A value of $W_T = 0.06$ is applicable to each of the five organs or tissues in the "remainder" category receiving the highest dose equivalents, and the dose equivalents of all other remaining tissues may be disregarded. The following portions of the GI tract -- stomach,

small intestine, upper large intestine, and lower large intestine -- are to be treated as four separate organs.

Note that the dose equivalents for an extremity, skin, and lens of the eye are not considered in computing the committed effective dose equivalent but are subject to limits that shall be met separately.

When an ALI is defined by the stochastic dose limit, this value alone is given. When an ALI is determined by the nonstochastic dose limit to an organ, the organ or tissue to which the limit applies is shown, and the ALI for the stochastic limit is shown in parentheses. Abbreviated organ or tissue designations are used:

LLI wall	=	lower large intestine wall,
St. wall	=	stomach wall,
Blad wall	=	bladder wall, and
Bone surf	=	Bone surface.

The use of the ALIs listed first, the more limiting of the stochastic and nonstochastic ALIs, will ensure that nonstochastic effects are avoided and that the risk of stochastic effects is limited to an acceptably low value. If, in a particular situation involving a radionuclide for which the nonstochastic ALI is limiting, use of that nonstochastic ALI is considered unduly conservative, the licensee may use the stochastic ALI to determine the committed effective dose equivalent. However, the licensee shall also ensure that the 0.5 Sv (50 rem) dose equivalent limit for any organ or tissue is not exceeded by the sum of the external deep-dose equivalent plus the internal committed dose equivalent to that organ, not the effective dose. For the case where there is no external dose contribution, this would be demonstrated if the sum of the fractions of the nonstochastic ALIs (ALI_{ns}) that contribute to the committed dose equivalent to the organ receiving the highest dose does not exceed unity, that is, $\sum (\text{intake (in } \mu\text{Ci) of each radionuclide} / ALI_{ns}) \leq 1.0$. If there is an external deep dose equivalent contribution of H_d , then this sum must be less than $1 - (H_d/50)$, instead of ≤ 1.0 .

Note that the dose equivalents for an extremity, skin, and lens of the eye are not considered in computing the committed effective dose equivalent but are subject to limits that must be met separately.

The derived air concentration (DAC) values are derived limits intended to control chronic occupational exposures. The relationship between the DAC and the ALI is given by:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

$$\text{DAC} = \text{ALI}(\text{in } \mu\text{Ci}) / (2000 \text{ hours per working year} \times 60 \text{ minutes/hour} \times 2 \times 10^4 \text{ ml per minute}) = [\text{ALI} / 2.4 \times 10^9] \mu\text{Ci/ml},$$

where 2×10^4 ml is the volume of air breathed per minute at work by Reference Man under working conditions of light work.

The DAC values relate to one of two modes of exposure: either external submersion or the internal committed dose equivalents resulting from inhalation of radioactive materials. DACs based upon submersion are for immersion in a semi-infinite cloud of uniform concentration and apply to each radionuclide separately.

The ALI and DAC values include contributions to exposure by the single radionuclide named and any in-growth of daughter radionuclides produced in the body by decay of the parent. However, intakes that include both the parent and daughter radionuclides shall be treated by the general method appropriate for mixtures.

The values of ALI and DAC do not apply directly when the individual both ingests and inhales a radionuclide, when the individual is exposed to a mixture of radionuclides by either inhalation or ingestion or both, or when the individual is exposed to both internal and external irradiation. See R9-7-407. When an individual is exposed to radioactive materials which fall under several of the translocation classifications of the same radionuclide, such as Class D, Class W, or Class Y, the exposure may be evaluated as if it were a mixture of different radionuclides.

It should be noted that the classification of a compound as Class D, W, or Y is based on the chemical form of the compound and does not take into account the radiological half-life of different radionuclides. For this reason, values are given for Class D, W, and Y compounds, even for very short-lived radionuclides.

Table II "Effluent Concentrations"

The columns in Table II of this Appendix captioned "Effluents," "Air," and "Water" are applicable to the assessment and control of dose to the public, particularly in the implementation of the provisions of R9-7-415. The concentration values given in Columns 1 and 2 of Table II are equivalent to the radionuclide concentrations which, if inhaled or ingested continuously over the course of a year, would produce a total effective dose equivalent of 0.5 mSv (0.05 rem).

Consideration of nonstochastic limits has not been included in deriving the air and water effluent concentration limits because nonstochastic effects are presumed not to occur at or below the dose levels established for individual members of the public. For radionuclides, where the nonstochastic limit was governing in deriving the occupational DAC, the stochastic ALI was used in deriving the corresponding airborne effluent limit in Table II. For this reason,

the DAC and airborne effluent limits are not always proportional as they were in earlier versions of Appendix A of Article 4.

The air concentration values listed in Table II, Column 1 were derived by one of two methods. For those radionuclides for which the stochastic limit is governing, the occupational stochastic inhalation ALI was divided by 2.4×10^9 , relating the inhalation ALI to the DAC, as explained above, and then divided by a factor of 300. The factor of 300 includes the following components: a factor of 50 to relate the 0.05 Sv (5 rem) annual occupational dose limit to the 0.1 rem limit for members of the public, a factor of 3 to adjust for the difference in exposure time and the inhalation rate for a worker and that for members of the public; and a factor of 2 to adjust the occupational values, derived for adults, so that they are applicable to other age groups.

For those radionuclides for which submersion, that is external dose, is limiting, the occupational DAC in Table I, Column 3 was divided by 219. The factor of 219 is composed of a factor of 50, as described above, and a factor of 4.38 relating occupational exposure for 2,000 hours per year to full-time exposure (8,760 hours per year). Note that an additional factor of 2 for age considerations is not warranted in the submersion case.

The water concentrations were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3×10^7 . The factor of 7.3×10^7 (ml) includes the following components: the factors of 50 and 2 described above and a factor of 7.3×10^5 (ml) which is the annual water intake of Reference Man.

Note 2 of this Appendix provides groupings of radionuclides which are applicable to unknown mixtures of radionuclides. These groupings, including occupational inhalation ALIs and DACs, air and water effluent concentrations, and releases to sewer, require demonstrating that the most limiting radionuclides in successive classes are absent. The limit for the unknown mixture is defined when the presence of one of the listed radionuclides cannot be definitely excluded as being present either from knowledge of the radionuclide composition of the source or from actual measurements.

Table III "Releases to Sewers"

The monthly average concentrations for release to sanitary sewerage are applicable to the provisions in R9-7-435. The concentration values were derived by taking the most restrictive occupational stochastic oral ingestion ALI and dividing by 7.3×10^6 (ml). The factor of 7.3×10^6 (ml) is composed of a factor of 7.3×10^5 (ml), the annual water intake by Reference Man, and a factor of 10, such that the concentrations, if the sewage released by the licensee were the only source of water ingested by a Reference Man during a year, would result in a committed effective dose equivalent of 0.5 rem.

FOOTNOTES:

- ¹ "Submersion" means that values given are for submersion in a hemispherical semi-infinite cloud of airborne material.
- ² These radionuclides have radiological half-lives of less than 2 hours. The total effective dose equivalent received during operations with these radionuclides might include a significant contribution from external exposure. The DAC values for all radionuclides, other than those designated Class "Submersion," are based upon the committed effective dose equivalent due to the intake of the radionuclide into the body and do NOT include potentially significant contributions to dose equivalent from external exposures. The licensee may substitute 1E-7 $\mu\text{Ci/ml}$ for the listed DAC to account for the submersion dose prospectively but shall use individual monitoring devices or other radiation-measuring instruments that measure external exposure to demonstrate compliance with the limits. (See R12-1-410)
- ³ For soluble mixtures of U-238, U-234, and U-235 in air, chemical toxicity may be the limiting factor (see R12-1-408(E)). If the percent by weight (enrichment) of U-235 is not greater than 5, the concentration value for a 40-hour work week is 0.2 milligrams uranium per cubic meter of air average. For any enrichment, the product of the average concentration and time of exposure during a 40-hour work week shall not exceed 8E-3 (SA) $\mu\text{Ci-hr/ml}$, where SA is the specific activity of the uranium inhaled. The specific activity for natural uranium is 6.77E-7 curies per gram U. The specific activity for other mixtures of U-238, U-235, and U-234, if not known, shall be:

$$\text{SA} = 3.6\text{E-7 curies/gram U} \quad \text{U-depleted}$$

$$\text{SA} = [0.4 + 0.38 (\text{enrichment}) + 0.0034 (\text{enrichment})^2] \text{E-6,} \quad \text{enrichment} > 0.72$$

where enrichment is the percentage by weight of U-235, expressed as percent.

NOTE:

- If the identity of each radionuclide in a mixture is known but the concentration of one or more of the radionuclides in the mixture is not known, the DAC for the mixture shall be the most restrictive DAC of any radionuclide in the mixture.
- If the identity of each radionuclide in the mixture is not known, but it is known that certain radionuclides specified in this Appendix are not present in the mixture, the inhalation ALI, DAC, and effluent and sewage concentrations for the mixture are the lowest values specified in this Appendix for any radionuclide that is not known to be absent from the mixture; or\

3. If a mixture of radionuclides consists of Uranium and its daughters in ore dust (10 μm AMAD particle distribution assumed) prior to chemical separation of the Uranium from the ore, the following values may be used for the DAC of the mixture: 6E-11 μCi of gross

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

alpha activity from Uranium-238, Uranium-234, Thorium-230, and Radium-226 per milliliter of air; 3E-11 µCi of natural uranium per milliliter of air; or 45 micrograms of natural uranium per cubic meter of air.

4. If the identity and concentration of each radionuclide in a mixture are known, the limiting values should be derived as follows: determine, for each radionuclide in the mixture, the ratio between the concentration present in the mixture and the concentration otherwise established in Appendix B to Article 4 for the specific radionuclide when not in a mixture. The sum of such ratios for all of the radionuclides in the mixture may not exceed "1" (i.e., "unity").

Example: If radionuclides "A," "B," and "C" are present in concentrations C_A , C_B , and C_C , and if the applicable DACs are DAC_A , DAC_B , and DAC_C respectively then the concentrations shall be limited so that the following relationship exists:

$$\frac{C_A}{DAC_A} + \frac{C_B}{DAC_B} + \frac{C_C}{DAC_C} \leq 1$$

Historical Note

New Appendix B recodified from 12 A.A.C. 1, Article 4, Appendix B, effective March 22, 2018 (Supp. 18-1).

* To convert μCi to kBq, multiply the μCi value by 37.

NOTE: Where there is involved a combination of radionuclides in known amounts, the limit for the combination shall be derived as follows: determine, for each radionuclide in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific radionuclide when not in combination. The sum of such ratios for all radionuclides in the combination may not exceed "1" -- that is, unity.

¹ The quantities listed above were derived by taking 1/10 of the most restrictive ALI listed in Table I, Columns 1 and 2, of Appendix B to Article 4, rounding to the nearest factor of 10, and constraining the values listed between 37 Bq and 37 MBq (0.001 and 1,000 μCi). Values of 3.7 MBq (100 μCi) have been assigned for radionuclides having a radioactive half-life in excess of E+9 years, except rhenium, 37 MBq (1,000 μCi), to take into account their low specific activity.

Historical Note

New Appendix C recodified from 12 A.A.C. 1, Article 4, Appendix C, effective March 22, 2018 (Supp. 18-1). Amended by final expedited rulemaking at 24 A.A.R. 2151, effective July 12, 2018 (Supp. 18-3).

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Appendix D. Classification and Characteristics of Low-level Radioactive Waste

I. Classification of Radioactive Waste for Land Disposal

- a) Considerations. Determination of the classification of radioactive waste involves two considerations. First, consideration must be given to the concentration of long-lived radionuclides (and their shorter-lived precursors) whose potential hazard will persist long after such precautions as institutional controls, improved waste form, and deeper disposal have ceased to be effective. These precautions delay the time when long-lived radio nuclides could cause exposures. In addition, the magnitude of the potential dose is limited by the concentration and availability of the radionuclide at the time of exposure. Second, consideration must be given to the concentration of shorter-lived radionuclides for which requirements on institutional controls, waste form, and disposal methods are effective.

b) Classes of waste.

- 1) Class A waste is waste that is usually segregated from other waste classes at the disposal site. The physical form and characteristics of Class A waste must meet the minimum requirements set forth in Section II(a). If Class A waste also meets the stability requirements set forth in Section II(b), it is not necessary to segregate the waste for disposal.
- 2) Class B waste is waste that must meet more rigorous requirements on waste form to ensure stability after disposal. The physical form and characteristics of Class B waste must meet both the minimum and stability requirements set forth in Section II.
- 3) Class C waste is waste that not only must meet more rigorous requirements on waste form to ensure stability but also requires additional measures at the disposal facility to protect against inadvertent intrusion. The physical form and characteristics of Class C waste must meet both the minimum and stability requirements set forth in Section II.

c) Classification determined by long-lived radionuclides. If the radioactive waste contains only radionuclides listed in Table I, classification shall be determined as follows:

- 1) If the concentration does not exceed 0.1 times the value in Table I, the waste is Class A.
- 2) If the concentration exceeds 0.1 times the value in Table I but does not exceed the value in Table I, the waste is Class C.
- 3) If the concentration exceeds the value in Table I, the waste is not generally acceptable for land disposal.
- 4) For wastes containing mixtures of radionuclides listed in Table I, the total concentration shall be determined by the sum of fractions rule described in Section I(g).

- d) Classification determined by short-lived radionuclides. If the waste does not contain any of the radionuclides listed in Table I, classification shall be determined based on the concentrations shown in Table II. However, as specified in Section I(f), if radioactive waste does not contain any nuclides listed in either Table I or II, it is Class A.

- 1) If the concentration does not exceed the value in Column 1, the waste is Class A.
- 2) If the concentration exceeds the value in Column 1 but does not exceed the value in Column 2, the waste is Class B.
- 3) If the concentration exceeds the value in Column 2 but does not exceed the value in Column 3, the waste is Class C.
- 4) If the concentration exceeds the value in Column 3, the waste is not generally acceptable for near-surface disposal.
- 5) For wastes containing mixtures of the radionuclides listed in Table II, the total concentration shall be determined by the sum of fractions rule described in Section I(g).

* DEPARTMENT NOTE: To convert the Ci/m³ value to gigabecquerel (GBq) per cubic meter, multiply the Ci/m³ value by 37. There are no limits established for these radionuclides in Class B or C wastes. Practical considerations such as the effects of external radiation and internal heat generation on transportation, handling, and disposal will limit the concentrations for these wastes. These wastes shall be Class B unless the concentrations of other radionuclides in Table II determine the waste to be Class C independent of these radionuclides.

- e) Classification determined by both long- and short-lived radionuclides. If the radioactive waste contains a mixture of radionuclides, some of which are listed in Table I and some of which are listed in Table II, classification shall be determined as follows:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Each package of waste shall be clearly labeled to identify whether it is Class A, Class B, or Class C waste, in accordance with Section I.

*****See Section R9-7-102 for definition of pyrophoric.

ARTICLE 5. SEALED SOURCE INDUSTRIAL RADIOGRAPHY**R9-7-501. Definitions**

"Access panel" means any panel that is designed to be removed or opened for maintenance or service purposes, opened using tools, and used to provide access to the interior of the cabinet x-ray unit.

"Annual refresher safety training" means a review conducted or provided by the licensee for its employees on radiation safety aspects of industrial radiography. The review shall include, as applicable, the results of internal inspections, new procedures or equipment, new or revised state rules, accidents or errors that have occurred, and provide opportunities for employees to ask safety questions.

"Aperture" means any opening in the outside surface of the cabinet x-ray unit, other than a port, which remains open during generation of x-radiation.

"Associated equipment" means equipment used in conjunction with a radiographic exposure device that drives, guides, or comes in contact with the source.

"Certifying entity" means an independent certifying organization that complies with the requirements in Appendix A of this Article, or requirements of the NRC or another Agreement State, that are equivalent to the requirements in parts II and III of Appendix A.

"Collimator" means a radiation shield that is placed on the end of the guide tube or directly onto a radiographic exposure device to restrict the size of the radiation beam when the sealed source is positioned to make a radiographic exposure.

"Control (drive) cable" means the cable that is connected to the source assembly and used to drive the source to and from the exposure location.

"Control (drive) mechanism" means a device that enables the source assembly to be moved to and from the exposure device.

"Control tube" means a protective sheath for guiding the control cable. The control tube connects the control drive mechanism to the radiographic exposure device.

"Door" means any barrier that is designed to be movable or opened for routine operation purposes, not opened using tools, and used to provide access to the interior of the cabinet x-ray unit.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Exposure head” means a device that places the gamma radiography sealed source in a selected working position.

“Ground fault” means an accidental electrical grounding of an electrical conductor.

“Guide tube (projection sheath)” means a flexible or rigid tube (i.e., “J” tube) for guiding the source assembly and the attached control cable from the exposure device to the exposure head. The guide tube may also include the connections necessary for attachment to the exposure device and to the exposure head.

“Hands-on experience” means accumulation of knowledge or skill in any area relevant to radiography.

“Independent certifying organization” means an independent organization that meets all of the requirements in Appendix A.

“Lay-barge radiography” means industrial radiography performed on any water vessel used for laying pipe.

“Port” means any opening in the outside surface of the cabinet x-ray unit that is designed to remain open, during generation of x-rays, for conveying material being irradiated into and out of the cabinet, or for partial insertion of an object for irradiation whose dimensions do not permit complete insertion into the cabinet x-ray unit.

“Practical examination” means a demonstration, through practical application of safety rules and principles of industrial radiography, including use of all radiography equipment and knowledge of radiography procedures.

“Radiographer certification” means written approval received from a certifying entity stating that an individual has satisfactorily met certain established radiation safety, testing, and experience criteria.

“Radiographic exposure device” means any x-ray machine used for purposes of making an industrial radiographic exposure or a device that contains a sealed source, and the sealed source or its shielding may be moved or otherwise changed from a shielded to an unshielded position for purposes of making an industrial radiographic exposure.

“Radiographic operations” means all activities associated with the presence of radiation sources in a radiographic exposure device during use of the device or transport (except when the device is being transported by a common or contract carrier). This includes performing surveys to confirm the adequacy of boundaries, setting up equipment, and conducting any activity inside restricted area boundaries.

“S-tube” means a tube through which a radioactive source travels when the source is inside a radiographic exposure device.

“Source assembly” means an assembly that consists of a sealed source and a connector that attaches the source to a control cable. The source assembly may also include a stop ball used to secure the source in the shielded position.

“Underwater radiography” means industrial radiography performed when a radiographic exposure device is beneath the surface of water.

R9-7-502. License Requirements

- A. The Department shall review an application for a specific license for the use of radioactive material in industrial radiog-

raphy and approve the license if an applicant meets all of the following requirements:

1. The applicant satisfies the general requirements in R9-7-309 and any special requirements contained in this Article; and
2. The applicant submits a program for training radiographers and radiographers’ assistants that complies with R9-7-543, except that:
 - a. After the effective date of this Section, an applicant is not required to describe its initial training and examination program for radiographers;
 - b. An applicant shall affirm that an individual who is acting as an industrial radiographer is certified in radiation safety by a certifying organization, as required in R9-7-543, before permitting the individual to act as a radiographer. This affirmation substitutes for a description of the applicant’s initial training and examination program for radiographers in the subjects outlined in R9-7-543(G); and
 - c. An applicant shall submit procedures for verifying and documenting the certification status of each radiographer and for ensuring that the certification remains valid.
- B. The applicant shall submit written operating and emergency procedures as prescribed in R9-7-522.
- C. The applicant shall submit a description of a program for review of job performance of each radiographer and radiographers’ assistant at intervals that do not exceed six months as prescribed in R9-7-543(E).
- D. The applicant shall submit a description of the applicant’s overall organizational structure as it applies to radiation safety responsibilities in industrial radiography, including specified delegation of authority and responsibility.
- E. The applicant shall submit a list of the qualifications of each individual designated as an RSO under R9-7-512 and indicate which designee is responsible for ensuring that the licensee’s radiation safety program is implemented in accordance with approved procedures.
- F. If an applicant intends to perform leak testing on any sealed source or exposure device that contains depleted uranium (DU) shielding, the applicant shall submit a description of the procedures for performing the leak testing and the qualifications of each person authorized to perform leak testing. If the applicant intends to analyze its own wipe samples, the application shall include a description of the procedures to be followed. The description shall include the:
 1. Instruments to be used,
 2. Methods of performing the analysis, and
 3. Relevant experience of the person who will analyze the wipe samples.
- G. If the applicant intends to perform “in-house” calibrations of survey instruments, the applicant shall describe each calibration method to be used and the relevant experience of each person who will perform a calibration. A licensee shall perform all calibrations according to the procedures prescribed in R9-7-504.
- H. The applicant shall identify and describe the location of all field stations and permanent radiographic installations.
- I. The applicant shall identify each location where records required by this Chapter will be maintained.

R9-7-503. Performance Requirements for Equipment

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- A.** A licensee shall ensure that equipment used in industrial radiographic operations meets the following minimum criteria:
- Each radiographic exposure device, source assembly or sealed source, and all associated equipment meet the requirements in American National Standards Institute, N432-1980 "Radiological Safety for the Design and Construction of Apparatus for Gamma Radiography" (published as NBS Handbook 136, issued January 1981) by the American National Standards Institute, which is incorporated by reference and on file with the Department. This incorporation by reference contains no future editions or amendments. This publication may be purchased from the American National Standards Institute, Inc., 25 West 43rd Street, New York, New York 10036 Telephone (212) 642-4900. A copy of the document is also on file at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html; or
 - An engineering safety analysis demonstrates the applicability of previously performed testing on similar individual radiography equipment components. Based on a review of the analysis, the Department may find that previously performed testing can be substituted for testing of the component under the standards in subsection (A)(1).
- B.** In addition to the requirements in subsection (A), the following requirements apply to each radiographic exposure device, source changer, source assembly, and sealed source:
- A licensee shall ensure that each radiographic exposure device has attached to it a durable, legible, and clearly visible label bearing:
 - The chemical symbol and mass number of the radionuclide in the device;
 - The activity of the source and the date on which this activity was last measured;
 - The model (or product code) and serial number of the sealed source;
 - The manufacturer's description of the sealed source; and
 - The licensee's name, address, and telephone number.
 - A licensee shall ensure that each radiographic exposure device intended for use as a Type B transport container meets the applicable requirements of 10 CFR 71, revised January 1, 2015, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.
 - A licensee shall not modify any radiographic exposure device, source changer, source assembly, or associated equipment, unless the design of the replacement component, including source holder, source assembly, controls, or guide tubes is consistent with and does not compromise the design safety features of the system.
- C.** In addition to the requirements in subsections (A) and (B), the following requirements apply to each radiographic exposure device, source assembly, and associated equipment that allows the source to be moved out of the device for radiographic operations or to a source changer:
- The license shall ensure that the coupling between the source assembly and the control cable is designed so that the source assembly does not become disconnected if it is positioned outside of the guide tube and is constructed so that an unintentional disconnect will not occur under normal and reasonably foreseeable abnormal conditions;
 - The device automatically secures the source assembly if it is retracted into the fully shielded position within the device and the securing system is released from the exposure device only by means of a deliberate operation;
 - The outlet fittings, lock box, and drive cable fittings on each radiographic exposure device are equipped with safety plugs or covers installed for storage and transportation to protect the source assembly from water, mud, sand, or other foreign matter;
 - Each sealed source or source assembly has attached to it or is engraved with a durable, legible, and visible label with the words: "DANGER--RADIOACTIVE." The licensee shall ensure that the label does not interfere with safe operation of the equipment;
 - The guide tube is able to withstand a crushing test that closely approximates the crushing forces that are likely to be encountered during use, and a kinking resistance test that closely approximates the kinking forces that are likely to be encountered during use;
 - A guide tube is used if a person moves the source out of the device;
 - An exposure head or similar device, designed to prevent the source assembly from passing out of the end of the guide tube, is attached to the outermost end of the guide tube during industrial radiography operations;
 - The guide tube exposure head connection is able to withstand the tensile test for control units specified in ANSI N432-1980, incorporated by reference in subsection (A); and
 - Source changers provide a system for ensuring that the source is not accidentally withdrawn from the changer when a person is connecting or disconnecting the drive cable to or from the source assembly.
- D.** A licensee shall ensure that radiographic exposure devices and associated equipment in use after January 10, 1996 comply with the requirements of this Section.
- E.** Notwithstanding subsection (A), a licensee with equipment used in industrial radiographic operations need not comply with Sec. 8.92(C) of the Endurance Test in American National Standards Institute N432-1980 if the prototype equipment has been tested using a torque value representative of the torque that an individual using the radiography equipment can realistically exert on the lever or crankshaft of the drive mechanism.

Historical Note

R9-7-504. Radiation Survey Instruments

- A.** A licensee shall maintain at least two calibrated and operable radiation survey instruments at each location where sources of radiation are present to make radiation surveys required by this Article and Article 4 of this Chapter. Instrumentation required by this Section shall be capable of measuring a range from 0.02 millisieverts (2 millirems) per hour through 0.01 sievert (1 rem) per hour.
- B.** A licensee shall ensure that each radiation survey instrument required under subsection (A) is calibrated:
- At intervals that do not exceed six months, and after instrument servicing, except for battery changes;
 - For linear scale instruments, at two points located approximately one-third and two-thirds of full-scale on each scale; for logarithmic scale instruments, at mid-range of each decade, and at two points of at least one decade; and for digital instruments, at 3 points between 0.02 and 10 millisieverts (2 and 1000 millirems) per hour; and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

3. So that an accuracy within plus or minus 20% of the calibration source can be demonstrated at each point checked.
- C. A licensee shall maintain calibration records for each radiation survey instrument, and maintain each record for three years after it is made.

Historical Note

New Section R9-7-504 recodified from R12-1-504 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-505. Leak Testing and Replacement of Sealed Sources

- A. A licensee shall ensure that replacement of any sealed source fastened to or contained in a radiographic exposure device and leak testing of any sealed source is performed by a person authorized to do so by the Department, the NRC, or another Agreement State.
- B. A licensee shall ensure that opening, repairing, or modifying any sealed source is performed by a person specifically authorized to do so by the Department, the NRC, or another Agreement State.
- C. A licensee that uses a sealed source shall have the source tested for leakage by a qualified person at intervals that do not exceed six months. The person who performs leak testing of the source shall use a method approved by the Department, the NRC, or by another Agreement State. A wipe sample shall be taken from the nearest accessible point to the sealed source where contamination might accumulate. The wipe sample shall be analyzed for radioactive contamination. The licensee shall ensure that the analysis is capable of detecting the presence of 185 Bq (0.005 microcurie) of radioactive material on the test sample and a person specifically authorized by the Department, the NRC, or another Agreement State performs the analysis. The licensee shall maintain records of the leak tests in accordance with this Section.
- D. Unless a sealed source is accompanied by a certificate from the transferor that shows that the sealed source has been leak tested within six months before the transfer, a licensee shall not use the sealed source until it is tested for leakage. A licensee is not required to test a sealed source that is in storage, but shall test each sealed source before use or transfer to another person if the interval of storage exceeds six months.
- E. A licensee shall immediately withdraw equipment containing a leaking source from use and have it decontaminated and repaired or dispose of the source in accordance with this Chapter. The licensee shall file a report with the Director of the Department within five days of any test with results that exceed the threshold in this subsection, and describe the equipment involved, the test results, and corrective action taken. If a leak test conducted under this Section reveals the presence of 185 Bq (0.005 microcurie) or more of removable radioactive material the Department classifies the sealed source as leaking.
- F. A licensee shall test for DU contamination at intervals that do not to exceed 12 months a radiographic exposure device that uses depleted uranium (DU) shielding and an "S" tube configuration. The licensee shall ensure that the analysis is capable of detecting the presence of 185 Bq (0.005 microcuries) of radioactive material on the test sample and a person specifically authorized by the Department, the NRC, or another Agreement State performs the analysis. If the testing reveals the presence of 185 Bq (0.005 microcuries) or more of removable DU contamination, the licensee shall remove the exposure device from use until an evaluation of the wear on the S-tube is completed. If the evaluation reveals that the S-tube is worn through, the licensee shall ensure that the device is not used again. The licensee is not required to test for DU contamination

if the radiographic exposure device is in storage. Before using or transferring the radiographic exposure device, the licensee shall test the device for DU contamination if the interval of storage exceeds 12 months. The licensee shall maintain records of the DU leak test in accordance with subsection (G).

- G. A licensee shall maintain records of leak test results for each sealed source and for each device that contains DU. The licensee shall ensure results are in Becquerels (microcuries), and retain each record for three years after it is made or until the source is removed from storage and tested, whichever is longer.

Historical Note

New Section R9-7-505 recodified from R12-1-505 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-506. Quarterly Inventory

- A. A licensee shall conduct a quarterly physical inventory to account for all sealed sources and devices that contain depleted uranium.
- B. A licensee shall maintain a record of the quarterly inventory required under subsection (A) for three years after it is made.
- C. The record required in subsection (B) shall include the date of the inventory, name of the individual who conducted the inventory, radionuclide, number of becquerels (curies) or mass (for DU) in each device, location of sealed source and associated devices, and manufacturer, model, and serial number of each sealed source and device as applicable.

Historical Note

New Section R9-7-506 recodified from R12-1-506 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-507. Utilization Logs

- A. A licensee shall maintain for each sealed source a utilization log that provides all of the following information:
1. A description, including the make, model, and serial number of each radiographic exposure device, and each sealed source transport and storage container that contains a sealed source;
 2. The identity and signature of the radiographer using the source; and
 3. The plant or site where the source is used and dates of use, including the date each source is removed from and returned to storage.
- B. A licensee shall retain the log required by subsection (A) for three years after the log is made.

Historical Note

New Section R9-7-507 recodified from R12-1-507 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-508. Inspection and Maintenance of Radiographic Exposure Devices, Transport and Storage Containers, Source Changers, Survey Instruments, and Associated Equipment

- A. A licensee shall perform visual and operability checks on each survey instrument, radiographic exposure device, transport and storage container, source changer, and associated equipment before use on each day the equipment is to be used to ensure that the equipment is in good working condition, the source is adequately shielded, and required labeling is present. A survey instrument operability check shall be performed using a check source or other authorized means. If an equipment problem is found, the licensee shall remove the equipment from service until it is repaired.
- B. A licensee shall have written inspection and maintenance procedures to ensure that:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. Radiographic exposure devices, source changers, transport and storage containers, survey instruments, and associated equipment that require inspection and maintenance at intervals that do not exceed three months or before first use of the equipment are functioning properly and safely. Replacement components shall meet design specifications. If an equipment problem is discovered, the licensee shall remove the equipment from service until it is repaired; and
 2. Type B packages are shipped and maintained in accordance with the certificate of compliance or other approval.
- C. A licensee shall maintain records of daily checks and quarterly inspections of radiographic exposure devices, transport and storage containers, source changers, survey instruments, and associated equipment, and retain each record for three years after it is made. The record shall include the date of the check or inspection, name of the inspector, equipment involved, any problems found, and any repair or needed maintenance performed.

R9-7-509. Surveillance

During each radiographic operation, a radiographer or the radiographer's assistant, as permitted by R9-7-510, shall maintain continuous direct visual surveillance of the operation to protect against unauthorized entry into a high radiation area, except at permanent radiographic installations where all entrances are locked and the licensee is in compliance with R9-7-539.

Historical Note

New Section R9-7-509 recodified from R12-1-509 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-510. Radiographic Operations

- A. If industrial radiography is performed at a location other than a permanent radiographic installation, a licensee shall ensure that the radiographer is accompanied by at least one other radiographer or radiographer's assistant, qualified under R9-7-543. The additional radiographer or radiographer's assistant shall observe the operations and be capable of providing immediate assistance to prevent unauthorized entry. Industrial radiography is prohibited if only one qualified individual is present.
- B. A licensee shall ensure that each industrial radiographic operation is conducted at a location of use authorized on the license in a permanent radiographic installation, unless another permanent location is specifically authorized by the Department.

R9-7-512. Radiation Safety Officer (RSO)

- A. A licensee shall have a radiation safety officer (RSO) who is responsible for implementing procedures and regulatory requirements in the daily operation of the radiation safety program.
- B. Except as provided in subsection (C), the licensee shall ensure that the RSO satisfies the following minimum requirements:
1. The training and testing requirements in R9-7-543,

2. Two thousand hours of hands-on experience as a qualified radiographer for an industrial radiographic operation, and
 3. Formal training in the establishment and maintenance of a radiation safety program.
- C. If the licensee uses an individual in the position of RSO who does not have the training and experience required in subsection (B), the licensee shall provide the Department with a description of the individual's training and experience in the field of ionizing radiation and training with respect to the establishment and maintenance of a radiation safety protection program so the Department can determine whether the individual is qualified to perform under subsection (D).
- D. The specific duties and authorities of the RSO include, but are not limited to:
1. Establishing and overseeing operating, emergency, and ALARA procedures as required in Article 4 of this Chapter and reviewing them every year to ensure that the procedures in use conform to current Department rules and license conditions;
 2. Overseeing and approving all phases of the training program for radiographic personnel, ensuring that appropriate and effective radiation protection practices are taught;
 3. Overseeing radiation surveys, leak tests, and associated documentation to ensure that the surveys and tests are performed in accordance with the rules and taking corrective measures if levels of radiation exceed established action limits;
 4. Overseeing the personnel monitoring program to ensure that devices are calibrated and used properly by occupationally exposed personnel and ensuring that records are kept of the monitoring results and timely notifications are made as required in R9-7-444; and
 5. Overseeing operations to ensure that they are conducted safely and instituting corrective actions, which may include ceasing operations if necessary.

Historical Note

R9-7-514. Limits on External Radiation Levels from Storage Containers and Source Changers

The maximum rate limits for storage containers and source changers are 2 millisieverts (200 mRem/hr) at any exterior surface and 0.1 millisieverts (10 mRem/hr) at 1 meter from any exterior surface with the sealed source in the shielded position.

Historical Note

New Section R9-7-514 recodified from R12-1-514 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-515. Locking Radiographic Exposure Devices, Storage Containers, and Source Changers

- A. Except at permanent radiographic installations governed by R9-7-539, a licensee shall ensure that each radiographic exposure device has a lock or an outer container with a lock designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The licensee shall ensure that the exposure device or its container, if applicable, is locked (and if a keyed lock, with the key removed) if the device or container is not under the direct surveillance of a

radiographer or a radiographer's assistant. During radiographic operations, the radiographer or radiographer's assistant shall secure the sealed source assembly in the shielded position each time the source is returned to the shielded position.

- B.** A licensee shall ensure that each sealed source storage container and source changer has a lock or an outer container with a lock designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The licensee shall ensure that each storage container and source changer is locked (and if a keyed lock, with the key removed) if the storage container or source changer contains a sealed source and is not under the direct surveillance of a radiographer or a radiographer's assistant.

Historical Note

R9-7-516. Records of Receipt and Transfer of Sealed Sources

- A.** A licensee shall maintain records that show each receipt and transfer of a sealed source or device that uses DU for shielding and retain each record for three years after it is made.
- B.** The records shall contain separate entries for each transaction, including the date, name of the individual making the record, radionuclide, number of Becquerels (curies) or mass (for DU), and manufacturer, model, and serial number of each sealed source or device, as applicable.

Historical Note

New Section R9-7-516 recodified from R12-1-516 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-517. Posting

A licensee shall post any area in which industrial radiography is performed as required by R9-7-429. Exceptions listed in R9-7-430 do not apply to industrial radiographic operations.

Historical Note

New Section R9-7-517 recodified from R12-1-517 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-518. Labeling, Storage, and Transportation

- A.** A licensee shall not use a source changer or a storage container to store licensed material unless the source changer or the storage container has securely attached to it a durable, legible, and clearly visible label that bears the standard trefoil radiation caution symbol and the standard colors for the symbol specifically: magenta, purple, or black on a yellow background, and the label has a minimum diameter of 25 mm and the wording "CAUTION (or DANGER), RADIOACTIVE MATERIAL NOTIFY CIVIL AUTHORITIES (or "NAME OF COMPANY")"
- B.** A licensee shall not transport licensed material unless the material is packaged and the package is labeled, marked, and accompanied with appropriate shipping papers in accordance with 10 CFR 71, January 1, 2004, published by the Office of the Federal Register, National Archives and Records Administration, incorporated by reference, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- C.** A licensee shall physically secure locked radiographic exposure devices and storage containers behind a locked door to prevent tampering or removal by unauthorized personnel. The licensee shall store licensed material in a manner that will minimize danger from explosion or fire.
- D.** A licensee shall lock each transport package that contains licensed material and physically secure the package behind the

locked doors of the transporting vehicle to prevent accidental loss, tampering, or unauthorized removal of the licensed material from the vehicle.

R9-7-522. Operating and Emergency Procedures

- A.** A licensee shall ensure that the operating and emergency procedures include, at a minimum, instructions in the following, as applicable:
1. Handling and use of sealed sources or radiographic exposure devices, so that persons are not exposed to radiation that exceeds the limits in Article 4 of this Chapter;
 2. Methods and occasions for conducting radiation surveys;
 3. Methods for controlling access to radiographic areas;
 4. Methods and occasions for locking and securing radiographic exposure devices, transport and storage containers, and sealed sources;
 5. Personnel monitoring and associated equipment;
 6. Transportation of sealed sources to field locations, including packing radiographic exposure devices and storage containers in vehicles, placarding vehicles, and maintaining control of the sealed sources during transportation, as required in 49 CFR 171-173, 2002 edition, published October 1, 2002, by the Office of the Federal Register, National Archives and Records Administration, Washington, D.C. 20408, which is incorporated by reference and on file with the Department. This incorporation contains no future editions or amendments;
 7. Inspection, maintenance, and operability checks of radiographic exposure devices, survey instruments, transport containers, and storage containers;
 8. Actions to be taken immediately by radiography personnel if a pocket dosimeter is found to be off-scale or an alarm rate meter sounds an alarm;
 9. Procedures for identifying and reporting defects and non-compliance, as required by R9-7-448 and R9-7-535;
 10. Procedures for notifying the RSO and the Department in the event of an accident;
 11. Methods for minimizing exposure of persons in the event of an accident;
 12. Procedures for recovering a source if the licensee is responsible for source recovery; and
 13. Maintenance of records.
- B.** The licensee shall maintain copies of current operating and emergency procedures until the Department terminates the license. Superseded procedures shall be maintained for three years after being superseded. Additionally, a copy of the procedures shall be maintained at field stations in accordance with R9-7-540.

Historical Note

New Section R9-7-522 recodified from R12-1-522 at 24
A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-523. Personnel Monitoring

- A.** A licensee shall not permit any individual to act as a radiographer or a radiographer's assistant unless, at all times during radiographic operations, each individual wears, on the trunk of the body, a direct reading dosimeter, an operating alarm rate meter, and a personnel dosimeter that is processed and evaluated by an accredited National Voluntary Laboratory Accreditation Program (NVLAP) processor. At permanent radiography installations where other appropriate alarming or warning devices are in routine use, the wearing of an alarm rate meter is not required. A licensee shall:
1. Use a pocket dosimeter with a range from zero to 2 millisieverts (200 millirems). The licensee shall ensure that each dosimeter is recharged at the start of each shift. Electronic personal dosimeters are permitted in place of ion-chamber pocket dosimeters.
 2. Assign a personnel dosimeter to each individual, who shall wear the assigned equipment.
 3. Replace film badges at least monthly and ensure that other personnel dosimeters are processed and evaluated by an accredited NVLAP processor and replaced at periods that do not exceed three months.
 4. After replacement, ensure that each personnel dosimeter is processed as soon as possible.
- B.** A licensee shall record exposures noted from direct reading dosimeters, such as pocket dosimeters or electronic personal dosimeters, at the beginning and end of each shift. The licensee shall maintain the records for three years after the Department terminates the license.
- C.** A licensee shall check pocket dosimeters and electronic personal dosimeters for correct response to radiation at periods that do not exceed 12 months. The licensee shall record the results of each check and maintain the records for three years after the dosimeter check is performed. The licensee shall discontinue use of a dosimeter if it is not accurate within plus or minus 20 percent of the true radiation exposure.
- D.** If an individual's pocket dosimeter has an off-scale reading, or the individual's electronic personal dosimeter reads greater than 2 millisieverts (200 millirems), and radiation exposure cannot be ruled out as the cause, a licensee shall process the individual's dosimeter within 24 hours of the suspect exposure. The licensee shall not allow the individual to resume work associated with sources of radiation until the individual's radiation exposure has been determined. Using information from the dosimeter, the licensee's RSO or the RSO's designee shall calculate the affected individual's cumulative radiation exposure as prescribed in Article 4 of this Chapter and include the results of this determination in the personnel monitoring records maintained in accordance with subsection (B).
- E.** If the personnel dosimeter that is required by subsection (A) is lost or damaged, the licensee shall ensure that the worker ceases work immediately until the licensee provides a replacement personnel dosimeter that meets the requirements in subsection (A) and the RSO or the RSO's designee calculates the exposure for the time period from issuance to discovery of the lost or damaged personnel dosimeter. The licensee shall maintain a record of the calculated exposure and the time period for which the personnel dosimeter was lost or damaged in accordance with subsection (B).
- F.** The licensee shall maintain dosimetry reports received from the accredited NVLAP personnel dosimeter processor in accordance with subsection (B).
- G.** For each alarm rate meter a licensee shall ensure that:

1. At the start of each shift, the alarm functions (sounds) properly before an individual uses the device;
2. Each device is set to give an alarm signal at a preset dose rate of 5 mSv/hr (500 mrem/hr); with an accuracy of plus or minus 20 percent of the true radiation dose rate;
3. A special means is necessary to change the preset alarm function on the device; and
4. Each device is calibrated at periods that do not exceed 12 months for correct response to radiation. The licensee shall maintain records of alarm rate meter calibrations in accordance with subsection (B).

R9-7-524. Supervision of a Radiographer's Assistant

If a radiographer's assistant uses a radiographic exposure device, associated equipment, or a sealed source or conducts a radiation survey required by R9-7-533(B) to determine that the sealed source has returned to the shielded position after an exposure, the licensee shall ensure that the assistant is under the personal supervision of a radiographer. For purposes of this Section "personal supervision" means:

1. The radiographer is physically present at the site where the sealed source is being used,
2. The radiographer is available to give immediate assistance if required, and
3. The radiographer is able to observe the assistant's performance directly.

R9-7-525. Notification of Field Work

Each day radioactive material is used for industrial radiography, a licensee shall notify the Department of any planned field radiography. The notice shall be in writing and specify the location of the field work, the name of the supervising individual at the job site, and the expected duration of the work at the job site listed in the notice. A facsimile that provides the required information is sufficient notice.

R9-7-531. Security

During each radiographic operation, the radiographer or radiographer's assistant shall maintain continuous direct visual surveillance of the operation to protect against unauthorized entry into a high radiation area, as defined in Article 1, unless:

1. The high radiation area is equipped with a control device or an alarm system as prescribed in R9-7-420(A), or
2. The high radiation area is locked to protect against unauthorized or accidental entry.

R9-7-533. Radiation Surveys

- A. A licensee shall conduct surveys with a calibrated and operable radiation survey instrument that meets the requirements of R9-7-504.
- B. Using a survey instrument that complies with subsection (A), the licensee shall conduct a survey of the radiographic exposure device and the guide tube after each exposure before approaching the device or the guide tube. The survey shall be performed to determine that the sealed source is in the shielded position before the radiographer or radiographer's assistant exchanges films, repositions the exposure head, or dismantles the equipment.
- C. The licensee shall conduct a survey of the radiographic exposure device with a calibrated radiation survey instrument any time the source is exchanged or the device is placed in a storage area, as defined in R9-7-102, to ensure that the sealed source is in the shielded position.
- D. The licensee shall maintain a record of each exposure device survey conducted before the device is placed in storage under subsection (C), if that survey is the last one performed during the workday. Each record shall be maintained for three years after the record is made.

R9-7-535. Notifications

- A. In addition to the reporting requirements specified in Article 4, each licensee shall provide a written report to the Department if any of the following incidents involving radiography equipment occur:
 1. Unintentional disconnection of the source assembly from the control cable;
 2. Inability to retract the source assembly to the fully shielded position or secure it in this position; or

3. Failure of any component (critical to safe operation of the device) to properly perform its intended function;

- B. A licensee shall include the following information in any report submitted under this Section, regarding radiography equipment, or Article 4, regarding an overexposure, if the report concerns the failure of safety components of radiography equipment:
 1. A description of the equipment problem;
 2. Cause of the incident, if known;
 3. Name of manufacturer and model number of the equipment involved in the incident;
 4. Place, date, and time of the incident;
 5. Actions taken to establish normal operations;
 6. Corrective actions taken or planned to prevent recurrence; and
 7. Qualifications of personnel involved in the incident.
- C. Any licensee that conducts radiographic operations, or stores radioactive material at a location not listed on the license or for a period longer than 180 days during a calendar year, shall notify the Department of these activities before the 180 days has elapsed.

R9-7-539. Permanent Radiographic Installations

- A. If a licensee maintains a permanent radiographic installation that does not fall within the definition of "enclosed radiography" in R9-7-102, the licensee shall ensure that each entrance, used for personnel access to the high radiation area, has either:
 1. An entrance control device of the type described in R9-7-420(A)(1) that reduces the radiation level upon entry into the area, or
 2. Both conspicuous visible and audible alarm signals to warn of the presence of radiation. The licensee shall ensure that the visible signal is actuated by radiation if a source is exposed and the audible signal is actuated if someone attempts to enter the installation while a source is exposed.
- B. A licensee with an alarm signal shall test the alarm signal for proper operation with a radiation source each day before the installation is used for radiographic operations. The test shall include a check of both the visible and audible signals. A licensee with an entrance control device shall test the device monthly. If an entrance control device or alarm signal is operating improperly, the licensee shall immediately label the device or signal as "defective" and repair the device or signal within seven calendar days. The licensee may continue to use the facility during this seven-day period, if the licensee implements continuous surveillance requirements of R9-7-509 and uses an alarming rate meter.

R9-7-540. Location of Documents and Records

- A. A licensee shall maintain a copy of each record required by this Article and other applicable Articles of this Chapter at a location specified under R9-7-502(I).
- B. A licensee shall maintain a copy of each record listed below at each field station and temporary job site;
1. The license that authorizes use of radioactive material;
 2. A copy of Articles 4, 5, and 10 of this Chapter;
 3. Utilization logs for each radiographic exposure device dispatched from that location, as required by R9-7-507;
 4. Records of equipment problems identified in daily checks of equipment, as required by R9-7-508(A);
 5. Records of alarm system and entrance control checks as required by R9-7-539;
 6. Records of direct-reading dosimeters, such as pocket dosimeters and electronic personnel dosimeters as required by R9-7-523;
 7. Operating and emergency procedures as required by R9-7-522;
 8. A report on the most recent calibration of the radiation survey instruments in use at the site as required by R9-7-504;
 9. A report on the most recent calibration of each alarm rate meter, and operability check of each pocket dosimeter and electronic personnel dosimeter as required in R9-7-523;
 10. Most recent survey record as required by R9-7-533;
 11. The shipping papers for the transportation of radioactive material required by 10 CFR 71.5, 2003 edition, published January 1, 2003, by the Office of the Federal Register, National Archives and Records Administration, Washington, D.C. 20408, which is incorporated by reference and on file with the Department (this incorporation contains no future editions or amendments); and
 12. If operating under reciprocity in accordance with R9-7-320, a copy of the NRC or Agreement State license authorizing the use of radioactive materials.

R9-7-543. Training

- A. A licensee shall not allow an individual to act as a radiographer until the individual has received training in the subjects in subsection (G), has participated in a minimum of two months of on-the-job training, and is certified through a radiographer certification program by a independent certifying organization in accordance with the criteria specified in Appendix A.

1. A licensee shall provide the Department with proof of an individual's certification and a written request that the individual be added to a license as a certified radiographer.
 2. A licensee shall maintain proof of certification at the job site where a radiographer is performing field radiography.
 3. A licensee that employs certified radiographers in Arizona shall ensure that:
 - a. Each radiographer has obtained initial certification within the last five years, and
 - b. An uncertified radiographer works only as a radiographer's assistant until certified.
 4. A radiographer shall recertify every five years by:
 - a. Taking an approved radiography certification examination in accordance with this subsection; or
 - b. Providing written evidence that the radiographer is active in the practice of industrial radiography and has participated in continuing education during the previous five-year period.
 5. If an individual cannot provide the written evidence required in subsection (4)(b), the individual shall retake the certification examination.
 6. A radiographer shall provide the licensee with proof of certification in the form of a card issued by the certifying organization that contains:
 - a. A picture of the certified radiographer,
 - b. The radiographer's certification number,
 - c. The date the certification expires, and
 - d. The radiographer's signature.
- B. A licensee shall not allow an individual to act as a radiographer until the individual:
1. Has received copies of and instruction in the requirements of this Article; applicable Sections of Articles 4 and 10 and R9-7-107; applicable DOT regulations in 10 CFR 71, January 1, 2003 edition, by the Office of the Federal Register, National Archives and Records Administration, Washington, D.C. 20408, which is incorporated by reference, contains no future editions or amendments, and is on file with Department; the Department license or licenses under which the radiographer will perform industrial radiography; and the licensee's operating and emergency procedures;
 2. Has demonstrated an understanding of the licensee's license and operating and emergency procedures by successfully completing a written or oral examination that covers the relevant material;
 3. Has received training in:
 - a. Use of the licensee's radiographic exposure devices and sealed sources,
 - b. Daily inspection of devices and associated equipment, and
 - c. Use of radiation survey instruments; and
 4. Has demonstrated an understanding of the use of radiographic exposure devices, sources, survey instruments, and associated equipment described in subsection (B)(3) by successfully completing a practical examination covering this material.
- C. A licensee shall not allow an individual to act as a radiographer's assistant until the individual:
1. Has received copies of and instruction in the requirements of this Article; applicable Sections of Articles 4 and 10 and R9-7-107; applicable DOT regulations in 10 CFR 71, January 1, 2003 edition, by the Office of the Federal Register, National Archives and Records Administration, Washington, D.C. 20408, which is incorporated by reference, contains no future editions or amendments,

- and is on file with the Department; the Department license or licenses under which the radiographer's assistant will perform industrial radiography; and the licensee's operating and emergency procedures;
2. Has developed competence to use, under the personal supervision of the radiographer, the licensee's radiographic exposure devices, sealed sources, associated equipment, and radiation survey instruments; and
 3. Has demonstrated understanding of the instructions provided under subsection (C)(1) by successfully completing a written test on the subjects covered and has demonstrated competence using the hardware described in subsection (C)(2) by successfully completing a practical examination.
- D. A licensee shall provide refresher safety training for each radiographer and radiographer's assistant at intervals not to exceed 12 months.
- E. Unless an individual serves as both a radiographer and an RSO, the RSO or the RSO's designee shall design and implement an inspection program to examine the job performance of each radiographer and radiographer's assistant and to ensure that the Department's rules and license requirements, and the licensee's operating and emergency procedures are followed. The inspection program shall:
1. Include observation of the performance of each radiographer and radiographer's assistant during an actual industrial radiographic operation, at intervals that do not exceed six months; and
 2. If a radiographer or a radiographer's assistant has not participated in an industrial radiographic operation for more than six months, the radiographer shall demonstrate knowledge of the training requirements in subsection (B)(3) and the radiographer's assistant shall demonstrate knowledge of the training requirements of subsection (C)(2) by a practical examination before participating in a radiographic operation.
- F. A licensee shall maintain records of the training required in this Section including certification documents, written and practical examinations, refresher safety training documents, and inspection documents, in accordance with subsection (I).
- G. A licensee shall include the following subjects in the training required under subsection (A):
1. Fundamentals of radiation safety, including:
 - a. Characteristics of gamma radiation,
 - b. Units of radiation dose and quantity of radioactivity,
 - c. Hazards of exposure to radiation,
 - d. Levels of radiation from licensed material, and
 - e. Methods of controlling radiation dose (time, distance, and shielding);
 2. Radiation detection instruments, including:
 - a. Use, operation, calibration, and limitations of radiation survey instruments;
 - b. Survey techniques; and
 - c. Use of personnel monitoring equipment;
 3. Equipment topics, including:
 - a. Operation and control of radiographic exposure equipment, use of remote handling equipment, and use of storage containers, using pictures or models of source assemblies (pigtailed);
 - b. Storage, control, and disposal of licensed material; and
 - c. Inspection and maintenance of equipment;
 4. The requirements of pertinent Department rules; and
 5. Case histories of accidents in radiography.
- H. A licensee shall maintain records of radiographer certification in accordance with subsection (I)(1) and provide proof of certification as required in subsection (A)(1).
- I. A licensee shall maintain the following records for three years after each record is made:
1. Records of training for each radiographer and each radiographer's assistant. For radiographers, the records shall include radiographer certification documents and verification of certification status. All records shall include copies of written tests, dates of oral and practical examinations, and names of individuals who conducted and took the oral and practical examinations; and
 2. Records of annual refresher safety training and semi-annual inspections of job performance for each radiographer and each radiographer's assistant. The records for the annual refresher safety training shall list topics discussed during training, the date of training, and names of each instructor and attendee. For inspections of job performance, the records shall include a list of the items checked during the inspection and any non-compliance observed by the RSO.

Appendix A. Standards for Organizations that Provide Radiography Certification

Note: For purposes of this Article an "independent certifying organization" means an organization that meets all of the criteria in this Appendix.

I. Requirements for an Organization that Provides Radiographer Certification

To qualify to provide radiographer certification an organization shall:

- A. Be a society or association, with members who participate in, or have an interest in, the field of industrial radiography;
- B. Not restrict membership because of race, color, religion, sex, age, national origin, or disability;
- C. Have a certification program that is open to nonmembers, as well as members;
- D. Be an incorporated, nationally recognized organization that is involved in setting national standards of practice within its fields of expertise;
- E. Have a staff comparable to other nationally recognized organizations, a viable system for financing its operations, and a policy-and decision-making review board;
- F. Have a set of written, organizational by-laws and policies that address conflicts of interest and provide a system for monitoring and enforcing the by-laws and policies;
- G. Have a committee, with members who can carry out their responsibilities impartially, review and approve the certification guidelines and procedures, and advise the organization's staff in implementing the certification program;
- H. Have a committee, with members who can carry out their responsibilities impartially, review complaints against certified individuals and determine sanctions;
- I. Have written procedures describing all aspects of the organization's certification program;
- J. Maintain records of the current status of each individual's certification and administration of the certification program;
- K. Have procedures to ensure that certified individuals are provided due process with respect to administration of the certification program, including a process for becoming certified and a process for imposing sanctions against certified individuals;
- L. Have procedures for proctoring examinations and qualifying proctors. The organization, through these procedures, shall

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

ensure that an individual who proctors an examination is not employed by the same company or corporation (or a wholly-owned subsidiary of the company or corporation) that employs an examinee;

- M. Exchange information about certified individuals with the Department, other independent certifying organizations, the NRC, or Agreement States and allow periodic review of its certification program and related records; and
- N. Provide a description to the Department of its procedures for choosing examination sites and providing a favorable examination environment.

II. Requirements for a Certification Program

An independent certifying organization shall ensure that its certification program:

- A. Requires an applicant for certification to:
 1. Obtain training in the subjects listed in R9-7-543(G) or equivalent NRC or Agreement State regulations, and
 2. Satisfactorily complete a written examination that covers these subjects;
- B. Requires an applicant for certification to provide documentation demonstrating that the applicant has:
 1. Received training in the subjects listed in R9-7-543(G) or equivalent NRC or Agreement State regulations;
 2. Satisfactorily completed the on-the-job training required in R9-7-543(A); and
 3. Received verification by an Agreement State or a NRC licensee that the applicant has demonstrated the capability of independently working as a radiographer;
- C. Provides procedures that protect examination questions from disclosure;
- D. Provides procedures for denying certification to an applicant and revoking, suspending, and reinstating a certificate;
- E. Provides a certification period that is not less than three years or more than five years, procedures for renewing certifications and, if the procedures allow renewals without examination, a system for assessing evidence of recent full-time employment and annual refresher training; and
- F. Provides a timely response to inquiries, by telephone or letter, from members of the public, about an individual's certification status.

III. Requirements for a Written Examination

An independent certifying organization shall ensure that its examination:

- A. Is designed to test an individual's knowledge and understanding of the subjects listed in R9-7-543(G);
- B. Is written in a multiple-choice format; and
- C. Has psychometrically valid questions drawn from a question bank and based on the material in R9-7-543(G).

R9-7-602. Definitions

The following definitions apply in this Article, unless the context otherwise requires:

"Accessible surface" means the external surface of the enclosure or housing provided by the manufacturer.

"Added filter" means the filter added to the inherent filtration.

"Aluminum equivalent" means the thickness of aluminum (type 1100 alloy) that affords equivalent attenuation, under specified conditions, as the material in question. (The nominal chemical composition of type 1100 aluminum alloy is 99.00 percent minimum aluminum, 0.12 percent copper).

"Annual" means annually within two months of the anniversary due date as determined by the original installation date, inspection date, survey date, or a reset date created by conducting a full survey before the anniversary date has arrived.

"Assembler" means any person engaged in the business of assembling, replacing, or installing one or more components into an x-ray system or subsystem.

"Attenuation block" means a block or stack, having dimensions 20 cm by 20 cm by 3.8 cm (7.9 inches by 7.9 inches by 1.5 inches) of type 1100 aluminum alloy or other materials that afford equivalent attenuation.

"Automatic exposure control" means a device that automatically controls one or more technique factors in order to obtain, at a preselected location or locations, a required quantity of radiation.

"Barrier" (See "Protective barrier")

"Beam axis" means a line from the source through the center of the x-ray field.

"Beam-limiting device" means a device that provides a means to restrict the dimensions of the x-ray field.

"C-arm x-ray system" means an x-ray system that has the image receptor and x-ray tube housing assembly connected by a common mechanical support system to maintain a desired spatial relationship. This system is designed to allow a change in the projection of the beam through the patient without a change in the position of the patient.

"Changeable filter" means any filter, exclusive of inherent filtration, which can be removed from the useful beam by an electronic, mechanical, or physical process.

"Cinefluorography" means fluorography that uses a movie camera to record fluorograph images on film for later playback.

"Coefficient of variation" means the ratio of the standard deviation to the mean value of a population of observations.

"Collimator" means an adjustable device, generally made of lead, that is fixed to an x-ray tube housing to intercept or collimate the useful beam and, if not made of lead, has a lead equivalency of not less than that of the tube housing assembly.

"Compression device" means a device used to bring object structures closer to the image plane of a radiograph and make a part of the human body a more uniform thickness so the optical density of the radiograph will be more uniform.

"Computed tomography" means the production of a tomogram by the acquisition and computer processing of x-ray transmission data. For purposes of these rules this term has the same meaning as "CT."

"Contact therapy system" means that the x-ray tube port is put in contact with or within 5 centimeters (2 inches) of the surface being treated.

"Control panel" means that part of the x-ray machine where switches, knobs, push-buttons, or other hardware necessary for manually setting the technique factors are located.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Cooling curve” means the graphical relationship between heat units stored and cooling time.

“CT gantry” means the tube housing assemblies, beam-limiting devices, detectors, and the supporting structure, frame, and cover which hold or enclose these components.

“Dead-man switch” means a switch constructed so that a circuit-closing contact can be maintained only by continuous pressure on the switch by the operator.

“Diagnostic source assembly” means the tube housing assembly with a beam-limiting device attached.

“Diagnostic x-ray system” means an x-ray system designed for irradiation of any part of a human or animal body for the purpose of diagnosis or visualization.

“Direct scattered radiation” means scattered radiation that has been deviated in direction only by materials irradiated by the useful beam (see “Scattered radiation”).

“Electronic brachytherapy” means a method of radiation therapy where an electrically generated source of ionizing radiation is placed in or near the tumor or target tissue to deliver therapeutic radiation dosage.

“Entrance exposure rate” means the roentgens per unit time at the point where the center of the useful beam enters the patient.

“Equipment” (See “X-ray equipment”)

“Filter” means material placed in the useful beam to absorb undesirable radiation.

“Fluoroscopic imaging assembly” means a subsystem in which x-ray photons produce a fluoroscopic image. It includes the image receptor or receptors such as the image intensifier and spot-film device, electrical interlocks, if any, and structural material that provides a linkage between the image receptor and diagnostic source assembly.

“Fluoroscopic system” means a radiographic x-ray system used to directly visualize internal structure, the motion of internal structures, and fluids in real time, or near real-time, to aid in the treatment or diagnosis of disease, or the performance of other medical procedures.

“Focal spot” means the region of the anode target in an x-ray tube where electrons from the cathode interact to produce x-rays.

“General purpose radiographic x-ray system” means any radiographic x-ray system that, by design, is not limited to radiographic examination of a specific anatomical region.

“Gonadal shield” means a protective barrier for the testes or ovaries.

“Grid” means a device used to improve the image detail in a radiograph by reducing the intensity of x-ray scatter radiation exiting the film side of the patient.

“Half-value layer” or “HVL” means the thickness of a specified material that attenuates the beam of radiation to an exposure rate that is one-half of its original value. In this definition, the contribution of any scattered radiation, other than that which is present initially in the beam, is excluded.

“Healing arts radiography” means the application of x-radiation to human patients for diagnostic or therapeutic purposes by a licensed practitioner or a person certified in accordance with R9-7-603(B)(1), at the direction of a licensed practitioner. Healing arts radiography includes:

Positioning the x-ray beam with respect to the patient,

Anatomical positioning of the patient,

Selecting exposure factors, or

Initiating the exposure.

“Healing arts screening” means the application of radiation from an x-ray machine to a human for the detection or evaluation of health indications when the tests are not specifically and individually ordered by a licensed practitioner.

“Image intensifier” means an electronic device, installed in an x-ray system housing, which instantaneously converts an x-ray pattern into a corresponding light image of higher intensity.

“Image receptor” means any device, such as a fluorescent screen or radiographic film, which transforms incident x-ray photons either into a visible image or into another form which can be made into a visible image by further transformation.

“Inherent filtration” means the filtration of the useful beam by permanently installed components of the tube housing assembly.

“Kilovolts peak” or “kVp” (See “Peak tube potential”)

“Lateral fluoroscope” means the x-ray tube and image receptor combination in a biplane system dedicated to the lateral projection. It consists of the lateral x-ray tube housing assembly and the lateral image receptor that are fixed in position relative to the table with the x-ray beam axis parallel to the plane of the table.

“Lead equivalent” means the thickness of lead affording the same attenuation, under specified conditions, as the material in question.

“Leakage radiation” means all radiation emanating from the tube housing except the useful beam and radiation produced when the exposure switch or timer is not activated.

“Leakage technique factors” means the technique factors associated with the diagnostic source assembly that are used in measuring leakage radiation. Included are:

For capacitor energy storage equipment, the maximum-rated peak tube potential and the maximum-rated number of exposures in an hour for operation at the maximum-rated peak tube potential with the quantity of charge per exposure being 10 millicoulombs (mAs) or the minimum obtainable from the unit, whichever is larger;

For field emission equipment rated for pulsed operation, the maximum-rated peak tube potential and maximum-rated number of x-ray pulses in an hour for operation at the maximum-rated peak tube potential; and

For all other source assemblies, the maximum-rated peak tube potential and maximum-rated continuous tube current for the maximum-rated peak tube potential.

“mA” means milliamperes.

“Mammographic x-ray system” means an x-ray system that is specifically engineered to image human breasts.

“mAs” means milliamperes second.

“Mobile equipment” (See “X-ray equipment”)

“Peak tube potential” means the maximum value of the potential difference across the x-ray tube during an exposure.

“Phantom” means a volume of material that behaves in a manner similar to tissue with respect to the attenuation and scatter-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

ing of radiation. (i.e. “Breast phantom” means an artificial test object that simulates the average composition of, and various structures in the breast.)

“Phototimer” (See “Automatic exposure control”)

“Portable equipment” (See “X-ray equipment”)

“Primary protective barrier” (See “Protective barrier”)

“Protective apron” means an apron made of radiation, absorbing material used to reduce radiation exposure.

“Protective barrier” means a barrier of radiation-absorbing material used to reduce radiation exposure.

“Primary protective barrier” means the material, excluding filters, placed in the useful beam.

“Secondary protective barrier” means the material which attenuates stray radiation.

“Protective glove” means a glove made of radiation- absorbing material used to reduce radiation exposure.

“Radiologic physicist” means an individual who:

Is certified by the American Board of Radiology, American Board of Medical Physics, or the American Board of Health Physics;

Possesses documentation of state approval;

Holds a master’s degree or higher in a physical science; and

Meets the training and certification requirements in R9-7-615(A)(1)(c).

“Scattered radiation” means radiation that, during passage through matter, has been deviated in direction. (See “Direct scattered radiation”)

“Screen” or “intensifying screen” means a device that converts the energy of the x-ray beam into visible light that interacts with the radiographic film, forming a latent image, or contains photostimulable phosphor plates that upon exposure, emit visible or nonvisible light to create an image.

“Secondary protective barrier” (See “Protective barrier”)

“Shutter” (See “Collimator”)

“Source” means the focal spot of the x-ray tube.

“Source-to-image receptor distance” or “SID” means the distance from the source to the center of the input surface of the image receptor.

“Spot check” means an abbreviated calibration procedure which is performed to assure that a previous calibration continues to be valid. Also, a spot film may be taken to improve visualization by arresting motion and to document medical observations. Note that in some cases, a film may not be created.

“Stationary equipment” (See “X-ray equipment”)

“Stray radiation” means the sum of leakage and scattered radiation.

“System” (See “X-ray system”)

“Technique chart” means a tabulation of technique factors.

“Technique factors” means the following conditions of operation:

For capacitor energy storage equipment, peak tube potential in kV and quantity of charge in mAs;

For field emission equipment rated for pulsed operation, peak tube potential in kV, and number of x-ray pulses;

For CT x-ray systems designed for pulsed operation, peak tube potential in kV, scan time in seconds, and either tube current in mA, x-ray pulse width in seconds, and number of x-ray pulses per scan, or the product of tube current, x-ray pulse width, and number of x-ray pulses in mAs;

For CT x-ray systems not designed for pulsed operation, peak tube potential in kV, and either tube current in mA and scan time in seconds, or the product of tube current, exposure time in mAs, when the scan time and exposure time are equivalent; and

For all other equipment, peak tube potential in kV, and either tube current in mA and exposure time in seconds, or the product of tube current and exposure time in mAs.

“Treatment simulator” means a diagnostic x-ray system that duplicates a medical particle accelerator or other teletherapy in terms of its geometrical, mechanical, and optical qualities; the main function of which, is to display radiation treatment fields so that the target volume may be accurately included in the area of irradiation without delivering excess radiation to surrounding normal tissue.

“Tube” means x-ray tube unless otherwise specified.

“Tube housing assembly” means the tube housing with the tube installed. It includes high-voltage or filament transformers and other elements contained within the tube housing.

“Tube rating chart” means the set of curves that specify the rated limits of operation of the tube in terms of the technique factors.

“Useful beam” means the radiation emanating from the tube housing port or the radiation head and passing through the aperture of the beam-limiting device when the exposure controls are in a mode that causes the system to produce radiation.

“Visible area” means that portion of the input surface on the image receptor over which incident x-ray photons are producing a visible image.

“X-ray equipment” means an x-ray system, subsystem, or component described further by the following terms:

“Hand-held” means x-ray equipment designed to be held by an operator while being used.

“Mobile” means x-ray equipment mounted on a permanent base with wheels or casters for moving while completely assembled.

“Portable” means x-ray equipment designed to be hand-carried, but used with a cord or delayed timer system that allows the operator to be six feet or more away from the useful beam.

“Stationary” means x-ray equipment installed in a fixed location.

“Transportable mobile” means x-ray equipment installed in a vehicle or trailer.

“X-ray system” means an assemblage of components for the controlled production of x-rays. It includes, at minimum, an x-ray high-voltage generator, an x-ray control, a tube housing assembly, a beam-limiting device, and the necessary support-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

ing structures. Additional components that function with the system are considered integral parts of the system.

“X-ray tube” means any electron tube that is designed for the conversion of electrical energy into x-ray energy. For purposes of the rules contained in 9 A.A.C. 7, this term is synonymous with “tube.”

R9-7-603. Operational Standards, Shielding, and Darkroom Requirements

- A. A person shall not make, sell, lease, transfer, lend, or install x-ray equipment or the supplies used in connection with the equipment unless the supplies and equipment, when properly placed in operation and properly used, meets the requirements of 9 A.A.C. 7.
- B. A registrant shall direct the operation of x-ray machines under the registrant's control and assure that all of the following provisions are met in the operation of x-ray machines:
 1. The registrant shall not permit any individual to engage in the practice of “Healing Arts Radiography” using equipment under the registrant's control, unless the individual possesses, and displays in the primary employer's facility, an official certificate issued by, or is exempt from, the Medical Radiologic Technology Board of Examiners that contains an original signature of its Director or designee. A copy of the certificate shall be posted at any secondary employment location with documentation that verifies that the employer has physically seen the official certificate and has annotated on the copy the location where the official certificate may be viewed by Department staff.
 2. The registrant shall maintain records documenting compliance with subsection (B)(1) for each individual practicing “Healing Arts Radiography” using equipment under the registrant's control.
 3. The registrant shall provide safety rules to each individual operating x-ray equipment under the registrant's control, including any restrictions in operating procedures necessary for the safe use of the equipment and require that the operator demonstrate familiarity with 9 A.A.C. 7.
- C. Shielding
 1. Each registrant shall provide each installation with primary and secondary protective barriers that are necessary to assure compliance with 9 A.A.C. 7, Article 4.
 2. A registrant shall ensure that attenuation provided by a protective barrier meets or exceeds the level of protection established in Report No. 147 Structural Shielding Design for Medical X-ray Imaging Facilities, November 19, 2004, by the National Council on Radiation Protection and Measurements, (NCRP), NCRP Publications, 7910 Woodmount Ave., Suite 400, Bethesda, MD 20814-3095. This report is incorporated by reference and available under R9-7-101. The incorporated material contains no future editions or amendments. Copies of the report are available from NCRP Publications: online at <http://www.ncrppublications.org>; toll free at (800) 229-2652 (Ext. 25); or e-mail at NCRPpubs@NCRPonline.org. Each registrant shall use this incorporated material to provide sufficient shielding to prevent a public exposure that exceeds the limits in R9-7-416.
 3. A registrant shall:
 - a. Mount each lead barrier so that the barrier will not sag or cold flow because of its own weight and protect the barrier from damage;

- b. Use barriers designed so that joints between different ends of protective material do not impair the overall protection of the barriers;
 - c. Use barriers designed so that joints at the floor and ceiling do not impair the overall protection of the barriers;
 - d. Use windows, window frames, doors, and door frames that have the same lead equivalence required in the adjacent walls; and
 - e. Cover holes in protective barriers so that overall attenuation is not impaired.
4. A registrant shall also meet the structural shielding requirements in R9-7-607(C), if the x-ray system in question is not a mobile fluoroscopic unit, dental panoramic, cephalometric, dental CT, or intraoral radiographic system.
- D. Film Processing and Darkroom Requirements. A registrant shall:
 1. Ensure that the darkroom is light-tight and use proper safe-lighting such that any film type in use exposed in a cassette to x-ray radiation sufficient to produce an optical density from 1 to 2 when processed shall not suffer an increase in density greater than 0.1 (0.05 for mammography) when exposed in the darkroom for two minutes with all safe-lights illuminated. (A processor with a daylight loader satisfies this requirement.);
 2. Ensure that film is stored in a cool, dry place and is protected from radiation exposure; and that film located in open packages is stored in a light-tight container;
 3. Ensure that film cassettes and intensifying screens are inspected annually, cleaned, and replaced as necessary;
 4. Ensure that film cassettes contain film and intensifying screens that have the same sensitivity;
 5. Ensure that automatic film processors develop film in accordance with time-temperature relationships recommended by the film manufacturer;
 6. Ensure that manually developed film is developed in accordance with the time-temperature relationships recommended by the manufacturer, and that a timer, thermometer, and a time-temperature chart are available and used in the darkroom;
 7. Ensure that film processing solutions are prepared and maintained in accordance with the directions of the manufacturer;
 8. Ensure that outdated film is not used for diagnostic radiographs;
 9. Follow manufacturer's recommendations for cleaning or inspection of computed radiography (CR) cassettes, but not less than annually;
 10. Follow manufacturer's recommendations for preventive maintenance on digital radiography panels or cassettes, but not less than annually; and
 11. Maintain documentation that demonstrates that requirements of this subsection are being met for three years for Department review from the date of inspection.

Historical Note

R9-7-604. General Procedures

- A. Each registrant shall ensure the following procedural requirements are met in the operation of x-ray equipment:
 1. An x-ray machine which does not meet the provisions of this Chapter shall not be operated for diagnostic or therapeutic purposes, unless specifically exempted by the Department.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. Except for patients who cannot be moved out of the room, only the individuals required for the radiological procedure or in training may be present in the room during radiographic exposure, and all the following requirements apply:
 - a. All individuals shall be positioned such that no part of the body, including the extremities not protected by 0.5 mm lead equivalent, will be struck by the useful beam.
 - b. Staff and ancillary personnel shall be protected from the direct scatter radiation by protective aprons or whole body protective barriers of not less than 0.25 mm lead equivalent.
 - c. Individuals, other than the patient to be examined, who cannot be removed from the room during mobile or portable radiography shall be protected from the direct scatter radiation by whole body protective barriers of 0.25 millimeters lead equivalent or shall be so positioned that the nearest portion of the body is at least 2 meters (6.5 feet) from both the tube head and the nearest edge of the image receptor.
 - d. If a portion of the body of any staff or ancillary personnel is potentially subjected to stray radiation that could result in that individual receiving 10 percent of the maximum permissible dose as defined in Article 4 of this Chapter, the registrant shall provide additional protective devices as specified by the Department.
 3. An individual shall not be exposed to the useful beam except for a healing arts purpose authorized by a licensed practitioner of the healing arts. The following acts are prohibited:
 - a. Exposure of an individual without meeting the required healing art requirements and without a valid directive from a licensed practitioner;
 - b. Exposure of an individual for training, demonstration, or other non-healing arts purpose;
 - c. Exposure of an individual for the purpose of healing arts screening, except as authorized by the Department after submitting to the Department the information listed in Appendix A of this Article. (If any information submitted to the Department changes, the registrant shall immediately notify the Department of the changes.);
 - d. Routinely holding film or a patient during an exposure to x-ray radiation; or
 - e. Exposure of an individual to fluoroscopy as a positioning method for general purpose radiological procedures.
 4. All persons who are associated with the operation of an x-ray system are subject to the occupational exposure limits specified in Article 4. Exposure of a personnel monitoring device to deceptively indicate a dose delivered to an individual is prohibited.
 5. The registrant shall check radiation protective equipment for reliability and integrity defects on an annual basis, as follows:
 - a. Aprons, gloves, and shields shall be checked for holes, tears, and breaks.
 - b. If defects are found in the equipment, the registrant shall replace or remove it from service. Equipment removed from service shall not be put back into service until it is repaired.
 - c. A record of the annual reliability and integrity check and any equipment replacement shall be maintained for three years.
- B.** The registrant shall maintain the following records for each x-ray machine:
1. Survey, calibration, maintenance, and modification records regarding the x-ray machine or room, which include the name of the person who performed the service; and
 2. Correspondence with the Department regarding the x-ray machine facility.

Historical Note

New Section R9-7-604 recodified from R12-1-604 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-605. X-ray Machine Standards

- A.** A registrant shall prevent leakage radiation from the diagnostic source assembly measured at a distance of 1 meter in any direction from the source assembly from exceeding 25.8 $\mu\text{C}/\text{kg}$ (100 milliroentgens) in one hour when the x-ray tube is operated at its leakage technique factors. The Department shall determine compliance by obtaining measurements averaged over an area of 100 square centimeters (15.5 square inches) with no linear dimension greater than 20 centimeters (7.9 inches).
- B.** The registrant shall prevent radiation emitted by a component other than the diagnostic source assembly from exceeding 516 nC/kg (2 milliroentgens) in one hour at 5 centimeters from any accessible surface of the component when it is operated in an assembled x-ray system under any conditions for which it was designed. The Department shall determine compliance by obtaining measurements averaged over an area of 100 square centimeters (15.5 square inches) with no linear dimension greater than 20 centimeters (7.9 inches).
- C.** Beam quality.
1. The registrant shall prevent the useful beam half-value layer (HVL) for diagnostic x-ray given x-ray tube potential from falling below the values shown in Table I. If it is necessary to determine the HVL at an x-ray tube potential that is not listed in Table I, the registrant shall use linear interpolation or extrapolation to make the determination.

- If the registrant demonstrates that the aluminum equivalent of the total filtration in the primary beam is not less than that shown in Table II, the registrant is considered to have met the criteria in subsection (C)(1).

Table II - Filtration Required vs. Operating Voltage

Operating Voltage (kVp)	Total Filtration (inherent plus added) (millimeters aluminum equivalent)
Below 51	0.5 millimeters
51 - 70	1.5 millimeters
Above 70	2.5 millimeters

- The registrant shall use beryllium window tubes that have a minimum of 0.5 millimeters aluminum equivalent filtration permanently mounted in the useful beam.
- For capacitor energy storage equipment, the Department shall determine compliance with the maximum quantity of charge per exposure.
- When determining the minimum aluminum equivalent filtration, the registrant shall include the filtration contributed by all materials that are always present between the focal spot of the tube and the patient (for example, a tabletop when the tube is mounted "under the table" and inherent filtration of the tube).

D. Multiple tubes. If two or more radiographic tubes are controlled by one exposure switch, the operator shall clearly indicate which tube or tubes have been selected before initiation of the exposure, activating one light on the x-ray control panel and a second light at or near the tube housing assembly, each indicating the tube or tubes that have been selected.

E. Mechanical support of tube head. The registrant shall adjust the tube housing assembly supports so that the tube housing assembly will remain stable during an exposure, unless the tube housing movement is a designed function of the x-ray system.

F. Exposure reproducibility. The coefficient of variation shall not exceed 0.10 when all technique factors are held constant. This requirement is satisfied if the value of the average exposure (E) is greater than or equal to five times the difference between the maximum exposure (E_{max}) and minimum exposure (E_{min}) when four exposures are made at identical technique factors, $[E \geq 5(E_{\max} - E_{\min})]$.

G. Accuracy deviation. A registrant shall not use an x-ray machine if the measured technique factors for kVp and time duration are not within the limits specified by the manufacturer. In the absence of the manufacturer's specifications, a registrant shall not use an x-ray machine if the measured kVp is not within 10 percent of the indicated kVp value and the

measured time duration is not within 20 percent of the indicated time.

New Section R9-7-605, including Tables I and II, recodified from R12-1-605, Tables I and II, at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-606. Fluoroscopic and Fluoroscopic Treatment Simulator Systems

- A.** Useful beam limitation. A registrant shall:
- Provide beam-limiting devices that restrict the entire cross section of the useful beam to less than the area of the primary barrier at any Source-to-Image Receptor Distance (SID);
 - Ensure that the x-ray field size produced by fluoroscopic systems without image intensification does not extend beyond the visible area of the image receptor at any SID;
 - Ensure that the x-ray field size produced by fluoroscopic systems with image intensification and automatic shutter control does not exceed the diameter of the image receptor at any SID;
 - Ensure that the x-ray field size produced by fluoroscopic systems with image intensification and manual shutter control does not exceed the diameter of the image receptor with the fluoroscopic imaging assembly positioned at the maximum usable distance above the table top; and
 - Ensure that the x-ray field size produced by fluoroscopic systems with image intensification and manual shutter control, where the fluoroscopic tube is above the table top, does not exceed the diameter of the image receptor with the shutters open to the fullest extent, and at the maximum SID which the fluoroscopic tube is capable of producing radiation.
- B.** Fluoroscopic primary protective barrier. A registrant shall:
- Provide the fluoroscopic imaging assembly with a primary protective barrier that always intercepts the entire cross section of the useful beam at any SID.
 - Ensure that the fluoroscopic tube is not capable of producing radiation unless the primary protective barrier is in a position to intercept the entire cross section of the useful beam.
 - Ensure that fluoroscopic radiation production automatically terminates if the primary protective barrier is removed from the useful beam.
 - Ensure that the fluoroscopic primary protective barrier meets the following requirements for attenuation of the useful beam:
 - For equipment installed before November 15, 1967, the required lead equivalent of the barrier is not less than 1.5 millimeters for fluoroscopes that produce

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

less than 100 kVp, 1.8 millimeters for fluoroscopes that produce at least 100 kVp but less than 125 kVp, and 2.0 millimeters for fluoroscopes that produce 125 or more kVp. (For conventional fluoroscopes, these requirements may be assumed to have been met if the exposure rate measured at the viewing surface of the fluorescent screen does not exceed 12.9 microcoulombs per kilogram (50 milliroentgens) per hour with the screen in the primary beam of the fluoroscope without a patient, under normal operating conditions.) For equipment installed or reinstalled, the required lead equivalent of the barrier is 2.0 millimeters for fluoroscopes that produce less than 125 kVp or 2.7 millimeters for fluoroscopes that produce 125 or more kVp.

- b. For fluoroscopic systems that use image intensification, the exposure rate, due to transmission through the primary protective barrier, does not exceed 516 nC/kg (2 milliroentgens) per hour at 10 centimeters (4 inches) from any accessible surface of the fluoroscopic imaging assembly, beyond the plane of the image receptor for each 258 μ C/kg (1 roentgen) per minute of entrance exposure rate.
 - c. Compliance with subsections (B)(4)(a) and (b) is determined with the image receptor positioned 35.5 centimeters (14 inches) from the panel or table top, at normal operating technical factors and with the attenuation block in the useful beam for systems with image intensification.
- C. Entrance exposure rate limits. A registrant shall ensure that:
1. The exposure rate, measured at the point where the center of the useful beam enters the patient does not exceed 2.6 mC/kg (10 roentgens) per minute at any combination of tube potential and current, except during recording of fluoroscopic images or if provided with optional high-level control.
 2. If provided with optional high-level control, the equipment is not operable at any combination of tube potential and current that will result in an exposure rate in excess of 2.6 mC/kg (10 roentgens) per minute at the point where the center of the useful beam enters the patient, unless the high-level control is activated, in which case an exposure rate in excess of 5.2 mC/kg (20 roentgens) per minute is prohibited.
 - a. Special means of activation of high-level controls, such as additional pressure applied continuously by the operator, are required to avoid accidental use.
 - b. A continuous signal audible to the fluoroscopist is required to indicate that the high-level control is being employed.
 3. The Department shall determine compliance with subsections (C)(1) and (2) as follows:
 - a. Remove grids and compression devices from the useful beam during the measurement;
 - b. If the source is below the table, measure the exposure rate 1 centimeter above the table top or cradle; and
 - c. If the source is above the table, measure the exposure rate 30 centimeters (11.8 inches) above the table top with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement;
 - d. For fluoroscopy involving a mobile C-arm x-ray system, measure the exposure rate 30 centimeters (11.8 inches) from the input surface of the fluoroscopic imaging assembly;
 - e. For fluoroscopy involving a C-arm x-ray system, measure the exposure rate 30 centimeters (11.8 inches) from the input surface of the fluoroscope imaging assembly, with the x-ray source positioned at any available SID, provided that the end of the beam-limiting device or spacer is not closer than 30 centimeters (11.8 inches) from the input surface of the fluoroscopic image assembly; and
 - f. For a lateral fluoroscope, measure the exposure rate 15 centimeters (5.9 inches) from the centerline of the x-ray table and in the direction of the x-ray source with the end of the beam-limiting device or spacer positioned as closely as possible to the point of measurement. If the tabletop is movable, it shall be positioned as closely as possible to the lateral x-ray source, with the end of the beam-limiting device or spacer no closer than 15 centimeters (5.9 inches) to the centerline of the x-ray table.
- D. The registrant shall ensure that the source-to-skin distance is not less than:
1. 38 centimeters (15 inches) on stationary fluoroscopes installed after January 2, 1996;
 2. 35.5 centimeters (14 inches) on stationary fluoroscopes which are in operation before January 2, 1996;
 3. 30 centimeters (11.8 inches) on all mobile fluoroscopes; and
 4. 20 centimeters (8 inches) for image-intensified fluoroscopes used for a specific surgical application. The registrant shall follow any precautionary measures in the users operating manual.
- E. Each fluoroscopic system installation is subject to all of the following requirements for the control of stray radiation. A registrant shall:
1. Provide a shielding device of at least 0.25 millimeter lead equivalent for covering the Bucky-slot during fluoroscopy;
 2. Except for fluoroscopy performed using portable or mobile C-arm x-ray systems or during surgical procedures or cardiac catheterization, provide protective drapes, or hinged or sliding panels of at least 0.25 millimeters lead equivalent, between the patient and fluoroscopist to intercept scattered radiation that would otherwise reach the fluoroscopist and others near the machine, but not substitute drapes and panels for a protective apron; and
 3. Ensure that protective aprons of at least 0.25 millimeter lead equivalent are worn in the fluoroscopy room by each person, except the patient, whose body is likely to be exposed to 50 μ Sv/hr (5 mR/hr) or more.
- F. Exposure control. A registrant shall:
1. Ensure that activation of the fluoroscopic tube is controlled by a "dead-man" switch;
 2. Provide a manual reset cumulative timing device, which is activated only during production of radiation in the fluoroscopic mode, to indicate elapsed time by an audible signal or terminate production of radiation;
 3. Provide a device for exposure control in the "spot film" mode that terminates exposure either automatically, or after a preset time interval, preset number of pulses, preset product of current and time, or preset exposure; and
 4. Ensure that the x-ray tube potential and current are continuously indicated.
- G. A registrant shall provide systems used for mobile fluoroscopy with image intensification.
- H. Fluoroscopic treatment simulators. Simulators are exempt from subsections (A) through (G). A registrant shall:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. Use a beam limiting device that restricts the beam to the area of clinical interest.
 2. Include and label devices for settings or physical factors, such as kVp, mA, or exposure time on the control panel;
 3. Ensure that the fluoroscopic exposure switch or switches are of the "deadman" type;
 4. Ensure that each person whose presence is necessary is in the simulator room during exposure and protected with a lead apron of at least 0.5 millimeter lead equivalent or a portable shield. Any person who places their hands in the useful x-ray beam shall wear leaded gloves; and
 5. Ensure that the operator stands behind a barrier and is able to observe the patient during simulator exposures.
2. Ensure that the exposure switch is a "dead-man" switch, and except for those used with "spot-film" devices in fluoroscopy, is arranged so that it cannot be conveniently operated outside a shielded area.
 3. Provide x-ray systems with automatic exposure control, which indicates at the control panel when this mode is selected, and a visual and audible signal, which indicates termination of the exposure.
 4. Use a control panel that includes:
 - a. A device (usually a milliamp meter) that will give a positive indication during radiation production; and
 - b. Control setting indicators or meters that indicate the appropriate technical factors: kVp, mAs, mA, or exposure time, and any special mode selected for the exposure.

