work practice, or operation and shall provide for compliance by means which achieve equivalent results.
 5. The person applying for the permit or permit revision under this Article performs an air impact analysis and monitoring as specified in R18-2-407, and the analysis demonstrates that allowable emission increases from the proposed new major source or major modification, in conjunction with all other applicable emission increases or reductions, including secondary emissions, would not cause or contribute to concentrations of conventional air pollutants in violation of:
 - a. Any national ambient air quality standard in any air quality control region; or

- b. Any applicable maximum increase allowed under R18-2-218 over the baseline concentration in any area.
- 6. Air quality models:
 - a. All estimates of ambient concentrations required under this Section shall be based on the applicable air quality models, databases, and other requirements specified in 40 CFR 51, Appendix W, "Guideline On Air Quality Models," as of July 1, 2015 (and no future amendments or editions), which shall be referred to hereinafter as "Guideline" and is adopted by reference and is on file with the Department.
 - b. Where an air quality impact model specified in the "Guideline" is not applicable, the model may be modified or another model substituted. Such a change shall be subject to notice and opportunity for public comment under R18-2-330. Written approval of the EPA Administrator shall be obtained for any modification or substitution.
- B. This Section and R18-2-407 shall not apply to a new major source or major modification to a source with respect to a particular pollutant if the person applying for the permit or permit revision under this Article demonstrates that, as to that pollutant, the source or modification is located in an area designated as nonattainment for the pollutant. This exemption shall not apply to an area designated nonattainment for a revoked national ambient air quality standard in 40 CFR 81.
- C. This Section, R18-2-407, and R18-2-410(B), (F), and (G) shall not apply to a new major source or a major modification if the source or modification would be a major source or major modification only if fugitive emissions, to the extent quantifiable, are considered in calculating the potential emissions of the source or modification, and the source does not belong to a section 302(j) category.
- D. This Section, R18-2-407, and R18-2-410(B), (F), and (G) shall not apply to a new major source or major modification to a source when the owner or operator of the source is a nonprofit health or educational institution.
- E. This Section, R18-2-407, and R18-2-410(B), (F) and (G) shall not apply to a portable source which would otherwise be a new major source or major modification to an existing source if all of the following conditions are satisfied:
 - 1. The portable source proposes to relocate and will operate for no more than 24 months at its new location.
 - 2. The source is subject to a permit or permit revision issued under this Section or 40 CFR 52.21.
 - 3. The source is in compliance with the conditions of that permit or permit revision.
 - 4. Emissions from the source will not impact a federal Class I area or an area where an applicable maximum increase allowed under R18-2-218 is known to be violated.
 - 5. Reasonable notice is given to the Director prior to the relocation identifying the proposed new location and the probable duration of operation at the new location at least 10 calendar days in advance of the proposed relocation, unless a different time duration is previously approved by the Director.
- F. Subsection (A)(5), R18-2-407, and R18-2-410(B) shall not apply to a proposed major source or major modification with respect to a particular pollutant, if the allowable emissions of that pollutant from the source, or the net emissions increase of that pollutant from the modification, would be temporary and impact no federal Class I area and no area where a maximum increase allowed under R18-2-218 is known to be violated.
- G. Subsection (A)(5), R18-2-407, and R18-2-410(B) as they relate to any maximum allowable increase for a Class II area shall not apply to a modification of a major stationary source that was in existence on March 1, 1978, if the net increase in allowable emissions of each regulated NSR pollutant from the modification after the application of best available control technology would be less than 50 tons per year.
- H. Subsection (A)(5)(b) shall not apply to a stationary source or modification with respect to any maximum increase allowed for nitrogen oxides under R18-2-218 if the owner or operator of the source or modification submitted an application for a permit under the applicable permit program approved or promulgated under the Act before the provisions embodying the maximum allowable increase took effect as part of the state implementation plan and the Director subsequently determined that the application as submitted before that date was complete.
- I. Subsection (A)(5)(b) shall not apply to a stationary source or modification with respect to any maximum increase allowed for PM₁₀ under R18-2-218 if the owner or operator of the source or modification submitted an application for a permit under the applicable permit program approved under the Act before the provisions embodying the maximum allowable increases for PM₁₀ took effect as part of the state implementation plan and the Director subsequently determined that the application as submitted before that date was complete. Instead, subsection (A)(5)(b) shall apply with respect to the maximum allowable increases for total suspended particulate as in effect on the date the application was submitted.
- J. Subsection (A)(5)(a) shall not apply to a stationary source or modification with respect to the national ambient air quality standards for PM_{2.5} in effect on March 18, 2013 if either of the following is true:
 - 1. The Director determined a permit application subject to this Section was complete on or before December 14, 2012. Instead, subsection (A)(5)(a) shall apply with respect to the national ambient air quality standards for PM_{2.5} in effect at the time the Director determined the permit application to be complete.
 - 2. The Director first published before March 18, 2013 a public notice of a proposed permit subject to this Section. Instead, subsection (A)(5)(a) shall apply with respect to the national ambient air quality standards for PM_{2.5} in effect at the time of first publication of the public notice.
- K. Subsection (A)(5)(a) of this section shall not apply to a stationary source or modification with respect to the revised national ambient air quality standards for ozone published on October 26, 2015 if:
 - 1. The Director has determined the permit application subject to this section to be complete on or before October 1, 2015. Instead, subsection (A)(5)(a) shall apply with respect to the national ambient air quality standards for ozone in effect at the time the Director determined the permit application to be complete.
 - 2. The Director has first published, before December 25, 2015, a public notice of a preliminary determination or draft permit for the permit application subject to this section. Instead, subsection (A)(5)(a) shall apply with respect to the national ambient air quality standards for ozone in effect at the time the Director determined the permit application to be complete.
- L. The owner or operator of a proposed source or modification shall submit all information necessary to perform any analysis or make a determination required under this Section. The owner or operator shall also provide information regarding:
 - 1. The air quality impact of the source or modification, including meteorological and topographical data necessary to estimate such impact, and

2. The air quality impacts and the nature and extent of any or all general commercial, residential, industrial, and other growth which has occurred since August 7, 1977, in the area the source or modification would affect.
- M. The issuance of a permit or permit revision under this Article in accordance with this Section shall not relieve the owner or operator of the responsibility to comply fully with applicable provisions of the SIP and any other requirements under local, state, or federal law.
- N. At such time that a particular source or modification becomes a major source or major modification solely by virtue of a relaxation in any enforceable limitation which was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of this Section shall apply to the source or modification as though construction had not yet commenced on the source or modification.
- E. The owner or operator of a proposed stationary source or modification to a source of volatile organic compounds who satisfies all conditions of 40 CFR 51, Appendix S, Section IV, may provide post-approval monitoring data for ozone in lieu of providing preconstruction data as required under subsections (B), (C), and (D) above.
- F. Post-construction monitoring. The owner or operator of a new major source or major modification shall, after construction of the source or modification, conduct such ambient monitoring as the Director determines is necessary to determine the effect emissions from the new source or modification may have, or are having, on air quality in any area.
- G. Operations of monitoring stations. The owner or operator of a new major source or major modification shall meet the requirements of 40 CFR 58, Appendix B, during the operation of monitoring stations for purposes of satisfying subsections (B) through (F) above.
- H. The requirements of subsections (B) through (G) above shall not apply to a new major source or major modification to an existing source with respect to monitoring for a particular pollutant if:
 1. The emissions increase of the pollutant from the new source or the net emissions increase of the pollutant from the modification would cause, in any area, air quality impacts less than the following amounts:
 - a. Carbon Monoxide - 575 $\mu\text{g}/\text{m}^3$, eight-hour average;
 - b. Nitrogen dioxide - 14 $\mu\text{g}/\text{m}^3$, annual average;
 - c. $\text{PM}_{2.5}$ - 0 $\mu\text{g}/\text{m}^3$, 24-hour average;
 - d. PM_{10} - 10 $\mu\text{g}/\text{m}^3$, 24-hour average;
 - e. Sulfur dioxide - 13 $\mu\text{g}/\text{m}^3$, 24-hour average;
 - f. Lead - 0.1 $\mu\text{g}/\text{m}^3$, 3-month average;
 - g. Fluorides - 0.25 $\mu\text{g}/\text{m}^3$, 24-hour average;
 - h. Total reduced sulfur - 10 $\mu\text{g}/\text{m}^3$, one-hour average;
 - i. Hydrogen sulfide - 0.04 $\mu\text{g}/\text{m}^3$, one-hour average;
 - j. Reduced sulfur compounds - 10 $\mu\text{g}/\text{m}^3$, one-hour average;
 - k. Ozone - net emissions increases of less than 100 tons per year of volatile organic compounds or oxides of nitrogen;
 2. The concentrations of the pollutant in the area that the new source or modification would affect are less than the concentrations listed in subsection (H)(1); or
 3. The pollutant is not listed in subsection (H)(1).

Historical Note

Former Section R9-3-405, renumbered effective September 17, 1975 (Supp. 75-1). Former Section R9-3-406 repealed, new Section R9-3-406 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-406 renumbered without change as Section R18-2-406 (Supp. 87-3). Section R18-2-406 renumbered to R18-2-606, new Section R18-2-406 adopted effective November 15, 1993 (Supp. 93-4). Amended effective February 28, 1995 (Supp. 95-1). The references to R18-2-101(97)(a) in subsection (A)(1) and (2) amended to reference R18-2-101(104)(a) (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-407. Air Quality Impact Analysis and Monitoring Requirements

- A. Any application for a permit or permit revision under R18-2-406 to construct a new major source or major modification to a major source shall contain an analysis of ambient air quality in the area that the new major source or major modification would affect for each of the following pollutants:
 1. For the new source, each pollutant that it would have the potential to emit in a significant amount;
 2. For the modification, each pollutant for which it would result in a significant net emissions increase.
- B. With respect to any such pollutant for which no national ambient air quality standard exists, the analysis shall contain all air quality monitoring data as the Director determines is necessary to assess ambient air quality for that pollutant in any area that the emissions of the pollutant would affect.
- C. With respect to any such pollutant (other than nonmethane hydrocarbons) for which such a standard does exist, the analysis shall contain continuous air quality monitoring data gathered for purposes of determining whether emissions of that pollutant would cause or contribute to a violation of the standard or any maximum allowable increase.
- D. In general, the continuous air quality monitoring data that is required shall have been gathered over a period of at least one year and shall represent at least the year preceding receipt of the application, except that, if the Director determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one year (but not to be less than four months), the data that is required shall have been gathered over at least that shorter period.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-407 renumbered without change as Section R18-2-407 (Supp. 87-3). Section R18-2-407 renumbered to R18-2-607, new Section R18-2-407 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-408. Innovative Control Technology

- A. Notwithstanding the provisions of R18-2-406(A)(1) through (3), the owner or operator of a proposed new major source or major modification may request that the Director approve a system of innovative control technology rather than the best available control technology requirements otherwise applicable to the new source or modification.
- B. The Director shall approve the installation of a system of innovative control technology if the following conditions are met:
 1. The owner or operator of the proposed source or modification satisfactorily demonstrates that the proposed control system would not cause or contribute to an

unreasonable risk to public health, welfare, or safety in its operation or function;

2. The owner or operator agrees to achieve a level of continuous emissions reduction equivalent to that which would have been required under R18-2-406(A)(1) or (2) by a date specified in the permit or permit revision under this Article for the source. Such date shall not be later than four years from the time of start-up or seven years from the issuance of a permit or permit revision under this Article;
 3. The source or modification would meet requirements equivalent to those in R18-2-406(A) based on the emissions rate that the stationary source employing the system of innovative control technology would be required to meet on the date specified in the permit or permit revision under this Article.
 4. Before the date specified in the permit or permit revision under this Article, the source or modification would not:
 - a. Cause or contribute to any violation of an applicable national ambient air quality standard; or
 - b. Impact any area where an applicable maximum increase allowed under R18-2-208 is known to be violated.
 5. All other applicable requirements including those for public participation have been met.
 6. The Director receives the consent of the governors of other affected states.
 7. The requirements of R18-2-410 for federal Class I areas will be met for all periods during the life of the source or modification.
- C. The Director shall withdraw any approval to employ a system of innovative control technology made under this Section if:
1. The proposed system fails by the specified date to achieve the required continuous emissions reduction rate; or
 2. The proposed system fails before the specified date so as to contribute to an unreasonable risk to public health, welfare, or safety; or
 3. The Director decides at any time that the proposed system is unlikely to achieve the required level of control or to protect the public health, welfare, or safety.
- D. If the new source or major modification fails to meet the required level of continuous emissions reduction within the specified time period, or if the approval is withdrawn in accordance with subsection (C) above, the Director may allow the owner or operator of the source or modification up to an additional three years to meet the requirement for the application of best available control technology through use of a demonstrated system of control.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Former Section R9-3-408 renumbered without change as Section R18-2-408 (Supp. 87-3). Section R18-2-408 renumbered to R18-2-608, new Section R18-2-408 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-409. Air Quality Models

- A. Where the Director requires a person requesting a permit or permit revision under this Article to perform air quality impact modeling to obtain such permit or permit revision under this Article, the modeling shall be performed in a manner consistent with the Guideline specified in R18-2-406(A)(6)(a).
- B. Where the person requesting a permit or permit revision under this Article can demonstrate that an air quality impact model

specified in the Guideline is inappropriate, the model may be modified or another model substituted. However, before such modification or substitution can occur, the Director shall make a written finding that:

1. No model in the Guideline is appropriate for a particular permit or permit revision under this Article under consideration, or
 2. The data base required for the appropriate model in the Guideline is not available, and
 3. The model proposed as a substitute or modification is likely to produce results equal or superior to those obtained by models in the Guideline, and
 4. The model proposed as a substitute or modification has been approved by the Administrator.
- C. The substitution or modification of an air quality model under this Section shall be included in the public notice under R18-2-330(C).

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-409 renumbered without change as Section R18-2-409 (Supp. 87-3). Section R18-2-409 renumbered to R18-2-609, new Section R18-2-409 adopted effective November 15, 1993 (Supp. 93-4).

R18-2-410. Visibility and Air Quality Related Value Protection

- A. Applicability.
 1. All of the requirements of this Section apply to a new major source or major modification that would be constructed in an area that is designated attainment or unclassified.
 2. Subsections (B) to (D) apply to the following:
 - a. A new major source or major modification that may have an impact on any integral vista of a mandatory federal Class I area, if it is identified in accordance with 40 CFR 51.304 by the Federal Land Manager at least twelve months before submission of a complete permit application for the source or modification, except where the Federal Land Manager has provided notice and opportunity for public comment on the integral vista, in which case the review must include impacts on any integral vista identified at least six months before submission of a complete permit application. This subsection shall not apply if the Director determines under 40 CFR 51.304(d) that the identification was not in accordance with the identification criteria.
 - b. A new major source or major modification that proposes to locate in an area designated as nonattainment and that may have an impact on visibility in any mandatory federal Class I area.
- B. Application Requirements. Any application for a permit or permit revision to construct a major source or major modification subject to this section shall contain:
 1. An analysis of the impairment to visibility, soils, and vegetation that would occur as a result of the new source or modification and general commercial, residential, industrial, and other growth associated with the new source or modification. The applicant need not provide an analysis of the impact on vegetation having no significant commercial or recreational value.
 2. An analysis of the air quality impact projected for the area as a result of general commercial, residential, industrial, and other growth associated with the new source or modification.
- C. Notification Requirements.

1. The Director shall provide written notice of the application for a permit or permit revision subject to this section to the Administrator, the Federal Land Manager and the federal official charged with direct responsibility for management of any lands within any Class I area that may be affected by the source or modification. The notice shall be provided within 30 days of receipt of the application and at least 60 days before any public hearing on the application. The notice shall:
 - a. Include a copy of the application and all information relevant to the permit or permit revision under this Article;
 - b. Include an analysis of the anticipated impacts of the proposed source on visibility in any federal Class I area; and
 - c. Provide for no less than a 30-day period within which written comments may be submitted.
 2. The Director shall notify the individuals identified in subsection (C)(1) within 30 days of receipt of any advance notification of any such permit or permit revision.
 3. The Director shall notify the individuals identified in subsection (C)(1) of the preliminary determination for the application under R18-2-402(I)(2)(c) and shall make available any materials used in making that determination.
 4. The Director shall provide notice to the administrator of every action related to the consideration of such permit or permit revision.
- D. Consideration of Federal Land Manager Analysis.**
1. The Federal Land Manager and the federal official charged with direct responsibility for management of federal Class I areas have an affirmative responsibility to protect the air quality related values, including visibility, of any such areas and to consider, in consultation with the Administrator, whether a proposed source or modification would have an adverse impact on such values.
 2. The Director shall consider any analysis performed by the Federal Land Manager and provided within 30 days of the notification required by subsection (C)(1) that shows that a proposed new major stationary source or major modification may have an adverse impact on visibility in a federal Class I area or integral vista.
 3. In considering the analysis, the Director shall ensure that the source's emissions will be consistent with making reasonable progress toward the national visibility goal referred to in 40 CFR 51.300(a), taking into account the costs of compliance, the time necessary for compliance, the energy and nonair quality environmental impacts of compliance, and the useful life of the source.
 4. If the Director concurs with the analysis, the Director shall deny the permit or permit revision.
 5. If the Director finds that the analysis does not demonstrate to the satisfaction of the Director that an adverse impact on visibility will result in the federal Class I area or integral vista, the Director shall, in the notice required by R18-2-402(I)(2)(c), either explain that decision or give notice as to where the explanation can be obtained.
- E. Federal Land Manager Analysis Showing Adverse Impact Despite Compliance with Maximum Allowable Increases for Class I Area.**
1. Within 30 days after the notification required by subsection (C)(3), the Federal Land Manager may present to the Director a demonstration that the emissions attributed to a new major source or major modification would have an adverse impact on visibility or other specifically defined air quality related values of any mandatory federal Class I area, even though the change in air quality resulting from emissions attributable to the source or modification will not cause or contribute to concentrations that exceed the maximum increases allowed for the area in R18-2-218.
 2. If the Director concurs with the demonstration, the Director shall not issue a permit or permit revision for the major source or major modification.
- F. Class I Variance with Federal Land Manager Concurrence.**
1. The owner or operator of a proposed source or modification may demonstrate to the Federal Land Manager that emissions from the source will have no adverse impact on the air quality related values (including visibility) of federal Class I areas, even though the change in air quality resulting from emissions from the source or modification are projected to cause or contribute to concentrations that exceed the maximum increases allowed for a Class I area under R18-2-218.
 2. If the Federal land manager concurs with the demonstration and so certifies to the Director, the Director may issue the permit, provided that:
 - a. Applicable requirements are otherwise met; and
 - b. The permit contains emission limits necessary to assure that emissions of sulfur dioxide, PM_{2.5}, PM₁₀, and nitrogen oxides will not cause increases in ambient concentrations of those pollutants exceeding the following maximum allowable increases over minor source baseline concentrations:
- | Pollutant | Maximum allowable increase (micrograms per cubic meter) |
|------------------------|---|
| PM _{2.5} : | |
| Annual arithmetic mean | 4 |
| 24-hr maximum | 9 |
| PM ₁₀ : | |
| Annual arithmetic mean | 17 |
| 24-hr maximum | 30 |
| Sulfur dioxide: | |
| Annual arithmetic mean | 20 |
| 24-hr maximum | 91 |
| 3-hr maximum | 325 |
| Nitrogen dioxide | |
| Annual arithmetic mean | 25 |
- G. Class I Sulfur Dioxide Variance by Governor with Concurrence by Federal Land Manager or President.**
1. The owner or operator of a proposed source or modification that cannot be approved under subsection (F) may demonstrate to the Governor that the source cannot be constructed by reason of any maximum allowable increase for sulfur dioxide for a period of twenty-four hours or less applicable to any Class I area and, in the case of mandatory federal Class I areas, that a variance under this clause would not adversely affect the air quality related values of the area (including visibility). The Governor, after consideration of the Federal Land Manager's recommendation (if any) and subject to his concurrence, may, after notice and public hearing, grant a variance from the maximum allowable increase. If the variance is granted, the Director shall issue a permit or permit to the source or modification pursuant to the requirements of subsection (G)(3), provided that the applicable requirements of R18-2-406 are otherwise met.

2. In any case where the Governor recommends a variance in which the Federal Land Manager does not concur, the recommendations of the Governor and the Federal Land Manager shall be transmitted to the President. The President may approve the Governor's recommendation if the President finds that the variance is in the national interest. If the variance is approved, the Director shall issue a permit pursuant to subsection (G)(3), provided that the applicable requirements of R18-2-406 are otherwise met.
3. In the case of a permit issued pursuant to subsection (G)(1) or (G)(2) the source or modification shall comply with emission limitations necessary to assure that emissions of sulfur dioxide from the source or modification will not (during any day on which the otherwise applicable maximum allowable increases are exceeded) cause or contribute to concentrations that would exceed the following maximum allowable increases over the baseline concentration and to assure that the emissions will not cause or contribute to concentrations that exceed the otherwise applicable maximum allowable increases for periods of exposure of 24 hours or less for more than 18 days, not necessarily consecutive, during any annual period:

Maximum Allowable Increase [Micrograms per cubic meter]		
Period of exposure	Terrain areas	
	Low	High
24-hr maximum	36	62
3-hr maximum	130	221

- H. Visibility Monitoring. The Director may require monitoring of visibility in any federal Class I area near a proposed major source or major modification for such purposes and by such means as the Director deems necessary and appropriate.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-410 renumbered without change as Section R18-2-410 (Supp. 87-3). Section R18-2-410 renumbered to R18-2-610, new Section R18-2-410 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-411. Permit Requirements for Sources that Locate in Attainment or Unclassifiable Areas and Cause or Contribute to a Violation of Any National Ambient Air Quality Standard

- A. Except as provided in subsection (C) or (D), the Director shall deny a permit or permit revision to any major source or major modification that would locate in any attainment or unclassified area, if the source or modification would cause or contribute to a violation of any national ambient air quality standard.
- B. A major source or major modification will be considered to cause or contribute to a violation of a national ambient air quality standard when the source or modification would, at a minimum, cause an increase in the concentrations of a regulated NSR pollutant that exceeds the significance level at any locality that does not, or as a result of the increase would not, meet the standard.
- C. A proposed major source or major modification subject to subsection (A) may reduce the impact of its emissions upon air quality by obtaining sufficient emission reductions to, at a minimum, compensate for its adverse ambient impact where the major source or major modification would otherwise cause or contribute to a violation of any national ambient air quality standard.

- D. Subsection (A) shall not apply to a major stationary source or major modification with respect to a particular pollutant if the owner or operator demonstrates that, as to that pollutant, the source or modification is located in an area designated as non-attainment pursuant to section 107 of the Act.

Historical Note

Adopted effective November 15, 1993 (Supp. 93-4). Section repealed by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). New Section made by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-412. PALs

- A. Applicability.
 1. The Director may approve the use of a PAL for any existing major source if the PAL meets the requirements of this Section.
 2. Any physical change in or change in the method of operation of a major stationary source that maintains its total source-wide emissions below the PAL level, meets the requirements of this Section, and complies with the PAL permit:
 - a. Is not a major modification for the PAL pollutant,
 - b. Does not have to be approved under R18-2-403 or R18-2-406, and
 - c. Is not subject to the provisions in R18-2-403(C) or R18-2-406(M).
 3. Except as provided under subsection (A)(2)(c), a major stationary source shall continue to comply with all applicable federal or state requirements, emission limitations, and work practice requirements that were established prior to the effective date of the PAL.
- B. Permit application requirements. As part of a permit application requesting a PAL, the owner or operator of a major source shall submit the following information to the Director for approval:
 1. A list of all emissions units at the source designated as small, significant or major based on their potential to emit. In addition, the owner or operator of the source shall indicate which, if any, federal or state applicable requirements, emission limitations, or work practices apply to each unit.
 2. Calculations of the baseline actual emissions (with supporting documentation). Baseline actual emissions shall include emissions associated not only with operation of the unit, but also emissions associated with the startup, shutdown and malfunction.
 3. The calculation procedures that the major source owner or operator proposes to use to convert the monitoring system data to monthly emissions and annual emissions based on a 12-month rolling total for each month as required by subsection (L)(1).
- C. General requirements for establishing PALs.
 1. The Director is allowed to establish a PAL at a major source, provided that at a minimum, the following requirements are met:
 - a. The PAL shall impose an annual emission limitation in tons per year, that is enforceable as a practical matter, for the entire major source. For each month during the PAL effective period after the first 12 months of establishing a PAL, the major source owner or operator shall show that the sum of the monthly emissions from each emissions unit under the PAL for the previous 12 consecutive months is less than the PAL (a 12-month sum, rolled monthly). For each month during the first 11 months from the

- PAL effective date, the major source owner or operator shall show that the sum of the preceding monthly emissions from the PAL effective date for each emissions unit under the PAL is less than the PAL.
- b. The PAL shall be established in a PAL permit that meets the requirements in subsection (D).
 - c. The PAL permit shall contain all the requirements of subsection (F).
 - d. The PAL shall include fugitive emissions, to the extent quantifiable, from all emissions units that emit or have the potential to emit the PAL pollutant at the major source.
 - e. Each PAL shall regulate emissions of only one pollutant.
 - f. Each PAL shall have a PAL effective period of 10 years.
 - g. The owner or operator of the major source with a PAL shall comply with the monitoring, recordkeeping, and reporting requirements provided in subsections (K) through (M) for each emissions unit under the PAL through the PAL effective period.
2. At no time (during or after the PAL effective period) are emissions reductions of a PAL pollutant that occur during the PAL effective period creditable as decreases for purposes of offsets under R18-2-404 unless the level of the PAL is reduced by the amount of such emissions reductions and such reductions would be creditable in the absence of the PAL.
- D. Action on PAL permit application.** A PAL permit application shall be processed in accordance with one of the following:
1. As an initial Class I permit pursuant to R18-2-304.
 2. As a renewal of a Class I permit pursuant to R18-2-322.
 3. As a significant revision to a Class I permit pursuant to R18-2-320.
- E. Setting the 10-year actuals PAL level.**
1. Except as provided in subsection (E)(2), the PAL level for a major source shall be established as the sum of the baseline actual emissions of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant. When establishing the PAL level, only one consecutive 24-month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive 24-month period may be used for each different PAL pollutant. Emissions associated with units that were permanently shut down after this 24-month period must be subtracted from the PAL level. The Director shall specify a reduced PAL level(s) (in tons/yr) in the PAL permit to become effective on the future compliance date(s) of any applicable federal or state regulatory requirement(s) that the Director is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of 60 ppm NO_x to a new rule limit of 30 ppm, then the permit shall contain a future effective PAL level that is equal to the current PAL level reduced by half of the original baseline emissions of such unit(s).
 2. For newly constructed units (which do not include modifications to existing units) on which actual construction began after the 24-month period, in lieu of adding the baseline actual emissions as specified in subsection (E)(1), the emissions must be added to the PAL level in an amount equal to the potential to emit of the units.
- F. Contents of the PAL permit.** The PAL permit must contain, at a minimum, the following information:
1. The PAL pollutant and the applicable source-wide emission limitation in tons per year.
 2. The PAL permit effective date and the expiration date of the PAL (PAL effective period).
 3. Specification in the PAL permit that if a major source owner or operator applies to renew a PAL in accordance with subsection (I) before the end of the PAL effective period, then the PAL shall not expire at the end of the PAL effective period. It shall remain in effect until a revised PAL permit is issued by the Director.
 4. A requirement that emission calculations for compliance purposes must include emissions from startups, shutdowns, and malfunctions.
 5. A requirement that, once the PAL expires, the major source is subject to the requirements of subsection (H).
 6. The calculation procedures that the major source owner or operator shall use to convert the monitoring system data to monthly emissions and annual emissions based on a 12-month rolling total as required by subsection (L)(1).
 7. A requirement that the major source owner or operator monitor all emissions units in accordance with the provisions under subsection (K).
 8. A requirement to retain the records required under subsection (L) onsite. Such records may be retained in an electronic format.
 9. A requirement to submit the reports required under subsection (M) by the required deadlines.
 10. Any other requirements that the Director deems necessary to implement and enforce the PAL.
- G. PAL effective period and reopening of the PAL permit.**
1. PAL effective period. The Director shall specify a PAL effective period of 10 years.
 2. Reopening of the PAL permit.
 - a. During the PAL effective period, the Director must reopen the PAL permit to:
 - i. Correct typographical/calculation errors made in setting the PAL or reflect a more accurate determination of emissions used to establish the PAL,
 - ii. Reduce the PAL if the owner or operator of the major source creates creditable emissions reductions for use as offsets under R18-2-404, and
 - iii. Revise the PAL to reflect an increase in the PAL as provided under subsection (J).
 - b. The Director shall have discretion to reopen the PAL permit for the following:
 - i. Reduce the PAL to reflect new federal applicable requirements with compliance dates after the PAL effective date;
 - ii. Reduce the PAL consistent with any other requirement, that is enforceable as a practical matter, and that the state may impose on the major source under the State Implementation Plan; and
 - iii. Reduce the PAL if the Director determines that a reduction is necessary to avoid causing or contributing to a violation of a national ambient air quality standard or a maximum increase allowed under R18-2-208, or to an adverse impact on an air quality related value that has been identified for a federal Class I area by a Federal Land Manager and for which information is available to the general public.

- c. Except for the permit reopening in subsection (G)(2)(a)(i) for the correction of typographical/calculation errors that do not increase the PAL level, all other reopenings shall be carried out in accordance with the public participation requirements of subsection (D).
- H. Expiration of a PAL.** Any PAL that is not renewed in accordance with the procedures in subsection (I) shall expire at the end of the PAL effective period, and the following requirements shall apply.
1. Each emissions unit (or each group of emissions units) that existed under the PAL shall comply with an allowable emission limitation under a revised permit established according to the following procedures.
 - a. Within the time-frame specified for PAL renewals in subsection (I)(2), the major source shall submit a proposed allowable emission limitation for each emissions unit (or each group of emissions units, if such a distribution is more appropriate) by distributing the PAL allowable emissions for the major source among each of the emissions units that existed under the PAL. If the PAL had not yet been adjusted for an applicable requirement that became effective during the PAL effective period, as would be required under subsection (I)(5), such distribution shall be made as if the PAL had been adjusted.
 - b. The Director shall decide how the PAL allowable emissions will be distributed and issue a revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as the Director determines is appropriate.
 2. Each emissions unit(s) shall comply with the allowable emission limitation on a 12-month rolling basis. The Director may approve the use of monitoring systems (source testing, emission factors, etc.) other than CEMS, CERMS, PEMS, or CPMS to demonstrate compliance with the allowable emission limitation.
 3. Until the Director issues the revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as required under subsection (H)(1)(b), the source shall continue to comply with a source-wide, multi-unit emissions cap equivalent to the level of the PAL emission limitation.
 4. Any physical change or change in the method of operation at the major source will be subject to the nonattainment major NSR requirements if such change meets the definition of major modification.
 5. The major source owner or operator shall continue to comply with any applicable requirements that may have applied either during the PAL effective period or before the PAL effective period except for those emission limitations that had been established pursuant to R18-2-403(C) or R18-2-406(H), but were eliminated by the PAL in accordance with subsection (A)(2)(c).
- I. Renewal of a PAL.**
1. The Director shall follow the procedures specified in subsection (D) in approving any request to renew a PAL for a major source, and shall provide both the proposed PAL level and a written rationale for the proposed PAL level to the public for review and comment. During such public review, any person may propose a PAL level for the source for consideration by the Director.
 2. Application deadline. A major source owner or operator shall submit a timely application to the Director to request renewal of a PAL. A timely application is one that is submitted at least six months prior to, but not earlier than 18 months from, the date of permit expiration. This deadline for application submittal is to ensure that the permit will not expire before the permit is renewed. If the owner or operator of a major source submits a complete application to renew the PAL within this time period, then the PAL shall continue to be effective until the revised permit with the renewed PAL is issued.
- J. Increasing a PAL during the PAL effective period.**
1. The Director may increase a PAL emission limitation only if the following requirements are met:
 - a. The owner or operator of the major source shall submit a complete application to request an increase in the PAL limit for a PAL major modification. Such application shall identify the emissions unit(s) contributing to the increase in emissions so as to cause the major source's emissions to equal or exceed its PAL.
 - b. As part of this application, the major source owner or operator shall demonstrate that the sum of the baseline actual emissions of the small emissions
 3. Application requirements. The application to renew a PAL permit shall contain the following information.
 - a. The information required in subsections (B)(1) through (3).
 - b. A proposed PAL level.
 - c. The sum of the potential to emit of all emissions units under the PAL (with supporting documentation).
 - d. Any other information the owner or operator wishes the Director to consider in determining the appropriate level for renewing the PAL.
 4. PAL adjustment. In determining whether and how to adjust the PAL, the Director shall consider the options outlined in subsections (I)(4)(a) and (b). However, in no case may any such adjustment fail to comply with subsection (I)(4)(c).
 - a. If the emissions level calculated in accordance with subsection (E) is equal to or greater than 80% of the PAL level, the Director may renew the PAL at the same level without considering the factors set forth in subsection (I)(4)(b); or
 - b. The Director may set the PAL at a level that the Director determines to be more representative of the source's baseline actual emissions, or that the Director determines to be more appropriate considering air quality needs, advances in control technology, anticipated economic growth in the area, desire to reward or encourage the source's voluntary emissions reductions, or other factors as specifically identified by the Director in the Director's written rationale.
 - c. Notwithstanding subsections (I)(4)(a) and (b):
 - i. If the potential to emit of the major source is less than the PAL, the Director shall adjust the PAL to a level no greater than the potential to emit of the source; and
 - ii. The Director shall not approve a renewed PAL level higher than the current PAL, unless the PAL has been increased in accordance with subsection (J).
 5. If the compliance date for an applicable requirement that applies to the PAL source occurs during the PAL effective period, and if the Director has not already adjusted for such requirement, the PAL shall be adjusted at the time of PAL permit renewal or renewal of the source's Class I permit, whichever occurs first.

units, plus the sum of the baseline actual emissions of the significant and major emissions units assuming application of BACT or LAER equivalent controls, plus the sum of the PAL allowable emissions of the new or modified emissions unit(s) exceeds the PAL. The level of control that would result from BACT or LAER equivalent controls on each significant or major emissions unit shall be determined by conducting a new BACT or LAER analysis at the time the application is submitted, as applicable for the particular PAL pollutant, unless the emissions unit is currently required to comply with a BACT or LAER requirement that was established within the preceding 10 years. In such a case, the assumed control level for that emissions unit shall be equal to the level of BACT or LAER with which that emissions unit must currently comply.

- c. The owner or operator obtains a major NSR permit for all emissions unit(s) identified in subsection (J)(1)(a), regardless of the magnitude of the emissions increase resulting from them (that is, no significant levels apply). These emissions unit(s) shall comply with any emissions requirements resulting from the major NSR process (for example, BACT), even though they have also become subject to the PAL or continue to be subject to the PAL.
 - d. The PAL permit shall require that the increased PAL level shall be effective on the day any emissions unit that is part of the PAL major modification becomes operational and begins to emit the PAL pollutant.
2. The Director shall calculate the new PAL level as the sum of the PAL allowable emissions for each modified or new emissions unit, plus the sum of the baseline actual emissions of the significant and major emissions units (assuming application of BACT or LAER equivalent controls as determined in accordance with subsection (J)(1)(b), plus the sum of the baseline actual emissions of the small emissions units.
 3. The PAL permit shall be revised to reflect the increased PAL level pursuant to the public notice requirements of subsection (D).

K. Monitoring requirements for PALs.

1. General requirements.
 - a. Each PAL permit must contain enforceable requirements for the monitoring system that accurately determines plantwide emissions of the PAL pollutant in terms of mass per unit of time. Any monitoring system authorized for use in the PAL permit must be based on sound science and meet generally acceptable scientific procedures for data quality and manipulation. Additionally, the information generated by such system must meet minimum legal requirements for admissibility in a judicial proceeding to enforce the PAL permit.
 - b. The PAL monitoring system must employ one or more of the four general monitoring approaches meeting the minimum requirements set forth in subsections (K)(2)(a) through (d) and must be approved by the Director.
 - c. Notwithstanding subsection (K)(1)(b), the owner or operator may also employ an alternative monitoring approach if approved by the Director as meeting the requirements of subsection (K)(1)(a).
 - d. Failure to use a monitoring system that meets the requirements of this Section renders the PAL invalid.

2. Minimum performance requirements for approved monitoring approaches. The following are acceptable general monitoring approaches when conducted in accordance with the minimum requirements in subsections (K)(3) through (9):
 - a. Mass balance calculations for activities using coatings or solvents,
 - b. CEMS,
 - c. CPMS or PEMS, and
 - d. Emission factors.
3. Mass balance calculations. An owner or operator using mass balance calculations to monitor PAL pollutant emissions from activities using coating or solvents shall meet the following requirements:
 - a. Provide a demonstrated means of validating the published content of the PAL pollutant that is contained in or created by all materials used in or at the emissions unit;
 - b. Assume that the emissions unit emits all of the PAL pollutant that is contained in or created by any raw material or fuel used in or at the emissions unit, if it cannot otherwise be accounted for in the process; and
 - c. Where the vendor of a material or fuel, which is used in or at the emissions unit, publishes a range of pollutant content from such material, the owner or operator must use the highest value of the range to calculate the PAL pollutant emissions unless the Director determines there is site-specific data or a site-specific monitoring program to support another content within the range.
4. CEMS. An owner or operator using CEMS to monitor PAL pollutant emissions shall meet the following requirements:
 - a. CEMS must comply with applicable Performance Specifications found in 40 CFR 60, Appendix B; and
 - b. CEMS must sample, analyze and record data at least every 15 minutes while the emissions unit is operating.
5. CPMS or PEMS. An owner or operator using CPMS or PEMS to monitor PAL pollutant emissions shall meet the following requirements:
 - a. The CPMS or the PEMS must be based on current site-specific data demonstrating a correlation between the monitored parameter(s) and the PAL pollutant emissions across the range of operation of the emissions unit; and
 - b. Each CPMS or PEMS must sample, analyze, and record data at least every 15 minutes, or at another less frequent interval approved by the Director, while the emissions unit is operating.
6. Emission factors. An owner or operator using emission factors to monitor PAL pollutant emissions shall meet the following requirements:
 - a. All emission factors shall be adjusted, if appropriate, to account for the degree of uncertainty or limitations in the factors' development;
 - b. The emissions unit shall operate within the designated range of use for the emission factor, if applicable; and
 - c. If technically practicable, the owner or operator of a significant emissions unit that relies on an emission factor to calculate PAL pollutant emissions shall conduct validation testing to determine a site-specific emission factor within six months of PAL per-

mit issuance, unless the Director determines that testing is not required.

7. A source owner or operator must record and report maximum potential emissions without considering enforceable emission limitations or operational restrictions for an emissions unit during any period of time that there is no monitoring data, unless another method for determining emissions during such periods is specified in the PAL permit.
 8. Notwithstanding the requirements in subsections (K)(3) through (7), where an owner or operator of an emissions unit cannot demonstrate a correlation between the monitored parameter(s) and the PAL pollutant emissions rate at all operating points of the emissions unit, the Director shall, at the time of permit issuance:
 - a. Establish default value(s) for determining compliance with the PAL based on the highest potential emissions reasonably estimated at such operating point(s), or
 - b. Determine that operation of the emissions unit during operating conditions when there is no correlation between monitored parameter(s) and the PAL pollutant emissions is a violation of the PAL.
 9. Re-validation. All data used to establish the PAL pollutant must be re-validated through performance testing or other scientifically valid means approved by the Director. Such testing must occur at least once every five years after issuance of the PAL.
- L. Recordkeeping requirements.**
1. The PAL permit shall require an owner or operator to retain a copy of all records necessary to determine compliance with any requirement of this Section and with the PAL, including a determination of each emissions unit's 12-month rolling total emissions, for five years from the date of such record.
 2. The PAL permit shall require an owner or operator to retain a copy of the following records for the duration of the PAL effective period plus five years:
 - a. A copy of the PAL permit application and any applications for revisions to the PAL, and
 - b. Each annual certification of compliance pursuant to R18-2-309(2) and the data relied on in certifying compliance.
- M. Reporting and notification requirements.** The owner or operator shall submit semi-annual monitoring reports and prompt deviation reports to the Director in accordance with R18-2-306(A)(5). The reports shall meet the following requirements:
1. Semi-annual report. The semi-annual report shall be submitted to the Director within 30 days of the end of each reporting period. This report shall contain the following information:
 - a. The identification of owner and operator and the permit number.
 - b. Total annual emissions (tons/year) based on a 12-month rolling total for each month in the reporting period recorded pursuant to subsection (L)(1).
 - c. All data relied upon, including, but not limited to, any Quality Assurance or Quality Control data, in calculating the monthly and annual PAL pollutant emissions.
 - d. A list of any emissions units modified or added to the major source during the preceding six-month period.
 - e. The number, duration, and cause of any deviations or monitoring malfunctions (other than the time associated with zero and span calibration checks), and any corrective action taken.
 - f. A notification of a shutdown of any monitoring system, whether the shutdown was permanent or temporary, the reason for the shutdown, the anticipated date that the monitoring system will be fully operational or replaced with another monitoring system, and whether the emissions unit monitored by the monitoring system continued to operate, and the calculation of the emissions of the pollutant or the number determined by method included in the permit, as provided by subsection (K)(7).
 - g. A certification by the responsible official consistent with R18-2-304(I).
2. Deviation report. The major source owner or operator shall promptly submit reports of any deviations or exceedance of the PAL permit requirements, including periods where no monitoring is available, in accordance with R18-2-306(A)(5). The reports shall contain the following information:
 - a. The identification of owner and operator and the permit number,
 - b. The PAL permit requirement that experienced the deviation or that was exceeded,
 - c. Emissions resulting from the deviation or the exceedance, and
 - d. A certification by the responsible official consistent with R18-2-304(I).
 3. Re-validation results. The owner or operator shall submit to the Director the results of any re-validation test or method within three months after completion of such test or method.

Historical Note

New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

ARTICLE 5. GENERAL PERMITS

R18-2-501. Applicability

- A.** The Director may issue general permits for a facility class that contains 10 or more facilities that are similar in nature, have substantially similar emissions, and would be subject to the same or substantially similar requirements governing operations, emissions, monitoring, reporting, or recordkeeping. "Similar in nature" refers to facility size, processes, and operating conditions.
- B.** The Director may issue general permits, in accordance with subsection (A), with emission limitations, controls, or other requirements that meet the requirements of R18-2-306.01. A source that seeks to vary from such a general permit, and obtain an emission limitation, control, or other requirement not contained in that general permit, shall apply for a permit pursuant to Article 3 of this Chapter.
- C.** General permits shall not be issued for affected sources except as provided in regulations promulgated by the Administrator under Title IV of the Act.
- D.** Unless otherwise stated, the provisions of Article 3 shall apply to general permits.

Historical Note

Former Section R18-2-501 renumbered to R18-2-502, new Section R18-2-501 adopted effective September 26, 1990 (Supp. 90-3). Former Section R18-2-501 renumbered to R18-2-701; new Section adopted effective November 15, 1993 (Supp. 93-4). Amended effective

August 1, 1995 (Supp. 95-3).

R18-2-502. General Permit Development

- A. The Director may issue a general permit on the Director's own initiative or in response to a petition.
- B. Any person may submit a petition to the Director requesting the issuance of a general permit for a defined class of facilities. The petition shall propose a particular class of facilities, and list the approximate number of facilities in the proposed class along with their size, processes, and operating conditions, and demonstrate how the class meets the criteria for a general permit as specified in R18-2-501 and A.R.S. § 49-426(H). The Director shall provide a written response to the petition within 120 days of receipt.
- C. General permits shall be issued for classes of facilities using the same engineering principles that applies to permits for individual sources and following the public notice requirements of R18-2-504.
- D. General permits shall include all of the following:
 1. All elements required by R18-2-306(A) except R18-2-306(A)(2)(b) and (6).
 2. The process for individual sources to apply for coverage under the general permit.
- E. General permits may include conditions imposed under R18-2-515.

Historical Note

Former Section R9-3-501 repealed, new Section R9-3-501 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (D) effective June 19, 1981 (Supp. 81-3). Amended subsections (C) and (D) effective February 2, 1982 (Supp. 82-1). Amended subsection (D) effective May 25, 1982 (Supp. 82-3). Former Section R9-3-501 renumbered without change as Section R18-2-501 (Supp. 87-3). Former Section R18-2-502 repealed, new Section R18-2-502 renumbered from R18-2-501 and amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-502 renumbered to R18-2-702; new Section R18-2-502 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-503. Application for Coverage under General Permit

- A. Once the Director has issued a general permit, any source which is a member of the class of facilities covered by the general permit may apply to the Director for authority to operate under the general permit. At the time the Director issues a general permit, the Director may also establish a specific application form with filing instructions for sources in the category covered by the general permit. Applicants shall complete the specific application form or, if a specific form has not been adopted, the standard application form provided under R18-2-304(B). The specific application form shall, at a minimum, require the applicant to submit the following information:
 1. Information identifying and describing the source, its processes, and operating conditions in sufficient detail to allow the Director to determine qualification for, and to assure compliance with, the general permit.
 2. A compliance plan that meets the requirements of R18-2-514.
- B. For sources required to obtain a permit under Title V of the Act, the Director shall provide the Administrator with a permit application summary form and any relevant portion of the permit application and compliance plan. To the extent possible,

this information shall be provided in computer-readable format compatible with the Administrator's national database management system.

- C. The Director shall act on the application for coverage under a general permit as expeditiously as possible. The source may operate under the terms of the applicable general permit during that time. The Director may defer acting on an application under this subsection (if) the Director has provided notice of intent to renew or not renew the permit.
- D. The Director shall deny an application for coverage from any Class I source that is subject to case-by-case standards or requirements.
- E. Upon notification from the Director of the availability of a web portal to apply for and obtain a general permit, an applicant shall file all applications and conduct all transactions related to the general permit through the portal.

Historical Note

Former Section R9-3-503 repealed, new Section R9-3-503 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (C), paragraph (6) effective June 19, 1981 (Supp. 81-3). Amended subsection (C) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-503 renumbered without change as Section R18-2-503 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-503 renumbered to R18-2-703; new Section R18-2-503 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-504. Public Notice

- A. This Section applies to issuance, revision, or renewal of a general permit.
- B. The Director shall provide public notice for any proposed new general permit, for any revision of an existing general permit, and for renewal of an existing general permit.
- C. The Director shall publish notice of the proposed general permit once each week for two consecutive weeks in a newspaper of general circulation in each county and shall provide at least 30 days from the date of the first notice for public comment. The notice shall describe the following:
 1. The proposed permit;
 2. The category of sources that would be affected;
 3. The air contaminants which the Director expects to be emitted by a typical facility in the class and the class as a whole;
 4. The Director's proposed actions and effective date for the actions;
 5. Locations where documents relevant to the proposed permit will be available during normal business hours;
 6. The name, address, and telephone number of a person within the Department who may be contacted for further information;
 7. The address where any person may submit comments or request a public hearing and the date and time by which comments or a public hearing request are required to be received;
 8. The process by which sources may obtain authorization to operate under the general permit.
- D. A copy of the notice required by subsection (C), shall be sent to the Administrator through the appropriate regional office, and to all other state and local air pollution control agencies in the state. The notice shall also be sent to any other agency in

the state having responsibility for implementing the procedures required under 40 CFR 51, I. For general permits under which operation may be authorized in lieu of Class I permits, the Director shall provide the proposed final permit to the Administrator after public and affected state review. No Class I permit shall be issued if the Administrator properly objects to its issuance in writing within 45 days from receipt of the proposed final permit and any necessary supporting information from the Director.

- E. By no later than the date notice is first published under subsection (A), the Department shall make copies of the following materials available at a public location in each county and at each Department office:
 1. The proposed general permit;
 2. The Department's analysis in support of the grant of the general permit;
 3. All other materials available to the Director that are relevant to the permit decision.
- F. Written comments to the Director shall include the name of the person and the person's agent or attorney and shall clearly set forth reasons why the general permit should or should not be issued pursuant to the criteria for issuance in A.R.S. §§ 49-426 and 49-427 and this Chapter.
- G. At the time a general permit is issued, the Director shall make available a response to all relevant comments on the proposed permit raised during the public comment period and during any requested public hearing. The response shall specify which provisions, if any, of the proposed permit have been changed and the reason for the changes. The Director shall also notify in writing any petitioner and each person who has submitted written comments on the proposed general permit or requested notice of the final permit decision.

Historical Note

Former Section R9-3-504 repealed, new Section R9-3-504 adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-504 renumbered without change as Section R18-2-504 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-504 renumbered to R18-2-704; new Section R18-2-504 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-505. General Permit Renewal

- A. The Director shall review and may renew general permits every five years. A source's authorization to operate under a general permit shall coincide with the term of the general permit regardless of when the authorization began during the five-year period, except as provided in R18-2-510(C). In addition to the public notice required to issue a proposed permit under R18-2-504, the Director shall notify in writing all sources who have been granted, or who have applications pending for, authorization to operate under the permit. The written notice shall describe the source's duty to reapply and may include requests for information required under the proposed permit.
- B. At the time a general permit is renewed, the Director shall notify in writing all sources who were granted coverage under the previous permit and shall require them to submit a timely renewal application. For purposes of general permits, a timely application is one that is submitted within the time-frame specified by the Director in the written notification. Until such time that a timely application is submitted, the source shall continue to comply with the previously issued general permit coverage. Upon submittal of a timely application, the source shall com-

ply with the renewed permit. Failure to submit a timely application terminates the source's right to operate.

Historical Note

Former Section R9-3-1007 renumbered effective January 13, 1976 (Supp. 76-1). Former Section R9-3-505 repealed, new Section R9-3-505 adopted effective May 14, 1979 (Supp. 79-1). Editorial corrections, subsection (B), paragraph (5), and subsection (D), paragraph (1), subparagraph (d) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended subsection (B) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-505 renumbered without change as Section R18-2-505 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-505 renumbered to R18-2-705; new Section R18-2-505 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-506. Relationship to Individual Permits

Any source covered under a general permit may request to be excluded from coverage by applying for an individual source permit. Coverage under the general permit shall terminate on the date the individual permit is issued.

Historical Note

Former Section R9-3-1008 renumbered effective January 13, 1976 (Supp. 76-1). Former Section R9-3-506 repealed, new Section R9-3-506 adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (C), paragraph (1) effective June 19, 1981 (Supp. 81-3). Former Section R9-3-506 renumbered without change as Section R18-2-506 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-506 renumbered to R18-2-706; new Section R18-2-506 adopted effective November 15, 1993 (Supp. 93-4).

R18-2-507. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-507 renumbered without change as Section R18-2-507 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-507 renumbered to R18-2-707; new Section R18-2-507 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Repealed by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-508. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (B) effective May 28, 1982 (Supp. 82-3). Amended subsection (B) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-508 renumbered without change as Section R18-2-508 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-508 renumbered to R18-2-708; new Section R18-2-508 adopted effective November 15, 1993 (Supp. 93-4). Repealed by final rulemaking at 23 A.A.R. 333, effective

March 21, 2017 (Supp. 17-1).

R18-2-509. General Permit Appeals

Any person who filed a comment on a proposed general permit as provided in R18-2-504 may appeal the terms and conditions of the general permit, as they apply to the facility class covered under a general permit, by filing an appeal with the Office of Administrative Hearings within 30 days after receipt of notice that the general permit has been issued.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-509 renumbered without change as Section R18-2-509 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-509 renumbered to R18-2-709; new Section R18-2-509 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4698, effective February 3, 2007 (Supp. 06-4).

R18-2-510. Terminations of General Permits and Revocations of Authority to Operate under a General Permit

- A. The Director may terminate a general permit at any time if:
 1. The Director has determined that the emissions from the sources in the facility class cause or contribute to ambient air quality standard violations which are not adequately addressed by the requirements in the general permit, or
 2. The Director has determined that the terms and conditions of the general permit no longer meet the requirements of A.R.S. §§ 49-426 and 49-427.
- B. The Director shall provide written notice to all sources operating under a general permit prior to termination of a general permit. Such notice shall include an explanation of the basis for the proposed action. Within 180 days of receipt of the notice of the expiration, termination or cancellation of any general permit, sources notified shall submit an application to the Director for an individual permit.
- C. The Director may require a source authorized to operate under a general permit to apply for and obtain an individual source permit at any time if the source is not in compliance with the terms and conditions of the general permit.
- D. If the Director revokes a source's authority to operate under a general permit pursuant to subsection (C), the Director shall notify the permittee by certified mail, return receipt requested. The notice shall include a statement detailing the grounds for the revocation of authority and a statement that the permittee is entitled to a hearing. A source previously authorized to operate under a general permit may operate under the terms of the general permit until the earlier of the date it submits a complete application for an individual permit, at which time it may operate under that application, or 180 days after receipt of the notice of revocation of authority to operate under the general permit.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsections (E)(3) and (E)(4) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-510 renumbered without change as Section R18-2-510 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-510 renumbered to R18-2-710; new Section R18-2-510 adopted effective November 15, 1993 (Supp. 93-4).

R18-2-511. Fees Related to General Permits

- A. **Permit Processing Fee.** The owner or operator of a source that applies for authority to operate under a general permit shall pay to the Director \$500 with the submittal of each application. This fee applies to the owner or operator of any source who intends to continue operating under the authority of a general permit that has been proposed for renewal. This fee also applies to requests for new Authorizations to Operate (ATOs) for new equipment.
- B. **Administrative or Inspection Fee.** The owner or operator of a source required to have a general permit, that has undergone initial startup by January 1, shall pay, for each calendar year, the applicable administrative or inspection fee from the table below, by February 1 or 60 days after the Director mails the invoice, whichever is later.

General Permit Source Category	Administrative Fee
Class I Title V General Permits	Administrative fee for category from R18-2-326(C)
Class II Title V Small Source	\$750
Other Class II Title V General Permits	\$4,520
	Inspection Fee
Class II Non-Title V Crematories	\$1,500
Other Class II Non-Title V General Permits	\$3,020

Historical Note

Former Section R18-2-511 renumbered to R18-2-711; new Section R18-2-511 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 5670, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 10 A.A.R. 4767, effective November 4, 2004 (Supp. 04-4). Amended by final rulemaking at 13 A.A.R. 4379, effective December 4, 2007 (Supp. 07-4).

R18-2-512. Changes to Facilities Granted Coverage under General Permits

- A. This Section applies to changes made at a facility that has been granted coverage under a general permit.
- B. **Facility Changes that Require New Authorization to Operate.** The following changes at a source that has been granted coverage under a general permit shall be made only after the source requests new authorization to operate from the Director:
 1. Adding new emissions units that require new authorization to operate,
 2. Installing replacement emissions units that require authorization to operate.
- C. **Facility Changes that Do Not Require Authorization to Operate.** The following changes at a source that has been granted coverage under a general permit shall be made only after the source provides notification to the Department:
 1. Adding new emissions units that do not require authorization to operate,
 2. Installing a replacement emissions unit with a higher capacity that does not require authorization to operate,
 3. Adding or replacing air pollution control equipment.
- D. A source that has been granted coverage under a general permit shall keep a record of any physical change or change in the method of operation that could affect emissions. The record shall include a description of the change and the date the change occurred.
- E. For sources that submit a request or notification under subsection (B) or (C), the applicant shall provide information identifying and describing the source, its processes, and operating

conditions in sufficient detail to allow the Director to determine continued qualification for, and to assure compliance with, the general permit. The Director shall act on a request for new authority to operate under a general permit as expeditiously as possible. The source may operate under the terms of the applicable general permit during that time.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-512 renumbered without change as Section R18-2-512 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-712 effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-513. Portable Sources Covered under a General Permit

- A. This Section applies to sources that have been granted coverage under a general permit that allows for the operation of a source at more than one location.
- B. General permits developed by the Director for portable sources shall contain conditions that assure compliance with all applicable requirements at all authorized locations.
- C. Owners and operators that hold multiple coverages under the same general permit:
 - 1. Shall have separate coverage under the general permit for each location at which each portable source operates.
 - 2. Until the Director notifies permittees of the availability of a web portal under R18-2-503(E), may move equipment between portable sources without obtaining a new authorization to operate. At no time shall an owner or operator move equipment to a portable source if the move would cause emissions from the portable source to exceed emission limitations in the general permit. Equipment from a portable source covered by one general permit shall not be moved to a portable source covered by a different general permit, unless the owner or operator obtains a new authorization to operate under the general permit covering the new location.
 - 3. After the Director notifies permittees of the availability of a web portal under R18-2-503(E), must use the portal to obtain authorizations to operate for each location at which the equipment will operate.
- D. A portable source that will operate for the duration of its permit solely in one county that has established a local air pollution control program pursuant to A.R.S. § 49-479 shall obtain a permit from that county. A portable source with a county permit shall not operate in any other county. A portable source that has been granted coverage under a general permit that subsequently obtains a county permit shall request that the Director terminate the coverage under the general permit. Upon issuance of the county permit, the coverage under the general permit issued by the Director is no longer valid.
- E. A portable source which has a county permit but proposes to operate outside that county may obtain coverage under a general permit from the Director. A portable source that has a permit issued by a county and obtains coverage under a general permit issued by the Director shall request that the county terminate the permit. Upon issuance of coverage under a general permit by the Director, the county permit is no longer valid. Before commencing operation in the new county, the source shall notify the Director and the control officer who has jurisdiction in the county that includes the new location according to subsection (F).

diction in the county that includes the new location according to subsection (F).

- F. A portable source granted coverage under a general permit may be transferred from one location to another provided that the owner or operator of the portable source notifies the Director and any control officer who has jurisdiction over the geographic area that includes the new location of the transfer prior to the transfer. The notification required under this subsection (shall) include:
 - 1. A description of the equipment to be transferred including the permit number and as appropriate the Authorization-to-Operate number for each piece of equipment;
 - 2. A description of the present location;
 - 3. A description of the new location;
 - 4. The date on which the equipment is to be moved;
 - 5. The date on which operation of the equipment will begin at the new location;
 - 6. A complete list of all equipment requiring authorization to operate that may be located at the new location; and
 - 7. Revised emissions calculations demonstrating that the equipment at the new location continues to qualify for the general permit under which the portable source has coverage.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (2) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-513 renumbered without change as Section R18-2-513 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-713 effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-514. General Permit Compliance Certification

- A. A compliance certification submitted by the owner or operator of a stationary source covered by a general permit shall be on a form provided by the Director and shall include the following information:
 - 1. The source's name, mailing address, contact person and contact person phone number, permit number, compliance reporting period, and physical address and location, if different than the mailing address.
 - 2. A certification of truth, accuracy, and completeness signed by the facility's responsible officer.
 - 3. Process information for the source, including design capacity, operations schedule, hours of operation, and total production.
 - 4. Method of documenting compliance and the status of compliance with all recordkeeping, reporting, monitoring, and testing requirements and all emission limitations and standards imposed in the permit.
- B. Upon notification from the Director of the availability of a web portal to complete and submit a compliance certification, the owner or operator shall complete and submit all compliance certifications through the portal.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-514 renumbered without change as Section R18-2-514 (Supp. 87-3).

87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-714 effective November 14, 1993 (Supp. 93-4). New Section made by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-515. Minor NSR in General Permits

- A. A general permit may include emission standards designed to assure that a stationary source covered by the permit will comply with minor new source review under R18-2-334(C). The emission standards may consist of any combination of the following:
1. Limits designed to assure that emissions from a stationary source that is a member of the class of facilities covered by the permit will not interfere with attainment or maintenance of a NAAQS.
 2. Limits imposing reasonably available control technology.
- B. Except as provided in subsection (C), if a general permit includes emission standards under subsection (A), then any stationary source that is a member of the class of facilities covered by the permit or any minor NSR modification to such a source may comply with R18-2-334 by obtaining coverage under the permit.
- C. An owner or operator seeking coverage under a general permit in order to obtain authorization to construct or make a minor NSR modification to a stationary source shall instead apply for an individual permit, if the Department determines there is reason to believe the source or modification could interfere with attainment or maintenance of any national ambient air quality standard. In making this determination, the Department:
1. Shall consider the factors in R18-2-334(E)(1) to (6).
 2. Shall consider whether the dispersion characteristics of the source are likely to result in higher ambient concentrations of a conventional pollutant than the modeling assumptions used to establish an emission standard under subsection (A)(1).
 3. May apply a screening model to the source's emissions.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Section R9-3-515 will be repealed and new Section R9-3-515 adopted effective following the adoption of Article 7. Nonferrous Smelter Orders, filed September 18, 1979 for public hearing (Supp. 79-5). Section R9-3-515 adopted effective May 14, 1979, amended effective October 2, 1979 (Supp. 79-5). Article 7. Nonferrous Smelter Orders adopted effective January 8, 1980. Section R9-3-515 filed September 18, 1979 for public hearing and effective following the adoption of Article 7 now amended and effective January 8, 1980 (Supp. 80-1). Amended as an emergency effective March 6, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-2). Emergency adoption effective March 6, 1980 now adopted and amended effective July 9, 1980. Amended subsection (C), paragraph (1) effective August 29, 1980 (Supp. 80-4). Amended as an emergency effective October 9, 1980, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 80-5). Former emergency adoption effective October 9, 1980, now adopted and amended effective June 19, 1981 (Supp. 81-3). Amended subsection (B), paragraph (1) effective February 2, 1982 (Supp. 82-1). Amended effective May 25, 1982 (Supp. 82-3). Amended subsections ((C)(3) and (C)(5) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-515 renumbered without change as Section R18-2-515 (Supp. 87-3). Section amended and subsections (C)(1)(h) through (C)(7)

renumbered to R18-2-515.01 and subsections (C)(8) through (C)(9) renumbered to R18-2-515.02 effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715 effective November 15, 1993 (Supp. 93-4). New Section made by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-515.01. Renumbered

Historical Note

Section R18-2-515.01 renumbered from R18-2-515(C)(1)(h) through (C)(7) and amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715.01 effective November 15, 1993 (Supp. 93-4).

R18-2-515.02. Renumbered

Historical Note

R18-2-515.02 renumbered from R18-2-515(C)(8) through (C)(9) and amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-715.02 effective November 15, 1993 (Supp. 93-4).

R18-2-516. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-4). Former Section R9-3-516 renumbered without change as Section R18-2-516 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-716 effective November 15, 1993 (Supp. 93-4).

R18-2-517. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (C), paragraph (1) (Supp. 80-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-517 renumbered without change as Section R18-2-517 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-2). Renumbered to R18-2-717 effective November 15, 1993 (Supp. 93-4).

R18-2-518. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended effective September 22, 1983 (Supp. 83-4). Former Section R9-3-518 renumbered without change as Section R18-2-518 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-718 effective November 15, 1993 (Supp. 93-4).

R18-2-519. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Editorial correction, subsection (A), paragraph (1) (Supp. 80-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-519 renumbered without change as Section R18-2-519 (Supp. 87-3). Amended effective September

26, 1990 (Supp. 90-3). Renumbered to R18-2-719 effective November 15, 1993 (Supp. 93-4).

R18-2-520. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Editorial correction, subsection (A), paragraph (1) (Supp. 80-2). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-520 renumbered without change as Section R18-2-520 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-720 effective November 15, 1993 (Supp. 93-4).

R18-2-521. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-521 renumbered without change as Section R18-2-521 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-721 effective November 15, 1993 (Supp. 93-4).

R18-2-522. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective May 28, 1982 (Supp. 82-3). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-522 renumbered without change as Section R18-2-522 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-722 effective November 15, 1993 (Supp. 93-4).

R18-2-523. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-523 renumbered without change as Section R18-2-523 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-2). Renumbered to R18-2-723 effective November 15, 1993 (Supp. 93-4).

R18-2-524. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended subsection (A) effective September 22, 1983 (Supp. 83-5). Former Section R9-3-524 renumbered without change as Section R18-2-524 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-724 effective November 15, 1993 (Supp. 93-4).

R18-2-525. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Editorial correction, subsection (B) (Supp. 79-6). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-525 renumbered without change as Section R18-2-525 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3).

3). Renumbered to R18-2-725 effective November 15, 1993 (Supp. 93-4).

R18-2-526. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-526 renumbered without change as Section R18-2-526 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-726 effective November 15, 1993 (Supp. 93-4).

R18-2-527. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-527 renumbered without change as Section R18-2-527 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-727 effective November 15, 1993 (Supp. 93-4).

R18-2-528. Renumbered

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Former Section R9-3-528 renumbered without change as Section R18-2-528 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-728 effective November 15, 1993 (Supp. 93-4).

R18-2-529. Renumbered

Historical Note

Adopted effective September 22, 1983 (Supp. 83-5). Former Section R9-3-529 renumbered without change as Section R18-2-529 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-729 effective November 15, 1993 (Supp. 93-4).

R18-2-530. Renumbered

Historical Note

Adopted effective September 26, 1990 (Supp. 90-3). Renumbered to R18-2-730 effective November 15, 1993 (Supp. 93-4).

ARTICLE 6. EMISSIONS FROM EXISTING AND NEW NONPOINT SOURCES

R18-2-601. General

For purposes of this Article, any source of air contaminants which due to lack of an identifiable emission point or plume cannot be considered a point source, shall be classified as a nonpoint source. In applying this criteria, such items as air-curtain destructors, heater-planners, and conveyor transfer points shall be considered to have identifiable plumes. Any affected facility subject to regulation under Article 7 of this Chapter or Title 18, Chapter 2, Article 9, shall not be subject to regulation under this Article.

Historical Note

Former Section R9-3-601 repealed, new Section R9-3-601 adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-601 renumbered without change as Section R18-2-601 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-601 renumbered to R18-2-801, new Section R18-2-601 renumbered from R18-2-401 and amended effective November 15, 1993 (Supp. 93-4). Section updated to reflect corrected citation reference (Supp. 08-1).

R18-2-602. Unlawful Open Burning

- A. In addition to the definitions contained in A.R.S. § 49-501, in this Section:
1. "Agricultural burning" means burning vegetative materials related to producing and harvesting crops and raising animals for the purpose of marketing for profit, or providing a livelihood, but does not include burning of household waste or prohibited materials. A person may conduct agricultural burns in fields, piles, ditch banks, fence rows, or canal laterals for purposes such as weed control, waste disposal, disease and pest prevention, or site preparation.
 2. "Approved waste burner" means an incinerator constructed of fire resistant material with a cover or screen that is closed when in use, and has openings in the sides or top no greater than one inch in diameter.
 3. "Class I Area" means any one of the Arizona mandatory federal Class I areas defined in A.R.S. § 49-401.01.
 4. "Construction burning" means burning wood or vegetative material from land clearing, site preparation, or fabrication, erection, installation, demolition, or modification of any buildings or other land improvements, but does not include burning household waste or prohibited material.
 5. "Dangerous material" means any substance or combination of substances that is capable of causing bodily harm or property loss unless neutralized, consumed, or otherwise disposed of in a controlled and safe manner.
 6. "Delegated authority" means any of the following:
 - a. A county, city, town, air pollution control district, or fire district that has been delegated authority to issue open burning permits by the Director under A.R.S. § 49-501(E); or
 - b. A private fire protection service provider that has been assigned authority to issue open burning permits by one of the authorities in subsection (A)(6)(a).
 7. "Director" means the Director of the Department of Environmental Quality, or designee.
 8. "Emission reduction techniques" means methods for controlling emissions from open outdoor fires to minimize the amount of emissions output per unit of area burned.
 9. "Flue," as used in this Section, means any duct or passage for air or combustion gases, such as a stack or chimney.
 10. "Household waste" means any solid waste including garbage, rubbish, and sanitary waste from a septic tank that is generated from households including single and multiple family residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas, but does not include construction debris, landscaping rubble, or demolition debris.
 11. "Independent authority to permit fires" means the authority of a county to permit fires by a rule adopted under Arizona Revised Statutes, Title 49, Chapter 3, Article 3, and includes only Maricopa, Pima, and Pinal counties.
 12. "Open outdoor fire or open burning" means the combustion of material of any type, outdoors and in the open, where the products of combustion are not directed through a flue. Open outdoor fires include agricultural, residential, prescribed, and construction burning, and fires using air curtain destructors.
 13. "Prohibited materials" means nonpaper garbage from the processing, storage, service, or consumption of food; chemically treated wood; lead-painted wood; linoleum flooring, and composite counter-tops; tires; explosives or ammunition; oleanders; asphalt shingles; tar paper; plastic and rubber products, including bottles for household chemicals; plastic grocery and retail bags; waste petroleum products, such as waste crankcase oil, transmission oil, and oil filters; transformer oils; asbestos; batteries; anti-freeze; aerosol spray cans; electrical wire insulation; thermal insulation; polyester products; hazardous waste products such as paints, pesticides, cleaners and solvents, stains and varnishes, and other flammable liquids; plastic pesticide bags and containers; and hazardous material containers including those that contained lead, cadmium, mercury, or arsenic compounds.
 14. "Residential burning" means open burning of vegetative materials conducted by or for the occupants of residential dwellings, but does not include burning household waste or prohibited material.
 15. "Prescribed burning" has the same meaning as in R18-2-1501.
- B. Unlawful open burning. Notwithstanding any other rule in this Chapter, a person shall not ignite, cause to be ignited, permit to be ignited, allow, or maintain any open outdoor fire in a county without independent authority to permit fires except as provided in A.R.S. § 49-501 and this Section.
- C. Open outdoor fires exempt from a permit. The following fires do not require an open burning permit from the Director or a delegated authority:
1. Fires used only for:
 - a. Cooking of food,
 - b. Providing warmth for human beings,
 - c. Recreational purposes,
 - d. Branding of animals,
 - e. Orchard heaters for the purpose of frost protection in farming or nursery operations, and
 - f. The proper disposal of flags under 4 U.S.C. 1, § 8.
 2. Any fire set or permitted by any public officer in the performance of official duty, if the fire is set or permission given for the following purpose:
 - a. Control of an active wildfire; or
 - b. Instruction in the method of fighting fires, except that the person setting these fires must comply with the reporting requirements of subsection (D)(3)(f).
 3. Fire set by or permitted by the Director of Department of Agriculture for the purpose of disease and pest prevention in an organized, area-wide control of an epidemic or infestation affecting livestock or crops.
 4. Prescribed burns set by or assisted by the federal government or any of its departments, agencies, or agents, or the state or any of its agencies, departments, or political subdivisions, regulated under Article 15 of this Chapter.
- D. Open outdoor fires requiring a permit.
1. The following open outdoor fires are allowed with an open burning permit from the Director or a delegated authority:
 - a. Construction burning;
 - b. Agricultural burning;
 - c. Residential burning;
 - d. Prescribed burns conducted on private lands without the assistance of a federal or state land manager as defined under R18-2-1501;
 - e. Any fire set or permitted by a public officer in the performance of official duty, if the fire is set or permission given for the purpose of weed abatement, or the prevention of a fire hazard, unless the fire is exempt from the permit requirement under subsection (C)(3);
 - f. Open outdoor fires of dangerous material under subsection (E);
 - g. Open outdoor fires of household waste under subsection (F); and

- h. Open outdoor fires that use an air curtain destructor, as defined in R18-2-101.
- 2. A person conducting an open outdoor fire in a county without independent authority to permit fires shall obtain a permit from the Director or a delegated authority unless exempted under subsection (C). Permits may be issued for a period not to exceed one year. A person shall obtain a permit by completing an ADEQ-approved application form.
- 3. Open outdoor fire permits issued under this Section shall include:
 - a. A list of the materials that the permittee may burn under the permit;
 - b. A means of contacting the permittee authorized by the permit to set an open fire in the event that an order to extinguish the open outdoor fire is issued by the Director or the delegated authority;
 - c. A requirement that burns be conducted during the following periods, unless otherwise waived or directed by the Director on a specific day basis:
 - i. Year-round: ignite fire no earlier than one hour after sunrise; and
 - ii. Year-round: extinguish fire no later than two hours before sunset;
 - d. A requirement that the permittee conduct all open burning only during atmospheric conditions that:
 - i. Prevent dispersion of smoke into populated areas;
 - ii. Prevent visibility impairment on traveled roads or at airports that result in a safety hazard;
 - iii. Do not create a public nuisance or adversely affect public safety;
 - iv. Do not cause an adverse impact to visibility in a Class I area; and
 - v. Do not cause uncontrollable spreading of the fire;
 - e. A list of the types of emission reduction techniques that the permittee shall use to minimize fire emissions.;
 - f. A reporting requirement that the permittee shall meet by providing the following information in a format provided by the Director for each date open burning occurred, on either a daily basis on the day of the fire, or an annual basis in a report to the Director or delegated authority due on March 31 for the previous calendar year:
 - i. The date of each burn;
 - ii. The type and quantity of fuel burned for each date open burning occurred;
 - iii. The fire type, such as pile or pit, for each date open burning occurred; and
 - iv. For each date open burning occurred, the legal location, to the nearest section, or latitude and longitude, to the nearest degree minute, or street address for residential burns;
 - g. A requirement that the person conducting the open burn notify the local fire-fighting agency or private fire protection service provider, if the service provider is a delegated authority, before burning. If neither is in existence, the person conducting the burn shall notify the state forester.;
 - h. A requirement that the permittee start each open outdoor fire using items that do not cause the production of black smoke;
 - i. A requirement that the permittee attend the fire at all times until it is completely extinguished;
 - j. A requirement that the permittee provide fire extinguishing equipment on-site for the duration of the burn;
 - k. A requirement that the permittee ensure that a burning pit, burning pile, or approved waste burner be at least 50 feet from any structure;
 - l. A requirement that the permittee have a copy of the burn permit on-site during open burning;
 - m. A requirement that the permittee not conduct open burning when an air stagnation advisory, as issued by the National Weather Service, is in effect in the area of the burn or during periods when smoke can be expected to accumulate to the extent that it will significantly impair visibility in Class I areas;
 - n. A requirement that the permittee not conduct open burning when any stage air pollution episode is declared under R18-2-220;
 - o. A statement that the Director, or any other public officer, may order that the burn be extinguished or prohibit burning during periods of inadequate smoke dispersion, excessive visibility impairment, or extreme fire danger; and
 - p. A list of the activities prohibited and the criminal penalties provided under A.R.S. § 13-1706.
- 4. The Director or a delegated authority shall not issue an open burning permit under this Section:
 - a. That would allow burning prohibited materials other than under a permit for the burning of dangerous materials;
 - b. If the applicant has applied for a permit under this Section to burn a dangerous material which is also hazardous waste under 40 CFR 261, but does not have a permit to burn hazardous waste under 40 CFR 264, or is not an interim status facility allowed to burn hazardous waste under 40 CFR 265; or
 - c. If the burning would occur at a solid waste facility in violation of 40 CFR 258.24 and the Director has not issued a variance under A.R.S. § 49-763.01.
- E. Open outdoor fires of dangerous material. A fire set for the disposal of a dangerous material is allowed by the provisions of this Section, when the material is too dangerous to store and transport, and the Director has issued a permit for the fire. A permit issued under this subsection shall contain all provisions in subsection (D)(3) except for subsections (D)(3)(e) and (D)(3)(f). The Director shall permit fires for the disposal of dangerous materials only when no safe alternative method of disposal exists, and burning the materials does not result in the emission of hazardous or toxic substances either directly or as a product of combustion in amounts that will endanger health or safety.
- F. Open outdoor fires of household waste. An open outdoor fire for the disposal of household waste is allowed by provisions of this Section when permitted in writing by the Director or a delegated authority. A permit issued under this subsection shall contain all provisions in subsection (D)(3) except for subsections (D)(3)(e) and (D)(3)(f). The permittee shall conduct open outdoor fires of household waste in an approved waste burner and shall either:
 - 1. Burn household waste generated on-site on farms or ranches of 40 acres or more where no household waste collection or disposal service is available; or
 - 2. Burn household waste generated on-site where no household waste collection and disposal service is available and where the nearest other dwelling unit is at least 500 feet away.

- G.** Permits issued by a delegated authority. The Director may delegate authority for the issuance of open burning permits to a county, city, town, air pollution control district, or fire district. A delegated authority may not issue a permit for its own open burning activity. The Director shall not delegate authority to issue permits to burn dangerous material under subsection (E). A county, city, town, air pollution control district, or fire district with delegated authority from the Director may assign that authority to one or more private fire protection service providers that perform fire protection services within the county, city, town, air pollution control district, or fire district. A private fire protection provider shall not directly or indirectly condition the issuance of open burning permits on the applicant being a customer. Permits issued under this subsection shall comply with the requirements in subsection (D)(3) and be in a format prescribed by the Director. Each delegated authority shall:
1. Maintain a copy of each permit issued for the previous five years available for inspection by the Director;
 2. For each permit currently issued, have a means of contacting the person authorized by the permit to set an open fire if an order to extinguish open burning is issued; and
 3. Annually submit to the Director by May 15 a record of daily burn activity, excluding household waste burn permits, on a form provided by the Director for the previous calendar year containing the information required in subsections (D)(3)(e) and (D)(3)(f).
- H.** The Director shall hold an annual public meeting for interested parties to review operations of the open outdoor fire program and discuss emission reduction techniques.
- I.** Nothing in this Section is intended to permit any practice that is a violation of any statute, ordinance, rule, or regulation.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective October 2, 1979 (Supp. 79-5). Correction, subsection (C) repealed effective October 2, 1979, not shown (Supp. 80-1). Former Section R9-3-602 renumbered without change as Section R18-2-602 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-602 renumbered to R18-2-802, new Section R18-2-602 renumbered from R18-2-401 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-603. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-603 renumbered without change as Section R18-2-603 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-603 renumbered to R18-2-803, new Section R18-2-603 renumbered from R18-2-403 effective November 15, 1993 (Supp. 93-4). Repealed effective October 8, 1996 (Supp. 96-4).

R18-2-604. Open Areas, Dry Washes, or Riverbeds

- A.** No person shall cause, suffer, allow, or permit a building or its appurtenances, or a building or subdivision site, or a driveway, or a parking area, or a vacant lot or sales lot, or an urban or suburban open area to be constructed, used, altered, repaired, demolished, cleared, or leveled, or the earth to be moved or excavated, without taking reasonable precautions to limit excessive amounts of particulate matter from becoming airborne. Dust and other types of air contaminants shall be kept to a minimum by good modern practices such as using an

approved dust suppressant or adhesive soil stabilizer, paving, covering, landscaping, continuous wetting, detouring, barring access, or other acceptable means.

- B.** No person shall cause, suffer, allow, or permit a vacant lot, or an urban or suburban open area, to be driven over or used by motor vehicles, trucks, cars, cycles, bikes, or buggies, or by animals such as horses, without taking reasonable precautions to limit excessive amounts of particulates from becoming airborne. Dust shall be kept to a minimum by using an approved dust suppressant, or adhesive soil stabilizer, or by paving, or by barring access to the property, or by other acceptable means.
- C.** No person shall operate a motor vehicle for recreational purposes in a dry wash, riverbed or open area in such a way as to cause or contribute to visible dust emissions which then cross property lines into a residential, recreational, institutional, educational, retail sales, hotel or business premises. For purposes of this subsection “motor vehicles” shall include, but not be limited to trucks, cars, cycles, bikes, buggies and 3-wheelers. Any person who violates the provisions of this subsection shall be subject to prosecution under A.R.S. § 49-463.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-604 renumbered without change as Section R18-2-604 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-604 renumbered to R18-2-804, new Section R18-2-604 renumbered from R18-2-404 and amended effective November 15, 1993 (Supp. 93-4).

R18-2-605. Roadways and Streets

- A.** No person shall cause, suffer, allow or permit the use, repair, construction or reconstruction of a roadway or alley without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne. Dust and other particulates shall be kept to a minimum by employing temporary paving, dust suppressants, wetting down, detouring or by other reasonable means.
- B.** No person shall cause, suffer, allow or permit transportation of materials likely to give rise to airborne dust without taking reasonable precautions, such as wetting, applying dust suppressants, or covering the load, to prevent particulate matter from becoming airborne. Earth or other material that is deposited by trucking or earth moving equipment shall be removed from paved streets by the person responsible for such deposits.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Former Section R9-3-605 renumbered without change as Section R18-2-605 (Supp. 87-3). Amended effective September 26, 1990 (Supp. 90-3). Former Section R18-2-605 renumbered to R18-2-805, new Section R18-2-605 renumbered from R18-2-405 effective November 15, 1993 (Supp. 93-4).

R18-2-606. Material Handling

No person shall cause, suffer, allow or permit crushing, screening, handling, transporting or conveying of materials or other operations likely to result in significant amounts of airborne dust without taking reasonable precautions, such as the use of spray bars, wetting agents, dust suppressants, covering the load, and hoods to prevent excessive amounts of particulate matter from becoming airborne.

Historical Note

Section R18-2-606 renumbered from R18-2-406 effective November 15, 1993 (Supp. 93-4).

R18-2-607. Storage Piles

- A. No person shall cause, suffer, allow, or permit organic or inorganic dust producing material to be stacked, piled, or otherwise stored without taking reasonable precautions such as chemical stabilization, wetting, or covering to prevent excessive amounts of particulate matter from becoming airborne.
- B. Stacking and reclaiming machinery utilized at storage piles shall be operated at all times with a minimum fall of material and in such manner, or with the use of spray bars and wetting agents, as to prevent excessive amounts of particulate matter from becoming airborne.

Historical Note

Section R18-2-607 renumbered from R18-2-407 effective November 15, 1993 (Supp. 93-4).

R18-2-608. Mineral Tailings

No person shall cause, suffer, allow, permit construction of, or otherwise own or operate, mineral tailing piles without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne. Reasonable precautions shall mean wetting, chemical stabilization, revegetation or such other measures as are approved by the Director.

Historical Note

Section R18-2-608 renumbered from R18-2-408, new Section R18-2-408 adopted effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 228, effective March 7, 2009 (Supp. 09-1).

R18-2-609. Agricultural Practices

A person shall not cause, suffer, allow, or permit the performance of agricultural practices outside the Phoenix and Yuma planning areas, as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210, including tilling of land and application of fertilizers without taking reasonable precautions to prevent excessive amounts of particulate matter from becoming airborne.

Historical Note

Section R18-2-609 renumbered from R18-2-409 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Amended by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2).

R18-2-610. Definitions for R18-2-610.01, R18-2-610.02, and R18-2-610.03

The definitions in R18-2-101 and the following definitions apply to R18-2-610.01, R18-2-610.02, and R18-2-610.03:

1. "Access restriction" means reducing PM emissions by reducing the number of trips driven on agricultural aprons and access roads by restricting or eliminating public access to noncropland or commercial farm roads with signs or physical obstruction at locations that effectively control access to the area.
2. "Aggregate cover" means reducing PM emissions and wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to noncropland or commercial farm roads. The aggregate should be clean, hard and durable, and should be applied and maintained to a depth sufficient to reduce PM emissions.
3. "Area A" means the area delineated according to A.R.S. § 49-541(1).
4. "Best management practice" (BMP) means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM emissions from a regulated agricultural activity.