R9-7-607. Additional X-ray Machine Standards, Shielding Requirements, and Procedures, Except Mobile Fluoroscopic, Dental Panoramic, Cephalometric, Dental CT, or Dental Intra-oral Radiographic Systems

A. Useful beam limitation. A registrant shall:

1. Provide a means to restrict the useful beam to the area of clinical interest for any combination of SID and image receptor size employed.
2. Ensure that beam-limiting devices meet the following requirements:
 - a. Devices that project a circular radiation field restrict the diameter of the useful beam, not to exceed the diagonal dimension of the image receptor by greater than 2 percent of the SID;
 - b. Devices that project a rectangular or square radiation field restrict the useful beam to the longitudinal and transverse dimensions of the image receptor to within 2 percent of the SID;
 - c. Beam limiting devices that do not incorporate light beams to define the projected radiation field are clearly labeled, indicating the SID and image receptor size at which each device complies with the applicable requirements of subsection (A)(2)(a) or (b);
 - d. Adjustable beam-limiting devices installed after July 31, 1971, incorporate light beams to define the projected dimensions of the useful beam and provide an average illumination of not less than 100 lux (9 foot-candles) at 1 meter (3.3 feet) or at the maximum SID, whichever is less. The average illumination shall be based upon measurements made in the approximate center of each quadrant of the light field; and
 - e. All beam-limiting devices installed, on general purpose fixed and mobile radiographic systems, provide stepless means of continuous adjustment of the projected radiation field size.
3. Provide a means to align the center of the radiation field to the center of the image receptor to within 2 percent of the SID.

B. Radiation exposure control. A registrant shall:

1. Provide a means to terminate the exposure at a preset time interval, preset product of current and time, preset number of pulses, or a preset exposure to the image receptor. The registrant shall ensure that it is not possible to make an exposure when the exposure control device is set to a "zero" or "off" position if either position is provided.

C. Structural shielding. A registrant shall:

1. Ensure that all wall, floor and ceiling areas struck by the useful beam have primary protective barriers. Primary protective barriers in walls shall extend from the finished floor to a minimum height of 2.13 meters (7 feet);
2. Ensure that secondary protective barriers are provided in all wall, floor, and ceiling areas that do not have primary protective barriers or where the primary protective barrier requirements are lower than the secondary barrier requirements;
3. Ensure that the operator's station is behind a protective barrier sufficient to ensure compliance with R9-7-408, R9-7-414, and R9-7-416, and the operator is able to communicate with the patient from the operator's station.
4. Provide a window of transparent material equal in attenuation to that required by the adjacent barrier, or a mirror system, that is large enough and placed so that the operator can see the patient during exposure without having to leave the protected area.

D. Operating procedures. A registrant shall:

1. Use mechanical supporting or restraining devices, if a patient must be held in position for radiography. If the patient must be held by an individual, the registrant shall ensure that the individual is protected with appropriate shielding devices, such as protective gloves and apron, and is positioned so that no part of the body of the individual holding the patient is struck by the useful beam;
2. Ensure that only individuals required for the radiographic procedure are in the radiographic room during exposure, and, except for the patient, all these individuals are equipped with protective devices;
3. Restrict the useful beam to the clinical area of interest;
4. Provide a chart in the vicinity of the diagnostic x-ray system's control panel that specifies, for all routine examinations performed with the system, the following information:
 - a. Patient's anatomical size and technique factors;
 - b. Type and size of the film or film screen combination;
 - c. Type and focal distance of the grid, if any;
 - d. X-ray source-to-image receptor distance; and
 - e. Type and location of gonad shielding.
5. Provide documentation of the following items:
 - a. The patient's identity;
 - b. The x-ray examination, as recorded in a radiographic log;
 - c. The date the examination is performed;
 - d. The number of projections (if applicable), or on-time, or dose factors depending upon the unit; and
 - e. A method of identifying the individual who performed the examination.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

6. The registrant shall maintain in chronological order, the documentation required in subsection (D)(5) in written or readily available electronic form. The documentation shall be maintained for three years from the date the examination is performed.

R9-7-608. Mobile Diagnostic Radiographic and Mobile Fluoroscopic Systems, Except Dental Panoramic, Cephalometric, Dental CT, or Dental Intraoral Radiographic Systems**A. Equipment**

1. All requirements of R9-7-607(A) and (B) apply.
2. For mobile radiographic units the registrant shall provide a "dead-man" switch, together with an electrical cord of sufficient length so that the operator can stand out of the useful beam and at least 1.82 meters (6 feet) from the patient during all x-ray exposures.
3. A registrant shall ensure that a cone, spacer frame, or inherent provision is made so that the equipment is not operated at source-skin distances of less than 20.3 centimeters (8 inches).

B. Structural shielding. If a mobile unit is used routinely in one location, it is considered a fixed installation subject to the shielding requirements in R9-7-603(C), and R9-7-607(C).**C. Operating procedures**

1. All provisions of R9-7-607(D) apply.
2. An individual who operates a mobile x-ray system shall comply with R9-7-419(B).

R9-7-610. Dental Intraoral Radiographic Systems**A. Equipment.** A registrant shall:

1. Use a protective tube housing of diagnostic type;
2. Use diaphragms or cones for restricting the useful beam and to provide the same degree of protection as the housing. The diameter of the useful beam at the end of the cone or spacer frame shall not be more than 7.6 centimeters (3 inches) for intraoral radiography;
3. Ensure that a cone or spacer frame provides a source-to-skin distance of not less than 17.8 centimeters (7 inches) with apparatus operating above 50 kVp or 10 centimeters (4 inches) with apparatus operating at 50 kVp or below for intraoral radiography;
4. Provide a timer to terminate the exposure at a preset time interval, a preset product of current and time, a preset number of pulses, or a preset radiation exposure to the image receptor;
5. Ensure that it is not possible to make an exposure if the timer is set to the "zero" or "off" position;
6. Ensure that the tube head remains stationary if placed in the exposure position;
7. Ensure that the exposure initiating device is a "dead-man" switch;
8. Use a control panel that includes:

- a. A means to provide visual or audible indication, detectable at or from the operator's position, during x-ray production or exposure termination; and
- b. Indication of technique factors for kVp, mA, exposure time, and any special mode that may be selected for the exposure;

9. Use technique factors, where deviation of measured values from indicated values for kVp and exposure time do not exceed the limits specified by the manufacturer. In the absence of the manufacturer's specifications, the deviation shall not exceed plus or minus 10 percent of the indicated value for kVp and plus or minus 20 percent for exposure time duration;
10. For a digital system that uses an electronic sensor, use digital radiography techniques that permit reducing x-ray beam on-time to 25 percent of the exposure time required for "D" speed film or lower, reducing radiation to the patient by the same rate; and
11. For a computed radiography (imaging plate (IP) made of photostimulable phosphor) system that uses an imaging plate, use radiography techniques that permit reducing x-ray beam on-time to 50 percent of the exposure time required for "D" speed film or lower, reducing radiation to the patient by the same rate.

B. Structural shielding. The registrant shall:

1. Provide dental installations with primary and secondary barriers to ensure compliance with the personnel exposure requirements in Article 4 of this Chapter; (Note: In many cases, structural materials of ordinary walls suffice as a protective barrier without addition of special shielding material.)
2. Install primary protective barriers between rooms or areas if dental x-ray units are used in adjacent rooms or areas;
3. Provide each installation with a protective barrier for the operator or arrange the installation so that the operator can stand at least 1.82 meters (6 feet) from the patient and well away from the useful beam;
4. Arrange the operator's position to allow visual contact with the patient during exposure; and
5. Comply with fixed installation requirements, if a mobile unit is used routinely in one location.

C. Operating procedures

1. A dentist or other persons shall not hold patients or films during exposure. Only persons required for the radiographic procedure are allowed in the radiographic room during exposures.
2. An operator shall stand at least 1.82 meters (6 feet) from the patient or behind a protective barrier during each exposure.
3. An operator shall ensure that only the patient is in the useful beam.
4. The licensed practitioner or other person shall not hold the tube housing or the cone during the exposure.
5. A registrant shall not perform dental fluoroscopy without an image intensifier.

R9-7-610.01. Hand-held Intraoral Dental Radiographic Unit Requirements For Use

- A.** Registrants are subject to the following requirements for Intraoral dental radiographic units designed to be operated as a hand-held unit:
 1. For all uses:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. Operators of hand-held intraoral dental radiographic units shall be specifically trained to operate such equipment.
 - b. A hand-held intraoral dental radiographic unit shall be held without any motion during a patient examination. A tube stand may be utilized to immobilize a hand-held intraoral dental radiographic unit during patient examination.
 - c. The operator shall ensure there are no bystanders within a radius of at least six feet from the patient being examined with a hand-held intraoral radiographic unit.
2. Additional requirements for operatories in permanent facilities:
- a. Hand-held intraoral dental radiographic units shall be used for patient examinations in dental operatories that meet the structural shielding requirements specified by the Department or by a qualified health or medical physicist.
 - b. Hand-held intraoral dental radiographic units shall not be used for patient examinations in hallways and waiting rooms.
- B.** Hand-held units may only be used in a manner as specified on the registration issued by the Department.

Historical Note

New Section R9-7-610.01 recodified from R12-1-610.01 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-611. Therapeutic X-ray Systems of Less Than 1 MeV**A.** Equipment requirements.

1. Leakage radiation. When the x-ray tube is operated at its maximum rated tube current for the maximum kVp, the leakage air kerma rate shall not exceed the value specified at the distance specified for that classification of therapeutic radiation machine. For each therapeutic radiation machine, the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at the positions specified:
 - a. 5-50 kVp Systems. The leakage air kerma rate measured at any position 5 centimeters from the tube housing assembly shall not exceed 1 mGy (100 mrad) in any one hour.
 - b. Greater than 50 kVp and less than 1MeV Systems. The leakage air kerma rate measured at a distance of 1 meter from the target in any direction shall not exceed 1 centigray (1 rad) in any 1 hour. This air kerma rate measurement may be averaged over areas no larger than 100 square centimeters (100 cm²). In addition, the air kerma rate at a distance of 5 centimeters from the surface of the tube housing assembly shall not exceed 30 centigray (30 rad) per hour.
2. Permanent beam limiting devices. A registrant shall ensure that fixed diaphragms or cones used for limiting the useful beam provide the same or higher degree of attenuation as required for the tube housing assembly.
3. Removable and adjustable beam-limiting devices. A registrant shall ensure that:
 - a. Removable and adjustable beam-limiting devices, for the portion of the useful beam to be blocked by these devices, transmit not more than 1 percent of the original x-ray beam at the maximum kilovoltage and maximum treatment filter; and
 - b. When adjustable beam limiting devices are used, the position and shape of the radiation field shall be indicated by a light beam.
4. Filter system. A registrant shall ensure that the filter system is designed so that:
 - a. Filters cannot be accidentally displaced from the useful beam at any possible tube orientation;
 - b. For equipment installed after January 1, 2011, an interlock system prevents irradiation if the proper filter is not in place;
 - c. The air kerma rate escaping from the filter slot shall not exceed 1 centigray (1 rad) per hour at one (1) meter under any operating conditions; and
 - d. Each filter is marked regarding its material of construction and its thickness or wedge angle for wedge filters.
5. X-ray tube immobilization. A registrant shall ensure that the tube housing assembly is capable of being immobilized during stationary treatments and the x-ray tube shall be so mounted that it cannot accidentally turn or slide with respect to the housing aperture.
6. Focal spot marking. A registrant shall ensure that the tube housing assembly is marked so that it is possible to determine the location of the focal spot to within 5 millimeters, and the marking is readily accessible for use during calibration procedures.
7. Therapy treatment timers. A registrant shall:
 - a. Provide a timer that has a display at the treatment control panel. The timer shall have a preset time selector and an elapsed time indicator;
 - b. Ensure that the timer is a cumulative timer that activates with the radiation, retains its reading after irradiation is interrupted or terminated, and requires the operator to reset the preset time selector after irradiation is terminated and before irradiation can be reinitiated;
 - c. Ensure that the timer terminates irradiation when a preselected time has elapsed;
 - d. Ensure that the timer permits accurate presetting and determination of exposure times as short as one second;
 - e. Ensure that the timer does not permit an exposure if set at zero; and
 - f. Ensure that the timer does not activate until the shutter is opened if irradiation is controlled by a shutter mechanism.
8. Control panel functions. In addition to the displays required in other provisions of this Section, a registrant shall ensure that a control panel has:
 - a. An indication of whether electrical power is available at the control panel and if activation of the x-ray tube is possible;
 - b. An indication of whether x-rays are being produced;
 - c. A means for indicating kVp and x-ray tube current;
 - d. A means for terminating an exposure at any time;
 - e. A locking device that will prevent unauthorized use of the x-ray system; and
 - f. For x-ray equipment installed after January 2, 1996, a positive display of specific filters in the beam.
9. Multiple tubes. If one control panel is used to energize more than one x-ray tube a registrant shall ensure that:
 - a. It is possible to activate only one x-ray tube during any time interval,
 - b. There is an indication at the control panel that identifies which x-ray tube is energized, and
 - c. There is an indication at the tube housing assembly when that tube is energized.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

10. Source-to-patient distance. A registrant shall ensure that there is a means of determining the source-to-patient distance to within 1 centimeter.
 11. Shutters. Unless it is possible to bring the x-ray output to the prescribed exposure parameters within five seconds, a registrant shall ensure that the entire useful beam is automatically attenuated by a shutter with a lead equivalency not less than that of the tube housing assembly. In addition the registrant shall ensure that:
 - a. After the unit is at operating parameters, the operator controls the shutter electrically from the control panel; and
 - b. An indication of shutter position appears at the control panel.
 12. Low filtration x-ray tubes. A registrant shall ensure that each x-ray system equipped with a beryllium or other low-filtration window is clearly labeled as low-filtration equipment on the tube housing assembly and at the control panel.
- B. Facility design requirements.** In addition to shielding necessary to meet the requirements of Article 4 of this Chapter, a registrant shall ensure that:
1. Warning lights. A treatment room to which access is possible through more than one entrance has a warning light, in a readily observable position near the outside of any access doors, which will indicate when the useful beam is "on."
 2. Voice communication. Two-way oral communication is possible between the patient and the operator at the control panel; or where excessive noise levels make oral communication impractical, another effective method of communication.
 3. Viewing systems. Windows, mirrors, closed-circuit television, or an equivalent system, permits continuous observation of the patient during irradiation and is located so that the operator can observe the patient from the control panel. If the primary viewing system is by electronic means (for example, television), the registrant shall have an alternate viewing system for use in the event of electronic failure.
 4. Systems above 150 kVp. For treatment rooms that contain an x-ray system capable of operating above 150 kVp a registrant shall ensure that:
 - a. All necessary shielding, except for any beam interceptor, is provided by fixed barriers;
 - b. The control panel is within a protective booth equipped with an interlocked door, or located outside the treatment rooms;
 - c. All doors of the treatment room are electrically connected to the control panel so that x-ray production cannot occur unless all doors are closed; and
 - d. Opening of any door to the treatment room during exposure results in automatic termination of x-ray production or reduction of radiation levels to an average of no more than 516 nC/kg (2 milliroentgens) per hour and a maximum of 2.6 μ C/kg (10 milliroentgens) per hour at a distance of 1 meter (3.3 feet) from the target in any direction, and restoration of the machine to full operation is possible only from the control panel after the termination or reduction.
- C. Surveys.** A registrant shall ensure that:
1. All facilities, both new and existing, or not previously surveyed, are surveyed before being put into service for the treatment of patients by, or under the direction of, a person trained and experienced in the principles of radiation protection, and perform additional surveys of a facility after any change in the facility or a facility's equipment that might cause a significant increase in radiation hazard, before being put into service for the treatment of patients.
 2. The person conducting the survey reports the survey findings in writing to the individual in charge of the facility and maintains a copy of the survey report for inspection by the Department.
 3. The installation is operated in compliance with any limitations indicated by the protection survey required by subsection (C)(1).
- D. Calibrations.** A registrant shall ensure that:
1. The calibration of a therapeutic x-ray system includes, but is not limited to, the following determinations:
 - a. Verification that the x-ray system is operating in compliance with the design specifications;
 - b. The dose rate equivalent for each combination of field size, technique factors, filter, and treatment distance used;
 - c. The degree of congruence between the radiation field and the field indicated by the localizing device if a localizing device is used; and
 - d. An evaluation of the uniformity of the radiation field symmetry for the field sizes used and any dependence upon source housing assembly orientation;
 2. The calibration of an x-ray system is performed at intervals not to exceed annually and after any change or replacement of components that could cause a change in the radiation output;
 3. The calibration of the radiation output of the x-ray system is performed by, or under the direction of, a person trained and experienced in performing calibrations, who is physically present at the facility during calibration;
 4. Calibration of the radiation output of an x-ray system is performed with a calibrated instrument. The registrant shall ensure that calibration of the instrument is directly traceable to the National Institute of Standards and Technology (NIST) and that the instrument has been calibrated within the preceding 24 months;
 5. Records of calibration performed under subsection (D)(3) are maintained for at least three years after completion of the calibration and are made available for inspection by the Department; and
 6. A copy of the most recent calibration is available for use by the operator at the control panel.
- E. Spot checks.** A registrant shall ensure that spot checks are performed on therapeutic x-ray systems capable of operation at greater than 150 kVp. The registrant shall ensure that spot checks meet the following requirements:
1. The spot-check procedures are in writing and have been developed by a qualified expert;
 2. The measurements taken during the spot checks demonstrate the degree of consistency of the operating characteristics that can affect the radiation output of the x-ray system;
 3. The written spot-check procedure specifies the frequency of the tests or measurements, made at intervals not to exceed monthly;
 4. The spot-check procedure identifies conditions that require recalibration of the system in accordance with subsection (D)(1); and
 5. Records of spot-check measurements performed as required by subsection (E)(3) are maintained, available for inspection by the Department, for three years following the measurements.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- F.** Operating procedures. A registrant shall ensure that:
1. Therapeutic x-ray systems are not left unattended unless the system is secured according to subsection (A)(8)(e);
 2. If a patient must be held in position for radiation therapy, mechanical supporting or restraining devices are used;
 3. The tube housing assembly is not held by an individual during exposures; and
 4. At 150 kVp or more the patient is the only person in the treatment room during production of radiation. At less than 150 kVp an individual may be in the room with patient, provided the individual is protected by a barrier sufficient to meet the requirements of Article 4 of this Chapter.
- G.** Electronic Brachytherapy units are exempt from the requirements of this Section.
- Historical Note**
- New Section R9-7-611 recodified from R12-1-611 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).
- R9-7-611.01. Electronic Brachytherapy to Deliver Interstitial and Intracavitary Therapeutic Radiation Dosage**
- A.** Electronic brachytherapy devices used to deliver interstitial and intracavitary therapeutic radiation dosage shall be subject to the requirements of this Section, and unless otherwise specified in this Section shall be exempt from the requirements of R9-7-611.
1. An electronic brachytherapy device that does not meet the requirements of this Section shall not be used for irradiation of patients; and
 2. An electronic brachytherapy device shall only be utilized for human use applications specifically approved by the U.S. Food and Drug Administration (FDA), unless participating in a research study approved by the registrant's Institutional Review Board (IRB).
- B.** Each facility location authorized to use an electronic brachytherapy device in accordance with this Section shall possess appropriately calibrated portable monitoring equipment. At a minimum, such equipment shall include a portable survey instrument capable of measuring dose rates over the range 10 μ Sv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The survey instrument shall be capable of measuring as low as 10 μ Sv (1 mrem) per hour in the energy range of the electronic brachytherapy unit for which the survey instrument is to be used. Published correction factors utilized in conjunction with the instrument's readings may be used to achieve sensitivity. The survey instrument or instruments shall be operable and calibrated before first use, at intervals not to exceed 12 months, and after survey instrument repairs.
- C.** Facility Design Requirements for Electronic Brachytherapy Devices. In addition to shielding adequate to meet requirements of R9-7-603(C), the treatment room shall meet the following design requirements:
1. If applicable, provision shall be made to prevent simultaneous operation of more than one therapeutic radiation machine in a treatment room.
 2. Access to the treatment room shall be controlled by a door at each entrance.
 3. Each treatment room shall have provisions to permit continuous oral communication and visual observation of the patient from the treatment control panel during irradiation. The electronic brachytherapy device shall not be used for patient irradiation unless the patient can be observed.
 4. For electronic brachytherapy devices capable of operating below 150 kVp, radiation shielding for the staff in the treatment room may be available, either as a portable shield or as localized shielded material around the treatment site or both, in lieu of the requirements for room shielding. The shielding shall meet the requirements of R9-7-603(C).
- D.** Control Panel Functions. The control panel, in addition to the displays required by other provisions in this Section, shall:
1. Provide an indication of whether electrical power is available at the control panel and if activation of the electronic brachytherapy source is possible;
 2. Provide an indication of whether x-rays are being produced;
 3. Provide a means for indicating electronic brachytherapy source potential and current;
 4. Provide the means for terminating an exposure at any time; and
 5. Include an access control (locking) device that will prevent unauthorized use of the electronic brachytherapy device.
- E.** Timer. A suitable irradiation control device (timer) shall be provided to terminate the irradiation after a pre-set time interval or integrated charge on a dosimeter-based monitor.
1. A timer shall be provided at the treatment control panel. The timer shall indicate the planned setting and the time elapsed or remaining;
 2. The timer shall not permit an exposure if set at zero;
 3. The timer shall be a cumulative device that activates with an indication of "BEAM-ON" that retains its reading after irradiation is interrupted or terminated. After irradiation is terminated and before irradiation can be reinitiated, it shall be necessary to reset the elapsed time indicator;
 4. The timer shall terminate irradiation when a pre-selected time has elapsed, if any dose monitoring system has not previously terminated irradiation.
 5. The timer shall permit setting of exposure times as short as 0.1 second; and
 6. The timer shall be accurate to within one percent of the selected value or 0.1 second, whichever is greater.
- F.** Qualified Medical Physicist Support.
1. The services of a Qualified Medical Physicist shall be required in facilities having electronic brachytherapy devices. The Qualified Medical Physicist shall be responsible for:
 - a. Evaluation of the output from the electronic brachytherapy source;
 - b. Generation of the necessary dosimetric information;
 - c. Supervision and review of treatment calculations prior to initial treatment of any treatment site;
 - d. Establishing the periodic and day-of-use quality assurance checks and reviewing the data from those checks as required in subsection (J);
 - e. Consultation with the authorized user in treatment planning, as needed; and
 - f. Performing calculations/assessments regarding patient treatments that may constitute a medical event.
 2. If the Qualified Medical Physicist is not a full-time employee of the registrant, then the operating procedures required by subsection (G) shall also specifically address how the Qualified Medical Physicist is to be contacted for problems or emergencies, as well as the specific actions, if any, to be taken until the Qualified Medical Physicist can be contacted.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

G. Operating Procedures.

1. Only individuals approved by the authorized user, Radiation Safety Officer, or Qualified Medical Physicist shall be present in the treatment room during treatment;
2. Electronic brachytherapy devices shall not be made available for medical use unless the requirements of subsections (A), (H), and (I) have been met;
3. The electronic brachytherapy device shall be inoperable, either by hardware or password, when unattended by qualified staff or service personnel;
4. During operation, the electronic brachytherapy device operator shall monitor the position of all persons in the treatment room, and all persons entering the treatment room, to prevent entering persons from unshielded exposure from the treatment beam;
5. If a patient must be held in position during treatment, mechanical supporting or restraining devices shall be used;
6. Written procedures shall be developed, implemented, and maintained for responding to an abnormal situation. These procedures shall include:
 - a. Instructions for responding to equipment failures and the names of the individuals responsible for implementing corrective actions; and
 - b. The names and telephone numbers of the authorized users, the Qualified Medical Physicist, and the Radiation Safety Officer to be contacted if the device or console operates abnormally.
7. A copy of the current operating and emergency procedures shall be physically located at the electronic brachytherapy device control console;
8. Instructions shall be maintained with the electronic brachytherapy device control console to inform the operator of the names and telephone numbers of the authorized users, the Qualified Medical Physicist, and the Radiation Safety Officer to be contacted if the device or console operates abnormally; and
9. The Radiation Safety Officer, or the Radiation Safety Officer's designee, and an authorized user shall be notified immediately if the patient has a medical emergency, suffers injury or dies. The Radiation Safety Officer or the Qualified Medical Physicist shall inform the manufacturer of the event.

H. Safety Precautions for Electronic Brachytherapy Devices.

1. Any person in the treatment room, other than the person being treated, shall wear personnel monitoring devices;
2. An authorized user and a Qualified Medical Physicist shall be physically present during the initiation of all new patient treatments involving the electronic brachytherapy device;
3. After the first treatment one of the following individuals shall be physically present during continuation of all patient treatments involving the electronic brachytherapy device:
 - a. A Qualified Medical Physicist, or
 - b. An authorized user, or
 - c. A certified therapy technologist (CTT) certified by the Arizona Medical Radiologic Technology Board of Examiners, under the direct supervision of an authorized user, who has been trained in the operation and emergency response for the electronic brachytherapy device;
4. When shielding is required by subsection (C)(4), surveys shall be conducted to ensure that the requirements of R9-7-408, R9-7-414, and R9-7-416 are met. Alternatively, a Qualified Medical Physicist shall designate shield loca-

tions sufficient to meet the requirements of R9-7-603(C) and R9-7-607(C) for any individual, other than the patient, in the treatment room; and

5. All personnel in the treatment room are required to remain behind shielding during treatment. A Qualified Medical Physicist shall approve any deviation from this requirement and shall designate alternative radiation safety protocols, compatible with patient safety, to provide an equivalent degree of protection.

I. Electronic Brachytherapy Source Calibration Measurements.

1. Calibration of the electronic brachytherapy source output shall be performed by, or under the direct supervision of, a Qualified Medical Physicist. If the control console is integral to the electronic brachytherapy device, the required procedures shall be kept where the operator is located during electronic brachytherapy device operation;
2. Calibration of the electronic brachytherapy source output shall be made for each electronic brachytherapy source, or after any repair affecting the x-ray beam generation, or when indicated by the electronic brachytherapy source quality assurance checks;
3. Calibration of the electronic brachytherapy source output shall utilize a dosimetry system appropriate for the energy output of the unit and calibrated by the National Institute for Standards and Technology (NIST) or by an American Association of Physicists in Medicine (AAPM) Accredited Dosimetry Calibration Laboratory (ADCL). The calibration shall have been performed within the previous 24 months and after any servicing that may have affected system calibration;
4. Calibration of the electronic brachytherapy source output shall include, as applicable, determination of:
 - a. The output within two percent of the expected value, if applicable, or determination of the output if there is no expected value;
 - b. Timer accuracy and linearity over the typical range of use;
 - c. Proper operation of back-up exposure control devices;
 - d. Evaluation that the relative dose distribution about the source is within five percent of that expected; and
 - e. Source positioning accuracy to within one millimeter within the applicator;
5. Calibration of the x-ray source output required shall be in accordance with current published recommendations from a recognized national professional association with expertise in electronic brachytherapy (when available). In the absence of a calibration protocol published by a national professional association, the manufacturer's calibration protocol shall be followed.
6. The registrant shall maintain a record of each calibration in an auditable form for the duration of the registration. The record shall include: the date of the calibration; the manufacturer's name, model number and serial number for the electronic brachytherapy device and a unique identifier for its electronic instrument or instruments brachytherapy source; the model numbers and serial numbers of the instrument or instruments used to calibrate the electronic brachytherapy device; and the name and signature of the Qualified Medical Physicist responsible for performing the calibration.

J. Periodic and Day-of-Use Quality Assurance Checks for Electronic Brachytherapy Devices.

1. Quality assurance checks shall be performed on each electronic brachytherapy device:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. At the beginning of each day of use;
 - b. Each time the device is moved to a new room or site; and
 - c. After each x-ray tube installation.
 2. The registrant shall perform periodic quality assurance checks required in accordance with procedures established by the Qualified Medical Physicist;
 3. To satisfy the requirements of this subsection, radiation output quality assurance checks shall include at a minimum:
 - a. Verification that output of the electronic brachytherapy source falls within three percent of expected values, as appropriate for the device, as determined by:
 - i. Output as a function of time, or
 - ii. Output as a function of setting on a monitor chamber.
 - b. Verification of the consistency of the dose distribution to within three percent (or the manufacturer's or Qualified Medical Physicist's documented recommendation not to exceed five percent), observed at the source calibration required by subsection (I); and
 - c. Validation of the operation of positioning methods to ensure that the treatment dose exposes the intended location within one millimeter; and
 4. The registrant shall use a dosimetry system that has been intercompared within the previous 12 months with the dosimetry system described in this Section to make the quality assurance checks required in subsection (J)(3);
 5. The registrant shall review the results of each radiation output quality assurance check to ensure that:
 - a. An authorized user and Qualified Medical Physicist is immediately notified if any parameter is not within its acceptable tolerance, and the electronic brachytherapy device is not used until the Qualified Medical Physicist has determined that all parameters are within their acceptable tolerances;
 - b. If all radiation output quality assurance check parameters appear to be within their acceptable range, the acceptable quality assurance checklist shall be reviewed and signed by either the authorized user or Qualified Medical Physicist prior to the next patient use of the unit. In addition, the Qualified Medical Physicist shall review and sign the results of each radiation output quality assurance check at intervals not to exceed 30 days.
 6. To satisfy the requirements of subsection (J)(1), safety device quality assurance checks shall, at a minimum, assure:
 - a. Proper operation of radiation exposure indicator lights on the electronic brachytherapy device and on the control console;
 - b. Proper operation of viewing and intercom systems in each electronic brachytherapy facility, if applicable;
 - c. Proper operation of radiation monitors, if applicable;
 - d. The integrity of all cables, catheters or parts of the device that carry high voltages; and
 - e. Connecting guide tubes, transfer tubes, transfer-tube-applier interfaces, and treatment spacers are free from any defects that interfere with proper operation.
 7. If the results of the safety device quality assurance checks required in subsection (J)(6) indicate the malfunction of any system, a registrant shall secure the control console in the OFF position and not use the electronic brachytherapy device except as may be necessary to repair, replace, or check the malfunctioning system.
 8. The registrant shall maintain a record of each quality assurance check required by this Section in a legible form for three years.
 - a. The record shall include the date of the quality assurance check; the manufacturer's name, model number and serial number for the electronic brachytherapy device; the name and signature of the individual who performed the periodic quality assurance check and the name and signature of the Qualified Medical Physicist who reviewed the quality assurance check;
 - b. For radiation output quality assurance checks required by subsection (J)(3), the record shall also include the unique identifier for the electronic brachytherapy source and the manufacturer's name; model number and serial number for the instrument or instruments used to measure the radiation output of the electronic brachytherapy device.
- K. Therapy-related Computer Systems.** The registrant shall perform acceptance testing on the treatment planning system of electronic brachytherapy-related computer systems in accordance with current published recommendations from a recognized national professional association with expertise in electronic brachytherapy (when available). In the absence of an acceptance testing protocol published by a national professional association, the manufacturer's acceptance testing protocol shall be followed.
1. Acceptance testing shall be performed by, or under the direct supervision of a Qualified Medical Physicist. At a minimum, the acceptance testing shall include, as applicable, verification of:
 - a. The source-specific input parameters required by the dose calculation algorithm;
 - b. The accuracy of dose, dwell time, and treatment time calculations at representative points;
 - c. The accuracy of isodose plots and graphic displays;
 - d. The accuracy of the software used to determine radiation source positions from radiographic images; and
 - e. If the treatment planning system is different from the treatment delivery system, the accuracy of electronic transfer of the treatment delivery parameters to the treatment delivery unit from the treatment planning system.
 2. The position indicators in the applicator shall be compared to the actual position of the source or planned dwell positions, as appropriate, at the time of commissioning.
 3. Prior to each patient treatment regimen, the parameters for the treatment shall be evaluated for correctness and approved by the authorized user and the Qualified Medical Physicist through means independent of that used for the determination of the parameters.
- L. Training for e-brachytherapy Authorized Users.**
1. The registrant for any therapeutic radiation machine subject to this Section shall require the authorized user to be a physician who is:
 - a. Certified in:
 - i. Radiation oncology or therapeutic radiology by the American Board of Radiology or radiology (combined diagnostic and therapeutic radiology program) by the American Board of Radiology prior to 1976; or
 - ii. Radiation oncology by the American Osteopathic Board of Radiology; or
 - iii. Radiology, with specialization in radiotherapy, as a British "Fellow of the Faculty of Radiol-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- ogy” or “Fellow of the Royal College of Radiology”; or
- iv. Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or
- b. In the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic radiation techniques applicable to the use of an external beam radiation therapy unit, 500 hours of supervised work experience, and a minimum of three years of supervised clinical experience.
- 2. To satisfy the requirement in subsection (L)(1)(b) for:
 - a. Instruction, the classroom and laboratory training shall include:
 - i. Radiation physics and instrumentation;
 - ii. Radiation protection;
 - iii. Mathematics pertaining to the use and measurement of ionization radiation; and
 - iv. Radiation biology;
 - b. Supervised work experience, training shall be under the supervision of an authorized user and shall include:
 - i. Review of the full calibration measurements and periodic quality assurance checks;
 - ii. Evaluation of prepared treatment plans and calculation of treatment times or patient treatment settings or both;
 - iii. Using administrative controls to prevent medical events as described in R9-7-444;
 - iv. Implementing emergency procedures to be followed in the event of the abnormal operation of an external beam radiation therapy unit or console; and
 - v. Checking and using radiation survey meters; and
 - c. A period of supervised clinical experience, training shall include one year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional two years of clinical experience in therapeutic radiology under the supervision of an authorized user. The supervised clinical experience shall include:
 - i. Examining individuals and reviewing their case histories to determine their suitability for external beam radiation therapy treatment, and any limitations or contraindications or both;
 - ii. Selecting proper dose and how it is to be administered;
 - iii. Calculating the therapeutic radiation machine doses and collaborating with the authorized user in the review of patients’ progress and consideration of the need to modify originally prescribed doses or treatment plans as warranted by patients’ reaction to radiation or both; and
 - iv. Post-administration follow-up and review of case histories.
- 3. A physician shall not act as an authorized user until such time as the physician’s training has been reviewed and approved by the Department.
- 4. Notwithstanding the requirements of subsections (L)(1) through (L)(3), the registrant for any therapeutic radiation machine subject to this Section may also submit the training of the prospective authorized user physician for Department review on a case-by-case basis if the training includes substantially equivalent training as that listed in subsections (L)(1)(b) and (L)(2) and the training includes dosimetry calculation training and experience.
- M. Training for Qualified Medical Physicist. The registrant for any therapeutic radiation machine subject to this Section shall require the Qualified Medical Physicist to:
 - 1. Be certified with the Department, as a provider of radiation services in the area of calibration and compliance surveys of external beam radiation therapy units; and
 - 2. Be certified by the American Board of Radiology in:
 - a. Therapeutic radiological physics; or
 - b. Roentgen-ray and gamma-ray physics; or
 - c. X-ray and radium physics; or
 - d. Radiological physics; or
 - 3. Be certified by the American Board of Medical Physics in Radiation Oncology Physics; or
 - 4. Be certified by the Canadian College of Physicists in Medicine; or
 - 5. Hold a master’s or doctor’s degree in physics, medical physics, other physical science, engineering, or applied mathematics from an accredited college or university, and have completed one year of full-time training in medical physics and an additional year of full-time work experience under the supervision of a Qualified Medical Physicist at a medical institution. This training and work experience shall be conducted in clinical radiation facilities that provide high-energy external beam radiation therapy (photons and electrons with energies greater than or equal to one MV/one MeV). To meet this requirement, the individual shall have performed the tasks listed in this subsection under the supervision of a Qualified Medical Physicist during the year of work experience.
- N. Qualifications of Operators. Individuals who will be operating a therapeutic radiation machine for medical use shall be certified by the Department as a CTT by the Arizona Medical Radiologic Technology Board of Examiners.
- O. Additional training requirements.
 - 1. A registrant shall provide instruction, initially and at least annually, to all individuals who operate the electronic brachytherapy device, as appropriate to the individual’s assigned duties, in the operating procedures identified in subsection (G). If the interval between patients exceeds one year, retraining of the individuals shall be provided.
 - 2. In addition to the requirements of subsection (L) for therapeutic radiation machine authorized users and subsection (M) for Qualified Medical Physicists, these individuals shall also receive device-specific instruction initially from the manufacturer, and annually from either the manufacturer or other qualified trainer. The training shall be of a duration recommended by a recognized national professional association with expertise in electronic brachytherapy (when available). In the absence of any training protocol recommended by a national professional association, the manufacturer’s training protocol shall be followed. The training shall include, but not be limited to:
 - a. Device-specific radiation safety requirements;
 - b. Device operation;
 - c. Clinical use for the types of use approved by the FDA;
 - d. Emergency procedures, including an emergency drill; and
 - e. The registrant’s quality assurance program.
 - 3. A registrant shall retain a record of individuals receiving manufacturer’s instruction for three years. The record

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

shall include a list of the topics covered, the date of the instruction, the name or names of the attendee or attendees, and the name or names of the individual or individuals who provided the instruction.

P. Mobile Electronic Brachytherapy Service. A registrant providing mobile electronic brachytherapy service shall, at a minimum:

1. Check all survey instruments before medical use at each address of use or on each day of use, whichever is more restrictive;
2. Account for the electronic brachytherapy x-ray tube in the electronic brachytherapy device before departure from the client's address; and
3. Perform, at each location on each day of use, all of the required quality assurance checks specified in this Section to assure proper operation of the device.

Q. Medical events shall be reported to the Department. For purposes of this Section "medical event" means a therapeutic radiation dose from a machine:

1. Delivered to the wrong patient;
2. Delivered using the wrong mode of treatment;
3. Delivered to the wrong treatment site; or
4. Delivered in one week to the correct patient, using the correct mode, to the correct therapy site, but greater than 130 percent of the prescribed weekly dose; or

R. A therapeutic radiation dose from a machine with errors in the calibration, time of exposure, or treatment geometry that result in a calculated total treatment dose differing from the final, prescribed total treatment dose by more than 20 percent, except for treatments given in 1 to 3 fractions, in which case a difference of more than 10 percent constitutes a medical event.

S. Reports of therapy medical events:

1. Within 24 hours after discovery of a medical event, a registrant shall notify the Department by telephone by speaking to a Department staff member. The registrant shall also notify the referring physician of the affected patient and the patient or a responsible relative or guardian, unless the referring physician personally informs the registrant either that he or she will inform the patient, or that in his or her medical judgment, telling the patient or the patient's responsible relative or guardian would be harmful to one or the other, respectively. If the Department staff member, referring physician, or the patient's responsible relative or guardian cannot be reached within 24 hours, the registrant shall notify them as soon as practicable. The registrant shall not delay medical care for the patient because of notification problems.
2. Within 15 days following the verbal notification to the Department, the registrant shall report, in writing, to the Department and individuals notified under subsection (S)(1). The written report shall include the registrant's name, the referring physician's name, a brief description of the event, the effect on the patient, the action taken to prevent recurrence, whether the registrant informed the patient or the patient's responsible relative or guardian, and if not, why not. The report shall not include the patient's name or other information that could lead to identification of the patient.
3. Each registrant shall maintain records of all medical events for Department inspection. The records shall:
 - a. Contain the names of all individuals involved in the event, including:
 - i. The physician,
 - ii. The allied health personnel,
 - iii. The patient,
 - iv. The patient's referring physician,

- v. The patient's identification number if one has been assigned,
 - vi. A brief description of the event,
 - vii. The effect on the patient, and
 - viii. The action taken to prevent recurrence.
- b. Be maintained for three years beyond the termination date of the affected registration.

Amended by final expedited rulemaking at 24 A.A.R. 2151, effective July 12, 2018 (Supp. 18-3).

R9-7-611.02. Other Use of Electronically-Produced Radiation to Deliver Superficial Therapeutic Radiation Dosage

A person shall not utilize any device which is designed to electrically generate a source of ionizing radiation to deliver superficial therapeutic radiation dosage, and which is not appropriately regulated under any existing category of therapeutic radiation machine, until:

1. The applicant or registrant has, at a minimum, provided the Department with:
 - a. A detailed description of the device and its intended application or applications;
 - b. Facility design requirements, including shielding and access control;
 - c. Documentation of appropriate training for authorized user physician or physicians and qualified medical physicist or physicists;
 - d. Methodology for measurement of dosages to be administered to patients or human research subjects;
 - e. Documentation regarding calibration, maintenance, and repair of the device, as well as instruments and equipment necessary for radiation safety;
 - f. Radiation safety precautions and instructions; and
 - g. Other information requested by the Department in its review of the application; and
2. The applicant or registrant has received written approval from the Department to utilize the device in accordance with the regulations and specific conditions the Department considers necessary for the medical use of the device; and
3. The applicant or registrant has submitted the application information and forms required by Article 2.
4. In addition to the requirements of this Section, a registrant using a device for x-ray radiation therapy shall meet the requirements of R9-7-611.01(Q), (R), and (S).

Historical Note

New Section R9-7-611.02 recodified from R12-1-611.02 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-612. Computed Tomography Systems

A. Definitions:

1. "CT" means computed tomography.
2. "CT conditions of operation" means all selectable parameters governing the operation of a CT including nominal tomographic section thickness, and technique factors.
3. "CTDI" means computed tomography dose index, the integral of the dose profile along a line perpendicular to the tomographic plane divided by the product of the nominal tomographic thickness and the number of tomogram produced in a single scan.
4. "CTDI vol" means a value of a volume-weighted tomography dose index. The unit of the CTDI vol is Gray or subunits of the Gray. The value of the CTDI vol for

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

patient scan is used to trigger a notification when the value exceeds or will exceed a threshold value.

5. "CTN" means CT number, the number used to represent the x-ray attenuation associated with each elemental area of the CT image.
 6. "Dose profile" means the dose as a function of position along a line.
 7. "DLP" means the dose-length product. The DLP is the mathematical product of the CTDI vol and the length of the scan. The unit DLP is the Gray-cm of subunits of the Gray-cm. The DLP is used to trigger a notification when the value exceeds or will exceed a threshold value.
 8. "Elemental area" means the smallest area within a tomogram for which the x-ray attenuation properties of a body are depicted.
 9. "Multiple tomogram system" means a CT system that obtains x-ray transmissions data simultaneously during a single scan to produce more than one tomogram.
 10. "Nominal tomographic section thickness" means the full width at half-maximum of the sensitivity profile taken at the center of the cross section volume over which x-ray transmission data are collected.
 11. "Reference plane" means a plane that is displaced from and parallel to the tomographic plane.
 12. "Scan" means the complete process of collecting x-ray transmission data for the production of a tomogram. Data can be collected simultaneously during a single scan for the production of one or more tomograms.
- B. Facility:** A registrant shall ensure that a CT facility has:
1. An operable two-way communication system between the patient and the operator in each CT room.
 2. A viewing system that will allow the operator to continuously view the patient from the control panel during each examination. If the viewing system malfunctions the CT shall not be used until the viewing system is repaired.
- C. Equipment:** A registrant shall ensure that:
1. There is a means to terminate x-ray exposure automatically in the event of equipment failure by:
 - a. De-energizing the x-ray source, or
 - b. Shuttering the x-ray beam.
 2. The equipment shall provide the operator the ability to terminate the x-ray exposure at any time during the examination, provided the scan or series of scans is greater than one-half second duration.
 - a. If an operator terminates an x-ray exposure, the operator shall reset the CT conditions of operation before the initiation of another scan.
 - b. A visible signal shall indicate when an x-ray exposure has been terminated because of equipment failure.
 3. A means is provided to permit visual determination of the tomographic plane for a single tomogram system, or the location of a reference plane offset from a single tomograph or multiple tomogram system.
 - a. If a light source is used to satisfy this requirement, it shall provide illumination of the tomographic plane or reference plane under ambient light conditions.
 - b. The difference between the actual plane location and the indicated location of a tomographic plane or reference plane shall not exceed 5 millimeters.
 - c. The deviation of indicated scan increment versus actual increment shall not exceed plus or minus 1 millimeter with any mass from 0 to 100 kilograms resting on the patient support device.
 4. The control panel and gantry provides a visual indication, if x-rays are produced.
 5. Emergency buttons and switches are marked by function.
 6. Parameters of CT operation used during a patient examination are visible to the operator upon initiation of the scan. If an operational parameter is not adjustable by the operator, this subsection may be met by indicating on the control panel the parameter is not adjustable by the operator.
 7. Radiation exposure does not exceed 100 mR in one hour at one meter in any direction from the tube port of an operating CT.
 8. The angular position or positions where the maximum surface CTDI occurs is identified to allow for reproducible positioning of a CT dosimetry phantom, except in those cases where the x-ray tubes are designed to move, in which case, the maximum dose and associated tube position shall be evaluated according to manufacturer recommendations.
- D. Operating Procedures:** A registrant shall ensure that:
1. Operating procedures are available at the control panel, or by electronic means, regarding the operation of a CT and evaluation of a CT's operation.
 2. The operating procedures contain the following information:
 - a. A copy of the latest evaluation of the CT's operation, to include output for each CT procedure, performed by a qualified expert;
 - b. Instructions on the use of the CT performance phantom by the qualified expert, a schedule of quality control tests with the results of the most recent quality control test, and the allowable variations for the indicated parameters;
 - c. The distance in millimeters between the tomographic plane and the reference plane if a reference plane is used; and
 - d. A current technique chart that contains the information required in R9-7-607(D)(4)(a) for both adult and pediatric patients, as applicable, is available at the CT operating console, and a procedure for determining whether a CT has been performed according to instructions of a physician.
 - e. A written or electronic log that contains the information required in R9-7-607(D)(5) as well as an entry in the record of any displayed values for the exam from either a CTDI vol or DLP measurement for each patient exam completed on equipment manufactured on or after January 1, 2011.
 3. If the evaluation of the CT's operation or quality control test identifies a parameter exceeding the tolerance established by a qualified expert, the use of a CT for patient examination is limited to those uses established in written instructions from the qualified expert.
- E. Quality control tests:** A registrant shall have a written quality control test procedure, developed by a qualified expert, and ensure that the quality control test procedure:
1. Incorporates the use of a CT performance phantom that is compatible with an approved accreditation program approved by the Medicare Improvements for Patients and Providers Act (MIPPA) or supplied by or approved for use by the manufacturer of the unit.
 2. Is followed in the evaluation of the CT's operation, that the interval between tests does not exceed those set forth in the application for accreditation or quarterly if not accredited by an organization approved by (MIPPA), and that system conditions are specified by the registrant's qualified expert.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

3. Includes obtaining quality control test images with the CT performance phantom using the same processing mode and CT conditions of operation that are used to perform the evaluation of the CT's operation.
 4. Requires that images obtained under subsection (E)(3) be retained until a new evaluation of the CT's operation is performed.
 5. Requires that any Alerts and Notification settings using CTDI vol or DLP are reviewed against preloaded techniques in the system and any missing fields are reviewed with the staff radiologist and noted in the annual report.
 6. Requires the quality control test procedure and records of quality control tests performed be maintained for three years for Department inspection.
- F.** Evaluation of a CT's operation. A registrant shall ensure that:
1. The evaluation of a CT's operation is performed by, or under the direct supervision of, a qualified expert who is physically present at the facility during the evaluation of the CT's operation.
 2. The evaluation of a CT's operation:
 - a. Is performed before initial patient use and annually (within two months of the annual due date) and after any change or replacement of components that could, in the opinion of the qualified expert, cause a change in radiation output; and
 - b. Shall measure the CTDI in a dosimetry phantom along the two axes specified in subsection (F)(4)(b).
 - c. A complete evaluation of a CT unit, performed before the annual due date shall clearly list if the new survey changes the annual due date for the unit. It shall be clearly noted on all documentation for the next three years that the survey has established a new annual due date based upon the date of the new survey.
 3. The evaluation of a CT's x-ray system is performed with a calibrated dosimetry system that:
 - a. Has been calibrated using a method that is traceable to the National Institute of Standards and Technology (NIST), and
 - b. Has been calibrated within the preceding two years.
 4. CT dosimetry phantoms used in determining radiation output are compatible with an approved accreditation program approved by (MIPPA) or supplied by or approved for use by the manufacturer of the unit; and
 - a. Are constructed in a way that the parameters used to image the most commonly imaged parts of the human body are evaluated; and
 - b. At a minimum, provide means for placement of a dosimeter along the axis of rotation and along a line parallel to the axis of rotation 1.0 centimeter from the outer surface and within the phantom.
 5. Any effects on the measured dose due to the removal of phantom material to accommodate the dosimeter are accounted for in the reported data or included in the statement of maximum deviation for the measured values.
- G.** CT units designated for simulator use, veterinary use, dental use, podiatry use, and non-diagnostic use on humans are exempt from the annual requirements in subsections (E) and (F) provided an initial evaluation is conducted by a qualified expert and the output does not exceed the manufacturers specified limits. The initial evaluation shall be maintained for Department review.

R9-7-613. Veterinary Medicine Radiographic Systems

- A.** Equipment. A registrant shall ensure that:
1. The total filtration permanently in the useful beam is not less than 1.5 millimeters aluminum-equivalent for equipment operating at up to 70 kVp and 2.0 millimeters aluminum-equivalent for equipment operating in excess of 70 kVp;
 2. A device is provided to terminate the exposure after a preset time or exposure;
 3. Each radiographic system has a "dead-man" exposure switch with an electrical cord of sufficient length to allow the operator to stand at least 1.82 meters (six feet) away from the useful beam during x-ray exposures.
- B.** Procedures: A registrant shall ensure that:
1. Unless required to restrain an animal, the operator stands at least 1.82 meters (6 feet) away from the useful beam and the animal during a radiographic exposure;
 2. An individual other than the operator is not in the x-ray room or area while an exposure is being made, unless the individual's assistance is required;
 3. If possible, an animal is held in position during an x-ray exposure using mechanical supporting or restraining devices;
 4. An individual holding an animal during an x-ray exposure is:
 - a. Wearing protective gloves and an apron of not less than 0.5 millimeter lead equivalent or positioned behind a whole-body protective barrier;
 - b. Wearing required personnel monitoring devices; and
 - c. Positioned so that no part of the person's body, except hands and arms, will be struck by the useful beam;
 5. If an individual holds or supports an animal or a film during an x-ray exposure, the name of the individual is recorded in an x-ray log that contains the animal's name, the type of x-ray procedure, the number of exposures, and the date of the procedure; and
 6. As a condition of employment an individual is not required to routinely hold or support animals, or hold film during radiation exposures.

R9-7-614. Mammography Systems

- A.** Equipment. A registrant shall ensure that:
1. Only radiation machines specifically designed for mammographic examinations are used;
 2. The film processor used in the registrant's facility is maintained in accordance with the film processor's and film manufacturer's recommendations;
 3. Each facility has an image development system onsite unless the Department has approved an alternate system;
 4. If used with screen-film image receptors, and the contribution to filtration made by the compression device is included, the useful beam has a half-value layer between the values of: "measured kVp/100 and measured kVp/100 + L millimeters" of aluminum equivalent, where L = 0.12 for Mo/Mo, L = 0.19 for Mo/Rh, L = 0.22 for Rh/Rh, L = 0.30 for W/Rh target filtration combinations and L =

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- 0.33 for other target filtration combinations not otherwise specified.
5. The combination of focal spot size, source-to-image distance and magnification produces a radiograph with a resolution of at least 12 line pairs per millimeter at an object-to-image receptor distance of 4.5 centimeters; or the standards in Table 3-3 of the American Association of Physicists in Medicine (AAPM), Report No. 29, Equipment Requirements and Quality Control for Mammography, August 1990, published by the American Institute of Physics, Suite 1N01, 2 Huntington Quadrangle, Melville, NY 11747 (This report is incorporated by reference and available under R9-7-101.  6. The compression device used with the mammographic unit, unless specifically manufactured otherwise, is parallel to the imaging plane, not varying at any spot by more than 1 centimeter;
 7. The mammographic x-ray system with initial power drive:
 - a. Has compression paddles compatible with each size of image receptor;
 - b. Is capable of compressing the breast with a force of at least 25 pounds, but not more than 45 pounds, and maintaining the compression for at least three seconds; and
 - c. Is used in a manner so that the chest wall edge of the compression device is aligned just beyond the chest wall edge of the image receptor so that the chest wall edge of the compression device does not appear on the image receptor;
 8. A mammographic x-ray system using screen-film image receptors has:
 - a. At least two different sizes of moving anti-scatter grids, including one for each size of image receptor utilized; and
 - b. Automatic exposure control;
 9. All mammographic x-ray systems indicate or provide a means of determining, the mAs resulting from each exposure made with automatic exposure control;
 10. The collimation provided limits the useful beam to the image receptor so that the beam does not extend beyond any edge of the image receptor at any designated source to image receptor distance by more than 2 percent of the source to image receptor distance;
 11. The accuracy of the indicated kVp is within plus or minus 2kVp;
 12. Mammographic x-ray systems operating with automatic exposure control are capable of maintaining a film density within plus or minus 0.15 optical density units over the clinical range of kVp used, for a breast having an equivalent phantom thickness from 2 to 6 centimeters. If a technique chart is used, the operator shall maintain the film density within plus or minus 0.15 optical density units of the mean optical density;
 13. At a kVp of 28, the mammographic x-ray system is capable of generating at least 2.0 $\mu\text{C/kg/mAs}$ (8mR/mAs) and at least 200 $\mu\text{C/kg/second}$ (800 mR/second), measured at a point 4.5 centimeters above the surface of the patient support device when the Source-image receptor distance is at its maximum;
 14. Screens are not used for mammography if one or more areas of greater than 1 centimeter squared of poor screen-film contact are seen when tested, using a 40 mesh screen test;
 15. Mammographic image quality meets the minimum mammography film standards for phantom performance in Mammography Quality Control Manual, 1999 edition, published by the American College of Radiology (ACR). (This manual is incorporated by reference and available under R9-7-101. The incorporated material contains no future editions or amendments. The manual is available from ACR Publication Sales, P.O. Box 533, Annapolis Junction, MD 20701; toll free at (800) 227-7762; e-mail at: acr@brightkey.net).
 16. The mean glandular dose for one cranio-caudal view of a 4.2 centimeter (1.8 inch) compressed breast, composed of 50 percent adipose and 50 percent glandular tissue, does not exceed 300 millirads (3 milligray); and
 17. A radiologic physicist who meets the requirements in R9-7-615(A)(1)(c) evaluates the operation of a mammographic x-ray system:
 - a. When first installed and annually thereafter,
 - b. Following any major change in equipment or replacement of parts, and
 - c. When quality assurance tests indicate calibration is necessary.
- B. Operating Procedures.** A registrant shall ensure that:
1. Each mammographic facility has a quality assurance program, and that the quality assurance program includes performance and documentation of the quality control tests in subsection (B)(2), conducted at the required time intervals. Test results shall fall within the specified limits in subsection (B)(2) or the registrant shall take corrective action and maintain documentation that the results are within specified limits before performing or processing any further examinations using the system that failed. A radiologic physicist, as defined in R9-7-615(A)(1)(c), shall review the program and make any recommendations necessary for the facility to comply with this Section;
 2. The quality assurance program meets federal requirements (Contained in 21 CFR 900.12(d)(1), and (e)(1) through (e)(10), revised April 1, 2013, incorporated by reference and available under R9-7-101. This incorporated material contains no future editions or amendments.); or the following requirements:
 - a. Daily sensitometric and densitometric evaluation of the image processing system demonstrates that Base + Fog < +0.03 optical density of operating level, Mid Density \pm 0.15 optical density of operating level, and Density Difference \pm 0.15 optical density of operating level;
 - b. Weekly phantom image quality evaluations demonstrate the visualization of at least four fibers, three speck groups, and three masses with a background of greater than 1.40 optical density, not varying by 0.20 optical density of operating level;
 - c. Monthly technique chart evaluations demonstrate updates for all equipment changes and that all examinations are being performed according to a physicist's density control recommendation;
 - d. Quarterly fixer retention evaluations demonstrate an acceptable limit of less than or equal to 5.0 micrograms per square centimeter;
 - e. Quarterly repeat analysis demonstrates an acceptable limit of less than 2 percent increase in repeats;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- f. Semiannual darkroom fog evaluations meet the limit of less than or equal to 0.05 optical density of fog, using the two minute exposed film method;
- g. Semiannual screen film contact evaluations meet the limit of less than one area of poor contact of 1 centimeter squared, using a 40 mesh screen on all clinically-used screens;
- h. Semiannual automatic compression force evaluations meet the limit of greater than or equal to 25 pounds (111 Newtons) and less than 45 pounds (200 Newtons);
- i. A survey shall be conducted annually and whenever indicated for installation, major repairs, parts replacement, or as deemed necessary by a qualified expert when quality control test results indicate a survey is necessary; the survey shall include all of the following tests:
 - i. Automatic exposure control performance and thickness response;
 - ii. Accuracy and reproducibility of kVp;
 - iii. System resolution;
 - iv. Breast entrance air kerma and automatic exposure control reproducibility;
 - v. Average glandular dose;
 - vi. X-ray field, light field, and image receptor alignment;
 - vii. Compression paddle alignment;
 - viii. Uniformity of screen speed;
 - ix. System artifacts;
 - x. Radiation output;
 - xi. Decompression;
 - xii. Beam quality and half value layer;
- j. For systems with image receptor modalities other than screen film:
 - i. The quality assurance and quality control program for the acquisition system meets or exceeds the recommendations by the manufacturer;
 - ii. The quality assurance and quality control program for the printer meets or exceeds the recommendations by the image receptor manufacturer. In the absence of recommendations by the image receptor manufacturer for the specified printer, the quality control and assurance program meets or exceeds the recommendations of the printer manufacturer; and
 - iii. The quality assurance and quality control program for the interpretation monitors meets or exceeds the recommendations by the image receptor manufacturer. In the absence of recommendations by the image receptor manufacturer for the specified monitor or monitors, the quality control and assurance program meets or exceeds the recommendations of the interpretation monitor or monitors manufacturer; and
- k. The registrant maintains records documenting compliance with the provisions in this subsection for three years from the date each requirement is met. The records shall be made available for Department inspection.

C. Mammographic films and reports.

- 1. A registrant shall maintain films and reports for a minimum of five years. In those cases where no subsequent mammographic procedures are performed, the registrant shall maintain films and associated reports for 10 years. If the mammographic facility is closed, the registrant shall

make arrangements for storage of the films and associated reports for five years after the closure; and

- 2. A registrant shall make films and reports available for comparison upon request for temporary or permanent transfer to other mammographic facilities.

R9-7-615. Mammography Personnel**A. Personnel.**

- 1. Each registrant shall require personnel who perform mammography, which includes the production, processing, and interpretation of mammograms and related quality assurance activities, to meet the following requirements:
 - a. An interpreting physician shall meet federal requirements (Contained in 21 CFR 900.12(a)(1), revised April 1, 2013, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.); or
 - i. Be licensed under A.R.S. Title 32, Chapters 13 or 17;
 - ii. Have initially completed 40 hours of medical education credits in mammography;
 - iii. Be certified by the American Board of Radiology or the American Osteopathic Board of Radiology or meet the requirements of the mammography quality standards act regulations for quality standards of interpreting physicians;
 - iv. Have interpreted or reviewed an average of 300 mammograms per year during the preceding two years or have completed a radiology residency that included mammogram image interpretation in the preceding two years;
 - v. Have completed 15 hours of continuing medical education credits in mammography during the preceding three years; and
 - vi. Have received at least eight hours of training specific to each mammographic modality before engaging in independent interpretation.
 - b. A mammographic technologist shall meet federal requirements (Contained in 21 CFR 900.12(a)(2), revised April 1, 2013, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.); or
 - i. Possess a valid mammographic technologist certificate issued by the Medical Radiologic Technology Board of Examiners, as required in A.R.S. § 32-2841, or be pursuing mammography certification by training under the direct supervision of a technologist who possesses a valid mammographic technologist certificate;
 - ii. Have performed at least 200 mammographic examinations in the preceding two years;
 - iii. Have completed 15 hours of continuing medical education credits in mammography during the preceding three years; and
 - iv. Have received at least eight hours of training specific to each mammographic modality to be used by the technologist in performing mammographic examinations.
 - c. A radiologic physicist shall meet federal requirements (Contained in 21 CFR 900.12(a)(3), revised

- i. Be certified by the American Board of Radiology, American Board of Medical Physics, or the American Board of Health Physics;
- ii. Possess documentation of state approval;
- iii. Hold a master's degree or higher in a physical science;
- iv. Have, upon initial employment as a radiologic physicist, experience conducting, at least one mammographic facility survey and evaluating at least 10 mammographic units;
- v. Have, after completing the experience requirements in subsection (A)(1)(c)(iv), continuing experience surveying two mammographic facilities and evaluating six mammographic units during the preceding two years;
- vi. Have completed 15 hours of continuing medical education credits in mammography during the three preceding years; or
- vii. Have received at least eight hours of training specific to any modality surveyed; and

2. Each registrant shall maintain records documenting the requirements in subsection (A)(1) for three years from the date the requirement is met and make the records available for Department inspection.

- B. Radiologic physicists shall apply for and renew their certification on Department-approved forms. In addition to the Department-approved forms, applicants must also submit documentation showing education, mammography specific training, education, and board certification. Upon renewal, an applicant must submit documentation showing current continuing education requirements are met.

Appendix A. Information Submitted to the Department According to R9-7-604(A)(3)(c)

- A. Name and address of the applicant and, if applicable, the name and address of any person within this state that is authorized to act on behalf of the applicant;
- B. Disease or conditions to be diagnosed using the proposed x-ray examination;
- C. A detailed description of each x-ray examination that will be used in the diagnosis;
- D. A description of the population to be examined in the screening program, using characteristics such as age, sex, physical condition, and other descriptive information;
- E. An evaluation of any known alternative diagnostic modalities not involving ionizing radiation that could achieve the same diagnosis as a screening program and why these modalities have not been chosen;
- F. An evaluation by a qualified expert of the x-ray equipment used in the screening program, which demonstrates that the x-ray equipment satisfies the requirements of this Article;
- G. A description of the quality control program;
- H. A copy of the technique chart for the planned x-ray examination;
- I. The qualifications of each individual who will be operating the x-ray equipment;
- J. The qualifications of the individual who will be supervising each operator of the x-ray equipment;
- K. The name and address of the individual who will interpret each radiographic image;

- L. A description of the planned procedures for advising a screened individual and the screened individual's physician of the screening procedure results, and the need for further medical care, and
- M. A description of the procedures for retention or disposition of the radiographic images and other records pertaining to the x-ray examination.

ARTICLE 7. MEDICAL USES OF RADIOACTIVE MATERIAL**R9-7-701. License Required**

- A. A person may manufacture, produce, acquire, receive, possess, prepare, use, or transfer radioactive material for medical use only in accordance with a specific license issued by the Department, the NRC, or another Agreement State, or as allowed in subsection (B)(1) or (B)(2).
- B. A specific license is not needed for an individual who:
 1. Receives, possesses, uses, or transfers radioactive material in accordance with the rules in this Chapter under the supervision of an authorized user as provided in R9-7-706, unless prohibited by license condition; or
 2. Prepares unsealed radioactive material for medical use in accordance with the rules in this Chapter under the supervision of an authorized nuclear pharmacist or authorized user.

R9-7-702. Definitions

"Authorized medical physicist" means an individual who meets the requirements in R9-7-711. For purposes of ensuring that personnel are adequately trained, an authorized medical physicist is a "qualified expert" as defined in Article 1.

"Authorized nuclear pharmacist" means a pharmacist who meets the requirements in R9-7-712.

"Authorized user" means a physician, dentist, or podiatrist who meets the requirements in R9-7-719, R9-7-721, R9-7-723, R9-7-727, R9-7-728, or R9-7-744.

"Brachytherapy" means a method of radiation therapy in which a sealed source or group of sealed sources is utilized to deliver beta or gamma radiation at a distance of up to a few centimeters, by surface, intracavitary, intraluminal, or interstitial application.

"CT" means computerized tomography.

"High dose rate afterloading brachytherapy" means the treating of human disease using the radiation from a radioactive sealed source containing more than 1 curie of radioactive material. The radioactive material is introduced into a patient's body using a device that allows the therapist to indirectly handle the radiation source during the treatment. For purposes of the requirements in this Article "pulse dose rate afterloading brachytherapy" is included in this definition.

"Human research subject" means an individual who is or becomes a participant in research overseen by an IRB, either as a recipient of the test article or as a control. A subject may be either a healthy human, in research overseen by the RDRC, or a patient.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Institutional review board” (IRB) is defined in R9-7-704(B).

“Manual brachytherapy” means a type of brachytherapy in which the brachytherapy sources (e.g., seeds, ribbons) are manually placed topically on or inserted either into the body cavities that are in close proximity to a treatment site or directly into the tissue volume.

“Medical event” means an event that meets the criteria in R9-7-745.

“Medical institution” means an organization in which several medical disciplines are practiced.

“Medical use” means the intentional internal or external administration of radioactive material, or the radiation from it, to an individual under the supervision of an authorized user.

“Nuclear cardiology” means the diagnosis of cardiac disease using radiopharmaceuticals.

“PET” means positron emission tomography.

“Physically present” means that a supervising medical professional is in proximity to the patient during a radiation therapy procedure so that immediate emergency orders can be communicated to ancillary staff, should the occasion arise.

“Prescribed dosage” means the specified activity or range of activity of unsealed radioactive material as documented:

In a written directive; or

In accordance with the directions of the authorized user for procedures performed in accordance with the uses described in Exhibit A.

“Prescribed dose” means:

For gamma stereotactic radiosurgery, the total dose as documented in the written directive;

For teletherapy, the total dose and dose per fraction as documented in the written directive;

For manual brachytherapy, either the total source strength and exposure time or the total dose, as documented in the written directive; or

For remote brachytherapy afterloaders, the total dose and dose per fraction as documented in the written directive.

“Radiation Safety Officer” (RSO) for purposes of this Article, and in addition to the definition in Article 1 means an individual who:

Meets the requirements in R9-7-710, or

Is identified as a radiation safety officer on:

A specific medical use license issued by the NRC or Agreement State; or

A medical use permit issued by a NRC master material license.

“Radioactive drug” is defined in 21 CFR 310.3(c) and includes a “radioactive biological product” as defined in 21 CFR 600.3, April 1, 2006, both of which are incorporated by reference, published by the Office of Federal Register, National Archives and Records Administration, Washington, DC 20408, and on file with the Department. These incorporated materials contain no future editions or amendments.

“Radioactive Drug Research Committee” (RDRC) means the committee established by the licensee to review all basic research involving the administration of a radioactive drug to

human research subjects, taken from 21 CFR 361.1, April 1, 2006, which is incorporated by reference, published by the Office of Federal Register, National Archives and Records Administration, Washington, DC 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments. Research is considered basic research if it is done for the purpose of advancing scientific knowledge, which includes basic information regarding the metabolism (including kinetics, distributions, dosimetry, and localization) of a radioactive drug or regarding human physiology, pathophysiology, or biochemistry. Basic research is not intended for immediate therapeutic or diagnostic purposes and is not intended to determine the safety and effectiveness of a radioactive drug in humans.

“Radiopharmaceutical” means any drug that exhibits spontaneous disintegration of unstable nuclei with the emission of nuclear particles or photons and includes any nonradioactive reagent kit or nuclide generator that is intended to be used in the preparation of any such substance. For purposes of this Article radiopharmaceutical is equivalent to radioactive drug.

“Remote afterloading brachytherapy device” means a device used in radiation therapy that allows the authorized user to insert, from a remote location, a radiation source into an applicator that has been previously inserted in an individual requiring treatment.

“Sealed Source and Device Registry” means the national registry that contains all the registration certificates, generated by both NRC and the Agreement States, that summarize the radiation safety information for the sealed sources and devices and describe the licensing and use conditions approved for the product.

“Stereotactic radiosurgery” means the use of external radiation in conjunction with a stereotactic guidance device to very precisely deliver a dose.

“Teletherapy” means therapeutic irradiation in which the sealed source of radiation is at a distance from the body.

“Therapeutic dosage” means a dosage of unsealed radioactive material that is intended to deliver a radiation dose to a patient or human research subject for palliative or curative treatment.

“Therapeutic dose” means a radiation dose delivered from a source containing radioactive material to a patient or human research subject for palliative or curative treatment.

“Treatment site” means the anatomical description of the tissue intended to receive a radiation dose, as described in a written directive.

“Unit dosage” means a dosage prepared for medical use for administration as a single dosage to a patient or human research subject without any further manipulation of the dosage after it is initially prepared.

“Written directive” means an authorized user’s written order for the administration of radioactive material or radiation from radioactive material to a specific patient or human research subject, as specified in R9-7-707.

R9-7-703. License for Medical Use of Radioactive Material

A. In addition to the requirements set forth in R9-7-309, the Department shall issue a specific license for medical use of radioactive material if:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. The applicant has appointed a radiation safety committee, meeting the requirements in R9-7-705, that will oversee the use of licensed material throughout the licensee's facility and associated radiation safety program;
 2. The applicant possesses facilities for the clinical care of patients or human research subjects; and
 3. The individual designated on the application as an authorized user has met the training and experience requirements in R9-7-719, R9-7-721, R9-7-723, R9-7-727, R9-7-728, or R9-7-744.
- B. Specific licenses to individual authorized users for medical use of radioactive material:**
1. The Department shall approve an application by a prospective individual authorized user or prospective group of authorized users for a specific license governing the medical use of radioactive material if:
 - a. The applicant satisfies the general requirements in R9-7-309;
 - b. The application is for use in the applicant's practice at an office outside of a medical institution;
 - c. The applicant meets the training and experience requirements in subsection (A)(3); and
 - d. The applicant has a radiation safety committee, if the criteria in R9-7-705 are applicable and a RDRC, if the use is basic research involving humans.
 2. The Department shall not approve an application by a prospective authorized user or group of prospective authorized users for a specific license to receive, possess, or use radioactive material on the premises of a medical institution unless:
 - a. The use of radioactive material is limited to:
 - i. The administration of radiopharmaceuticals for diagnostic or therapeutic purposes;
 - ii. The performance of diagnostic studies on patients or human research subjects to whom a radiopharmaceutical has been administered;
 - iii. The performance of in vitro diagnostic studies; or
 - iv. The calibration and quality control checks of radioactive assay instrumentation, radiation safety instrumentation, or diagnostic instrumentation;
 - b. The authorized user brings the radioactive material and removes the radioactive material upon departure; and
 - c. The medical institution does not hold a radioactive materials license under subsection (A).
- C. Specific licenses for certain groups of medical uses of radioactive material:**
1. The Department shall approve an application for a specific license under subsections (A) or (B), for any medical use or uses of radioactive material specified in Groups 100 through 1,000, in Exhibit A of this Article, for all of the materials within each group requested in the application if:
 - a. The applicant satisfies the requirements of subsections (A) and (B);
 - b. Each person involved in the preparation and use of the radioactive material is an authorized user, an authorized nuclear pharmacist, or certified as a nuclear medicine technologist by the Medical Radiologic Technology Board of Examiners (MRTBE);
 - c. The applicant's radiation detection and measuring instrumentation is adequate for conducting the procedures involved in the authorized uses selected from Group 100 through Group 1,000; and
 - d. The applicant's radiation safety operating procedures are adequate for handling and disposal of the radioactive material involved in the authorized uses selected from Group 100 through Group 1,000.
 2. Any licensee who is authorized to use radioactive material:
 - a. In unsealed form under Groups 100, 200, 300 or 1,000 listed in Exhibit A of this Article, shall do so using radiopharmaceuticals prepared in accordance with R9-7-311(I); or
 - b. In sealed source form under Groups 400, 500, 600, or 1,000 listed in Exhibit A of this Article, shall do so using sealed sources that have been manufactured and distributed in accordance with R9-7-311(K);
 - c. In any form under group 1,000 listed in Exhibit A of this Article, shall do so using sealed and unsealed sources that have been manufactured and distributed in accordance with the specific license issued by the Department.
 3. Any licensee who is licensed according to subsection (C)(1), for one or more of the medical use groups in Exhibit A also is authorized to use radioactive material under the general license in R9-7-306(E) for the specified in vitro uses without filing Form ARRA-9 as required by R9-7-306(E)(2); provided, that the licensee is subject to the other provisions of R9-7-306(E).
- D. In addition to the other license application requirements in this Section, each applicant shall include in the radiation safety program required under subsection (A)(1) a system for ensuring that each syringe and vial that contains unsealed radioactive material is labeled in accordance with R9-7-431(D).**

R9-7-704. Provisions for the Protection of Human Research Subjects

- A.** A licensee may conduct basic research involving human research subjects and research involving patients receiving investigational new drugs or devices if the licensee only uses the radioactive material specified on the license for the uses authorized on the license.
- B.** If research is conducted, funded, supported, or regulated by a federal agency that has implemented the federal Policy for Protection of Human Research Subjects (45 CFR 46, June 23, 2005, which is incorporated by reference, published by the Office of Federal Register, National Archives and Records Administration, Washington, DC 20408, on file with the Department, and contains no future editions or amendments), the licensee shall:
1. Obtain review and approval of the research from an Institutional Review Board (IRB); and
 2. Obtain informed consent from the human research subject.
- C.** If research will not be conducted, funded, supported, or regulated by a federal agency that has implemented the federal policy in subsection (B), a medical licensee shall, before conducting research, apply for and receive a specific amendment to its use license. The amendment request shall include a written commitment that the licensee will, before conducting research:
1. Obtain review and approval of the research from an IRB, as defined and described in the federal policy; and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. Obtain informed consent from the human research subject.
- D. Before conducting the research described in subsection (A) the licensee shall apply to the Department for and receive a specific amendment to its medical use license. The amendment request shall include a written commitment that the licensee will, before conducting research:
 1. Obtain any review and approval required by this Section, and
 2. Obtain informed consent from the human research subject if applicable.
- E. Nothing in this Section relieves a licensee from complying with the other requirements in this Article.

R9-7-705. Authority and Responsibilities for the Radiation Protection Program

- A. A licensee's management shall appoint in writing a Radiation Safety Officer, who agrees, in writing, to be responsible for implementing the radiation protection program. The licensee, through the Radiation Safety Officer, shall ensure that radiation safety activities are being performed in accordance with licensee-approved procedures and regulatory requirements. A licensee's management may appoint, in writing, one or more Associate Radiation Safety Officers to support the Radiation Safety Officer. The Radiation Safety Officer, with written agreement of the licensee's management, must assign the specific duties and tasks to each Associate Radiation Safety Officer. These duties and tasks are restricted to the types of use for which the Associate Radiation Safety Officer is listed on a license. The Radiation Safety Officer may delegate duties and tasks to the Associate Radiation Safety Officer but shall not delegate the authority or responsibilities for implementing the radiation protection program. Each time the Radiation Safety Officer is changed, the licensee shall provide to the Department within 30 days an amendment request and a copy of the correspondence between the licensee's management and the candidate, accepting the position of Radiation Safety Officer.
- B. Licensees that are authorized for two or more different types of uses of radioactive material listed in Groups 300, 400, 600, and 1,000, or two or more types of units under group 600 or 1,000, shall establish a Radiation Safety Committee (RSC) to oversee all uses of radioactive material permitted by the license. At a minimum, the RSC shall include an authorized user of each type of use permitted by the license, the Radiation Safety Officer, a representative of the nursing service, and a representative of management who is neither an authorized user nor a Radiation Safety Officer.
- C. If a licensee or applicant is not a health care institution and is unable to meet the RSC membership requirements in subsection (B), the licensee or applicant may request an exemption in accordance with A.R.S. § 30-654(B)(13). The request for exemption shall be made to the Department in writing and list the reasons why the health care institution is unable to meet the requirements.
- D. A licensee shall ensure that the RSC meets, at a minimum, on an annual basis and maintain the RSC meeting minutes for Department review for three years after the date of the RSC meeting.
- E. A licensee shall notify the Department no later than 30 days after:
 1. An authorized user, an authorized nuclear pharmacist, a Radiation Safety Officer, an Associate Radiation Safety Officer, an authorized medical physicist, or ophthalmic

physicist permanently discontinues performance of duties under the license or has a name change;

2. The licensee permits an individual qualified to be a Radiation Safety Officer under R9-7-710 to function as a temporary Radiation Safety Officer and to perform the functions of a Radiation Safety Officer;
3. The licensee's mailing address changes;
4. The licensee's name changes, but the name change does not constitute a transfer of control of the license as described in R9-7-313(B);
5. The licensee has added to or changed the areas of use identified in the application or on the license where byproduct material is used in accordance with R9-7-301, if the change does not include addition or relocation of either an area where PET radionuclides are produced or a PET radioactive drug delivery line from the PET radionuclide/PET radioactive drug production area; or
6. The licensee obtains a sealed source for use in manual brachytherapy from a different manufacturer or with a different model number than authorized by its license for which it did not require a license amendment as provided in R9-7-701. The notification must include the manufacturer and model number of the sealed source, the isotope, and the quantity per sealed source.

R9-7-706. Supervision

- A. For purposes of this rule, "supervision" means the exercise of control over or direction of the use of radioactive material in the practice of medicine by an authorized user named on a radioactive material license. Supervision does not require a supervising physician's constant physical presence if the supervising physician can be easily contacted by radio, telephone, or telecommunication.
- B. A physician may use radioactive material if the person is licensed by the Arizona Medical Board or Board of Osteopathic Examiners in Medicine and Surgery and is listed as an authorized user on the Arizona radioactive material license under which the radioactive material is obtained.
- C. A licensee that permits the receipt, possession, use, or transfer of radioactive material by an individual under the supervision of an authorized user, shall:
 1. Instruct the supervised individual in the licensee's written radiation protection procedures, written directive procedures, rules, and license conditions with respect to the use of radioactive material; and
 2. Require the supervised individual to follow the instructions of the supervising authorized user for medical uses of radioactive material, written radiation protection procedures established by the licensee, written directive procedures, rules, and license conditions with respect to the medical use of radioactive material.
- D. A licensee that permits the preparation of radioactive material for medical use by an individual who is supervised by an authorized nuclear pharmacist or a physician, who is an authorized user, shall:
 1. Instruct the supervised individual in the preparation of radioactive material for medical use, as appropriate to that individual's involvement with radioactive material; and
 2. Require the supervised individual to follow the instructions of the supervising authorized user or authorized

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

nuclear pharmacist regarding the preparation of radioactive material for medical use, written radiation protection procedures established by the licensee, the rules, and license conditions.

- E. A licensee that permits supervised activities under subsections (C) and (D) is responsible for the acts and omissions of the supervised individual.
- F. A limited-service nuclear pharmacy licensee shall dispense radiopharmaceuticals only to a physician listed as an authorized user on a valid radioactive material license issued by the Department, an Agreement State, or the NRC. For purposes of this rule "limited-service nuclear pharmacy" is defined in R4-23-110.

R9-7-707. Written Directives

- A. A licensee shall ensure that a written directive is dated and signed by an authorized user before the administration of I-131 sodium iodide greater than 1.11 MBq (30 microcuries (μCi)), any therapeutic dosage of unsealed radioactive material or any therapeutic dose of radiation from radioactive material. If, because of the emergent nature of the patient's condition, a delay in order to provide a written directive would jeopardize the patient's health, an oral directive is acceptable. The information contained in the oral directive shall be documented as soon as possible in writing in the patient's record. A written directive shall be prepared within 48 hours of the oral directive.
- B. A written directive shall contain the patient or human research subject's name and the following information:
 - 1. For any administration of quantities greater than 1.11 MBq (30 μCi) of sodium iodide I-131: the dosage;
 - 2. For an administration of a therapeutic dosage of unsealed radioactive material other than sodium iodide I-131: the radiopharmaceutical, dosage, and route of administration;
 - 3. For gamma stereotactic radiosurgery: the total dose, treatment site, and values for the target coordinate settings per treatment for each anatomically distinct treatment site;
 - 4. For teletherapy: the total dose, dose per fraction, number of fractions, and treatment site;
 - 5. For high dose-rate remote afterloading brachytherapy: the radionuclide, treatment site, dose per fraction, number of fractions, and total dose;
 - 6. For permanent implant brachytherapy:
 - a. Before implantation: the treatment site, radionuclide, and total strength; and
 - b. After implantation but before the patient leaves the post-treatment recovery area: the treatment site, number of sources implanted, total source strength implanted, and date; or
 - 7. For all other brachytherapy, including low, medium, and pulsed dose rate remote afterloaders:
 - a. Before implantation: the treatment site, radionuclide, and dose; and
 - b. After implantation but before completion of the procedure: the radionuclide, treatment site, number of sources, total source strength and exposure time (or the total dose), and date.
- C. The licensee shall retain a copy of the written directive for three years after creation of the record.

R9-7-708. Procedures for Administrations Requiring a Written Directive

For any administration requiring a written directive, the licensee shall develop, implement, and maintain written procedures to provide high confidence that:

1. The patient's or human research subject's identity is verified before each administration; and
2. Each administration is in accordance with the written directive.

R9-7-709. Sealed Sources or Devices for Medical Use

A licensee may only use:

1. Sealed sources, including teletherapy sources, or devices manufactured, labeled, packaged, and distributed in accordance with a license issued under Article 3 of this Chapter, equivalent regulations of the NRC or equivalent requirements of an Agreement State; or
2. Sealed sources or devices noncommercially transferred from another medical licensee; or
3. Teletherapy sources manufactured and distributed in accordance with a license issued by the Department, the NRC, or another Agreement State.

R9-7-710. Radiation Safety Officer and Associate Radiation Safety Officer Training

- A. A licensee shall require an individual fulfilling the responsibilities of the Radiation Safety Officer, described in R9-7-705, to be an individual who:
 1. Is certified by a specialty board whose certification process includes all of the requirements in subsection (A)(2)(a) and (B) and whose certification has been recognized by the Department, the NRC, or an Agreement State. To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Meet the following minimum requirements:
 - i. Hold a bachelor's or graduate degree from an accredited college or university in physical science or engineering or biological science with a minimum of 20 college credits in physical science;
 - ii. Have five or more years of professional experience in health physics (graduate training may be substituted for no more than two years of the required experience) including at least three years in applied health physics; and
 - iii. Pass an examination administered by diplomates of the specialty board, which evaluates knowledge and competence in radiation physics and instrumentation, radiation protection, mathematics pertaining to the use and measurement of radioactivity, radiation biology, and radiation dosimetry; or
 - b. Meet the following minimum requirements:
 - i. Hold a master's or doctor's degree in physics, medical physics, other physical science, engi-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- neering, or applied mathematics from an accredited college or university;
- ii. Have two years of full-time practical training and/or supervised experience in medical physics;
 - (1) Under the supervision of a medical physicist who is certified in medical physics by a specialty board recognized by the Department, the NRC, or another Agreement State; or
 - (2) In clinical nuclear medicine facilities providing diagnostic and/or therapeutic services under the direction of physicians who meet the requirements for authorized users qualified under subsection (B), R9-7-721, or R9-7-723; and
 - iii. Pass an examination, administered by diplomates of the specialty board, that assesses knowledge and competence in clinical diagnostic radiological or nuclear medicine physics and in radiation safety;
2. Has:
 - a. Completed a structured educational program consisting of both:
 - i. 200 hours of didactic and laboratory training in the following areas:
 - (1) Radiation physics and instrumentation;
 - (2) Radiation protection;
 - (3) Mathematics pertaining to the use and measurement of radioactivity;
 - (4) Radiation biology; and
 - (5) Radiation dosimetry; and
 - ii. One year of full-time radiation safety experience under the supervision of the individual identified as the Radiation Safety Officer on a Department, a NRC, or an Agreement State license or permit issued by a NRC master material licensee that authorizes similar type(s) of use(s) of radioactive material involving the following:
 - (1) Shipping, receiving, and performing related radiation surveys;
 - (2) Using and performing checks for proper operation of instruments used to determine the activity of dosages, survey meters, and instruments used to measure radionuclides;
 - (3) Securing and controlling radioactive material;
 - (4) Using administrative controls to avoid mistakes in the administration of radioactive material;
 - (5) Using procedures to prevent or minimize radioactive contamination and using proper decontamination procedures;
 - (6) Using emergency procedures to control radioactive material; and
 - (7) Disposing of radioactive material; and
 - b. Obtained written certification, signed by a preceptor Radiation Safety Officer or Associate Radiation Safety Officer, that the individual has satisfactorily completed the requirements in subsection (A)(2)(a) and has achieved a level of radiation safety knowledge sufficient to function independently as a Radiation Safety Officer or as an Associate Radiation Safety Officer for a medical use licensee;
 3. Is:
 - a. A medical physicist who has been certified by a specialty board whose certification process has been recognized by the Department, the NRC, or another Agreement State under R9-7-711(A) or equivalent, has experience with radiation safety aspects of similar types of use of radioactive material for which the licensee seeks the approval of the individual as Radiation Safety Officer or an Associate Radiation Safety Officer, and meets the requirements in subsection (B); or
 - b. An authorized user, authorized medical physicist, or authorized nuclear pharmacist identified on the licensee's license and has experience with the radiation safety aspects of similar types of use of radioactive material for which the individual has Radiation Safety Officer responsibilities; or
 4. Has experience with the radiation safety aspects of the types of use of radioactive material for which the individual is seeking simultaneous approval both as the Radiation Safety Officer and the authorized user on the same new medical license and meets the requirements in subsection (B).
- B. A licensee shall require an individual fulfilling the responsibilities of the Radiation Safety Officer to have training in the radiation safety, regulatory issues, and emergency procedures for the types of use for which the licensee seeks approval. This training requirement may be satisfied by completing training that is supervised by a Radiation Safety Officer, an Associate Radiation Safety Officer, authorized medical physicist, authorized nuclear pharmacist, or authorized user, as appropriate, who is authorized for the type(s) of use for which the licensee is seeking approval.
 - C. Exceptions.
 1. An individual identified as a Radiation Safety Officer or as an Associate Radiation Safety Officer on a Department, a NRC, or another Agreement State license or a permit issued by the NRC or an Agreement State broad scope licensee or master material license permit or by a master material license permittee of broad scope May 5, 2007 need not comply with the training requirements in subsections (A)(1) through (4).
 2. A physician, dentist, or podiatrist identified as an authorized user for the medical use of radioactive material on a license issued by the Department, the NRC, or an Agreement State, a permit issued by a NRC master material licensee, a permit issued by the Department, the NRC, or an Agreement State broad scope licensee, or a permit issued by a NRC master material license broad scope permittee May 5, 2007 need not comply with the training requirements in this Article.
 - D. The training and experience required in this Section shall be obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.
 - E. Individuals who, under subsection (C), need not comply with training requirements described in this Section may serve as preceptors for, and supervisors of, applicants seeking authorization on Department licenses for the same uses for which these individuals are authorized.
 - F. Records Retention.
 1. The licensee shall retain both a copy of the authority, duties, and responsibilities of the Radiation Safety Officer, as required by this Section, and a signed copy of each Radiation Safety Officer's agreement to be responsible

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

for implementing the radiation safety program for the duration of the license. The records must include the signature of the Radiation Safety Officer and licensee management.