5. "Cessation of Night Tilling" means the discontinuation of tillage from sunset to sunrise on a day identified by the Maricopa or Pinal County Dust Control Forecast as being high risk of dust generation.
6. "Chemical irrigation" means reducing a minimum of one ground operation across a commercial farm by applying a fertilizer, pesticide, or other agricultural chemical to cropland through an irrigation system, which reduces soil disturbance and increases efficiency of application.
7. "Chips/ mulches" means reducing PM emissions and soil movement and preserving soil moisture by applying and maintaining nontoxic chemical or organic dust suppressants to a depth sufficient to reduce PM emissions. Materials shall meet all specifications required by federal, state, or local water agencies, and is not prohibited for use by any applicable regulations.
8. "Combining tractor operations" means reducing soil compaction and a minimum of one tillage or ground operation across a commercial farm by using a tractor, implement, harvester, or other farming support vehicle to perform two or more tillage, cultivation, planting, or harvesting operations at the same time. If Equipment modification is also chosen as a BMP, and uses the same practices as described in this BMP, this action is considered one BMP.
9. "Commercial farm" means 10 or more contiguous acres of land used for agricultural purposes within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
10. "Commercial farm road" means a road that is unpaved, owned by a commercial farmer, and is used exclusively to service a commercial farm.
11. "Commercial farmer" means an individual, entity, or joint operation in general control of a commercial farm.
12. "Committee" means the Governor's Agricultural Best Management Practices Committee as established by A.R.S. § 49-457.
13. "Conservation Tillage" means a tillage system that reduces a minimum of three tillage operations. This system reduces soil and water loss by planting into existing plant stubble on the field after harvest as well as managing the stubble so that it remains intact during the planting season.
14. "Cover crop" means establishing cover crops that maintain a minimum of 60 percent ground cover. Native or volunteer vegetation that meets the minimum ground cover requirement is acceptable. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
15. "Critical area planting" means reducing PM₁₀ emissions and wind erosion by planting trees, shrubs, vines, grasses, or other vegetative cover on noncropland in order to maintain at least 60 percent ground cover. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
16. "Cropland" means land on a commercial farm that:
 - a. Is within the time-frame of final harvest to plant emergence, but does not include tillage activities;

- b. Has been tilled in a prior year and is suitable for crop production, but is currently fallow; or
 - c. Is a turn-row.
17. "Cross-wind ridges" means stabilizing soil and reducing PM emissions and wind erosion by creating soil ridges in a commercial farm by tillage or planting operations. Ridges should be at least four inches in height, and be aligned as perpendicular as possible to the prevailing wind direction.
 18. "Dust Control Forecast" means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
 - a. Projected meteorological conditions, including:
 - i. Wind speed and direction,
 - ii. Stagnation,
 - iii. Recent precipitation, and
 - iv. Potential for precipitation;
 - b. Existing concentrations of air pollution at the time of the forecast; and
 - c. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
 19. "Equipment modification" means reducing PM emissions and soil erosion during tillage or ground operations by modifying and maintaining an existing piece of agricultural equipment, installing shielding equipment, modifying land planting and land leveling, matching the equipment to row spacing, or grafting to new varieties or technological improvements. If combining tractor operations is also chosen as a BMP, and uses the same practices as described in this BMP, this action is considered one BMP.
 20. "Fallow Field" means an area of land that is routinely cultivated, planted and harvested and is unplanted for one or more growing seasons or planting cycles, but is intended to be placed back in agricultural production.
 21. "Field Capacity" means the amount of water remaining in the soil two days after having been saturated and after free drainage has ceased.
 22. "Forage Crop" means a product grown for consumption by any domestic animal.
 23. "Genetically Modified" (GMO) means a living organism whose genetic material has been altered, changing one or more of its characteristics.
 24. "GPS: Global Position Satellite System" means using a satellite navigation system on farm equipment to calculate position in the field.
 25. "Green chop" means reducing soil compaction, soil disturbance and a minimum of one ground operation across a commercial farm by harvesting a Forage Crop without allowing it to dry in the field.
 26. "Ground operation" means an agricultural operation that is not a tillage operation, which involves equipment passing across the field. A ground operation includes harvest activities. A pass through the field may be a subset of a ground operation.
 27. "Harvest" means the time after planting up through harvest, including gathering mature crops from a commercial farm, as well as all actions taken immediately after crop removal, such as cooling, sorting, cleaning, and packing.
 28. "Integrated Pest Management" means reducing soil compaction and a minimum of one ground operation across a commercial farm for spraying by using a combination of techniques including organic, conventional, and biological farming practices to suppress pest problems.
 29. "Limited harvest activity" means performing no ground operations on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation.
 30. "Limited tillage activity" means performing no tillage operations on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation.
 31. "Maricopa PM nonattainment area" means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
 32. "Multi-year crop" means reducing PM emissions from wind erosion and a minimum of one tillage and ground operation across a commercial farm, by protecting the soil surface by growing a crop, pasture, or orchard that is grown, or will be grown, on a continuous basis for more than one year.
 33. "Noncropland" means any commercial farm land that:
 - a. Is no longer used for agricultural production;
 - b. Is no longer suitable for production of crops;
 - c. Is subject to a restrictive easement or contract that prohibits use for the production of crops; or
 - d. Includes a ditch, ditch bank, equipment yard, storage yard, or well head.
 34. "NRCS" means the Natural Resource Conservation Service.
 35. "Organic material cover" means reducing PM emissions and wind erosion and preserving soil moisture by applying and maintaining cover material such as animal waste or plant residue, to a soil surface to reduce soil movement. Material shall be evenly applied and maintained to a depth sufficient to reduce PM emissions and coverage should be a minimum of 70 percent.
 36. "Permanent cover" means reducing PM emissions and wind erosion by maintaining a long-term perennial vegetative cover on cropland that is temporarily not producing a major crop. Perennial species such as grasses and/or legumes shall be used to establish at least 60 percent cover. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
 37. "Pinal County PM Nonattainment Area" means the West Pinal PM₁₀ planning area and the West Central PM_{2.5} planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
 38. "Plant stubble" means stubble on the soil surface, which insulates soil to reduce evaporation of moisture, and also protects the soil from wind and water erosion.
 39. "Planting based on soil moisture" means reducing PM emissions and wind erosion by applying water or having enough moisture in the soil to germinate the seed prior to planting. Soil must have a minimum soil moisture content of 60% of field capacity at planting depth. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions).
 40. "PM" includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a

- nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
41. "Precision Farming" means reducing the number of passes across a commercial farm by at least 12 inches per pass by using GPS to precisely guide farm equipment in the field.
 42. "Reduce vehicle speed" means reducing PM emissions and soil erosion from the operation of farm vehicles or farm equipment on noncropland or commercial farm roads at speeds not to exceed 15. This can be achieved through installation of engine speed governors, signage, or speed control devices.
 43. "Reduced harvest activity" means reducing soil disturbance, soil and water loss, and the number of mechanical harvest passes by a minimum of one ground operation across a commercial farm, by means other than equipment modification or combining tractor operations.
 44. "Reduced tillage system" means reducing soil disturbance, soil and water loss, by using a single piece of equipment that reduces a minimum of three tillage operations, by means other than equipment modification or combining tractor operations.
 45. "Regulated agricultural activity" means a regulated agricultural activity as defined in A.R.S. § 49-457(P)(1)(a) through (P)(1)(d).
 46. "Regulated area" means the regulated area as defined in A.R.S. § 49-457(P)(6).
 47. "Residue management" means reducing PM emissions and wind erosion by maintaining a minimum of 60 percent ground cover of crop and other plant residues on a soil surface between the time of harvest of one crop and the commencement of tillage for a new crop. Compliance shall be determined by the Line Transect Test Method, NRCS National Agronomy Manual, Subpart 503.51, Estimating Crop Residue Cover, amended through February 2011 (and no future editions).
 48. "Sequential cropping" means reducing PM emissions and wind erosion by growing crops in a sequence or close rotation that limits the amount of time bare soil is exposed on a commercial farm to 30 days or less.
 49. "Shuttle System/Larger Carrier" means reducing one out of every four trips across a commercial farm by using multiple or larger bins/trailers to haul commodity from the field.
 50. "Significant Agricultural Earth Moving Activities" means either leveling activities conducted on a commercial farm that disturb the soil more than 4 inches below the surface, or the creation, maintenance and relocation of: ditches, canals, ponds, irrigation lines, tailwater recovery systems (agricultural sumps) and other water conveyances, not to include activities performed on cropland for tillage, ground operations or harvest.
 51. "Silt content test method" means the test method as described in Appendix 2.
 52. "Stabilization of soil prior to plant emergence" means reducing PM emissions by applying water to soil prior to crop emergence in order to cause the soil to form a visible crust.
 53. "Surface roughening" means reducing PM emissions or wind erosion by manipulating a soil surface by means such as rough discing or tillage in order to produce or maintain clods on the land surface. Compliance shall be determined by NRCS Practice Code 609, Surface Roughening, amended through November 2008 (and no future editions).
 54. "Synthetic particulate suppressant" means reducing PM emissions and wind erosion by providing a stabilized soil surface on noncropland or commercial farm roads with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
 55. "Tillage" means any mechanical practice that physically disturbs the soil, and includes preparation for planting, such as plowing, ripping, or discing.
 56. "Tillage based on soil moisture" means reducing PM emissions by irrigating fields to the depth of the proposed cut prior to soil disturbances or conducting tillage to coincide with precipitation. Soil must have a minimum soil moisture content of 40-60% of field capacity at planting depth. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions).
 57. "Timing of a tillage operation" means reducing wind erosion and PM emissions by performing tillage operations that minimize the amount of time within 45 days.
 58. "Tillage operation" means an agricultural operation that mechanically manipulates the soil for the enhancement of crop production. Examples include discing or bedding. A pass through the field may be a subset of a tillage operation.
 59. "Track-out control system" means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment from noncropland or commercial farm roads or and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
 60. "Transgenic Crops" means reducing a minimum of one tillage or ground operation, the number of chemical spray applications, or soil disturbances by using plants that are genetically modified.
 61. "Transplanting" means reducing a minimum of one ground operation across a commercial farm and minimizing soil disturbance by utilizing plants already in a growth state as compared to seeding.
 62. "VDT" (Vehicle trips per day) means trips per day made by one vehicle, in one direction.
 63. "Watering" means reducing PM emissions and wind erosion by applying water to noncropland or commercial farm road bare soil surfaces during periods of high traffic until the surfaces are visibly moist.
 64. "Watering on a high risk day" means reducing PM emissions and wind erosion by applying water to commercial farm road bare soil surfaces until the surfaces are visibly moist, on a day forecast to be high risk for dust generation by the Maricopa or Pinal County Dust Control Forecast.
 65. "Wind barrier" means reducing PM emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For

vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Wind-break/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).

Historical Note

Former Section R18-2-610 renumbered to R18-2-612; new Section R18-2-610 adopted by final rulemaking at 6

A.A.R. 2009, effective May 12, 2000 (Supp. 00-2).

Amended by exempt rulemaking at 13 A.A.R. 4326, effective November 14, 2007 (Supp. 07-4). Amended by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4). Subsection (A) corrected at the request of the Department, Office File No. M12-133, filed April 5, 2012 (Supp. 11-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-610.01. Agricultural PM General Permit for Crop Operations; Maricopa County PM Nonattainment Area

- A.** A commercial farmer within the Maricopa County PM Nonattainment Area shall implement at least two best management practices from each category to reduce PM emissions.
- B.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions during tillage, harvest or ground operation activities:
 1. Chemical irrigation,
 2. Combining tractor operations,
 3. Equipment modification,
 4. Green Chop,
 5. Integrated Pest Management,
 6. Limited harvest activity,
 7. Limited tillage activity,
 8. Multi-year crop,
 9. Cessation of Night Tilling,
 10. Planting based on soil moisture,
 11. Precision Farming,
 12. Reduced harvest activity,
 13. Reduced tillage system,
 14. Tillage based on soil moisture,
 15. Timing of a tillage operation,
 16. Transgenic Crops,
 17. Transplanting,
 18. Shuttle System/Larger Carrier, or
 19. Conservation Tillage.
- C.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from noncropland and commercial farm roads:
 1. Access restriction,
 2. Aggregate cover,
 3. Wind barrier,
 4. Critical area planting,
 5. Organic material cover,
 6. Reduce vehicle speed,
 7. Synthetic particulate suppressant,
 8. Track-out control system, or
 9. Watering.
- D.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from cropland:
 1. Wind barrier,
 2. Cover crop,
 3. Cross-wind ridges,
 4. Chips/mulches,
 5. Multi-year crop,
 6. Permanent cover,
 7. Stabilization of soil prior to plant emergence,
 8. Residue management,
 9. Sequential cropping, or
 10. Surface roughening.
- E.** A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
 1. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 2. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 3. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
 4. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- F.** From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete and maintain a Best Management Practices Program General Permit Record Form demonstrating compliance with this Section. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
 1. The name of the commercial farmer, signature, and date signed;
 2. The mailing address or physical address of the commercial farm; and
 3. The best management practices selected for tillage, harvest, and ground operation activities, cropland, noncropland and commercial farm roads, and significant earth moving activities (if applicable).
- G.** Records of any changes to the Best Management Practices identified in the most recently submitted Best Management Practices Program General Permit Record Form shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- H.** A person may develop different practices to control PM emissions not contained in subsections (B), (C), (D), or (E) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I.** A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.

- J. The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM₁₀ general permit.
- K. A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- L. The Director shall document noncompliance with this Section before issuing a compliance order.
- M. A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4).

Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-610.02. Agricultural PM General Permit for Crop Operations; Moderate PM Nonattainment Areas, Designated After June 1, 2009

- A. A commercial farmer within a PM Moderate Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each category to reduce PM emissions.
- B. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions during tillage, harvest and ground operation activities:
 - 1. Chemical irrigation,
 - 2. Combining tractor operations,
 - 3. Equipment modification,
 - 4. Green Chop,
 - 5. Integrated Pest Management,
 - 6. Limited harvest activity,
 - 7. Limited tillage activity,
 - 8. Multi-year crop,
 - 9. Cessation of Night Tilling,
 - 10. Planting based on soil moisture,
 - 11. Precision Farming,
 - 12. Reduced harvest activity,
 - 13. Reduced tillage system,
 - 14. Tillage based on soil moisture,
 - 15. Timing of a tillage operation,
 - 16. Transgenic Crops,
 - 17. Transplanting, or
 - 18. Shuttle System/Larger Carrier, or
 - 19. Conservation Tillage.
- C. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from noncropland and commercial farm roads:
 - 1. Access restriction,
 - 2. Aggregate cover,
 - 3. Wind barrier,
 - 4. Critical area planting,
 - 5. Organic material cover,
 - 6. Reduce vehicle speed,
 - 7. Synthetic particulate suppressant,
 - 8. Track-out control system, or
 - 9. Watering.
- D. A commercial farmer shall implement from the following best management practices, as described in subsection (A), to reduce PM emissions from cropland:
 - 1. Wind barrier,
 - 2. Cover crop,
 - 3. Cross-wind ridges,
 - 4. Chips/mulches,
 - 5. Multi-year crop,
 - 6. Permanent cover,
 - 7. Stabilization of soil prior to plant emergence,
 - 8. Residue management,
 - 9. Sequential cropping, or
 - 10. Surface roughening.
- E. A commercial farmer shall implement from the following best management practices, as described in subsection (A), when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
 - 1. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 - 2. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 - 3. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
 - 4. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- F. From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete and maintain a Best Management Practices Program General Permit Record Form demonstrating compliance with this Section. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
 - 1. The name of the commercial farmer, signature, and date signed;
 - 2. The mailing address or physical address of the commercial farm; and
 - 3. The best management practice selected for tillage, harvest and ground operation activities, cropland, noncropland and commercial farm roads, and significant earth moving activities (if applicable).
- G. Records of any changes to the Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- H. A person may develop different practices to control PM emissions not contained in subsections (B), (C), (D), or (E) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I. A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Pro-

gram General Permit Record Form to confirm implementation of each best management practice.

- J. The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM general permit.
- K. A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- L. The Director shall document noncompliance with this Section before issuing a compliance order.
- M. A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-610.03. Agricultural PM General Permit for Crop Operations; Pinal County PM Nonattainment Area

- A. On the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of best management practices as described in sections (B)(1)(b), (B)(2)(b), (B)(3)(b), (B)(4)(b), and (B)(5)(b).
- B. On all days, a commercial farmer shall implement at least one best management practice from each category to reduce PM emissions, as described below in subsections (1)(a), (2)(a), (3)(a), (4)(a), and (6), and at least two best management practices from subsection (5)(a). If a commercial farmer implements the Conservation tillage or Reduced tillage system best management practice for the tillage category, they do not have to implement a best management practice from the subsections (2)(a), (2)(b), (5)(a) and (5)(b).
 - 1. Tillage:
 - a. A commercial farmer shall implement at least one of the following:
 - i. Combining tractor operations,
 - ii. Equipment modification,
 - iii. Multi-year crop,
 - iv. Cessation of night tilling,
 - v. Planting based on soil moisture,
 - vi. Precision farming,
 - vii. Tillage based on soil moisture,
 - viii. Timing of a tillage operation,
 - ix. Transgenic crops,
 - x. Transplanting,
 - xi. Reduced tillage system, or
 - xii. Conservation tillage.
 - b. Unless choosing limited tillage activity (subsection iv, below), on the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
 - i. Multi-year crop,
 - ii. Planting based on soil moisture,
 - iii. Tillage based on soil moisture,
 - iv. Limited tillage activity,
 - v. Reduced tillage system, or
 - vi. Conservation tillage.
 - 2. Ground Operations and Harvest:
 - a. A commercial farmer shall implement at least one of the following:
 - i. Combining tractor operations,
 - ii. Equipment modification,
 - iii. Chemical irrigation,

- iv. Green chop,
 - v. Integrated pest management,
 - vi. Multi-year crop,
 - vii. Precision farming,
 - viii. Reduced harvest activity,
 - ix. Transgenic crops, or
 - x. Shuttle System/Larger Carrier.
 - b. Unless choosing limited harvest activity (subsection iv, below), on the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
 - i. Green chop,
 - ii. Integrated pest management,
 - iii. Multi-year crop, or
 - iv. Limited harvest activity.
- 3. Noncropland:
 - a. A commercial farmer shall implement at least one of the following best management practices:
 - i. Access restriction,
 - ii. Aggregate cover,
 - iii. Wind barrier,
 - iv. Critical area planting,
 - v. Organic material cover,
 - vi. Reduce vehicle speed,
 - vii. Synthetic particulate suppressant, or
 - viii. Watering.
 - b. Unless choosing watering on a high risk day (subsection vi, below), on the day before and during a day forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, on a non-cropland area that experiences more than 20 VDT from 2 or more axle vehicles, commercial farmer shall ensure implementation of at least one of the following best management practices:
 - i. Aggregate cover,
 - ii. Wind barrier,
 - iii. Critical area planting,
 - iv. Organic material cover,
 - v. Synthetic particulate suppressant, or
 - vi. Watering on a high risk day.
 - 4. Commercial farm roads:
 - a. A commercial farmer shall implement at least one of the following best management practices:
 - i. Access restriction,
 - ii. Reduce vehicle speed,
 - iii. Track-out control system,
 - iv. Aggregate cover,
 - v. Synthetic particulate suppressant,
 - vi. Watering, or,
 - vii. Organic material cover.
 - b. Unless choosing watering on a high risk day (subsection vi, below), on the day before and during a day forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, on a road that experiences more than 20 VDT from 2 or more axle vehicles, a commercial farmer shall ensure implementation of at least one of the following best management practices:
 - i. Aggregate cover,
 - ii. Synthetic particulate suppressant,
 - iii. Wind barrier,
 - iv. Organic material cover,
 - v. Roads are stabilized as determined by the silt content test method,

- vi. Watering on a high risk day.
- 5. Cropland:
 - a. A commercial farmer shall implement at least two of the following best management practices, one from subsection (i) through (vii), and one from subsection (viii) through (xi), to reduce PM emissions from cropland:
 - i. Wind barrier,
 - ii. Cover crop,
 - iii. Cross-wind ridges,
 - iv. Chips/mulches,
 - v. Sequential cropping
 - vi. Residue management,
 - vii. Surface roughening,
 - viii. Multi-year crop,
 - ix. Permanent cover, or
 - x. Stabilization of soil prior to plant emergence.
 - b. On the day before and during the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, a commercial farmer shall ensure implementation of at least one of the following:
 - i. Wind barrier,
 - ii. Cover crop,
 - iii. Cross-wind ridges,
 - iv. Chips/mulches,
 - v. Surface roughening,
 - vi. Multi-year crop,
 - vii. Permanent cover,
 - viii. Stabilization of soil prior to plant emergence, or
 - ix. Residue management.
- 6. A commercial farmer shall implement at least one of the following best management practices, when conducting Significant Agricultural Earth Moving Activities as defined in R18-2-610:
 - a. Apply water prior to conducting Significant Agricultural Earth Moving Activities and/or time Significant Agricultural Earth Moving Activities to coincide with precipitation. Soil must have a minimum soil moisture content of 50% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 - b. Apply water during Significant Agricultural Earth Moving Activities. Soil must have a minimum soil moisture content of 30% of field capacity. Compliance shall be determined by NRCS Estimating Soil Moisture by Feel and Appearance Method, amended through April 1998 (and no future editions);
 - c. Limit activities on a day identified by the Maricopa or Pinal County Dust Control Forecast to be high risk for dust generation; or
 - d. Conduct Significant Agricultural Earth Moving Activities in a manner to reduce a minimum of one ground operation across a commercial farm by using equipment that is the most efficient means of moving the soil.
- C. From and after December 31, 2015, a commercial farmer who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form demonstrating compliance with this rule. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial farmer. The Best Management Practice Program General Permit Record Form shall include the following information:
 - 1. The name of the commercial farmer, signature, and date signed;
 - 2. The mailing address or physical address of the commercial farm; and
 - 3. The best management practices selected for tillage, ground operations and harvest, cropland, noncropland, commercial farm roads, and significant earth moving activities (if applicable); and
 - 4. Any additional best management practices selected for high risk days as predicted by the Pinal County Dust Control Forecast.
- D. Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director, in conjunction with the Arizona Department of Agriculture, shall provide the commercial farmer with a Best Management Practices Program 3-year Survey. The commercial farmer shall complete the Survey with data from the preceding calendar year and submit the Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA without reference to a commercial farmer's name, shall aggregate the data from the Surveys received, and be submitted to the Department. The 3-year Survey shall include the following information:
 - 1. The name, business address, and phone number of the commercial farmer responsible for the preparation and implementation of the best management practices;
 - 2. The signature of the commercial farmer and the date the form was signed;
 - 3. The acreage of each crop type planted/growing during the calendar year that the survey is conducted;
 - 4. The total miles of commercial farm roads at the commercial farm;
 - 5. The total acreage of the noncropland at the commercial farm;
 - 6. The best management practices selected for tillage, ground operations and harvest, cropland, noncropland, commercial farm roads, and significant earth moving activities (if applicable); and
 - 7. Any additional best management practices selected for high risk days as predicted by the Pinal County Dust Control Forecast.
- E. Records of any changes to the Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the commercial farmer onsite and made available for review by the Director within two business days of notice to the commercial farmer.
- F. A person may develop different practices to control PM emissions not contained in subsections (B)(1) through (B)(6) and may submit such practices that are proven effective through on-farm demonstration trials to the Committee. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- G. A commercial farmer shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- H. The Director shall not assess a fee to a commercial farmer for coverage under the agricultural PM general permit.
- I. A commercial farmer shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.

- J. The Director shall document noncompliance with this Section before issuing a compliance order.
- K. A commercial farmer who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-611. Definitions for R18-2-611.01, R18-2-611.02, and R18-2-611.03

The definitions in R18-2-101 and the following definitions apply to R18-2-611.01, R18-2-611.02, and R18-611.03:

1. The following definitions apply to a commercial dairy operation, a commercial beef feedlot, a commercial poultry facility, and commercial swine facility:
 - a. "Animal waste handling and transporting" means the processes by which any animal excretions and mixtures containing animal excretions are collected and transported.
 - b. "Arenas, corrals and pens" means areas where animals are confined for the purposes of, but not limited to, feeding, displaying, safety, racing, exercising, or husbandry.
 - c. "Commercial animal operation" means a commercial dairy operation, a commercial beef feedlot, a commercial poultry facility, and a commercial swine facility, as defined in this Section.
 - d. "Commercial animal operator" means an individual, entity, or joint operation in general control of a commercial animal operation.
 - e. "Dust Control Forecast" means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
 - i. Projected meteorological conditions, including:
 - (1) Wind speed and direction,
 - (2) Stagnation,
 - (3) Recent precipitation, and
 - (4) Potential for precipitation;
 - ii. Existing concentrations of air pollution at the time of the forecast; and
 - iii. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
 - f. "High traffic areas" means areas that experience more than 20 VDT from 2 or more axle vehicles.
 - g. "Maricopa PM nonattainment area" means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
 - h. "Paved Public Road" means any paved roadways that are open to public travel and maintained by a City, County, State, or Federal entities.
 - i. "Pinal County PM Nonattainment Area" means the West Pinal PM₁₀ planning area and the West Central PM_{2.5} planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
 - j. "PM" includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
 - k. "Regulated agricultural activity" means a regulated agricultural activity as defined in A.R.S. § 49-457(P)(5).
 - l. "Regulated area" means the regulated area as defined in A.R.S. § 49-457(P)(6).
 - m. "Track-out control device" means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment from unpaved access connections and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
 - n. "Unpaved access connections" means any unpaved road connection which connects to a paved public road.
 - o. "Unpaved roads or feed lanes" means roads and feed lanes that are unpaved, owned by a commercial animal operator, and used exclusively to service a commercial animal operation.
 - p. "VDT" (Vehicle trips per day) means trips per day made by one vehicle, in one direction.
2. The following definitions apply to a commercial dairy operation:
 - a. "Aggregate cover" means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
 - b. "Apply a fibrous layer" means reducing PM emissions and soil movement, and preserving soil moisture by spreading shredded or deconstructed plant materials to cover loose soil in high animal traffic areas. Material shall be consistently applied to a minimum depth of two inches above the soil surface and coverage should be a minimum of 70 percent.
 - c. "Bunkers" means below ground level storage systems for storing large amount of silage, which is covered with a plastic tarp.
 - d. "Calves" means young dairy stock under two months of age.
 - e. "Cement cattle walkways to milk barn" means reducing PM emissions by fencing pathways from the corrals to the milking barn, restricting dairy cattle to surfaces with concrete floors.
 - f. "Commercial dairy operation" means a dairy operation with more than 150 dairy cattle within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
 - g. "Cover manure hauling trucks" means reducing PM emissions by completely covering the top of the loaded area.

- h. “Covers for silage” means reducing PM emissions and wind erosion by using large plastic tarps to completely cover silage.
 - i. “Do not run cattle” means reducing PM emissions by walking dairy cattle to the milking barn.
 - j. “Feed higher moisture feed to dairy cattle” means reducing PM emissions by feeding dairy cattle one or any combination of the following:
 - i. Add water to ration mix to achieve a 20% minimum moisture level,
 - ii. Add molasses or tallow to ration mix at a minimum of 1%,
 - iii. Add silage, or
 - iv. Add green chop.
 - k. “Feed green chop” means feeding high moisture feed that contains at least 30% moisture directly to dairy cattle.
 - l. “Groom manure surface” means reducing PM emissions and wind erosion by:
 - i. Flushing or vacuuming lanes daily,
 - ii. Scraping and harrowing pens on a weekly basis, and
 - iii. Removing manure every four months with equipment that leaves an even corral surface of compacted manure on top of the soil.
 - m. “Hutches” means raised, roofed enclosures that protect the calves from the elements.
 - n. “Pile manure between cleanings” means reducing PM emissions by collecting loose surface materials within the confines of the surface area of the occupied feed pen every two weeks.
 - o. “Provide cooling in corral” means reducing PM emissions by using cooling systems under the corral shades to reduce the ambient air temperature, thereby increasing stocking density in the cool areas of the corrals.
 - p. “Provide shade in corral” means reducing PM emissions by increasing stocking density and reducing animal movement by using a permanent structure, which provides at least 16 square feet per animal of shaded pen surface.
 - q. “Push equipment” means manure harvesting equipment pushed in front of a tractor.
 - r. “Silage” means fermented, high-moisture fodder that can be fed to ruminants, such as cattle and sheep; usually made from grass crops including corn, sorghum or other cereals, by using the entire green plant.
 - s. “Store and maintain feed stock” means reducing PM emissions and wind erosion by storing feed stock in a covered area where the commodity is surrounded on at least three sides by a structure.
 - t. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial dairy operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
 - u. “Use drag equipment to maintain pens” means reducing PM emissions by using manure equipment pulled behind a tractor instead of using push equipment, which avoids dust accumulation in floor depressions.
 - v. “Use free stall housing” means reducing PM emissions by enclosing one cow per stall, which are outfitted with concrete floors.
 - w. “Water misting systems” means reducing PM emissions from dry manure by using systems that project a cloud of very small water particles onto the manure surface, keeping the surface visibly moist.
 - x. “Wind barrier” means reducing PM₁₀ emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).
3. The following definitions apply to a commercial beef cattle feedlot:
- a. “Add moisture to pen surface” means reducing PM emissions and wind erosion by applying at least three to six gallons of water per head/per day in pens occupied by beef cattle.
 - b. “Add molasses or tallow to feed” means reducing PM emissions by adding molasses or tallow so that it equals three percent of the total ration.
 - c. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
 - d. “Apply a fibrous layer in working areas” means reducing PM emissions and soil movement, and preserving soil moisture by spreading shredded or deconstructed plant materials to cover loose soil in high animal traffic areas. Material shall be consistently applied to a minimum depth of two inches above the soil surface and coverage should be a minimum of 70 percent.
 - e. “Bulk materials” means reducing PM emissions by using a closed conveyor system instead of vehicular means to move grain or other.
 - f. “Commercial beef cattle feedlot” means a beef cattle feedlot with more than 500 beef cattle within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
 - g. “Concrete apron” means reducing PM emissions by using solidly formed concrete surface, at least 4 inches thick on top of the soil surface, inside the feed pen for 8 feet approaching the feed bunk or water trough.
 - h. “Control cattle during movements” means reducing PM emissions by suppressing the animal’s ability to run by driving them forward while intruding on their “flight zones” or restraining the animal’s movement.

- i. “Cover manure hauling trucks” means reducing PM emissions by completely covering the top of the loaded area.
 - j. “Feed higher moisture feed to beef cattle” means reducing PM emissions by feeding beef cattle feed that contains at least 30% moisture.
 - k. “Frequent manure removal” means reducing PM emissions and wind erosion by harvesting loose manure on top of the pen surface at least once every six months.
 - l. “Pile manure between cleanings” means reducing PM emissions by collecting loose manure surface materials, by scraping or pushing, within the confines of the surface area of the occupied feed pen at least four times per year.
 - m. “Provide shade in corral” means reducing PM emissions by increasing stocking density and reducing animal movement by using a permanent structure, which provides at least 16 square feet per animal of shaded pen surface.
 - n. “Push equipment” means manure harvesting equipment pushed in front of a tractor.
 - o. “Store and maintain feed stock” means reducing PM emissions and wind erosion by storing feed stock in a covered area where the commodity is surrounded on at least three sides by a structure.
 - p. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial beef feedlot with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
 - q. “Use drag equipment to maintain pens” means reducing PM emissions by using manure harvesting equipment pulled behind a tractor instead of using push equipment, which avoids dust accumulation in floor depressions.
 - r. “Wind barrier” means reducing PM₁₀ emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).
4. The following definitions apply to a commercial poultry facility:
- a. “Add moisture through ventilation systems” means reducing PM emissions by using a ventilation system that is designed to allow stock to maintain their normal body temperature without difficulty while maintaining a minimum of 20% moisture in the air within the housing system to bind small particles to larger particles.
 - b. “Add oil and/or moisture to the feed” means reducing PM emissions by adding a minimum of 1% edible oil and/or moisture to feed rations to bind small particles to larger particles.
 - c. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
 - d. “Clean aisles between cage rows” means reducing PM emissions by cleaning the aisles between cage rows at least twice every 14 days to prevent dried manure, spilled feed, and debris accumulation.
 - e. “Clean fans, louvers, and soffit inlets in a commercial poultry facility” means reducing PM emissions by cleaning fans, louvers, and soffit inlets when the facility is empty between depopulating and populating the facility.
 - f. “Clean floors and walls in a commercial poultry facility” means reducing PM emissions by cleaning floors and walls to prevent dried manure, spilled feed, and debris accumulation when the facility is empty between depopulating and populating the facility.
 - g. “Commercial poultry facility” means a poultry operation with more than 25,000 egg laying hens within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area.
 - h. “Control vegetation on building exteriors” means reducing PM emissions by removing, cutting, or trimming vegetation that accumulates PM and restricts ventilation of the building, so as to leave approximately 3 feet between the vegetation and building.
 - i. “Enclose transfer points” means reducing PM emissions by enclosing the points of transfer between the enclosed, weatherproof storage structure and the enclosed feed distribution system, which reduce air contact with the feed rations during feed conveyance.
 - j. “House in fully enclosed ventilated buildings” means reducing PM emissions by utilizing fully enclosed buildings with sufficient ventilation.
 - k. “Maintain moisture in manure solids” means reducing PM emissions by maintaining a moisture content of a minimum of 15% in the solids sufficient to bind small particles to larger particles.
 - l. “Minimize drop distance” means reducing PM emissions by designing the feed distribution system so that the distance the feed ration drops from the feed distribution system into feeders is approximately 1 foot or less, which reduces air contact with the feed rations during feed conveyance.
 - m. “Poultry” means any domesticated bird including chickens, turkeys, ducks, geese, guineas, ratites and squabs.
 - n. “Remove spilled feed” means reducing PM emissions by removing spilled feed from the housing facility at least once every 14 days.
 - o. “Stack separated manure solids” means reducing PM emissions and wind erosion by reducing the amount of exposed surface area of manure solids.

- p. “Store feed” means reducing PM emissions by storing feed in a structure that is enclosed and weather-proof, which reduces air contact with the feed rations during feed storage.
 - q. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial poultry operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
 - r. “Use enclosed feed distribution system” means reducing PM emissions by using an enclosed feed conveyance system that distributes feed rations throughout the housing facility, which reduces air contact with the feed rations during feed conveyance.
 - s. “Use a flexible discharge spout” means reducing PM emissions and wind erosion at the time of bulk feed deliveries to the housing units by using a flexible discharge spout on the end of the feed truck transfer auger.
 - t. “Use no bedding in the production facility” means reducing PM emissions by not using bedding such as wood shavings, sawdust, peanut hulls, straw, or other organic material.
 - u. “Use of a rotary dryer to dry manure waste” means reducing PM₁₀ emissions by drying the manure waste in a rotary dryer fitted with a baghouse or wet scrubber. A commercial poultry facility using a rotary dryer must comply with all of the following:
 - i. Install, maintain, and operate the baghouse or wet scrubber in a manner consistent with the manufacturer’s specifications at all times the rotary dryer is operated. The manufacturer specifications must be available on site upon request.
 - ii. Conduct monthly observations using EPA Method 22 on the control equipment to ensure proper operation. If improper operation is observed through EPA Method 22, the dryer must stop immediately and the equipment repaired before resuming operations.
 - iii. For baghouses, conduct an annual black light inspection of the bags to detect broken or leaking bags. If broken or leaking bags are detected it must be repaired or replaced immediately.
 - iv. Maintain a record of all repair activity required under (ii) and (ii) that must be made available within two days of Director’s request for inspection.
5. The following definitions apply to a commercial swine facility:
- a. “Add oil and/or moisture to the feed” means reducing PM emissions by adding a minimum of 0.5% edible oil and/or moisture to feed rations to bind small particles to larger particles.
 - b. “Add moisture through ventilation systems” means reducing PM emissions by using a ventilation system that is designed to allow stock to maintain their normal body temperature without difficulty while maintaining minimum of 15% moisture in the air within the housing system to bind small particles to larger particles.
 - c. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads or feed lanes. The aggregate should be clean, hard and durable, and should be applied and maintained to a minimum of three inches deep.
 - d. “Clean aisles between pens and stalls” means reducing PM emissions by cleaning the aisles between pens and stalls at least twice every 14 days to prevent dried manure, spilled feed, and debris accumulation.
 - e. “Clean fans, louvers, and soffit inlets in a commercial swine facility” means reducing PM emissions by cleaning fans, louvers, and soffit inlets between transfer of animal groups, but in any case, at least every 6 months.
 - f. “Clean pens, floors and walls in a commercial swine facility” means reducing PM emissions by cleaning pens, floors, and walls between transfer of animal groups to prevent dried manure, spilled feed, and debris accumulation, but in any case, at least every 6 months.
 - g. “Commercial swine facility” means a swine operation with more than 50 animal units for more than 30 consecutive days within the boundary of the Maricopa PM nonattainment area and Maricopa County portion of Area A, a PM nonattainment area designated after June 1, 2009 as stated in A.R.S. § 49-457(P)(1)(f), or the Pinal County PM Nonattainment Area. One thousand pounds equals one animal unit.
 - h. “Control vegetation on building exteriors” means reducing PM emissions by removing, cutting, or trimming vegetation that accumulates PM and restricts ventilation of the building, so as to leave approximately 3 feet between the vegetation and the building.
 - i. “Enclose transfer points” means reducing PM emissions by enclosing the points of transfer between the enclosed, weatherproof storage structure and the enclosed feed distribution system, which reduces air contact with the feed rations during feed conveyance.
 - j. “House in fully enclosed ventilated buildings” means reducing PM emissions by utilizing fully enclosed buildings with sufficient ventilation.
 - k. “Lagoon” means a liquid manure storage and treatment pond.
 - l. “Maintain moisture in manure solids” means reducing PM₁₀ emissions by maintaining a minimum moisture content of 10% in the solids sufficient to bind small particles to larger particles.
 - m. “Minimize drop distance” means reducing PM emissions by designing the feed distribution system so that the distance the feed ration drops from the feed distribution system into feeders is 3 feet or less, which reduces air contact with the feed rations during feed conveyance.
 - n. “Remove spilled feed” means reducing PM emissions by removing spilled feed from the housing facility at least once every 14 days.
 - o. “Slatted flooring” means reducing PM emissions by using flooring that is a slotted concrete or wire-mesh floor set above a liquid manure collection pit, which allows the excrement to fall through the flooring into the liquid pit below, which prevents solids build-up.

- Slats 4 to 8 inches wide with spacing of about 1 inch in between are recommended.
- p. “Sloped concrete flooring” means reducing PM emissions by pouring concrete with a minimum of 0.25% grade inside of the barns which provides drainage and easier cleaning of floor areas.
 - q. “Stack separated manure solids” means reducing PM emissions and wind erosion by reducing the amount of exposed surface area of manure solids.
 - r. “Store feed” means reducing PM emissions by storing feed in a structure that is enclosed and weather-proof, which reduces air contact with the feed rations during feed storage.
 - s. “Store separated manure solids” means reducing PM emissions by storing manure solids in a wind-blocked area behind a wall, structure, or area with natural wind protection to minimize blowing air movement over the manure stack.
 - t. “Synthetic particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface on a commercial swine operation with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide that is used to control particulate matter.
 - u. “Use a flexible discharge spout” means reducing PM emissions and wind erosion at the time of bulk feed deliveries to the housing units by using a flexible discharge spout on the end of the feed truck transfer auger.
 - v. “Use enclosed feed distribution system” means reducing PM emissions by using an enclosed feed conveyance system that distributes feed rations throughout the housing facility, which reduces air contact with the feed rations during the feed conveyance.
 - w. “Use no bedding in the production facility” means reducing PM emissions by not using bedding such as wood shavings, sawdust, peanut hulls, straw, or other organic material.
- b. Provide shade in corral,
 - c. Provide cooling in corral,
 - d. Cement cattle walkways to milk barn,
 - e. Groom manure surface,
 - f. Water misting systems,
 - g. Use drag equipment to maintain pens,
 - h. Pile manure between cleanings,
 - i. Feed green chop,
 - j. Keep calves in barns or hutches,
 - k. Do not run cattle,
 - l. Apply a fibrous layer, or
 - m. Wind barrier.
2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to dairy cattle,
 - b. Store and maintain feed stock,
 - c. Covers for silage,
 - d. Store silage in bunkers,
 - e. Cover manure hauling trucks, or
 - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
 3. Unpaved Access Connections:
 - a. Install signage to limit vehicle speed to 15 mph,
 - b. Install speed control devices,
 - c. Restrict access to through traffic,
 - d. Install and maintain a track-out control device,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant, or
 - h. Apply and maintain water as a dust suppressant.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant,
 - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
 - j. Apply and maintain pavement or cement feed lanes.

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Amended by exempt rulemaking at 13 A.A.R. 4326, effective November 14, 2007 (Supp. 07-4). Section repealed; new Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4). Subsection (2)(a) corrected at request of the Department, Office File No. M12-133, filed April 5, 2012 (Supp. 11-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 22 A.A.R. 987, effective April 5, 2016 (Supp. 16-2).

R18-2-611.01. Agricultural PM General Permit for Animal Operations; Maricopa County Serious PM Nonattainment Areas

- A. A commercial animal operator within a Serious PM Nonattainment Area shall implement at least two best management practices from each category to reduce PM emissions.
- B. A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 1. Arenas, Corrals, and Pens:
 - a. Use free stall housing,

- C. A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 1. Arenas, Corrals, and Pens:
 - a. Concrete aprons,
 - b. Provide shade in corral,
 - c. Add moisture to pen surface,
 - d. Manure removal,
 - e. Pile manure between cleanings,
 - f. Feed higher moisture feed to beef cattle,
 - g. Control cattle during movements,
 - h. Use drag equipment to maintain pens,
 - i. Apply a fibrous layer, or
 - j. Wind barrier.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to beef cattle,
 - b. Add molasses or tallow to feed,
 - c. Store and maintain feed stock,
 - d. Bulk materials,
 - e. Use drag equipment to maintain pens,
 - f. Cover manure hauling trucks, or
 - g. Do not load manure when wind exceeds 15 mph.

3. Unpaved Access Connections:
 - a. Install and maintain a track-out control device,
 - b. Apply and maintain pavement in high traffic areas,
 - c. Apply and maintain aggregate cover,
 - d. Apply and maintain synthetic particulate suppressant, or
 - e. Apply and maintain water as a dust suppressant.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant, or
 - i. Apply and maintain oil on roads or feed lanes.
- D.** A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
 - a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
 - b. Use no bedding,
 - c. Control vegetation on building exteriors,
 - d. Add moisture through ventilation systems, or
 - e. House in fully enclosed ventilated buildings.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to the feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean floors and walls in a commercial poultry facility,
 - i. Clean aisles between cage rows,
 - j. Stack separated manure solids,
 - k. Maintain moisture in manure solids, or
 - l. Use of a rotary dryer to dry manure waste.
 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system, or
 - d. Install signage to limit vehicle speed to 15 mph.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water, or
 - h. Apply and maintain oil on roads or feed lanes.
- E.** A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
 - a. House in fully enclosed ventilated buildings,
 - b. Use no bedding,
 - c. Use a slatted floor system,
 - d. Use sloped concrete flooring,
 - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
 - f. Control vegetation on building exteriors, or
 - g. Add moisture through ventilation systems.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean pens, floors, and walls in a commercial swine facility,
 - i. Clean aisles between pens and stalls,
 - j. Store separated manure solids in a wind-blocked area,
 - k. Stack separated manure solids,
 - l. Maintain moisture in manure solids, or
 - m. Maintain liquid lagoon level.
 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system,
 - d. Install signage to limit vehicle speed to 15 mph.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water,
 - h. Apply and maintain oil on roads or feed lanes, or
 - i. Wind barrier.
- F.** From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practice Program General Permit Record form shall include the following information:
1. The name of the commercial animal operator, signature, and date signed,
 2. The mailing address or physical address of the commercial animal operation, and
 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- G.** Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.

- H. A person may develop different practices not contained in subsection (B), (C), (D), or (E), that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee.
 - I. The Director shall not assess a fee to a commercial animal operator for coverage under the Best Management Practice Program General Permit Record Form.
 - J. A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
 - K. The Director shall document noncompliance with this Section before issuing a compliance order.
 - L. A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).
- 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant,
 - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
 - j. Apply and maintain pavement or cement feed lanes.

Historical Note

New Section made by exempt rulemaking at 18 A.A.R. 137, effective December 29, 2011 (Supp. 11-4).
 Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 22 A.A.R. 987, effective April 5, 2016 (Supp. 16-2).

R18-2-611.02. Agricultural PM General Permit for Animal Operations; Moderate PM Nonattainment Areas Designated After June 1, 2009, Except Pinal County PM Nonattainment Area

- A. A commercial animal operator within a Moderate PM Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each category to reduce PM emissions.
- B. A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 - 1. Arenas, Corrals, and Pens:
 - a. Use free stall housing,
 - b. Provide shade in corral,
 - c. Provide cooling in corral,
 - d. Cement cattle walkways to milk barn,
 - e. Groom manure surface,
 - f. Water misting systems,
 - g. Use drag equipment to maintain pens,
 - h. Pile manure between cleanings,
 - i. Feed green chop,
 - j. Keep calves in barns or hutches,
 - k. Do not run cattle,
 - l. Apply a fibrous layer, or
 - m. Wind barrier.
 - 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to dairy cattle,
 - b. Store and maintain feed stock,
 - c. Covers for silage,
 - d. Store silage in bunkers,
 - e. Cover manure hauling trucks, or
 - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
 - 3. Unpaved Access Connections:
 - a. Install signage to limit vehicle speed to 15 mph,
 - b. Install speed control devices,
 - c. Restrict access to through traffic,
 - d. Install and maintain a track-out control device,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant, or
- C. A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 - 1. Arenas, Corrals, and Pens:
 - a. Concrete aprons,
 - b. Provide shade in corral,
 - c. Add moisture to pen surface,
 - d. Manure removal,
 - e. Pile manure between cleanings,
 - f. Feed higher moisture feed to beef cattle,
 - g. Control cattle during movements,
 - h. Use drag equipment to maintain pens,
 - i. Apply a fibrous layer, or
 - j. Wind barrier.
 - 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to beef cattle,
 - b. Add molasses or tallow to feed,
 - c. Store and maintain feed stock,
 - d. Bulk materials,
 - e. Use drag equipment to maintain pens,
 - f. Cover manure hauling trucks, or
 - g. Do not load manure when wind exceeds 15 mph.
 - 3. Unpaved Access Connections:
 - a. Install and maintain a track-out control device,
 - b. Apply and maintain pavement in high traffic areas,
 - c. Apply and maintain aggregate cover,
 - d. Apply and maintain synthetic particulate suppressant, or
 - e. Apply and maintain water as a dust suppressant.
 - 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant, or
 - i. Apply and maintain oil on roads or feed lanes.
- D. A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 - 1. Arenas, Corrals, and Pens (Housing):
 - a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
 - b. Use no bedding,
 - c. Control vegetation on building exteriors;
 - d. Add moisture through ventilation systems, or
 - e. House in fully enclosed ventilated buildings.

2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to the feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean floors and walls in a commercial poultry facility,
 - i. Clean aisles between cage rows,
 - j. Stack separated manure solids, or
 - k. Maintain moisture in manure solids.
 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system, or
 - d. Install signage to limit vehicle speed to 15 mph.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water, or
 - h. Apply and maintain oil on roads or feed lanes.
- E.** A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
 - a. House in fully enclosed ventilated buildings,
 - b. Use no bedding,
 - c. Use a slatted floor system,
 - d. Use sloped concrete flooring,
 - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
 - f. Control vegetation on building exteriors, or
 - g. Add moisture through ventilation systems.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean pens, floors, and walls in a commercial swine facility,
 - i. Clean aisles between pens and stalls,
 - j. Store separated manure solids in a wind-blocked area,
 - k. Stack separated manure solids,
 - l. Maintain moisture in manure solids, or
 - m. Maintain liquid lagoon level.
 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system,
 - d. Install signage to limit vehicle speed to 15 mph.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water,
 - h. Apply and maintain oil on roads or feed lanes, or
 - i. Wind barrier.
- F.** From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practices Program General Permit Record Form shall include the following information:
1. The name of the commercial animal operator, signature, and date signed,
 2. The mailing address or physical address of the commercial animal operation, and
 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- G.** Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.
- H.** A person may develop different practices not contained in subsection (B), (C), (D), or (F) that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee. The new best management practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- I.** The Director shall not assess a fee to a commercial animal operator for coverage under the agricultural PM general permit.
- J.** A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- K.** The Director shall document noncompliance with this Section before issuing a compliance order.
- L.** A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-611.03. Agricultural PM General Permit for Animal Operations; Pinal County PM Nonattainment Area

- A.** A commercial animal operator within the Pinal County PM Nonattainment Area shall implement at least one best management practice from each category to reduce PM emissions.
- B.** In addition to subsection (A), on the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast, commercial dairy operations within the Pinal County PM Nonattainment Area shall apply and maintain one of the

Department of Environmental Quality – Air Pollution Control

four following BMPs on unpaved roads that experience more than 20 VDT from 2 or more axle vehicles:

1. Apply and maintain pavement in high traffic areas,
 2. Apply and maintain aggregate cover,
 3. Apply and maintain synthetic particulate suppressant, or
 4. Apply and maintain water as a dust suppressant.
- C.** In addition to subsection (A), commercial beef feedlots within the Pinal County PM Nonattainment Area, shall add water to pen surface, as defined in R18-2-611(3)(a), on the day that is forecast to be high risk for dust generation by the Pinal County Dust Control Forecast.
- D.** A commercial dairy operation shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens:
 - a. Use free stall housing,
 - b. Provide shade in corral,
 - c. Provide cooling in corral,
 - d. Cement cattle walkways to milk barn,
 - e. Groom manure surface,
 - f. Water misting systems,
 - g. Use drag equipment to maintain pens,
 - h. Pile manure between cleanings,
 - i. Feed green chop,
 - j. Keep calves in barns or hutches,
 - k. Do not run cattle,
 - l. Apply a fibrous layer, or
 - m. Wind barrier.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to dairy cattle,
 - b. Store and maintain feed stock,
 - c. Covers for silage,
 - d. Store silage in bunkers,
 - e. Cover manure hauling trucks, or
 - f. Do not load manure trucks with dry manure when wind exceeds 15 mph.
 3. Unpaved Access Connections:
 - a. Install signage to limit vehicle speed to 15 mph,
 - b. Install speed control devices,
 - c. Restrict access to through traffic,
 - d. Install and maintain a track-out control device,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant, or
 - h. Apply and maintain water as a dust suppressant.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant,
 - i. Use appropriate vehicles such as electric carts or small utility vehicles instead of trucks, or
 - j. Apply and maintain pavement or cement feed lanes.
- E.** A commercial beef cattle feedlot shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens:
 - a. Concrete aprons,
 - b. Provide shade in corral,
 - c. Add water to pen surface,
 - d. Manure removal,
 - e. Pile manure between cleanings,
 - f. Feed higher moisture feed to beef cattle,
 - g. Control cattle during movements,
 - h. Use drag equipment to maintain pens,
 - i. Apply a fibrous layer, or
 - j. Wind barrier.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Feed higher moisture feed to beef cattle;
 - b. Add molasses or tallow to feed,
 - c. Store and maintain feed stock,
 - d. Bulk materials,
 - e. Use drag equipment to maintain pens,
 - f. Cover manure hauling trucks, or
 - g. Do not load manure when wind exceeds 15 mph.
 3. Unpaved Access Connections:
 - a. Install and maintain a track-out control device,
 - b. Apply and maintain pavement in high traffic areas,
 - c. Apply and maintain aggregate cover,
 - d. Apply and maintain synthetic particulate suppressant, or
 - e. Apply and maintain water as a dust suppressant.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed truck to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict access to through traffic,
 - e. Apply and maintain pavement in high traffic areas,
 - f. Apply and maintain aggregate cover,
 - g. Apply and maintain synthetic particulate suppressant,
 - h. Apply and maintain water as a dust suppressant, or
 - i. Apply and maintain oil on roads or feed lanes.
- F.** A commercial poultry facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
1. Arenas, Corrals, and Pens (Housing):
 - a. Clean fans, louvers, and soffit inlets in a commercial poultry facility,
 - b. Use no bedding,
 - c. Control vegetation on building exteriors,
 - d. Add moisture through ventilation systems, or
 - e. House in fully enclosed ventilated buildings.
 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to the feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean floors and walls in a commercial poultry facility,
 - i. Clean aisles between cage rows,
 - j. Stack separated manure solids, or
 - k. Maintain moisture in manure solids.
 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system, or
 - d. Install signage to limit vehicle speed to 15 mph.
 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,

Department of Environmental Quality – Air Pollution Control

- b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water, or
 - h. Apply and maintain oil on roads or feed lanes.
- G.** A commercial swine facility shall implement the following best management practices, as described in subsection (A), from each of the following categories:
 - 1. Arenas, Corrals, and Pens (Housing):
 - a. House in fully enclosed ventilated buildings,
 - b. Use no bedding,
 - c. Use a slatted floor system,
 - d. Use sloped concrete flooring,
 - e. Clean fans, louvers, and soffit inlets in a commercial swine facility,
 - f. Control vegetation on building exteriors, or
 - g. Add moisture through ventilation systems.
 - 2. Animal Waste (and Feed) Handling and Transporting:
 - a. Remove spilled feed,
 - b. Store feed,
 - c. Add oil and/or moisture to feed,
 - d. Use enclosed feed distribution system,
 - e. Use flexible discharge spout,
 - f. Minimize drop distance,
 - g. Enclose transfer points,
 - h. Clean pens, floors, and walls in a commercial swine facility,
 - i. Clean aisles between pens and stalls,
 - j. Store separated manure solids in a wind-blocked area,
 - k. Stack separated manure solids,
 - l. Maintain moisture in manure solids, or
 - m. Maintain liquid lagoon level.
 - 3. Unpaved Access Connections:
 - a. Install speed control devices,
 - b. Restrict traffic access,
 - c. Install and maintain a track-out control system,
 - d. Install signage to limit vehicle speed to 15 mph.
 - 4. Unpaved Roads or Feed Lanes:
 - a. Install engine speed governors on feed trucks to 15 mph,
 - b. Install signage to limit vehicle speed to 15 mph,
 - c. Install speed control devices,
 - d. Restrict traffic access,
 - e. Apply and maintain aggregate cover,
 - f. Apply and maintain synthetic particulate suppressant,
 - g. Apply and maintain water,
 - h. Apply and maintain oil on roads or feed lanes, or
 - i. Wind barrier.
- H.** From and after December 31, 2015, a commercial animal operator who engages in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the commercial animal operator. The Best Management Practices Program General Permit Record Form shall include the following information:
 - 1. The name of the commercial animal operator, signature, and date signed,
 - 2. The mailing address or physical address of the commercial animal operation, and
 - 3. The best management practices selected for Arenas, Corrals, and Pens, Animal Waste Handling and Transporting, Unpaved Access Connections, and Unpaved Roads or Feed Lanes.
- I.** Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director shall provide the commercial animal operator with a Best Management Practices Program 3-year Survey. The commercial animal operator shall complete the Survey with data from the preceding calendar year and submit the Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA in a format that does not refer to a commercial animal operator's name, shall aggregate the data from the Surveys received, and be submitted to the Department. The 3-year Survey shall include the following information:
 - 1. The name, business address, and phone number of the commercial farmer responsible for the preparation and implementation of the best management practices;
 - 2. The signature of the commercial farmer and the date the form was signed;
 - 3. The number of animals in a commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
 - 4. The total miles of unpaved roads at the commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
 - 5. The total acreage of the unpaved access connections and equipment areas at the commercial dairy operation, beef cattle feed lot, poultry facility or swine facility;
 - 6. The best management practices selected for each category; and
 - 7. For commercial dairy operations and beef cattle feedlots, an acknowledgement that water was applied on the day of a high risk day as predicted by the Pinal County Dust Control Forecast.
- J.** Beginning January 1, 2016, a commercial animal operator shall maintain records demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice and any changes to the best management practices. Records shall be kept by the commercial animal operator onsite and made available for review by the Director within two business days of notice to the commercial animal operator.
- K.** A person may develop different practices not contained in subsection (D), (E), (F), or (G) that reduce PM and may submit such practices that are proven effective through on-operation demonstration trials to the Committee. The new best management practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- L.** The Director shall not assess a fee to a commercial animal operator for coverage under the agricultural PM general permit.
- M.** A commercial animal operator shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- N.** The Director shall document noncompliance with this Section before issuing a compliance order.
- O.** A commercial animal operator who is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking pursuant to

Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-612. Definitions for R18-2-612.01

The definitions in R18-2-101 and the following definitions apply to R18-2-612.01:

1. “Access restriction” means reducing PM emission by reducing the number of trips driven on unpaved operation and maintenance and unpaved utility roads by restricting or eliminating public access by the use of signs or physical obstruction at locations that effectively control access to roads.
2. “Aggregate cover” means reducing PM emissions, wind erosion and stabilizing soil by applying and maintaining gravel, concrete, recycled road base, caliche, or other similar material to unpaved roads. The aggregate should be clean, hard and durable, and should be applied a depth sufficient to create soil stabilization in accordance with material specifications. A minimum depth of three inches is the standard in the absence of such specifications.
3. “Apply and maintain water” means reducing PM emissions and wind erosion by applying water to bare soil surfaces until the surfaces are visibly moist.
4. “Best management practice” means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM emissions from a regulated agricultural activity.
5. “Biological control of aquatic weeds” means reducing at least one trip, or to one trip if only one trip is needed, per treatment, made by vehicles for the purposes of removing aquatic weeds from canals by using fish, and other biologic means, within the canal through the use of to control the growth of aquatic weeds that reduce operating capacities and create debris that causes other operational issues.
6. “Canals” means facilities constructed for the sole purpose of the control, conveyance, and delivery of water. These facilities may be either open earthen channels, lined or unlined, or buried pipelines, which are used to convey water uphill and under obstructions, such as roadways and wash and river channels. These facilities include, but are not limited to, gate, inlet, outlet, safety, and measuring structures required to control water along the canals and deliver water to irrigation district customers, as well as compacted earthen banks constructed to protect these facilities from storm runoff events.
7. “Committee” means the Governor's Agricultural Best Management Practices Committee.
8. “Debris” means trash, rubble, and other non-soil materials.
9. “Dredge canals” means reducing PM emissions by mechanically removing muck, debris, and other foreign objects from canals while material is still wet or damp.
10. “Dust Control Forecast” means a forecast, which shall identify a low, moderate or high risk of dust generation for the next five consecutive days and shall be issued by noon on each day the forecast is generated. When developing these forecasts, the department shall consider all of the following:
 - a. Projected meteorological conditions, including:
 - i. Wind speed and direction,
 - ii. Stagnation,
 - iii. Recent precipitation, and
 - iv. Potential for precipitation;
 - b. Existing concentrations of air pollution at the time of the forecast; and
 - c. Historic air pollution concentrations that have been observed during meteorological conditions similar to those that are predicted to occur in the forecast.
11. “Earth materials” means natural materials covering the ground surface, which includes, but are not limited to, dirt, rocks, or soil.
12. “Grading roadways” means mechanically smoothing and compacting the roadway surface.
13. “Irrigation District” means a political subdivision, governed by title 48, chapter 19.
14. “Limit activity” means performing only critical operational or emergency activity on a day forecast to be high risk for dust generation as forecasted by the Pinal County Dust Control Forecast.
15. “Major earth moving activities” means the mechanical movement of earth materials to reconstruct, relocate, reshape, reconfigure canals, including operation and maintenance roads and utility access roads.
16. “Maricopa PM nonattainment area” means the Phoenix planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
17. “Minor earth moving activities” means the mechanical movement of earth materials to repair and maintain the existing configuration, location, bank slopes, or inclines of canals.
18. “Muck” means water that is saturated with mud, dirt, and soil, which accumulates over time along the bottom of canals.
19. “Paved Public Road” means any paved roadways that are open to public travel and maintained by a City, County, or the State.
20. “Pinal County PM Nonattainment Area” means the West Pinal PM₁₀ planning area and the West Central PM_{2.5} planning area, as defined in 40 CFR 81.303, and incorporated by reference in R18-2-210.
21. “PM” includes both particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured by a reference method based on 40 CFR 50 Appendix L, or by an equivalent method designated according to 40 CFR 53; and particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by a reference method contained within 40 CFR 50 Appendix J or by an equivalent method designated in accordance with 40 CFR 53, as incorporated by reference in Appendix 2.
22. “Reduce vehicle speed” means reducing PM emissions and soil erosion from the use of vehicles owned or operated by the irrigation district on unpaved operation, maintenance, and utility access roads, at speeds not to exceed 25 mph. This can be achieved through worker behavior modifications, signage, or any other necessary means.
23. “Regulated agricultural activity” means activities of an irrigation district, which affects those lands and facilities that are under the jurisdiction and control of an irrigation district, as described in § 49-457(P)(1)(f) and A.R.S. § 49-457(P)(5)(b).
24. “Regulated area” means a regulated area as defined in A.R.S. § 49-457(P)(6)(c).
25. “Sediment” means muck that has dried after removal from canals.
26. “Supervisory control system” means a system that allows the irrigation district to control operational structures from a remote computer location in order to reduce at least one trip made by vehicles to access structures for operational purposes.

27. “Synthetic or natural particulate suppressant” means reducing PM emissions and wind erosion by providing a stabilized soil surface with organic material, such as muck, animal waste or biosolids, or with a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, an emulsion of a petroleum product, an enzyme product, or polyacrylamide.
 28. “Track-out control system” means minimizing any and all material that adheres to and agglomerates on all vehicles and equipment and falls onto paved public roads or shoulders to paved public roads by using a device or system to remove mud or soil from a vehicle or equipment before the vehicle enters a paved public road. Devices such as a grizzly, a gravel pad or a wheel wash system can be used.
 29. “Unauthorized use” means any travel or access by non-district personnel in non-district vehicles along roadways under the control of an irrigation district without the permission of the irrigation district.
 30. “Unpaved operation and maintenance roads” means unpaved roadways that lay adjacent to canals, which provide access for irrigation district personnel and equipment for direct operation and maintenance of canals, and are under the control of the irrigation district.
 31. “Unpaved utility access roads” means unpaved roadways used to provide access to canals, and also includes office and shop facilities, equipment yards, staging areas and other lands under the control of the irrigation district.
 32. “Weed management” means reducing at least one trip made by vehicles for the purposes of removing weeds by using a combination of techniques, including organic, chemical, or biological means, to control weeds along canal banks and land surfaces not used for conveying water, excluding unpaved roadways.
 33. “Wind barrier” means reducing PM₁₀ emissions and wind erosion by constructing a fence or structure, or providing a woody vegetative barrier by planting a row of trees or shrubs, perpendicular or across the prevailing wind direction to reduce wind speed by changing the pattern of air flow over the land surface. For fences and structures, the wind barrier shall have a density of no less than 50% and the height of the wind barrier must be proportionate to the downwind protected area. The downwind protected area is considered ten times the height of the wind barrier. For vegetative barriers, compliance shall be determined by NRCS Conservation Practice Standard, Code 380, Windbreak/Shelterbelt Establishment, amended through August 21, 2009 (and no future editions).
- a. Access restriction,
 - b. Apply and maintain aggregate cover,
 - c. Install supervisory control system to limit vehicle travel,
 - d. Limit activity,
 - e. Install signage to limit vehicle speed to 25 mph,
 - f. Post warning signs for unauthorized use at point of entry to roads,
 - g. Reduce vehicle speed,
 - h. Install and maintain a track-out control system,
 - i. Apply and maintain synthetic or natural particulate suppressant,
 - j. Apply and maintain water before, during, and after major and minor earth moving activities,
 - k. Apply and maintain water when grading roadways,
 - l. Use paved non-district or paved public roads to access structures, or
 - m. Install wind barriers.
2. Canals:
 - a. Dredge canals while muck or debris is still wet,
 - b. Dispose of muck or debris while still damp,
 - c. Weed management,
 - d. Biological control of aquatic weeds, or
 - e. Apply and maintain water before, during and after major and minor earth moving activities.
 3. Unpaved utility access roads:
 - a. Access restriction,
 - b. Apply and maintain aggregate cover,
 - c. Limit activity,
 - d. Install signage to limit vehicle speed to 25 mph,
 - e. Post warning signs for unauthorized use at points of entry to roads,
 - f. Reduce vehicle speed,
 - g. Install and maintain a track-out control system,
 - h. Apply and maintain pavement,
 - i. Apply and maintain synthetic or natural particulate suppressant,
 - j. Apply and maintain water before, during and after major and minor earth moving activities,
 - k. Apply and maintain water when grading roadways,
 - l. Use paved non-district or paved public roads to access structures, or
 - m. Install wind barriers.

- B. From and after December 31, 2015, an irrigation district engaged in a regulated agricultural activity shall complete a Best Management Practices Program General Permit Record Form. Thereafter, a new Best Management Practices Program General Permit Record Form shall be completed every year by March 31. The Form shall be provided to the Director within two business days of notice to the irrigation district. The Best Management Practice Program General Permit Record form shall include the following information:
 1. The name, business address, and the irrigation district representative responsible for the preparation and implementation of the best management practices;
 2. The signature of the irrigation district representative and the date the form was signed; and
 3. The best management practice selected for unpaved operation and utility roads, canals, and unpaved utility access roads.
- C. Beginning in calendar year 2017, and no more than once every subsequent three calendar years, the Director, in conjunction with the Arizona Department of Agriculture, shall provide the irrigation district with a Best Management Practices Program 3-year Survey. The irrigation district shall complete the Survey with data from the preceding calendar year and submit the

Historical Note

New Section R18-2-612 renumbered from R18-2-610 at 6 A.A.R. 2009, effective May 12, 2000 (Supp. 00-2). Former Section R18-2-612 renumbered to R18-2-614; new Section R18-2-612 made by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-612.01. Agricultural PM General Permit For Irrigation Districts; PM Nonattainment Areas Designated After June 1, 2009

- A. An irrigation district within a PM Nonattainment Area, designated after June 1, 2009, shall implement at least one best management practice from each of the following categories to reduce PM emissions:
 1. Unpaved operation and maintenance roads:

Survey to the Arizona Department of Agriculture (ADA) by January 31, 2018, and every three years thereafter. The Survey information submitted to the ADA shall be compiled by the ADA then be submitted to the Department. The 3-year Survey shall include the following information:

1. The name, business address, and phone number of the irrigation district representative responsible for the preparation and implementation of the best management practices;
 2. The signature of the irrigation district representative and the date the form was signed;
 3. The total miles of canals that the irrigation district controls;
 4. The total miles of unpaved operation and maintenance roads;
 5. The total miles of the unpaved utility access roads; and
 6. The best management practices selected for unpaved operation and utility roads, canals, and unpaved utility access roads.
- D.** Records of any changes to those Best Management Practices shall be noted on the Best Management Practices Program General Permit Record Form and shall be kept by the irrigation district onsite and made available for review by the Director within two business days of notice to the irrigation district by the Department.
- E.** An irrigation district may develop different practices not contained in either of the categories of subsection (A)(1), (A)(2), or (A)(3) that reduce PM and may submit such practices that are proven effective through in-district trials. The proposed new practices shall not become effective unless submitted as described in A.R.S. § 49-457(L).
- F.** An irrigation district shall maintain a record demonstrating compliance with this Section for three years. Records shall include a copy of the complete Best Management Practice Program General Permit Record Form to confirm implementation of each best management practice.
- G.** The Director shall not assess a fee to an irrigation district for coverage under the agricultural PM general permit.
- H.** An irrigation district shall ensure that the implementation of all selected best management practices does not violate any other local, state, or federal law.
- I.** The Director shall document noncompliance with this Section before issuing a compliance order.
- J.** An irrigation district that is not in compliance with this Section is subject to the provisions in A.R.S. § 49-457(I), (J), and (K).

Historical Note

New Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-613. Definitions for R18-2-613.01

1. “Access restriction” means restricting or eliminating public access to noncropland with signs or physical obstruction.
2. “Aggregate cover” means gravel, concrete, recycled road base, caliche, or other similar material applied to noncropland.
3. “Artificial wind barrier” means a physical barrier to the wind.
4. “Bed row spacing” means increasing or decreasing the size of a planting bed area to reduce the number of passes and soil disturbance by increasing plant density.
5. “Best management practice” means a technique verified by scientific research, that on a case-by-case basis is practical, economically feasible, and effective in reducing PM₁₀ emissions from a regulated agricultural activity.
6. “Chemical irrigation” means applying a fertilizer, pesticide, or other agricultural chemical to cropland through an irrigation system.
7. “Combining tractor operations” means performing two or more tillage, cultivation, planting, or harvesting operations with a single tractor or harvester pass.
8. “Commercial farm” means 10 or more contiguous acres of land used for agricultural purposes within the boundary of the Yuma PM₁₀ nonattainment area.
9. “Commercial farmer” means an individual, entity, or joint operation in general control of a commercial farm.
10. “Conservation irrigation” means the use of drips, sprinklers, or underground lines to conserve water, and to reduce the weed population, the need for tillage, and soil compaction.
11. “Conservation tillage” means types of tillage that reduce the number of passes and the amount of soil disturbance.
12. “Cover crop” means plants or a green manure crop grown for seasonal soil protection or soil improvement.
13. “Critical area planting” means using trees, shrubs, vines, grasses, or other vegetative cover on noncropland.
14. “Cropland” means land on a commercial farm that:
 - a. Is within the time-frame of final harvest to plant emergence;
 - b. Has been tilled in a prior year and is suitable for crop production, but is currently fallow; or
 - c. Is a turn-row.
15. “Cross-wind ridges” means soil ridges formed by a tillage operation.
16. “Cross-wind strip-cropping” means planting strips of alternating crops within the same field.
17. “Cross-wind vegetative strips” means herbaceous cover established in one or more strips within the same field.
18. “Equipment modification” means modifying agricultural equipment to prevent or reduce particulate matter generation from cropland.
19. “Limited activity during a high-wind event” means performing no tillage or soil preparation activity when the measured wind speed at six feet in height is more than 25 mph at the commercial farm site.
20. “Manure application” means applying animal waste or biosolids to a soil surface.
21. “Mulching” means applying plant residue or other material that is not produced onsite to a soil surface.
22. “Multi-year crop” means a crop, pasture, or orchard that is grown, or will be grown, on a continuous basis for more than one year.
23. “Night farming” means performing regulated agricultural activities at night when moisture levels are higher and winds are lighter.
24. “Noncropland” means any commercial farmland that:
 - a. Is no longer used for agricultural production;
 - b. Is no longer suitable for production of crops;
 - c. Is subject to a restrictive easement or contract that prohibits use for the production of crops; or
 - d. Includes a private farm road, ditch, ditch bank, equipment yard, storage yard, or well head.
25. “Permanent cover” means a perennial vegetative cover on cropland.
26. “Planting based on soil moisture” means applying water to soil before performing planting operations.
27. “Precision farming” means use of satellite navigation to calculate position in the field, to reduce overlap during field operations, and allow operations to occur during nighttime and inclement weather, thus generating less PM₁₀.

28. “Reduce vehicle speed” means operating farm vehicles or farm equipment on unpaved farm roads at speeds not to exceed 20 mph.
 29. “Reduced harvest activity” means reducing the number of harvest passes using a mechanized method to cut and remove crops from a field.
 30. “Regulated agricultural activity” means a commercial farming practice that may produce PM₁₀ within the Yuma PM₁₀ nonattainment area.
 31. “Residue management” means managing the amount and distribution of crop and other plant residues on a soil surface.
 32. “Sequential cropping” means growing crops in a sequence that minimizes the amount of time bare soil is exposed on a field.
 33. “Surface roughening” means manipulating a soil surface to produce or maintain clods.
 34. “Synthetic particulate suppressant” means a manufactured product such as lignosulfate, calcium chloride, magnesium chloride, and polyacrylamide, an emulsion of a petroleum product, and an enzyme product that is used to control particulate matter.
 35. “Tillage and harvest” means any mechanical practice that physically disturbs cropland or crops on a commercial farm.
 36. “Tillage based on soil moisture” means applying water to soil before or during tillage, or delaying tillage to coincide with precipitation.
 37. “Timing of a tillage operation” means performing tillage operations at a time that will minimize the soil’s susceptibility to generate PM₁₀.
 38. “Transgenic crops” means the use of genetically modified crops such as “herbicide ready” crops, which reduces the need for tillage or cultivation operations, and reduces soil disturbance.
 39. “Track-out control system” means a device to remove mud or soil from a vehicle before the vehicle enters a paved public road.
 40. “Tree, shrub, or windbreak planting” means providing a woody vegetative barrier to the wind.
 41. “Watering” means applying water to noncropland.
 42. “Yuma PM₁₀ nonattainment area” means the Yuma PM₁₀ planning area as defined in 40 CFR 81.303, which is incorporated by reference in R18-2-210.
- D.** A commercial farmer shall ensure that the implementation of each selected best management practice does not violate any other local, state, or federal law.
- E.** A commercial farmer shall implement at least one of the following best management practices to reduce PM₁₀ emissions from tillage and harvest:
1. Bed row spacing,
 2. Chemical irrigation,
 3. Combining tractor operations,
 4. Conservation irrigation,
 5. Conservation tillage,
 6. Equipment modification,
 7. Limited activity during a high-wind event,
 8. Multi-year crop,
 9. Night farming,
 10. Planting based on soil moisture,
 11. Precision farming,
 12. Reduced harvest activity,
 13. Tillage based on soil moisture,
 14. Timing of a tillage operation, or
 15. Transgenic crops.
- F.** A commercial farmer shall implement at least one of the following best management practices to reduce PM₁₀ emissions from noncropland:
1. Access restriction;
 2. Aggregate cover;
 3. Artificial wind barrier;
 4. Critical area planting;
 5. Manure application;
 6. Reduce vehicle speed;
 7. Synthetic particulate suppressant;
 8. Track-out control system;
 9. Tree, shrub, or windbreak planting; or
 10. Watering.
- G.** A commercial farmer shall implement at least one of the following best management practices to reduce PM₁₀ emissions from cropland:
1. Artificial wind barrier;
 2. Cover crop;
 3. Cross-wind ridges;
 4. Cross-wind strip-cropping;
 5. Cross-wind vegetative strips;
 6. Manure application;
 7. Mulching;
 8. Multi-year crop;
 9. Permanent cover;
 10. Planting based on soil moisture;
 11. Precision farming;
 12. Residue management;
 13. Sequential cropping;
 14. Surface roughening; or
 15. Tree, shrub, or windbreak planting.
- H.** A person may develop different practices not contained in subsections (E), (F), or (G) that reduce PM₁₀. A person may submit practices that are proven effective through demonstration trials to the Director. The Director shall review the submitted practices.
- I.** A commercial farmer shall maintain records demonstrating compliance with this Section. The commercial farmer shall provide the records to the Director within two business days of written notice to the commercial farmer. The records shall contain:
1. The name of the commercial farmer,
 2. The mailing address or physical location of the commercial farm, and

Historical Note

New Section made by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Section R18-2-313 renumbered to R18-2-313.01; new Section made by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-613.01. Yuma PM₁₀ Nonattainment Area; Agricultural Best Management Practices

- A.** A commercial farmer shall comply with this Section by August 1, 2005.
- B.** A commercial farmer who begins a regulated agricultural activity after August 1, 2005, shall comply with this Section within 60 days after beginning the regulated agricultural activity.
- C.** A commercial farmer shall implement at least one of the best management practices from each of the following categories at each commercial farm:
1. Tillage and harvest, subsection (E);
 2. Noncropland, subsection (F); and
 3. Cropland, subsection (G).

3. The best management practices selected for tillage and harvest, noncropland, and cropland by the commercial farmer, and the date each best management practice was implemented.

Historical Note

New Section R18-2-313.01 renumbered from Section R18-2-313 by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3).

R18-2-614. Evaluation of Nonpoint Source Emissions

Opacity of an emission from any nonpoint source shall not be greater than 40% measured according to the 40 CFR 60, Appendix A, Reference Method 9. An open fire permitted under R18-2-602 or regulated under Article 15 is exempt from this requirement.

Historical Note

Section R18-2-614 renumbered from R18-2-612; amended by final rulemaking at 11 A.A.R. 2210, effective July 18, 2005 (Supp. 05-2). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

ARTICLE 7. EXISTING STATIONARY SOURCE PERFORMANCE STANDARDS

R18-2-701. Definitions

For purposes of this Article:

1. "Acid mist" means sulfuric acid mist as measured in the Arizona Testing Manual and 40 CFR 60, Appendix A.
2. "Architectural coating" means a coating used commercially or industrially for residential, commercial or industrial buildings and their appurtenances, structural steel, and other fabrications such as storage tanks, bridges, beams and girders.
3. "Asphalt concrete plant" means any facility used to manufacture asphalt concrete by heating and drying aggregate and mixing with asphalt cements. This is limited to facilities, including drum dryer plants that introduce asphalt into the dryer, which employ two or more of the following processes:
 - a. A dryer.
 - b. Systems for screening, handling, storing, and weighing hot aggregate.
 - c. Systems for loading, transferring, and storing mineral filler.
 - d. Systems for mixing asphalt concrete.
 - e. The loading, transferring, and storage systems associated with emission control systems.
4. "Black liquor" means waste liquor from the brown stock washer and spent cooking liquor which have been concentrated in the multiple-effect evaporator system.
5. "Calcine" means the solid materials produced by a lime plant.
6. "Coal" means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite by the ASTM Method D388-05 "Standard Classification of Coals by Rank" and coal refuse. Synthetic fuels derived from coal for the purpose of creating useful heat including but not limited to, coal derived gases (not meeting the definition of natural gas), solvent-refined coal, coal-oil mixtures, and coal-water mixtures, are considered "coal" for the purposes of this subpart.
7. "Coal refuse" means any by-product of coal mining, physical coal cleaning, and coal preparation operations (e.g., culm, gob, etc.) containing coal, matrix material, clay, and other organic and inorganic material with an ash content greater than 50 percent (by weight) and a heating value less than 13,900 kilojoules per kilogram (6,000 Btu per pound) on a dry basis.
8. "Concentrate" means enriched copper ore recovered from the froth flotation process.
9. "Concentrate dryer" means any facility in which a copper sulfide ore concentrate charge is heated in the presence of air to eliminate a portion of the moisture from the charge, provided less than 5% of the sulfur contained in the charge is eliminated in the facility.
10. "Concentrate roaster" means any facility in which a copper sulfide ore concentrate is heated in the presence of air to eliminate 5% or more of the sulfur contained in the charge.
11. "Condensate stripper system" means a column, and associated condensers, used to strip, with air or steam, TRS compounds from condensate streams from various processes within a kraft pulp mill.
12. "Control device" means the air pollution control equipment used to remove particulate matter or gases generated by a process source from the effluent gas stream.
13. "Converter" means any vessel to which copper matte is charged and oxidized to copper.
14. "Electric generating plant" means all electric generating units located at a stationary source.
15. "Electric generating unit" means a combustion unit of more than 25 megawatts electric that serves a generator that produces electricity for sale and that burns coal for more than 10.0 percent of the average annual heat input during any three consecutive calendar years or for more than 15.0 percent of the annual heat input during any one calendar year. A unit that cogenerates steam and electricity and supplies more than one-third of its potential electric output capacity and more than 25 megawatts electric output to any utility power distribution system for sale is considered an electric generating unit.
16. "Existing source" means any source which does not have an applicable new source performance standard under Article 9 of this Chapter.
17. "Facility" means an identifiable piece of stationary process equipment along with all associated air pollution equipment.
18. "Federal mercury standards" means the emissions limits, monitoring, testing, recordkeeping, reporting and notification requirements applicable or relating to emissions of mercury from electric generating units under 40 CFR Part 63, Subpart UUUUU.
19. "Fugitive dust" means fugitive emissions of particulate matter.
20. "High sulfur oil" means fuel oil containing 0.90% or more by weight of sulfur.
21. "Inlet mercury" means the average concentration of mercury in the coal burned at an electric generating unit, as determined by ASTM methods, EPA-approved methods or alternative methods approved by the Director.
22. "Lime kiln" means a unit used to calcinate lime rock or kraft pulp mill lime mud, which consists primarily of calcium carbonate, into quicklime, which is calcium oxide.
23. "Low sulfur oil" means fuel oil containing less than 0.90% by weight of sulfur.
24. "Matte" means a metallic sulfide made by smelting copper sulfide ore concentrate or the roasted product of copper sulfide ores.
25. "Mercury" means mercury or mercury compounds in either a gaseous or particulate form.
26. "Miscellaneous metal parts and products" for purposes of industrial coating include all of the following:

- a. Large farm machinery, such as harvesting, fertilizing and planting machines, tractors, and combines;
- b. Small farm machinery, such as lawn and garden tractors, lawn mowers, and rototillers;
- c. Small appliances, such as fans, mixers, blenders, crock pots, dehumidifiers, and vacuum cleaners;
- d. Commercial machinery, such as office equipment, computers and auxiliary equipment, typewriters, calculators, and vending machines;
- e. Industrial machinery, such as pumps, compressors, conveyor components, fans, blowers, and transformers;
- f. Fabricated metal products, such as metal-covered doors and frames;
- g. Any other industrial category which coats metal parts or products under the Code in the “Standard Industrial Classification Manual, 1987” of Major Group 33 (primary metal industries), Major Group 34 (fabricated metal products), Major Group 35 (non-electric machinery), Major Group 36 (electrical machinery), Major Group 37 (transportation equipment), Major Group 38 (miscellaneous instruments), and Major Group 39 (miscellaneous manufacturing industries), except all of the following:
 - i. Automobiles and light-duty trucks;
 - ii. Metal cans;
 - iii. Flat metal sheets and strips in the form of rolls or coils;
 - iv. Magnet wire for use in electrical machinery;
 - v. Metal furniture;
 - vi. Large appliances;
 - vii. Exterior of airplanes;
 - viii. Automobile refinishing;
 - ix. Customized top coating of automobiles and trucks, if production is less than 35 vehicles per day;
 - x. Exterior of marine vessels.
27. “Multiple-effect evaporator system” means the multiple-effect evaporators and associated condenser and hotwell used to concentrate the spent cooking liquid that is separated from the pulp.
28. “Neutral sulfite semichemical pulping” means any operation in which pulp is produced from wood by cooking or digesting wood chips in a solution of sodium sulfite and sodium bicarbonate, followed by mechanical defibrating or grinding.
29. “Petroleum liquids” means petroleum, condensate, and any finished or intermediate products manufactured in a petroleum refinery but does not mean Number 2 through Number 6 fuel oils as specified in ASTM D396-90a (Specification for Fuel Oils), gas turbine fuel oils Numbers 2-GT through 4-GT as specified in ASTM D2880-90a (Specification for Gas Turbine Fuel Oils), or diesel fuel oils Numbers 2-D and 4-D as specified in ASTM D975-90 (Specification for Diesel Fuel Oils).
30. “Potential electric output capacity” means 33% of a unit’s maximum design heat input, divided by 3,413 Btu per kilowatt-hour, divided by 1,000 kilowatt-hours/per megawatt-hour, and multiplied by 8,760 hours per year.
31. “Process source” means the last operation or process which produces an air contaminant resulting from either:
 - a. The separation of the air contaminants from the process material, or
 - b. The conversion of constituents of the process materials into air contaminants which is not an air pollution abatement operation.
32. “Process weight” means the total weight of all materials introduced into a process source, including fuels, where these contribute to pollution generated by the process.
33. “Process weight rate” means a rate established pursuant to R18-2-702(E).
34. “Recovery furnace” means the unit, including the direct-contact evaporator for a conventional furnace, used for burning black liquor to recover chemicals consisting primarily of sodium carbonate and sodium sulfide.
35. “Reid vapor pressure” means the absolute vapor pressure of volatile crude oil and volatile non-viscous petroleum liquids, except liquified petroleum gases, as determined by ASTM D-323-90 (Test Method for Vapor Pressure of Petroleum Products) (Reid Method).
36. “Reveratory smelting furnace” means any vessel in which the smelting of copper sulfide ore concentrates or calcines is performed and in which the heat necessary for smelting is provided primarily by combustion of a fossil fuel.
37. “Rotary lime kiln” means a unit with an included rotary drum which is used to produce a lime product from limestone by calcination.
38. “Slag” means fused and vitrified matter separated during the reduction of a metal from its ore.
39. “Smelt dissolving tank” means a vessel used for dissolving the smelt collected from the kraft mill recovery furnace.
40. “Smelter feed” means all materials utilized in the operation of a copper smelter, including metals or concentrates, fuels and chemical reagents, calculated as the aggregate sulfur content of all fuels and other feed materials whose products of combustion and gaseous by-products are emitted to the atmosphere.
41. “Smelting” means processing techniques for the smelting of a copper sulfide ore concentrate or calcine charge leading to the formation of separate layers of molten slag, molten copper, or copper matte.
42. “Smelting furnace” means any vessel in which the smelting of copper sulfide ore concentrates or calcines is performed and in which the heat necessary for smelting is provided by an electric current, rapid oxidation of a portion of the sulfur contained in the concentrate as it passes through an oxidizing atmosphere, or the combustion of a fossil fuel.
43. “Standard conditions” means a temperature of 293K (68°F or 20°C) and a pressure of 101.3 kilopascals (29.92 in. Hg or 1013.25 mb).
44. “Supplementary control system” (SCS) means a system by which sulfur dioxide emissions are curtailed during periods when meteorological conditions conducive to ground-level concentrations in excess of ambient air quality standards for sulfur dioxide either exist or are anticipated.
45. “Vapor pressure” means the pressure exerted by the gaseous form of a substance in equilibrium with its liquid or solid form.

Historical Note

Former Section R18-2-701 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-701 renumbered from R18-2-501 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2). Amended by final rulemaking at 21 A.A.R. 711, effective June 30, 2015

(Supp. 15-2).

R18-2-702. General Provisions

- A. The provisions of this Article shall only apply to a source that is all of the following:
 1. An existing source, as defined in R18-2-101;
 2. A point source. For the purposes of this Section, "point source" means a source of air contaminants that has an identifiable plume or emissions point; and
 3. A stationary source, as defined in R18-2-101.
- B. Except as otherwise provided in this Chapter relating to specific types of sources, the opacity of any plume or effluent, from a source described in subsection (A), as determined by Reference Method 9 in 40 CFR 60, Appendix A, shall not be:
 1. Greater than 20% in an area that is nonattainment or maintenance for any particulate matter standard, unless an alternative opacity limit is approved by the Director and the Administrator as provided in subsections (D) and (E), after February 2, 2004;
 2. Greater than 40% in an area that is attainment or unclassifiable for each particulate matter standard; and
 3. After April 23, 2006, greater than 20% in any area that is attainment or unclassifiable for each particulate matter standard except as provided in subsections (D) and (E).
- C. If the presence of uncombined water is the only reason for an exceedance of any visible emissions requirement in this Article, the exceedance shall not constitute a violation of the applicable opacity limit.
- D. A person owning or operating a source may petition the Director for an alternative applicable opacity limit. The petition shall be submitted to ADEQ by May 15, 2004.
 1. The petition shall contain:
 - a. Documentation that the affected facility and any associated air pollution control equipment are incapable of being adjusted or operated to meet the applicable opacity standard. This includes:
 - i. Relevant information on the process operating conditions and the control devices operating conditions during the opacity or stack tests;
 - ii. A detailed statement or report demonstrating that the source investigated all practicable means of reducing opacity and utilized control technology that is reasonably available considering technical and economic feasibility; and
 - iii. An explanation why the source cannot meet the present opacity limit although it is in compliance with the applicable particulate mass emission rule.
 - b. If there is an opacity monitor, any certification and audit reports required by all applicable subparts in 40 CFR 60 and in Appendix B, Performance Specification 1.
 - c. A verification by a responsible official of the source of the truth, accuracy, and completeness of the petition. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
 2. If the unit for which the alternative opacity standard is being applied is subject to a stack test, the petition shall also include:
 - a. Documentation that the source conducted concurrent EPA Reference Method stack testing and visible emissions readings or is utilizing a continuous opacity monitor. The particulate mass emission test results shall clearly demonstrate compliance with the applicable particulate mass emission limitation by being at least 10% below that limit. For multiple units that are normally operated together and whose emissions vent through a single stack, the source shall conduct simultaneous particulate testing of each unit. Each control device shall be in good operating condition and operated consistent with good practices for minimizing emissions.
 - b. Evidence that the source conducted the stack tests according to R18-2-312, and that they were witnessed by the Director or the Director's agent or representative.
 - c. Evidence that the affected facility and any associated air pollution control equipment were operated and maintained to the maximum extent practicable to minimize the opacity of emissions during the stack tests.
 3. If the source for which the alternative opacity standard is being applied is located in a nonattainment area, the petitioner shall include all the information listed in subsections (D)(1) and (D)(2), and in addition:
 - a. In subsection (D)(1)(a)(ii), the detailed statement or report shall demonstrate that the alternative opacity limit fulfills the Clean Air Act requirement for reasonably available control technology; and
 - b. In subsection (D)(2)(b), the stack tests shall be conducted with an opportunity for the Administrator or the Administrator's agent or representative to be present.
- E. If the Director receives a petition under subsection (D) the Director shall approve or deny the petition as provided below by October 15, 2004:
 1. If the petition is approved under subsection (D)(1) or (D)(2), the Director shall include an alternative opacity limit in a proposed significant permit revision for the source under R18-2-320 and R18-2-330. The proposed alternative opacity limit shall be set at a value that has been demonstrated during, and not extrapolated from, testing, except that an alternative opacity limit under this Section shall not be greater than 40%. For multiple units that are normally operated together and whose emissions vent through a single stack, any new alternative opacity limit shall reflect the opacity level at the common stack exit, and not individual in-duct opacity levels.
 2. If the petition is approved under subsection (D)(3), the Director shall include an alternative opacity limit in a proposed revision to the applicable implementation plan, and submit the proposed revision to EPA for review and approval. The proposed alternative opacity limit shall be set at a value that has been demonstrated during, and not extrapolated from, testing, except that the alternative opacity limit shall not be greater than 40%.
 3. If the petition is denied, the source shall either comply with the 20% opacity limit or apply for a significant permit revision to incorporate a compliance schedule under R18-2-309(5)(c)(iii) by April 23, 2006.
 4. A source does not have to petition for an alternative opacity limit under subsection (D) to enter into a revised compliance schedule under R18-2-309(5)(c).
- F. The Director, Administrator, source owner or operator, inspector or other interested party shall determine the process weight rate, as used in this Article, as follows:
 1. For continuous or long run, steady-state process sources, the process weight rate is the total process weight for the entire period of continuous operation, or for a typical portion of that period, divided by the number of hours of the period, or portion of hours of that period.

2. For cyclical or batch process sources, the process weight rate is the total process weight for a period which covers a complete operation or an integral number of cycles, divided by the hours of actual process operation during the period.

Historical Note

Former Section R18-2-702 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-702 renumbered from R18-2-502 and amended effective November 15, 1993 (Supp. 93-4). Amended by exempt rulemaking at 9 A.A.R. 5550, effective February 3, 2004 (Supp. 03-4).