2. For each Associate Radiation Safety Officer appointed under this Section, the licensee shall retain, for five years after the Associate Radiation Safety Officer is removed from the license, a copy of the written document appointing the Associate Radiation Safety Officer, signed by the licensee's management.

R9-7-711. Authorized Medical Physicist Training

A. A licensee shall require an authorized medical physicist to be an individual who:

1. Is certified by a specialty board whose certification process includes all of the training and experience requirements in subsections (A)(2)(a) and (B) and whose certification has been recognized by the Department, the NRC, or an Agreement State. To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Hold a master's or doctor's degree in physics, medical physics, other physical science, engineering, or applied mathematics from an accredited college or university;
 - b. Have two years of full-time practical training and/or supervised experience in medical physics:
 - i. Under the supervision of a medical physicist who is certified in medical physics by a specialty board recognized by the NRC or an Agreement State; or
 - ii. In clinical radiation facilities providing high-energy, external beam therapy (photons and electrons with energies greater than or equal to 1 million electron volts) and brachytherapy services under the direction of physicians who meet the requirements for authorized users in R9-7-710, R9-7-719, R9-7-721, R9-7-723, R9-7-727, R9-7-728, or R9-7-744; and
 - c. Pass an examination, administered by diplomates of the specialty board, that assesses knowledge and competence in clinical radiation therapy, radiation safety, calibration, quality assurance, and treatment planning for external beam therapy, brachytherapy, and stereotactic radiosurgery; or
2. Meets the following alternative training requirements:
 - a. Holds a master's or doctor's degree in physics, medical physics, other physical science, engineering, or applied mathematics from an accredited college or university; and has completed one year of full-time training in medical physics and an additional year of full-time work experience under the supervision of an individual who meets the requirements for an authorized medical physicist for the type(s) of use for which the individual is seeking authorization. This training and work experience must be conducted in clinical radiation facilities that provide high-energy, external beam therapy (photons and electrons with energies greater than or equal to 1

million electron volts) and brachytherapy services and must include:

- i. Performing sealed source leak tests and inventories;
 - ii. Performing decay corrections;
 - iii. Performing full calibration and periodic spot checks of external beam treatment units, stereotactic radiosurgery units, and remote afterloading units as applicable; and
 - iv. Conducting radiation surveys around external beam treatment units, stereotactic radiosurgery units, and remote afterloading units as applicable; and
- b. Has obtained written attestation that the individual has satisfactorily completed the requirements in both subsections (A)(2)(a) and (B); and has achieved a level of competency sufficient to function independently as an authorized medical physicist for each type of therapeutic medical unit for which the individual is requesting authorized medical physicist status. The written attestation must be signed by a preceptor authorized medical physicist who meets the requirements in this Section, or equivalent Agreement State or NRC requirements for an authorized medical physicist for each type of therapeutic medical unit for which the individual is requesting authorized medical physicist status.

- B. A licensee shall require an authorized medical physicist to be an individual who has training for the type(s) of use for which authorization is sought that includes hands-on device operation, safety procedures, clinical use, and the operation of a treatment planning system. This training requirement may be satisfied by satisfactorily completing either a training program provided by the vendor or by training supervised by an authorized medical physicist authorized for the type(s) of use for which the individual is seeking authorization.
- C. Exceptions. An individual identified as a teletherapy or medical physicist on a Department, a NRC, or another Agreement State license or a permit issued by the NRC or another Agreement State broad scope licensee or master material license permit or by a master material license permittee of broad scope before May 5, 2007 need not comply with the training requirements in subsection (A).
- D. The training and experience required in this Section shall be obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.
- E. Individuals who, under subsection (C), need not comply with training requirements described in this Section may serve as preceptors for, and supervisors of, applicants seeking authorization on Department licenses for the same uses for which these individuals are authorized.

R9-7-712. Authorized Nuclear Pharmacist Training

A. A licensee shall require the authorized nuclear pharmacist to be a pharmacist who:

1. Is certified as a nuclear pharmacist by a specialty board whose certification process has been recognized by the

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Department, the NRC, or an Agreement State. To have its certification process recognized, a specialty board shall require all candidates for certification to:

- a. Have graduated from a pharmacy program accredited by the American Council on Pharmaceutical Education (ACPE) or have passed the Foreign Pharmacy Graduate Examination Committee (FPGEC) examination;
 - b. Hold a current, active license to practice pharmacy in Arizona;
 - c. Provide evidence of having acquired at least 4000 hours of training/experience in nuclear pharmacy practice. Academic training may be substituted for no more than 2000 hours of the required training and experience; and
 - d. Pass an examination in nuclear pharmacy administered by diplomates of the specialty board, that assesses knowledge and competency in procurement, compounding, quality assurance, dispensing, distribution, health and safety, radiation safety, provision of information and consultation, monitoring patient outcomes, research and development; or
2. Has completed 700 hours in a structured educational program consisting of both:
 - a. 200 hours of classroom and laboratory training in the following areas:
 - i. Radiation physics and instrumentation;
 - ii. Radiation protection;
 - iii. Mathematics pertaining to the use and measurement of radioactivity;
 - iv. Chemistry of radioactive material for medical use; and
 - v. Radiation biology; and
 - b. Supervised practical experience in a nuclear pharmacy involving:
 - i. Shipping, receiving, and performing related radiation surveys;
 - ii. Using and performing checks for proper operation of instruments used to determine the activity of dosages, survey meters, and, if appropriate, instruments used to measure alpha- or beta-emitting radionuclides;
 - iii. Calculating, assaying, and safely preparing dosages for patients or human research subjects;
 - iv. Using administrative controls to avoid medical events in the administration of radioactive material; and
 - v. Using procedures to prevent or minimize radioactive contamination and using proper decontamination procedures; and
 3. Has obtained written attestation, signed by a preceptor authorized nuclear pharmacist, that the individual has satisfactorily completed the requirements in subsection (A)(2) and has achieved a level of competency sufficient to function independently as an authorized nuclear pharmacist.
- B. Exceptions. An individual identified as a nuclear pharmacist on a Department, a NRC, or an Agreement State license or a permit issued by the NRC or an Agreement State broad scope licensee or master material license permit or by a master material license permittee of broad scope before the effective date of these rules need not comply with the training requirements in subsections (A)(1) through (A)(3).
 - C. The training and experience required in this Section shall be obtained within the seven years preceding the date of applica-

tion or the individual shall have had related continuing education and experience since the required training and experience was completed.

- D. Individuals who, under subsection (B), need not comply with training requirements described in this Section may serve as preceptors for, and supervisors of, applicants seeking authorization on Department licenses for the same uses for which these individuals are authorized.

R9-7-713. Determination of Prescribed Dosages, and Possession, Use, and Calibration of Instruments

- A. A licensee shall determine and record the activity of each dosage before medical use.
- B. For a unit dosage, this determination shall be made by:
 1. Direct measurement of radioactivity; or
 2. Decay correction, based on the activity or activity concentration determined by:
 - a. A manufacturer or preparer licensed under R9-7-311 or equivalent NRC or Agreement State requirements; or
 - b. A Department, a NRC, or an Agreement State licensee for use in research in accordance with a Radioactive Drug Research Committee-approved protocol or an Investigational New Drug (IND) protocol accepted by FDA or;
 - c. A PET radioactive drug producer licensed under 1 R9-7-311 or equivalent NRC or Agreement State requirements.
- C. For other than unit dosages, this determination shall be made by:
 1. Direct measurement of radioactivity;
 2. Combination of measurement of radioactivity and mathematical calculations; or
 3. Combination of volumetric measurements and mathematical calculations based on the measurement made by a manufacturer or preparer licensed under R9-7-311, or equivalent NRC or Agreement State requirements.
- D. Unless otherwise directed by the authorized user, a licensee may not use a dosage if the dosage does not fall within the prescribed dosage range or if the dosage differs from the prescribed dosage by more than 20 percent.
- E. A licensee shall retain a record of the dosage determination required by this Section for Department inspection for three years.
- F. For direct measurements performed in accordance with subsection (B)(1), a licensee shall possess and use instrumentation to measure the activity of the dosage before it is administered to each patient or human research subject.
- G. A licensee shall calibrate the instrumentation required in subsection (F) in accordance with nationally recognized standards, the manufacturer's instructions, or the following procedures.
 1. The procedures that may be followed are:
 - a. Check each dose calibrator for constancy with a dedicated check source at the beginning of each day of use;
 - b. Test each dose calibrator for accuracy upon installation and at least annually thereafter by assaying at least two sealed sources containing different radionuclides whose activity the manufacturer has determined within 5 percent of its stated activity, whose activity is at least 10 microcuries for radium-226 and 50 microcuries for any other photon-emitting radio-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- nuclide, and at least one of which has a principal photon energy between 100 keV and 500 keV;
- c. Test each dose calibrator for linearity upon installation and at least quarterly thereafter over a range from the highest dosage that will be administered to a patient or human research subject to 1.1 megabecquerels (30 microcuries);
- d. Test each dose calibrator for geometry dependence upon installation over the range of volumes and volume configurations for which it will be used. The licensee shall keep a record of this test for the duration of the use of the dose calibrator;
- e. Perform appropriate checks and tests required by this Section following adjustment or repair of the dose calibrator; and
- f. Mathematically correct dosage readings for any geometry or linearity error that exceeds 10 percent if the dosage is greater than 10 microcuries and shall repair or replace the dose calibrator if the accuracy or constancy error exceeds 10 percent.
- 2. A licensee shall maintain the dose calibrator in accordance with this subsection, even though the dose calibrator is only used to “verify” a dosage prepared by a supplier authorized in subsection (B)(2).
- 3. A licensee shall maintain on file for Department review nationally recognized standards or manufacturer’s instructions used to maintain a dose calibrator and meet the requirements of subsection (G).
- H. A licensee shall calibrate the survey instruments before first use, annually, and following a repair that affects the calibration. A licensee shall:
 - 1. Calibrate all scales with readings up to 10 mSv (1000 mrem) per hour with a radiation source;
 - 2. Calibrate two separated readings on each scale or decade that will be used to show compliance; and
 - 3. Conspicuously note on the instrument the date of calibration.
- I. A licensee may not use survey instruments if the difference between the indicated exposure rate and the calculated exposure rate is more than 20 percent.
- J. A licensee shall retain records of instrument calibration for three years following the calibration.

R9-7-714. Authorization for Calibration, Transmission, and Reference Sources

Any person authorized by R9-7-703 for medical use of radioactive material may receive, possess, and use any of the following radioactive material for check, calibration, transmission, and reference use.

- 1. Sealed sources, not exceeding 1.11 GBq (30 mCi) each, manufactured and distributed by a person licensed under Article 3 of this Chapter or equivalent NRC or Agreement State regulations.
- 2. Sealed sources, not exceeding 1.11 GBq (30 mCi) each, redistributed by a licensee authorized to redistribute the sealed sources manufactured and distributed by a person licensed under Article 3 of this Chapter, providing the redistributed sealed sources are in the original packaging and shielding and are accompanied by the manufacturer’s approved instructions.
- 3. Any radioactive material with a half-life not longer than 120 days in individual amounts not to exceed 0.56 GBq (15 mCi).
- 4. Any radioactive material with a half-life longer than 120 days in individual amounts not to exceed the smaller of 7.4 MBq (200 µCi) or 1000 times the quantities in Article 4, Appendix B of this Chapter.
- 5. Technetium-99m in amounts as needed.
- 6. A licensee is limited to five sources of radiation authorized under subsections (1) through (3), unless otherwise specified in the licensee’s radioactive material license.

R9-7-715. Requirements for Possession of Sealed Sources and Brachytherapy Sources

- A. A licensee in possession of any sealed source or brachytherapy source shall follow the radiation safety and handling instructions supplied by the manufacturer.
- B. A licensee in possession of a sealed source shall test the source for leakage in accordance with R9-7-417.
- C. A licensee in possession of sealed sources or brachytherapy sources, except for gamma stereotactic radiosurgery sources, shall conduct a physical inventory every six months of all sources in its possession. During the period of time between the inventories, the licensee shall add each acquired sealed source to the inventory record and remove from the inventory record each source that leaves the licensee’s control.
- D. A licensee shall document the inventories conducted under subsection (C) and maintain inventory records in accordance with R9-7-450.

R9-7-716. Surveys of Ambient Radiation Exposure Rate, Surveys for Contamination, and PET Radiation Exposure Concerns

- A. In addition to the surveys required in Article 4 of this Chapter, a licensee shall survey with a radiation detection survey instrument at the end of each day of use all areas where unsealed radioactive material, requiring a written directive, is prepared for use or administered. In areas of routine use, that are to be released for unrestricted use, a licensee shall perform a survey of the area using an instrument appropriate for detecting contamination before releasing the area for unrestricted use.
- B. A licensee shall obtain the services of a person, experienced in the principles of radiation protection and installation design, to design a PET facility and perform a radiation survey when the facility is ready for patient imaging. The licensee shall provide a copy of the installation radiation survey to the Department within 30 days of imaging the first patient.
- C. The licensee shall use engineering controls or shield each PET use area with protective barriers necessary to comply with the radiation exposure limits in R9-7-408 and R9-7-416.
 - 1. At the time of application for a new license or amendment to an existing license, and before imaging of the first patient, the licensee shall provide to the Department a copy of the installation report signed by the contractor who installed the shielding material recommended by a person meeting the requirements in subsection (B) and a copy of the installation radiation survey required in subsection (B).
 - 2. The licensee shall perform shielding calculations in accordance with *AAPM Task Group 108: PET and PET/CT Shielding Requirements*, in Medical Physics, Vol. 33, No. 1, January 2006, which is incorporated by reference, published by the American Association of Physicists in

Medicine, One Physics Ellipse, College Park, MD 20740, and on file with the Department. This incorporation by reference contains no future editions or amendments. In lieu of these procedures, the licensee may use equivalent calculations approved by the Department.

- D. As part of the annual ALARA review required in R9-7-407, the licensee shall document a review of the PET patient workload and associated change, if any, in public exposure resulting from the installed facility shielding and other public radiation exposure controls in use at the time of the review.

R9-7-717. Release of Individuals Containing Radioactive Material or Implants Containing Radioactive Material

- A. A licensee may authorize the release from its control of any individual who has been administered unsealed radioactive material or implants containing radioactive material, if the total effective dose equivalent to any other individual from exposure to the released individual is not likely to exceed 5 millisieverts (0.5 rem).
- B. A licensee shall provide the released individual, or the individual's parent or guardian, with instructions, including written instructions, on actions recommended to maintain doses to other individuals as low as is reasonably achievable if the total effective dose equivalent to any other individual is likely to exceed 1 millisievert (0.1 rem). If the total effective dose equivalent to a nursing infant or child could exceed 1 millisievert (0.1 rem) assuming there were no interruption of breast-feeding, the instructions shall also include:
1. Guidance on the interruption or discontinuation of breast-feeding; and
 2. Information on the potential consequences, if any, of failure to follow the guidance.
- C. A licensee shall maintain a record of the basis for authorizing the release of an individual and instructions provided to a breast-feeding female for three years from the date of the administration performed under subsection (A). Nothing in this rule relieves the licensee from the personnel exposure requirements in Article 4.

R9-7-718. Mobile Medical Service

- A. A licensee providing mobile medical service shall:
1. Obtain a letter signed by the management of each client for which services are rendered that permits the use of radioactive material at the client's address and clearly delineates the authority and responsibility of the licensee and the client;
 2. Check instruments used to measure the activity of unsealed radioactive material for proper function before medical use at each client's address or on each day of use, whichever is more frequent. At a minimum, the check for proper function required by this subsection shall include a constancy check;
 3. Check survey instruments for proper operation with a dedicated check source before use at each client's address; and
 4. Before leaving a client's address, survey all areas of use to ensure compliance with the requirements in Article 4 of this Chapter.
- B. A mobile medical service may not have radioactive material delivered from the manufacturer or the distributor to the client

unless the client has a license allowing its possession. If applicable, radioactive material delivered to the client shall be received and handled in conformance with the client's license.

- C. A licensee providing mobile medical services shall retain the letter required in subsection (A)(1) and the record of each survey required in subsection (A)(4) for three years from the date of the survey.

R9-7-719. Training for Uptake, Dilution, and Excretion Studies

- A. Except as provided in R9-7-710, the licensee shall require an authorized user of unsealed radioactive material for the uses authorized under Group 100 in Exhibit A, Medical Use Groups of this Article to be a physician who:
1. Is certified by a medical specialty board whose certification process has been recognized by the NRC or an Agreement State, as specified in the NRC's Medical Uses Licensee Toolkit available through <https://www.nrc.gov>, and who meets the requirements in subsection (A)(3). To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Complete 60 hours of training and experience in basic radionuclide handling techniques and radiation safety applicable to the medical use of unsealed radioactive material for uptake, dilution, and excretion studies as described in subsection (A)(3); and
 - b. Pass an examination, administered by diplomates of the specialty board, that assesses knowledge and competence in radiation safety, radionuclide handling, and quality control;
 2. Is an authorized user under R9-7-721, R9-7-723, the NRC, or equivalent Agreement State requirements; or
 3. Has:
 - a. Completed 60 hours of training and experience, including a minimum of eight hours of classroom and laboratory training, in basic radionuclide handling techniques applicable to the medical use of unsealed radioactive material for uptake, dilution, and excretion studies. The training and experience must include:
 - i. Classroom and laboratory training in the following areas:
 - (1) Radiation physics and instrumentation;
 - (2) Radiation protection;
 - (3) Mathematics pertaining to the use and measurement of radioactivity;
 - (4) Chemistry of radioactive material for medical use; and
 - (5) Radiation biology; and
 - ii. Work experience, under the supervision of an authorized user who meets the requirements in this Article, NRC, or equivalent Agreement State requirements, involving:
 - (1) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
 - (2) Performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation of survey meters;
 - (3) Calculating, measuring, and safely preparing patient or human research subject dosages;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- (4) Using administrative controls to prevent a medical event involving the use of unsealed radioactive material;
 - (5) Using procedures to contain spilled radioactive material safely and using proper decontamination procedures; and
 - (6) Administering dosages of radioactive drugs to patients or human research subjects; and
 - b. Obtained written attestation that the individual has satisfactorily completed the requirements in subsection (A)(1) or subsection (A)(3)(a) and has achieved a level of competency sufficient to function independently as an authorized user for the medical uses authorized under Exhibit A, Medical Use Groups of this Article. The attestation must be obtained from either:
 - i. A preceptor authorized user who meets the requirements in this Section, R9-7-721, or R9-7-723, the NRC, or equivalent Agreement State requirements; or
 - ii. A residency program director who affirms in writing that the attestation represents the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in this Section, R9-7-721, or R9-7-723, the NRC, or equivalent Agreement State requirements, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in subsection (A)(3)(a).
 - B. The training and experience in subsections (A)(1)(a) or (3)(a) shall have been obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.
 - C. Individuals who, under R9-7-710(B), need not comply with training requirements described in this Section may serve as preceptors for, and supervisors of, applicants seeking authorization on Department licenses for the same uses for which these individuals are authorized.

- A. A licensee may not administer to humans a radiopharmaceutical that contains more than 0.15 kilobecquerel of molybdenum-99 per megabecquerel of technetium-99m (0.15 microcurie of molybdenum-99 per millicurie of technetium-99m) or, more than 0.02 kilobecquerel of strontium-82 per megabecquerel of rubidium-82 chloride injection (0.02 microcurie of strontium-82 per millicurie of rubidium-82 chloride); or more than 0.2 kilobecquerel of strontium-85 per megabecquerel of rubidium-82 chloride injection (0.2 microcurie of strontium-85 per millicurie of rubidium-82).
 - B. A licensee that uses molybdenum-99/technetium-99m generators for preparing a technetium-99m radiopharmaceutical shall measure the molybdenum-99 concentration of the first eluate after receipt of a generator to demonstrate compliance with subsection (A).
 - C. A licensee that uses a strontium-82/rubidium-82 generator for preparing a rubidium-82 radiopharmaceutical shall, before the first patient use of the day, measure the concentration of radionuclides strontium-82 and strontium-85 to demonstrate compliance with subsection (A).
 - D. A licensee shall maintain a record of each molybdenum-99 concentration measurement or strontium-82 and strontium-85 concentrations measurements for three years following completion of the measurement.
 - E. A licensee shall notify by telephone the NRC Operations Center and the distributor of the generator within seven calendar days after discovery that an eluate exceeded the permissible concentration listed in subsection (A) at the time of generator elution. The telephone report to the NRC must include the manufacturer, model number, and serial number (or lot number) of the generator; the results of the measurement; the date of the measurement; whether dosages were administered to patients or human research subjects; when the distributor was notified; and the action taken.

- R9-7-721. Training for Imaging and Localization Studies Not Requiring a Written Directive**
- Except as provided in R9-7-710, the licensee shall require an authorized user of unsealed radioactive material for the uses authorized under Group 200 in Exhibit A, Medical Use Groups of this Article to be a physician who:
1. Is certified by a medical specialty board whose certification process has been recognized by the NRC or an Agreement State, as specified in the NRC's Medical Uses Licensee Toolkit available through <https://www.nrc.gov>, and who meets the requirements in subsection (3). To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Complete 700 hours of training and experience in basic radionuclide handling techniques and radiation safety applicable to the medical use of unsealed radioactive material for imaging and localization studies as described in subsection (3); and
 - b. Pass an examination, administered by diplomates of the specialty board, that assesses knowledge and competence in radiation safety, radionuclide handling, and quality control;
 2. Is an authorized user under R9-7-723, the NRC, or equivalent Agreement State requirements; or
 3. Has:
 - a. Completed 700 hours of training and experience, including a minimum of 80 hours of classroom and laboratory training, in basic radionuclide handling techniques applicable to the medical use of unsealed radioactive material for imaging and localization studies. The training and experience must include:

Work experience, under the supervision of an authorized user who meets the requirements in this Section, R9-7-710, or R9-7-723 and in subsection (3)(b)(vii); the requirements of the NRC; or equivalent Agreement State requirements. An authorized nuclear pharmacist who meets the requirements in R9-7-712 may provide the supervised work experience for subsection (3)(a)(ii)(7). Work experience must involve:
 - (1) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
 - (2) Performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation of survey meters;
 - (3) Calculating, measuring, and safely preparing patient or human research subject dosages;
 - (4) Using administrative controls to prevent a medical event involving the use of unsealed radioactive material;
 - (5) Using procedures to contain spilled radioactive material safely and using proper decontamination procedures;
 - (6) Administering dosages of radioactive drugs to patients or human research subjects; and
 - (7) Eluting generator systems appropriate for preparation of radioactive drugs for imaging and localization studies, measuring and testing the elate for radionuclide purity, and processing the elate with reagent kits to prepare labeled radioactive drugs; and
- b. Obtained written attestation that the individual has satisfactorily completed the requirements in subsection (3)(a) and is able to independently fulfill the radiation safety-related duties as an authorized user for the medical uses authorized under Group 200 in Exhibit A, Medical Use Groups of this Article. The attestation must be obtained from either:
 - i. A preceptor authorized user who meets the requirements in this Section, R9-7-710, or R9-7-723; NRC requirements; or equivalent Agreement State requirements; or

R9-7-722. Safety Instruction and Precautions for Use of Unsealed Radioactive Material Requiring a Written Directive

- A. A licensee shall provide radiation safety instruction, initially and at least annually, for all personnel caring for the patient or human research subject receiving radiopharmaceutical therapy and hospitalized for compliance with R9-7-717. To satisfy this requirement, the instruction shall describe the licensee's procedures for:
 1. Patient or human research subject control,
 2. Visitor control,
 3. Contamination control, and
 4. Waste control.
- B. For each patient or human research subject who cannot be released under R9-7-717, a licensee shall:
 1. Quarter the patient or the human research subject in a private room with a private sanitary facility;
 2. Visibly post the patient's or the human research subject's room with a "Radioactive Materials" sign;
 3. Note on the door or in the patient's or human research subject's chart where and how long visitors may stay in the patient's or the human research subject's room; and
 4. Monitor material and items removed from the patient's or the human research subject's room to determine that their radioactivity cannot be distinguished from the natural background radiation level with a radiation detection survey instrument set on its most sensitive scale and with no interposed shielding, or handle the material and items as radioactive waste.
- C. A licensee shall notify the Radiation Safety Officer, or his or her designee, and the authorized user as soon as possible if the patient or human research subject has a medical emergency or dies.
- D. A licensee may use any unsealed byproduct material identified in R9-7-723(A)(2)(b)(vi) prepared for medical use and for which a written directive is required that is:
 1. Obtained from:
 - a. A manufacturer or preparer licensed under R9-7-311 or equivalent Agreement State requirements, or
 - b. A PET radioactive drug producer licensed under R9-7-311 or equivalent Agreement State requirements;
 2. Excluding production of PET radionuclides, prepared by:
 - a. An authorized nuclear pharmacist;
 - b. A physician who is an authorized user and who meets the requirements specified R-7-723; or
 - c. An individual under the supervision, as specified in R9-7-712, of the authorized nuclear pharmacist in subsection (D)(2)(a) or the physician who is an authorized user in subsection (D)(2)(b);
 3. Obtained from and prepared by an NRC or Agreement State licensee for use in research in accordance with an Investigational New Drug (IND) protocol accepted by FDA; or

To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Successfully complete residency training in a radiation therapy or nuclear medicine training program or a program in a related medical specialty. These residency training programs must include 700 hours of training and experience as described in (A)(2) subsection (A)(2)(a). Eligible training programs must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education, the Royal College of Physicians and Surgeons of Canada, or the Committee on Post-Graduate Training of the American Osteopathic Association; and
 - b. Pass an examination, administered by diplomates of the specialty board, which tests knowledge and competence in radiation safety, radionuclide handling, and quality assurance, and clinical use of unsealed radioactive material for which a written directive is required; or
 2. Has:
 - a. Completed 700 hours of training and experience, including a minimum of 200 hours of classroom and laboratory training, in basic radionuclide handling techniques applicable to the medical use of unsealed radioactive material requiring a written directive. R9-7-724. Surveys after Brachytherapy Source Implant and Removal; Accountability

- A. A licensee shall make a survey to locate and account for all sources that have not been implanted immediately after implanting sources in a patient or a human research subject.
- B. A licensee shall make a survey of the patient or the human research subject with a radiation detection survey instrument immediately after removing the last temporary implant source to confirm that all sources have been removed.
- C. A licensee shall maintain accountability at all times for all sources in storage or use.
- D. A licensee shall return brachytherapy sources to a secure storage area as soon as possible after removing sources from a patient or a human research subject.
- E. A licensee shall record the procedures performed in subsections (A) through (D) and retain the records for three years following completion of the record.
- F. A licensee must use only brachytherapy sources:
 - 1. Approved in the Sealed Source and Device Registry for manual brachytherapy medical use. The manual brachytherapy sources may be used for manual brachytherapy uses that are not explicitly listed in the Sealed Source and Device Registry, but must be used in accordance with the radiation safety conditions and limitations described in the Sealed Source and Device Registry; or

- 2. In research to deliver therapeutic doses for medical use in accordance with an active Investigational Device Exemption (IDE) application accepted by the U.S. Food and Drug Administration, provided the requirements of R9-7-450(A) are met.

R9-7-725. Safety Instructions and Precautions for Brachytherapy Patients that Cannot be Released Under R9-7-717

- A. In addition to the training requirements in Article 10, a licensee shall provide radiation safety instruction, initially and at least annually, to personnel caring for patients or human research subjects who are receiving brachytherapy and cannot be released under R9-7-717. To satisfy this requirement, the instruction shall be commensurate with the duties of the personnel and include the:
 - 1. Size and appearance of the brachytherapy sources;
 - 2. Safe handling and shielding instructions;
 - 3. Patient or human research subject control;
 - 4. Visitor control, including both:
 - a. Routine visitation of hospitalized individuals in accordance with Article 4 of this Chapter,
 - b. Visitation authorized in accordance with Article 4 of this Chapter, and
 - 5. Notification of the radiation safety officer, or his or her designee, and an authorized user if the patient or the human research subject has a medical emergency or dies.
- B. For each patient or human research subject who is receiving brachytherapy and cannot be released under R9-7-717, a licensee shall:
 - 1. Not quarter the patient or the human research subject in the same room as an individual who is not receiving brachytherapy;
 - 2. Visibly post the patient's or human research subject's room with a "Radioactive Materials" sign; and
 - 3. Note on the door or in the patient's or human research subject's chart where and how long visitors may stay in the patient's or human research subject's room.
- C. A licensee shall have applicable emergency response equipment available near each treatment room to respond to a source:
 - 1. Dislodged from the patient; and
 - 2. Lodged within the patient following removal of the source applicators.
- D. A licensee shall notify the radiation safety officer, or the RSO's designee, and an authorized user as soon as possible if the patient or human research subject has a medical emergency or dies.
- E. A licensee shall record the instructions given under subsection (A) and retain the records for three years after recording the instructions.

R9-7-726. Calibration Measurements of Brachytherapy Sources, Decay of Sources Used for Ophthalmic Treatments, and Computerized Treatment Planning Systems

- A. Before the first medical use of a brachytherapy source after the effective date of this rule, a licensee shall have:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. Determined the source output or activity using a dosimetry system that meets the requirements of R9-7-733(A);
 2. Determined source positioning accuracy within applicators; and
 3. Used published protocols currently accepted by nationally recognized bodies to meet the requirements of subsections (A)(1) and (A)(2).
- B.** A licensee may use measurements provided by the source manufacturer or by a calibration laboratory accredited by the American Association of Physicists in Medicine that are made in accordance with subsection (A).
- C.** A licensee shall mathematically correct the outputs or activities determined in subsection (A) for physical decay at intervals consistent with one percent physical decay.
- D.** Only an authorized medical physicist shall calculate the activity of each strontium-90 source that is used to determine the treatment times for ophthalmic treatments. The decay shall be based on the activity determined under subsection (A).
- E.** A licensee shall perform acceptance testing on the treatment planning system of therapy-related computer systems in accordance with published protocols accepted by nationally recognized bodies. At a minimum, the acceptance testing shall include, as applicable, verification of:
1. The source-specific input parameters required by the dose calculation algorithm;
 2. The accuracy of dose, dwell time, and treatment time calculations at representative points;
 3. The accuracy of isodose plots and graphic displays; and
 4. The accuracy of the software used to determine sealed source positions from radiographic images.
- F.** A licensee shall retain records of each source activity determination and ophthalmic source decay correction, and documentation of the acceptance testing protocol required under subsection (E) for three years after the date of the procedure required in subsections (A) and (D), and for the records created in conjunction with subsection (E), the record shall be maintained for three years from the last date of the protocol's use.

R9-7-727. Training for Use of Manual Brachytherapy Sources and Training for the Use of Strontium-90 Sources for Treatment of Ophthalmic Disease

- A.** Except as provided in R9-7-710, the licensee shall require an authorized user of a manual brachytherapy source for the uses authorized under this Article to be a physician who:
1. Is certified by a medical specialty board whose certification process has been recognized by the NRC or an Agreement State and who meets the requirements in subsection (A)(2). The names of board certifications that have been recognized by the NRC or an Agreement State are specified in the NRC's Medical Uses Licensee Toolkit available through <https://www.nrc.gov>. To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - a. Successfully complete a minimum of three years of residency training in a radiation oncology program approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Committee on Post-Graduate Training of the American Osteopathic Association; and
 - b. Pass an examination, administered by diplomates of the specialty board, that tests knowledge and competence in radiation safety, radionuclide handling, treatment planning, quality assurance, and clinical use of manual brachytherapy; or
 2. Has completed a structured educational program in basic radionuclide handling techniques applicable to the use of manual brachytherapy sources that includes:
 - a. 200 hours of classroom and laboratory training in the following areas:
 - i. Radiation physics and instrumentation;
 - ii. Radiation protection;
 - iii. Mathematics pertaining to the use and measurement of radioactivity;
 - iv. Radiation biology;
 - b. 500 hours of work experience, under the supervision of an authorized user who meets the requirements in this Section, or equivalent NRC or Agreement State requirements at a medical institution, involving:
 - i. Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
 - ii. Checking survey meters for proper operation;
 - iii. Preparing, implanting, and removing brachytherapy sources;
 - iv. Maintaining running inventories of material on hand;
 - v. Using administrative controls to prevent a medical event involving the use of radioactive material;
 - vi. Using emergency procedures to control radioactive material;
 - c. Completing three years of supervised clinical experience in radiation oncology, under an authorized user who meets the requirements in this Section, or equivalent Agreement State requirements, as part of a formal training program approved by the Residency Review Committee for Radiation Oncology of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Committee on Postdoctoral Training of the American Osteopathic Association. This experience may be obtained concurrently with the supervised work experience required by subsection (A)(2)(b); and
 - d. Obtaining written attestation that the individual has satisfactorily completed the requirements in subsections (A)(2)(a) through (c) and is able to independently fulfill the radiation safety-related duties as an authorized user of manual brachytherapy sources for the medical uses authorized under Exhibit A, Medical Use Groups of this Article. The attestation must be obtained from either:
 - i. A preceptor authorized user who meets the requirements in this Section or equivalent Agreement State or NRC requirements; or
 - ii. A residency program director who affirms in writing that the attestation represents the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in this Section or equivalent Agreement State or NRC requirements, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the

Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in subsection (A)(2)(a) and (b).

- B.** A licensee who uses strontium-90 for ophthalmic treatments must ensure that certain activities as specified in subsection (C) are performed by either:
1. An authorized medical physicist; or
 2. An individual who:
 - a. Is identified as an ophthalmic physicist on a:
 - i. Specific medical use license issued by the Department, the NRC, or another Agreement State,
 - ii. Permit issued by an NRC or other Agreement State broad scope medical use licensee,
 - iii. Medical use permit issued by an NRC master material licensee, or
 - iv. Permit issued by an NRC master material licensee broad scope medical use permittee;
 - b. Holds a master's or doctor's degree in physics, medical physics, other physical sciences, engineering, or applied mathematics from an accredited college or university;
 - c. Has successfully completed one year of full-time training in medical physics and an additional year of full-time work experience under the supervision of a medical physicist; and
 - d. Has documented training in:
 - i. The creation, modification, and completion of written directives;
 - ii. Procedures for administrations requiring a written directive; and
 - iii. Performing the calibration measurements of brachytherapy sources as detailed in R9-7-726.
- C.** The individuals who are identified in subsection (B)(1) or (2) shall:
1. Calculate the activity of each strontium-90 source that is used to determine the treatment times for ophthalmic treatments. The decay must be based on the activity determined under R9-7-726; and
 2. Assist the licensee in developing, implementing, and maintaining written procedures to provide high confidence that the administration is in accordance with the written directive. These procedures must include the frequencies that the individual meeting the requirements in paragraph (a) of this Section will observe treatments, review the treatment methodology, calculate treatment time for the prescribed dose, and review records to verify that the administrations were in accordance with the written directives.
- D.** Licensees shall retain a record of the activity of each strontium-90 source in accordance with R9-7-313.
- E.** The training and experience shall have been obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.

R9-7-728. Training for Use of Sealed Sources for Diagnosis

- A.** Except as provided in R9-7-710, the licensee shall require the authorized user of a diagnostic sealed source for use in a device authorized under Group 500 in Exhibit A, Medical Use Groups of this Article to be a physician, dentist, or podiatrist who:
1. Is certified by a medical specialty board whose certification process has been recognized by the NRC or an Agreement State and who meets the requirements in subsections (A)(3) and (B) and whose certification has been recognized by the Department, the NRC, or another Agreement State as specified in the NRC's Medical Uses Licensee Toolkit available through <https://www.nrc.gov>;
 2. Is an authorized user for uses listed in Group 200 of Exhibit A, Medical Use Groups of this Article or equivalent NRC or Agreement State requirements; or
 3. Has completed eight hours of classroom and laboratory training in basic radionuclide handling techniques specifically applicable to the use of the device. The training must include:
 - a. Radiation physics and instrumentation;
 - b. Radiation protection;
 - c. Mathematics pertaining to the use and measurement of radioactivity;
 - d. Radiation biology.
- B.** A licensee shall require the authorized user of a diagnostic sealed source for use in a device authorized under Group 500 in Exhibit A, Medical Use Groups of this Article to have completed training in the use of the device for the uses requested.
- C.** The training and experience shall have been obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.

R9-7-729. Surveys of Patients and Human Research Subjects Treated with a Remote Afterloader Unit

- A.** Before releasing a patient or a human research subject from licensee control, a licensee shall survey the patient or the human research subject and the remote afterloader unit with a portable radiation detection survey instrument to confirm that each source has been removed from the patient or human research subject and returned to the safe shielded position.
- B.** A licensee shall make records of these surveys conducted under subsection (A) and retain them for three years from the date of each survey.

R9-7-730. Installation, Maintenance, Adjustment, and Repair of an Afterloader Unit, Teletherapy Unit, or Gamma Stereotactic Radiosurgery Unit

- A.** Only a person specifically licensed by the Department, the NRC, or an Agreement State shall install, maintain, adjust, or repair a remote afterloader unit, teletherapy unit, or gamma stereotactic radiosurgery unit that involves work on any source shielding, the source's driving unit, or other electronic or

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

mechanical component that could expose a source, reduce the shielding around a source, or compromise the radiation safety of a unit or a source.

- B. Except for low dose-rate remote afterloader units, only a person specifically licensed by the Department, the NRC, or an Agreement State shall install, replace, relocate, or remove a sealed source or source contained in other remote afterloader units, teletherapy units, or gamma stereotactic radiosurgery units.
- C. For a low dose-rate remote afterloader unit, only a person specifically licensed by the Department, the NRC, or an Agreement State or an authorized medical physicist shall install, replace, relocate, or remove a sealed source contained in the unit.
- D. A licensee shall retain a record of the installation, maintenance, adjustment, and repair of remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units for three years from the completion date of the activity listed in this Section.

R9-7-731. Safety Procedures and Instructions for Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units

- A. A licensee shall:
 - 1. Secure the unit, the console, the console keys, and the treatment room when not in use or unattended;
 - 2. Permit only individuals approved by the authorized user, Radiation Safety Officer, or authorized medical physicist to be present in the treatment room during treatment with a source;
 - 3. Prevent dual operation of more than one radiation producing device in a treatment room if applicable; and
 - 4. Develop, implement, and maintain written procedures for responding to an abnormal situation when the operator is unable to place a source in the shielded position, or remove the patient or human research subject from the radiation field with controls from outside the treatment room. These procedures shall include:
 - a. Instructions for responding to equipment failures and the names of the individuals responsible for implementing corrective actions;
 - b. The process for restricting access to and posting of the treatment area to minimize the risk of inadvertent exposure; and
 - c. The names and telephone numbers of the authorized users, the authorized medical physicist, and the Radiation Safety Officer to be contacted if the unit or console operates abnormally.
- B. A licensee shall post instructions at the unit console to inform the operator of:
 - 1. The location of the procedures required by subsection (A)(4); and
 - 2. The names and telephone numbers of the authorized users, the authorized medical physicist, and the Radiation Safety Officer to be contacted if the unit or console operates abnormally.
- C. A licensee shall provide instruction, initially and at least annually, to all individuals who operate the unit, as appropriate to the individual's assigned duties, in:
 - 1. The procedures identified in subsection (A)(4); and
 - 2. The operating procedures for the unit.

- D. A licensee shall ensure that operators, authorized medical physicists, and authorized users participate in drills of the emergency procedures, initially and at least annually.
- E. A licensee shall retain a record of individuals receiving instruction required by subsection (C) for three years from the date of the instruction.
- F. A licensee shall maintain a copy of the procedures required by subsections (A)(4) and (C)(2) for Department review. The copy shall be maintained for three years beyond the termination date of the activities for which the procedures were written.
- G. Prior to the first use for patient treatment of a new unit or an existing unit with a manufacturer upgrade that affects the operation and safety of the unit, a licensee shall ensure that vendor operational and safety training is provided to all individuals who will operate the unit. The vendor operational and safety training must be provided by the device manufacturer or by an individual certified by the device manufacturer to provide the operational and safety training.
- H. A licensee shall have each teletherapy unit and gamma stereotactic radiosurgery unit fully inspected and serviced during each source replacement to assure proper functioning of the source exposure mechanism and other safety components. The interval between each full-inspection servicing shall not exceed five years for each teletherapy unit and shall not exceed seven years for each gamma stereotactic radiosurgery unit.
- I. A licensee shall:
 - 1. Ensure that inspection and servicing are performed only by persons specifically licensed to do so by the Department, the NRC or another Agreement State, and
 - 2. Keep a record of the inspection and servicing for three years after termination.
- J. A licensee shall maintain a record of safety instruction required by R9-7-722, R9-7-725 and this Section and the operational and safety instructions for three years after the date of the instruction. The record must include a list of the topics covered, the date of the instruction, the name(s) of the attendee(s), and the name(s) of the individual(s) who provided the instruction.

R9-7-732. Safety Precautions for Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units

- A. A licensee shall control access at each entrance to a treatment room.
- B. A licensee shall equip each entrance to the treatment room with an electrical interlock system that will:
 - 1. Prevent the operator from initiating the treatment cycle unless each treatment room entrance door is closed;
 - 2. Cause each source to be shielded when an entrance door is opened; and
 - 3. Prevent any source from being exposed following an interlock interruption until all treatment room entrance doors are closed and the source's on-off control is reset at the console.
- C. A licensee shall require any individual entering the treatment room to assure, through the use of appropriate radiation monitors, that radiation levels have returned to ambient levels.
- D. Except for low-dose remote afterloader units, a licensee shall construct or equip each treatment room with viewing and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

intercom systems to permit continuous observation of the patient or the human research subject from the treatment console during irradiation.

- E. For licensed activities where sources are placed within the patient's or human research subject's body, a licensee shall only conduct treatments which allow for expeditious removal of a decoupled or jammed source.
- F. In addition to the requirements specified in subsections (A) through (E), a licensee shall:
 - 1. For medium dose-rate and pulsed dose-rate remote afterloader units, require:
 - a. An authorized medical physicist and either an authorized user or a physician, under the supervision of an authorized user, who has been trained in the operation and emergency response for the unit, to be physically present during the initiation of all patient treatments involving the unit; and
 - b. An authorized medical physicist and either an authorized user or an individual, under the supervision of an authorized user, who has been trained to remove each source applicator in the event of an emergency involving the unit, to be immediately available during continuation of all patient treatments involving the unit.
 - 2. For high dose-rate remote afterloader units, require:
 - a. An authorized user and an authorized medical physicist to be physically present during the initiation of all patient treatments involving the unit; and
 - b. An authorized medical physicist and either an authorized user or a physician, under the supervision of an authorized user, who has been trained in the operation and emergency response for the unit, to be physically present during continuation of all patient treatments involving the unit.
 - 3. For gamma stereotactic radiosurgery units, require an authorized user and an authorized medical physicist to be physically present throughout all patient treatments involving the unit. As used in this provision, physically present means to be within hearing distance of normal voice, and does not include the use of portable communication devices, intercoms, or other devices that could be used to amplify the human voice.
 - 4. Notify the radiation safety officer, or radiation safety officer's designee, and an authorized user as soon as possible if the patient or human research subject has a medical emergency or dies.
- G. A licensee shall have applicable emergency response equipment available near each treatment room to respond to a source:
 - 1. Remaining in the unshielded position; or
 - 2. Lodged within the patient following completion of the treatment.

R9-7-733. Dosimetry Equipment

- A. Except for low dose-rate remote afterloader sources where the source output or activity is determined by the manufacturer, a licensee shall have a calibrated dosimetry system available for use. To satisfy this requirement, one of the following two conditions shall be met.
 - 1. The system shall have been calibrated using a system or source traceable to the National Institute of Science and Technology (NIST) and published protocols accepted by nationally recognized bodies; or by a calibration labora-

tory accredited by the American Association of Physicists in Medicine (AAPM). The calibration shall have been performed within the previous two years and after any servicing that may have affected system calibration; or

- 2. The system shall have been calibrated within the previous four years. Eighteen to 30 months after that calibration, the system shall have been intercompared with another dosimetry system that was calibrated within the past 24 months by NIST or by a calibration laboratory accredited by the AAPM. The results of the intercomparison shall indicate that the calibration factor of the licensee's system had not changed by more than two percent. The licensee may not use the intercomparison result to change the calibration factor. When intercomparing dosimetry systems to be used for calibrating sealed sources for therapeutic units, the licensee shall use a comparable unit with beam attenuators or collimators, as applicable, and sources of the same radionuclide as the source used at the licensee's facility.
- B. The licensee shall have a dosimetry system available for use for spot-check output measurements, if applicable. To satisfy this requirement, the system may be compared with a system that has been calibrated in accordance with subsection (A). This comparison shall have been performed within the previous year and after each servicing that may have affected system calibration. The spot-check system may be the same system used to meet the requirement in subsection (A).
- C. The licensee shall retain, for three years from the date of the procedure, a record of each calibration, intercomparison, and comparison.

R9-7-734. Full Calibration Measurements on Teletherapy Units

- A. A licensee authorized to use a teletherapy unit for medical use shall perform full calibration measurements on each teletherapy unit:
 - 1. Before the first medical use of the unit; and
 - 2. Before medical use under the following conditions:
 - a. Whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;
 - b. Following replacement of the source or following reinstallation of the teletherapy unit in a new location;
 - c. Following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and
 - 3. At intervals not exceeding one year.
- B. To satisfy the requirement of subsection (A), full calibration measurements shall include determination of:
 - 1. The output within ± 3 percent for the range of field sizes and for the distance or range of distances used for medical use;
 - 2. The coincidence of the radiation field and the field indicated by the light beam localizing device;
 - 3. The uniformity of the radiation field and its dependence on the orientation of the useful beam;
 - 4. Timer accuracy and linearity over the range of use;
 - 5. On-off error; and
 - 6. The accuracy of all distance measuring and localization devices in medical use.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- C. A licensee shall use the dosimetry system described in R9-7-733(A) to measure the output for one set of exposure conditions. The remaining radiation measurements required in subsection (B)(1) may be made using a dosimetry system that indicates relative dose rates.
- D. A licensee shall make full calibration measurements required by subsection (A) in accordance with published protocols accepted by nationally recognized bodies.
- E. A licensee shall mathematically correct the outputs determined in subsection (B)(1) for physical decay for intervals not exceeding one month for cobalt-60, six months for cesium-137, or at intervals consistent with 1 percent decay for all other nuclides.
- F. Full calibration measurements required by subsection (A) and physical decay corrections required by subsection (E) shall be performed by an authorized medical physicist.
- G. A licensee shall retain a record of each calibration for three years from the date it was completed.
- G. A licensee shall mathematically correct the outputs determined in subsection (B)(1) for physical decay at intervals consistent with 1 percent physical decay.
- H. Full calibration measurements required by subsection (A) and physical decay corrections required by subsection (G) shall be performed by an authorized medical physicist.
- I. A licensee shall retain a record of each calibration for three years from the date it was completed.

R9-7-736. Full Calibration Measurements on Gamma Stereotactic Radiosurgery Units

- A. A licensee authorized to use a gamma stereotactic radiosurgery unit for medical use shall perform full calibration measurements on each unit:
 1. Before the first medical use of the unit;
 2. Before medical use under the following conditions:
 - a. Whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;
 - b. Following replacement of the sources or following reinstallation of the gamma stereotactic radiosurgery unit in a new location; and
 - c. Following any repair of the gamma stereotactic radiosurgery unit that includes removal of the sources or major repair of the components associated with the source assembly; and
 3. At intervals not exceeding one year, with the exception that relative helmet factors need only be determined before the first medical use of a helmet and following any damage to a helmet.
- B. To satisfy the requirement of subsection (A), full calibration measurements shall include determination of:
 1. The output within ± 3 percent;
 2. Relative helmet factors;
 3. Isocenter coincidence;
 4. Timer accuracy and linearity over the range of use;
 5. On-off error;
 6. Trunnion centricity;
 7. Treatment table retraction mechanism, using backup battery power or hydraulic backups with the unit off;
 8. Helmet microswitches;
 9. Emergency timing circuits; and
 10. Stereotactic frames and localizing devices (trunnions).
- C. A licensee shall use the dosimetry system described in R9-7-733(A) to measure the output for one set of exposure conditions. The remaining radiation measurements required in subsection (B)(1) may be made using a dosimetry system that indicates relative dose rates.
- D. A licensee shall make full calibration measurements required by subsection (A) in accordance with published protocols accepted by nationally recognized bodies.
- E. A licensee shall mathematically correct the outputs determined in subsection (B)(1) at intervals not exceeding one month for cobalt-60 and at intervals consistent with 1 percent physical decay for all other radionuclides.
- F. Full calibration measurements required by subsection (A) and physical decay corrections required by subsection (E) shall be performed by an authorized medical physicist.
- G. A licensee shall retain a record of each calibration for three years from the date of the procedure.

R9-7-735. Full Calibration Measurements on Remote Afterloader Units

- A. A licensee authorized to use a remote afterloader unit for medical use shall perform full calibration measurements on each unit:
 1. Before the first medical use of the unit;
 2. Before medical use under the following conditions:
 - a. Following replacement of the source or following reinstallation of the unit in a new location outside the facility; and
 - b. Following any repair of the unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and
 3. At intervals not exceeding one quarter for high dose-rate, medium dose-rate, and pulsed dose-rate remote afterloader units with sources whose half-life exceeds 75 days; and
 4. At intervals not exceeding one year for low dose-rate remote afterloader units.
- B. To satisfy the requirement of subsection (A), full calibration measurements shall include, as applicable, determination of:
 1. The output within ± 5 percent;
 2. Source positioning accuracy to within ± 1 millimeter;
 3. Source retraction with backup battery upon power failure;
 4. Length of the source transfer tubes;
 5. Timer accuracy and linearity over the typical range of use;
 6. Length of the applicators; and
 7. Function of the source transfer tubes, applicators, and transfer tube-applicator interfaces.
- C. A licensee shall use the dosimetry system described in R9-7-733(A) to measure the output.
- D. A licensee shall make full calibration measurements required by subsection (A) in accordance with published protocols accepted by nationally recognized bodies.
- E. In addition to the requirements for full calibrations for low dose-rate remote afterloader units in subsection (B), a licensee shall perform an autoradiograph of the sources to verify inventory and source arrangement at intervals not exceeding one quarter.
- F. For low dose-rate remote afterloader units, a licensee may use measurements provided by the source manufacturer that are made in accordance with subsections (A) through (E).

R9-7-737. Periodic Spot-checks for Teletherapy Units

- A.** A licensee authorized to use teletherapy units for medical use shall perform output spot-checks on each teletherapy unit once in each calendar month that include determination of:
1. Timer accuracy, and timer linearity over the range of use;
 2. On-off error;
 3. The coincidence of the radiation field and the field indicated by the light beam localizing device;
 4. The accuracy of all distance measuring and localization devices used for medical use;
 5. The output for one typical set of operating conditions measured with the dosimetry system described in R9-7-733(B); and
 6. The difference between the measurement made in subsection (A)(5) and the anticipated output, expressed as a percentage of the anticipated output.
- B.** A licensee shall perform measurements required by subsection (A) in accordance with written procedures established by an authorized medical physicist. That individual need not actually perform the spot-check measurements.
- C.** A licensee shall have an authorized medical physicist review the results of each spot-check within 15 days. The authorized medical physicist shall notify the licensee as soon as possible in writing of the results of each spot-check.
- D.** A licensee authorized to use a teletherapy unit for medical use shall perform safety spot-checks of each teletherapy facility once in each calendar month and after each source installation to assure proper operation of:
1. Electrical interlocks at each teletherapy room entrance;
 2. Electrical or mechanical stops installed for the purpose of limiting use of the primary beam of radiation (restriction of source housing angulation or elevation, carriage or stand travel and operation of the beam on-off mechanism);
 3. Source exposure indicator lights on the teletherapy unit, on the control console, and in the facility;
 4. Viewing and intercom systems;
 5. Treatment room doors from inside and outside the treatment room; and
 6. Electrically assisted treatment room doors with the teletherapy unit electrical power turned off.
- E.** If the results of the checks required in subsection (D) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- F.** A licensee shall retain a record of each spot-check required by subsections (A) and (D) for three years from the date of the procedure, and a copy of the procedures required by subsection (B) until licensee terminates all medical activities involving the teletherapy unit.

Historical Note

R9-7-738. Periodic Spot-checks for Remote Afterloader Units

- A.** A licensee authorized to use a remote afterloader unit for medical use shall perform spot-checks of each remote afterloader facility and on each unit:
1. Before the first use of a high dose-rate, medium dose-rate, or pulsed dose-rate remote afterloader unit on a given day;

2. Before each patient treatment with a low dose-rate remote afterloader unit; and
3. After each source installation.

- B.** A licensee shall perform the measurements required by subsection (A) in accordance with written procedures established by an authorized medical physicist. That individual need not actually perform the spot-check measurements.
- C.** A licensee shall have an authorized medical physicist review the results of each spot-check within 15 days. The authorized medical physicist shall notify the licensee as soon as possible in writing of the results of each spot-check.
- D.** To satisfy the requirements of subsection (A), spot-checks shall, at a minimum, assure proper operation of:
1. Electrical interlocks at each remote afterloader unit room entrance;
 2. Source exposure indicator lights on the remote afterloader unit, on the control console, and in the facility;
 3. Viewing and intercom systems in each high dose-rate, medium dose-rate, and pulsed dose-rate remote afterloader facility;
 4. Emergency response equipment;
 5. Radiation monitors used to indicate the source position;
 6. Timer accuracy;
 7. Clock (date and time) in the unit's computer; and
 8. Decayed source activity in the unit's computer.
- E.** If the results of the checks required in subsection (D) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- F.** A licensee shall retain a record of each spot-check required by subsections (A) and (D) for three years from the date of the procedure, and a copy of the procedures required by subsection (B) until licensee terminates all medical activities involving the afterloader unit.

R9-7-739. Periodic Spot-checks for Gamma Stereotactic Radiosurgery Units

- A.** A licensee authorized to use a gamma stereotactic radiosurgery unit for medical use shall perform spot-checks of each gamma stereotactic radiosurgery facility and on each unit:
1. Monthly;
 2. Before the first use of the unit on a given day; and
 3. After each source installation.
- B.** A licensee shall:
1. Perform the measurements required by subsection (A) in accordance with written procedures established by an authorized medical physicist. That individual need not actually perform the spot-check measurements.
 2. Have the authorized medical physicist review the results of each spot-check within 15 days. The authorized medical physicist shall notify the licensee as soon as possible in writing of the results of each spot-check.
- C.** To satisfy the requirements of subsection (A)(1), spot-checks shall, at a minimum:
1. Assure proper operation of:
 - a. Treatment table retraction mechanism, using backup battery power or hydraulic backups with the unit off;
 - b. Helmet microswitches;
 - c. Emergency timing circuits; and
 - d. Stereotactic frames and localizing devices (trunnions).
 2. Determine:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. The output for one typical set of operating conditions measured with the dosimetry system described in R9-7-733(B);
 - b. The difference between the measurement made in subsection (C)(2)(a) and the anticipated output, expressed as a percentage of the anticipated output;
 - c. Source output against computer calculation;
 - d. Timer accuracy and linearity over the range of use;
 - e. On-off error; and
 - f. Trunnion centricity.
- D.** To satisfy the requirements of subsections (A)(2) and (A)(3), spot-checks shall assure proper operation of:
- 1. Electrical interlocks at each gamma stereotactic radiosurgery room entrance;
 - 2. Source exposure indicator lights on the gamma stereotactic radiosurgery unit, on the control console, and in the facility;
 - 3. Viewing and intercom systems;
 - 4. Timer termination;
 - 5. Radiation monitors used to indicate room exposures; and
 - 6. Emergency off buttons.
- E.** A licensee shall arrange for the repair of any system identified in subsection (C) that is not operating properly as soon as possible.
- F.** If the results of the checks required in subsection (D) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- G.** A licensee shall retain a record of each check required by subsections (C) and (D) for three years from the date of the procedure, and a copy of the procedures required by subsection (B) until licensee terminates all medical activities involving the radiosurgery unit.

R9-7-740. Additional Requirements for Mobile Remote Afterloader Units

- A.** A licensee providing mobile remote afterloader service shall:
- 1. Check survey instruments before medical use at each address of use or on each day of use, whichever is more frequent; and
 - 2. Account for all sources before departure from a client's address of use.
- B.** In addition to the periodic spot-checks required by R9-7-738, a licensee authorized to use mobile afterloaders for medical use shall perform checks on each remote afterloader unit before use at each address of use. At a minimum, checks shall be made to verify the operation of:
- 1. Electrical interlocks on treatment area access points;
 - 2. Source exposure indicator lights on the remote afterloader unit, on the control console, and in the facility;
 - 3. Viewing and intercom systems;
 - 4. Applicators, source transfer tubes, and transfer tube-applicator interfaces;
 - 5. Radiation monitors used to indicate room exposures;
 - 6. Source positioning (accuracy); and
 - 7. Radiation monitors used to indicate whether the source has returned to a safe shielded position.
- C.** In addition to the requirements for checks in subsection (B), a licensee shall ensure overall proper operation of the remote afterloader unit by conducting a simulated cycle of treatment before use at each address of use.

- D.** If the results of the checks required in subsection (B) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- E.** A licensee shall retain a record of each check required by subsection (B) for three years from the date of the procedure.

R9-7-741. Additional Radiation Surveys of Sealed Sources used in Radiation Therapy

- A.** In addition to the survey requirement in Article 4 of this Chapter, a person licensed to use sealed sources in the practice of radiation therapy shall make surveys to ensure that the maximum radiation levels and average radiation levels from the surface of the main source safe with each source in the shielded position do not exceed the levels stated in the Sealed Source and Device Registry.
- B.** A licensee shall make the survey required by subsection (A) at installation of a new source and following repairs to any source shielding, a source's driving unit, or other electronic or mechanical component that could expose the source, reduce the shielding around a source, or compromise the radiation safety of the unit or the source.
- C.** A licensee shall retain a record of the radiation surveys required by subsection (A) for three years from the date of each survey.

R9-7-742. Five-year Inspection for Teletherapy and Gamma Stereotactic Radiosurgery Units

- A.** A licensee shall have each teletherapy unit and gamma stereotactic radiosurgery unit fully inspected and serviced during source replacement or at intervals not to exceed five years, whichever comes first, to assure proper functioning of the source exposure mechanism.
- B.** This inspection and servicing may only be performed by persons specifically licensed to do so by the Department, the NRC, or an Agreement State.
- C.** A licensee shall keep a record of each five-year inspection for three years from the date of the inspection, if the inspection determined that service was unnecessary, and three years from the date of the completed service if the inspection determined that service was needed.

R9-7-743. Therapy-related Computer Systems

The licensee shall perform acceptance testing on the treatment planning system of therapy-related computer systems in accordance with published protocols accepted by nationally recognized bodies. At a minimum, the acceptance testing shall include, as applicable, verification of:

- 1. The source-specific input parameters required by the dose calculation algorithm;
- 2. The accuracy of dose, dwell time, and treatment time calculations at representative points;
- 3. The accuracy of isodose plots and graphic displays;
- 4. The accuracy of the software used to determine sealed source positions from radiographic images; and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

5. The accuracy of electronic transfer of the treatment delivery parameters to the treatment delivery unit from the treatment planning system.

R9-7-744. Training for Use of Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units

- A. Except as provided in R9-7-710, a licensee shall require an authorized user of a sealed source for a use authorized under Group 600 in Exhibit A, Medical Use Groups of this Article to be a physician who:

1. Is certified by a medical specialty board whose certification process has been recognized by the Department, the NRC or another Agreement State and who meets the requirements in subsection (A)(2)(c). The names of board certifications that have been recognized by the Department, the NRC or another Agreement State are specified in the NRC's Medical Uses Licensee Toolkit available through <https://www.nrc.gov>. To have its certification process recognized, a specialty board shall require all candidates to:
 - a. Successfully complete a minimum of three years of residency training in a radiation therapy program approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Committee on Post-Graduate Training of the American Osteopathic Association; and
 - b. Pass an examination, administered by diplomates of the specialty board, which tests knowledge and competence in radiation safety, radionuclide handling, treatment planning, quality assurance, and clinical use of stereotactic radiosurgery, remote afterloaders and external beam therapy; or
2. Has completed a structured educational program in basic radionuclide techniques applicable to the use of a sealed source in a therapeutic medical unit that includes:
 - a. 200 hours of classroom and laboratory training in the following areas:
 - i. Radiation physics and instrumentation;
 - ii. Radiation protection;
 - iii. Mathematics pertaining to the use and measurement of radioactivity;
 - iv. Chemistry of radioactive material for medical use; and
 - v. Radiation biology;
 - b. 500 hours of work experience, under the supervision of an authorized user who meets the requirements in this Section, or equivalent Agreement State or NRC requirements at a medical institution, involving:
 - i. Reviewing full calibration measurements and periodic spot-checks;
 - ii. Preparing treatment plans and calculating treatment doses and times;
 - iii. Using administrative controls to prevent a medical event involving the use of radioactive material;
 - iv. Implementing emergency procedures to be followed in the event of the abnormal operation of the medical unit or console;
 - v. Checking and using survey meters; and

- vi. Selecting the proper dose and how it is to be administered;

- c. Completing three years of supervised clinical experience in radiation therapy, under an authorized user who meets the requirements in this Section, or equivalent Agreement State or NRC requirements, as part of a formal training program approved by the Residency Review Committee for Radiation Oncology of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Committee on Post-doctoral Training of the American Osteopathic Association. This experience may be obtained concurrently with the supervised work experience required by subsection (A)(2)(b); and

- d. Obtaining written attestation that the individual has satisfactorily completed the requirements in subsections (A)(2)(a) through (c) and (B), and is able to independently fulfill the radiation safety-related duties as an authorized user of each type of therapeutic medical unit for which the individual is requesting authorized user status. The written attestation must be obtained from either:

- i. A preceptor authorized user who meets the requirements in this Section, NRC requirements, or equivalent Agreement State requirements for the type(s) of therapeutic medical unit for which the individual is requesting authorized user status; or

- ii. A residency program director who affirms in writing that the attestation represents the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in this Section, NRC requirements, or equivalent Agreement State requirements, for the type(s) of therapeutic medical unit for which the individual is requesting authorized user status, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in subsection (A)(2)(a) through (c).

- B. A licensee shall require an authorized user of a sealed source for a use authorized under Group 600 in Exhibit A, Medical Use Groups of this Article to receive training in device operation, safety procedures, and clinical use for the type(s) of use for which authorization is sought. This training requirement may be satisfied by satisfactory completion of a training program provided by the vendor for new users or by receiving training supervised by an authorized user or authorized medical physicist, as appropriate, who is authorized for the type(s) of use for which the individual is seeking authorization.
- C. The training and experience shall have been obtained within the seven years preceding the date of application or the individual shall have had related continuing education and experience since the required training and experience was completed.

R9-7-745. Report and Notification of a Medical Event

A. A licensee shall report any "medical" event, except for an event that results from patient intervention, in which the administration of radioactive material or radiation from radioactive material results in:

1. A dose that differs from the prescribed dose or dose that would have resulted from the prescribed dosage by more than 0.05 Sv (5 rem) effective dose equivalent, 0.5 Sv (50 rem) to an organ or tissue, or 0.5 Sv (50 rem) shallow dose equivalent to the skin; and
 - a. The total dose delivered differs from the prescribed dose by 20 percent or more;
 - b. The total dosage delivered differs from the prescribed dosage by 20 percent or more or falls outside the prescribed dosage range; or
 - c. The fractionated dose delivered differs from the prescribed dose, for a single fraction, by 50 percent or more.
2. A dose that exceeds 0.05 Sv (5 rem) effective dose equivalent, 0.5 Sv (50 rem) to an organ or tissue, or 0.5 Sv (50 rem) shallow dose equivalent to the skin from any of the following:
 - a. An administration of a wrong radiopharmaceutical containing radioactive material;
 - b. An administration of a radiopharmaceutical containing radioactive material by the wrong route of administration;
 - c. An administration of a dose or dosage to the wrong individual or human research subject;
 - d. An administration of a dose or dosage delivered by the wrong mode of treatment; or
 - e. A leaking sealed source.
3. A dose to the skin or an organ or tissue other than the treatment site that exceeds by 0.5 Sv (50 rem) to an organ or tissue and 50 percent or more of the dose expected from the administration defined in the written directive (excluding, for permanent implants, seeds that were implanted in the correct site but migrated outside the treatment site).

B. A licensee shall report any event resulting from intervention of a patient or human research subject in which the administration of radioactive material or radiation from radioactive material results or will result in unintended permanent functional damage to an organ or a physiological system, as determined by a physician.

C. The licensee shall notify by telephone the Department no later than the next calendar day after discovery of the medical event.

D. The licensee shall submit a written report to the Department within 15 days after discovery of the medical event.

1. The written report shall include:
 - a. The licensee's name;
 - b. The name of the prescribing physician;
 - c. A brief description of the event;
 - d. Why the event occurred;
 - e. The effect, if any, on each individual who received the administration;
 - f. What actions, if any, have been taken or are planned to prevent recurrence; and
 - g. Certification that the licensee notified each individual (or the individual's responsible relative or guardian), and if not, why not.

2. The report may not contain an individual's name or any other information that could lead to identification of the individual.

E. The licensee shall provide notification of the event to the referring physician and also notify the individual who is the subject of the medical event no later than 24 hours after its discovery, unless the referring physician personally informs the licensee either that he or she will inform the individual or that, based on medical judgment, telling the individual would be harmful. The licensee is not required to notify the individual without first consulting the referring physician. If the referring physician or the affected individual cannot be reached within 24 hours, the licensee shall notify the individual as soon as possible thereafter. The licensee may not delay any appropriate medical care for the individual, including any necessary remedial care as a result of the medical event, because of any delay in notification. To meet the requirements of this subsection, the notification of the individual who is the subject of the medical event may be made instead to that individual's responsible relative or guardian. If a verbal notification is made, the licensee shall inform the individual, or appropriate responsible relative or guardian, that a written description of the event can be obtained from the licensee upon request. The licensee shall provide such a written description if requested.

F. Aside from the notification requirement, nothing in this Section affects any rights or duties of licensees and physicians in relation to each other, to individuals affected by the medical event, or to that individual's responsible relatives or guardians.

G. A licensee shall:

1. Annotate a copy of the report provided to the Department with the:
 - a. Name of the individual who is the subject of the event; and
 - b. Social Security number or other identification number, if one has been assigned, of the individual who is the subject of the event; and
2. Provide a copy of the annotated report to the referring physician, if other than the licensee, no later than 15 days after the discovery of the event.

R9-7-746. Report and Notification of a Dose to an Embryo, Fetus, or Nursing Child

A. A licensee shall report any dose to an embryo/fetus that is greater than 50 mSv (5 rem) dose equivalent that is a result of an administration of radioactive material or radiation from radioactive material to a pregnant individual unless the dose to the embryo/fetus was specifically approved, in advance, by the authorized user.

B. A licensee shall report any dose to a nursing child that is a result of an administration of radioactive material to a breastfeeding individual that:

1. Is greater than 50 mSv (5 rem) total effective dose equivalent; or
2. Has resulted in unintended permanent functional damage to an organ or a physiological system of the child, as determined by a physician.

C. The licensee shall notify the Department by telephone no later than the next calendar day after discovery of a dose to the embryo, fetus, or nursing child that requires a report in subsections (A) or (B).

D. The licensee shall submit a written report to the Department within 15 days after discovery of a dose to the embryo, fetus,

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

or nursing child that requires a report in subsections (A) or (B). The written report shall include:

1. The licensee's name;
2. The name of the prescribing physician;
3. A brief description of the event;
4. Why the event occurred;
5. The effect, if any, on the embryo/fetus or the nursing child;
6. What actions, if any, have been taken or are planned to prevent recurrence; and
7. Certification that the licensee notified the pregnant individual or mother (or the mother's or child's responsible relative or guardian), and if not, why not.

E. The report, required in subsection (D), shall not contain the individual's or child's name or any other information that could lead to identification of the individual or child.

F. The licensee shall provide notification of the event to the referring physician and also notify the pregnant individual or mother, both hereafter referred to as the mother, no later than 24 hours after discovery of an event that would require reporting under subsections (A) or (B), unless the referring physician personally informs the licensee either that he or she will inform the mother or that, based on medical judgment, telling the mother would be harmful. The licensee is not required to notify the mother without first consulting with the referring physician. If the referring physician or mother cannot be reached within 24 hours, the licensee shall make the appropriate notifications as soon as possible thereafter. The licensee shall not delay any appropriate medical care for the embryo, fetus, or for the nursing child, including any necessary remedial care as a result of the event, because of any delay in notification. To meet the requirements of this subsection, the notification may be made to the mother's or child's responsible relative or guardian instead of the mother. If a verbal notification is made, the licensee shall inform the mother, or the mother's or child's responsible relative or guardian, that a written description of the event can be obtained from the licensee upon request. The licensee shall provide the written description upon request.

G. A licensee shall:

1. Make a copy of the report provided to the Department and include with it the:
 - a. Name of the pregnant individual or the nursing child who is the subject of the event; and
 - b. Social Security number or other identification number, if one has been assigned, of the pregnant individual or the nursing child who is the subject of the event; and
2. Provide the copy of the information required in subsection (G)(1) to the referring physician, if other than the licensee, no later than 15 days after the discovery of the event.

Exhibit A. Medical Use Groups

Group 100

Included is the use of any unsealed radioactive material for use in uptake, dilution, or excretion studies and not requiring a written directive: The radioactive material in this group shall be:

1. Obtained from a manufacturer or preparer licensed under R9-7-703(C)(2)(a), or equivalent NRC or Agreement State requirements; or
2. Obtained from a PET radioactive drug producer licensed under R9-7-703 or equivalent NRC or an Agreement

State license excluding production of PET radionuclides prepared by an authorized nuclear pharmacist who meets the requirements in R9-7-712, a physician who is an authorized user and who meets the requirements specified in R9-7-721, or R9-7-723 and R9-7-721(3)(b)(vii), or an individual under the supervision of either as specified in R9-7-706; or

3. If a research protocol:

- a. Obtained from and prepared by an Agreement State or NRC licensee for use in research in accordance with a Radioactive Drug Research Committee-approved protocol or an Investigational New Drug (IND) protocol accepted by FDA; or
- b. Prepared by the licensee for use in research in accordance with a Radioactive Drug Research Committee-approved application or an Investigational New Drug (IND) protocol accepted by FDA.

Group 200

Included is the use of any unsealed radioactive material for use in imaging and localization not requiring a written directive. PET radiopharmaceuticals may be used if the licensee meets the requirements in R9-7-716. The radioactive material in this group shall be:

1. Obtained from a manufacturer or preparer licensed under R9-7-703(C)(2)(a), or equivalent NRC or Agreement State requirements; or
2. Obtained from a PET radioactive drug producer licensed under R9-7-703 or an equivalent NRC or Agreement State license excluding production of PET radionuclides prepared by an authorized nuclear pharmacist who meets the requirements in R9-7-712, a physician who is an authorized user and who meets the requirements specified in R9-7-721, or R9-7-723 and R9-7-721(3)(b)(vii), or an individual under the supervision of either as specified in R9-7-706; or
3. If a research protocol:
 - a. Obtained from and prepared by an Agreement State or NRC licensee for use in research in accordance with a Radioactive Drug Research Committee-approved application or an Investigational New Drug (IND) protocol accepted by FDA; or
 - b. Prepared by the licensee for use in research in accordance with a Radioactive Drug Research Committee-approved application or an Investigational New Drug (IND) protocol accepted by FDA.

Group 300

Included is the use of any unsealed radioactive material for medical use (radiopharmaceutical) for which a written directive is required. The radioactive material in this group shall be:

1. Obtained from a manufacturer or preparer licensed under R9-7-703(C)(2)(a) or equivalent NRC or Agreement State requirements; or
2. Obtained from a PET radioactive drug producer licensed under R9-7-703 or equivalent NRC or an Agreement State license excluding production of PET radionuclides prepared by an authorized nuclear pharmacist who meets the requirements in R9-7-712, a physician who is an authorized user and who meets the requirements specified in R9-7-721 or R9-7-723, or an individual under the supervision of either as specified in R9-7-706; or
3. If a research protocol:
 - a. Obtained from and prepared by an Agreement State or NRC licensee for use in research in accordance with an Investigational New Drug (IND) protocol accepted by FDA; or

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- b. Prepared by the licensee for use in research in accordance with an Investigational New Drug (IND) protocol accepted by FDA.

Group 400

Included is the use of any brachytherapy source for therapeutic medical use that is manufactured in accordance with R9-7-703(C)(2)(b) and:

1. Approved for therapeutic use in the Sealed Source and Device Registry; or
2. Part of a research protocol that is approved for therapeutic use under an active Investigational Device Exemption (IDE) application accepted by the FDA, and meets the requirements of R9-7-709.

Group 500

Included is the use of any sealed source that is manufactured in accordance with R9-7-703(C)(2)(b), and is approved for diagnostic use in the Sealed Source and Device Registry.

Group 600

Included is the use of sealed sources in photon emitting remote afterloader units, teletherapy units, or gamma stereotactic radiosurgery units that are manufactured in accordance with R9-7-703(C)(2)(b) and:

1. Approved for therapeutic use in the Sealed Source and Device Registry; or
2. Part of a research protocol that is approved for therapeutic use under an active Investigational Device Exemption (IDE) application accepted by the FDA and meets the requirements of R9-7-709.

Group 1000

A licensee may use radioactive material or a radiation source approved for medical use which is not specifically addressed in R9-7-309(4) if:

1. The applicant or licensee has submitted the information required by this Article; and
2. The applicant or licensee has received written approval from the Department in a license or license amendment and uses the material in accordance with the rules and specific conditions the Department considers necessary for the medical use of the material.

ARTICLE 8. RADIATION SAFETY REQUIREMENTS FOR ANALYTICAL X-RAY OPERATIONS**R9-7-801. Scope**

The rules in this Article establish requirements for the use of analytical x-ray equipment by persons registered under R9-7-204. The provisions of this Article supplement other applicable provisions of this Chapter.

Historical Note

New Section R9-7-801 recodified from R12-1-801 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-802. Definitions

"Analytical x-ray equipment" means devices or machines used for x-ray diffraction or x-ray induced fluorescence analysis.

"Analytical x-ray system" means a group of components utilizing x-rays to determine the elemental composition or to examine the microstructure of materials.

"Enclosed beam x-ray system" means an analytical x-ray system constructed in such a way that access to the interior of the enclosure housing the x-ray source is precluded during operation except through bypassing of interlocks or other safety devices to perform maintenance or servicing.

"Fail-safe characteristic" means a design feature which causes beam port shutters to close, or otherwise prevents emergence of the primary beam, upon the failure of a safety or warning device.

"Local component" means part of an analytical x-ray system and includes each area that is struck by x-rays, such as radiation source housings, port and shutter assemblies, collimators, sample holders, cameras, goniometers, detectors and shielding, but does not include power supplies, transformers, amplifiers, readout devices, and control panels.

"Normal operating procedures" means instructions or procedures including, but not limited to, sample insertion and manipulation, equipment alignment, routine maintenance by the registrant, and data recording procedures which are related to radiation safety.

"Open beam x-ray system" means an analytical x-ray system which permits an individual to place some body part in the primary beam path during normal operation.

"Primary beam" means radiation which passes through an aperture of the source housing on a direct path from the x-ray tube.

Historical Note

New Section R9-7-802 recodified from R12-1-802 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-803. Enclosed-beam X-ray Systems

- A. Enclosed beam x-ray systems are exempt from other equipment requirements contained in this Article provided the enclosed beam x-ray systems are designed and constructed so that radiation levels measured at 5 cm from any accessible surface of the enclosure housing the x-ray source do not exceed 5 μ Sv (0.5 mrem) in one hour.
- B. A registrant using enclosed beam x-ray systems shall comply with applicable provisions R9-7-804(A), R9-7-805(B), and 9 A.A.C. 7, Article 4.
- C. A person who maintains or services analytical x-ray systems, shall:
 1. Obtain permission in advance from the radiation safety officer before bypassing interlocks or other safety devices,
 2. Label equipment as "out of service" until maintenance or service is completed,
 3. Wear extremity personnel monitoring devices, and
 4. Ensure that interlocks or other safety devices are operating upon completion of maintenance or service.

Historical Note

New Section R9-7-803 recodified from R12-1-803 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-804. Open-beam X-ray Systems

- A. A registrant shall label open beam x-ray systems with a readily discernible sign or signs bearing the radiation symbol and the words:
 1. "CAUTION -- HIGH INTENSITY X-RAY BEAM," or a similar warning, on the x-ray source housing; and
 2. "CAUTION RADIATION -- THIS EQUIPMENT PRODUCES RADIATION WHEN ENERGIZED" or a similar warning, near any switch that energizes an x-ray tube if the radiation source is an x-ray tube.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- B.** A registrant shall ensure that an open beam x-ray system has all of the following warning devices:
1. X-ray tube status (On-Off) indicator in systems where the primary beam is controlled in this fashion;
 2. Shutter status (Open-Closed) indicators near each port on the radiation housing for systems which control the primary beam; and
 3. A clearly visible warning light labeled with the words "X-RAY ON," or a similar warning located near any switch that energizes an x-ray tube, illuminated only when the tube is energized; and
 4. The warning devices in subsections (B)(1) through (3) shall be labeled so that their purpose is easily identified.
- C.** A registrant shall ensure that any apparatus utilized in beam alignment procedures is designed in such a way that excessive radiation will not strike the operator. Particular attention shall be given to viewing devices, in order to ascertain that lenses and other transparent components attenuate the beam to an acceptable level.
- D.** A registrant shall provide an interlock device which prevents entry of any portion of an individual's body into the primary beam or causes the primary beam to be shut off upon entry into its path on all open-beam x-ray systems. A registrant may apply to the Department for an exemption from the requirements of a safety device. An application for exemption shall include:
1. A description of the various safety devices that have been evaluated;
 2. The reason each device cannot be used; and
 3. A description of the alternative methods that will be used to minimize accidental exposure, including procedures to assure that operators and others in the area will be informed of the absence of safety devices.
- E.** A registrant shall use only systems constructed so that:
1. Each x-ray tube housing is equipped with an interlock that automatically shuts off the tube if the tube is removed from the radiation source housing or the housing is disassembled; and
 2. With all shutters closed, radiation measured at a distance of 5 centimeters from the surface of the system is not capable of producing a dose that exceeds 25 Sv (2.5 mRem) in one hour for the specified tube rating of the x-ray tube.
- F.** A registrant shall supply each x-ray generating system with a protective cabinet that limits leakage radiation measured at a distance of 5 cm (2 in) from the cabinet surface, so that the system is not capable of producing a dose equivalent that exceeds 25 μ Sv (2.5 mrem) in one hour.
- G.** A registrant shall ensure that the local components of an analytical x-ray system are located and arranged and have sufficient shielding or access control for the specified tube rating to prevent the radiation level in any area adjacent to the local component group from exceeding the dose limits in R9-7-416.
- H.** A registrant shall perform a radiation survey of the local component group of each analytical x-ray system to demonstrate compliance with subsection (G) upon:
1. Installation,
 2. Change in configuration, or
 3. Maintenance that affects the radiation level in any area adjacent to the local component group.
- I.** A registrant shall maintain a record of each survey for three years or until the analytical x-ray system is no longer used, whichever period is shorter.

Historical Note

New Section R9-7-804 recodified from R12-1-804 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-805. Administrative Responsibilities

- A.** A registrant shall designate a radiation safety officer who shall:
1. Establish and maintain operational procedures so that the radiation exposure of each worker is kept ALARA;
 2. Instruct all personnel who work with or near radiation producing machines in safety practices;
 3. Maintain a system of personnel monitoring;
 4. Establish radiation control areas, including placement of appropriate radiation warning signs or devices;
 5. Provide a radiation safety inspection of radiation producing machines on a routine basis;
 6. Review modifications to x-ray systems, including x-ray tube housing, cameras, diffractometers, shielding, and safety interlocks;
 7. Investigate and report proper authorities any case of excessive exposure to personnel and take remedial action; and,
 8. Be familiar with all applicable rules for control of ionizing radiation.
- B.** An individual shall not be permitted to operate or maintain an open beam analytical x-ray system unless the individual has received instruction in and demonstrated competence in all of the following:
1. Identification of radiation hazards associated with the use of the equipment;
 2. Significance of all radiation warning and safety devices, interlocks incorporated into the equipment, or the reasons that devices or interlocks have not been installed on certain pieces of equipment and the extra precautions required in lieu of these precautions;
 3. Proper operating procedures for the equipment;
 4. Recognition of symptoms of acute localized radiation exposure; and
 5. Proper procedure for reporting an actual or suspected exposure.
- C.** A registrant shall maintain records of instruction and competence for Department inspection for three years from the date of course completion or demonstration.

Historical Note

New Section R9-7-805 recodified from R12-1-805 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-806. Operating Requirements

- A.** A radiation safety officer shall establish written emergency procedures and post the procedures in a conspicuous location. The procedures shall include the telephone number of the radiation safety officer.
- B.** A registrant shall ensure that written operating procedures are available for all analytical x-ray equipment workers. An individual shall not operate analytical x-ray equipment in any manner other than that specified in the procedures unless the individual obtains the radiation safety officer's written approval.
- C.** An individual shall not bypass a safety device or interlock unless the individual has obtained Radiation Safety Officer approval. The approval shall be for a specific period of time. When a safety device or interlock has been bypassed, the Radiation Safety Officer shall place a readily discernible sign on the radiation source housing, warning the reader of the unsafe condition. A registrant shall maintain the written record of the bypass approval for three years after the approval expires.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- D. Except as authorized in subsection (C), an individual shall not perform an operation involving removal of covers, shielding materials, or tube housings or modification of shutters, collimators, or beam stops without ascertaining that the tube is off and that it will remain off until all protective devices have been restored to the normal operating condition. An individual repairing analytical x-ray equipment shall use the main switch, rather than interlocks, for routine shutdown in preparation for repairs.
- E. A registrant shall ensure that unused ports on radiation source housings are closed and secured against unauthorized access to the radiation source.
- F. Finger or wrist personnel monitoring devices shall be used by:
1. Operators of open beam analytical x-ray equipment not equipped with a safety device; and
 2. Personnel performing maintenance procedures that require the presence of a primary x-ray beam when any local component is disassembled or removed.
- G. A registrant shall ensure that each safety and warning device is tested for proper operation at intervals that do not exceed one month and maintain a record of each test for three years from the date the test is completed.

R9-7-807. Surveys

- A. To ensure that personnel exposure does not result in a dose to an individual that exceeds the dose limits specified in Article 4, a registrant shall perform a radiation survey upon:
1. Installation of the equipment and at least once each year after installation;
 2. Change in the initial arrangement, number, or type of local components in the system;
 3. Maintenance that involves disassembly or removal of a local component in the system;
 4. Maintenance that involves alignment, if alignment requires the generation of the primary x-ray beam while any local component of the system is disassembled or removed;
 5. A visual inspection of the local components in the system that reveals an abnormal condition; or
 6. Determination that personnel are being exposed to radiation in excess of established levels recorded in monitoring records for personnel during previous monitoring periods or the occupational dose limits specified in Article 4.
- B. The radiation surveys in subsection (A) are not required if the registrant demonstrates that the local components of an analytical x-ray system are located and arranged, and have sufficient shielding or access control, to limit personnel exposure to a level that is ALARA and below the occupational dose limits in Article 4. The Department shall determine ALARA radiation levels based on the specified x-ray tube rating.

R9-7-809. Training

A registrant shall not allow an individual to operate or maintain analytical x-ray equipment unless the individual has received training and demonstrated competence in:

1. Identifying radiation hazards associated with use of the equipment;
2. Recognizing and using radiation warning and safety devices, including interlocks that are incorporated into the equipment, and understanding why these devices are sometimes not installed;
3. Taking precautions associated with use of the equipment;
4. Recognizing symptoms of an acute localized exposure; and
5. Following proper procedure for reporting a suspected personnel exposure.