R18-2-703. Standards of Performance for Existing Fossil-fuel Fired Steam Generators and General Fuel-burning Equipment

A. This Section applies to the following:

1. Installations in which fuel is burned for the primary purpose of producing power, steam, hot water, hot air or other liquids, gases or solids and in the course of doing so the products of combustion do not come into direct contact with process materials. When any products or by-products of a manufacturing process are burned for the same purpose or in conjunction with any fuel, the same maximum emission limitation shall apply, except for wood waste burners as regulated under R18-2-704.
2. All fossil-fuel fired steam generating units or general fuel burning equipment which are greater than or equal to 73 megawatts capacity.

B. For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. The heat content of solid fuel shall be determined in accordance with R18-2-311. Compliance tests shall be conducted during operation at the nominal rated capacity of each unit.

C. No person shall cause, allow or permit the emission of particulate matter in excess of the amounts calculated by one of the following equations:

1. For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 1.02Q^{0.769}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 Q = the heat input in million Btu per hour.

2. For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:

$$E = 17.0Q^{0.432}$$
 where "E" and "Q" have the same meaning as in subsection (C)(1).

D. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.

E. When low sulfur oil is fired:

1. Existing fuel-burning equipment or steam-power generating installations which commenced construction or a major modification prior to May 30, 1972, shall not emit more than 1.0 pounds sulfur dioxide maximum three-hour average, per million Btu (430 nanograms per joule) heat input.
2. Existing fuel-burning equipment or steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit more than 0.80 pounds of sulfur dioxide maximum three-hour average per million Btu (340 nanograms per joule) heat input.

- F. When high sulfur oil is fired, all existing steam-power generating and general fuel-burning installations which are subject to the provisions of this Section shall not emit more than 2.2 pounds of sulfur dioxide maximum three-hour average per million Btu (946 nanograms per joule) heat input.

G. When solid fuel is fired:

1. Existing general fuel-burning equipment and steam-power generating installations which commenced construction or a major modification prior to May 30, 1972, shall not emit more than 1.0 pounds of sulfur dioxide maximum three-hour average, per million Btu (430 nanograms per joule) heat input.
2. Existing general fuel-burning equipment and steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit more than 0.80 pounds of sulfur dioxide, maximum three-hour average, per million Btu (340 nanograms per joule) heat input.

H. Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee, unless the applicant demonstrates to the satisfaction of the Director that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.

1. The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
2. In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
3. When the conditions justifying the use of high sulfur oil no longer exists, the permit shall be modified accordingly.
4. Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.

I. Existing steam-power generating installations which commenced construction or a major modification after May 30, 1972, shall not emit nitrogen oxides in excess of the following amounts:

1. 0.20 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when gaseous fossil fuel is fired.
2. 0.30 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when liquid fossil fuel is fired.
3. 0.70 pounds of nitrogen oxides, maximum three-hour average, calculated as nitrogen dioxide, per million Btu heat input when solid fossil fuel is fired.

J. Emission and fuel monitoring systems, where deemed necessary by the Director for sources subject to the provisions of this Section shall, conform to the requirements of R18-2-313.

K. The applicable reference methods given in the Appendices to 40 CFR 60 shall be used to determine compliance with the standards as prescribed in subsections (C) through (G) and (I). All tests shall be run at the heat input calculated under subsection (B).

Historical Note

Former Section R18-2-703 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-703 renumbered from R18-2-503 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Amended by final rulemaking at 15 A.A.R. 281, effective

March 7, 2009 (Supp. 09-1).

R18-2-704. Standards of Performance for Incinerators

- A.** No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator, smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 20% opacity except during the times specified in subsection (D).
- B.** No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any incinerator, in excess of the following limits:
 1. For multiple chamber incinerators, controlled atmosphere incinerators, fume incinerators, afterburners or other unspecified types of incinerators, emissions shall not exceed 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
 2. For wood waste burners other than air curtain destructors, emissions discharged from the stack or burner top opening shall not exceed 0.2 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
- C.** Air curtain destructors shall not be used within 500 feet of the nearest dwelling.
- D.** Incinerators shall be exempt from the opacity and emission requirements described in subsections (A) and (B) as follows:
 1. For multiple chamber incinerators, controlled atmosphere incinerators, fume incinerators, afterburners or other unspecified types of incinerators, such exemption shall be for not more than 30 seconds in any 60-minute period.
 2. Wood waste burners shall be exempt both:
 - a. For a period once each day for the purpose of building a new fire but not to exceed 60 minutes, and
 - b. For an upset of operations not to exceed three minutes in any 60-minute period.
- E.** The owner or operator of any incinerator subject to the provisions of this Section shall record the daily charging rates and hours of operation.
- F.** The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A, shall be used to determine compliance with the standards prescribed in subsection (B) as follows:
 - a. Method 5 for the concentration of particulate matter and the associated moisture content;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis and calculation of excess air, using the integrated sampling technique.
 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 0.85 dscm (30.0 dscf) except that smaller sampling times or sample volumes, when necessitated by process variables or other factors, may be approved by the Director.

Historical Note

Former Section R18-2-704 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-704 renumbered from R18-2-504 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

R18-2-705. Standards of Performance for Existing Portland Cement Plants

- A.** The provisions of this Section are applicable to the following affected facilities in portland cement plants: kiln, clinker

cooler, raw mill system, finish mill system, raw mill dryer, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems.

- B.** No person shall cause, allow or permit the discharge of particulate matter from any identifiable process source within any existing cement plant subject to the provisions of this Section which exceeds the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:
$$E = 4.10P^{0.67}$$
where:
E = the maximum allowable particulate emissions rate in pounds-mass per hour.
P = the process weight rate in tons-mass per hour.
 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:
$$E = 55.0P^{0.11}-40$$
where "E" and "P" are defined as indicated in subsection (B)(1).
- C.** No process source within any portland cement plant shall exceed 20% opacity.
- D.** No person shall cause, allow or permit discharge into the atmosphere of an amount in excess of 6 pounds of sulfur oxides, calculated as sulfur dioxide, per ton cement kiln feed from cement plants subject to the provisions of this Section.
- E.** The owner or operator of any portland cement plant subject to the provisions of this Section shall record the daily production rates and the kiln feed rates.
- F.** The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A, except as provided for in R18-2-312 shall be used to determine compliance with the standards prescribed in subsection (B) as follows:
 - a. Method 5 for the concentration of particulate matter and the associated moisture content;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis.
 2. For Method 5, the minimum sampling time and minimum sample volume for each run except when process variables or other factors justifying otherwise to the satisfaction of the Director, shall be as follows:
 - a. 60 minutes and 0.85 dscm (30.0 dscf) for the kiln,
 - b. 60 minutes and 1.15 dscm (40.6 dscf) for the clinker cooler.
 3. Total kiln feed rate, except fuels, expressed in metric tons per hour on a dry basis, shall be both:
 - a. Determined during each testing period by suitable methods; and
 - b. Confirmed by a material balance over the production system.
 4. For each run, particulate matter emissions, expressed in g/metric ton of kiln feed, shall be determined by dividing the emission rate in g/hr by the kiln feed rate. The emission rate shall be determined by the equation, $g/hr = Q_s \times c$, where Q_s = volumetric flow rate of the total effluent in dscm/hr as determined in accordance with subsection (F)(1)(c), and c = particulate concentration in g/dscm as determined in accordance with subsection (F)(1)(a).

Historical Note

Former Section R18-2-705 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-705 renumbered from R18-2-505 effective November 15, 1993 (Supp. 93-4).

R18-2-706. Standards of Performance for Existing Nitric Acid Plants

- A. No person shall cause, allow or permit discharge from any nitric acid plant producing weak nitric acid, which is either:
 1. 30 to 70% in strength by either the increased pressure or atmospheric pressure process, or
 2. More than 1.5 kg of total oxides of nitrogen per metric ton (3.0 lbs/ton) of acid produced expressed as nitrogen dioxide.
- B. The opacity of any plume subject to the provisions of this Section shall not exceed 10%.
- C. A continuous monitoring system for the measurement of nitrogen oxides shall be installed, calibrated, maintained and operated by the owner or operator, in accordance with Section R18-2-313.
- D. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with the standard prescribed in subsection (A) as follows:
 - a. Method 7 for the concentration of NO_x ;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis.
 2. For Method 7, the sample site shall be selected according to Method 1 and the sampling point shall be the centroid of the stack or duct or at a point no closer to the walls than 1 m (3.28 ft.). Each run shall consist of at least four grab samples taken at approximately 15-minute intervals. The arithmetic mean of the samples shall constitute the run value. A velocity traverse shall be performed once per run.
 3. Acid production rate, expressed in metric tons per hour of 100% nitric acid, shall be both:
 - a. Determined during each testing period by suitable methods, and
 - b. Confirmed by a material balance over the production system.
 4. For each run, nitrogen oxides, expressed in g/metric ton of 100% nitric acid, shall be determined by dividing the emission rate in g/hr by the acid production rate. The emission rate shall be determined by the equation:

$$\text{g/hr} = Q_s \times c$$
 where Q_s = volumetric flow rate of the effluent in dscm/hr, as determined in accordance with subsection (D)(1)(c), and c = NO_x concentration in g/dscm, as determined in accordance with subsection (D)(1)(a).

Historical Note

Former Section R18-2-706 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-706 renumbered from R18-2-506 effective November 15, 1993 (Supp. 93-4).

R18-2-707. Standards of Performance for Existing Sulfuric Acid Plants

- A. Facilities that produce sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfide and mercaptans or acid sludge shall not discharge into the atmosphere:
 1. Greater than 2 kg of sulfur dioxide per metric ton (4 lbs/ton) of sulfuric acid produced (calculated as 100% H_2SO_4), or
 2. Greater than 0.075 kg of sulfuric acid mist per metric ton (0.15 lbs/ton) or sulfuric acid produced (calculated as 100% H_2SO_4).

- B. This Section shall not apply to metallurgical plants or other facilities where conversion to sulfuric acid is utilized as a means of controlling emissions to the atmosphere of sulfur dioxide or other sulfur compounds.
- C. A continuous monitoring system for the measurement of sulfur dioxide shall be installed, calibrated, maintained and operated by the owner or operator, in accordance with R18-2-313.
- D. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with standards prescribed in subsection (A) as follows:
 - a. Method 8 for concentration of SO_2 and acid mist;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis.
 2. The moisture content can be considered to be zero. For Method 8 the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 1.15 dscm (40.6 dscf) except that smaller sampling times or sample volumes, when necessitated by process variables or other factors, may be approved by the Director.
 3. Acid production rate, expressed in metric tons per hour of 100% H_2SO_4 , shall be both:
 - a. Determined during each testing period by suitable methods, and
 - b. Confirmed by a material balance over the production system.
 4. Acid mist and sulfur dioxide emissions, expressed in g/metric ton of 100% H_2SO_4 , shall be determined by dividing the emission rate in g/hr by the acid production rate. The emission rate shall be determined by the equation, $\text{g/hr} = Q_s \times c$, where Q_s = volumetric flow rate of the effluent in dscm/hr as determined in accordance with subsection (D)(1)(c), and c = acid mist and SO_2 concentrations in g/dscm as determined in accordance with subsection (D)(1)(a).

Historical Note

Former Section R18-2-707 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-707 renumbered from R18-2-507 effective November 15, 1993 (Supp. 93-4).

R18-2-708. Standards of Performance for Existing Asphalt Concrete Plants

- A. Fixed asphalt concrete plants and portable asphalt concrete plants shall meet the standards set forth in this Section.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any existing asphalt concrete plant in total quantities in excess of the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 - E = the maximum allowable particulate emission rate in pounds-mass per hour.
 - P = the process weight rate in tons-mass per hour.

2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where "E" and "P" are defined as indicated in subsection (B)(1).

- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- E. Liquid fuel containing greater than 0.9% sulfur by weight shall not be utilized for asphalt concrete plants subject to this Section.
- F. Solid fuel containing greater than 0.5% sulfur by weight shall not be utilized for asphalt concrete plants subject to this Section.
- G. The test methods and procedures required under this Section are:
 1. The referenced methods given in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in subsection (B).
 - a. Method 5 for the concentration of particulate matter and the associated moisture content,
 - b. Method 1 for sample and velocity traverses,
 - c. Method 2 for velocity and volumetric flow rate,
 - d. Method 3 for gas analysis.
 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.9 dscm/hr (0.53 dscf/min) except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.
 3. Percent sulfur in liquid fuel shall be determined by ASTM method D-129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method), and the percent sulfur in solid fuel shall be determined by ASTM method D-3177-89 (Test Method for Total Sulfur in the Analysis Sample of Coal and Coke).

Historical Note

Former Section R18-2-708 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-708 renumbered from R18-2-508 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-709. Expired

Historical Note

Former Section R18-2-709 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-709 renumbered from R18-2-509 and amended effective November 15, 1993 (Supp. 93-4). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

R18-2-710. Standards of Performance for Existing Storage Vessels for Petroleum Liquids

- A. No person shall place, store or hold in any reservoir, stationary tank or other container having a capacity of 40,000 (151,400 liters) or more gallons any petroleum liquid having a vapor pressure of 1.5 pounds per square inch absolute or greater under actual storage conditions, unless such tank, reservoir or other container is a pressure tank maintaining working pressure sufficient at all times to prevent hydrocarbon vapor or gas

loss to the atmosphere, or is equipped with one of the following vapor loss control devices, properly installed, in good working order and in operation:

1. A floating roof consisting of a pontoon type double-deck type roof resting on the surface of the liquid contents and equipped with a closure seal to close the space between the roof eave and tank wall and a vapor balloon or vapor dome, designed in accordance with accepted standards of the petroleum industry. The control equipment shall not be used if the petroleum liquid has a vapor pressure of 12 pounds per square inch absolute or greater under actual storage conditions.
 - a. All tank gauging and sampling devices shall be gas-tight except when gauging or sampling is taking place.
 - b. There shall be no visible holes, tears, or other openings in the seal or any seal fabric. Where applicable, all openings except drains shall be equipped with a cover, seal, or lid. The cover, seal, or lid shall be in a closed position at all times, except when the device is in actual use.
 - c. Automatic bleeder vents shall be closed at all times, except when the roof is floated off or landed on the roof leg supports.
 - d. Rim vents, if provided, shall be set to open when the roof is being floated off the roof leg supports, or at the manufacturer's recommended setting.
2. Other equipment proven to be of equal efficiency for preventing discharge of hydrocarbon gases and vapors to the atmosphere.
- B. Any other petroleum liquid storage tank shall be equipped with a submerged filling device, or acceptable equivalent, for the control of hydrocarbon emissions.
- C. All facilities for dock loading of petroleum products, having a vapor pressure of 1.5 pounds per square inch absolute or greater at loading pressure, shall provide for submerged filling or acceptable equivalent for control of hydrocarbon emissions.
- D. All pumps and compressors which handle volatile organic compounds shall be equipped with mechanical seals or other equipment of equal efficiency to prevent the release of organic contaminants into the atmosphere.
- E. The monitoring of operations required by this Section is as follows:
 1. The owner or operator of any petroleum liquid storage vessel to which this Section applies shall for each such storage vessel maintain a file of each type of petroleum liquid stored, of the typical Reid vapor pressure of each type of petroleum liquid stored and of dates of storage. Dates on which the storage vessel is empty shall be shown.
 2. The owner or operator of any petroleum liquid storage vessel to which this Section applies shall for such storage vessel determine and record the average monthly storage temperature and true vapor pressure of the petroleum liquid stored at such temperature if either:
 - a. The petroleum liquid has a true vapor pressure, as stored, greater than 26 mm Hg (0.5 psia) but less than 78 mm Hg (1.5 psia) and is stored in a storage vessel other than one equipped with a floating roof, a vapor recovery system or their equivalents; or
 - b. The petroleum liquid has a true vapor pressure, as stored, greater than 470 mm Hg (9.1 psia) and is stored in a storage vessel other than one equipped with a vapor recovery system or its equivalent.
 3. The average monthly storage temperature shall be an arithmetic average calculated for each calendar month, or

portion thereof, if storage is for less than a month, from bulk liquid storage temperatures determined at least once every seven days.

4. The true vapor pressure shall be determined by the procedures in American Petroleum Institute Bulletin 2517, amended as of February 1980 (and no future editions), which is incorporated herein by reference and on file with the Office of the Secretary of State. This procedure is dependent upon determination of the storage temperature and the Reid vapor pressure, which requires sampling of the petroleum liquids in the storage vessels. Unless the Director requires in specific cases that the stored petroleum liquid be sampled, the true vapor pressure may be determined by using the average monthly storage temperature and the typical Reid vapor pressure. For those liquids for which certified specifications limiting the Reid vapor pressure exist, the Reid vapor pressure may be used. For other liquids, supporting analytical data must be made available upon request to the Director when typical Reid vapor pressure is used.

Historical Note

Section R18-2-710 renumbered from R18-2-510 effective November 15, 1993 (Supp. 93-4).

R18-2-711. Expired

Historical Note

Section R18-2-711 renumbered from R18-2-511 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

R18-2-712. Expired

Historical Note

Section R18-2-712 renumbered from R18-2-512 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

R18-2-713. Expired

Historical Note

Section R18-2-713 renumbered from R18-2-513 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

R18-2-714. Standards of Performance for Existing Sewage Treatment Plants

- A. No person shall cause, allow or permit to be emitted into the atmosphere, from any municipal sewage treatment plant sludge incinerator:
 1. Smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 20% opacity for more than 30 seconds in any 60-minute period.
 2. Particulate matter in concentrations in excess of 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
- B. The owner or operator of any sludge incinerator subject to the provisions of this Section shall monitor operations by doing all of the following:
 1. Install, calibrate, maintain and operate a flow measuring device which can be used to determine either the mass or volume of sludge charged to the incinerator. The flow measuring device shall have an accuracy of $\pm 5\%$ over its operating range.
 2. Provide access to the sludge charged so that a well-mixed representative grab sample of the sludge can be obtained.
 3. Install, calibrate, maintain and operate a weighing device for determining the mass of any municipal solid waste charged to the incinerator when sewage sludge and municipal solid wastes are incinerated together. The weighing device shall have an accuracy of $\pm 5\%$ over its operating range.

C. The test methods and procedures required by this Section are as follows:

1. The reference methods set forth in 40 CFR 60, Appendix A shall be used to determine compliance with the standards prescribed in subsection (A) as follows:
 - a. Method 5 for concentration of particulate matter and associated moisture content;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for volumetric flow rate; and
 - d. Method 3 for gas analysis.
2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.015 dscm/min (0.53 dscf/min), except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.

Historical Note

Section R18-2-714 renumbered from R18-2-514 effective November 15, 1993 (Supp. 93-4).

R18-2-715. Standards of Performance for Existing Primary Copper Smelters; Site-specific Requirements

- A. No owner or operator of a primary copper smelter shall cause, allow or permit the discharge of particulate matter into the atmosphere from any process in total quantities in excess of the amount calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (A)(1).
- B. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- C. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter for that process.
- D. The opacity of emissions subject to the provisions of this Section shall not exceed 20%.
- E. The reference methods set forth in the Arizona Testing Manual and 40 CFR 60, Appendix A, as incorporated by reference in

Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in this Section as follows:

1. Method A1 or Reference Method 5 for concentration of particulate matter and associated moisture content,
 2. Reference Method 1 for sample and velocity traverses,
 3. Reference Method 2 for volumetric flow rate,
 4. Reference Method 3 for gas analysis.
- F.** Except as provided in a consent decree or a delayed compliance order, the owner or operator of any primary copper smelter shall not discharge or cause the discharge of sulfur dioxide into the atmosphere from any stack required to be monitored by R18-2-715.01(K) in excess of the following:
1. For the copper smelter located near Hayden, Arizona at latitude 33°0'29"N and longitude 110°47'17" W:
 - a. Annual average emissions, as calculated under R18-2-715.01(C), shall not exceed 6,882 pounds per hour.
 - b. The number of three-hour average emissions, as calculated under R18-2-715.01(C), shall not exceed n cumulative occurrences in excess of E, the emission level, shown in the following table in any compliance period as defined in R18-2-715.01(J):

n, Cumulative Occurrences	E, (lb/hr)
0	24,641
1	22,971
2	21,705
4	20,322
7	19,387
12	18,739

1340	9,748
1610	9,319
1910	8,953
2240	8,556

2. For the copper smelter located near Miami, Arizona at latitude 33°24'50"N and longitude 110°51'25"W:
 - a. Annual average emissions, as calculated under R18-2-715.01(C), shall not exceed 604 pounds per hour.
 - b. The number of three-hour average emissions, as calculated under R18-2-715.01(C), shall not exceed n cumulative occurrences in excess of E, the emission level, shown in the following table in any compliance period as defined in R18-2-715.01(J):

n, Cumulative Occurrences	E, (lb/hr)
0	8678
1	7158
2	5903
4	4575

1340	797
1610	765
1910	739
2240	712

- G.** Except as provided in a consent decree or a delayed compliance order, for the copper smelter located near Hayden, Arizona at latitude 33°0'29"N and longitude 110°47'17"W, annual average fugitive emissions calculated under R18-2-715.01(T) shall not exceed 295 pounds per hour.
- H.** In addition to the limits in subsection (F)(3), except as provided in a consent decree or a delayed compliance order, the owner or operator of the copper smelter located near Miami, Arizona at latitude 33°24'50"N and longitude 110°51'25"W shall not discharge or cause the discharge of sulfur dioxide into the atmosphere from combined stack and fugitive emissions units in excess of the 2420 pounds per hour annual average calculated under R18-2-715.01(U).
- I.** The owner and operator of the copper smelter located near Hayden, Arizona at the latitude and longitude provided in R18-2-715(F)(1) shall comply with Section R18-2-715(F)(1) and R18-2-715(G) until the effective date of R18-2-B1302 as determined by R18-2-B1302(A)(2). The owner and operator of the copper smelter located near Miami, Arizona at the latitude and longitude provided in R18-2-715(F)(2) shall comply with Section R18-2-715(F)(2) and R18-2-715(H) until the effective date of R18-2-C1302 as determined by R18-2-C1302(A)(2).

Historical Note

Section R18-2-715 renumbered from R18-2-515 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 575, effective January 15, 2002 (Supp. 02-1). Amended by final rulemaking at 8 A.A.R. 3365, effective July 18, 2002 (Supp. 02-3). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Amended by final rulemaking at 15 A.A.R. 281, effective March 7,

2009 (Supp. 09-1). Amended by final rulemaking at 23 A.A.R. 767, effective May 7, 2017, (Supp. 17-1).

R18-2-715.01. Standards of Performance for Existing Primary Copper Smelters; Compliance and Monitoring

- A.** The cumulative occurrence and emission limits in R18-2-715(F) apply to the total of sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not uncaptured fugitive emissions or emissions due solely to the use of fuel for space heating or steam generation.
- B.** The owner or operator shall include periods of malfunction, startup, shutdown or other upset conditions when determining compliance with the cumulative occurrence or annual average emission limits in R18-2-715(F), (G), or (H).
- C.** The owner or operator shall determine compliance with the cumulative occurrence and emission limits contained in R18-2-715(F) as follows:
 1. The owner or operator shall calculate annual average emissions at the end of each day by averaging the emissions for all hours measured during the compliance period defined in subsection (J) ending on that day. An annual emissions average in excess of the allowable annual average emission limit is a violation of R18-2-715(F) if either:
 - a. The annual average is greater than the annual average computed for the preceding day; or
 - b. The annual averages computed for the five preceding days all exceed the allowable annual average emission limit.
 2. The owner or operator shall calculate a three-hour emissions average at the end of each clock hour by averaging the hourly emissions for the preceding three consecutive hours provided each hour was measured according to the requirements in subsection (K).
- D.** For purposes of this Section, the compliance date, unless otherwise provided in a consent decree or a delayed compliance order, shall be January 14, 1986, except that:
 1. The compliance date for the cumulative occurrence and emissions limits in R18-2-715(F)(1) and R18-2-715(G) is January 15, 2002, and
 2. The compliance date for the cumulative occurrence and emissions limits in R18-2-715(F)(2), (F)(3), (G), and (H) is the effective date of this rule.
- E.** For purposes of subsection (C), a three-hour emissions average in excess of an emission level E violates the associated cumulative occurrence limit n listed in R18-2-715(F) if:
 1. The number of all three-hour emissions averages calculated during the compliance period in excess of that emission level exceeds the cumulative occurrence limit associated with the emission level; and
 2. The average is calculated during the last operating day of the compliance period being reported.
- F.** A three-hour emissions average only violates the cumulative occurrence limit n of an emission level E on the day containing the last hour in the average.
- G.** Multiple violations of the same cumulative occurrence limit on the same day and violations of different cumulative occurrence limits on the same day constitute a single violation of R18-2-715(F).
- H.** The violation of any cumulative occurrence limit and an annual average emission limit on the same day constitutes only a single violation of the requirements of R18-2-715(F).
- I.** Multiple violations of a cumulative occurrence limit by different three-hour emissions averages containing any common hour constitutes a single violation of R18-2-715(F).
- J.** To determine compliance with subsections (C) through (I), the compliance period consists of the 365 calendar days immediately preceding the end of each day of the month being reported unless that period includes less than 300 operating days, in which case the number of days preceding the last day of the compliance period shall be increased until the compliance period contains 300 operating days. For purposes of this Section, an operating day is any day on which sulfur-containing feed is introduced into the smelting process.
- K.** To determine compliance with R18-2-715(F) or (H), the owner or operator of any smelter subject to R18-2-715(F) or (H) shall install, calibrate, maintain, and operate a measurement system for continuously monitoring sulfur dioxide concentrations and stack gas volumetric flow rates in each stack that could emit five percent or more of the allowable annual average sulfur dioxide emissions from the smelter.
 1. The owner or operator shall continuously monitor sulfur dioxide concentrations and stack gas volumetric flow rates in the outlet of each piece of sulfur dioxide control equipment.
 2. The owner or operator shall continuously monitor captured fugitive emissions for sulfur dioxide concentrations and stack gas volumetric flow rates and include these emissions as part of total plant emissions when determining compliance with the cumulative occurrence and emission limits in R18-2-715(F) and (H).
 3. If the owner or operator demonstrates to the Director that measurement of stack gas volumetric flow in the outlet of any particular piece of sulfur dioxide control equipment would yield inaccurate results once operational or would be technologically infeasible, then the Director may allow measurement of the flow rate at an alternative sampling point.
 4. For purposes of this subsection, continuous monitoring means the taking and recording of at least one measurement of sulfur dioxide concentration and stack gas flow rate reading from the effluent of each affected stack, outlet, or other approved measurement location in each 15-minute period. Fifteen-minute periods start at the beginning of each clock hour, and run consecutively. An hour of smelter emissions is considered continuously monitored if the emissions from all monitored stacks, outlets, or other approved measurement locations are measured for at least 45 minutes of any hour according to the requirements of this subsection.
 5. The owner or operator shall demonstrate that the continuous monitoring system meets all of the following requirements:
 - a. The sulfur dioxide continuous emission monitoring system installed and operated under this Section meets the requirements of 40 CFR 60, Appendix B, Performance Specification 6.
 - b. The sulfur dioxide continuous emission monitoring system installed and operated under this Section meets the quality assurance requirements of 40 CFR 60, Appendix F.
 - c. The owner or operator shall notify the Director in writing at least 30 days in advance of the start of relative accuracy test audit (RATA) procedures performed on the continuous monitoring system.
 - d. The Director shall approve the location of all sampling points for monitoring sulfur dioxide concentrations and stack gas volumetric flow rates in writing before installation and operation of measurement instruments.

- e. The measurement system installed and used under this subsection is subject to the manufacturer's recommended zero adjustment and calibration procedures at least once per 24-hour operating period unless the manufacturer specifies or recommends calibration at shorter intervals, in which case specifications or recommendations shall be followed. The owner or operator shall make available a record of these procedures that clearly shows instrument readings before and after zero adjustment and calibration.
- L. The owner or operator of a smelter subject to this Section shall measure at least 95 percent of the hours during which emissions occurred in any month.
- M. Failure of the owner or operator of a smelter subject to this Section to measure any 12 consecutive hours of emissions according to the requirements of subsection (K) or (S) is a violation of this Section.
- N. The owner or operator of any smelter subject to this Section shall maintain on hand and ready for immediate installation sufficient spare parts or duplicate systems for the continuous monitoring equipment required by this Section to allow for the replacement within six hours of any monitoring equipment part that fails or malfunctions during operation.
- O. To determine total overall emissions, the owner or operator of any smelter subject to this Section shall perform material balances for sulfur according to the procedures prescribed by Appendix 8 of this Chapter.
- P. The owner or operator of any smelter subject to this Section shall maintain a record of all average hourly emissions measurements and all calculated average monthly emissions required by this Section. The record of the emissions shall be retained for at least five years following the date of measurement or calculation. The owner or operator shall record the measurement or calculation results as pounds per hour of sulfur dioxide. The owner or operator shall summarize the following data monthly and submit the summary to the Director within 20 days after the end of each month:
 1. For all periods described in subsection (C) and (R), the annual average emissions as calculated at the end of each day of the month;
 2. The total number of hourly periods during the month in which measurements were not taken and the reason for loss of measurement for each period;
 3. The number of three-hour emissions averages that exceeded each of the applicable emissions levels listed in R18-2-715(F) and (G) for the compliance periods ending on each day of the month being reported;
 4. The date on which a cumulative occurrence limit listed in R18-2-715(F) or (G) was exceeded if the exceedance occurred during the month being reported; and
 5. For all periods described in subsection (T) and (U), the annual average emissions as calculated at the end of the last day of each month.
- Q. An owner or operator shall install instrumentation to monitor each point in the smelter facility where a means exists to bypass the sulfur removal equipment, to detect and record all periods that the bypass is in operation. An owner or operator of a copper smelter shall report to the Director, not later than the 15th day of each month, the recorded information required by this Section, including an explanation for the necessity of the use of the bypass.
- R. The owner or operator shall determine compliance with the cumulative occurrence and fugitive emission limits contained in R18-2-715(G) as follows:
 1. The owner or operator shall calculate annual average emissions at the end of each day by averaging the emissions for all hours measured during the compliance period, as defined in subsection (R)(8), ending on that day. An annual emissions average in excess of the allowable annual average emission limit is a violation of R18-2-715(G) if either:
 - a. The annual average is greater than the annual average computed for the preceding day; or
 - b. The annual averages computed for the five preceding days all exceed the allowable annual average emission limit.
 2. The owner or operator shall calculate a three-hour emissions average at the end of each clock hour by averaging the hourly emissions for the preceding three consecutive hours provided each hour was measured according to the requirements contained in subsection (S).
 3. For purposes of subsection (R)(2), a three-hour emissions average in excess of an emission level E_f violates the associated cumulative occurrence limit listed in R18-2-715(G) if:
 - a. The number of all three-hour emissions averages calculated during the compliance period in excess of that emission level exceeds the cumulative occurrence limit associated with the emission level; and
 - b. The average is calculated during the last operating day of the compliance period being reported.
 4. A three-hour emissions average only violates the cumulative occurrence limit n of an emission level E_f on the day containing the last hour in the average.
 5. Multiple violations of the same cumulative occurrence limit on the same day and violations of different cumulative occurrence limits on the same day constitute a single violation of R18-2-715(G).
 6. The violation of any cumulative occurrence limit and an annual average emission limit on the same day constitutes only a single violation of the requirements of R18-2-715(G).
 7. Multiple violations of a cumulative occurrence limit by different three-hour emissions averages containing any common hour constitutes a single violation of R18-2-715(G).
 8. To determine compliance with subsections (R)(1) through (7), the compliance period consists of the 365 calendar days immediately preceding the end of each day of the month being reported unless that period includes less than 300 operating days, in which case the number of days preceding the last day of the compliance period shall be increased until the compliance period contains 300 operating days. For purposes of this Section, an operating day is any day on which sulfur-containing feed is introduced into the smelting process.
- S. To determine compliance with R18-2-715(G), the owner or operator of the smelter subject to R18-2-715(G) shall install, calibrate, maintain, and operate a measurement system for continuously monitoring sulfur dioxide concentrations of the converter roof fugitive emissions.
 1. For purposes of this subsection, continuous monitoring means the taking and recording of at least one measurement of sulfur dioxide concentration from an approved measurement location in each 15-minute period. Fifteen-minute periods start at the beginning of each clock hour, and run consecutively. An hour of smelter emissions is considered continuously monitored if the emissions from all approved measurement locations are measured for at

least 45 minutes of any hour according to the requirements of this subsection.

2. The owner or operator of a smelter subject to the requirements of this subsection shall conduct quality assurance procedures on the continuous monitoring system according to the methods in 40 CFR 60, Appendix F, except that an annual relative accuracy test audit (RATA) is not required.
- T. The emission limit in R18-2-715(G) applies to the total of uncaptured fugitive sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not emissions due solely to the use of fuel for space heating or steam generation. The owner or operator shall determine compliance with the emission limit contained in R18-2-715(G) as follows:
 1. The owner or operator shall calculate annual average fugitive emissions at the end of the last day of each month by averaging the monthly emissions for the previous 12-month period ending on that day. To determine monthly fugitive emissions, the owner or operator shall perform material balances for sulfur according to the sulfur balance procedures prescribed in Appendix 8 of this Chapter.
 2. An annual emissions average in excess of the allowable annual average emission limit violates R18-2-715(G) if the fugitive annual average computed at the end of each month exceeds the allowable annual average emission limit.
- U. The emission limit in R18-2-715(H) applies to the total of stack and uncaptured fugitive sulfur dioxide emissions from the smelter processing units and sulfur dioxide control and removal equipment, but not emissions due solely to the use of fuel for space heating or steam generation. The owner or operator shall determine compliance with the emission limit contained in R18-2-715(H) as follows:
 1. The owner or operator shall calculate annual average stack emissions at the end of the last day of each month by averaging the emissions for all hours measured during the previous 12-month period ending on that day according to the requirements contained in subsection (K).
 2. The owner or operator shall calculate annual average fugitive emissions at the end of the last day of each month by averaging the monthly emissions for the previous 12-month period ending on that day. To determine monthly fugitive emissions, the owner or operator shall perform material balances for sulfur according to the sulfur balance procedures prescribed in Appendix 8 of this Chapter.
 3. An annual emissions average in excess of the allowable annual average emission limit violates R18-2-715(H) if the total of the stack and fugitive annual averages computed at the end of each month exceeds the allowable annual average emission limit.
- V. The owner and operator of the copper smelter located near Hayden, Arizona at the latitude and longitude provided in R18-2-715(F)(1) shall comply with Section R18-2-715.01 until the effective date of R18-2-B1302 as determined by R18-2-B1302(A)(2). The owner and operator of the copper smelter located near Miami, Arizona at the latitude and longitude provided in R18-2-715(F)(2) shall comply with Section R18-2-715.01 until the effective date of R18-2-C1302 as determined by R18-2-C1302(A)(2).

Historical Note

Section R18-2-715.01 renumbered from R18-2-515.01 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 8 A.A.R. 575, effective

January 15, 2002 (Supp. 02-1). Amended by final rulemaking at 8 A.A.R. 3365, effective July 18, 2002 (Supp. 02-3). Amended by final rulemaking at 23 A.A.R. 767, effective May 7, 2017, (Supp. 17-1).

R18-2-715.02. Standards of Performance for Existing Primary Copper Smelters; Fugitive Emissions

- A. For purposes of this Section, the compliance date, unless otherwise provided in a consent decree or a delayed compliance order, shall be January 14, 1986.
- B. No later than 24 months before the compliance date, the owner or operator of a smelter subject to R18-2-715 shall submit to the Director the results of an evaluation of the fugitive emissions from the smelter. The evaluation results shall contain all of the following information:
 1. A measurement or accurate estimate of total fugitive emissions from the smelter during typical operations, including planned start-up and shutdown. The measurement or estimate shall contain the amount of both average short-term (24 hours) and average long-term (monthly) fugitive emissions from the smelter. The evaluation plan shall be approved in advance by the Department and shall specify the method used to determine the fugitive emission amounts, including the conditions determined to be "typical operations" for the smelter.
 2. A measurement or accurate estimate of the relative proportion, expressed as a percentage, of total fugitive emissions during typical operations, including planned start-up and shutdown, produced by any of the following smelter processes:
 - a. Roaster or dryer operation;
 - b. Calcine or dried concentrate transfer;
 - c. Reverberatory furnace operations, including feeding, slag return, matte and slag tapping;
 - d. Matte transfer; and
 - e. Converter operations.
 3. The measurement technique or method of estimation used to fulfill the requirement in subsection (B)(2) shall be approved in advance by the Department.
 4. The results of at least a six-month fugitive emission impact analysis conducted during that part of the year when fugitive emissions are expected to have the greatest ambient air quality impact. The study shall utilize sufficient measurements of fugitive emissions, meteorological conditions and ambient sulfur dioxide concentrations to associate fugitive emissions with specific measured ambient concentrations of sulfur dioxide. The study shall describe in detail the techniques used to make the required determinations. The design of the study shall be approved in advance by the Department.
- C. On the basis of the results of the evaluation as well as other data and information contained in the records of the Department, the Director shall determine whether fugitive emissions from a particular smelter have the potential to cause or significantly contribute to violations of the ambient sulfur dioxide standards in the vicinity of the smelter. If the Director finds that fugitive emissions from a particular smelter have the potential to cause or significantly contribute to violations of ambient sulfur dioxide standards in the vicinity of a smelter, then the Director shall adopt rules specifying the emission limits and undertake other appropriate measures necessary to maintain ambient sulfur dioxide standards.
- D. The requirements of subsection (B) shall not apply to a smelter subject to this Section if the owner or operator of that smelter can demonstrate to the Director both that:
 1. Compliance with the applicable cumulative occurrence and emission limits listed in R18-2-715(F) will require

the smelter to undergo major modifications to its physical configuration or work practices prior to the compliance date, and

2. That the modification will reduce fugitive emissions to such an extent that such emissions will not cause or significantly contribute to violations of ambient sulfur dioxide standards in the vicinity of the smelter.
- E. In order to assess the sufficiency of the cumulative occurrence and emission limits contained in R18-2-715(F) to maintain the ambient air quality standards for sulfur dioxide set forth in R18-2-202, an owner or operator of a smelter subject to this Section shall continue to calibrate, maintain and operate any ambient sulfur dioxide monitoring equipment owned by the smelter owner or operator and in operation within the area of the smelter enclosed by a circle with 10-mile radius as calculated from a center point which shall be the point of the smelter's greatest sulfur dioxide emissions, for a period of at least three years after the compliance date.
 1. Such monitors shall be operated and maintained in accordance with 40 CFR 50 and 58 and such other conditions as the Director deems necessary.
 2. The location of ambient sulfur dioxide monitors and length of time such monitors remain at a location shall be determined by the Director.
- F. The owner and operator of the copper smelter located near Hayden, Arizona at the latitude and longitude provided in R18-2-715(F)(1) shall comply with Section R18-2-715.02 until the effective date of R18-2-B1302 as determined by R18-2-B1302(A)(2). The owner and operator of the copper smelter located near Miami, Arizona at the latitude and longitude provided in R18-2-715(F)(2) shall comply with Section R18-2-715.02 until the effective date of R18-2-C1302 as determined by R18-2-C1302(A)(2).

Historical Note

Section R18-2-715.02 renumbered from R18-2-515.02 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 23 A.A.R. 767, effective May 7, 2017, (Supp. 17-1).

R18-2-716. Standards of Performance for Existing Coal Preparation Plants

- A. The provisions of this Section are applicable to any of the following affected facilities in coal preparation plants: thermal dryers, pneumatic coal-cleaning equipment, coal processing and conveying equipment including breakers and crushers, coal storage systems, and coal transfer and loading systems. For purposes of this Section, the definitions contained in 40 CFR 60.251 are adopted by reference and incorporated herein.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any existing coal preparation plant in total quantities in excess of the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where "E" and "P" are defined as indicated in subsection (B)(1).

- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- E. Fugitive emissions from coal preparation plants shall be controlled in accordance with R18-2-604 through R18-2-607.
- F. The test methods and procedures required by this Section are as follows:
 1. The reference methods in the 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, are used to determine compliance with standards prescribed in subsection (B) as follows:
 - a. Method 5 for the concentration of particulate matter and associated moisture content,
 - b. Method 1 for sample and velocity traverses,
 - c. Method 2 for velocity and volumetric flow rate,
 - d. Method 3 for gas analysis.
 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume is 0.85 dscm (30 dscf) except that short sampling times or smaller volumes, when necessitated by process variables or other factors, may be approved by the Director. Sampling shall not be started until 30 minutes after start-up and shall be terminated before shutdown procedures commence. The owner or operator of the affected facility shall eliminate cyclonic flow during performance tests in a manner acceptable to the Director.
 3. The owner or operator shall construct the facility so that particulate emissions from thermal dryers or pneumatic coal cleaning equipment can be accurately determined by applicable test methods and procedures under subsection (F)(1).

Historical Note

Section R18-2-716 renumbered from R18-2-516 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-717. Expired

Historical Note

Section R18-2-717 renumbered from R18-2-517 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015 (Supp. 15-4).

R18-2-718. Repealed

Historical Note

Section R18-2-718 renumbered from R18-2-518 effective November 15, 1993 (Supp. 93-4). Section repealed by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

R18-2-719. Standards of Performance for Existing Stationary Rotating Machinery

- A. The provisions of this Section are applicable to the following affected facilities: all stationary gas turbines, oil-fired turbines, or internal combustion engines. This Section also applies to an installation operated for the purpose of producing electric or mechanical power with a resulting discharge of sulfur dioxide in the installation's effluent gases.

- B.** For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. Compliance tests shall be conducted during operation at the normal rated capacity of each unit. The total heat input of all operating fuel-burning units on a plant or premises shall be used for determining the maximum allowable amount of particulate matter which may be emitted.
- C.** No person shall cause, allow or permit the emission of particulate matter, caused by combustion of fuel, from any stationary rotating machinery in excess of the amounts calculated by one of the following equations:
- For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 1.02Q^{0.769}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 Q = the heat input in million Btu per hour.
 - For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:

$$E = 17.0Q^{0.432}$$
 where "E" and "Q" have the same meaning as in subsection (C)(1).
- D.** Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- E.** No person shall cause, allow or permit to be emitted into the atmosphere from any stationary rotating machinery, smoke for any period greater than 10 consecutive seconds which exceeds 40% opacity. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- F.** When low sulfur oil is fired, stationary rotating machinery installations shall burn fuel which limits the emission of sulfur dioxide to 1.0 pound per million Btu heat input.
- G.** When high sulfur oil is fired, stationary rotating machinery installations shall not emit more than 2.2 pounds of sulfur dioxide per million Btu heat input.
- H.** Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee. This condition may not be included in the permit if the applicant demonstrates to the satisfaction of the Director both that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.
- The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
 - In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
 - When the conditions justifying the use of high sulfur oil no longer exist, the permit shall be modified accordingly.
 - Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.
- I.** The owner or operator of any stationary rotating machinery subject to the provisions of this Section shall record daily the sulfur content and lower heating value of the fuel being fired in the machine.
- J.** The owner or operator of any stationary rotating machinery subject to the provisions of this Section shall report to the Director any daily period during which the sulfur content of the fuel being fired in the machine exceeds 0.8%.
- K.** The test methods and procedures required by this Section are as follows:
- To determine compliance with the standards prescribed in subsections (C) through (H), the following reference methods shall be used:
 - Reference Method 20 in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, for the concentration of sulfur dioxide and oxygen.
 - ASTM Method D129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method) for the sulfur content of liquid fuels.
 - ASTM Method D1072-90 (Test Method for Total Sulfur in Fuel Gases for the sulfur content of gaseous fuels).
 - To determine compliance with the standards prescribed in subsection (J), the following reference methods shall be used:
 - ASTM Method D129-91 (Test Method for Sulfur in Petroleum Products) (General Bomb Method) for the sulfur content of liquid fuels.
 - ASTM Method D1072-90 (Test Method for Total Sulfur in Fuel Gases) for the sulfur content of gaseous fuels.

Historical Note

Section R18-2-719 renumbered from R18-2-519 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1). Amended by final rulemaking at 18 A.A.R. 1542, effective August 7, 2012 (Supp. 12-2).

R18-2-720. Standards of Performance for Existing Lime Manufacturing Plants

- A.** The provisions of this Section are applicable to the following affected facilities used in the manufacture of lime: rotary lime kilns, vertical lime kilns, lime hydrators, and limestone crushing facilities. This Section is also applicable to limestone crushing equipment which exists apart from other lime manufacturing facilities.
- B.** No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any lime manufacturing or limestone crushing facility in total quantities in excess of the amounts calculated by one of the following equations:
- For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 - For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (B)(1).
- C.** Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D.** For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in

determining the maximum allowable emission of particulate matter.

- E. Fugitive emissions from lime plants shall be controlled in accordance with R18-2-604 through R18-2-607.
- F. The owner or operator subject to the provisions of this Section shall install, calibrate, maintain, and operate a continuous monitoring system, except as provided in subsection (G), to monitor and record the opacity of the gases discharged into the atmosphere from any rotary lime kiln. The span of this system shall be set at 70% opacity.
- G. The owner or operator of any rotary lime kiln using a wet scrubbing emission control device subject to the provisions of this Section shall not be required to monitor the opacity of the gases discharged as required in subsection (F).
- H. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with this Section as follows:
 - a. Method 5 for the measurement of particulate matter,
 - b. Method 1 for sample and velocity traverses,
 - c. Method 2 for velocity and volumetric flow rate,
 - d. Method 3 for gas analysis,
 - e. Method 4 for stack gas moisture,
 - f. Method 9 for visible emissions.
 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.85 dscm/hr (0.53 dscf/min), except that shorter sampling times, when necessitated by process variables or other factors, may be approved by the Director.
 3. Because of the high moisture content of the exhaust gases from the hydrators, in the range of 40 to 85% by volume, the Method 5 sample train may be modified to include a calibrated orifice immediately following the sample nozzle when testing lime hydrators. In this configuration, the sampling rate necessary for maintaining isokinetic conditions can be directly related to exhaust gas velocity without a correction for moisture content.

Historical Note

Section R18-2-720 renumbered from R18-2-520 and amended effective November 15, 1993 (Supp. 93-4).
Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-721. Standards of Performance for Existing Nonferrous Metals Industry Sources

- A. The provisions of this Section are applicable to the following affected facilities:
 1. Mines,
 2. Mills,
 3. Concentrators,
 4. Crushers,
 5. Screens,
 6. Material handling facilities,
 7. Fine ore storage,
 8. Dryers,
 9. Roasters, and
 10. Loaders.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere in any one hour from any process source subject to the provisions of this Section in total quantities in excess of the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the

maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$

where:

E = the maximum allowable particulate emissions rate in pounds-mass per hour.

P = the process weight rate in tons-mass per hour.

2. For process sources having a process weight greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$

where "E" and "P" are defined as indicated in subsection (B)(1).

- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- E. No person shall cause, allow or permit to be discharged into the atmosphere from any dryer or roaster the operating temperature of which exceeds 700°F, reduced sulfur in excess of 10% of the sulfur entering the process as feed. Reduced sulfur includes sulfur equivalent from all sulfur emissions including sulfur dioxide, sulfur trioxide, and sulfuric acid.
- F. The owner or operator of any mining property subject to the provisions of this Section shall record the daily process rates and hours of operation of all material handling facilities.
- G. A continuous monitoring system for measuring sulfur dioxide emissions shall be installed, calibrated, maintained and operated by the owner or operator where dryers or roasters are not expected to achieve compliance with the standard under subsection (E).
- H. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standard prescribed in this Section as follows:
 - a. Method 5 for the concentration of particulate matter and the associated moisture content;
 - b. Method 1 for sample and velocity traverses;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis and calculation of excess air, using the integrated sample technique;
 - e. Method 6 for concentration of SO₂.
 2. For Method 5, Method 1 shall be used to select the sampling site and the number of traverse sampling points. The sampling time for each run shall be at least 60 minutes and the minimum sampling volume shall be 0.85 dscm (30 dscf), except that smaller sampling times or volumes, when necessitated by process variables or other factors, may be approved by the Director. The probe and filter holder heating systems in the sampling train shall be set to provide a gas temperature no greater than 160°C. (320°F).
 3. For Method 6, the sampling site shall be the same as that selected for Method 5. The sampling point in the duct shall be at the centroid of the cross section or at a point no closer to the walls than 1 m (3.28 ft.). For Method 6, the sample shall be extracted at a rate proportional to the gas velocity at the sampling point.
 4. For Method 6, the minimum sampling time shall be 20 minutes and the minimum sampling volume 0.02 dscm (0.71 dscf) for each sample. The arithmetic mean of two

samples shall constitute one run. Samples shall be taken at approximately 30-minute intervals.

Historical Note

Section R18-2-721 renumbered from R18-2-521 effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-722. Standards of Performance for Existing Gravel or Crushed Stone Processing Plants

- A. The provisions of this Section are applicable to the following affected facilities: primary rock crushers, secondary rock crushers, tertiary rock crushers, screens, conveyors and conveyor transfer points, stackers, reclaimers, and all gravel or crushed stone processing plants and rock storage piles.
- B. No person shall cause, allow or permit the discharge of particulate matter into the atmosphere except as fugitive emissions in any one hour from any gravel or crushed stone processing plant in total quantities in excess of the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$
 where “E” and “P” are defined as indicated in subsection (B)(1).
- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. Spray bar pollution controls shall be utilized in accordance with “EPA Control of Air Emissions From Process Operations In The Rock Crushing Industry” (EPA 340/1-79-002), “Wet Suppression System” (pages 15-34, amended as of January 1979 (and no future amendments or editions)), as incorporated herein by reference and on file with the Office of the Secretary of State, with placement of spray bars and nozzles as required by the Director to minimize air pollution.
- E. Fugitive emissions from gravel or crushed stone processing plants shall be controlled in accordance with R18-2-604 through R18-2-607.
- F. The owner or operator of any affected facility subject to the provisions of this Section shall install, calibrate, maintain, and operate monitoring devices which can be used to determine daily the process weight of gravel or crushed stone produced. The weighing devices shall have an accuracy of $\pm 5\%$ over their operating range.
- G. The owner or operator of any affected facility shall maintain a record of daily production rates of gravel or crushed stone produced.
- H. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards prescribed in this Section as follows:
 - a. Method 5 for concentration of particulate matter and moisture content,

- b. Method 1 for sample and velocity traverses,
 - c. Method 2 for velocity and volumetric flow rate,
 - d. Method 3 for gas analysis.
2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume is 0.85 dscm (30 dscf), except that shorter sampling times or smaller volumes, when necessitated by process variables or other factors, may be approved by the Director. Sampling shall not be started until 30 minutes after start-up and shall be terminated before shutdown procedures commence. The owner or operator of the affected facility shall eliminate cyclonic flow during performance tests in a manner acceptable to the Director.

Historical Note

Section R18-2-722 renumbered from R18-2-522 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-723. Standards of Performance for Existing Concrete Batch Plants

Fugitive dust emitted from concrete batch plants shall be controlled in accordance with R18-2-604 through R18-2-607.

Historical Note

Section R18-2-723 renumbered from R18-2-523 and amended effective November 15, 1993 (Supp. 93-4).

R18-2-724. Standards of Performance for Fossil-fuel Fired Industrial and Commercial Equipment

- A. This Section applies to industrial and commercial installations which are less than 73 megawatts capacity (250 million Btu per hour), but in the aggregate on any premises are rated at greater than 500,000 Btu per hour (0.146 megawatts), and in which fuel is burned for the primary purpose of producing steam, hot water, hot air or other liquids, gases or solids and in the course of doing so the products of combustion do not come into direct contact with process materials. When any products or by-products of a manufacturing process are burned for the same purpose or in conjunction with any fuel, the same maximum emission limitations shall apply.
- B. For purposes of this Section, the heat input shall be the aggregate heat content of all fuels whose products of combustion pass through a stack or other outlet. The heat content of solid fuel shall be determined in accordance with R18-2-311. Compliance tests shall be conducted during operation at the nominal rated capacity of each unit. The total heat input of all fuel-burning units on a plant or premises shall be used for determining the maximum allowable amount of particulate matter which may be emitted.
- C. No person shall cause, allow or permit the emission of particulate matter, caused by combustion of fuel, from any fuel-burning operation in excess of the amounts calculated by one of the following equations:
 1. For equipment having a heat input rate of 4200 million Btu per hour or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 1.02Q^{0.769}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 Q = the heat input in million Btu per hour.
 2. For equipment having a heat input rate greater than 4200 million Btu per hour, the maximum allowable emissions shall be determined by the following equation:

$$E = 17.0Q^{0.432}$$

where “E” and “Q” have the same meanings as in subsection (C)(1).

- D. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- E. Fossil-fuel fired industrial and commercial equipment installations shall not emit more than 1.0 pounds of sulfur dioxide per million Btu heat input when low sulfur oil is fired.
- F. Fossil-fuel fired industrial and commercial equipment installations shall not emit more than 2.2 pounds of sulfur dioxide per million Btu heat input when high sulfur oil is fired.
- G. Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee. This condition may be omitted from the permit if the applicant demonstrates to the satisfaction of the Director both that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to ensure that the sulfur dioxide ambient air quality standards set forth in R18-2-202 will not be violated.
 - 1. The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified.
 - 2. In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Department monthly reports detailing its efforts to obtain low sulfur oil.
 - 3. When the conditions justifying the use of high sulfur oil no longer exist, the permit shall be modified accordingly.
 - 4. Nothing in this Section shall be construed as allowing the use of a supplementary control system or other form of dispersion technology.
- H. When coal is fired, fossil-fuel fired industrial and commercial equipment installations shall not emit more than 1.0 pounds of sulfur dioxide per million Btu heat input.
- I. The owner or operator subject to the provisions of this Section shall install, calibrate, maintain and operate a continuous monitoring system for measurement of the opacity of emissions discharged into the atmosphere from the control device.
- J. For the purpose of reports required under excess emissions reporting required by R18-2-310.01, the owner or operator shall report all six-minute periods in which the opacity of any plume or effluent exceeds 15%.
- K. The test methods and procedures required by this Section are as follows:
 - 1. The reference methods in 40 CFR 60, Appendix A, as incorporated by reference in Appendix 2 of this Chapter, shall be used to determine compliance with the standards as prescribed in this Section.
 - a. Method 1 for selection of sampling site and sample traverses,
 - b. Method 3 for gas analysis to be used when applying Reference Methods 5 and 6,
 - c. Method 5 for concentration of particulate matter and the associated moisture content,
 - d. Method 6 for concentration of SO₂.
 - 2. For Method 5, Method 1 shall be used to select the sampling site and the number of traverse sampling points. The sampling time for each run shall be at least 60 minutes and the minimum sampling volume shall be 0.85 dscm (30 dscf), except that smaller sampling times or volumes, when necessitated by process variables or other factors, may be approved by the Director. The probe and filter holder heating systems in the sampling train shall be set to provide a gas temperature no greater than 160°C. (320°F.).
 - 3. For Method 6, the sampling site shall be the same as that selected for Method 5. The sampling point in the duct shall be at the centroid of the cross section or at a point no

closer to the walls than 1 m (3.28 ft). For Method 6, the sample shall be extracted at a rate proportional to the gas velocity at the sampling point.

- 4. For Method 6, the minimum sampling time shall be 20 minutes and the minimum sampling volume 0.02 dscm (0.71 dscf) for each sample. The arithmetic mean of two samples shall constitute one run. Samples shall be taken at approximately 30-minute intervals.
- 5. Gross calorific value shall be determined in accordance with the applicable ASTM methods: D-2015-91 (Test for Gross Calorific Value of Solid Fuel by the Adiabatic Bomb Calorimeter) for solid fuels; D-240-87 (Test Method for Heat of Combustion of Liquid Hydrocarbon Fuels by Bomb Calorimeter) for liquid fuels; and D-1826-88 (Test Method for Calorific Value of Gases in Natural Gas Range by Continuous Recording Calorimeter) for gaseous fuels. The rate of fuels burned during each testing period shall be determined by suitable methods and shall be confirmed by a material balance over the fossil-fuel fired system.

Historical Note

Section R18-2-724 renumbered from R18-2-524 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 7 A.A.R. 1164, effective February 15, 2001 (Supp. 01-1). Amended by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-725. Standards of Performance for Existing Dry Cleaning Plants

- A. No person shall conduct any dry cleaning operation using chlorinated synthetic solvents without minimizing organic solvent emissions by good modern practices including but not limited to the use of an adequately sized and properly maintained activated carbon absorber or other equally effective control device.
- B. No person shall operate any dry cleaning establishment using petroleum solvents other than non-photochemically reactive solvents without reducing solvent emissions by at least 90%. For purposes of this subsection, a photochemically reactive solvent shall be any solvent with an aggregate of more than 20% of its total volume composed of the chemical compounds classified in subsections (B)(1) through (3), or which exceeds any of the following percentage composition limitations, referred to the total volume of solvent:
 - 1. A combination of the following types of compounds having an olefinic or cyclo-olefinic type of unsaturation -- hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones: 5%.
 - 2. A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene: 8%.
 - 3. A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichlorethylene or toluene: 20%.
- C. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution is discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to the adjoining property.

Historical Note

Section R18-2-725 renumbered from R18-2-525 effective November 15, 1993 (Supp. 93-4).

R18-2-726. Standards of Performance for Sandblasting

Operations

No person shall cause or permit sandblasting or other abrasive blasting without minimizing dust emissions to the atmosphere through the use of good modern practices. Examples of good modern practices include wet blasting and the use of effective enclosures with necessary dust collecting equipment.

Historical Note

Section R18-2-726 renumbered from R18-2-526 effective November 15, 1993 (Supp. 93-4).

R18-2-727. Standards of Performance for Spray Painting Operations

- A. No person shall conduct any spray paint operation without minimizing organic solvent emissions. Such operations other than architectural coating and spot painting, shall be conducted in an enclosed area equipped with controls containing no less than 96% of the overspray.
- B. No person shall either:
 1. Employ, apply, evaporate or dry any architectural coating containing photochemically reactive solvents for industrial or commercial purposes; or
 2. Thin or dilute any architectural coating with a photochemically reactive solvent.
- C. For purposes of subsection (B), a photochemically reactive solvent shall be any solvent with an aggregate of more than 20% of its total volume composed of the chemical compounds classified in subsections (1) through (3), or which exceeds any of the following percentage composition limitations, referred to the total volume of solvent:
 1. A combination of the following types of compounds having an olefinic or cyclo-olefinic type of unsaturation -- hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones: 5%.
 2. A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene: 8%.
 3. A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichlorethylene or toluene: 20%.
- D. Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the groups or organic compounds described in subsection (C)(1) through (3), it shall be considered to be a member of the group having the least allowable percent of the total volume of solvents.

Historical Note

Section R18-2-727 renumbered from R18-2-527 effective November 15, 1993 (Supp. 93-4).

R18-2-728. Standards of Performance for Existing Ammonium Sulfide Manufacturing Plants

- A. The provisions of this Section are applicable to the following affected facilities in ammonium sulfide manufacturing plants: sulfide unloading facilities, reactor-absorbers, bubble cap scrubbers, and fume incinerators.
- B. No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator or other outlet smoke, fumes, gases, particulate matter or other gas-borne material, the opacity of which exceeds 20%.
- C. No person shall cause, allow or permit to be emitted into the atmosphere from any emission point from any incinerator, or to pass a convenient measuring point near such emission point, particulate matter of concentrations in excess of 0.1 grain per cubic foot, based on dry flue gas at standard conditions, corrected to 12% carbon dioxide.
- D. No person shall allow hydrogen sulfide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place

beyond the premises on which the source is located exceeds 0.03 parts per million by volume for any averaging period of 30 minutes or more.

- E. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution are discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to adjoining property.
- F. The owner or operator of any ammonium sulfide tailgas incinerator subject to the provisions of this Section shall do both of the following:
 1. Install, calibrate, maintain, and operate a flow measuring device which can be used to determine either the mass or volume of tailgas charged to the incinerator. The flow measuring device shall have an accuracy of $\pm 5\%$ over its operating range.
 2. Provide access to the tailgas charged so that a well-mixed representative grab sample can be obtained.
- G. The test methods and procedures required by this Section are as follows:
 1. The reference methods in 40 CFR 60, Appendix A shall be used to determine compliance with the standards prescribed in this Section as follows:
 - a. Method 5 for the concentration of particulate matter and the associated moisture content;
 - b. Method 1 for sample and velocity traverse;
 - c. Method 2 for velocity and volumetric flow rate;
 - d. Method 3 for gas analysis and calculation of excess air, using the integrated sample technique;
 - e. Method 11 shall be used to determine the concentration of H_2S and Method 6 shall be used to determine the concentration of SO_2 .
 2. For Method 5, the sampling time for each run shall be at least 60 minutes and the minimum sample volume shall be 0.85 dscm (30.0 dscf) except that shorter sampling times and smaller sample volumes, when necessitated by process variables or other factors, may be approved by the Director.
 3. Particulate matter emissions, expressed in g/dscm, shall be corrected to 12% CO_2 by using the following formula:

$$C_{12} = \frac{12c}{\% \text{CO}_2}$$
 where:
 C_{12} = the concentration of particulate matter corrected to 12% CO_2 ,
 c = the concentration of particulate matter as measured by Method 5, and
 $\% \text{CO}_2$ = the percentage of CO_2 as measured by Method 3, or, when applicable, the adjusted outlet CO_2 percentage.
 4. If Method 11 is used, the gases sampled shall be introduced into the sampling train at approximately atmospheric pressure. Where fuel gas lines are operating at pressures substantially above atmosphere, this may be accomplished with a flow control valve. If the line pressure is high enough to operate the sampling train without a vacuum pump, the pump may be eliminated from the sampling train. The sample shall be drawn from a point near the centroid of the fuel gas line. The minimum sampling time shall be 10 minutes and the minimum sampling volume 0.01 dscm (0.35 dscf) for each sample. The arithmetic average of two samples of equal sampling time shall constitute one run. Samples shall be taken at

approximately one-hour intervals. For most fuel gases, sample times exceeding 20 minutes may result in depletion of the collecting solution, although fuel gases containing low concentrations of hydrogen sulfide may necessitate sampling for longer periods of time.

5. If Method 5 is used, Method 1 shall be used for velocity traverses and Method 2 for determining velocity and volumetric flow rate. The sampling site for determining CO₂ concentration by Method 3 shall be the same as for determining volumetric flow rate by Method 2. The sampling point in the duct for determining SO₂ concentration by Method 3 shall be at the centroid of the cross section if the cross sectional area is less than 5 m² (54 ft²) or at a point no closer to the walls than 1 m (3.28 feet) if the cross sectional area is 5 m² or more and the centroid is more than 1 meter from the wall. The sample shall be extracted at a rate proportional to the gas velocity at the sampling point. The minimum sampling time shall be 10 minutes and the minimum sampling volume 0.01 dscm (0.36 dscf) for each sample. The arithmetic average of two samples of equal sampling time shall constitute one run. Samples shall be taken at approximately one-hour intervals.

Historical Note

Section R18-2-728 renumbered from R18-2-528 effective November 15, 1993 (Supp. 93-4).

R18-2-729. Standards of Performance for Cotton Gins

- A. Fugitive dust, lint, bolls, cotton seed or other material emitted from a cotton gin or lying loose in a yard shall be collected and disposed of in an efficient manner or shall be treated in accordance with R18-2-604 through R18-2-607.
- B. No person shall cause, allow or permit to be emitted into the atmosphere, from any type of incinerator, smoke, fumes, gases, particulate matter or other gas-borne material which exceeds 40% opacity.
- C. No person shall cause, allow, or permit the discharge of particulate matter into the atmosphere in any one hour from any cotton gin in total quantities in excess of the amounts calculated by one of the following equations:
 1. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 2. For process sources having a process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (C)(1).
- D. The test methods and procedures required by this Section are as follows:
 1. The reference methods in the Arizona Testing Manual and 40 CFR 60, Appendix A shall be used to determine compliance with this Section as follows:
 - a. Method A-2 for the measurement of particulate matter,
 - b. Method 1 for sample and velocity traverses,
 - c. Method 2 for velocity and volumetric flow rate,
 - d. Method 3 for gas analysis,

e. Method 9 for visible emissions.

2. For Method A-2, the sampling time for each run shall be at least 60 minutes and the sampling rate shall be at least 0.85 dry standard cubic meters per hour (0.53 dry standard cubic feet per minute), except that shorter sampling times, when necessitated by progress variables or other factors, may be approved by the Director.

Historical Note

Section R18-2-729 renumbered from R18-2-529 and amended effective November 15, 1993 (Supp. 93-4).
 Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2).

R18-2-730. Standards of Performance for Unclassified Sources

- A. No existing source which is not otherwise subject to standards of performance under this Article or Article 9 or 11 of this Chapter, shall cause or permit the emission of pollutants at rates greater than the following:
 1. For particulate matter discharged into the atmosphere in any one hour from any unclassified process source in total quantities in excess of the amounts calculated by one of the following equations:
 - a. For process sources having a process weight rate of 60,000 pounds per hour (30 tons per hour) or less, the maximum allowable emissions shall be determined by the following equation:

$$E = 4.10P^{0.67}$$
 where:
 E = the maximum allowable particulate emissions rate in pounds-mass per hour.
 P = the process weight rate in tons-mass per hour.
 - b. For process weight rate greater than 60,000 pounds per hour (30 tons per hour), the maximum allowable emissions shall be determined by the following equation:

$$E = 55.0P^{0.11-40}$$
 where "E" and "P" are defined as indicated in subsection (A)(1)(a).
 2. Sulfur dioxide – 600 parts per million.
 3. Nitrogen oxides expressed as NO₂ – 500 parts per million.
- B. For purposes of this Section, the total process weight from all similar units employing a similar type process shall be used in determining the maximum allowable emission of particulate matter.
- C. Actual values shall be calculated from the applicable equations and rounded off to two decimal places.
- D. No person shall emit gaseous or odorous materials from equipment, operations or premises under the person's control in such quantities or concentrations as to cause air pollution.
- E. No person shall operate or use any machine, equipment, or other contrivance for the treatment or processing of animal or vegetable matter, separately or in combination, unless all gaseous vapors and gas entrained effluents from such operations, equipment, or contrivance have been either:
 1. Incinerated to destruction, as indicated by a temperature measuring device, at not less than 1,200°F if constructed or reconstructed prior to January 1, 1989, or 1,600°F with a minimum residence time of 0.5 seconds if constructed or reconstructed thereafter; or
 2. Passed through such other device which is designed, installed and maintained to prevent the emission of odors or other air contaminants and which is approved by the Director.

- F. Materials including solvents or other volatile compounds, paints, acids, alkalies, pesticides, fertilizers and manure shall be processed, stored, used and transported in such a manner and by such means that they will not evaporate, leak, escape or be otherwise discharged into the ambient air so as to cause or contribute to air pollution. Where means are available to reduce effectively the contribution to air pollution from evaporation, leakage or discharge, the installation and use of such control methods, devices, or equipment shall be mandatory.
- G. Where a stack, vent or other outlet is at such a level that fumes, gas mist, odor, smoke, vapor or any combination thereof constituting air pollution is discharged to adjoining property, the Director may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet by the owner or operator thereof to a degree that will adequately dilute, reduce or eliminate the discharge of air pollution to adjoining property.
- H. No person shall allow hydrogen sulfide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.03 parts per million by volume for any averaging period of 30 minutes or more.
- I. No person shall cause, allow or permit discharge from any stationary source carbon monoxide emissions without the use of complete secondary combustion of waste gases generated by any process source.
- J. No person shall allow hydrogen cyanide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.3 parts per million by volume for any averaging period of eight hours.
- K. No person shall allow sodium cyanide dust or dust from any other solid cyanide to be emitted from any location in such manner and amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 140 micrograms per cubic meter for any averaging period of eight hours.
- L. No owner or operator of a facility engaged in the surface coating of miscellaneous metal parts and products may operate a coating application system subject to this Section that emits volatile organic compounds in excess of any of the following:
 1. 4.3 pounds per gallon (0.5 kilograms per liter) of coating, excluding water, delivered to a coating applicator that applies clear coatings.
 2. 3.5 pounds per gallon (0.42 kilograms per liter) of coating, excluding water delivered to a coating applicator in a coating application system that is air dried or forced warm air dried at temperatures up to 194°F (90°C).
 3. 3.5 pounds per gallon (0.42 kilograms per liter) of coating, excluding water, delivered to a coating applicator that applies extreme performance coatings.
 4. 3.0 pounds per gallon (0.36 kilograms per liter) of coating, excluding water, delivered to a coating applicator for all other coatings and application systems.
- M. If more than one emission limitation in subsection (L) applies to a specific coating, then the least stringent emission limitation shall be applied.
- N. All VOC emissions from solvent washings shall be considered in the emission limitations in subsection (L), unless the solvent is directed into containers that prevent evaporation into the atmosphere.

Historical Note

Renumbered from R18-2-530 and amended effective November 15, 1993 (Supp. 93-4). Amended by final

rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

R18-2-731. Standards of Performance for Existing Municipal Solid Waste Landfills

- A. This Section applies to each municipal solid waste landfill (MSW landfill) at which:
 1. Construction, reconstruction, or modification began before May 30, 1991; and
 2. Waste was accepted at any time since November 8, 1987, or additional design capacity is available for future waste deposition.
- B. For the purposes of this Section, “Municipal solid waste landfill or MSW landfill” means an entire disposal facility in a contiguous geographical space where household waste is placed in or on land. An MSW landfill may also receive other types of RCRA (Resource Conservation and Recovery Act) Subtitle D wastes such as commercial solid waste, nonhazardous sludge, conditionally exempt small quantity generator waste, and industrial solid waste. Portions of an MSW landfill may be separated by access roads. An MSW landfill may be publicly or privately owned.
- C. MSW landfills covered by this Section shall comply with 40 CFR 60, Subpart WWW, as modified by this subsection. 40 CFR 60, Subpart WWW, “Standards of Performance for Municipal Solid Waste Landfills,” is incorporated by reference in R18-2-901.
 1. Definitions. In addition to the definitions in 40 CFR 60.751, “Administrator” means the Director of the Department of Environmental Quality.
 2. Reporting. Each MSW landfill shall comply with the reporting requirements of 40 CFR 60.757. The initial design capacity report and initial NMOC emission rate report shall be due 90 days after the effective date of this rule.
 3. Design plan. An MSW landfill that is required to install a collection and control system shall submit a design plan for the system to the Director with a Standard Permit Application Form not later than 12 months after it submitted or should have submitted a NMOC emission rate report indicating emissions greater than 50 Mg per year. The design plan shall be prepared by a professional engineer registered in Arizona. The Director shall not approve the design plan if it does not meet the requirements of 40 CFR 60.752(b)(2)(ii).
 4. System installation. An MSW landfill that is required to install a collection and control system shall complete installation of the system not later than 30 months after the effective date of this rule.
 5. An MSW landfill that first becomes subject to the collection and control system requirement after the effective date of this rule shall submit a design plan for the system to the Director not later than 12 months after it submitted or should have submitted a NMOC emission rate report indicating emissions greater than 50 Mg per year.

Historical Note

Adopted effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1).

R18-2-732. Expired**Historical Note**

New Section adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3). Amended by final rulemaking at 13 A.A.R. 2157, effective August 4, 2007 (Supp. 07-2). Section expired under A.R.S. § 41-1056(J) at 21 A.A.R. 15, effective September 30, 2015

(Supp. 15-4).

R18-2-733. Repealed

Historical Note

New Section made by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Section repealed by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

R18-2-733.01. Repealed

Historical Note

New Section made by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Section repealed by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

R18-2-734. Standards of Performance for Mercury Emissions from Electric Generating Units

- A.** Applicability and Purpose. The requirements of this Section apply to owners and operators of electric generating units. The purpose of this Section is to establish:
1. Interim standards for mercury emissions from electric generating units that shall apply until compliance with the emissions limits in the federal mercury standards is required.
 2. State standards for mercury emissions from electric generating units that shall apply if the federal mercury standards are vacated by a federal court or repealed by the administrator.
- B.** Interim Standards. The following requirements shall apply until the date that compliance with the federal mercury standards or subsection (G) is required:
1. The owners and operators shall comply with the mercury control strategy operations and maintenance plan approved as part of the permit for the electric generating plant.
 2. The owners and operators shall operate and maintain the electric generating plant, including any associated air pollution control equipment, in a manner consistent with good air pollution control practices for minimizing mercury emissions. This requirement shall apply to any air pollution control equipment installed pursuant to subsection (B)(1) or to any new air pollution control equipment installed to comply with the federal mercury standards if such equipment replaces equipment installed pursuant to subsection (B)(1).
- C.** Incorporation of Federal Mercury Standards. The federal mercury standards in 40 CFR Part 63, Subpart UUUUU, as of July 1, 2013 (and no future amendments or editions) are incorporated by reference and shall remain effective to the extent specified in this Section regardless of whether they are vacated by a federal court or repealed by the administrator. Subpart UUUUU of 40 C.F.R. Part 63 is published by the United States Government Printing Office, 732 North Capital Street, NW, Washington, DC 20401-0001, is on file with the Department of Environmental Quality, 1110 West Washington Street, Phoenix, Arizona 85007, and is available at the Arizona State Library, Archives & Public Records, 1700 West Washington Street, Phoenix, Arizona 85007 and at other Federal depository libraries in the state (see http://catalog.gpo.gov/fdlpdir/FDLP-dir.jsp?st_12=AZ&flag=searchp). It is also available online at <http://www.gpo.gov/fdsys/browse/collectionCfr.action?collectionCode=CFR>. The owners and operators shall provide to the director a copy of all notices and reports submitted to the Administrator under the federal mercury standards, except for any reports or data submitted to the Administrator through

electronic systems (for example, Compliance and Emissions Data Reporting Interface (CEDRI), Emission Collection Monitoring Plan System Client Tool (ECMPS) or the Emissions Reporting Tool (ERT)).

- D.** Notice of State Standard Applicability. The director shall provide notice to the responsible official for each electric generating plant of any repeal or federal court vacatur of the federal mercury standards. If the repeal or vacatur occurred after the date the electric generating plant was required to comply with the emission limits in the federal mercury standards, the plant shall continue to comply with the federal mercury standards until the date that compliance with subsection (G) is required.
- E.** Application for Permit Revision. Within 120 days of receipt of written notice from the director under subsection (D), the owners and operators shall submit an application for a permit revision that proposes:
1. The mercury emission limit or limits in subsection (G) that shall apply to the electric generating plant.
 2. A date for demonstrating compliance with the mercury emission limit consistent with subsection (F)(2).
 3. A mercury monitoring plan consistent with subsection (H)(2).
- F.** Permit Revision Setting State Standard. A permit revision granted in response to the application submitted under subsection (E) shall contain the following conditions:
1. The mercury emission limit or limits in subsection (G) that shall apply to the electric generating plant.
 2. The date compliance with the emission limit or limits shall be required. Unless the application requests an earlier date, the compliance date shall be the later of December 31, 2016 or the end of the first averaging period commencing no later than 180 days after permit issuance.
 3. The date for demonstrating initial compliance with the emission limit or limits, which shall be 45 days after completion of the first full averaging period after the compliance date established under subsection (F)(2).
 4. The date on which compliance with subsection (B), or the obligation to comply with the federal mercury standards in subsection (D), as applicable, shall no longer be required.
 5. A mercury monitoring plan consistent with subsection (H).
 6. Compliance reporting requirements consistent with subsection (I).
- G.** State Mercury Emission Limits. Emissions from an electric generating unit shall comply with one or more of the emission limits specified in the following table, as selected by the owners and operators under subsection (F).

No.	Limit	Averaging Period	Applicable To
1.	10 percent of inlet mercury	Rolling 12-month	Electric generating plant
2.	0.0087 pounds per gigawatt-hour	Rolling 12-month	Electric generating plant
3.	0.011 pounds per gigawatt-hour	Rolling 90-boiler operating days	EGUs identified in averaging group
4.	1.0 pounds per Trillion Btu	Rolling 90-boiler operating days	EGUs identified in averaging group

5.	0.013 pounds per gigawatt-hour	Rolling 30-boiler operating days	Individual electric generating unit
6.	1.2 pounds per Trillion Btu	Rolling 30-boiler operating days	Individual electric generating unit

H. Compliance Monitoring and Recordkeeping.

1. Compliance with subsection (G) shall be determined using a mercury CEMS or sorbent trap monitoring system pursuant to Appendix A of the federal mercury standards and in accordance with an approved mercury monitoring plan.
2. The mercury monitoring plan shall include the following elements:
 - a. Identification of the emission limit or limits in subsection (G) for which compliance will be demonstrated.
 - b. Identification of whether a mercury CEMS or sorbent trap monitoring system will be used as the primary compliance method. Backup methods may be identified and approved in the plan.
 - c. Description of the parameters that will be monitored, including mercury concentration, stack flow, fuel mercury content, fuel rate, electricity generation rate, moisture percent, and any diluent or other gas or process parameters necessary to calculate compliance in terms of the applicable emission limit.
 - d. Description and example of the calculations required to convert monitored parameters to mercury emissions in terms of the emission limit.
 - e. Establishment of CEMS analyzer data availability, and QA/QC requirements.
 - f. Procedures for completing an initial demonstration of compliance, except as otherwise provided in subsection (I)(1).
2. At least once per month, the mercury emissions data shall be compiled into a record demonstrating compliance with the emission limit or limits established in the permit revision issued under subsection (F). This record shall be completed no later than the 15th day of the following month.
3. Records shall be maintained as follows:
 - a. Records demonstrating compliance with the emissions limits shall be maintained for five years.
 - b. If a mercury CEMS is used, daily CEMS data, QA/QC data identified in the mercury monitoring plan, any maintenance work conducted on the CEMS or data logging system, and a calculation of all mercury CEMS downtime shall be maintained for five years.
 - c. If a sorbent trap monitoring system is used, all sorbent monitoring data and any maintenance work conducted on the system shall be maintained for five years.
- I. Reporting.** The owners and operators shall submit to the director the following reports:
 1. An initial demonstration of compliance, which must be submitted to the director within 180 days after comple-

tion of the first full averaging period. This requirement shall not apply to an electric generating unit if an initial demonstration of compliance has been completed for that unit under 40 C.F.R. 63.10005(d)(3) and the demonstration shows compliance with subsection (G) for that unit. The report shall include:

- a. The name of the electric generating plant and electric generating units.
 - b. The applicable emission limit or limits for the plant or the electric generating units.
 - c. The mercury emissions for the plant, group of averaged units, or each unit, as applicable, during the initial compliance demonstration in terms of the applicable standard.
 - d. A certification by a responsible official.
2. Semiannual compliance reports, which must be submitted to the director on the dates established in the electric generating plant's air quality permit. The report shall include:
 - a. The name of the electric generating plant and electric generating units;
 - b. The applicable emission limit or limits for the plant or the electric generating units.
 - c. The mercury emissions for the plant, or each unit, as applicable, for each month during the six month period ending the month prior to the semiannual report in terms of the applicable standard.
 - d. An explanation of any excess emissions, the duration of the excess emissions, and corrective actions taken, if any, to resolve those excess emissions.
 - e. A certification by a responsible official.
 - J. Exemption.** After receipt of notice under subsection (D), in lieu of submitting the permit revision application required by subsection (E), the owners and operators may notify the director in writing that they elect to comply with the vacated or repealed federal mercury standards at an electric generating plant. If the owners and operators for an electric generating plant make this election, the plant shall be exempt from subsections (E) through (I). If the owners and operators of an electric plant elect this option:
 1. "Administrator" shall mean "Director" whenever it appears in the federal mercury standards or regulations referenced therein.
 2. "EPA" shall mean "ADEQ, Air Quality Division" whenever it appears in the federal mercury standards or regulations referenced therein.
 3. In lieu of reports submitted to the Administrator through electronic systems (for example, Compliance and Emissions Data Reporting Interface (CEDRI), Emission Collection Monitoring Plan System Client Tool (ECMPS) or Emissions Reporting Tool (ERT)) pursuant to the federal mercury standards, the owners or operators shall submit to the Director, semiannually at the time required by permit, the RATA or the rolling 30-day or rolling 90-day average mercury value for each EGU or the plant, as applicable.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 4701, effective January 29, 2007 (Supp. 06-4). Amended by final rulemaking at 21 A.A.R. 711, effective June 30, 2015 (Supp. 15-2).

Table 1. Emission Limitations for Small, Medium, and Large HMIWI

Pollutant	Units (7% oxygen, dry basis)	Emission Limitation		
		Small HMIWI	Medium HMIWI	Large HMIWI
Particulate matter	Milligrams per dry standard cubic meter (grains per dry standard cubic foot).	115 (0.05)	69 (0.03)	34 (0.015)
Carbon monoxide	Parts per million by volume	40	40	40
Dioxin/furans	Nanograms per dry standard cubic meter total dioxin/furans (grains per billion dry standard cubic foot) or nanograms per dry standard cubic meter toxic equivalent quantity (grains per billion dry standard cubic foot).	125 (55) or 2.3 (1.0)	125 (55) or 2.3 (1.0)	125 (55) or 2.3 (1.0)
Hydrogen chloride	Parts per million by volume or percent reduction.	100 or 93%	100 or 93%	100 or 93%
Sulfur dioxide	Parts per million by volume	55	55	55
Nitrogen oxides	Parts per million by volume	250	250	250
Lead	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot) or percent reduction	1.2 (0.52) or 70%	1.2 (0.52) or 70%	1.2 (0.52) or 70%
Cadmium	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot) or percent reduction	0.16 (0.07) or 65%	0.16 (0.07) or 65%	0.16 (0.07) or 65%
Mercury	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot) or percent reduction	0.55 (0.24) or 85%	0.55 (0.24) or 85%	0.55 (0.24) or 85%

Historical Note

Table 1 adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3).

Table 2. Emissions Limitations for Rural HMIWI

Pollutant	Units (7% oxygen, dry basis)	Emission Limitation
Particulate matter	Milligrams per dry standard cubic meter (grains per dry standard cubic foot)	197 (0.086)
Carbon monoxide	Parts per million by volume	40
Dioxin/furans	Nanograms per dry standard cubic meter total dioxin/furans (grains per billion dry standard cubic foot) or nanograms per dry standard cubic meter toxic equivalent quantity (grains per billion dry standard cubic foot)	800 (350) or 15 (6.6)
	Parts per million by volume	3100 (1.0)
Hydrogen chloride	Parts per million by volume	55
Sulfur dioxide	Parts per million by volume	250
Nitrogen oxides	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot)	10 (4.4)
Lead	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot)	4 (1.7)
Cadmium	Milligrams per dry standard cubic meter (grains per thousand dry standard cubic foot)	7.5 (3.3)
Mercury		

Historical Note

Table 2 adopted by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999 (Supp. 99-3).

ARTICLE 8. EMISSIONS FROM MOBILE SOURCES (NEW AND EXISTING)**R18-2-801. Classification of Mobile Sources**

- A. This Article is applicable to mobile sources which either move while emitting air contaminants or are frequently moved during the course of their utilization but are not classified as motor vehicles, agricultural vehicles, or agricultural equipment used in normal farm operations.
- B. Unless otherwise specified, no mobile source shall emit smoke or dust the opacity of which exceeds 40%.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1).
 Amended effective September 26, 1990 (Supp. 90-3).
 Amended effective February 3, 1993 (Supp. 93-1). Former Section R18-2-801 renumbered to Section R18-2-901, new Section R18-2-801 renumbered from R18-2-601 effective November 15, 1993 (Supp. 93-4).

R18-2-802. Off-road Machinery

- A. No person shall cause, allow or permit to be emitted into the atmosphere from any off-road machinery, smoke for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- B. Off-road machinery shall include trucks, graders, scrapers, rollers, locomotives and other construction and mining machinery not normally driven on a completed public roadway.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1).
 Amended effective September 26, 1990 (Supp. 90-3).
 Former Section R18-2-802 renumbered to Section R18-2-902, new Section R18-2-802 renumbered from R18-2-602 effective November 15, 1993 (Supp. 93-4).

R18-2-803. Heater-planer Units

No person shall cause, allow or permit to be emitted into the atmosphere from any heater-planer operated for the purpose of reconstructing asphalt pavements smoke the opacity of which exceeds 20%. However three minutes' upset time in any one hour shall not constitute a violation of this Section.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1).
 Amended effective September 26, 1990 (Supp. 90-3).
 Former Section R18-2-803 renumbered to Section R18-2-903, new Section R18-2-803 renumbered from R18-2-603 effective November 15, 1993 (Supp. 93-4).

R18-2-804. Roadway and Site Cleaning Machinery

- A. No person shall cause, allow or permit to be emitted into the atmosphere from any roadway and site cleaning machinery smoke or dust for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%. Visible emissions when starting cold equipment shall be exempt from this requirement for the first 10 minutes.
- B. In addition to complying with subsection (A), no person shall cause, allow or permit the cleaning of any site, roadway, or alley without taking reasonable precautions to prevent particulate matter from becoming airborne. Reasonable precautions may include applying dust suppressants. Earth or other material shall be removed from paved streets onto which earth or other material has been transported by trucking or earth moving equipment, erosion by water or by other means.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1).
 Amended effective September 26, 1990 (Supp. 90-3).
 Amended effective February 3, 1993 (Supp. 93-1). Former Section R18-2-804 renumbered to Section R18-2-904, new Section R18-2-804 renumbered from R18-2-604 effective November 15, 1993 (Supp. 93-4).

R18-2-805. Asphalt or Tar Kettles

- A. No person shall cause, allow or permit to be emitted into the atmosphere from any asphalt or tar kettle smoke for any period greater than 10 consecutive seconds, the opacity of which exceeds 40%.
- B. In addition to complying with subsection (A), no person shall cause, allow or permit the operation of an asphalt or tar kettle without minimizing air contaminant emissions by utilizing all of the following control measures:
1. The control of temperature recommended by the asphalt or tar manufacturer;
 2. The operation of the kettle with lid closed except when charging;
 3. The pumping of asphalt from the kettle or the drawing of asphalt through cocks with no dipping;
 4. The dipping of tar in an approved manner;
 5. The maintaining of the kettle in clean, properly adjusted, and good operating condition;
 6. The firing of the kettle with liquid petroleum gas or other fuels acceptable to the Director.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1).
 Amended effective September 26, 1990 (Supp. 90-3).
 Former Section R18-2-805 renumbered to Section R18-2-905, new Section R18-2-805 renumbered from R18-2-605 effective November 15, 1993 (Supp. 93-4).