ARTICLE 9. PARTICLE ACCELERATORS**R9-7-901. Purpose and Scope**

- A. This Article establishes procedures and requirements for the registration and the use of particle accelerators.
- B. In addition to the requirements of this Article, all registrants are subject to the requirements of Articles 1, 2, 4 and 10. Registrants engaged in industrial radiographic operations are subject to the requirements of Article 11, and registrants engaged in the healing arts are subject to the requirements of Article 6 of this Chapter. Registrants using a particle accelerator for the production of radioactive material are subject to the requirements of Article 3, and if the radioactive material is used for medical purposes, Article 7.

A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-902. Definitions

The following definitions apply in this Article, unless the context otherwise requires:

"Added filter" (See Article 6)

"Arc therapy" means radiation therapy that uses electrons to treat large, superficial volumes that follow curved surfaces, as in postmastectomy patients.

"Authorized medical physicist" means an individual who meets the requirements in R9-7-711. For purposes of ensuring that personnel are adequately trained, an authorized medical physicist is a "qualified expert" as defined in Article 1.

"Beam-limiting device" (See Article 6)

"Beam-monitoring system" means a system of devices that will monitor the useful beam during irradiation and terminate irradiation when a preselected number of monitor units has been accumulated.

"Control panel" (See Article 6)

"Full beam detector" means a radiation detector of such size that the total cross section of the maximum size useful beam is intercepted.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Gantry” means that part of a linear accelerator that supports the radiation source so that it can rotate about a horizontal axis.

“Interlock” (See Article 1)

“Isocenter” means the point of intersection of the collimator axis and the axis of rotation of the gantry.

“Monitor unit” means a unit response from the beam monitoring system from which the absorbed dose can be calculated.

“Moving beam therapy” means radiation therapy in which there is displacement of the useful beam relative to the patient. Moving beam therapy includes arc therapy, skip therapy, and rotational beam therapy.

“Rotational beam therapy” means radiation therapy that is administered to a patient from a radiation source that rotates around the patient’s body or the patient is rotated while the beam is held fixed.

“Skip therapy” means rotational beam therapy that is administered in a way that maximizes the dose to an area of interest and minimizes the dose to surrounding healthy tissue.

“Spot check” (See Article 6)

“Stationary beam therapy” means radiation therapy that involves a beam from a radiation source that is aimed at the patient from different directions. The distance of the source from the isocenter remains constant irrespective of the beam direction.

“Virtual source” means a point from which radiation appears to originate.

R9-7-903. General Registration Requirements

- A. The requirements in this Section supplement the registration requirements in 9 A.A.C. 7, Article 2.
- B. The Department shall approve a registration application for use of a particle accelerator only if the Department determines that:
 1. The applicant is qualified by training and experience to use the accelerator for the purpose in the application submitted to the Department under Article 2;
 2. The applicant’s proposed equipment, facilities, and operating and emergency procedures are adequate to protect public health;
 3. The applicant satisfies any other applicable 1 requirements in this Section; and 4. The applicant has appointed a radiation safety officer.

R9-7-904. Registration of Particle Accelerators Used in the Practice of Medicine

- A. The requirements in this Section supplement the registration requirements in R9-7-903.
- B. An applicant that is a “medical institution,” as defined in 9 A.A.C. 7, Article 7, and performing human research shall appoint a radiation safety committee that meets the following requirements:
 1. The committee shall consist of at least four individuals and shall include:
 - a. An authorized user of each type of use permitted by the registration,

- b. The Radiation Safety Officer,
 - c. A representative of the nursing service, and
 - d. A representative of management who is neither an authorized user nor a Radiation Safety Officer, and
 - e. Any other members the registrant selects;
 2. The committee shall meet at least once in each 12-month period, unless otherwise specified by registration condition;
 3. To conduct business at least 50 percent of the membership of the committee shall be present including the Radiation Safety Officer and the management representative;
 4. The minutes of each radiation safety committee meeting shall include a reference of any discussion or documents related to the review required in R9-7-407(C);
 5. Review the radiation safety program for all sources of radiation as required in R9-7-407(C);
 6. Establish a table that contains investigational levels for occupational and public dose that, when exceeded, will initiate an investigation and consideration of actions by the Radiation Safety Officer; and
 7. Establish the safety objectives of the quality management program required by subsection (E).
- C. The applicant shall ensure that an individual designated as an authorized user is an Arizona licensed physician; approved by the radiation safety committee, if applicable; and is:
1. Certified in:
 - a. Radiology, therapeutic radiology, or radiation oncology by the American Board of Radiology; or
 - b. Radiation oncology by the American Osteopathic Board of Radiology; or
 - c. Radiology, with specialization in radiotherapy, as a British “Fellow of the Faculty of Radiology” or “Fellow of the Royal College of Radiology”; or
 - d. Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or
 2. Engaged in the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic techniques applicable to the use of a particle accelerator, 500 hours of supervised work experience, and a minimum of three years of supervised clinical experience.
 - a. To satisfy the requirement for instruction, the classroom and laboratory training shall include all of the following subjects:
 - i. Radiation physics and instrumentation,
 - ii. Radiation protection,
 - iii. Mathematics pertaining to the use and measurement of radiotherapy, and
 - iv. Radiation biology.
 - b. To satisfy the requirement for supervised work experience, training shall occur under the supervision of an authorized user at a medical institution and shall include:
 - i. Reviewing full calibration measurements and periodic spot checks,
 - ii. Preparing treatment plans and calculating treatment times,
 - iii. Using administrative controls to prevent misadministration,
 - iv. Implementing emergency procedures to be followed in the event of the abnormal operation of a particle accelerator, and
 - v. Checking and using survey meters.
 - c. To satisfy the requirement for a period of supervised clinical experience, training shall include one year in a formal training program approved by the Residency Review Committee for Radiology of the

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional two years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience shall include:

- i. Examining individuals and reviewing their case histories to determine their suitability for treatment, noting any limitations or contraindications;
 - ii. Selecting the proper dose and how it is to be administered;
 - iii. Calculating the therapy doses and collaborating with the authorized user in the review of patients' or human research subjects' progress and consideration of the need to modify originally prescribed doses, as warranted by patients' or human research subjects' reaction to radiation; and
 - iv. Post-administration follow up and review of case histories.
- D.** With the application the applicant shall provide the name of each authorized user to the Department so the names can be listed on the registration form, and so that the Department can determine whether the authorized user's training and experience satisfies the requirements in subsection (C).
- E.** Each registrant shall establish and maintain a written quality management program to provide high confidence that the radiation produced by the particle accelerator will be administered as directed by an authorized user. The quality management program shall include, at minimum, the tests and checks listed in Appendix A.
- F.** Each registrant shall ensure that a particle accelerator is calibrated by an authorized medical physicist who meets the training and experience qualifications in R9-7-711.
- G.** At the time of application for registration or when a therapy program is expanded to multiple sites, each applicant or registrant shall provide the Department with a description of the quality management program, a listing of the professional staff assigned to the facility, and the expected ratio of patient workload to staff member for programs involving multiple therapy sites. If the staffing ratio exceeds the recommended levels in Radiation Oncology in Integrated Cancer Management, Report of the Inter-Society Council for Radiation Oncology, December 1991, the applicant shall provide to the Department for approval the justification for the larger ratio and the safety considerations that have been addressed in establishing the program. This report is incorporated by reference and available under R9-7-101. The incorporated material contains no future editions or amendments. R9-7-905. Medical Particle Accelerator Equipment, Facility and Shielding, and Spot Checks**A. Equipment**

1. Leakage radiation
 - a. X-ray leakage radiation from the source housing assembly shall not exceed 0.1 percent of the maxi-

mum dose equivalent rate of the unattenuated useful beam.

- b. Neutron leakage radiation from the source housing assembly shall not exceed 0.5 percent of the maximum dose equivalent rate of the unattenuated useful beam.
 - c. Leakage radiation measurements made at any point 1 meter from the path of the charged particle between its point of origin and the target, window or scattering foil shall meet the requirements of subsection (A)(1)(a) and (b) when computed as a percentage of the dose rate equivalent of the unattenuated useful beam measured at 1 meter from the virtual source. Leakage radiation measurements at each point shall be averaged over an area up to but not exceeding 100 square centimeters (15.5 square inches).
 - d. The registrant shall maintain, for inspection by the Department, records that show leakage radiation measurements for the life of the operation.
- 2.** Beam limiting devices (not to include blocks or wedges). Adjustable or interchangeable beam limiting devices shall be provided and shall transmit no more than 2 percent of the useful beam for the portion of the useful beam that is to be attenuated by the beam limiting device. The neutron component of the useful beam shall not be included in this requirement. Measurements shall be averaged over an area up to but not exceeding 100 square centimeters (15.5 square inches) at the normal treatment distance.
- 3.** Filters. The following requirements apply to systems that use a system of wedge filters, interchangeable field flattening filters, or interchangeable beam scattering filters:
- a. Irradiation shall not be possible until a selection of a filter has been made at the treatment control panel;
 - b. An interlock system shall be provided to prevent irradiation if the filter selected is not in the correct position;
 - c. An indication of the wedge filter orientation with respect to the treatment field shall be provided at the control panel, by direct observation, or by electronic means, when wedge filters are used;
 - d. A display shall be provided at the treatment control panel showing the filter or filters in use;
 - e. Each filter that is removable from the system shall be clearly identified as to that filter's material of construction, thickness, and the nominal wedge angle for wedge filters, or a record tracing these factors for each filter shall be maintained at the system console; and
 - f. An interlock shall be provided to prevent irradiation if any filter selection operation carried out in the treatment room does not agree with the filter selection operation carried out at the treatment control panel.
- 4.** Beam monitor. Equipment installed after the effective date of this Section shall be provided with at least one radiation detector in the radiation head. This detector shall be incorporated into a primary system so that all of the following criteria are met:
- a. Each primary system shall have a detector that is a transmission detector and a full beam detector and that is placed on the patient side of any fixed added filters other than a wedge filter;
 - b. The detectors shall be removable only with tools and shall be interlocked to prevent incorrect positioning;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- c. Each detector shall be capable of independently monitoring and controlling the useful beam;
 - d. Each detector shall form part of a dose-monitoring system from which the absorbed dose can be calculated at a reference point in the treatment volume;
 - e. Each dose monitoring system shall have a legible display at the treatment control panel that:
 - i. Maintains a reading until intentionally reset to zero;
 - ii. Has only one scale and no scale multiplying factors in replacement equipment; and
 - iii. Utilizes a design such that increasing dose is displayed by increasing numbers and is designed so that, in the event of an overdosage of radiation, the absorbed dose may be accurately determined under all nominal conditions of use or foreseeable failures;
 - f. In the event of power failure, the dose monitoring information required in subsection (A)(4) displayed at the control panel at the time of failure shall be retrievable in at least one system; and
 - g. Selection and display of dose monitor units;
 - i. Irradiation shall not be possible until a selection of dose monitor units has been made at the treatment control panel.
 - ii. Each primary system shall terminate irradiation when the preselected number of dose monitor units has been detected by the system.
 - iii. Each secondary system shall terminate irradiation when 110 percent of the preselected number of dose monitor units has been detected by the system.
 - iv. It shall be possible to interrupt irradiation and equipment movements at any time from the operator's position at the treatment control panel. Following an interruption, it shall be possible to restart irradiation by operator action without any reselection of operating conditions. If any change is made of a preselected value during an interruption the equipment shall go to termination condition.
 - v. It shall be possible to terminate irradiation and equipment movements, or go from an interruption condition to termination conditions at any time from the operator's position at the treatment control panel.
5. Beam monitoring system. All accelerator systems shall be provided with a beam monitoring system in the radiation head capable of monitoring and terminating irradiation.
- a. Each beam monitoring system shall have a display at the treatment control panel that registers the accumulated monitor units.
 - b. The beam monitoring system shall terminate irradiation if the preselected number of monitor units has been detected by the system.
 - c. For units with a secondary beam monitoring system, the primary beam monitoring system shall terminate irradiation if the preselected number of monitor units has been detected. The secondary beam monitoring system shall terminate irradiation if the primary system fails.
 - d. In the event of a power failure, the display information required in subsection (A)(5)(a) shall be retained in at least one system following the power failure.
 - e. An interlock device shall prevent irradiation if any beam monitoring system is inoperable.
 - f. For purposes of this rule:
 - i. "Beam monitoring system" means a system of devices that will monitor the useful beam during irradiation and will terminate irradiation if a preselected number of monitor units is accumulated.
 - ii. "Monitor unit" means a unit response from the beam monitoring system from which the absorbed dose can be calculated.
6. Treatment beam mode selection. In equipment capable of both x-ray and electron therapy:
- a. Irradiation shall not be possible until a selection of radiation type is made at the treatment control panel;
 - b. An interlock system shall be provided to prevent irradiation if any selected operations carried out in the treatment room do not agree with the selected operations indicated at the treatment control panel;
 - c. An interlock system shall be available and in operating condition on a therapy machine, and shall be used to prevent unwanted x-ray or electron irradiation when preparing for, or performing radiation therapy procedures. The interlock system need not be available for use, if the therapy machine is only used to make an image of an inanimate object; and
 - d. The radiation type selected shall be displayed at the treatment control panel before and during irradiation.
7. Treatment beam energy selection. Equipment capable of generating radiation beams of different energies shall meet all of the following requirements:
- a. Irradiation shall not be possible until a selection of energy is made at the treatment control panel;
 - b. An interlock system shall be provided to ensure that the equipment can emit only the energy of radiation that is selected;
 - c. An interlock system shall be provided to prevent irradiation if any selected operations carried out in the treatment room do not agree with the selected operations indicated at the treatment control panel; and
 - d. The energy selected shall be displayed at the treatment control panel before and during irradiation.
8. Selection of stationary or moving beam therapy. Equipment capable of both stationary and moving beam therapy modes shall meet all of the following requirements:
- a. Irradiation shall not be possible until a selection of stationary beam therapy or moving beam therapy is made at the treatment control panel;
 - b. An interlock system shall be provided to ensure that the equipment can operate only in the mode that is selected;
 - c. An interlock system shall be provided to prevent irradiation if any selected operations carried out in the treatment room do not agree with the selected operations indicated at the treatment control panel;
 - d. An interlock system shall be provided to terminate irradiation if the movement stops during moving beam therapy;
 - e. Moving beam therapy shall be so controlled that the required relationship between the number of dose monitor units and movement is obtained; and
 - f. The mode of operation shall be displayed at the treatment control panel.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

9. Focal spot location and beam orientation. The registrant shall determine, or obtain from the manufacturer, the location in reference to an accessible point on the radiation head of all of the following:
 - a. The x-ray target or the virtual source of x-rays,
 - b. The electron window or the scattering foil, and
 - c. All possible orientations of the useful beam.
 10. System checking facilities. Capabilities shall be provided for checking of all safety interlock systems.
- B. Facility and shielding requirements.**
1. In addition to protective barriers sufficient to ensure compliance with R9-7-907, all of the following design requirements apply:
 - a. Except for entrance doors or beam interceptors, all the required barriers shall be fixed barriers;
 - b. The treatment control panel shall be located outside the treatment room;
 - c. Windows, mirrors, operable closed-circuit television, or other equivalent viewing systems shall be provided to permit continuous observation of the patient during irradiation and shall be so located that the operator may observe the patient from the treatment control panel;
 - d. Provision shall be made for two-way oral communication between the patient and the operator at the treatment control panel;
 - e. Each point of entry into the treatment room shall be provided with warning lights that will indicate when the useful beam is "on" in a readily observable position outside of the room; and
 - f. Interlocks shall be provided and shall result in all entrance doors being closed before treatment can be initiated or continued. If the radiation beam is interrupted by any door opening, it shall be possible to restore the machine to operation only by closing the door and reinitiating exposure by manual action at the control panel.
 2. An authorized medical physicist, trained and experienced in the principles of radiation protection, shall perform a radiation protection survey on all installations before human use and after any change in an installation that might produce a radiation hazard. The authorized medical physicist shall provide the survey results in writing to the individual in charge of the installation and transmit a copy of the survey results to the Department.
 3. Calibrations.
 - a. Calibration of the therapy system, including radiation output calibration, shall be performed before placing new installations into operation for the purpose of irradiation of patients. Subsequent calibrations shall be made at intervals not to exceed 12 months, and after any change that may cause the calibration of the therapy system to change.
 - b. Calibration of the radiation output of the therapy beam shall be performed with an instrument that has been calibrated using a method that is traceable to the National Institute of Standards and Technology (NIST), within the preceding two years.
 - c. Calibration of a particle accelerator shall be performed by, or under the supervision of an authorized medical physicist who meets the qualification requirements specified in R9-7-711, and a copy of the calibration report shall be maintained by the registrant for inspection by the Department.
 - d. Calibration of the therapy beam shall include, but not necessarily be limited to, all of the following determinations:
 - i. Verification that the equipment is operating within the design specifications concerning the light localizer, the side light and back pointer alignment with the isocenter, when applicable, variation in the axis of rotation for the table, gantry and jaw system, and beam flatness and symmetry at specific depths;
 - ii. The exposure rate or dose rate in air or at various depths of water for the range of field sizes used for each effective energy, and for each treatment distance used for radiation therapy;
 - iii. The congruence between the radiation field and the field defined by the localizing device;
 - iv. The uniformity of the radiation field and its dependency upon the direction of the useful beam; and
 - v. The calibration determinations above shall be provided in sufficient detail, to allow the absorbed dose to tissue in the useful beam to be calculated to within plus or minus 5 percent.
 - e. Records of calibrations shall be maintained for three years following the date the calibration was performed.
 - f. A copy of the current calibration report shall be available in the therapy facility for use by the operator, and the report shall contain the following information:
 - i. The action taken by the authorized medical physicist performing the calibration if it indicates a change has occurred since the last calibration,
 - ii. A listing of the persons informed of the change in calibration results, and
 - iii. A statement as to the effect the change in calibration has had on the therapy doses prior to the current calibration finding.
- C. Spot checks.**
1. The spot check procedures shall be in writing and shall have been developed by an authorized medical physicist trained and experienced in performing calibrations.
 2. The measurements taken during spot checks shall demonstrate the degree of consistency of the operating characteristics which can affect the radiation output of the system or the radiation dose delivered to a patient during a therapy procedure.
 3. The written spot check procedure shall indicate the frequency at which tests or measurements are to be performed, not to exceed monthly.
 4. The spot check procedure shall note conditions that require recalibration of the therapy system before further human irradiation.
 5. Records of spot checks shall be maintained and available for inspection by the Department for three years following the spot check measurements. Records of spot checks not performed by an authorized medical physicist shall be signed by an authorized medical physicist within 15 days of the spot check.
- D. Operating procedures.**
1. Only the patient shall be in the treatment room during irradiation.
 2. If a patient must be held in position during treatment only, mechanical supporting or restraining devices shall be used for this purpose.

A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-906. Limitations

- A.** A registrant shall not permit an individual to act as:
1. A particle accelerator operator of any type unless the individual:
 - a. Has received copies of and instruction in this Article and the registrant's operating and emergency procedures,
 - b. Demonstrates an understanding of the material, and
 - c. Has demonstrated competence in the use the particle accelerator, related equipment, and survey instruments that will be employed during the operation of the particle accelerator;
 2. A medical particle accelerator operator unless the individual is certified as required in A.R.S. § 32-2811 or the operator meets the requirements in R9-7-603(B); or
 3. An industrial particle accelerator operator unless the individual has been instructed in radiation safety.
- B.** A registrant shall provide either the Radiation Safety Committee or the Radiation Safety Officer with the authority to terminate operations at a particle accelerator facility if this is necessary to protect health and safety or property.
- C.** If equipment is capable of both stationary and moving beam therapy, the registrant shall ensure that:
1. Irradiation is not possible unless either stationary or moving beam therapy has been selected at the control panel,
 2. An interlock is provided to ensure that the machine will operate only in the mode that has been selected,
 3. An interlock is provided that terminates irradiation if the gantry fails to move properly during moving beam therapy,
 4. A means is provided to prevent movement during stationary therapy, and
 5. The mode of operation is displayed at the control panel.

R9-7-907. Shielding and Safety Design

- A.** An authorized medical physicist experienced in the principles of radiation protection and installation design shall be consulted in the design of a particle accelerator installation and called upon to perform a radiation survey when the accelerator is first capable of producing radiation. The registrant shall provide a copy of the installation radiation survey to the Department before a Department inspection conducted according to R9-7-914.
- B.** The registrant shall shield each particle accelerator installation with the primary and secondary protective barriers necessary to comply with R9-7-408 and R9-7-416.
- C.** At the time of application for registration and before treatment of the first patient, the applicant shall provide to the Department a copy of an installation report, signed by the contractor who installed required shielding material recommended by the authorized medical physicist who performed the shielding calculations for the particle accelerator facility.
- D.** As part of the annual radiation protection program review required in R9-7-407(C), the registrant shall document installed facility shielding and other radiation exposure controls, review patient workload, and note associated changes, if any, in public exposure that are the result of installed facility shielding, increased workload, and other radiation exposure controls in use at the time of the review.

A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-908. Particle Accelerator Controls and Interlock Systems

A registrant shall ensure that:

1. Instrumentation, readouts and controls on the particle accelerator control panel are clearly identified and easily discernible;
2. All entrances into the area that contains the particle accelerator room, target room, or other high radiation area, are provided with interlocks that shut down the machine if an entrance door is opened;
3. If an interlock system connected to an entrance door that provides access to the therapy suite has been tripped, it is not possible to resume operation of the particle accelerator by resetting the interlock switch at the entrance where it had been tripped;
4. Each safety interlock is on a circuit that allows it to operate independently of all other safety interlocks;
5. If possible, the interlock system is fail-safe in design, so that any defect or component failure in the interlock system prevents operation of the particle accelerator; and
6. A scram button or other emergency power cutoff switch is located and easily identifiable in the area that contains the particle accelerator. The registrant shall ensure that the scram button prevents persons from restarting the particle accelerator at the accelerator control panel without resetting the button or switch.

A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-909. Warning Systems

A registrant shall ensure that:

1. High radiation areas and entrances to the high radiation areas in medical facilities are equipped with a continuously-operating warning light system that operates when, and only when, radiation is produced;
2. High radiation areas and entrances to the high radiation areas in nonmedical facilities are equipped with an easily-observable flashing or rotating warning light system that operates when, and only when, radiation is produced;
3. High radiation areas associated with nonmedical particle accelerators have an audible warning device that is activated for 15 seconds before creation of the high radiation area; and the warning device is clearly discernible in all high radiation areas and all radiation areas; and
4. High radiation areas associated with any particle accelerator are posted according to R9-7-428 and R9-7-429.

R9-7-910. Operating Procedures

- A.** A registrant shall secure from use a particle accelerator when it is not being used to prevent unauthorized use.
- B.** A particle accelerator operator shall use the switch on the control panel to turn the accelerator beam on and off during normal operations. The safety interlock system may be used to turn off the accelerator beam in emergencies.
- C.** A registrant shall ensure that all safety and warning systems, including interlocks, are tested for proper operation at intervals not to exceed three months, and maintain a record of each

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

test for Department inspection for at least three years from the date of the test.

- D. A registrant shall keep current electrical circuit diagrams of a particle accelerator and the associated interlock systems, and maintain the diagrams for inspection by the Department.
- E. A registrant shall not bypass an interlock unless the by-pass is:
 1. Authorized in writing by the Radiation Safety Committee or Radiation Safety Office,
 2. Recorded in a permanent log with a notice of the by-pass posted at any affected interlock and at the control panel, and
 3. Terminated as soon as possible.
- F. A registrant shall maintain a copy of the current operating and emergency procedures at the particle accelerator control panel.

Historical Note

R9-7-911. Radiation Surveys

- A. The registrant shall ensure that a portable survey instrument is available at all times in a particle accelerator facility.
- B. An authorized medical physicist shall:
 1. Check the operation of the portable survey instrument required in subsection (A), using a known radiation source, before each use;
 2. Perform and document a radiation protection survey when changes have been made in shielding, operation, equipment, or occupancy of adjacent areas;
 3. For particle accelerator facilities greater than 30 Mev, establish a program of radiation protection surveys that will evaluate the airborne radiation hazards, and ensure that the particulate radioactivity present in the accelerator facility will not result in personnel exposure that exceeds the limits in Article 4; and
 4. Perform radiation protection surveys, including smear surveys of the particle accelerator facility, as prescribed in the written procedures established by the Radiation Safety Officer of the particle accelerator facility and approved by the Department at the time of application for registration.
- C. The registrant shall maintain the following records:
 1. Radiation protection surveys required in subsection (B)(2), and the associated facility description, required in R9-7-202, until the registration is terminated; and
 2. Records of the surveys required in subsections (B)(3) and (4) for three years following the measurement.

Section R9-7-912 reserved when this Chapter was recodified from 12 A.A.C. 1 (Supp. 18-1).

R9-7-913. Misadministration

- A. For purposes of this rule "misadministration" means:
 1. A therapeutic radiation dose from a machine:
 - a. Delivered to the wrong patient;
 - b. Delivered using the wrong mode of treatment;
 - c. Delivered to the wrong treatment site; or
 - d. Delivered in one week to the correct patient, using the correct mode, to the correct therapy site, but greater than 130 percent of the prescribed weekly dose; or

2. A therapeutic radiation dose from a machine with errors in the calibration, time of exposure, or treatment geometry that result in a calculated total treatment dose differing from the final, prescribed total treatment dose by more than 20 percent, except for treatments given in 1 to 3 fractions, in which case a difference of more than 10 percent constitutes a misadministration.

B. Reports of therapy misadministration

1. Within 24 hours after discovery of a misadministration, a registrant shall notify the Department by telephone. The registrant shall also notify the referring physician of the affected patient and the patient or a responsible relative or guardian, unless the referring physician personally informs the registrant either that he or she will inform the patient, or that in his or her medical judgment, telling the patient or the patient's responsible relative or guardian would be harmful to one or the other, respectively. If the referring physician or the patient's responsible relative or guardian cannot be reached within 24 hours, the registrant shall notify them as soon as practicable. The registrant shall not delay medical care for the patient because of notification problems.
2. Within 15 days following the verbal notification to the Department, the registrant shall report, in writing, to the Department and individuals notified under subsection (B)(1). The written report shall include the registrant's name, the referring physician's name, a brief description of the event, the effect on the patient, the action taken to prevent recurrence, whether the registrant informed the patient or the patient's responsible relative or guardian, and if not, why not. The report shall not include the patient's name or other information that could lead to identification of the patient.
3. Each registrant shall maintain records of all misadministrations for Department inspection. The records shall:
 - a. Contain the names of all individuals involved in the event, including:
 - i. The physician,
 - ii. The allied health personnel,
 - iii. The patient,
 - iv. The patient's referring physician,
 - v. The patient's identification number if one has been assigned,
 - vi. A brief description of the event,
 - vii. The effect on the patient, and
 - viii. The action taken to prevent recurrence.
 - b. Be maintained for three years beyond the termination date of the affected registration.

ARTICLE 10. NOTICES, INSTRUCTIONS, AND REPORTS TO RADIATION WORKERS; INSPECTIONS**R9-7-1001. Purpose and Scope**

This Article establishes requirements for notices, instructions, and reports by licensees or registrants to individuals working for a licensee or registrant. This Article explains the options available to these individuals in connection with Department inspections of licensees or registrants regarding radiological working conditions. The rules in this Article apply to all persons who receive, possess, use, own, or transfer sources of radiation licensed or registered by the Department.

Historical Note

New Section R9-7-1001 recodified from R12-1-1001 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1002. Posting of Notices for Workers

- A.** Each licensee or registrant shall post current copies of the following documents:
1. The rules in this Chapter;
 2. The license, certificate of registration, conditions, or documents incorporated into the license or registration by

- reference, and any amendments to the license or registration;
 3. The operating procedures applicable to work under the license or registration;
 4. Any notice of violation involving radiological working conditions, proposed imposition of a civil penalty, or order issued under 9 A.A.C. 7, Article 12, and any response from the licensee or registrant.
- B.** If posting of a document specified in subsections (A)(1), (2) and (3) is not practicable, the licensee or registrant may post a notice which describes the document and states where it may be examined.
- C.** Form ARRA-6 (shown following R9-7-1008), "Notice to Employees" shall be posted by each licensee or registrant wherever individuals work in or frequent any portion of a restricted area.
- D.** Each licensee or registrant shall post documents, notices, or forms, as required by this Section, so that they are conspicuous and appear in a sufficient number of places to permit individuals engaged in work under the license or registration to observe them on the way to or from any particular work location to which the document applies and shall replace any document if it is defaced or altered.
- E.** Department documents posted as required in subsection (A)(4) shall be posted within two working days after receipt of the documents from the Department; the licensee's or registrant's response, if any, shall be posted within two working days after dispatch from the licensee or registrant. The documents shall remain posted for a minimum of five working days or until action correcting the violation has been completed, whichever is later.

Historical Note

New Section R9-7-1002 recodified from R12-1-1002 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1003. Instructions for Workers

- A.** A licensee or registrant shall ensure that each individual who, in the course of employment, is likely to receive in a year an occupational dose in excess of 1 mSv (100 mrem), receives instruction in all of the following subjects:
1. Storage, transfer, or use of radiation and radioactive material;
 2. Health protection problems associated with exposure to radiation or radioactive material, precautions or procedures to minimize exposure, and purposes and functions of protective devices;
 3. Applicable provisions in Department rules, licenses, and registrations that protect of personnel from exposure to radiation or radioactive material, with an emphasis on the duties of workers;
 4. The duty to promptly report to the licensee or registrant any condition that may lead to or cause a violation of a provision in a Department rule, license, or registration or unnecessary exposure to radiation or radioactive material;
 5. Correct response to warnings in the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive material; and
 6. Radiation exposure reports that a worker may request according to R9-7-1004.
- B.** In determining whether subsection (A) applies to an individual, a licensee or registrant shall take into consideration assigned activities during normal and abnormal situations that involve exposure to radiation or radioactive material and could reasonably be expected to occur during the life of a facility. The licensee or registrant shall provide instruction that is com-

mensurate with potential radiological health protection problems present in the work place.

Historical Note

New Section R9-7-1003 recodified from R12-1-1003 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1004. Notifications and Reports to Individuals

- A. A licensee or registrant shall report radiation exposure data for an individual and the results of any measurements, analyses, and calculations of radioactive material deposited or retained in the body to the individual as specified in this Section. The information reported shall include data and results obtained under Department rules, orders, or license conditions, as shown in records maintained by the licensee or registrant. Each notification and report shall be in writing; include appropriate identifying data, such as the name of the licensee or registrant, the name of the individual, and the individual's Social Security number; include the individual's exposure information; and contain the following statement:

"This report is furnished to you under the provisions of 9 A.A.C. 7. You should preserve this report for future reference."

- B. Each licensee or registrant shall make dose information available to workers as shown in records maintained by the licensee or registrant under the provisions of Article 4. Each licensee or registrant shall provide annual notification of exposure to radiation or radioactive material for each worker, as shown in records maintained by the licensee or registrant under R9-7-419(E) if:
1. The individual's occupational dose exceeds 1 mSv (100 mrem) TEDE or 1 mSv (100 mrem) to any individual organ or tissue; or
 2. The individual requests his or her annual dose report.
- C. At the request of a worker formerly engaged in work controlled by the licensee or the registrant, each licensee or registrant shall furnish to the worker a report of the worker's exposure to radiation or radioactive material. The report shall be furnished within 30 days from the time the request is made, or within 30 days after the exposure of the individual has been determined by the licensee or registrant, whichever is later; the report shall cover, within the period of time specified in the request, each calendar quarter in which the worker's activities involved exposure to radiation from radioactive material licensed by, or radiation machines registered with, the Department; and the report shall include the dates and locations of work under the license or registration in which the worker participated during this period.
- D. Reports to individuals of their exposure to radiation shall be made according to R9-7-446.

Historical Note

New Section R9-7-1004 recodified from R12-1-1004 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1005. Licensee, Registrant, and Worker Representation During Department Inspection

- A. As a condition of licensure or registration, each licensee or registrant shall afford to the Department, at all reasonable times and without undue delay, an opportunity to inspect materials, machines, activities, facilities, premises, and records.
- B. During an inspection, the licensee or registrant shall permit Department inspectors to consult privately with workers as specified in R9-7-1006. The licensee or registrant may accompany Department inspectors during other phases of an inspection.
- C. A worker authorized to consult with an Department inspector under R9-7-1006 may authorize another individual to repre-

sent the worker's interests during the Department inspection. The licensee or registrant shall notify the inspectors of the worker's authorization and give the worker's representative an opportunity to accompany the inspectors during the inspection of physical working conditions.

- D. Each worker's representative shall be routinely engaged in work under control of the licensee or registrant or shall have received instructions under R9-7-1003.
- E. Different representatives of licensees or registrants and workers may accompany the inspectors during different phases of an inspection if there is no resulting interference with the inspection. However, only one worker's representative at a time may accompany the inspectors.
- F. With the approval of the licensee or registrant and the worker's representative an individual who is not routinely engaged in work under control of the licensee or registrant, for example, a consultant to the licensee or registrant or to the worker's representative, shall be afforded the opportunity to accompany Department inspectors during the inspection of physical working conditions.
- G. Notwithstanding the other provisions of this Section, Department inspectors are authorized to refuse to permit accompaniment by any individual who deliberately interferes with a fair and orderly inspection. With regard to any area containing proprietary information the worker's representative for that area shall be an individual previously authorized by the licensee or registrant to enter that area. With regard to areas containing information classified by an agency of the U.S. Government in the interest of national security, any individual who accompanies an inspector may have access to such information only if authorized by the classifying agency.

Historical Note

New Section R9-7-1005 recodified from R12-1-1005 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1006. Consultation with Workers During Inspections

- A. A licensee or registrant shall afford Department inspectors talking to a licensee or registrant representative the opportunity to consult privately with workers concerning matters of occupational radiation protection and other matters related to applicable provisions of Department rules, licenses, and registrations to the extent the inspectors deem consultation necessary for conducting an effective and thorough inspection.
- B. During the course of an inspection, any worker may privately bring to the attention of the inspectors, either orally or in writing, any past or present condition which the worker has reason to believe may have contributed to or caused any violation of the Act, these rules, or a license or registration condition, or any unnecessary exposure of an individual to radiation from licensed radioactive material or a registered radiation machine under the licensee's or registrant's control. If this notification is in writing, the worker shall comply with the requirements of R9-7-1007(A).
- C. The provisions of subsection (B) shall not be interpreted as authorization to disregard instructions required by R9-7-1003.

Historical Note

New Section R9-7-1006 recodified from R12-1-1006 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).
Amended by final expedited rulemaking at 24 A.A.R. 2151, effective July 12, 2018 (Supp. 18-3).

R9-7-1007. Inspection Requests by Workers

- A. Any worker or representative of workers who believes that a violation of the Act, these rules, license, or registration conditions exists, or has occurred with regard to radiological working conditions in which the worker is engaged, may request an

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

inspection of the facility by the Department. Any request shall be in writing, addressed to the Director, set forth the specific grounds for the request, and be signed by the worker or representative of the workers. The Department shall provide a copy to the licensee or registrant no later than at the time of inspection except that, upon the request of the worker, the Department shall protect the worker's name and the name of individuals referred to in the request to the extent authorized by law, except for good cause shown.

- B. If, upon receipt of a request for inspection, the Department Director determines that there are reasonable grounds to believe that the alleged violation exists or has occurred, the Director shall initiate an inspection as soon as practicable, to determine if the alleged violation exists or has occurred. Inspections performed under this subsection need not be limited to matters referred to in the complaint.
- C. A licensee or registrant shall not discharge or in any manner discriminate against any worker because the worker has filed any complaint or caused to be instituted any proceeding under these rules or has testified or is about to testify in the instituted

proceeding or because the worker exercises on behalf of the worker or others, any option afforded by this Article.

R9-7-1008. Inspection not Warranted; Review

If the Department determines, with respect to a complaint under R9-7-1007, that an inspection is not warranted or there are no reasonable grounds to believe that a violation exists or has occurred, the Department shall notify the complainant in writing of the determination. The complainant may obtain review of the determination by submitting a written request for hearing to the Department. The Department shall provide for a hearing before the Radiation Regulatory Hearing Board under 9 A.A.C. 7, Article 12 and A.R.S. Title 41, Chapter 6, Article 10.

In Article 4 of the Arizona Department of Health Services, Bureau of Radiation Control rules for the Control of Radiation, the Arizona Department of Health Services, Bureau of Radiation Control has established standards for your protection against radiation hazards. In Article 10 of the rules for the Control of Radiation, the Arizona Department of Health Services, Bureau of Radiation Control has established certain provisions for the options of workers engaged in work under a license or registration issued by the Arizona Department of Health Services, Bureau of Radiation Control.

YOUR EMPLOYER'S RESPONSIBILITY

Your employer is required to -

1. Apply these rules to work involving sources of radiation.
2. Post or otherwise make available to you a copy of the Arizona Department of Health Services, Bureau of Radiation Control rules, licenses, and operating procedures which apply to work you are engaged in, and explain their provisions to you.
3. Post notice of violation involving radiological working conditions, proposed imposition of civil penalties, and orders.

YOUR RESPONSIBILITY AS A WORKER

You should familiarize yourself with those provisions of the Arizona Department of Health Services, Bureau of Radiation Control rules and the operating procedures which apply to the work you are engaged in. You should observe their provisions for your own protection and protection of your co-workers.

WHAT IS COVERED BY THESE RULES

1. Limits on exposure to radiation and radioactive material in restricted and unrestricted areas;
2. Measures to be taken after accidental exposure;
3. Personnel monitoring, surveys, and equipment;
4. Caution signs, labels, and safety interlock equipment;
5. Exposure records and reports;
6. Options for workers regarding inspections by the Arizona Department of Health Services, Bureau of Radiation Control; and
7. Related matters.

REPORTS ON YOUR RADIATION EXPOSURE HISTORY

1. The Arizona Department of Health Services, Bureau of Radiation Control rules require that your employer give you a written report if you receive an exposure in excess of any applicable limit set forth in the rules or in the

license. The basic limits for exposure to employees are set forth in Article 4 of the rules. These Sections specify limits on exposure to radiation and exposure to concentrations of radioactive material in air and water.

2. If you work where personnel monitoring is required, and if you request information on your radiation exposures,
 - a. Your employer must give you a written report, upon termination of your employment, of your radiation exposures; and
 - b. Your employer must advise you annually of your exposure to radiation.

INSPECTIONS

All licensed or registered activities are subject to inspection by representatives of the Arizona Department of Health Services, Bureau of Radiation Control. In addition, any worker or representative of workers who believes that there is a violation of the regulations issued thereunder, or the terms of the employer's license or rules with regard to radiological working conditions in which the worker is engaged, may request an inspection by sending a notice of the alleged violation to the Arizona Department of Health Services, Bureau of Radiation Control. The request must set forth the specific grounds for the notice and must be signed by the worker on his own behalf or as a representative of the workers. During inspections, inspectors of the Arizona Department of Health Services, Bureau of Radiation Control may confer privately with workers, and any worker may bring to the attention of the inspectors any past or present condition which he believes contributed to or caused any violation as described above.

INQUIRIES

Inquiries dealing with the matters outlined above can be sent to the:

R9-7-1102. Definitions

"Access point" means any door or cover that is designed to be removed or opened for maintenance or service purposes, opened using tools, and used to provide access to the interior of a cabinet x-ray unit.

"Annual refresher safety training" means a review provided by the registrant for its employees on radiation safety aspects of industrial radiography. The review shall include, as applicable, the results of internal inspections, new procedures or equipment, new or revised statutes or rules, accidents, or errors that

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

have occurred, and provide opportunities for employees to ask safety questions.

“Aperture” means any opening in the outside surface of a cabinet x-ray unit, other than a port, which remains open during generation of x-radiation.

“Door” means any barrier that is designed to be movable or opened for routine operation purposes, rather than opened using tools, and used to provide access to the interior of the cabinet x-ray unit.

“Ground fault” means an accidental electrical grounding of an electrical conductor.

“Hands-on experience” means the accumulation of knowledge or skill in any area relevant to radiography.

“Port” means any opening in the outside surface of a cabinet x-ray unit that is designed to remain open, during generation of x-rays, for conveying material that is being irradiated into and out of the cabinet, or for partial insertion of an object for irradiation if the dimensions of the object do not permit complete insertion into the cabinet x-ray unit.

“Practical examination” means a demonstration, through practical application of safety rules and principles of industrial radiography, which includes use of all radiography equipment and tests knowledge of radiography procedures.

“Radiographic operations” means all activities associated with use of a radiographic x-ray system. This includes performing surveys to confirm the adequacy of boundaries, setting up equipment, and conducting any activity inside restricted area boundaries.

R9-7-1104. Registration Requirements

- A. The Department shall review an application for registration of a radiation machine for use in industrial radiography and approve the registration if an applicant meets all of the following requirements:
1. The applicant satisfies the general requirements in Article 2 and any special requirements contained in this Article,
 2. The applicant submits a program for training radiographer’s assistants that complies with R9-7-1146, and
 3. The applicant submits procedures for verifying and documenting the certification status of each radiographer and for ensuring that the certification remains valid.
- B. An applicant shall submit written operating and emergency procedures, as prescribed in R9-7-1128.
- C. An applicant shall submit a description of a program for review of job performance of each radiographer and radiographer’s assistant at intervals that do not exceed six months, as prescribed in R9-7-1146(E).
- D. An applicant shall submit a description of the applicant’s overall organizational structure as it applies to radiation safety responsibilities in industrial radiography, including specified delegation of authority and responsibility.
- E. An applicant shall submit and list the qualifications of each individual designated as an RSO under R9-7-1120 and indicate which designee is responsible for ensuring that the registrant’s radiation safety program is implemented.

- F. If an applicant intends to perform “in-house” calibrations of survey instruments, the applicant shall describe each calibration method to be used, the relevant experience of each person who will perform a calibration, and procedures to ensure that all calibrations are performed according to the procedures prescribed in R9-7-1108.
- G. An applicant shall identify and describe the location of all field stations and permanent radiographic installations.
- H. An applicant shall identify each location where records required by this Chapter will be maintained.

R9-7-1108. Radiation Survey Instruments

- A. A registrant shall maintain at least two calibrated and operable radiation survey instruments at each location where sources of radiation are present to make radiation surveys required by this Article and Article 4 of this Chapter. Instrumentation required by this Section shall be capable of measuring a range from 0.02 millisieverts (2 millirems) per hour through 0.01 sievert (1 rem) per hour.
- B. A registrant shall ensure that each radiation survey instrument required under subsection (A) is calibrated:
1. At intervals that do not exceed six months, and after instrument servicing, except for battery changes;
 2. For linear scale instruments, at two points located approximately one-third and two-thirds of full-scale on each scale; for logarithmic scale instruments, at mid-range of each decade, and at two points of at least one decade; and for digital instruments, at 3 points between 0.02 and 10 millisieverts (2 and 1000 millirems) per hour; and
 3. So that an accuracy within plus or minus 20% of the calibration source can be demonstrated at each point checked.
- C. A registrant shall make a record each time a radiation survey instrument is calibrated, and maintain each record for three years after it is made.

Survey instrument operability checks shall be performed using check sources or other authorized means. If equipment problems are found, the registrant shall remove the equipment from service until it is repaired.
- B. A registrant shall have written inspection and maintenance procedures for radiation machines and survey instruments that require inspection and maintenance, at intervals that do not exceed three months or before first use of the equipment and to ensure the proper functioning of components important to safety. Replacement components shall meet design specifications. If equipment problems are discovered, the registrant shall remove the equipment from service until the equipment is repaired.
- C. A registrant shall maintain records of equipment problems found in daily checks and quarterly inspections and retain each record for three years after it is made. The record shall include

- B. A registrant shall ensure that the RSO has satisfied the following minimum requirements:
 - 1. The training and testing requirements in R9-7-1146;
 - 2. Two thousand hours of hands-on experience as a qualified radiographer for an industrial radiographic operation; and
 - 3. Formal training in the establishment and maintenance of a radiation safety program.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- C. A registrant may use an individual in the position of RSO who does not have the training and experience required in subsection (B), if the registrant provides the Department with a description of the individual's training and experience in the field of ionizing radiation and training with respect to the establishment and maintenance of a radiation safety protection program.
- D. The specific duties and authorities of the RSO include, but are not limited to:
1. Establishing and overseeing operating, emergency, and ALARA procedures as required in Article 4 of this Chapter, and reviewing the procedures every year to ensure that they conform to current Department rules and registration conditions;
 2. Overseeing and approving all phases of the training program for radiographic personnel, ensuring that appropriate and effective radiation protection practices are taught;
 3. Overseeing radiation surveys and associated documentation to ensure that the surveys are performed in accordance with the rules and taking corrective measures if levels of radiation exceed established action limits;
 4. Overseeing the personnel monitoring program to ensure that monitoring devices are calibrated and used properly by occupationally exposed personnel and ensuring that records are kept of the monitoring results and timely notifications are made as required in R9-7-444; and
 5. Overseeing operations to ensure that they are conducted safely and instituting corrective actions, which may include ceasing operations if necessary.

1. Use of radiation machines, so that persons are not exposed to radiation that exceeds the limits in Article 4 of this Chapter;
 2. Methods and occasions for conducting radiation surveys;
 3. Methods for controlling access to radiographic areas;
 4. Methods and occasions for locking and securing a radiation machine;
 5. Personnel monitoring and associated equipment;
 6. Inspection, maintenance, and operability checks of a radiation machine and survey instruments;
 7. Actions to be taken immediately by radiography personnel if a pocket dosimeter is found to be off-scale or an alarm rate meter sounds an alarm;
 8. Procedures for identifying and reporting defects and non-compliance, as required by R9-7-448;
 9. The procedure for notifying the RSO and the Department in the event of an accident;
 10. Minimizing exposure of persons in the event of an accident, and
 11. Maintenance of records.
- B. The registrant shall maintain copies of current operating and emergency procedures until the Department terminates the registration. Superseded procedures shall be maintained for three years after a change is made. Additionally, records shall be maintained in accordance with R9-7-1138.

R9-7-1130. Personnel Monitoring

- A. An individual shall not act as a radiographer or a radiographer's assistant unless, at all times during radiographic operations, the individual wears, on the trunk of the body, a direct reading dosimeter, an operating alarm rate meter, and either a film badge, a TLD, or an optically stimulated luminescence (OSL) dosimeter. At permanent radiography installations where other required alarm or warning devices are in routine use, an alarm rate meter is not required.
1. A registrant shall provide pocket dosimeters that have a range from zero to 2 millisieverts (200 millirems) and ensure that the dosimeters are recharged at the start of each shift. Electronic personnel dosimeters are permitted in place of ion-chamber pocket dosimeters.
 2. The registrant shall assign a film badge, TLD, or OSL dosimeter to one individual, who shall wear the assigned equipment.
 3. The registrant shall replace film badges at least monthly and replace TLDs or OSL dosimeters at least quarterly.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

4. After replacement, the registrant shall ensure that each film badge or TLD is processed as soon as possible.
- B.** A radiographer or radiographer's assistant shall record exposures noted from direct reading dosimeters, such as pocket dosimeters or electronic personnel dosimeters, at the beginning and end of each shift.
- C.** A registrant shall check each pocket dosimeter or electronic personnel dosimeter at least yearly for correct response to radiation, and discontinue use of a dosimeter if it is not accurate within plus or minus 20% of the true radiation exposure.
- D.** If an individual's pocket dosimeter has an off-scale reading, or the electronic personnel dosimeter reads greater than 2 millisieverts (200 millirems), and radiation exposure cannot be ruled out as the cause, a registrant shall send the individual's film badge, TLD, or OSL dosimeter for processing within 24 hours. The registrant shall not allow the individual to work with a radiation machine until the individual's radiation exposure is determined. Using the information from the badge or dosimeter, the RSO or the RSO's designee shall calculate the affected individual's cumulative radiation exposure, as prescribed in Article 4 of this Chapter and include the results in records maintained in accordance with subsection (G).
- E.** If an individual's monitoring device is lost or damaged, the individual shall cease work immediately until the registrant provides a replacement film badge, TLD, or OSL dosimeter and the RSO or the RSO's designee calculates the exposure for the time period from issuance to discovery of a lost or damaged film badge, TLD, or OSL dosimeter. The registrant shall include the calculated exposure and the time period for which the film badge, TLD, or OSL dosimeter was lost or damaged in the records maintained in accordance with subsection (G).
- F.** For each alarm rate meter a registrant shall ensure that:
 1. At the start of a shift each individual with an alarm rate meter checks that the alarm functions (sounds) before using the device;
 2. Each device is set to give an alarm signal at a preset dose rate of 5 mSv/hr (500 mrem/hr) with an accuracy of plus or minus 20% of the true radiation dose rate;
 3. A special means is necessary to change the preset alarm function on the device; and
 4. Each device is calibrated at periods that do not to exceed 12 months for correct response to radiation
- G.** Each registrant shall maintain the following personnel monitoring records:
 1. Each dosimeter reading and the yearly operability check required by subsections (B) and (C) for three years after each record is made;
 2. A record of each alarm rate meter calibration for three years after the record is made;
 3. Any report received from the film badge, TLD, or OSL processor. The registrant shall maintain these records until the Department terminates the registration; and
 4. Any estimation of an exposure evidenced by an off-scale personnel direct-reading dosimeter or a lost or damaged film badge, TLD, or OSL dosimeter. The records shall be maintained until the Department terminates the registration.

If a radiographer's assistant uses a radiation machine or conducts a radiation survey required by R9-7-1134(B), the registrant shall ensure that the assistant is under the personal supervision of a radiographer. For purposes of this Section "personal supervision" means:

1. The radiographer is physically present at the site where the radiation machine is being used;
2. The radiographer is available to give immediate assistance if required; and
3. The radiographer is able to observe directly the assistant's performance.

R9-7-1136. Permanent Radiographic Installations

- A.** If a registrant maintains a permanent radiographic installation that does not fall within the definition of "enclosed radiography" in R9-7-102, the registrant shall ensure that each entrance used for personnel access to the high radiation area has either:
 1. An entrance control device of the type described in R9-7-420(A)(1), which reduces the radiation level upon entry into the area, or
 2. Both conspicuous visible and audible alarm signals to warn of the presence of radiation. The registrant shall ensure that the visible signal is actuated by radiation if the x-ray tube is energized and the audible signal is actuated if a person attempts to enter the installation while the x-ray tube is energized.
- B.** A registrant shall test the alarm system for proper operation with a radiation source each day before the installation is used for radiographic operations. The test shall include a check of both the visible and audible signals. The registrant shall test each device referenced in subsection (A)(1) monthly. If an

entrance control device or alarm signal is operating improperly, the registrant shall immediately label the device or signal as “defective” and repair the device or signal within seven calendar days. The registrant may continue to use the facility during this seven-day period, if the registrant implements continuous surveillance requirements of R9-7-1116 and uses an alarm rate meter.

- C. A registrant shall maintain each record of alarm system and entrance control device tests for three years after the record is made.

- B. A registrant shall maintain a copy of the following at each field station and temporary job site:
1. The registration that authorizes use of a radiation machines;
 2. A copy of Articles 4, 10, and 11 of this Chapter;
 3. Utilization logs for each radiation machine dispatched from that location, as required by R9-7-1112;
 4. Records of equipment problems identified in daily checks of equipment, as required by R9-7-1114;
 5. Records of alarm system and entrance control device checks, as required by R9-7-1136;
 6. Records of direct-reading dosimeters such as pocket dosimeters and electronic personnel dosimeters, as required by R9-7-1130;
 7. Operating and emergency procedures, as required by R9-7-1128;
 8. A report on the most recent calibration of the radiation survey instruments in use at the site, as required by R9-7-1108;

1. The registrant makes, or causes to be made, an evaluation of each certified and certifiable cabinet x-ray system, at intervals that do not exceed 12 months, to determine whether the system conforms to the standards for certified and certifiable cabinet x-ray systems defined in Article 1. Records of each evaluation shall be maintained for three years from the date the record is created; and
 2. The registrant performs a physical radiation survey with a survey instrument calibrated within the preceding 12 months and designed for the energy range and levels of radiation that will be assessed.
- B. A registrant with a cabinet x-ray system that is not exempt under subsection (A) shall comply with the recordkeeping requirements of this Article and the following special requirements. The registrant shall:
1. Ensure that radiation levels measured at 5 centimeters (2 inches) from any accessible exterior surface of the enclosure do not exceed 50 microsievert (0.5 milliroentgen) in one hour for any combination of technical factors (i.e., mA, kVp);
 2. Ensure that access to the interior of the enclosure is possible only through interlocked doors or panels that prevent production of radiation unless all interlocked doors or panels are securely closed. The registrant shall ensure that opening a door or panel results in immediate termination of radiation production and subsequent reactivation of the x-ray tube is only possible at the control panel;
 3. Provide visible warning signals, activated only during production of radiation, at the control panel and at each access point to the interior of the enclosure;
 4. Before using an x-ray system make, or cause to be made, an initial evaluation of the x-ray system to determine compliance with this Article, and subsequently evaluate the x-ray system at intervals that do not exceed three months. The registrant shall maintain a record of each evaluation for two years, and
 5. Using instrumentation that complies with R9-7-1108, perform a physical radiation survey to satisfy the requirements of subsection (B)(4).
- C. A registrant with a shielded room x-ray systems shall comply with the recordkeeping requirements of this Article and the following special requirements. The registrant shall:
1. Shield each x-ray room so that every location on the exterior meets the requirements for an “unrestricted area” as specified in R9-7-416;
 2. Provide access to the interior of a shielded x-ray room only through doors or panels that are interlocked. The registrant shall ensure that radiation production is possible only when all interlocked doors and panels are securely closed, opening of any interlocked door or panel results in immediate termination of radiation production; and subsequent reactivation of the x-ray tube is only possible at the control panel;
 3. Provide each access point with two interlocks, each on a separate circuit, so that failure of one interlock will not affect the performance of the other interlock;
 4. Provide visible warning signals, activated only during production of radiation at the control panel and each access point to the shielded room;
 5. Make, or cause to be made, an initial evaluation of each shielded room x-ray system to determine compliance with this Article, and subsequently evaluate the x-ray system at intervals that do not exceed three months. The registrant shall maintain a record of each evaluation for two years;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

6. Perform radiation surveys to determine exposure with an instrument that meets the requirements of R9-7-1108;
7. Inspect electrical interlocks and warning devices for correct operation before each use, and maintain a record of each inspection for two years;
8. Not permit an individual to operate an x-ray machine for shielded room radiography unless the individual has received a copy of, and instruction in, the operating procedures and demonstrated competence in the safe use of the equipment;
9. Ensure that an individual does not occupy the interior of any shielded room x-ray system during production of radiation;
10. Provide personnel monitoring devices that meet the requirements of R9-7-1130 to each shielded room x-ray machine operator, and require that each operator use the devices;
11. Maintain records of:
 - a. Quarterly inventories for mobile systems, as prescribed in R9-7-1110; and
 - b. Utilization logs for all systems, as prescribed in R9-7-1112; and
12. Maintain records for three years from the date of the quarterly inventory or utilization log.

- D.** A registrant shall connect an enclosed radiography machine to the electrical system in a manner that will prevent a ground fault from generating x-radiation.

R9-7-1142. Baggage and Package Inspection Systems

- A.** For x-ray systems designed to screen carry-on baggage or packages at airlines, railroads, bus terminals, package inspection facilities, or similar facilities, a registrant shall ensure the x-ray system has an operator present at the control area in a position that permits surveillance of the ports and doors during generation of x-radiation to prevent exposure to passengers and other members of the public.
- B.** For an exposure or preset succession of exposures of one-half second or greater duration, a registrant shall use a system that enables the operator to terminate the exposure or preset succession of exposures at any time.
- C.** For an exposure or preset succession of exposures of less than one-half second duration, a registrant shall use a system that allows the operator to complete the exposure in progress, but prevent additional exposures.
- D.** A registrant shall operate a baggage or package inspection system according to the manufacturer's instructions.
- E.** A registrant shall not disconnect or otherwise tamper with the safety systems of a baggage or package inspection system, except for maintenance purposes.
- F.** In addition to the requirements in this Section, a registrant using a baggage or package inspection system shall meet the requirements in R9-7-1140(A), (B), and (D).

R9-7-1146. Training

- A.** A registrant shall not allow an individual to act as a radiographer until the individual has received training in the subjects in subsection (G), has participated in a minimum of two months of on-the-job training, and is certified through a radiographer certification program by a independent certifying organization in accordance with the criteria specified in Appendix A.
1. A registrant shall provide the Department with proof of an individual's certification upon request.
 2. A registrant shall maintain proof of an individual's certification at the job site where the individual is performing field radiography.
 3. A registrant that employs a certified radiographer in Arizona shall ensure that:
 - a. The radiographer has obtained initial certification or recertification within the last five years; and
 - b. An uncertified radiographer works only as a radiographer's assistant until certified.
 4. A radiographer shall recertify every five years by:
 - a. Taking an approved radiography certification examination in accordance with this subsection; or
 - b. Providing written evidence that the radiographer is active in the practice of industrial radiography and has participated in continuing education during the previous five-year period.
 5. If an individual cannot provide the written evidence required in subsection (4)(b), the individual shall retake the certification examination.
 6. A radiographer shall provide the registrant with proof of certification in the form of a card issued by the certifying organization that contains:
 - a. A picture of the certified radiographer,
 - b. The radiographer's certification number,
 - c. The date the certification expires, and
 - d. The radiographer's signature.
- B.** A registrant shall not allow an individual to act as a radiographer until the individual:
1. Receives copies of and instruction in the requirements of this Article, applicable Sections of Articles 4 and 10 and R9-7-107, the Department registration or registrations under which the individual will perform industrial radiography, and the registrant's operating and emergency procedures;
 2. Demonstrates an understanding of the registrant's registration and operating and emergency procedures by successful completion of a written or oral examination that covers the relevant material;
 3. Receives training in:
 - a. Use of the registrant's radiation machine,
 - b. Daily inspection of the radiation machine, and
 - c. Use of radiation survey instruments; and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

4. Demonstrates an understanding of the use of the radiation machines and survey instruments described in subsection (B)(3) by successful completion of a practical examination covering this material.
- C. A registrant shall not allow an individual to act as a radiographer's assistant until the individual:
 1. Receives copies of and instruction in the requirements of this Article, applicable Sections of Articles 4 and 10 and R9-7-107, the Department registration or registrations under which the radiographer will perform industrial radiography, and the registrant's operating and emergency procedures;
 2. Develops competence to use, under the personal supervision of the radiographer, the registrant's radiation machine and radiation survey instruments; and
 3. Demonstrates understanding of the instructions provided under subsection (C)(1) by successfully completing a written test on the subjects covered and demonstrates competence using the hardware described in subsection (C)(2) by successfully completing a practical examination.
- D. A registrant shall provide refresher safety training for each radiographer and radiographer's assistant at intervals that do not exceed 12 months.
- E. Except where an individual serves both as a radiographer and an RSO, the RSO or the RSO's designee shall design and implement an inspection program to examine the job performance of each radiographer and radiographer's assistant and ensure that the Department's rules and registration requirements, and the registrant's operating and emergency procedures, are followed. The inspection program shall:
 1. Include observation of the performance of each radiographer and radiographer's assistant during an actual industrial radiographic operation, at intervals that do not exceed six months; and
 2. Provide that, if a radiographer or a radiographer's assistant has not participated in an industrial radiographic operation for more than six months since the last inspection, each radiographer shall demonstrate knowledge of the training requirements in subsection (B)(3) and each radiographer's assistant shall demonstrate knowledge of the training requirements of subsection (C)(2) by a practical examination before these workers can participate in a radiographic operation.
- F. A registrant shall maintain records of the training required in this Section, including certification documents, written and practical examinations, refresher safety training documents, and inspection documents, in accordance with subsection (I).
- G. A registrant shall include the following subjects in the training required under subsection (A):
 1. Fundamentals of radiation safety, including:
 - a. Characteristics of x-ray radiation;
 - b. Units of radiation dose and quantity of radioactivity;
 - c. Hazards of exposure to radiation;
 - d. Levels of radiation from x-ray machines; and
 - e. Methods of controlling radiation dose (time, distance, and shielding);
 2. Radiation detection instruments, including:
 - a. Use, operation, calibration, and limitations of radiation survey instruments;
 - b. Survey techniques; and
 - c. Use of personnel monitoring equipment;
 3. Equipment topics, including:
 - a. Operation and control of radiation machines; and
 - b. Inspection and maintenance of each radiation machine and survey instrument;
4. The requirements of pertinent Department rules; and
5. Case histories of accidents in radiography.
- H. A registrant shall maintain records of radiographer certification in accordance with subsection (I)(1) and provide proof of certification as required in subsection (A)(1).
- I. A registrant shall maintain the following records for three years after each record is made:
 1. Records of training for each radiographer and each radiographer's assistant. For radiographers, the records shall include radiographer certification documents and verification of certification status. All records shall include copies of written tests, dates of oral and practical examinations, and names of individuals who conducted and took the oral and practical examinations; and
 2. Records of annual refresher safety training and semi-annual inspections of job performance for each radiographer and each radiographer's assistant. The records for the annual refresher safety training shall list topics discussed during training, the date of training, and names of each instructor and attendee. For inspections of job performance, the records shall include a list of items checked during the inspection and any non-compliance observed by the RSO.

Appendix A. Standards for Organizations that Provide Radiography Certification

Note: For purposes of this Article an "independent certifying organization" means an organization that meets all of the criteria in this Appendix.

I. Requirements for an Organization that Provides
Radiographer Certification

To qualify to provide radiography certification, an organization shall:

- A. Be a society or association, with members who participate in, or have an interest in, the field of industrial radiography;
- B. Not restrict membership because of race, color, religion, sex, age, national origin, or disability;
- C. Have a certification program that is open to nonmembers, as well as members;
- D. Be an incorporated, nationally recognized organization that is involved in setting national standards of practice within its fields of expertise;
- E. Have a staff comparable to other nationally recognized organizations, a viable system for financing its operations, and a policy-and decision-making review board;
- F. Have a set of written, organizational by-laws and policies that address conflicts of interest and provide a system for monitoring and enforcing the by-laws and policies;
- G. Have a committee, with members who can carry out their responsibilities impartially, review and approve the certification guidelines and procedures, and advise the organization's staff in implementing the certification program;
- H. Have a committee, with members who can carry out their responsibilities impartially, review complaints against certified individuals, and determine sanctions;
- I. Have written procedures that describe all aspects of the organization's certification program;
- J. Maintain records of the current status of each individual's certification and administration of the certification program;
- K. Have procedures to ensure that certified individuals are provided due process with respect to administration of the certification program, including a process for becoming certified and a process for imposing sanctions against certified individuals;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- L. Have procedures for proctoring examinations and qualifying proctors. The organization, through these procedures, shall ensure that an individual who proctors an examination is not employed by the same company or corporation (or a wholly-owned subsidiary of the company or corporation) that employs an examinee;
- M. Exchange information about certified individuals with the Department, other independent certifying organizations, the NRC, or Agreement States and allow periodic review of its certification program and related records; and
- N. Provide a description to the Department of its procedures for choosing examination sites and providing a favorable examination environment.

II. Requirements for a Certification Program

An independent certifying organization shall ensure that its certification program:

- A. Requires an applicant for certification to:
 - 1. Obtain training in the subjects listed in R9-7-1146(G), and
 - 2. Satisfactorily complete a written examination that covers these subjects;
- B. Require an applicant for certification to provide documentation demonstrating that the applicant has:
 - 1. Received training in the subjects listed in R9-7-1146(G);
 - 2. Satisfactorily completed the on-the-job training required in R9-7-1146(A); and
 - 3. Received verification from a registrant that the applicant has demonstrated the capability of independently working as a radiographer;
- C. Provides procedures that protect examination questions from disclosure;
- D. Provides procedures for denying certification to an applicant and revoking, suspending, and reinstating a certificate;
- E. Provides a certification period that is not less than three years or more than five years, procedures for renewing certifications and, if the procedures allow renewals without examination, a system for assessing evidence of recent full-time employment and annual refresher training; and
- F. Provides a timely response to inquiries, by telephone or letter, from members of the public, about an individual's certification status.

III. Requirements for a Written Examination

An independent certifying organization shall ensure that its examination:

- A. Is designed to test an individual's knowledge and understanding of the subjects listed in R9-7-1146(G) or equivalent NRC or Agreement State requirements;
- B. Is written in a multiple-choice format; and
- C. Has psychometrically valid questions drawn from a question bank and based on the material in R9-7-1146(G).

Historical Note

ARTICLE 12. ADMINISTRATIVE PROVISIONS**R9-7-1201. Timeliness**

- A. Any application, request, response, or report required by any rule, order, application, or letter shall be considered timely if it is postmarked on or before the due date, or hand-delivered to the Department office before 5:00 p.m. on the due date. If the due date falls on a Saturday, a Sunday, or a legal holiday, the due date is extended to the end of the next day that is not a Saturday, a Sunday, or legal holiday.

- B. As used in this Article, "working days" are all days other than Saturdays, Sundays, or legal holidays prescribed in A.R.S. § 1-301.

R9-7-1202. Administrative Hearings

- A. All hearings shall be governed by Title 41, Chapter 6, Article 10.
- B. If the Radiation Regulatory Hearing Board is conducting a hearing, all motions and rulings shall be in writing, except those made during the hearing may be oral. The Board shall ensure that any agreements reached during a conference are incorporated in the record, and that all hearings are recorded.
- C. If it is necessary for an administrative law judge or the Board to visit the site of an alleged violation or activity that is regulated by the Department in order to supplement testimonial or documentary evidence presented at the hearing, the party that proposed the visit shall enter the purpose of the visit and all pertinent observations into the record.

R9-7-1213. Severity Levels of Violations**A.** The following violations are classified as severity level I violations:

1. Any failure, malfunction, or insufficiency of a safety system which may result in
 - a. Radiation exposure to a person,
 - b. A concentration of radionuclides; or
 - c. A radiation level, in excess of 10 times the limits specified in 9 A.A.C. 7, or 10 times the prescribed therapeutic patient dose.
2. Any inaccurate or incomplete information that is intentionally provided by a licensee or registrant official, and if the information had been complete and accurate at the time it was provided, would have likely resulted in action such as an immediate order required to protect the public health and safety.
3. Any information that the Department requires be kept by a licensee or registrant that is incomplete or inaccurate because of falsification by or with the knowledge of a licensee or registrant official, and if the information had been complete and accurate at the time it was reviewed by the Department, would have likely resulted in action such as an immediate order required to protect the public health and safety.
4. Any concealment or attempted concealment of a severity level I violation of the Act, 9 A.A.C. 7, or a license condition. This is a separate violation in addition to the original violation.
5. Any concealment or attempted concealment of a severity level II violation of the Act, 9 A.A.C. 7, or a license condition. This violation shall increase the severity level of the original violation by one level.
6. For the purposes of subsections (A)(2) and (3) above the term "licensee or registrant official" means the owner, a partner, a corporate officer, a radiation safety officer, the individual signing an application for a license or registration, or the chairman of any radiation safety committee supervising the radiation safety program of the licensee or registrant.

B. The following violations are classified as severity level II violations:

1. Any failure, malfunction, or insufficiency of a safety system which may result in:
 - a. Radiation exposure to a person,
 - b. A concentration of radionuclides, or
 - c. A radiation level, in excess of two times the limits specified in 9 A.A.C. 7, or two times the prescribed therapeutic patient dose.
2. Any attempt to prevent a Department inspection.
3. Any concealment or attempted concealment of a severity level III violation of the Act, 9 A.A.C. 7, or a license condition by a licensee or registrant official as defined in subsection (A)(6). This violation shall increase the severity level of the original violation by one level.
4. Significant information provided and designated by a licensee or registrant and not previously provided to the Department because of careless disregard on the part of a licensee official or registrant.

C. The following violations are classified as severity level III violations:

1. Any failure, malfunction, or insufficiency of a safety system, or loss of control over a radiation source, which may result in:
 - a. Radiation exposure to a person,
 - b. A concentration of radionuclides, or
 - c. A radiation level in excess of the limits specified in 9 A.A.C. 7, or 20% higher than the prescribed therapeutic patient dose.
2. Any concealment or attempted concealment of a severity level IV or V violation of the Act, 9 A.A.C. 7, or a registration or license condition. This violation shall increase the severity level of the original violation by one level.
3. Any violation of the safety requirements for the use, storage, disposal, or the preparation for transportation of sources of radiation, as prescribed in the Act, 9 A.A.C. 7, or in a license or registration condition, provided the violation does not meet the criteria for a severity level I or II violation and the licensee or registrant does not maintain a radiation protection program meeting the requirements of R9-7-407.
4. Any factually incorrect statement upon which the Department relied or would have relied in consideration of any action.
5. Any unlawful attempt to interfere with the progress of an inspection by the Department.
6. The acquisition of any source of radiation without the applicable current registration or license, unless otherwise authorized by these rules; or use of the source outside the scope of the current registration or license.
7. The continued use of sources of radiation after April 1, if the annual fee has not been paid for the current year.

D. The following violations are classified as severity level IV violations:

1. Any violation of R9-7-407;
2. Any violation of the safety requirements for the use, storage, disposal, or preparation for transportation of sources of radiation, prescribed in the Act, 9 A.A.C. 7, or in a license or registration condition, provided the violation does not meet the criteria for a severity level I, II or III violation;
3. Failure to maintain records of mammography quality control tests required in R9-7-614.
4. Any failure to comply with the reporting requirements in the Act or 9 A.A.C. 7.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- E. The following violations are classified as severity level V violations:
1. Failure of a registrant or a licensee to comply with the recordkeeping requirements of:
 - a. The Act;
 - b. 9 A.A.C. 7; or
 - c. A registration or facility certification, or license condition, provided that all safety requirements prescribed in the Act, 9 A.A.C. 7, or in a license or registration condition are met or otherwise demonstrated.
 2. If compliance with all safety requirements cannot be demonstrated by the registrant or licensee the failure to comply with the recordkeeping requirements is classified as a level IV violation.

Historical Note

New Section R9-7-1213 recodified from R12-1-1213 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1214. Mitigating Factors

- A. The Department may refrain from issuing a Notice of Violation for Severity Level IV or V violations identified by the registrant or licensee provided the severity level IV or V violations are identified in an inspection report, the report includes a brief description of the corrective action, and the violation meets all of the following criteria:
1. It was identified by the licensee, as a result of an event discovered by the licensee or registrant;
 2. It was not a violation that could reasonably be expected to have been prevented by the licensee's or registrant's corrective action for a previous violation or a previous licensee or registrant finding;
 3. It was or will be corrected within a reasonable time, by specific corrective action committed to by the registrant or licensee by the end of the inspection. The corrective action shall include comprehensive measures that will prevent reoccurrence;
 4. It was not a willful violation or, if it was willful:
 - a. The violation was reported to the Department;
 - b. The violation appears to be the isolated action of an employee without management involvement and the violation was not caused by lack of management oversight;
 - c. Significant remedial action was taken by the licensee or registrant, demonstrating the seriousness of the violation to all affected personnel.
- B. The Director may:
1. Reduce the scheduled civil penalty, including any augmentation, by 50% for the discovery, remedy, and voluntary reporting of a severity level I or II violation by the registrant or licensee; or
 2. Waive the scheduled civil penalty, including augmented civil penalties, for the discovery, remedy, and voluntary reporting of a severity level III, IV, or V violation by the registrant or licensee. For the purposes of this rule, "voluntary reporting" means that the registrant or licensee has notified the Department of a violation, the reporting of which may or may not be required under 9 A.A.C. 7.

Historical Note

R9-7-1215. License and Registration Divisions

- A. Each registrant or license type is classified into one of three administrative sanction divisions.
1. Division I licenses and registrations:

- a. Broad Academic Class A,
 - b. Broad Academic Class B,
 - c. Broad Academic Class C,
 - d. Broad Industrial Class A,
 - e. Broad Medical,
 - f. Class C Laser Facility,
 - g. Distribution,
 - h. Fixed Gauge Class A,
 - i. Industrial Radiography Class A,
 - j. Low Level Radioactive Waste Disposal Site,
 - k. Major Accelerator Facility,
 - l. Medical Materials Class A,
 - m. Medical Teletherapy,
 - n. NORM Commercial Disposal Site,
 - o. Nuclear Laundry,
 - p. Nuclear Pharmacy,
 - q. Open Field Irradiator,
 - r. Secondary Uranium Recovery,

- B.** Any person required by the Act to register the use of a general license with the Department, or to obtain a specific license from the Department, is considered a licensee of the appropriate type notwithstanding the failure of the person to register or obtain a license.
- C.** The Department shall classify each person that possesses an out-of-state specific license for the use of radioactive material and operates in Arizona under reciprocal recognition, as prescribed in R9-7-320 and authorized in R9-7-1302(D)(16), by placing the person into the administrative sanction division listed in subsection (A) that best defines the out-of-state, licensed activities.
- D.** For administrative purposes, the following persons are classified with the Division III licensees and registrants in subsection (A)(3):
- 1. Any person not required to register the use of a general license,
 - 2. Any person not required to obtain a specific license,
 - 3. Any person not required to register a source of radiation who violates the Act or 9 A.A.C. 7, and
 - 4. Any person registered to provide x-ray machine service.

Historical Note

New Section R9-7-1215 recodified from R12-1-1215 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1216. Civil Penalties

- A.** Except as augmented by R9-7-1217, the schedule of civil penalties is as follows:
- 1. Severity level I violations:
 - a. Division I registration or license -- \$4,000;
 - b. Division II registration or license -- \$3,000;
 - c. Division III registration or license -- \$2,000.
 - 2. Severity level II violations:
 - a. Division I registration or license -- \$3,000;
 - b. Division II registration or license -- \$2,000;
 - c. Division III registration or license -- \$1,000.
 - 3. Severity level III violations:
 - a. Division I registration or license -- \$2,000;
 - b. Division II registration or license -- \$1,000;
 - c. Division III registration or license -- \$500.
 - 4. Severity level IV violations:
 - a. Division I registration or license -- \$1,000;
 - b. Division II registration or license -- \$500;
 - c. Division III registration or license -- \$250.
 - 5. Severity level V violations:
 - a. Division I registration or license -- \$500,
 - b. Division II registration or license -- \$250,
 - c. Division III registration or license -- \$125.
- B.** Payment of civil penalties for severity level I and severity level II violations may not be avoided merely by rectifying the condition; however, the Board may mitigate or waive the penalty upon determining a violation meets all of the following:
- 1. It was not a violation that could reasonably be expected to have been prevented by the licensee's or registrant's corrective action for a previous violation or a previous licensee or registrant finding;
 - 2. It was or will be corrected within the time given for corrections, by specific corrective action committed to by the licensee or registrant by the end of the inspection,
- which includes immediate and comprehensive measures to prevent recurrence;
3. It was not a willful violation.
- C.** The Director or Board shall waive payment of penalties for severity level III through severity level V violations provided:
- 1. The violation is not subject to augmentation under R9-7-1217; and
 - 2. The registrant or licensee submits a timely and adequate response to the notice; rectifies the conditions which appear to have caused the violation; and complies with the Act, 9 A.A.C. 7, registration, and license conditions.

Historical Note

New Section R9-7-1216 recodified from R12-1-1216 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1217. Augmentation of Civil Penalties

- A.** A continuing violation, for the purposes of calculating the proposed civil penalty, is considered a separate violation for each day it continues. The second (or successive) day of a continuing violation is not considered a repeat violation of the violation occurring on the first day.
- B.** If a second severity level I violation is committed within five years, the Department shall increase the base civil penalty by 100%, provided the registration or license is not revoked under R9-7-1219.
- C.** If a second severity level II violation is committed within a period of five years, the Department shall increase the base civil penalty by 50%, provided the registration or license is not revoked under R9-7-1219.
- D.** If a severity level III violation is repeated within five years, the Department shall increase the base civil penalty by 50%. If the same severity level III violation is repeated a second time within five years, the base civil penalty shall be increased by 100%, provided the registration or license is not revoked under R9-7-1219.
- E.** If a severity level IV violation is repeated within five years, the Department shall propose the base civil penalty.
- 1. If the same violation occurs three times within five years, the Department shall increase the base civil penalty by 50%.
 - 2. If the same violation occurs four times within five years, the Department shall increase the base civil penalty by 100%, provided the registration or license is not revoked under R9-7-1219.
- F.** If more than three severity level V violations are observed during two consecutive inspections, the Department shall impose a civil penalty for each violation. The base civil penalty for each violation is the base civil penalty assessed for a severity level V violation. If the inspection shows repetition of a violation the base civil penalty for each repeat violation is the base civil penalty assessed for a severity level IV violation. Subsection (E) does not apply to penalties under this subsection.
- G.** Other rights and procedures are not affected by the repeat nature of a violation.
- H.** A person may avoid the penalties in subsections (D) and (E) by demonstrating to the Director in the response to the penalty that the violation meets all of the following criteria:
- 1. It was not a violation that could reasonably be expected to have been prevented by the licensee's or registrant's corrective action for a previous violation or a previous licensee or registrant finding;
 - 2. It was or will be corrected within the time given for correction, by specific corrective action committed to by the licensee or registrant by the end of the inspection, which

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

includes immediate and comprehensive measures to prevent recurrence;

3. It was not a willful violation.

- I.** Notwithstanding any other provision of this Section, the Department shall not impose a penalty that exceeds a maximum of \$5,000 for each violation for each day up to a maximum of \$25,000 for any 30-day period.

R9-7-1219. Additional Sanctions-Show Cause

- A.** If a severity level I violation is repeated or if any second severity level I violation is committed within 10 years, the Department shall require the registrant or licensee to show cause why the registration or license should not be suspended or revoked.
- B.** If any second severity level II violation is committed within five years, or if a severity level II violation involving radioactive effluent releases, excessive radiation levels, or radiation overexposure to an individual is committed within five years of a similar severity level I violation, the Department shall require the registrant or licensee to show cause why the registration or license should not be suspended or revoked.
- C.** If repeated or different severity level III violations are committed on three separate occasions within any five year period, the Department may require the registrant or licensee to show cause why the registration or license should not be suspended or revoked.

R9-7-1220. Escalated Enforcement

- A.** The Director may issue an order to suspend, revoke, or modify a registration or license, or impound a radiation source for:
1. Any severity level I violation; or
 2. Any of the following occurring within a five-year period:

- a. A repeat severity level II violation,
- b. A different second severity level II violation, or
- c. A severity level II violation after a severity level I violation.

- B.** The Director may issue an order impounding the radiation source or suspending, revoking, or modifying the registration or license upon determining that conditions exist which cause a potential for a severity level I or severity level II violation.
- C.** The Department shall hold hearings according to A.R.S. § 30-688.
- D.** An order to impound a radiation source, or an order to suspend, revoke, or modify a registration or a license shall remain in effect until the order is suspended or modified by the Board according to A.R.S. § 30-688.

ARTICLE 13. LICENSE AND REGISTRATION FEES**R9-7-1301. Definition**

“Combined” means the Department has granted authorized activities contained in two or more license types in a single license document, requiring the payment of a single license fee for the more expensive license of the planned combination.

Historical Note

New Section R9-7-1301 recodified from R12-1-1301 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1302. License and Registration Categories

A. Category A licenses are those specific licenses that authorize a school, college, university, or other teaching facility to possess and use radioactive materials for instructional or research purposes.

1. A broad academic class A license is any category A license that meets the specifications of R9-7-310(A)(1).
2. A broad academic class B license is any category A license other than a broad academic class A license that meets the specifications of R9-7-310(A)(2).
3. A broad academic class C license is any category A license other than a broad academic class A or B license that meets the specifications of R9-7-310(A)(3).
4. A limited academic license is any category A license that authorizes only those radioisotopes, forms, and quantities individually specified in the license.

B. Category B licenses are those specific or general licenses that authorize the application of radioactive material or the radiation from it to a human being for medical diagnostic, therapeutic, or research purposes, or the use of radioactive material in medical laboratory testing. Except for a type B6, general medical license, the Department shall not combine a category B license with a license of any other category.

1. A broad medical license is any category B license that meets the specifications of R9-7-310(A)(1) and meets the requirements of 9 A.A.C. 7, Article 7. A broad medical license may authorize any medical use other than teletherapy.
2. A medical materials class A license is any specific category B license other than a broad medical license, that authorizes the use of radiopharmaceuticals and sealed sources containing radioactive materials for a therapeutic purpose in quantities that require hospitalization of the patient for radiation safety purposes. The license may authorize other radioactive materials and other medical uses, except teletherapy.
3. A medical materials class B license is any specific category B license that authorizes the diagnostic or therapeutic use, other than teletherapy, of radioactive materials only in limited quantities such that the patient need not be hospitalized for radiation safety purposes.
4. A medical materials class C license is any specific category B license that authorizes possession of specified radioisotopes only in the form of sealed sources for treatment of the eye or skin or for use in diagnostic medical imaging devices.

ment of the eye or skin or for use in diagnostic medical imaging devices.