ARTICLE 9. NEW SOURCE PERFORMANCE STANDARDS**R18-2-901. Standards of Performance for New Stationary Sources**

Except as provided in R18-2-902 through R18-2-905, the following subparts of 40 CFR 60, New Source Performance Standards (NSPS), and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

1. Subpart A - General Provisions.
2. Subpart D - Standards of Performance for Fossil-Fuel-Fired Steam Generators for Which Construction is Commenced After August 17, 1971.
3. Subpart Da - Standards of Performance for Electric Utility Steam Generating Units for Which Construction is Commenced After September 18, 1978.
4. Subpart Db - Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units.
5. Subpart Dc - Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units.
6. Subpart E - Standards of Performance for Incinerators.
7. Subpart Ea - Standards of Performance for Municipal Waste Combustors for Which Construction is Commenced after December 20, 1989 and on or Before September 20, 1994.
8. Subpart Eb - Standards of Performance for Large Municipal Waste Combustors for Which Construction is Com-

- menced after September 20, 1994 or for Which Modification or Reconstruction is Commenced After June 19, 1996.
9. Subpart Ec - Standards of Performance for Hospital/Medical/Infectious Waste Incinerators for Which Construction is Commenced After June 20, 1996.
 10. Subpart F - Standards of Performance for Portland Cement Plants.
 11. Subpart G - Standards of Performance for Nitric Acid Plants.
 12. Subpart Ga - Standards of Performance for Nitric Acid Plants for which Construction, Reconstruction, or Modification Commenced after October 14, 2011.
 13. Subpart H - Standards of Performance for Sulfuric Acid Plants.
 14. Subpart I - Standards of Performance for Hot Mix Asphalt Facilities.
 15. Subpart J - Standards of Performance for Petroleum Refineries.
 16. Subpart Ja - Standards of Performance for Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After May 14, 2007.
 17. Subpart K - Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After June 11, 1973, and Prior to May 19, 1978.
 18. Subpart Ka - Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After May 18, 1978, and Prior to July 23, 1984.
 19. Subpart Kb - Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced after July 23, 1984.
 20. Subpart L - Standards of Performance for Secondary Lead Smelters.
 21. Subpart M - Standards of Performance for Secondary Brass and Bronze Production Plants.
 22. Subpart N - Standards of Performance for Primary Emissions from Basic Oxygen Process Furnaces for Which Construction is Commenced After June 11, 1973.
 23. Subpart Na - Standards of Performance for Secondary Emissions from Basic Oxygen Process Steelmaking Facilities for Which Construction is Commenced After January 20, 1983.
 24. Subpart O - Standards of Performance for Sewage Treatment Plants.
 25. Subpart P - Standards of Performance for Primary Copper Smelters.
 26. Subpart Q - Standards of Performance for Primary Zinc Smelters.
 27. Subpart R - Standards of Performance for Primary Lead Smelters.
 28. Subpart S - Standards of Performance for Primary Aluminum Reduction Plants.
 29. Subpart T - Standards of Performance for Phosphate Fertilizer Industry: Wet-Process Phosphoric Acid Plants.
 30. Subpart U - Standards of Performance for Phosphate Fertilizer Industry: Superphosphoric Acid Plants.
 31. Subpart V - Standards of Performance for Phosphate Fertilizer Industry: Diammonium Phosphate Plants.
 32. Subpart W - Standards of Performance for Phosphate Fertilizer Industry: Triple Superphosphate Plants.
 33. Subpart X - Standards of Performance for Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities.
 34. Subpart Y - Standards of Performance for Coal Preparation Plants.
 35. Subpart Z - Standards of Performance for Ferroalloy Production Facilities.
 36. Subpart AA - Standards of Performance for Steel Plants: Electric Arc Furnaces Constructed After October 21, 1974, and On or Before August 17, 1983.
 37. Subpart AAa - Standards of Performance for Steel Plants: Electric Arc Furnaces and Argon-Oxygen Decarburization Vessels Constructed After August 7, 1983.
 38. Subpart BB - Standards of Performance for Kraft Pulp Mills.
 39. Subpart CC - Standards of Performance for Glass Manufacturing Plants.
 40. Subpart DD - Standards of Performance for Grain Elevators.
 41. Subpart EE - Standards of Performance for Surface Coating of Metal Furniture.
 42. Subpart GG - Standards of Performance for Stationary Gas Turbines.
 43. Subpart HH - Standards of Performance for Lime Manufacturing Plants.
 44. Subpart KK - Standards of Performance for Lead-Acid Battery Manufacturing Plants.
 45. Subpart LL - Standards of Performance for Metallic Mineral Processing Plants.
 46. Subpart MM - Standards of Performance for Automobile and Light Duty Truck Surface Coating Operations.
 47. Subpart NN - Standards of Performance for Phosphate Rock Plants.
 48. Subpart PP - Standards of Performance for Ammonium Sulfate Manufacture.
 49. Subpart QQ - Standards of Performance for Graphic Arts Industry: Publication Rotogravure Printing.
 50. Subpart RR - Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations.
 51. Subpart SS - Standards of Performance for Industrial Surface Coating: Large Appliances.
 52. Subpart TT - Standards of Performance for Metal Coil Surface Coating.
 53. Subpart UU - Standards of Performance for Asphalt Processing and Asphalt Roofing Manufacture.
 54. Subpart VV - Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry.
 55. Subpart VVa - Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry for Which Construction, Reconstruction, or Modification Commenced after November 7, 2006.
 56. Subpart WW - Standards of Performance for Beverage Can Surface Coating Industry.
 57. Subpart XX - Standards of Performance for Bulk Gasoline Terminals.
 58. Subpart AAA - Standards of Performance for New Residential Wood Heaters.
 59. Subpart BBB - Standards of Performance for Rubber Tire Manufacturing Industry.
 60. Subpart DDD - Standards of Performance for Volatile Organic Compound (VOC) Emissions from the Polymer Manufacturing Industry.
 61. Subpart FFF - Standards of Performance for Flexible Vinyl and Urethane Coating and Printing.

62. Subpart GGG - Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries.
63. Subpart GGGa - Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After November 7, 2006.
64. Subpart HHH - Standards of Performance for Synthetic Fiber Production Facilities.
65. Subpart III - Standards of Performance for Volatile Organic Compound (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI) Air Oxidation Unit Processes.
66. Subpart JJJ - Standards of Performance for Petroleum Dry Cleaners.
67. Subpart KKK - Standards of Performance for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants.
68. Subpart LLL - Standards of Performance for Onshore Natural Gas Processing; SO₂ Emissions.
69. Subpart NNN - Standards of Performance for Volatile Organic Compound (VOC) Emissions From Synthetic Organic Chemical Manufacturing Industry (SOCMI) Distillation Operations.
70. Subpart OOO - Standards of Performance for Nonmetallic Mineral Processing Plants.
71. Subpart PPP - Standards of Performance for Wool Fiberglass Insulation Manufacturing Plants.
72. Subpart QQQ - Standards of Performance for VOC Emissions From Petroleum Refinery Wastewater Systems.
73. Subpart RRR - Standards of Performance for Volatile Organic Compound Emissions From Synthetic Organic Chemical Manufacturing Industry (SOCMI) Reactor Processes.
74. Subpart SSS - Standards of Performance for Magnetic Tape Coating Facilities.
75. Subpart TTT - Standards of Performance for Industrial Surface Coating: Surface Coating of Plastic Parts for Business Machines.
76. Subpart UUU - Standards of Performance for Calciners and Dryers in Mineral Industries.
77. Subpart VVV - Standards of Performance for Polymeric Coating of Supporting Substrates Facilities.
78. Subpart WWW - Standards of Performance for Municipal Solid Waste Landfills.
79. Subpart AAAA - Standards of Performance for Small Municipal Waste Combustion Units for Which Construction Is Commenced after August 30, 1999, or for Which Modification or Reconstruction Is Commenced after June 6, 2001.
80. Subpart CCCC - Standards of Performance for Commercial and Industrial Solid Waste Incineration Units for Which Construction Is Commenced after November 30, 1999, or for Which Modification or Reconstruction Is Commenced on or after June 1, 2001.
81. Subpart EEEE - Standards of Performance for Other Solid Waste Incineration Units for Which Construction is Commenced After December 9, 2004, or for Which Modification or Reconstruction is Commenced on or After June 16, 2006.
82. Subpart IIII - Standards of Performance for Stationary Compression Ignition Combustion Engines.
83. Subpart JJJJ - Standards of Performance for Stationary Spark Ignition Internal Combustion Engines.
84. Subpart KKKK - Standards of Performance for Stationary Combustion Turbines.

85. Subpart LLLL - Standards of Performance for New Sewage Sludge Incineration Units.
86. Subpart OOOO - Standards of Performance for Crude Oil and Natural Gas Production, Transmission and Distribution.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Amended effective February 3, 1993 (Supp. 93-1). Section R18-2-901 renumbered to R18-2-1101, new Section R18-2-901 renumbered from R18-2-801 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3058, effective August 10, 1999, and at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expedited rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

R18-2-902. General Provisions

- A. As used in 40 CFR 60: "Administrator" means the Director of the Arizona Department of Environmental Quality, except that the Director shall not be authorized to approve alternate or equivalent test methods or alternative standards or work practices.
- B. From the general standards identified in R18-2-901, delete the following:
 1. 40 CFR 60.4. All requests, reports, applications, submittals, and other communications to the Director pursuant to this Article shall be submitted to the Arizona Department of Environmental Quality, Air Quality Division, 1110 West Washington Street, Phoenix, Arizona 85007.
 2. 40 CFR 60.5 and 60.6.
- C. The Director shall not be delegated authority to deal with equivalency determinations or innovative technology waivers as covered in Sections 111(h)(3) and 111(j) of the Act.

Historical Note

Adopted effective February 26, 1988 (Supp. 88-1). Amended effective September 26, 1990 (Supp. 90-3). Section R18-2-902 renumbered to R18-2-1102, new Section R18-2-902 renumbered from R18-2-802 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4).

R18-2-903. Standards of Performance for Fossil-fuel Fired Steam Generators

As exceptions to 40 CFR 60.40 through 60.47:

1. In place of 40 CFR 60.43(a)(2), the following language shall be substituted: 340 nanograms per joule heat input (0.8 pounds per million Btu) derived from solid fossil fuel or solid fossil fuel and wood residue.

2. Delete 40 CFR 60.43(b).
3. If an owner or operator of a fossil-fuel fired steam generator obtained an installation permit for two or more fuel-burning equipment or steam-power generating installations before May 14, 1979, that permitted the installation to comply with the sulfur dioxide emission standards specified in R18-2-901 and this Section as if the equipment or installations were one emission discharge point:
 - a. The owner or operator shall comply with the applicable sulfur dioxide emission standards in the manner specified in the installation permit;
 - b. The Department shall incorporate the emission standards under subsection (3)(a) into each owner's or operator's operating permit as an enforceable permit condition;
 - c. No single fuel-burning equipment or steam-power generating installation shall emit sulfur dioxide in excess of:
 - i. 520 nanograms per joule heat input (1.2 pounds per million BTU) for solid fossil fuel or solid fossil fuel and wood residue; or
 - ii. 340 nanograms per joule heat input (0.8 pounds per million BTU) for liquid fossil fuel or liquid fossil fuel and wood residue.
4. When an owner or operator subject to subsection (3) changes the equipment configuration so that each fuel-burning equipment or steam-powered generating installation constitutes one emission discharge point:
 - a. The owner or operator shall comply with the emissions standards specified in subsection (1) and R18-2-901; and
 - b. The Department shall incorporate the emissions standards into the owner's or operator's operating permit as enforceable permit conditions.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-903 renumbered without change as Section R18-2-903 (Supp. 87-3). Repealed effective February 26, 1988 (Supp. 88-1). New Section R18-2-903 renumbered from R18-2-803 and amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 14 A.A.R. 230, effective March 8, 2008 (Supp. 08-1).

R18-2-904. Standards of Performance for Incinerators

- A. Incinerators with a charging rate of more than 45 metric tons or 49.6 tons per day shall conform to the requirements of 40 CFR 60.50 through 60.54.
- B. Incinerators with a charging rate of 45 metric tons or 49.6 tons per day or less that commence construction or modification after May 14, 1979, shall conform to the requirements of 40 CFR 60.52 through 60.54 and of R18-2-704(A).

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective May 28, 1982 (Supp. 82-3). Former Section R9-3-904 renumbered without change as Section R18-2-904 (Supp. 87-3). Repealed effective February 26, 1988 (Supp. 88-1). New Section R18-2-904 renumbered from R18-2-804 and amended effective November 15, 1993 (Supp. 93-4).

R18-2-905. Standards of Performance for Storage Vessels for Petroleum Liquids

In addition to 40 CFR 60.110 - 60.113:

1. Any petroleum liquid storage tank of less than 40,000 gallons (151,412 liters) capacity shall be equipped with a

submerged filling device or acceptable equivalent as determined by the Director for the control of hydrocarbon emissions.

2. All facilities for dock loading of petroleum products having a vapor pressure of 2.0 pounds per square inch absolute, or greater, at loading pressure shall provide for submerged filling or other acceptable equivalent for control of hydrocarbon emissions.
3. All pumps and compressors which handle volatile organic compounds shall be equipped with mechanical seals or other equipment of equal efficiency to prevent the release of organic contaminants into the atmosphere.

ARTICLE 10. MOTOR VEHICLES; INSPECTIONS AND MAINTENANCE

R18-2-1001. Definitions

In this Article, unless the context otherwise requires:

1. Abbreviations and symbols are as follows:
 - a. "A/F" means air/fuel,
 - b. "CO" means carbon monoxide.
 - c. "CO₂" means carbon dioxide.
 - d. "EGR" means exhaust gas recirculation.
 - e. "GVWR" means gross vehicle weight rating.
 - f. "HC" means hydrocarbon.
 - g. "HP" means horsepower.
 - h. "LNG" means liquefied natural gas.
 - i. "LPG" means liquid petroleum gas.
 - j. "MIL" means Malfunction Indicator Lamp.
 - k. "MPH" means miles per hour.
 - l. "MVD" means the Motor Vehicle Division of the Arizona Department of Transportation.
 - m. "NDIR" means nondispersive infrared.
 - n. "NO_x" means the sum of nitrogen oxide and nitrogen dioxide.
 - o. "%" means percent.
 - p. "OEM" means original equipment manufacturer.
 - q. "OBD" means On-Board Diagnostics.
 - r. "PCV" means positive crankcase ventilation.
 - s. "PPM" means parts per million by volume.
 - t. "RPM" means revolutions per minute.
 - u. "VIN" means vehicle identification number.
2. "Annual test" means any vehicle emissions test that is not a biennial test.
3. "Apportioned vehicle" means a vehicle that is subject to the proportional registration provisions of A.R.S. § 28-2233.
4. "Area A" has the meaning in A.R.S. § 49-541.
5. "Area A vehicle" means a motor vehicle subject to emissions inspection and that is:
 - a. Registered or to be registered within area A;
 - b. Owned by or leased to a person having a valid fleet permit and customarily kept in area A;
 - c. A government vehicle customarily kept in area A;
 - d. Used to commute to the driver's principal place of employment located in area A; or
 - e. Parked, will be parked, or is the subject of a parking permit application at an institution located in area A and subject to the requirements of A.R.S. §§ 15-1444(C) or 15-1627(G).
6. "Area B" has the meaning in A.R.S. § 49-541.
7. "Area B vehicle" means a motor vehicle subject to emissions inspection and that is:
 - a. Registered or to be registered within area B;
 - b. Owned by or leased to a person having a valid fleet permit and customarily kept in area B;
 - c. A government vehicle customarily kept in area B;
 - d. Used to commute to the driver's principal place of employment located in area B; or
 - e. Parked, will be parked, or is the subject of a parking permit application at an institution located in area B and subject to the requirements of A.R.S. §§ 15-1444(C) or 15-1627(G).
8. "Biennial test" means the transient loaded emissions test and evaporative system tests required under R18-2-1006(E)(2), or the OBD test for area A vehicles under R18-1006(E)(3).
9. "Calibration gas" means a gas with assigned concentrations of CO, hexane, or CO₂ that is used by a state inspector to check the accuracy of emissions analyzers.
10. "Certificate of compliance" means a serially numbered document issued by a state station at the time of a vehicle inspection indicating that the vehicle has met the emissions standards.
11. "Certificate of exemption" means a serially numbered document issued by the Director exempting a vehicle from inspection that is not available within the state for an inspection during the 90 days before the emissions compliance expiration date.
12. "Certificate of inspection" means a serially numbered document issued by the Director indicating that a vehicle has been inspected under A.R.S. § 49-546 and has passed inspection.
13. "Certificate of waiver" means a serially numbered document issued by the Department or a fleet inspector other than an auto dealer licensed to sell used motor vehicles under A.R.S. Title 28, indicating that the requirement of passing reinspection has been waived for a vehicle under A.R.S. § 49-542.
14. "Conditioning mode" means either a fast idle condition or a loaded condition as defined in this Section.
15. "Constant 4-wheel drive vehicle" means any 4-wheel drive vehicle that cannot be converted to 2-wheel drive except by disconnecting one of the vehicle's drive shafts.
16. "Constant volume sampler" means a system that dilutes engine exhaust to be sampled with ambient air so that the total combined flow rate of exhaust and dilution air mix is nearly constant for all engine operating conditions.
17. "Contractor" means a person, business, firm, partnership, or corporation with whom the Director has a contract that provides for the operation of one or more official emissions inspection stations.
18. "Curb idle test" means an exhaust emissions test conducted with the engine of the vehicle running at the manufacturer's idle speed ± 100 RPM but without pressure exerted on the accelerator.
19. "Curb weight" means a vehicle's unloaded weight without fuel and oil plus 300 pounds.
20. "Dealer" means a person or organization licensed by the Arizona Department of Transportation as a new motor vehicle dealer, used motor vehicle dealer, or motorcycle dealer.
21. "Department" means the Department of Environmental Quality.
22. "Director" means the Director of the Department of Environmental Quality.
23. "Director's certificate" means a serially numbered document issued by the Director in certain circumstances for the vehicle to show evidence of meeting the minimum standards for registration or reregistration under R18-2-1019 or R18-2-1022.
24. "Electrically-powered vehicle" means a vehicle that uses electricity as the means of propulsion and does not require the combustion of fossil fuel within the confines of the vehicle to generate electricity.
25. "Emissions compliance expiration date" means:
 - a. Each registration expiration date for a vehicle subject to an annual test; and
 - b. The registration expiration date in the second year after the initial biennial test required under this Article or R18-2-1005(B) for a vehicle subject to a biennial test.

26. "Emissions inspection station permit" means a certificate issued by the Director authorizing the holder to perform vehicle emissions inspections under this Article.
27. "Exhaust emissions" means products of combustion emitted into the atmosphere from any opening in the exhaust system downstream of the exhaust ports of a motor vehicle engine.
28. "Exhaust pipe" means the pipe that attaches to the muffler and exits the vehicle.
29. "Fast idle condition" means to operate a vehicle by running the engine at 2,500 RPM, \pm 300 RPM, for up to 30 seconds, with the transmission in neutral, to prepare the vehicle for a subsequent curb idle test.
30. "Fast pass or fast fail algorithm" means a procedure in a vehicle emissions testing system that logically determines whether a vehicle will pass or fail the transient loaded emissions test under R18-2-1006(E)(2) before the test is over.
31. "Fleet emissions inspection station" or "fleet station" means any vehicle emissions inspection facility operated under a permit issued under A.R.S. § 49-546.
32. "Fuel" means any material that is burned within the confines of a vehicle to propel the vehicle.
33. "Four-stroke vehicle" means a vehicle equipped with an engine that requires two revolutions of the crankshaft for each piston power stroke.
34. "Golf cart" means a motor vehicle that has not less than three wheels in contact with the ground, has an unladen weight less than 1,300 pounds, is designed to be and is operated at not more than 15 MPH, and is designed to carry golf equipment and persons.
35. "Government vehicle" means a registered motor vehicle exempt from the payment of a registration fee, or a federally owned or leased vehicle.
36. "Gross vehicle weight rating" (GVWR) means the maximum vehicle weight that a vehicle is designed for as established by the manufacturer.
37. "Inspection" means the mandatory vehicle emissions inspection including the tampering inspection.
38. "Inspection sticker" means a self-adhesive, serially numbered rectangular sticker indicating a government vehicle has met Arizona emissions inspection requirements.
39. "Loaded condition" means to condition a vehicle by running the vehicle on a chassis dynamometer at a specified speed and load for no more than 30 seconds to prepare the vehicle for a subsequent curb idle test.
40. "Loaded cruise test" means an exhaust emissions test conducted on a chassis dynamometer under R18-2-1006(E)(1)(a) and (F)(2)(a).
41. "Mass emissions measurement" means measurement of a vehicle's exhaust in mass units such as grams.
42. "Model year" means the date of manufacture of the original vehicle within the annual production period of the vehicle as designated by the manufacturer or, if a reconstructed vehicle, the first year of titling.
43. "MOL percent" means the percent, by volume, that a particular gas occupies in a mixture of gases at a uniform temperature.
44. "Motorcycle" means a motor vehicle, other than a tractor, having a seat or saddle for use of the rider and designed to travel on not more than three wheels in contact with the ground.
45. "Motorhome" means a vehicle built on a truck or bus chassis and equipped as a self-contained traveling home.
46. "New aftermarket catalytic converter" or "new aftermarket converter" means a catalytic converter, except for an OEM, that meets the standards under 40 CFR 86.
47. "Official emissions inspection station" means an inspection facility, other than a fleet emissions inspection station, whether placed in a permanent structure or in a mobile unit for conveyance to various locations within the state, for the purpose of conducting inspections under A.R.S. § 49-542.
48. "On-board diagnostics test" means a method of emissions testing using the on-board computer systems of a 1996 or newer vehicle, to diagnose and report on the status of the engine's emissions systems by connecting a scan tool to the vehicle's data link connector.
49. "Opacity" means the degree of absorption of transmitted light.
50. "Operational air pump" means an air injection system to supply additional air into the exhaust system to promote further oxidation of HC and CO gases and to assist in catalytic reaction.
51. "Person" means the federal government, state, or any federal or state agency or institution, any municipality, political subdivision, public or private corporation, individual, partnership, association, or other entity, and includes any officer or governing or managing body of any municipality, political subdivision, or public or private corporation.
52. "Reconditioned OEM catalytic converter" or "reconditioned OEM converter" means a used OEM reconditioned equivalent or an OEM converter that has had the pellets replaced with new or used OEM equivalent pellets and that also meets the standards under 40 CFR 86.
53. "Recognized repair facility" means a business with an Arizona transaction privilege tax license whose primary purpose is vehicle repair, and who has at least one employee with a nationally recognized certification for emissions-related diagnosis and repair.
54. "Reconstructed vehicle" means:
 - a. A reconstructed special as identified by the code letters "SP" on the section of the vehicle's Arizona registration card or Arizona certificate of title reserved for identification of the vehicle's style; or
 - b. A vehicle in which the vehicle style is not shown on the Arizona registration card or certificate of title, and the original manufacturer of the complete vehicle cannot be identified from the body.
55. "Standard gases" means gases maintained as a primary standard for determining the composition of working gases, calibration gases, or the accuracy of an emissions analyzer.
56. "State inspector" means an employee of the Department designated to perform quality assurance or waiver functions under this Article.
57. "State station" means an official emissions inspection station operated by a contractor.
58. "Tampering" means removing, defeating, or altering an emissions control device that was installed on a vehicle at the time the vehicle was manufactured. For the purposes of this Article, defeating includes failure to repair any malfunctioning emission control system or device.
59. "Two-stroke vehicle" means a vehicle equipped with an engine that requires one revolution of the crankshaft for each power stroke.
60. "Unloaded fast idle test" means an exhaust emissions test conducted with the engine of the vehicle running at 2,500 RPM.

61. "Vehicle" means any automobile, truck, truck tractor, motor bus, or self-propelled or motor-driven vehicle registered or to be registered in this state and used upon the public highways of this state for the purpose of transporting persons or property, except implements of husbandry, roadrollers, or road machinery temporarily operated upon the highway.
62. "Vehicle emissions inspector" means an individual who is licensed by the Director to perform vehicle emissions inspections under this Article.
63. "Working gases" means gases maintained to perform periodic calibration of an emissions analyzer.

Historical Note

Former Section R9-3-1001 repealed, new Section R9-3-1001 adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1001 repealed, former Section R9-3-1002 renumbered and amended as Section R9-3-1001 effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1001 renumbered as Section R18-2-1001 and amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1002. Reserved

R18-2-1003. Vehicles to be Inspected by the Mandatory Vehicle Emissions Inspection Program

- A. The following vehicles shall be inspected according to this Article at a state station or a fleet station unless exempted by subsection (B):
 1. A vehicle to be registered or reregistered within area A or area B for highway use. For the purposes of this Article, registration or reregistration within area A or area B shall be determined by the vehicle owner's permanent and actual residence. The permanent address in the MVD database shall be presumed to be the owner's permanent and actual residence. A post office box address listed on a title or registration document under A.R.S. § 28-2051(C) is not evidence of the owner's permanent and actual residence;
 2. Each vehicle delivered to a retail purchaser by a dealer licensed to sell used motor vehicles for highway use under A.R.S. Title 28 and whose place of business is located in area A or area B;
 3. Each vehicle registered outside area A and area B but used to commute to the driver's principal place of employment located within area A or area B;
 4. Each vehicle owned by a person who is subject to A.R.S. §§ 15-1444(C) or 15-1627(G); and
 5. An area A or area B vehicle located out-of-state for more than 90 days before vehicle registration expiration shall be emissions tested at an official emissions inspection testing center in the area where it is located. If no official emissions testing program is available in the area for that vehicle, the vehicle shall meet the testing requirements under this Article within 15 calendar days of returning to Arizona.
- B. The following vehicles are exempt from the inspection requirements of this Article:
 1. A vehicle manufactured in or before the 1966 model year;
 2. A vehicle leased to a person residing outside area A and area B by a leasing company whose place of business is

in area A or area B, except as provided in subsection (A)(3);

3. A vehicle sold between motor vehicle dealers;
4. An electrically-powered vehicle;
5. An apportioned vehicle;
6. A golf cart;
7. A vehicle with an engine displacement of less than 90 cubic centimeters;
8. A vehicle registered at the time of change of name of ownership except when:
 - a. The change in registration is accompanied by the required fee for the year following expiration of the prior registration, or
 - b. The change results from the sale by a dealership whose place of business is located in area A or area B;
9. A vehicle for which a current certificate of exemption or Director's certificate is issued;
10. A vehicle of a model year the same as, or newer than, the current calendar year and a vehicle of the prior four model years, except:
 - a. A reconstructed vehicle;
 - b. An alternative fuel vehicle, as defined in A.R.S. § 43-1086, and
 - c. A vehicle failing an emissions inspection the owner chooses to have under A.R.S. § 49-543.
11. A vehicle designed to operate exclusively on hydrogen, as defined in A.R.S. § 1-215.

- C. Government vehicles operated in area A or area B and not exempted by this Article shall be emissions inspected according to R18-2-1017.

Historical Note

Former Section R9-3-1003 repealed, new Section R9-3-1003 adopted effective January 13, 1976 (Supp. 76-1). Amended effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1003 as amended effective January 3, 1979 and amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1003 renumbered as Section R18-2-1003 and amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended effective October 15, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 2722, effective June 28, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1004. Repealed

Historical Note

Former Section R9-3-1004 repealed, new Section R9-3-1004 adopted effective January 13, 1976 (Supp. 76-1). Amended effective January 3, 1977 (Supp. 77-1). Former Section R9-3-1004 renumbered as Section R18-2-1004 and amended effective August 1, 1988 (Supp. 88-3). Section repealed by final rulemaking at 6 A.A.R. 382, effective January 1, 2002 (Supp. 01-4).

tive December 20, 1999 (Supp. 99-4).

R18-2-1005. Time of Inspection

- A.** Area A vehicles subject to an annual test, all area B vehicles, and vehicles sold or offered for sale by dealers required to be inspected under R18-2-1003, shall be inspected at the following times:
1. For a vehicle not covered by a fleet station permit, within 90 days before each registration expiration date;
 2. For a vehicle sold by a dealer licensed to sell used motor vehicles under A.R.S. Title 28, whose place of business is located in area A or area B, before delivery of the vehicle to the retail purchaser;
 3. For a consignment vehicle offered for sale by a dealer licensed to sell used motor vehicles under A.R.S. Title 28 whose place of business is located in area A or area B, before delivery of the vehicle to the retail purchaser. The consignment vehicle shall be inspected at a state station according to R18-2-1006;
 4. For government vehicles:
 - a. For a vehicle not exempt under R18-2-1003(B)(10), within 12 months after acquisition by the operating entity and then annually on or before the anniversary date of the previous inspection;
 - b. For a vehicle exempt under R18-2-1003(B)(10), within 90 days after the vehicle becomes subject to testing, and then annually on or before the anniversary date of the previous inspection and;
 - c. A vehicle is subject to testing on the anniversary of its date of acquisition;
 5. For a vehicle owned by or leased to a person having a valid fleet station permit, at least once within each 12-month period following any original registration or reregistration;
 6. For a vehicle to be registered in area A or area B under conditions not specified in subsection (1) through (5), within 90 days before registration;
 7. For a vehicle registered outside area A and area B and used to commute to the driver's principal place of work located in area A or area B, upon vehicle registration or reregistration;
 8. For a vehicle owned by a person subject to A.R.S. §§ 15-1444(C) or 15-1627(G), within 30 calendar days following the date of initial registration at the institution located in area A or area B and annually thereafter; and
 9. For a vehicle issued a certificate of exemption under R18-2-1023, within 15 calendar days after returning to Arizona, unless an official emissions inspection document from the out-of-state emissions inspection station is submitted with the request for exemption.
- B.** An area A vehicle subject to a biennial test shall be inspected at the following times:
1. For a vehicle not covered by a fleet station permit, within 90 days before the vehicle's emissions compliance expiration date.
 2. For a government vehicle;
 - a. For a vehicle not exempt under R18-2-1003(B)(10), within 12 months after acquisition by the operating entity, and biennially thereafter, on or before the anniversary date of the previous inspection;
 - b. For a vehicle exempt under R18-2-1003(B)(10), within 90 days after the vehicle becomes subject to testing, and biennially thereafter, on or before the anniversary date of the previous inspection; and
 - c. The vehicle becomes subject to testing on the anniversary of its date of acquisition;
 3. For a vehicle owned by or leased to a person having a valid fleet station permit, at least once within each successive 24-month period following original registration;
 4. For a vehicle registered outside area A but used to commute to the driver's principal place of work located in area A, upon vehicle registration and biennially thereafter;
 5. For a vehicle owned by a person subject to A.R.S. §§ 15-1444(C) or 15-1627(G), within 30 days following the date of initial registration at the institution located in area A and biennially thereafter;
 6. For a vehicle to be registered as area A vehicles under conditions not specified in subsections (1) through (5), upon initial registration and within 90 days before the vehicle's emissions compliance expiration date thereafter and;
 7. For a vehicle issued a certificate of exemption under R18-2-1023, within 15 calendar days after returning to Arizona, unless an official emissions inspection document indicating compliance with the emissions requirements from the out-of-state emissions inspection station is submitted with the request for exemption.
- C.** A used vehicle not registered as an area A or area B vehicle shall be inspected according to this Article before registration as an area A or area B vehicle unless exempted by R18-2-1003(B).
- D.** An area B vehicle being registered in area A is subject to the appropriate annual or biennial test from area A before registration even if the emissions compliance period for area B has not yet expired.
- E.** A new vehicle that is exempt from emissions testing under R18-2-1003(B)(10), and subject to either an annual or biennial test, shall be tested before registration in the calendar year that exceeds the vehicle's model year by five years.
- F.** Nothing in this Section shall be construed to waive a late registration fee because of failure to meet inspection requirements by the registration deadline, except that a motor vehicle that fails the initial or subsequent test shall not be subject to a penalty fee for late registration renewal if:
1. The initial test is accomplished before the emissions compliance expiration date, and
 2. The registration renewal is received by MVD within 30 days of the initial test.
- G.** An owner of a vehicle subject to subsection (A)(1), (A)(6), (B)(1), or (B)(6) may submit the vehicle for emissions inspection more than 90 days before the emissions compliance expiration date but the inspection does not satisfy the registration or reregistration testing requirement under R18-2-1003.

Historical Note

Former Section R9-3-1005 repealed, new Section R9-3-1005 adopted effective January 31, 1976 (Supp. 76-1). Amended effective January 3, 1977 (Supp. 77-1). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended effective February 20, 1980 (Supp. 80-1). Amended as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-2). Former Section R9-3-1005 as amended effective February 20, 1980 and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1005 renumbered as Section R18-2-1005 and subsections (A) and (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3).

Amended effective November 14, 1994 (Supp. 94-4).
Amended by final rulemaking at 6 A.A.R. 382, effective
December 20, 1999 (Supp. 99-4). Amended by final
rulemaking at 8 A.A.R. 90, effective January 1, 2002
(Supp. 01-4).

R18-2-1006. Emissions Test Procedures

- A.** Each vehicle inspected at a state station shall be visually inspected before the emissions test for the following unsafe or untestable conditions:
 1. A fuel leak that causes wetness or pooling of fuel;
 2. A continuous engine or transmission oil leak onto the floor;
 3. A continuous engine coolant leak onto the floor such that the engine is overheating or may overheat within a short time;
 4. A vehicle with a tire on a driving wheel with less than 2/32-inch tread, with metal protruberances, unmatched tire size, with obviously low tire pressure as determined by visual inspection, or any other condition that precludes a loaded test for reasons of personnel, equipment, or vehicle safety;
 5. An exhaust pipe that does not exit the rear or side of the vehicle to allow for safe exhaust probe insertion;
 6. An exhaust pipe on a diesel-powered vehicle that does not allow for safe exhaust probe insertion and attachment of opacity meter sensor units;
 7. Improperly operating brakes;
 8. Any vehicle modification or mechanical condition that prevents dynamometer operation; and
 9. Any other condition deemed unsafe or untestable by the inspector, including loud internal engine noise or an obvious exhaust leak.
- B.** A vehicle emissions inspection shall not be performed by an official emissions inspection station on any vehicle towing a heavily loaded trailer, carrying a heavy load, loaded with explosives, or loaded with any hazardous material not used as fuel for the vehicle.
- C.** Any vehicle unsafe or otherwise untestable as determined by the visual inspection shall be rejected without an emissions test. The inspector shall notify the vehicle owner or operator of all unsafe conditions found on rejected vehicles. The state station shall not charge a fee if the vehicle is rejected. The contractor shall not conduct an emissions test on a vehicle rejected for a safety reason or any other untestable condition until the cause for rejection is repaired.
- D.** When conducting the emissions test required by this Section, the vehicle emissions inspector shall meet all of the following requirements:
 1. The vehicle shall be tested in the condition presented, unless rejected under subsection (A), (B), or (C). The vehicle's engine shall be operating at normal temperature and not be overheating as indicated by a gauge, warning light, or boiling radiator. All of the vehicle's accessories shall be turned off during testing.
 2. A vehicle designed to operate with more than one fuel shall be tested on the fuel in use when the vehicle is presented for inspection, except alternative fuel vehicles, as defined in A.R.S. § 43-1086. The inspector shall test the alternative fuel vehicle on each fuel for which it is intended to operate, using the appropriate emissions test procedure and standards for that vehicle. The alternative fuel vehicle shall:
 - a. Be operated a minimum of 30 seconds before testing, after switching fuels;
 - b. Be rejected if it is not able to operate on both fuels; and
 - c. Be rejected if the vehicle operator cannot switch fuels.
 3. A vehicle operated exclusively on propane or natural gas, as defined in A.R.S. § 1-215, shall be exempt from the gas cap and evaporative pressure testing described in subsection (E)(6)(b)(ii), (E)(7)(a), and (F)(7)(a).
- E.** In area A, the inspection test procedures for a vehicle other than a diesel-powered vehicle or a vehicle held for resale by a fleet-licensed motor vehicle dealer shall consist of the following:
 1. A vehicle manufactured with a model year of 1967 through 1980, a nonexempt vehicle with a GVWR greater than 8,500 pounds, and a reconstructed vehicle, except a motorcycle and a constant 4-wheel drive vehicle, is required to annually take and pass a loaded cruise test and a curb idle test, as follows:
 - a. Loaded cruise test. The vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1 of this Article, in drive for automatic transmission or second or higher gear for manual transmission. Overdrive shall not be used for testing. All vehicles shall be driven by the inspector during testing. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. After exhaust emissions are recorded, engine speed shall be returned to idle for a curb idle test.
 - b. Curb idle test. The test shall be performed with the vehicle in neutral for 1981 and newer vehicles. For 1980 and older vehicles, the test shall be performed in neutral, except that if the vehicle has an automatic transmission, drive shall be used. Engine RPM shall be within ± 100 RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. A CO₂ plus CO reading of 6% or greater shall be registered to establish test validity. A CO₂ plus CO reading of less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired, except when tested at a fleet emissions inspection station.
 - c. Exhaust sampling for a vehicle required to take an annual emissions test under subsection (E)(1) shall comply with subsection (F)(8).
 2. A vehicle with a 1981 or newer model year and a GVWR of 8,500 pounds or less, except a motorcycle, a reconstructed vehicle, a 1996 or newer OBD-equipped vehicle or a constant 4-wheel drive vehicle, is required to biennially take and pass a transient loaded emissions test and an evaporative system pressure test as follows:
 - a. The transient loaded emissions test shall consist of 147 seconds of mass emissions measurement using a constant volume sampler while the vehicle is driven by an inspector through a computer-monitored driving cycle on a dynamometer with inertial weight settings appropriate for the weight of the vehicle. The driving cycle shall include the acceleration, deceleration, and idle operating modes described in Table 4. The 147 second sequence may be ended earlier using a fast pass or fast fail algorithm. A retest algorithm shall be used to determine if a test failure is due to insufficient vehicle preconditioning. As determined by the retest algorithm, up to two additional

- tests may be performed on a failing vehicle. Drive shall be used for automatic transmissions and first gear shall be used to begin for manual transmissions. Exhaust emissions concentrations in grams per mile for HC, CO, NO_x and CO₂ shall be recorded continuously beginning with the first second. The inspector shall reject a vehicle with an audible or visible exhaust leak from emissions testing.
- b. The evaporative system pressure test shall consist of the following steps in sequence:
 - i. Connect the test equipment to either the fuel tank vent hose at the canister or the fuel tank filler neck. The gas cap shall be checked to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge;
 - ii. Pressurize the system to 14 ± 0.5 inches of water without exceeding 26 inches of water system pressure;
 - iii. Close off the pressure source, seal the evaporative system, and monitor pressure decay for no more than two minutes.
 - c. For a vehicle requiring a transient loaded emissions test under subsection (E)(2)(a), all testing and test equipment shall conform to "IM240 & Evap Technical Guidance," EPA420-R-98-010, EPA, August 1998, incorporated by reference, and no future editions or amendments, except that the transient driving cycle in Table 4 of this Article shall be used. A copy of the incorporated material is on file with the Department and the Secretary of State, and may be obtained at EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105-2498.
3. A vehicle with a 1996 or newer model year and a GVWR of 8500 pounds or less, except a motorcycle or a reconstructed vehicle, is required to biennially take and pass an OBD test and a functional gas cap test as follows:
 - a. The OBD test shall consist of:
 - i. A visual inspection of the MIL function; and
 - ii. An electronic examination of the OBD computer by connecting a scan tool to the data link connector and interrogating the OBD system to determine vehicle readiness status, MIL status, and presence of diagnostic trouble codes.
 - b. The OBD test and test equipment shall conform to "Performing Onboard Diagnostic System Checks as Part of a Vehicle Inspection and Maintenance Program," EPA420-R-01-015, EPA, June 2001, incorporated by reference, and no future editions or amendments. A copy of this incorporated material is on file with the Department and the Secretary of State, and may be obtained at the EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI, 48105-2498; and
 - c. The functional gas cap test shall comply with subsection (E)(7)(a).
 4. A motorcycle, or a constant 4-wheel drive vehicle except one requiring an OBD emissions test under subsection (E)(3), shall take and pass only a curb idle test according to subsection (F)(1). An all-terrain vehicle (ATV), as defined in A.R.S. § 28-101, shall be tested as a motorcycle.
 5. A vehicle with a 1975 or newer model year is required to take and pass a liquid fuel leak inspection annually or biennially according to subsections (E)(1) or (2) as follows:
 - a. For purposes of this subsection, "liquid fuel leak" means any fuel emanating from a vehicle's fuel delivery, metering or evaporation systems in liquid form that has created a visible drop or more of fuel on, around, or under a component of a vehicle's fuel delivery, metering, or evaporation system.
 - b. With the engine running, the vehicle emissions inspector shall visually inspect the following components of the vehicle, if they are exposed and visually accessible, for liquid fuel leaks:
 - i. Gasoline fuel tanks;
 - ii. Gasoline fill pipes, associated hoses and fuel tank connections;
 - iii. Gas caps;
 - iv. External fuel pumps;
 - v. Fuel delivery and return lines and hoses;
 - vi. Fuel filters;
 - vii. Carburetors;
 - viii. Fuel injectors;
 - ix. Fuel pressure regulators;
 - x. Charcoal canisters; and
 - xi. Fuel vapor hoses.
 - xii. Any valves connected to any other fuel evaporative component.
 - c. The liquid fuel leak inspection required by this subsection is a visual inspection only. The vehicle emissions inspector is not required to perform any disassembly of the vehicle to inspect for liquid fuel leaks. No special tools or equipment, other than a flashlight and mirror, are required and no raising, hoisting, or lifting of the vehicle is required.
 - d. The vehicle emissions inspector shall indicate on the vehicle inspection report the location of any liquid fuel leak.
 - e. Nothing in this subsection shall prohibit a vehicle emissions inspector from refusing to inspect a vehicle under subsections (A), (B), or (C) or from terminating an inspection if a liquid fuel leak presents a safety hazard.
 - f. A vehicle operated exclusively by compressed natural gas (CNG), liquid natural gas (LNG), or liquid petroleum gas (LPG) shall be exempt from the liquid fuel leak inspection.
 6. The emissions pass-fail determination for a vehicle tested under subsection (E) shall be made as follows:
 - a. A vehicle tested under subsection (E)(1), that does not exceed the loaded cruise mode or curb idle mode HC and CO emissions standards listed in Table 2 for the vehicle, complies with the emissions standards in Table 2. The loaded cruise test standards in Table 2 apply to a fleet vehicle tested with the 2,500 RPM unloaded fast idle test under R18-2-1019(E).
 - b. A vehicle tested under subsection (E)(2) shall meet the standards in Table 3 and pass the evaporative system pressure test as follows:
 - i. Table 3 Standards. A vehicle shall meet either the composite standard for the whole test or the phase 2 standard for seconds 65 to 146. The Department may implement a testing algorithm for fast pass, fast fail, or both, provided that the algorithm is reliable in accurately predicting the final outcome of the entire cycle. A vehicle not meeting either the composite or phase 2 standard shall fail the emissions test.

- ii. Evaporative System Pressure Test. A vehicle fails the emissions test if the evaporative system cannot maintain a system pressure above eight inches of water for at least two minutes after being pressurized to 14 ± 0.5 inches of water. Additionally, a vehicle fails the evaporative test if the canister is missing or damaged, if a hose or electrical connection is missing, routed incorrectly, or disconnected, according to the vehicle emissions control information label, or if the gas cap is missing.
- c. A vehicle that operates on natural gas complies with HC emissions standards if the HC emissions value does not exceed the applicable standard in subsection (E)(6)(a) or (b), if:
 - i. Multiplied by 0.19, when using an analyzer with a flame ionization detector, or
 - ii. Multiplied by 0.61, when using an NDIR analyzer.
- d. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (E)(3), that does not exceed the curb idle mode HC and CO emissions standards listed in Table 2 on either the first curb idle test or the second curb idle test passes the emissions test.
- e. A vehicle tested under subsection (E)(3) shall:
 - i. Fail if the data link connector is missing, tampered, or otherwise inoperable during any OBD test;
 - ii. Fail if the MIL does not illuminate at all when the ignition key is turned to the key on, engine off position, or does not illuminate briefly during engine start during any OBD test;
 - iii. Fail if the MIL illuminates continuously or flashes after the engine has been started during any OBD test;
 - iv. Fail if a diagnostic trouble code is present and the MIL status, as indicated by the scan tool, is commanded on during any OBD test.
 - v. Be rejected from an initial OBD test and required to take and pass a transient loaded test under subsection (E)(2) if the number of unset readiness indicators, excluding continuous indicators, is three or more for a model year 1996-2000 vehicle, or two or more for a model year 2001 and newer vehicle.
 - vi. Be rejected from an OBD retest if the number of unset readiness indicators, excluding continuous indicators, exceeds the number allowed in subsection (v).
 - vii. Fail the functional gas cap test if the gas cap does not comply with subsection (E)(7)(a).
- f. A vehicle tested under subsection (E)(5) shall fail the inspection if a vehicle emissions inspector detects a liquid fuel leak.
- g. A vehicle that exceeds the applicable emissions standards for the tests described in subsections (E)(1) and (E)(2)(a), or fails the OBD test described in subsection (E)(3), fails the emissions test and shall not be reinspected until a low-emissions tune-up is performed as described in R18-2-1010. A vehicle that fails the evaporative system pressure test described in subsection (E)(2)(b) shall not be reinspected until repaired as required in R18-2-1010(D)(1) and (2). A vehicle that fails the functional gas cap test described in subsection (E)(7)(a) shall not be reinspected until repaired as required in R18-2-1009(B). A vehicle that fails the liquid fuel leak test described in subsection (E)(5) shall not be reinspected until repaired as required in R18-2-1010(E).
- 7. A vehicle required to take an annual emissions test in area A shall, at the time of the test, undergo a tampering inspection based on the original configuration of the vehicle as manufactured. The applicable emissions system requirements shall be verified by the "VEHICLE EMISSION CONTROL INFORMATION" label. A vehicle that fails any portion of the tampering inspection shall be repaired according to R18-2-1009 before reinspection unless the owner provides the written statement required in R18-2-1008(B). "Original configuration" for a foreign-manufactured vehicle means the design and construction of a vehicle produced by the manufacturer for original entry and sale in the United States. The tampering inspection shall consist of the following:
 - a. Any vehicle emissions tested, except one with a vented fuel system, shall have a functional test of the gas cap to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge. A vehicle with a vented fuel system shall be checked for the presence of a properly fitting fuel cap.
 - b. For a 1975 and newer model year vehicle:
 - i. A visual inspection to determine the presence and proper installation of each required catalytic converter, if applicable;
 - ii. An examination to determine the presence of an operational air pump, if applicable; and
 - iii. A visual inspection to determine the presence of an operational positive crankcase ventilation system and evaporative control system, if applicable.
- F. In area B, the inspection test procedures for a vehicle other than a diesel-powered vehicle shall consist of the following:
 - 1. An area B vehicle with a model year of 1967 through 1980 shall take and pass only a curb idle test. The curb idle test shall be performed with the vehicle in drive for automatic transmissions or in neutral for manual transmissions. Engine RPM shall be within ± 100 RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. A CO₂ plus CO reading of 6% or greater shall be registered to establish test validity. A CO₂ plus CO reading less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired, except when tested at a fleet emissions inspection station. If the vehicle fails the curb idle test, and if permitted by the vehicle operator, the vehicle shall be conditioned according to one of the following conditioning procedures:
 - a. Fast-idle conditioning procedure. The vehicle shall be conditioned by increasing engine speed to 2,500, ± 300 RPM, for up to 30 seconds with the transmission in neutral. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. The conditioning procedure standards in Table 2 are for diagnostic and advisory information only. After exhaust emissions are recorded, the engine speed shall be returned to curb idle for a second idle test. The fast-idle conditioning procedure

- may be used on a vehicle at a state station instead of the loaded conditioning procedure if any of the following occurs:
- i. The vehicle has a tire on a driving wheel with less than 2/32-inch tread, with metal protruberances, with visibly low tire pressure as determined by visual inspection, or any other condition that precludes loaded conditioning for reasons of personnel, equipment, or vehicle safety;
 - ii. The vehicle is driven by a person who, because of physical incapacity, is unable to yield the driver's seat to the vehicle emissions inspector;
 - iii. The driver refuses to yield the driver's seat to the vehicle emissions inspector; or
 - iv. The vehicle cannot be tested according to Table 1 because of the vehicle's inability to attain the speeds specified.
- b. Loaded conditioning procedure. For a vehicle other than a motorcycle or a constant 4-wheel drive vehicle, the vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1, in drive for automatic transmission, or second or higher gear for manual transmission. All front wheel drive vehicles shall be driven by the inspector. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 30 seconds, whichever occurs first. The conditioning procedure standards in Table 2 are for diagnostic and advisory information only. After exhaust emissions are recorded, engine speed shall be returned to curb idle for a second idle test.
 - c. Following one of the conditioning procedures in subsection (F)(1)(a) or (b), the vehicle shall be retested according to the curb idle test procedure in subsection (F)(1).
2. An area B vehicle with a 1981 or newer model year, except a motorcycle, a constant 4-wheel drive vehicle, or a 1996 and newer vehicle equipped with OBD, shall take and pass a loaded cruise test and curb idle test, as follows:
 - a. Loaded Cruise Test. The vehicle's drive wheels shall be placed on a dynamometer and the vehicle shall be operated according to Table 1, in drive for automatic transmission or second or higher gear for manual transmission. Overdrive shall not be used. All front wheel drive vehicles shall be driven by the inspector. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. After exhaust emissions are recorded, engine speed shall be returned to idle for a curb idle test.
 - b. Curb Idle Test. The test shall be performed with the vehicle in neutral. Engine RPM shall be within ± 100 RPM of the manufacturer's specified idle RPM. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized, or at the end of 90 seconds, whichever occurs first. A CO₂ plus CO reading of 6% or greater shall be registered to establish test validity, except when tested at a fleet inspection station. A CO₂ plus CO reading less than 6% shall be proof of exhaust sample dilution and the vehicle shall be rejected from further emissions inspection until repaired.
 3. A vehicle with a model year of 1996 or newer and a GVWR of 8500 pounds or less, except a motorcycle or a reconstructed vehicle, is required to annually take and pass an OBD test and a functional gas cap test as follows:
 - a. The OBD test shall consist of:
 - i. A visual inspection of the MIL function; and
 - ii. An electronic examination of the OBD computer by connecting a scan tool to the data link connector and interrogating the OBD system to determine vehicle readiness status, MIL status, and presence of diagnostic trouble codes;
 - b. The OBD test and test equipment shall conform to "Performing Onboard Diagnostic System Checks as Part of a Vehicle Inspection and Maintenance Program," EPA420-R-01-015, EPA, June 2001, incorporated by reference, and no future editions or amendments. A copy of this incorporated material is on file with the Department and the Secretary of State and may be obtained at the EPA's National Vehicle and Fuel Emissions Laboratory, 2565 Plymouth Road, Ann Arbor, MI, 48105-2498; and
 - c. The functional gas cap test shall comply with subsection (F)(7)(a).
 4. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (F)(3), shall take and pass only a curb idle test according to subsection (F)(1). An all-terrain vehicle (ATV), as defined in A.R.S. § 28-101, shall be tested as a motorcycle. If the vehicle fails the curb idle test, and if permitted by the vehicle operator, the vehicle shall be conditioned according to the fast idle conditioning procedure required in subsection (F)(1)(a). Following conditioning, the vehicle shall be retested according to the curb idle test procedure in subsection (F)(1).
 5. A vehicle with a 1975 or newer model year and annually tested under subsections (F)(1) or (2) is required to take and pass a liquid fuel leak inspection according to subsections (E)(5)(a) through (f).
 6. The emissions pass-fail determination shall be made as follows:
 - a. A vehicle with a model year of 1967 through 1980, except a motorcycle or a constant 4-wheel drive vehicle, that does not exceed the curb idle mode HC and CO emissions standards in Table 2 on either the first or second curb idle test, complies with the minimum emissions standards contained in Table 2.
 - b. A vehicle with a 1981 or newer model year, except a motorcycle or a constant 4-wheel drive vehicle, that does not exceed the loaded cruise mode or curb idle mode HC and CO emissions standards listed in Table 2, complies with the minimum emissions standards in Table 2. The loaded cruise test standards specified in Table 2 shall apply to fleet vehicles tested with the 2,500 RPM unloaded fast idle test.
 - c. A vehicle that operates on natural gas complies with HC emissions standards if the HC emissions value, as determined by an NDIR analyzer, multiplied by 0.61 does not exceed the applicable standard in subsection (F)(6)(a) or (b).
 - d. A motorcycle or a constant 4-wheel drive vehicle, except one requiring an OBD emissions test under subsection (F)(3), that does not exceed the curb idle mode HC and CO emissions standards in Table 2 on either the first or second curb idle test complies with the minimum emissions standards in Table 2.
 - e. A vehicle that exceeds the applicable emissions standards, or fails the OBD test described in subsection (F)(3), fails the emissions test and shall have a

- low emissions tune-up as described in R18-2-1010 before reinspection. A vehicle that fails the functional gas cap test described in subsection (F)(3)(c) shall not be reinspected until repaired as required in R18-2-1009(B).
- f. A vehicle tested under subsection (F)(3) shall:
 - i. Fail if the data link connector is missing, tampered, or otherwise inoperable during any OBD test;
 - ii. Fail if the MIL does not illuminate at all when the ignition key is turned to the key on, engine off position, or does not illuminate briefly during engine start during any OBD test;
 - iii. Fail if the MIL illuminates continuously or flashes after the engine has been started during any OBD test;
 - iv. Fail if a diagnostic trouble code is present and the MIL status, as indicated by the scan tool, is commanded on during any OBD test;
 - v. Be rejected from an initial OBD test and required to take and pass a loaded cruise test and curb idle test under subsection (F)(2) if the number of unset readiness indicators, excluding continuous indicators, is three or more for a model year 1996-2000 vehicle, or two or more for a model year 2001 and newer vehicle;
 - vi. Be rejected from an OBD retest if the number of unset readiness indicators, excluding continuous indicators, exceeds the number allowed in subsection (v); and
 - vii. Fail the functional gas cap test if the gas cap does not comply with subsection (F)(7)(a).
 - g. A vehicle tested under subsection (F)(5) shall fail the inspection if a vehicle emissions inspector detects a liquid fuel leak. A vehicle that fails the liquid fuel leak test shall not be reinspected until repaired as required in R18-2-1010(E).
7. A vehicle required to take an emissions test in area B, except a vehicle required to take an OBD test as described in subsection (F)(3), shall at the time of the test, undergo a tampering inspection based on the original configuration of the vehicle as manufactured. The applicable emissions system requirements shall be verified by the "VEHICLE EMISSION CONTROL INFORMATION" label. A vehicle that fails any portion of the tampering inspection shall be repaired according to R18-2-1009 before reinspection unless the owner provides the written statement required in R18-2-1008(B). "Original configuration" for a foreign manufactured vehicle means the design and construction of a vehicle produced by the manufacturer for original entry and sale in the United States. The tampering inspection shall consist of the following:
 - a. Any vehicle emissions tested, except one with a vented fuel system, shall have a functional test of the gas cap to determine that cap leakage does not exceed 60 cubic centimeters of air per minute at a pressure of 30 inches of water gauge. A vehicle with a non-sealing gas cap shall be checked for the presence of a properly fitting gas cap.
 - b. For a 1975 or newer model year vehicle:
 - i. A visual inspection to determine the presence and proper installation of each required catalytic converter, if applicable; and
 - ii. An examination to determine the presence of an operational air pump, if applicable.
 8. Exhaust sampling in area B shall comply with the following:
 - a. All CO and HC emissions analyzers shall have water traps incorporated in the sampling lines. Sampling probes shall be capable of taking undiluted exhaust samples from a vehicle exhaust system.
 - b. A vehicle, other than a diesel-powered vehicle, shall be inspected with a NDIR analyzer capable of determining concentrations of CO and HC within the ranges and tolerances specified in Table 5.
 - c. A vehicle with multiple exhaust pipes shall be inspected by collecting and averaging samples by one of the following methods:
 - i. Collect separate samples from each exhaust pipe and use the average concentration to determine the test result;
 - ii. Use manifold exhaust probes to simultaneously sample approximately equal volumes from each pipe; or
 - iii. Use manifold exhaust pipe adapters to collect approximately equal volume samples from each pipe.
- G. The following apply to all testing under subsection (E) or (F):
 1. A rotary piston engine shall be inspected as a 4-stroke engine with four cylinders or less;
 2. A turbine engine shall be inspected as a 4-stroke engine with more than four cylinders; and
 3. A vehicle in which a diesel engine has been replaced with a gas engine shall be inspected as a gas-powered vehicle of the same vehicle model year. The vehicle shall not pass the inspection unless each catalytic converter, air pump, gas cap, and other emissions control device applicable to the vehicle model year and the same or more recent year engine configuration is properly installed and in operating condition.
 - H. In area A, the inspection test procedure for a diesel-powered vehicle is as follows:
 1. A diesel-powered vehicle with a GVWR greater than 8,500 pounds shall be tested with a procedure that conforms to Society of Automotive Engineers standard J1667, February 1996, incorporated by reference and on file with the Department and the Secretary of State. This incorporation by reference contains no future editions or amendments. A copy of this referenced material may be obtained at Society of Automotive Engineers, 400 Commonwealth Dr., Warrendale, PA 15096-0001. The procedure shall utilize the corrections for ambient test conditions in Appendix B of J1667 for all tests. The test results shall be reported as the percentage of smoke opacity. Emissions pass-fail determinations are as follows:
 - a. A vehicle powered by a 1991 or later model year diesel engine fails if the J1667 final test result is greater than 40%, unless the engine family is exempted from the 40% standard under subsection (H)(1)(e);
 - b. A vehicle powered by a pre-1991 model year diesel engine fails if the J1667 final test result is greater than 55%, unless the engine family is exempted from the 55% standard under subsection (H)(1)(e);
 - c. The engine model year is determined by the emission control label. If the emission control label is missing, illegible, or incorrect, the test standard shall be 40%, unless a correct, legible, emission control label replacement is attached to the vehicle within 30 days of the inspection;

- d. A vehicle that exceeds the opacity standard in subsection (H)(1)(a) or (b) fails the emissions test. Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010(H);
 - e. The Director shall exempt any engine family from the standards in subsections (H)(1)(a) or (b) if the engine manufacturer demonstrates either of the following:
 - i. The engine family exhibits smoke opacity greater than the standard when in good operating condition and adjusted to the manufacturer's specifications. The Director shall identify a technologically appropriate less stringent standard based on a review of data obtained from engines in good operating condition and adjusted to manufacturer's specifications; or
 - ii. The engine family is exempted from an equivalent standard based on J1667 by the executive officer of the California Air Resources Board (CARB). The Director shall allow the engine family to comply with any technologically appropriate less stringent standard identified by the executive officer of CARB; and
 - f. A demonstration under subsection (H)(1)(e)(i) shall be based on data from at least three vehicles. Data from official inspections under subsection (H)(1) showing that vehicles in the engine family meet the standard may be used to rebut the demonstration. The Director shall implement any new standard resulting from each exemption as soon as practicable for all subsequent tests and provide notice at all affected test stations and fleets.
2. A diesel-powered vehicle with a GVWR greater than 4,000 pounds and less than or equal to 8,500 pounds shall be tested by a loaded dynamometer test by applying a single load of 30 HP, \pm 2 HP, while operated at 50 MPH. A diesel-powered vehicle with a GVWR of 4,000 pounds or less shall be tested by a loaded dynamometer test by applying a single load of between 6.4 - 8.4 HP while operated at 30 MPH. For all diesel-powered vehicles with a GVWR less than or equal to 8,500 pounds:
 - a. The emissions pass-fail determination shall be made as follows:
 - i. The opacity reading for a period of 10 consecutive seconds with the engine under applicable loading shall be compared to the opacity standard in R18-2-1030(B). A vehicle that does not exceed the applicable opacity standard in R18-2-1030(B) complies with the minimum emissions standards.
 - ii. A vehicle that exceeds the applicable opacity standard fails the emissions test. Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010.
 - b. Exhaust sampling shall comply with the following:
 - i. For a diesel-powered vehicle equipped with multiple pipes, separate measurements shall be made on each exhaust pipe. The reading taken from the exhaust pipe that has the highest opacity reading shall be used for comparison with the applicable emissions standard.
 - ii. A vehicle shall be inspected with either a full-flow or sampling-type opacity meter. The opacity meter shall be a direct reading, continuous reading light extinction-type using a collimated light source and photo-electric cell, accurate to a value within \pm 5% of filter value.
- I. In area B, the inspection test procedure for a diesel-powered vehicle is as follows:
 1. A diesel-powered vehicle with a GVWR greater than 26,000 pounds or having tandem axles shall be tested according to one of the following methods:
 - a. The vehicle shall be tested on a chassis dynamometer beginning with no power absorption by selecting a gear ratio that produces a maximum vehicle speed of 30-35 MPH at governed or maximum rated RPM. If the vehicle has a manual transmission or an automatic transmission with individual gear selection, the engine shall be operated at governed or maximum rated engine RPM, at normal operating temperature under a power absorption load applied to the dynamometer until the loading reduces the engine RPM to 80% of the governed speed at wide-open throttle position. If the vehicle has an automatic transmission and automatic gear kickdown, the engine shall be loaded to a speed just above the kickdown speed or 80% of the governed speed, whichever is greater. If the chassis dynamometer does not have enough horsepower absorption capability to lug the engine down to these speeds, the vehicle's brakes may be used to assist the dynamometer.
 - b. If a chassis dynamometer is not available, the vehicle shall be tested by being lugged by its own brakes by selecting a gear ratio that produces a maximum speed of 10-15 MPH at governed engine RPM or maximum rated RPM and then loading the engine by applying the brakes until the engine RPM is lugged down to 80% of the governed or maximum rated RPM at wide-open throttle position. If the vehicle does not have a tachometer, the vehicle may be loaded to 80% of governed or maximum rated speed.
 2. A diesel-powered vehicle without tandem axles and having a GVWR greater than 10,500 pounds and less than or equal to 26,000 pounds shall be tested according to one of the following methods:
 - a. The vehicle shall be tested on a chassis dynamometer beginning with no power absorption by selecting a gear ratio that produces a maximum vehicle speed of 30-35 MPH at governed or maximum rated RPM. If the vehicle has a manual transmission or an automatic transmission with individual gear selection, the engine shall be operated at governed or maximum rated engine RPM, at normal operating temperature under a power absorption load applied to the dynamometer until such loading reduces the engine RPM to 80% of the governed speed at wide-open throttle position. If the vehicle has an automatic transmission and automatic gear kickdown, the engine shall be loaded to a speed just above the kickdown speed or 80% of governed speed, whichever is greater. If the chassis dynamometer does not have enough horsepower absorption capability to lug the engine down to these speeds, the vehicle's brakes may be used to assist the dynamometer;
 - b. The vehicle shall be tested by applying a single load of 30 HP, \pm 2 HP, while operated at 50 MPH; or
 - c. The vehicle shall be tested by being lugged by its own brakes by selecting a gear ratio that produces a maximum speed of 10-15 MPH at governed engine

RPM or maximum rated RPM and then loading the engine by applying the brakes until the engine RPM is lugged down to 80% of the governed or maximum rated RPM at wide-open throttle position. If the vehicle does not have a tachometer, the vehicle may be loaded to 80% of governed or maximum rated speed.

3. A diesel-powered vehicle with a GVWR of greater than 4,000 pounds and less than or equal to 10,500 pounds shall be tested by a loaded dynamometer test by applying a single load of 30 HP, \pm 2 HP, while operated at 50 MPH.
4. A diesel-powered vehicle with a GVWR of 4,000 pounds or less shall be tested by a loaded dynamometer test by applying a single load of between 6.4 - 8.4 HP while operated at 30 MPH.
5. The emissions pass-fail determination shall be performed:
 - a. The opacity reading during a period of 10 consecutive seconds with the engine under applicable loading specified in subsections (I)(1) through (4) shall be compared to the opacity standard specified in R18-2-1030(B). A vehicle that does not exceed the opacity standard in R18-2-1030(B) complies with the minimum emissions standards.
 - b. A vehicle that exceeds the standard in R18-2-1030(B) fails the emissions test. Before reinspection, the vehicle shall have a low emissions tune-up as described in R18-2-1010.
6. Exhaust sampling shall comply with the following:
 - a. For a diesel-powered vehicle equipped with multiple exhaust pipes, separate measurements shall be made on each exhaust pipe. The reading taken from the exhaust pipe that has the highest opacity reading shall be used for comparison with the standard in R18-2-1030(B).
 - b. A vehicle shall be inspected with either a full-flow or sampling-type opacity meter. The opacity meter shall be a direct reading, continuous reading light extinction-type using a collimated light source and photo-electric cell, accurate to a value within \pm 5% of filter value.
- J. All diesel-powered vehicles shall undergo a tampering inspection under subsection (E)(7).

Historical Note

Former Section R9-3-1006 repealed, new Section R9-3-1006 adopted effective January 13, 1976 (Supp. 76-1). Amended effective November 1, 1976 (Supp. 76-5). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended effective February 20, 1980 (Supp. 80-1). Former Section R9-3-1006 repealed, new Section R9-3-1006 adopted as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1006 as amended effective February 20, 1980 repealed and a new Section R9-3-1006 adopted as an emergency effective January 2, 1981 now adopted and amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1006 renumbered as Section R18-2-1006 and subsections (A), (C) and (D) amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended effective October 15, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 382, effective

December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 6 A.A.R. 2722, effective June 28, 2000 (Supp. 00-2). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

R18-2-1007. Evidence of Meeting State Inspection Requirements

- A. Vehicles required to be inspected under this Article shall pass inspection before registration by meeting the requirements of R18-2-1006, unless waived under R18-2-1008.
- B. The MVD or its agent may use the MVD motor vehicles emissions database, if available, as evidence that a vehicle complies with the requirements of this Article.
- C. If the MVD motor vehicles emissions database is not available, the MVD or its agent shall accept any of the following documents, when complete, unaltered, and dated no more than 90 days before registration expiration date, as evidence that a vehicle complies with the requirements of this Article unless the MVD or its agent has reason to believe it is false. Documents accompanying a late registration may be dated subsequent to the registration expiration date:
 1. Certificate of compliance,
 2. Certificate of waiver (except from auto dealers licensed to sell used motor vehicles under Title 28),
 3. Certificate of exemption, or
 4. Director's certificate,
 5. The upper section of the vehicle inspection report with "PASS" in the final results block.
- D. A complete certificate of inspection dated within 12 months of registration for an annually tested vehicle and 24 months for a biennially tested vehicle shall be accepted by the MVD or its agent as evidence that a vehicle is in compliance with the requirements of this Article unless the MVD or its agent has reason to believe it is false. A certificate corrected according to R18-2-1019(F)(1)(a) shall be accepted by the MVD or its agent.
- E. Documents listed in subsection (C) and originating in area B are not acceptable for meeting the inspection requirements in area A.
- F. Government vehicles for which only weight fees are paid shall be registered without evidence of inspection.

Historical Note

Former Section R9-3-1007 repealed, new Section R9-3-1007 adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1007 repealed, new Section R9-3-1007 adopted effective January 3, 1977 (Supp. 77-1). Amended effective February 20, 1980 (Supp. 80-1). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1007 renumbered without change as Section R18-2-1007 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1008. Procedure for Issuing Certificates of Waiver

- A. Unless prohibited under subsection (C), (D), or (E), a certificate of waiver shall be issued subsequent to reinspection by a state inspector at a state or Department station to a vehicle that failed the emissions inspection or the emissions and tampering inspections when it is determined by repair receipts, emissions test results, evidence of repairs performed, underhood verification, or similar evidence that the requirements of R18-2-1009 and R18-2-1010 have been met, or for emissions failures only, any further repairs within the repair cost limit would be inef-

fective. A waiver may be denied if a waiver request is based upon repair estimates and the state inspector demonstrates that a recognized repair facility can repair or improve the vehicle's test readings within the repair cost limit.

- B. A certificate of waiver may be issued to a vehicle failing the tampering inspection if the vehicle owner provides to the Director a written statement from an automobile parts or repair business that an emission control device necessary to repair the tampering is not available and cannot be obtained from any usual source of supply, and if all requirements of R18-2-1008(A) have been met. All written statements are subject to verification for authenticity and accuracy by the Department. The Department may deny a certificate of waiver if the state inspector has any reason to believe the written statement is false or a usual source of supply exists and the device necessary to repair the tampering is available. Certificates of waiver for tampered vehicles may be issued conditionally for a specified period, not to exceed 90 days, that allows sufficient time for the procurement and installation of a proper emissions control device. A receipt or bill from a vehicle repair facility or automobile parts store shall be an acceptable proof of purchase. Before the end of the specified time period, the vehicle owner shall present to the Director proof of purchase and installation of the device. The Department shall track all issued conditional certificates of waiver and if no proof of purchase and installation is received before the end of the specified time period, the Director shall forward to the Department of Motor Vehicles an order to cancel the vehicle's registration.
- C. The Director shall not issue a waiver to a vehicle that has failed the emissions test due to the catalytic converter system. A vehicle shall have failed the emissions test due to the catalytic converter system if:
 1. The converter's oxidation efficiency, as measured by the Catalyst Efficiency Test Procedure in R18-2-1031(A), is less than 75%; and
 2. No engine or fuel system malfunctions exist that would prevent the proper operation of a catalytic converter.
- D. The Director shall not issue a waiver to a vehicle failing the emission test with an HC, CO, NO_x, or opacity emission level greater than two times the pass-fail standard in R18-2-1006, unless the vehicle is repaired so that each emission level is less than two times the pass-fail standard.
- E. After January 1, 1997, the Director shall not issue a certificate of waiver to the same vehicle more than once.
- F. The fee for a certificate of waiver under this Section shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated costs to the state for administering and enforcing the provisions of this Article for issuance of certificates of waiver under this Section. The fee shall be payable directly to the Department of Environmental Quality at the time the certificate of waiver is issued.

Historical Note

Former Section R9-3-1008 repealed, new Section R9-3-1008 adopted effective January 13, 1976 (Supp. 76-1).

Former R9-3-1008 repealed, new Section R9-3-1008 adopted effective January 3, 1977 (Supp. 77-1). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1008 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) and added subsection (D) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Sec-

tion R9-3-1008 renumbered as Section R18-2-1008 and amended effective August 1, 1988 (Supp. 88-3).

Amended effective November 14, 1994 (Supp. 94-4).

Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

R18-2-1009. Tampering Repair Requirements

- A. If a vehicle fails the visual inspection for properly installed catalytic converters, the converters shall be replaced with new or reconditioned OEM converters or equivalent new aftermarket converters. The Department shall provide names of acceptable aftermarket converters at the time of inspection on the repair requirement list.
- B. If a vehicle fails the functional gas cap pressure test described in R18-2-1006(E)(7)(a) or (F)(7)(a), the gas cap shall be replaced with one that meets those specifications. If a vehicle designed with a vented system fails a visual inspection for the presence of a gas cap, a properly fitting gas cap shall be installed on the vehicle.
- C. If a vehicle fails the visual inspection for the presence of an operational air pump, a new, used, or reconditioned, operational air pump shall be properly installed on the vehicle.
- D. If a vehicle fails the visual inspection for the presence or malfunction of the positive crankcase ventilation system, the system shall be repaired or replaced with OEM or equivalent aftermarket parts.
- E. If a vehicle fails the visual inspection for the presence or malfunction of the evaporative control system, the system shall be repaired or replaced with OEM or equivalent aftermarket parts.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).

Repealed effective January 3, 1977 (Supp. 77-1). New Section R9-3-1009 adopted effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1009 renumbered without change as Section R18-2-1009 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

R18-2-1010. Low Emissions Tune-up, Emissions and Evaporative System Repair

- A. A low emissions tune-up on a nondiesel-powered vehicle consists of the following procedures:
 1. Emissions Failure Diagnosis. For a computer-controlled vehicle, the on-board-diagnostics shall be accessed and any stored trouble codes recorded. For a model year 1996 or newer vehicle equipped with an OBD system, a compatible scan tool shall be used to access and record diagnostic trouble codes. The following instruments or equipment are required to complete a low emissions tune-up:
 - a. Tachometer;
 - b. Timing light;
 - c. Engine analyzer or oscilloscope, and
 - d. A HC/CO NDIR analyzer to make final A/F adjustments, if specified by the manufacturer.
 2. Adjustment. All adjustments shall be made according to the manufacturer's specifications and procedures. Final adjustment shall be made on the vehicle engine only after the engine is at normal operating temperature.

3. Inspection of Air Cleaner, Choke, and Air Intake System. A dirty or plugged air cleaner, stuck choke, or restricted air intake system shall be replaced or repaired as required.
 4. Dwell and Basic Timing Check. Dwell and basic engine timing shall be checked and adjusted, if necessary, according to manufacturer's specifications.
 5. Inspection of PCV Valve. The PCV valve shall be checked to ensure that it is the type recommended by the manufacturer and is correctly operating. Free flow through the PCV system passages and hoses shall be verified. Repair or replace as required.
 6. Inspection of Vacuum Hoses. The vacuum hoses shall be inspected for leaks, obstruction, and proper routing and connection. Repair or replace as required.
 7. Perform a visual inspection for leaking fuel lines or system components. Repair or replace as required.
 8. Idle Speed and A/F Mixture Check. The idle speed and A/F mixture shall be checked and adjusted according to manufacturer's specifications and procedures. If the vehicle is equipped with a fuel injection system or an alternate fuel (LPG or LNG), the manufacturer's recommended adjustment procedure shall be followed.
- B.** A vehicle that fails reinspection does not qualify for a waiver unless a low emissions tune-up and diagnosis is performed on the vehicle.
- C.** If the maximum required repair cost in subsection (F) or (G) is not exceeded after a low emissions tune-up described in subsection (A), then the following procedures apply:
1. CO failure.
 - a. If a vehicle fails CO only, the vehicle shall be checked for:
 - i. Proper canister purge system operation,
 - ii. High float setting,
 - iii. Leaky power valve, and
 - iv. Faulty or worn needles, seats, jets or improper jet size.
 - b. If applicable, the following shall also be checked:
 - i. Computer,
 - ii. Engine and computer sensors,
 - iii. Engine solenoids,
 - iv. Engine thermostats,
 - v. Engine switches,
 - vi. Coolant switches,
 - vii. Throttle body or port fuel injection system,
 - viii. Fuel injectors,
 - ix. Fuel line routing and integrity,
 - x. Air in fuel system including line and pump,
 - xi. Fuel return system,
 - xii. Injection pump,
 - xiii. Fuel injection timing,
 - xiv. Routing of vacuum hoses, and
 - xv. Electrical connections.
 - c. The items in subsections (C)(1)(a) and (b) shall be repaired or replaced as required.
 2. HC, or HC and CO failure.
 - a. If a vehicle fails HC, or HC and CO, the vehicle shall be checked for:
 - i. Faulty spark plugs and faulty, open, crossed, or disconnected plug wires;
 - ii. Distributor module;
 - iii. Vacuum hose routing and electrical connections;
 - iv. Distributor component malfunctions including vacuum advance;
 - v. Faulty points or condenser;
 - vi. Distributor cap crossfire;
 - vii. Catalytic converter efficiency air supply;
 - viii. Vacuum leaks at intake manifold, carburetor base gasket, EGR, and vacuum-operated components.
 - b. The items in subsection (C)(2)(a) shall be repaired or replaced as required.
 3. NO_x failure.
 - a. If a vehicle fails NO_x, the vehicle shall be checked for:
 - i. Removed, plugged, or malfunctioning EGR valve, exhaust gas ports, lines, and passages;
 - ii. EGR valve electrical and vacuum control circuitry, components, and computer control, as applicable;
 - iii. Above normal engine operating temperature;
 - iv. Proper air management;
 - v. Lean A/F mixture;
 - vi. Catalytic converter efficiency; and
 - vii. Over-advanced off-idle timing.
 - b. The items in subsection (C)(3)(a) shall be repaired or replaced as required.
 4. OBD failure. If the vehicle fails the OBD test, the vehicle shall be repaired for the items indicated on the Vehicle Emissions Report as causing the failure. If the failure results from Diagnostic Trouble Codes (DTCs) that caused the Malfunction Indicator Lamp (MIL) to be illuminated, the components or systems causing the DTCs shall be repaired or replaced. After repair of a DTC failure, and before reinspection, the vehicle shall be operated under conditions recommended by the vehicle manufacturer for the OBD computer to evaluate the repaired system.
- D.** For Evaporative System Failures, the following procedures apply:
1. If a vehicle fails the evaporative system pressure test, the vehicle shall be checked for leaking or disconnected vapor hoses, line, gas cap, and fuel tank.
 2. If a vehicle fails a visual inspection of the evaporative system, the vehicle shall be checked for a missing or damaged canister, canister electrical and vacuum control circuits and components, disconnected, damaged, mis-routed or plugged hoses, and damaged or missing purge valves. Repair or replace as necessary.
- E.** If a vehicle fails the liquid fuel leak inspection, the vehicle shall be checked for leaking or disconnected fuel delivery, metering, or evaporation system components including those listed in R18-2-1006(E)(5)(b). Repair or replace as necessary.
- F.** The maximum required repair cost for a vehicle in area A, not including cost to repair the vehicle for failing an evaporative system pressure test due to tampering, or other tampering repair cost, is:
1. For a diesel-powered vehicle with a GVWR greater than 26,000 pounds or a diesel-powered vehicle with tandem axles: \$500; and
 2. For a vehicle that is not a diesel-powered vehicle with a GVWR greater than 26,000 pounds and is not a diesel-powered vehicle with tandem axles:
 - a. Manufactured in or before the 1974 model year: \$200;
 - b. Manufactured in the 1975 through 1979 model years: \$300; and
 - c. Manufactured in or after the 1980 model year: \$450.
 3. Subsection (F) does not prevent a vehicle owner from authorizing or performing more than the required repairs. A vehicle operator who has a vehicle reinspected shall

have the repair receipts available when requesting a certificate of waiver.

- G.** The maximum required repair cost for vehicles in area B, not including tampering repair cost, is:
1. For a diesel-powered vehicle with a GVWR greater than 26,000 pounds or a diesel-powered vehicle with tandem axles: \$300; and
 2. For a vehicle that is not a diesel-powered vehicle with a GVWR greater than 26,000 pounds and is not a diesel-powered vehicle with tandem axles:
 - a. Manufactured in or before the 1974 model year: \$50;
 - b. Manufactured in the 1975 through 1979 model years: \$200; and
 - c. Manufactured in or after the 1980 model year: \$300.
 3. Subsection (G) does not prevent a vehicle owner from authorizing or performing more than the required repairs. A vehicle operator who has a vehicle reinspected shall have the repair receipts available when requesting a certificate of waiver.
- H.** A low emissions tune-up on a diesel-powered vehicle consists of the following procedures:
1. Inspect for dirty or plugged air cleaner, or restricted air intake system. Repair or replace as required.
 2. Check fuel injection system timing according to manufacturer's specifications. Adjust as required.
 3. Check for fuel injector fouling, leaking, or mismatch. Repair or replace as required.
 4. Check fuel pump and A/F ratio control according to manufacturer's specifications. Adjust as required.
 5. If the vehicle fails the J1667 procedure, check smoke-limiting devices, if any, including the aneroid valve and puff limiter. Repair or replace as required.
- I.** Any available warranty coverage for a vehicle shall be used to obtain needed repairs before an expenditure can be counted toward the cost limits in subsection (F) and (G). If the operator of a vehicle within the age and mileage coverage of section 207(b) of the Clean Air Act presents a written denial of warranty coverage from the manufacturer or authorized dealer, warranty coverage is not considered available under this subsection.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1010 repealed, new Section R9-3-1010 adopted effective January 3, 1977 (Supp. 77-1). Amended effective March 2, 1978 (Supp. 78-2). Amended effective January 3, 1979 (Supp. 79-1). Amended effective February 20, 1980 (Supp. 80-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1010 as amended effective February 20, 1980, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1010 renumbered as Section R18-2-1010 and subsection (D) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended effective October 15, 1998 (Supp. 98-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008

(Supp. 08-3).

R18-2-1011. Vehicle Inspection Report

- A.** A vehicle inspected at a state station shall be provided a uniquely numbered vehicle inspection report of a design approved by the Director that contains, at a minimum, the following information:
1. License plate number;
 2. Vehicle identification number;
 3. Model year of vehicle;
 4. Make of vehicle;
 5. Style of vehicle;
 6. Type of fuel;
 7. Odometer reading to the nearest 1000 miles, truncated;
 8. Emissions standards for idle and loaded cruise modes, if applicable;
 9. Emissions measurements during idle and loaded cruise modes, if applicable;
 10. Opacity measurements and standards, if applicable;
 11. Emissions standards and measurements for the transient loaded test, and the evaporative system pressure test, if applicable;
 12. Results of OBD test including all diagnostic trouble codes that commanded the illumination of the malfunction indicator lamp;
 13. Tampering inspection results;
 14. Liquid fuel leak inspection results;
 15. Repair requirements;
 16. Final test results;
 17. Repairs performed;
 18. Cost of emissions-related repairs;
 19. Cost of tampering-related repairs;
 20. Name, address, and telephone number of the business or person making repairs;
 21. Signature and certification number of person certifying repairs;
 22. Date of inspection;
 23. Test results of the previous inspection if the inspection is a reinspection;
 24. Inspection station, lane locators; and
 25. Test number and time of test.
- B.** A vehicle failing the initial inspection shall receive an inspection report supplement approved by the Department containing, at a minimum, the following:
1. Diagnostic and tampering information including acceptable replacement units, and
 2. Applicable maximum repair costs.
- C.** The inspection report shall provide a 3-inch by 5-inch tear-out section that may be used as a certificate of compliance for vehicles passing the inspection or as a certificate of waiver, if applicable.
1. The tear-out section shall be a certificate of compliance when the word "compliance" appears in the appropriate location on the printout.
 2. The tear-out section shall be a certificate of waiver when the word "waiver" appears in the appropriate location on the printout.
 3. The tear-out section shall contain all of the following information:
 - a. License plate number,
 - b. Vehicle identification number,
 - c. Final results,
 - d. Serial number of the inspection report,
 - e. Date of inspection,
 - f. Model year,
 - g. Make,
 - h. Date of initial inspection, and

i. Inspection fee.

- D. At the time of registration or reregistration, the certificate of compliance or certificate of waiver may be submitted to the Arizona Department of Transportation Motor Vehicle Division as evidence of meeting the requirements of this Article.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1011 repealed, new Section R9-3-1011 adopted effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1011 as amended effective January 3, 1979, and as amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2).

Amended effective January 1, 1986 (Supp. 85-6).

Amended subsections (A) and (B) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1011 renumbered as Section R18-2-1011 and amended by removing subsection (E) effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

R18-2-1012. Inspection Procedures and Fee

- A. A vehicle that is inspected by a state station must be accompanied by a document such as a registration renewal notice, registration, certificate of title, or bill of sale that identifies the vehicle by make, model year, identification number, and license plate if applicable.
- B. If the vehicle inspection report from the previous test is used, it shall be retained by the test lane inspector.
- C. The fees for emissions inspections at a state station shall be specified in the contract between the contractor and the state of Arizona according to A.R.S. § 49-543, and shall include the full cost of the vehicle emissions inspection program including administration, implementation, and enforcement. Each fee is payable directly to the contractor at the time and place of inspection in cash or by check approved by the contractor. The amount collected by the contractor to defray the cost of the inspection shall be retained by the contractor. The amount collected to defray the cost of the administration, implementation, and enforcement of the vehicle emissions inspection program shall be remitted to the Department. Amounts collected shall be recorded and reported to the Department monthly. The contractor shall submit to the state of Arizona on a monthly basis, by the 10th day of each month, a report showing the number of inspections performed and the amount of fees collected.
- D. Each subsequent inspection, if needed, shall be treated by the state and the contractor in the same manner as an initial inspection and reinspection, providing for a free reinspection according to R18-2-1013, if needed, following a paid inspection. The fee for each paid inspection shall be the full fee as provided for in the contract with the contractor.
- E. A state station emissions inspector shall not recommend repairs or repair facilities.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1012 repealed, new Section R9-3-1012 adopted effective January 3, 1977 (Supp. 77-1). Amended effective January 3, 1979 (Supp. 79-1). Amended as an

emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1012 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended subsections (A) and (D) effective November 9, 1982 (Supp. 82-6). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1012 renumbered as Section R18-2-1012 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1013. Reinspections

- A. A vehicle failing the initial inspection or any subsequent paid inspection is entitled to one reinspection at no additional charge under the following conditions:
1. The vehicle is presented for inspection within 60 calendar days of the initial or any subsequent paid inspection, if the vehicle operator presents the vehicle inspection report from the previous inspection, indicating the itemization of the repairs performed.
 2. Emissions-related repairs or adjustments and any tampering repairs have been made.
 3. The vehicle is accompanied by the entire vehicle inspection report from the initial or subsequent inspection with the following information filled in on the reverse side:
 - a. Emissions-related and tampering-related repairs made;
 - b. Cost of emissions related and tampering related repairs as reflected by receipts or bills;
 - c. Name, address, telephone number, and type of facility making repairs;
 - d. Signature of person certifying the repairs;
 - e. Date of repairs; and
 - f. The state certification number of the technician making repairs, if applicable.
- B. A vehicle shall be retested after repair for any portion of the inspection the vehicle failed on the previous test to determine if the repairs are effective. To the extent that repair to correct a previous failure could cause failure of another portion of the test, that portion shall also be retested. Evaporative system repairs shall trigger an exhaust emissions retest.
- C. A vehicle failing the reinspection shall be provided a vehicle inspection report and a vehicle inspection report supplement.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1). Former Section R9-3-1013 repealed, new Section R9-3-1013 adopted effective January 3, 1977 (Supp. 77-1). Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1013 adopted effective January 3, 1977, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1013 renumbered as Section R18-2-1013 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

R18-2-1014. Repealed

Historical Note

Adopted effective November 14, 1994 (Supp. 94-4).
Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Section repealed by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1015. Repealed**Historical Note**

Adopted effective November 14, 1994 (Supp. 94-4).
Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4). Section repealed by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1016. Licensing of Inspectors

- A.** The Department shall license a person as a vehicle emissions inspector if the applicant passes a practical and a written examination with a score equal to or greater than 80% in the following areas:
1. For nondiesel-powered fleet vehicle emissions inspectors:
 - a. Equipment used in the inspection and the control of emissions;
 - b. Types of emission inspection failures;
 - c. Corrective procedures for excessive HC emissions;
 - d. Corrective procedures for excessive CO emissions;
 - e. Corrective procedures for excessive NO_x emissions, for inspectors in area A;
 - f. Proper fuel system adjustment procedures;
 - g. Computerized engine control systems; and
 - h. Regulations governing fleet stations;
 2. For diesel-powered fleet vehicle emissions inspectors:
 - a. Equipment used in the inspection and the control of opacity and emissions;
 - b. Corrective procedures for excessive opacity;
 - c. Proper fuel injection system adjustment procedures;
 - d. Proper use of tools required by the vehicle manufacturer for field setting of fuel injectors, inlet and exhaust valve clearance, governors, and throttle controls;
 - e. Computerized engine control systems; and
 - f. Regulations governing fleet stations;
 3. For state station vehicle emission inspectors:
 - a. Air pollution causes and effects;
 - b. Purpose, function, and goals of the inspection program;
 - c. State inspection regulations;
 - d. Test procedures and rationale for their design;
 - e. Emission control devices, configuration, and inspection;
 - f. Test equipment operation, calibration, and maintenance;
 - g. Proficiency in driving the transient test cycle in Table 4;
 - h. Quality control procedures;
 - i. Public relations; and
 - j. Safety and health issues related to the inspection process.
 4. For the practical portion of the examination an applicant shall demonstrate the ability to conduct a proper emissions inspection, including proper use of equipment and procedures, to pass. If an inspector fails to demonstrate such ability in an audit, either covert or overt, the inspector's license shall be suspended. The suspended licensee shall demonstrate to the Department the skills required by this subsection within 30 days of suspension or such license shall be revoked.

- B.** If an applicant for a nondiesel-powered vehicle emissions inspector license fails the written examination, the applicant shall successfully complete the vehicle emissions inspector state training program before reexamination for licensure.
- C.** Applications may be obtained from the Department. The application shall contain the following:
 1. The type of license requested;
 2. The applicant's name;
 3. The applicant's home address;
 4. The applicant's phone number;
 5. The name of the applicant's employer;
 6. The phone number of the applicant's employer;
 7. The applicant's signature; and
 8. The date of the license request.
- D.** All completed applications shall be returned to the Department.
- E.** Licenses issued to vehicle emissions inspectors shall be renewed annually on or before the expiration date. An inspector whose license has expired may not inspect vehicles.
- F.** Applications for renewal of vehicle emissions fleet inspector's licenses shall be submitted within 30 days before the current license expiration date.
- G.** The Department may suspend, revoke, or refuse to renew a license if the licensee has violated any provision of A.R.S. Title 49, Chapter 3, Article 5 or any provision of this Article or fails to continue to demonstrate proficiency to the Department as required in subsection (A).
- H.** A vehicle emissions inspector shall notify the Department of any change in employment status, due to retirement, resignation or termination, within seven days of the change. The notification shall include the name and license number of the emissions inspector, a statement declaring the employment change, and the effective date of the employment change.
- I.** The Department shall assign a single, unique, nontransferable inspector's number to each vehicle emissions inspector.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).
Amended effective January 3, 1977 (Supp. 77-1).
Amended effective March 2, 1978 (Supp. 78-2).
Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1016 as amended effective March 2, 1978, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1016 renumbered as Section R18-2-1016 and subsection (G) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1017. Inspection of Government Vehicles

- A.** Inspection of government vehicles operated in areas A and B shall be conducted as follows:
1. At a licensed fleet station operated by the government entity;
 2. At a state station upon payment of the fee;
 3. At a state station upon payment of the contracted fee, either singly or in combination with other government fleet operators.
- B.** A government vehicle except a federally owned vehicle that is excluded from the definition of motor vehicle under 40 CFR

85.1703, shall be inspected according to this Article and shall have a Government Vehicle Certificate of Inspection affixed to the vehicle if in compliance with state inspection requirements.

1. The vehicle emissions inspector performing the inspection shall punch out the appropriate year and month on the Government Vehicle Certificate of Inspection to designate date of the vehicle's next annual or biennial inspection. The vehicle emissions inspector, at the time of inspection, shall record the serial number of the Government Vehicle Certificate of Inspection on the vehicle inspection report. If the vehicle emissions inspection is performed at a fleet station, the emissions inspector, at the time of inspection, shall record the serial number in the block labeled "Certificate of Inspection No." on the "Fleet Vehicle Inspection Report/Monthly Summary." Each Government Vehicle Certificate of Inspection shall be used in serial number order. Presence of a current Government Vehicle Certificate of Inspection indicates a government vehicle has met the state of Arizona emissions inspection requirements.
 2. A government vehicle, with the exception of a motorcycle or an undercover law enforcement vehicle, shall have the Government Vehicle Certificate of Inspection affixed to the lower left side of the rear window as determined from a position facing the window, from outside the vehicle. If a vehicle does not have a rear window, the Government Vehicle Certificate of Inspection shall be affixed to the lower left corner of the windshield as determined from the driver's position.
 3. A government motorcycle shall have the Government Vehicle Certificate of Inspection affixed to the lower left-hand corner of the windscreen as determined from the driver's position. If the Government Vehicle Certificate of Inspection cannot be affixed to the lower left-hand corner of the windscreen, the Government Vehicle Certificate of Inspection may be affixed to a visible position on the front or left side of the left front fork of the motorcycle. The fork shall be determined from the driver's position.
- C. The Government Vehicle Certificate of Inspection shall be purchased from the Department in lots of 25.
1. The fee for a certificate of inspection shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of certificates of inspections. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
 2. Only the Department may sell or otherwise transfer certificates of inspection.
- D. All Government Vehicle Certificates of Inspection shall be designed, issued, and administered to ensure compliance with this Article. The Department shall be the only source of supply for Government Vehicle Certificates of Inspection.
- E. Government entity fleet stations shall inspect the fleet vehicles according to R18-2-1019 except that a government vehicle certificate of inspection shall only be used for government vehicles.
- F. A government entity fleet station shall send a quarterly statement identifying vehicles and test results to the Department within 10 business days following the end of the quarter.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).

Amended effective January 3, 1977 (Supp. 77-1).

Amended effective January 3, 1979 (Supp. 79-1).

Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1017 renumbered as Section R18-2-1017 and subsection (E) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1018. Certificate of Inspection

- A. A fleet station other than a government entity fleet station shall use completed certificates of inspection as evidence that its vehicles meet the requirements of this Article unless inspection data is electronically transmitted to MVD under A.R.S. § 49-542(Q). If a fleet vehicle is inspected at a state station, the vehicle inspection report provided under R18-2-1011 shall be used.
- B. A certificate of inspection shall contain the following information:
1. VIN,
 2. Model year,
 3. License number,
 4. If applicable, a statement that the inspection meets area A requirements,
 5. Owner of vehicle,
 6. Date of expiration, according to R18-2-1019(F)(1)(b),
 7. Fleet station permit number, and
 8. Inspector's signature and license number.
- C. A certificate of inspection issued to a fleet vehicle is transferable to an auctioneer licensed as a used motor vehicle dealer to sell the vehicle. The certificate of inspection is valid for a period not to exceed 180 days after the transfer unless the vehicle is reregistered with a new owner, in which case the vehicle shall be inspected according to this Article before the reregistration.
- D. A certificate of inspection, complete or incomplete, is not transferable except as provided in subsection (C) or except when submitted to MVD for the purpose of vehicle registration.
- E. Only a person who meets the requirements of R18-2-1019(D)(4) is authorized to purchase certificates of inspection, certificates of waiver, or Government Vehicle Certificates of Inspection.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).

Amended effective January 3, 1977 (Supp. 77-1).

Amended effective March 2, 1978 (Supp. 78-2).

Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1018 renumbered as Section R18-2-1018 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1019. Fleet Station Procedures and Permits

- A. The following requirements apply to issuance of fleet station permits:
1. An owner or lessee of a fleet of 25 or more nonexempt vehicles whose place of business is located in area A or B may apply to the Director for a permit to establish a fleet station. A dealer's business inventory of vehicles held for resale, counted cumulatively over the previous 12 months at the time of application review by the Department shall be used to determine compliance with this subsection. A

- newly established dealer shall certify that it will comply with the 25 nonexempt vehicles requirement.
2. An application form for a fleet station permit shall be obtained from the Department. All completed applications shall be submitted to the Department. An application shall be considered administratively complete when:
 - a. The Department receives a completed application form and fleet agent designation form;
 - b. The applicant or designated employee successfully completes the fleet agent examination; and
 - c. The Department conducts a site inspection.
 3. Before an application for a fleet station permit may be approved, a state inspector shall inspect the premises to determine compliance with subsections (B) and (C).
 4. A fleet station permit shall not expire.
 5. A fleet station permit shall only be applicable to the fleet's inspection facility located at the address shown on the fleet station permit. If a fleet owner or lessee requests a permit for inspection facilities at more than one address, the fleet owner or lessee shall apply for a permit for each facility.
 6. A fleet station permit issued by the Director is non-transferable.
 7. If the name or address of the permitted fleet facility changes and the name or address change does not involve a change of ownership, the permit shall be returned to the Department for cancellation and a new permit application shall be submitted. The Director shall cancel the returned permit and issue a new permit.
 8. In the event of loss, destruction, or mutilation of the permit, the person to whom it was issued may obtain a duplicate upon furnishing satisfactory proof of loss, destruction, or mutilation. If a fleet owner or lessee obtains a duplicate permit and then finds the original, the fleet owner or lessee shall immediately surrender the original permit to the Department.
- B.** A fleet station permit applicant or fleet station permit holder, or its employees, shall own or lease the following equipment for testing and repair of a fleet vehicle, and maintain the equipment in good working condition:
1. If the permit is for the inspection of a vehicle required to take an idle only, or an idle plus 2500 RPM unloaded test:
 - a. An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
 - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a); and
 - c. An ignition-operated tachometer.
 2. If the permit is for the inspection of a vehicle required to take a steady-state loaded test:
 - a. An NDIR CO and HC emissions analyzer that complies with the requirements of R18-2-1006(F)(8) to conduct the emissions inspection;
 - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a);
 - c. A dynamometer to operate the vehicle under load; and
 - d. An ignition-operated tachometer.
 3. If the permit is for the inspection of a vehicle required to take a transient loaded test:
 - a. Equipment to perform a transient loaded emissions test as required in R18-2-1006(E)(2);
 - b. Equipment to perform the evaporative system pressure test as required in R18-2-1006(E)(2)(b);
 - c. Equipment to perform the maintenance and quality control requirements of R18-2-1006(E)(2) and "IM240 and Evap Technical Guidance;" and
 - d. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a).
 4. If the permit is for the inspection of a vehicle required to take an OBD test:
 - a. A scan tool used to perform the OBD test that complies with the Society of Automotive Engineers Recommended Practice J1979, September 1997, incorporated by reference and no future editions or amendments. A copy of this referenced material is on file with the Department and the Secretary of State and may be obtained at Society of Automotive Engineers, 400 Commonwealth Dr., Warrendale, PA 15096-0001; and
 - b. Pressure test equipment for the functional gas cap test that complies with the requirements of R18-2-1006(E)(7)(a).
 5. If the permit is for the inspection of a vehicle required to take a diesel test:
 - a. Opacity meter: A meter used in area A shall comply with the requirements of R18-2-1006(H) for the applicable test procedure. A meter used in area B shall comply with the requirements of R18-2-1006(I)(6)(b); and
 - b. A dynamometer for testing any light-duty diesel vehicle in area A or for testing any diesel vehicle in area B.
- C.** A fleet's inspection facility shall comply with the following requirements:
1. The facility shall include space devoted principally to maintaining or repairing the fleet's motor vehicles. The space shall be large enough to conduct maintenance or repair of at least one fleet motor vehicle.
 2. The facility shall be exclusively rented, leased, or owned by the permit applicant or permit holder.
- D.** A fleet owner or lessee shall employ the following personnel:
1. If the facility is for the repair of nondiesel-powered vehicles, at least one person to perform tune-ups of engines and replacement or repair of fuel system and ignition components.
 2. If the facility is for the repair of diesel-powered vehicles, at least one person to perform tune-ups and replacement or repair of diesel fuel systems in the vehicle fleet.
 3. A licensed vehicle emissions inspector who will perform the necessary inspections. This inspector may be the same person required by subsection (D)(1) or (2).
 4. A fleet agent, who shall be in charge of the day-to-day operation of the fleet and who demonstrates proficiency by passing a Department-administered examination annually, with a score equal to or greater than 80%, on the statutes and rules governing the operation and administration of a fleet emissions inspection station. The fleet owner or lessee shall designate the fleet agent on a form obtained from the Department.
- E.** Unless inspected at a state station, a vehicle owned by or leased to a holder of a fleet emissions inspection station permit shall be inspected according to R18-2-1006(D) through (J), except as follows:
1. A dealer fleet vehicle in area A held for resale and an area B fleet vehicle, with a model year of 1981 or newer, and other than diesel-powered, shall be required to take and pass both the curb idle test specified in R18-2-

Department of Environmental Quality – Air Pollution Control

1006(F)(2)(b) and a 2,500 RPM unloaded fast idle test as follows:

- a. The vehicle's engine shall be operated at 2,500, \pm 300 RPM, for no more than 30 seconds with the transmission in neutral.
 - b. HC and CO exhaust emissions concentrations shall be recorded after readings have stabilized or at the end of 30 seconds, whichever occurs first, and compared to the loaded cruise standards in Table 2. The curb idle test standards in Table 2 shall apply for the idle test.
2. A dealer fleet vehicle in area A held for resale, and an area B vehicle, with a model year of 1980 or older and other than diesel-powered, shall be required to take and pass a curb idle test as specified in R18-2-1006(F)(1). The curb idle test standards in Table 2 shall apply.
 3. A dealer fleet vehicle in area A held for resale with a model year of 1975 or newer and other than diesel-powered, shall be required to take and pass a tampering inspection as specified in R18-2-1006(E)(7).
 4. A dealer fleet vehicle in area B held for resale with a model year of 1975 or newer and other than diesel-powered, shall be required to take and pass a tampering inspection as specified in R18-2-1006(F)(7).
 5. A consignment vehicle shall be tested at a state inspection station according to R18-2-1005(A)(3).
- F. The vehicle emissions inspector shall complete and process the forms for vehicle inspection as follows, except a government entity fleet shall issue and process each government vehicle certificate of inspection under R18-2-1017:
1. A certificate of inspection shall be processed as follows:
 - a. A certificate of inspection shall be completed and signed by the vehicle emissions inspector performing the inspection at the time the vehicle passes inspection. The vehicle emissions inspector who performed the inspection may correct a certificate by drawing a single line through the mistake, writing the correct information directly above the mistake, and initialing and dating the correction. Each certificate shall be issued in numerical order;
 - b. For an inspection that does not include a biennial test, the expiration date shall be one year from the date the vehicle passes the mandatory vehicle emissions inspection. For a vehicle required to pass a biennial test, the expiration date shall be two years after the pass date;
 - c. All copies of a certificate of inspection shall be legible;
 - d. Unless inspection data is electronically transmitted under A.R.S. § 49-542(Q), the original completed certificate shall be presented to MVD for processing the vehicle's application for title and registration or the Arizona registration card. MVD may accept a signed certificate of inspection as evidence that the vehicle is a fleet-inspected vehicle and meets the inspection requirements of this Article;
 - e. The vehicle emissions inspector shall forward the second copy of each completed certificate of inspection, along with the second copy of the "Fleet Vehicle Inspection Report/Monthly Summary," to the Department monthly, not later than two weeks after the last day of the month in which the inspection is conducted;
 - f. The third copy of each completed certificate of inspection, along with the original "Fleet Vehicle Inspection Report/Monthly Summary," shall be retained for two years from the date of inspection;
 - g. Vehicle emissions certificates shall be purchased from the Department in lots of 25. Excess certificates may be returned to the Department for refund or may be used in subsequent years;
 - h. The fee for a certificate of inspection shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of a certificate of inspection. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
 - i. Only the Department shall sell or otherwise transfer a certificate of inspection. This subsection does not apply to the submission of a certificate of inspection to MVD for the purpose of vehicle registration;
 - j. The fleet station owner shall be responsible for the security and accountability of the fleet's certificates and fleet vehicle emissions inspection records. Certificates and fleet vehicle emissions inspection records shall be maintained at the fleet station and shall be made available for review by a state inspector during normal business hours of the fleet station;
 - k. If any certificate is discovered lost or stolen, the fleet station owner shall notify the Department in writing within 24 hours, indicating the number of certificates lost or stolen and each serial number. The Department may revoke a fleet station permit for refusal or failure to report a lost or stolen certificate within 24 hours;
 - l. In the event of loss, destruction, or mutilation of an original completed certificate of inspection, a Director's certificate may be obtained from the Department by hand-delivery of the following:
 - i. The second or third copy of the lost, destroyed, or mutilated certificate of inspection;
 - ii. The original of the "Fleet Vehicle Inspection Report/Monthly Summary;"
 - iii. A cover letter from the fleet agent explaining the situation that caused the loss, destruction, or mutilation of the original certificate of inspection; and
 - iv. Payment of a fee to cover the cost of issuance of the Director's certificate. The fee for a Director's certificate shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a Director's certificate. Checks shall be made payable to the Department of Environmental Quality; and
 - m. If an original certificate of inspection is voided by a fleet station, the original of the voided certificate shall be matched to the corresponding third copy of the certificate and retained at the fleet station for two years from the date of inspection.
2. The fleet agent or vehicle emissions inspector shall obtain the "Fleet Vehicle Inspection Report/Monthly Summary" form from the Department. The vehicle emissions inspector performing the inspection shall record the following information on the form at the time of inspection:
 - a. The VIN of the vehicle passing inspection;

Department of Environmental Quality – Air Pollution Control

- b. The vehicle's license number, if applicable;
 - c. The HC content of the undiluted exhaust recorded at idle, if applicable;
 - d. The CO content of the undiluted exhaust recorded at idle, if applicable;
 - e. The HC content of the undiluted exhaust recorded at 2,500 rpm, if applicable;
 - f. The CO content of the undiluted exhaust recorded at 2,500 rpm, if applicable;
 - g. Results of a tampering check, if applicable;
 - h. Liquid fuel leak inspection results;
 - i. The vehicle model year;
 - j. The vehicle make;
 - k. The GVWR for a vehicle certified under federal truck standards;
 - l. The date of inspection;
 - m. The license number of the vehicle emissions inspector conducting the inspection;
 - n. The signature of the inspector making the entry;
 - o. The serial number of the certificate of inspection, recorded in numerical order;
 - p. For a vehicle required to take the transient loaded emissions test, the inspector shall record the total HC, CO, CO₂ and NO_x measured in grams/mile, and the evaporative system pressure test result, if applicable;
 - q. The registration number of the registered analyzer or opacity meter used to perform the inspection;
 - r. For a light-duty diesel vehicle, the inspector shall record opacity rather than undiluted HC and CO;
 - s. For a heavy-duty diesel vehicle, instead of undiluted HC and CO:
 - i. The time of the inspection;
 - ii. The ambient temperature;
 - iii. The corrected barometric pressure;
 - iv. The relative humidity at the time of inspection;
 - v. The engine year and cubic inch or liter displacement;
 - vi. The GVWR;
 - vii. The diameter of the exhaust stack; and
 - viii. The corrected opacity reading.
 - t. For a vehicle required to take an OBD test, the inspector shall record the OBD results rather than HC, CO, and NO_x.
3. A certificate of waiver may be issued by a fleet vehicle emissions inspector unless the fleet owner or lessee is an auto dealer licensed to sell used motor vehicles under A.R.S. Title 28. The certificate of waiver may be issued according to the following procedure if the requirements of R18-2-1008(A), R18-2-1009, and R18-2-1010 are met:
- a. A certificate of waiver shall be completed and signed by the vehicle emissions inspector performing the inspection after completion of a fleet inspection waiver report. The report shall be forwarded to the Department within three business days from the date of issuance of the certificate of waiver. A fleet inspection waiver report shall be provided by the Department with the purchase of each certificate of waiver. The report shall contain a description of the vehicle, test results, and repairs performed.
 - b. The expiration date of the certificate of waiver shall be two years from the date that the waiver is issued for a vehicle required to take the transient loaded emissions test, and one year for all other vehicles.
 - c. All information required on the certificate of waiver shall be legible.
 - d. The vehicle emissions inspector issuing the certificate of waiver shall initial all corrections.
 - e. Only the vehicle emissions inspector performing the inspection may sign or initial a certificate of waiver.
 - f. Unless inspection data is electronically transmitted under A.R.S. § 49-542(Q), the original completed certificate shall be presented to MVD for processing of either the vehicle's application for title and registration or the Arizona registration card. MVD may accept the signed certificate of waiver as evidence that the vehicle is a fleet inspected vehicle and meets the inspection requirements of this Article if the certificate is complete and the expiration date has not passed.
 - g. The second copy of each completed certificate of waiver shall accompany the completed fleet inspection waiver report.
 - h. The third copy of each completed certificate of waiver, along with a copy of the fleet inspection waiver report, shall be retained by the fleet station owner for two years from the date of inspection.
 - i. The fee for a certificate of waiver shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a certificate of waiver. Payment for certificates shall be included with an application for certificates. Checks shall be made payable to the Department of Environmental Quality.
 - j. Only the Department shall sell or otherwise transfer a certificate of waiver. This subsection does not apply to the submission of a certificate of waiver to MVD for the purpose of vehicle registration.
 - k. The fleet station owner shall be responsible for the security and accountability of the fleet's certificates.
 - l. If a certificate is discovered lost or stolen, the fleet station owner shall notify the Department in writing within 24 hours and indicate the number of certificates lost or stolen and each serial number. The Department may revoke a fleet station permit for refusal or failure to report a lost or stolen certificate within 24 hours of discovery.
 - m. In the event of loss, destruction, or mutilation of an original completed certificate of waiver, a Director's certificate may be obtained from the Department by hand delivery of the following:
 - i. The second or third copy of the lost, destroyed, or mutilated certificate of waiver;
 - ii. The original of the "Fleet Vehicle Inspection Report/Monthly Summary;"
 - iii. A cover letter from the fleet agent explaining the situation that caused the loss, destruction, or mutilation of the original certificate of waiver; and
 - iv. Payment of a fee to cover the cost of issuance of the Director's certificate. The fee for a Director's certificate shall be fixed by the Director according to A.R.S. § 49-543, and shall be based upon the Director's estimated cost to the state of administering and enforcing the provisions of this Article as they apply to issuance of a Director's certificate. Checks shall be made payable to the Department of Environmental Quality.

- n. In the event an original certificate of waiver is voided by a fleet station, the original of the voided certificate shall be matched to the corresponding third copy of the certificate and retained by the fleet for two years from the date of inspection.
4. Upon request, a state inspector shall be allowed access to and shall be permitted to photocopy, on or off the premises, any original "Fleet Vehicle Inspection Report/Monthly Summary," the second copy of a certificate of inspection, and any other related documents.
- G.** The fleet shall comply with the following general operating requirements:
1. The fleet station permit and the licenses of all inspectors employed at the station shall be prominently displayed at the fleet's inspection facility.
 2. A fleet station shall only certify a vehicle owned by or leased to the holder of the fleet station permit.
 3. The inspection equipment shall be operated, calibrated, and maintained as follows:
 - a. All test equipment and instrumentation shall be maintained in accurate working condition as required by the manufacturer. An instrument requiring periodic calibration shall be calibrated according to instructions and recommendations of the instrument or equipment manufacturer. An NDIR emissions analyzer shall be registered and calibrated according to R18-2-1027. Calibration records for each instrument, except an NDIR emissions analyzer, shall be maintained by the fleet station. The calibration records shall be signed and dated by the technician performing each calibration.
 - b. The instrument calibration records shall be available for review by the Department.
 - c. Working gases used by the fleet station shall be subject to analysis and comparison to the Department's standard gases at any time.
 - d. Fleet station equipment shall be subject to both scheduled and unscheduled checks for accuracy and condition by the Department.
 4. A fleet emissions inspection station that is unable to test at least 25 vehicles according to R18-2-1006 and subsection (A) shall surrender its permit.
 5. A motor vehicle dealer with a fleet station permit shall comply with A.R.S. § 49-542.03.
 6. If a fleet station fails to meet any requirement of subsection (B), (C), or (D), it shall immediately cease operating as a fleet station until the requirement is met. If the fleet is cited for failure to have the necessary equipment under subsection (B), it shall not resume operation as a fleet emissions inspection station until compliance is verified by the Department.
 7. A fleet station shall notify the Department in writing within seven days of the end or start of employment of any vehicle emissions inspector. The written notification shall include the name and license number of the vehicle emissions inspector, a statement declaring the employment change, and the effective date of the employment change. A fleet station that does not employ a vehicle emissions inspector shall immediately cease operating as a fleet station and notify the Department immediately by telephone and within seven days in writing. All unused vehicle certificates of inspection shall be returned to the Department for a refund within seven days after operations cease.
 8. A fleet station that does not employ a fleet agent, as described in subsection (D)(4), shall immediately cease operating as a fleet station and shall notify the Department immediately by telephone and within seven days in writing. The written notification shall include the name and license number of the fleet agent, a statement declaring the employment change, and the effective date of the employment change. The fleet station may resume fleet station operation after the permit applicant or other designated employee takes and passes the examination required in subsection (D)(4), if the responsibility of the day-to-day operation of the fleet station and a fleet agent designation form has been filed with the Department.
- H.** A fleet's activities shall be governed by the following compliance and enforcement rules:
1. Subsections (B) through (G) apply at all times after the issuance of a fleet station permit. In addition, subsections (B), (C), and (D) apply before a permit can be issued or removed from suspension.
 2. The Director may suspend or revoke a fleet station permit according to A.R.S. § 49-546(F) and A.R.S. Title 41, Chapter 6, if the permittee, or any person employed by the permittee:
 - a. Violates any provision of A.R.S. Title 49, Chapter 3, Article 5 or any provision of this Article;
 - b. Misrepresents a material fact in obtaining a permit;
 - c. Fails to make, keep, and submit to the Department records for a vehicle tested as a permittee; or
 - d. Does not provide a state inspector access to the information required by this Article.
 3. If a fleet station permit is surrendered, suspended or revoked, all unused vehicle certificates of inspection shall be returned to the Department for a refund.
 4. A fleet vehicle is subject to inspection by a state inspector.
 5. Surrender of a permit under subsection (A)(8) or (G)(4) shall not prevent the Department from carrying out an investigative or disciplinary proceeding against the permit holder for a violation before surrender.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).
 Amended effective January 3, 1977 (Supp. 77-1).
 Amended effective March 2, 1978 (Supp. 78-2).
 Amended effective January 3, 1979 (Supp. 79-1).
 Amended effective February 20, 1980 (Supp. 80-1).
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1019 as amended effective February 20, 1980, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1019 renumbered as Section R18-2-1019 and amended effective August 1, 1988 (Supp. 88-3).
 Amended effective September 19, 1990 (Supp. 90-3).
 Amended effective February 4, 1993 (Supp. 93-1).
 Amended effective November 14, 1994 (Supp. 94-4).
 Amended effective October 15, 1998 (Supp. 98-4).
 Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

R18-2-1020. Licensing of Third Party Agents; Issuing Alternative Fuel Certificates

- A.** Licensing of Third Party Agents. The Department shall accept an application for a third party agent license to issue Alternative Fuel Certificates from any person who demonstrates all of the following:
1. The applicant has knowledge of all laws and rules governing the inspection of alternative fuel vehicles;
 2. The applicant has training or experience in inspecting alternative fuel vehicles; and
 3. The applicant agrees to conduct inspections in accordance with the laws and rules for the inspection of alternative fuel vehicles.
- B.** A third party agent license is valid for a period of five years.
- C.** Issuing Alternative Fuel Certificates. The Department or its agent shall issue an Alternative Fuel Certificate according to A.R.S. § 28-2416 if the vehicle is currently powered by an alternative fuel as defined in A.R.S. § 1-215(4).

Historical Note

New Section adopted by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1021. Reserved**R18-2-1022. Procedure for Waiving Inspections Due to Technical Difficulties**

A vehicle emissions station manager employed by an official emissions inspection station may issue a Director's certificate for a vehicle that cannot be inspected as required by this Article because of technical difficulties inherent in the manufacturer's design or construction of the vehicle.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).
 Amended effective January 3, 1977 (Supp. 77-1).
 Amended effective March 2, 1978 (Supp. 78-2).
 Amended effective January 3, 1979 (Supp. 79-1).
 Amended effective January 1, 1986 (Supp. 85-6).
 Former Section R9-3-1022 renumbered without change as Section R18-2-1022 (Supp. 88-3). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

R18-2-1023. Certificate of Exemption for Out-of-State Vehicles

- A.** If a vehicle being registered or reregistered in area A or area B requires an emission test and will not be available for inspection within the state during the 90-day period before the emissions compliance expiration date, and an emissions inspection is not available for that class of vehicle at an official inspection station in the area where the vehicle is located, the owner or owner's agent may apply in writing to the Department for a certificate of exemption.
- B.** The owner or owner's agent shall complete the owner portion of the certificate of exemption form, and a law enforcement official shall complete the vehicle verification portion. The owner or owner's agent shall submit the completed form to the Department.
- C.** The Department shall issue a certificate of exemption:
1. For a vehicle that meets the requirements of subsection (A) as indicated by the form completed under subsection (B).
 2. For a vehicle that has passed an official emissions inspection in another state during the 90 days before emissions compliance expiration upon submission of the inspection compliance document issued by the government entity conducting the inspection program.

- D.** The fee for a certificate of exemption shall be fixed by the Director according to A.R.S. § 49-543 and shall be based upon the Director's estimated costs to the state of administering and enforcing the provisions of this Article as they apply to issuance of certificates of exemption. The payment for the certificates shall be included with the application for certificates. Checks shall be made payable to the Department of Environmental Quality.

Historical Note

Adopted effective January 13, 1976 (Supp. 76-1).
 Amended effective January 3, 1977 (Supp. 77-1).
 Amended effective January 3, 1979 (Supp. 79-1).
 Amended as an emergency effective January 2, 1981 pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1023 as amended effective January 3, 1979 and amended as an emergency effective January 2, 1981 now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Former Section R9-3-1023 renumbered without change as Section R18-2-1023 (Supp. 88-3). Amended effective February 4, 1993 (Supp. 93-1). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

R18-2-1024. Expired**Historical Note**

New Section made by final rulemaking at 8 A.A.R. 84, effective December 14, 2001 (Supp. 01-4). Section expired under A.R.S. § 41-1056(E) at 15 A.A.R. 1128, effective April 30, 2008 (Supp. 09-2).

R18-2-1025. Inspection of Contractor's Equipment and Personnel

- A.** State stations shall be inspected by state inspectors as follows:
1. In Area A:
 - a. Automated emission analyzers, calibrated and maintained according to "IM240 and Evap Technical Guidance," shall be inspected using state station field calibration gases at least once every other month.
 - b. Opacity meters shall be inspected for accuracy using a neutral density filter at least once each month.
 - c. During audits, a check shall be made for equipment tampering, worn instrumentation, blocked filters, and other conditions that would impair accurate sampling.
 2. In Area B:
 - a. Automated emission analyzers shall be inspected using state station field calibration gases at least two times each month.
 - b. Opacity meters shall be inspected for accuracy using a neutral density filter at least two times each month.
 - c. During audits, a check shall be made for tampering, worn instrumentation, blocked filters, and other conditions that would impair accurate sampling.
 - d. Functional checks of dynamometer accuracy including roll speed and power absorption shall be performed at least quarterly.
- B.** Equipment used to perform a transient loaded emissions test, shall be audited at least twice a year for all of the following:
1. Constant volume sampler critical flow and calibration;
 2. Optimization of the flame ionization detector fuel to air ratio using methane;
 3. Proper dynamometer coast down, roll distance, and inertia weight;

4. Ability to detect background pollutant concentrations;
 5. Evaporative pressure test system for accuracy, response time, and other criteria consistent with “IM240 and Evap Technical Guidance;” and
 6. Functional gas cap analysis equipment.
- C. If an equipment audit of an inspection lane in either area A or area B indicates that a state station analyzer is not operating within contractually specified tolerance, the state inspector shall immediately re-audit the failing equipment. If the equipment fails the second audit, the inspector shall immediately notify the station manager. The station manager shall either replace or repair the failing equipment or close the affected lane until the equipment is repaired and its accuracy verified. The state inspector shall provide a copy of the analyzer’s failing results to the station manager.
- D. A state station analyzer removed by the contractor may be returned to service upon its repair and written verification of a passing calibration audit. The contractor shall immediately notify the Department in writing of the analyzer’s return to service. The contractor’s calibration audit of the analyzer shall be provided to the Department within seven calendar days after the analyzer’s return to service.
- E. State inspectors shall conduct performance audits to determine whether vehicle emissions inspectors are correctly performing all inspections and functions related to inspections as follows:
1. Overt audits at least two times each year for each inspection lane:
 - a. Check for proper document security;
 - b. Check for required recordkeeping including vehicle emissions inspector licenses; and
 - c. Observation and written evaluation of each vehicle emissions inspector’s ability to perform an inspection.
 2. State station and vehicle emissions inspector records shall be reviewed at least monthly to assess station performance and identify any problems, potential fraud, or incompetence.
 3. If a vehicle emissions inspector fails an audit under subsection (E)(1) or (E)(2), the vehicle emissions inspector’s license may be suspended or revoked according to R18-2-1016(A)(4).
- F. On-road emissions analyzers shall be inspected by a state inspector at least monthly using dry-gas analysis equipment.
- G. If an equipment audit indicates that an on-road emissions analyzer is not operating within contractually specified tolerance, the state inspector shall immediately re-audit the failing equipment. If the equipment fails the second audit, the inspector shall immediately notify the contractor and the contractor shall repair or replace the equipment according to subsections (C) and (D).

Historical Note

Adopted effective January 3, 1977 (Supp. 77-1).
 Amended effective March 2, 1978 (Supp. 78-2).
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1025 as amended effective March 2, 1978, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (A) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1025 renumbered as Section R18-2-1025 and subsection (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4).

R18-2-1026. Inspection of Fleet Stations

- A. Equipment used by fleet stations shall be inspected by state inspectors for accuracy as follows:
1. Emission analyzers shall be inspected using field calibration gases at least quarterly.
 2. Opacity meters shall be inspected using a neutral density filter at least quarterly.
 3. Equipment for transient loaded emissions tests shall be inspected according to R18-2-1025(A) and (B).
- B. A fleet station’s emissions analyzer shall not be used for an official emissions inspection if:
1. The state’s field calibration gases are not read within the tolerances prescribed by subsection (J);
 2. There is a leak in the sampling systems or the calibration port; or
 3. The sample handling system is restricted.
- C. The fleet station is responsible for calibration of the fleet station emission analyzer.
- D. A state inspector may, at the inspector’s discretion, allow a fleet station employee, or someone authorized by the fleet station, to calibrate the analyzer utilizing the state’s field calibration gases.
- E. The Department shall assign HC and CO concentrations to a calibration gas submitted by a fleet station emission analyzer technician and purchased from a private source.
- F. A state inspector shall tag a fleet station emission analyzer if the analyzer does not meet the requirements of this Section. The fleet vehicle emissions inspector shall not use the analyzer for inspection until the tag is removed by a state inspector or an analyzer repair person certified under R18-2-1028. The tag shall be in the form of a U.S. postcard and contain the information listed in R18-2-1027(E).
- G. An analyzer tagged under subsection (F) shall not be returned to service until its accuracy is verified by a state inspector or an emissions analyzer repair person certified under R18-2-1028.
- H. A fleet station is responsible for periodic maintenance and calibrations of its emissions analyzers. Repair and maintenance requirements are prescribed in R18-2-1019.
- I. If a state inspector has approved its use, a fleet station may lease or borrow an emission analyzer for official inspections for up to six months while the station’s approved analyzer is being repaired.
- J. Fleet station analyzers used for transient loaded tests shall comply with and be quality control checked according to “IM240 and Evap Technical Guidance.” All other fleet station emission analyzers used for emissions inspections are required to read the calibration gases within the following tolerances:
1. Within plus 0.50% CO to minus 0.25% CO in the range from 0 to 2% CO;
 2. Within plus 1.00% CO to minus 0.50% CO in the range from 2% to 10% CO;
 3. Within plus 60 PPM HC to minus 30 PPM HC in the range from 0 to 500 PPM HC when read as N-HEXANE; and
 4. Within plus 200 PPM HC to minus 100 PPM HC in the range from 500 to 2,000 PPM HC when read as N-HEXANE.
- K. A fleet station opacity meter used for emission inspections is required to read the equivalent opacity value of neutral density filter within $\pm 5\%$ opacity at any point in the range of the meter.
- L. A state inspector shall conduct performance audits to determine whether a vehicle emissions inspector is correctly per-

forming inspections and functions related to inspections as follows:

1. Overt audits at least two times each year for each facility:
 - a. Check for proper document security;
 - b. Check for required recordkeeping including vehicle emissions inspector licenses; and
 - c. Observe and make a written evaluation of each vehicle emissions inspector's ability to perform an inspection.
2. Fleet station and vehicle emissions inspector records shall be reviewed at least monthly to assess fleet performance and identify any problems, potential fraud, or incompetence.

Historical Note

Adopted effective January 3, 1977 (Supp. 77-1).
 Amended effective January 1, 1986 (Supp. 85-6).
 Amended subsections (A) and (J) and added subsection (K) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1026 renumbered as Section R18-2-1026 and subsections (B), (F), (G) and (H) amended effective August 1, 1988 (Supp. 88-3).
 Amended effective November 14, 1994 (Supp. 94-4).
 Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

R18-2-1027. Registration and Inspection of Emissions Analyzers and Opacity Meters

- A. An automotive repair facility may apply to the Department at no charge for registration of NDIR HC and CO analyzers, and opacity meters. NDIR emission analyzers and opacity meters used by fleet inspection stations shall be registered for the fleet station permit approval. Application forms for analyzer or opacity meter registration are available from the Department. Completed application forms shall be submitted to the Department. For purposes of 18 A.A.C. 1, the application components for registration of an analyzer or opacity meter are:
 1. The Department receives a completed application form;
 2. The applicant or employee successfully completes the "Certified Technician" examination described in R18-2-1028(A)(2); and
 3. The Department inspects the analyzer.
- B. A registered analyzer shall be calibrated at least monthly, by a certified technician, with calibration gases approved by the Department. A registered opacity meter shall be calibrated according to manufacturer's specifications before performing the first vehicle emissions inspection in any month.
- C. A registered analyzer shall meet the requirements of R18-2-1006(F)(8)(a). Calibration shall be verified by a state inspector before the analyzer is registered. The analyzer shall read the value of the calibration gases within the following tolerances:
 1. Plus 0.50% CO to minus 0.25% CO in the range from 0 to 2% CO;
 2. Plus 1.00% CO to minus 0.50% CO in the range from 2% to 10% CO;
 3. Plus 60 PPM HC to minus 30 PPM HC in the range from 0 to 500 PPM HC when read as N-HEXANE; and
 4. Plus 200 PPM HC to minus 100 PPM HC in the range from 500 to 2,000 PPM HC when read as N-HEXANE.
- D. Each registered opacity meter and analyzer shall have a unique registration number assigned by the Department. The technician shall maintain a repair and calibration log for each registered opacity meter and analyzer on a form provided by the Department. The log shall be made available to a state inspector on request.
- E. A state inspector shall tag a registered opacity meter or analyzer if the opacity meter or analyzer does not meet the

requirements of this Section. A tagged opacity meter or analyzer shall not be used for the purposes of R18-2-1010 or R18-2-1019 until the tag is removed by a state inspector or an emission analyzer repair person certified under R18-2-1028 after accuracy is verified.

1. The tag shall be in the form of a U.S. postcard and contain the following information:
 - a. Analyzer registration number or opacity meter registration number,
 - b. Brief statement that the analyzer does not meet state operating requirements for registered analyzers,
 - c. Reason for tagging,
 - d. Date the analyzer was tagged and the signature of state inspector issuing the tag,
 - e. Details of repairs performed to correct the failure,
 - f. CO and HC concentrations of calibration gases used to verify analyzer accuracy,
 - g. Analyzer readings when gases were introduced into the analyzer sampling probe, and
 - h. Repair person's certificate number and signature or signature of state inspector removing the tag and date accuracy is verified.
 2. The tag shall be returned to the Department within two business days after accuracy is verified.
- F. An owner of a registered emission analyzer or opacity meter shall notify the Department within seven business days of the retirement, resignation, or termination of any licensed vehicle emissions inspector or certified technician. The Department shall revoke the registration of an emission analyzer or opacity meter if the owner of the analyzer or meter does not employ an inspector licensed under R18-2-1019 or a technician certified under R18-2-1028.

Historical Note

Adopted effective January 3, 1977 (Supp. 77-1).
 Amended effective March 2, 1978 (Supp. 78-2).
 Amended effective January 3, 1979 (Supp. 79-1).
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1027 as amended effective January 3, 1979, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1027 renumbered as Section R18-2-1027 and subsections (B), (D), (F) and (G) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1). Amended by final rulemaking at 8 A.A.R. 90, effective January 1, 2002 (Supp. 01-4). Amended by final rulemaking at 14 A.A.R. 2834, effective July 1, 2008 (Supp. 08-3).

R18-2-1028. Certification of Users of Registered Analyzers and Analyzer Repair Persons

- A. A person may be certified to use a registered analyzer and opacity meter if:
 1. The person completes the application form and submits it to the Department; and
 2. The person demonstrates proficiency by scoring 80% or higher on a Department-administered examination in the following areas:
 - a. Equipment used in the inspection and control of emissions;
 - b. Types of emissions inspection failures;

- c. Correction procedures for excessive HC emissions;
 - d. Correction procedures for excessive CO emissions;
 - e. Proper carburetor adjustment procedures; and
 - f. Diesel fuel injection systems.
- B. Certification under subsection (A) shall be valid for one year from date of issue and may be renewed, under the conditions of subsection (A), by submitting a renewal application to the Department 30 days before the current certification expiration date.
- C. A person certified under subsection (A) shall notify the Department within seven business days of the person's retirement, resignation, or termination from employment.
- D. A person may be certified to repair and remove tags from an emission analyzer under R18-2-1027 if:
 - 1. Application is made to the Department;
 - 2. The person demonstrates proficiency by scoring 80% or higher on a Department-administered examination in the following areas:
 - a. State and federal regulations governing emissions analyzers,
 - b. Fundamentals of emission analyzer operation, repair and preventive maintenance,
 - c. Theory of operation of vehicle emissions control devices.
- E. Certification under subsection (D) shall be valid for one year from date of issue and may be renewed, under the conditions of subsection (D), by submitting a renewal application to the Department 30 days before the current certification expiration date.
- F. Each person certified under this Section shall receive a unique nontransferable certification number.
- G. The Department may suspend, revoke or refuse to renew the certification issued under subsection (A) if:
 - 1. The person's actions demonstrate a lack of proficiency in the areas listed under subsection (A)(2); or
 - 2. The person has willfully violated any provision of this Article.
- H. The Department may suspend, revoke, or refuse to renew the certification issued under subsection (D) if:
 - 1. The person's actions demonstrate a lack of proficiency in the areas listed under subsection (D)(2); or
 - 2. The person has willfully violated any provision of this Article.

Historical Note

Adopted effective January 1, 1986 (Supp. 85-6).
 Amended subsections (A) and (F) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1028 renumbered as Section R18-2-1028 and subsection (D) amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

R18-2-1029. Vehicle Emission Control Devices

For the purposes of A.R.S. §§ 28-955 and 49-447, a registered motor vehicle shall have in operating condition all emission control devices installed by the vehicle manufacturer to comply with federal requirements for motor vehicle emissions or equivalent after-market replacement parts or devices.

Historical Note

Adopted effective January 3, 1977 (Supp. 77-1). Former Section R9-3-1029 renumbered as Section R18-2-1029 and amended effective August 1, 1988 (Supp. 88-3). Amended by final rulemaking at 6 A.A.R. 562, effective

January 14, 2000 (Supp. 00-1).

R18-2-1030. Visible Emissions; Mobile Sources

- A. A vehicle other than a diesel-powered vehicle or 2-stroke vehicle that emits any visible emissions for 10 consecutive seconds or more is "excessive" for the purposes of A.R.S. § 28-955(C).
- B. A diesel-powered vehicle shall not emit any visible emissions in excess of:
 - 1. Twenty percent visual opacity for 10 consecutive seconds or more at or below 2,000 feet elevation;
 - 2. Thirty percent visual opacity for 10 consecutive seconds or more above 2,000 feet and at or below 4,000 feet elevation; and
 - 3. Forty percent visual opacity for 10 consecutive seconds above 4,000 feet elevation.
- C. A vehicle that exceeds the standards in subsection (B) fails the inspection under R18-2-1006 and is considered to have "excessive" emissions under A.R.S. § 28-955(C).

Historical Note

Adopted effective January 3, 1977 (Supp. 77-1).
 Amended as an emergency effective January 2, 1981, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 81-1). Former Section R9-3-1030 as adopted effective January 3, 1977, and amended as an emergency effective January 2, 1981, now amended effective April 15, 1981 (Supp. 81-2). Amended effective January 1, 1986 (Supp. 85-6). Amended subsection (C) effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1030 renumbered as Section R18-2-1030 and subsection (C) amended effective August 1, 1988 (Supp. 88-3). Amended effective September 19, 1990 (Supp. 90-3). Amended by final rulemaking at 6 A.A.R. 562, effective January 14, 2000 (Supp. 00-1).

R18-2-1031. Standards for Evaluating the Oxidation Efficiency of a Catalytic Converter

- A. Except for a vehicle requiring an Idle-Only Inspection, a gasoline-powered vehicle requiring a catalytic converter test under R18-2-1008(C) shall be tested using the following Catalyst Efficiency Test Procedure:
 - 1. Immediately after a vehicle completes an Inspection and Maintenance (I/M) test in the waiver lane, the exhaust sampling cone shall be removed from the tailpipe. The vehicle shall remain on the dynamometer with the engine idling and the transmission in neutral. The vehicle engine must be at normal operating temperature.
 - 2. For the catalyst test, the dynamometer and the constant volume sampler shall remain at the settings used for the vehicle's I/M test.
 - 3. The inspector shall insert the sampling tube for the A/F analyzer into the tailpipe of the vehicle.
 - 4. The inspector shall accelerate the vehicle to 40 ± 2.5 MPH and maintain a steady-state operating mode for the duration of the test. Once the vehicle obtains the test speed, the test shall begin.
 - 5. Once the test begins, a two-minute stabilization period shall take place, during which the inspector shall monitor the A/F analyzer to ensure that the A/F is 14.0 or greater. If the mean A/F is less than 14.0, the inspector shall abort the test.
 - 6. If the A/F is 14.0 or greater, the exhaust sampling cone shall be repositioned for exhaust sampling.
 - 7. After the stabilization period ends, the total hydrocarbon and methane concentrations and the A/F ratio shall be continuously recorded for two minutes.
 - 8. At the end of the two-minute sampling period, the inspector shall stop the vehicle, remove the exhaust sampling

- cone and the A/F analyzer sampling probe from the tailpipe, and remove the vehicle from the dynamometer.
9. The mean total hydrocarbon concentration shall be divided by the mean methane concentration for the recorded values of the test, to produce a ratio (R) of total hydrocarbon to methane. The ratio, R, shall be applied to the formula: Catalyst Efficiency (%) = -3 (R) +100.
 10. A vehicle passes the test if the Catalyst Efficiency (%) is 75% or greater.
 11. The test result for a non-passing vehicle with a mean A/F equal to, or less than, 14.3 shall be inconclusive.
 12. A vehicle fails the Catalyst Efficiency Test Procedure if the A/F is greater than 14.3 and the Catalyst Efficiency (%) is less than 75%. The failing vehicle cannot be granted a waiver according to R18-2-1008(C)(1).
- B.** Analytical equipment required to perform the Catalyst Efficiency Test Procedure shall meet the following requirements:
1. Analyzer Specifications:
 - a. An analyzer shall meet performance specifications of 40 CFR 86 subparts B, D, and N with respect to accuracy, precision, drift, interference, and noise. 40 CFR, subparts B, D, and N, adopted as of July 1, 1998, are incorporated by reference and on file with the Department and the Secretary of State. This incorporation contains no future editions or amendments. A copy of this referenced material may be obtained from the U.S. Government Printing Office, Superintendent of Documents, Mail Stop SSOP, Washington D.C. 20402-9328.
 - b. Total hydrocarbon analysis shall be determined by a flame ionization detector. The analyzer shall be single range with a calibration curve covering at least 0 to 300 ppm carbon.
 - c. Methane analysis shall be determined by a flame ionization detector equipped with a non-methane cutter capable of oxidizing 98% of the hydrocarbons (except methane) while more than 90% of the methane remains unchanged. The analyzer shall be single range with a calibration curve covering at least 0 to 30 ppm.
 2. Analyzer Performance Verification and Calibration:
 - a. The operator of an analyzer under this Section shall verify analyzer performance according to manufacturer recommendations.
 - b. Upon initial installation, and monthly thereafter, the operator of an analyzer under this Section shall generate a 10-point calibration curve for each total hydrocarbon and methane analyzer. A gas divider employing equally spaced points may be used to generate the calibration curve.
 - i. Each calibration curve generated shall fit the data within $\pm 2.0\%$ at each calibration point.
 - ii. Each calibration curve shall be verified for each analyzer with a confirming calibration standard between 15-80% of full scale that is not used for curve generation. Each confirming standard shall be measured by the curve within $\pm 2.5\%$.
 - d. Engine A/F mixture analysis shall be determined by a Universal Exhaust Gas Oxygen Sensor. The range shall be 8.0 to 25.5 A/F for gasoline with an accuracy of $\pm 2\%$ of point and a response time of less than 150 milliseconds.

Historical Note

Adopted effective January 1, 1987, filed December 31, 1986 (Supp. 86-6). Former Section R9-3-1031 renumbered as Section R18-2-1031 and amended effective August 1, 1988 (Supp. 88-3). Amended effective November 14, 1994 (Supp. 94-4). Amended by final rulemaking at 6 A.A.R. 382, effective December 20, 1999 (Supp. 99-4).

Table 1. Dynamometer Loading Table - Annual Tests

Gross Vehicle Weight			
Rating (Pounds)	Engine Size	Speed (MPH)	Load (HP)
8500 or less	4 cyl. or less	22-25	2.8-4.1
8500 or less	5 or 6 cyl.	29-32	6.4-8.4
8500 or less	8 cyl. or more	32-35	8.4-10.8
8501 or more	All	37-40	12.7-15.8

Historical Note

Adopted effective November 14, 1994 (Supp. 94-4).

ARTICLE 11. FEDERAL HAZARDOUS AIR POLLUTANTS**R18-2-1101. National Emission Standards for Hazardous Air Pollutants (NESHAPs)**

- A. Except as provided in R18-2-1102, the following subparts of 40 CFR 61, National Emission Standards for Hazardous Air Pollutants (NESHAPs), and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.
1. Subpart A - General Provisions.
 2. Subpart B - Radon Emissions from Underground Uranium Mines.
 3. Subpart C - Beryllium.
 4. Subpart D - Beryllium Rocket Motor Firing.
 5. Subpart E - Mercury.
 6. Subpart F - Vinyl Chloride.

7. Subpart H - Radionuclides Other Than Radon from Department of Energy Facilities.
8. Subpart I - Radionuclide Emissions from Federal Other Than Nuclear Regulatory Commission Licensees and Not Covered by Subpart H.
9. Subpart J - Equipment Leaks (Fugitive Emission Sources) of Benzene.
10. Subpart K - Radionuclide Emissions From Elemental Phosphorus Plants.
11. Subpart L - Benzene Emissions from Coke By-Product Recovery Plants.
12. Subpart M - Asbestos.
13. Subpart N - Inorganic Arsenic Emissions from Glass Manufacturing Plants.
14. Subpart O - Inorganic Arsenic Emissions from Primary Copper Smelters.
15. Subpart P - Inorganic Arsenic Emissions from Arsenic Trioxide and Metallic Arsenic Production.
16. Subpart Q - Radon Emissions from Department of Energy Facilities.
17. Subpart R - Radon Emissions from Phosphogypsum Stacks.
18. Subpart T - Radon Emissions from the Disposal of Uranium Mill Tailings.
19. Subpart V - Equipment Leaks (Fugitive Emission Sources).
20. Subpart W - Radon Emissions from Operating Mill Tailings.
21. Subpart Y - Benzene Emissions From Benzene Storage Vessels.
22. Subpart BB - Benzene Emissions from Benzene Transfer Operations.
23. Subpart FF - Benzene Waste Operations.

- B. Except as provided in R18-2-1102, the following subparts of 40 CFR 63, NESHAPs for Source Categories, and all accompanying appendices, adopted as of June 28, 2013, and no future editions or amendments, are incorporated by reference as applicable requirements. These standards are on file with the Department and shall be applied by the Department. These standards can be obtained from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.
1. Subpart A - General Provisions.
 2. Subpart F - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry.
 3. Subpart G - National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater.
 4. Subpart H - National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks.
 5. Subpart I - National Emission Standards for Organic Hazardous Air Pollutants for Certain Processes Subject to the Negotiated Regulation for Equipment Leaks.
 6. Subpart J - National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production.
 7. Subpart L - National Emission Standards for Coke Oven Batteries.
 8. Subpart M - National Perchloroethylene Air Emission Standards for Dry Cleaning Facilities.
 9. Subpart N - National Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks.
 10. Subpart O - Ethylene Oxide Emissions Standards for Sterilization Facilities.
 11. Subpart Q - National Emission Standards for Hazardous Air Pollutants for Industrial Process Cooling Towers.
 12. Subpart R - National Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations).
 13. Subpart S - National Emission Standards for Hazardous Air Pollutants from the Pulp and Paper Industry.
 14. Subpart T - National Emission Standards for Halogenated Solvent Cleaning.
 15. Subpart U - National Emission Standards for Hazardous Air Pollutant Emissions: Group I Polymers and Resins.
 16. Subpart W - National Emission Standards for Hazardous Air Pollutants for Epoxy Resins Production and Non-Nylon Polyamides Production.
 17. Subpart Y - National Emission Standards for Marine Tank Vessel Loading Operations.
 18. Subpart AA - National Emission Standards for Hazardous Air Pollutants From Phosphoric Acid Manufacturing Plants.
 19. Subpart BB - National Emission Standards for Hazardous Air Pollutants From Phosphate Fertilizers Production Plants.
 20. Subpart CC - National Emission Standards for Hazardous Air Pollutants from Petroleum Refineries.
 21. Subpart DD - National Emission Standards for Hazardous Air Pollutants from Off-Site Waste and Recovery Operations.
 22. Subpart EE - National Emission Standards for Magnetic Tape Manufacturing Operations.
 23. Subpart GG - National Emission Standards for Aerospace Manufacturing and Rework Facilities.
 24. Subpart HH - National Emission Standards for Hazardous Air Pollutants From Oil and Natural Gas Production Facilities.
 25. Subpart JJ - National Emission Standards for Wood Furniture Manufacturing Operations.
 26. Subpart KK - National Emission Standards for the Printing and Publishing Industry.
 27. Subpart LL - National Emission Standards for Hazardous Air Pollutants for Primary Aluminum Reduction Plants.
 28. Subpart MM - National Emission Standards for Hazardous Air Pollutants for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semi-chemical Pulp Mills.
 29. Subpart OO - National Emission Standards for Tanks - Level 1.
 30. Subpart PP - National Emission Standards for Containers.
 31. Subpart QQ - National Emission Standards for Surface Impoundments.
 32. Subpart RR - National Emission Standards for Individual Drain Systems.
 33. Subpart SS - National Emission Standards for Closed Vent Systems, Control Devices, Recovery Devices and Routing to a Fuel Gas System or a Process.
 34. Subpart TT - National Emission Standards for Equipment Leaks - Control Level 1.
 35. Subpart UU - National Emission Standards for Equipment Leaks - Control Level 2 Standards.
 36. Subpart VV - National Emission Standards for Oil-Water Separators and Organic-Water Separators.
 37. Subpart WW - National Emission Standards for Storage Vessels (Tanks) - Control Level 2.
 38. Subpart XX - National Emission Standards for Ethylene Manufacturing Process Units: Heat Exchange Systems and Waste Operations.
 39. Subpart YY - National Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards.
 40. Subpart CCC - National Emission Standards for Hazardous Air Pollutants for Steel Pickling - HCl Process Facilities and Hydrochloric Acid Regeneration Plants.
 41. Subpart DDD - National Emission Standards for Hazardous Air Pollutants for Mineral Wool Production.
 42. Subpart EEE - National Emission Standards for Hazardous Air Pollutants From Hazardous Waste Combustors.
 43. Subpart GGG - National Emission Standards for Pharmaceuticals Production.
 44. Subpart HHH - National Emission Standards for Hazardous Air Pollutants From Natural Gas Transmission and Storage Facilities.
 45. Subpart III - National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production.
 46. Subpart JJJ - National Emission Standards for Hazardous Air Pollutant Emissions: Group IV Polymers and Resins.
 47. Subpart LLL - National Emission Standards for Hazardous Air Pollutants From the Portland Cement Manufacturing Industry.
 48. Subpart MMM - National Emission Standards for Hazardous Air Pollutants for Pesticide Active Ingredient Production.
 49. Subpart NNN - National Emission Standards for Hazardous Air Pollutants for Wool Fiberglass Manufacturing.
 50. Subpart OOO - National Emission Standards for Hazardous Air Pollutant Emissions: Manufacture of Amino/Phenolic Resins.

Department of Environmental Quality – Air Pollution Control

51. Subpart PPP - National Emission Standards for Hazardous Air Pollutant Emissions for Polyether Polyols Production.
52. Subpart QQQ - National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting.
53. Subpart RRR - National Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production.
54. Subpart TTT - National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelting.
55. Subpart UUU - National Emission Standards for Hazardous Air Pollutants for Petroleum Refineries: Catalytic Cracking Units, Catalytic Reforming Units, and Sulfur Recovery Units.
56. Subpart VVV - National Emission Standards for Hazardous Air Pollutants: Publicly Owned Treatment Works.
57. Subpart XXX - National Emission Standards for Hazardous Air Pollutants for Ferroalloys Production: Ferromanganese and Silicomanganese.
58. Subpart AAAA - National Emission Standards for Hazardous Air Pollutants: Municipal Solid Waste Landfills.
59. Subpart CCCC - National Emission Standards for Hazardous Air Pollutants: Manufacture of Nutritional Yeast.
60. Subpart DDDD - National Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products.
61. Subpart EEEE - National Emission Standards for Hazardous Air Pollutants: Organic Liquids Distribution (Non-Gasoline).
62. Subpart FFFF - National Emission Standards for Hazardous Air Pollutants: Miscellaneous Organic Chemical Manufacturing.
63. Subpart GGGG - National Emission Standards for Hazardous Air Pollutants: Solvent Extraction for Vegetable Oil Production.
64. Subpart HHHH - National Emissions Standards for Hazardous Air Pollutants for Wet-Formed Fiberglass Mat Production.
65. Subpart IIII - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks.
66. Subpart JJJJ - National Emission Standards for Hazardous Air Pollutants: Paper and Other Web Coating.
67. Subpart KKKK - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Cans.
68. Subpart MMMM - National Emission Standards for Hazardous Air Pollutants for Surface Coating of Miscellaneous Metal Parts and Products.
69. Subpart NNNN - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Large Appliances.
70. Subpart OOOO - National Emission Standards for Hazardous Air Pollutants: Printing, Coating, and Dyeing of Fabrics and Other Textiles.
71. Subpart PPPP - National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products.
72. Subpart QQQQ - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Wood Building Products.
73. Subpart RRRR - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Furniture.
74. Subpart SSSS - National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Coil.
75. Subpart TTTT - National Emission Standards for Hazardous Air Pollutants for Leather Finishing Operations.
76. Subpart UUUU - National Emission Standards for Hazardous Air Pollutants for Cellulose Products Manufacturing.
77. Subpart VVVV - National Emission Standards for Hazardous Air Pollutants for Boat Manufacturing.
78. Subpart WWWW - National Emissions Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production.
79. Subpart XXXX - National Emission Standards for Hazardous Air Pollutants: Rubber Tire Manufacturing.
80. Subpart YYYY - National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines.
81. Subpart ZZZZ - National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines.
82. Subpart AAAAA - National Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants.
83. Subpart BBBBB - National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing.
84. Subpart CCCCC - National Emission Standards for Hazardous Air Pollutants for Coke Ovens: Pushing, Quenching, and Battery Stacks.
85. Subpart DDDDD - National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers and Process Heaters.
86. Subpart EEEEE - National Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries.
87. Subpart FFFFF - National Emission Standards for Hazardous Air Pollutants: Integrated Iron and Steel Manufacturing.
88. Subpart GGGGG - National Emission Standards for Hazardous Air Pollutants: Site Remediation.
89. Subpart HHHHH - National Emission Standards for Hazardous Air Pollutants: Miscellaneous Coating Manufacturing.
90. Subpart IIIII - National Emission Standards for Hazardous Air Pollutants: Mercury Emissions From Mercury Cell Chlor-Alkali Plants.
91. Subpart JJJJJ - National Emission Standards for Hazardous Air Pollutants for Brick and Structural Clay Products Manufacturing.
92. Subpart KKKKK - National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing.
93. Subpart LLLLL - National Emission Standards for Hazardous Air Pollutants: Asphalt Processing and Asphalt Roofing Manufacturing.
94. Subpart MMMMM - National Emission Standards for Hazardous Air Pollutants: Flexible Polyurethane Foam Fabrication Operations.
95. Subpart NNNNN - National Emission Standards for Hazardous Air Pollutants: Hydrochloric Acid Production.
96. Subpart PPPPP - National Emission Standards for Hazardous Air Pollutants: Engine Test Cells/Standards.
97. Subpart QQQQQ - National Emission Standards for Hazardous Air Pollutants for Friction Materials Manufacturing Facilities.
98. Subpart RRRRR - National Emission Standards for Hazardous Air Pollutants: Taconite Iron Ore Processing.
99. Subpart SSSSS - National Emission Standards for Hazardous Air Pollutants for Refractory Products Manufacturing.
100. Subpart TTTTT - National Emissions Standards for Hazardous Air Pollutants for Primary Magnesium Refining.
101. Subpart WWWW - National Emission Standards for Hospital Ethylene Oxide Sterilizers.

102. Subpart YYYYYY - National Emission Standards for Hazardous Air Pollutants for Area Sources: Electric Arc Furnace Steelmaking Facilities.
103. Subpart ZZZZZZ - National Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries Area Sources.
104. Subpart BBBBBB - National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Distribution Bulk Terminals, Bulk Plants, and Pipeline Facilities.
105. Subpart CCCCCC - National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Dispensing Facilities.
106. Subpart DDDDDD - National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production Area Sources.
107. Subpart EEEEEEE - National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting Area Sources.
108. Subpart FFFFFFF - National Emission Standards for Hazardous Air Pollutants for Secondary Copper Smelting Area Sources.
109. Subpart GGGGGG - National Emission Standards for Hazardous Air Pollutants for Primary Nonferrous Metals Area Sources-Zinc, Cadmium, and Beryllium.
110. Subpart HHHHHH - National Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources.
111. Subpart JJJJJJ - National Emission Standards for Hazardous Air Pollutants for Area Sources: Industrial, Commercial, and Institutional Boilers Area Sources.
112. Subpart LLLLLL - National Emission Standards for Hazardous Air Pollutants for Acrylic and Modacrylic Fibers Production Area Sources.
113. Subpart MMMMMM - National Emission Standards for Hazardous Air Pollutants for Carbon Black Production Area Sources.
114. Subpart NNNNNN - National Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources: Chromium Compounds.
115. Subpart OOOOOO - National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production and Fabrication Area Sources.
116. Subpart PPPPPP - National Emission Standards for Hazardous Air Pollutants for Lead Acid Battery Manufacturing Area Sources.
117. Subpart QQQQQQ - National Emission Standards for Hazardous Air Pollutants for Wood Preserving Area Sources.
118. Subpart RRRRRR - National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing Area Sources.
119. Subpart SSSSSS - National Emission Standards for Hazardous Air Pollutants for Glass Manufacturing Area Sources.
120. Subpart TTTTTT - National Emission Standards for Hazardous Air Pollutants for Secondary Nonferrous Metals Processing Area Sources.
121. Subpart VVVVVV - National Emission Standards for Hazardous Air Pollutants for Chemical Manufacturing Area Sources.
122. Subpart WWWWWW - National Emission Standards for Hazardous Air Pollutants: Area Source Standards for Plating and Polishing Operations.
123. Subpart XXXXXX - National Emission Standards for Hazardous Air Pollutants Area Source Standards for Nine Metal Fabrication and Finishing Source Categories.
124. Subpart YYYYYY - National Emission Standards for Hazardous Air Pollutants for Area Sources: Ferroalloys Production Facilities.
125. Subpart ZZZZZZ - National Emission Standards for Hazardous Air Pollutants: Area Source Standards for Aluminum, Copper, and other Nonferrous Foundries.
126. Subpart AAAAAA - National Emission Standards for Hazardous Air Pollutants for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing.
127. Subpart BBBBBB - National Emission Standards for Hazardous Air Pollutants for Area Sources: Chemical Preparations Industry.
128. Subpart CCCCCC - National Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing.
129. Subpart DDDDDDD - National Emission Standards for Hazardous Air Pollutants for Area Sources: Prepared Feeds Manufacturing.
130. Subpart EEEEEEE - National Emission Standards for Hazardous Air Pollutants: Gold Mine Ore Processing and Production Area Source Category.
131. Subpart HHHHHHH - National Emission Standards for Hazardous Air Pollutant Emissions for Polyvinyl Chloride and Copolymers Production.

Historical Note

Former Section R18-2-1101 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-1101 renumbered from R18-2-901 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective February 17, 1995 (Supp. 95-1). Amended effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 5504, effective February 4, 2006 (Supp. 05-4). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by final expediated rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

R18-2-1102. General Provisions

- A. When used in 40 CFR 61 or 63, “Administrator” means the Director of the Arizona Department of Environmental Quality except that the Director shall not be authorized to approve alternate or equivalent test methods or alternate standards or work practices, except as specifically provided in Part 63, Subpart B.
- B. From the general standards identified in R18-2-1101(A), delete 40 CFR 61.04. All requests, reports, applications, submittals, and other communications to the Director pursuant to this Article shall be submitted to the Arizona Department of Environmental Quality, Air Quality Division, 1110 West Washington Street, Phoenix, Arizona 85007.

- C. The Director shall not be delegated authority to deal with equivalency determinations that are nontransferable through Section 112(h)(3) of the Act.

Historical Note

Former Section R18-2-1102 repealed effective September 26, 1990 (Supp. 90-3). New Section R18-2-1102 renumbered from R18-2-902 and amended effective November 15, 1993 (Supp. 93-4). Amended effective June 10, 1994 (Supp. 94-2). Amended effective February 17, 1995 (Supp. 95-1). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4).

ARTICLE 12. EMISSIONS BANK

R18-2-1201. Definitions

In addition to the definitions contained in Article 1 of this Chapter, and A.R.S. § 49-401.01, the following definitions apply to this Article:

1. "Certified credit" means an emission reduction credit that meets the criteria under R18-2-1205.
2. "Conditional credit" means an emission reduction credit that is in the review process before qualifying for certification under R18-2-1205.
3. "Credit generation" means the process by which a source obtains emission reduction credits for eventual listing in the registry.
4. "Credit retirement" means a person's purchase of a banked emission reduction credit for the purpose of permanent removal from the emissions bank.
5. "Credit utilization" means the use of a certified emission reduction credit.
6. "Credit withdrawal" means the removal of an emission reduction credit from the bank by the source originally depositing the emission reduction credit.
7. "Emission reduction credit" or "credit" means a certified unit that may be banked, sold, transferred, withdrawn, or retired.
8. "Permitting authority" means the state or county that has jurisdiction over a source under A.R.S. § 49-402 and may review, issue, revise, administer, and enforce a permit; and certify a credit under this Article.
9. "Registry" means the location where emission reduction credits are posted for the purpose of public notice, allowing a person to determine the availability of credits for related market transactions.
10. "Surplus" means the amount of a permitted source's emission reduction that is not required by federal, state, or local law.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1202. Applicability

The provisions of this Article apply to permitted sources emitting particulate matter, sulfur dioxide, carbon monoxide, nitrogen oxides, or volatile organic compounds. The provisions of this Article shall not apply to sources granted authority to operate under 18 A.A.C. 2, Article 5.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1203. Emissions Bank Administration

- A. The Director shall place an emission reduction credit in the emissions bank credit registry upon conditional certification, certification, pending use, and final disposition. For each credit, the Director shall place in the registry:

1. Source's contact name and information;
2. Source name and information;
3. Amount and type of pollutant;
4. Date of emission reduction and credit status.

- B. The Director shall issue a certificate of deposit to the reducing source for each certified credit deposited in the bank, and issue a certificate of retirement to a person for each certified credit permanently retired.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1204. Credit Generation

- A. A source wanting to generate an emission reduction for deposit into the bank shall submit a Credit Generation Application (CGA) to the Director on a form prescribed by the Director. The CGA shall contain:

1. The company name;
 2. The company mailing address;
 3. The owner, co-owner, or partner;
 4. The contact person name, title, and telephone number;
 5. The permitted source name, location, permit number, and industry code;
 6. The pollutant;
 7. The attainment status of the area where the source is located;
 8. The amount of actual emissions reduced;
 9. The date of emission reduction to be credited;
 10. The description of emission reduction credit generation activity;
 11. The signature of and verification of truthfulness and accuracy by a responsible official as defined in R18-2-301(17);
 12. The name, title, and telephone number of the responsible official.
- The source shall submit a copy of the CGA to the permitting authority with an application to revise the permit or request to terminate the permit.

- B. Upon receipt by the Director of the CGA with a check for the administrative fee specified in R18-2-1208(A), the Director shall list each conditional credit in the registry.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1205. Credit Certification

- A. A permitting authority may certify an emission credit if the permitting authority verifies the credit is based on:
1. A reduction in actual emissions that occurred after August 17, 1999;
 2. A quantifiable reduction in actual emissions;
 3. A permanent reduction in actual emissions;
 4. An enforceable reduction in actual emissions; and
 5. A surplus reduction in actual emissions occurring in addition to any other required emission reduction.

- B. The source must notify the permitting authority when the reduction occurs.

- C. In order for an emission reduction to be quantifiable under this Section:

1. The emission reduction must be quantifiable under R18-2-301(17); and
2. The reducing source shall submit documentation of any testing or monitoring that demonstrates an emission reduction.

- D. The permitting authority shall certify one emission reduction credit for each ton per year of particulate matter, sulfur diox-

ide, carbon monoxide, nitrogen dioxide, or volatile organic compound actually reduced.

- E. A banked credit does not expire.
- F. The permitting authority shall notify the source and the Director that a credit is certified. Upon receipt of the notice, the Director shall issue a certificate for each certified credit to the applicant identified in R18-2-1204, and list the certified credit in the registry.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1). Amended by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

R18-2-1206. Credit Utilization

- A. A source may use a certified emission reduction credit in the same nonattainment area, maintenance area, or modeling domain in which the emission reduction occurred by submitting a Credit Utilization Application (CUA) to the Director on a form prescribed by the Director. The CUA shall contain:
 1. The name and mailing address of the source that generated the credit;
 2. The owner, co-owner, or partner of the source that generated the credit;
 3. The contact person name, title, telephone number of the source that generated the credit;
 4. The name and mailing address of the source utilizing the credit;
 5. The owner, co-owner, or partner of the source utilizing the credit;
 6. The contact person name, title, telephone number of the source utilizing the credit;
 7. The purpose of the utilization;
 8. The pollutant;
 9. The amount of emission reduction credit to be utilized;
 10. Each emission reduction credit certificate number;
 11. The signature of and verification of truthfulness and accuracy by a responsible official as defined in R18-2-301(17); and
 12. The name, title, and telephone number of the responsible official.

The source shall submit a copy of the CUA to the permitting authority at the time the source submits an application for a permit or permit revision.
- B. Upon receipt by the Director of the CUA with a check for the administrative fee specified in R18-2-1208(B), the Director shall list the pending sale in the registry.
- C. The Director shall not list the final sale in the registry until:
 1. The permitting authority evaluates and verifies the authenticity of the credit with the emissions bank;
 2. The permitting authority determines that there will be no adverse impact on air quality; and
 3. The permitting authority completes the permitting action and submits the credit certificate to the Director.
- D. After the permitting authority notifies the Director that the requirements of this Section have been met, the Director shall delist the credits in the registry.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1207. Credit Withdrawal

Any party purchasing certified credits listed in the emissions bank for the purpose of credit retirement, or any source withdrawing its own credits from the emissions bank, shall submit a CUA specified in R18-2-1204(A) with the surrendered certificates to the Director.

Upon receipt of the CUA and surrendered certificates, the Director shall delist the credits in the registry.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

R18-2-1208. Fees

- A. A source generating a credit shall pay a non-refundable administrative fee of \$200.00 to the Director when submitting the CGA. This fee is in addition to the fees specified in R18-2-326.
- B. A source utilizing a credit shall pay a non-refundable administrative fee of \$200.00 to the Director when submitting the CUA. This fee is in addition to the fees specified in R18-2-326.
- C. The Director shall not assess an administrative fee to a person:
 1. Purchasing a credit for retirement;
 2. Amending ownership information contained in the registry; or
 3. Withdrawing a credit from the bank.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 1815, effective March 18, 2002 (Supp. 02-1).

ARTICLE 13. STATE IMPLEMENTATION PLAN RULES FOR SPECIFIC LOCATIONS

R18-2-1301. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1302. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1303. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1304. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1305. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1306. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired

under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

R18-2-1307. Expired

Historical Note

New Section made by final rulemaking at 9 A.A.R. 1295, effective April 2, 2003 (Supp. 03-2). Section expired under A.R.S. § 41-1056(J) at 19 A.A.R. 2856, effective April 30, 2013 (Supp. 13-3).

PART A. RESERVED

PART B. HAYDEN, ARIZONA, PLANNING AREA

R18-2-B1301. Limits on Lead Emissions from the Hayden Smelter

A. Applicability.

1. This Section applies to the owner or operator of the Hayden Smelter.
2. Effective date. Except as otherwise provided, the requirements of this Section shall become applicable on the earlier of July 1, 2018 or 180 days after completion of all project improvements authorized by Significant Permit Revision No. 60647.

B. Definitions. In addition to general definitions contained in R18-2-101, the following definitions apply to this Section:

1. "ACFM" means actual cubic feet per minute.
2. "Anode furnace baghouse stack" means the dedicated stack that vents controlled off-gases from the anode furnaces to the Main Stack.
3. "Blowing" shall mean the introduction of air or oxygen-enriched air into the converter furnace molten bath through tuyeres that are submerged below the level of the molten bath. The flow of air through the tuyeres above the level of the molten bath or into an empty converter shall not constitute blowing.
4. "Capture system" means the collection of components used to capture gases and fumes released from one or more emission units, and to convey the captured gases and fumes to one or more control devices or a stack. A capture system may include, but is not limited to, the following components as applicable to a given capture system design: duct intake devices, hoods, enclosures, ductwork, dampers, manifolds, plenums, and fans.
5. "Control device" means a piece of equipment used to clean and remove pollutants from gases and fumes released from one or more emission units that would otherwise be released to the atmosphere. Control devices may include, but are not limited to, baghouses, Electrostatic Precipitators (ESPs), and sulfuric acid plants.
6. "Hayden Smelter" means the primary copper smelter located in Hayden, Gila County, Arizona at latitude 33°0'15"N and longitude 110°46'31"W.
7. "Main Stack" means the center and annular portions of the 1,000-foot stack, which vents controlled off-gases from the INCO flash furnace, the converters, and anode furnaces and also vents exhaust from the tertiary hoods.
8. "SCFM" means standard cubic feet per minute.
9. "SLAMS monitor" means an ambient air monitor part of the State and Local Air Monitoring Stations network operated by State or local agencies for the purpose of demonstrating compliance with the National Ambient Air Quality Standards.
10. "Smelting process-related fugitive lead emissions" means uncaptured and/or uncontrolled lead emissions that are released into the atmosphere from smelting copper in the INCO flash furnace, converters, and anode furnaces.

C. Emission limit. Main Stack lead emissions shall not exceed 0.683 pound of lead per hour.

D. Operational Standards.

1. Process equipment and control device operations. At all times, including periods of startup, shutdown, and malfunction, the owner or operator shall, to the extent practicable, maintain and operate smelter processes and associated emission capture and/or control equipment in a manner consistent with good air pollution control practices for minimizing lead emissions to the level required by subsection (C). Determination of whether acceptable operating and maintenance procedures are being used shall be based on all information available to the Department and EPA Region IX, which may include, but is not limited to, monitoring results, review of operating and maintenance procedures and records, and inspection of the relevant equipment.
2. Capture system and control device operations and maintenance plan. The owner or operator shall develop and implement an operations and maintenance plan for each capture system and/or control device used to ventilate or control process gas or emissions from the flash furnace, including matte tapping, slag skimming and slag return operations; converter primary hoods, converter secondary hoods, tertiary ventilation system; and anode refining operations. The operations and maintenance plan must address the following requirements as applicable to each capture system and/or control device.
 - a. Monitoring devices. The plan shall provide for installation, operation, calibration, and maintenance of appropriate monitoring devices to measure and record operating limit values or settings at all times the required capture and control system is operating, except during periods of monitor calibration, repair, and malfunction. The initial plan shall provide for volumetric flow monitoring on the vent gas baghouse (inlet or outlet), each converter primary hood, each converter secondary hood, the tertiary ventilation system, and the anode furnace baghouse (inlet or outlet). All monitoring devices shall be accurate within +/- 10 percent and calibrated according to manufacturer's instructions. If direct measurement of the exhaust flow is infeasible due to physical limitations or exhaust characteristics, the owner or operator may propose a reliable equivalent method for approval. Initial monitoring may be adjusted as provided in subsection (D)(2)(e). Dampers that are manually set and remain in the same position while the capture system is operating are exempt from these monitoring requirements. Capture system damper position setting(s) shall be specified in the plan.
 - b. Operational limits. The owner or operator shall establish operating limits in the operations and maintenance plan for the capture systems and/or control devices that are representative and reliable indicators of the performance of the capture system and control device operations. Initial operating limits may be adjusted as provided in subsection (D)(2)(e). Initial operating limits shall include the following:
 - i. A minimum air flow for the furnace ventilation system and associated damper positions for each matte tapping hood or slag skimming hood when operating to ensure that the opera-

- tion(s) are within the confines or influence of the capture system.
 - ii. A minimum air flow for the secondary hood baghouse and associated damper positions for each slag return hood to ensure that the operation is within the confines or influence of the capture system's ventilation draft during times when the associated process is operating.
 - iii. A minimum air infiltration ratio for the converter primary hoods of 1:1 averaged over 24 converter Blowing hours, rolled hourly measured as volumetric flow in primary hood less the volumetric flow of tuyere Blowing compared to the volumetric flow of tuyere Blowing.
 - iv. A minimum secondary hood exhaust rate of 35,000 SCFM during converter Blowing, averaged over 24 converter Blowing hours, rolled hourly.
 - v. A minimum secondary hood exhaust rate of 133,000 SCFM during all non-Blowing operating hours, averaged over 24 non-Blowing hours, rolled hourly.
 - vi. A minimum negative pressure drop across the secondary hood when the doors are closed equivalent to 0.007 inches of water.
 - vii. A minimum exhaust rate on the tertiary hooding of 400,000 ACFM during all times material is processed in the converter aisle, averaged over 24 hours and rolled hourly.
 - viii. Fan amperes or minimum air flow for the anode furnace baghouse and associated damper positions for each anode furnace hood to ensure that the anode furnace off-gas port is within the confines or influence of the capture system's ventilation draft during times when the associated furnace is operating.
 - ix. The anode furnace charge mouth shall be kept covered when the tuyeres are submerged in the metal bath except when copper is being charged to or transferred from the furnace.
 - c. Preventative maintenance. The owner or operator shall perform preventative maintenance on each capture system and control device according to written procedures specified in the operations and maintenance plan. The procedures must include a preventative maintenance schedule that is consistent with the manufacturer's or engineer's instructions, or operator's experience working with the equipment, and frequency for routine and long-term maintenance. This provision does not prohibit additional maintenance beyond that required by the plan.
 - d. Inspections. The owner or operator shall perform inspections in accordance with written procedures in the operations and maintenance plan for each capture system and control device that are consistent with the manufacturer's, engineer's, or operator's instructions for each system and device.
 - e. Plan development and revisions.
 - i. The owner or operator shall develop and keep current the plan required by this Section. Any plan or plan revision shall be consistent with this Section, shall be designed to ensure that the capture and control system performance conforms to the attainment demonstration in the Hayden 2008 Lead National Ambient Air Quality Standards Nonattainment Area State Implementation Plan (SIP), and shall be submitted to the Department for review. Any plan or plan revision submitted shall include the associated manufacturer's, engineer's or operator's recommendations and/or instructions used for capture system and control device operations and maintenance.
 - ii. The owner or operator shall submit the initial plan to the Department no later than May 1, 2018 and shall include the initial volumetric flow monitoring provisions in subsection (D)(2)(a), the initial operational limits in subsection (D)(2)(b), the preventative maintenance procedures in subsection (D)(2)(c), and the inspection procedures in subsection (D)(2)(d).
 - iii. The owner or operator shall submit to the Department for approval a plan revision with changes, if any, to the initial volumetric flow monitoring provisions in subsection (D)(2)(a) and initial operational limits in subsection (D)(2)(b) not later than six months after completing a fugitive emissions study conducted in accordance with Appendix 14. The Department shall submit the approved changes to the volumetric flow monitoring provisions and operational limits pursuant to this subsection to EPA Region IX as a SIP revision not later than 12 months after completion of a fugitive emissions study.
 - iv. Other plan revisions may be submitted at any time when necessary. All plans and plan revisions shall be designed to achieve operation of the capture system and/or control device consistent with the attainment demonstration in the Hayden 2008 Lead National Ambient Air Quality Standards Nonattainment Area SIP. Except for changes to the volumetric flow monitoring provisions in subsection (D)(2)(a) and operational limits in subsection (D)(2)(b), which shall require prior approval, plans and plan revisions may be implemented upon submittal and shall remain in effect until superseded or until disapproved by the Department. Disapprovals are appealable Department actions.
3. Emissions from the anode furnace baghouse stack shall be routed to the Main Stack.
- E. Performance Test Requirements.**
1. Main stack performance tests. No later than 180 calendar days after completion of all Converter Retrofit Project improvements authorized by Significant Permit Revision No. 60647, the owner or operator shall conduct initial performance tests on the following:
 - a. the gas stream exiting the anode furnaces baghouse prior to mixing with other gas streams routed to the Main Stack.
 - b. the gas stream exiting the acid plant at a location prior to mixing with other gas streams routed to the Main Stack.
 - c. the gas stream exiting the secondary baghouse at a location prior to mixing with other gas streams routed to the Main Stack.
 - d. the gas stream collected by the tertiary hooding at a location prior to mixing with other gas streams routed to the Main Stack.

- e. the gas stream exiting the vent gas baghouse at a location prior to mixing with other gas streams routed to the Main Stack.
 2. Subsequent performance tests on the gas streams specified in subsection (E)(1) shall be conducted at least annually.
 3. Performance tests shall be conducted under such conditions as the Department specifies to the owner or operator based on representative performance of the affected sources and in accordance with 40 CFR 60, Appendix A, Reference Method 29.
 4. At least 30 calendar days prior to conducting a performance test pursuant to subsection (E)(1), the owner or operator shall submit a test plan, in accordance with R18-2-312(B) and the Arizona Testing Manual, to the Department for approval. The test plan must include the following:
 - a. Test duration;
 - b. Test location(s);
 - c. Test method(s), including those for test method performance audits conducted in accordance with subsection (E)(6); and
 - d. Source operation and other parameters that may affect the test result.
 5. The owner or operator may use alternative or equivalent performance test methods as defined in 40 CFR § 60.2 when approved by the Department and EPA Region IX, as applicable, prior to the test.
 6. The owner or operator shall include a test method performance audit during every performance test in accordance with 40 CFR § 60.8(g).
- F. Compliance Demonstration Requirements.**
1. For purposes of determining compliance with the Main Stack emission limit in subsection (C), the owner or operator shall calculate the combined lead emissions in pounds per hour from the gas streams identified in subsection (E)(1) based on the most recent performance tests conducted in accordance with subsection (E).
 2. The owner or operator shall determine compliance with the requirements in subsection (D)(2) as follows:
 - a. Maintaining and operating the emissions capture and control equipment in accordance with the capture system and control device operations and maintenance plan required in subsection (D)(2) and recording operating parameters for capture and control equipment as required in subsection (D)(2)(b); and
 - b. Conducting a fugitive emissions study in accordance with Appendix 14 starting not later than 6 months after completion of the Converter Retrofit Project authorized by Significant Permit Revision No. 60647. The fugitive emissions study shall demonstrate, as set forth in Appendix 14, that fugitive emissions from the smelter are consistent with estimates used in the attainment demonstration in the Hayden 2008 Lead National Ambient Air Quality Standards Nonattainment Area SIP.
 3. The owner or operator shall include periods of startup, shutdown, malfunction, or other upset conditions when determining compliance with the emission limit in subsection (C).
- G. Recordkeeping.** The owner or operator shall maintain the following records for at least five years and keep on-site for at least two years:
1. All records as specified in the operations and maintenance plan required under subsection (D)(2).
 2. All records of major maintenance activities and inspections conducted on emission units, capture systems, monitoring devices, and air pollution control equipment, including those set forth in the operations and maintenance plan required by subsection (D)(2).
 3. All records of performance tests, test plans, and audits required by subsection (E).
 4. All records of compliance calculations required by subsection (F).
 5. All records of fugitive emission studies and study protocols conducted in accordance with Appendix 14.
 6. All records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of concentrate drying, smelting, converting, anode refining, and casting emission units; and any malfunction of the associated air pollution control equipment that is inoperative or not operating correctly.
 7. All records of reports and notifications required by subsection (H).
- H. Reporting.** The owner or operator shall provide the following to the Department:
1. Notification of commencement of construction of any equipment necessary to comply with the operational or emission limits.
 2. Semiannual progress reports on construction of any such equipment postmarked by July 30 for the preceding January-June period and January 30 for the preceding July-December period.
 3. Notification of initial startup of any such equipment within 15 business days of such startup.
 4. Whenever the owner or operator becomes aware of any exceedance of the emission limit set forth in subsection (C), the owner or operator shall notify the Department orally or by electronic or facsimile transmission as soon as practicable, but no later than two business days after the owner or operator first knew of the exceedance.
 5. Within 30 days after the end of each calendar-year quarter, the owner or operator shall submit a quarterly report to the Department for the preceding quarter that shall include dates, times, and descriptions of deviations when the owner or operator operated smelting processes and related control equipment in a manner inconsistent with the operations and maintenance plan required by subsection (D)(2).
 6. Reports from performance testing conducted pursuant to subsection (E) shall be submitted to the Department within 60 calendar days of completion of the performance test. The reports shall be submitted in accordance with the Arizona Testing Manual and A.A.C. R18-2-312(A).

Historical Note

New Section R18-2-B1301 made by final rulemaking at 23 A.A.R. 767, effective on the earlier of July 1, 2018, or 180 calendar days after completion of all Converter Retrofit Project improvements authorized by Significant Permit Revision No. 60647 (Supp. 17-1).

R18-2-B1301.01. Limits on Lead-Bearing Fugitive Dust from the Hayden Smelter

A. Applicability.

1. This Section applies to the owner or operator of the Hayden Smelter.
2. Effective Date. Except as otherwise provided, the requirements of this Section shall become applicable on December 1, 2018.