5. A medical teletherapy license is a specific category B license that solely authorizes radioisotopes in the form of multi-curie sealed sources for use in external beam therapy. The Department shall not combine a medical teletherapy license with any other type of category B license.
 6. A general medical license is one that authorizes the use of radioactive material pursuant to R9-7-306(D) or R9-7-306(E). A general medical license may be combined into a broad medical, medical materials class A, or medical materials class B license.
- C. Category C licenses are those specific or general licenses that authorize the use of radioactive materials in any activity other than those authorized by a category A, B, or D license. Except as specifically authorized in this Section, the Department shall not combine a category C license with any other type of license.
1. A broad industrial class A license is any category C license that meets the specifications of R9-7-310(A)(1). The Department may combine a broad industrial class A license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
 2. A broad industrial class B license is any category C license other than a broad industrial class A license that meets the specifications of R9-7-310(A)(2). The Department may combine a broad industrial class B license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
 3. A broad industrial class C license is any category C license other than a broad industrial class A or B license that meets the specifications of R9-7-310(A)(3). The Department may combine a broad industrial class C license with any other category C license except industrial radiography, open field irradiator, or well logging licenses.
 4. A limited industrial license is a specific category C license that authorizes the possession of the radioactive materials authorized in R9-7-305(A), or R9-7-306(A), (C), or (F) for uses authorized in those subsections, but in quantities greater than authorized by those subsections.
 5. A portable gauge license is a specific category C license that authorizes radioactive materials in the form of sealed sources for use in measuring or gauging devices designed and manufactured to be transported to the location of use. The Department may combine a portable gauge license with any broad scope industrial license or a fixed gauge class A license.
 6. A fixed gauge class A license is a specific category C license that authorizes the possession of 50 or more measuring or gauging devices containing radioactive materials, where each device is permanently mounted for use at a single location.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

7. A fixed gauge class B license is a specific category C license that authorizes the possession of 1 through 49 measuring or gauging devices containing radioactive materials, where each device is permanently mounted for use at a single location.
 8. A leak detector license is a specific category C license that authorizes the use of radioisotopes in the form of a gas to test hermetic seals on electronic packages.
 9. A gas chromatograph license is a specific category C license that authorizes the use of radioactive materials as ionization sources in gas chromatography or electron capture devices.
 10. A general industrial license is one that authorizes the use of a material, source, or device generally licensed pursuant to R9-7-305 or R9-7-306, except R9-7-305(B), R9-7-306(D), or R9-7-306(E).
 11. An industrial radiography class A license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources at specific facilities identified in the license conditions or at temporary field job sites.
 12. An industrial radiography class B license is a specific category C license that authorizes industrial radiography using sealed radioisotope sources only at specific facilities identified in the license conditions.
 13. An open field irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources not permanently mounted within a shielding container, for irradiation of materials.
 14. A self-shielded irradiator license is a specific category C license that authorizes the use of radioisotopes in the form of sealed sources for irradiation of materials in a shielding device from which the sources are not removed during irradiation. The Department may combine a self-shielded irradiator license with any broad license.
 15. A well logging license is a specific category C license that authorizes the use of radioactive material in sealed or unsealed sources for wireline services or field tracer studies.
 16. A research and development license is a specific category C license that authorizes a licensee to utilize radioactive material in unsealed and sealed form for industrial, scientific, or biomedical research, not including administration of radiation or radioactive material to human beings.
 17. A laboratory license is a specific category C license that authorizes a licensee to perform specific in-vitro or in-vivo medical or veterinary testing, while possessing quantities of radioactive material greater than the general license quantities authorized in R9-7-306.
- D.** Category D licenses are the following specific or general radioactive material licenses. Except for type D4, general industrial; type D5, depleted uranium; type D8 and D9, health physics; and type D14, additional facilities licenses, the Department shall not combine a category D license with any other license.
1. A distribution license is one that authorizes the commercial distribution of radioactive materials or radioisotopes in products to persons holding an appropriate general or specific license. The Department shall ensure that a distribution license does not:
 - a. Authorize distribution of radiopharmaceuticals or distribution to persons exempt from regulatory control, or
 - b. Authorize any other use of the radioactive material. An appropriate category C license is required for possession of radioisotopes and their incorporation into products.
 2. A nuclear pharmacy license is one that authorizes the preparation, compounding, packaging, or dispensing of radiopharmaceuticals for use by other licensees.
 3. A nuclear laundry license is one that authorizes the collection and cleaning of items contaminated with radioactive materials.
 4. A general industrial gauging device license is one that authorizes the use of a gauging device in accordance with R9-7-306(A). The Department may combine a general industrial gauging device license with a class A, B, or C broad industrial, limited industrial, portable gauge, or class A or B fixed gauge license.
 5. A general depleted uranium license is one that authorizes the use of the general license authorized pursuant to R9-7-305(C) or the use of depleted uranium as a concentrated mass or as shielding for another radiation source within a device or machine. The Department may combine a general depleted uranium license with a medical teletherapy; class A, B, or C broad industrial; portable gauge; class A or B fixed gauge; class A or B industrial radiography; or self-shielded irradiator license. For licensing purposes, an applicant shall follow the requirements in R9-7-305(C).
 6. A veterinary medicine license is one that authorizes the use of radioactive materials for specific applications in veterinary medicine as authorized in the license.
 7. A general veterinary medicine license is one that authorizes the use of the general license authorized in R9-7-306(E) in veterinary medicine.
 8. A health physics class A license is one that authorizes the use of radioactive materials for performing instrument calibrations, processing leak test or environmental samples, or providing radiation dosimetry services.
 9. A health physics class B license is one that authorizes only the collection, possession, and transfer of radioactive materials in the form of leak test samples for processing by others.
 10. A secondary uranium recovery license is one that authorizes the extraction of natural uranium or thorium from an ore stream or tailing that is being or has been processed primarily for the extraction of another mineral. The Department shall not combine a secondary uranium recovery license with any other license.
 11. A low-level, radioactive waste disposal facility license is a license that is issued for a "disposal facility," as that term is used in R9-7-439 and R9-7-442, that has a closure or long-term care plan and is constructed and operated according to the requirements in 10 CFR 61, revised January 1, 2015, incorporated by reference, available under R9-7-101 and containing no future editions or amendments.
 12. A waste processor class A license is one that authorizes the incineration, compaction, repackaging, or any other treatment or processing of low-level radioactive waste prior to transfer to another person authorized to receive or dispose of the waste. The Department shall not combine a waste processor class A license with any other license.
 13. A waste processor class B license is one that authorizes a waste broker to receive prepackaged, low-level radioactive waste from other licensees; combine the waste into shipments; and transfer the waste without treating or processing the waste in any manner and without repackaging except to place damaged or leaking packages into overpacks. The Department shall not combine a waste processor class B license with any other license.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

14. An additional storage and use site license is an endorsement, by license condition to an existing specific license, authorizing one or more additional separate facilities where radioactive material may be stored or used for a period exceeding six months.
 15. A possession-only license is a license of any other category that authorizes only the possession in storage, but no use of, the authorized materials. A license that has been suspended as an enforcement action is not considered a possession-only license.
 16. A reciprocal license is the general license authorized by R9-7-320. This license is subject to a special fee as provided by R9-7-1306(C) but is exempt from annual fees.
 17. Reserved
 18. An "unclassified" radioactive material license is one that authorizes radioisotopes, physical or chemical forms, possession limits, or uses not included in any other type of license specified in this Section.
 19. A NORM commercial disposal site license is one that authorizes the receipt of waste material contaminated with naturally occurring radioactive material from other licensees for permanent disposal, provided the concentration of the radioactive material does not exceed 74kBq (2,000 picocuries)/gram.
- E. Category E registrations** are those that register the possession of x-ray machine(s) under 9 A.A.C. 7, Article 2. The Department shall not combine category E registrations with any other registration.
1. An X-ray machine class A registration is one authorizing the possession of X-ray machines in a hospital or other facility offering inpatient care.
 2. An X-ray machine class B registration is one authorizing the possession of X-ray machines in a medical, osteopathic, or chiropractic office or clinic not offering inpatient care; or the possession of X-ray machines in a school, college, university, or other teaching facility.
 3. An X-ray machine class C registration is one authorizing the possession of X-ray machines in dental, podiatry, or veterinarian offices or clinics.
 4. An industrial radiation machine registration is one authorizing the possession of X-ray machines, or the possession of particle accelerators not capable of producing a high radiation area, in a nonmedical facility.
 5. An accelerator facility registration is one authorizing the possession and operation of one or more particle accelerators of any kind capable of accelerating any particle and producing a high radiation area.
 6. An "other" ionizing radiation machine registration is one authorizing possession or use of an ionizing radiation machine not included in any other category specified in subsection (E).
- F. Category F registrations** are those that register non-ionizing radiation producing sources regulated under 9 A.A.C. 7, Article 14. The Department shall not combine category F registrations with any other registration categories that have a difference in fee per unit.
1. A tanning registration authorizes the commercial operation of one or more tanning booths, beds, cabinets, or other devices in a single establishment.
 2. A Class A laser registration authorizes the operation of one to 10 laser devices subject to R9-7-1433.
 3. A Class B laser registration authorizes the operation of 11 to 49 laser devices subject to R9-7-1433.
 4. A Class C laser registration authorizes operation of 50 or more laser devices subject to R9-7-1433.
 5. A laser light show or laser demonstration registration authorizes the operation of a laser device subject to R9-7-1441.
 6. A medical laser registration authorizes the operation of one or more laser devices subject to R9-7-1440.
 7. A Class II surgical device registration authorizes the operation of one or more Class II surgical devices subject to R9-7-1438. A device is designated as a Class II surgical device by the USFDA and is labeled as such by the manufacturer.
 8. A cosmetic radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing cosmetic procedures.
 9. A class A industrial radiofrequency device registration authorizes the operation of one to five radiofrequency devices.
 10. A class B industrial radiofrequency device registration authorizes the operation of six to 20 radiofrequency devices.
 11. A class C industrial radiofrequency device registration authorizes the operation more than 20 radiofrequency devices.
 12. A medical radiofrequency device registration authorizes the operation of one or more medical radiofrequency devices for non-ionizing, non-cosmetic procedures.
 13. An "other" non-ionizing radiation device registration authorizes the operation of a non-ionizing radiation device or other device not included in any other category specified in subsection (F).

Historical Note

New Section R9-7-1302 recodified from R12-1-1302 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Amended by final rulemaking at 26 A.A.R. 2939, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-7-1303. Fee for Initial License and Initial Registration

An applicant shall remit for a new license or new registration the appropriate fee as prescribed in R9-7-1306 and Table 13.1. Table of Fees.

Historical Note

New Section R9-7-1303 recodified from R12-1-1303 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Amended by final rulemaking at 26 A.A.R. 2939, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-7-1304. Annual Fees for Licenses and Registrations

- A.** Each license or registration issued by the Department shall identify the category by a letter and number corresponding to the appropriate subsection of R9-7-1302 or the category and type listed in Table 13.1. Table of Fees.
- B.** Except as specified in R9-7-1306(C), (D), and (E), each licensee or registrant shall submit payment of the annual fee in the amount prescribed in Table 13.1 Table of Fees on or before January 1 of each year. This single annual fee will cover any and all renewals, amendments, and regular inspections of the license during the forthcoming calendar year.
- C.** If a licensee or registrant fails to pay the annual fee by January 1, the license is not current.
- D.** If a licensee or registrant fails to pay the annual fee by April 1, the Department shall apply administrative sanction provisions of Article 12 of this Chapter.
- E.** A licensee who is required to pay an annual fee under this Article may qualify as a small entity and pay the reduced

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

annual fee in Table 13.2 if the licensee has the following characteristics:

1. For a business not engaged in manufacturing or a not-for-profit organization, having a three-year average of gross annual receipts of \$6.5 million or less;
 2. For an entity engaged in manufacturing, having an annual average of no more than 500 employees;
 3. For a government jurisdiction, not including publicly supported educational institutions, having no more than 50,000 residents in the jurisdiction;
 4. For a publicly supported educational institution, having no more than 50,000 faculty, staff, and students; and
 5. For an educational institution that is not publicly supported, having no more than 500 faculty and staff.
- F.** A licensee who seeks to establish status as a small entity for the purpose of paying an annual fee in Table 13.2, rather than the annual fee in Table 13.1, shall file with the Department a certification statement annually on Department Form 333, accessed through the Department website at <https://azdhs.gov/documents/licensing/radiation-regulatory/forms/ram-small-entity-form.pdf>, for each license under which the licensee is billed.
- G.** If a licensee qualifies as a small entity and provides the Department with the certification required in subsection (F), the licensee may pay the applicable reduced annual fee shown in Table 13.2. Small Entity Fees. Failure to file a small entity certification, according to subsection (F), in a timely manner may result in the licensee being required to pay the applicable fee in Table 13.1. Table of Fees.

Historical Note

New Section R9-7-1304 recodified from R12-1-1304 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Amended by final rulemaking at 26 A.A.R. 2939, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-7-1305. Method of Payment

- A.** An applicant licensee or registrant shall pay fees by check or money order, payable to the "State of Arizona" at the address shown on the application, license, registration, or renewal notice.
- B.** Once a license or registration has been issued, no portion of the application fee or any annual fee will be refunded.

Historical Note

New Section R9-7-1305 recodified from R12-1-1305 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1306. Application Fees and Annual Fees

- A.** The application fee or annual fee for each category and type is shown in Table 13.1. Table of Fees.
- B.** The fee for a category D11 license, for a low-level radioactive waste disposal site, is \$6,000,000 for years one through five. Based on data gathered during the first five years, the Department shall set a reasonable fee after consideration of the following factors:
1. Unrecovered costs that the Department may charge under A.R.S. § 30-654(B)(18), and
 2. Actual costs incurred by the Department in regulating the licensee.
- C.** The fee for a category D16 license, providing reciprocal recognition under R9-7-320 of a radioactive materials license issued by the NRC or another Agreement state, is half of the annual fee for an Arizona license of the appropriate category and type. If there is no Arizona license of the appropriate category and type, the Department shall assess the "Full Cost" fee according to subsection (D) or (E), as applicable. The fee is

due and payable at the time reciprocity is requested, and the general license does not become current until the fee is paid.

- D.** "Full Cost" for an application fee is based on professional personnel time for preparation, travel, onsite inspection, any reports, review of findings, and preparation of the license or registration or denial charged at \$99 per hour and mileage charged at 44.5¢ per mile. The Department shall assess the licensee or registrant 90% of the estimated full cost of issuing the license or registration. The Department will assess for any remaining costs when it is prepared to issue the license, registration, denial, or if Department costs for the requested activity exceed \$10,000.
- E.** "Full Cost" for an annual fee is based on professional personnel time for preparation, travel, onsite inspection, preparation of reports, review of findings, and preparation for any inspections or completion of any amendments to the license, registration or denials charged at \$99 per hour and mileage charged at 44.5¢ per mile for the preceding 12 months.

Historical Note

New Section R9-7-1306 and Table 13.1 recodified from R12-1-1306 and Table 13.1 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Table 13.1 under subsection (A) repealed; Section amended by final rulemaking at 26 A.A.R. 2939, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-7-1307. Repealed**Historical Note**

New Section R9-7-1307 recodified from R12-1-1307 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Repealed by final rulemaking at 26 A.A.R. 2939, with an immediate effective date of November 3, 2020 (Supp. 20-4).

R9-7-1308. Fee for Requested Inspections

- A.** A licensee or registrant may request an inspection of its facility at any time. The Department shall assess the licensee or registrant the full cost of the inspection, based on personnel time for preparation, travel, onsite inspection, review of findings, and preparation of a report, charged at \$99 per hour and mileage charged at 44.5¢ per mile.
- B.** The fee specified in this Section does not apply to:
1. Regular inspections as scheduled by the Department,
 2. Enforcement reinspections conducted to ensure the correction of violations or safety hazards, or
 3. Inspections requested by workers pursuant to R9-7-1007.

Historical Note

New Section R9-7-1308 recodified from R12-1-1308 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1309. Abandonment of License or Registration Application

- A.** Any license or registration application for which the applicant has been provided a written notification of deficiencies in the application and for which the applicant does not make a written attempt to supply the requested information or request an extension in writing within 90 days of the date of the written notice of deficiencies, is considered abandoned and will not be processed.
- B.** If an applicant does not act in the time-frame specified in subsection (A), the applicant shall submit a new application with the appropriate fee.

ARTICLE 14. REGISTRATION OF NONIONIZING RADIATION SOURCES AND STANDARDS FOR PROTECTION AGAINST NONIONIZING RADIATION

R9-7-1401. Registration of Nonionizing Radiation Sources and Service Providers

- A.** A person shall not use a nonexempt nonionizing radiation source, unless the source is registered by the Department.
- B.** A person who possesses a nonexempt nonionizing source shall submit to the Department an application for registration within 30 days of its first use.
 1. A person who possesses a nonexempt source listed in R9-7-1302(F) shall register the source with the Department.
 2. A person applying for the registration of a nonexempt source shall use an application form provided by the Department.
 3. An applicant shall provide the information identified in Appendix B of this Article.
- C.** A registrant shall notify the Department within 30 days of any change to the information contained in the registration, or sale of a source that results in termination of the activities conducted under the registration.
- D.** In addition to the application form, an applicant shall remit the applicable registration fee, specified in R9-7-1306.
- E.** A person who is operating more than one facility, where one or more nonexempt nonionizing sources are used, shall apply for a separate registration for each facility.
- F.** A person in the business of installing or servicing nonexempt nonionizing sources shall apply to the Department for registration 30 days before furnishing the service. The person shall apply for registration on a form furnished by the Department and shall provide the information required by A.R.S. § 30-672.01.

Historical Note

New Section R9-7-1401 recodified from R12-1-1401 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1402. Definitions

General definitions:

“Controlled area” means any area to which human access is restricted for the purpose of protection from nonionizing radiation.

“Direct supervision” means that a licensed practitioner supervises the use of a source for medical purposes while the practitioner is present inside the facility where the source is being used.

“Indirect supervision” means for lasers or IPL devices used for hair removal procedures, there is at a minimum, responsible supervision and control by a licensed practitioner who is easily accessible by telecommunication.

“Licensed practitioner” (See R9-7-102)

“Medical director” means a licensed practitioner, as defined in R9-7-102, who delegates a laser, IPL, or other light-emitting medical device procedure to a non-physician and is qualified

to perform the procedure within the scope of practice of the license.

“Nonexempt nonionizing source” means any system or device that contains a nonionizing source listed in R9-7-1302(F).

“Operator” means a person who is trained in accordance with this Article and knowledgeable about the control and function of a nonionizing device regulated under this Article.

“Other cosmetic procedure” means a method of using medical lasers or intense pulse light (IPL) devices approved by the Federal Food and Drug Administration (FDA), for the cosmetic purpose of spider vein removal, skin rejuvenation, non-ablative skin resurfacing, skin resurfacing, port wine stain removal, epidermal pigmented skin lesion removal, or tattoo removal; and does not include hair removal.

Laser definitions:

“Accessible emission limit (AEL)” means the maximum accessible emission level of laser or collateral radiation permitted within a particular class.

“Accessible radiation” means laser or collateral radiation to which human access is possible.

“Angular subtense” means the apparent visual angle, α , as calculated from the source size and distance from the eye.

“Aperture” means an opening in the protective housing or other enclosure of a laser product, through which laser or collateral radiation is emitted, allowing human access to the radiation.

“Aperture stop” means an opening serving to limit the size and to define the shape of the area over which radiation is measured.

“Certified laser product” means that the product is certified by a manufacturer in accordance with the requirements of 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

“CDRH” means the Center for Devices and Radiological Health.

“Classes of lasers” means the following categories of lasers, defined in 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department: Class 1, Class 2, Class 2a, Class 3, Class 3a, Class 3b, and Class 4. This incorporation by reference contains no future editions or amendments.

“Collateral radiation” means any electronic product radiation, except laser radiation, emitted by a laser product as a result of operation of the laser or any component of the laser product

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

that is physically necessary for operation of the laser. The accessible emission limits for collateral radiation are specified in 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

“Continuous wave” (cw) means the output of a laser that is operated in a continuous rather than a pulsed mode. For purposes of this Article, a laser operating with a continuous output for a period ≥ 0.25 seconds, is regarded as a cw laser.

“Cosmetic procedure protocol” means a delegated written authorization to select specific laser or IPL settings, initiate a laser or IPL procedure, and conduct necessary follow-up procedures.

“Demonstration laser” means any laser manufactured, designed, intended, or used for purposes of demonstration, entertainment, advertising display, or artistic composition.

“Embedded laser” means an enclosed laser with an assigned class number higher than the inherent capability of the laser system in which it is incorporated, where the system’s lower classification is due to engineering features that limit accessible emission.

“Enclosed laser” means a laser that is contained within its own protective housing or the protective housing of a laser or laser system in which it is incorporated. Opening or removing the protective housing provides more access to laser radiation above the applicable MPE than is possible with the protective housing in place. (An embedded laser is a type of enclosed laser.)

“Federal performance standards for light-emitting products” means the regulations in 21CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives, and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

“Human access” means the capacity to intercept laser or collateral radiation by any part of the human body.

“Incident” means an event or occurrence that results in actual or suspected accidental exposure to laser radiation that has caused or is likely to cause biological damage.

“Integrated radiance” means radiant energy per unit area of a radiating surface per unit solid angle of emission, expressed in joules per square centimeter per steradian.

“Irradiance” means the time-averaged radiant power incident on an element of a surface divided by the area of that element, expressed in watts per square centimeter.

“Laser” See the definition in Article 1.

“Laser energy source” means any device intended for use in conjunction with a laser to supply energy for the operation of the laser. General energy sources, such as electrical supply mains or batteries, are not considered laser energy sources by the Department.

“Laser facility” means a facility where one or more lasers are used. For purposes of this definition a Class 1 facility is a facility that has one or more Class 1 lasers; a Class 2 facility is a facility that has one or more Class 2 or 2a lasers; a Class 3 facility is a facility that has one or more Class 3, 3a, or 3b lasers, and a Class 4 facility is a facility that has one or more

Class 4 lasers. Facilities that contain more than one laser class are classified according to the highest laser class in use at the facility.

“Laser product” means any manufactured product or assemblage of components that constitutes, incorporates, or is intended to incorporate a laser or laser system. A laser or laser system that is intended for use as a component of an electronic product is itself considered a laser product.

“Laser protective device” means any device used to reduce or prevent exposure of personnel to laser radiation. This includes: protective eyewear, garments, engineering controls, and operational controls.

“Laser radiation” means all electromagnetic radiation emitted by a laser product, within the spectral range specified in the definition of “laser,” which is produced as a result of controlled stimulated emission or that is detectable with radiation so produced through the appropriate aperture stop and within the appropriate solid angle of acceptance.

“Laser Safety Officer (LSO)” means any individual, qualified by training and experience in the evaluation and control of laser hazards, who is designated by the registrant and has the authority and responsibility to establish and administer the laser radiation protection program for a particular class of facility.

“Laser system” means a laser in combination with an appropriate laser energy source with or without additional incorporated components.

“Limited exposure duration (T_{\max})” means an exposure duration that is specifically limited by design or intended use.

“Maintenance” means performance of those adjustments or procedures specified in operator information provided by the manufacturer with the laser product, which are to be performed by the operator to ensure the intended performance of the product. The term does not include operation or service as defined in this Section.

“Maximum permissible exposure (MPE)” means the level of laser radiation to which a person may be exposed without hazardous effect or adverse biological changes in the eye or skin. MPE values for eye and skin exposure are listed in ANSI Z136.1-2000, American National Standard for Safe Use of Lasers, 2000 edition, which is incorporated by reference, published by the Laser Institute of America, 13501 Ingenuity Drive, Suite 128, Orlando, FL 32826, and on file with the Department. This incorporation by reference contains no future editions or amendments.

“Medical laser product” means any laser product that is a medical device defined in 21 U.S.C. 321(h) and is manufactured, designed, intended, or promoted for in vivo laser irradiation of any part of the human body for the purpose of: diagnosis, surgery, therapy, or relative positioning of the human body.

“Operation” means the performance of the laser product over the full range of its function. It does not include maintenance or service as defined in this Section.

“Protective housing” means those portions of a laser product that are designed to prevent human access to laser or collateral radiation in excess of the prescribed accessible emission limits under conditions specified in this Article.

“Pulse duration” means the time increment measured between the half-peak-power points at the leading and trailing edges of a pulse.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Pulse interval” means the period of time between identical points on two successive pulses.

“Radiance” means the time-averaged radiant power per unit area of a radiating surface per unit solid angle of emission, expressed in watts per square centimeter per steradian.

“Radiant energy” means energy emitted, transferred, or received in the form of radiation, expressed in joules.

“Radiant exposure” means the radiant energy incident on an element of a surface divided by the area of that element, expressed in joules per square centimeter.

“Radiant power” means the time-averaged power emitted, transferred, or received in the form of radiation, expressed in watts.

“Rule of nines” means a method for estimating the extent of burns, expressed as a percentage of total body surface. In this method the body is divided into sections of 9 percent or multiples of 9 percent, each: head and neck, 9 percent; anterior trunk, 18 percent; posterior trunk, 18 percent; upper limbs, 18 percent; lower limbs, 36 percent; and genitalia and perineum, 1 percent.

“Safety interlock” means a device associated with the protective housing of a laser product to prevent human access to excessive radiation.

“Sampling interval” means the time interval during which the level of accessible laser or collateral radiation is sampled by a measurement process. The magnitude of the sampling interval in units of seconds is represented by the symbol “t”.

“Secured enclosure” means an area to which casual access is impeded by various means, such as a door secured by a lock, latch, or screws.

“Service” means the performance of those procedures or adjustments described in the manufacturer’s service instructions that may affect any aspect of the product’s performance. The term does not include maintenance or operation as defined in this Section.

“T_{max}” See limited exposure duration.

“Uncertified laser product” means any laser that has not been certified in accordance with the requirements of 21CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

Radio frequency and microwave radiation definitions:

“Accessible emission level” means the level of radio frequency radiation emitted from any source, expressed in terms of power density in milliwatts per square centimeter or electric and magnetic field strength, as applicable, and to which human access is normally possible.

“Far field region” means the area in which locally uniform distribution of electric and magnetic field strengths exists in planes transverse to the direction of propagation. The far field region is presumed to exist at distances greater than $2D^2/\lambda$ from the antenna, where λ is the wavelength and D is the largest antenna aperture dimension.

“Maximum permissible exposure MPE” means the rms and peak electric and magnetic field strengths, their squares, or the plane-wave equivalent power densities associated with these fields and the induced and contact currents to which a person

may be exposed without harmful effect and with an acceptable safety factor.

“Near field region” means the area near an antenna in which the electric and magnetic field components vary considerably in strength from point to point. For most antennas the outer boundary of the region is presumed to exist at a distance $\lambda/2\pi$ from the antenna surface, where λ is the wavelength.

“Radio frequency controlled area” means any location to which access is controlled for the purpose of protection from radio frequency radiation.

“Radio frequency source” means a source or system that produces electromagnetic radiation in the radio frequency spectrum.

“Radio frequency radiation” means electromagnetic radiation (including microwave radiation) with frequencies in the range of 0.3 megahertz to 100 gigahertz.

“Root-mean-square (rms)” means the effective value, or the value associated with joule heating, of a periodic electromagnetic wave. The rms is obtained by taking the square root of the mean of the squared value of a function.

“Safety device” means any mechanism incorporated into a radio frequency source that is designed to prevent human access to excessive levels of radio frequency radiation.

Ultraviolet, high intensity light, and intense pulsed light source definitions:

“EPA” means the United States Environmental Protection Agency.

“FDA” means the United States Food and Drug Administration.

“High intensity mercury vapor discharge (HID) lamp” means any lamp, including a mercury vapor or metal halide lamp that incorporates a high-pressure arc discharge tube with a fill that consists primarily of mercury and is contained within an outer envelope, except the tungsten filament self-ballasted mercury vapor lamp.

“Intense pulsed light device (IPL)” means, for purposes of R9-7-1438, any lamp-based device that produces an incoherent, filtered, and intense light.

“Maximum exposure time” means the greatest continuous exposure time interval recommended by the manufacturer of a product.

“Protective sunlamp eyewear” means any device designed to be worn by a user of a product to reduce exposure of the eyes to radiation emitted by the product.

“Sanitize” means treat the surfaces of equipment and devices using an EPA or FDA registered product that provides a specified concentration of chemicals, for a specified period of time, to reduce the bacterial count, including pathogens, to a safe level.

“Self-extinguishing lamp” means any HID lamp that ceases operation in conformance with the requirements of the performance standard in 21 CFR 1040.30(d), April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

“Sunlamp product” means any electronic product designed to incorporate one or more ultraviolet lamps and intended for

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

irradiation of any part of the living human body, by ultraviolet radiation with wavelengths in air between 200 and 400 nanometers, to induce skin tanning.

“Timer” means any device incorporated into a product that terminates radiation emission after a preset time interval.

“Ultraviolet lamp” means any light source that produces ultraviolet radiation and that is intended for use in any sunlamp product.

“Ultraviolet radiation” means electromagnetic radiation in the wavelength interval from 200 to 400 nanometers in air.

“User” means any member of the public who is provided access to a tanning device in exchange for a fee or other compensation, or any individual who, in exchange for a fee or other compensation, is afforded use of a tanning device as a condition or benefit of membership or access.

R9-7-1403. General Safety Provisions and Exemptions

- A.** Based on consideration of the following factors, the Department may waive compliance with specific requirements of this Article:
- Whether compliance requires product replacement or substantial modification of a product’s current installation, and
 - Whether the registrant provided information requested by the Department to determine if there are alternative methods of achieving the same or a greater level of radiation protection.
- B.** The registrant shall:
- Ensure that any nonionizing source is operated by an individual who is trained and has demonstrated competence in the safe use of the source.
 - Provide safety rules to each individual who operates a nonionizing radiation source and determine whether the individual is aware of operating restrictions and procedures associated with the safe use of the source.
 - Make, or cause to be made, any physical radiation surveys required by this Article.
 - Maintain the following records for three years for Department review:
 - Results of any physical survey or calibration required by this Article;
 - Radiation source inventories;
 - Maintenance, service, and modification records; and
 - Incident reports of known or suspected exposure to nonionizing radiation that exceeds any MPE specified in this Article.
- C.** A registrant shall not operate a nonionizing radiation source unless the source complies with all of the applicable requirements of this Article.

R9-7-1404. Radio Frequency Equipment

- A.** A registrant shall operate a radiation source that emits radio frequency radiation in a radio frequency controlled area, in a manner that will prevent human exposure that exceeds the MPE specified in IEEE Std C95.1-1999, Institute of Electrical and Electronics Engineers Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3kHz to 300 GHz, 1999 edition, which is incorpo-

rated by reference, published by the Institute of Electrical and Electronic Engineers, Inc., 345 East 47th Street, New York, NY 10017, and on file with the Department. This incorporation by reference contains no future editions or amendments. The registrant shall post each point of access into a radio frequency controlled area according to R9-7-1406.

- B.** If a registrant is required to operate a radio frequency source in a controlled area, the registrant shall employ visual or audible emission indicators that function only during production of radiation.
- C.** If a source of radio frequency emissions is physically separate from the source’s means of activation by a distance greater than 2 meters, the registrant shall place a visual or an audible emission indicator at the source and the point of activation.
- D.** A registrant shall place each visual emission indicator so that the location of the indicator does not require human exposure to radio frequency radiation that exceeds the applicable MPE.
- E.** A registrant shall inspect each safety device designed to prevent human exposure to excessive radio frequency radiation for proper operation at intervals that do not exceed one month.
- F.** If a machine emits mechanically scanned radio frequency radiation, a registrant shall ensure that the machine cannot, as the result of scan failure or any other malfunction, cause a change in angular velocity or amplitude, allowing human exposure that exceeds the applicable MPE.
- G.** A registrant shall physically secure each radio frequency sources to prevent unauthorized use and tampering.

R9-7-1405. Radio Frequency Radiation: Maximum Permissible Exposure

- A.** A registrant shall not expose a person to radio frequency radiation that exceeds the applicable MPE specified in IEEE Std C95.1-1999, Institute of Electrical and Electronics Engineers Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 3kHz to 300 GHz, 1999 edition, which is incorporated by reference, published by the Institute of Electrical and Electronic Engineers, Inc., 345 East 47th Street, New York, NY 10017, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- B.** At frequencies between 300 kHz and 100 GHz a registrant may exceed the applicable MPE if exposure conditions can be shown by laboratory procedures to produce specific absorption rates (SARs) above 0.4 watts per kilogram, averaged over the whole body, and spatial peak SAR values above 8 watts per kilogram, averaged over 1 gram of tissue.
- C.** At frequencies between 300 kHz and 1 GHz, a registrant may exceed the applicable MPE, if the radio frequency input power to the radiating device is seven watts or less.

R9-7-1406. Radio Frequency Hazard Caution Signs, Symbols, Labeling, and Posting

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- A. A registrant shall post each point of access to a controlled area with caution signs of the type designated in Figure 1.

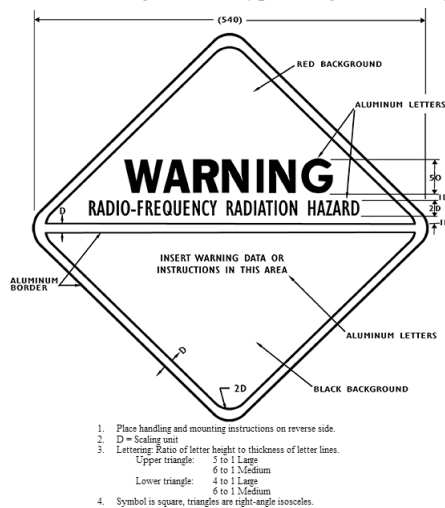

Fig. 1

- B. A registrant shall post operating procedure restrictions or limitations, used to prevent unnecessary or excessive exposure to radio frequency radiation, in a location visible to the operator.
- C. A registrant shall place each warning sign or label so that an observer is not exposed to radio frequency radiation that exceeds the applicable MPE.

Historical Note

R9-7-1408. Reporting of Radio Frequency Radiation Incidents

- A. A registrant shall report in writing to the Department within 15 days of a known or suspected personnel exposure to radiation that exceeds the applicable MPE incorporated by reference in R9-7-1405.
- B. A registrant shall report to the Department within 24 hours of a known or suspected personnel exposure to radiation that exceeds 150% of an applicable MPE incorporated by reference in R9-7-1405.
- C. A registrant shall immediately report to the Department a known or suspected personnel exposure to radiation that exceeds 500% of an applicable MPE incorporated by reference in R9-7-1405.

Historical Note

R9-7-1409. Medical Surveillance for Workers Who May Be Exposed to Radio Frequency Radiation

- A. Upon request by the Department, a registrant shall provide a medical examination to an individual exposed to radiation reported to the Department according to R9-7-1408.
- B. A registrant shall provide a copy of the results to the Department if an individual undergoes a medical examination, requested under subsection (A).

Historical Note

New Section R9-7-1409 recodified from R12-1-1409 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1410. Radio Frequency Compliance Measurements

- A. For obtaining measurements to determine compliance with R9-7-1405, the Department shall use an instrument capable of measuring the field strength and frequency of radiation.
- B. The Department shall ensure that each instrument used for compliance measurements is calibrated every 12 months. The calibration shall be performed in a manner that meets the standards in IEEE Std C95.1-1999, incorporated by reference in R9-7-1404(A).
- C. For compliance measurements of exposure conditions in the near field, the Department shall obtain measurements of both the electric and magnetic field components. The applicable protection standards for near field measurements are the mean squared electric and magnetic field strengths (using the applicable MPE) referenced in R9-7-1405.
- D. If the Department is obtaining measurements to determine compliance in far field exposure conditions, the Department may use measurements of power density in milliwatts per square centimeter or the calculated equivalent plane wave power density, based on measurement of either the electric or magnetic field strength. The applicable protection standards are the power density values (using the applicable MPE) referenced in R9-7-1405.
- E. In obtaining measurements in accordance with this Section, the Department shall measure the electric and magnetic field strength:
 1. Obtained at an emission frequency of 300 megahertz or less; and
 2. Expressed in terms of power density.
- F. For mixed or broadband fields at frequencies for which there are different protection standards, the Department shall determine the fraction of the applicable MPE incurred within each frequency interval. To achieve compliance the sum of all the fractions shall not exceed unity (1).
- G. The Department shall obtain compliance measurements at a distance of five centimeters or greater from any object.
- H. A registrant shall obtain measurements that are averaged over a six-minute period for pulsed and non-pulsed modes of radio frequency emission and make a correction for duty cycle in determining the average field strength.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

Historical Note

New Section R9-7-1412 recodified from R12-1-1412 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1413. Tanning Equipment Standards

- A.** A registrant operating a tanning facility shall use sunlamp products that are certified by the manufacturer to comply with 21 CFR 1040.20, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments. For sunlamp products in use before the effective date of this Article, the Department shall determine compliance based on the standard in effect at the time of manufacture, as shown on the equipment identification label.
- B.** A registrant shall replace burned-out or defective lamps or filters, before any use of a tanning device.
- C.** A registrant shall replace a burned-out or defective lamp or filter with a lamp or filter intended for use in that equipment, as specified on the sunlamp product label, or that is equivalent to a lamp or filter specified on the sunlamp product label under the FDA regulations and policies applicable to the sunlamp product at the time of manufacture. If an equivalent lamp or filter is used instead of the Original Equipment Manufacturer (OEM) lamp or filter specified on the product label, the registrant shall maintain a copy of the equivalency certification, provided by the lamp supplier, on file for review by Department inspectors.
- D.** A registrant shall ensure that each sunlamp product has a timer and control system that complies with 21 CFR 1040.20(c), April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments. In addition the registrant shall ensure that:
 1. The timer interval does not exceed the manufacturer's maximum, recommended exposure time;
 2. The timer is functional and accurate to within +/- 10% of the maximum timer interval of the product;
 3. The timer does not automatically reset and cause radiation emission to resume for a period greater than the unused portion of the timer cycle;
 4. The timer is tested annually for accuracy;
 5. For a new facility (including existing facilities with change of ownership) a remote timer control system is installed before operation of sunlamp products. For an existing facility that has sunlamp products not equipped with a remote timer control system, a remote timer control system (outside of the sunlamp product room) is installed no later than 6 months after the effective date of this Section; and
 6. Each sunlamp product is equipped with an emergency shutoff mechanism that allows manual termination of the UV exposure by the user.
- E.** A registrant shall provide physical barriers between each sunlamp product to protect users from injury caused by touching or breaking a lamp.
- F.** A registrant that employs a stand-up sunlamp product shall:
 1. Use physical barriers, handrails, floor markings, or other methods to indicate the proper exposure distance between the ultraviolet lamps and the user's skin;
 2. Construct each tanning booth so that it can withstand the stress of use and the impact of a falling person;

3. Provide access to a tanning booth with doors of rigid construction that open outward, handrails, and non-slip floors; and
4. Control the interior temperature of a sunlamp product so that it never exceeds 100 degrees Fahrenheit (38 degrees Centigrade).

Historical Note

R9-7-1414. Tanning Equipment Operators

- A.** A registrant shall ensure that at least one operator is present during operating hours. The operator shall:
 1. Limit the occupancy of the tanning room to one person when the tanning equipment is in use;
 2. Prevent use of the tanning equipment by anyone under 18 years of age unless the person has written permission from a parent or guardian;
 3. Limit exposure time to the manufacturer's recommendation on the equipment label or in the operator's manual;
 4. Limit exposure time during a 24-hour period to the maximum recommended for a 24-hour period by the manufacturer; and
 5. Maintain a record of each user's total number of tanning visits and exposure times for Department inspection. The registrant shall maintain the records for three years from the date on the record.
- B.** Before use of tanning equipment, an operator shall:
 1. Provide the user sanitized protective sunlamp eyewear and directions for its use;
 2. Demonstrate the use of any physical aids, necessary to maintain correct exposure distance for the user, as recommended by the manufacturer of the tanning equipment;
 3. Set the exposure timer so that the user is not exposed to excess radiation;
 4. Instruct the user on the maximum exposure time and correct distance from the radiation source as recommended by the manufacturer of the tanning equipment; and
 5. Instruct the user about the location and correct operation of the emergency shutoff switch.
- C.** An operator shall control a sunlamp's timer. A registrant shall:
 1. Provide training to operators that covers:
 - a. The requirements of this Section;
 - b. Facility operating procedures, including:
 - i. Determination of skin type and associated duration of exposure;
 - ii. Procedures for use of minor and adult user consent forms;
 - iii. Potential harm associated with photosensitizing foods, cosmetics, and medications;
 - iv. Requirements for use of protective eyewear by users of the equipment; and
 - v. Proper sanitizing procedures for the facility, equipment, and eyewear;
 - c. The manufacturer's procedures for operation and maintenance of tanning equipment;
 - d. Recognition of injury or overexposure; and
 - e. Emergency procedures used in the case of an injury.
 2. Maintain records of training for Department review, which include dates and material covered, for three years from the date the training is provided.
 3. Post a list of operators at the facility.
- D.** Before the first use of a tanning facility in each calendar year by a user:
 1. An operator shall request that the user read a copy of the warnings in R9-7-1415(A);

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. The operator shall obtain the user's signature on a statement as an acknowledgment that the user has heard or read and understands the warnings in R9-7-1415(A); and
3. For illiterate or visually handicapped persons, the operator shall read the warnings in R9-7-1415(A) in the presence of a witness. Both the witness and the operator shall sign the statement described in subsection (D)(2).

R9-7-1415. Tanning Facility Warning Signs

- A. A registrant shall post the warning sign shown in this subsection within 1 meter (39.37 inches) of each tanning device,

ensuring that the sign is clearly visible and easily viewed by the user before the tanning device is operated.

- B. A registrant shall post a warning sign, which contains the statement shown, at or near the reception area.

PERSONS UNDER AGE 18 ARE REQUIRED TO HAVE

PARENT OR LEGAL GUARDIAN SIGN AN AUTHORIZATION

TO TAN IN THE PRESENCE OF A TANNING FACILITY OPERATOR

- C. The lettering on each warning sign shall be at least 10 millimeters high for all words shown in capital letters and at least 5 millimeters high for all lower case letters.

DANGER - ULTRAVIOLET RADIATION

1. Follow instructions.
2. Avoid overexposure. As with natural sunlight, exposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause premature aging of the skin, dryness, wrinkling, and skin cancer.
3. Wear protective eyewear.

FAILURE TO USE PROTECTIVE EYEWEAR MAY RESULT IN SEVERE BURNS OR LONG TERM INJURY TO THE EYES.

4. Medications or cosmetics may increase your sensitivity to the ultraviolet radiation. Consult a physician before using a sunlamp if you are using medications or have a history of skin problems or believe you are especially sensitive to sunlight.
5. If you do not tan in the sun, you are unlikely to tan from use of this device.

R9-7-1416. Reporting of Tanning Injuries

- A. A registrant shall report any incident involving an eye injury; skin burn; fall injury, if the fall occurs within the tanning device or while entering or exiting the device; laceration; infection believed to have been transmitted by use of the tanning device; or any other injury reasonably related to the use of the tanning device.
- B. A registrant shall provide a written report of an incident to the Department within 10 working days of its occurrence or within 10 working days of the date the registrant became aware of the incident.
- C. The report shall include:
1. The name of the user;
 2. The name and location of the tanning facility;
 3. A description of and the circumstances associated with the injury;
 4. The name and address of the health care provider treating the user, if any; and
 5. Any other information the registrant considers relevant to the incident.

R9-7-1421. Laser Safety

- A. The requirements contained in this Section apply to laser products that are used in accordance with the manufacturer's classification and instructions. If certain engineering controls are impractical during manufacture or research and development activities, the LSO shall specify alternate requirements to obtain equivalent laser safety protection.
- B. A registrant shall establish and maintain a laser radiation safety program.
- C. If R9-7-1433 is applicable, a registrant shall conduct a laser radiation protection survey to ensure compliance with R9-7-1433 before initial use, following system modifications, and at intervals that do not exceed six months. During a survey the registrant shall:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. Determine whether each laser protective device is labeled correctly, functioning within the design specifications, and meets required standards for the type and class of laser in use;
 2. Determine whether each warning device is functioning within design specifications;
 3. Determine whether each controlled area is identified, controlled, and posted with accurate warning signs in accordance with this Article;
 4. Reevaluate potential hazards from surfaces that are associated with Class 3 and Class 4 beam paths; and
 5. Evaluate the laser and collateral radiation hazard incident to the use of lasers.
- D.** The registrant shall maintain records of:
1. Results of all physical surveys made to determine compliance with this Article;
 2. Any restriction in operating procedures necessary to prevent unnecessary or excessive exposure to laser or collateral radiation;
 3. Any incident for which reporting to the Department is required pursuant to R9-7-1436;
 4. Results of medical surveillance to determine extent of injury resulting from exposure to laser or collateral radiation;
 5. Inventory to account for all sources of radiation possessed by the licensee.
- E.** A registrant shall provide the Laser Safety Officer with training that covers the subjects listed in Appendix D.

Historical Note

New Section R9-7-1421 recodified from R12-1-1421 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1422. Laser Protective Devices

- A.** A registrant shall ensure that each laser product has a protective housing that prevents access to laser and collateral radiation if it exceeds the exposure limits for Class 1 lasers in R9-7-1426. If a laser's accessible emission levels must exceed the limits for Class 1 lasers, the registrant shall use a laser from the lowest class that will enable the registrant to perform the intended function.
- B.** To prevent access to radiation above the applicable MPE, a registrant shall ensure that each laser has a safety interlock, which prevents operation of the laser if a person has removed any portion of the protective housing that can be removed or displaced without the use of tools during normal operation or maintenance. The registrant shall ensure that:
1. Service, testing, or maintenance of a laser does not render the interlocks inoperative or increase radiation outside the protective housing to levels that exceed the applicable MPE, unless a controlled area is established as specified in R9-7-1433;
 2. For pulsed lasers, interlocks are designed to prevent the laser from firing;
 3. For Class 3b and 4 continuous wave (cw) lasers, interlocks turn off the power supply or interrupt the beam.
 4. An interlock does not allow automatic accessibility to radiation emission above the applicable MPE when the interlock is closed; and
 5. Multiple safety interlocks or a means to preclude removal or displacement of the interlocked portion of the protective housing is provided if failure of a single interlock could result in:
 - a. Human access to levels of laser radiation that exceed the radiant power accessible emission limit for Class 3a laser radiation, or
 - b. Laser radiation that exceeds the accessible emission limit for Class 2, emitted directly through the opening created by removal or displacement of a portion of the protective housing.
- C.** A registrant shall ensure that a laser with viewing ports, viewing optics, or display screens, included as an integral part of the enclosed laser or laser system has:
1. A suitable means to attenuate laser and collateral radiation transmitted through the optical system to less than the accessible emission limit for collateral radiation required by 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments; and
 2. Specific written administrative procedures developed by the LSO, and use controls, such as interlocks or filters, if there is increased hazard to the eye or skin associated with the use of optical systems such as lenses, telescopes, or microscopes.
- D.** A registrant shall ensure that each Class 3 or 4 laser product provides a visual or audible indication before the emission of accessible laser radiation that exceeds the limits for Class 1, as follows:
1. For Class 3, except for laser products that allow access to less than 5 milliwatts peak visible laser radiation, and Class 4 lasers, the indication occurs before the emission of the radiation and allows enough time for action to avoid exposure;
 2. Any visual indicator is clearly visible through protective eyewear designed specifically for the wavelength of the emitted laser radiation;
 3. If the laser and laser energy source are housed separately and can be operated at a separation distance of greater than 2 meters, both the laser and laser energy source incorporate visual or audible indicators; and
 4. Any visual indicators are positioned so that viewing does not require human access to laser radiation that exceeds the applicable MPE.
- E.** In addition to the information signs, symbols, and labels prescribed in R9-7-1427, R9-7-1428, and R9-7-1429, each registrant shall provide, near the signs, symbols, and labels within the laser facility, operating procedure restrictions and any other safety information required to ensure compliance with this Article and minimize exposure to laser and collateral radiation.

R9-7-1423. Laser Prohibitions

- A.** A registrant shall not require or permit an individual to look directly into a laser beam or directly at specular reflections of a laser beam, or align a laser by eye while looking along the axis of the laser beam if the intensity of the beam or the beam's reflections exceeds the applicable MPE.
- B.** A registrant shall not permit an individual to enter a controlled area if the skin exposure exceeds the applicable MPE, unless the registrant provides and requires the use of protective clothing, gloves, and shields.
- C.** A registrant shall ensure that any laser product, emitting spatially scanned laser radiation, does not, as a result of scan failure or any other failure that causes a change in angular velocity or amplitude, permit human access to laser radiation class of product.

- A. Each laser product is classified on the basis of emission level, emission duration, and wavelength of accessible laser radiation emitted over the full range of resulting operational capability, any time during the useful life of the product, according to the federal performance standards for light-emitting products contained in 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- B. Any person that modifies a certified laser product in a manner that affects any aspect of performance or intended functions of the product, shall recertify and reidentify the product in accordance with 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- C. Any laser system that is incorporated into a laser product that is subject to the requirements of this Article, and capable, without modification, of producing laser radiation when removed from the laser product, is considered a laser product, subject to the applicable requirements of this Article. Upon removal of the laser system described in this subsection, the laser product is classified on the basis of accessible laser radiation emission.

R9-7-1426. Laser and Collateral Radiation Exposure Limits

- A. A registrant shall not use, or permit the use of a laser product that will result in a human exposure that exceeds the applicable MPE or accessible emission limit (AEL) listed in ANSI Z136.1-2000, American National Standard for Safe Use of Lasers, 2000 edition, which is incorporated by reference, published by the Laser Institute of America, 13501 Ingenuity Drive, Suite 128, Orlando, FL 32826, and on file with the Department. Accessible emission limits are listed in 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. These incorporations by reference contain no future editions or amendments.
- B. A registrant shall not allow exposure to collateral radiation that exceeds any accessible emission limit in 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

R9-7-1427. Laser Caution Signs, Symbols, and Labels

- A. Except as otherwise authorized by the Department, a registrant shall use signs, symbols, and labels prescribed by this Section and the design and colors specified in ANSI Z136.1-2000, American National Standard for Safe Use of Lasers, 2000 edition, which is incorporated by reference, published by the Laser Institute of America, 13501 Ingenuity Drive, Suite 128, Orlando, FL 32826, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- B. A registrant shall ensure that the word “invisible” immediately precedes the word “radiation” on labels and signs required by this Section for lasers that only produce wavelengths of laser and collateral radiation that are outside of the range of 400 to 710 nanometers.
- C. A registrant shall ensure that the words “visible and invisible” immediately precede the word “radiation” on labels and signs required by this Section for lasers that produce wavelengths of laser and collateral radiation that are both within and outside the range of 400 to 710 nanometers.
- D. A registrant shall position any label placed on lasers or signs posted in laser facilities so that the reader of the label or sign is not exposed to laser or collateral radiation that exceeds the applicable MPE or accessible emission limit while reading the label or sign.
- E. A registrant shall use labels and signs that are clearly visible, legible, and permanently attached to the laser or facility.
- F. A registrant shall ensure that a permanent and legible label is affixed to each laser, identifying the classification of the laser in accordance with 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.
- G. For a Class 3 or Class 4 laser a registrant shall ensure that a permanent and legible label is affixed to each laser, specifying the maximum output of laser radiation, the pulse duration if applicable, and the laser medium or emitted wavelength.
- H. For a Class 3 or Class 4 laser, used in the practice of medicine, a registrant shall ensure that a permanent and legible label is affixed to each laser providing one or more of the following warnings near each aperture that emits laser radiation or collateral radiation that exceeds the applicable MPE, as follows:
 1. “AVOID EXPOSURE - Laser radiation is emitted from this aperture” if the radiation emitted through the aperture is laser radiation;
 2. “AVOID EXPOSURE - Hazardous electromagnetic radiation is emitted from this aperture” if the radiation emitted through the aperture is collateral radiation; or
 3. “AVOID EXPOSURE - Hazardous x-rays are emitted from this aperture” if the radiation emitted through the aperture is collateral x-ray radiation.
- I. A registrant shall ensure that there is a label on each non-interlocked or defeatable interlocked portion of the protective housing or enclosure that permits human access to laser or collateral radiation. The label shall include one or more of the following warnings, as applicable:
 1. For laser radiation that exceeds the applicable accessible emission limit for a Class 1 or Class 2 laser, but does not exceed the applicable accessible emission limit for a Class 3 laser, the warning: “DANGER - Laser radiation

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

when open, AVOID DIRECT EXPOSURE TO THE BEAM.”

2. For laser radiation that exceeds the applicable accessible emission limit for a Class 3 laser, the warning: “DANGER - Laser radiation when open, AVOID EYE OR SKIN EXPOSURE TO DIRECT OR SCATTERED RADIATION.”
3. For collateral radiation that exceeds an applicable accessible emission limit:
 - a. If the applicable limit for collateral laser radiation is exceeded, the warning: “CAUTION - Hazardous electromagnetic radiation when open”; and
 - b. If the applicable limit for collateral x-ray radiation is exceeded, the warning: “CAUTION - Hazardous x-ray radiation”.
4. For a protective housing or an enclosure that has a defeat-able interlock, the warning “and interlock defeated” in addition to the warnings in subsections (1) through (3).

R9-7-1433. Laser Use Areas that are Controlled

- A. A registrant shall establish a controlled area for a laser if it is possible for a person to be exposed to laser radiation from a Class 3b laser, except a Class 3b laser of less than 5 milliwatts visible peak power, or a Class 4 laser that exceeds the applicable MPE or AEL in R9-7-1426.
- B. A registrant shall ensure that a controlled area associated with a Class 3b laser is:
 1. The responsibility of a LSO;
 2. Posted in accordance with this Article; and
 3. Access controlled by the LSO or a trained, designated representative.

- C. A registrant shall ensure that a controlled area associated with a Class 4 laser is:
 1. The responsibility of a LSO;
 2. Posted in accordance with this Article;
 3. Access controlled by the LSO or a trained, designated representative; and
 4. If an indoor controlled area:
 - a. Equipped with latches, interlocks, or another means of preventing unexpected entry into the controlled area;
 - b. Equipped with a control-disconnect switch, panic button, or an equivalent device for deactivating the laser during an emergency;
 - c. Operated so that the person in charge of the controlled area can momentarily override the safety interlocks during tests that require continuous operation to provide access to other personnel if there is no optical radiation hazard at the point of entry and the entering personnel are wearing required protective devices; and
 - d. Controlled in a way that reduces the transmitted values of laser radiation through optical paths such as windows, to levels at or below the applicable ocular MPE and AEL in R9-7-1426. If a laser beam with an irradiance or radiant-exposure above the applicable MPE or AEL will exit the indoor controlled area (as in the case of exterior atmospheric beam paths), the registrant and the operator are responsible for ensuring that the beam path is limited to controlled air space or controlled ground space.

- D. If a panel or protective cover is removed or an interlock bypassed for service, testing, or maintenance, a registrant shall establish an accessible controlled area. The registrant, through a LSO or a designated representative, shall comply with laser safety requirements for all potentially-exposed individuals.

R9-7-1434. Laser Safety Officer (LSO)

- A. Each registrant shall designate a Laser Safety Officer (LSO).
- B. The LSO shall administer the laser radiation protection program and shall:
 1. Ensure that maintenance or service for Class 3b and Class 4 lasers is performed only by technicians trained to provide the maintenance or service by either the manufacturer’s service organization or the registrant;
 2. Approve or reject written service, maintenance, and operating procedures;
 3. Investigate, document, and report all incidents as required by R9-7-1436;
 4. Select protective eyewear as required by R9-7-1435, along with any other protective equipment;
 5. For health care facilities, establish authorization and operating procedures, including preoperative and postoperative checklists, for use by operating room personnel;
 6. Ensure that authorized personnel are trained in the assessment and control of laser hazards;
 7. Select signs, symbols, and labels as required by R9-7-1427;
 8. Perform laser radiation protection surveys as required by R9-7-1421 and R9-7-1441;
 9. Classify or verify the classification of lasers and laser systems used under the LSO’s jurisdiction;
 10. Evaluate the hazard of laser use areas, treatment areas, and controlled areas, as required by R9-7-1421(C).

R9-7-1435. Laser Protective Eyewear

- A. A registrant shall require that protective eyewear, as specified by the LSO, be worn by an individual who has access to:
1. Class 4 laser radiation; or
 2. Class 3b laser radiation.
- B. A registrant shall, through the LSO, provide protective eyewear that is:
1. Marked with a label that indicates the optical density protection afforded for the relevant laser wavelength;
 2. Maintained so that the protective properties of the eyewear are preserved;
 3. Inspected at intervals that do not exceed six months to ensure integrity of the protective properties; and
 4. Removed from service if the protective properties of the eyewear fall below the optical density on the label.
- C. A registrant shall maintain records of protective eyewear maintenance, inspection, and removal from service for five years.

R9-7-1436. Reporting Laser Incidents

- A. A registrant shall notify the Department by telephone within 24 hours of any incident that has caused or may have caused:
1. Permanent loss of sight in either eye; or
 2. Third-degree burns of the skin involving more than 5 percent of the body surface as estimated by the rule of nines.
- B. A registrant shall notify the Department by telephone within five working days of any incident that has or may have caused:
1. Any second-degree burn of the skin larger than one inch (2.54 centimeter) in greatest diameter; or
 2. Any third-degree burn of the skin; or
 3. An eye injury with any potential loss of sight.
- C. Each registrant shall file a written report with the Department of any known exposure of an individual to laser radiation or collateral radiation within 30 days of its discovery, describing:
1. Each exposure of the individual to laser or collateral radiation that exceeds the applicable MPE; and
 2. Any incident that triggered a notice requirement in subsections (A) or (B).
- D. Each report required by subsection (C) shall describe the extent of exposure to each individual including:
1. An estimate of the individual's exposure;
 2. The level of laser or collateral radiation involved;
 3. The cause of the exposure; and
 4. The corrective steps taken or planned to prevent a recurrence.
- E. A registrant shall not operate or permit the operation of any laser product or system that does not meet the applicable requirements in this Article.

R9-7-1437. Special Lasers

A registrant operating a laser system with an unenclosed beam path shall:

1. Conduct an evaluation before operating the laser to determine the expected beam path and the potential hazards from reflective surfaces. Based on the evaluation the registrant shall exclude reflective surfaces from the beam

path at all points where the laser radiation exceeds an applicable MPE;

2. Evaluate the stability of the laser platform to determine the constraints placed upon the beam traverse and the extent of the range of control; and
3. Refrain from operating or making a laser ready for operation until the area along all points of the beam path, where the laser radiation will exceed the applicable MPE, is clear of individuals, unless the individuals are wearing the correct protective devices.

R9-7-1438. Hair Reduction and Other Cosmetic Procedures Using Laser and Intense Pulsed Light

- A. Registration. A person who seeks to perform hair reduction or other cosmetic procedures shall apply for registration of any medical laser or IPL device that is a Class II surgical device, certified as complying with the labeling standards in 21 CFR 801.109, revised April 1, 2010, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments. The applicant shall provide all of the following information to the Department with the application for registration:

1. Documentation demonstrating that the health professional is qualified in accordance with A.R.S. § 32-516 or 32-3233, has 24 hours of didactic training on the subjects listed in Appendix C, and has passed an Department-approved exam on subjects covered with a minimum grade of 80%;
2. For any health professional in practice prior to October 1, 2010, proof of 24 hours of training on the subjects listed in Appendix C;
3. Documentation endorsed by the prescribing health professional, acknowledging responsibility for the minimum level of supervision required for hair reduction procedures as defined in R9-7-1402 under "indirect supervision";
4. Procedures to ensure that the registrant has a written order from a prescribing health professional before the application of radiation;
5. If authorized, procedures to ensure that, in the absence of a prescribing health professional at the facility, the registrant has established a method for emergency medical care and assumed legal liability for the service rendered by an indirectly-supervised certified laser technician; and
6. Documentation that the indirectly-supervised certified laser technician has participated in the supervised training required by A.R.S. § 32-516 or 32-3233.

B. Hair Reduction Procedures

1. If a registrant is using a medical laser or an IPL device that is a Class II surgical device, certified in accordance with the labeling standards in subsection (A), for hair reduction procedures, the registrant shall:
 - a. Ensure that the device is only used by a health professional described in A.R.S. §§ 32-516(F)(3) and 32-3233(D)(1) or by a certified laser technician who is working under the indirect supervision of a health professional described in A.R.S. §§ 32-516(C)(1) and 32-3233(D) and (H)(1), and
 - b. Ensure that a prescribing health professional purchases or orders the Class II surgical device that will be used for hair reduction procedures.
2. A registrant shall:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. Not permit an individual to use a medical laser or IPL device for hair reduction procedures unless the individual:
 - i. Completes an approved laser technician didactic training program of at least 40 hours duration. To successfully complete the training program, the individual shall pass a test that consists of at least 50 multiple choice questions on subjects covered with a minimum grade of 80%. The training program shall be provided by an individual who is a health professional acting within the health professional's scope of practice, or a certified laser technician with a minimum of 100 hours of hands-on experience per procedure being taught;
 - ii. Is present in the room for at least 24 hours of hands-on training, conducted by a health professional or a certified laser technician as described in subsection (B)(2)(a)(i);
 - iii. Performs or assists in at least 10 hair reduction procedures; and
 - iv. Has the qualified health professional or qualified supervising certified laser technician certify that the laser technician has completed the training and supervision as described in subsection (B)(2)(a).
 - b. Ensure that the laser technician follows written procedure protocols established by a prescribing health professional; and
 - c. Ensure that the laser technician follows any written order, issued by a prescribing health professional, which describes the specific site of hair reduction.
 3. A registrant shall maintain a record of each hair reduction procedure protocol that is approved and signed by a prescribing health professional, and ensure that each protocol is reviewed by a prescribing health professional, at least annually.
 4. A registrant shall:
 - a. Maintain each procedure protocol onsite, and ensure that the protocol contains instructions for the patient concerning follow-up monitoring; and
 - b. Design each protocol to promote the exercise of professional judgment by the laser technician commensurate with the individual's education, experience, and training. The protocol need not describe the exact steps that a qualified laser technician should take with respect to a hair reduction procedure.
 5. A registrant shall require that a prescribing health professional observe the performance of each laser technician during procedures at intervals that do not exceed six months. The registrant shall maintain a record of the observation for three years from the date of the observation.
 6. A registrant shall verify that a health professional is qualified to perform hair reduction procedures by obtaining evidence that the health professional has received relevant training specified in subsection (A)(1) and in physics, safety, surgical techniques, pre-operative and post-operative care and can perform these procedures within the relevant scope of practice, as defined by the health professional's licensing board.
 7. A registrant shall provide radiation safety training to all personnel involved with hair reduction procedures, designing each training program so that it matches an individual's involvement in hair reduction procedures. The registrant shall maintain records of the training program and make them available to the Department for three years from the date of the program, during and after the individual's period of employment.
- C. Other Cosmetic Procedures
1. If a registrant is using a medical laser or an IPL device that is a Class II surgical device, certified in accordance with the labeling standards in subsection (A), for other cosmetic procedures, the registrant shall:
 - a. Ensure that the device is only used by a health professional described in A.R.S. §§ 32-516(F)(3) and 32-3233(D)(1) or by a certified laser technician who is directly supervised by a health professional as described in A.R.S. §§ 32-516(C)(2) and 32-3233(D) and (H)(2); and
 - b. Ensure that a prescribing health professional purchases or orders the Class II surgical device that will be used for other cosmetic procedures.
 2. A registrant shall not permit an individual to use a medical laser or IPL device for other cosmetic procedures unless the individual:
 - a. Completes an approved laser technician didactic training program of at least 40 hours duration. To successfully complete the training program the individual shall pass a test that consists of at least 50 multiple choice questions on subjects covered with a minimum grade of 80%. The training program shall be provided by an individual who is a health professional acting within the health professional's scope of practice, or a certified laser technician with a minimum of 100 hours of hands-on experience per procedure being taught;
 - b. Is present in the room for at least 24 hours of hands-on training, conducted by a health professional or a certified laser technician as described in subsection (C)(2)(a); and
 - c. Performs or assists in at least 10 cosmetic procedures governed by subsection (C), for each type of procedure (for example: spider vein reduction, skin rejuvenation, non-ablative skin resurfacing); and
 - d. Has the qualified health professional or qualified supervising certified laser technician certify that the laser technician has completed the training and supervision as described in subsection (C)(2).
 3. A registrant shall maintain a record of each protocol for a cosmetic procedure governed by subsection (C) that is approved and signed by a prescribing health professional, and ensure that each protocol is reviewed by a prescribing health professional, at least annually. The registrant shall:
 - a. Maintain each protocol onsite, and ensure that the protocol contains instructions for the patient concerning follow-up monitoring; and
 - b. Design each protocol to promote the exercise of professional judgment by the laser technician commensurate with the individual's education, experience, and training. The protocol need not describe the exact steps that a qualified laser technician should take with respect to a cosmetic procedure governed by subsection (C).
 4. A registrant shall verify that a health professional is qualified to perform laser, IPL, and related procedures, by obtaining evidence that the health professional has received relevant training specified in subsection (A)(1) and in physics, safety, surgical techniques, pre-operative and post-operative care and can perform these procedures within the relevant scope of practice, as defined by the health professional's licensing board.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

5. A registrant shall provide radiation safety training to all personnel involved with cosmetic procedures governed by subsection (C), designing each training program so that it matches an individual's involvement in each procedure. The registrant shall maintain records of the training program and make them available to the Department for three years from the date of the program, during and after the individual's period of employment.
- D. Persons governed by this Section shall also comply with other applicable licensing and safety laws.
- E. A laser shall be secured so that the laser cannot be removed from the facility and the on/off switch is turned to the "off" position with the key removed when a certified laser technician or a health professional is not present in the room where the laser is located.

Historical Note

New Section R9-7-1438 recodified from R12-1-1438 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1438.01. Certification and Revocation of Laser Technician Certificate

- A. An applicant for a laser technician certificate shall submit a completed application and certification that the applicant has received the training specified in A.R.S. §§ 32-516(A) or 32-3233(E).
- B. The applicant shall pay a nonrefundable fee of \$30.00. A duplicate certificate may be requested at the time of initial application or renewal at a fee of \$10.00 per certificate. To obtain a duplicate certificate at other times a laser technician shall pay \$20.00 per certificate.
- C. Initial certificates are issued for 12 months and expire on the last day of the month. A renewal application shall be accompanied by a renewal fee of \$30.00 each year in addition to \$10.00 per duplicate certificate requested.
- D. Under A.R.S. § 32-3233(I) and (J), the Department may take appropriate disciplinary action, including revocation of the certificate of a certified laser technician. The Department may discipline a certified laser technician who has had a relevant professional license suspended or revoked, or been otherwise disciplined by a health professional board or the Board of Cosmetology. The Department may also discipline the certified laser technician for falsifying documentation related to training, prescriptions, or other required documentation. As provided in Article 12 of this Chapter, the Department may assess civil penalties, suspend, revoke, deny, or put on probation a certified laser technician.
- E. A laser technician who has been using laser and IPL devices prior to November 24, 2009 may continue to do so if the technician applies for and receives a certificate from the Department before October 1, 2010.
- F. Certification may be issued for one or more of the following procedures:
 1. Hair Reduction,
 2. Skin Rejuvenation,
 3. Non-Ablative Skin Resurfacing,
 4. Spider Vein Reduction,
 5. Skin Tightening,
 6. Wrinkle Reduction,
 7. Laser Peel,
 8. Telangiectasia Reduction,
 9. Acquired Adult Hemangioma Reduction,
 10. Facial Erythema Reduction,
 11. Solar Lentigo Reduction (Age Spots),
 12. Ephelis Reduction (Freckles),
 13. Acne Scar Reduction,
 14. Photo Facial, or
15. Additional procedures as approved by the Department after consultation with other health professional boards as defined in A.R.S. § 32-516(F)(3) or 32-3233(D)(1).
- G. For any application relating to the certification of laser technicians, as described in A.R.S. § 41-1072, there is an administrative completeness review time-frame of 30 days and a substantive review time-frame of 30 days with an overall time-frame of 60 days.
- H. Certified laser technicians shall display a valid original certificate as issued by the Department in a location that is viewable by the public.

R9-7-1439. Laser and IPL Laser Technician and Laser Safety Training Programs

- A. A person seeking to initiate a medical laser or IPL laser technician training program shall submit an application to the Department for certification that contains a description of the training program. In addition, the person shall submit a syllabus and a test that consists of at least 50 multiple choice questions on subjects covered. In the program materials, the person shall address the subjects in R9-7-1438 through this Section, and Appendix C.
- B. The Department shall review the application and other documents required by subsections (A) and (E) in a timely manner, using an administrative completeness review time-frame of 40 days and a substantive review time-frame of 20 days with an overall time-frame of 60 days.
- C. The Department shall maintain a list of certified laser or IPL training programs.
- D. Applicants for approval as a certified laser or IPL training program shall pay a nonrefundable \$100.00 fee.
- E. Initial certification shall be issued for 12 months and shall expire on the last day of the month. A renewal application shall be accompanied by a renewal fee of \$100.00 each year.
- F. A person seeking to initiate a medical laser or IPL laser technician safety training program shall submit an application to the Department for certification that contains a description of the training program. In addition, the person shall submit a syllabus and a test that consists of at least 50 multiple choice questions on subjects covered. In the program materials, the person shall address the subjects in R9-7-1421 through R9-7-1444, Appendix C, and Appendix D, with emphasis on personal and public safety. The program shall also contain the training required by A.R.S. § 32-3233(E) or clearly state the portions of the training that are not provided or met if didactic certification is to take place in another program. The applicant shall conduct training in accordance with the program submitted to the Department and certified by the Department.

Historical Note

R9-7-1440. Medical Lasers

- A. A registrant shall ensure that a Class 3 and Class 4 laser product used in the practice of medicine has a means for measuring the level of laser radiation with an error in measurement of no greater than +20%, when calibrated in accordance with the laser product manufacturer's calibration procedure.
- B. A registrant shall calibrate a laser used in the practice of medicine according to the manufacturer's specified calibration procedure, at intervals that do not exceed those specified by the manufacturer.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- C. In a medical facility where several medical disciplines or a number of different practitioners use Class 3b and Class 4 lasers, a registrant shall form a Laser Safety Committee to govern laser activity, establish use criteria, and approve operating procedures, as follows:
 1. With regard to membership of the committee the registrant shall include at least one representative of the Nursing staff, the LSO, one management representative, and one representative of each medical discipline that uses the lasers;
 2. The committee shall review actions by the LSO related to hazard evaluation and the monitoring and control of laser hazards; and
 3. The committee shall approve or deny requests by potential operators and ancillary personnel to operate or assist in the operation of a laser under the direction of a licensed practitioner.
- D. A registrant shall use Class 3b and Class 4 Lasers that have a guard mechanism on the switch to control patient exposure and prevent inadvertent exposure.
- E. A registrant shall establish a written laser safety training program that provides a thorough understanding of established procedures for each type of laser in use and the medical procedures associated with use of the laser. The registrant shall make program documentation available for Department review and, at minimum, address all of the following in the documentation:
 1. Regulatory requirements and the laser classification system;
 2. Fundamentals of laser operation and the significance of specular and diffuse reflections;
 3. Biological effects of laser radiation on the eye and skin;
 4. Non-beam hazards (for example: electrical, chemical, and reaction by-product hazards) and ionizing radiation hazards (for example: x-rays from power sources and target interactions, if applicable) of lasers; and
 5. Responsibilities of management and employees regarding control measures.
- E. If a light show or demonstration involves laser radiation emissions outside the spectral range of 400 to 700 nanometers, a registrant shall prevent the emissions from exceeding the applicable Class 1 accessible emission limit.
- F. If it is likely that an audience member or any operator, performer, or employee will view laser or collateral radiation, a registrant shall prevent the radiation from exceeding the applicable Class 1 accessible emission limit.
- G. Even if it is unlikely that an individual, including any operator, performer, or employee in the vicinity of a laser light show or demonstration will view or be exposed to laser or collateral radiation, a registrant shall prevent the radiation from exceeding the applicable Class 2 accessible emission limit.
- H. A registrant shall identify any area where levels of laser radiation exceed the applicable Class 2 accessible emission limit by posting warning signs and using barriers or guards to prevent entry.
- I. If a registrant uses a scanning device, the registrant shall not use a device which, as a result of scan failure or any other failure, can change its angular velocity or amplitude, permitting audience exposure to laser radiation that exceeds the applicable Class 1 accessible emission limit.
- J. If a mirror ball is used with a scanning laser, a registrant shall meet the requirements of subsections (F) and (G) when the mirror ball is stationary or during any failure mode that results in a change in the rotational speed of the mirror ball.
- K. A registrant shall ensure that an operator is at all times directly and personally supervising a laser light show or demonstration, except in cases where the maximum laser power output level is less than 5 milliwatts (all spectral lines) and the laser beam path is located at all times at least 6 meters above any surface upon which an individual in the audience is permitted to stand, and at any point, more than 2.5 meters in lateral separation from any position where an individual in the audience is permitted during the performance.
- L. A registrant shall prevent laser radiation levels from exceeding the applicable Class 2 accessible emission limit at any point less than three meters above any surface upon which an individual in the audience is permitted to stand and 2.5 meters in lateral separation from any position where an individual in the audience is permitted, unless physical barriers are present that prevent human access to the radiation.
- M. A registrant shall limit the maximum power output of any laser to a level sufficient to produce the desired effect.
- N. If a registrant is required to limit output power to a level less than the available power to meet the requirements of this Article, the registrant shall adjust, measure, and record the laser output power before the laser light show or demonstration.
- O. A registrant shall functionally test and evaluate all safety devices and procedures necessary to comply with this Article after setup, and before a laser light show or demonstration.
- P. A registrant shall secure a laser system, when not in use, against unauthorized operation or tampering.
- Q. A registrant shall perform laser alignment procedures with the laser output power reduced to the lowest practicable level, and ensure that any operator, performer, or other employee wears protective eyewear as necessary to prevent exposure to radiation levels that exceed the applicable MPE. The registrant shall only allow individuals who are performing the alignment be present during alignment procedures.
- R. A registrant shall not conduct a laser light show or demonstration unless the Department has specifically exempted the show or demonstration from the requirements of 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file

R9-7-1441. Laser Light Shows and Demonstrations

- A. Before a conducting laser light show or laser demonstration, a registrant shall provide documentation to the Department that a variance from 21 CFR 1040.10 has been obtained from the FDA.
- B. A registrant shall notify the Department in writing, at least three working days in before a proposed laser light show or demonstration, and include all of the following information:
 1. The location, time, and date of the light show or demonstration;
 2. Sketches showing the locations of each laser, operator, performer, laser beam path, viewing screen, wall, mirror ball, or any other reflective or diffuse surface that could be hit by or reflect the laser beam;
 3. Scanning beam patterns, scan velocity, and frequency in occupied areas; and
 4. Physical surveys and calculations made to comply with this Article.
- C. A registrant shall supply any additional information required by the Department for the safety evaluation of the proposed activity.
- D. Before an outdoor laser light show, a registrant shall notify the Federal Aviation Administration of the proposed show.

R9-7-1442. Measurements and Calculations to Determine MPE Limits for Lasers

A registrant shall take measurements to determine MPE values in a manner consistent with the procedures contained in ANSI Z136.1-2000, American National Standard for Safe Use of Lasers, 2000 edition, which is incorporated by reference, published by the Laser Institute of America, 13501 Ingenuity Drive, Suite 128, Orlando, FL 32826, and on file with the Department. This incorporation by reference contains no future editions or amendments.

R9-7-1443. Laser Compliance Measurement Instruments

A registrant shall ensure that the radiation output measurement is performed with an instrument that is calibrated and designed for use with the laser that is being evaluated for compliance. The registrant shall specify the date of calibration, accuracy of calibration, wavelength range, and power or energy of calibration on a legible, clearly visible label attached to the instrument.

Historical Note

R9-7-1444. Laser Classification Measurements

A. A registrant shall measure accessible emission for classification:

1. Under the operational conditions and procedures that maximize accessible emission levels, including start-up, stabilized operation, and shutdown of the laser or laser facility;
2. With all controls and adjustments listed in the operating and service instructions adjusted for the maximum accessible emission level of laser radiation that is not expected to be detrimental to the functional integrity of the laser or enclosure;
3. At points in space to which human access is possible for a given laser configuration. If operations include the defeat of safety interlocks or removal of portions of the protective housing or enclosure, the registrant shall measure accessible emission at points accessible in that configuration;
4. With the measuring instrument detector positioned so that the maximum possible radiation is measured by the instrument; and
5. With the laser coupled to the type of laser energy source specified as compatible by the laser manufacturer and producing the maximum emission of accessible laser radiation.

B. A registrant shall perform measurements of accessible emission levels, used to classify laser and collateral radiation in accordance with 21 CFR 1040.10, April 1, 2004, which is incorporated by reference, published by the Office of Federal Register National Archives and Records Administration, Washington, D.C. 20408, and on file with the Department. This incorporation by reference contains no future editions or amendments.

Appendix B. Application Information

The Department shall issue a registration if an applicant provides the following information and fee as required in R9-7-1401(D). The Department shall provide an application form to the applicant with a guide and upon request, assist the applicant to ensure that correct information is provided on the application form.

Name and mailing address of applicant
Person responsible for radiation safety program
Type of facility
Legal structure and ownership
Radiation source information
Shielding information
Equipment operator instructions and restrictions
Classification of professional in charge
Type of request: amendment, new, or renewal
Protection survey results, if applicable
Radiation Safety Officer name, if applicable
Laser class and type, if applicable
Information required by Article 14 for the specific source
Use location
Telephone number
Facility subtype
Signature of certifying agent
Equipment identifiers
Scale drawing
Physicist name and training, if applicable
Contact person
Applicable fee listed in Article 13 schedule

Appendix C. Hair Removal and Other Cosmetic Laser or IPL Operator Training Program

1. General Considerations. An applicant shall ensure that:
 - a. The training program is specific to the medical laser or IPL device in use and the clinical procedures to be performed;
 - b. Program content is consistent with facility policy and procedure and applicable federal and state law; and
 - c. The training program addresses hazards associated with laser or IPL device use.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. Technical Considerations. The applicant's training program shall cover all of the following technical subjects:
 - a. Laser and IPL device descriptions
 - b. Definitions
 - c. Laser and IPL device radiation fundamentals
 - d. Laser mediums, types of lasers, and other light-emitting devices – solid, liquid, gas, and IPL devices
 - e. Biological effects of laser or IPL device light
 - f. Damage mechanisms
 - i. Eye hazard
 - ii. Skin hazard (includes information regarding skin type and skin anatomy)
 - iii. Absorption and wavelength effects
 - iv. Thermal effects
 - g. Photo chemistry
 - h. Criteria for setting the Maximum Permissible Exposure (MPE) for eye and skin associated hazards
 - i. Explosive, electrical, and chemical hazards
 - j. Photosensitive medications
 - k. Fire, ionizing radiation, cryogenic hazards, and other hazards, as applicable
3. Medical Considerations. The applicant's training program shall cover all of the following medical subjects:
 - a. Local anesthesia techniques, including ice, EMLA® cream, and other applicable topical treatments
 - b. Typical laser and IPL device settings for hair removal and cosmetic procedures
 - c. Expected patient response to treatment
 - d. Potential adverse reactions to treatment
 - e. Anatomy and physiology of skin areas to be treated
 - f. Indications and contraindications for use of pigment and vascular-specific lasers for cutaneous procedures
4. General Laser or IPL device safety. The applicant's training program shall cover the following general safety subjects:
 - a. Laser and IPL device classifications
 - b. Control measures (includes information regarding protective equipment)
 - c. Manager and operator responsibilities
 - d. Medical surveillance practices
 - e. Federal and state legal requirements
 - f. Related safety issues
 - i. Controlled access
 - ii. Plume management
 - iii. Equipment testing, aligning, and troubleshooting
 - g. Control measures
 - h. Responsibilities of managers and operators
 - i. Medical surveillance practices (if applicable)
 - j. CPR for personnel servicing lasers with exposed high voltages, the capability of producing potentially lethal electrical currents, or both.
2. The LSO or other individual responsible for the safety program, evaluation of hazards, and implementation of control measures, or any others, if directed by management to obtain a thorough knowledge of laser safety:
 - a. The subjects covered in subsection (1)
 - b. Laser terminology
 - c. Laser types, wavelengths, pulse shapes, modes, power and energy
 - d. Basic radiometric units and measurement devices
 - e. MPE levels for eye and skin under all conditions
 - f. Laser hazard evaluations, range equations, and other calculations
3. Technical Considerations
 - a. Laser and IPL device descriptions
 - b. Definitions
 - c. Laser and IPL device radiation fundamentals
 - d. Laser mediums, types of lasers, and other light-emitting devices (includes information regarding diodes and solid, liquid, gas, and IPL devices)
 - e. Biological effects of laser or IPL device light
 - f. Damage mechanisms
 - i. Eye hazard
 - ii. Skin hazard (includes information regarding skin type and skin anatomy)
 - iii. Absorption and wavelength effects
 - iv. Thermal effects
 - g. Photo chemistry
 - h. Photosensitive medications
 - i. Criteria for setting the Maximum Permissible Exposure (MPE) levels for eye and skin associated hazards
 - j. Explosive, electrical, and chemical hazards
 - k. Fire, ionizing radiation, cryogenic hazards, and other hazards as applicable.

ARTICLE 15. TRANSPORTATION**R9-7-1501. Requirement for License**

- A. A person shall not transport radioactive material or deliver radioactive material to a carrier for transport unless the person is authorized in a general or specific license issued by the Department or exempt under R9-7-103(A).
- B. This Article applies to any licensee to transfer licensed material if the licensee delivers that material to a carrier for transport, transports the material outside the site of usage as specified in the license, or transports that material on public highways. No provision of this Article authorizes possession of licensed material.

Historical Note

Appendix D. Laser Operator and Laser Safety Officer Training

1. Operators and personnel that work around lasers:
 - a. Fundamentals of laser operation (for example: physical principles, construction, and other basic information)
 - b. Bioeffects of laser radiation on the eye and skin
 - c. Significance of specular and diffuse reflections
 - d. Non-beam hazards of lasers (for example: electrical, chemical, and reaction byproducts)
 - e. Ionizing radiation hazards (includes information regarding x-rays from power sources and target interactions, if applicable)
 - f. Laser and laser system classifications

R9-7-1503. Transportation of Licensed Material

Each licensee that transports licensed material outside the site of usage, as specified in a Department license, or where transport is on public highways, or that delivers licensed material to a carrier for transport, shall comply with the applicable requirements of the U.S. Department of Transportation regulations listed in 10 CFR 71.5, revised January 1, 2008, incorporated by reference and available under R9-7-101. This incorporated material contains no future editions or amendments.

Historical Note

R9-7-1504. Intrastate Transportation and Storage of Radioactive Materials**A.** A general license is issued to:

1. Any common or contract carrier not exempt under R9-7-103 to receive, possess, transport, and store radioactive material in the regular course of carriage for others or to store radioactive material incident to the transport activities, provided the transportation or storage is in accordance with applicable requirements for the mode of transport of the U.S. Department of Transportation, 49 CFR 171 through 180, revised October 1, 2007, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.
2. Any private carrier or licensee who transports and stores radioactive material, provided the transportation and storage are in accordance with the requirements applicable to the mode of transport, of the U.S. Department of Transportation, 49 CFR 171 through 180, revised October 1, 2007, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

B. Any notification of incidents required under federal regulations in subsection (A) shall also be filed with, or made to, the Department.**C.** A person who transports or stores radioactive material according to the general license in this Section is exempt from the requirements of Article 4 and Article 10 of this Chapter to the extent that this Section applies to transportation of the radioactive material.**Historical Note**

New Section R9-7-1504 recodified from R12-1-1504 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1505. Storage of Radioactive Material in Transport

- A.** A carrier shall not store, for any period in excess of 72 hours, any package that contains radioactive material bearing a Department of Transportation Yellow II or Yellow III label, unless the radioactive material is stored in an area other than, and not adjacent to, any food storage area or area that is normally occupied by an individual.
- B.** A carrier shall not store a package that contains radioactive material with other hazardous materials, except as authorized by U.S. Department of Transportation regulations in 49 CFR 177.848, revised October 1, 2007, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

C. Whenever a package containing radioactive material is stored in excess of 48 hours, the storage area shall be conspicuously posted according to the requirements of Article 4.**D.** When transit is interrupted and storage is required for an extended period, the following requirements apply:

1. When radioactive materials are stored for longer than 48 hours during transit, the carrier shall notify the local fire department and provide the following information:
 - a. Warehouse location and carrier name and telephone number;
 - b. Radionuclide(s);
 - c. Activity per package in curies or becquerels and number of packages;
 - d. Form (solid, metallic, liquid, gas);
 - e. Flammability (if flammable);
 - f. Specific location in warehouse;
 - g. Estimated date of departure;
 - h. Toxicity (if toxic).
2. If the radioactive material will be, or has been in storage for longer than 90 days, the carrier shall notify the Department in writing and include the information required in subsection (D)(1).
3. The licensee or carrier shall immediately notify the Department of Public Safety of an accident involving radioactive material.

Historical Note

New Section R9-7-1505 recodified from R12-1-1505 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1506. Preparation of Radioactive Material for Transport

A licensee shall not deliver any package that contains radioactive material to a carrier for transport or transport radioactive material, unless the licensee:

1. Complies with the U.S. Department of Transportation packaging, monitoring, manifesting, marking, and labeling regulations applicable to the mode of transport, (Contained in 49 CFR 171 through 180, revised October 1, 2007, or 39 CFR 111.1, revised July 1, 2007, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.); and
2. Establishes procedures for safely opening and closing packages in which radioactive material is transported; and
3. Prior to delivery of a package to a carrier for transport, assures that:
 - a. The package is properly closed, and
 - b. Any special instructions needed to safely open the package are made available to the consignee.

Historical Note

New Section R9-7-1506 recodified from R12-1-1506 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1507. Packaging Quality Assurance

- A.** A licensee that transports radioactive material in the course of business or delivers radioactive material to a carrier for transport in a package for which a license, certificate of compliance, applicant for a certificate of compliance, or other approval has been issued by the Nuclear Regulatory Commission, or meets the applicable criteria (10 CFR 71, Subpart H), shall establish, maintain, and execute the quality assurance program specified in 10 CFR 71, Subpart H.
- B.** The transportation of radioactive material shall be in accordance with the requirements in 10 CFR Part 71, with the exception of the following sections: 71.2, 71.6, 71.11,

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

71.14(b), 71.19, 71.31, 71.33, 71.35, 71.37, 71.38, 71.39, 71.41, 71.43, 71.45, 71.51, 71.52, 71.53, 71.55, 71.59, 71.61, 71.63, 71.64, 71.65, 71.70, 71.71, 71.73, 71.74, 71.75, 71.77, 71.85(a)-(c), 71.91(b), 71.99, 71.100, 71.101(c)(2), 71.101(g), 71.107, 71.109, 71.111, 71.113, 71.115, 71.117, 71.119, 71.121, 71.123 and 71.125. The provisions of this subsection apply to the transportation of radioactive material, or delivery of radioactive material to a carrier for transportation, regardless of whether or not the carrier is also subject to the rules and regulations of the NRC contained in 10 CFR Part 71 and other agencies of the United States having jurisdiction.

- C. In addition to the requirements in subsection (A) for a quality assurance program, a licensee shall verify by procedures such as checking or inspection, that deficiencies or defective material or equipment relative to the shipment of packages containing radioactive material are promptly identified and corrected.
- D. Before the first use of any Type B packaging, a licensee shall obtain approval of its quality assurance program by the Department.
- E. A licensee shall maintain sufficient written records to demonstrate compliance with the quality assurance program. Records of quality assurance pertaining to the use of a Type B package for shipment of radioactive material shall be maintained for three years after the package is used for a shipment.

Historical Note

New Section R9-7-1507 recodified from R12-1-1507 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1). Amended by final expedited rulemaking at 26 A.A.R. 1067, with an immediate effective date of May 6, 2020 (Supp. 20-2).

R9-7-1508. Advance Notification of Nuclear Waste Transportation

- A. Prior to the transport of any nuclear waste, as defined in Article 1, outside of the confines of the licensee's facility or other place of use or storage, or prior to the delivery of any nuclear waste to a carrier for transport, each licensee shall provide advance notification of such transport to the Department.
- B. Each advance notification required in subsection (A) above shall contain the following information:
 1. The name, address, and telephone number of the shipper, carrier, and receiver of the shipment;
 2. A description of the nuclear waste contained in the shipment as required by 49 CFR 172.202 and 172.203(d) (Revised October 1, 2007, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.);
 3. The point of origin of the shipment and the seven-day period during which departure of the shipment will occur;
 4. The seven-day period during which arrival of the shipment at state boundaries will occur;
 5. The destination of the shipment, and the seven-day period during which arrival of the shipment will occur; and
 6. A point of contact with a telephone number for current shipment information.
- C. The licensee shall make the notification required by subsection (A) in writing to the Department. A notification delivered by mail must be postmarked at least seven days before the beginning of the seven-day period during which departure of the shipment is estimated to occur. The licensee shall maintain a copy of the notification for one year.
- D. The licensee shall notify the Department of any changes in shipment plans, including cancellations, rerouting, or rescheduling, provided pursuant to subsection (A). Such notification shall be by telephoning the Department. The licensee shall

maintain for one year a record of the name of the individual contacted.

- E. After June 11, 2013, each licensee shall provide advance notification to the Tribal official of participating Tribes referenced in paragraph (c)(3)(iii) of 10 CFR 71.97, or the official's designee, of the shipment of licensed material, within or across the boundary of the Tribe's reservation, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.

R9-7-1509. General License: Plutonium-Beryllium Special Form Material

- A. A general license is issued to any licensee of the Department to transport fissile material in the form of plutonium-beryllium (Pu-Be) special form sealed sources, or to deliver Pu-Be sealed sources to a carrier for transport, if the material is shipped in accordance with this Article. This material must be contained in a Type A package. The Type A package must also meet the DOT requirements of 49 CFR 173.417(a), revised October 1, 2010, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.
- B. The general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying the provisions of R9-7-1507.
- C. The general license applies only when a package's contents:
 1. Contain no more than a Type A quantity of radioactive material; and
 2. Contain less than 1000 g of plutonium, provided that: plutonium-239, plutonium-241, or any combination of these radionuclides, constitutes less than 240 g of the total quantity of plutonium in the package.
- D. The general license applies only to packages labeled with a CSI which:
 1. Has been determined in accordance with subsection (E);
 2. Has a value less than or equal to 100; and
 3. For a shipment of multiple packages containing Pu-Be sealed sources, the sum of the CSIs must be less than or equal to 50 (for shipment on a nonexclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance).
- E. The value for the CSI must be greater than or equal to the number calculated by the following equation:
 1. $CSI = 10[(\text{grams of } ^{239}\text{Pu} + \text{grams of } ^{241}\text{Pu})/24]$,
 2. The calculated CSI must be rounded up to the first decimal place.

R9-7-1510. Packaging

- A. A general license is issued to any licensee to transport, or to deliver to a carrier for transport, licensed material in a package for which a license, certificate of compliance, or other approval has been issued by the NRC.
 1. This general license applies only to a licensee that has a quality assurance program approved by the Department as satisfying R9-7-1507;
 2. This general license applies only to a licensee that:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. Has a copy of the license, certificate of compliance, or other approval of the package, and has the drawings and other documents referenced in the approval relating to the use and maintenance of the packaging and to the actions to be taken before shipment;
 - b. Complies with the terms and conditions of the license, certificate, or other approval, as applicable, and the applicable requirements of this Article;
 - c. Before the licensee's first use of the package, submits in writing to the Department and to ATTN: Document Control Desk, Director, Division of Fuel Management, Office of Nuclear Material Safety and Safeguards, using an appropriate method listed in 10 CFR 71.1(a), the licensee's name, license number, and the package identification number specified in the package approval;
 - d. The licensee shall make available to the Department for inspection, upon reasonable notice, all records required by this part. Records are only valid if stamped, initialed, or signed and dated by authorized personnel, or otherwise authenticated; and
 - e. The licensee shall maintain sufficient written records to furnish evidence of the quality of packaging. The records to be maintained include results of the determinations required by 10 CFR 71.85; design, fabrication, and assembly records; results of reviews, inspections, tests, and audits; results of monitoring work performance and materials analyses; and results of maintenance, modification, and repair activities. Inspection, test, and audit records must identify the inspector or data recorder, the type of observation, the results, the acceptability, and the action taken in connection with any deficiencies noted. These records must be retained for three years after the life of the packaging to which they apply.
3. This general license applies only when the package approval authorizes use of the package under this general license.
 4. For a Type B or fissile material package, the design of which was approved by NRC before April 1, 1996, the general license is subject to the additional restrictions of subsection (B).
- B. Type B packages.**
1. Before the first use of any packaging for the shipment of licensed material, refer to 10 CFR 71.85 (a), (b) and (c).
 2. A Type B(U) package, a Type B(M) package, a low specific activity (LSA) material package or a fissile material package, previously approved by the NRC but without the "-85" designation in the identification number of the NRC certificate of compliance, may be used under the general license of subsection (A) with the following additional conditions:
 - a. Fabrication of the packaging is satisfactorily completed by April 1, 1999 as demonstrated by application of its model number in accordance with 10 CFR 71.85(c);
 - b. A package that is used for a shipment to a location outside the United States is subject to multilateral approval as defined in 49 CFR 173.403, revised January 8, 2015, incorporated by reference, available under R9-7-101, and containing no future editions or amendments; and
 - c. A serial number which uniquely identifies each package which conforms to the approved design and is assigned to, and legibly and durably marked on, the outside of each package.
 3. A licensee may modify the design and authorized contents of a Type B package, or a fissile material package, previously approved by NRC, provided:
 - a. The modifications of a Type B package are not significant with respect to the design, operating characteristics, or safe performance of the containment system, when the package is subjected to the tests specified in 10 CFR 71.71 and 71.73;
 - b. The modifications of a fissile material package are not significant, with respect to the prevention of criticality, when the package is subjected to the tests specified in 10 CFR 71.71 and 71.73; and
 - c. The modifications to the package satisfy the requirements of this Section.
 4. The NRC will revise the package identification number to designate previously approved package designs as B(U), B(M), AF, BF, or A as applicable, and with the identification number suffix "-85" after receipt of an application demonstrating that the design meets the requirements of this Section.
 5. For purposes of this Section, package types are defined in 10 CFR 71.4.
- C. A general license is issued to any licensee of the Department to transport fissile material, or to deliver to a carrier for transport, licensed material in a specification container for fissile material or for a Type B quantity of radioactive material as specified in 49 CFR 173, revised July 16, 2018, and 49 CFR 178, revised March 11, 2013, incorporated by reference, available under R9-7-101, and containing no future editions or amendments, if the following requirements are met:**
1. The licensee maintains a quality assurance program approved by the Department as satisfying R9-7-1507;
 2. The licensee:
 - a. Maintains a copy of the specification; and
 - b. Complies with the terms and conditions of the specification and the applicable requirements in 10 CFR 71, Subparts A, G, and H;
 3. The licensee does not use the specification container for a shipment to a location outside the United States, except by multilateral approval, as defined in 49 CFR 173.403, revised January 1, 2015, incorporated by reference, available under R9-7-101, and containing no future editions or amendments;
 4. The general license applies only when a package's contents:
 - a. Contain no more than a Type A quantity of radioactive material; and
 - b. Contain less than 500 total grams of beryllium, graphite, or hydrogenous material enriched in deuterium;
 5. The general license applies only to packages containing fissile material that are labeled with a CSI which:
 - a. Has been determined in accordance with subsection (E);
 - b. Has a value less than or equal to 10; and
 - c. For a shipment of multiple packages containing fissile material, the sum of the CSIs must be less than or equal to 50 (for shipment on a nonexclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance); and
 6. The CSI value meets the following requirements:
 - a. The value for the CSI must be greater than or equal to the number calculated by the following equation: $CSI = 10[(\text{grams of } 235\text{U}/X) + (\text{grams of } 235\text{U}/Y) + (\text{grams of } 235\text{U}/Z)]$;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- b. The calculated CSI must be rounded up to the first decimal place;
 - c. The values of X, Y, and Z used in the CSI equation must be taken from Tables 71-1 or 71-2 as appropriate located in 10 CFR 71.22;
 - d. If Table 71-2 is used to obtain the value of X, then the values for the terms in the equation for uranium-233 and plutonium must be assumed to be zero; and
 - e. Table 71-1 values for X, Y, and Z must be used to determine the CSI if:
 - i. Uranium-233 is present in the package;
 - ii. The mass of plutonium exceeds 1 percent of the mass of uranium-235;
 - iii. The uranium is of unknown uranium-235 enrichment or greater than 24 weight percent enrichment; or
 - iv. Substances having a moderating effectiveness (i.e., an average hydrogen density greater than H₂O) (e.g., certain hydrocarbon oils or plastics) are present in any form, except as polyethylene used for packing or wrapping.
- D. Foreign packaging.**
- 1. A general license is issued to any licensee of the Department to transport, or to deliver to a carrier for transport, licensed material in a package the design of which has been approved in a foreign national competent authority certificate that has been revalidated by the Federal Department of Transportation as meeting the applicable requirements of 49 CFR 171.23, revised March 30, 2017, incorporated by reference, available under R9-7-101, and containing no future editions or amendments.
 - 2. Except as otherwise provided in this Section, the general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying the applicable provisions of R9-7-1507.
 - 3. This general license applies only to:
 - a. Shipments made to or from locations outside the United States.
 - b. A licensee that:
 - i. Has a copy of the applicable certificate, the revalidation, and the drawings and other documents referenced in the certificate, relating to the use and maintenance of the packaging and to the actions to be taken before shipment; and
 - ii. Complies with the terms and conditions of the certificate and revalidation, and with the applicable requirements in 10 CFR 71, Subparts A, G, and H, revised September 9, 2015.
- E. Routine determination before each shipment of licensed material shall ensure that the package with its contents satisfies the applicable requirements of this Article and of the license. The licensee shall determine that:**
- 1. The package is proper for the contents to be shipped;
 - 2. The package is in unimpaired physical condition except for superficial defects such as marks or dents;
 - 3. Each closure device of the packaging, including any required gasket, is properly installed and secured and free of defects;
 - 4. Any system for containing liquid is adequately sealed and has adequate space or other specified provision for expansion of the liquid;
 - 5. Any pressure relief device is operable and set in accordance with written procedures;
 - 6. The package has been loaded and closed in accordance with written procedures;
 - 7. For fissile material, any moderator or neutron absorber, if required, is present and in proper condition;
 - 8. Any structural part of the package that could be used to lift or tie down the package during transport is rendered inoperable for that purpose, unless it satisfies the design requirements of 10 CFR 71.45;
 - 9. The level of non-fixed (removable) radioactive contamination on the external surfaces of each package offered for shipment is as low as reasonably achievable, and within the limits specified in DOT regulations in 49 CFR 173.443, revised July 11, 2014, incorporated by reference, available under R9-7-101, and containing no future editions or amendments;
 - 10. External radiation levels around the package and around the vehicle, if applicable, will not exceed the limits specified in 10 CFR 71.47, at any time during transportation; and
 - 11. Accessible package surface temperatures will not exceed the limits specified in 10 CFR 71.43(g), at any time during transportation.
- F. Fissile material meeting the requirements of at least one of the conditions in subsections (F)(1) through (F)(6) are exempt from classification as fissile material and from the fissile material package standards of 10 CFR 71.55 and 71.59, but are subject to all other requirements of this part, except as noted.**
- 1. Individual package containing 2 grams or less fissile material.
 - 2. Individual or bulk packaging containing 15 grams or less of fissile material provided the package has at least 200 grams of solid nonfissile material for every gram of fissile material. Lead, beryllium, graphite, and hydrogenous material enriched in deuterium may be present in the package but must not be included in determining the required mass for solid nonfissile material.
 - 3. Low concentrations of solid fissile material commingled with solid nonfissile material, provided that:
 - a. There is at least 2000 grams of solid nonfissile material for every gram of fissile material;
 - b. There is no more than 180 grams of fissile material distributed within 360 kg of contiguous nonfissile material; and
 - c. Lead, beryllium, graphite, and hydrogenous material enriched in deuterium may be present in the package but must not be included in determining the required mass of solid nonfissile material.
 - 4. Uranium enriched in uranium-235 to a maximum of 1 percent by weight, and with total plutonium and uranium-233 content of up to 1 percent of the mass of uranium-235, provided that the mass of any beryllium, graphite, and hydrogenous material enriched in deuterium constitutes less than 5 percent of the uranium mass, and that the fissile material is distributed homogeneously and does not form a lattice arrangement within the package.
 - 5. Liquid solutions of uranyl nitrate enriched in uranium-235 to a maximum of 2 percent by mass, with a total plutonium and uranium-233 content not exceeding 0.002 percent of the mass of uranium, and with a minimum nitrogen to uranium atomic ratio (N/U) of 2. The material must be contained in at least a DOT Type A package.
 - 6. Packages containing, individually, a total plutonium mass of not more than 1000 grams, of which not more than 20 percent by mass may consist of plutonium-239, plutonium-241, or any combination of these radionuclides.

Amended by final expedited rulemaking at 24 A.A.R. 2151, effective July 12, 2018 (Supp. 18-3). Amended by final expedited rulemaking at 26 A.A.R. 1067, with an immediate effective date of May 6, 2020 (Supp. 20-2).

R9-7-1511. Air Transport of Plutonium

A. Notwithstanding the provisions of any general licenses and notwithstanding any exemptions stated directly in this Section or included indirectly by citation of 49 CFR 107, and 171 through 180, previously incorporated in this Article, as may be applicable, the licensee shall ensure that plutonium in any form, whether for import, export, or domestic shipment, is not transported by air or delivered to a carrier for air transport unless:

1. The plutonium is contained in a medical device designed for individual human application; or
2. The plutonium is contained in a material in which the specific activity is less than or equal to the activity concentration values for Plutonium specified in 10 CFR 71, Appendix A, Table A-2 (Revised January 1, 2008, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.), and in which the radioactivity is essentially uniformly distributed; or
3. The plutonium is shipped in a single package containing no more than an A2 quantity of plutonium in any isotope or form, and is shipped in accordance with R9-7-1503 and 10 CFR 71.5 (Revised January 1, 2008, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.); or
4. The plutonium is shipped in a package specifically authorized for the shipment of plutonium by air in the Certificate of Compliance for that package issued by the NRC.

B. Nothing in subsection (A) is to be interpreted as removing or diminishing the requirements of 10 CFR 73.24, January 1, 2008, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

C. For a shipment of plutonium by air that is subject to subsection (A)(4), the licensee shall, through special arrangement with the carrier, require compliance with 49 CFR 175.704, revised October 1, 2007, incorporated by reference, and available under R9-7-101. This U.S. Department of Transportation regulation is applicable to the air transport of plutonium. This incorporated material contains no future editions or amendments.

R9-7-1512. Advance Notification of Shipment of Irradiated Reactor Fuel and Nuclear Waste

A. A licensee shall provide advance notification to the Governor, or the Director of the Department, of the shipment of licensed material as specified in 10 CFR 71.97, revised January 1, 2015, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

B. After June 11, 2013, each licensee shall provide advance notification to the Tribal official of participating Tribes referenced in paragraph (c)(3)(iii) of 10 CFR 71.97, or the Tribal official's designee, of the shipment of licensed material, within or across the boundary of the Tribe's reservation, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.

C. Advance notification is also required under this Section for the shipment of licensed material, other than irradiated fuel, meeting the following three conditions:

1. The licensed material is required by this part to be in Type B packaging for transportation;
2. The licensed material is being transported to or across a State boundary en route to a disposal facility or to a collection point for transport to a disposal facility; and
3. The quantity of licensed material in a single package exceeds the least of the following:
 - a. 3000 times the A1 value of the radionuclides as specified in appendix A, Table A-1 for special form radioactive material;
 - b. 3000 times the A2 value of the radionuclides as specified in appendix A, Table A-1 for normal form radioactive material; or
 - c. 1000 TBq (27,000 Ci).

D. Procedures for submitting advance notification. (1) The notification must be made in writing to:

1. The office of each appropriate governor or governor's designee;
2. The office of each appropriate Tribal official or Tribal official's designee; and
3. The Director, Division of Security Policy, Office of Nuclear Security and Incident Response.

Amended by final expedited rulemaking at 24 A.A.R. 2151, effective July 12, 2018 (Supp. 18-3).

R9-7-1513. Opening Instructions

Before delivery of a package to a carrier for transport, the licensee shall ensure that any special instructions needed to safely open the package have been sent to, or otherwise made available to, the consignee for the consignee's use in accordance with 10 CFR 20.1906(e) revised January 1, 2010, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

Historical Note

New Section R9-7-1513 recodified from R12-1-1513 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1514. Records

A. Each licensee shall maintain, for a period of three years after shipment, a record of each shipment of licensed material not exempt under R9-7-1515, showing where applicable:

1. Identification of the packaging by model number and serial number;
2. Verification that there are no significant defects in the packaging, as shipped;
3. Volume and identification of coolant;
4. Type and quantity of licensed material in each package, and the total quantity of each shipment;
5. For each item of irradiated fissile material:
 - a. Identification by model number and serial number;
 - b. Irradiation and decay history to the extent appropriate to demonstrate that its nuclear and thermal characteristics comply with license conditions; and
 - c. Any abnormal or unusual condition relevant to radiation safety;
6. Date of the shipment;
7. For fissile packages and for Type B packages, any special controls exercised;
8. Name and address of the transferee;
9. Address to which the shipment was made; and

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

10. Results of the determinations required by R9-7-1510(E) and by the conditions of the package approval.

- B. The licensee shall make available to the Department for inspection, upon reasonable notice, all records required by this Chapter. Records are only valid if stamped, initialed, or signed and dated by authorized personnel, or otherwise authenticated.
- C. The licensee shall maintain sufficient written records to furnish evidence of the quality of packaging. The records to be maintained include results of the determinations required by R9-7-1507; design, fabrication, and assembly records; results of reviews, inspections, tests, and audits; results of monitoring work performance and materials analyses; and results of maintenance, modification, and repair activities. Inspection, test, and audit records must identify the inspector or data recorder, the type of observation, the results, the acceptability, and the action taken in connection with any deficiencies noted. These records must be retained for three years after the life of the packaging to which they apply.
- D. Each record required by this Chapter must be legible throughout the retention period specified by each Department regulation. The record may be the original or a reproduced copy or a microform provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Records such as letters, drawings, and specifications must include all pertinent information such as stamps, initials, and signatures. The licensee shall maintain adequate safeguards against tampering with and loss of records.

Historical Note

R9-7-1515. Exemption for Low-level Radioactive Materials

- A. A licensee is exempt from all the requirements of 10 CFR 71 with respect to shipment or carriage of the low-level materials listed in 10 CFR 71.14(a), revised January 1, 2008, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.
- B. Natural material and ores containing naturally occurring radionuclides that are either in their natural state, or have only been processed for purposes other than for the extraction of the radionuclides, and which are not intended to be processed for the use of these radionuclides, provided the activity concentration of the material does not exceed 10 times the applicable radionuclide activity concentration values specified in appendix A, Table A-2, or Table A-3 of this part.
- C. Materials for which the activity concentration is not greater than the activity concentration values specified in appendix A, Table A-2, or Table A-3 of this part, or for which the consignment activity is not greater than the limit for an exempt consignment found in appendix A, Table A-2, or Table A-3 of 10 CFR 71 Appendix A.
- D. Non-radioactive solid objects with radioactive substances present on any surfaces in quantities not in excess of the levels cited in the definition of contamination in 10 CFR 71.4.

ARTICLE 16. RESERVED**ARTICLE 17. WIRELINE SERVICE OPERATIONS AND SUBSURFACE TRACER STUDIES****R9-7-1701. Definitions**

"Energy compensation source (ECS)" means a small sealed source, with activity that does not exceed 3.7 Mbq (100 microcuries), contained within a logging tool or other tool component.

"Tritium neutron generator target source" means a tritium source contained within a tritium neutron generator tube that produces neutrons for use in well logging applications.

New Section R9-7-1701 recodified from R12-1-1701 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1702. Agreement with Well Owner or Operator

- A. A licensee that performs wireline service (well logging) with a sealed source shall enter into a written agreement with the employing well owner or operator that identifies the party responsible for complying with each of the following requirements. The responsible party shall:
 1. Make a reasonable effort to recover any sealed source that may be lodged in the well;
 2. Not attempt to recover a sealed source in a manner which, in the licensee's opinion, is likely to result in its rupture;
 3. Perform the radiation monitoring required in R9-7-1723(A);
 4. Decontaminate anyone or anything contaminated with licensed material before releasing personnel or equipment from the site or releasing the site for unrestricted use; and
 5. If a source is classified by the Department as irretrievable after reasonable efforts at recovery, implement the following requirements within 30 days:
 - a. Immobilize the irretrievable well logging source and seal it in place with a cement plug;
 - b. Provide a means to prevent inadvertent intrusion that could damage the source, unless the site is rendered inaccessible to subsequent drilling operations; and
 - c. Mount a permanent identification plaque, constructed of long-lasting material, such as stainless steel, brass, bronze, or Monel, in a conspicuous location adjacent to the well. The responsible party shall ensure that the plaque size is at least 17 cm (7 inches) square and 3 mm (1/8 inch) thick and the following information is written on the plaque:
 - i. The word "CAUTION,"
 - ii. The radiation symbol (the color requirement in R9-7-428(A) does not apply),
 - iii. The date the source was abandoned,
 - iv. The name of the well owner or operator that employed the licensee;
 - v. The well name and identification number or other designation,
 - vi. An identification of each source by radionuclide and quantity of radionuclide,
 - vii. The depth of the source and depth to the top of the plug, and
 - viii. The following warning, "DO NOT RE-ENTER THIS WELL," and
 - d. Notify the Oil and Gas Conservation Commission, Department of Water Resources, or Department of Environmental Quality of the abandoned source, as required by law.
- B. A licensee shall maintain a copy of the agreement at the field station during logging operations. The licensee shall retain a

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

copy of the written agreement for three years after completion of the well logging operation.

- C. A licensee may apply in accordance with A.R.S. § 30-654(B)(13) for Department approval, on a case-by-case basis, of proposed procedures to abandon an irretrievable well logging source in a manner not otherwise authorized in subsection (A)(5).
- D. A written agreement between the licensee and the well owner or operator is not required if the licensee and the well owner or operator are employed by the same corporation or other business entity. If so, the licensee shall comply with the requirements in subsections (A)(1) through (A)(5).

R9-7-1712. Storage Precautions

- A. A person storing or transporting a source of radiation shall place the source in an approved storage container, transport container, or both. The container or combination of containers shall have a lock, or tamper-proof seal for calibration sources, to prevent unauthorized removal of the source and exposure to radiation.
- B. A person storing or transporting a source of radiation shall store the source in a manner that will minimize danger from explosion or fire.

R9-7-1714. Radiation Survey Instruments

- A. A licensee shall maintain at each field station and temporary job site a calibrated and operable radiation survey instrument capable of detecting beta and gamma radiation. The licensee shall ensure that the radiation survey instrument is capable of measuring 1.0 microsievert (0.1 millirem) per hour through 500 microsievert (50 millirem) per hour.
- B. A licensee shall ensure that additional calibrated and operable radiation detection instruments are available as needed and that the instruments are sensitive enough to detect the low radiation and contamination levels that could be encountered if a sealed source is ruptured.
- C. A licensee shall ensure that the radiation survey instrument required in subsection (A) is calibrated
1. At intervals not to exceed six months and after each instrument servicing;
 2. At energies comparable to the energies of the radiation sources used;
 3. For linear scale instruments, at two points located approximately 1/3 and 2/3 of full-scale on each scale or for logarithmic scale instruments, at mid-range of each decade, and at two points of at least one decade; and
 4. So that accuracy within plus or minus 20 percent of the true radiation level can be demonstrated on each scale.
- D. A licensee shall retain calibration records for a period of three years from the date of calibration.

Historical Note

New Section R9-7-1714 recodified from R12-1-1714 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1715. Leak Testing of Sealed Sources

- A. A licensee that uses a sealed source shall ensure that the source is tested for leakage according to subsection (C). The licensee shall maintain a record of leak test results in units of Becquerels (Bq) or microcuries, for inspection by the Department for three years after the leak test is performed.
- B. A person authorized under R9-7-417(C) shall wipe a sealed source using a leak test kit or a similar method approved by the Department, the NRC, or another Agreement State. The authorized person shall take the wipe sample from the nearest acces-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

sible point to the sealed source where contamination might accumulate, and ensure the wipe sample is analyzed for radioactive contamination. The authorized person shall use a method of analysis capable of detecting the presence of 185 Bq (0.005 microcuries) of radioactive material on the test sample.

C. Test frequency.

1. A licensee shall ensure that each sealed source (except an energy compensation source (ECS)) is tested in accordance with R9-7-417. In the absence of a certificate from a transferor that a test has been performed within six months before transfer, a licensee shall not use the sealed source until it is tested.
2. A licensee shall ensure that each ECS that is not exempt from testing under subsection (E) is tested at intervals that do not exceed three years. In the absence of a certificate from a transferor that a test has been performed within three years before transfer, a licensee shall not use the ECS until it is tested.

D. Removal of leaking source from service.

1. If a test conducted according to this Section reveals the presence of 185 Bq (0.005 microcuries) or more of removable radioactive material, a licensee shall remove the sealed source from service immediately and have it decontaminated, repaired, or disposed of by a Department, a NRC, or an Agreement State licensee that is authorized to perform these functions. The licensee shall check the equipment associated with the leaking source for radioactive contamination and, if the equipment is contaminated, have it decontaminated or disposed of by a Department, a NRC, or an Agreement State licensee that is authorized to perform the chosen function.
2. A licensee shall submit a report to the Department, within five days of receiving positive test results. The report shall describe the equipment involved in the leak, the test results, any contamination that resulted from the leaking source, and each corrective action taken up to the date on the report.

E. The following sealed sources are exempt from the periodic leak test requirements in subsections (A) through (D):

1. Hydrogen-3 (tritium) sources;
2. Sources that contain licensed material with a half-life of 30 days or less;
3. Sealed sources that contain licensed material in gaseous form;
4. Sources of beta- or gamma-emitting radioactive material with an activity of 3.7 MBq [100 microcuries] or less; and
5. Sources of alpha- or neutron-emitting radioactive material with an activity of 0.37 MBq [10 microcuries] or less.

R9-7-1716. Inventory

A licensee shall conduct a physical inventory every six months to account for all licensed material received and possessed under the license. The licensee shall maintain records of the inventory for three years from the date of the inventory for inspection by the Department. The inventory shall indicate the quantity and kind of licensed material, the location of the licensed material, the date of the inventory, and the name of each individual who conducted the inventory. Physical inventory records may be combined with leak test records.

R9-7-1717. Utilization Records

Each licensee shall maintain records of use for three years from the date of the recorded event, that contain the following information for each source of radiation:

1. Make, model number, and serial number or a description of each source of radiation used;
2. The identity of the well-logging supervisor or the field unit to which the source is assigned;
3. Locations and dates of use; and
4. In the case of tracer materials and radioactive markers, the radionuclide and activity undertaken in a particular well.

Historical Note

New Section R9-7-1717 recodified from R12-1-1717 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1718. Design and Performance Criteria for Sealed Sources

A. A licensee shall use a sealed source for well logging applications if the sealed source:

1. Is doubly encapsulated;
2. Contains licensed material in a chemical and physical form that is insoluble and nondispersible; and
3. Meets the requirements of subsection (B), (C), or (D).

B. For a sealed source manufactured on or before July 14, 1989, a licensee may use a sealed source in well logging applications that meets the requirements of USASI N5.4-1968, Classification of Sealed Radioactive Sources, available from the American National Standards Institute at 25 West 43rd Street, 4th floor, New York, NY 10036, which is incorporated by reference and on file with the Department, or the requirements in subsection (C) or (D). This incorporation by reference contains no future editions or amendments.

C. For a sealed source manufactured after July 14, 1989, a licensee may use a sealed source in well logging applications that meets the oil-well logging requirements of ANSI/HPS N43.6-1997, Sealed Radioactive Sources--Classification, available from the American National Standards Institute at 25 West 43rd Street, 4th floor, New York, NY 10036, which is incorporated by reference and on file with the Department. This incorporation by reference contains no future editions or amendments.

D. For a sealed source manufactured after July 14, 1989, a licensee may use a sealed source in well logging applications if the sealed source's prototype has been tested and found to maintain its integrity after each of the following required tests:

1. Temperature. The test source is held at -40° C for 20 minutes and 600° C for one hour, and then subjected to a thermal shock with a temperature drop from 600° C to 20° C within 15 seconds.
2. Impact. A 5 kg steel hammer, 2.5 cm in diameter, is dropped from a height of 1 m onto the test source.
3. Vibration. The test source is subjected to vibration in the 25 Hz to 500 Hz range at 5 g amplitude for 30 minutes.
4. Puncture. A 1 gram hammer with a pin, 0.3 cm in diameter, is dropped from a height of 1 m onto the test source.
5. Pressure. The test source is subjected to an external pressure of 1.695 x 10⁷ pascals (24,600 pounds per square inch absolute).

E. The requirements in subsections (A), (B), (C), and (D) do not apply to a sealed source that contains licensed material in gaseous form.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- F. The requirements in subsections (A), (B), (C), and (D) do not apply to an energy compensation source (ECS).

Historical Note

R9-7-1719. Labeling

- A. A licensee shall mark each source, source holder, or logging tool that contains radioactive material with a durable, legible, and clearly visible marking or label, consisting at minimum of the standard radiation caution symbol, without the conventional color requirement, and the following wording:

DANGER (or: CAUTION)
RADIOACTIVE

This labeling is required for each component transported as a separate piece of equipment regardless of size.

- B. A licensee shall permanently attach to each transport container a durable, legible, and a clearly visible label consisting at minimum, of the standard radiation caution symbol and the following wording:

DANGER (or: CAUTION)
RADIOACTIVE
NOTIFY CIVIL AUTHORITIES (or name of company)

Historical Note

R9-7-1720. Inspection, Maintenance, and Opening of a Source or Source Holder

- A. Each licensee shall visually check source holders, logging tools, and source handling tools for defects before each use to ensure that the equipment is in good working condition and that required labeling is present. If defects are found, the licensee shall remove equipment from service until it is repaired, and make a record listing: date of check, name of inspector, equipment involved, each defect found, and repairs made. The licensee shall maintain each record for three years after a defect is found.
- B. Each licensee shall have a program for semiannual visual inspection and routine maintenance of source holders, logging tools, injection tools, source handling tools, storage containers, transport containers, and uranium sinker bars to ensure that the required labeling is legible and that no physical damage is visible. If any defect is found, the licensee shall remove the equipment from service until it is repaired, and make a record listing: date of inspection, equipment involved, inspection and maintenance operations performed, each defect found, and each action taken to correct a defect. The licensee shall maintain each record for three years after a defect is found.
- C. A licensee shall not remove a sealed source from a source holder or logging tool, or perform maintenance on a sealed source or source holder that contains a sealed source without written permission from the Department.
- D. If a sealed source is stuck in the source holder, a licensee shall not perform any operation, such as drilling, cutting, or chiseling, on the source holder unless the licensee is specifically authorized to perform the operation by the Department.
- E. The opening, repair, or modification of any sealed source is prohibited, unless authorized by the Department, the NRC, or an Agreement State.

Historical Note

R9-7-1721. Training

- A. A licensee shall not permit an individual to act as a logging supervisor until that person has:
1. Completed training in the subjects outlined in subsection (E);
 2. Received copies of, and instruction in:
 - a. The applicable rules contained in 9 A.A.C. 7;
 - b. The Department license under which the logging supervisor will perform well logging; and
 - c. The licensee's operating and emergency procedures, required by R9-7-1722;
 3. Completed on-the-job training and demonstrated competence during a field evaluation in the use of licensed materials, remote handling tools, and radiation survey instruments; and
 4. Demonstrated understanding of the requirements in subsections (A)(1) and (A)(2) by successfully completing a written test.
- B. The licensee shall not permit an individual to act as a logging assistant until that person has:
1. Received instruction in applicable rules of 9 A.A.C. 7;
 2. Received copies of, and instruction in, the licensee's operating and emergency procedures required by R9-7-1722;
 3. Demonstrated understanding of the materials listed in subsections (B)(1) and (B)(2) by successfully completing a written or oral test; and
 4. Received instruction in the use of licensed materials, remote handling tools, and radiation survey instruments that is related to the logging assistant's intended job responsibilities.
- C. A licensee shall provide a safety training review for logging supervisors and logging assistants at least once during each calendar year. Each logging supervisor and logging assistant shall attend a safety training review at least once during the current calendar year.
- D. A licensee shall maintain a record of each logging supervisor's and logging assistant's initial training and annual safety training review. The training records shall include copies of written tests and dates of oral tests given after the effective date of this Section. The licensee shall maintain the initial training records for three years following termination of employment, and maintain records of each annual safety training review, including a list of subjects covered during the review, for three years.
- E. A licensee shall provide instruction in the following subjects in the training required by subsection (A)(1):
1. Fundamentals of radiation safety, including:
 - a. Characteristics of radiation;
 - b. Units of radiation dose and quantity of radioactivity;
 - c. Hazards of exposure to radiation;
 - d. Levels of radiation from licensed material;
 - e. Methods of controlling radiation dose (time, distance, and shielding); and
 - f. Radiation safety practices, including prevention of contamination and methods of decontamination;
 2. Radiation detection instruments, including:
 - a. Use, operation, calibration, and limitations of radiation survey instruments;
 - b. Survey techniques; and
 - c. Use of personnel monitoring equipment;
 3. Equipment, including:
 - a. Operation of equipment, including source handling equipment and remote handling tools;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- b. Storage, control, and disposal of licensed material; and
- c. Maintenance of equipment;
- 4. The requirements of pertinent federal and state law, and
- 5. Case histories of accidents in well logging.

Historical Note

R9-7-1722. Operating and Emergency Procedures

Each licensee shall develop operating and emergency procedures on the following subjects:

1. Procedures designed to prevent individuals from being exposed to radiation in excess of the limits in Article 4 of this Chapter. This subject includes:
 - a. Use of a sealed source in a well without a surface casing for the purposes of protecting a fresh water aquifer, as appropriate;
 - b. Methods employed to minimize exposure from inhalation or ingestion of licensed tracer materials; and
 - c. Methods for minimizing exposure of individuals in the event of an accident;
2. Use of remote handling tools for manipulating a radioactive sealed source or tracer;
3. Methods and occasions for conducting a radiation survey;
4. Methods and occasions for locking and securing a source of radiation;
5. Personnel monitoring and the use of personnel monitoring equipment;
6. Transportation of a source to a temporary job site or field station, including packaging and placing the source of radiation in a vehicle, placarding the vehicle, and securing the source of radiation during transportation;
7. Procedure for notifying the Department if there is an accident;
8. Maintenance of records;
9. Inspection and maintenance of source holders, logging tools, source handling tools, storage containers, transport containers, and injection tools;
10. Procedure required if a sealed source is:
 - a. Lost or lodged downhole; or
 - b. Ruptured, including safeguards to prevent job site and personnel contamination, inhalation; and ingestion;
11. Procedures required for picking up, receiving, and opening packages that contain radioactive material; and
12. Procedures required for site and equipment surveys and decontamination following tracer studies.

Historical Note

New Section R9-7-1722 recodified from R12-1-1722 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1723. Personnel Monitoring

- A. A licensee shall not permit an individual to act as a logging supervisor or logging assistant unless that person wears, at all times during the handling of licensed radioactive materials, a personnel dosimeter that is processed and evaluated by an accredited National Voluntary Laboratory Accreditation Program (NVLAP) processor.
- B. A licensee shall assign a personnel dosimeter to each individual, who shall wear the assigned equipment.
- C. A licensee shall replace film badges at least monthly and replace other personnel dosimeters at least quarterly. After replacement, a licensee shall promptly process each personnel dosimeter.

- D. A licensee shall provide bioassay services to each individual who uses licensed materials in subsurface tracer studies if required by the license.
- E. A licensee shall record exposures noted from personnel dosimeters required by subsection (A) and bioassay results and maintain these records for three years after the Department terminates the radioactive material license.

Historical Note

New Section R9-7-1723 recodified from R12-1-1723 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1724. Radioactive Contamination Control

- A. If a licensee detects evidence that a sealed source has ruptured or licensed materials have caused contamination, the licensee shall immediately initiate the emergency procedures required by R9-7-1722.
- B. If contamination results from the use of licensed material in well logging, the licensee shall decontaminate all affected areas, equipment, and personnel.
- C. During efforts to recover a source lodged in a well, the licensee shall continuously monitor, with a radiation detection instrument that complies with R9-7-1714 or a logging tool with a radiation detector, the well and any circulating fluids from the well to check for contamination resulting from damage to the source.

Historical Note

New Section R9-7-1724 recodified from R12-1-1724 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1725. Uranium Sinker Bars

A licensee may use a uranium sinker bar for a well logging application only if it is legibly impressed with the words "Caution Radioactive-Depleted Uranium" and "Notify Civil Authorities (or company name) if Found."

Historical Note

R9-7-1726. Energy Compensation Source

- A. A licensee may use an energy compensation source (ECS) in a logging tool, or other tool component, if the ECS contains a quantity of radioactive material that does not exceed 3.7 MBq (100 microcuries).
- B. If used in a well with a surface casing, an ECS is subject to all Sections of this Article except R9-7-1702, R9-7-1728, and R9-7-1751.
- C. If used in a well logging hole without a surface casing, an ECS is subject to all Sections of this Article.

Historical Note

New Section R9-7-1726 recodified from R12-1-1726 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1727. Neutron Generator Source

- A. A licensee may use a tritium neutron generator source to produce neutrons for well logging applications.
- B. If the activity of a tritium neutron generator source does not exceed 1.11 TBq (30 Curies) and the source is used in a well with a surface casing, the source is subject to all Sections of this Article except R9-7-1702 and R9-7-1751.
- C. If the activity of a neutron generator source is equal to or exceeds 1.11 TBq (30 Curies) or the source is used in a well without a surface casing, the source is subject to all Sections of this Article.

R9-7-1731. Security

- A. A logging supervisor shall be physically present at a temporary job site whenever licensed material is being handled or is not stored and locked in a vehicle or storage place. The logging supervisor may leave the job site to obtain assistance if a source becomes lodged in a well.
- B. During well logging, except when a radiation source is below ground or in a shipping or storage container, the logging supervisor or other individual designated by the logging supervisor shall maintain direct surveillance of the operation to prevent unauthorized entry into a restricted area, as defined in R9-7-102.

Historical Note

R9-7-1733. Subsurface Tracer Studies

- A. Any person who handles radioactive tracer material shall wear protective gloves and other appropriate protective clothing and equipment. Precautions shall be taken to avoid ingestion or inhalation of radioactive material.
- B. A licensee shall not inject radioactive material into potable aquifers without authority granted in a radioactive material license issued by the Department.
- C. A licensee shall dispose of tracer study waste contaminated with radioactive material in accordance with R9-7-434.

Historical Note

New Section R9-7-1733 recodified from R12-1-1733 at 24 A.A.R. 813, effective March 22, 2018 (Supp. 18-1).

R9-7-1734. Use of a Sealed Source in a Well Without a Surface Casing and Particle Accelerators

- A. A licensee or registrant may use a sealed source in a well without a surface casing to protect a fresh water aquifer if the licensee follows the correct procedure for reducing the probability that the source will become lodged in the well.
- B. A licensee or registrant shall not begin well logging operations in a well without a surface casing unless the Department has approved the licensee's procedure for logging in an uncased hole.
- C. A licensee or registrant shall not permit above-ground testing of a particle accelerator, designed for use in well-logging, which results in the production of radiation, unless the area or facility affected is controlled or shielded in a manner consistent with applicable requirements in Article 4 of this Chapter.

R9-7-1741. Radiation Surveys

- A. A licensee shall perform and make a record of a radiation survey using instruments or calculations of radiation levels in each area where radioactive material is stored.
- B. A licensee shall make and record a radiation survey using instruments or calculations of radiation levels in occupied positions and on the exterior of each vehicle used to transport radioactive material. The survey or calculation shall include each source of radiation or combination of sources to be transported in the vehicle.
- C. After removal of the sealed source from the logging tool and before departing the job site, a licensee shall ensure that the logging tool detector is energized, or a survey meter is used to test the logging tool for contamination. The licensee shall record the test for contamination.
- D. The licensee shall make and record each survey using an appropriate survey instrument for the radionuclide being used, at the job site or wellhead for each tracer operation, except those using Hydrogen-3, Carbon-14 and Sulfur-35. Each sur-

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

vey shall include measurements of radiation levels before and after each tracer operation.

- E. Records of surveys conducted according to subsections (A) through (D) shall include the date of each survey, the identification of each individual making the survey, identification of each survey instrument used, each radiation measurement in millirem or microsievert per hour, and an exact description of the location of the survey. A licensee shall retain records of a survey for three years after completion of the survey.

Each licensee that conducts operations at a temporary job site shall maintain the following documents and records at the temporary job site until the well logging operation is completed:

1. Operating and emergency procedures required by R9-7-1722;
2. The most current calibration records for the radiation survey instruments in use at the site required by R9-7-1714;
3. The most current survey records required by R9-7-1741.
4. The shipping papers for transportation of radioactive materials required by license condition; and
5. If operating under reciprocity in accordance with R9-7-320, a copy of the Department authorization for use of radioactive material in Arizona.

R9-7-1751. Notification of Incidents and Lost Sources; Abandonment Procedures for Irretrievable Sources

- A. If, after making a reasonable effort to recover a sealed source or device that contains radioactive material using methods that are not likely to result in damage or rupture and contamination, a licensee determines that the source or device is lodged in a well, the licensee shall:
1. Immediately notify the Department by telephone of the circumstances that resulted in the inability to retrieve the source and, if there is no evidence of contamination, obtain the following from the Department:
 - a. A determination that the source is irretrievable and abandonment is necessary because further efforts to recover the source are likely to result in an immediate threat to public health and safety, and
 - b. An approval to implement abandonment procedures;
 2. Advise the well owner or operator, as applicable, of the abandonment procedures implemented under R9-7-1702(A) and (C); and
 3. Either ensure that abandonment procedures are implemented within 30 days after the Department classifies the source as irretrievable or request an extension of time if unable to complete abandonment procedures.
- B. A licensee shall immediately notify the Department by telephone and subsequently, within 30 days, by confirmatory letter if the licensee knows or has reason to believe that a sealed source has been ruptured or the well has otherwise been contaminated. The letter shall describe the well location, the magnitude and extent of radioactive contamination, the consequences of the rupture, and the efforts planned or initiated to mitigate the consequences.
- C. A licensee shall notify the Department of the theft or loss of any radioactive material, radiation overexposure, excessive levels and concentrations of radiation, and incidents as required by R9-7-443, R9-7-444, and R9-7-445.
- D. A licensee shall, within 30 days after a sealed source has been classified as irretrievable, report in writing to the Department. The licensee shall send a copy of the report to each state or federal agency that issued permits or otherwise approved of the drilling operation. The report shall contain the following information:
1. Date of occurrence;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. A description of the irretrievable well logging source involved, including the name of the radionuclide and its quantity, and the chemical and physical form of the radionuclide;
3. Surface location and identification of the well;
4. Results of efforts to immobilize and seal the source in place;
5. A brief description of the attempted recovery effort;
6. Depth of the source;
7. Depth of the top of the cement plug;
8. Depth of the well;
9. The reasons why further efforts to recover the source are likely to result in an immediate threat to public health and safety, necessitating abandonment;
10. Information contained on the permanent identification plaque; and
11. State and federal agencies receiving a copy of the report.

ARTICLE 18. RESERVED**ARTICLE 19. PHYSICAL PROTECTION OF CATEGORY 1 AND CATEGORY 2 QUANTITIES OF RADIOACTIVE MATERIAL****R9-7-1901. Purpose**

This Article has been established to provide the requirements for the physical protection program for any licensee that possesses an aggregated category 1 or category 2 quantity of radioactive material listed in Appendix A to this Article. These requirements provide reasonable assurance of the security of category 1 or category 2 quantities of radioactive material by protecting these materials from theft or diversion. Specific requirements for access to material, use of material, transfer of material, and transport of material are included. No provision of this Article authorizes possession of licensed material.

R9-7-1903. Scope

- A. R9-7-1921 through R9-7-1957 of this Article apply to any person who, under the rules in this chapter, possesses or uses at any site, an aggregated category 1 or category 2 quantity of radioactive material.
- B. R9-7-1971 through R9-7-1981 of this Article applies to any person who, under the rules of this chapter:
 1. Transports or delivers to a carrier for transport in a single shipment, a category 1 or category 2 quantity of radioactive material; or
 2. Imports or exports a category 1 or category 2 quantity of radioactive material; the provisions only apply to the domestic portion of the transport.

R9-7-1905. Definitions

The following definitions apply in this Article, unless the context otherwise requires:

“Access control means a system for allowing only approved individuals to have unescorted access to the security zone and for ensuring that all other individuals are subject to escorted access.

“Act” means the Atomic Energy Act of 1954 (68 Stat. 919), including any amendments thereto.

“Aggregated” means accessible by the breach of a single physical barrier that would allow access to radioactive material in any form, including any devices that contain the radioactive material, when the total activity equals or exceeds a category 2 quantity of radioactive material.

“Agreement State” means any state with which the Atomic Energy Commission or the U.S. Nuclear Regulatory Commission has entered into an effective agreement under subsection 274b. of the Act. Non-agreement State means any other State.

“Approved individual” means an individual whom the licensee has determined to be trustworthy and reliable for unescorted access in accordance with R9-7-1921 through R9-7-1933 of this Article and who has completed the training required by R9-7-1943(C).

“Background investigation” means the investigation conducted by a licensee or applicant to support the determination of trustworthiness and reliability.

“Becquerel (Bq)” means one disintegration per second.

“Byproduct material” means the same as in R9-7-102.

“Category 1 quantity of radioactive material” means a quantity of radioactive material meeting or exceeding the category 1 threshold in Table 1 of Appendix A to this Article. This quantity is determined by calculating the ratio of the total activity of each radionuclide to the category 1 threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds 1, the quantity would be considered a category 1 quantity. Category 1 quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.

“Category 2 quantity of radioactive material” means a quantity of radioactive material meeting or exceeding the category 2 threshold but less than the category 1 threshold in Table 1 of Appendix A to this Article. This quantity is determined by calculating the ratio of the total activity of each radionuclide to the category 2 threshold for that radionuclide and adding the ratios together. If the sum is equal to or exceeds 1, the quantity would be considered a category 2 quantity. Category 2 quantities of radioactive material do not include the radioactive material contained in any fuel assembly, subassembly, fuel rod, or fuel pellet.

“Commission” means the U.S. Nuclear Regulatory Commission or its duly authorized representatives.

“Curie” means the same as in R9-7-102.

“Diversion” means the unauthorized movement of radioactive material subject to this Article to a location different from the material’s authorized destination inside or outside of the site at which the material is used or stored.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

“Escorted access” means accompaniment while in a security zone by an approved individual who maintains continuous direct visual surveillance at all times over an individual who is not approved for unescorted access.

“Fingerprint orders” means the orders issued by the U.S. Nuclear Regulatory Commission or the legally binding requirements issued by Agreement States that require fingerprints and criminal history records checks for individuals with unescorted access to category 1 and category 2 quantities of radioactive material or safeguards information-modified handling.

“Government agency” means any executive department, commission, independent establishment, corporation, wholly or partly owned by the United States of America which is an instrumentality of the United States, or any board, bureau, division, service, office, officer, authority, administration, or other establishment in the executive branch of the Government.

“License”, except where otherwise specified, means a license for byproduct material issued pursuant to the rules in Articles 3, 5, 7, and 15 of this chapter.

“License issuing authority” means the licensing agency that issued the license, i.e. the Department, the U.S. Nuclear Regulatory Commission, or the appropriate agency of an Agreement State.

“Local law enforcement agency (LLEA)” means a public or private organization that has been approved by a federal, state, or local government to carry firearms and make arrests, and is authorized and has the capability to provide an armed response in the jurisdiction where the licensed category 1 or category 2 quantity of radioactive material is used, stored, or transported.

“Lost or missing licensed material” means licensed material whose location is unknown. It includes material that has been shipped but has not reached its destination and whose location cannot be readily traced in the transportation system.

“Mobile device” means a piece of equipment containing licensed radioactive material that is either mounted on wheels or casters, or is otherwise equipped for moving without a need for disassembly or dismounting; or designed to be hand carried. Mobile devices do not include stationary equipment installed in a fixed location.

“Movement control center” means an operations center that is remote from transport activity and that maintains position information on the movement of radioactive material, receives reports of attempted attacks or thefts, provides a means for reporting these and other problems to appropriate agencies and can request and coordinate appropriate aid.

“No-later-than arrival time” means the date and time that the shipping licensee and receiving licensee have established as the time at which an investigation will be initiated if the shipment has not arrived at the receiving facility. The no-later-than arrival time may not be more than 6 hours after the estimated arrival time for shipments of category 2 quantities of radioactive material.

“Person” means:

Any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, Government agency other than the Commission or the DOE (except that the DOE shall be considered a person within the meaning of the rules in 10 CFR chapter I to the extent that its facilities and activities are subject to the

licensing and related regulatory authority of the Commission under section 202 of the Energy Reorganization Act of 1974 (88 Stat. 1244), the Uranium Mill Tailings Radiation Control Act of 1978 (92 Stat. 3021), the Nuclear Waste Policy Act of 1982 (96 Stat. 2201), and section 3(b)(2) of the Low-Level Radioactive Waste Policy Amendments Act of 1985 (99 Stat. 1842)), any State or any political subdivision of or any political entity within a State, any foreign government or nation or any political subdivision of any such government or nation, or other entity; and

Any legal successor, representative, agent, or agency of the foregoing.

“Reviewing official” means the individual who shall make the trustworthiness and reliability determination of an individual to determine whether the individual may have, or continue to have, unescorted access to the category 1 or category 2 quantities of radioactive materials that are possessed by the licensee.

“Sabotage” means deliberate damage, with malevolent intent, to a category 1 or category 2 quantity of radioactive material, a device that contains a category 1 or category 2 quantity of radioactive material, or the components of the security system.

“Safe haven” means a readily recognizable and readily accessible site at which security is present or from which, in the event of an emergency, the transport crew can notify and wait for the local law enforcement authorities.

“Security zone” means any temporary or permanent area determined and established by the licensee for the physical protection of category 1 or category 2 quantities of radioactive material.

“State” means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

“Telemetric position monitoring system” means a data transfer system that captures information by instrumentation and/or measuring devices about the location and status of a transport vehicle or package between the departure and destination locations.

“Trustworthiness and reliability” means characteristics of an individual considered dependable in judgment, character, and performance, such that unescorted access to category 1 or category 2 quantities of radioactive material by that individual does not constitute an unreasonable risk to the public health and safety or security. A determination of trustworthiness and reliability for this purpose is based upon the results from a background investigation.

“Unescorted access” means solitary access to an aggregated category 1 or category 2 quantity of radioactive material or the devices that contain the material.

“United States” when used in a geographical sense, includes Puerto Rico and all territories and possessions of the United States.

- A. The Department may, upon application of any interested person or upon its own initiative, grant such exemptions from the requirements of the rules in this Article as it determines are authorized by law and will not endanger life or property or the common defense and security, and are otherwise in the public interest.
- B. Any licensee's NRC-licensed activities are exempt from the requirements of R9-7-1921 through R9-7-1957 of this Article to the extent that its activities are included in a security plan required by 10 CFR part 73 revised January 1, 2015, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.
- C. A licensee that possesses radioactive waste that contains category 1 or category 2 quantities of radioactive material is exempt from the requirements of R9-7-1921 through R9-7-1981 of this Article, except that any radioactive waste that

contains discrete sources, ion-exchange resins, or activated material that weighs less than 2,000 kg (4,409 lbs.) is not exempt from the requirements of this Article. The licensee shall implement the following requirements to secure the radioactive waste:

1. Use continuous physical barriers that allow access to the radioactive waste only through established access control points;
2. Use a locked door or gate with monitored alarm at the access control point;
3. Assess and respond to each actual or attempted unauthorized access to determine whether an actual or attempted theft, sabotage, or diversion occurred; and
4. Immediately notify the LLEA and request an armed response from the LLEA upon determination that there was an actual or attempted theft, sabotage, or diversion of the radioactive waste that contains category 1 or category 2 quantities of radioactive material.

R9-7-1921. Personnel Access Authorization Requirements for Category 1 or Category 2 Quantities of Radioactive Material**A. General:**

1. Each licensee that possesses an aggregated quantity of radioactive material at or above the category 2 threshold shall establish, implement, and maintain its access authorization program in accordance with the requirements of this Article.
2. An applicant for a new license and each licensee that would become newly subject to the requirements of this Article upon application for modification of its license shall implement the requirements of this Article, as appropriate, before taking possession of an aggregated category 1 or category 2 quantity of radioactive material.
3. Any licensee that has not previously implemented the Security Orders or been subject to the provisions of R9-7-1921 through R9-7-1933 shall implement the provisions of R9-7-1921 through R9-7-1933 before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

B. General performance objective: The licensee's access authorization program shall ensure that the individuals specified in subsection (C)(1) are trustworthy and reliable.**C. Applicability:**

1. Licensees shall subject the following individuals to an access authorization program:
 - a. Any individual whose assigned duties require unescorted access to category 1 or category 2 quantities of radioactive material or to any device that contains the radioactive material; and
 - b. Reviewing officials.
2. Licensees need not subject the categories of individuals listed in R9-7-1929(A) to the investigation elements of the access authorization program.
3. Licensees shall approve for unescorted access to category 1 or category 2 quantities of radioactive material only those individuals with job duties that require unescorted access to category 1 or category 2 quantities of radioactive material.
4. Licensees may include individuals in the access authorization program under R9-7-1921 through R9-7-1933 and needing access to safeguards information-modified handling under 10 CFR part 73 revised January 1, 2015, incorporated by reference, and available under R9-7-101. This incorporated material contains no future editions or amendments.

R9-7-1923. Access Authorization Program Requirements**A. Granting unescorted access authorization:**

1. Licensees shall implement the requirements of this Article for granting initial or reinstated unescorted access authorization.

2. Individuals who have been determined to be trustworthy and reliable shall also complete the security training required by R9-7-1943(C) before being allowed unescorted access to category 1 or category 2 quantities of radioactive material.

B. Reviewing officials:

1. Reviewing officials are the only individuals who may make trustworthiness and reliability determinations that allow individuals to have unescorted access to category 1 or category 2 quantities of radioactive materials possessed by the licensee.
2. Each licensee shall name one or more individuals to be reviewing officials. After completing the background investigation on the reviewing official, the licensee shall provide under oath or affirmation, a certification, to the ATTN: Bureau Chief, Bureau of Radiation Control, Arizona Department of Health Services, 4814 S. 40th Street, Phoenix, Arizona 85040, that the reviewing official is deemed trustworthy and reliable by the licensee. The fingerprints of the named reviewing official shall be taken by a law enforcement agency, Federal or State agencies that provide fingerprinting services to the public, or commercial fingerprinting services authorized by a State to take fingerprints. The licensee shall recertify that the reviewing official is deemed trustworthy and reliable every 10 years in accordance with R9-7-1925(C).
3. Reviewing officials shall be permitted to have unescorted access to category 1 or category 2 quantities of radioactive materials or access to safeguards information or safeguards information-modified handling, if the licensee possesses safeguards information or safeguards information-modified handling. Reviewing officials permitted unescorted access to category 1 or category 2 quantities of radioactive materials shall receive appropriate radiation safety training initially and at a frequency not to exceed 12 months. The licensee shall maintain records of the initial and refresher training for three years from the date of training for Department review.
4. Reviewing officials cannot approve other individuals to act as reviewing officials.
5. A reviewing official does not need to undergo a new background investigation before being named by the licensee as the reviewing official if:
 - a. The individual has undergone a background investigation that included fingerprinting and an FBI criminal history records check and has been determined to be trustworthy and reliable by the licensee; or
 - b. The individual is subject to a category listed in R9-7-1929(A).

C. Informed consent:

1. Licensees may not initiate a background investigation without the informed and signed consent of the subject individual. This consent shall include authorization to share personal information with other individuals or organizations as necessary to complete the background investigation. Before a final adverse determination, the licensee shall provide the individual with an opportunity to correct any inaccurate or incomplete information that is developed during the background investigation. Licensees do not need to obtain signed consent from those individuals that meet the requirements of R9-7-1925(B). A signed consent shall be obtained prior to any reinvestigation.
2. The subject individual may withdraw his or her consent at any time. Licensees shall inform the individual that:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. If an individual withdraws his or her consent, the licensee may not initiate any elements of the background investigation that were not in progress at the time the individual withdrew his or her consent; and
 - b. The withdrawal of consent for the background investigation is sufficient cause for denial or termination of unescorted access authorization.
- D.** Personal history disclosure: Any individual who is applying for unescorted access authorization shall disclose the personal history information that is required by the licensee's access authorization program for the reviewing official to make a determination of the individual's trustworthiness and reliability. Refusal to provide, or the falsification of, any personal history information required by this Article is sufficient cause for denial or termination of unescorted access.
- E.** Determination basis:
1. The reviewing official shall determine whether to permit, deny, unfavorably terminate, maintain, or administratively withdraw an individual's unescorted access authorization based on an evaluation of all of the information collected to meet the requirements of this Article.
 2. The reviewing official may not permit any individual to have unescorted access until the reviewing official has evaluated all of the information collected to meet the requirements of this Article and determined that the individual is trustworthy and reliable. The reviewing official may deny unescorted access to any individual based on information obtained at any time during the background investigation.
 3. The licensee shall document the basis for concluding whether or not there is reasonable assurance that an individual is trustworthy and reliable.
 4. The reviewing official may terminate or administratively withdraw an individual's unescorted access authorization based on information obtained after the background investigation has been completed and the individual granted unescorted access authorization.
 5. Licensees shall maintain a list of persons currently approved for unescorted access authorization. When a licensee determines that a person no longer requires unescorted access or meets the access authorization requirement, the licensee shall remove the person from the approved list as soon as possible, but no later than 7 working days, and take prompt measures to ensure that the individual is unable to have unescorted access to the material.
- F.** Procedures: Licensees shall develop, implement, and maintain written procedures for implementing the access authorization program. The procedures shall include provisions for the notification of individuals who are denied unescorted access. The procedures shall include provisions for the review, at the request of the affected individual, of a denial or termination of unescorted access authorization. The procedures shall contain a provision to ensure that the individual is informed of the grounds for the denial or termination of unescorted access authorization and allow the individual an opportunity to provide additional relevant information.
- G.** Right to correct and complete information:
1. Prior to any final adverse determination, licensees shall provide each individual subject to this Article with the right to complete, correct, and explain information obtained as a result of the licensee's background investigation. Confirmation of receipt by the individual of this notification shall be maintained by the licensee for a period of 1 year from the date of the notification.
 2. If, after reviewing his or her criminal history record, an individual believes that it is incorrect or incomplete in any respect and wishes to change, correct, update, or explain anything in the record, the individual may initiate challenge procedures. These procedures include direct application by the individual challenging the record to the law enforcement agency that contributed the questioned information or a direct challenge as to the accuracy or completeness of any entry on the criminal history record to the Federal Bureau of Investigation, Criminal Justice Information Services (CJIS) Division, ATTN: SCU, Mod. D-2, 1000 Custer Hollow Road, Clarksburg, WV 26306 as set forth in 28 CFR 16.30 through 16.34. In the latter case, the Federal Bureau of Investigation (FBI) will forward the challenge to the agency that submitted the data, and will request that the agency verify or correct the challenged entry. Upon receipt of an official communication directly from the agency that contributed the original information, the FBI Identification Division makes any changes necessary in accordance with the information supplied by that agency. Licensees shall provide at least 10 days for an individual to initiate action to challenge the results of an FBI criminal history records check after the record being made available for his or her review. The licensee may make a final adverse determination based upon the criminal history records only after receipt of the FBI's confirmation or correction of the record.
- H.** Records:
1. The licensee shall retain documentation regarding the trustworthiness and reliability of individual employees for 3 years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material.
 2. The licensee shall retain a copy of the current access authorization program procedures as a record for 3 years after the procedure is no longer needed. If any portion of the procedure is superseded, the licensee shall retain the superseded material for 3 years after the record is superseded.
 3. The licensee shall retain the list of persons approved for unescorted access authorization for 3 years after the list is superseded or replaced.

- A.** Initial investigation: Before allowing an individual unescorted access to category 1 or category 2 quantities of radioactive material or to the devices that contain the material, licensees shall complete a background investigation of the individual seeking unescorted access authorization. The scope of the investigation shall encompass at least the 7 years preceding the date of the background investigation or since the individual's eighteenth birthday, whichever is shorter. The background investigation shall include at a minimum:
1. Fingerprinting and an FBI identification and criminal history records check in accordance with R9-7-1927;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

2. Verification of true identity. Licensees shall verify the true identity of the individual who is applying for unescorted access authorization to ensure that the applicant is who he or she claims to be. A licensee shall review official identification documents (e.g., driver's license; passport; government identification; certificate of birth issued by the state, province, or country of birth) and compare the documents to personal information data provided by the individual to identify any discrepancy in the information. Licensees shall document the type, expiration, and identification number of the identification document, or maintain a photocopy of identifying documents on file in accordance with R9-7-1931. Licensees shall certify in writing that the identification was properly reviewed, and shall maintain the certification and all related documents for review upon inspection;
 3. Employment history verification. Licensees shall complete an employment history verification, including military history. Licensees shall verify the individual's employment with each previous employer for the most recent 7 years before the date of application;
 4. Verification of education. Licensees shall verify that the individual participated in the education process during the claimed period;
 5. Character and reputation determination. Licensees shall complete reference checks to determine the character and reputation of the individual who has applied for unescorted access authorization. Unless other references are not available, reference checks may not be conducted with any person who is known to be a close member of the individual's family, including but not limited to the individual's spouse, parents, siblings, or children, or any individual who resides in the individual's permanent household. Reference checks under this Section shall be limited to whether the individual has been and continues to be trustworthy and reliable;
 6. The licensee shall also, to the extent possible, obtain independent information to corroborate that provided by the individual (e.g., seek references not supplied by the individual); and
 7. If a previous employer, educational institution, or any other entity with which the individual claims to have been engaged fails to provide information or indicates an inability or unwillingness to provide information within a time frame deemed appropriate by the licensee but at least after 10 business days of the request or if the licensee is unable to reach the entity, the licensee shall document the refusal, unwillingness, or inability in the record of investigation; and attempt to obtain the information from an alternate source.
- B. Grandfathering:**
1. Individuals who have been determined to be trustworthy and reliable for unescorted access to category 1 or category 2 quantities of radioactive material under the Fingerprint Orders may continue to have unescorted access to category 1 and category 2 quantities of radioactive material without further investigation. These individuals shall be subject to the reinvestigation requirement.
 2. Individuals who have been determined to be trustworthy and reliable under the provisions of 10 CFR part 73 revised January 1, 2015, incorporated by reference, available under R9-7-101, and containing no future editions or amendments; or the security orders for access to safeguards information, safeguards information-modified handling, or risk-significant material may have unescorted access to category 1 and category 2 quantities of radioactive material without further investigation. The licensee shall document that the individual was determined to be trustworthy and reliable under the provisions of 10 CFR part 73 revised January 1, 2015, incorporated by reference, available under R9-7-101, and containing no future editions or amendments; or a security order. Security order, in this context, refers to any order that was issued by the NRC that required fingerprints and an FBI criminal history records check for access to safeguards information, safeguards information-modified handling, or risk significant material such as special nuclear material or large quantities of uranium hexafluoride. These individuals shall be subject to the reinvestigation requirement.
- C. Re-investigations:** Licensees shall conduct a reinvestigation every 10 years for any individual with unescorted access to category 1 or category 2 quantities of radioactive material. The reinvestigation shall consist of fingerprinting and an FBI identification and criminal history records check in accordance with R9-7-1927. The re-investigations shall be completed within 10 years of the date on which these elements were last completed.

1. Except for those individuals listed in R9-7-1929 and those individuals grandfathered under R9-7-1925(B), each licensee subject to the provisions of this Article shall fingerprint each individual who is to be permitted unescorted access to category 1 or category 2 quantities of radioactive material. Licensees shall transmit all collected fingerprints to the NRC for transmission to the FBI. The licensee shall use the information received from the FBI as part of the required background investigation to determine whether to grant or deny further unescorted access to category 1 or category 2 quantities of radioactive materials for that individual.
2. The licensee shall notify each affected individual that his or her fingerprints will be used to secure a review of his or her criminal history record, and shall inform him or her of the procedures for revising the record or adding explanations to the record.
3. Fingerprinting is not required if a licensee is reinstating an individual's unescorted access authorization to category 1 or category 2 quantities of radioactive materials if:
 - a. The individual returns to the same facility that granted unescorted access authorization within 365 days of the termination of his or her unescorted access authorization; and
 - b. The previous access was terminated under favorable conditions.
4. Fingerprints do not need to be taken if an individual who is an employee of a licensee, contractor, manufacturer, or supplier has been granted unescorted access to category 1 or category 2 quantities of radioactive material, access to safeguards information, or safeguards information-modified handling.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

fied handling by another licensee, based upon a background investigation conducted under this Article, the Fingerprint Orders, or 10 CFR part 73, revised December 12, 2018, incorporated by reference, available under R9-7-101, and containing no future editions or amendments. An existing criminal history records check file may be transferred to the licensee asked to grant unescorted access in accordance with the provisions of R9-7-1931(C).

5. Licensees shall use the information obtained as part of a criminal history records check solely for the purpose of determining an individual's suitability for unescorted access authorization to category 1 or category 2 quantities of radioactive materials, access to safeguards information, or safeguards information-modified handling.

B. Prohibitions:

1. Licensees may not base a final determination to deny an individual unescorted access authorization to category 1 or category 2 quantities of radioactive material solely on the basis of information received from the FBI involving:
 - a. An arrest more than 1 year old for which there is no information of the disposition of the case; or
 - b. An arrest that resulted in dismissal of the charge or an acquittal.
2. Licensees may not use information received from a criminal history records check obtained under this Section in a manner that would infringe upon the rights of any individual under the First Amendment to the Constitution of the United States, nor shall licensees use the information in any way that would discriminate among individuals on the basis of race, religion, national origin, gender, or age.

C. Procedures for processing of fingerprint checks:

1. For the purpose of complying with this Article, licensees shall use an appropriate method listed in 10 CFR 37.7, revised November 29, 2019, incorporated by reference, available under R9-7-101, and containing no future editions or amendments; to submit to the U.S. Nuclear Regulatory Commission, Division of Physical and Cyber Security Policy, 11545 Rockville Pike, ATTN: Criminal History Program/Mail Stop T-8B20, Rockville, MD 20852, one completed, legible standard fingerprint card (Form FD-258, ORIMDNRCOOOZ), electronic fingerprint scan or, where practicable, other fingerprint record for each individual requiring unescorted access to category 1 or category 2 quantities of radioactive material. Copies of these forms may be obtained by emailing MAILSVS.Resource@nrc.gov. Guidance on submitting electronic fingerprints can be found at <https://www.nrc.gov/security/chp.html>.
2. Fees for the processing of fingerprint checks are due upon application. Licensees shall submit payment with the application for the processing of fingerprints through corporate check, certified check, cashier's check, money order, or electronic payment, made payable to "U.S. NRC." (For guidance on making electronic payments, contact the Division of Physical and Cyber Security Policy by e-mailing Crimhist.Resource@NRC.gov.) Combined payment for multiple applications is acceptable. The Commission publishes the amount of the fingerprint check application fee on the NRC's public website. (To find the current fee amount, go to the Licensee Criminal History Records Checks & Firearms Background Check information page at <https://www.nrc.gov/security/chp.html> and see the link for "How do I determine how much to pay for the request?")

3. The U.S. Nuclear Regulatory Commission will forward to the submitting licensee all data received from the FBI as a result of the licensee's application or applications for criminal history records checks.

R9-7-1929. Relief From Fingerprinting, Identification, and Criminal History Records Checks and Other Elements of Background Investigations for Designated Categories of Individuals Permitted Unescorted Access to Certain Radioactive Materials

- A. Fingerprinting, and the identification and criminal history records checks required by section 149 of the Atomic Energy Act of 1954, as amended, and other elements of the background investigation are not required for the following individuals prior to granting unescorted access to category 1 or category 2 quantities of radioactive materials:
 1. An employee of the U.S. Nuclear Regulatory Commission or of the Executive Branch of the U.S. Government who has undergone fingerprinting for a prior U.S. Government criminal history records check;
 2. A Member of Congress;
 3. An employee of a member of Congress or Congressional committee who has undergone fingerprinting for a prior U.S. Government criminal history records check;
 4. The Governor of a State or his or her designated State employee representative;
 5. Federal, State, or local law enforcement personnel;
 6. State Radiation Control Program Directors and State Homeland Security Advisors or their designated State employee representatives;
 7. Agreement State employees conducting security inspections on behalf of the NRC under an agreement executed under section 274.i. of the Atomic Energy Act;
 8. Representatives of the International Atomic Energy Agency (IAEA) engaged in activities associated with the U.S./IAEA Safeguards Agreement who have been certified by the NRC;
 9. Emergency response personnel who are responding to an emergency;
 10. Commercial vehicle drivers for road shipments of category 1 and category 2 quantities of radioactive material;
 11. Package handlers at transportation facilities such as freight terminals and railroad yards;
 12. Any individual who has an active Federal security clearance, provided that he or she makes available the appropriate documentation. Written confirmation from the agency/employer that granted the Federal security clearance or reviewed the criminal history records check shall be provided to the licensee. The licensee shall retain this documentation for a period of 3 years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material; and
 13. Any individual employed by a service provider licensee for which the service provider licensee has conducted the

background investigation for the individual and approved the individual for unescorted access to category 1 or category 2 quantities of radioactive material. Written verification from the service provider shall be provided to the licensee. The licensee shall retain the documentation for a period of 3 years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material.

- B.** Fingerprinting, and the identification and criminal history records checks required by section 149 of the Atomic Energy Act of 1954, as amended, are not required for an individual who has had a favorably adjudicated U.S. Government criminal history records check within the last 5 years, under a comparable U.S. Government program involving fingerprinting and an FBI identification and criminal history records check provided that he or she makes available the appropriate documentation. Written confirmation from the agency/employer that reviewed the criminal history records check shall be provided to the licensee. The licensee shall retain this documentation for a period of 3 years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material. These programs include, but are not limited to:
1. National Agency Check;
 2. Transportation Worker Identification Credentials (TWIC) under 49 CFR part 1572;
 3. Bureau of Alcohol, Tobacco, Firearms, and Explosives background check and clearances under 27 CFR part 555;
 4. Health and Human Services security risk assessments for possession and use of select agents and toxins under 42 CFR part 73;
 5. Hazardous Material security threat assessment for hazardous material endorsement to commercial driver's license under 49 CFR part 1572; and
 6. Customs and Border Protection's Free and Secure Trade (FAST) Program.

R9-7-1931. Protection of Information

- A.** Each licensee who obtains background information on an individual under this Article shall establish and maintain a system of files and written procedures for protection of the record and the personal information from unauthorized disclosure.
- B.** The licensee may not disclose the record or personal information collected and maintained to persons other than the subject individual, his or her representative, or to those who have a need to have access to the information in performing assigned duties in the process of granting or denying unescorted access to category 1 or category 2 quantities of radioactive material, safeguards information, or safeguards information-modified handling. No individual authorized to have access to the information may disseminate the information to any other individual who does not have a need to know.
- C.** The personal information obtained on an individual from a background investigation may be provided to another licensee:
1. Upon the individual's written request to the licensee holding the data to disseminate the information contained in his or her file; and

2. The recipient licensee verifies information such as name, date of birth, social security number, gender, and other applicable physical characteristics.

- D.** The licensee shall make background investigation records obtained under this Article available for examination by an authorized representative of the Department to determine compliance with the rules and laws.
- E.** The licensee shall retain all fingerprint and criminal history records (including data indicating no record) received from the FBI, or a copy of these records if the individual's file has been transferred, on an individual for 3 years from the date the individual no longer requires unescorted access to category 1 or category 2 quantities of radioactive material.

Each licensee shall ensure that access authorization programs are reviewed to confirm compliance with the requirements of this Article and that comprehensive actions are taken to correct any noncompliance that is identified. The review program shall evaluate all program performance objectives and requirements. Each licensee shall periodically (at least annually) review the access program content and implementation.
- B.** The results of the reviews, along with any recommendations, shall be documented. Each review report shall identify conditions that are adverse to the proper performance of the access authorization program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.
- C.** Review records shall be maintained for 3 years.

R9-7-1941. Security Program**A. Applicability:**

1. Each licensee that possesses an aggregated category 1 or category 2 quantity of radioactive material shall establish, implement, and maintain a security program in accordance with the requirements of this Article.
2. An applicant for a new license and each licensee that would become newly subject to the requirements of this Article upon application for modification of its license shall implement the requirements of this Article, as appropriate, before taking possession of an aggregated category 1 or category 2 quantity of radioactive material.
3. Any licensee that has not previously implemented the Security Orders or been subject to the provisions of R9-7-1941 through R9-7-1957 shall provide written notification to the Department, as specified in R9-7-1907, at least 90 days before aggregating radioactive material to a quantity that equals or exceeds the category 2 threshold.

B. General performance objective: Each licensee shall establish, implement, and maintain a security program that is designed to monitor and, without delay, detect, assess, and respond to an actual or attempted unauthorized access to category 1 or category 2 quantities of radioactive material.**C. Program features:** Each licensee's security program shall include the program features, as appropriate, described in R9-7-1943, R9-7-1945, R9-7-1947, R9-7-1949, R9-7-1951, R9-7-1953, and R9-7-1955.**Historical Note**

R9-7-1943. General Security Program Requirements**A. Security plan:**

1. Each licensee identified in R9-7-1941(A) shall develop a written security plan specific to its facilities and operations. The purpose of the security plan is to establish the licensee's overall security strategy to ensure the integrated and effective functioning of the security program required by this Article. The security plan shall, at a minimum:
 - a. Describe the measures and strategies used to implement the requirements of this Article; and

- b. Identify the security resources, equipment, and technology used to satisfy the requirements of this Article.

2. The security plan shall be reviewed and approved by the individual with overall responsibility for the security program.

3. A licensee shall revise its security plan as necessary to ensure the effective implementation of Department requirements. The licensee shall ensure that:
 - a. The revision has been reviewed and approved by the individual with overall responsibility for the security program; and
 - b. The affected individuals are instructed on the revised plan before the changes are implemented.

4. The licensee shall retain a copy of the current security plan as a record for 3 years after the security plan is no longer required. If any portion of the plan is superseded, the licensee shall retain the superseded material for 3 years after the record is superseded.

B. Implementing procedures:

1. The licensee shall develop and maintain written procedures that document how the requirements of this Article and the security plan will be met.
2. The implementing procedures and revisions to these procedures shall be approved in writing by the individual with overall responsibility for the security program.
3. The licensee shall retain a copy of the current procedure as a record for 3 years after the procedure is no longer needed. Superseded portions of the procedure shall be retained for 3 years after the record is superseded.

C. Training:

1. Each licensee shall conduct training to ensure that those individuals implementing the security program possess and maintain the knowledge, skills, and abilities to carry out their assigned duties and responsibilities effectively. The training shall include instruction in:
 - a. The licensee's security program and procedures to secure category 1 or category 2 quantities of radioactive material, and in the purposes and functions of the security measures employed;
 - b. The responsibility to report promptly to the licensee any condition that causes or may cause a violation of Department requirements;
 - c. The responsibility of the licensee to report promptly to the local law enforcement agency and licensee any actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material; and
 - d. The appropriate response to security alarms.
2. In determining those individuals who shall be trained on the security program, the licensee shall consider each individual's assigned activities during authorized use and response to potential situations involving actual or attempted theft, diversion, or sabotage of category 1 or category 2 quantities of radioactive material. The extent of the training shall be commensurate with the individual's potential involvement in the security of category 1 or category 2 quantities of radioactive material.
3. Refresher training shall be provided at a frequency not to exceed 12 months and when significant changes have been made to the security program. This training shall include:
 - a. Review of the training requirements of subsection (c) and any changes made to the security program since the last training;

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- b. Reports on any relevant security issues, problems, and lessons learned;
 - c. Relevant results of Department inspections; and
 - d. Relevant results of the licensee's program review and testing and maintenance.
4. The licensee shall maintain records of the initial and refresher training for 3 years from the date of the training. The training records shall include dates of the training, topics covered, a list of licensee personnel in attendance, and related information.

D. Protection of information:

1. Licensees authorized to possess category 1 or category 2 quantities of radioactive material shall limit access to and unauthorized disclosure of their security plan, implementing procedures, and the list of individuals that have been approved for unescorted access.
2. Efforts to limit access shall include the development, implementation, and maintenance of written policies and procedures for controlling access to, and for proper handling and protection against unauthorized disclosure of, the security plan and implementing procedures.
3. Before granting an individual access to the security plan or implementing procedures, licensees shall:
 - a. Evaluate an individual's need to know the security plan or implementing procedures; and
 - b. If the individual has not been authorized for unescorted access to category 1 or category 2 quantities of radioactive material, safeguards information, or safeguards information-modified handling, the licensee shall complete a background investigation to determine the individual's trustworthiness and reliability. A trustworthiness and reliability determination shall be conducted by the reviewing official and shall include the background investigation elements contained in R9-7-1925(A)(2) through (A)(7).
4. Licensees need not subject the following individuals to the background investigation elements for protection of information:
 - a. The categories of individuals listed in R9-7-1929(A); or
 - b. Security service provider employees, provided written verification that the employee has been determined to be trustworthy and reliable, by the required background investigation in R9-7-1925(A)(2) through (A)(7), has been provided by the security service provider.
5. The licensee shall document the basis for concluding that an individual is trustworthy and reliable and should be granted access to the security plan or implementing procedures.
6. Licensees shall maintain a list of persons currently approved for access to the security plan or implementing procedures. When a licensee determines that a person no longer needs access to the security plan or implementing procedures or no longer meets the access authorization requirements for access to the information, the licensee shall remove the person from the approved list as soon as possible, but no later than 7 working days, and take prompt measures to ensure that the individual is unable to obtain the security plan or implementing procedures.
7. When not in use, the licensee shall store its security plan and implementing procedures in a manner to prevent unauthorized access. Information stored in non-removable electronic form shall be password protected.
8. The licensee shall retain as a record for 3 years after the document is no longer needed:

- a. A copy of the information protection procedures; and
 - b. The list of individuals approved for access to the security plan or implementing procedures.
9. State officials, State employees, and other individuals, whether or not licensees of the Commission or an Agreement State, who receive schedule information of the kind specified in subsection (D)(1) shall protect that information against unauthorized disclosure as specified in subsection (D)(2).

1. A description of the facilities and the category 1 and category 2 quantities of radioactive materials along with a description of the licensee's security measures that have been implemented to comply with this Article; and
 2. A notification that the licensee will request a timely armed response by the LLEA to any actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of material.
- B.** The licensee shall notify the Department as listed in R9-7-1907 of this Article within 3 business days if:
1. The LLEA has not responded to the request for coordination within 60 days of the coordination request; or
 2. The LLEA notifies the licensee that the LLEA does not plan to participate in coordination activities.
- C.** The licensee shall document its efforts to coordinate with the LLEA. The documentation shall be kept for 3 years.
- D.** The licensee shall coordinate with the LLEA at least every 12 months, or when changes to the facility design or operation adversely affect the potential vulnerability of the licensee's material to theft, sabotage, or diversion.

R9-7-1947. Security Zones

- A.** Licensees shall ensure that all aggregated category 1 and category 2 quantities of radioactive material are used or stored within licensee established security zones. Security zones may be permanent or temporary.
- B.** Temporary security zones shall be established as necessary to meet the licensee's transitory or intermittent business activities, such as periods of maintenance, source delivery, and source replacement.

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- C. Security zones shall, at a minimum, allow unescorted access only to approved individuals through:
1. Isolation of category 1 and category 2 quantities of radioactive materials by the use of continuous physical barriers that allow access to the security zone only through established access control points. A physical barrier is a natural or man-made structure or formation sufficient for the isolation of the category 1 or category 2 quantities of radioactive material within a security zone; or
 2. Direct control of the security zone by approved individuals at all times; or
 3. A combination of continuous physical barriers and direct control.
- D. For category 1 quantities of radioactive material during periods of maintenance, source receipt, preparation for shipment, installation, or source removal or exchange, the licensee shall, at a minimum, provide sufficient individuals approved for unescorted access to maintain continuous surveillance of sources in temporary security zones and in any security zone in which physical barriers or intrusion detection systems have been disabled to allow such activities.
- E. Individuals not approved for unescorted access to category 1 or category 2 quantities of radioactive material shall be escorted by an approved individual when in a security zone.
- b. For category 2 quantities of radioactive material, weekly verification through physical checks, tamper indicating devices, use, or other means to ensure that the radioactive material is present.
- B. Assessment: Licensees shall immediately assess each actual or attempted unauthorized entry into the security zone to determine whether the unauthorized access was an actual or attempted theft, sabotage, or diversion.
- C. Personnel communications and data transmission: For personnel and automated or electronic systems supporting the licensee's monitoring, detection, and assessment systems, licensees shall:
1. Maintain continuous capability for personnel communication and electronic data transmission and processing among site security systems; and
 2. Provide an alternative communication capability for personnel, and an alternative data transmission and processing capability, in the event of a loss of the primary means of communication or data transmission and processing. Alternative communications and data transmission systems may not be subject to the same failure modes as the primary systems.
- D. Response: Licensees shall immediately respond to any actual or attempted unauthorized access to the security zones, or actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material at licensee facilities or temporary job sites. For any unauthorized access involving an actual or attempted theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material, the licensee's response shall include requesting, without delay, an armed response from the LLEA.

- A. Monitoring and detection:
1. Licensees shall establish and maintain the capability to continuously monitor and detect without delay all unauthorized entries into its security zones. Licensees shall provide the means to maintain continuous monitoring and detection capability in the event of a loss of the primary power source, or provide for an alarm and response in the event of a loss of this capability to continuously monitor and detect unauthorized entries.
 2. Monitoring and detection shall be performed by:
 - a. A monitored intrusion detection system that is linked to an onsite or offsite central monitoring facility; or
 - b. Electronic devices for intrusion detection alarms that will alert nearby facility personnel; or
 - c. A monitored video surveillance system; or
 - d. Direct visual surveillance by approved individuals located within the security zone; or
 - e. Direct visual surveillance by a licensee designated individual located outside the security zone.
 3. A licensee subject to this Article shall also have a means to detect unauthorized removal of the radioactive material from the security zone. This detection capability shall provide:
 - a. For category 1 quantities of radioactive material, immediate detection of any attempted unauthorized removal of the radioactive material from the security zone. Such immediate detection capability shall be provided by:
 - i. Electronic sensors linked to an alarm; or
 - ii. Continuous monitored video surveillance; or
 - iii. Direct visual surveillance.

The equipment relied on to meet the security requirements of this part shall be inspected and tested for operability and performance at the manufacturer's suggested frequency. If there is no suggested manufacturer's suggested frequency, the testing shall be performed at least annually, not to exceed 12 months.
- B. The licensee shall maintain records on the maintenance and testing activities for 3 years. The record shall include:
1. The date of activity;
 2. Type of activity performed;
 3. A list of the equipment involved;
 4. The results of the activity;
 5. The name of the individual that conducted the activity;
 6. The repair or maintenance (if applicable) that was performed.

- A. Have two independent physical controls that form tangible barriers to secure the material from unauthorized removal when the device is not under direct control and constant surveillance by the licensee; and
- B. For devices in or on a vehicle or trailer, unless the health and safety requirements for a site prohibit the disabling of the vehicle, the licensee shall utilize a method to disable the vehicle or trailer when not under direct control and constant surveillance by the licensee. Licensees shall not rely on the removal of an ignition key to meet this requirement.

R9-7-1955. Security Program Review

- A. Each licensee shall be responsible for the continuing effectiveness of the security program. Each licensee shall ensure that the security program is reviewed to confirm compliance with the requirements of this Article and that comprehensive actions are taken to correct any noncompliance that is identified. The review shall include the radioactive material security program content and implementation. Each licensee shall periodically (at least annually) review the security program content and implementation.
- B. The results of the review, along with any recommendations, shall be documented. Each review report shall identify conditions that are adverse to the proper performance of the security program, the cause of the condition(s), and, when appropriate, recommend corrective actions, and corrective actions taken. The licensee shall review the findings and take any additional corrective actions necessary to preclude repetition of the condition, including reassessment of the deficient areas where indicated.
- C. The licensee shall maintain the review documentation for 3 years.

R9-7-1957. Reporting of Events

- A. The licensee shall immediately notify the LLEA after determining that an unauthorized entry resulted in an actual or attempted theft, sabotage, or diversion of a category 1 or category 2 quantity of radioactive material. As soon as possible

after initiating a response, but not at the expense of causing delay or interfering with the LLEA response to the event, the licensee shall notify the Department. Notification shall be to a live person, a voice mail is not considered adequate notification. In no case shall the notification to the Department be later than 4 hours after the discovery of any attempted or actual theft, sabotage, or diversion.

- B. The licensee shall assess any suspicious activity related to possible theft, sabotage, or diversion of category 1 or category 2 quantities of radioactive material and notify the LLEA as appropriate. As soon as possible but not later than 4 hours after notifying the LLEA, the licensee shall notify the Department.
- C. The initial telephonic notification required by subsection (A) shall be followed within a period of 30 days by a written report submitted to the Department by an appropriate method listed in R9-7-1907. The report shall include sufficient information for Department analysis and evaluation, including identification of any necessary corrective actions to prevent future instances.

R9-7-1971. Additional Requirements for Transfer of Category 1 and Category 2 Quantities of Radioactive Material

A licensee transferring a category 1 or category 2 quantity of radioactive material to a licensee of the Department, the NRC, or an Agreement State shall meet the license verification provisions listed below instead of those listed in sections of this chapter:

1. Any licensee transferring category 1 quantities of radioactive material to a licensee of the Department, the NRC, or an Agreement State, prior to conducting such transfer, shall verify with the Department's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred and that the licensee is authorized to receive radioactive material at the location requested for delivery. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.
2. Any licensee transferring category 2 quantities of radioactive material to a licensee of the Department, the NRC, or an Agreement State, prior to conducting such transfer, shall verify with the Department's license verification system or the license issuing authority that the transferee's license authorizes the receipt of the type, form, and quantity of radioactive material to be transferred. If the verification is conducted by contacting the license issuing authority, the transferor shall document the verification. For transfers within the same organization, the licensee does not need to verify the transfer.
3. In an emergency where the licensee cannot reach the license issuing authority and the license verification system is nonfunctional, the licensee may accept a written certification by the transferee that it is authorized by license to receive the type, form, and quantity of radioactive material to be transferred. The certification shall include the license number, current revision number, issuing agency, expiration date, and for a category 1 shipment the authorized address. The licensee shall keep a copy of the certification. The certification shall be confirmed by use of the NRC's license verification system or by con-

tacting the license issuing authority by the end of the next business day.

4. The transferor shall keep a copy of the verification documentation as a record for 3 years.

R9-7-1973. Applicability of Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material During Transit

- A. For shipments of category 1 quantities of radioactive material, each shipping licensee shall comply with the requirements for physical protection contained in Sections R9-7-1975(A) and (E); R9-7-1977; R9-7-1979(A)(1), (B)(1), and (C); and R9-7-1981(A), (C), (E), (G) and (H).
- B. For shipments of category 2 quantities of radioactive material, each shipping licensee shall comply with the requirements for physical protection contained in R9-7-1975(B) through (E); R9-7-1979(A)(2), (A)(3), (B)(2), and (C); and R9-7-1981(B), (D), (F), (G), and (H). For those shipments of category 2 quantities of radioactive material that meet the criteria of Article 15 of this Chapter, the shipping licensee shall also comply with the advance notification provisions of R9-7-1508 or R9-7-1512 as appropriate.
- C. The shipping licensee shall be responsible for meeting the requirements of R9-7-1971 through R9-7-1981 unless the receiving licensee has agreed in writing to arrange for the in-transit physical protection required under R9-7-1971 through R9-7-1981.
- D. Each licensee that imports or exports category 1 quantities of radioactive material shall comply with the requirements for physical protection during transit contained in R9-7-1975(A)(2) and (E); R9-7-1977; R9-7-1979(A)(1), (B)(1), and (C); and R9-7-1981(A), (C), (E), (G), and (H) for the domestic portion of the shipment.
- E. Each licensee that imports or exports category 2 quantities of radioactive material shall comply with the requirements for physical protection during transit contained in R9-7-1979(A)(2), (A)(3), and (B)(2); and R9-7-1981(B), (D), (F), (G), and (H) for the domestic portion of the shipment.