B. Definitions. In addition to definitions contained in R18-2-101 and R18-2-B1301, the following definitions apply to this Section:

1. "Acid plant scrubber blowdown drying system" means the process in which Venturi scrubber blowdown solids are dried and packaged via a thickener, filter press, electric dryer, and supersack filling stations.
2. "Control measure" means a piece of equipment used, or actions taken, to minimize lead-bearing fugitive dust emissions that would otherwise be released to the atmosphere. Control equipment may include, but are not limited to, wind fences, chemical dust suppressants, and water sprayers. Actions may include, but are not limited to, relocating sources, curtailing operations, or ceasing operations.
3. "Hayden Lead Nonattainment Area" means the townships in Gila and Pinal Counties, as identified and codified in 40 CFR § 81.303, that are designated nonattainment for the 2008 Lead National Ambient Air Quality Standards.
4. "High wind event" means any period of time beginning when the average wind speed, as measured at a meteorological station maintained by the owner or operator that is approved by the Department, is greater than or equal to 15 miles per hour over a 15 minute period, and ending when the average wind speed, as measured at the approved meteorological station maintained by the owner or operator, falls below 15 miles per hour over a 15 minute period.
5. "Lead-bearing fugitive dust" means uncaptured and/or uncontrolled particulate matter containing lead that is entrained in the ambient air and is caused by activities, including, but not limited to, the movement of soil, vehicles, equipment, and wind.
6. "Material pile" means material, including concentrate, uncrushed reverts, crushed reverts, and bedding material, that is stored in a pile outside a building or warehouse and is capable of producing lead-bearing fugitive dust.
7. "Non-smelting process sources" means sources of lead-bearing fugitive dust that are not part of the hot metal process, which includes smelting in the INCO flash furnace, converting, and anode refining and casting. Non-smelting process sources include storage, handling, and unloading of concentrate, uncrushed reverts, crushed reverts, and bedding material; acid plant scrubber blowdown solids; and paved and unpaved roads.
8. "Ongoing visible emissions" means observed emissions to the outside air that are not brief in duration.
9. "Road" means any surface on which vehicles pass for the purpose of carrying people or materials from one place to another in the normal course of business at the Hayden Smelter.
10. "Slag" means the inorganic molten material that is formed during the smelting process and has a lower specific gravity than copper-bearing matte.
11. "Slag hauler" means any vehicle used to transport molten slag.
12. "Storage and handling" means all activities associated with the handling and storage of materials that take place at the Hayden Smelter, including, but not limited to, stockpiling, transport on conveyor belts, transport or storage in rail cars, crushing and milling, arrival and handling of offsite concentrate, bedding, and handling of reverts.
13. "Trackout/carry-out" means any materials that adhere to and agglomerate on the surfaces of motor vehicles, haul

trucks, and/or equipment (including tires) and that may then fall onto the road.

C. Operational Standards.

1. Equipment operations. At all times, the owner or operator shall operate and maintain all non-smelting process sources, including all associated air pollution control equipment, control measures, and monitoring equipment, in a manner consistent with good air pollution control practices for minimizing lead-bearing fugitive dust, and in accordance with the fugitive dust plan required by subsection (C)(2) and performance and housekeeping requirements in subsection (D). A determination of whether acceptable operating and maintenance procedures are being used shall be based on all available information to the Department and EPA Region IX, which may include, but is not limited to, monitoring results, review of operating and maintenance procedures and records, review of fugitive dust plans, and inspection of the relevant equipment.
2. Fugitive dust plan. The owner or operator shall develop, implement, and follow a fugitive dust plan that is designed to minimize lead-bearing fugitive dust from non-smelting process sources. At minimum, the fugitive dust plan shall contain the following:
 - a. Performance and housekeeping requirements in subsection (D).
 - b. Design plans and specifications for each wind fence to be installed to control lead-bearing fugitive dust from non-smelting process sources identified in subsections (D)(11) through (D)(14). The dust plan shall contain height limits for the materials being stored in each wind fence, consistent with the design plans and specifications for that particular wind fence. Wind fence design and specifications shall:
 - i. Require full encircling of the source to be controlled, with reasonable and sufficient openings for ingress and egress;
 - ii. Consider the orientation of the wind fence to the prevailing winds;
 - iii. Consider the strength of the winds in the area where the fence will be located;
 - iv. Consider the porosity of the material to be used, which shall not exceed 50 percent; and
 - v. Consider the height of the fence relative to the height of the material being stored. At minimum, wind fence height shall be greater than or equal to the material pile height.
 - c. Design plans and specifications for each new or modified water sprayer system used to control lead-bearing fugitive dust from non-smelting process sources specified in subsections (D)(11) through (D)(14). The number, type, location, watering intensity, flow rates, and other operational parameters of the water sprayers must meet moisture content objectives for sources specified in subsections (D)(11) through (D)(14). The owner or operator may include in the dust plan an exemption to the water requirements at times when the materials are sufficiently moist or it is raining and thus there is no need for additional wetting until the next scheduled watering to meet moisture content objectives. The dust plan shall include the following for each water sprayer:
 - i. Watering schedule;
 - ii. Watering intensity;
 - iii. Minimum flow rate or pressure drop;

- iv. Appropriate and/or continuous monitoring;
 - v. Schedule for calibration based on the manufacturer's recommended calibration schedule;
 - vi. Preventative maintenance schedule; and
 - vii. Other applicable operational parameters.
 - d. Necessary improvements and/or modifications to material conveyor systems, along with a schedule for implementing improvements or modifications, targeted to minimize lead-bearing fugitive dust from non-smelting process sources specified in subsections (D)(11) through (D)(14), as applicable, to the greatest extent practicable. The improvements or modifications may include, but is not limited to, hooding of transfer points, utilizing water sprayers, and employing scrapers, brushes, or cleaning systems at all points where belts loop around themselves to catch and contain material before it falls to the ground.
 - e. Design plans for the concrete pads for the non-smelting process sources specified in subsections (D)(11) and (D)(13). The concrete pads shall be designed to capture, store, and control stormwater or sprayed water to minimize emissions to the greatest extent practicable, including curbing around the outer edges of the concrete pad where feasible.
 - f. Additional controls and measures for sources specified in subsections (D)(11) through (D)(14) to be implemented during high wind events. These additional controls or measures, which must include curtailment or other alteration of activity when appropriate, must be implemented at these sources during all periods of high wind.
 - g. Sample inspection sheets, checklists, or logsheets for each of the inspections identified in subsection (D)(6), and in accordance with the following:
 - i. The inspection sheets or checklists shall include:
 - (1) Specific descriptions of the equipment being inspected and the specific functions being evaluated;
 - (2) The findings of the inspection;
 - (3) The date, time, and location of inspections; and
 - (4) An identification of who performed the inspection or logged the results.
 - ii. The logsheets for high wind events shall include:
 - (1) High wind event start time;
 - (2) High wind event end time;
 - (3) Description of area or activity inspected; and
 - (4) Description of corrective action taken if necessary.
 - h. Design plans of the new acid plant scrubber blow-down drying system specified in subsection (D)(15).
 - i. The name and location of the meteorological station, which must be approved by the Department, that is to be used by the owner or operator for determining high wind events pursuant to subsection (B)(4) and for implementing control requirements pursuant to subsection (D)(5).
3. Plan development and revisions. The owner or operator shall develop and keep current the fugitive dust plan required by subsection (C)(2). Any plan or plan revision shall be consistent with this Section and shall be submitted to the Department for review. The initial plan shall be submitted to the Department for review no later than May 1, 2017. Plans and plan revisions shall be consistent with good air pollution control practice for fugitive dust. Except for the meteorological station to be used for high wind events pursuant to subsection (D)(5), which shall require prior approval, plans and plan revisions may be implemented upon submittal and shall remain in effect until superseded or until disapproved by the Department. Disapprovals are appealable Department actions.
- D. Performance and Housekeeping Requirements.** The owner or operator shall comply with these requirements at all times regardless of a fugitive dust plan.
1. Water sprayers. The owner or operator shall implement a recordkeeping system to capture sprayer operations, including identification of the particular operation, lead-bearing fugitive dust source, timing and intensity of watering, and data regarding the quantity of water used at each water sprayer.
 2. Wind fences. The owner or operator shall ensure that wind fences used to control lead-bearing fugitive dust from the non-smelting process sources specified in subsections (D)(11) through (D)(14) meet the following requirements:
 - a. Wind fence height shall be greater than or equal to the material pile height. The allowed material pile height shall be posted in a readily visible location at each wind fence.
 - b. Wind fence porosity shall not exceed 50 percent.
 3. Material conveyor systems. For sources specified in subsections (D)(11) through (D)(14), as applicable, the owner or operator shall:
 - a. Minimize conveyor drop heights to the greatest extent practicable.
 - b. Clean any spills from conveyors within 30 minutes of discovery. The material collected must be handled in such a way so as to minimize lead-bearing fugitive dust to the maximum extent practicable.
 4. Vehicle transport of materials. The owner or operator shall maintain vehicle cargo compartments used to transport materials capable of producing lead-bearing fugitive dust so that the cargo compartment is free of holes or other openings and is covered by a tarp.
 5. High wind event requirements.
 - a. During high wind events, the owner or operator shall evaluate the non-smelting process sources specified in subsections (D)(11) through (D)(14) for ongoing visible emissions using the appropriate logsheet for each source.
 - b. If ongoing visible emissions are observed, the owner or operator shall promptly wet the source of emissions with the objective of mitigating further emissions.
 - c. If wetting does not appear to mitigate the ongoing visible emissions to 20 percent opacity or less, the owner or operator shall postpone associated handling of the source until the high wind event has ceased.
 6. Physical inspections. The owner or operator shall conduct physical inspections as follows:
 - a. Daily inspections of all water sprayers to make sure they are functioning and are in accordance with the dust plan;
 - b. Daily visual inspections of all material piles to make sure they are maintained within areas protected by a wind fence, that they are not higher than allowed for

- the wind fence, and to verify that moisture content requirements are met;
- c. Daily inspections of all material handling areas to identify and clean up track out or spills of materials;
 - d. Daily inspections of conveyor systems to identify and clean up material spills;
 - e. Daily inspections of rumble grates sump levels;
 - f. Daily spot inspections of vehicles carrying lead-bearing fugitive dust-producing materials when vehicles are in use to ensure that material is not overloaded, is properly covered, and cargo compartments are intact;
 - g. Weekly inspections of wind fences for material integrity and structural stability;
 - h. Daily inspections of all paved roads to identify and clean up track out or spills of materials;
 - i. Daily inspections of unpaved roads in subsection (D)(10)(a) to identify areas where chemical dust suppressant coverage has broken down; and
 - j. Bi-weekly inspections of the acid plant scrubber blowdown drying system enclosure.
7. Opacity limit and Method 9 readings.
 - a. Opacity from lead-bearing fugitive dust emissions shall not exceed 20 percent from any part of the facility at any time. Opacity shall be determined by using 40 CFR 60, Appendix A, Reference Method 9, except for unpaved roads, in which opacity shall be determined pursuant to subsection (D)(10)(c).
 - b. In the event that an employee observes ongoing visible emissions at a non-smelting process source covered by this Section, that employee shall promptly contact a Reference Method 9-certified observer, who shall promptly evaluate the emissions and conduct a Reference Method 9 reading, if possible.
 - c. A Reference Method 9-certified observer shall conduct a weekly visible emissions survey of all non-smelting process sources covered by this Section and perform a Reference Method 9 reading for any plumes that on an instantaneous basis appear to exceed 15 percent opacity.
 8. Corrective actions.
 - a. At any time that visible emissions from the non-smelting process sources covered by this Section appear to exceed 15 percent opacity, the owner or operator shall take prompt corrective action to identify the source of the emissions and abate such emissions, with the corrective action starting within 30 minutes after discovery. For any non-smelting process source that produces visible emissions that appear to exceed 15 percent opacity, the owner or operator shall perform an analysis of the root cause, and implement a strategy designed to prevent, to the extent feasible, the ongoing recurrence of the source of visible emissions. Within 14 days of completion of its analysis, if appropriate, the owner or operator shall modify the fugitive dust plan in subsection (C)(2) for any changes identified from the analysis differing from the current provisions of the fugitive dust plan.
 - b. At any time that the owner or operator becomes aware that provisions of the fugitive dust plan and/or performance and housekeeping provisions required by this Section are not being met, the owner or operator shall take prompt action to return to compliance, which may include modifications to monitoring, recordkeeping, and reporting requirements in the fugitive dust plan. This includes, but is not limited to, the following actions:
 - i. Return water sprayers to full operational status;
 - ii. Repair damaged conveyor hoodings or other enclosures;
 - iii. Apply additional water to ensure that sources are meeting moisture content requirements;
 - iv. Clean any trackout or spillage of dust-producing material, including dropoff of dust producing material from conveyors, using a street sweeper, vacuum, or wet broom with sufficient water and at the speed recommended by the manufacturer;
 - v. Reapplication of chemical dust suppressants in areas where the coating has broken down on unpaved roads; and
 - vi. Revisions to the fugitive dust plan to undertake improved monitoring, recordkeeping, and reporting requirements necessary to ensure that the controls contained in the fugitive dust plan are being implemented as contemplated by the fugitive dust plan.
 9. Paved Roads. These requirements apply to all roads at the facility currently paved and roads to be paved in the future. The owner or operator shall:
 - a. Clean roads at least once daily with a sweeper, vacuum, or wet broom in accordance with applicable manufacturer recommendations.
 - b. Maintain the integrity of the road surface.
 - c. Clean up trackout and carry-out of material on the following schedule:
 - i. As expeditiously as practicable, when trackout and carry-out extends a cumulative distance of 50 linear feet or more; and
 - ii. At the end of the workday, for all other trackout and carry-out.
 - d. Comply with a speed limit not to exceed 15 miles per hour for all vehicular traffic. At minimum, speed limit signs shall be posted at all entrances and truck loading and unloading areas and/or at conspicuous areas along the roadway.
 10. Unpaved Roads. These requirements apply to the unpaved roads identified in subsections (D)(10)(a)(i) through (D)(10)(a)(iii) below, including any access points where the unpaved roads adjoin paved roads and any areas of vehicular handling of material. The owner or operator shall:
 - a. Implement a chemical dust suppressant application intensity and schedule, which at minimum shall be:
 - i. For the slag hauler road and all other unpaved roads used or to be used by the slag hauler, chemical dust suppressant shall be applied at least once per week during the summer, and once per every two weeks during the winter.
 - ii. For the main road to the secondary crusher, chemical dust suppressant shall be applied at least once every six weeks, year-round.
 - iii. For unpaved roads near reverts and silica flux crushing operations, chemical dust suppressant shall be applied at least once per two weeks during the summer, and once per month in the winter.
 - b. Increase the frequency of chemical dust suppressant application if necessary to reduce fugitive dust emissions from unpaved roads.

- c. Not allow visible emissions to exceed 20 percent opacity and shall not allow silt loading equal to or greater than 0.33 oz/ft². However, if silt loading is equal to or greater than 0.33 oz/ft², then the owner or operator shall not allow the average percent silt content to exceed 6 percent. Compliance with these requirements shall be determined by the test methods described in Appendix 15.
 - d. Maintain sufficient watering trucks and personnel to operate such trucks to be employed as an interim measure whenever visible emissions or a breakdown in dust suppressant covering are observed at any point along the treated unpaved road system.
 - e. Immediately, but no later than 30 minutes after initial observation of any visible emissions, apply water or chemical dust suppressant to the portion of the unpaved road where the visible emissions were observed.
 - f. Reapply chemical dust suppressant within 24 hours of discovery of any area where the surface chemical dust suppressant coverage has broken down.
 - g. Collect and prevent from becoming airborne any runoff or material from rinsing or sweeping as soon as practicable.
 - h. Comply with a speed limit not to exceed 15 miles per hour for all vehicular traffic. At minimum, speed limit signs shall be posted at all entrances and truck loading and unloading areas and/or at conspicuous areas along the roadway.
11. Concentrate Storage, Handling, and Unloading. The owner or operator shall:
- a. Consolidate and manage all concentrate storage piles in one or more concrete storage pads.
 - b. Store concentrate in an area with a wind fence in accordance with requirements set forth in the fugitive dust plan and pursuant to subsection (D)(2).
 - c. Maintain water sprayers in accordance with requirements set forth in the fugitive dust plan and to ensure the surfaces of concentrate piles are wetted to maintain a nominal 10 percent surface moisture content as determined from representative samples using ASTM Method D2216-10 or other equivalent methods approved by the Department and EPA Region IX.
 - d. Minimize the footprint of the concentrate storage piles by pushing into the stockpile with a front end loader and sweeping open areas of the pads with a self-powered vacuum sweeper at least daily during use.
12. Uncrushed Reverts Handling and Storage. The owner or operator shall:
- a. Manage uncrushed revert material only in areas protected by a wind fence in accordance with requirements set forth in the fugitive dust plan and pursuant to subsection (D)(2).
 - b. Maintain water sprayers in accordance with requirements set forth in the fugitive dust plan and to ensure the surface of uncrushed revert material is wetted with the objective to minimize lead-bearing fugitive dust emissions to the greatest extent practicable.
13. Reverts Crushing Operations and Crushed Reverts Storage. The owner or operator shall:
- a. Crush revert and store crushed revert only on one or more concrete pads.
 - b. Crush revert and store crushed revert only within an area protected by a wind fence in accordance with requirements set forth in the fugitive dust plan and pursuant to subsection (D)(2).
14. Bedding Operations, Including Handling, Storage, and Unloading. The owner or operator shall:
- a. Perform all bedding activities, including loading and unloading of materials to be blended, only within an area protected by a wind fence in accordance with requirements set forth in the fugitive dust plan and pursuant to subsection (D)(2). These activities include the storage and handling areas for potentially lead-bearing fugitive dust-producing material within the bedding plant area.
 - b. Maintain water sprayers in accordance with requirements set forth in the fugitive dust plan and to ensure the surfaces of material in the bedding area is wetted to maintain a nominal 10 percent surface moisture content as determined from representative samples using ASTM Method D2216-10 or other equivalent methods approved by the Department and EPA Region IX.
 - c. Maintain rumble grates at all of the bedding plant's entrances and exits to shake off material on the loader tires as they enter and exit the area. Material that is tracked out of the bedding area must be cleaned up at the end of the workday.
 - d. Operate its bedding activities in a manner designed to avoid any trackout outside an area protected by a wind fence. Areas of material spillage or trackout, whether inside or outside of an area protected by a wind fence, shall be rinsed or cleaned daily.
15. Acid Plant Scrubber Blowdown Drying System.
- a. The owner or operator shall dry acid plant scrubber blowdown solids only in an enclosed system that uses a venturi scrubber, thickener, filter press, and electric dryer that is maintained under negative pressure at all times that materials are being dried.
 - b. The owner or operator shall maintain the negative pressure of the electric dryer using a 2,500 ACFM dryer ventilation fan that must run at all times the electric dryer is operational. Monitoring of the negative pressure shall be demonstrated through the run and stop states of the ventilation fan and electric dryer.
 - c. The acid plant scrubber blowdown drying system shall include the following elements:
 - i. Venturi scrubber slurry that reports to a new thickener.
 - ii. Underflow from the thickener that goes to a filter press for further liquid removal, with the resulting filter cake sent to two electric dryers operating in parallel to provide final drying of the dust cake.
 - iii. Exhaust from the dryers sent to the packed gas cooling tower inlet duct.

Department of Environmental Quality – Air Pollution Control

- iv. Dried cake discharged directly into bags.
- d. The owner or operator shall clean all areas previously used for scrubber blowdown drying and no longer use previous areas for scrubber blowdown drying.

E. Contingency Requirements.

1. If the owner or operator does not meet the compliance schedule below in subsection (E)(3), or if the Hayden Lead Nonattainment Area does not attain the 2008 Lead National Ambient Air Quality Standards by the attainment date established in the Act, whichever occurs first, then the owner or operator shall increase the paved road cleaning frequency specified in subsection (D)(9) to twice per day.
2. The owner or operator shall implement the contingency measure in subsection (E)(1) within 60 days of notification by EPA Region IX of either a failure to meet the compliance schedule in subsection (E)(3) or a failure to attain by the attainment date established in the Act, whichever occurs first.

3. The compliance schedule is as follows. The Fugitive Dust Plan referred to in the compliance schedule shall mean the Fugitive Dust Plan submitted to the Administrator by the owner or operator to comply with requirements set forth in Consent Decree No. CV-15-02206-PHX-DLR, which became effective on December 30, 2015 in the United States District Court for the District of Arizona, as that plan may be later revised pursuant to subsection (C)(3):

Control Measure	Date of Implementation
Implementation of chemical dust suppression for unpaved roads.	Within 30 days of Administrator approval of application intensity and schedules in Fugitive Dust Plan.
Implementation of wind fences for materials piles (uncrushed reverts, reverts crushing and crushed reverts, bedding materials, and concentrate).	Within 120 days of Administrator approval of the Fugitive Dust Plan or the date of completion in the approved Fugitive Dust Plan, whichever is later.
Implementation of water sprays for materials piles (uncrushed reverts, reverts crushing and crushed reverts, bedding materials, and concentrate).	Within 120 days of Administrator approval of the Fugitive Dust Plan or the date of completion in the approved Fugitive Dust Plan, whichever is later.
Implementation of new acid plant scrubber blowdown drying system.	November 30, 2016
Implementation of new primary, secondary, and tertiary hooding systems for converter aisle for purposes of complying with requirements in R18-2-B1301.	July 1, 2018
Implementation of new ventilation system for matte tapping and slag skimming for flash furnace for purposes of complying with requirements in R18-2-B1301.	July 1, 2018

F. Ambient Air and Meteorological Monitoring Requirements.

1. The owner or operator shall conduct ambient air monitoring and sampling for lead as follows:
 - a. At minimum, the owner or operator shall continue to maintain and operate the ambient lead monitors located at ST-14 (the smelter parking lot), ST-23 (Hillcrest area), ST-26 (post office), and ST-18 (next to the concentrate handling area).
 - b. Samples must be collected continuously at all monitor sites specified in subsection (F)(1)(a). For the purposes of this requirement, “continuously” means that 24-hour filters are placed and collected at minimum, every six calendar days at all sites consistent with 40 CFR § 58.12.
 - c. The owner or operator shall follow the Hayden Smelter’s Quality Assurance Project Plan (QAPP) applicable to these monitors.
 - d. The monitors must be operated and maintained in accordance with 40 CFR 58, Appendix A.
 - e. The owner or operator shall submit each filter removed from each monitor to a certified laboratory for analysis no later than 18 calendar days after the filter’s removal. The owner or operator shall ensure

that the laboratory performs its analysis and submits the results to the owner or operator no later than 21 calendar days from the lab’s receipt of the filter.

- f. The owner or operator shall calculate, update, and maintain as a record the following data within 14 calendar days of receipt of any results pertaining to the monitor filters received from a certified lab:
 - i. The total pollutants on the filters collected and analyzed; and
 - ii. Calculations of 30-day rolling average ambient air levels of lead for the ST-23, ST-26, and ST-18 monitors, and 60-day rolling average ambient air levels of lead for the ST-14 monitor, expressed as $\mu\text{g}/\text{m}^3$.
- g. The owner or operator shall retain lead samples collected pursuant to this Section for at least three years. The samples shall be stored in individually sealed containers and labeled with the applicable monitor and date. Upon request, the samples shall be provided to the Department within five business days.
2. The owner or operator shall conduct meteorological monitoring as follows:

Department of Environmental Quality – Air Pollution Control

- a. Continuously monitor and record wind speed and direction data using equipment and a meteorological station approved by the Department.
 - b. The owner or operator shall calculate and record average wind speed in miles per hour over 15 minutes, rolled each minute.
 - c. Conduct wind speed and direction measurements using methods in accordance with EPA's Quality Assurance Handbook for Air Pollution Measurement Systems, Volume IV, Meteorological Measurements, Version 2.0.
3. The ambient air and meteorological monitoring stations required by this Section may be discontinued at the end of three full calendar years after the Hayden Lead Nonattainment Area is redesignated attainment for the 2008 Lead National Ambient Air Quality Standards.
- G. Compliance Demonstration Requirements.** The owner or operator shall demonstrate compliance with this Section by complying with all requirements in the fugitive dust plan pursuant to subsection (C)(2) and implementing all housekeeping and performance requirements pursuant to subsection (D).
- H. Recordkeeping.**
1. The owner or operator shall maintain the following records for at least five years and keep on-site for at least two years:
 - a. Current and past fugitive dust plans required by subsection (C)(2).
 - b. Physical inspection sheets, checklists, and logsheets for inspections conducted in accordance with subsection (D)(6).
 - c. All records of opacity and stabilization tests, if any, conducted in accordance with subsection (D)(10)(c).
 - d. All records of surface moisture content tests, if any, conducted in accordance with subsection (D)(11), subsection (D)(13), and subsection (D)(14).
 - e. All records of major maintenance activities and inspections conducted on monitors required by subsection (F).
 - f. All records of quality assurance and quality control activities for the monitors required by subsection (F).
 - g. All air quality monitoring samples, rolling averages of ambient lead concentrations and necessary calculations, and data required by subsection (F).
 - h. All records of wind data from the meteorological station required by subsection (F).
 - i. All records of any periods during which a monitoring device required by subsection (F) is inoperative or not operating correctly.
 - j. All records of reports and notifications required by subsection (I).
 2. All of the following records maintained for the purposes of the fugitive dust plan required by subsection (C)(2) must be maintained in a recordkeeping log or recordkeeping system. As part of the records, the owner or operator shall include the dates and times for each of the following observations or activities, the name of the employee documenting each activity or observation, and the nature and location of each observation activity:
 - a. Each instance of observed visible emissions of 15 percent opacity or greater, along with a description of any corrective action undertaken and its success.
 - b. Water sprayer operations, including timing and intensity of watering to be captured in the water sprayer recordkeeping system.
 - c. Timing, location, type, and amount of chemical suppressant and water applied to unpaved roads, and a description of the nature and timing of any additional corrective action taken, as necessary, to minimize emissions to the greatest extent practicable.
 - d. Timing and location of all sweeping and cleaning of trackout or spillage material.
 - e. Timing and location of all washdown of concrete areas.
 - f. Timing and location of sump cleanouts.
 - g. Results of all visible emissions surveys and Reference Method 9 readings.
 - h. Appropriate records for operating conditions, including electric dryer ventilation fan start and stop times for the newly designed acid plant scrubber blowdown drying system.
 - i. Calibration records for all measurement devices, including maintenance of manufacturer's manuals or other documentation for suggested calibration schedules and accuracy levels for each measurement device.
 - j. Dates, times, and descriptions of deviations when the owner or operator's operations was carried out in a manner inconsistent with the fugitive dust plan required by subsection (C)(2).
- I. Reporting.** Within 30 days after the end of each calendar-year quarter, the owner or operator shall submit a report to the Department covering the prior quarter that includes the following:
1. All instances where observed fugitive emissions coming from sources covered in this Section were 15 percent or greater.
 2. The date of all high wind events, with an identification of the location of the reading, wind speed, and duration of the event, and a description of actions taken as a result of the event on a source-by-source basis.
 3. All instances where corrective action was required with identification of the emission source involved, what triggered the corrective action, what action the owner or operator undertook to abate or mitigate the problem, and whether the corrective action achieved the intended results.
 4. A summary of all times when the electronic recordkeeping system was not recording data, and a summary and indication of the period when recorded data was outside of established operating parameters.
 5. A summary of progress of all new construction, installation, upgrades, or modifications to equipment or structures at the facility required by the fugitive dust plan and subsection (D), including dates of commencement and completion of construction, dates of operations of new or modified equipment or structures, and dates old or outdated equipment or structures were permanently retired.
 6. Raw monitoring data and calculated ambient lead concentrations from the ambient air monitoring stations required by subsection (F).

Historical Note

New Section R18-2-B1301.01 made by final rulemaking at 23 A.A.R. 767, effective December 1, 2018 (Supp. 17-1).

R18-2-B1302. Limits on SO₂ Emissions from the Hayden Smelter**A. Applicability.**

1. This Section applies to the owner or operator of the Hayden Smelter. It establishes limits on sulfur dioxide

emissions from the Hayden Smelter and monitoring, recordkeeping and reporting requirements for those limits.

2. Effective date. Except as otherwise provided, the requirements of this Section shall become applicable on the earlier of July 1, 2018 or 180 days after completion of all project improvements authorized by Significant Permit Revision No. 60647.

B. Definitions. In addition to definitions contained in R18-2-101 and R18-2-B1301, the following definitions apply to this rule.

1. "Continuous emissions monitoring system" or "CEMS" means the total equipment, required under the emission monitoring provisions in this Chapter, used to sample, condition (if applicable), analyze, and to provide, on a continuous basis, a permanent record of emissions.
2. "Operating day" means any calendar day in which any of the following occurs:
 - a. Concentrate is smelted in the smelting furnace;
 - b. Copper or sulfur bearing materials are processed in the converters;
 - c. Blister or scrap copper is processed in the anode furnaces;
 - d. Molten metal, including slag, matte or blister copper, is transferred between vessels; or
 - e. Molten metal is cast into anodes or other intermediate or final products.
3. "Out of control period" means the time that begins with the completion of the fifth, consecutive, daily calibration drift check with a calibration drift in excess of two times the allowable limit, or the time corresponding to the completion of the daily calibration drift check preceding the daily calibration drift check that results in a calibration drift in excess of four times the allowable limit, and the time that ends with the completion of the calibration check following corrective action that results in the calibration drifts at both the zero (or low-level) and high-level measurement points being within the corresponding allowable calibration drift limit.

C. Sulfur Dioxide Emissions Limitations.

1. Emissions from the Main Stack shall not exceed 1069.1 pounds per hour on a 14-operating day average unless 1,518 pounds or less is emitted during each hour of the 14-operating day period.
2. The owner and operator shall not cause to be discharged into the atmosphere from any affected unit subject to 40 CFR 60 subpart P any gases which contain sulfur dioxide in excess of the limit set forth in 40 CFR § 60.163(a) (as in effect on July 1, 2016 and no later editions).

D. Operational Standards.

1. Process equipment and control device operations. At all times, including periods of startup, shutdown, and malfunction, the owner or operator shall, to the extent practicable, maintain and operate smelter processes and associated emission control and/or control equipment in a manner consistent with good air pollution control practices for minimizing SO₂ emissions to the levels required by subsection (C). Determination of whether acceptable operating and maintenance procedures are being used will be based on all information available to the Director and EPA Region IX, which may include, but is not limited to, monitoring results, review of operating and maintenance procedures and records, and inspection of the relevant equipment.
2. Capture system and control device operations and maintenance plan. The owner or operator shall develop and implement an operations and maintenance plan for each

capture system and/or control device used to ventilate or control process gas or emissions from the flash furnace including matte tapping, slag skimming, and slag return operations; converter primary hoods, converter secondary hoods, tertiary ventilation system, and anode refining operations. The operations and maintenance plan must address the following requirements as applicable to each capture system and/or control device.

- a. Monitoring devices. The plan shall provide for installation, operation, calibration, and maintenance of appropriate monitoring devices to measure and record operating limit values or settings at all times the required capture and control system is operating, except during periods of monitor calibration, repair and malfunction. The initial plan shall provide for volumetric flow monitoring on the vent gas baghouse (inlet or outlet), each converter primary hood, each converter secondary hood, the tertiary ventilation system and the anode furnace baghouse (inlet or outlet). All monitoring devices shall be accurate within +/-10 percent and calibrated according to manufacturer's instructions. If direct measurement of the exhaust flow is infeasible due to physical limitations or exhaust characteristics, the owner or operator may propose a reliable equivalent method for approval. Initial monitoring may be adjusted as provided in subsection (D)(2)(e). Dampers that are manually set and remain in the same position while the capture system is operating are exempt from these monitoring requirements. Capture system damper position setting(s) shall be specified in the plan.
- b. Operational limits. The owner or operator shall establish operating limits in the operations and maintenance plan for the capture systems and/or control devices that are representative and reliable indicators of the performance of the capture system and control device operations. The initial operating limits may be adjusted as provided in subsection (D)(2)(e). Initial operating limits shall include the following:
 - i. Identification of those modes of operation when the double dampers between the flash furnace vessel and the vent gas system will be closed and the interstitial space evacuated to the acid plant.
 - ii. A minimum air flow for the furnace ventilation system and associated damper positions for each matte tapping hood or slag skimming hood when operating to ensure that the operation(s) are within the confines or influence of the capture system.
 - iii. A minimum air flow for the secondary hood baghouse and associated damper positions for each slag return hood to ensure that the operation is within the confines or influence of the capture system's ventilation draft during times when the associated process is operating.
 - iv. A minimum air infiltration ratio for the converter primary hoods of 1:1 averaged over 24 converter Blowing hours, rolled hourly measured as volumetric flow in primary hood less the volumetric flow of tuyere Blowing compared to the volumetric flow of tuyere Blowing.
 - v. A minimum secondary hood exhaust rate of 35,000 SCFM during converter Blowing, aver-

- aged over 24 converter Blowing hours, rolled hourly.
- vi. A minimum secondary hood exhaust rate of 133,000 SCFM during all non-Blowing operating hours, averaged over 24 non-Blowing hours, rolled hourly.
- vii. A minimum negative pressure drop across the secondary hood when the doors are closed equivalent to 0.007 inches of water.
- viii. A minimum exhaust rate on the tertiary hooding of 400,000 ACFM during all times material is processed in the converter aisle, averaged over 24 hours and rolled hourly.
- ix. Fan amperes or minimum air flow for the anode furnace baghouse and associated damper positions for each anode furnace hood to ensure that the anode furnace off-gas port is within the confines or influence of the capture system's ventilation draft during times when the associated furnace is operating.
- x. The anode furnace charge mouth shall be kept covered when the tuyeres are submerged in the metal bath except when copper is being charged to or transferred from the furnace.
- xi. The temperatures of the acid plant catalyst bed, which shall at minimum, meet the manufacturer's recommendations.
- xii. The acid plant catalyst replenishment criteria, which shall at minimum, meet the manufacturer's recommendations.
- c. Preventative maintenance. The owner or operator must perform preventative maintenance on each capture system and control device according to written procedures specified in the operation and maintenance plan. The procedures must include a preventative maintenance schedule that is consistent with the manufacturer's or engineer's instructions, or operator's experience working with equipment, and frequency for routine and long-term maintenance. This provision does not prohibit additional maintenance beyond that required by the plan.
- d. Inspections. The owner or operator must perform inspections in accordance with written procedures in the operations and maintenance plan for each capture system and control device that are consistent with the manufacturer's, engineer's or operator's instructions for each system and device.
- e. Plan development and revisions.
 - i. The owner or operator shall develop and keep current the plan required by this Section. Any plan or plan revision shall be consistent with this Section, shall be designed to ensure that the capture and control system performance conforms to the attainment demonstration in the Hayden 2010 Sulfur Dioxide National Ambient Air Quality Standards Nonattainment Area State Implementation Plan (SIP), and shall be submitted to the Department for review. Any plan or plan revision submitted shall include the associated manufacturer's recommendations and/or instructions used for capture system and control device operations and maintenance.
 - ii. The owner or operator shall submit the initial plan to the Department no later than May 1, 2018 and shall include the initial volumetric flow monitoring provisions in subsection (D)(2)(a), the initial operational limits in subsection (D)(2)(b), the preventative maintenance procedures in subsection (D)(2)(c), and the inspection procedures in subsection (D)(2)(d).
- iii. The owner or operator shall submit to the Department for approval a plan revision with changes, if any, to the initial volumetric flow monitoring provisions in subsection (D)(2)(a) and initial operational limits in subsection (D)(2)(b) not later than six months after completing a fugitive emissions study conducted in accordance with Appendix 14. The Department shall submit the approved changes to the volumetric flow monitoring provisions and operational limits pursuant to this subsection to EPA Region IX as a SIP revision not later than 12 months after completion of a fugitive emissions study.
- iv. Other plan revisions may be submitted at any time when necessary. All plans and plan revisions shall be designed to achieve operation of the capture system and/or control device consistent with the attainment demonstration in the Hayden 2010 Sulfur Dioxide National Ambient Air Quality Standards Nonattainment Area SIP. Except for changes to the volumetric flow monitoring provisions in subsection (D)(2)(a) and operational limits in subsection (D)(2)(b), which shall require prior approval, plans and plan revisions may be implemented upon submittal and shall remain in effect until superseded or until disapproved by the Department. Disapprovals are appealable Department actions.
- 3. Emissions from the anode furnace baghouse stack shall be routed to the Main Stack.
- E. Monitoring.
 - 1. To determine compliance with subsection (C)(1) the owner or operator of the Hayden Smelter shall install, calibrate, maintain, and operate a CEMS for continuously monitoring and recording SO₂ concentrations and stack gas volumetric flow rates at the following locations.
 - a. The exit of the acid plant;
 - b. The exit of the secondary hood particulate control device after the High Surface Area (HSA) lime injection system;
 - c. The exit of the flash furnace particulate control device after the HSA lime injection system;
 - d. The tertiary ventilation system prior to mixing with any other exhaust streams; and
 - e. The anode furnace baghouse stack prior to mixing with any other exhaust streams.
 - 2. Except during periods of systems breakdown, repairs, maintenance, out-of-control periods, calibration checks, and zero and span adjustments, the owner or operator shall continuously monitor SO₂ concentrations and stack gas volumetric flow rates at each location in subsection (E)(1).
 - 3. For purposes of this section, continuous monitoring means the taking and recording of at least one measurement of SO₂ concentration and stack gas flow rate reading from the effluent of each affected stack, outlet, or other approved measurement location in each 15-minute period when the associated process units are operating. Fifteen-minute periods start at the beginning of each

clock hour, and run consecutively. All CEMS required by subsection (E)(1) shall complete at least one cycle of operation (sampling, analyzing, and data recording) for each successive 15-minute period.

4. If the owner or operator can demonstrate to the Director that measurement of stack gas volumetric flow rate in the outlet of any particular piece of SO₂ control equipment would yield inaccurate results or would be technologically infeasible, then the Director may allow measurement of the flow rate at an alternative sampling point.
5. The owner or operator shall demonstrate that the CEMS required by subsection (E)(1) meet all of the following requirements:
 - a. The SO₂ CEMS installed and operated under this Section meets the requirements of 40 CFR 60, Appendix B, Performance Specification 2 and Performance Specification 6. The CEMS on the anode furnace baghouse stack and tertiary ventilation system shall complete an initial Relative Accuracy Test Audit (RATA) in accordance with Performance Specification 2. The RATA runs shall be tied to when the anode furnace is in use and, for the tertiary system, when the converters are in operation and/or material is being transferred in the converter aisle. Asarco may petition the Department and EPA Region IX on the criteria for subsequent RATAs for the anode furnace baghouse stack or tertiary ventilation system CEMS. The petition shall include submittal of CEMS data during the year.
 - b. The SO₂ CEMS installed and operated under this Section meets the quality assurance requirements of 40 CFR 60, Appendix F.
 - c. The owner or operator shall notify the Director in writing at least 30 days in advance of the start of the relative accuracy test audit (RATA) performed on the CEMS.
 - d. The Director shall approve the location of all sampling points for monitoring SO₂ concentration and stack gas volumetric flow rates and the appropriate span values for the monitoring systems. This approval shall be in writing before installation and operation of the measurement instruments.
 - e. The measurement system installed and used under this subsection is subject to the manufacturer's recommended zero adjustment and calibration procedures at least once per operating day unless the manufacturer specifies or recommends calibration at shorter intervals, in which case the owner or operator shall follow those specifications or recommendations. The owner or operator shall make available a record of these procedures that clearly shows instrument readings before and after zero adjustment and calibration.
 - f. The owner or operator shall maintain on hand and ready for immediate installation sufficient spare parts or duplicate systems for the CEMS required by this Section to allow for the replacement within six hours of any monitoring equipment part that fails or malfunctions during operation.
6. The owner or operator of the Hayden Smelter may petition the Department to substitute annual stack testing for the tertiary ventilation or the anode furnace baghouse stack CEMS if the owner or operator demonstrates, for a period of two years, that either CEMS contribute(s) less than five percent individually of the total sulfur dioxide emissions. The Department must determine the demon-

stration adequate to approve the petition. Annual stack testing shall use EPA Methods 1, 4, and 6C in 40 CFR 60 Appendix A or an alternate method approved by the Department and EPA Region IX. Annual stack testing shall commence no later than the one year after the date the continuous emission monitoring system was removed. The owner or operator shall submit a test protocol to the Department at least 30 days in advance of testing. The protocol shall provide for three or more 24-hour runs unless the owner or operator justifies a different period and the Department approves such different period. Reports of testing shall be submitted to the Department no later than 60 days after testing or 30 days after receipt, whichever is later. The report shall provide an emissions rate, in the form of a pound per hour or pound per unit of production factor, that shall be used in the compliance demonstration in subsection (F)(1). Except as provided herein, the owner or operator shall otherwise comply with section R18-2-312 in conducting such testing.

F. Compliance Demonstration Requirements.

1. For purposes of determining compliance with the emission limit in subsection (C)(1) the owner or operator shall calculate emissions for each operating day as follows:
 - a. Sum the hourly pounds of SO₂ vented to each uncontrolled shutdown ventilation flue and through each monitoring point listed in subsection (E)(1) for the current operating day and the preceding 13-operating days to calculate the total pounds of SO₂ emissions over the 14-operating day averaging period, as applicable.
 - b. Divide the total amount of SO₂ emissions calculated from subsection (F)(1)(a) by 336 to calculate the 14-operating day average SO₂ emissions.
 - c. If the calculation in subsection (F)(1)(b) exceeds 1069.1 pounds per hour, then the owner or operator shall sum the hourly pounds of SO₂ vented to each uncontrolled shutdown ventilation flue and through each monitoring point listed in subsection (E)(1) for each hour of the current operating day and each hour of the preceding 13-operating days to ascertain if any hour exceeded 1,518 pounds per hour.
2. When no valid hour or hours of data have been recorded by a continuous monitoring system required by subsections (E)(1) and (E)(2) and the associated process unit is operating, the owner or operator shall calculate substitute data for each such period according to the following procedures:
 - a. For a missing data period less than or equal to 24 hours, substitute the average of the hourly SO₂ concentrations recorded by the system for the hour before and the hour after the missing data period.
 - b. For a missing data period greater than 24 hours, substitute the greater of:
 - i. The 90th percentile hourly SO₂ concentrations recorded by the system during the previous 720 quality-assured monitor operating hours.
 - ii. The average of the hourly SO₂ concentrations recorded by the system for the hour before and the four hours after the missing data period.
 - c. Notwithstanding subsections (F)(3)(a) and (F)(3)(b), the owner or operator may present any credible evidence as to the quantity or concentration of emissions during any period of missing data.
3. The owner or operator shall determine compliance with the requirements in subsection (D)(2) as follows:

Department of Environmental Quality – Air Pollution Control

- a. Maintaining and operating the emissions capture and control equipment in accordance with the capture system and control device operations and maintenance plan required in subsection (D)(2) and recording operating parameters for capture and control equipment as required in subsection (D)(2)(b); and
 - b. Conducting a fugitive study in accordance with Appendix 14 starting not later than 6 months after completion of the Converter Retrofit Project authorized by Significant Permit Revision No. 60647. The fugitive study shall demonstrate, as set forth in Appendix 14, that fugitive emissions from the smelter are consistent with estimates used in the attainment demonstration in the Hayden 2010 Sulfur Dioxide National Ambient Air Quality Standards Nonattainment Area SIP.
 - 4. The owner or operator shall include periods of startup, shutdown, malfunction, or other upset conditions when determining compliance with the emission limits in subsection (C).
 - 5. The owner and operator shall demonstrate compliance with the limit in subsection (C)(2) in accordance with 40 CFR §§ 60.165 and 60.166 (as in effect on July 1, 2016 and not later editions).
- G. Recordkeeping.**
- 1. The owner or operator shall maintain a record of each operation and maintenance plan required under subsection (D)(2).
 - 2. The owner or operator shall maintain the following records for at least five years:
 - a. All measurements from the continuous monitoring system required by subsection (E)(1), including the date, place, and time of sampling or measurement; parameters sampled or measured; and results. All measurements will be calculated daily.
 - b. All records of quality assurance and quality control activities for emissions measuring systems required by subsection (E)(1).
 - c. All records of calibration checks, adjustments, maintenance, and repairs conducted on the continuous monitoring systems required by subsection (E); including records of all compliance calculations required by subsection (F).
 - d. All records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of concentrate drying, smelting, converting, anode refining and casting emission units; any malfunction of the associated air pollution control equipment; or any periods during which a continuous monitoring system or monitoring device required by subsection (E)(1) is inoperative or not operating correctly.
 - e. All records of planned and unplanned shutdown ventilation flue utilization events and calculations used to determine emissions from shutdown ventilation flue utilization events if the owner or operator chooses to use the alternative compliance determination method.
 - f. All records of major maintenance activities and inspections conducted on emission units, capture system, air pollution control equipment, and CEMS, including those set forth in the operations and maintenance plan required by subsection (D)(2).
 - g. All records of operating days and production records required for calculations in subsection (F).
 - h. All records of fugitive emissions studies and study protocols conducted in accordance with Appendix 14.
 - i. All records of reports and notifications required by subsection (H).
- H. Reporting.**
- 1. The owner or operator shall notify the Director in writing at least 30 days in advance of the start of relative accuracy test audit (RATA) procedures performed on the continuous monitoring systems required by subsection (E)(1).
 - 2. Within 30 days after the end of each calendar quarter, the owner or operator shall submit a data assessment report to the Director in accordance with 40 CFR Part 60, Appendix F for the continuous monitoring systems required by subsection (E).
 - 3. The owner or operator shall submit an excess emissions and monitoring systems performance report or summary report form in accordance with 40 CFR § 60.7(c) to the Director quarterly for the continuous monitoring systems required by subsection (E)(1). Excess emissions means any 14-operating day average as calculated in subsection (F) in excess of the emission limit in subsection (C)(1), any period in which the capture and control system was operating outside of its parameters specified in the capture system and control device operation and maintenance plan in subsection (D)(2). For any 14-operating day period exceeding 1069.1 pounds per hour that the owner or operator claims does not exceed the limit in subsection (C)(1) because all hours in the operating period are below 1,518 pounds per hour, the owner or operator shall submit the CEMS data for each hour during that period. All reports shall be postmarked by the 30th day following the end of each calendar quarter time period.
 - 4. The owner or operator shall provide the following to the Director:
 - a. The owner or operator shall notify the Director of commencement of construction of any equipment necessary to comply with the operational or emission limits.
 - b. The owner or operator shall submit semiannual progress reports on construction of any such equipment postmarked by July 30 for the preceding January-June period and January 30 for the preceding July-December period.
 - c. The owner or operator shall submit notification of initial startup of any such equipment within 15 business days of such startup.
- I. Preconstruction review.** This Section is determined to be Reasonably Available Control Technology (RACT) for SO₂ emissions from the operations subject to subsection (C) for purposes of minor source NSR requirement addressed in R18-2-334.

Historical Note

New Section R18-2-B1302 made by final rulemaking at 23 A.A.R. 767, effective on the earlier of July 1, 2018, or 180 calendar days after completion of all Converter Retrofit Project improvements authorized by Significant Permit Revision No. 60647 (Supp. 17-1).

PART C. MIAMI, ARIZONA, PLANNING AREA**R18-2-C1301. Reserved****Historical Note**

New Section R18-2-C1301 reserved at 23 A.A.R. 767

(Supp. 17-1).

R18-2-C1302. Limits on SO₂ Emissions from the Miami Smelter**A. Applicability.**

1. This Section applies to the owner or operator of the Miami Smelter. It establishes limits on SO₂ emissions from the Miami Smelter and monitoring, recordkeeping and reporting requirements for those limits.
2. Effective date. Except as otherwise provided, the provisions of this Section shall take effect on the later of the effective date of the Administrator's action approving it as part of the state implementation plan or January 1, 2018.

B. Definitions. In addition to general definitions contained in R18-2-101, the following definitions apply to this rule.

1. "Capture system" means the collection of components used to capture gases and fumes released from one or more emission points, and to convey the captured gases and fumes to one or more control devices. A capture system may include, but is not limited to, the following components as applicable to a given capture system design: duct intake devices, hoods, enclosures, ductwork, dampers, manifolds, plenums, and fans.
2. "Electric furnace" means a furnace in which copper matte and slag are heated by electrical resistance without the mechanical introduction of air or oxygen.
3. "IsaSmelt[®] furnace" means a furnace in which air, oxygen, and fuel are injected through a top-submerged lance into a molten slag bath to produce slag and copper matte.
4. "Miami Smelter" means the primary copper smelter located near Miami, Gila County, Arizona at latitude 33°24'50"N and longitude 110°51'25"W.
5. "Out of control period" means the time that begins with the completion of the fifth, consecutive, daily calibration drift check with a calibration drift in excess of two times the allowable limit, or the time corresponding to the completion of the daily calibration drift check preceding the daily calibration drift check that results in a calibration drift in excess of four times the allowable limit, and the time that ends with the completion of the calibration check following corrective action that results in the calibration drifts at both the zero (or low-level) and high-level measurement points being within the corresponding allowable calibration drift limit.
6. "Operating day" means any calendar day in which any of the following occurs:
 - a. Concentrate is smelted in the Electric furnace or IsaSmelt[®] furnace;
 - b. Copper or sulfur bearing materials are processed in the converters;
 - c. Blister or scrap copper is processed in the anode furnaces or mold vessel;
 - d. Molten metal, including slag, matte or blister copper, is transferred between vessels;
 - e. Molten metal is cast into molds, anodes, or other intermediate or final products;
 - f. Power is provided to the electric furnace to make or maintain a molten bath; or
 - g. The anode furnace is heated to make or maintain a molten bath.

C. Sulfur Dioxide Emission Limitations. Combined SO₂ emissions from the tail gas stack, vent fume stack, aisle scrubber stack, bypass stack, and smelter roofline fugitives shall not exceed 142.45 pounds per hour on a 30-day rolling average basis.**D. Operational Standards.**

1. Process Equipment and control device operations. At all times, including periods of startup, shutdown, and malfunction, the owner or operator shall, to the extent practicable, maintain and operate smelter processes and associated emission control devices in a manner consistent with good air pollution control practices for minimizing SO₂ emissions from the process gases associated with the IsaSmelt[®] furnace, electric furnace, and converters at least to the levels required by subsection (C). Determination of whether acceptable operating and maintenance procedures are being used will be based on information available to the Director and EPA Region IX, which may include, but is not limited to, monitoring results, review of operating and maintenance procedures and records, and inspection of the relevant equipment.
2. Capture system and control device operations and maintenance plan. The owner or operator shall develop and implement an operations and maintenance plan for each capture system and control device used to ventilate or control process gas or emissions associated with the IsaSmelt[®] furnace, electric furnace, and converters. The owner or operator shall submit the initial plan to the Department and EPA Region IX for review and approval by July 1, 2017.
 - a. The operations and maintenance plan must address the following requirements as applicable to each capture system and control device:
 - i. Monitoring devices. The plan shall provide for installation, operation, calibration, and maintenance of appropriate monitoring devices to measure and record operating limit or range values at all times the required system is operating. Dampers that are manually set and remain in the same position while the capture system is operating are exempt from these monitoring requirements.
 - ii. Operational limits and ranges. The owner or operator shall establish operating limits and ranges in the plan for each capture system and control device that are representative and reliable indicators of capture system performance and control device operation. If selected as an operational limit or range, capture system damper position settings shall be specified in the plan.
 - iii. Preventative maintenance. The owner or operator must perform preventative maintenance for each capture system and control device according to written procedures in the plan. The procedures must include a preventative maintenance schedule that is consistent with the manufacturer's or engineer's instructions and specified frequency for routine and long-term maintenance.
 - iv. Inspections. The owner or operator must perform inspections in accordance with written procedures in the plan for each capture system and control device, including position verification of any manual damper settings specified in the plan, that are consistent with the manufacturer's or engineer's instructions for each system and device.
 - b. The owner or operator shall operate and maintain each capture system and each control device in accordance with the plan required by subsection

(D)(2) and as approved by the Department and EPA Region IX, except as provided herein. Until receiving initial approval of the plan, the owner or operator shall operate and maintain each capture system and each control device in accordance with the plan as initially submitted pursuant to subsection (D)(2). The owner or operator shall submit plan revisions for review by the Department and EPA Region IX. At any time, the Department and/or EPA Region IX may require the owner or operator to revise the plan if determined to be inconsistent with subsection (D)(2)(a). Within 60 days of receiving written notification from the Department or EPA Region IX specifying such inconsistency, the owner or operator shall submit a proposal to the Department and EPA Region IX that addresses the inconsistency. The owner or operator shall maintain a current copy of the plan onsite and available for review and inspection upon request.

E. Monitoring.

1. To determine compliance with subsection (C), the owner or operator shall install, calibrate, maintain, and operate continuous monitoring systems to monitor and record SO₂ concentrations and stack gas volumetric flow rates at the following locations.
 - a. The acid plant tail gas stack;
 - b. The vent fume stack;
 - c. The aisle scrubber stack; and
 - d. The bypass stack.
2. To determine compliance with the emission limit in subsection (C), the owner or operator shall install, calibrate, maintain, and operate a continuous monitoring system to monitor and record fugitive SO₂ concentrations at the Miami Smelter roofline.
3. Except during periods of continuous monitoring system breakdown, repairs, maintenance, out-of-control periods, calibration checks, and zero and span adjustments, the owner or operator shall continuously monitor SO₂ concentrations and stack gas volumetric flow rates at each location specified in subsection (E)(1) and use the monitored concentrations and volumetric flow rates when demonstrating compliance with the SO₂ emission limit in subsection (C) in accordance with subsection (F).
4. Except during periods of continuous monitoring system breakdown, repairs, maintenance, out-of-control periods, calibration checks and zero and span adjustments, the owner or operator shall continuously monitor fugitive SO₂ emissions at the Miami Smelter roofline and use the monitored concentrations and volumetric flow rates when demonstrating compliance with the SO₂ emission limit in subsection (C) in accordance with subsection (F).
5. For purposes of subsections (E)(3) and (E)(4), continuous monitoring means the taking and recording of at least one measurement of SO₂ concentration and stack gas flow rate reading from the effluent of each affected stack, outlet, or other approved measurement location in each 15-minute period when the associated process units are operating. Fifteen-minute periods start at the beginning of each clock hour, and run consecutively. All continuous monitoring systems required by subsection (E)(1) shall complete at least one cycle of operation (sampling, analyzing, and data recording) for each successive 15-minute period.
6. If the owner or operator can demonstrate to the Director and EPA Region IX that measurement of stack gas volumetric flow rate in the outlet of any particular piece of SO₂ control equipment would yield inaccurate results or would be technologically infeasible, then the Director and EPA Region IX may allow measurement of the flow rate at an alternative sampling point.
7. The owner or operator shall demonstrate that the continuous monitoring systems required by subsection (E)(1) meet all of the following requirements:
 - a. Each SO₂ continuous monitoring system shall meet the specifications under 40 CFR 60, Appendix B, Performance Specification 6.
 - b. Each SO₂ continuous monitoring system installed and operated under this Section shall also meet the quality assurance requirements of 40 CFR 60, Appendix F, Procedure 1.
 - c. The owner or operator shall notify the Director in writing at least 30 days in advance of the start of the relative accuracy test audit (RATA) procedures performed on each continuous monitoring system.
 - d. The Director shall approve the location of all sampling points for monitoring SO₂ concentrations and stack gas volumetric flow rates in writing before installation and operation of measurement instruments.
 - e. The span of each continuous monitoring system for the acid plant tail stack, vent fume stack, and aisle scrubber stack shall be set at a SO₂ concentration of zero to 0.20 percent by volume.
 - f. The span of the continuous monitoring system for the bypass stack shall be set at a SO₂ concentration of zero to 20 percent by volume.
 - g. The zero (or low-level value between 0 and 20 percent of the span value) and span (50 to 100 percent of span value) calibration drifts shall be checked at least once each operating day in accordance with a written procedure. The zero and span must, at a minimum, be adjusted whenever either the 24-hour zero drift or the 24-hour span drift exceeds two times the limit in 40 CFR Part 60, Appendix B, Performance Specification 2. The system must allow the amount of the excess zero and span drift to be recorded and quantified.
 - h. The owner or operator shall maintain on hand and ready for immediate installation sufficient spare parts or duplicate systems for the continuous monitoring system equipment required by this Section to allow for the replacement within six hours of any monitoring system equipment part that fails or malfunctions during operation.
8. The owner or operator shall develop and implement a roofline fugitive emissions monitoring plan for the continuous monitoring system required by subsection (E)(2). The owner or operator shall submit the initial plan to the Department and EPA Region IX for review and approval by July 1, 2017.
 - a. The roofline fugitive emissions monitoring plan must address the following requirements:
 - i. The continuous monitoring system required by subsection (E)(2) must include measurement of fugitive emissions from, at a minimum, the Converter, Electric Furnace, Anode Furnace, and IsaSmelt[®] systems that is representative of total fugitive emissions.
 - ii. Each measurement system shall include at least one SO₂ analyzer and sufficient sampling locations that ensure collection of a representative sample along the roof monitor for each monitor

- system. The number of sample probes and their locations for each monitoring system shall account for the physical configuration of the vent, the locations of emitting activities relative to the vent, and heat generated by the equipment served by the vent.
- iii. Each measurement system shall include validation of adequate velocity for flow measurements and sufficient flow and temperature sensors to ensure calculation of representative exhaust flows through each vent. The number of such sensors and their locations for each monitoring system shall account for the physical configuration of the vent, the locations of emitting activities relative to the vent, and heat generated by the equipment served by the vent.
 - iv. Each measurement system shall include an on-site data collection system that continuously logs and stores the measured SO₂ concentration, the measured flow velocity, and the measured temperature.
 - v. An appropriate range for zero-span drift shall be established for all SO₂ analyzers to ensure proper calibration and operation. Unless otherwise provided in the roofline fugitive emissions monitoring plan required by subsection (E)(8), the zero (or low-level) value determination shall be made using a gas containing between zero to 20 percent of the span value for SO₂ and the span (or high-level) value determination shall be made using a certified gas with a value between 50 and 100 percent of the span value for SO₂. For each SO₂ analyzer, a daily zero-span check shall be performed by introducing zero gas and a known concentration of span gas to the analyzer. If the zero or span drift for an analyzer is greater than five percent of the span gas concentration for five consecutive days or greater than 10 percent of the span gas concentration for one day, the analyzer shall be found to be operating improperly and appropriate measures shall be taken to return the analyzer to proper operation. The zero-span check shall be repeated after any such corrective action is taken.
 - vi. All SO₂ analyzers shall be inspected quarterly by the owner or operator and inspected annually by an independent auditor. The inspections shall be conducted in accordance with the data accuracy assessment requirements of 40 CFR 60, Appendix F, Procedure 1, Section 5 or as otherwise provided in the roofline fugitive emissions monitoring plan required by subsection (E)(8). The quarterly inspections consist of two certified concentrations of SO₂ to each sample probe system and comparing the known concentrations to the concentrations logged by the corresponding on-site data collection system to generate a relative error for each system.
 - vii. The flow and temperature data shall be checked daily for proper operation of flow and temperature sensors in accordance with the roofline fugitive emissions monitoring plan required by subsection (E)(8). If a flow or temperature sensor is found to be operating improperly, appropriate measures shall be taken to return the sensor to proper operation.
 - viii. All temperature sensors shall be inspected annually. The inspection shall be conducted according to the manufacturer's specification. A temperature sensor tolerance range representative of proper sensor operation shall be established in the roofline fugitive emissions monitoring plan required by subsection (E)(8). If a temperature sensor is found to measure outside of an established tolerance range, the sensor shall be found to be operating improperly and appropriate measures shall be taken to return the sensor to proper operation.
 - ix. All flow sensors shall be calibrated semi-annually with calibration tools according to the manufacturer's specifications. A calibration tool range representative of proper sensor operation shall be established in the roofline fugitive emissions monitoring plan required by subsection (E)(8). If a flow sensor is found to measure outside of an established range, the sensor shall be found to be operating improperly and appropriate measures shall be taken to return the sensor to proper operation.
 - b. The owner or operator shall operate and maintain the continuous monitoring system required by subsection (E)(2) in accordance with the roofline fugitive emissions monitoring plan required by subsection (E)(2) and as approved by the Department and EPA Region IX, except as provided herein. Until receiving initial approval of the plan, the owner or operator shall operate and maintain the continuous monitoring system required by subsection (E)(2) in accordance with the plan as initially submitted pursuant to subsection (E)(2). The owner or operator shall keep the plan current and consistent with subsection (E)(8)(a). The owner or operator shall maintain a current copy of the plan onsite and available for review and inspection upon request. The Department and/or EPA Region IX may require the owner or operator to revise the plan if determined to be inconsistent with subsection (E)(8)(a). Within 60 days of receiving written notification from the Department or EPA Region IX specifying such inconsistency, the owner or operator shall submit a proposal to the Department and EPA Region IX that addresses the inconsistency.
- F. Compliance Demonstration Requirements.
1. Within 180 days of the effective date set forth in subsection (A)(2), the owner or operator shall demonstrate compliance with the emission limit in subsection (C) by calculating SO₂ emissions for each operating day as follows:
 - a. Sum the hourly pounds of SO₂ measured by the continuous monitoring systems required by subsection (E)(1) and (E)(2) for the current operating day and the preceding 29 operating days to calculate the total pounds of SO₂ emissions over the 30-operating day averaging period.
 - b. Multiply the operating days occurring during a 30-day averaging period by 24 to calculate the total operating hours over the most recent 30-operating day period.
 - c. Divide the total amount of SO₂ emissions calculated from subsection (F)(1)(a) by the total operating

Department of Environmental Quality – Air Pollution Control

- hours calculated from subsection (F)(1)(b) to calculate the 30-day rolling hourly average SO₂ emissions.
2. For the continuous monitoring systems required by subsections (E)(1) and (E)(2), hourly emissions shall be computed as follows:
 - a. Except as provided under subsection (F)(2)(c), for a full operating hour (any clock hour with 60 minutes of unit operation), at least four valid data points are required to calculate the hourly average, i.e., one data point in each of the 15-minute quadrants of the hour.
 - b. Except as provided under subsection (F)(2)(c), for a partial operating hour (any clock hour with less than 60 minutes of unit operation), at least one valid data point in each 15-minute quadrant of the hour in which the unit operates is required to calculate the hourly average.
 - c. For any operating hour in which required maintenance or quality-assurance activities are performed:
 - i. If the unit operates in two or more quadrants of the hour, a minimum of two valid data points, separated by at least 15 minutes, is required to calculate the hourly average; or
 - ii. If the unit operates in only one quadrant of the hour, at least one valid data point is required to calculate the hourly average.
 - d. If a daily calibration error check is failed during any operating hour, all data for that hour shall be invalidated, unless a subsequent calibration error test is passed in the same hour and the requirements of subsection (F)(2)(c) are met, based solely on valid data recorded after the successful calibration.
 - e. For each full or partial operating hour, all valid data points shall be used to calculate the hourly average.
 - f. Data recorded during periods of continuous monitoring system breakdown, repair, maintenance, out of control periods, calibration checks, and zero and span adjustments shall not be included in the data averages computed under subsection (F)(3).
 - g. Either arithmetic or integrated averaging of all data may be used to calculate the hourly average. The data may be recorded in reduced or non-reduced form.
 3. When no valid hour or hours of data have been recorded by a continuous monitoring system required by subsections (E)(1) and (E)(2) and the associated process unit is operating, the owner or operator shall calculate substitute data for each such period according to the following procedures:
 - a. For a missing data period less than or equal to 24 hours, substitute the average of the hourly SO₂ concentrations recorded by the system for the hour before and the hour after the missing data period.
 - b. For a missing data period greater than 24 hours, substitute the greater of:
 - i. The 90th percentile hourly SO₂ concentrations recorded by the system during the previous 720 quality-assured monitor operating hours; or
 - ii. The average of the hourly SO₂ concentrations recorded by the system for the hour before and the hour after the missing data period.
 4. The owner or operator shall include periods of startup, shutdown, malfunction, or other upset conditions when determining compliance with the emission limit in subsection (C).
- G. Recordkeeping.**
1. The owner or operator shall maintain records as specified in the capture system and control device operations and maintenance plan required under subsection (D)(2) and the roofline fugitive emissions monitoring plan required under subsection (E)(8).
 2. The owner or operator shall maintain the following records for at least five years:
 - a. All measurements from the continuous monitoring systems required by subsection (E)(1) and (E)(2); including the date, place, and time of sampling or measurement, parameters sampled or measured, and results.
 - b. All records of all compliance calculations required by subsection (F).
 - c. All records of quality assurance and quality control activities conducted on the continuous monitoring systems required by subsection (E)(1) and (E)(2).
 - d. All records of continuous monitoring system breakdowns, repairs, maintenance, out of control periods, calibration checks, and zero and span adjustments for the continuous monitoring systems required by subsection (E)(1) and (E)(2).
 - e. All records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of Smelter processes; any malfunction of the associated air pollution control equipment; or any periods during which a continuous monitoring system or monitoring device required by subsection (E)(1) and (E)(2) is inoperative.
 - f. All records of all major maintenance activities conducted on emission units, capture system, air pollution control equipment, and continuous monitoring systems; including those set forth in the operations and maintenance plan required by subsection (D)(2).
 - g. All records of reports and notifications required by subsection (H).
- H. Reporting**
1. Within 30 days after the end of each calendar quarter, the owner or operator shall submit a data assessment report to the Director in accordance with 40 CFR Part 60, Appendix F, Procedure 1 for the continuous monitoring systems required by subsection (E).
 2. The owner or operator shall submit an excess emissions and monitoring systems performance report and/or summary report form in accordance with 40 CFR § 60.7(c) to the Director semiannually for the continuous monitoring systems required by subsection (E)(1) and (E)(2). All reports shall be postmarked by the 30th day following the end of each six-month period.
 3. The owner or operator shall provide the following to the Director:
 - a. Notification of commencement of construction of the project improvements and equipment authorized by Significant Permit Revision No. 53592 to comply with the operational or emission limits in this Section no later than 30 days after such date.
 - b. Semiannual progress reports on construction of any such improvements and equipment on January 1 and July 1 of each calendar year until construction is complete.
 - c. Notification of initial startup of any such improvements and equipment within 15 days after such date.
- I. Preconstruction review.** This Section is determined to be Reasonably Available Control Technology (RACT) for SO₂ emissions from the operations subject to subsection (C) for

purposes of minor source NSR requirements addressed in R18-2-334.

Historical Note

New Section R18-2-C1302 made by final rulemaking at 23 A.A.R. 767, on the later of the effective date of the Administrator's action approving it as part of the state implementation plan or January 1, 2018.

ARTICLE 14. CONFORMITY DETERMINATIONS

R18-2-1401. Definitions

Terms used in this Article but not defined in this Article, Article 1 of this Chapter, or A.R.S. § 49-401.01 shall have the meaning given them by the CAA, Titles 23 and 40 U.S.C., other EPA regulations, or other USDOT regulations, in that order of priority. The following definitions and the definitions contained in Article 1 of this Chapter and in A.R.S. § 49-401.01 shall apply to this Article:

1. "ADEQ" means the Arizona Department of Environmental Quality.
2. "ADOT" means the Arizona Department of Transportation.
3. "Applicable implementation plan" is defined in § 302(q) of the CAA and means the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under § 110, or promulgated under § 110(c), or promulgated or approved pursuant to regulations promulgated under § 301(d) and which implements the relevant requirements of the CAA.
4. "CAA" means the Clean Air Act, as amended.
5. "Cause or contribute to a new violation" for a project means either of the following:
 - a. To cause or contribute to a new violation of a standard in the area substantially affected by the project or over a region which would otherwise not be in violation of the standard during the future period in question, if the project were not implemented.
 - b. To contribute to a new violation in a manner that would increase the frequency or severity of a new violation of a standard in such area.
6. "Consultation" means that one party confers with another identified party, provides access to all appropriate information to that party needed for meaningful input, and, prior to taking any action, considers the views of that party and responds in accordance with the procedures established in R18-2-1405.
7. "Control strategy implementation plan revision" is the applicable implementation plan which contains specific strategies for controlling the emissions of and reducing ambient levels of pollutants in order to satisfy CAA requirements for demonstrations of reasonable further progress and attainment (CAA §§ 182(b)(1), 182(c)(2)(A), 182(c)(2)(B), 187(a)(7), 189(a)(1)(B), and 189(b)(1)(A); and §§ 192(a) and 192(b), for nitrogen dioxide).
8. "Control strategy period" with respect to particulate matter less than 10 microns in diameter (PM₁₀), carbon monoxide (CO), nitrogen dioxide (NO₂), or ozone precursors (volatile organic compounds (VOC) and oxides of nitrogen (NO_x)), means that period of time after EPA approves control strategy implementation plan revisions containing strategies for controlling PM₁₀, NO₂, CO, or ozone, as appropriate. This period ends when the state submits and EPA approves a request under § 107(d) of the CAA for redesignation to an attainment area.
9. "Design concept" means the type of facility identified by the project, e.g., freeway, expressway, arterial highway, grade-separated highway, reserved right-of-way rail transit, mixed traffic rail transit, exclusive busway, etc.
10. "Design scope" means the design aspects of a facility which will affect the proposed facility's impact on regional emissions, usually as they relate to vehicle or person carrying capacity and control, e.g., number of lanes or tracks to be constructed or added, length of project, signalization, access control including approximate number and location of interchanges, preferential treatment for high-occupancy vehicles, etc.
11. "EPA" means the United States Environmental Protection Agency.
12. "FHWA" means the Federal Highway Administration of USDOT.
13. "FHWA or FTA project" means any highway or transit project which is proposed to receive funding assistance and approval through the Federal-Aid Highway program or the federal mass transit program, or requires Federal Highway Administration (FHWA) or Federal Transit Administration (FTA) approval for some aspect of the project, such as connection to an interstate highway or deviation from applicable design standards on the interstate system.
14. "FTA" means the Federal Transit Administration of USDOT.
15. "Forecast period" with respect to a transportation plan means the period covered by the transportation plan pursuant to 23 CFR 450.
16. "Highway project" means an undertaking to implement or modify a highway facility or highway-related program. Such an undertaking consists of all required phases necessary for implementation. For analytical purposes, it shall be defined sufficiently to:
 - a. Connect logical termini and be of sufficient length to address environmental matters on a broad scope.
 - b. Have independent utility or significance, i.e., be usable and be a reasonable expenditure even if no additional transportation improvements in the area are made.
 - c. Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.
17. "Horizon year" means a year for which the transportation plan describes the envisioned transportation system in accordance with R18-2-1406.
18. "Hot-spot analysis" means an estimation of likely future localized CO and PM₁₀ pollutant concentrations and a comparison of those concentrations to the national ambient air quality standards. Pollutant concentrations to be estimated should be based on the total emissions burden which may result from the implementation of a single, specific project, summed together with future background concentrations (which can be estimated using the ratio of future to current traffic multiplied by the ratio of future to current emission factors) expected in the area. The total concentration shall be estimated and analyzed at appropriate receptor locations in the area substantially affected by the project. Hot-spot analysis assesses impacts on a scale smaller than the entire nonattainment or maintenance area, including, for example, congested roadway intersections and highways or transit terminals, and uses an air quality dispersion model to determine the effects of emissions on air quality.
19. "Incomplete data area" means any ozone nonattainment area which EPA has classified, in 40 CFR 81, as an incomplete data area.

20. "Increase the frequency or severity of a violation" means to cause a location or region to exceed a standard more often or to cause a violation at a greater concentration than previously existed or would otherwise exist during the future period in question, if the project were not implemented.
21. "ISTEA" means the Intermodal Surface Transportation Efficiency Act of 1991.
22. "Local transportation agency" means a city, town, or county.
23. "Maintenance area" means any geographic region of the United States previously designated nonattainment pursuant to the CAA Amendments of 1990 and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under § 175A of the CAA.
24. "Maintenance period" with respect to a pollutant or pollutant precursor means that period of time beginning when a state submits and EPA approves a request under § 107(d) of the CAA for redesignation to an attainment area, and lasting for 20 years, unless the applicable implementation plan specifies that the maintenance period shall last for more than 20 years.
25. "Metropolitan planning organization (MPO)" means the organization designated as being responsible, together with the state, for conducting the continuing, cooperative, and comprehensive planning process under 23 U.S.C. 134 and 49 U.S.C. 1607.
26. "Milestone" means an emissions level and the date on which it is required to be achieved as described in § 182(g)(1) and § 189(c) of the CAA.
27. "Motor vehicle emissions budget" means that portion of the total allowable emissions defined in a revision to the applicable implementation plan (or in an implementation plan revision which was endorsed by the Governor or Director of ADEQ, subject to a public hearing, and submitted to EPA, but not yet approved by EPA) for a certain date for the purpose of meeting reasonable further progress milestones or attainment or maintenance demonstrations, for any criteria pollutant or its precursors, allocated by the applicable implementation plan to highway and transit vehicles. The applicable implementation plan for an ozone nonattainment area may also designate a motor vehicle emissions budget for oxides of nitrogen (NO_x) for a reasonable further progress milestone year if the applicable implementation plan demonstrates that this NO_x budget will be achieved with measures in the implementation plan (as an implementation plan must do for VOC milestone requirements). The applicable implementation plan for an ozone nonattainment area includes a NO_x budget if NO_x reductions are being substituted for reductions in volatile organic compounds in milestone years required for reasonable further progress.
28. "National ambient air quality standards (NAAQS)" means those standards established pursuant to § 109 of the CAA.
29. "NEPA" means the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.).
30. "NEPA process completion" with respect to FHWA or FTA, means the point at which there is a specific action to do any of the following:
 - a. Make a formal final determination that a project is categorically excluded.
 - b. Make a Finding of No Significant Impact.
 - c. Issue a record of decision on a Final Environmental Impact Statement under NEPA.
31. "Nonattainment area" means any geographic region of the United States which has been designated as nonattainment under § 107 of the CAA for any pollutant for which a national ambient air quality standard exists.
32. "Not classified area" means any carbon monoxide nonattainment area which EPA has not classified as either moderate or serious.
33. "Phase II of the interim period" with respect to a pollutant or pollutant precursor means that period of time after December 27, 1993, lasting until the earlier of the following:
 1. Submission to EPA of the relevant control strategy implementation plan revisions which have been endorsed by the Governor or the Director of ADEQ and have been subject to a public hearing.
 2. The date that the CAA requires relevant control strategy implementation plans to be submitted to EPA, provided EPA has made a finding of the state's failure to submit any such plans and the state, MPO, and USDOT have received notice of such finding of the state's failure to submit any such plans.
34. "Project" means a highway project or transit project.
35. "Recipient of funds designated under 23 U.S.C. or the Federal Transit Act" means any agency at any level of state, county, or city government, including any political subdivision or MPO, that routinely receives 23 U.S.C. or Federal Transit Act funds to construct FHWA or FTA projects, operate FHWA or FTA projects or equipment, purchase equipment, or undertake other services or operations via contracts or agreements. This definition does not include private landowners or developers, or contractors or entities that are only paid for services or products created by their own employees.
36. "Regional transportation agency" means a regional transit authority established pursuant to A.R.S. Title 28, Chapter 20 or Chapter 24, or a formal association of political subdivisions involved in regional transportation issues.
37. "Regionally significant transportation project" means a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals, as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternative to regional highway travel.
38. "Rural transport ozone nonattainment area" means an ozone nonattainment area that does not include, and is not adjacent to, any part of a Metropolitan Statistical Area or, where one exists, a Consolidated Metropolitan Statistical Area (as defined by the United States Bureau of the Census) and is classified under CAA § 182(h) as a rural transport area.
39. "Standard" means a national ambient air quality standard.
40. "Statewide transportation improvement program (STIP)" means a staged, multi-year, intermodal program of transportation projects covering the state, which is consistent with the statewide transportation plan and metropolitan transportation plans, and developed pursuant to 23 CFR 450.
41. "Statewide transportation plan" means the official intermodal statewide transportation plan that is developed

through the statewide planning process for the state, developed pursuant to 23 CFR 450.

42. “Submarginal area” means any ozone nonattainment area which EPA has classified as submarginal in 40 CFR 81.
43. “Transit” is mass transportation by bus, rail, or other conveyance which provides general or special service to the public on a regular and continuing basis. It does not include school buses or charter or sightseeing services.
44. “Transit project” means an undertaking to implement or modify a transit facility or transit-related program, purchase transit vehicles or equipment, or provide financial assistance for transit operations. It does not include actions that are solely within the jurisdiction of local transit agencies, such as changes in routes, schedules, or fares. It may consist of several phases. For analytical purposes, it shall be defined inclusively enough to:
 - a. Connect logical termini and be of sufficient length to address environmental matters on a broad scope.
 - b. Have independent utility or independent significance, i.e., be a reasonable expenditure even if no additional transportation improvements in the area are made.
 - c. Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.
45. “Transitional area” means any ozone nonattainment area which EPA has classified as transitional in 40 CFR 81.
46. “Transitional period” with respect to a pollutant or pollutant precursor means that period of time which begins after submission to EPA of the relevant control strategy implementation plan which has been endorsed by the Governor or Director of ADEQ and has been subject to a public hearing. The transitional period lasts until EPA takes final approval or disapproval action on the control strategy implementation plan submission or finds it to be incomplete. The precise beginning and end of the transitional period is defined in R18-2-1428.
47. “Transportation control measure (TCM)” means any measure that is specifically identified and committed to in the applicable implementation plan that is either one of the types listed in § 108 of the CAA, or any other measure for the purpose of reducing emissions or concentrations of air pollutants from transportation sources by reducing vehicle use or changing traffic flow or congestion conditions. Notwithstanding the above, vehicle technology-based, fuel-based, and maintenance-based measures which control the emissions from vehicles under fixed traffic conditions are not TCMs for the purposes of this rule.
48. “Transportation improvement program (TIP)” means a staged, multi-year, intermodal program of transportation projects covering a metropolitan planning area which is consistent with the metropolitan transportation plan and developed pursuant to 23 CFR 450.
49. “Transportation plan” means the official intermodal metropolitan transportation plan that is developed through the metropolitan planning process for the metropolitan planning area, developed pursuant to 23 CFR 450.
50. “Transportation project” means a highway project or a transit project.
51. “USDOT” means the United States Department of Transportation.
52. “VMT” means the number of vehicle miles traveled.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1402. Applicability

- A. Except as provided for in subsection (F) or R18-2-1434, conformity determinations are required for all of the following:
 1. The adoption, acceptance, approval, or support of transportation plans developed pursuant to 23 CFR 450 or 49 CFR 613 by an MPO or USDOT.
 2. The adoption, acceptance, approval, or support of TIPs developed pursuant to 23 CFR 450 or 49 CFR 613 by an MPO or USDOT.
 3. The approval, funding, or implementation of FHWA or FTA projects.
- B. Conformity determinations are not required under this Article for individual projects which are not FHWA or FTA projects. However, R18-2-1429 applies to such projects if they are regionally significant.
- C. The provisions of this Article shall apply in all nonattainment and maintenance areas for transportation-related criteria pollutants for which the area is designated nonattainment or has a maintenance plan.
- D. The provisions of this Article apply with respect to emissions of the following criteria pollutants: ozone, carbon monoxide, nitrogen dioxide, and particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM₁₀).
- E. The provisions of this Article apply with respect to emissions of the following precursor pollutants:
 1. Volatile organic compounds and nitrogen oxides in ozone areas (unless the Administrator determines under § 182(f) of the CAA that additional reductions of NO_x would not contribute to attainment).
 2. Nitrogen oxides in nitrogen dioxide areas.
 3. Volatile organic compounds, nitrogen oxides, and PM₁₀ in PM₁₀ areas if either of the following apply:
 - a. During the interim period, the EPA Regional Administrator or the Director of ADEQ has made a finding (including a finding in an applicable implementation plan or a submitted implementation plan revision) that transportation-related precursor emissions within the nonattainment area are a significant contributor to the PM₁₀ nonattainment problem and has so notified ADOT or the MPO where one exists and USDOT.
 - b. During the transitional, control strategy, and maintenance periods, the applicable implementation plan or implementation plan submission establishes a budget for such emissions as part of the reasonable further progress, attainment, or maintenance strategy.
- F. Projects subject to this Article for which the NEPA process and a conformity determination have been completed by FHWA or FTA may proceed toward implementation without further conformity determinations if one of the following major steps has occurred within the most recent three-year period: NEPA process completion; formal start of final design; acquisition of a significant portion of the right-of-way; or approval of the plans, specifications, and estimates. All phases of such projects which were considered in the conformity determination are also included, if those phases were for the purpose of funding, final design, right-of-way acquisition, construction, or any combination of these phases.
- G. A new conformity determination for the project will be required if there is a significant change in project design concept and scope, if a supplemental environmental document for air quality purposes is initiated, or if no major steps to advance

the project have occurred within the most recent three-year period.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1403. Priority

When assisting or approving any action with air quality-related consequences, FHWA and FTA shall give priority to the implementation of those transportation portions of an applicable implementation plan prepared to attain and maintain the NAAQS. This priority shall be consistent with statutory requirements for allocation of funds among states or other jurisdictions.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1404. Frequency of Conformity Determinations

- A. Conformity determinations and conformity redeterminations for transportation plans, TIPs, and FHWA or FTA projects shall be made according to the requirements of this Section and the applicable implementation plan.
- B. Each new transportation plan shall be found to conform before the transportation plan is approved by the MPO or accepted by USDOT.
- C. All transportation plan revisions shall be found to conform before the transportation plan revisions are approved by the MPO or accepted by USDOT, unless the revision merely adds or deletes exempt projects listed in R18-2-1434 and has been made in accordance with the notification provisions contained in R18-2-1405. The conformity determination shall be based on the transportation plan and the revision taken as a whole.
- D. An existing conformity determination shall lapse unless conformity of existing transportation plans is redetermined:
 1. By May 25, 1995, unless previously redetermined consistent with 40 CFR 51, subpart T.
 2. Within 18 months after EPA approval of an implementation plan revision which either:
 - a. Establishes or revises a transportation-related emissions budget (as required by CAA §§ 175A(a), 182(b)(1), 182(c)(2)(A), 182(c)(2)(B), 187(a)(7), 189(a)(1)(B), and 189(b)(1)(A); and §§ 192(a) and 192(b), for nitrogen dioxide); or
 - b. Adds, deletes, or changes TCMs.
 3. Within 18 months after EPA promulgation of an implementation plan which establishes or revises a transportation-related emissions budget or adds, deletes, or changes TCMs.
- E. In any case, conformity determinations shall be made no less frequently than every three years, or the existing conformity determination will lapse.
- F. A new TIP shall be found to conform before the TIP is approved by the MPO or accepted by USDOT.
- G. A TIP amendment requires a new conformity determination for the entire TIP before the amendment is approved by the MPO or accepted by USDOT, unless the amendment merely adds or deletes exempt projects listed in R18-2-1434 and has been made in accordance with the notification procedures under R18-2-1405.
- H. After an MPO adopts a new or revised transportation plan, TIP conformity shall be redetermined by the MPO and USDOT within six months from the date of adoption of the plan, unless the new or revised plan merely adds or deletes exempt projects listed in R18-2-1434. Otherwise, the existing conformity determination for the TIP shall lapse.
- I. In any case, TIP conformity determinations shall be made no less frequently than every three years or the existing TIP conformity determination shall lapse.

- J. FHWA or FTA projects shall be found to conform before they are adopted, accepted, approved, or funded. Conformity shall be redetermined for any FHWA or FTA project if none of the following major steps has occurred within the most recent three-year period:
 1. NEPA process completion,
 2. Start of final design,
 3. Acquisition of a significant portion of the right-of-way,
 4. Approval of the plans, specifications, and estimates.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1405. Consultation

- A. Consultation procedures as described in this Section shall be undertaken by all of the following entities and shall include the public and affected local and regional transportation agencies in preparing for and making conformity determinations and in developing applicable implementation plans:
 1. An MPO where one exists.
 2. The Arizona Department of Transportation (ADOT).
 3. The United States Department of Transportation (USDOT).
 4. The Arizona Department of Environmental Quality (ADEQ).
 5. The county air pollution control agency established pursuant to A.R.S. Title 49 where one exists.
 6. The United States Environmental Protection Agency (EPA).
- B. The following elements shall be used to implement the consultation processes under subsection (M), with the exception of subsection (M)(8), and under subsection (N), with the exception of subsections (N)(2) and (N)(3), and shall include all affected agencies and interested members of the public, and may be conducted at separate times or in combination:
 1. Providing to the affected agencies and interested members of the public information describing the upcoming decision process,
 2. Distributing or providing access to draft documents,
 3. Providing an opportunity for informal question and answer on the draft document or proposed decision,
 4. Providing an opportunity for formal written comment,
 5. Writing and distributing both a response to comments and the final document or decision.
- C. An MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, and any local transportation agency shall undertake a consultation process in accordance with this Section with each other, with the local or regional offices of EPA, FHWA and FTA, with affected regional transportation agencies, and with the public on the development of the following as described in subsections (D) through (G):
 1. The implementation plan, including the emission budget and list of TCMs in the applicable implementation plan;
 2. The unified planning work program under 23 CFR § 450.314;
 3. The transportation plan and TIP;
 4. The statewide transportation plan and STIP;
 5. Any revisions to the preceding documents;
 6. All transportation conformity determinations.
- D. ADEQ, or the MPO in a county having a population greater than 250,000 persons, shall be the lead agency responsible for preparing an implementation plan, the associated emission budgets, and the list of TCMs in the plan. The lead agency shall also be responsible for assuring the adequacy of the consultation process. The concurrence of ADEQ on each implementation plan is required before ADEQ adopts the plan and

transmits it to EPA for inclusion in the state implementation plan pursuant to A.R.S. § 49-406.

- E. ADOT, or the MPO where one exists, shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the transportation plan and the TIP. The MPO shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the unified planning work program under 23 CFR 450.314.
- F. ADOT shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to the development of the statewide transportation plan and the STIP.
- G. ADOT, or the MPO where one exists, shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the consultation process with respect to determinations of transportation conformity, except that the entity authorized to adopt or approve a project shall be the lead agency responsible for project-level conformity determinations for projects outside of the transportation plan or TIP and shall assure the adequacy of the consultation process.
- H. Each lead agency described in subsections (D) through (G) shall:
 1. Confer with all other agencies having an interest in the document or decision to be developed;
 2. Provide access to all information needed for meaningful input;
 3. Solicit early and continuing input from those agencies;
 4. Conduct the public consultation process described in subsection (P);
 5. Assure policy-level contact with agencies;
 6. With the exception of notifications pursuant to subsection (M)(8), prior to taking any action required pursuant to subsections (D) through (G), consider the views of each agency and the public and respond to significant comments in a timely, substantive written manner prior to taking any final action and assure that such views and written response are made part of the record of any action.
- I. FHWA and FTA shall be responsible for assuring timely action on final findings of conformity for transportation plans, TIPs, and federally funded projects, including the basis for those findings, after consulting with other agencies as provided in this Section. FHWA and FTA shall also be responsible for providing guidance on conformity and the transportation planning process to agencies in consultation. FHWA and FTA may rely on the consultation process initiated by ADOT or the MPO where one exists and shall not be required to duplicate that process.
- J. EPA shall be responsible for reviewing and approving updated motor vehicle emissions factors and providing guidance on conformity criteria and procedures to agencies in consultation.
- K. Each lead agency subject to a consultation process under this Section, including any federal agency, shall provide or notice the availability of each final document that is the product of the consultation process, together with all supporting information, to each other agency and members of the public that have participated in the consultation process within 15 days of adopting or approving the document or making the determination. An agency may supply a checklist of available supporting information, which other participating agencies or the public may use to request all or part of the supporting information, in lieu of generally distributing all supporting information.
- L. A meeting that is scheduled or required for another purpose may be used for the purposes of consultation if the conformity consultation purpose is identified in the public notice for the meeting.
- M. A consultation process involving an MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, EPA, USDOT, and the public shall be undertaken for the following:
 1. Evaluating and choosing each model and associated methods and assumptions to be used in hot-spot analyses and regional emissions analyses including vehicle miles traveled (VMT) forecasting. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 2. Determining whether the responsible agency identified in R18-2-1433 has demonstrated that the requirements of R18-2-1416, R18-2-1418 and R18-2-1419 are satisfied without a particular mitigation or control measure. The consultation process pursuant to this subsection shall be initiated by the responsible agency.
 3. Making a determination, as required by R18-2-1429(C)(2), whether the project is included in the regional emissions analysis supporting the currently conforming TIP's conformity determination, even if the project is not included in the TIP for the purposes of MPO project selection or endorsement, and whether the project's design concept and scope have changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility. The consultation process pursuant to this subsection shall be initiated by the MPO. In nonattainment areas where no MPO exists, ADOT shall initiate the consultation process for making a determination, as required by R18-2-1429(C)(2), whether a project that is outside of a TIP is included in the regional emissions analysis, and whether the project's design concept and scope have changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility.
 4. Determining pursuant to subsection (R) which minor arterials and other transportation projects should be considered "regionally significant" for the purposes of regional emissions analysis and which projects should be considered to have a significant change in design concept and scope from the transportation plan or TIP. The consultation process pursuant to this subsection shall be initiated by the MPO. In nonattainment areas where no MPO exists, ADOT shall initiate the consultation process for determining pursuant to subsection (R) which minor arterials and other transportation projects should be considered "regionally significant" for the purposes of regional emissions analysis.
 5. Evaluating whether exempt projects as described in R18-2-1434 and R18-2-1435 should be treated as non-exempt in cases where potential adverse emissions impacts may exist for any reason. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 6. Making a determination, as required by R18-2-1413, whether past obstacles to implementation of TCMs which are behind the schedule established in the applicable implementation plan have been identified and are being overcome, and whether state and local agencies with influence over approvals or funding for TCMs are giving

maximum priority to approval or funding for TCMs. This consultation process shall also consider whether delays in TCM implementation necessitate revisions to the applicable implementation plan to remove TCMs or to substitute TCMs or other emission reduction measures. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.