- A. Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 1 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall:
 1. Preplan and coordinate shipment arrival and departure times with the receiving licensee;
 2. Preplan and coordinate shipment information with the governor or the governor's designee of any State through which the shipment will pass to:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

- a. Discuss the State's intention to provide law enforcement escorts; and
 - b. Identify safe havens; and
- 3. Document the preplanning and coordination activities.
- B.** Each licensee that plans to transport, or deliver to a carrier for transport, licensed material that is a category 2 quantity of radioactive material outside the confines of the licensee's facility or other place of use or storage shall coordinate the shipment no-later-than arrival time and the expected shipment arrival with the receiving licensee. The licensee shall document the coordination activities.
- C.** Each licensee who receives a shipment of a category 2 quantity of radioactive material shall confirm receipt of the shipment with the originator. If the shipment has not arrived by the no-later-than arrival time, the receiving licensee shall notify the originator.
- D.** Each licensee, who transports or plans to transport a shipment of a category 2 quantity of radioactive material, and determines that the shipment will arrive after the no-later-than arrival time provided pursuant to paragraph (B), shall promptly notify the receiving licensee of the new no-later-than arrival time.
- E.** The licensee shall retain a copy of the documentation for preplanning and coordination and any revision thereof, as a record for 3 years.

R9-7-1977. Advance Notification of Shipment of Category 1 Quantities of Radioactive Material

Each licensee shall provide advance notification to the Department and the governor of a State, or the governor's designee, of the shipment of licensed material in a category 1 quantity, through or across the boundary of the State, before the transport, or delivery to a carrier for transport of the licensed material outside the confines of the licensee's facility or other place of use or storage.

- 1. Procedures for submitting advance notification:
 - a. The notification shall be made to the Department and to the office of each appropriate governor or governor's designee. The contact information, including telephone and mailing addresses, of governors and governors' designees and participating Tribes is available on the NRC's website at <https://scp.nrc.gov/special/designee.pdf>. A list of the contact information is also available upon request from the Director, Division of Material Safety, Security, State, and Tribal Programs, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. The notification to the Department may be made by email to ram@azdhs.gov or by fax to (602) 437-0705.
 - b. A notification delivered by mail shall be postmarked at least 7 days before transport of the shipment commences at the shipping facility.
 - c. A notification delivered by any means other than mail shall reach the Department at least 4 days before the transport of the shipment commences and shall reach the office of the governor or the gover-

nor's designee at least 4 days before transport of a shipment within or through the State.

- 2. Information to be furnished in advance notification of shipment: Each advance notification of shipment of category 1 quantities of radioactive material shall contain the following information, if available at the time of notification:
 - a. The name, address, and telephone number of the shipper, carrier, and receiver of the category 1 radioactive material;
 - b. The license numbers of the shipper and receiver;
 - c. A description of the radioactive material contained in the shipment, including the radionuclides and quantity;
 - d. The point of origin of the shipment and the estimated time and date that shipment will commence;
 - e. The estimated time and date that the shipment is expected to enter each State along the route;
 - f. The estimated time and date of arrival of the shipment at the destination; and
 - g. A point of contact, with a telephone number, for current shipment information.
- 3. Revision notice:
 - a. The licensee shall provide any information not previously available at the time of the initial notification, as soon as the information becomes available but not later than commencement of the shipment, to the governor of the State or the governor's designee and to the Department at the contact information available in R9-7-1907.
 - b. A licensee shall promptly notify the governor of the state or the governor's designee of any changes to the information provided in accordance with subsections (B) and (C)(1). The licensee shall also immediately notify the Department at the contact information available in R9-7-1907 of any such changes.
- 4. Cancellation notice: Each licensee who cancels a shipment for which advance notification has been sent shall send a cancellation notice to the governor of each State or to the governor's designee previously notified and to the Department Director at the contact information available in R9-7-1907. The licensee shall send the cancellation notice before the shipment would have commenced or as soon thereafter as possible. The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being cancelled.
- 5. Records: The licensee shall retain a copy of the advance notification and any revision and cancellation notices as a record for 3 years.
- 6. Protection of information: State officials, State employees, and other individuals, whether or not licensees of the Department, the NRC, or an Agreement State, who receive schedule information of the kind specified in this Section shall protect that information against unauthorized disclosure as specified in R9-7-1943(D) of this Article.

R9-7-1979. Requirements for Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material During Shipment

A. Shipments by road:

1. Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:
 - a. Ensure that movement control centers are established that maintain position information from a remote location. These control centers shall monitor shipments 24 hours a day, 7 days a week, and have the ability to communicate immediately, in an emergency, with the appropriate law enforcement agencies.
 - b. Ensure that redundant communications are established that allow the transport to contact the escort vehicle (when used) and movement control center at all times. Redundant communications may not be subject to the same interference factors as the primary communication.
 - c. Ensure that shipments are continuously and actively monitored by a telemetric position monitoring system or an alternative tracking system reporting to a movement control center. A movement control center shall provide positive confirmation of the location, status, and control over the shipment. The movement control center shall be prepared to promptly implement preplanned procedures in response to deviations from the authorized route or a notification of actual, attempted, or suspicious activities related to the theft, loss, or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.
 - d. Provide an individual to accompany the driver for those highway shipments with a driving time period greater than the maximum number of allowable hours of service in a 24-hour duty day as established by the Department of Transportation Federal Motor Carrier Safety Administration. The accompanying individual may be another driver.
 - e. Develop written normal and contingency procedures to address:
 - i. Notifications to the communication center and law enforcement agencies;
 - ii. Communication protocols. Communication protocols shall include a strategy for the use of authentication codes and duress codes and provisions for refueling or other stops, detours, and locations where communication is expected to be temporarily lost;
 - iii. Loss of communications; and
 - iv. Responses to an actual or attempted theft or diversion of a shipment.
 - f. Each licensee who makes arrangements for the shipment of category 1 quantities of radioactive material shall ensure that drivers, accompanying personnel, and movement control center personnel have access to the normal and contingency procedures.
2. Each licensee that transports category 2 quantities of radioactive material shall maintain constant control and/or surveillance during transit and have the capability for

immediate communication to summon appropriate response or assistance.

3. Each licensee who delivers to a carrier for transport, in a single shipment, a category 2 quantity of radioactive material shall:

- a. Use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system shall allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control.
- b. Use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and
- c. Use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.

B. Shipments by rail:

1. Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 1 quantity of radioactive material shall:
 - a. Ensure that rail shipments are monitored by a telemetric position monitoring system or an alternative tracking system reporting to the licensee, third-party, or railroad communications center. The communications center shall provide positive confirmation of the location of the shipment and its status. The communications center shall implement preplanned procedures in response to deviations from the authorized route or to a notification of actual, attempted, or suspicious activities related to the theft or diversion of a shipment. These procedures will include, but not be limited to, the identification of and contact information for the appropriate LLEA along the shipment route.
 - b. Ensure that periodic reports to the communications center are made at preset intervals.
 2. Each licensee who transports, or delivers to a carrier for transport, in a single shipment, a category 2 quantity of radioactive material shall:
 - a. Use carriers that have established package tracking systems. An established package tracking system is a documented, proven, and reliable system routinely used to transport objects of value. In order for a package tracking system to maintain constant control and/or surveillance, the package tracking system shall allow the shipper or transporter to identify when and where the package was last and when it should arrive at the next point of control.
 - b. Use carriers that maintain constant control and/or surveillance during transit and have the capability for immediate communication to summon appropriate response or assistance; and
 - c. Use carriers that have established tracking systems that require an authorized signature prior to releasing the package for delivery or return.
- C. Investigations:** Each licensee who makes arrangements for the shipment of category 1 quantities of radioactive material shall immediately conduct an investigation upon the discovery that a category 1 shipment is lost or missing. Each licensee who makes arrangements for the shipment of category 2 quantities of radioactive material shall immediately conduct an investi-

gation, in coordination with the receiving licensee, of any shipment that has not arrived by the designated no-later-than arrival time.

R9-7-1981. Reporting of Events

- A. Within one hour of its determination that a shipment of category 1 quantities of radioactive material is lost or missing, a shipping licensee shall notify the appropriate LLEA and the Department. The Department shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212. The appropriate LLEA is the law enforcement agency in the area of the shipment's last confirmed location. During the investigation required by R9-7-1979(C), the shipping licensee shall provide agreed upon updates to the Department on the status of the investigation.
- B. Within four (4) hours of its determination that a shipment of category 2 quantities of radioactive material is lost or missing, a shipping licensee shall notify the appropriate LLEA and the Department. The Department shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212. If, after 24 hours of its determination that the shipment is lost or missing, the radioactive material has not been located and secured, the licensee shall immediately notify the Department.
- C. The shipping licensee shall notify the designated LLEA along the shipment route as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment or suspicious activities related to the theft or diversion of a shipment of a category 1 quantity of radioactive material. As soon as possible after notifying the LLEA, the licensee shall notify the Department upon discovery of any actual or attempted theft or diversion of a shipment, or any suspicious activity related to the shipment of category 1 radioactive material. The Department shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212.
- D. The shipping licensee shall notify the Department as soon as possible upon discovery of any actual or attempted theft or diversion of a shipment, or any suspicious activity related to the shipment, of a category 2 quantity of radioactive material. The Department shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212.
- E. The shipping licensee shall notify the Department and the LLEA as soon as possible upon recovery of any lost or missing category 1 quantities of radioactive material. The Agency shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212.
- F. The shipping licensee shall notify the Department as soon as possible upon recovery of any lost or missing category 2 quantities of radioactive material. The Department shall be notified by calling (602) 255-4845 during business hours, or by calling the after-hours emergency Department of Public Safety dispatch line, at (602) 223-2212.

- G. The initial telephonic notification required by subsections (A) through (D) shall be followed within a period of 30 days by a written report submitted to the Department by an appropriate method listed in R9-7-1907. A written report is not required for notifications on suspicious activities required by subsections (C) and (D). The report shall set forth the following information:

1. A description of the licensed material involved, including kind, quantity, and chemical and physical form;
2. A description of the circumstances under which the loss or theft occurred;
3. A statement of disposition, or probable disposition, of the licensed material involved;
4. Actions that have been taken, or will be taken, to recover the material; and
5. Procedures or measures that have been, or will be, adopted to ensure against a recurrence of the loss or theft of licensed material.

- H. Subsequent to filing the written report, the licensee shall also report any additional substantive information on the loss or theft within 30 days after the licensee learns of such information.

Section R9-7-19106 reserved when the Chapter was recodified from 12 A.A.C. 1 (Supp. 18-1).

R9-7-19107. Violations

- A. The Department may obtain an injunction or other court order to prevent a violation of the provisions of:
1. A.R.S. § 30-685, as amended;
 2. A.A.C. Title 9, Chapter 7; or
 3. A rule or order issued by the Department pursuant to Statute or the rules under A.A.C. Title 9, Chapter 7.
- B. The Department may obtain a court order for the payment of a civil penalty imposed under A.R.S. § 30-687, as amended:

CHAPTER 7. DEPARTMENT OF HEALTH SERVICES - RADIATION CONTROL

1. For violations of:
 - a. The rules in A.A.C. Title 9, Chapter 7, as amended;
 - b. Nonpayment of fees listed in A.A.C. Title 9, Chapter 7, Article 13;
 - c. Any rule, or order issued pursuant to the sections specified in subsection (B)(1)(a);
 - d. Any term, condition, or limitation of any license issued under the sections specified in subsection (B)(1)(a).
2. For any violation for which a license may be revoked.

Ytterbium-169	300	8,100	3	81.0

Note: Calculations Concerning Multiple Sources or Multiple Radionuclides

The “sum of fractions” methodology for evaluating combinations of multiple sources or multiple radionuclides is to be used in determining whether a location meets or exceeds the threshold and is thus subject to the requirements of this part.

1. If multiple sources of the same radionuclide and/or multiple radionuclides are aggregated at a location, the sum of the ratios of the total activity of each of the radionuclides shall be determined to verify whether the activity at the location is less than the category 1 or category 2 thresholds of Table 1, as appropriate. If the calculated sum of the ratios, using the equation below, is greater than or equal to 1.0, then the applicable requirements of this part apply.
2. First determine the total activity for each radionuclide from Table 1. This is done by roadding the activity of each individual source, material in any device, and any loose or bulk material that contains the radionuclide. Then use the equation below to calculate the sum of the ratios by inserting the total activity of the applicable radionuclides from Table 1 in the numerator of the equation and the corresponding threshold activity from Table 1 in the denominator of the equation.

Calculations shall be performed in metric values (i.e., TBq) and the numerator and denominator values shall be in the same units.

R1 = total activity for radionuclide 1

R2 = total activity for radionuclide 2

RN = total activity for radionuclide n

AR1 = activity threshold for radionuclide 1

AR2 = activity threshold for radionuclide 2

ARN = activity threshold for radionuclide n

$$\sum_{i=1}^n \left[\frac{R1}{AR1} + \frac{R2}{AR2} + \frac{Rn}{ARN} \right] \geq 1.0$$

The release of this Chapter in Supp. 21-2 replaces Supp. 20-3, 1-41 pages

Please note that the Chapter you are about to replace may have rules still in effect after the publication date of this supplement. Therefore, all superseded material should be retained in a separate binder and archived for future reference.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2019 is cited as Supp. 19-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority

note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State’s website, under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, managing rules editor, assisted with the editing of this chapter.

Administrative Rules Division

The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

 - ii. A license renewal;

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

- b. May make one written comprehensive request for additional information or documentation; and
 - c. May make supplemental requests for additional information and documentation if agreed to by the applicant or license holder.
7. If a REGULATORY AUTHORITY provides a written comprehensive request for additional information or documentation or a supplemental request to an applicant or license holder:
- a. The substantive review time-frame and overall time-frame are suspended from the date of the written comprehensive request or supplemental request until the date the REGULATORY AUTHORITY receives the information and documents requested; and
 - b. An applicant or license holder shall submit the information and documents listed in the written comprehensive request in a format provided by the REGULATORY AUTHORITY within 15 calendar days after the date of the written comprehensive request or supplemental request.
8. The REGULATORY AUTHORITY shall issue to an applicant or license holder, as applicable:
- a. An approval for:
 - i. An application, or
 - ii. A license renewal; or
 - b. A denial, including the reason for the denial and the appeal process in A.R.S. Title 41, Chapter 6, Article 10, if an applicant or license holder:
 - i. Does not submit all of the information and documentation listed in a written comprehensive request or supplemental request for additional information or documentation; or
 - ii. Does not comply with A.R.S. § 36-136 and this Article.
- F. In FC Part 8-4, the Department:
- 1. In Section 8-402.11 requires “The REGULATORY AUTHORITY to comply with A.R.S. § 41-1009 when performing inspections.”
 - 2. Does not accept requirements in:
 - a. Section 8-402.20, Refusal, Notification of Right to Access, and Final Request for Access;
 - b. Section 8-402.30, Refusal, Reporting;
 - c. Section 8-402.40, Inspection Order to Gain Access; and
 - d. Section 8-403.10, Documenting Information and Observation.
 - 3. In Section 8-403.50 requires “A REGULATORY AUTHORITY treat the inspection report as a public document and shall make it available for disclosure to a PERSON who requests it as provided in LAW.”
 - 4. In Section 8-404.12 requires “A REGULATORY AUTHORITY approve or deny resumption of operations within five days after receipt of the license holder’s request to resume operations.”

Section amended by final expedited rulemaking at 24 A.A.R. 263, effective January 10, 2018 (Supp. 18-1).

R9-8-204. Time-frames

- A. The overall time-frame described in A.R.S. § 41-1072 for the Department to act on an application for an approval of a source is 60 days. The applicant and the Department may agree in writing to extend the substantive review time-frame and the overall time-frame by no more than 25% of the overall time-frame.
- B. The administrative completeness review time-frame described in A.R.S. § 41-1072 for an application for an approval of a

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

source is 30 days and begins on the date the application is received.

1. The Department shall mail notice of administrative completeness or deficiencies to the applicant within the administrative completeness review time-frame.
 - a. A notice of deficiencies shall list each deficiency and the information and documentation needed to complete the application.
 - b. If the Department issues a notice of deficiencies within the administrative completeness review time-frame, the administrative completeness review time-frame and the overall time-frame are suspended from the date that the notice is issued until the date the Department receives the missing information from the applicant.
 - c. If the applicant fails to submit to the Department all the information and documents listed in the notice of deficiencies within 60 days of the date the Department mailed the notice of deficiencies, the Department deems the application for approval of a source withdrawn.
2. If the Department issues an approval of a source to the applicant during the administrative completeness review time-frame, the Department does not issue a separate written notice of administrative completeness.
- C. The substantive review time-frame described in A.R.S. § 41-1072 is 30 days and begins on the date the notice of administrative completeness is mailed to the applicant.
 1. The Department shall mail an approval of a source or a written notification of denial of approval to the applicant within the substantive review time-frame.
 2. If the Department issues a comprehensive written request or supplemental request for information, the substantive review time-frame and the overall time-frame are suspended from the date the Department issues the request until the date the Department receives all of the information.
 3. If the Department denies approval of a source, the Department shall send the applicant a written notice of disapproval that lists the reasons for disapproval and all other information required in A.R.S. § 41-1076.
- D. If a time-frame's last day is on a Saturday, Sunday, or legal holiday, the Department considers the next business day as the time-frame's last day.

Historical Note

Adopted effective August 6, 1990 (Supp. 90-3). Section repealed; new Section made by final rulemaking at 10 A.A.R. 4178, effective November 23, 2004 (Supp. 04-3).

R9-8-205. Quality Testing Requirements

- A. To maintain approval of its source, a plant operator shall have a licensed laboratory test the quality of the bottled water at the times stated in 21 CFR 129.80(g) (2016), incorporated by reference, on file with the Department, including no future editions or amendments, and available from the U.S. Government Printing Office, 732 N. Capitol Street, N.W. Washington, D.C. 20401-001.
- B. A plant operator shall maintain records of the quality testing of the bottled water on the bottled water plant premises for two years from the date the bottled water is tested and ensure that the records are readily available for inspection by the Department.

Historical Note

Adopted effective August 6, 1990 (Supp. 90-3). Section repealed; new Section made by final rulemaking at 10 A.A.R. 4178, effective November 23, 2004 (Supp. 04-3).

R9-8-303. Public Portable Toilet Requirements

- A. A responsible person or the responsible person's designee shall ensure that:
 - 1. A public portable toilet:
 - a. Is clean;
 - b. Is sanitary;
 - c. Is maintained to avoid odors and insect or vermin infestation;
 - d. Has a non-absorbent, durable, smooth, leakproof, and rustproof floor, wall, ceiling, and door materials;
 - e. Has a vent pipe connected to a sewage storage tank that:
 - i. Is wide enough in diameter to prevent the build up of gasses, and
 - ii. Extends upwards from the sewage storage tank through the roof of the portable toilet enclosure;
 - f. Has a supply of toilet paper that is replenished before running out; and
 - g. Has a self-closing door and privacy latch on the door;
 - 2. Except as provided in subsection (B), one public portable toilet is deployed for the first 100 individuals using or expected to use public portable toilet facilities and one additional public portable toilet is deployed for each additional 100 individuals;
 - 3. Each public portable toilet's sewage storage tank is pumped out on a regular basis to keep the public portable toilet operating as designed;
 - 4. Facilities for washing or sanitizing hands are provided as follows:
 - a. Except as provided in subsection (B), working portable hand-wash stations are deployed at a minimum rate of one per 10 public portable toilets;
 - b. Soap, water, and single use towels are continuously provided at each portable hand-wash station; and
 - c. Where conditions make the use of soap and water impractical, the regulatory authority may allow sanitizing gel in place of soap and water; and
 - 5. Public portable toilets are located a minimum of 100 feet from any food establishment.
- B. A responsible person or the responsible person's designee shall ensure that sewage, human excreta, and refuse produced in a public portable toilet:
 - 1. Does not create a public nuisance; and
 - 2. Is disposed of according to 18 A.A.C. 13, Article 3 or 18 A.A.C. 13, Article 11.
- C. The regulatory authority may adjust the number of public portable toilets required in subsection (A)(2) and portable hand-wash stations required in (A)(5)(a) provided based on the estimated number of users, the duration of use, and the availability of public restrooms within 200 feet of the public portable toilet.

7. "Department" means the Arizona Department of Health Services.

8. "Food establishment" has the same meaning as in 9 A.A.C. 8, Article 1.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3716, effective August 9, 2002 (Supp. 02-3). Section amended by final expedited rulemaking at 24 A.A.R. 266, effective January 10, 2018 (Supp. 18-1).

R9-8-402. Initial and Renewal License Application Process

- A. An applicant shall submit a completed license application form in subsection (B) to:
 1. The county in which the children's camp is located, if the county has a delegation agreement with the Department under A.R.S. § 36-3915; or
 2. The Department, if there is no delegation agreement.
- B. An applicant shall submit a completed license application form provided by the Department or a county that contains:
 1. The name, mailing address, and telephone number of the children's camp;
 2. The county in which the children's camp is located;
 3. The name, telephone number, and mailing address of the applicant;
 4. The name, telephone number, and if applicable, e-mail address of the camp director;
 5. The dates of operation of the children's camp;
 6. The number of individuals the children's camp can accommodate;
 7. Whether there is a food establishment in the children's camp;
 8. Whether there is a bathing place in the children's camp;
 9. The potable water supply source at the children's camp;
 10. The type of sewage disposal system;
 11. Whether the application is for an initial or a renewal license; and
 12. The signature of the applicant.
- C. With the completed license application, an applicant shall include a map that specifies the location of the children's camp, and:
 1. For an initial license:
 - a. If applying to the Department, a fee of \$100, or
 - b. If applying to a county, a fee established according to A.R.S. § 36-3903.
 2. For a renewal license:
 - a. If applying to the Department, a fee of \$25 or
 - b. If applying to a county, a fee established according to A.R.S. § 36-3903.
- D. The Department or a county begins reviewing applications on May 1 of each year.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3716, effective August 9, 2002 (Supp. 02-3). Section amended by final expedited rulemaking at 24 A.A.R. 266, effective January 10, 2018 (Supp. 18-1).

R9-8-403. Time-frames

- A. The overall time-frame described in A.R.S. § 41-1072 for an initial or a renewal license granted by the Department or county is 60 days. The applicant and the Department or a county may agree in writing to extend the substantive review time-frame and the overall time-frame. An extension of the substantive time-frame and the overall time-frame shall not exceed 25% of the overall time-frame.
- B. The administrative completeness review time-frame described in A.R.S. § 41-1072 for an initial or a renewal license granted by the Department or a county is 30 days and begins on May 1

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

of each year or on the date the application is received if after May 1.

1. The Department or a county shall mail notice of administrative completeness or deficiencies to the applicant within the administrative completeness review time-frame.
 - a. A notice of deficiencies shall list each deficiency and the information and documentation needed to complete the license application.
 - b. If the Department or a county issues a notice of deficiencies within the administrative completeness review time-frame, the administrative completeness review time-frame and the overall time-frame are suspended from the date that the notice is issued until the date the Department or a county receives the missing information from the applicant.
 - c. If the applicant fails to submit to the Department or a county all the information and documents listed in the notice of deficiencies within 60 days of the date the Department or a county mailed the notice of deficiencies, the Department or county deems the license application withdrawn.
 2. If the Department or a county issues a license to the applicant during the administrative completeness review time-frame, the Department or a county does not issue a separate written notice of administrative completeness.
- C. The substantive review time-frame described in A.R.S. § 41-1072 is 30 days and begins on the date the notice of administrative completeness is mailed to the applicant.
1. The Department or a county shall mail a children's camp license or a written notification of denial of the license application to the applicant within the substantive review time-frame.
 2. As part of the substantive-review time-frame for a children's camp license, the Department or a county may conduct an inspection of the children's camp to determine whether the children's camp has complied with the applicable requirements in subsection (C)(4) or (C)(5).
 3. If the Department or a county issues a comprehensive written request or supplemental request for information, the substantive review time-frame and the overall time-frame are suspended from the date the Department or a county issues the request until the date the Department or a county receives all of the information.
 4. If an applicant applying to the Department meets all the requirements under A.R.S. Title 8, Chapter 6, Article 1, and these rules, the Department shall issue a license to the applicant.
 5. If an applicant applying to a county meets all the requirements under A.R.S. Title 8, Chapter 6, Article 1, these rules, and county requirements consistent with A.R.S. Title 8, Chapter 6, Article 1, a county shall issue a license to the applicant.
 6. If the Department or a county disapproves a license application, the Department or a county shall send the applicant a written notice of disapproval setting forth the reasons for disapproval and all other information required in A.R.S. § 41-1076.
- D. If a time-frame's last day is on a Saturday, Sunday, or legal holiday, the Department or a county considers the next business day as the time-frame's last day.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3716, effective August 9, 2002 (Supp. 02-3).

 48. "Shower head" means a fixture connected to a plumbing system that allows drinking water to fall on a user's body.
 49. "Shower room" means a structure or room that contains at least one shower head and one floor drain, but does not contain a bathtub, lavatory, water closet, or urinal.
 50. "Underground water source" means:
 - a. An aquifer,
 - b. A constructed underground storage facility, or
 - c. A managed underground storage facility.
 51. "Urinal" means the same as in A.R.S. § 45-311.
 52. "Warm water" means water with a temperature from 75° F to 94° F.
 53. "Water closet" means the same as in A.R.S. § 45-311.
 54. "Water cooler" means a fixture connected to a plumbing system for cooling water and dispensing a vertically falling stream of drinking water.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-702. General Provisions

- A. A responsible person shall ensure that a school complies with the provisions of this Article and with federal and state statutes and rules and local ordinances governing subjects included in A.R.S. § 36-136(H)(9).
- B. A violation of this Article is a public nuisance under A.R.S. § 36-601.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-703. Restroom, Bathroom, and Shower Room Requirements

- A. A responsible person shall ensure that a school provides restrooms or bathrooms that:
 1. Are clean; and
 2. Have:
 - a. Floors of a non-absorbent material;
 - b. Floors that slope to a drain connected to a sanitary sewer;
 - c. Water closets with seats of the split or U-shaped type made of non-absorbent material;
 - d. Interior surfaces that are clean, washable, and free from gaps;
 - e. Toilet paper at all water closets; and
 - f. Soap and single-use paper towels or air hand dryers at all lavatories.
- B. If a school provides a shower room, the responsible person shall ensure that the shower room:
 1. Is clean;
 2. Does not have a school-provided cloth towel unless, after each use, the cloth towel is machine washed with detergent and machine dried; and
 3. Has:
 - a. Hot and cold, or warm water from all shower heads;
 - b. Floors of a non-absorbent material;
 - c. Floors that slope to a drain connected to a sanitary sewer; and
 - d. Interior surfaces that are clean, washable, and free of gaps.
- C. A responsible person shall ensure that restrooms, bathrooms, and shower rooms are maintained to avoid odors.

R9-8-704. Cafeterias and Food Service

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

- A. A responsible person for a school that stores, prepares, or serves food on the premises shall ensure that the school complies with 9 A.A.C. 8, Article 1, except when the food is brought to the school by staff or a student for personal consumption.
- B. If a school contracts with a food establishment to prepare and deliver food to the school, the responsible person shall:
1. Ensure that the food establishment has a current license or permit issued under 9 A.A.C. 8, Article 1; and
 2. Retain a copy of the food establishment's current license or permit, required in subsection (B)(1), for inspection.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-705. Indoor Areas

A responsible person shall ensure that:

1. Indoor classroom and non-classroom areas are clean; and
2. If a classroom has a lavatory in it, the lavatory has soap and single-use paper towels or air hand dryers.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-706. Water Supply

- A. A responsible person shall ensure that a school has an ample water supply.
- B. A responsible person shall ensure that a school's drinking water is dispensed from:
1. A clean drinking fountain that:
 - a. Provides, from an opening, a stream of water that does not touch anything before reaching a user's mouth;
 - b. Has an opening that is higher than the overflow rim to prevent the opening's submersion; and
 - c. Has a device to prevent a user's mouth from touching the opening from which the water streams;
 2. A clean and sanitized water cooler;
 3. A clean and sanitized bottled water cooler;
 4. A clean and sanitized lavatory faucet; or
 5. A clean and sanitized portable water container.
- C. If a portable water container or the bottle from a school's bottled water cooler is to be refilled, a responsible person shall ensure that the portable water container or the bottle is:
1. Washed, rinsed, and sanitized, as specified in 9 A.A.C. 8, Article 1;
 2. Stored in a clean area; and
 3. Refilled with drinking water from any of the sources of drinking water specified in subsection (B).
- D. A responsible person shall ensure that a school does not provide a common drinking cup unless the common drinking cup is washed, rinsed, and sanitized, as specified in 9 A.A.C. 8, Article 1, after each use.
- E. A responsible person shall ensure that a school provides:
1. Drinking fountains, water coolers, or bottled water coolers according to Tables 1 and 2; and
 2. At least one drinking fountain, water cooler, or bottled water cooler on each floor of the school that contains a classroom, regardless of the number of students.

Table 1. Kindergarten to Eighth Grade

301-400	4
401-500*	5

* For each additional 1-100 students, another drinking fountain, water cooler, or bottled water cooler is required.

- F. A responsible person shall ensure a school provides drinking water that is:
1. Accessible from the school grounds; and
 2. Sufficient to maintain the hydration of all participants at school-organized outdoor activities.

Historical Note

New Section, including Tables 1 and 2, made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-707. Sewage Disposal

A responsible person shall ensure that a school's:

1. Water closets and urinals flush sewage to a sanitary sewer;
2. Lavatories, showers, bathtubs, and other plumbing fixtures drain sewage to a sanitary sewer; and
3. Sanitary sewer lines are maintained in accordance with the recommendations of the local health department.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-708. Refuse Management

A responsible person shall ensure that a school:

1. Stores refuse in durable, non-absorbent, and washable containers;
2. Provides:
 - a. Indoor refuse containers in each classroom and in each non-classroom area; and
 - b. Accessible outdoor refuse containers;
3. Maintains refuse containers so that refuse does not accumulate in school buildings or on school grounds; and
4. Disposes of refuse according to 18 A.A.C. 13, Article 3.

Historical Note

New Section made by final rulemaking at 12 A.A.R. 282, effective March 11, 2006 (Supp. 06-1).

R9-8-709. Animal Standards

- A. A responsible person shall ensure that an animal in a school:

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

1. Is kept in a habitat that:
 - a. Has water free of algae, insects, and particulate matter;
 - b. Is maintained to avoid odors from rotting food or excess animal wastes; and
 - c. Is not in the same room as food preparation areas, as specified in 9 A.A.C. 8, Article 1;
 2. May be removed from the animal's habitat at the direction of a teacher;
 3. When out of the animal's habitat, is under the control of a teacher or a student of the school, if the animal is:
 - a. A bird, reptile, amphibian, or invertebrate;
 - b. A large mammal, such as a horse, sheep, pig, goat, or cow;
 - c. A rabbit or hare; or
 - d. A rodent, such as a mouse, rat, hamster, guinea pig, or gerbil;
 4. Has a current immunization against rabies, if the animal is a dog, cat or ferret, as documented by:
 - a. A dog license issued by a state or county agency;
 - b. A rabies immunization certificate from a veterinarian licensed under 3 A.A.C. 11;
 - c. A receipt for veterinary services, showing the administration of a rabies vaccine; or
 - d. A written statement attesting to the current immunization of the animal against rabies; and
 5. Is not:
 - a. A non-human primate;
 - b. A deer mouse, or other wild mouse of the genus *Peromyscus*; and
 - c. A bat, skunk, raccoon, fox, wolf-hybrid or coyote, except when brought into a classroom for an educational display, as defined in R12-4-401, by a person who has complied with provisions in 12 A.A.C. 4, Article 4, obtained a permit or license issued by the Arizona Game and Fish Department, and is experienced in handling the animal.
- B.** A responsible person shall ensure that a room, in which an animal in a school is kept:
1. Is free of animal waste, except in the habitat; and
 2. Has:
 - a. A lavatory with soap and single-use paper towels or air hand dryers; or
 - b. A product to sanitize the hands of an individual who touches an animal or its habitat.

38. "Water contact recreation" means an activity for enjoyment in which an individual wets all or part of the individual's body with water.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-802. Applicability

This Article does not apply to:

1. A private residential swimming pool,
2. A private residential spa,
3. A bathing place used for medical treatment or physical therapy supervised by licensed medical personnel, or
4. A body of water that is not used as a bathing place.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-803. Public and Semipublic Swimming Pool and Spa**Water Quality and Disinfection Standards**

- A. An operator of a public or semipublic swimming pool or spa shall ensure that:
 1. The swimming pool or spa is filled only with potable water;
 2. The water in the swimming pool or spa:
 - a. Complies with the water quality standards in this Section when the swimming pool or spa is open for water contact recreation;
 - b. Maintains a pH of between 7.2 and 7.8;
 - c. Maintains a total alkalinity of between 60 and 100 ppm; and
 - d. Is sufficiently clear so that the main drain in the swimming pool or spa is visible from the deck of the swimming pool or spa;
 3. The surface of the water in the swimming pool or spa is free from scum and floating debris;
 4. The bottom and sides of the swimming pool or spa are free from sediment, dirt, slime, and algae;
 5. The chemical disinfection level, pH, total alkalinity, and temperature of the water is tested at least once daily; and
 6. A daily operating log that includes the results of the tests in subsection (A)(5) is maintained for 12 months from the date of the test and is available to a regulatory authority or a member of the public upon request.
- B. An operator of a public or semipublic swimming pool or spa:
 1. Shall not use chloramine as a primary disinfectant in the swimming pool or spa;
 2. Shall not add gaseous disinfectant directly into the swimming pool;
 3. Shall not add dry or liquid disinfectant directly into the swimming pool or spa for routine disinfection; and
 4. May add dry or liquid disinfectant directly into the swimming pool or spa for shock treatment.
- C. An operator of a public or semipublic swimming pool or spa using chlorinated isocyanurates or cyanuric acid stabilizer for disinfection and stabilization in the swimming pool or spa shall ensure that the water in the swimming pool or spa maintains an oxidation-reduction potential equal to or greater than 650 millivolts and that cyanuric acid levels, whether from chlorinated isocyanurates or from the separate addition of cyanuric acid stabilizer, do not exceed 150 ppm.
- D. An operator of a public or semipublic swimming pool shall ensure that the water in the swimming pool meets one of the following chemical disinfection standards:
 1. A free chlorine residual between 1.0 and 3.0 ppm as measured by the N, N-Diethyl-p-phenylenediamine test,
 2. A free bromine residual between 2.0 and 4.0 ppm as measured by the N, N-Diethyl-p-phenylenediamine test, or
 3. An oxidation-reduction potential equal to or greater than 650 millivolts.
- E. An operator of a public or semipublic spa shall ensure that:
 1. A chlorine gas disinfection system is not used in the spa;
 2. The water temperature in the spa does not exceed 40EC; and
 3. The water in the spa meets one of the following chemical disinfection standards:
 - a. A free chlorine residual between 3.0 and 5.0 ppm as measured by the N, N-Diethyl-p-phenylenediamine test,
 - b. A free bromine residual between 3.0 and 5.0 ppm as measured by the N, N-Diethyl-p-phenylenediamine test, or
 - c. An oxidation-reduction potential equal to or greater than 650 millivolts.

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-804. Public and Semipublic Swimming Pool and Spa Water Circulation Requirements

- A. An operator of a public or semipublic swimming pool or spa shall ensure that:
1. The swimming pool or spa water circulation system complies with the water circulation requirements in 18 A.A.C. 5, Article 2; and
 2. The swimming pool or spa is equipped with:
 - a. A flow meter as specified in 18 A.A.C. 5, Article 2; and
 - b. A vacuum cleaning system as specified in 18 A.A.C. 5, Article 2.
- B. An operator may draw water from a swimming pool for a water slide or a water fountain without filtering or disinfecting the water.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-805. Public and Semipublic Swimming Pool and Spa Maximum Bathing Loads

An operator of a public or semipublic swimming pool or spa shall ensure that the maximum bathing load, as specified in 18 A.A.C. 5, Article 2, is not exceeded.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-806. Posting Requirements

An operator of a public or semipublic swimming pool or spa shall ensure that a sign is posted within 50 feet of the swimming pool or spa, that includes the following instructions:

1. Use the toilet before entering the pool or spa;
2. Take a shower before entering the pool or spa;
3. Do not enter the pool with a cold, skin or other body infection, open wound, diarrhea, or any other contagious condition;
4. If incontinent, wear tight fitting rubber or plastic pants or a swim diaper; and
5. Observe all safety regulations.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-807. Public and Semipublic Swimming Pool and Spa and Bathing Place Facility Sanitation

- A. An operator of a public or semipublic swimming pool or spa shall ensure that a sanitary facility at the public or semipublic swimming pool is maintained in a clean condition.
- B. An operator of a public or semipublic swimming pool or bathing place shall provide a soap dispenser with liquid or powdered soap at each sink in a sanitary facility.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-808. Bathing Place Towels

If a towel is provided by a bathing place to an individual using the bathing place, an operator of the bathing place shall ensure that the towel is washed with soap or detergent and hot water and thoroughly dried after each individual use.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-809. Disposal of Sewage, Filter Backwash, and Wasted Swimming Pool or Spa Water

An operator of a public or semipublic swimming pool or spa shall ensure that sewage, filter backwash, and swimming pool or spa water are disposed of according to A.A.C. R18-5-236.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-810. Fecal Contamination in Public and Semipublic Swimming Pools and Spas

- A. If solid feces are found in a public or semipublic swimming pool or spa, an operator of the swimming pool or spa shall ensure that:
1. Each individual in the swimming pool or spa exits the swimming pool or spa and the swimming pool or spa is closed,
 2. The feces in the swimming pool or spa are removed and disposed of in a toilet,
 3. The chemical disinfection level of the water in the swimming pool or spa is tested to determine whether the water complies with the water quality and disinfection standards in R9-8-803, and
 4. The swimming pool or spa is not reopened until a test conducted under subsection (A)(3) indicates that the water complies with the water quality and disinfection standards in R9-8-803.
- B. If liquid feces are found in a public or semipublic swimming pool or spa, an operator of the swimming pool or spa shall ensure that:
1. Each individual in the swimming pool or spa exits the swimming pool or spa and the swimming pool or spa is closed;
 2. The swimming pool or spa is closed for at least 24 hours;
 3. As much of the liquid feces as possible in the swimming pool or spa is removed and disposed of in a toilet;
 4. The swimming pool or spa is chemically treated with a shock treatment;
 5. The water in the swimming pool or spa is tested 24 hours after applying the shock treatment to determine whether the water complies with the water quality and disinfection standards in R9-8-803; and
 6. The swimming pool or spa is not reopened until a test conducted under subsection (B)(5) indicates that the water complies with the water quality and disinfection standards in R9-8-803.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-811. Natural and Semi-artificial Bathing Place and Artificial Lake Water Quality Standards

An operator of a public or semipublic natural bathing place, a semi-artificial bathing place, or an artificial lake shall ensure that the public or semipublic natural bathing place, semi-artificial bathing place, or artificial lake meets the narrative and numeric water quality standards in 18 A.A.C. 11, Article 1 when the public or semipublic natural bathing place, semi-artificial bathing place, or artificial lake is open for water contact recreation.

CHAPTER 8. DEPARTMENT OF HEALTH SERVICES - FOOD, RECREATIONAL, AND INSTITUTIONAL SANITATION

at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-812. Inspections

- A. A regulatory authority shall inspect a bathing place to determine whether the bathing place complies with this Article.
- B. A regulatory authority shall inspect a public swimming pool at least once each month that the swimming pool is open for water contact recreation.

Historical Note

Section repealed; new Section made by final rulemaking at 8 A.A.R. 3645, effective August 9, 2002 (Supp. 02-3).

R9-8-813. Cease and Desist and Abatement

- A. Engaging in any practice in violation of this Article is a public nuisance.
- B. If a regulatory authority has reasonable cause to believe that an operator of a public or semipublic swimming pool or bathing place is creating or maintaining a public nuisance at the public or semipublic swimming pool or bathing place, the regulatory authority shall order the operator to discontinue the activity and to abate the public nuisance as follows:
 1. The regulatory authority shall serve on the operator a written cease and desist and abatement order requiring the operator to discontinue the activity and to remove the public nuisance at the operator's expense within 24 hours after service of the order. The order shall contain:
 - a. A reference to the statute or rule that is alleged to have been violated or on which the order is based,
 - b. A description of the operator's right to request a hearing, and
 - c. A description of the operator's right to request an informal settlement conference.
 2. The regulatory authority shall serve the order and any subsequent notices by personal delivery or certified mail, return receipt requested, to the operator or other party's last address of record with the regulatory authority or by any other method reasonably calculated to effect actual notice to the operator or other party.
 3. The operator or another party whose rights are determined by the order may obtain a hearing to appeal the order by filing a written notice of appeal with the regulatory authority within 30 days after service of the order. The operator or other party appealing the order shall serve the notice of appeal upon the regulatory authority by personal delivery or certified mail, return receipt requested, to the office of the regulatory authority or by any other method reasonably calculated to effect actual notice on the regulatory authority. Appealing an order does not release the operator from the obligation to comply with the order.
 4. If a notice of appeal is timely filed, the regulatory authority shall do one of the following:
 - a. If the regulatory authority is the Department or a local health department or public health services district to which the duty to comply with A.R.S. Title 41, Chapter 6, Article 10 is delegated, the notification and hearing shall comply with A.R.S. Title 41, Chapter 6, Article 10 and any rules promulgated by the Office of Administrative Hearings.
 - b. For all other regulatory authorities, the notification and hearing shall comply with the procedures adopted by a county board of supervisors as required by A.R.S. § 36-183.04(E).
 5. If a written notice of appeal is not timely filed, the order becomes final.
 6. A regulatory authority shall inspect the public or semipublic swimming pool or bathing place 24 hours after ser-

vice of the order to determine whether the operator has complied with the order. If the regulatory authority determines upon inspection that the operator has not ceased the activity and abated the public nuisance, the regulatory authority shall cause the public nuisance to be removed.

 - c. Kept free of ectoparasites including bedbugs, lice, and mites.
3. A community kitchen provided by a lodging establishment complies with 9 A.A.C. 8, Article 1 if operating as a food establishment.
4. Any multi-use utensils and equipment provided by the lodging establishment are easily cleanable and either:
 - a. Are washed, rinsed, and made sanitary before use by each separate individual; or
 - b. A conspicuously located sign identifies which multi-use utensils and equipment provided by the lodging establishment are not washed, rinsed, and made sanitary before use by each separate individual.
5. A lodging establishment shall comply with 9 A.A.C. 8 Article 8, if within a common area, the lodging establishment provides a:
 - a. Natural bathing place as defined in A.A.C. R18-5-201,
 - b. Semi-artificial bathing place as defined in R9-8-801,
 - c. Spa as defined in A.A.C. R18-5-201, or
 - d. Swimming pool as defined in A.A.C. R18-5-201.

Historical Note

New Section made by final rulemaking at 25 A.A.R. 763, effective March 6, 2019 (Supp. 19-1).

R9-8-1305. Water Supply

A responsible party shall ensure that the following requirements are met:

1. All water provided by the lodging establishment for human consumption is potable water.
2. Any source of water provided by the lodging establishment that is not potable is clearly identified with "not for human consumption" signage at each access point.
3. The potable water supply and distribution system provided by the lodging establishment is designed to provide sufficient quantity at a minimum pressure of 20 pounds per square inch at floor level at each bathroom, shower

room, and permanent water fixture provided by the lodging establishment.

4. No lodging unit is more than 300 feet from a potable water source.
5. If water is hauled to the lodging establishment as a potable water supply, the water and transport shall meet the requirements of A.A.C. R18-4-214.
6. If potable water provided by the lodging establishment is not from a public water system as defined by 18 A.A.C. 4:
 - a. The potable water provided is tested prior to use with results of:
 - i. No coliform bacteria or other fecal indicator present, and
 - ii. Nitrate (as N) no greater than 10 mg/l.
 - b. The potable water provided is routinely monitored to determine:
 - i. The presence or absence of total coliform bacteria at least once every month of operation, and
 - ii. The concentration of nitrates at least once every three months.
 - c. Water samples collected in accordance with this section shall be analyzed by a laboratory that is licensed by the Arizona State Laboratory Office of Laboratory Services and licensed according to 9 A.A.C. 14, Article 6.
 - d. Records of water sample results analyzed in accordance with this section shall be:
 - i. Maintained at the lodging establishment for at least 12 months, and
 - ii. Made available to the Department upon request.
 - e. Written notification must be provided to the regulatory authority within 24 hours when any water quality requirement listed in subsection (a) is out-of-compliance.

PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), accepts state agency rule filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director
ADMINISTRATIVE RULES DIVISION

RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into titles. Titles are divided into chapters. A chapter includes state agency rules. Rules in chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each chapter.

First Quarter: January 1 - March 31

Second Quarter: April 1 - June 30

Third Quarter: July 1 - September 30

Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2019 is cited as Supp. 19-1.

Please note: The Office publishes by chapter, not by individual rule section. Therefore there might be only a few sections codified in each chapter released in a supplement. Historical notes at the end of a section provide an effective date and information when a rule was last updated.

AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate chapters of the *Administrative Code* in Supp. 18-1 to comply with A.R.S. § 41-1012(B) and A.R.S. § 5302(1), (2)(d) through (e), and (3)(d) through (e).

A certification verifies the authenticity of each *Code* chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, www.azleg.gov. An agency’s authority

note to make rules is often included at the beginning of a chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

SESSION LAW REFERENCES

Arizona Session Law references in a chapter can be found at the Secretary of State’s website, under Services-> Legislative Filings.

EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at www.azsos.gov/rules, click on the *Administrative Register* link.

Editor’s notes at the beginning of a chapter provide information about rulemaking sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

EXEMPTIONS AND PAPER COLOR

At one time the office published exempt rules on either blue or green paper. Blue meant the authority of the exemption was given by the Legislature; green meant the authority was determined by a court order. In 2001 the Office discontinued publishing rules using these paper colors.

PERSONAL USE/COMMERCIAL USE

This chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

Rhonda Paschal, managing rules editor, assisted with the editing of this chapter.

Administrative Rules Division

The Arizona Secretary of State electronically publishes each A.A.C. Chapter with a digital certificate. The certificate-based signature displays the date and time the document was signed and can be validated in Adobe Acrobat Reader.

TITLE 9. HEALTH SERVICES

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

Editor's Note: The heading for 9 A.A.C. 10 changed from "Licensure" to "Licensing" per a request from the Department of Health Services (Supp. 03-4).

Editor's Note: The Office of the Secretary of State publishes all Chapters on white paper (Supp. 01-2).

Editor's Note: This Chapter contains rules which were adopted, amended, and repealed under exemptions from the provisions of the Administrative Procedure Act (A.R.S. Title 41, Chapter 6) pursuant to Laws 1993, Ch. 163, § 3(B); Laws 1996, Ch. 329, § 5; Laws 1998, Ch. 178 § 17, and Laws 1999, Ch. 311. Exemption from A.R.S. Title 41, Chapter 6 means that the Department of Health Services did not submit these rules to the Governor's Regulatory Review Council for review; the Department may not have submitted notice of proposed rulemaking to the Secretary of State for publication in the Arizona Administrative Register; the Department was not required to hold public hearings on these rules; and the Attorney General did not certify these rules. Because this Chapter contains rules which are exempt from the regular rulemaking process, the Chapter is printed on blue paper.

R9-10-104. Approval of Architectural Plans and Specifications

- A.** For approval of architectural plans and specifications for the construction or modification of a health care institution that is required by this Chapter to comply with any of the physical plant codes and standards incorporated by reference in R9-10-104.01, an applicant shall submit to the Department an application packet including:
1. An application in a Department-provided format provided by the Department that contains:
 - a. For construction of a new health care institution:
 - i. The health care institution's name, street address, city, state, zip code, telephone number, and e-mail address;
 - ii. The name and mailing address of the health care institution's governing authority;
 - iii. The requested health care institution class or subclass; and
 - iv. If applicable, the requested licensed capacity, licensed occupancy, respite capacity, and number of dialysis stations for the health care institution;
 - b. For modification of a licensed health care institution that requires approval of architectural plans and specifications:
 - i. The health care institution's license number,
 - ii. The name and mailing address of the licensee,
 - iii. The health care institution's class or subclass, and
 - iv. The health care institution's existing licensed capacity, licensed occupancy, respite capacity, or number of dialysis stations; and the requested licensed capacity, licensed occupancy, respite capacity, or number of dialysis stations for the health care institution;
 - c. The health care institution's contact person's name, street mailing address, city, state, zip code, telephone number, and e-mail address;
 - d. The name, street mailing address, city, state, zip code, telephone number, and e-mail address of:
 - i. The project architect; or
 - ii. If the construction or modification of the health care institution does not require a project architect, the project engineer or other individual responsible for the completion of the construction or modification;
 - e. A narrative description of the project;
 - f. The estimated total project cost including the costs of:
 - i. Site acquisition,
 - ii. General construction,
 - iii. Architect fees,

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- iv. Fixed equipment, and
 - v. Movable equipment;
 - g. If providing or planning to provide medical services, nursing services, or health-related services that require compliance with specific physical plant codes and standards incorporated by reference in R9-10-104.01, the number of rooms or inpatient beds designated for providing the medical services, nursing services, or health-related services;
 - h. If providing or planning to provide behavioral health observation/stabilization services, the number of behavioral health observation/stabilization observation chairs designated for providing the behavioral health observation/stabilization services;
 - i. For construction of a new health care institution and if modification of a health care institution requires a project architect, a statement signed and sealed by the project architect, according to the requirements in 4 A.A.C. 30, Article 3, that the:
 - i. Project architect has complied with A.A.C. R4-30-301; and
 - ii. Architectural plans and specifications comply with applicable licensing requirements in A.R.S. Title 36, Chapter 4 and this Chapter;
 - j. If construction or modification of a health care institution requires a project engineer, a statement signed and sealed by the project engineer, according to the requirements in 4 A.A.C. 30, Article 3, that the project engineer has complied with A.A.C. R4-30-301; and
 - k. A statement signed by the governing authority or the licensee that the architectural plans and specifications comply with applicable licensing requirements in A.R.S. Title 36, Chapter 4 and this Chapter;
2. If the health care institution is located on land under the jurisdiction of a local governmental agency, one of the following:
- a. A building permit for the construction or modification issued by the local governmental agency; or
 - b. If a building permit issued by the local governmental agency is not required, zoning clearance issued by the local governmental agency that includes:
 - i. The health care institution's name, street address, city, state, zip code, and county;
 - ii. The health care institution's class or subclass and each type of medical services, nursing services, or health-related services to be provided; and
 - iii. A statement signed by a representative of the local governmental agency stating that the address listed is zoned for the health care institution's class or subclass;
3. The following information that is as necessary to demonstrate that the project described on the application complies with applicable codes and standards incorporated by reference in R9-10-104.01:
- a. A table of contents containing:
 - i. The architectural plans and specifications submitted;
 - ii. The physical plant codes and standards incorporated by reference in R9-10-104.01 that apply to the project;
 - iii. The physical plant codes and standards that are required by a local governmental agency, if applicable;
 - iv. An index of the abbreviations and symbols used in the architectural plans and specifications; and
 - v. The facility's specific International Building Code construction type and International Building Code occupancy type;
- b. If the facility is larger than 3,000 square feet and is or will be occupied by more than 20 individuals, the seal of an architect on the architectural plans and specifications according to the requirements in A.R.S. Title 32, Chapter 1 and 4 A.A.C. 30, Article 3;
- c. A site plan, drawn to scale, of the entire premises showing streets, property lines, facilities, parking areas, outdoor areas, fences, swimming pools, fire access roads, fire hydrants, and access to water mains;
- d. For each facility, on architectural plans and specifications:
- i. A floor plan, drawn to scale, for each level of the facility, showing the layout and dimensions of each room, the name and function of each room, means of egress, and natural and artificial lighting sources;
 - ii. A diagram of a section of the facility, drawn to scale, showing the vertical cross-section view from foundation to roof and specifying construction materials;
 - iii. Building elevations, drawn to scale, showing the outside appearance of each facility;
 - iv. The materials used for ceilings, walls, and floors;
 - v. The location, size, and fire rating of each door and each window and the materials and hardware used, including safety features such as fire exit door hardware and fireproofing materials;
 - vi. A ceiling plan, drawn to scale, showing the layout of each light fixture, each fire protection device, and each element of the mechanical ventilation system;
 - vii. An electrical floor plan, drawn to scale, showing the wiring diagram and the layout of each lighting fixture, each outlet, each switch, each electrical panel, and electrical equipment;
 - viii. A mechanical floor plan, drawn to scale, showing the layout of heating, ventilation, and air conditioning systems;
 - ix. A plumbing floor plan, drawn to scale, showing the layout and materials used for water, sewer, and medical gas systems, including the water supply and plumbing fixtures;
 - x. A floor plan, drawn to scale, showing the communication system within the health care institution including the nurse call system, if applicable;
 - xi. A floor plan, drawn to scale, showing the automatic fire extinguishing, fire detection, and fire alarm systems; and
 - xii. Technical specifications or drawings describing installation of equipment or medical gas and the materials used for installation in the health care institution;
4. The estimated total project cost including the costs of:
- a. Site acquisition,
 - b. General construction,
 - c. Architect fees,

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- d. Fixed equipment, and
- e. Movable equipment;
- 5. The following, as applicable:
 - a. If the health care institution is located on land under the jurisdiction of a local governmental agency, one of the following provided by the local governmental agency:
 - i. A copy of the certificate of occupancy for the facility,
 - ii. Documentation that the facility was approved for occupancy, or
 - iii. Documentation that a certificate of occupancy for the facility is not available;
 - b. A certification and a statement that the construction or modification of the facility is in substantial compliance with applicable licensing requirements in A.R.S. Title 36, Article 4 and this Chapter signed by the project architect, the contractor, and the owner;
 - c. A written description of any work necessary to complete the construction or modification submitted by the project architect;
 - d. If the construction or modification affects the health care institution's fire alarm system, a contractor certification and description of the fire alarm system in a Department-provided format provided by the Department;
 - e. If the construction or modification affects the health care institution's automatic fire extinguishing system, a contractor certification of the automatic fire extinguishing system in a Department-provided format provided by the Department;
 - f. If the construction or modification affects the health care institution's heating, ventilation, or air conditioning system, a copy of the heating, ventilation, air conditioning, and air balance tests and a contractor certification of the heating, ventilation, or air conditioning system;
 - g. If draperies, cubicle curtains, or floor coverings are installed or replaced, a copy of the manufacturer's certification of flame spread for the draperies, cubicle curtains, or floor coverings;
 - h. For a health care institution using inhalation anesthetics or nonflammable medical gas, a copy of the Compliance Certification for Inhalation Anesthetics or Nonflammable Medical Gas System required in the National Fire Codes incorporated by reference in R9-10-104.01;
 - i. If a generator is installed, a copy of the installation acceptance required in the National Fire Codes incorporated by reference in R9-10-104.01;
 - j. If equipment is installed, a certification from an engineer or from a technical representative of the equipment's manufacturer that the equipment has been installed according to the manufacturer's recommendations and, if applicable, calibrated;
 - k. For a health care institution providing radiology, a written report from a certified health physicist of the location, type, and amount of radiation protection; and
 - l. If a factory-built building is used by a health care institution:
 - i. A copy of the installation permit and the copy of a certificate of occupancy for the factory-built building from the Office of Manufactured Housing; or
 - ii. A written report from an individual registered as an architect or a professional structural engineer under 4 A.A.C. 30, Article 2, stating that the factory-built building complies with applicable design standards;
- 6. For construction of a new health care institution and for a modification of a health care institution that requires a project architect, a statement signed by the project architect that final architectural plans and specifications have been submitted to the person applying for a health care institution license or the licensee of the health care institution;
- 7. For modification of a health care institution that does not require a project architect, a statement signed by the project engineer or other individual responsible for the completion of the modification that final architectural plans and specifications have been submitted to the person applying for a health care institution license or the licensee of the health care institution; and
- 8. The applicable fee required by R9-10-106.
- B.** Before an applicant submits an application for approval of architectural plans and specifications for the construction or modification of a health care institution, an applicant may request an architectural evaluation by providing the documents in subsection (A)(3) to the Department.
- C.** The Department may conduct on-site facility reviews during the construction or modification of a health care institution.
- D.** The Department shall approve or deny an application for approval of architectural plans and specifications of a health care institution in this Section according to R9-10-108.
- E.** In addition to obtaining an approval of a health care institution's architectural plans and specifications, a person shall obtain a health care institution license before operating the health care institution.

R9-10-107. Submission of Health Care Institution Licensing Fees

- A. An applicant for a health care institution license shall submit the applicable licensing fees in R9-10-106 to the Department:
 1. Within 60 calendar days after the date of the written notice of approval in R9-10-108(C)(3); or
 2. Within 90 calendar days after the date of the written notice of approval in R9-10-108(C)(3), with the payment of an additional late payment fee of \$250.
- B. The Department shall notify a licensee of the due date of the facility's health care institution licensing fees no later than 90 calendar days before the date the facility's health care institution licensing fee is due to the Department.
- C. Except as specified in subsection (E), a licensee shall submit to the Department, no earlier than 60 calendar days before the anniversary date of the facility's health care institution license:
 1. The following information in a Department-provided format:
 - a. The licensee's name, and
 - b. The facility's name and license number;
 2. Verification of the information in the Department's current records for the health care institution;
 3. If applicable, information or documentation required in another Article of this Chapter, specific to the health care institution, to be submitted with the relevant fees required in R9-10-106; and
 4. The applicable annual licensing fees in R9-10-106.
- D. If any information in the Department's current records for a health care institution is incorrect, before a licensee submits annual licensing fees according to subsection (C), the licensee shall comply with the applicable requirements in R9-10-109 or R9-10-110 to update the Department's records for the health care institution.
- E. A licensee may submit to the Department the information in subsection (C)(1), verification in subsection (C)(2), applicable information or documentation in subsection (C)(3), and applicable annual licensing fees in R9-10-106:
 1. Within 30 calendar days after the anniversary date of the facility's health care institution license, with the payment of the additional late payment fee in R9-10-106(F); or
 2. If an alternate licensing fee due date has been established for the licensee according to subsections (F) and (G):

- a. By the anniversary date of the facility's health care institution license, with the appropriate fee amount to prorate the annual licensing fees in R9-10-106 for a facility to the alternate licensing fee due date;
- b. By the alternate licensing fee due date;
- c. If a new alternate licensing fee due date has been established, by the current alternate licensing fee due date, with the appropriate fee amount to prorate the annual licensing fees in R9-10-106 for a facility to the new alternate licensing fee due date; or
- d. Within 30 calendar days after the alternate licensing fee due date, with the payment of the additional late payment fee in R9-10-106(F).

- F. Except as specified in subsection (H), a licensee may request a licensing fee due date for a facility that is different from the anniversary date of a facility's health care institution license by submitting an application for an alternate licensing fee due date to the Department, at least 30 calendar days before the anniversary date of the facility's health care institution license, that includes the following information in a Department-provided format:
 1. The licensee's name and e-mail address,
 2. The facility's name and license number,
 3. The current licensing fee due date,
 4. The proposed alternate licensing fee due date,
 5. The reason the licensee is requesting an alternate licensing fee due date, and
 6. The name of the health care institution's administrator's or individual representing the health care institution as designated in A.R.S. § 36-422 and the dated signature of the administrator or individual.
- G. The Department shall review a request made according to subsection (F) according to R9-10-108.
- H. A licensee may not request an alternate licensing fee due date according to subsection (F):
 1. More frequently than once in each three-year period, or
 2. For a facility for which the payment of licensing fees is not up-to-date.

Historical Note

New Section made by final rulemaking at 8 A.A.R. 3559, effective August 1, 2002 (Supp. 02-3). Amended by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). Amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2). R9-10-108. Time-frames

- A. The overall time-frame for each type of approval granted by the Department is listed in Table 1.1. The applicant and the Department may agree in writing to extend the substantive review time-frame and the overall time-frame. The substantive review time-frame and the overall time-frame may not be extended by more than 25% of the overall time-frame.
- B. The administrative completeness review time-frame for each type of approval granted by the Department as prescribed in this Article is listed in Table 1.1. The administrative completeness review time-frame begins on the date the Department receives an application packet or a written request for an alternate licensing fee due date.
 1. The application packet for a health care institution license is not complete until the applicant provides the Department with written notice that the health care institution is ready for a licensing inspection by the Department.

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

2. If the application packet or written request is incomplete, the Department shall provide a written notice to the applicant specifying the missing document or incomplete information. The administrative completeness review time-frame and the overall time-frame are suspended from the date of the notice until the date the Department receives the missing document or information from the applicant.
 3. When an application packet or written request is complete, the Department shall provide a written notice of administrative completeness to the applicant.
 4. For an application packet for review of architectural plans and specifications, a health care institution license application packet, an application packet for a modification not requiring review of architectural plans and specifications, or a written request for an alternate licensing fee due date, the Department shall consider the application or written request withdrawn if the applicant fails to supply the missing documents or information included in the notice described in subsection (B)(2) within 60 calendar days after the date of the notice described in subsection (B)(2).
 5. If the Department issues a license or grants an approval during the time provided to assess administrative completeness, the Department shall not issue a separate written notice of administrative completeness.
- C. The substantive review time-frame is listed in Table 1.1 and begins on the date of the notice of administrative completeness.
1. The Department may conduct an onsite inspection of the facility:
 - a. As part of the substantive review for approval of architectural plans and specifications;
 - b. As part of the substantive review for issuing a health care institution license; or
 - c. As part of the substantive review for approving a modification of a health care institution's license.
 2. During the substantive review time-frame, the Department may make one comprehensive written request for additional information or documentation. If the Department and the applicant agree in writing, the Department may make supplemental requests for additional information or documentation. The time-frame for the Department to complete the substantive review is suspended from the date of a written request for additional information or documentation until the Department receives the additional information or documentation.
 3. The Department shall send a written notice of approval to an applicant that is in substantial compliance with applicable requirements in A.R.S. Title 36, Chapter 4 and this Chapter.
 4. After an applicant for a health care institution license receives the written notice of approval in subsection (C)(3), the applicant shall submit the applicable health care institution license fee in R9-10-106 according to R9-10-107(A).
 5. After receiving the applicable health care institution licensing fee from an applicant according to subsection (C)(4) and R9-10-107(A), the Department shall send a health care institution license to the applicant.
 6. The Department shall provide a written notice of denial that complies with A.R.S. § 41-1076 to an applicant who does not:
 - a. For a health care institution license application or a request for approval of a modification of a health care institution requiring architectural plans and specifications, submit the information or documentation in subsection (C)(2) within 120 calendar days after the Department's written request to the applicant;
 - b. For a request for approval of a modification of a health care institution not requiring architectural plans and specifications or a written request for an alternate licensing fee due date, submit the information or documentation in subsection (C)(2) within 30 calendar days after the Department's written request to the applicant;
 - c. Comply with the applicable requirements in A.R.S. Title 36, Chapter 4 and this Chapter; or
 - d. If applicable, submit a fee required in R9-10-106 or R9-10-107.
 7. An applicant may file a written notice of appeal with the Department within 30 calendar days after receiving the notice described in subsection (C)(6). The appeal shall be conducted according to A.R.S. Title 41, Chapter 6, Article 10.
 8. If a time-frame's last day falls on a Saturday, a Sunday, or an official state holiday, the Department shall consider the next working day to be the time-frame's last day.

- a. The adult behavioral health therapeutic home or behavioral health respite home has a written agreement with a collaborating health care institution;
- b. The collaborating health care institution has approved the adult behavioral health therapeutic home's or behavioral health respite home's:
 - i. Scope of services, and
 - ii. Policies and procedures; and
- c. The collaborating health care institution has verified the provider's skills and knowledge.

G. If a licensee is an affiliated outpatient treatment center, the licensee shall ensure that if the affiliated outpatient treatment center:

1. Plans to begin providing administrative support to a counseling facility at a time other than during the affiliated outpatient treatment center's license application process, the following information for each counseling facility is submitted to the Department before the affiliated outpatient treatment center begins providing administrative support:
 - a. The counseling facility's name,
 - b. The license number assigned to the counseling facility by the Department, and
 - c. The date the affiliated outpatient treatment center will begin providing administrative support to the counseling facility; or
2. No longer provides administrative support to a counseling facility previously identified by the affiliated outpatient treatment center as receiving administrative support from the affiliated outpatient treatment center, the following information for each counseling facility is submitted to the Department within 30 calendar days after the affiliated outpatient treatment center no longer provides administrative support:
 - a. The counseling facility's name,
 - b. The license number assigned to the counseling facility by the Department, and
 - c. The date the affiliated outpatient treatment center stopped providing administrative support to the counseling facility.

H. If a licensee is a counseling facility, the licensee shall ensure that if the counseling facility:

1. Plans to begin receiving administrative support from an affiliated outpatient treatment center at a time other than during the counseling facility's license application process, the following information for the affiliated outpatient treatment center is submitted to the Department before the counseling facility begins receiving administrative support:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. The affiliated outpatient treatment center's name,
- b. The license number assigned to the affiliated outpatient treatment center by the Department, and
- c. The date the counseling facility will begin receiving administrative support;
2. No longer receives administrative support from an affiliated outpatient treatment center previously identified by the counseling facility as providing administrative support to the counseling facility, the following information for the affiliated outpatient treatment center is submitted to the Department within 30 calendar days after the counseling facility no longer receives administrative support from the affiliated outpatient treatment center:
 - a. The affiliated outpatient treatment center's name,
 - b. The license number assigned to the affiliated outpatient treatment center by the Department, and
 - c. The date the counseling facility stopped receiving administrative support from the affiliated outpatient treatment center;
3. Plans to begin sharing administrative support with an affiliated counseling facility at a time other than during the counseling facility's license application process, the following information for each affiliated counseling facility sharing administrative support with the counseling facility is submitted to the Department before the counseling facility and affiliated counseling facility begin sharing administrative support:
 - a. The affiliated counseling facility's name,
 - b. The license number assigned to the affiliated counseling facility by the Department, and
 - c. The date the counseling facility and the affiliated counseling facility will begin sharing administrative support; or
4. No longer shares administrative support with an affiliated counseling facility previously identified by the counseling facility as sharing administrative support with the counseling facility, the following information is submitted for each affiliated counseling facility within 30 calendar days after the counseling facility and affiliated counseling facility no longer share administrative support:
 - a. The affiliated counseling facility's name,
 - b. The license number assigned to the affiliated counseling facility by the Department, and
 - c. The date the counseling facility and affiliated counseling facility will no longer be sharing administrative support.
- I. A governing authority shall submit a license application required in R9-10-105 for:
 1. A change in ownership of a health care institution;
 2. A change in the address or location of a health care institution that provides medical services, nursing services, health-related services, or behavioral health services on the premises; or
 3. A change in a health care institution's class or subclass.
- J. A governing authority is not required to submit the documentation required in R9-10-105(A)(5) for a license application if:
 1. The health care institution has not ceased operations for more than 30 calendar days,
 2. A modification has not been made to the health care institution,
 3. The services the health care institution is authorized by the Department to provide are not changed, and
 4. The location of the health care institution's premises is not changed.

R9-10-114. Clinical Practice Restrictions for Hemodialysis Technician Trainees

- A.** The following definitions apply in this Section:
1. "Assess" means collecting data about a patient by:
 - a. Obtaining a history of the patient,
 - b. Listening to the patient's heart and lungs, and
 - c. Checking the patient for edema.
 2. "Blood-flow rate" means the quantity of blood pumped into a dialyzer per minute of hemodialysis.
 3. "Blood lines" means the tubing used during hemodialysis to carry blood between a vascular access and a dialyzer.
 4. "Central line catheter" means a type of vascular access created by surgically implanting a tube into a large vein.
 5. "Clinical practice restriction" means a limitation on the hemodialysis tasks that may be performed by a hemodialysis technician trainee.
 6. "Conductivity test" means a determination of the electrolytes in a dialysate.
 7. "Dialysate" means a mixture of water and chemicals used in hemodialysis to remove wastes and excess fluid from a patient's body.
 8. "Dialysate-flow rate" means the quantity of dialysate pumped per minute of hemodialysis.
 9. "Directly observing" or "direct observation" means a medical person stands next to an inexperienced hemodialysis technician trainee and watches the inexperienced hemodialysis technician trainee perform a hemodialysis task.
 10. "Direct supervision" has the same meaning as "supervision" in A.R.S. § 36-401.
 11. "Electrolytes" means chemical compounds that break apart into electrically charged particles, such as sodium, potassium, or calcium, when dissolved in water.
 12. "Experienced hemodialysis technician trainee" means an individual who has passed all didactic, skills, and competency examinations provided by a health care institution that measure the individual's knowledge and ability to perform hemodialysis.
 13. "Fistula" means a type of vascular access created by a surgical connection between an artery and vein.
 14. "Fluid-removal rate" means the quantity of wastes and excess fluid eliminated from a patient's blood per minute of hemodialysis to achieve the patient's prescribed weight, determined by:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Dialyzer size,
 - b. Blood-flow rate,
 - c. Dialysate-flow rate, and
 - d. Hemodialysis duration.
15. "Germicide-negative test" means a determination that a chemical used to kill microorganisms is not present.
 16. "Germicide-positive test" means a determination that a chemical used to kill microorganisms is present.
 17. "Graft" means a vascular access created by a surgical connection between an artery and vein using a synthetic tube.
 18. "Hemodialysis machine" means a mechanical pump that controls:
 - a. The blood-flow rate,
 - b. The mixing and temperature of dialysate,
 - c. The dialysate-flow rate,
 - d. The addition of anticoagulant, and
 - e. The fluid-removal rate.
 19. "Hemodialysis technician" has the same meaning as in A.R.S. § 36-423(A).
 20. "Hemodialysis technician trainee" means an individual who is working in a health care institution to assist in providing hemodialysis and who is not certified as a hemodialysis technician according to A.R.S. § 36-423(A).
 21. "Inexperienced hemodialysis technician trainee" means an individual who has not passed all didactic, skills, and competency examinations provided by a health care institution that measure the individual's knowledge and ability to perform hemodialysis.
 22. "Medical person" means:
 - a. A physician who is experienced in dialysis;
 - b. A registered nurse practitioner who is experienced in dialysis;
 - c. A nurse who is experienced in dialysis;
 - d. A hemodialysis technician who meets the requirements in A.R.S. § 36-423(A) approved by the governing authority; and
 - e. An experienced hemodialysis technician trainee approved by the governing authority.
 23. "Not established" means not approved by a patient's nephrologist for use in hemodialysis.
 24. "Patient" means an individual who receives hemodialysis.
 25. "pH test" means a determination of the acidity of a dialysate.
 26. "Preceptor course" means a health care institution's instruction and evaluation provided to a nurse, hemodialysis technician, or hemodialysis technician trainee that enables the nurse, hemodialysis technician, or hemodialysis technician trainee to provide direct observation and education to hemodialysis technician trainees.
 27. "Respond" means to mute, shut off, reset, or troubleshoot an alarm.
 28. "Safety check" means successful completion of tests recommended by the manufacturer of a hemodialysis machine, a dialyzer, or a water system used for hemodialysis before initiating a patient's hemodialysis.
 29. "Water-contaminant test" means a determination of the presence of chlorine or chloramine in a water system used for hemodialysis.
- B.** An experienced hemodialysis technician trainee may:
 1. Perform hemodialysis under direct supervision, and
 2. Provide direct observation to another hemodialysis technician trainee only after completing the health care institution's preceptor course approved by the governing authority.
 - C.** An experienced hemodialysis technician trainee shall not access a patient's:
 1. Fistula that is not established, or
 2. Graft that is not established.
 - D.** An inexperienced hemodialysis technician trainee may perform the following hemodialysis tasks only under direct observation:
 1. Access a patient's central line catheter;
 2. Respond to a hemodialysis-machine alarm;
 3. Draw blood for laboratory tests;
 4. Perform a water-contaminant test on a water system used for hemodialysis;
 5. Inspect a dialyzer and perform a germicide-positive test before priming a dialyzer;
 6. Set up a hemodialysis machine and blood lines before priming a dialyzer;
 7. Prime a dialyzer;
 8. Test a hemodialysis machine for germicide presence;
 9. Perform a hemodialysis machine safety check;
 10. Prepare a dialysate;
 11. Perform a conductivity test and a pH test on a dialysate;
 12. Assess a patient;
 13. Check and record a patient's vital signs, weight, and temperature;
 14. Determine the amount and rate of fluid removal from a patient;
 15. Administer local anesthetic at an established fistula or graft, administer anticoagulant, or administer replacement saline solution;
 16. Perform a germicide-negative test on a dialyzer before initiating hemodialysis;
 17. Initiate or discontinue a patient's hemodialysis;
 18. Adjust blood-flow rate, dialysate-flow rate, or fluid-removal rate during hemodialysis; or
 19. Prepare a blood, water, or dialysate culture to determine microorganism presence.
 - E.** An inexperienced hemodialysis technician trainee shall not:
 1. Access a patient's:
 - a. Fistula that is not established, or
 - b. Graft that is not established; or
 2. Provide direct observation.
 - F.** When a hemodialysis technician trainee performs hemodialysis tasks for a patient, the patient's medical record shall include:
 1. The name of the hemodialysis technician trainee;
 2. The date, time, and hemodialysis task performed;
 3. The name of the medical person directly observing or the nurse or physician directly supervising the hemodialysis technician trainee; and
 4. The initials or signature of the medical person directly observing or the nurse or physician directly supervising the hemodialysis technician trainee.
 - G.** If the Department determines that a health care institution is not in substantial compliance with this Section, the Department may take enforcement action according to R9-10-111.

R9-10-115. Behavioral Health Paraprofessionals; Behavioral Health Technicians

If a health care institution is a behavioral health facility or is authorized by the Department to provide behavioral health services, an administrator shall ensure that:

1. Policies and procedures are established, documented, and implemented that:
 - a. Delineate the services a behavioral health paraprofessional is allowed to provide at or for the health care institution;
 - b. Cover supervision of a behavioral health paraprofessional, including documentation of supervision;
 - c. Establish the qualifications for a behavioral health professional providing supervision to a behavioral health paraprofessional;
 - d. Delineate the services a behavioral health technician is allowed to provide at or for the health care institution;
 - e. Cover clinical oversight for a behavioral health technician, including documentation of clinical oversight;
 - f. Establish the qualifications for a behavioral health professional providing clinical oversight to a behavioral health technician;
 - g. Delineate the methods used to provide clinical oversight, including when clinical oversight is provided on an individual basis or in a group setting; and
 - h. Establish the process by which information pertaining to services provided by a behavioral health technician is provided to the behavioral health professional who is responsible for the clinical oversight of the behavioral health technician;
2. A behavioral health paraprofessional receives supervision according to policies and procedures;
3. Clinical oversight is provided to a behavioral health technician to ensure that patient needs are met based on, for each behavioral health technician:
 - a. The scope and extent of the services provided,
 - b. The acuity of the patients receiving services, and
 - c. The number of patients receiving services;
4. A behavioral health technician receives clinical oversight at least once during each two week period, if the behavioral health technician provides services related to patient care at the health care institution during the two week period;
5. When clinical oversight is provided electronically:
 - a. The clinical oversight is provided verbally with direct and immediate interaction between the behavioral health professional providing and the behavioral health technician receiving the clinical oversight,
 - b. A secure connection is used, and
 - c. The identities of the behavioral health professional providing and the behavioral health technician receiving the clinical oversight are verified before clinical oversight is provided; and
6. A behavioral health professional provides supervision to a behavioral health paraprofessional or clinical oversight to behavioral health technician within the behavioral

health professional's scope of practice established in the applicable licensing requirements under A.R.S. Title 32.

R9-10-116. Nutrition and Feeding Assistant Training Programs

- A. For the purposes of this Section, "agency" means an entity other than a nursing care institution that provides the nutrition and feeding assistant training required in A.R.S. § 36-413.
- B. An agency shall apply for approval to operate a nutrition and feeding assistant training program by submitting:
 1. An application in a Department-provided format that contains:
 - a. The name of the agency;
 - b. The name, telephone number, and e-mail address of the individual in charge of the proposed nutrition and feeding assistant training program;
 - c. The address where the nutrition and feeding assistant training program records are maintained;
 - d. A description of the training course being offered by the nutrition and feeding assistant training program including for each topic in subsection (I):
 - i. The information presented for each topic,
 - ii. The amount of time allotted to each topic,
 - iii. The skills an individual is expected to acquire for each topic, and
 - iv. The testing method used to verify an individual has acquired the stated skills for each topic;
 - e. Whether the agency agrees to allow the Department to submit supplemental requests for information as specified in subsection (F)(2); and
 - f. The signature of the individual in charge of the proposed nutrition and feeding assistant training program and the date signed; and
 2. A copy of the materials used for providing the nutrition and feeding assistant training program.
- C. For an application for an approval of a nutrition and feeding assistant training program, the administrative review time-frame is 30 calendar days, the substantive review time-frame is 30 calendar days, and the overall time-frame is 60 calendar days.
- D. Within 30 calendar days after the receipt of an application in subsection (B), the Department shall:
 1. Issue an approval of the agency's nutrition and feeding assistant training program;
 2. Provide a notice of administrative completeness to the agency that submitted the application; or
 3. Provide a notice of deficiencies to the agency that submitted the application, including a list of the information or documents needed to complete the application.
- E. If the Department provides a notice of deficiencies to an agency:
 1. The administrative completeness review time-frame and the overall time-frame are suspended from the date of the notice of deficiencies until the date the Department

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- receives the missing information or documents from the agency;
2. If the agency does not submit the missing information or documents to the Department within 30 calendar days, the Department shall consider the application withdrawn; and
 3. If the agency submits the missing information or documents to the Department within 30 calendar days, the substantive review time-frame begins on the date the Department receives the missing information or documents.
- F.** Within the substantive review time-frame, the Department:
1. Shall issue or deny an approval of a nutrition and feeding assistant training program; and
 2. May make one written comprehensive request for more information, unless the Department and the agency agree in writing to allow the Department to submit supplemental requests for information.
- G.** If the Department issues a written comprehensive request or a supplemental request for information:
1. The substantive review time-frame and the overall time-frame are suspended from the date of the written comprehensive request or the supplemental request for information until the date the Department receives the information requested, and
 2. The agency shall submit to the Department the information and documents listed in the written comprehensive request or supplemental request for information within 10 working days after the date of the comprehensive written request or supplemental request for information.
- H.** The Department shall issue:
1. An approval for an agency to operate a nutrition and feeding assistant training program if the Department determines that the agency and the application comply with A.R.S. § 36-413 and this Section; or
 2. A denial for an agency that includes the reason for the denial and the process for appeal of the Department's decision if:
 - a. The Department determines that the agency does not comply with A.R.S. § 36-413 and this Section; or
 - b. The agency does not submit information and documents listed in the written comprehensive request or supplemental request for information within 10 working days after the date of the comprehensive written request or supplemental request for information.
- I.** An individual in charge of a nutrition and feeding assistant training program shall ensure that:
1. The materials and coursework for the nutrition and feeding assistant training program demonstrate the inclusion of the following topics:
 - a. Feeding techniques;
 - b. Assistance with feeding and hydration;
 - c. Communication and interpersonal skills;
 - d. Appropriate responses to resident behavior;
 - e. Safety and emergency procedures, including the Heimlich maneuver;
 - f. Infection control;
 - g. Resident rights;
 - h. Recognizing a change in a resident that is inconsistent with the resident's normal behavior; and
 - i. Reporting a change in subsection (I)(1)(h) to a nurse at a nursing care institution;
 2. An individual providing the training course is:
 - a. A physician,
 - b. A physician assistant,
 - c. A registered nurse practitioner,
 - d. A registered nurse,
 - e. A registered dietitian,
 - f. A licensed practical nurse,
 - g. A speech-language pathologist, or
 - h. An occupational therapist; and
 3. An individual taking the training course completes:
 - a. At least eight hours of classroom time, and
 - b. Demonstrates that the individual has acquired the skills the individual was expected to acquire.
- J.** An individual in charge of a nutrition and feeding assistant training program shall issue a certificate of completion to an individual who completes the training course and demonstrates the skills the individual was expected to acquire as a result of completing the training course that contains:
1. The name of the agency approved to operate the nutrition and feeding assistant training program;
 2. The name of the individual completing the training course;
 3. The date of completion;
 4. The name, signature, and professional license of the individual providing the training course; and
 5. The name and signature of the individual in charge of the nutrition and feeding assistant training program.
- K.** The Department may deny, revoke, or suspend an approval to operate a nutrition and feeding assistant training program if an agency operating or applying to operate a nutrition and feeding assistance training program:
1. Provides false or misleading information to the Department;
 2. Does not comply with the applicable statutes and rules;
 3. Issues a training completion certificate to an individual who did not:
 - a. Complete the nutrition and feeding assistant training program, or
 - b. Demonstrate the skills the individual was expected to acquire; or
 4. Does not implement the nutrition and feeding assistant training program as described in or use the materials submitted with the agency's application.
- L.** In determining which action in subsection (K) is appropriate, the Department shall consider the following:
1. Repeated violations of statutes or rules,
 2. Pattern of non-compliance,
 3. Types of violations,
 4. Severity of violations, and
 5. Number of violations.

R9-10-118. Collaborating Health Care Institution

A. An administrator of a collaborating health care institution shall ensure that:

1. A list is maintained of adult behavioral health therapeutic homes and behavioral health respite homes for which the collaborating health care institution serves as a collaborating health care institution;
2. For each adult behavioral health therapeutic home or behavioral health respite home in subsection (A)(1), the collaborating health care institution maintains the following information:
 - a. A copy of the documented agreement that establishes the responsibilities of the adult behavioral health therapeutic home or behavioral health respite home and the collaborating health care institution consistent with the requirements in this Chapter;
 - b. For the adult behavioral health therapeutic home or behavioral health respite home, the following information:
 - i. Provider's name;
 - ii. Street address;
 - iii. License number;
 - iv. Whether the residence is an adult behavioral health therapeutic home or a behavioral health respite home;
 - v. If the residence is a behavioral health respite home, whether the behavioral health respite home provides respite care services to:
 - (1) Individuals 18 years of age or older, or
 - (2) Individuals less than 18 years of age;
 - vi. The beginning and ending dates of the documented agreement in subsection (A)(2)(a); and
 - vii. The name and contact information for the individual assigned by the collaborating health care institution to monitor the adult behavioral health therapeutic home or behavioral health respite home;
 - c. For the adult behavioral health therapeutic home or behavioral health respite home, a copy of the following that have been approved by the collaborating health care institution:
 - i. Scope of services,
 - ii. Policies and procedures, and
 - iii. Documentation of the review and update of policies and procedures;
 - d. A description of the required skills and knowledge for a provider, based on the scope of services of the adult behavioral health therapeutic home or behavioral health respite home, as established by the collaborating health care institution; and
 - e. For a provider in the adult behavioral health therapeutic home or behavioral health respite home, documentation of:
 - i. The provider's skills and knowledge;
 - ii. If applicable, the provider's completion of training in assistance in the self-administration of medication;
 - iii. Verification of the provider's skills and knowledge; and

iv. If the provider is required to have clinical oversight according to R9-10-1805(C), the provider's receiving clinical oversight;

3. A provider's skills and knowledge are verified by a personnel member according to policies and procedures;
 4. A provider who provides behavioral health services receives clinical oversight, required in R9-10-1805(C), from a behavioral health professional; and
 5. A provider, other than a provider who is a medical practitioner or nurse, receives training in assistance in the self-administration of medication:
 - a. From a medical practitioner or registered nurse or from a personnel member of the collaborating health care institution trained by a medical practitioner or registered nurse;
 - b. That includes:
 - i. A demonstration of the provider's skills and knowledge necessary to provide assistance in the self-administration of medication,
 - ii. Identification of medication errors and medical emergencies related to medication that require emergency medical intervention, and
 - iii. The process for notifying the appropriate entities when an emergency medical intervention is needed; and
 - c. That is documented.
- B.** For a patient referred to an adult behavioral health therapeutic home or a behavioral health respite home, an administrator shall ensure that:
1. A resident or recipient accepted by and receiving services from the adult behavioral health therapeutic home or behavioral health respite home does not present a threat to the referred patient, based on the resident's or recipient's developmental levels, social skills, verbal skills, and personal history;
 2. The referred patient does not present a threat to a resident or recipient accepted by and receiving services from the adult behavioral health therapeutic home or behavioral health respite home based the referred patient's developmental levels, social skills, verbal skills, and personal history;
 3. The referred patient requires services within the adult behavioral health therapeutic home's or behavioral health respite home's scope of services;
 4. A provider of the adult behavioral health therapeutic home or behavioral health respite home has the verified skills and knowledge to provide behavioral health services to the referred patient;
 5. A treatment plan for the referred patient, which includes information necessary for a provider to meet the referred patient's needs for behavioral health services, is completed and forwarded to the provider before the referred patient is accepted as a resident or recipient;
 6. A patient's treatment plan is reviewed and updated at least once every 12 months, and a copy of the patient's updated treatment plan is forwarded to the patient's provider;
 7. If documentation of a significant change in a patient's behavioral, physical, cognitive, or functional condition and the action taken by a provider to address patient's changing needs is received by the collaborating health care institution, a behavioral health professional or behavioral health technician reviews the documentation and:
 - a. Documents the review; and
 - b. If applicable:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- i. Updates the patient's treatment plan, and
 - ii. Forwards the updated treatment plan to the provider within 10 working days after receipt of the documentation of a significant change;
- 8. If the review and updated treatment plan required in subsection (B)(7) is performed by a behavioral health technician, a behavioral health professional reviews and signs the review and updated treatment plan to ensure the patient is receiving the appropriate behavioral health services; and
- 9. In addition to the requirements for a medical record for a patient in this Chapter, a referred patient's medical record contains:
 - a. The provider's name and the street address and license number of the adult behavioral health therapeutic home or behavioral health respite home to which the patient is referred,
 - b. A copy of the treatment plan provided to the adult behavioral health therapeutic home or behavioral health respite home,
 - c. Documentation received according to and required by subsection (B)(7),
 - d. Any information about the patient received from the adult behavioral health therapeutic home or behavioral health respite home, and
 - e. Any follow-up actions taken by the collaborating health care institution related to the patient.
- C. For a patient referred to an adult behavioral health therapeutic home, an administrator shall ensure that the collaborating health care institution has documentation in the patient's medical record of evidence of freedom from infectious tuberculosis that meets the requirements in R9-10-113.