7. Identifying, as required by R18-2-1431, projects located at sites in PM₁₀ nonattainment areas which have vehicle and roadway emission and dispersion characteristics which are essentially identical to those at sites which have violations verified by monitoring, and therefore require quantitative PM₁₀ hot-spot analysis. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 8. Notification of transportation plan or TIP revisions or amendments which merely add or delete exempt projects listed in R18-2-1434. Notice shall be provided by the MPO and need not be provided prior to final action. Notice shall be provided by ADOT for revisions and amendments affecting the state transportation plan and the state TIP. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
 9. Project-level conformity determinations pursuant to R18-2-1416. The consultation process pursuant to this subsection shall be initiated by the recipient of the funds designated under 23 U.S.C. or the Federal Transit Act.
- N. A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, appropriate political subdivisions, regional transportation agencies, if any, and the public shall be undertaken for the following:
1. Evaluating events which will trigger new conformity determinations in addition to those triggering events established in R18-2-1404 and including any changes in planning assumptions that may trigger a new conformity determination. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 2. Consulting on emissions analysis for transportation activities which cross the borders of MPOs or nonattainment areas or air basins. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
 3. Where the metropolitan planning area does not include the entire nonattainment or maintenance area, a consultation process involving the MPO and ADOT for cooperative planning and analysis for purposes of determining conformity of all projects outside the metropolitan area and within the nonattainment or maintenance area. The consultation process pursuant to this subsection shall be initiated by ADOT. The public involvement process described in subsection (P) is not required for the purposes of this subsection.
 4. The design, schedule, and funding of research and data collection efforts and regional transportation model development. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 5. Determining that a conforming project approved with mitigation no longer requires mitigation. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
- O. The following consultation processes involve recipients of funds designated under 23 U.S.C. or the Federal Transit Act:
1. A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, recipients of funds designated under 23 U.S.C. or the Federal Transit Act and any agency created under state law that sponsors or approves transportation projects shall be undertaken to assure that plans for construction of regionally significant projects which are not FHWA or FTA projects, including projects for which alternative locations, design concept or scope, or the no-build option are still being considered, are disclosed as soon as practicable to ADOT or the MPO where one exists, so as to assure that any significant changes to the design concept or scope of those plans are disclosed as soon as practicable. The political subdivision having authority to adopt or approve a regionally significant transportation project, and any agency that becomes aware of any such project through applications for approval, permitting, funding, or otherwise shall disclose such project to ADOT or the MPO if one exists as soon as practicable. To help assure timely disclosure, the political subdivision having authority to adopt or approve any potential regionally significant transportation project shall disclose to ADOT or the MPO on a schedule prescribed by ADOT or the MPO, whichever is appropriate, each project for which alternatives have been identified through the NEPA process and, in particular, any preferred alternative that may be a regionally significant project. The consultation process shall include assuming the location, design concept, and scope of the project, where the sponsor has not yet decided these features, in sufficient detail to allow ADOT or the MPO to perform a regional emissions analysis. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
 2. A consultation process involving the MPO, ADEQ, a county air pollution control agency where one exists, ADOT, recipients of funds designated under 23 U.S.C. or the Federal Transit Act, any agency created under state law that sponsors or approves transportation projects, and the public shall be undertaken for the development of procedures as described in R18-2-1429. The consultation process pursuant to this subsection shall be initiated by ADOT or the MPO where one exists.
- P. Public involvement processes shall be conducted according to the requirements of this subsection.
1. ADOT or the MPO, where one exists, when making conformity determinations on transportation plans, programs, and projects shall establish and continuously implement a proactive public involvement process which provides opportunity for public review and comment prior to taking formal action on a conformity determination for all transportation plans and TIPs, that meets the following minimum requirements:
 - a. Includes a process that provides complete information, timely public notice, full public access to key decisions and supports early and continuing involvement of the public in developing plans and TIPs.
 - b. Requires a minimum public comment period of 45 days before the public involvement process is initially adopted or revised.
 - c. Provides timely information about transportation issues and processes to citizens, affected public agencies, representatives of transportation agency employees, private providers of transportation, other interested parties and segments of the community

- affected by transportation plans, programs, and projects, including but not limited to central city and other local jurisdiction concerns.
- d. Provides reasonable public access to technical and policy information used in the development of plans and TIPs and open public meetings where matters related to the federal-aid highway and transit programs are being considered.
 - e. Requires adequate public notice of public involvement activities and time for public review and comment at key decision points, including, but not limited to, approval of plans and TIPs and approval of changes in plans and TIPs. In nonattainment areas classified as serious and above, the comment period shall be at least 30 days for the plan, TIP, and major amendments. Public notice shall include mailing of notice to a list of all persons who have requested notice of actions covered by this Article.
 - f. Demonstrates explicit consideration and response to public input received during the planning and program development processes.
 - g. Seeks out and considers the needs of those traditionally underserved by existing transportation systems, including but not limited to low-income and minority households.
 - h. When significant written and oral comments are received on a draft transportation plan or TIP, including the financial plan, as a result of the public involvement process or the consultation process required by this Section, a summary, analysis, and report on the disposition of comments shall be made part of the final plan and TIP.
 - i. If the final transportation plan or TIP differs significantly from the one which was made available for public comment by the MPO and it raises new material issues which interested parties could not reasonably have foreseen from the public involvement efforts, an additional opportunity for public comment on the revised plan or TIP shall be made available.
 - j. ADOT or the MPO where one exists shall specifically address in writing all public comments that known plans for a regionally significant transportation project which is not receiving FHWA or FTA funding or approval have not been properly reflected in the emissions analysis supporting a proposed conformity finding for a transportation plan or TIP.
 - k. Public involvement processes shall be periodically reviewed by ADOT or the MPO in terms of their effectiveness in assuring that the process provides full and open access to all.
 - l. These procedures will be reviewed by the FHWA and the FTA during certification reviews for TMAs, and as otherwise necessary for all MPOs, to assure that full and open access is provided to MPO decisionmaking processes.
 - m. Metropolitan public involvement processes shall be coordinated with statewide public involvement processes wherever possible to enhance public consideration of the issues, plans, and programs and to reduce redundancies and costs.
2. Local and regional transportation agencies when making conformity determinations on regionally significant transportation projects shall establish and implement a public involvement process which meets, at a minimum, the following requirements:
 - a. Provides to the affected agencies and interested members of the public information describing the upcoming decision process.
 - b. Distributes or provides access to draft documents and all information needed for meaningful input.
 - c. Solicits early and continuing input from interested agencies and the public.
 - d. Provides an opportunity for informal question and answer on the draft document or proposed decision.
 - e. Provides an opportunity for formal written comment.
 - f. Provides for writing and distributing both a response to comments and the final document or decision. The response to comments shall consider the views of each agency and the public. The response to comments shall be made in a timely, substantive written manner prior to taking any final action and shall be made part of the record of any action.
 - Q. Any conflict among state agencies or between state agencies and an MPO shall be escalated to the Governor if the conflict cannot be resolved by the directors of the involved agencies. In the first instance, such entities shall make every effort to resolve any differences, including personal meetings between the directors of such entities or their policy-level representatives, to the extent possible. Within 14 calendar days after ADOT or the MPO has notified ADEQ of its decision, ADEQ may appeal a proposed determination of conformity, or other policy decision under this Article, to the Governor. ADEQ must provide notice of any appeal under this subsection to ADOT or the MPO. If ADEQ does not appeal to the Governor within 14 days, ADOT or the MPO may proceed with the final determination or decision. If ADEQ appeals to the Governor, the final conformity determination or policy decision shall have the concurrence of the Governor. The Governor may delegate to another official or agency within the state the role of hearing any appeal under this subsection and of deciding whether to concur in the determination or decision but may not delegate these functions to the director or staff of ADEQ, to any local air quality agency, to ADOT, to any state transportation commission or board, to an MPO, or to any agency that has responsibility for any of these functions.
 - R. The following procedures shall govern the consultation process regarding regionally significant transportation projects as defined in R18-2-1401(37):
 1. By September 1, 1995, ADOT or the MPO where one exists shall develop and make available, for each nonattainment or maintenance area, consistent with A.R.S. § 49-408(A), the following:
 - a. A map of the highway or transit facilities in the nonattainment or maintenance area that serve regional transportation needs.
 - b. Guidance on which undertakings to implement or modify a highway facility are not transportation projects as defined in this Article, because they are not of sufficient length to address environmental matters on a broad scope.
 - c. Guidance on which types of transportation projects are normally included in the regional transportation model.
 2. The map and guidance described in subsection (R)(1) shall be produced only after consultation with ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, and the public. The map developed pursuant to subsection (R)(1) shall be updated prior to the commencement of the next TIP or STIP

development cycle, unless no changes have occurred. The guidance developed pursuant to subsection (R)(3) shall be revised as necessary to reflect changes in the regional transportation model.

3. ADOT or the MPO where one exists shall develop and initiate the consultation process described in subsection (H) for a proposed list of transportation projects to be considered regionally significant. The consultation process shall include the MPO where one exists, ADEQ, a county air pollution control agency where one exists, ADOT, a transit authority where one exists, local and regional transportation agencies, EPA, USDOT, and the public. The list shall include information supporting the proposed classification.
 4. In determining whether a facility serves regional transportation needs, ADOT or the MPO where one exists shall consider at a minimum whether the facility:
 - a. Would be classified as a principal arterial based on average daily traffic or other factors, if not for limitations that the USDOT places on the percentage of streets that can be so classified.
 - b. For all other roadways, whether the facility:
 - i. Serves regional mobility needs, as opposed to local access.
 - ii. Carries regional traffic from one principal arterial to another.
 - iii. Is a modification that expands a facility such that it would serve regional transportation needs.
 5. For the purposes of this Article, a street with a lower classification than a collector street, as specified in the most recent federal classification map for the region, does not serve regional transportation needs.
 6. None of the following attributes, by itself, shall require a transportation project to be included in the modeling of a metropolitan area's transportation network:
 - a. The connection of a facility that does not serve regional transportation needs to a facility that does serve regional transportation needs.
 - b. The addition or modification of a lane other than a through lane.
- S.** An agency having a role or responsibility under this Section may delegate that role or responsibility to another entity pursuant to the applicable state law but shall notify all other parties to the consultation process of this fact when the delegation occurs and shall also provide to the other parties the name, address, and telephone number of one or more contact persons representing the entity that is accepting the delegated role or responsibility.
- T.** The provisions of this Section apply only to TIP and STIP planning cycles beginning with the cycles next following the effective date of this Section. The provisions of 40 CFR 51, Subpart T, continue to apply to all TIP and STIP planning cycles in progress at the time of the effective date of this Section. The provisions of this Section apply to consultation on projects and TIP amendments as of the effective date of this Section.
1. The transportation plan shall specifically describe the transportation system envisioned for certain future years which shall be called horizon years.
 2. The agency or organization developing the transportation plan, after consultation pursuant to R18-2-1405, may choose any years to be horizon years, subject to the following restrictions:
 - a. Horizon years may be no more than 10 years apart.
 - b. The first horizon year may be no more than 10 years from the base year used to validate the transportation demand planning model.
 - c. If the attainment year is in the time span of the transportation plan, the attainment year shall be a horizon year.
 - d. The last horizon year shall be the last year of the transportation plan's forecast period.
 3. For these horizon years all of the following apply:
 - a. The transportation plan shall quantify and document the demographic and employment factors influencing expected transportation demand, including land-use forecasts, in accordance with implementation plan provisions and R18-2-1405.
 - b. The highway and transit system shall be described in terms of the regionally significant additions or modifications to the existing transportation network which the transportation plan envisions to be operational in the horizon years. Additions and modifications to the highway network shall be sufficiently identified to indicate intersections with existing regionally significant facilities and to determine their effect on route options between transportation analysis zones. Each added or modified highway segment shall also be sufficiently identified in terms of its design concept and design scope to allow modeling of travel times under various traffic volumes, consistent with the modeling methods for area-wide transportation analysis in use by the MPO. Transit facilities, equipment, and services envisioned for the future shall be identified in terms of design concept, design scope, and operating policies sufficiently to allow modeling of their transit ridership. The description of additions and modifications to the transportation network shall also be sufficiently specific to show that there is a reasonable relationship between expected land use and the envisioned transportation system.
 - c. Other future transportation policies, requirements, services, and activities, including intermodal activities, shall be described.
- B.** Ozone or CO nonattainment areas which are reclassified from moderate to serious shall meet the requirements of subsection (A) within two years from the date of reclassification.
- C.** Transportation plans for other areas shall meet the requirements of subsection (A) at least to the extent it has been the previous practice of the MPO to prepare plans which meet those requirements. Otherwise, transportation plans shall describe the transportation system envisioned for the future specifically enough to allow determination of conformity according to the criteria and procedures of R18-2-1409 through R18-2-1427.
- D.** The requirements of this Section supplement other requirements of applicable law or regulation governing the format or content of transportation plans.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1406. Content of Transportation Plans

- A.** For transportation plans adopted after January 1, 1995, in serious, severe, or extreme ozone nonattainment areas and in serious carbon monoxide nonattainment areas, the following shall apply:

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1407. Relationship of Transportation Plan and TIP Conformity with the NEPA Process

The degree of specificity required in the transportation plan and the specific travel network assumed for air quality modeling do not preclude the consideration of alternatives in the NEPA process or other project development studies. Should the NEPA process result in a project with design concept and scope significantly different from that in the transportation plan or TIP, the project shall meet the criteria in R18-2-1409 through R18-2-1427 for projects not from a TIP before NEPA process completion.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1408. Fiscal Constraints for Transportation Plans and TIPs

Transportation plans and TIPs shall demonstrate that they are fiscally constrained consistent with USDOT's metropolitan planning regulations at 23 CFR 450 in order to be found in conformity.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1409. Criteria and Procedures for Determining Conformity of Transportation Plans, Programs, and Projects: General

- A. In order to be found to conform, each transportation plan, program, and FHWA or FTA project shall satisfy the applicable criteria and procedures in R18-2-1410 through R18-2-1427 as listed in Table 1 of this Section and shall comply with all applicable conformity requirements of implementation plans and of court orders for the area which pertain specifically to conformity determination requirements. The criteria for making conformity determinations differ based on the action under review (transportation plans, TIPs, and FHWA or FTA projects), the time period in which the conformity determination is made, and the relevant pollutant.
- B. The following table indicates the criteria and procedures in R18-2-1410 through R18-2-1427 which apply for each action in each time period:

Table 1. Conformity Criteria

DURING ALL PERIODS	
Action	Criteria
Transportation Plan	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(B)
TIP	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(C)
Project (from a conforming plan and TIP)	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1414, R18-2-1415, R18-2-1416, R18-2-1417
Project (not from a conforming plan and TIP)	R18-2-1410, R18-2-1411, R18-2-1412, R18-2-1413(D), R18-2-1414, R18-2-1416, R18-2-1417

PHASE II OF THE INTERIM PERIOD

Action	Criteria
Transportation Plan	R18-2-1422, R18-2-1425
TIP	R18-2-1423, R18-2-1426
Project (from a conforming plan and TIP)	R18-2-1421

Project (not from a conforming plan and TIP)	R18-2-1421, R18-2-1424, R18-2-1427
--	------------------------------------

TRANSITIONAL PERIOD

Action	Criteria
Transportation Plan	R18-2-1418, R18-2-1422, R18-2-1425
TIP	R18-2-1419, R18-2-1423, R18-2-1426
Project (from a conforming plan and TIP)	R18-2-1421
Project (not from a conforming plan and TIP)	R18-2-1420, R18-2-1421, R18-2-1424, R18-2-1427

CONTROL STRATEGY AND MAINTENANCE PERIODS

Action	Criteria
Transportation Plan	R18-2-1418
TIP	R18-2-1419
Project (from a conforming plan and TIP)	No additional criteria
Project (not from a conforming plan and TIP)	R18-2-1420

- R18-2-1410. The conformity determination must be based on the latest planning assumptions.
- R18-2-1411. The conformity determination must be based on the latest emission estimation model available.
- R18-2-1412. The MPO must make the conformity determination according to the consultation procedures of this rule and the implementation plan revision required by 40 CFR 51.396.
- R18-2-1413. The transportation plan, TIP, or FHWA or FTA project which is not from a conforming plan and TIP must provide for the timely implementation of TCMs from the applicable implementation plan.
- R18-2-1414. There must be a currently conforming transportation plan and currently conforming TIP at the time of project approval.
- R18-2-1415. The project must come from a conforming transportation plan and program.
- R18-2-1416. The FHWA or FTA project must not cause or contribute to any new localized CO or PM₁₀ violations or increase the frequency or severity of any existing CO or PM₁₀ violations in CO and PM₁₀ nonattainment and maintenance areas.
- R18-2-1417. The FHWA or FTA project must comply with PM₁₀ control measures in the applicable implementation plan.
- R18-2-1418. The transportation plan must be consistent with the motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.
- R18-2-1419. The TIP must be consistent with the motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.
- R18-2-1420. The project which is not from a conforming transportation plan and conforming TIP must be consistent with the motor vehicle emissions budget(s) in the applicable implementation plan or implementation plan submission.
- R18-2-1421. The FHWA or FTA project must eliminate or reduce the severity and number of localized CO violations in the area substantially affected by the project (in CO nonattainment areas).
- R18-2-1422. The transportation plan must contribute to emissions reductions in ozone and CO nonattainment areas.

- R18-2-1423. The TIP must contribute to emissions reductions in ozone and CO nonattainment areas.
- R18-2-1424. The project which is not from a conforming transportation plan and TIP must contribute to emissions reductions in ozone and CO nonattainment areas.
- R18-2-1425. The transportation plan must contribute to emission reductions or must not increase emissions in PM₁₀ and NO₂ nonattainment areas.
- R18-2-1426. The TIP must contribute to emission reductions or must not increase emissions in PM₁₀ and NO₂ nonattainment areas.
- R18-2-1427. The project which is not from a conforming transportation plan and TIP must contribute to emission reductions or must not increase emissions in PM₁₀ and NO₂ nonattainment areas.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1410. Criteria and Procedures: Latest Planning Assumptions

- A. During all periods the conformity determination, with respect to all other applicable criteria in R18-2-1411 through R18-2-1427, shall be based upon the most recent complete planning assumptions in force at the time of the conformity determination. The conformity determination shall satisfy the requirements of subsections (B) through (F).
- B. Assumptions, including vehicle miles traveled per capita or per household, trip generation per household, vehicle occupancy, household size, vehicle fleet mix, vehicle ownership, and the geographic distribution of population growth shall be derived from the estimates of current and future population, employment, travel, and congestion most recently used by ADOT or the MPO where one exists. Population estimates shall be consistent with the estimates developed by the Arizona Department of Economic Security pursuant to A.R.S. § 41-1954(A). The conformity determination shall also be based on the latest assumptions about current and future background concentrations.
- C. The conformity determination for each transportation plan and TIP shall discuss how transit operating policies (including fares and service levels) and assumed transit ridership have changed since the previous conformity determination.
- D. The conformity determination shall include reasonable assumptions about transit service and increases in transit fares and road and bridge tolls over time.
- E. The conformity determination shall use the latest existing information regarding the effectiveness of the TCMs which have already been implemented.
- F. Key assumptions shall be specified and included in the draft documents and supporting materials used for the interagency and public consultation required by R18-2-1405.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1411. Criteria and Procedures: Latest Emissions Model

- A. During all periods the conformity determination shall be based on the latest emission estimation model available. This criterion is satisfied if the most current version of the motor vehicle emissions model specified by EPA for use in the preparation or revision of implementation plans in that state or area is used for the conformity analysis. Where EMFAC is the motor vehicle emissions model used in preparing or revising the applicable implementation plan, new versions shall be approved by EPA before they are used in the conformity analysis.
- B. Conformity analyses for which the emissions analysis was begun during the grace period or before the Federal Register

notice of availability of the latest emission model, or during any grace period announced in such notice, may continue to use the previous version of the model for transportation plans and TIPs. The previous model may also be used for projects if the analysis was begun during the grace period or before the Federal Register notice of availability, provided no more than three years have passed since the draft environmental document was issued.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1412. Criteria and Procedures: Consultation

All conformity determinations shall be made according to the consultation procedures in R18-2-1405. This criterion applies during all periods. Until the implementation plan revision required by 40 CFR 51.396 is approved by EPA, the conformity determination shall be made according to the procedures in R18-2-1405. Once the implementation plan revision has been approved by EPA, this criterion is satisfied if the conformity determination is made consistent with the implementation plan's consultation requirements.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1413. Criteria and Procedures: Timely Implementation of TCMs

- A. During all periods the transportation plan, TIP, or FHWA, or FTA project which is not from a conforming plan and TIP shall provide for the timely implementation of TCMs from the applicable implementation plan.
- B. For transportation plans, this criterion is satisfied if the following two conditions are met:
 1. The transportation plan, in describing the envisioned future transportation system, provides for the timely completion or implementation of all TCMs in the applicable implementation plan which are eligible for funding under 23 U.S.C. or the Federal Transit Act, consistent with schedules included in the applicable implementation plan.
 2. Nothing in the transportation plan interferes with the implementation of any TCM in the applicable implementation plan.
- C. For TIPs, this criterion is satisfied if all of the following conditions are met:
 1. An examination of the specific steps and funding source needed to fully implement each TCM indicates that TCMs which are eligible for funding under 23 U.S.C. or the Federal Transit Act are on or ahead of the schedule established in the applicable implementation plan, or, if such TCMs are behind the schedule established in the applicable implementation plan, the MPO and USDOT have determined that past obstacles to implementation of the TCMs have been identified and have been or are being overcome, and that all state and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding of TCMs over other projects within their control, including projects in locations outside the nonattainment or maintenance area. Maximum priority to approval or funding of TCMs includes demonstrations with respect to funding acceleration, commitment of staff or other agency resources, diligent efforts to seek approvals, and similar actions.
 2. If federal funding intended for TCMs in the applicable implementation plan has previously been programmed but is reallocated to projects in the TIP other than TCMs, (or if there are no other TCMs in the TIP, to projects in the TIP other than projects which are eligible for federal

funding under ISTEA's Congestion Mitigation and Air Quality Improvement Program), and the TCMs are behind the schedule in the implementation plan, the TIP cannot be found to conform.

3. Nothing in the TIP may interfere with the implementation of any TCM in the applicable implementation plan.
- D. For FHWA or FTA projects which are not from a conforming transportation plan and TIP, this criterion is satisfied if the project does not interfere with the implementation of any TCM in the applicable implementation plan.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1414. Criteria and Procedures: Currently Conforming Transportation Plan and TIP

During all periods there shall be a currently conforming transportation plan and currently conforming TIP at the time of project approval. This criterion is satisfied if the current transportation plan and TIP have been found to conform to the applicable implementation plan by the MPO and USDOT according to the procedures of this subpart. Only one conforming transportation plan or TIP may exist in an area at any time; conformity determinations of a previous transportation plan or TIP expire once the current plan or TIP is found to conform by USDOT. The conformity determination on a transportation plan or TIP will also lapse if conformity is not determined according to the frequency requirements of R18-2-1404.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1415. Criteria and Procedures: Projects from a Plan and TIP

- A. During all periods the project shall come from a conforming transportation plan and program. Otherwise, the project shall satisfy all criteria in Table 1 of R18-2-1409 for a project not from a conforming transportation plan and TIP. A project is considered to be from a conforming transportation plan if it meets the requirements of subsection (B) and from a conforming program if it meets the requirements of subsection (C).
- B. A project is considered to be from a conforming transportation plan if one of the following conditions applies:
 1. For projects which are required to be identified in the transportation plan in order to satisfy R18-2-1406, the project is specifically included in the conforming transportation plan and the project's design concept and scope have not changed significantly from those which were described in the transportation plan, or in a manner which would significantly impact use of the facility.
 2. For projects which are not required to be specifically identified in the transportation plan, the project is identified in the conforming transportation plan, or is consistent with the policies and purpose of the transportation plan and will not interfere with other projects specifically included in the transportation plan.
- C. A project is considered to be from a conforming program if all of the following conditions are met:
 1. The project is included in the conforming TIP and the design concept and scope of the project were adequate at the time of the TIP conformity determination to determine its contribution to the TIP's regional emissions and have not changed significantly from those which were described in the TIP, or in a manner which would significantly impact use of the facility.
 2. If the TIP describes a project design concept and scope which includes project-level emissions mitigation or control measures, enforceable written commitments to implement such measures shall be obtained from the project sponsor or operator as required by R18-2-1433 in order for the project to be considered from a conforming program. Any change in these mitigation or control measures that would significantly reduce their effectiveness constitutes a change in the design concept and scope of the project.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1416. Criteria and Procedures: Localized CO and PM₁₀ Violations (Hot Spots)

- A. During all periods any FHWA or FTA project shall not cause or contribute to any new localized CO or PM₁₀ violations or increase the frequency or severity of any existing CO or PM₁₀ violations in CO and PM₁₀ nonattainment and maintenance areas. This criterion is satisfied if it is demonstrated that no new local violations will be created and the severity or number of existing violations will not be increased as a result of the project.
- B. The demonstration shall be performed according to the requirements of R18-2-1405 and R18-2-1431.
- C. For projects which are not of the type identified by R18-2-1431(A) or R18-2-1431(D), this criterion may be satisfied if consideration of local factors clearly demonstrates that no local violations presently exist and no new local violations will be created as a result of the project. Otherwise, in CO nonattainment and maintenance areas, a quantitative demonstration shall be performed according to the requirements of R18-2-1431(B).

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1417. Criteria and Procedures: Compliance with PM₁₀ Control Measures

During all periods any FHWA or FTA project shall comply with PM₁₀ control measures in the applicable implementation plan. This condition is satisfied if control measures (for the purpose of limiting PM₁₀ emissions from the construction activities or normal use and operation associated with the project) contained in the applicable implementation plan are included in the final plans, specifications, and estimates for the project.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1418. Criteria and Procedures: Motor Vehicle Emissions Budget (Transportation Plan)

- A. The transportation plan shall be consistent with the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. This criterion may be satisfied if the requirements in subsections (B) and (C) are met:
- B. A regional emissions analysis shall be performed as follows:
 1. The regional analysis shall estimate emissions of any of the following pollutants and pollutant precursors for which the area is in nonattainment or maintenance and for which the applicable implementation plan or implementation plan submission establishes an emissions budget:
 - a. VOC as an ozone precursor.
 - b. NO_x as an ozone precursor, unless the Administrator determines that additional reductions of NO_x would not contribute to attainment.
 - c. CO.
 - d. PM₁₀ (and its precursors VOC or NO_x if the applicable implementation plan or implementation plan

- submission identifies transportation-related precursor emissions within the nonattainment area as a significant contributor to the PM₁₀ nonattainment problem or establishes a budget for such emissions).
- e. NO_x (in NO₂ nonattainment or maintenance areas).
 2. The regional emissions analysis shall estimate emissions from the entire transportation system, including all regionally significant transportation projects contained in the transportation plan and all other regionally significant highway and transit projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.
 3. The emissions analysis methodology shall meet the requirements of R18-2-1430.
 4. For areas with a transportation plan that meets the content requirements of R18-2-1406(A), the emissions analysis shall be performed for each horizon year. Emissions in milestone years which are between the horizon years may be determined by interpolation.
 5. For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), the emissions analysis shall be performed for all of the following:
 - a. The last year of the plan's forecast period.
 - b. The attainment year, if the attainment year is in the time span of the transportation plan.
 - c. Any other years in the time span of the transportation plan such that there is not a gap of more than 10 years between analysis years. Emissions in milestone years which are between these analysis years may be determined by interpolation.
 - C. The regional emissions analysis shall demonstrate that for each of the applicable pollutants or pollutant precursors in subsection (B)(1) the emissions are less than or equal to the motor vehicle emissions budget as established in the applicable implementation plan or implementation plan submission as follows:
 1. If the applicable implementation plan or implementation plan submission establishes emissions budgets for milestone years, emissions in each milestone year are less than or equal to the motor vehicle emissions budget established for that year.
 2. For nonattainment areas, emissions in the attainment year are less than or equal to the motor vehicle emissions budget established in the applicable implementation plan or implementation plan submission for that year.
 3. For nonattainment areas, emissions in each analysis or horizon year after the attainment year are less than or equal to the motor vehicle emissions budget established by the applicable implementation plan or implementation plan submission for the attainment year. If emissions budgets are established for years after the attainment year, emissions in each analysis year or horizon year shall be less than or equal to the motor vehicle emissions budget for that year, if any, or the motor vehicle emissions budget for the most recent budget year prior to the analysis year or horizon year.
 4. For maintenance areas, emissions in each analysis or horizon year are less than or equal to the motor vehicle emissions budget established by the maintenance plan for that year, if any, or the emissions budget for the most recent budget year prior to the analysis or horizon year.
 - A. The TIP shall be consistent with the motor vehicle emissions budgets in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. This criterion may be satisfied if the requirements in subsections (B) and (C) are met.
 - B. For areas with a conforming transportation plan that fully meets the content requirements of R18-2-1406(A), this criterion may be satisfied without additional regional emissions analysis if:
 1. Each program year of the TIP is consistent with the federal funding which may be reasonably expected for that year, and required state or local matching funds and funds for state or local funding-only projects are consistent with the revenue sources expected over the same period; and
 2. The TIP is consistent with the conforming transportation plan such that the regional emissions analysis already performed for the plan applies to the TIP also. This requires a demonstration that:
 - a. The TIP contains all projects which shall be started in the TIP's time-frame in order to achieve the highway and transit system envisioned by the transportation plan in each of its horizon years;
 - b. All TIP projects which are regionally significant are part of the specific highway or transit system envisioned in the transportation plan's horizon years; and
 - c. The design concept and scope of each regionally significant transportation project in the TIP is not significantly different from that described in the transportation plan.
 3. If the requirements in subsections (B)(1) and (B)(2) are not met, then either:
 - a. The TIP may be modified to meet those requirements; or
 - b. The transportation plan shall be revised so that the requirements in subsections (B)(1) and (B)(2) are met. Once the revised plan has been found to conform, this criterion is met for the TIP with no additional analysis except a demonstration that the TIP meets the requirements of subsections (B)(1) and (B)(2).
 - C. For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), a regional emissions analysis shall meet all of the following requirements:
 1. The regional emissions analysis shall estimate emissions from the entire transportation system, including all projects contained in the proposed TIP, the transportation plan, and all other regionally significant highway and transit projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.
 2. The analysis methodology shall meet the requirements of R18-2-1430(C).
 3. The regional emissions analysis shall satisfy the requirements of R18-2-1418(B)(1), R18-2-1418(B)(5), and R18-2-1418(C).

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1420. Criteria and Procedures: Motor Vehicle Emissions Budget (Project Not from a Plan and TIP)

- A. The project which is not from a conforming transportation plan and a conforming TIP shall be consistent with the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission. This criterion applies during the transitional period and the control strategy and maintenance periods, except as provided in R18-2-1436. It is

R18-2-1419. Criteria and Procedures: Motor Vehicle Emissions Budget (TIP)

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

satisfied if emissions from the implementation of the project, when considered with the emissions from the projects in the conforming transportation plan and TIP and all other regionally significant transportation projects expected in the area, do not exceed the motor vehicle emissions budget in the applicable implementation plan or implementation plan submission.

- B.** For areas with a conforming transportation plan that meets the content requirements of R18-2-1406(A):
1. This criterion may be satisfied without additional regional analysis if the project is included in the conforming transportation plan, even if it is not specifically included in the latest conforming TIP. This requires a demonstration that all of the following apply:
 - a. Allocating funds to the project will not delay the implementation of projects in the transportation plan or TIP which are necessary to achieve the highway and transit system envisioned by the transportation plan in each of its horizon years.
 - b. The project is not regionally significant or is part of the specific highway or transit system envisioned in the transportation plan's horizon years.
 - c. The design concept and scope of the project is not significantly different from that described in the transportation plan.
 2. If the requirements in subsection (B)(1) are not met, a regional emissions analysis shall be performed as follows:
 - a. The analysis methodology shall meet the requirements of R18-2-1430.
 - b. The analysis shall estimate emissions from the transportation system, including the proposed project and all other regionally significant transportation projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan. The analysis shall include emissions from all previously approved projects which were not from a transportation plan and TIP.
 - c. The regional emissions analysis shall meet the requirements of R18-2-1418(B)(1), R18-2-1418(B)(4) and R18-2-1418(C).
- C.** For areas with a transportation plan that does not meet the content requirements of R18-2-1406(A), a regional emissions analysis shall be performed for the project together with the conforming TIP and all other regionally significant transportation projects expected in the nonattainment or maintenance area. This criterion may be satisfied if all of the following apply:
1. The analysis methodology meets the requirements of R18-2-1430(C).
 2. The analysis estimates emissions from the transportation system, including the proposed project, and all other regionally significant transportation projects expected in the nonattainment or maintenance area in the time-frame of the transportation plan.
 3. The regional emissions analysis satisfies the requirements of R18-2-1418(B)(1), R18-2-1418(B)(5), and R18-2-1418(C).

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1421. Criteria and Procedures: Localized CO Violations (Hot Spots) in the Interim and Transitional Periods

- A.** Each FHWA or FTA project shall eliminate or reduce the severity and number of localized CO violations in the area substantially affected by the project (in CO nonattainment areas). This criterion applies during the interim and transi-

tional periods only. This criterion is satisfied with respect to existing localized CO violations if it is demonstrated that existing localized CO violations will be eliminated or reduced in severity and number as a result of the project.

- B.** The demonstration shall be performed according to the requirements of R18-2-1405 and R18-2-1431.
- C.** For projects which are not of the type identified by R18-2-1431(A), this criterion may be satisfied if consideration of local factors clearly demonstrates that existing CO violations will be eliminated or reduced in severity and number. Otherwise, a quantitative demonstration shall be performed according to the requirements of R18-2-1431(B).

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1422. Criteria and Procedures: Interim and Transitional Period Reductions in Ozone and CO Areas (Transportation Plan)

- A.** A transportation plan shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise provided in R18-2-1436. It applies to the net effect on emissions of all projects contained in a new or revised transportation plan. This criterion may be satisfied if a regional emissions analysis is performed as described in subsections (B) through (F).
- B.** Determine the analysis years for which emissions are to be estimated. Analysis years shall be no more than 10 years apart. The first analysis year shall be no later than the first milestone year (1995 in CO nonattainment areas and 1996 in ozone nonattainment areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
- C.** Define the Baseline scenario for each of the analysis years to be the future transportation system that would result from current programs, composed of all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:
1. All in-place regionally significant highway and transit facilities, services and activities.
 2. All ongoing travel demand management or transportation system management activities.
 3. Completion of all regionally significant transportation projects, regardless of funding source, which are currently under construction or are undergoing right-of-way acquisition (except for hardship acquisition and protective buying); come from the first three years of the previously conforming transportation plan or TIP; or have completed the NEPA process. For the first conformity determination on the transportation plan after November 24, 1993, a project may not be included in the Baseline scenario and shall be included in the Action scenario as described in subsection (D), if one of the following major steps has not occurred within the most recent three-year period:
 - a. NEPA process completion;
 - b. Start of final design;
 - c. Acquisition of a significant portion of the right-of-way;
 - d. Approval of the plans, specifications and estimates.
- D.** Define the Action scenario for each of the analysis years as the transportation system that will result in that year from the implementation of the proposed transportation plan, TIPs

adopted under it, and other expected regionally significant transportation projects in the nonattainment area. The Action scenario will include all of the following except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:

1. All facilities, services, and activities in the Baseline scenario;
 2. Completion of all TCMs and regionally significant transportation projects, including facilities, services, and activities, specifically identified in the proposed transportation plan which will be operational or in effect in the analysis year, except that regulatory TCMs may not be assumed to begin at a future time unless the regulation is already adopted by the enforcing jurisdiction or the TCM is identified in the applicable implementation plan;
 3. All travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which have been fully adopted or funded by the enforcing jurisdiction or sponsoring agency since the last conformity determination on the transportation plan;
 4. The incremental effects of any travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which were adopted or funded prior to the date of the last conformity determination on the transportation plan, but which have been modified since then to be more stringent or effective;
 5. Completion of all expected regionally significant highway and transit projects which are not from a conforming transportation plan and TIP;
 6. Completion of all expected regionally significant non-FHWA/FTA highway and transit projects that have clear funding sources and commitments leading toward their implementation and completion by the analysis year.
- E.** Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios and determine the difference in regional VOC and NO_x emissions (unless the Administrator determines that additional reductions of NO_x would not contribute to attainment) between the two scenarios for ozone nonattainment areas and the difference in CO emissions between the two scenarios for CO nonattainment areas. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. Emissions in milestone years which are between the analysis years may be determined by interpolation.
- F.** This criterion is met if the regional VOC and NO_x emissions (for ozone nonattainment areas) and CO emissions (for CO nonattainment areas) predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and if this can reasonably be expected to be true in the periods between the first milestone year and the analysis years. The regional analysis shall show that the Action scenario contributes to a reduction in emissions from the 1990 emissions by any nonzero amount.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1423. Criteria and Procedures: Interim Period Reductions in Ozone and CO Areas (TIP)

- A.** A TIP shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise pro-

vided in R18-2-1436. It applies to the net effect on emissions of all projects contained in a new or revised TIP. This criterion may be satisfied if a regional emissions analysis is performed as described in subsections (B) through (F).

- B.** Determine the analysis years for which emissions are to be estimated. The first analysis year shall be no later than the first milestone year (1995 in CO nonattainment areas and 1996 in ozone nonattainment areas). The analysis years shall be no more than 10 years apart. The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
- C.** Define the Baseline scenario as the future transportation system that would result from current programs, composed of all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:
1. All in-place regionally significant highway and transit facilities, services, and activities.
 2. All ongoing travel demand management or transportation system management activities.
 3. Completion of all regionally significant transportation projects, regardless of funding source, which are currently under construction or are undergoing right-of-way acquisition, except for hardship acquisition and protective buying; come from the first three years of the previously conforming TIP; or have completed the NEPA process. For the first conformity determination on the TIP after November 24, 1993, a project may not be included in the Baseline scenario if one of the following major steps has not occurred within the most recent three-year period:
 - a. NEPA process completion.
 - b. Start of final design.
 - c. Acquisition of a significant portion of the right-of-way.
 - d. Approval of the plans, specifications, and estimates. Such a project shall be included in the Action scenario, as described in subsection (D).
- D.** Define the Action scenario as the future transportation system that will result from the implementation of the proposed TIP and other expected regionally significant transportation projects in the nonattainment area in the time-frame of the transportation plan. It will include all of the following, except that projects listed in R18-2-1434 and R18-2-1435 need not be explicitly considered:
1. All facilities, services, and activities in the Baseline scenario;
 2. Completion of all TCMs and regionally significant transportation projects, including facilities, services, and activities, included in the proposed TIP, except that regulatory TCMs may not be assumed to begin at a future time unless the regulation is already adopted by the enforcing jurisdiction or the TCM is contained in the applicable implementation plan;
 3. All travel demand management programs and transportation system management activities known to the MPO, but not included in the applicable implementation plan or utilizing any federal funding or approval, which have been fully adopted or funded by the enforcing jurisdiction or sponsoring agency since the last conformity determination on the TIP;
 4. The incremental effects of any travel demand management programs and transportation system management activities known to the MPO, but not included in the

applicable implementation plan or utilizing any federal funding or approval, which were adopted or funded prior to the date of the last conformity determination on the TIP, but which have been modified since then to be more stringent or effective;

5. Completion of all expected regionally significant highway and transit projects which are not from a conforming transportation plan and TIP;
 6. Completion of all expected regionally significant non-FHWA/FTA highway and transit projects that have clear funding sources and commitments leading toward their implementation and completion by the analysis year.
- E. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios, and determine the difference in regional VOC and NO_x emissions (unless the Administrator determines that additional reductions of NO_x would not contribute to attainment) between the two scenarios for ozone nonattainment areas and the difference in CO emissions between the two scenarios for CO nonattainment areas. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. Emissions in milestone years which are between analysis years may be determined by interpolation.
- F. This criterion is met if the regional VOC and NO_x emissions in ozone nonattainment areas and CO emissions in CO nonattainment areas predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and if this can reasonably be expected to be true in the period between the analysis years. The regional analysis shall show that the Action scenario contributes to a reduction in emissions from the 1990 emissions by any nonzero amount.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1424. Criteria and Procedures: Interim Period Reductions for Ozone and CO Areas (Project Not from a Plan and TIP)

A transportation project shall contribute to emissions reductions in ozone and CO nonattainment areas. This criterion applies during the interim and transitional periods only, except as otherwise provided in R18-2-1436. This criterion is satisfied if a regional emissions analysis is performed which meets the requirements of R18-2-1422 and which includes the transportation plan and project in the Action scenario. If the project which is not from a conforming transportation plan and TIP is a modification of a project currently in the plan or TIP, the Baseline scenario shall include the project with its original design concept and scope, and the Action scenario shall include the project with its new design concept and scope.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1425. Criteria and Procedures: Interim Period Reductions for PM₁₀ and NO₂ Areas (Transportation Plan)

- A. A transportation plan shall contribute to emission reductions or shall not increase emissions in PM₁₀ and NO₂ nonattainment areas. This criterion applies only during the interim and transitional periods. It applies to the net effect on emissions of all projects contained in a new or revised transportation plan. This criterion may be satisfied if the requirements of either subsections (B) or (C) are met.
- B. Demonstrate that implementation of the plan and all other regionally significant transportation projects expected in the nonattainment area will contribute to reductions in emissions of PM₁₀ in a PM₁₀ nonattainment area, and of each transportation-related precursor of PM₁₀ in PM₁₀ nonattainment areas if

the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM₁₀ nonattainment problem and has so notified the MPO and USDOT, and of NO_x in an NO₂ nonattainment area, by performing a regional emissions analysis as follows:

1. Determine the analysis years for which emissions are to be estimated. Analysis years shall be no more than 10 years apart. The first analysis year shall be no later than 1996 (for NO₂ areas) or four years and six months following the date of designation (for PM₁₀ areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
 2. Define for each of the analysis years the Baseline scenario, as defined in R18-2-1422(C), and the Action scenario, as defined in R18-2-1422(D).
 3. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios and determine the difference between the two scenarios in regional PM₁₀ emissions in a PM₁₀ nonattainment area (and transportation-related precursors of PM₁₀ in PM₁₀ nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM₁₀ nonattainment problem and has so notified ADOT, the MPO where one exists and USDOT) and in NO_x emissions in an NO₂ nonattainment area. The analysis shall be performed for each of the analysis years according to the requirements of R18-2-1430. The analysis shall address the periods between the analysis years and the periods between 1990, the first milestone year if any, and the first of the analysis years. Emissions in milestone years which are between the analysis years may be determined by interpolation.
 4. Demonstrate that the regional PM₁₀ emissions and PM₁₀ precursor emissions, where applicable, (for PM₁₀ nonattainment areas) and NO_x emissions (for NO₂ nonattainment areas) predicted in the Action scenario are less than the emissions predicted from the Baseline scenario in each analysis year, and that this can reasonably be expected to be true in the periods between the first milestone year (if any) and the analysis years.
- C. Demonstrate that when the projects in the transportation plan and all other regionally significant transportation projects expected in the nonattainment area are implemented, the transportation system's total highway and transit emissions of PM₁₀ in a PM₁₀ nonattainment area (and transportation-related precursors of PM₁₀ in PM₁₀ nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM₁₀ nonattainment problem and has so notified the MPO and USDOT) and of NO_x in an NO₂ nonattainment area will not be greater than baseline levels, by performing a regional emissions analysis as follows:
1. Determine the baseline regional emissions of PM₁₀ and PM₁₀ precursors, where applicable (for PM₁₀ nonattainment areas) and NO_x (for NO₂ nonattainment areas) from highway and transit sources. Baseline emissions are those estimated to have occurred during calendar year 1990, unless the control strategy implementation plan for that

area includes a baseline emissions inventory for a different year.

2. Estimate the emissions of the applicable pollutant or pollutants from the entire transportation system, including projects in the transportation plan and TIP and all other regionally significant transportation projects in the nonattainment area, according to the requirements of R18-2-1430. Emissions shall be estimated for analysis years which are no more than 10 years apart. The first analysis year shall be no later than 1996 (for NO₂ areas) or four years and six months following the date of designation (for PM₁₀ areas). The second analysis year shall be either the attainment year for the area or, if the attainment year is the same as the first analysis year or earlier, the second analysis year shall be at least five years beyond the first analysis year. The last year of the transportation plan's forecast period shall also be an analysis year.
3. Demonstrate that for each analysis year the emissions estimated in subsection (C)(2) are no greater than baseline emissions of PM₁₀ and PM₁₀ precursors, where applicable (for PM₁₀ nonattainment areas) or NO_x (for NO₂ nonattainment areas) from highway and transit sources.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1426. Criteria and Procedures: Interim Period Reductions for PM₁₀ and NO₂ Areas (TIP)

- A. A TIP shall contribute to emission reductions or shall not increase emissions in PM₁₀ and NO₂ nonattainment areas. This criterion applies only during the interim and transitional periods. It applies to the net effect on emissions of all projects contained in a new or revised TIP. This criterion may be satisfied if the requirements of either subsection (B) or subsection (C) are met.
- B. Demonstrate that implementation of the plan and TIP and all other regionally significant transportation projects expected in the nonattainment area will contribute to reductions in emissions of PM₁₀ in a PM₁₀ nonattainment area (and transportation-related precursors of PM₁₀ in PM₁₀ nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM₁₀ nonattainment problem and has so notified the MPO and USDOT) and of NO_x in an NO₂ nonattainment area, by performing a regional emissions analysis as follows:
 1. Determine the analysis years for which emissions are to be estimated, according to the requirements of R18-2-1425(B)(1).
 2. Define for each of the analysis years the Baseline scenario, as defined in R18-2-1423(C), and the Action scenario, as defined in R18-2-1423(D).
 3. Estimate the emissions predicted to result in each analysis year from travel on the transportation systems defined by the Baseline and Action scenarios as required by R18-2-1425(B)(3), and make the demonstration required by R18-2-1425(B)(4).
- C. Demonstrate that when the projects in the transportation plan and TIP and all other regionally significant transportation projects expected in the area are implemented, the transportation system's total highway and transit emissions of PM₁₀ in a PM₁₀ nonattainment area (and transportation-related precursors of PM₁₀ in PM₁₀ nonattainment areas if the EPA Regional Administrator or the Director of ADEQ has made a finding that such precursor emissions from within the nonattainment area are a significant contributor to the PM₁₀ nonattainment

problem and has so notified the MPO and USDOT) and of NO_x in an NO₂ nonattainment area will not be greater than baseline levels, by performing a regional emissions analysis as required by R18-2-1425(C).

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1427. Criteria and Procedures: Interim Period Reductions for PM₁₀ and NO₂ Areas (Project Not from a Plan and TIP)

A transportation project which is not from a conforming transportation plan and TIP shall contribute to emission reductions or shall not increase emissions in PM₁₀ and NO₂ nonattainment areas. This criterion applies during the interim and transitional periods only. This criterion is met if a regional emissions analysis is performed which meets the requirements of R18-2-1425 and which includes the transportation plan and project in the Action scenario. If the project which is not from a conforming transportation plan and TIP is a modification of a project currently in the transportation plan or TIP, and R18-2-1425(B) is used to demonstrate satisfaction of this criterion, the Baseline scenario shall include the project with its original design concept and scope, and the Action scenario shall include the project with its new design concept and scope.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1428. Transition from the Interim Period to the Control Strategy Period

- A. For areas which submit a control strategy implementation plan revision after November 24, 1993:
 1. The transportation plan and TIP shall be demonstrated to conform according to transitional period criteria and procedures by one year from the date the CAA requires submission of such control strategy implementation plan revision. Otherwise, the conformity status of the transportation plan and TIP will lapse, and no new project-level conformity determinations may be made.
 - a. The conformity of new transportation plans and TIPs may be demonstrated according to Phase II interim period criteria and procedures for 90 days following submission of the control strategy implementation plan revision, provided the conformity of such transportation plans and TIPs is redetermined according to transitional period criteria and procedures as required in subsection (A)(1) and such transportation plans and TIPs are consistent with the motor vehicle emissions budget in the applicable implementation plan or any previously submitted control strategy implementation plan revision.
 - b. Beginning 90 days after submission of the control strategy implementation plan revision, new transportation plans and TIPs shall demonstrate conformity according to transitional period criteria and procedures.
 2. If EPA disapproves the submitted control strategy implementation plan revision and so notifies the state, the MPO where one exists, and USDOT, which initiates the sanction process under CAA §§ 179 or 110(m), the conformity status of the transportation plan and TIP shall lapse 120 days after EPA's disapproval, and no new project-level conformity determinations may be made. No new transportation plan, TIP, or project may be found to conform until another control strategy implementation plan revision is submitted and conformity is demonstrated according to transitional period criteria and procedures.

3. Notwithstanding subsection (A)(2), if EPA disapproves the submitted control strategy implementation plan revision but determines that the control strategy contained in the revision would have been considered approvable with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (A)(1) shall apply for 12 months following the date of disapproval. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of disapproval unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
- B.** For areas which have not submitted a control strategy implementation plan revision:
1. For areas whose CAA deadline for submission of the control strategy implementation plan revision is after November 24, 1993, and EPA has notified the state, the MPO where one exists, and USDOT of the state's failure to submit a control strategy implementation plan revision, which initiates the sanction process under CAA §§ 179 or 110(m) all of the following shall apply:
 - a. No new transportation plans or TIPs may be found to conform beginning 120 days after the CAA deadline.
 - b. The conformity status of the transportation plan and TIP shall lapse one year after the CAA deadline, and no new project-level conformity determinations may be made.
 2. For areas whose CAA deadline for submission of the control strategy implementation plan was before November 24, 1993, and EPA has made a finding of failure to submit a control strategy implementation plan revision, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
 - a. No new transportation plans or TIPs may be found to conform beginning March 24, 1994.
 - b. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, and no new project-level conformity determinations may be made.
- C.** For areas which have not submitted a complete control strategy implementation plan revision:
1. For areas where EPA notifies the state, the MPO where one exists, and USDOT after November 24, 1993, that the control strategy implementation plan revision submitted by the state is incomplete, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
 - a. No new transportation plans or TIPs may be found to conform beginning 120 days after EPA's incompleteness finding.
 - b. The conformity status of the transportation plan and TIP shall lapse one year after the CAA deadline, and no new project-level conformity determinations may be made.
 - c. Notwithstanding subsections (C)(1)(a) and (b), if EPA notes in its incompleteness finding that the submittal would have been considered complete with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (A)(1) shall apply for a period of 12 months following the date of the incompleteness determination. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of the incompleteness determination unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
 2. For areas where EPA has determined before November 24, 1993, that the control strategy implementation plan revision is incomplete, which initiates the sanction process under CAA §§ 179 or 110(m), all of the following apply unless the failure has been remedied and acknowledged by a letter from the EPA Regional Administrator:
 - a. No new transportation plans or TIPs may be found to conform beginning March 24, 1994.
 - b. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, and no new project-level conformity determinations may be made.
 - c. Notwithstanding subsections (C)(2)(a) and (b), if EPA notes in its incompleteness finding that the submittal would have been considered complete with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (D)(1) shall apply for a period of 12 months following the date of the incompleteness determination. The conformity status of the transportation plan and TIP shall lapse 12 months following the date of the incompleteness determination unless another control strategy implementation plan revision is submitted to EPA and found to be complete.
- D.** For areas which submitted a control strategy implementation plan before November 24, 1993:
1. The transportation plan and TIP shall have been demonstrated to conform according to transitional period criteria and procedures by November 25, 1994. Otherwise, their conformity status will lapse, and no new project-level conformity determinations may be made. From and after February 22, 1994, new transportation plans and TIPs shall demonstrate conformity according to transitional period criteria and procedures.
 2. If EPA has disapproved the most recent control strategy implementation plan submission, the conformity status of the transportation plan and TIP shall lapse March 24, 1994, and no new project-level conformity determinations may be made. No new transportation plans, TIPs, or projects may be found to conform until another control strategy implementation plan revision is submitted and conformity is demonstrated according to transitional period criteria and procedures.
 3. Notwithstanding subsection (D)(2), if EPA has disapproved the submitted control strategy implementation plan revision but determines that the control strategy contained in the revision would have been considered approvable with respect to requirements for emission reductions if all committed measures had been submitted in enforceable form as required by CAA § 110(a)(2)(A), the provisions of subsection (D)(1) shall apply until November 25, 1994. The conformity status of the transportation plan and TIP shall lapse November 25, 1994, unless another control strategy implementation plan revision is submitted to EPA and found to be complete.

- E. If the currently conforming transportation plan and TIP have not been demonstrated to conform according to transitional period criteria and procedures, the requirements of subsections (E)(1) and (2) shall be met.
- Before a FHWA or FTA project which is regionally significant and increases single-occupant vehicle capacity (a new general purpose highway on a new location or adding general purpose lanes) may be found to conform, ADEQ shall be consulted on how the emissions which the existing transportation plan and TIP's conformity determination estimates for the Action scenario, as required by R18-2-1422 through R18-2-1427, compare to the motor vehicle emissions budget in the implementation plan submission or the projected motor vehicle emissions budget in the implementation plan under development.
 - In the event of unresolved disputes on such project-level conformity determinations, ADEQ may escalate the issue to the governor consistent with the procedure in R18-2-1405, which applies for ADEQ comments on a conformity determination.
- F. Redetermination of conformity of the existing transportation plan and TIP according to the transitional period criteria and procedures:
- The redetermination of the conformity of the existing transportation plan and TIP according to transitional period criteria and procedures (as required by subsections (A)(1) and (D)(1)) does not require new emissions analysis and does not have to satisfy the requirements of R18-2-1410 and R18-2-1411 if all of the following are met:
 - The control strategy implementation plan revision submitted to EPA uses the MPO's modeling of the existing transportation plan and TIP for its projections of motor vehicle emissions.
 - The control strategy implementation plan does not include any transportation projects which are not included in the transportation plan and TIP.
 - A redetermination of conformity as described in subsection (F)(1) is not considered a conformity determination for the purposes of R18-2-1404(E) or R18-2-1404(I) regarding the maximum intervals between conformity determinations. Conformity shall be determined according to all the applicable criteria and procedures of R18-2-1409 within three years of the last determination which did not rely on subsection (F)(1).
- G. Ozone nonattainment areas:
- The requirements of subsection (B)(1) apply if a serious or above ozone nonattainment area has not submitted the implementation plan revisions which CAA §§ 182(c)(2)(A) and 182(c)(2)(B) require to be submitted to EPA November 15, 1994, even if the area has submitted the implementation plan revision which CAA § 182(b)(1) requires to be submitted to EPA November 15, 1993.
 - The requirements of subsection (B)(1) apply if a moderate ozone nonattainment area which is using photochemical dispersion modeling to demonstrate the "specific annual reductions as necessary to attain" required by CAA § 182(b)(1), and which has permission from EPA to delay submission of such demonstration until November 15, 1994, does not submit such demonstration by that date. The requirements of subsection (B)(1) apply in this case even if the area has submitted the 15% emission reduction demonstration required by CAA § 182(b)(1).
 - The requirements of subsection (A) apply when the implementation plan revisions required by CAA §§ 182(c)(2)(A) and 182(c)(2)(B) are submitted.
- H. Nonattainment areas which are not required to demonstrate reasonable further progress and attainment. If an area listed in R18-2-1436 submits a control strategy implementation plan revision, the requirements of subsections (A) and (E) apply. Because the areas listed in R18-2-1436 are not required to demonstrate reasonable further progress and attainment and therefore have no CAA deadline, the provisions of subsection (B) do not apply to these areas at any time.
- I. If a control strategy implementation plan revision is not submitted to EPA but a maintenance plan required by CAA § 175A is submitted to EPA, the requirements of subsection (A) or (D) apply, with the maintenance plan submission treated as a "control strategy implementation plan revision" for the purposes of those requirements.
- J. This Section does not become effective until June 1, 1996.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1429. Requirements for Adoption or Approval of Projects by Recipients of Funds Designated under 23 U.S.C. or the Federal Transit Act

- A. This Section shall not apply to any of the following:
- A transportation project that is a street with a lower classification than a collector street, as specified in the most recent federal classification map for the region.
 - An exempt project listed in R18-2-1434.
- B. No recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act shall adopt or approve a transportation project, regardless of funding source, without first determining whether the transportation project is regionally significant. In making this determination, the recipient shall not take any action that is inconsistent with the procedures developed by ADOT or the MPO pursuant to R18-2-1405(R).
- C. No recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act shall adopt or approve a regionally significant highway or transit project, regardless of funding source, unless both of the following apply:
- There is a currently conforming transportation plan and TIP consistent with the requirements of R18-2-1414.
 - The requirements of one of the following are met:
 - The project comes from a conforming plan and program consistent with the requirements of R18-2-1415.
 - The project is included in the regional emissions analysis supporting the currently conforming TIP's conformity determination, even if the project is not strictly "included" in the TIP for the purposes of MPO project selection or endorsement, and the project's design concept and scope have not changed significantly from those which were included in the regional emissions analysis, or in a manner which would significantly impact use of the facility.
 - During the control strategy or maintenance period, the project is consistent with the motor vehicle emissions budget in the applicable implementation plan consistent with the requirements of R18-2-1420.
 - During Phase II of the interim period, the project contributes to emissions reductions or does not increase emissions consistent with the requirements of R18-2-1424 (in ozone and CO nonattainment areas) or R18-2-1427 (in PM₁₀ and NO₂ nonattainment areas).
 - During the transitional period, the project satisfies the requirements of both subsections (1)(2)(c) and (d).

- D. Pursuant to the consultation process established in R18-2-1405(O), ADOT or the MPO where one exists shall, not later than September 1, 1995, develop and make available the procedures to be used by any recipient of federal funds designated under 23 U.S.C. or the Federal Transit Act to comply with subsections (B) and (C). These procedures may be revised periodically, as needed, using the same consultation process. At a minimum, such procedures shall provide for the following:
1. The minimum information required by the recipient to make determinations in compliance with subsections (B) and (C);
 2. The time-frames for action to be taken by the recipient;
 3. For transportation projects determined to be regionally significant, the documentation necessary to demonstrate that the requirements of 23 CFR 450.324(e), (g), and (h) have been met.
- E. After a transportation project is adopted or approved, no subsequent act defined as adoption or approval under this Section or under procedures developed to implement this Section shall be subject to subsection (B) or (C), unless project's design concept or scope have changed significantly since the project was first adopted or approved.
- F. A regionally significant transportation project found to be in conformity, either as a result of a TIP or a separate project analysis, shall retain such conformity finding, irrespective of subsequent analysis, unless the project fails to meet the conditions of its approval or undergoes a significant change in scope. In any event, a conformity determination shall lapse after three years in the absence of a redetermination; except that a project undergoing NEPA approval shall retain its conformity determination, unless none of the following major steps has occurred within the most recent three-year period:
1. NEPA process completion;
 2. Start of final design;
 3. Acquisition of a significant portion of the right-of-way;
 4. Approval of the plans, specifications, and estimates.
- Historical Note**
Adopted effective June 15, 1995 (Supp. 95-2).
- R18-2-1430. Procedures for Determining Regional Transportation-related Emissions**
- A. The following are general requirements for determining regional transportation-related emissions:
1. The regional emissions analysis for the transportation plan, TIP, or project not from a conforming plan and TIP shall include all regionally significant transportation projects expected in the nonattainment or maintenance area, including FHWA or FTA projects proposed in the transportation plan and TIP and all other regionally significant transportation projects which are disclosed to ADOT or the MPO as required by R18-2-1405. Projects which are not regionally significant are not required to be explicitly modeled, but VMT from such projects shall be estimated in accordance with reasonable professional practice. The effects of TCMs and similar projects that are not regionally significant may also be estimated in accordance with reasonable professional practice.
 2. The emissions analysis may not include for emissions reduction credit any TCMs which have been delayed beyond the scheduled date until such time as implementation has been assured. If the TCM has been partially implemented and it can be demonstrated that it is providing quantifiable emission reduction benefits, the emissions analysis may include that emissions reduction credit.
3. Emissions reduction credit from projects, programs, or activities which require a regulation in order to be implemented may not be included in the emissions analysis unless the regulation is already adopted by the enforcing jurisdiction. Adopted regulations are required for demand management strategies for reducing emissions which are not specifically identified in the applicable implementation plan, and for control programs which are external to the transportation system itself, such as tailpipe or evaporative emission standards, limits on gasoline volatility, inspection and maintenance programs, and oxygenated or reformulated gasoline or diesel fuel. A regulatory program may also be considered to be adopted if an opt-in to a federally enforced program has been approved by EPA, if EPA has promulgated the program (if the control program is a federal responsibility, such as tailpipe standards), or if the CAA requires the program without need for individual state action and without any discretionary authority for EPA to set its stringency, delay its effective date, or not implement the program.
 4. Notwithstanding subsection (A)(3), during the transitional period, control measures or programs which are committed to in an implementation plan submission as described in R18-2-1418 through R18-2-1420, but which has not received final EPA action in the form of a finding of incompleteness, approval, or disapproval, may be assumed for emission reduction credit for the purpose of demonstrating that the requirements of R18-2-1418 through R18-2-1420 are satisfied.
 5. A regional emissions analysis for the purpose of satisfying the requirements of R18-2-1422 through R18-2-1424 may account for the programs in subsection (A)(4), but the same assumptions about these programs shall be used for both the Baseline and Action scenarios.
 6. Ambient temperatures shall be consistent with those used to establish the emissions budget in the applicable implementation plan. Factors other than temperatures, for example the fraction of travel in a hot stabilized engine mode, may be modified after interagency consultation according to R18-2-1405 if the newer estimates incorporate additional or more geographically specific information or represent a logically estimated trend in such factors beyond the period considered in the applicable implementation plan.
- B. For serious, severe, and extreme ozone nonattainment areas and serious carbon monoxide areas after January 1, 1995, estimates of regional transportation-related emissions used to support conformity determinations shall be made according to procedures which meet the requirements in subsections (B)(1) through (5).
1. A network-based transportation demand model or models relating travel demand and transportation system performance to land-use patterns, population demographics, employment, transportation infrastructure, and transportation policies shall be used to estimate travel within the metropolitan planning area of the nonattainment area. Such a model shall possess all of the following attributes:
 - a. The modeling methods and the functional relationships used in the model shall in all respects be in accordance with acceptable professional practice and reasonable for purposes of emission estimation.
 - b. The network-based model shall be validated against ground counts for a base year that is not more than 10 years prior to the date of the conformity determination. Land use, population, and other inputs shall

- be based on the best available information and appropriate to the validation base year.
- c. For peak-hour or peak-period traffic assignments, a capacity sensitive assignment methodology shall be used.
 - d. Zone-to-zone travel times used to distribute trips between origin and destination pairs shall be in reasonable agreement with the travel times which result from the process of assignment of trips to network links. Where use of transit currently is anticipated to be a significant factor in satisfying transportation demand, these times should also be used for modeling mode splits.
 - e. Free-flow speeds on network links shall be based on empirical observations.
 - f. Peak and off-peak travel demand and travel times shall be provided.
 - g. Trip distribution and mode choice shall be sensitive to pricing, where pricing is a significant factor, if the network model is capable of such determinations and the necessary information is available.
 - h. The model shall utilize and document a logical correspondence between the assumed scenario of land development and use and the future transportation system for which emissions are being estimated. Reliance on a formal land-use model is not specifically required but is encouraged.
 - i. A dependence of trip generation on the accessibility of destinations via the transportation system, including pricing, is strongly encouraged but not specifically required, unless the network model is capable of such determinations and the necessary information is available.
 - j. A dependence of regional economic and population growth on the accessibility of destinations via the transportation system is strongly encouraged but not specifically required, unless the network model is capable of such determinations and the necessary information is available.
 - k. Consideration of emissions increases from construction-related congestion is not specifically required.
2. Highway Performance Monitoring System (HPMS) estimates of vehicle miles traveled shall be considered the primary measure of vehicle miles traveled within the portion of the nonattainment or maintenance area and for the functional classes of roadways included in HPMS, for urban areas which are sampled on a separate urban area basis. A factor or factors shall be developed to reconcile and calibrate the network-based model estimates of vehicle miles traveled in the base year of its validation to the HPMS estimates for the same period, and these factors shall be applied to model estimates of future vehicle miles traveled. In this factoring process, consideration will be given to differences in the facility coverage of the HPMS and the modeled network description. Departure from these procedures is permitted with the concurrence of USDOT and EPA.
 3. Reasonable methods shall be used to estimate nonattainment area vehicle travel on off-network roadways within the urban transportation planning area and on roadways outside the urban transportation planning area.
 4. Reasonable methods in accordance with good practice shall be used to estimate traffic speeds and delays in a manner that is sensitive to the estimated volume of travel on each roadway segment represented in the network model.
- C. For areas which are not serious, severe, or extreme ozone non-attainment areas or serious carbon monoxide areas, or before January 1, 1995:
 1. Procedures which satisfy some or all of the requirements of subsection (A) shall be used in all areas not subject to subsection (A) in which those procedures have been the previous practice of the MPO.
 2. Regional emissions may be estimated by methods which do not explicitly or comprehensively account for the influence of land use and transportation infrastructure on vehicle miles traveled and traffic speeds and congestion. Such methods shall account for VMT growth by extrapolating historical VMT or projecting future VMT by considering growth in population and historical growth trends for vehicle miles travelled per person. These methods shall also consider future economic activity, transit alternatives, and transportation system policies.
 - D. This subsection applies to any nonattainment or maintenance area or any portion thereof which does not have a metropolitan transportation plan or TIP and whose projects are not part of the emissions analysis of any MPO's metropolitan transportation plan or TIP (because the nonattainment or maintenance area or portion thereof does not contain a metropolitan planning area or portion of a metropolitan planning area and is not part of a Metropolitan Statistical Area or Consolidated Metropolitan Statistical Area which is or contains a nonattainment or maintenance area).
 1. Conformity demonstrations for projects in these areas may satisfy the requirements of R18-2-1420, R18-2-1424, and R18-2-1427 with one regional emissions analysis which includes all the regionally significant transportation projects in the nonattainment or maintenance area or portion thereof.
 2. The requirements of R18-2-1420 shall be satisfied according to the procedures in R18-2-1420(C), with references to the "transportation plan" taken to mean the statewide transportation plan.
 3. The requirements of R18-2-1424 and R18-2-1427 which reference "transportation plan" or "TIP" shall be taken to mean those projects in the statewide transportation plan or statewide TIP which are in the nonattainment or maintenance area or portion thereof.
 4. The requirement of R18-2-1429(A)(2) shall be satisfied if all of the following are met:
 - a. The project is included in the regional emissions analysis which includes all regionally significant highway and transportation projects in the nonattainment or maintenance area or portion thereof and supports the most recent conformity determination made according to the requirements of R18-2-1420, R18-2-1424 or R18-2-1427 (as modified by subsections (D)(2) and (D)(3)), as appropriate for the time period and pollutant.
 - b. The project's design concept and scope have not changed significantly from those which were included in the regional emissions analysis or in a manner which would significantly impact use of the facility.
 - E. For areas in which the implementation plan does not identify construction-related fugitive PM₁₀ as a contributor to the non-attainment problem, the fugitive PM₁₀ emissions associated with highway and transit project construction are not required to be considered in the regional emissions analysis.
 - F. In PM₁₀ nonattainment and maintenance areas with implementation plans which identify construction-related fugitive PM₁₀ as a contributor to the nonattainment problem, the

regional PM₁₀ emissions analysis shall consider construction-related fugitive PM₁₀ and shall account for the level of construction activity, the fugitive PM₁₀ control measures in the applicable implementation plan, and the dust-producing capacity of the proposed activities.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1431. Procedures for Determining Localized CO and PM₁₀ Concentrations (Hot-spot Analysis)

- A. In the following cases, CO hot-spot analyses shall be based on the applicable air quality models, data bases, and other requirements specified in 40 CFR 51 Appendix W (“Guideline on Air Quality Models (Revised)” (1988), supplement (A) (1987) and supplement (B) (1993), EPA publication no. 450/2-78-027R, incorporated by reference and on file with the Department and with the Secretary of State), unless, after the interagency consultation process described in R18-2-1405 and with the approval of the EPA Regional Administrator, these models, data bases, and other requirements are determined to be inappropriate:
 1. For projects in or affecting locations, areas, or categories of sites which are identified in the applicable implementation plan as sites of current violation or possible current violation;
 2. For those intersections at Level-of-Service D, E, or F, or those that will change to Level-of-Service D, E, or F because of increased traffic volumes related to a new project in the vicinity;
 3. For any project involving or affecting any of the intersections which the applicable implementation plan identifies as the top three intersections in the nonattainment or maintenance area based on the highest traffic volumes;
 4. For any project involving or affecting any of the intersections which the applicable implementation plan identifies as the top three intersections in the nonattainment or maintenance area based on the worst Level-of-Service;
 5. Where use of the “Guideline” models is practicable and reasonable given the potential for violations.
- B. In cases other than those described in subsection (A), other quantitative methods may be used if they represent reasonable and common professional practice.
- C. CO hot-spot analyses shall include the entire project and may be performed only after the major design features which will significantly impact CO concentrations have been identified. The background concentration may be estimated using the ratio of future to current traffic multiplied by the ratio of future to current emission factors.
- D. PM₁₀ hot-spot analysis shall be performed for projects which are located at sites at which violations have been verified by monitoring, and at sites which have essentially identical vehicle and roadway emission and dispersion characteristics (including sites near one at which a violation has been monitored). The projects which require PM₁₀ hot-spot analysis shall be determined through the interagency consultation process required in R18-2-1405. In PM₁₀ nonattainment and maintenance areas, new or expanded bus and rail terminals and transfer points which increase the number of diesel vehicles congregating at a single location require hot-spot analysis. USDOT may choose to make a categorical conformity determination on bus and rail terminals or transfer points based on appropriate modeling of various terminal sizes, configurations, and activity levels. The requirements of this subsection for quantitative hot-spot analysis will not take effect until EPA releases modeling guidance on this subject and announces in the Federal Register that these requirements are in effect.

- E. Hot-spot analysis assumptions shall be consistent with those in the regional emissions analysis for those inputs which are required for both analyses.
- F. PM₁₀ or CO mitigation or control measures shall be assumed in the hot-spot analysis only where there are enforceable written commitments from the project sponsor or operator to the implementation of such measures, as required by R18-2-1433(A).
- G. CO and PM₁₀ hot-spot analyses are not required to consider construction-related activities which cause temporary increases in emissions. Each site which is affected by construction-related activities shall be considered separately, using established “Guideline” methods. Temporary increases are defined as those which occur only during the construction phase and last five years or less at any individual site.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1432. Using the Motor Vehicle Emissions Budget in the Applicable Implementation Plan or Implementation Plan Submission

- A. In interpreting an applicable implementation plan or implementation plan submission with respect to its motor vehicle emissions budget, ADOT or the MPO where one exists and USDOT may not infer additions to the budget that are not explicitly intended by the implementation plan or submission. Unless the implementation plan explicitly quantifies the amount by which motor vehicle emissions could be higher while still allowing a demonstration of compliance with the milestone, attainment, or maintenance requirement and explicitly states an intent that some or all of this additional amount should be available to ADOT or the MPO and USDOT in the emission budget for conformity purposes, ADOT or the MPO may not interpret the budget to be higher than the implementation plan’s estimate of future emissions. This applies in particular to applicable implementation plans or submissions which demonstrate that after implementation of control measures in the implementation plan any of the following apply:
 1. Emissions from all sources will be less than the total emissions that would be consistent with a required demonstration of an emissions reduction milestone.
 2. Emissions from all sources will result in achieving attainment prior to the attainment deadline or ambient concentrations in the attainment deadline year will be lower than needed to demonstrate attainment.
 3. Emissions will be lower than needed to provide for continued maintenance.
- B. If an applicable implementation plan submitted before November 24, 1993, demonstrates that emissions from all sources will be less than the total emissions that would be consistent with attainment and quantifies that “safety margin,” the state may submit a SIP revision which assigns some or all of this safety margin to highway and transit mobile sources for the purposes of conformity. Such a SIP revision, once it is endorsed by the governor and has been subject to a public hearing, may be used for the purposes of transportation conformity before it is approved by EPA.
- C. A conformity demonstration shall not trade emissions among budgets which the applicable implementation plan or implementation plan submission allocates for different pollutants or precursors, or among budgets allocated to motor vehicles and other sources, without a SIP revision or a SIP which establishes mechanisms for such trades.
- D. If the applicable implementation plan or implementation plan submission estimates future emissions by geographic subarea of the nonattainment area, ADOT or the MPO where one

exists and USDOT are not required to consider this to establish subarea budgets, unless the applicable implementation plan or implementation plan submission explicitly indicates an intent to create such subarea budgets for the purposes of conformity.

- E. If a nonattainment area includes more than one MPO, the SIP may establish motor vehicle emissions budgets for each MPO. Otherwise, the MPOs shall collectively make a conformity determination for the entire nonattainment area.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1433. Enforceability of Design Concept and Scope and Project-level Mitigation and Control Measures

- A. Prior to determining that a transportation project is in conformity, ADOT, the MPO where one exists, other recipient of funds designated under 23 U.S.C. or the Federal Transit Act, FHWA, or FTA shall obtain from the project sponsor or operator enforceable written commitments to implement in the construction of the project and operation of the resulting facility or service any project-level mitigation or control measures which are identified as conditions for NEPA process completion with respect to local PM₁₀ or CO impacts. Before making conformity determinations enforceable written commitments shall also be obtained for project-level mitigation or control measures which are conditions for making conformity determinations for a transportation plan or TIP and included in the project design concept and scope which is used in the regional emissions analysis required by R18-2-1418 through R18-2-1420 and R18-2-1422 through R18-2-1424 or used in the project-level hot-spot analysis required by R18-2-1416 and R18-2-1421.
- B. Project sponsors voluntarily committing to mitigation measures to facilitate positive conformity determinations shall provide enforceable written commitments and comply with the obligations of such commitments.
- C. Enforceable written commitments to mitigation or control measures shall be obtained prior to a positive conformity determination, and that project sponsors shall comply with such commitments.
- D. During the control strategy and maintenance periods, if ADOT, the MPO, or project sponsor believes the mitigation or control measure is no longer necessary for conformity, the project sponsor or operator may be relieved of its obligation to implement the mitigation or control measure if it can demonstrate that the requirements of R18-2-1416, R18-2-1418, and R18-2-1419 are satisfied without the mitigation or control measure and so notifies the agencies involved in the inter-agency consultation process required under R18-2-1405. ADOT or the MPO where one exists and USDOT shall confirm that the transportation plan and TIP still satisfy the requirements of R18-2-1418 and R18-2-1419 and that the project still satisfies the requirements of R18-2-1416, and therefore that the conformity determinations for the transportation plan, TIP, and project are still valid.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1434. Exempt Projects

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in Table 2 are exempt from the requirement that a conformity determination be made. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in Table 2 is not exempt if ADOT or the MPO where one exists in consultation with other agencies pursuant to R18-2-1405, the EPA, and the FHWA (in the case of a highway project) or the

FTA (in the case of a transit project) concur that it has potentially adverse emissions impacts for any reason. States and MPOs shall ensure that exempt projects do not interfere with TCM implementation.

Table 2. Exempt Projects
Exempt Projects
SAFETY

1. Railroad or highway crossing.
2. Hazard elimination program.
3. Safer non-federal-aid system roads.
4. Shoulder improvements.
5. Increasing sight distance.
6. Safety improvement program.
7. Traffic control devices and operating assistance other than signalization projects.
8. Railroad or highway crossing warning devices.
9. Guardrails, median barriers, crash cushions.
10. Pavement resurfacing or rehabilitation.
11. Pavement marking demonstration.
12. Emergency relief (23 U.S.C. 125).
13. Fencing.
14. Skid treatments.
15. Safety roadside rest areas.
16. Adding medians.
17. Truck climbing lanes outside the urbanized area.
18. Lighting improvements.
19. Widening narrow pavements or reconstructing bridges (no additional travel lanes).
20. Emergency truck pullovers.

MASS TRANSIT

1. Operating assistance to transit agencies.
2. Purchase of support vehicles.
3. Rehabilitation of transit vehicles. (In PM₁₀ nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.)
4. Purchase of office, shop, and operating equipment for existing facilities.
5. Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.).
6. Construction or renovation of power, signal, and communications systems.
7. Construction of small passenger shelters and information kiosks.
8. Reconstruction or renovation of transit buildings and structures (e.g., rail or bus buildings, storage and maintenance facilities, stations, terminals, and ancillary structures).
9. Rehabilitation or reconstruction of track structures, track, and trackbed in existing rights-of-way.
10. Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet. (In PM₁₀ nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.)
11. Construction of new bus or rail storage or maintenance facilities categorically excluded in 23 CFR 771.

AIR QUALITY

1. Continuation of ride-sharing and van-pooling promotion activities at current levels.
2. Bicycle and pedestrian facilities.

OTHER

1. Specific activities which do not involve or lead directly to construction, such as:
 - a. Planning and technical studies.
 - b. Grants for training and research programs.

- c. Planning activities conducted pursuant to Titles 23 and 49 U.S.C.
- d. Federal-aid systems revisions.
- 2. Engineering to assess social, economic and environmental effects of the proposed action or alternatives to that action.
- 3. Noise attenuation.
- 4. Advance land acquisitions (23 CFR 712 or 23 CFR 771).
- 5. Acquisition of scenic easements.
- 6. Plantings, landscaping, etc.
- 7. Sign removal.
- 8. Directional and informational signs.
- 9. Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities).
- 10. Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1435. Projects Exempt from Regional Emissions Analyses

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in Table 3 are exempt from regional emissions analysis requirements. The local effects of these projects with respect to CO or PM₁₀ concentrations shall be considered to determine if a hot-spot analysis is required prior to making a project-level conformity determination. These projects may then proceed to the project development process even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in Table 3 is not exempt from regional emissions analysis if the MPO in consultation with other agencies pursuant to R18-2-1405, the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potential regional impacts for any reason.

Table 3. Projects Exempt From Regional Emissions Analyses

Projects Exempt From Regional Emissions Analyses

- 1. Intersection channelization projects.
- 2. Intersection signalization projects at individual intersections.
- 3. Interchange reconfiguration projects.
- 4. Changes in vertical and horizontal alignment.
- 5. Truck size and weight inspection stations.
- 6. Bus terminals and transfer points.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1436. Special Provisions for Nonattainment Areas Which are Not Required to Demonstrate Reasonable Further Progress and Attainment

- A. This Section applies in the following areas:
 - 1. Rural transport ozone nonattainment areas,
 - 2. Marginal ozone areas,
 - 3. Submarginal ozone areas,
 - 4. Transitional ozone areas,
 - 5. Incomplete data ozone areas,
 - 6. Moderate CO areas with a design value of 12.7 ppm or less,
 - 7. Not classified CO areas.
- B. The criteria and procedures in R18-2-1422 through R18-2-1424 will remain in effect throughout the control strategy period for transportation plans, TIPs, and projects (not from a conforming plan and TIP) in lieu of the procedures in R18-2-1418 through R18-2-1420, except as otherwise provided in subsection (C).

- C. The state or MPO may voluntarily develop an attainment demonstration and corresponding motor vehicle emissions budget like those required in areas with higher nonattainment classifications. In this case, the state shall submit an implementation plan revision which contains that budget and attainment demonstration. Once EPA has approved this implementation plan revision, the procedures in R18-2-1418 through R18-2-1420 apply in lieu of the procedures in R18-2-1422 through R18-2-1424.

Historical Note

Adopted effective June 15, 1995 (Supp. 95-2).

R18-2-1437. Reserved**R18-2-1438. General Conformity for Federal Actions**

The following subparts of 40 CFR 93, Determining Conformity of Federal Actions to State or Federal Implementation Plans, and all accompanying appendices, adopted as of July 1, 1994, and no future editions, are incorporated by reference. These standards are on file with the Office of the Secretary of State and with the Department and shall be applied by the Department.

Subpart B - Determining Conformity of General Federal Actions to State or Federal Implementation Plans (58 FR 63253, November 30, 1993).

Historical Note

Adopted effective January 31, 1995 (Supp. 95-1).

ARTICLE 15. FOREST AND RANGE MANAGEMENT BURNS**R18-2-1501. Definitions**

In addition to the definitions contained in A.R.S. § 49-501 and R18-2-101, in this Article:

- 1. "Activity fuels" means those fuels created by human activities such as thinning or logging.
- 2. "ADEQ" means the Department of Environmental Quality.
- 3. "Annual emissions goal" means the annual establishment in cooperation with the F/SLMs, under R18-2-1503(G), of a planned quantifiable value of emissions reduction from prescribed fires and fuels management activities.
- 4. "Burn plan" means the ADEQ form that includes information on the conditions under which a burn will occur with details of the burn and smoke management prescriptions.
- 5. "Burn prescription" means, with regard to a burn project, the pre-determined area, fuel, and weather conditions required to attain planned resource management objectives.
- 6. "Burn project" means an active or planned prescribed burn, including a wildland fire use incident.
- 7. "Duff" means forest floor material consisting of decomposing needles and other natural materials.
- 8. "Emission reduction techniques (ERT)" means methods for controlling emissions from prescribed fires to minimize the amount of emission output per unit of area burned.
- 9. "Federal land manager (FLM)" means any department, agency, or agent of the federal government, including the following:
 - a. United States Forest Service,
 - b. United States Fish and Wildlife Service,
 - c. National Park Service,
 - d. Bureau of Land Management,
 - e. Bureau of Reclamation,
 - f. Department of Defense,
 - g. Bureau of Indian Affairs, and

- h. Natural Resources Conservation Service.
- 10. “F/SLM” means a federal land manager or a state land manager.
- 11. “Local fire management officer” means a person designated by a F/SLM as responsible for fire management in a local district or area.
- 12. “Mop-up” means the act of extinguishing or removing burning material from a prescribed fire to reduce smoke impacts.
- 13. “National Wildfire Coordinating Group” means the national inter-agency group of federal and state land managers that shares similar wildfire suppression programs and has established standardized inter-agency training courses and qualifications for fire management positions.
- 14. “Non-burning alternatives to fire” means techniques that replace fire for at least five years as a means to treat activity fuels created to achieve a particular land management objective (e.g., reduction of fuel-loading, manipulation of fuels, enhancement of wildlife habitat, and ecosystem restoration). These alternatives are not used in conjunction with fire. Techniques used in conjunction with fire are referred to as emission reduction techniques (ERTs).
- 15. “Planned resource management objectives” means public interest goals in support of land management agency objectives including silviculture, wildlife habitat management, grazing enhancement, fire hazard reduction, wilderness management, cultural scene maintenance, weed abatement, watershed rehabilitation, vegetative manipulation, and disease and pest prevention.
- 16. “Prescribed burning” means the controlled application of fire to wildland fuels that are in either a natural or modified state, under certain burn and smoke management prescription conditions that have been specified by the land manager in charge of or assisting the burn, to attain planned resource management objectives. Prescribed burning does not include a fire set or permitted by a public officer to provide instruction in fire fighting methods, or construction or residential burning under R18-2-602.
- 17. “Prescribed fire manager” means a person designated by a F/SLM as responsible for prescribed burning for that land manager.
- 18. “Smoke management prescription” means the predetermined meteorological conditions that affect smoke transport and dispersion under which a burn could occur without adversely affecting public health and welfare.
- 19. “Smoke management techniques (SMT)” means management and dispersion practices used during a prescribed burn or wildland fire use incident which affect the direction, duration, height, or density of smoke.
- 20. “Smoke management unit” means any of the geographic areas defined by ADEQ whose area is based on primary watershed boundaries and whose outline is determined by diurnal windflow patterns that allow smoke to follow predictable drainage patterns. A map of the state divided into the smoke management units is on file with ADEQ.
- 21. “State land manager (SLM)” means any department, agency, or political subdivision of the state government including the following:
 - a. State Land Department,
 - b. Department of Transportation,
 - c. Department of Game and Fish, and
 - d. Parks Department.
- 22. “Wildfire” means an unplanned wildland fire subject to appropriate control measures. Wildfires include those incidents where suppression may be limited for safety, economic, or resource concerns.

- 23. “Wildland fire use” means a wildland fire that is ignited by natural causes, such as lightning, and is managed using the same controls and for the same planned resource management objectives as prescribed burning.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1502. Applicability

- A. A F/SLM that is conducting or assisting a prescribed burn shall follow the requirements of this Article.
- B. A private or municipal burner with whom ADEQ has entered into a memorandum of agreement shall follow the requirements of this Article.
- C. The provisions of this Article apply to all areas of the state except Indian Trust lands. All federally managed lands and all state lands, parks, and forests are under the jurisdiction of ADEQ in matters relating to air pollution from prescribed burning.
- D. Notwithstanding subsection (C), ADEQ and any Indian tribe may enter into a memorandum of agreement to implement this Article.
- E. ADEQ and any private or municipal prescribed burner may enter into a memorandum of agreement to implement this Article.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1503. Annual Registration, Program Evaluation and Planning

- A. Each F/SLM shall register annually with ADEQ on a form prescribed by ADEQ, all planned burn projects, including areas planned for wildland fire use.
- B. Each planned year extends from January 1 of the registration year to December 31 of the same year. Each F/SLM shall use best efforts to register before December 31 and no later than January 31 of each year.
- C. A F/SLM shall include the following information on the registration form:
 - 1. The F/SLM’s name, address, and business telephone number;
 - 2. The name, address, and business telephone number of an air quality representative who will provide technical support to ADEQ for decisions regarding prescribed burning. The same air quality representative may be selected by more than one F/SLM;
 - 3. All prescribed burn projects and potential wildland fire use areas planned for the next year;
 - 4. Maximum project and annual acres to be burned, maximum daily acres to be burned, fuel types within project area, and planned use of emission reduction techniques to support the annual emissions goal for each prescribed burn project;
 - 5. Planned use of any smoke management techniques for each prescribed burn project;
 - 6. Maximum project and annual acres projected to be burned, maximum daily acres projected to be burned, and a map of the anticipated project area, fuel types and loading within the planned area for an area the F/SLM anticipates for wildland fire use;
 - 7. A list of all burn projects that were completed during the previous year;

8. Project area for treatment, treatment type, fuel types to be treated, and activity fuel loading to support the annual emissions goal for areas to be treated using non-burning alternatives to fire; and
 9. The area treated using non-burning alternatives to fire during the previous year including the number of acres, the specific types of alternatives utilized, and the location of these areas.
- D.** After consultation with the F/SLM, ADEQ may request additional information for registration of prescribed burns and wildland fire use to support regional coordination of smoke management, annual emission goal setting using ERTs, and non-burning alternatives to fire.
- E.** A F/SLM may amend a registration at any time with a written submission to ADEQ.
- F.** ADEQ accepts a facsimile or other electronic method as a means of complying with the deadline for registration. If an electronic means is used, the F/SLM shall deliver the original paper registration form to ADEQ for its records. ADEQ shall acknowledge in writing the receipt of each registration.
- G.** ADEQ shall hold a meeting after January 31 and before April 1 of each year between ADEQ and F/SLMs to evaluate the program and cooperatively establish the annual emission goal. The annual emission goal shall be developed to minimize prescribed fire emissions to the maximum extent feasible using emission reduction techniques and alternatives to burning subject to economic, technical, and safety feasibility criteria, and consistent with land management objectives.
- H.** At least once every five years, ADEQ shall request long-term projections of future prescribed fire and wildland fire use activity from the F/SLMs to support planning for visibility impairment and assessment of other air quality concerns by ADEQ.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1504. Prescribed Burn Plan

Each F/SLM planning a prescribed burn shall complete and submit to ADEQ the "Burn Plan" form supplied by ADEQ no later than 14 days before the date on which the F/SLM requests permission to burn. ADEQ shall consider the information supplied on the Burn Plan Form as binding conditions under which the burn shall be conducted. A Burn Plan shall be maintained by ADEQ until notification from the F/SLM of the completion of the burn project. Revisions to the Burn Plan for a burn project shall be submitted in writing no later than 14 days before the date on which the F/SLM requests permission to burn. To facilitate the Daily Burn authorization process under R18-2-1505, the F/SLM shall include on the Burn Plan form:

1. An emergency telephone number that is answered 24 hours a day, seven days a week;
2. Burn prescription;
3. Smoke management prescription;
4. The number of acres to be burned, the quantity and type of fuel, type of burn, and the ignition technique to be used;
5. The land management objective or purpose for the burn such as restoration or maintenance of ecological function and indicators of fire resiliency;
6. A map depicting the potential impact of the smoke unless waived either orally or in writing by ADEQ. The potential impact shall be determined by mapping both the daytime and nighttime smoke path and down-drainage flow for 15 miles from the burn site, with smoke-sensitive

areas delineated. The map shall use the appropriate scale to show the impacts of the smoke adequately;

7. Modeling of smoke impacts unless waived either orally or in writing by ADEQ, for burns greater than 250 acres per day, or greater than 50 acres per day if the burn is within 15 miles of a Class I Area, an area that is non-attainment for particulates, a carbon monoxide non-attainment area, or other smoke-sensitive area. In consultation with the F/SLM, ADEQ shall provide guidelines on modeling;
8. The name of the official submitting the Burn Plan on behalf of the F/SLM; and
9. After consultation with the F/SLM, any other information to support the Burn Plan needed by ADEQ to assist in the Daily Burn authorization process for smoke management purposes or assessment of contribution to visibility impairment of Class I areas.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1505. Prescribed Burn Requests and Authorization

- A.** Each F/SLM planning a prescribed burn, shall complete and submit to ADEQ the "Daily Burn Request" form supplied by ADEQ. The Daily Burn Request form shall include:
1. The contact information of the F/SLM conducting the burn;
 2. Each day of the burn;
 3. The area to be burned on the day for which the Burn Request is submitted, with reference to the Burn Plan, including size, legal location to the section, and latitude and longitude to the minute;
 4. Projected smoke impacts; and
 5. Any local conditions or circumstances known to the F/SLM that, if conveyed to ADEQ, could impact the Daily Burn authorization process.
- B.** After consultation with the F/SLM, ADEQ may request additional information related to the burn, meteorological, smoke dispersion, or air quality conditions to supplement the Daily Burn Request form and to aid in the Daily Burn authorization process.
- C.** The F/SLM shall submit the Daily Burn Request form to ADEQ as expeditiously as practicable, but no later than 2:00 p.m. of the business day preceding the burn. An original form, a facsimile, or an electronic information transfer are acceptable submittals.
- D.** An F/SLM shall not ignite a prescribed burn without receiving the approval of ADEQ, as follows:
1. ADEQ shall approve, approve with conditions, or disapprove a burn on the same business day as the Burn Request submittal.
 2. If ADEQ fails to address a Burn Request by 10:00 p.m. of the business day on which the request is submitted, the Burn Request is approved by default after the burner makes a good faith effort to contact ADEQ to confirm that the Burn Request was received.
 3. ADEQ may communicate its decision by verbal, written, or electronic means. ADEQ shall provide a written or electronic reply if requested by the F/SLM.
- E.** If weather conditions cease to conform to those in the smoke management prescription of either the Burn Plan or an Approval with Conditions, the F/SLM shall take appropriate action to reduce further smoke impacts, ensure safe and appropriate fire control, and notify the public when necessary. After

consultation with ADEQ, the smoke management prescription or burn plan may be modified.

- F. The F/SLM shall ensure that there is appropriate signage and notification to protect public safety on transportation corridors including roadways and airports during a prescribed fire.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1506. Smoke Dispersion Evaluation

ADEQ shall approve, approve with conditions, or disapprove a Daily Burn Request submitted under R18-2-1505, by using the following factors for each smoke management unit:

1. Analysis of the emissions from burns in progress and residual emissions from previous burns on a day-to-day basis;
2. Analysis of emissions from active wildland fire use incidents, and active multiple-day burns, and consideration of potential long-term emissions estimates;
3. Analysis of the emissions from wildfires greater than 100 acres and consideration of their potential long-term growth;
4. Local burn conditions;
5. Burn prescription and smoke management prescription from the applicable Burn Plan;
6. Existing and predicted local air quality;
7. Local and synoptic meteorological conditions;
8. Type and location of areas to be burned;
9. Protection of the national visibility goal for Class I Areas under § 169A(a)(1) of the Act and 40 CFR 51.309;
10. Assessment of duration and intensity of smoke emissions to minimize cumulative impacts;
11. Minimization of smoke impacts in Class I Areas, areas that are non-attainment for particulate matter, carbon monoxide non-attainment areas, or other smoke-sensitive areas; and
12. Protection of the National Ambient Air Quality Standards.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1507. Prescribed Burn Accomplishment; Wildfire Reporting

- A. Each F/SLM conducting a prescribed burn shall complete and submit to ADEQ the "Burn Accomplishment" form supplied by ADEQ. For each burn approval, the F/SLM shall submit a Burn Accomplishment form to ADEQ by 2:00 p.m. of the business day following the approved burn. The F/SLM shall include the following information on the Burn Accomplishment form:
1. Any known conditions or circumstances that could impact the Daily Burn decision process;
 2. The date, location, fuel type, fuel loading, and acreage accomplishments;
 3. The ERTs and SMTs described in R18-2-1509 and R18-2-1510, respectively, and may include any further ERTs and SMTs that become available, that the F/SLM used to reduce emissions or manage the smoke from the burn.
- B. The F/SLM shall submit the Burn Accomplishment form as an original form, a facsimile, or an electronic information transfer.

- C. ADEQ shall maintain a record of Burn Requests, Burn Approvals/Conditional Approvals/Denials and Burn Accomplishments for five years.

- D. The F/SLM in whose jurisdiction a wildfire occurs shall make available to ADEQ no later than the day after the activity all required information for wildfire incidents that burned more than 100 acres per day in timber or slash fuels or 300 acres per day in brush or grass fuels. For each day of a wildfire incident that exceeds the daily activity threshold, the F/SLM shall provide the location, an estimate of predominant fuel type and quantity consumed, and an estimate of the area blackened that day.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1508. Wildland Fire Use: Plan, Authorization, Monitoring; Inter-agency Consultation; Status Reporting

- A. In order for ADEQ to participate in the wildland fire use decision-making process, the F/SLM shall notify ADEQ as soon as practicable of any wildland fire use incident projected to attain or attaining a size of 50 acres of timber fuel or 250 acres of brush or grass fuel.
- B. For each wildland fire use incident that has been declared as such by the F/SLM, the F/SLM shall complete and submit to ADEQ a Wildland Fire Use Burn Plan in a format approved by ADEQ in cooperation with the F/SLM. The F/SLM shall submit the Wildland Fire Use Burn Plan to ADEQ as soon as practicable but no later than 72 hours after the wildland fire use incident is declared or under consideration for such designation. The F/SLM shall include the following information in the Wildland Fire Use Burn Plan:
1. An emergency telephone number that is answered 24 hours a day, seven days a week;
 2. Anticipated burn prescription;
 3. Anticipated smoke management prescription;
 4. The estimated daily number of acres, quantity, and type of fuel to be burned;
 5. The anticipated maximum allowable perimeter or size with map;
 6. Information on the condition of the area to be burned, such as whether it is in maintenance or restoration, its ecological function, and other indicators of fire resiliency;
 7. The anticipated duration of the wildland fire use incident;
 8. The anticipated long-range weather trends for the site;
 9. A map depicting the potential impact of the smoke. The potential impact shall be determined by mapping both the daytime and nighttime smoke path and down-drainage flow for 15 miles from the wildland fire use incident, with smoke-sensitive areas delineated. Mapping is mandatory unless waived either orally or in writing by ADEQ. The map shall use the appropriate scale to show the impacts of the smoke adequately; and
 10. Modeling or monitoring of smoke impacts, if requested by ADEQ after consultation with the F/SLM.
- C. ADEQ shall approve or disapprove a Wildland Fire Use Burn Plan within three hours of receipt. ADEQ shall consult directly with the requesting F/SLM before disapproving a Wildland Fire Use Burn Plan. If ADEQ fails to address the Wildland Fire Use Burn Plan within the time allotted, the Plan is approved by default under the condition that the F/SLM makes a good faith effort to contact ADEQ to confirm that the Plan was received. Approval by ADEQ of a Wildland Fire Use Burn Plan is binding upon ADEQ for the duration of the wild-

land fire use incident, unless smoke from the incident creates a threat to public health or welfare. If a threat to public health or welfare is created, ADEQ shall consult with the F/SLM regarding the situation and develop a joint action plan for reducing further smoke impacts.

- D. The F/SLM shall submit a Daily Status Report for each wildland fire use incident to ADEQ for each day of the burn that the fire burns more than 100 acres in timber or slash fuels or 300 acres in brush or grass fuels. The F/SLM shall include a synopsis of smoke behavior, future daily anticipated growth, and location of the activity of the wildland fire use incident in the Daily Status Report.
- E. The F/SLM shall consult with ADEQ prior to initiating human-made ignition on the wildland fire use incident when greater than 250 acres is anticipated to be burned by the ignition. Emergency human-made ignition on the incident for protection of public or fire-fighter safety does not require consultation with ADEQ regardless of the size of the area to be burned.
- F. The F/SLM shall ensure that there is appropriate signage and notification to protect public safety on transportation corridors including roadways and airports during a wildland fire use incident.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1509. Emission Reduction Techniques

- A. Each F/SLM conducting a prescribed burn shall implement as many Emission Reduction Techniques as are feasible subject to economic, technical, and safety feasibility criteria, and land management objectives.
- B. Emission Reduction Techniques include:
 - 1. Reducing biomass to be burned by use of techniques such as yarding or consolidation of unmerchandisable material, multi-product timber sales, or public firewood access, when economically feasible;
 - 2. Reducing biomass to be burned by fuel exclusion practices such as preventing the fire from consuming dead snags or dead and downed woody material through lining, application of fire-retardant foam, or water;
 - 3. Using mass ignition techniques such as aerial ignition by helicopter to produce high intensity fires of high fuel density areas such as logging slash decks;
 - 4. Burning only fuels essential to meet resource management objectives;
 - 5. Minimizing consumption and smoldering by burning under conditions of high fuel moisture of duff and litter;
 - 6. Minimizing fuel consumption and smoldering by burning under conditions of high fuel moisture of large woody fuels;
 - 7. Minimizing soil content when slash piles are constructed by using brush blades on material-moving equipment and by constructing piles under dry soil conditions or by using hand piling methods;
 - 8. Burning fuels in piles;
 - 9. Using a backing fire in grass fuels;
 - 10. Burning fuels with an air curtain destructor, as defined in R18-2-101, operated according to manufacturer specifications and meeting applicable state or local opacity requirements;
 - 11. Extinguishing or mopping-up of smoldering fuels;
 - 12. Chunking of piles and other consolidations of burning material to enhance flaming and fuel consumption, and to minimize smoke production;

- 13. Burning before litter fall;
- 14. Burning before green-up of fuels;
- 15. Burning before recently cut large fuels cure in areas with activity; and
- 16. Burning just before precipitation to reduce fuel smoldering and consumption.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4).
Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1510. Smoke Management Techniques

- A. Each F/SLM conducting a prescribed burn shall implement as many Smoke Management Techniques as are feasible subject to economic, technical, and safety feasibility criteria, and land management objectives.
- B. Smoke management techniques include:
 - 1. Burning from March 15 through September 15, when meteorological conditions allow for good smoke dispersion;
 - 2. Igniting burns under good-to-excellent ventilation conditions;
 - 3. Suspending operations under poor smoke dispersion conditions;
 - 4. Considering smoke impacts on local community activities and land users;
 - 5. Burning piles when other burns are not feasible, such as when snow or rain is present;
 - 6. Using mass ignition techniques such as aerial ignition by helicopter to produce high intensity fires with short duration impacts;
 - 7. Using all opportunities that meet the burn prescription and all burn locations to spread smoke impacts over a broader time period and geographic area;
 - 8. Burning during optimum mid-day dispersion hours, with all ignitions in a burn unit completed by 3:00 p.m. to prevent trapping smoke in inversions or diurnal windflow patterns;
 - 9. Providing information on the adverse impacts of using green or wet wood as fuel when public firewood access is allowed;
 - 10. Implementing maintenance burning in a periodic rotation to shorten prescribed fire duration and to reduce excessive fuel accumulations that could result in excessive smoke production in a wildfire; and
 - 11. Using wildland fire-use strategies to shift smoke into more favorable smoke dispersion seasons.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1510 renumbered to R18-2-1511; new R18-2-1510 made by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1511. Monitoring

- A. ADEQ may require a F/SLM to monitor air quality before or during a prescribed burn or a wildland fire use incident if necessary to assess smoke impacts. Air quality monitoring may be conducted using both federal and non-federal reference method as well as other techniques.
- B. ADEQ may require a F/SLM to monitor weather before or during a prescribed burn or a wildland fire use incident, if necessary to predict or assess smoke impacts. After consultation with the F/SLM, ADEQ may also require the F/SLM to establish burn site or area-representative remote automated weather stations or their equivalent, having telemetry that allows retrieval on a real-time basis by ADEQ. An F/SLM shall give

ADEQ notice and an opportunity to comment before making any change to a long-term established remote automated weather station.

- C. A F/SLM shall employ the following types of monitoring, unless waived by ADEQ, for burns greater than 250 acres per day, or greater than 50 acres per day if the burn is within 15 miles of a Class I Area, an area that is non-attainment for particulate matter, carbon monoxide, or ozone, or other smoke-sensitive area:
 - 1. Smoke plume measurements, using a format supplied by ADEQ; and
 - 2. The release of pilot balloons (PIBALs) at the burn site to verify needed wind speed, direction, and stability. Instead of pilot balloons, a test burn at the burn site may be used for specific prescribed burns on a case-by-case basis as approved by ADEQ, to verify needed wind speed, direction, and stability.
- D. An F/SLM shall make monitoring information required under subsection (C) available to ADEQ on the business day following the burn ignition.
- E. The F/SLM shall keep on file for one year following the burn date any monitoring information required under this Section.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1511 renumbered to R18-2-1512; new R18-2-1511 renumbered from R18-2-1510 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1512. Burner Qualifications

- A. All burn projects shall be conducted by personnel trained in prescribed fire and smoke management techniques as required by the F/SLM in charge of the burn and established by National Wildfire Coordinating Group training qualifications.
- B. A Prescribed Fire Boss or other local Fire Management Officer of the F/SLM having jurisdiction over prescribed burns shall have smoke management training obtained through one of the following:
 - 1. Successful completion of a National Wildfire Coordinating Group or F/SLM-equivalent course addressing smoke management; or
 - 2. Attendance at an ADEQ-approved smoke management workshop.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1512 renumbered to R18-2-1513; new R18-2-1512 renumbered from R18-2-1511 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1513. Public Notification and Awareness Program; Regional Coordination

- A. The Director shall conduct a public education and awareness program in cooperation with F/SLMs and other interested parties to inform the general public of the smoke management program described by this Article. The program shall include smoke impacts from prescribed fires and the role of prescribed fire in natural ecosystems.
- B. ADEQ shall make annual registration, prescribed burn approval, and wildfire and wildland fire use activity information readily available to the public and to facilitate regional coordination efforts and public notification.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1513 renumbered to R18-2-1514; new R18-2-1513 renumbered from R18-2-1512 and amended

by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1514. Surveillance and Enforcement

- A. An F/SLM conducting a prescribed burn shall permit ADEQ to enter and inspect burn sites unannounced to verify the accuracy of the Daily Burn Request, Burn Plan, or Accomplishment data as well as matching burn approval with actual conditions, smoke dispersion, and air quality impacts. On-ground site inspection procedures and aerial surveillance shall be coordinated by ADEQ and the F/SLM for safety purposes.
- B. ADEQ may use remote automated weather station data if necessary to verify current and previous meteorological conditions at or near the burn site.
- C. ADEQ may audit burn accomplishment data, smoke dispersion measurements, or weather measurements from previously conducted burns, if necessary to verify conformity with, or deviation from, procedures and authorizations approved by ADEQ.
- D. Deviation from procedures and authorizations approved by ADEQ constitute a violation of this Article. Violations may require containment or mop-up of any active burns and may also require, in the Director's discretion, a five-day moratorium on ignitions by the responsible F/SLM. Violations of this Article are also subject to a civil penalty of not more than \$10,000 per day per violation under A.R.S. § 49-463.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Former Section R18-2-1514 repealed; new R18-2-1514 renumbered from R18-2-1513 and amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

R18-2-1515. Forms; Electronic Copies; Information Transfers

- A. ADEQ shall make available on paper and in electronically readable format any form required to be developed by ADEQ and completed by a F/SLM.
- B. After consultation with an F/SLM, ADEQ may require the F/SLM to provide data in a manner that facilitates electronic transfers of information.

Historical Note

Adopted effective October 8, 1996 (Supp. 96-4). Amended by final rulemaking at 10 A.A.R. 388, effective March 16, 2004 (Supp. 04-1).

ARTICLE 16. VISIBILITY; REGIONAL HAZE

Article 16, consisting of Sections R18-2-1601 through R18-2-1606, made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

R18-2-1601. Definitions

In addition to the definitions contained in Articles 1 and 4 of this Chapter and A.R.S. § 49-401.01, the following definitions apply to this Article:

- 1. "Best available retrofit technology (BART)" means an emission limitation based on the degree of reduction achievable through the application of the best system of continuous emission reduction for each pollutant emitted by an existing stationary facility. The emission limitation is established on a case-by-case basis under R18-2-1605.
- 2. "Existing stationary facility" means any of the following stationary sources of air pollutants, including any reconstructed source, which was not in operation before August 7, 1962, and was in existence on August 7, 1977, and has the potential to emit 250 tons per year or more of any air pollutant. A person who determines potential to emit shall count fugitive emissions to the extent quantifiable.

- a. Fossil-fuel fired steam electric plants of more than 250 million British thermal units per hour heat input;
 - b. Coal cleaning plants (thermal dryers);
 - c. Kraft pulp mills;
 - d. Portland cement plants;
 - e. Primary zinc smelters;
 - f. Iron and steel mill plants;
 - g. Primary aluminum ore reduction plants;
 - h. Primary copper smelters;
 - i. Municipal incinerators capable of charging more than 250 tons of refuse per day;
 - j. Hydrofluoric, sulfuric, and nitric acid plants;
 - k. Petroleum refineries;
 - l. Lime plants;
 - m. Phosphate rock processing plants;
 - n. Coke oven batteries;
 - o. Sulfur recovery plants;
 - p. Carbon black plants (furnace process);
 - q. Primary lead smelters;
 - r. Fuel conversion plants;
 - s. Sintering plants;
 - t. Secondary metal production facilities;
 - u. Chemical process plants;
 - v. Fossil-fuel boilers of more than 250 million British thermal units per hour heat input;
 - w. Petroleum storage and transfer facilities with a capacity exceeding 300,000 barrels;
 - x. Taconite ore processing facilities;
 - y. Glass fiber processing plants; and
 - z. Charcoal production facilities.
3. "Federal Land Manager" means the secretary of the department, or the secretary's designee, with authority over the Federal Class I area.
 4. "Mandatory Federal Class I Area" means any area identified in 40 CFR 81.400 through 81.436.
 5. "Reasonably attributable" means ascribable by visual observation or other techniques described in R18-2-1604.
 6. "Reasonably attributable visibility impairment" means visibility impairment that is caused by the emission of air pollutants from one source, or a small group of sources.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

R18-2-1602. Applicability

This Article applies to any existing stationary source located in the state that may reasonably be anticipated to cause or contribute to visibility impairment in any mandatory Federal Class I area identified in 40 CFR 81.401 through 81.436. Mandatory Federal Class I areas within Arizona are: Chiricahua National Monument Wilderness, Chiricahua Wilderness, Galiuro Wilderness, Grand Canyon National Park, Mazatzal Wilderness, Mount Baldy Wilderness, Petrified Forest National Park, Pine Mountain Wilderness, Saguaro Wilderness, Sierra Ancha Wilderness, Superstition Wilderness, and Sycamore Canyon Wilderness.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

R18-2-1603. Certification of Impairment

- A. A Federal Land Manager with authority over a mandatory Federal Class I area may certify to the Director, at any time, that a reasonably attributable visibility impairment exists in a mandatory Federal Class I area. The Director may also certify that reasonably attributable visibility impairment exists in any

mandatory Federal Class I area to assure reasonable progress under section 169A(b)(2) of the Clean Air Act.

- B. Documentation that supports the Federal Land Manager or Director's certification shall include:
 1. The mandatory Federal Class I area for which visibility impairment is being certified,
 2. Any information documenting the basis for the certification of impairment.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

R18-2-1604. Attribution Analysis; Finding

- A. If a mandatory Federal Class I area is certified as having reasonably attributable visibility impairment, the Director shall conduct an attribution analysis to identify each existing stationary source that may be reasonably anticipated to cause or contribute to visibility impairment. The Director shall notify the Federal Land Manager, affected source or small group of sources, and local air pollution control officer of the intent to conduct an attribution analysis. The attribution analysis shall be based on the following:
 1. Monitoring information obtained through the Arizona Class I Visibility Monitoring Network or special studies approved by ADEQ to ascertain:
 - a. The times visibility impairment occurred, and
 - b. The pollutants contributing to the visibility impairment;
 2. Transport analysis or air quality modeling based upon meteorological records to ascertain whether the pollutants were transported to the mandatory Federal Class I area;
 3. Other available studies, modeling analyses, and emissions inventories of point, area, and mobile source emissions to ascertain:
 - a. The pollutant causing the impairment, and
 - b. The source, or a small group of sources, emitting the pollutant;
 4. Other relevant supporting documentation provided by the Federal Land Manager or Director used to make the draft attribution analysis finding; and
 5. Consideration of any documentation provided by the source, a small group of sources, or other interested parties.
- B. In conducting the attribution analysis, the Director shall use monitoring information, meteorological records, and emissions inventories that represent times and locations reasonably concurrent with the visibility impairment.
- C. The Director shall issue a draft attribution finding that impairment has or has not occurred, and provide public notice of the draft attribution finding. The Director shall publish notice of the draft attribution finding in a newspaper of general circulation in each county containing the mandatory Federal Class I area and the affected source. The Director shall provide at least 30 days from the date of the notice for public comment. Written comments to the Director shall include the name of the person and the person's agent or attorney, if any, and shall clearly set forth reasons why the Director should review the draft attribution finding. The Director shall issue a final attribution finding after the public comment period. If the Director finds existing stationary sources cause or contribute to visibility impairment in a mandatory Federal Class I area, the source shall be subject to a BART Control Analysis under R18-2-1605.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541,

effective December 2, 2003 (Supp. 03-4).

R18-2-1605. BART Control Analysis; Finding

- A. The Director shall analyze for BART controls each existing stationary source for which a final attribution finding is made under R18-2-1604(C). The Director shall consider the following factors:
1. Available control technology;
 2. New source performance standards (NSPS) in Article 9;
 3. Alternative control systems if retrofitting to comply with applicable NSPS standards in Article 9 is infeasible;
 4. Cost of compliance;
 5. Energy and non-air quality environmental impacts of compliance;
 6. Existing pollution control technology in use at the source or small group of sources;
 7. Remaining useful life of the source or small group of sources;
 8. Net environmental impact associated with the proposed emission control system;
 9. Economic impacts associated with installing and operating the proposed emission control system; and
 10. Degree of improvement in visibility anticipated to result from application of the proposed emission control system.
- B. The Director shall issue a draft BART finding, and provide public notice of the draft BART finding. The Director shall publish notice of the draft BART finding in a newspaper of general circulation in each county containing the mandatory Federal Class I area and the affected source. The Director shall provide at least 30 days from the date of the notice for public comment. Written comments to the Director shall include the name of the person and the person's agent or attorney, and shall clearly set forth reasons why the Director should review the draft BART finding. The Director shall issue a final BART finding after the public comment period.
1. The Director shall submit each final BART finding to the Administrator as a revision to the SIP.
 2. The Director shall require that each existing stationary source meet BART as expeditiously as practicable but in no case later than five years after EPA approval of the SIP revision.
- C. If the Director determines that technological or economic limitations on the applicability of measurement methodology to a particular existing stationary source would make the imposition of an emission standard infeasible, the Director may, as part of the finding under subsection (B), prescribe a design, equipment, work practice, operational standard, or combination of design, equipment, work practice, or operational standard. The standard, to the degree possible, shall set forth the emission reduction to be achieved by implementation of the design, equipment, work practice, or operation, and shall provide for compliance by means that achieve equivalent results.
- D. The Director shall make a finding that the attributable source satisfies the BART requirement if the attributable source:
1. Voluntarily applies best available retrofit technology;
 2. Previously applied emission control standards equivalent to BART; or
 3. Agrees to shutdown or curtail operations at the attributable source within five years of the finding. An attributable source that does not shutdown or curtail operations shall meet BART as expeditiously as practicable, but in no case later than five years after EPA's approval of the revision to the SIP.
- E. If the Director determines that the imposition of BART or a standard under subsection (C) is infeasible at the time of the finding, the Director shall require the attributable source to

install and operate BART at a later date when the Director determines that BART or equivalent controls are feasible.

- F. The Director shall provide for a BART control analysis of any existing stationary source that might cause or contribute to impairment of visibility in any mandatory Federal Class I area identified under this Article at such time as the Administrator determines new control technology for the pollutant becomes reasonably available:
1. The pollutant is emitted by that existing stationary source,
 2. Controls representing BART for the pollutant have not previously been required under this Article, and
 3. The impairment of visibility in any mandatory Federal Class I area is reasonably attributable to the emissions of that pollutant.

Historical Note

New Section made by final rulemaking at 9 A.A.R. 4541, effective December 2, 2003 (Supp. 03-4).

R18-2-1606. Exemption from BART

Any existing stationary source required to install, operate, and maintain BART under this Article, may apply to the Administrator for an exemption from that requirement according to 40 CFR 51.303. The existing stationary source shall obtain the Director's written concurrence before sending the application for exemption to the Administrator.

May 28, 1982 (Supp. 82-3). Amended effective September 22, 1983 (Supp. 83-5). Amended effective December 1, 1988 (Supp. 88-4). Appendix 1 repealed, new Appendix 1 adopted effective November 15, 1993 (Supp. 93-4). Amended effective October 7, 1994 (Supp. 94-4). Amended effective August 1, 1995 (Supp. 95-3). The reference to R18-2-101(80) amended to reference R18-2-101(84) (Supp. 99-3). Amended by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2). Repealed by final rulemaking at 23 A.A.R. 333, effective March 21, 2017 (Supp. 17-1).

Appendix 2. Test Methods and Protocols

The following test methods and protocols are approved for use as directed by the Department under this Chapter. These standards are incorporated by reference as applicable requirements revised as of June 28, 2013, and no future editions or amendments. These standards are on file with the Department, and are also available from the U.S. Government Printing Office, Superintendent of Documents, bookstore.gpo.gov, Mail Stop: SSOP IDCC-SSOM, Washington, D.C. 20402-9328.

- J. 40 CFR 63, all appendices;
- K. 40 CFR 75, all appendices.
- L. 40 CFR 51.128, Appendix A(1)(B).
- M. Silt Content Test Method. The purpose of this test method is to estimate the silt content of the trafficked parts of commercial farm roads, as defined in R18-2-610. The higher the silt content, the more fine dust particles that are released when cars and trucks drive on commercial farm roads.
 1. Equipment:
 - a. A set of sieves with the following openings: 4 millimeters (mm), 2mm, 1 mm, 0.5 mm and 0.25 mm and a lid and collector pan
 - b. A small whisk broom or paintbrush with stiff bristles and dustpan 1 ft. in width. (The broom/brush should preferably have one, thin row of bristles no longer than 1.5 inches in length.)
 - c. A spatula without holes A small scale with half ounce increments (e.g. postal/package scale)
 - d. A shallow, lightweight container (e.g. plastic storage container)
 - e. A sturdy cardboard box or other rigid object with a level surface
 - f. Basic calculator
 - g. Cloth gloves (optional for handling metal sieves on hot, sunny days)
 - h. Sealable plastic bags (if sending samples to a laboratory)
 - i. Pencil/pen and paper
 2. Step 1: Look for a routinely-traveled surface, as evidenced by tire tracks. [Only collect samples from surfaces that are not wet or damp due to precipitation, dew or watering.] Use caution when taking samples to ensure personal safety with respect to passing vehicles. Gently press the edge of a dustpan (1 foot in width) into the surface four times to mark an area that is 1 square foot. Col-

lect a sample of loose surface material using a whisk broom or brush and slowly sweep the material into the dustpan, minimizing escape of dust particles. Use a spatula to lift heavier elements such as gravel. Only collect dirt/gravel to an approximate depth of 3/8 inch or 1 cm in the 1 square foot area. If you reach a hard, underlying subsurface that is < 3/8 inch in depth, do not continue collecting the sample by digging into the hard surface. In other words, you are only collecting a surface sample of loose material down to 1 cm. In order to confirm that samples are collected to 1 cm. in depth, a wooden dowel or other similar narrow object at least one foot in length can be laid horizontally across the survey area while a metric ruler is held perpendicular to the dowel. At this point, you can choose to place the sample collected into a plastic bag or container and take it to an independent laboratory for silt content analysis. A reference to the procedure the laboratory is required to follow is in subsection (10) below.

3. Step 2: Place a scale on a level surface. Place a light-weight container on the scale. Zero the scale with the weight of the empty container on it. Transfer the entire sample collected in the dustpan to the container, minimizing escape of dust particles. Weigh the sample and record its weight.
4. Step 3: Stack a set of sieves in order according to the size openings specified above, beginning with the largest size opening (4 mm) at the top. Place a collector pan underneath the bottom (0.25 mm) sieve.
Step 4: Carefully pour the sample into the sieve stack, minimizing escape of dust particles by slowly brushing material into the stack with a whisk broom or brush. (On windy days, use the trunk or door of a car as a wind barricade.) Cover the stack with a lid. Lift up the sieve stack and shake it vigorously up, down and sideways for at least 1 minute.
5. Step 5: Remove the lid from the stack and disassemble each sieve separately, beginning with the top sieve. As you remove each sieve, examine it to make sure that all of the material has been sifted to the finest sieve through which it can pass; e.g. material in each sieve (besides the top sieve that captures a range of larger elements) should look the same size. If this is not the case, re-stack the sieves and collector pan, cover the stack with the lid, and shake it again for at least 1 minute. (You only need to reassemble the sieve(s) that contain material which requires further sifting.)
6. Step 6: After disassembling the sieves and collector pan, slowly sweep the material from the collector pan into the empty container originally used to collect and weigh the entire sample. Take care to minimize escape of dust particles. You do not need to do anything with material captured in the sieves -- only the collector pan. Weigh the container with the material from the collector pan and record its weight.
7. Step 7: If the source is an unpaved road, multiply the resulting weight by 0.38. If the source is an unpaved parking lot, multiply the resulting weight by 0.55. The resulting number is the estimated silt loading. Then, divide by the total weight of the sample you recorded earlier in Step 2 and multiply by 100 to estimate the percent silt content.
8. Step 8: Select another two routinely-traveled portions of the unpaved road or unpaved parking lot and repeat this test method. Once you have calculated the silt loading

and percent silt content of the 3 samples collected, average your results together.

9. Step 9: Examine Results. If the average silt loading is less than 0.33 oz/ft², the surface is STABLE. If the average silt loading is greater than or equal to 0.33 oz/ft², then proceed to examine the average percent silt content. If the source is an unpaved road and the average percent silt content is 6% or less, the surface is STABLE. If the source is an unpaved parking lot and the average percent silt content is 8% or less, the surface is STABLE. If your field test results are within 2% of the standard (for example, 4%-8% silt content on an unpaved road), it is recommended that you collect 3 additional samples from the source according to Step 1 and take them to an independent laboratory for silt content analysis.
10. Independent Laboratory Analysis: You may choose to collect 3 samples from the source, according to Step 1, and send them to an independent laboratory for silt content analysis rather than conduct the sieve field procedure. If so, the test method the laboratory is required to use comes from the following text: *Procedures For Laboratory Analysis Of Surface/Bulk Dust Loading Samples*, (Fifth Edition, Volume I, Appendix C.2.3 "Silt Analysis", 1995), AP-42, Office of air Quality Planning & Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina.

Historical Note

Former Appendix 2 repealed, new Appendix 2 adopted effective October 2, 1979 (Supp. 79-5). Amended effective May 28, 1982 (Supp. 82-3). Amended effective December 1, 1988 (Supp. 88-4). Repealed effective November 15, 1993 (Supp. 93-4). New Appendix 2 adopted effective December 7, 1995 (Supp. 95-4). Amended effective May 9, 1996 (Supp. 96-2). Amended effective April 4, 1997; filed with the Office of the Secretary of State March 14, 1997 (Supp. 97-1). Amended effective December 4, 1997 (Supp. 97-4). Amended by final rulemaking at 5 A.A.R. 3221, effective August 12, 1999 (Supp. 99-3). Amended by final rulemaking at 6 A.A.R. 4170, effective October 11, 2000 (Supp. 00-4). Amended by final rulemaking at 8 A.A.R. 2543, effective May 24, 2002 (Supp. 02-2). Amended by final rulemaking at 10 A.A.R. 3281, effective September 27, 2004 (Supp. 04-3). Amended by final rulemaking at 11 A.A.R. 3305, effective October 3, 2005 (Supp. 05-3). Amended by final rulemaking at 13 A.A.R. 4199, effective January 5, 2008 (Supp. 07-4). Amended by exempt rulemaking pursuant to Laws 2011, Ch. 214, § 4, at 21 A.A.R. 1156, effective July 2, 2015 (Supp. 15-3). Amended by final expedited rulemaking at 21 A.A.R. 2747, effective December 13, 2015 (Supp. 15-4).

Appendix 3. Logging

1. Each log entry required by a change under R18-2-317.02(B) shall include at least the following information:
 - a. A description of the change, including:
 - i. A description of any process change.
 - ii. A description of any equipment change, including both old and new equipment descriptions, model numbers and serial numbers, or any other unique equipment number.
 - iii. A description of any process material change.
 - b. The date and time that the change occurred.
 - c. The provision of R18-2-317.02(B) that authorizes the change to be made with logging.

- d. The date the entry was made and the first and last name of the person making the entry.
- 2. Logs shall be kept for five years from the date created. Logging shall be performed in indelible ink in a bound log book with sequentially numbered pages, or in any other form, including electronic format, approved by the Director.

Adopted effective December 22, 1976 (Supp. 76-5). Former Appendix 7 repealed, new Appendix 7 adopted effective January 8, 1980 (Supp. 80-1). Editorial correction, Instructions for Schedule 2, paragraph (15) (Supp. 80-2). Repealed effective September 26, 1990 (Supp. 90-3).

A8. Appendix 8. Procedures for Utilizing the Sulfur Balance Method for Determining Sulfur Emissions**PROCEDURES FOR UTILIZING THE SULFUR BALANCE METHOD FOR DETERMINING SULFUR EMISSIONS****A8.1. Calculating Input Sulfur**

Total sulfur input is the sum of the product of the weight of each sulfur bearing material introduced into the smelting process as calculated in A8.1.1. multiplied by the fraction of sulfur contained in that material as calculated in A8.1.2. plus the amount of sulfur contained in fuel utilized in the smelting process as calculated in A8.1.3.

A8.1.1. Material Weight

The owner or operator of a copper smelter shall weigh all sulfur-bearing materials, other than fuels, introduced into the smelting process. The weighing shall be subject to the following conditions:

- A8.1.1.1. Weight shall be determined on a belt scale, rail or truck scales, or other weighing device.
- A8.1.1.2. Weight shall be determined within an accuracy of $\pm 5\%$.
- A8.1.1.3. All devices or scales used for weighing shall be calibrated to manufacturer's specifications at least once a month.
- A8.1.1.4. Sulfur-bearing materials subject to being weighed include concentrate, cement copper, reverbs that are discarded and not part of the internal circulating load and precipitates. Materials such as limestone and silica flux that are mixed with a charge of sulfur bearing materials shall be weighed and reported by the owner or operator.
- A8.1.2. Sulfur Content

The owner or operator shall calculate the sulfur content of all sulfur-bearing materials introduced into the smelting process

using the following steps or an alternative method approved according to A8.4.1.

A8.1.2.1. Sampling

The procedures followed by the owner or operator in sampling are dependent upon the input vehicles for the sulfur-bearing material.

A8.1.2.1.1. Beltfeed

The smelter owner or operator shall collect a five-pound sample each hour. The owner or operator shall combine hourly samples for a total daily sample.

A8.1.2.1.2. Railcar

The smelter owner or operator shall collect a 24-pound sample from each car by the auger method at a minimum of four locations. The owner or operator shall combine each car sample with all other car samples for a total lot sample.

A8.1.2.1.3. Truck

The owner or operator shall collect a 12-pound sample from each truck load. The owner or operator shall take samples at two locations during unloading. If more than one truck delivers a single lot, the samples from each truck shall be combined for a total lot sample.

A8.1.2.2. Sample Preparation

The owner or operator shall prepare each total sample for analysis in the following manner:

- A8.1.2.2.1. The sample shall be crushed to minus $\frac{1}{4}$ inch particles.
- A8.1.2.2.2. 2000 gm of the sample shall be split out using a Jones Riffle Splitter or similar device.
- A8.1.2.2.3. The 2000 gm sample shall be pulverized to minus 150 mesh.
- A8.1.2.2.4. The pulverized mass shall be mixed using a rolling cloth.
- A8.1.2.2.5. 500 gm shall be split out for sample analysis.
- A8.1.2.3. Sample Analysis
 - A8.1.2.3.1. The owner or operator shall analyze the sample to determine sulfur content using the Barium Sulfate (BaSO_4) Gravimetric Method according to A8.4.3. The analysis shall be accurate to within $\pm 1\%$.
 - A8.1.2.3.2. For purposes of comparison, the owner or operator shall analyze the sample for copper content using the Potassium Iodide (KI) Titration Method according to A8.4.3. The analysis shall be accurate to within $\pm 1\%$.
- A8.1.3. Fuel Sulfur Content

The owner or operator shall calculate sulfur in fuels by multiplying the amount of fuel that enters the process by the fraction of sulfur in the fuel, as reported to the smelter operator by the fuel's supplier. The sulfur content determination shall be accurate to within $\pm 5\%$.
- A8.2. Calculating Removed Sulfur

Total removed sulfur is the sum of the removed sulfur in each of the following products as determined by each process set forth below, or by other processes approved according to A8.4.1.

 - A8.2.1. Furnace and Converter Slags
 - A8.2.1.1. The owner or operator shall determine the weight of each slag using a scale with an accuracy within $\pm 5\%$.
 - A8.2.1.2. The owner or operator shall collect a five-pound sample from each slag pot during tapping operations.
 - A8.2.1.3. The owner or operator shall prepare the sample and determine the amount of sulfur and copper using the procedures specified in A8.1.2.2. and A8.1.2.3.
 - A8.2.2. Dust Collection Equipment Dusts
 - A8.2.2.1. After the owner or operator collects the dust and places it in a rail car or truck they shall weigh it using a scale with an accuracy within $\pm 5\%$.

A8.2.2.2. The owner or operator shall sample the dust and prepare and analyze a sample for sulfur and copper using the procedures specified in A8.1.2.1., A8.1.2.2., and A8.1.2.3.

A8.2.3. Strong Acids

A8.2.3.1. The owner or operator shall take an inventory of strong acids daily by means of a manometer or sight glass, and increase the inventory by the amounts of acid shipped or otherwise transferred during that day.

A8.2.3.2. The owner or operator shall ensure the daily inventory will be accurate to within $\pm 5\%$.

A8.2.3.3. The owner or operator shall take a sample of each batch of the inventoried acid and analyze the sample for sulfur, according to the procedures in A8.1.2.3.

A8.2.4. Weak Acids

A8.2.4.1. The owner or operator shall determine the amount of weak acid discharged from an acid plant and scrubber systems by a time volumetric method of measurement in gallons per minute and to an accuracy of within $\pm 20\%$.

A8.2.4.2. The owner or operator shall analyze a 500 ml sample of the weak acid daily for sulfur content according to the procedures in A8.1.2.3.

A8.2.5. Sulfur in Copper Production

A8.2.5.1. The owner or operator shall determine the weight of copper produced by weight of copper cast to an accuracy of within $\pm 5\%$.

A8.2.5.2. The owner or operator shall record the weight and number of castings.

A8.2.5.3. The owner or operator shall obtain a sample of the copper, either by the grab sample method while casting, or by the use of at least three drill holes on a representative casting from each charge.

A8.2.5.4. The owner or operator shall obtain at least one sample from each charge.

A8.2.5.5. The owner or operator shall analyze each sample for sulfur content using the Barium Sulfate (BaSO_4) Gravimetric Method according to A8.4.3. The analysis shall be accurate to within $\pm 50\%$.

A8.2.6. Materials in Process

A8.2.6.1. The owner or operator shall determine the total tonnage of materials in process by physical inventory on the first or last day of each month.

A8.2.6.2. The owner or operator shall calculate a monthly change in in-process inventory for each material in process by taking the difference between the inventory from each material in process on the first or last day of the preceding month and multiplying that difference by the monthly composite sulfur assay for that material.

A8.2.6.3. The change in monthly in-process inventory shall be accurate to within $\pm 50\%$.

A8.3. Sulfur Dioxide Emissions Monitoring

A8.3.1. The sulfur dioxide emissions monitoring and recording system required under R18-2-715.01(K) through R18-2-715.01(N) shall meet the following specifications:

A8.3.1.1. The monitoring system shall be capable of continuously monitoring sulfur dioxide emissions with an accuracy of within $\pm 20\%$ and a confidence level of 95%.

A8.3.1.2. The owner or operator shall operate and calibrate the sulfur dioxide emission monitoring and recording equipment according to manufacturer's specifications for the equipment except that calibration shall be done at least once every 24 hours.

A8.3.2. The sulfur removal equipment bypass monitoring required under R18-2-715.01(Q) shall consist of a detector and recorder system capable of producing a permanent record of all periods that the bypass is in operation.

A8.4. General Provisions

A8.4.1. For purposes of this Appendix, an approved alternative method, process, or procedure, must be approved in writing by the Director and the U.S. Environmental Protection Agency.

A8.4.2. The processes and procedures specified in this Appendix shall be available for inspection, review and verification by the Department at all reasonable times.

A8.4.3. The barium sulfate gravimetric test method and potassium iodide titration test method provided in *Standard Methods of Chemical Analysis*, Volume One, *The Elements*, Sixth Edition, N. Howell Furman (ed.), D. Van Nostrand Company, Inc., Princeton, New Jersey, 1962, pages 410-411, 1006-1011, and 1342-1343 (and no future editions or amendments) is incorporated by reference and available at the Department.

Historical Note

Adopted effective December 22, 1976 (Supp. 76-5). Correction, Appendix 8, A8-2-1.1 (Supp. 77-2). Amended effective May 28, 1982 (Supp. 82-3). Amended effective November 15, 1993 (Supp. 93-4). Amended by final rulemaking at 11 A.A.R. 2216, effective July 18, 2005 (Supp. 05-2).

A9. Appendix 9. Monitoring Requirements

MONITORING REQUIREMENTS

A9.1. Unless otherwise approved by the Director or specified in applicable Sections, the requirements of this Appendix shall apply to all continuous monitoring systems required under applicable Sections.

A9.2. All continuous monitoring systems and monitoring devices shall be installed and operational prior to conducting performance tests under rule R18-2-312. Verification of operational status shall, as a minimum, consist of the following:

A9.2.1. For continuous monitoring systems referenced in A9.3.1. below, completion of the conditioning period specified by applicable requirements in the Arizona Testing Manual and 40 CFR 60.

A9.2.2. For continuous monitoring systems referenced in A9.3.2. below, completion of seven days of operation.

A9.2.3. For monitoring devices referenced in other applicable Sections, completions of the manufacturer's written requirements or recommendations for checking the operation or calibration of the device.

A9.3. During any performance tests required under rule R18-2-312 or within 30 days thereafter and at such other times as may be required by the Director, the owner or operator of any affected facility shall conduct continuous monitoring system performance evaluations and furnish the Director within 60 days thereof, 2, or upon request, more copies of a written report of the results of such tests. The continuous monitoring system performance evaluations shall be conducted in accordance with the following specifications and procedures:

A9.3.1. Continuous monitoring systems listed within this subsection, except as provided in A9.3.2. below shall be evaluated in accordance with the requirements and procedures contained in the applicable performance specification of the Arizona Testing Manual and 40 CFR 60.

A9.3.1.1. Continuous monitoring systems for measuring opacity of emissions shall comply with Performance Specification 1.

A9.3.1.2. Continuous monitoring systems for measuring nitrogen oxides emissions shall comply with Performance Specification 2.

A9.3.1.3. Continuous monitoring systems for measuring sulfur dioxide emissions shall comply with Performance Specification 2.

- A9.3.1.4. Continuous monitoring systems for measuring the oxygen content or carbon dioxide content of effluent gases shall comply with Performance Specification 3.
- A9.3.2. An owner or operator who, prior to September 11, 1974, entered into a binding contractual obligation to purchase specific continuous monitoring system components except as referenced by A9.3.2.3. below shall comply with the following requirements:
- A9.3.2.1. Continuous monitoring systems for measuring opacity of emissions shall be capable of measuring emission levels within $\pm 20\%$. The Calibration Error Test and associated calculation procedures set forth in Performance Specification 1 of 40 CFR 60, Appendix B shall be used for demonstrating compliance with this specification.
- A9.3.2.2. Continuous monitoring systems for measurement of nitrogen oxides or sulfur dioxide shall be capable of measuring emission levels within $\pm 20\%$ with a confidence level of 95%. The Calibration Error Test, the Field Test for Accuracy (Relative), and associated operating and calculation procedures set forth in Performance Specification 2 of 40 CFR 60, Appendix B shall be used for demonstrating compliance with this specification.
- A9.3.2.3. Owners or operators of all continuous monitoring systems installed on an affected facility prior to October 6, 1975, are not required to conduct tests under A9.3.2.1. and/or A9.3.2.2. above unless requested by the Director.
- A9.3.3. All continuous monitoring systems referenced by A9.3.2. above shall be upgraded or replaced (if necessary) with new continuous monitoring systems, and such improved systems shall be demonstrated to comply with applicable performance specifications under A9.3.1. above by September 11, 1979.
- A9.4. Owners or operators of all continuous monitoring systems installed in accordance with the provisions of these rules shall check the zero and span drift at least once daily in accordance with the method prescribed by the manufacturer of such systems unless the manufacturer recommends adjustments at shorter intervals, in which case such recommendations shall be followed. The zero and span shall, as a minimum, be adjusted whenever the 24-hour zero drift or 24-hour calibration drift limits of the applicable performance specifications in 40 CFR 60, Appendix B are exceeded. For continuous monitoring systems measuring opacity of emissions, the optical surfaces exposed to the effluent gases shall be cleaned prior to performing the zero or span drift adjustments except that for systems using automatic zero adjustments, the optical surfaces shall be cleaned when the cumulative automatic zero compensation exceeds 4% opacity. Unless otherwise approved by the Director, the following procedures, as applicable, shall be followed:
- A9.4.1. For extractive continuous monitoring systems measuring gases, minimum procedures shall include introducing applicable zero and span gas mixtures into the measurement system as near the probe as practical. Span and zero gases certified by their manufacturer to be traceable to the National Bureau of Standards reference gases will be used whenever these reference gases are available. The span and zero gas mixtures shall be the same composition as specified in the 40 CFR 60, Appendix B. Every six months from date of manufacture, span and zero gases shall be re-analyzed by conducting triplicate analyses with Reference Methods 6 for SO₂, 7 for NO_x and 3 for O₂ and CO₂, respectively. The gases may be analyzed at less frequent intervals if longer shelf lives are guaranteed by the manufacturer.
- A9.4.2. For nonextractive continuous monitoring systems measuring gases, minimum procedures shall include upscale check(s) using a certified calibration gas cell or test cell which is functionally equivalent to a known gas concentration. The zero check may be performed by computing the zero value from upscale measurements or by mechanically producing a zero condition.
- A9.4.3. For continuous monitoring systems measuring opacity of emissions, minimum procedures shall include a method for producing a simulated zero opacity condition and an upscale (span) opacity condition using a certified neutral density filter or other related technique to produce a known obscuration of the light beam. Such procedures shall provide a system check of the analyzer internal optical surfaces and all electronic circuitry including the lamp and photodetector assembly.
- A9.5. Except for system breakdowns, repairs, calibration checks, and zero and span adjustments required under A9.4. above, all continuous monitoring systems shall be in continuous operation and shall meet minimum frequency of operation requirements as follows:
- A9.5.1. All continuous monitoring systems referenced by A9.3.1. and A9.3.2. above for measuring opacity of emissions shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive 10-second period.
- A9.5.2. All continuous monitoring systems referenced by A9.3.1. above for measuring oxides of nitrogen, sulfur dioxide, carbon dioxide, or oxygen shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive 15-minute period.
- A9.5.3. All continuous monitoring systems referenced by A9.3.2. above, except opacity, shall complete a minimum of one cycle of operation (sampling, analyzing, and data recording) for each successive one-hour period.
- A9.6. All continuous monitoring systems for monitoring devices shall be installed such that representative measurements of emissions or process parameters from the affected facility are obtained. Additional procedures for location of continuous monitoring systems contained in the applicable Performance Specifications of 40 CFR 60, Appendix B shall be used.
- A9.7. When the effluents from a single affected facility or two or more affected facilities subject to the same emission standards are combined before being released to the atmosphere, the owner or operator may install applicable continuous monitoring systems on each effluent or on the combined effluent. When the affected facilities are not subject to the same emission standards, separate continuous monitoring systems shall be installed on each effluent. When the effluent from one affected facility is released to the atmosphere through more than one point, the owner or operator shall install applicable continuous monitoring systems on each separate effluent unless the installation of fewer systems is approved by the Director.
- A9.8. Owners or operators of all continuous monitoring systems for measurement of opacity shall reduce all data to six-minute averages and for systems other than opacity to one-hour averages, respectively. Six minute opacity averages shall be calculated from 24 or more data points equally spaced over each six-minute period. For systems other than opacity, one-hour averages shall be computed from four or more data points equally spaced over each one-hour period. Data recorded during periods of system breakdowns, repairs, calibration checks, and zero and span adjustments shall not be included in the data averages computed under this subsection. An arithmetic or integrated average of all data may be used. The data output of all continuous monitoring systems may be recorded in reduced or nonreduced form (e.g. ppm pollutant and percent O₂ or lb/million Btu of pollutant). All excess emissions shall be converted into units of the standard using the applicable

conversion procedures specified in subparts. After conversion into units of the standard, the data may be rounded to the same number of significant digits used in these rules to specify the applicable standard (e.g., rounded to the nearest 1% opacity).

A9.9. Upon written application by an owner or operator, the Director may approve alternatives to any monitoring procedures or requirements of these rules including, but not limited to the following:

A9.9.1. Alternative monitoring requirements when installation of a continuous monitoring system or monitoring device specified by these rules would not provide accurate measurements due to liquid water or other interferences caused by substances with the effluent gases.

A9.9.2. Alternative monitoring requirements when the affected facility is infrequently operated.

A9.9.3. Alternative monitoring requirements to accommodate continuous monitoring systems that require additional measurements to correct for stack moisture conditions.

A9.9.4. Alternative locations for installing continuous monitoring systems or monitoring devices when the owner or operator can demonstrate that installation at alternate locations will enable accurate and representative measurements.

A9.9.5. Alternative methods of converting pollutant concentration measurements to units of the standards.

A9.9.6. Alternative procedures for performing daily checks of zero and span drift that do not involve use of span gases or test cells.

A9.9.7. Alternatives to the ASTM test methods or sampling procedures specified by any subpart.

A9.9.8. Alternative continuous monitoring systems that do not meet the design or performance requirements in Performance Specification 1 in 40 CFR 60, Appendix B but adequately demonstrate a definite and consistent relationship between its measurements and the measurements of opacity by a system complying with the requirements in Performance Specification 1. The Director may require that such demonstration be performed for each affected facility.

A9.9.9. Alternative monitoring requirements when the effluent from a single affected facility or the combined effluent from two or more affected facilities are released to the atmosphere through more than one point.

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 26, 1990 (Supp. 90-3). Amended effective June 15, 1995 (Supp. 95-2).

Appendix 10. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective July 9, 1980 (Supp. 80-4). Amended effective June 19, 1981 (Supp. 81-3). Repealed by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

Appendix 11. Repealed

Historical Note

Adopted effective May 14, 1979 (Supp. 79-1). Amended effective September 11, 1983 (Supp. 83-5). Repealed by final rulemaking at 15 A.A.R. 281, effective March 7, 2009 (Supp. 09-1).

A12. Appendix 12. Procedures for Determining Ambient Air Concentrations for Hazardous Air Pollutants

PROCEDURES FOR DETERMINING AMBIENT AIR CONCENTRATIONS FOR HAZARDOUS AIR POLLUTANTS

A12.1 The procedure described in this appendix shall be used to develop chronic ambient air concentrations (CAACs) and acute ambient air concentrations (AAACs) for hazardous air pollutants (HAPs) for the following:

A12.1.1 Any HAP not included in Article 17, Table 3; and

A12.1.2 Any compound included in a group of HAPs listed in Article 17, Table 3, other than those identified in the group listing as the “selected” compound.

A12.2 Chronic Ambient Air Concentrations

A12.2.1 The applicant shall review the following data sources and, except as otherwise provided, shall give them the priority indicated in the development of CAACs:

A12.2.1.1 Tier 1 Data Sources: Reference Concentrations (RfCs) and air Unit Risk Factors (URFs) as presented in the Integrated Risk Information System (IRIS) of the United States Environmental Protection Agency (EPA).

A12.2.1.2. Tier 2 Data Sources:

A12.2.1.2.1. Preliminary Remediation Goals (PRGs) developed by Region 9 of EPA.

A12.2.1.2.2. Risk-Based Concentrations (RBCs) developed by Region 3 of EPA.

A12.2.1.3. Tier 3 Data Sources:

A12.2.1.3.1 Minimal Risk Levels (MRLs) developed by the Agency for Toxic Substances and Disease Registry (ATSDR).

A12.2.1.3.2 Reference Exposure Levels (RELs) and Unit Risk Factors (CalURFs) developed by the California Environmental Protection Agency.

A12.2.2 Evaluation of Tier 1 Values

A12.2.2.1 Calculation of Concentrations

A12.2.2.1.1 RfCs shall be multiplied by 1.04 to reflect an assumed exposure of 350, rather than 365 days per year.

A12.2.2.1.2 URFs shall be transformed into concentrations in milligrams per cubic meter (mg/m³) by applying the following equation:

$$TR \times ATc / (EF \times IFA \text{ adj} \times [URF \times BW / IR])$$

where: TR = 1E-06, ATc = 25,550 days, EF = 350 days/year, IFA adj = 11 m³-year/kg-day, BW = 70 kg, IR = 20 m³/day

A12.2.2.2 Comparison to Tier 2 and Tier 3 Concentrations

The concentration developed in accordance with section A12.2.2.1 shall be compared to the Tier 2 and Tier 3 concentrations for the compound, if any. URF-based concentrations shall be compared only to concentrations based on CalURFs. RfC-based concentrations shall be compared to concentrations based on PRGs, RBCs, MRLs and RELs.

A12.2.2.2.1 If there is reasonable agreement between the Tier 1 concentration and the other concentrations for the compound, the Tier 1 concentration shall be selected as the CAAC.

A12.2.2.2.2 If the Tier 1 concentration is not in reasonable agreement with the other concentrations, and one of the other concentrations is based on more recent or relevant studies, that concentration shall be selected as the CAAC. Otherwise the Tier 1 concentration shall be selected.

A12.2.2.3 If both an RfC-based and URF-based Tier 1 concentration is selected under section A12.2.2.2, the more stringent of the two shall be used as the CAAC.

A12.2.2.4 If a Tier 1 value is selected in accordance with this section, no further evaluation of Tier 2 or Tier 3 concentrations is required.

A12.2.3 Evaluation of Tier 2 Concentrations

A12.2.3.1 Selection of Tier 2 Values for Further Evaluation

A12.2.3.1.1 If there is only a PRG or RBC for the compound, it shall be selected for further evaluation in accordance with section A12.2.3.2.

A12.2.3.1.2 If there is both a PRG and an RBC for the compound, the concentrations shall be compared. If the concentrations are similar, the PRG shall be selected for further evaluation. If the concentrations are not similar, and the RBC is based on more relevant or more recent studies, it shall be selected for further evaluation. Otherwise the PRG shall be selected.

A12.2.3.2 Comparison to Tier 3 Concentrations
The concentration developed in accordance with section A12.2.3.1 shall be compared to the Tier 3 concentrations for the compound, if any. For purposes of this comparison, only MRL- or REL-based concentrations shall be considered.

A12.2.3.2.1 If there is reasonable agreement between the Tier 2 concentration and the Tier 3 concentrations for the compound, the Tier 2 concentration shall be selected as the CAAC.

A12.2.3.2.2 If the Tier 2 concentration is not in reasonable agreement with the Tier 3 concentrations, and one of the Tier 3 concentrations is based on more recent or relevant studies, that concentration shall be selected as the CAAC. Otherwise the Tier 2 concentration shall be selected.

A12.2.3.3 If a Tier 2 concentration is selected in accordance with section A12.2.3, no further evaluation of Tier 3 concentrations is required.

A12.2.4 Evaluation of Tier 3 Values

A12.2.4.1 Calculation of Concentrations

A12.2.4.1.1 MRLs and RELs shall be multiplied by 1.04 to reflect an assumed exposure of 350, rather than 365, days per year.

A12.2.4.1.2 CalURFs shall be transformed into concentrations in milligrams per cubic meter (mg/m³) by applying the following equation:

$TR \times ATc / (EF \times IFA \text{ adj} \times [CalURF \times BW / IR])$
where: TR = 1E-06, ATc = 25,550 days, EF = 350 days/year, IFA adj = 11 m³-year/kg-day, BW = 70 kg, IR = 20 m³/day

A12.2.4.2 Selection of Concentration

A12.2.4.2.1 If both an MRL and an REL exist for the compound, the most appropriate shall be selected after considering the relevance and timing of the studies on which the levels are based.

A12.2.4.2.2 If there is both a CalURF-based concentration and a concentration based on an MRL or REL for the compound, the more stringent of the two shall be selected.

A12.2.5 No Available Data

If there is no data available in any of the sources identified in section A12.2.1 for the compound, the applicant must perform a Tier 4 Risk Management Analysis under R18-2-1708 or forego the Risk Management Analysis option.

A12.3 Acute Ambient Air Concentrations

A12.3.1 Selection of Concentration

The first concentration identified by evaluating the following data sources in the order listed shall be adjusted, where required, and used as the AAAC for the compound:

A12.3.1.1 The level 2, four-hour average Acute Exposure Guideline Level developed by the EPA Office of Prevention, Pesticides and Toxic Substances.

A12.3.1.2 The level 2 Emergency Response Planning Guideline (ERPG) developed by the American Industrial Hygiene Association. The AAAC shall be the ERPG divided by 2.

A12.3.1.3 The level 2 Temporary Emergency Exposure Limit (TEEL) developed by the United States Department of Energy's Emergency Management Advisory Committee's Subcommittee on Consequence Assessment and Protective Action. The AAAC shall be the TEEL divided by 2.

A12.3.2 No Available Data

If there is no data available in any of the sources identified in section A12.3.1, the applicant must perform a Tier 4 Risk

Management Analysis under R18-2-1708 or forego the Risk Management Analysis option.

Historical Note

New Appendix 12 made by final rulemaking at 12 A.A.R. 1953, effective January 1, 2007 (Supp. 06-2).

Appendix 13. Repealed

Historical Note

New Appendix 13 made by final rulemaking at 14 A.A.R. 2404, effective July 8, 2008 (Supp. 08-2). Appendix repealed by final rulemaking at 18 A.A.R. 250, effective January 10, 2012 (Supp. 12-1).

A14. Appendix 14. Procedures for Sulfur Dioxide and Lead Fugitive Emissions Studies for the Hayden Smelter

A14.1. Applicability

This appendix applies to the owner or operator of the primary copper smelter located in Hayden, Arizona at latitude 33°0'15"N and longitude 110°46'31"W.

A14.2. Study Objectives

The owner or operator shall conduct fugitive emissions studies to derive a measurement or accurate estimate of total fugitive sulfur dioxide and lead emissions from the Hayden smelter during operations, including planned and unplanned start-up and shutdown periods and malfunctions, for the processes identified in A14.3 below. The studies shall include uncaptured fugitive sulfur dioxide emissions from the smelter processing units, but not emissions due solely to the use of fuel for space heating or steam generation, burners at anode casting, or slag pouring at the slag dump. The studies shall evaluate the extent to which correlations may exist between fugitive sulfur dioxide, lead, and particulate matter (PM/PM10/PM2.5) emissions, and shall develop such correlations as feasible.

The studies shall also be used to help validate that the operating conditions or ranges specified in the capture and control device maintenance and operations plans required in R18-2-B1301(D)(2) and R18-2-B1302(D)(2) are consistent with operating conditions demonstrating attainment of the 2008 Lead National Ambient Air Quality Standards (NAAQS) in the Hayden 2008 Lead NAAQS Nonattainment Area State Implementation Plan (SIP) and the 2010 Sulfur Dioxide NAAQS in the Hayden 2010 Sulfur Dioxide NAAQS Nonattainment Area SIP.

A14.3. Processes Evaluated

From the fugitive emissions studies, the owner or operator shall develop an emission factor or accurate estimate of fugitive emissions for sulfur dioxide and lead during operations, including planned and unplanned start-up and shutdown periods and malfunctions, produced by each of the following smelting processes:

- i. Flash furnace building, including flash furnace and dryer operations
- ii. Converter aisle, including converter and related operations
- iii. Anode furnace aisle, including oxidizing, poling and related operations

A14.4. Averaging Periods

The emission estimate shall include the average pounds per hour emission factor for the fugitive lead and sulfur dioxide emissions from each step in the smelting process identified in A14.3. The estimate shall include all time periods, including planned and unplanned start-up and shutdown periods and malfunctions.

A14.5. Methods and Study Protocols

The owner or operator shall submit to the Department and EPA Region IX for review and approval study protocols at least six months prior to conducting fugitive emission studies. Study protocols must be approved by the Department and EPA Region IX prior to commencement of fugitive emissions studies. Study protocols shall specify the method(s) used to meet the study objectives as described in A14.2, including during all recurring operating scenarios from all processes identified in A14.3.

Each fugitive emissions measurement system shall include validation of adequate velocity for flow measurements (i.e., the expected exhaust velocity is within the measurement range of the instrument), and have a sufficient number of flow and temperature sensors to ensure calculation of representative exhaust flows through each roof monitor vent. The number of such sensors and their locations for each monitoring system shall account for the physical configuration of the roof monitor vent, the locations of emitting activities relative to the roof monitor vent, and heat generated by the equipment served by the roof monitor vent.

The fugitive emissions studies shall include operation and process information to help understand the emission impacts of startup, shutdown, malfunctions, and significant changes in process operations. This shall include, for example, dates, times and duration of these events, cause of malfunctions, and descriptions of process changes.

After the completion of each fugitive emissions study, the owner or operator shall modify study methods based on data and lessons learned from previous studies, and submit such modified methods in the proceeding study protocols prior to conducting future emissions studies.

A14.6. Study Duration, Frequency, and Submission Schedule

The first fugitive emissions study must commence not later than six months after the completion of the Converter Retrofit Project authorized by Significant Permit Revision No. 60647. The second study commencement date shall occur within the same calendar quarter, but five years later from the date of commencement of the first study. The owner or operator shall submit the results of each fugitive emissions study in a report to the Department and EPA Region IX for review and approval not later than six months after completing a study. The data collection portion of the first and second fugitive emissions studies shall be conducted for a period of 12 months to assess the content and quantity of fugitive sulfur dioxide and lead emissions.

A14.7. Study Reports and Subsequent Studies

At minimum, fugitive emission study reports submitted pursuant to A14.6 must include:

- i. Resultant emission factors used to determine fugitive emissions of sulfur dioxide and lead.
- ii. Resultant average fugitive lead emissions for each process identified in A14.3.
- iii. Resultant peak one-hour fugitive sulfur dioxide emissions for each process identified in A14.3.
- iv. Seasonal differences, if any.
- v. Comparisons of results from past studies, if any.
- vi. Descriptions and identification of volumetric flow monitoring provisions in R18-2-B1301(D)(2)(a) and R18-2-B1302(D)(2)(a) and operational limits R18-2-B1301(D)(2)(b) and R18-2-B1302(D)(2)(b) that are associated with fugitive emissions.
- vii. An analysis of whether the results from a study demonstrate that the volumetric flow monitoring provisions in R18-2-B1301(D)(2)(a) and R18-2-B1302(D)(2)(a) and

the operational limits in R18-2-B1301(D)(2)(b) and R18-2-B1302(D)(2)(b) continuously ensure that actual fugitive sulfur dioxide and lead emissions are consistent with the modeled emission rates used in the attainment demonstrations in the Hayden 2008 Lead NAAQS Nonattainment Area SIP and the Hayden 2010 Sulfur Dioxide NAAQS Nonattainment Area SIP. The analysis must also identify subsequent fugitive emissions studies, if any, needed to remedy inaccurate operational limits and volumetric flow monitoring provisions and to ensure attainment of the 2008 Lead NAAQS and 2010 Sulfur Dioxide NAAQS. The scope, duration, and frequency of any subsequent fugitive emissions studies must also be identified. This provision and the report's conclusion neither require nor prohibit future fugitive emission studies.

- viii. An analysis of whether supplemental modeling is needed to demonstrate that resultant fugitive emissions from a study provide attainment of the 2008 Lead NAAQS and 2010 Sulfur Dioxide NAAQS.
- ix. A summary of methods as followed per approved study protocols.

A14.8. Revisions to Operations and Maintenance Plan

If an analysis conducted in accordance with A14.7(vi) demonstrates that fugitive emissions associated with volumetric flow monitoring provisions in R18-2-B1301(D)(2)(a) and R18-2-B1302(D)(2)(a) and operational limits in R18-2-B1301(D)(2)(b) and R18-2-B1302(D)(2)(b) may exceed the modeled emission rates used in the Hayden 2008 Lead NAAQS Nonattainment Area SIP attainment demonstration and/or the Hayden 2010 Sulfur Dioxide NAAQS Nonattainment Area SIP attainment demonstration, and result in an increased likelihood of a NAAQS exceedance based on modeling required under A14.9, then the owner or operator shall submit to the Department for approval, not later than six months after completing a study, recommended changes to operational limits and volumetric flow monitoring provisions as an operations and maintenance plan revision pursuant to R18-2-B1301(D)(2)(e) and R18-2-B1302(D)(2)(e) that would achieve necessary fugitive emissions levels to demonstrate attainment of the NAAQS at the same level of assurance as in the attainment demonstrations. Until receiving approval of the plan revision, the owner or operator shall operate and maintain the volumetric flow monitoring provisions and the operational limits in accordance with the plan as initially submitted pursuant to R18-2-B1301(D)(2)(e) and R18-2-B1302(D)(2)(e). Additionally, the owner and operator shall submit new attainment demonstrations pursuant to A14.9, making appropriate demonstrations of attainment at adjusted fugitive emissions levels.

Similarly, if an analysis conducted in accordance with A14.7(vi) demonstrates that fugitive emissions associated with the volumetric flow monitoring provisions in R18-2-B1301(D)(2)(a) and R18-2-B1302(D)(2)(a) and operational limits in R18-2-B1301(D)(2)(b) and R18-2-B1302(D)(2)(b) may exceed the modeled emission rates used in the Hayden 2008 Lead NAAQS Nonattainment Area SIP attainment demonstration and/or the Hayden 2010 Sulfur Dioxide NAAQS Nonattainment Area SIP attainment demonstration, and result in an increased likelihood of a NAAQS exceedance based on modeling required under A14.9, then the Department shall submit appropriate changes to the operational limits and volumetric flow monitoring provisions, and any revised attainment demonstration pursuant to A14.9, if applicable, to EPA Region IX as a SIP revision not later than 12 months after completion of a fugitive emissions study.

A14.9. Supplemental Modeling

If an analysis conducted in accordance with A14.7(vii) demonstrates that fugitive emissions associated with volumetric flow monitoring provisions in R18-2-B1301(D)(2)(a) and R18-2-B1302(D)(2)(a) and operational limits in R18-2-B1301(D)(2)(b) and R18-2-B1302(D)(2)(b) are greater than the modeled emission rates used in the Hayden 2008 Lead NAAQS Nonattainment Area SIP attainment demonstration and/or the Hayden 2010 Sulfur Dioxide NAAQS Nonattainment Area SIP attainment demonstration, the owner or operator shall remodel to demonstrate whether the 2010 Sulfur Dioxide NAAQS and/or 2008 Lead NAAQS will be attained as such higher rates. The owner or operator shall submit such modeling to the Department and EPA Region IX for review and approval not later than six months after completing a fugitive emissions study.

If the revised modeling demonstrates that the 2010 Sulfur Dioxide NAAQS and/or 2008 Lead NAAQS will be attained, the Department shall submit such modeling demonstration and revised fugitive emissions assumptions as a SIP revision to EPA Region IX not later than 12 months after completion of a fugitive emissions study. Alternatively, the owner or operator shall propose additional emission control requirements to revise the SIP, or any combination of revised control measures and modeled attainment, to demonstrate attainment of the 2010 Sulfur Dioxide NAAQS and/or 2008 Lead NAAQS.

Historical Note

A14, Appendix 14 made by final rulemaking at 23 A.A.R. 722, effective May 7, 2017 (Supp. 17-1). Because of a clerical error in Supp. 17-1, A14, Appendix 14 was inadvertently published at the end of Article 13. At the request of the Department it has been moved to the end of this Chapter (Supp. 17-3).

A15. Appendix 15. Test Methods for Determining Opacity and Stabilization of Unpaved Roads

A15.1. Applicability

This appendix applies to unpaved roads at the primary copper smelter located in Hayden, Arizona at latitude 33°0'15"N and longitude 110°46'31"W.

A15.2. Opacity Test Method

The purpose of this test method is to estimate the percent opacity of fugitive dust plumes caused by vehicle movement on unpaved roads. This method can only be conducted by an individual who has received certification as a qualified observer. Qualification and testing requirements can be found in Section A15.4 of this appendix.

A15.2.1. Step 1

Stand at least 16.5 feet from the fugitive dust source in order to provide a clear view of the emissions with the sun oriented in the 140° sector to the back. Following the above requirements, make opacity observations so that the line of vision is approximately perpendicular to the dust plume and wind direction. If multiple plumes are involved, do not include more than one plume in the line of sight at one time.

A15.2.2. Step 2

Record the fugitive dust source location, source type, method of control used, if any, observer's name, certification data and affiliation, and a sketch of the observer's position relative to the fugitive dust source. Also record the time, estimated distance to the fugitive dust source location, approximate wind direction, estimated wind speed, description of the sky condition (presence and color of clouds), observer's position to the fugitive dust source, and color of

the plume and type of background on the visible emission observation from both when opacity readings are initiated and completed.

A15.2.3. Step 3

Make opacity observations, to the extent possible, using a contrasting background that is perpendicular to the line of vision. Make opacity observations approximately 1 meter above the surface from which the plume is generated. Note that the observation is to be made at only one visual point upon generation of a plume, as opposed to visually tracking the entire length of a dust plume as it is created along a surface. Make two observations per vehicle, beginning with the first reading at zero seconds and the second reading at five seconds. The zero-second observation should begin immediately after a plume has been created above the surface involved. Do not look continuously at the plume but, instead, observe the plume briefly at zero seconds and then again at five seconds.

A15.2.4. Step 4

Record the opacity observations to the nearest 5 percent on an observational record sheet. Each momentary observation recorded represents the average opacity of emissions for a 5-second period. While it is not required by the test method, EPA recommends that the observer estimate the size of vehicles which generate dust plumes for which readings are taken (e.g. midsize passenger car or heavy-duty truck) and the approximate speeds the vehicles are traveling when readings are taken.

A15.2.5. Step 5

Repeat Step 3 (Section A15.2.3 of this appendix) and Step 4 (Section A15.2.4 of this appendix) until you have recorded a total of 12 consecutive opacity readings. This will occur once six vehicles have driven on the source in your line of observation for which you are able to take proper readings. The 12 consecutive readings must be taken within the same period of observation but must not exceed 1 hour. Observations immediately preceding and following interrupted observations can be considered consecutive.

A15.2.6. Step 6

Average the 12 opacity readings together. If the average opacity reading equals 20 percent or lower, the source is in compliance.

A15.3. Silt Content Test Method

The purpose of this test method is to estimate the silt content of the trafficked parts of unpaved roads. The higher the silt content, the more fine dust particles that are released when cars and trucks drive on unpaved roads.

A15.3.1. Equipment

A15.3.1.1. A set of sieves with the following openings: 4 millimeters (mm), 2 mm, 1 mm, 0.5 mm and 0.25 mm (or a set of standard/commonly available sieves), a lid, and collector pan.

A15.3.1.2. A small whisk broom or paintbrush with stiff bristles and dustpan 1 ft. in width. (The broom/brush should preferably have one, thin row of bristles no longer than 1.5 inches in length).

A15.3.1.3. A spatula without holes.

A15.3.1.4. A small scale with half-ounce increments (e.g., postal/package scale).

A15.3.1.5. A shallow, lightweight container (e.g., plastic storage container).

A15.3.1.6. A sturdy cardboard box or other rigid object with a level surface.

A15.3.1.7. A basic calculator.

A15.3.1.8. Cloth gloves (optional for handling metal sieves on hot, sunny days).

A15.3.1.9. Sealable plastic bags (if sending samples to a laboratory).

A15.3.1.10. A pencil/pen and paper.

A15.3.2. Step 1

Look for a routinely traveled surface, as evidenced by tire tracks. (Only collect samples from surfaces that are not damp due to precipitation or dew. This statement is not meant to be a standard in itself for dampness where watering is being used as a control measure. It is only intended to ensure that surface testing is done in a representative manner.) Use caution when taking samples to ensure personal safety with respect to passing vehicles. Gently press the edge of a dustpan (1 foot in width) into the surface four times to mark an area that is 1 square foot. Collect a sample of loose surface material using a whiskbroom or brush and slowly sweep the material into the dustpan, minimizing escape of dust particles. Use a spatula to lift heavier elements such as gravel. Only collect dirt/gravel to an approximate depth of 3/8 inch or 1 cm in the 1 square foot area. If you reach a hard, underlying subsurface that is < 3/8 inch in depth, do not continue collecting the sample by digging into the hard surface. In other words, you are only collecting a surface sample of loose material down to 1 cm. In order to confirm that samples are collected to 1 cm in depth, a wooden dowel or other similar narrow object at least one foot in length can be laid horizontally across the survey area while a metric ruler is held perpendicular to the dowel.

At this point, you can choose to place the sample collected into a plastic bag or container and take it to an independent laboratory for silt content analysis. A reference to the procedure the laboratory is required to follow is at the end of this section.

A15.3.3. Step 2

Place a scale on a level surface. Place a lightweight container on the scale. Zero the scale with the weight of the empty container on it. Transfer the entire sample collected in the dustpan to the container, minimizing escape of dust particles. Weigh the sample and record its weight.

A15.3.4. Step 3

Stack a set of sieves in order according to the size openings specified above, beginning with the largest size opening (4 mm) at the top. Place a collector pan underneath the bottom (0.25 mm) sieve.

A15.3.5. Step 4

Carefully pour the sample into the sieve stack, minimizing escape of dust particles by slowly brushing material into the stack with a whiskbroom or brush. (On windy days, use the trunk or door of a car as a wind barricade.) Cover the stack with a lid. Lift up the sieve stack and shake it vigorously up, down and sideways for at least 1 minute.

A15.3.6. Step 5

Remove the lid from the stack and disassemble each sieve separately, beginning with the top sieve. As you remove each sieve, examine it to make sure that all of the material has been sifted to the finest sieve through which it can pass (e.g., material in each sieve [besides the top sieve that captures a range of larger elements] should look the same size). If this is not the case, re-stack the sieves

and collector pan, cover the stack with the lid, and shake it again for at least 1 minute. (You only need to reassemble the sieve(s) that contain material, which requires further sifting.)

A15.3.7. Step 6

After disassembling the sieves and collector pan, slowly sweep the material from the collector pan into the empty container originally used to collect and weigh the entire sample. Take care to minimize escape of dust particles. You do not need to do anything with material captured in the sieves; only the collector pan. Weigh the container with the material from the collector pan and record its weight.

A15.3.8. Step 7

If the source is an unpaved road, multiply the resulting weight by 0.38. The resulting number is the estimated silt loading. Then, divide by the total weight of the sample you recorded earlier in Step 2 (Section A15.3.3 of this appendix) and multiply by 100 to estimate the percent silt content.

A15.3.9. Step 8

Select another two routinely traveled portions of the unpaved road and repeat this test method. Once you have calculated the silt loading and percent silt content of the 3 samples collected, average your results together.

A15.3.10. Step 9

Examine results. If the average silt loading is less than 0.33 oz/ft², the surface is STABLE. If the average silt loading is greater than or equal to 0.33 oz/ft², then proceed to examine the average percent silt content. If the source is an unpaved road and the average percent silt content is 6 percent or less, the surface is STABLE. If your field test results are within 2 percent of the standard (for example, 4–8 percent silt content on an unpaved road), it is recommended that you collect 3 additional samples from the source according to Step 1 (Section A15.3.2 of this appendix) and take them to an independent laboratory for silt content analysis.

A15.3.11. Independent Laboratory Analysis

You may choose to collect 3 samples from the source, according to Step 1 (Section A15.3.2 of this appendix), and send them to an independent laboratory for silt content analysis rather than conduct the sieve field procedure. If so, the test method the laboratory is required to use is: U.S. Environmental Protection Agency (1995), “Procedures for Laboratory Analysis of Surface/Bulk Dust Loading Samples”, (AP-42 Fifth Edition, Volume I, Appendix C.2.3 “Silt Analysis”), Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina.

A15.4. Qualification and Testing

A15.4.1. Certification Requirements

To receive certification as a qualified observer, a candidate must be tested and demonstrate the ability to assign opacity readings in 5 percent increments to 25 different black plumes and 25 different white plumes, with an error not to exceed 15 percent opacity on any one reading and an average error not to exceed 7.5 percent opacity in each category. Candidates shall be tested according to the procedures described in Section A15.4.2 of this appendix. Any smoke generator used pursuant to Section A15.4.2 of this appendix shall be equipped with a smoke meter which meets the requirements of Section A15.4.3 of this appendix. Certification tests that do not meet the requirements of Sections A15.4.2 and A15.4.3 of this appendix are not valid. The certification shall be valid for a period of 6 months, and after each 6-month period the qualification procedures must be repeated by an observer in order to retain certification.

A15.4.2. Certification Procedure

The certification test consists of showing the candidate a complete run of 50 plumes, 25 black plumes and 25 white plumes, generated by a smoke generator. Plumes shall be presented in random order within each set of 25 black and 25 white plumes. The candidate assigns an opacity value to each plume and records the observation on a suitable form. At the completion of each run of 50 readings, the score of the candidate is determined. If a candidate fails to qualify, the complete run of 50 readings must be repeated in any retest. The smoke test may be administered as part of a smoke school or training program, and may be preceded by training or familiarization runs of the smoke generator, during which candidates are shown black and white plumes of known opacity.

A15.4.3. Smoke Generator Specifications

Any smoke generator used for the purpose of Section A15.4.2 of this appendix shall be equipped with a smoke meter installed to measure opacity across the diameter of the smoke generator stack. The smoke meter output shall display in-stack opacity, based upon a path length equal to the stack exit diameter on a full 0 percent to 100 percent chart recorder scale. The smoke meter optical design and performance shall meet the specifications shown in Table 1 of this appendix. The smoke meter shall be calibrated as prescribed in Section A15.4.3.1 of this appendix prior to conducting each smoke reading test. At the completion of each test, the zero and span drift shall be checked, and if the drift exceeds plus or minus 1 percent opacity, the condition shall be corrected prior to conducting any subsequent test runs. The smoke meter shall be demonstrated, at the time of installation, to meet the specifications listed in Table 1 of this appendix. This demonstration shall be repeated following any subsequent repair or replacement of the photocell or associated electronic circuitry, including the chart recorder or output meter, or every 6 months, whichever occurs first.

A15.4.3.1. Calibration

The smoke meter is calibrated after allowing a minimum of 30 minutes warm-up by alternately producing simulated opacity of 0 percent and 100 percent. When stable response at 0 percent or 100 percent is noted, the smoke meter is adjusted to produce an output of 0 percent or 100 percent, as appropriate. This calibration shall be repeated until stable 0 percent and 100 percent readings are produced without adjustment. Simulated 0 percent and 100 percent opacity values may be produced by alternately switching the power to the light source on and off while the smoke generator is not producing smoke.

A15.4.3.2. Smoke Meter Evaluation

The smoke meter design and performance are to be evaluated as follows:

A15.4.3.2.1. Light Source

Verify, from manufacturer's data and from voltage measurements made at the lamp, as installed, that the lamp is operated within plus or minus 5 percent of the nominal rated voltage.

A15.4.3.2.2. Spectral Response of Photocell

Verify from manufacturer's data that the photocell has a photopic response (i.e., the spectral sensitivity of the cell shall closely approximate the standard spectral-luminosity curve for photopic vision which is referenced in (b) of Table 1 of this appendix).

A15.4.3.2.3. Angle of View

Check construction geometry to ensure that the total angle of view of the smoke plume, as seen by the photocell, does not exceed 15°. Calculate the total angle of view (ϕ_v) as follows:

$$\text{Total Angle of View} = 2 \tan^{-1} (d/2L)$$

where:

d = The photocell diameter + the diameter of the limiting aperture; and

L = The distance from the photocell to the limiting aperture. The limiting aperture is the point in the path between the photocell and the smoke plume where the angle of view is most restricted. In smoke generator smoke meters, this is normally an orifice plate.

A15.4.3.2.4. Angle of Projection

Check construction geometry to ensure that the total angle of projection of the lamp on the smoke plume does not exceed 15°. Calculate the total angle of projection (ϕ_p) as follows:

$$\text{Total Angle of Projection} = 2 \tan^{-1} (d/2L)$$

where:

d = The sum of the length of the lamp filament + the diameter of the limiting aperture; and

L = The distance from the lamp to the limiting aperture.

A15.4.3.2.5. Calibration Error

Using neutral-density filters of known opacity, check the error between the actual response and the theoretical linear response of the smoke meter. This check is accomplished by first calibrating the smoke meter, according to Section A15.4.3.1 of this appendix, and then inserting a series of three neutral-density filters of nominal opacity of 20 percent, 50 percent, and 75 percent in the smoke meter path length. Use filters calibrated within plus or minus 2 percent. Care should be taken when inserting the filters to prevent stray light from affecting the meter. Make a total of five nonconsecutive readings for each filter. The maximum opacity error on any one reading shall be plus or minus 3 percent.

A15.4.3.2.6. Zero and Span Drift

Determine the zero and span drift by calibrating and operating the smoke generator in a normal manner over a 1-hour period. The drift is measured by checking the zero and span at the end of this period.

A15.4.3.2.7. Response Time

Determine the response time by producing the series of five simulated 0 percent and 100 percent opacity values and observing the time required to reach stable response. Opacity values of 0 percent and 100 percent may be simulated by alternately switching the power to the light source off and on while the smoke generator is not operating.

Table 1: Smoke Meter Design and Performance Specifications

Parameter	Specification
a. Light source	Incandescent lamp operated at nominal rated voltage
b. Spectral response of photocell	Photopic (daylight spectral response of the human eye)
c. Angle of view	15° maximum total angle
d. Angle of projection	15° maximum total angle
e. Calibration error	Plus or minus 3 percent opacity; maximum
f. Zero and span drift	Plus or minus 1 percent opacity, 30 minutes
g. Response time	Less than or equal to 5 seconds

Historical Note

A15, Appendix 15, to include Table 1, made by final rulemaking at 23 A.A.R. 767, effective May 7, 2017 (Supp. 17-1). Because of a clerical error in Supp. 17-1,

A15. Appendix 15 was inadvertently published at the end of Article 13. At the request of the Department it has been moved to the end of this Chapter (Supp. 17-3).