Historical Note

New Section R9-10-118 renumbered from R9-10-117 and amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2). R9-10-120. Opioid Prescribing and Treatment

- A. This Section does not apply to a health care institution licensed under Article 20 of this Chapter.
- B. In addition to the definitions in A.R.S. § 36-401(A) and R9-10-101, the following definitions apply in this Section:
 - 1. "Episode of care" means medical services, nursing services, or health-related services provided by a health care institution to a patient for a specific period of time, ending in discharge or the completion of the patient's treatment plan, whichever is later.
 - 2. "Order" means to issue written, verbal, or electronic instructions for a specific dose of a specific medication in a specific quantity and route of administration to be obtained and administered to a patient in a health care institution.
- C. An administrator of a health care institution where opioids are prescribed or ordered as part of treatment shall:
 - 1. Establish, document, and implement policies and procedures for prescribing or ordering an opioid as part of treatment, to protect the health and safety of a patient, that:
 - a. Cover which personnel members may prescribe or order an opioid in treating a patient and the required knowledge and qualifications of these personnel members;
 - b. As applicable and except when contrary to medical judgment for a patient, are consistent with the Arizona Opioid Prescribing Guidelines or national opioid-prescribing guidelines, such as guidelines developed by the:
 - i. Centers for Disease Control and Prevention, or
 - ii. U.S. Department of Veterans Affairs and the U.S. Department of Defense;
 - c. Include how, when, and by whom:
 - i. A patient's profile on the Arizona Board of Pharmacy Controlled Substances Prescription Monitoring Program database is reviewed;
 - ii. An assessment is conducted of a patient's substance use risk;
 - iii. The potential risks, adverse outcomes, and complications, including death, associated with the use of opioids are explained to a patient or the patient's representative;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- iv. Alternatives to a prescribed or ordered opioid are explained to a patient or the patient's representative;
 - v. Informed consent is obtained from a patient or the patient's representative and, if applicable, in what situations, described in subsection (G) or (H), informed consent would not be obtained before an opioid is prescribed or ordered for a patient;
 - vi. A patient receiving an opioid is monitored; and
 - vii. The actions taken according to subsections (C)(1)(c)(i) through (vi) are documented;
 - d. Address conditions that may impose a higher risk to a patient when prescribing or ordering an opioid as part of treatment, including:
 - i. Concurrent use of a benzodiazepine or other sedative-hypnotic medication,
 - ii. History of substance use disorder,
 - iii. Co-occurring behavioral health issue, or
 - iv. Pregnancy;
 - e. Cover the criteria for co-prescribing a short-acting opioid antagonist for a patient;
 - f. Include that, if continuing control of a patient's pain after discharge is medically indicated due to the patient's medical condition, a method for continuing pain control will be addressed as part of discharge planning;
 - g. Include the frequency of the following for a patient being prescribed or ordered an opioid for longer than a 30-calendar-day period:
 - i. Face-to-face interactions with the patient,
 - ii. Conducting an assessment of a patient's substance use risk,
 - iii. Renewal of a prescription or order for an opioid without a face-to-face interaction with the patient, and
 - iv. Monitoring the effectiveness of the treatment;
 - h. If applicable according to A.R.S. § 36-2608, include documenting a dispensed opioid in the Arizona Board of Pharmacy Controlled Substances Prescription Monitoring Program database;
 - i. Cover the criteria and procedures for tapering opioid prescription or ordering as part of treatment; and
 - j. Cover the criteria and procedures for offering or referring a patient for treatment for substance use disorder;
2. Include in the plan for the health care institution's quality management program a process for:
 - a. Review of known incidents of opioid-related adverse reactions or other negative outcomes a patient experiences or opioid-related deaths, and
 - b. Surveillance and monitoring of adherence to the policies and procedures in subsection (C)(1);
 3. Except as prohibited by Title 42 Code of Federal Regulations, Chapter I, Subchapter A, Part 2, or as provided in subsection (H)(1), ensure that, if a patient's death may be related to an opioid prescribed or ordered as part of treatment, written notification, in a Department-provided format, is provided to the Department of the patient's death within one working day after the health care institution learns of the patient's death; and
 4. Ensure that informed consent required from a patient or the patient's representative includes:
 - a. The patient's:
 - i. Name,
 - ii. Date of birth or other patient identifier, and
 - iii. Condition for which opioids are being prescribed;
 - b. That an opioid is being prescribed or ordered;
 - c. The potential risks, adverse reactions, complications, and medication interactions associated with the use of an opioid;
 - d. If applicable, the potential risks, adverse outcomes, and complications associated with the concurrent use of an opioid and a benzodiazepine or another sedative-hypnotic medication;
 - e. Alternatives to a prescribed or ordered opioid;
 - f. The name and signature of the individual explaining the use of an opioid to the patient; and
 - g. The signature of the patient or the patient's representative and the date signed.
- D.** Except as provided in subsection (H), an administrator of a health care institution where opioids are prescribed as part of treatment shall ensure that a medical practitioner authorized by policies and procedures to prescribe an opioid in treating a patient:
1. Before prescribing an opioid for a patient of the health care institution:
 - a. Conducts a physical examination of the patient or reviews the documentation from a physical examination conducted during the patient's same episode of care;
 - b. Except as exempted by A.R.S. § 36-2606(G), reviews the patient's profile on the Arizona Board of Pharmacy Controlled Substances Prescription Monitoring Program database;
 - c. Conducts an assessment of the patient's substance use risk or reviews the documentation from an assessment of the patient's substance use risk conducted during the same episode of care by an individual licensed under A.R.S. Title 32 and authorized by policies and procedures to conduct an assessment of the patient's substance use risk;
 - d. Explains to the patient or the patient's representative the risks and benefits associated with the use of opioids or ensures that the patient or the patient's representative understands the risks and benefits associated with the use of opioids, as explained to the patient or the patient's representative by an individual licensed under A.R.S. Title 32 and authorized by policies and procedures to explain to the patient or the patient's representative the risks and benefits associated with the use of opioids;
 - e. Explains alternatives to a prescribed opioid; and
 - f. Obtains informed consent from the patient or the patient's representative that meets the requirements in subsection (C)(4), including the potential risks, adverse outcomes, and complications associated with the concurrent use of an opioid and a benzodiazepine or another sedative-hypnotic medication, if the patient:
 - i. Is also prescribed or ordered a sedative-hypnotic medication, or
 - ii. Has been prescribed a sedative-hypnotic medication by another medical practitioner;
 2. Includes the following information in the patient's medical record, an existing treatment plan, or a new treatment plan developed for the patient:
 - a. The patient's diagnosis;
 - b. The patient's medical history, including co-occurring disorders;
 - c. The opioid to be prescribed;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- d. Other medications or herbal supplements being taken by the patient;
 - e. If applicable:
 - i. The effectiveness of the patient's current treatment,
 - ii. The duration of the current treatment, and
 - iii. Alternative treatments tried by or planned for the patient;
 - f. The expected benefit of the treatment and, if applicable, the benefit of the new treatment compared with continuing the current treatment; and
 - g. Other factors relevant to the patient's being prescribed an opioid; and
3. If applicable, specifies in the patient's discharge plan how medically indicated pain control will occur after discharge to meet the patient's needs.
- E.** Except as provided in subsection (G) or (H), an administrator of a health care institution where opioids are ordered for administration to a patient in the health care institution as part of treatment shall ensure that a medical practitioner authorized by policies and procedures to order an opioid in treating a patient:
- 1. Before ordering an opioid for a patient of the health care institution:
 - a. Conducts a physical examination of the patient or reviews the documentation from a physical examination conducted:
 - i. During the patient's same episode of care; or
 - ii. Within the previous 30 calendar days, at a health care institution transferring the patient to the health care institution or by the medical practitioner who referred the patient for admission to the health care institution;
 - b. Except as exempted by A.R.S. § 36-2606(G), reviews the patient's profile on the Arizona Board of Pharmacy Controlled Substances Prescription Monitoring Program database;
 - c. Conducts an assessment of the patient's substance use risk or reviews the documentation from an assessment of the patient's substance use risk conducted within the previous 30 calendar days by an individual licensed under A.R.S. Title 32 and authorized by policies and procedures to conduct an assessment of the patient's substance use risk;
 - d. Explains to the patient or the patient's representative the risks and benefits associated with the use of opioids or ensures that the patient or the patient's representative understands the risks and benefits associated with the use of opioids, as explained to the patient or the patient's representative by an individual licensed under A.R.S. Title 32 and authorized by policies and procedures to explain to the patient or the patient's representative the risks and benefits associated with the use of opioids;
 - e. If applicable, explains alternatives to an ordered opioid; and
 - f. Obtains informed consent from the patient or the patient's representative, according to subsection (D)(1)(f); and
 - 2. Includes the following information in the patient's medical record, an existing treatment plan, or a new treatment plan developed for the patient:
 - a. The patient's diagnosis;
 - b. The patient's medical history, including co-occurring disorders;
 - c. The opioid being ordered and the reason for the order;
 - d. Other medications or herbal supplements being taken by the patient; and
 - e. If applicable:
 - i. The effectiveness of the patient's current treatment,
 - ii. The duration of the current treatment,
 - iii. Alternative treatments tried by or planned for the patient,
 - iv. The expected benefit of a new treatment compared with continuing the current treatment, and
 - v. Other factors relevant to the patient's being ordered an opioid.
- F.** For a health care institution where opioids are administered as part of treatment or where a patient is provided assistance in the self-administration of medication for a prescribed opioid, including a health care institution in which an opioid may be prescribed or ordered as part of treatment, an administrator, a manager as defined in R9-10-801, or a provider, as applicable to the health care institution, shall:
- 1. Establish, document, and implement policies and procedures for administering an opioid as part of treatment or providing assistance in the self-administration of medication for a prescribed opioid, to protect the health and safety of a patient, that:
 - a. Cover which personnel members may administer an opioid in treating a patient and the required knowledge and qualifications of these personnel members;
 - b. Cover which personnel members may provide assistance in the self-administration of medication for a prescribed opioid and the required knowledge and qualifications of these personnel members;
 - c. Include how, when, and by whom a patient's need for opioid administration is assessed;
 - d. Include how, when, and by whom a patient receiving an opioid is monitored; and
 - e. Cover how, when, and by whom the actions taken according to subsections (F)(1)(c) and (d) are documented;
 - 2. Include in the plan for the health care institution's quality management program a process for:
 - a. Review of incidents of opioid-related adverse reactions or other negative outcomes a patient experiences or opioid-related deaths, and
 - b. Surveillance and monitoring of adherence to the policies and procedures in subsection (F)(1);
 - 3. Except as prohibited by Title 42 Code of Federal Regulations, Chapter I, Subchapter A, Part 2, or as provided in subsection (H)(1), ensure that, if a patient's death may be related to an opioid administered as part of treatment, written notification, in a Department-provided format, is provided to the Department of the patient's death within one working day after the patient's death; and
 - 4. Except as provided in subsection (H), ensure that an individual authorized by policies and procedures to administer an opioid in treating a patient or to provide assistance in the self-administration of medication for a prescribed opioid:
 - a. Before administering an opioid or providing assistance in the self-administration of medication for a prescribed opioid in compliance with an order as part of the treatment for a patient, identifies the patient's need for the opioid;
 - b. Monitors the patient's response to the opioid; and

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- c. Documents in the patient's medical record:
 - i. An identification of the patient's need for the opioid before the opioid was administered or assistance in the self-administration of medication for a prescribed opioid was provided, and

R9-10-121. Disease Prevention and Control

- A. This Section applies:
 - 1. When the Governor has declared a state of emergency, as defined in A.R.S. § 26-301, to address a situation described under A.R.S. § 36-787; and
 - 2. To health care institutions licensed under Article 4, 5, or 8 of this Chapter.
- B. The following definitions apply in this Section:
 - 1. "Communicable disease" has the same meaning as in A.A.C. R9-6-101.
 - 2. "Infection" has the same meaning as in A.A.C. R9-6-101.
 - 3. "Respiratory symptoms" means coughing, shortness of breath, or wheezing not known to be caused by asthma or another chronic lung-related disease.
- C. An administrator or manager, as applicable, shall ensure that policies and procedures are established, documented, and implemented, to protect the health and safety of a resident, that:
 - 1. Cover screening and triage of personnel members, employees, visitors, and, except as provided in subsection (E), any other individuals entering the facility;
 - 2. Cover the manner and frequency of assessing residents to determine a change in a resident's medical condition;
 - 3. Establish disinfection protocols and schedules for frequently touched surfaces; and
 - 4. Specify requirements for distancing residents who exhibit symptoms of a communicable disease from other residents to reduce the chance for infection of another individual.
- D. An administrator or manager, as applicable, shall ensure that:
 - 1. Except as provided in subsection (E), before entering the facility, each individual, including a personnel member, employee, or visitor, is screened for fever or respiratory symptoms indicative of a communicable disease;
 - 2. If an individual refuses to be screened, the individual is excluded from entry to the facility;
 - 3. If an individual is determined to have a fever or respiratory symptoms, the individual is excluded from entry to the facility until symptoms have resolved or the individual has been evaluated and cleared by a medical practitioner;
 - 4. If an individual, other than a resident, develops a fever or respiratory symptoms while in the facility, the individual is required to leave the facility and not return until symptoms have resolved or the individual has been evaluated and cleared by a medical practitioner; and
 - 5. If insufficient personnel members are available to meet the needs of all residents in the facility, the administrator or manager, as applicable, implements the disaster plan required in R9-10-424, R9-10-523, or R9-10-818, as applicable, which may include moving a resident to a different facility.
- E. An administrator or manager, as applicable, may allow an emergency medical care technician, as defined in A.R.S. § 36-2201, to enter the facility without screening if the emergency medical care technician is responding to a call for providing emergency medical services, as defined in A.R.S. § 36-2201, to a resident or other individual in the facility.
- F. An administrator or manager, as applicable, shall ensure that:
 - 1. An assessment of a resident includes whether the resident has a fever or respiratory symptoms indicative of a communicable disease and is documented in the resident's medical record; and

R9-10-225. Psychiatric Services

- A.** An administrator of a hospital that contains an organized psychiatric services unit or a special hospital licensed to provide psychiatric services shall ensure that in the organized psychiatric unit or special hospital:
1. Psychiatric services are provided under the direction of a medical staff member;
 2. An inpatient admitted to the organized psychiatric services unit or special hospital has a principal diagnosis of a mental disorder, a personality disorder, substance abuse, or a significant psychological or behavioral response to an identifiable stressor;
 3. Except in an emergency, a patient receives a nursing assessment before treatment for the patient is initiated;
 4. An individual whose medical needs cannot be met while the individual is an inpatient in an organized psychiatric services unit or a special hospital is not admitted to or is transferred out of the organized psychiatric services unit or special hospital;
 5. Policies and procedures for the organized psychiatric services unit or special hospital are established, documented, and implemented that:
 - a. Establish qualifications for medical staff members and personnel members who provide clinical oversight to behavioral health technicians;
 - b. Establish the process for patient assessment, including identification of a patient's medical conditions and criteria for the on-going monitoring of any identified medical condition;
 - c. Establish the process for developing and implementing a patient's care plan including:
 - i. Obtaining the patient's or the patient's representative's participation in the development of the patient's care plan;
 - ii. Ensuring that the patient is informed of the modality, frequency, and duration of any treatments that are included in the patient's care plan;
 - iii. Informing the patient that the patient has the right to refuse any treatment;
 - iv. Updating the patient's care plan and informing the patient of any changes to the patient's care plan; and
 - v. Documenting the actions in subsection (A)(5)(c)(i) through (iv) in the patient's medical record;
 - d. Establish the process for warning an identified or identifiable individual, as described in A.R.S. § 36-517.02 (B) through (C), if a patient communicates to a medical staff member or personnel member a threat of imminent serious physical harm or death to the individual and the patient has the apparent intent and ability to carry out the threat;
 - e. Establish the criteria for determining when an inpatient's absence is unauthorized, including whether the inpatient:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- i. Was admitted under A.R.S. Title 36, Chapter 5, Articles 1, 2, or 3;
 - ii. Is absent against medical advice; or
 - iii. Is under 18 years of age;
 - f. Identify each type of restraint and seclusion used in the organized psychiatric services unit or special hospital and include for each type of restraint and seclusion used:
 - i. The qualifications of a medical staff member or personnel member who can:
 - (1) Order the restraint or seclusion,
 - (2) Place a patient in the restraint or seclusion,
 - (3) Monitor a patient in the restraint or seclusion,
 - (4) Evaluate a patient's physical and psychological well-being after being placed in the restraint or seclusion and when released from the restraint or seclusion, or
 - (5) Renew the order for restraint or seclusion;
 - ii. On-going training requirements for a medical staff member or personnel member who has direct patient contact while the patient is in a restraint or in seclusion; and
 - iii. Criteria for monitoring and assessing a patient including:
 - (1) Frequencies of monitoring and assessment based on a patient's condition, cognitive status, situational factors, and risks associated with the specific restraint or seclusion;
 - (2) For the renewal of an order for restraint or seclusion, whether an assessment is required before the order is renewed and, if an assessment is required, who may conduct the assessment;
 - (3) Assessment content, which may include, depending on a patient's condition, the patient's vital signs, respiration, circulation, hydration needs, elimination needs, level of distress and agitation, mental status, cognitive functioning, neurological functioning, and skin integrity;
 - (4) If a mechanical restraint is used, how often the mechanical restraint is monitored or loosened; and
 - (5) A process for meeting a patient's nutritional needs and elimination needs;
 - g. Establish the criteria and procedures for renewing an order for restraint or seclusion;
 - h. Establish procedures for internal review of the use of restraint or seclusion;
 - i. Establish requirements for notifying the parent or guardian of a patient who is under 18 years of age and who is restrained or secluded; and
 - j. Establish medical record and personnel record documentation requirements for restraint and seclusion, if applicable;
6. If time-out is used in the organized psychiatric services unit or special hospital, a time-out:
- a. Takes place in an area that is unlocked, lighted, quiet, and private;
 - b. Does not take place in the room approved for seclusion by the Department under R9-10-104;
 - c. Is time-limited and does not exceed two hours per incident or four hours per day;
 - d. Does not result in a patient's missing a meal if the patient is in time-out at mealtime;
 - e. Includes monitoring of the patient by a medical staff member or personnel member at least once every 15 minutes to ensure the patient's health, safety, and welfare and to determine if the patient is ready to leave time-out; and
 - f. Is documented in the patient's medical record, to include:
 - i. The date of the time-out,
 - ii. The reason for the time-out,
 - iii. The duration of the time-out, and
 - iv. The action planned and taken to address the reason for the time-out;
7. Restraint or seclusion is:
- a. Not used as a means of coercion, discipline, convenience, or retaliation;
 - b. Only used when all of the following conditions are met:
 - i. Except as provided in subsection (A)(8), after obtaining an order for the restraint or seclusion;
 - ii. For the management of a patient's aggressive, violent, or self-destructive behavior;
 - iii. When less restrictive interventions have been determined to be ineffective; and
 - iv. To ensure the immediate physical safety of the patient, to prevent imminent harm to the patient or another individual, or to stop physical harm to another individual; and
 - c. Discontinued at the earliest possible time;
8. If as a result of a patient's aggressive, violent, or self-destructive behavior, harm to the patient or another individual is imminent or the patient or another individual is being physically harmed, a personnel member:
- a. May initiate an emergency application of restraint or seclusion for the patient before obtaining an order for the restraint or seclusion, and
 - b. Obtains an order for the restraint or seclusion of the patient during the emergency application of the restraint or seclusion;
9. Restraint or seclusion is:
- a. Only ordered by a physician or a registered nurse practitioner, and
 - b. Not written as a standing order or on an as-needed basis;
10. An order for restraint or seclusion includes:
- a. The name of the individual ordering the restraint or seclusion;
 - b. The date and time that the restraint or seclusion was ordered;
 - c. The specific restraint or seclusion ordered;
 - d. If a drug is ordered as a chemical restraint, the drug's name, strength, dosage, and route of administration;
 - e. The specific criteria for release from restraint or seclusion without an additional order; and
 - f. The maximum duration authorized for the restraint or seclusion;
11. An order for restraint or seclusion is limited to the duration of the emergency situation and does not exceed:
- a. Four continuous hours for a patient who is 18 years of age or older,
 - b. Two continuous hours for a patient who is between the ages of nine and 17 years of age, or
 - c. One continuous hour for a patient who is younger than nine years of age;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

12. If restraint and seclusion are used on a patient simultaneously, the patient receives continuous:
 - a. Face-to-face monitoring by a medical staff member or personnel member, or
 - b. Video and audio monitoring by a medical staff member or personnel member who is in close proximity to the patient;
13. If an order for restraint or seclusion of a patient is not provided by a medical practitioner coordinating the patient's medical services, the medical practitioner is notified as soon as possible;
14. A medical staff member or personnel member does not participate in restraint or seclusion, monitor a patient during restraint or seclusion, or evaluate a patient after restraint or seclusion until the medical staff member or personnel member completes education and training that:
 - a. Includes:
 - i. Techniques to identify medical staff member, personnel member, and patient behaviors; events; and environmental factors that may trigger circumstances that require restraint or seclusion;
 - ii. The use of nonphysical intervention skills, such as de-escalation, mediation, conflict resolution, active listening, and verbal and observational methods;
 - iii. Techniques for identifying the least restrictive intervention based on an assessment of the patient's medical or behavioral health condition;
 - iv. The safe use of restraint and the safe use of seclusion, including training in how to recognize and respond to signs of physical and psychological distress in a patient who is restrained or secluded;
 - v. Clinical identification of specific behavioral changes that indicate that the restraint or seclusion is no longer necessary;
 - vi. Monitoring and assessing a patient while the patient is in restraint or seclusion according to policies and procedures; and
 - vii. Training exercises in which medical staff members and personnel members successfully demonstrate the techniques that the medical staff members and personnel members have learned for managing emergency situations; and
 - b. Is provided by individuals qualified according to policies and procedures;
15. When a patient is placed in restraint or seclusion:
 - a. The restraint or seclusion is conducted according to policies and procedures;
 - b. The restraint or seclusion is proportionate and appropriate to the severity of the patient's behavior and the patient's:
 - i. Chronological and developmental age;
 - ii. Size;
 - iii. Gender;
 - iv. Physical condition;
 - v. Medical condition;
 - vi. Psychiatric condition; and
 - vii. Personal history, including any history of physical or sexual abuse;
 - c. The physician or registered nurse practitioner who ordered the restraint or seclusion is available for consultation throughout the duration of the restraint or seclusion;
- d. A patient is monitored and assessed according to policies and procedures;
- e. A physician or other health professional authorized by policies and procedures assesses the patient within one hour after the patient is placed in the restraint or seclusion and determines:
 - i. The patient's current behavior,
 - ii. The patient's reaction to the restraint or seclusion used,
 - iii. The patient's medical and behavioral condition, and
 - iv. Whether to continue or terminate the restraint or seclusion;
- f. The patient is given the opportunity:
 - i. To eat during mealtime, and
 - ii. To use the toilet; and
- g. The restraint or seclusion is discontinued at the earliest possible time, regardless of the length of time identified in the order;
16. If a patient is placed in seclusion, the room used for seclusion:
 - a. Is approved for use as a seclusion room by the Department under R9-10-104;
 - b. Is not used as a patient's bedroom or a sleeping area;
 - c. Allows full view of the patient in all areas of the room;
 - d. Is free of hazards, such as unprotected light fixtures or electrical outlets;
 - e. Contains at least 60 square feet of floor space; and
 - f. Except as provided in subsection (A)(17), contains a non-adjustable bed that:
 - i. Consists of a mattress on a solid platform that is:
 - (1) Constructed of a durable, non-hazardous material; and
 - (2) Raised off of the floor;
 - ii. Does not have wire springs or a storage drawer; and
 - iii. Is securely anchored in place;
17. If a room used for seclusion does not contain a non-adjustable bed required in subsection (A)(16)(f):
 - a. A piece of equipment is available for use in the room used for seclusion that:
 - i. Is commercially manufactured to safely and humanely restrain a patient's body;
 - ii. Provides support to the trunk and head of a patient's body;
 - iii. Provides restraint to the trunk of a patient's body;
 - iv. Is able to restrict movement of a patient's arms, legs, trunk, and head;
 - v. Allows a patient's body to recline; and
 - vi. Does not inflict harm on a patient's body; and
 - b. Documentation of the manufacturer's specifications for the piece of equipment in subsection (A)(17)(a) is maintained;
18. A seclusion room may be used for services or activities other than seclusion if:
 - a. A sign stating the service or activity scheduled or being provided in the room is conspicuously posted outside the room;
 - b. No permanent equipment other than the bed required in subsection (A)(16)(f) is in the room;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- c. Policies and procedures are established, documented, and implemented that:
 - i. Delineate which services or activities other than seclusion may be provided in the room,
 - ii. List what types of equipment or supplies may be placed in the room for the delineated services, and
 - iii. Provide for the prompt removal of equipment and supplies from the room before the room is used for seclusion; and
- d. The sign required in subsection (A)(18)(a) and equipment and supplies in the room, other than the bed required in subsection (A)(16)(f), are removed before a patient is placed in seclusion in the room;
- 19. A medical staff member or personnel member documents the following information in a patient's medical record before the end of the shift in which the patient is placed in restraint or seclusion or, if the patient's restraint or seclusion does not end during the shift in which it began, during the shift in which the patient's restraint or seclusion ends:
 - a. The emergency situation that required the patient to be restrained or put in seclusion;
 - b. The times the patient's restraint or seclusion actually began and ended;
 - c. The time of the face-to-face assessment required in subsection (A)(12)(a);
 - d. The monitoring required in subsection (A)(12)(b) or (15)(d), as applicable;
 - e. The times the patient was given the opportunity to eat or use the toilet according to subsection (A)(15)(f); and
 - f. The names of the medical staff members and personnel members with direct patient contact while the patient was in the restraint or seclusion; and
- 20. If an emergency situation continues beyond the time limit of an order for restraint or seclusion, the order is renewed according to policies and procedures.
- B. For a patient who was admitted after a suicide attempt or who exhibits suicidal ideation, in addition to the admission requirements in R9-10-208 and discharge planning requirements in R9-10-209, an administrator shall ensure that:
 - 1. The patient receives a suicide assessment; and
 - 2. The patient or the patient's representative receives:
 - a. The results of the suicide assessment in subsection (B)(1);
 - b. Information about the availability of age-appropriate, suicide crisis services, including contact information;
 - c. Specific information about or a referral to one of the following for ongoing or follow-up treatment related to suicide, including scheduling an appointment for the patient when practicable:
 - i. Another health care institution;
 - ii. A medical practitioner or, for a patient going to another state after discharge, a similarly licensed individual in the other state; or
 - iii. A behavioral health professional certified or licensed under A.R.S. Title 32 to provide treatment related to suicide or, for a patient going to another state after discharge, a similarly certified or licensed individual in the other state; and
 - d. Information about and instructions on how to access the Department of Insurance and Financial Institution's website, available through difi.az.gov, developed in compliance with A.R.S. § 20-3503(B), including how to file an appeal of an insurance determination.
- C. An administrator of a hospital that provides opioid treatment services to an outpatient shall comply with the requirements in R9-10-1020.

- E.** An administrator shall provide written notification to the Department of a patient's:
1. Death, if the patient's death is required to be reported according to A.R.S. § 11-593, within one working day after the patient's death; and
 2. Self-injury, within two working days after the patient inflicts a self-injury that requires immediate intervention by an emergency medical services provider.
- F.** Except as specified in R9-10-318(A)(1), if abuse, neglect, or exploitation of a patient is alleged or suspected to have occurred before the patient was admitted or while the patient is not on the premises and not receiving services from a behavioral health inpatient facility's employee or personnel member, an administrator shall report the alleged or suspected abuse, neglect, or exploitation of the patient according to A.R.S. § 46-454.
- G.** If an administrator has a reasonable basis, according to A.R.S. § 46-454, to believe abuse, neglect, or exploitation has occurred on the premises or while a patient is receiving services from a behavioral health inpatient facility's employee or personnel member, the administrator shall:
1. If applicable, take immediate action to stop the suspected abuse, neglect, or exploitation;
 2. Report the suspected abuse, neglect, or exploitation of the patient according to A.R.S. § 46-454;
 3. Document:
 - a. The suspected abuse, neglect, or exploitation;
 - b. Any action taken according to subsection (G)(1); and
 - c. The report in subsection (G)(2);
 4. Maintain the documentation in subsection (G)(3) for at least 12 months after the date of the report in subsection (G)(2);
 5. Initiate an investigation of the suspected abuse, neglect, or exploitation and document the following information

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

within five working days after the report required in subsection (G)(2):

- a. The dates, times, and description of the suspected abuse, neglect, or exploitation;
 - b. A description of any injury to the patient related to the suspected abuse or neglect and any change to the patient's physical, cognitive, functional, or emotional condition;
 - c. The names of witnesses to the suspected abuse, neglect, or exploitation; and
 - d. The actions taken by the administrator to prevent the suspected abuse, neglect, or exploitation from occurring in the future; and
6. Maintain a copy of the documented information required in subsection (G)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.
- H.** An administrator shall establish and document the criteria for determining when a patient's absence is unauthorized, including the criteria for a patient who:
1. Was admitted under A.R.S. Title 36, Chapter 5, Articles 1, 2, or 3;
 2. Is absent against medical advice; or
 3. Is under the age of 18.
- I.** An administrator shall:
1. For a patient who is under a court's jurisdiction, within an hour after determining that the patient's absence is unauthorized according to the criteria in subsection (H), notify the appropriate court or a person designated by the appropriate court;
 2. Document the notification in subsection (I)(1) and the written log required in subsection (I)(3);
 3. Maintain a written log of unauthorized absences for at least 12 months after the date of a patient's absence that includes the:
 - a. Name of a patient absent without authorization;
 - b. If applicable, name of the person notified as required in subsection (I)(1); and
 - c. Date of the notification; and
 4. Evaluate and take action related to unauthorized absences under the quality management program in R9-10-304.
- J.** If a behavioral health inpatient facility has a physician or registered nurse practitioner on-call to comply with R9-10-306(J)(1), an administrator shall ensure that:
1. The on-call schedule is documented;
 2. Personnel members are aware of:
 - a. The location at which the on-call schedule is available to personnel members of the behavioral health inpatient facility,
 - b. The process through which the on-call physician or registered nurse practitioner is contacted,
 - c. The circumstances that would require the on-call physician or registered nurse practitioner to come to the behavioral health inpatient facility, and
 - d. The process through which a request is made for the on-call physician or registered nurse practitioner to come to the behavioral health inpatient facility;
 3. A request for the on-call physician or registered nurse practitioner to come to the behavioral health inpatient facility is documented, including:
 - a. The time that a request for the on-call physician or registered nurse practitioner to come to the behavioral health inpatient facility is made,
 - b. The name of the individual making the request,
 - c. The reason for the request,

- d. The name of the physician or registered nurse practitioner contacted and requested to come to the behavioral health in-patient facility, and
 - e. The time the on-call physician or registered nurse practitioner arrives at the behavioral health inpatient facility in response to a request;
4. The documentation in subsections (J)(1) and (3) is maintained for at least 12 months after the last date on the documentation; and
 5. Documentation related to the request is included in the medical record of the applicable patient.

R9-10-307. Admission; Assessment

- A. Except as provided in R9-10-315(E) or (F), an administrator shall ensure that:
 1. A patient is admitted based upon the patient's presenting behavioral health issue and treatment needs and the behavioral health inpatient facility's ability and authority to provide physical health services, behavioral health services, and ancillary services consistent with the patient's treatment needs;
 2. A patient is admitted on the order of a medical practitioner or clinical director;
 3. A medical practitioner or clinical director, authorized by policies and procedures to accept a patient for admission, is available;
 4. Except in an emergency or as provided in subsections (A)(6) and (7), general consent is obtained from a patient or, if applicable, the patient's representative before or at the time of admission;
 5. The general consent obtained in subsection (A)(4) or the lack of consent in an emergency is documented in the patient's medical record;
 6. General consent is not required from a patient receiving a court-ordered evaluation or court-ordered treatment;
 7. General consent is not required from a patient receiving treatment according to A.R.S. § 36-512;
 8. A medical practitioner performs a medical history and physical examination on a patient within 30 calendar days before admission or within 24 hours after admission and documents the medical history and physical examination in the patient's medical record within 24 hours after admission;
 9. If a medical practitioner performs a medical history and physical examination on a patient before admission, the medical practitioner enters an interval note into the patient's medical record within seven calendar days after admission;
 10. Except when a patient needs crisis services, a behavioral health assessment of a patient is completed to determine the acuity of the patient's behavioral health issue and to identify the behavioral health services needed by the patient before treatment for the patient is initiated and whenever the patient has a significant change in condition or experiences an event that affects treatment;
 11. If the patient was admitted after a suicide attempt or exhibits suicidal ideation, the behavioral health assessment in subsection (A)(10) includes a suicide assessment;
 12. If a behavioral health assessment in subsection (A)(10), including a suicide assessment in subsection (A)(11) if applicable, is conducted by a:
 - a. Behavioral health technician or registered nurse, within 24 hours a behavioral health professional, certified or licensed under A.R.S. Title 32 to provide the behavioral health services needed by the patient, reviews and signs the behavioral health assessment to ensure that the behavioral health assessment identifies the behavioral health services needed by and the acuity of the patient; or
 - b. Behavioral health paraprofessional, a behavioral health professional, certified or licensed under A.R.S. Title 32 to provide the behavioral health services needed by the patient, supervises the behavioral health paraprofessional during the completion of the behavioral health assessment and signs the behavioral health assessment to ensure that the behavioral health assessment identifies the behavioral health services needed by and the acuity of the patient;
 13. When a patient is admitted, a registered nurse:
 - a. Conducts a nursing assessment of a patient's medical condition and history;
 - b. Determines whether the:
 - i. Patient requires immediate physical health services, and
 - ii. Patient's behavioral health issue may be related to the patient's medical condition and history;
 - c. Determines the acuity of the patient's medical condition;
 - d. Documents the patient's nursing assessment and the determinations required in subsection (A)(13)(b) and (c) in the patient's medical record; and
 - e. Signs the patient's medical record;
 14. A behavioral health assessment:
 - a. Documents the patient's:
 - i. Presenting issue, including the acuity of the patient's presenting issue;
 - ii. Substance abuse history;
 - iii. Co-occurring disorder;
 - iv. Legal history, including:
 - (1) Custody,
 - (2) Guardianship, and
 - (3) Pending litigation;
 - v. Court-ordered evaluation;
 - vi. Court-ordered treatment;
 - vii. Criminal justice record;
 - viii. Family history;
 - ix. Behavioral health treatment history;
 - x. Symptoms reported by the patient; and
 - xi. Referrals needed by the patient, if any; and
 - b. Includes:
 - i. Recommendations for further assessment or examination of the patient's needs;
 - ii. Recommendations for staffing levels or personnel member qualifications related to the patient's treatment to ensure patient health and safety;
 - iii. For a patient who:
 - (1) Is admitted to receive crisis services, the behavioral health services and physical health services that will be provided to the

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- patient; or
- (2) Does not need crisis services, the behavioral health services or physical health services that will be provided to the patient until the patient's treatment plan is completed; and
 - iv. The signature and date signed of the personnel member conducting the behavioral health assessment;
15. A patient is referred to a medical practitioner if a determination is made that the patient requires immediate physical health services or the patient's behavioral health issue may be related to the patient's medical condition;
 16. A request for participation in a patient's behavioral health assessment is made to the patient or the patient's representative;
 17. An opportunity for participation in the patient's behavioral health assessment is provided to the patient or the patient's representative;
 18. The request in subsection (A)(16) and the opportunity in subsection (A)(17) are documented in the patient's medical record;
 19. For a patient who is admitted to receive crisis services, the patient's behavioral health assessment is documented in the patient's medical record within eight hours after admission;
 20. Except as provided in subsection (A)(19), a patient's behavioral health assessment is documented in the patient's medical record within 24 hours after completing the assessment; and
 21. If the information listed in subsection (A)(14) is obtained about a patient after the patient's behavioral health assessment is completed, an interval note, including the information, is documented in the patient's medical record within 48 hours after the information is obtained.
- B.** If the results of a suicide assessment required in subsection (A)(11) indicate that the patient could be a danger to self upon discharge, an administrator shall ensure that the information in R9-10-309(B)(2) is made available to the patient or the patient's representative as part of the opportunity for participation in the patient's behavioral health assessment required in subsection (A)(17).
- Historical Note**
- New Section R9-10-307 made by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). - R9-10-308. Treatment Plan**
- A.** Except for a patient admitted to receive crisis services or as provided in R9-10-315(E) or (F), an administrator shall ensure that a treatment plan is developed and implemented for a patient that:
1. Is based on the behavioral health assessment and on-going changes to the behavioral health assessment of the patient;
 2. Is completed:
 - a. By a behavioral health professional or by a behavioral health technician under the clinical oversight of a behavioral health professional, and
 - b. Before the patient receives treatment;
 3. Is documented in the patient's medical record within 24 hours after the patient first receives treatment;
 4. Includes:
 - a. The patient's presenting issue, including the acuity of the patient's presenting issue;
 - b. The behavioral health services and physical health services to be provided to the patient;
 - c. If the patient was admitted after a suicide attempt or who exhibits suicidal ideation:
 - i. The results of the suicide assessment required in R9-10-307(11), and
 - ii. Information specific to helping prevent a recurrence;
 - d. The signature of the patient or the patient's representative and date signed, or documentation of the refusal to sign;
 - e. The date when the patient's treatment plan will be reviewed;
 - f. If a discharge date has been determined, the treatment needed after discharge; and
 - g. The signature of the personnel member who developed the treatment plan and the date signed;
 5. If the treatment plan was completed by a behavioral health technician, is reviewed and signed by a behavioral health professional within 24 hours after the completion of the treatment plan to ensure that the treatment plan identifies the acuity of the patient and meets the patient's treatment needs; and
 6. Is reviewed and updated on an on-going basis:
 - a. According to the review date specified in the treatment plan,
 - b. When a treatment goal is accomplished or changes,
 - c. When additional information that affects the patient's behavioral health assessment is identified, and
 - d. When a patient has a significant change in condition or experiences an event that affects treatment.
- B.** An administrator shall ensure that:
1. A request for participation in developing a patient's treatment plan is made to the patient or the patient's representative;
 2. An opportunity for participation in developing the patient's treatment plan is provided to the patient or the patient's representative; and
 3. The request in subsection (B)(1) and the opportunity in subsection (B)(2) are documented in the patient's medical record.
- C.** If a patient who is admitted to receive crisis services remains admitted as a patient after the patient no longer needs crisis services, an administrator shall ensure that a treatment plan for the patient is:
1. Except for subsection (A)(3), completed according to the requirements in subsection (A); and
 2. Documented in the patient's medical record within 24 hours after the patient no longer needs crisis services.
- Historical Note**
- New Section R9-10-308 made by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). Amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2). - R9-10-309. Discharge**

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- A. Except as provided in R9-10-315(E) or (F), an administrator shall ensure that a discharge plan for a patient is:
1. Developed that:
 - a. Identifies any specific needs of the patient after discharge;
 - b. If the discharge date has been determined, includes the discharge date;
 - c. Is completed before discharge occurs; and
 - d. Includes a description of the level of care that may meet the patient's assessed and anticipated needs after discharge;
 2. Documented in the patient's medical record within 48 hours after the discharge plan is completed; and
 3. Provided to the patient or the patient's representative before the discharge occurs.
- B. For a patient who was admitted after a suicide attempt or who exhibits suicidal ideation, in addition to the discharge planning requirements in subsection (A), an administrator shall ensure that:
1. The patient receives a suicide assessment; and
 2. The patient or the patient's representative receives:
 - a. The results of the suicide assessment;
 - b. Information about the availability of age-appropriate, suicide crisis services, including contact information; and
 - c. Information about and instructions on how to access the Department of Insurance and Financial Institution's website, available through difi.az.gov, developed in compliance with A.R.S. § 20-3503(B), including how to file an appeal of an insurance determination.
- C. An administrator shall ensure that:
1. A request for participation in developing a patient's discharge plan is made to the patient or the patient's representative,
 2. An opportunity for participation in developing the patient's discharge plan is provided to the patient or the patient's representative, and
 3. The request in subsection (C)(1) and the opportunity in subsection (C)(2) are documented in the patient's medical record.
- D. An administrator shall ensure that a patient is discharged from a behavioral health inpatient facility when the patient's treatment needs are not consistent with the services that the behavioral health inpatient facility is authorized and able to provide.
- E. An administrator shall ensure that there is a documented discharge order by a medical practitioner or behavioral health professional before a patient is discharged unless the patient leaves the behavioral health inpatient facility against a medical practitioner's or behavioral health professional's advice.
- F. An administrator shall ensure that, at the time of discharge, a patient receives:
1. A referral for treatment or ancillary services that the patient may need after discharge, if applicable; and
 2. For a patient who was admitted after a suicide attempt or who exhibits suicidal ideation, specific information about or a referral to one of the following for ongoing or follow-up treatment related to suicide, including scheduling an appointment for the patient when practicable:
 - a. Another health care institution;
 - b. A medical practitioner or, for a patient going to another state after discharge, a similarly licensed individual in the other state; or
 - c. A behavioral health professional certified or licensed under A.R.S. Title 32 to provide treatment related to suicide or, for a patient going to another state after discharge, a similarly certified or licensed individual in the other state.
- G. If a patient is discharged to any location other than a health care institution, an administrator shall ensure that:
1. Discharge instructions are documented, and
 2. The patient or the patient's representative is provided with a copy of the discharge instructions.
- H. An administrator shall ensure that a discharge summary:
1. Is entered into the patient's medical record within 10 working days after a patient's discharge; and
 2. Includes:
 - a. The following information authenticated by a medical practitioner or behavioral health professional:
 - i. The patient's presenting issue and other physical health and behavioral health issues identified in the patient's nursing assessment, behavioral health assessment, or treatment plan;
 - ii. A summary of the treatment provided to the patient;
 - iii. The patient's progress in meeting treatment goals, including treatment goals that were and were not achieved; and
 - iv. The name, dosage, and frequency of each medication ordered for the patient by a medical practitioner at the behavioral health inpatient facility at the time of the patient's discharge;
 - b. For a patient who was admitted after a suicide attempt or who exhibits suicidal ideation, the following information:
 - i. A description of the specific information about ongoing or follow-up treatment related to suicide provided to the patient or the patient's representative;
 - ii. Whether a referral was made for the patient according to subsection (F)(2) for ongoing or follow-up treatment related to suicide and, if so, information about the referral; and
 - iii. Whether an appointment was scheduled for the patient according to subsection (F)(2) for ongoing or follow-up treatment related to suicide and, if so, the date and time of the appointment; and
 - c. A description of the disposition of the patient's possessions, funds, or medications brought to the behavioral health inpatient facility by the patient.
- I. An administrator shall ensure that a patient who is dependent upon a prescribed medication is offered detoxification services, opioid treatment, or a written referral to detoxification services or opioid treatment before the patient is discharged from the behavioral health inpatient facility if a medical practitioner for the behavioral health inpatient facility will not be prescribing the medication for the patient at or after discharge.

R9-10-310. Transport; Transfer

- A. Except as provided in subsection (B), an administrator shall ensure that:
1. A personnel member coordinates the transport and the services provided to the patient;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

2. According to policies and procedures:
 - a. An evaluation of the patient is conducted before and after the transport,
 - b. Information from the patient's medical record is provided to a receiving health care institution,
 - c. A personnel member explains risks and benefits of the transport to the patient or the patient's representative, and
 - d. A personnel member communicates or documents why the personnel member did not communicate with an individual at a receiving health care institution; and
 3. The patient's medical record includes documentation of:
 - a. Communication or lack of communication with an individual at a receiving health care institution;
 - b. The date and time of the transport;
 - c. The mode of transportation; and
 - d. If applicable, the name of the personnel member accompanying the patient during a transport.
- B.** Subsection (A) does not apply to:
1. Transportation to a location other than a licensed health care institution,
 2. Transportation provided for a patient by the patient or the patient's representative,

R9-10-322. Emergency and Safety Standards

- A. An administrator shall ensure that a behavioral health inpatient facility has:
 - 1. A fire alarm system installed according to the National Fire Protection Association 72: National Fire Alarm and Signaling Code, incorporated by reference in R9-10-104.01, and a sprinkler system installed according to the National Fire Protection Association 13 Standard for the Installation of Sprinkler Systems, incorporated by reference in R9-10-104.01, that are in working order; or
 - 2. An alternative method to ensure a patient's safety, documented and approved by the local jurisdiction.
- B. An administrator shall ensure that:
 - 1. A disaster plan is developed, documented, maintained in a location accessible to personnel members and other employees, and, if necessary, implemented that includes:
 - a. When, how, and where patients will be relocated;
 - b. How a patient's medical record will be available to individuals providing services to the patient during a disaster;
 - c. A plan to ensure each patient's medication will be available to administer to the patient during a disaster; and
 - d. A plan for obtaining food and water for individuals present in the behavioral health inpatient facility or the behavioral health inpatient facility's relocation site during a disaster;
 - 2. The disaster plan required in subsection (B)(1) is reviewed at least once every 12 months;
 - 3. Documentation of a disaster plan review required in subsection (B)(2) is created, is maintained for at least 12 months after the date of the disaster plan review, and includes:
 - a. The date and time of the disaster plan review;
 - b. The name of each personnel member, employee, volunteer, or student participating in the disaster plan review;
 - c. A critique of the disaster plan review; and

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- d. If applicable, recommendations for improvement;
 4. A disaster drill for employees is conducted on each shift at least once every three months and documented;
 5. An evacuation drill for employees and patients:
 - a. Is conducted at least once every six months; and
 - b. Includes all individuals on the premises except for:
 - i. A patient whose medical record contains documentation that evacuation from the behavioral health inpatient facility would cause harm to the patient, and
 - ii. Sufficient personnel members to ensure the health and safety of patients not evacuated according to subsection (B)(5)(b)(i);
 6. Documentation of each evacuation drill is created, is maintained for at least 12 months after the date of the evacuation drill, and includes:
 - a. The date and time of the evacuation drill;
 - b. The amount of time taken for employees and patients to evacuate to a designated area;
 - c. If applicable:
 - i. An identification of patients needing assistance for evacuation, and
 - ii. An identification of patients who were not evacuated;
 - d. Any problems encountered in conducting the evacuation drill; and
 - e. Recommendations for improvement, if applicable; and
 7. An evacuation path is conspicuously posted on each hallway of each floor of the behavioral health inpatient facility.
- C. An administrator shall:**
1. Obtain a fire inspection conducted according to the time-frame established by the local fire department or the State Fire Marshal,
 2. Make any repairs or corrections stated on the fire inspection report, and
 3. Maintain documentation of a current fire inspection.

Adopted effective June 14, 1979 (Supp. 79-3). Former Section R9-10-322 repealed, new Section R9-10-322 adopted effective February 4, 1981 (Supp. 81-1). Section repealed by final rulemaking at 8 A.A.R. 2785, effective October 1, 2002 (Supp. 02-2). New Section R9-10-322 made by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). R9-10-322 renumbered to R9-10-323; new Section R9-10-322 renumbered from R9-10-321 and amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2). Amended by final expedited rulemaking, at 25 A.A.R. 3481 with an immediate effective date of November 5, 2019 (Supp. 19-4).
- R9-10-323. Environmental Standards**
- A. An administrator shall ensure that:**
1. The premises and equipment are:
 - a. Cleaned and, if applicable, disinfected according to policies and procedures designed to prevent, minimize, and control illness or infection; and
 - b. Free from a condition or situation that may cause a patient or other individual to suffer physical injury;
 2. A pest control program that complies with A.A.C. R3-8-201(C)(4) is implemented and documented;
 3. Biohazardous medical waste is identified, stored, and disposed of according to 18 A.A.C. 13, Article 14 and policies and procedures;
 4. Equipment used at the behavioral health inpatient facility is:
 - a. Maintained in working order;
 - b. Tested and calibrated according to the manufacturer's recommendations or, if there are no manufacturer's recommendations, as specified in policies and procedures; and
 - c. Used according to the manufacturer's recommendations;
 5. Documentation of equipment testing, calibration, and repair is maintained for at least 12 months after the date of the testing, calibration, or repair;
 6. Garbage and refuse are:
 - a. In areas used for food storage, food preparation, or food service, stored in covered containers lined with plastic bags;
 - b. In areas not used for food storage, food preparation, or food service, stored:
 - i. According to the requirements in subsection (6)(a), or
 - ii. In a paper-lined container that is cleaned and sanitized as often as necessary to ensure that the container is clean; and
 - c. Removed from the premises at least once a week;
 7. Heating and cooling systems maintain the behavioral health inpatient facility at a temperature between 70° F and 84° F;
 8. Common areas:
 - a. Are lighted to assure the safety of patients, and
 - b. Have lighting sufficient to allow personnel members to monitor patient activity;
 9. Hot water temperatures are maintained between 95° F and 120° F in the areas of a behavioral health inpatient facility used by patients;
 10. The supply of hot and cold water is sufficient to meet the personal hygiene needs of patients and the cleaning and sanitation requirements in this Article;
 11. Soiled linen and soiled clothing stored by the behavioral health inpatient facility are maintained separate from clean linen and clothing and stored in closed containers away from food storage, kitchen, and dining areas;
 12. Oxygen containers are secured in an upright position;
 13. Poisonous or toxic materials stored by the behavioral health inpatient facility are maintained in labeled containers in a locked area separate from food preparation and storage, dining areas, and medications and are inaccessible to patients;
 14. Combustible or flammable liquids and hazardous materials stored by a behavioral health inpatient facility are stored in the original labeled containers or safety containers in a locked area inaccessible to patients;
 15. If pets or animals are allowed in the behavioral health inpatient facility, pets or animals are:
 - a. Controlled to prevent endangering the patients and to maintain sanitation;
 - b. Licensed consistent with local ordinances; and
 - c. For a dog or cat, vaccinated against rabies;
 16. If a water source that is not regulated under 18 A.A.C. 4 by the Arizona Department of Environmental Quality is used:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. The water source is tested at least once every 12 months for total coliform bacteria and fecal coliform or *E. coli* bacteria;
 - b. If necessary, corrective action is taken to ensure the water is safe to drink; and
 - c. Documentation of testing is maintained for at least 12 months after the date of the test; and
17. If a non-municipal sewage system is used, the sewage system is in working order and is maintained according to applicable state laws and rules.
- B.** An administrator shall ensure that:
1. Smoking tobacco products is not permitted within a behavioral health inpatient facility; and
 2. Except as provided in R9-10-318(A)(11), smoking tobacco products may be permitted on the premises outside a behavioral health inpatient facility if:
 - a. Signs designating smoking areas are conspicuously posted, and
 - b. Smoking is prohibited in areas where combustible materials are stored or in use.
- C.** If a swimming pool is located on the premises, an administrator shall ensure that:
1. At least one personnel member with cardiopulmonary resuscitation training that meets the requirements in R9-10-303(C)(1)(e) is present in the pool area when a patient is in the pool area, and
 2. At least two personnel members are present in the pool area when two or more patients are in the pool area.
- Historical Note**
- Section R9-10-323, formerly numbered as R9-10-234, renumbered as an emergency effective February 22, 1979, pursuant to A.R.S. § 41-1003, valid for only 90 days (Supp. 79-1). Adopted effective June 14, 1979 (Supp. 79-3). Former Section R9-10-323 repealed, new Section R9-10-323 adopted effective February 4, 1981 (Supp. 81-1). Section repealed by final rulemaking at 8 A.A.R. 2785, effective October 1, 2002 (Supp. 02-2). New Section R9-10-323 made by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). R9-10-323 renumbered to R9-10-324; new Section R9-10-323 renumbered from R9-10-322 and amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2). Amended by final expedited rulemaking at 25 A.A.R. 259, effective January 8, 2019 (Supp. 19-1).
- R9-10-324. Physical Plant Standards**
- A.** An administrator shall ensure that the premises and equipment are sufficient to accommodate:
1. The services stated in the behavioral health inpatient facility's scope of services, and
 2. An individual accepted as a patient by the behavioral health inpatient facility.
- B.** An administrator shall ensure that:
1. A behavioral health inpatient facility has a:
 - a. Waiting area with seating for patients and visitors;
 - b. Room that provides privacy for a patient to receive treatment or visitors; and
 - c. Common area and a dining area that:
 - i. Are not converted, partitioned, or otherwise used as a sleeping area; and
 - ii. Contain furniture and materials to accommodate the recreational and socialization needs of the patients and other individuals in the behavioral health inpatient facility;
 2. A bathroom is available for use by visitors during the behavioral health inpatient facility's hours of operation and:
 - a. Provides privacy; and
 - b. Contains:
 - i. A working sink with running water,
 - ii. A working toilet that flushes and has a seat,
 - iii. Toilet tissue,
 - iv. Soap for hand washing,
 - v. Paper towels or a mechanical air hand dryer,
 - vi. Lighting, and
 - vii. A window that opens or another means of ventilation;
 3. For every six patients, there is at least one working toilet that flushes and has a seat and one sink with running water;
 4. For every eight patients, there is at least one working bathtub or shower with a slip-resistant surface;
 5. A patient bathroom complies with the following:
 - a. Provides privacy when in use;
 - b. Contains:
 - i. A shatterproof mirror, unless the patient's treatment plan requires otherwise;
 - ii. A window that opens or another means of ventilation; and
 - iii. Nonporous surfaces for shower enclosures and slip-resistant surfaces in tubs and showers;
 - c. Has plumbing, piping, ductwork, or other potentially hazardous elements concealed above a ceiling;
 - d. If the bathroom or shower area has a door, the door swings outward to allow for staff emergency access;
 - e. If grab bars for the toilet and tub or shower or other assistive devices are identified in the patient's treatment plan, has grab bars or other assistive devices to provide for patient safety;
 - f. If a grab bar is provided, has the space between the grab bar and the wall filled to prevent a cord being tied around the grab bar;
 - g. Does not contain a towel bar, a shower curtain rod, or a lever handle that is not a specifically designed anti-ligature lever handle;
 - h. Has tamper-resistant lighting fixtures, sprinkler heads, and electrical outlets; and
 - i. For a bathroom with a sprinkler head where a patient is not supervised while the patient is in the bathroom, has a sprinkler head that is recessed or designed to minimize patient access;
 6. If a patient bathroom door locks from the inside, an employee has a key and access to the bathroom;
 7. Each patient is provided a bedroom for sleeping;
 8. A patient bedroom complies with the following:
 - a. Is not used as a common area;
 - b. Is not used as a passageway to another bedroom or bathroom unless the bathroom is for the exclusive use of a patient occupying the bedroom;
 - c. Contains a door that opens into a hallway, common area, or outdoors and, except as provided in subsection (E), another means of egress;
 - d. Is constructed and furnished to provide unimpeded access to the door;
 - e. Has window or door covers that provide patient privacy;
 - f. Has floor to ceiling walls;
 - g. Is a:
 - i. Private bedroom that contains at least 60 square feet of floor space, not including the closet; or

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- ii. Shared bedroom that:
 - (1) Is shared by no more than four patients;
 - (2) Contains, except as provided in subsection (B)(9), at least 60 square feet of floor space, not including a closet, for each patient occupying the bedroom; and
 - (3) Provides sufficient space between beds to ensure that a patient has unobstructed access to the bedroom door;
 - h. Contains for each patient occupying the bedroom:
 - i. A bed that is: at least 36 inches wide and at least 72 inches long, and consists of at least a frame and mattress and linens that is not a threat to health and safety; and
 - ii. Individual storage space for personnel effects and clothing such as shelves, a dresser, or chest of drawers;
 - i. Has clean linen for each bed including mattress pad, sheets large enough to tuck under the mattress, pillows, pillow cases, bedspread, waterproof mattress covers as needed, and blankets to ensure warmth and comfort for each patient;
 - j. Has sufficient lighting for a patient occupying the bedroom to read; and
 - k. If applicable, has a drawer pull that is recessed to eliminate the possibility of use as a tie-off point;
 - 9. If a behavioral health inpatient facility licensed before November 1, 2003 was approved for 50 square feet of floor space for each patient in a bedroom, ensure that the bedroom contains at least 50 square feet for each patient not including the closet;
 - 10. In a patient bathroom or a patient bedroom:
 - a. The ceiling is secured from access or at least 9 feet in height; and
 - b. A ventilation grille is:
 - i. Secured and has perforations that are too small to use as a tie-off point, or
 - ii. Of sufficient height to prevent patient access;
 - 11. For a door located in an area of the behavioral health inpatient facility that is accessible to patients:
 - a. A door closing device, if used on a patient bedroom door, is mounted on the public side of the door;
 - b. A door's hinges are designed to minimize points for hanging;
 - c. Except for a door lever handle that contains specifically designed anti-ligature hardware, a door lever handle points downward when in the latched or unlatched position; and
 - d. Hardware has tamper-resistant fasteners; and
 - 12. A window located in an area of the behavioral health inpatient facility that is accessible to patients is fabricated with laminated safety glass or protected by polycarbonate, laminate, or safety screens.
- C. An administrator of a licensed behavioral health inpatient facility may submit a request, in a Department-provided format, for additional time to comply with a physical plant requirement in subsection (B)(5)(c) through (B)(5)(i), (B)(10), (B)(11), or (B)(12) that includes:
 - 1. The rule citation for the specific plant requirement,
 - 2. The current physical plant condition that does not comply with the physical plant requirement,
 - 3. How the current physical plant condition will be changed to comply with the physical plant requirement,
 - 4. Estimated completion date of the identified physical plant change, and
 - 5. Specific actions taken to ensure the health and safety of a patient until the physical plant requirement is met.
- D. When the Department receives a request for additional time to comply with a physical plant requirement in subsection (B)(5)(c) through (B)(5)(i), (B)(10), (B)(11), or (B)(12) submitted according to subsection (C), the Department may approve the request for up to 24 months after the effective date of these rules based on:
 - 1. The behavioral health inpatient facility's scope of services,
 - 2. The expected patient acuity based on the behavioral health inpatient facility's scope of services,
 - 3. The specific physical plant requirement in the request, and
 - 4. The threat to patients' health and safety.
- E. A bedroom in a behavioral health inpatient facility is not required to have a second means of egress if:
 - 1. An administrator ensures that policies and procedures are established, documented, and implemented that provide for the safe evacuation of a patient in the bedroom based on the patient's physical and mental limitations and the location of the bedroom; or
 - 2. The building where the bedroom is located has a fire alarm system and a sprinkler system required in R9-10-322(A)(1).
- F. If a swimming pool is located on the premises, an administrator shall ensure that:
 - 1. The swimming pool is enclosed by a wall or fence that:
 - a. Is at least five feet in height as measured on the exterior of the wall or fence;
 - b. Has no vertical openings greater than four inches across;
 - c. Has no horizontal openings, except as described in subsection (F)(1)(e);
 - d. Is not chain-link;
 - e. Does not have a space between the ground and the bottom fence rail that exceeds four inches in height; and
 - f. Has a self-closing, self-latching gate that:
 - i. Opens away from the swimming pool,
 - ii. Has a latch located at least 54 inches from the ground, and
 - iii. Is locked when the swimming pool is not in use; and
 - 2. A life preserver or shepherd's crook is available and accessible in the pool area.
- G. An administrator shall ensure that a spa that is not enclosed by a wall or fence as described in subsection (F)(1) is covered and locked when not in use.

R9-10-421. Medication Services

- A. An administrator shall ensure that policies and procedures for medication services:

1. Include:
 - a. A process for providing information to a resident about medication prescribed for the resident including:
 - i. The prescribed medication's anticipated results,
 - ii. The prescribed medication's potential adverse reactions,
 - iii. The prescribed medication's potential side effects, and
 - iv. Potential adverse reactions that could result from not taking the medication as prescribed;
 - b. Procedures for preventing, responding to, and reporting:
 - i. A medication error,
 - ii. An adverse response to a medication, or
 - iii. A medication overdose;
 - c. Procedures to ensure that a pharmacist reviews a resident's medications at least once every three months and provides documentation to the resident's attending physician and the director of nursing indicating potential medication problems such as incompatible or duplicative medications;
 - d. Procedures for documenting medication services; and
 - e. Procedures for assisting a resident in obtaining medication; and
2. Specify a process for review through the quality management program of:
 - a. A medication administration error, and
 - b. An adverse reaction to a medication.

- B. An administrator shall ensure that:

1. Policies and procedures for medication administration:
 - a. Are reviewed and approved by the director of nursing;
 - b. Specify the individuals who may:
 - i. Order medication, and
 - ii. Administer medication;
 - c. Ensure that medication is administered to a resident only as prescribed; and
 - d. Cover the documentation of a resident's refusal to take prescribed medication in the resident's medical record;
2. Verbal orders for medication services are taken by a nurse, unless otherwise provided by law;
3. A medication administered to a resident:
 - a. Is administered in compliance with an order, and
 - b. Is documented in the resident's medical record; and
4. If a psychotropic medication is administered to a resident, the psychotropic medication:
 - a. Is only administered to a resident for a diagnosed medical condition; and

- b. Unless clinically contraindicated or otherwise ordered by an attending physician or the attending physician's designee, is gradually reduced in dosage while the resident is simultaneously provided with interventions such as behavior and environment modification in an effort to discontinue the psychotropic medication, unless a dose reduction is attempted and the resident displays behavior justifying the need for the psychotropic medication, and the attending physician documents the necessity for the continued use and dosage.

- C. An administrator shall ensure that:

1. A current drug reference guide is available for use by personnel members; and
2. If pharmaceutical services are provided:
 - a. The pharmaceutical services are provided under the direction of a pharmacist;
 - b. The pharmaceutical services comply with A.R.S. Title 36, Chapter 27; A.R.S. Title 32, Chapter 18; and 4 A.A.C. 23; and
 - c. A copy of the pharmacy license is provided to the Department upon request.

- D. When medication is stored at a nursing care institution, an administrator shall ensure that:

1. Medication is stored in a separate locked room, closet, or self-contained unit used only for medication storage;
2. Medication is stored according to the instructions on the medication container; and
3. Policies and procedures are established, documented, and implemented to protect the health and safety of a resident for:
 - a. Receiving, storing, inventorying, tracking, dispensing, and discarding medication including expired medication;
 - b. Discarding or returning prepackaged and sample medication to the manufacturer if the manufacturer requests the discard or return of the medication;
 - c. A medication recall and notification of residents who received recalled medication; and
 - d. Storing, inventorying, and dispensing controlled substances.

- E. An administrator shall ensure that a personnel member immediately reports a medication error or a resident's adverse reaction to a medication to the medical practitioner who ordered the medication and the nursing care institution's director of nursing.

Historical Note

Adopted effective January 28, 1980 (Supp. 80-1). Section repealed by final rulemaking at 8 A.A.R. 2785, effective October 1, 2002 (Supp. 02-2). R9-10-422. Infection Control

- An administrator shall ensure that:

1. An infection control program is established, under the direction of an individual qualified according to policies and procedures, to prevent the development and transmission of infections and communicable diseases including:
 - a. A method to identify and document infections occurring at the nursing care institution;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- b. Analysis of the types, causes, and spread of infections and communicable diseases at the nursing care institution;
 - c. The development of corrective measures to minimize or prevent the spread of infections and communicable diseases at the nursing care institution; and
 - d. Documentation of infection control activities including:
 - i. The collection and analysis of infection control data,
 - ii. The actions taken related to infections and communicable diseases, and
 - iii. Reports of communicable diseases to the governing authority and state and county health departments;
 - 2. Infection control documentation is maintained for at least 12 months after the date of the documentation;
 - 3. Policies and procedures are established, documented, and implemented that cover:
 - a. Handling and disposal of biohazardous medical waste;
 - b. Sterilization, disinfection, and storage of medical equipment and supplies;
 - c. Using personal protective equipment such as aprons, gloves, gowns, masks, or face protection when applicable;
 - d. Cleaning of an individual's hands when the individual's hands are visibly soiled and before and after providing a service to a resident;
 - e. Training of personnel members, employees, and volunteers in infection control practices; and
 - f. Work restrictions for a personnel member with a communicable disease or infected skin lesion;
 - 4. Biohazardous medical waste is identified, stored, and disposed of according to 18 A.A.C. 13, Article 14 and policies and procedures;
 - 5. Soiled linen and clothing are:
 - a. Collected in a manner to minimize or prevent contamination;
 - b. Bagged at the site of use; and
 - c. Maintained separate from clean linen and clothing and away from food storage, kitchen, or dining areas; and
 - 6. A personnel member, an employee, or a volunteer washes hands or uses a hand disinfection product after a resident contact and after handling soiled linen, soiled clothing, or potentially infectious material.
- a. A copy of the contracted food establishment's license or permit under 9 A.A.C. 8, Article 1 is maintained by the nursing care institution; and
 - b. The nursing care institution is able to store, refrigerate, and reheat food to meet the dietary needs of a resident;
 - 4. A registered dietitian:
 - a. Reviews a food menu before the food menu is used to ensure that a resident's nutritional needs are being met,
 - b. Documents the review of a food menu, and
 - c. Is available for consultation regarding a resident's nutritional needs; and
 - 5. If a registered dietitian is not employed full-time, an individual is designated as a director of food services who consults with a registered dietitian as often as necessary to ensure that the nutritional needs of a resident are met.
 - B.** A registered dietitian or director of food services shall ensure that:
 - 1. Food is prepared:
 - a. Using methods that conserve nutritional value, flavor, and appearance; and
 - b. In a form to meet the needs of a resident such as cut, chopped, ground, pureed, or thickened;
 - 2. A food menu:
 - a. Is prepared at least one week in advance,
 - b. Includes the foods to be served on each day,
 - c. Is conspicuously posted at least one day before the first meal on the food menu will be served,
 - d. Includes any food substitution no later than the morning of the day of meal service with a food substitution, and
 - e. Is maintained for at least 60 calendar days after the last day included in the food menu;
 - 3. Meals and snacks for each day are planned and served using the applicable guidelines in <http://www.health.gov/dietaryguidelines/2010.asp>;
 - 4. A resident is provided:
 - a. A diet that meets the resident's nutritional needs as specified in the resident's comprehensive assessment and care plan;
 - b. Three meals a day with not more than 14 hours between the evening meal and breakfast except as provided in subsection (B)(4)(d);
 - c. The option to have a daily evening snack identified in subsection (B)(4)(d)(ii) or other snack; and
 - d. The option to extend the time span between the evening meal and breakfast from 14 hours to 16 hours if:
 - i. A resident group agrees; and
 - ii. The resident is offered an evening snack that includes meat, fish, eggs, cheese, or other protein, and a serving from either the fruit and vegetable food group or the bread and cereal food group;
 - 5. A resident is provided with food substitutions of similar nutritional value if:
 - a. The resident refuses to eat the food served, or
 - b. The resident requests a substitution;
 - 6. Recommendations and preferences are requested from a resident or the resident's representative for meal planning;
 - 7. A resident requiring assistance to eat is provided with assistance that recognizes the resident's nutritional, physical, and social needs, including the use of adaptive eating equipment or utensils;

Historical Note

Adopted effective January 28, 1980 (Supp. 80-1). Section repealed by final rulemaking at 8 A.A.R. 2785, effective October 1, 2002 (Supp. 02-2). New Section R9-10-422 made by exempt rulemaking at 19 A.A.R. 2015, effective October 1, 2013 (Supp. 13-2). Amended by exempt rulemaking at 20 A.A.R. 1409, pursuant to Laws 2013, Ch. 10, § 13; effective July 1, 2014 (Supp. 14-2).

R9-10-423. Food Services

- A.** An administrator shall ensure that:
 - 1. The nursing care institution has a license or permit as a food establishment under 9 A.A.C. 8, Article 1;
 - 2. A copy of the nursing care institution's food establishment license or permit is maintained;
 - 3. If a nursing care institution contracts with a food establishment, as established in 9 A.A.C. 8, Article 1, to prepare and deliver food to the nursing care institution:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

8. Tableware, utensils, equipment, and food-contact surfaces are clean and in good repair;
 9. A resident eats meals in a dining area unless the resident chooses to eat in the resident's room or is confined to the resident's room for medical reasons documented in the resident's medical record; and
 10. Water is available and accessible to residents.
- C. If a nursing care institution has nutrition and feeding assistants, an administrator shall ensure that:
1. A nutrition and feeding assistant:
 - a. Is at least 16 years of age;
 - b. If applicable, complies with the fingerprint clearance card requirements in A.R.S. § 36-411;
 - c. Completes a nutrition and feeding assistant training course within 12 months before initially providing nutrition and feeding assistance;
 - d. Provides nutrition and feeding assistance where nursing personnel are present;
 - e. Immediately reports an emergency to a nurse or, if a nurse is not present in the common area, to nursing personnel; and
 - f. If the nutrition and feeding assistant observes a change in a resident's physical condition or behavior, reports the change to a nurse or, if a nurse is not present in the common area, to nursing personnel;
 2. A resident is not eligible to receive nutrition and feeding assistance from a nutrition and feeding assistant if the resident:
 - a. Has difficulty swallowing,
 - b. Has had recurrent lung aspirations,
 - c. Requires enteral feedings,
 - d. Requires parenteral feedings, or
 - e. Has any other eating or drinking difficulty that may cause the resident's health or safety to be compromised if the resident receives nutrition and feeding assistance from a nutrition and feeding assistant;
 3. Only an eligible resident receives nutrition and feeding assistance from a nutrition and feeding assistant;
 4. A nurse determines if a resident is eligible to receive nutrition and feeding assistance from a nutrition and feeding assistant, based on:
 - a. The resident's comprehensive assessment,
 - b. The resident's care plan, and
 - c. An assessment conducted by the nurse when making the determination;
 5. A method is implemented that identifies eligible residents that ensures only eligible residents receive nutrition and feeding assistance from a nutrition and feeding assistant;
 6. When a nutrition and feeding assistant initially provides nutrition and feeding assistance and at least once every three months, a nurse observes the nutrition and feeding assistant while the nutrition and feeding assistant is providing nutrition and feeding assistance to ensure that the nutrition and feeding assistant is providing nutrition and feeding assistance appropriately;
 7. A nurse documents the nurse's observations required in subsection (C)(6); and
 8. A nutrition and feeding assistant is provided additional training:
 - a. According to policies and procedures, and
 - b. If a nurse identifies a need for additional training based on the nurse's observation in subsection (C)(6).

R9-10-424. Emergency and Safety Standards

A. An administrator shall ensure that:

1. A disaster plan is developed, documented, maintained in a location accessible to personnel members and other employees, and, if necessary, implemented that includes:
 - a. When, how, and where residents will be relocated, including:
 - i. Instructions for the evacuation or transfer of residents,
 - ii. Assigned responsibilities for each employee and personnel member, and
 - iii. A plan for continuing to provide services to meet a resident's needs;
 - b. How a resident's medical record will be available to individuals providing services to the resident during a disaster;
 - c. A plan for back-up power and water supply;
 - d. A plan to ensure a resident's medications will be available to administer to the resident during a disaster;
 - e. A plan to ensure a resident is provided nursing services and other services required by the resident during a disaster; and
 - f. A plan for obtaining food and water for individuals present in the nursing care institution or the nursing care institution's relocation site during a disaster;
2. The disaster plan required in subsection (A)(1) is reviewed at least once every 12 months;
3. Documentation of a disaster plan review required in subsection (A)(2) is created, is maintained for at least 12 months after the date of the disaster plan review, and includes:
 - a. The date and time of the disaster plan review;
 - b. The name of each personnel member, employee, or volunteer participating in the disaster plan review;
 - c. A critique of the disaster plan review; and
 - d. If applicable, recommendations for improvement;
4. A disaster drill for employees is conducted on each shift at least once every three months and documented;
5. An evacuation drill for employees and residents:
 - a. Is conducted at least once every six months; and
 - b. Includes all individuals on the premises except for:
 - i. A resident whose medical record contains documentation that evacuation from the nursing care institution would cause harm to the resident, and
 - ii. Sufficient personnel members to ensure the health and safety of residents not evacuated according to subsection (A)(5)(b)(i);
6. Documentation of each evacuation drill is created, is maintained for at least 12 months after the date of the drill, and includes:
 - a. The date and time of the evacuation drill;
 - b. The amount of time taken for employees and residents to evacuate to a designated area;
 - c. If applicable:
 - i. An identification of residents needing assistance for evacuation, and

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- ii. An identification of residents who were not evacuated;
 - d. Any problems encountered in conducting the evacuation drill; and
 - e. Recommendations for improvement, if applicable; and
- 7. An evacuation path is conspicuously posted on each hallway of each floor of the nursing care institution.
- B.** An administrator shall ensure that, if applicable, a sign is placed at the entrance to a room or area indicating that oxygen is in use.
- C.** An administrator shall:
 - 1. Obtain a fire inspection conducted according to the time-frame established by the local fire department or the State Fire Marshal,
 - 2. Make any repairs or corrections stated on the fire inspection report, and
 - 3. Maintain documentation of a current fire inspection.

R9-10-425. Environmental Standards

- A.** An administrator shall ensure that:
 - 1. A nursing care institution's premises and equipment are:
 - a. Cleaned and disinfected according to policies and procedures or manufacturer's instructions to prevent, minimize, and control illness and infection; and
 - b. Free from a condition or situation that may cause a resident or an individual to suffer physical injury;
 - 2. A pest control program that complies with A.A.C. R3-8-201(C)(4) is implemented and documented;
 - 3. Equipment used to provide direct care is:
 - a. Maintained in working order;
 - b. Tested and calibrated according to the manufacturer's recommendations or, if there are no manufacturer's recommendations, as specified in policies and procedures; and
 - c. Used according to the manufacturer's recommendations;
 - 4. Documentation of equipment testing, calibration, and repair is maintained for at least 12 months after the date of the testing, calibration, or repair;
 - 5. Garbage and refuse are:
 - a. In areas used for food storage, food preparation, or food service, stored in a covered container lined with a plastic bag;
 - b. In areas not used for food storage, food preparation, or food service, stored:
 - i. According to the requirements in subsection (A)(5)(a), or
 - ii. In a paper-lined or plastic-lined container that is cleaned and sanitized as often as necessary to ensure that the container is clean; and
 - c. Removed from the premises at least once a week;
 - 6. Heating and cooling systems maintain the nursing care institution at a temperature between 70° F and 84° F;
 - 7. Common areas:
 - a. Are lighted to assure the safety of residents, and
 - b. Have lighting sufficient to allow personnel members to monitor resident activity;
 - 8. The supply of hot and cold water is sufficient to meet the personal hygiene needs of residents and the cleaning and sanitation requirements in this Article;
 - 9. Linens are clean before use, without holes and stains, and not in need of repair;
 - 10. Oxygen containers are secured in an upright position;
 - 11. Poisonous or toxic materials stored by the nursing care institution are maintained in labeled containers in a locked area separate from food preparation and storage, dining areas, and medications and are inaccessible to residents;
 - 12. Combustible or flammable liquids stored by the nursing care institution are stored in the original labeled containers or safety containers in a locked area inaccessible to residents;
 - 13. If pets or animals are allowed in the nursing care institution, pets or animals are:
 - a. Controlled to prevent endangering the residents and to maintain sanitation;
 - b. Licensed consistent with local ordinances; and
 - c. For a dog or cat, vaccinated against rabies;
 - 14. If a water source that is not regulated under 18 A.A.C. 4 by the Arizona Department of Environmental Quality is used:
 - a. The water source is tested at least once every 12 months for total coliform bacteria and fecal coliform or *E. coli* bacteria;
 - b. If necessary, corrective action is taken to ensure the water is safe to drink; and
 - c. Documentation of testing is retained for at least 12 months after the date of the test; and
 - 15. If a non-municipal sewage system is used, the sewage system is in working order and is maintained according to all applicable state laws and rules.
- B.** An administrator shall ensure that:
 - 1. Smoking tobacco products is not permitted within a nursing care institution, and
 - 2. Smoking tobacco products may be permitted outside a nursing care institution if:
 - a. Signs designating smoking areas are conspicuously posted, and
 - b. Smoking is prohibited in areas where combustible materials are stored or in use.
- C.** If a swimming pool is located on the premises, an administrator shall ensure that:
 - 1. At least one personnel member with cardiopulmonary resuscitation training that meets the requirements in R9-10-403(C)(1)(e) is present in the pool area when a resident is in the pool area, and
 - 2. At least two personnel members are present in the pool area when two or more residents are in the pool area.

R9-10-427. Quality Rating**A.** As required in A.R.S. § 36-425.02(A), the Department shall issue a quality rating to each licensed nursing care institution based on the results of a compliance inspection.**B.** The following quality ratings are established:

1. A quality rating of "A" for excellent is issued if the nursing care institution achieves a score of 90 to 100 points,
2. A quality rating of "B" is issued if the nursing care institution achieves a score of 80 to 89 points,
3. A quality rating of "C" is issued if the nursing care institution achieves a score of 70 to 79 points, and
4. A quality rating of "D" is issued if the nursing care institution achieves a score of 69 or fewer points.

C. The quality rating is determined by the total number of points awarded based on the following criteria:

1. Nursing Services:
 - a. 15 points: The nursing care institution is implementing a system that ensures residents are provided nursing services to maintain the resident's highest practicable physical, mental, and psychosocial well-being according to the resident's comprehensive assessment and care plan.
 - b. 5 points: The nursing care institution ensures that each resident is free from medication errors that resulted in actual harm.
 - c. 5 points: The nursing care institution ensures the resident's representative is notified and the resident's attending physician is consulted if a resident has a significant change in condition or if the resident is in an incident that requires medical services.
2. Resident Rights:
 - a. 10 points: The nursing care institution is implementing a system that ensures a resident's privacy needs are met.
 - b. 10 points: The nursing care institution ensures that a resident is free from physical and chemical restraints for purposes other than to treat the resident's medical condition.
 - c. 5 points: The nursing care institution ensures that a resident or the resident's representative is allowed to participate in the planning of, or decisions concerning treatment including the right to refuse treatment and to formulate a health care directive.
3. Administration:
 - a. 10 points: The nursing care institution has no repeat deficiencies that resulted in actual harm or immediate jeopardy to residents that were cited during the

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- last compliance inspection or a complaint investigation conducted between the last compliance inspection and the current compliance inspection.
- b. 5 points: The nursing care institution is implementing a system to prevent abuse of a resident and misappropriation of resident property, investigate each allegation of abuse of a resident and misappropriation of resident's property, and report each allegation of abuse of a resident and misappropriation of resident's property to the Department and as required by A.R.S. § 46-454.
 - c. 5 points: The nursing care institution is implementing a quality management program that addresses nursing care institution services provided to residents, resident complaints, and resident concerns, and documents actions taken for response, resolution, or correction of issues about nursing care institution services provided to residents, resident complaints, and resident concerns.
 - d. 1 point: The nursing care institution is implementing a system to provide social services and a program of ongoing recreational activities to meet the resident's needs based on the resident's comprehensive assessment.
 - e. 1 point: The nursing care institution is implementing a system to ensure that records documenting freedom from infectious pulmonary tuberculosis are maintained for each personnel member, volunteer, and resident.
 - f. 2 points: The nursing care institution is implementing a system to ensure that a resident is free from unnecessary drugs.
 - g. 1 point: The nursing care institution is implementing a system to ensure a personnel member attends in-service education according to policies and procedures.
4. Environment and Infection Control:
 - a. 5 points: The nursing care institution environment is free from a condition or situation within the nursing care institution's control that may cause a resident injury.
 - b. 1 point: The nursing care institution establishes and maintains a pest control program that complies with A.A.C. R3-8-201(C)(4).
 - c. 1 point: The nursing care institution develops a written disaster plan that includes procedures for protecting the health and safety of residents.
 - d. 1 point: The nursing care institution ensures orientation to the disaster plan for each personnel member is completed within the first scheduled week of employment.
 - e. 1 point: The nursing care institution maintains a clean and sanitary environment.
 - f. 5 points: The nursing care institution is implementing a system to prevent and control infection.
 - g. 1 point: An employee cleans the employee's hands after each direct resident contact or when hand cleaning is indicated to prevent the spread of infection.
 5. Food Services:
 - a. 1 point: The nursing care institution complies with 9 A.A.C. 8, Article 1, for food preparation, storage and handling as evidenced by a current food establishment license.
 - b. 3 points: The nursing care institution provides each resident with food that meets the resident's needs as specified in the resident's comprehensive assessment and care plan.
 - c. 2 points: The nursing care institution obtains input from each resident or the resident's representative and implements recommendations for meal planning and food choices consistent with the resident's dietary needs.
 - d. 2 points: The nursing care institution provides assistance to a resident who needs help in eating so that the resident's nutritional, physical, and social needs are met.
 - e. 1 point: The nursing care institution prepares menus at least one week in advance, conspicuously posts each menu, and adheres to each planned menu unless an uncontrollable situation such as food spoilage or non-delivery of a specified food requires substitution.
 - f. 1 point: The nursing care institution provides food substitution of similar nutritive value for residents who refuse the food served or who request a substitution.
 - D. A nursing care institution's quality rating remains in effect until a subsequent compliance inspection or complaint investigation is conducted by the Department except as provided in subsection (E).
 - E. If the Department issues a provisional license, the current quality rating is terminated. A provisional licensee may submit an application for a substantial compliance inspection. If the Department determines that, as a result of a substantial compliance inspection, the nursing care institution is in substantial compliance, the Department shall issue a new quality rating according to subsection (C).
 - F. The issuance of a quality rating does not preclude the Department from seeking a civil penalty as provided in A.R.S. § 36-431.01, or suspension or revocation of a license as provided in A.R.S. § 36-427.

- 1. A qualified intellectual disabilities professional to oversee rehabilitation services provided by or on behalf of the ICF/IID; and

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

2. If the facility is authorized to admit patients who require intermittent nursing services or continuous nursing services, a registered nurse is appointed as director of nursing to oversee nursing services provided by or on behalf of the ICF/IID.
- E. If abuse, neglect, or exploitation of a resident is alleged or suspected to have occurred before the resident was admitted or while the resident is not on the premises and not receiving services from an ICF/IID's employee or personnel member, an administrator shall report the alleged or suspected abuse, neglect, or exploitation of the resident as follows:
 1. For a resident 18 years of age or older, according to A.R.S. § 46-454; or
 2. For a resident under 18 years of age, according to A.R.S. § 13-3620.
- F. If an administrator has a reasonable basis, according to A.R.S. §§ 13-3620 or 46-454, to believe that abuse, neglect, or exploitation has occurred on the premises or while a resident is receiving services from an ICF/IID's employee or personnel member, an administrator shall:
 1. If applicable, take immediate action to stop the suspected abuse, neglect, or exploitation;
 2. Report the suspected abuse, neglect, or exploitation of the resident as follows:
 - a. For a resident 18 years of age or older, according to A.R.S. § 46-454; or
 - b. For a resident under 18 years of age, according to A.R.S. § 13-3620;
 3. Document:
 - a. The suspected abuse, neglect, or exploitation;
 - b. Any action taken according to subsection (F)(1); and
 - c. The report in subsection (F)(2);
 4. Maintain the documentation in subsection (F)(3) for at least 12 months after the date of the report in subsection (F)(2);
 5. Initiate an investigation of the suspected abuse, neglect, or exploitation and document the following information within five working days after the report required in subsection (F)(2):
 - a. The dates, times, and description of the suspected abuse, neglect, or exploitation;
 - b. A description of any injury to the resident related to the suspected abuse or neglect and any change to the resident's physical, cognitive, functional, or emotional condition;
 - c. The names of witnesses to the suspected abuse, neglect, or exploitation; and
 - d. The actions taken by the administrator to prevent the suspected abuse, neglect, or exploitation from occurring in the future; and
 6. Maintain a copy of the documented information required in subsection (F)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.
- G. An administrator shall:
 1. Allow a resident advocate to assist a resident or the resident's representative with a request or recommendation, and document in writing any complaint submitted to the ICF/IID;
 2. Ensure that a monthly schedule of recreational activities for residents is developed, documented, and implemented; and
 3. Ensure that the following are conspicuously posted on the premises:
 - a. The current ICF/IID license issued by the Department;
 - b. The name, address, and telephone number of:
 - i. The Department's Office of Long Term Care, and
 - ii. Adult Protective Services of the Department of Economic Security;
 - c. A notice that a resident may file a complaint with the Department concerning the ICF/IID;
 - d. The monthly schedule of recreational activities; and
 - e. One of the following:
 - i. A copy of the current license survey report with information identifying residents redacted, any subsequent reports issued by the Department, and any plan of correction that is in effect; or
 - ii. A notice that the current license survey report with information identifying residents redacted, any subsequent reports issued by the Department, and any plan of correction that is in effect are available for review upon request.
- H. An administrator shall provide written notification to the Department of a resident's:
 1. Death, if the resident's death is required to be reported according to A.R.S. § 11-593, within one working day after the resident's death; and
 2. Self-injury, within two working days after the resident inflicts a self-injury that requires immediate intervention by an emergency medical services provider.
- I. An administrator shall:
 1. Notify a resident's representative, family member, or other individual designated by the resident within one calendar day after:
 - a. The resident's death,
 - b. There is a significant change in the resident's medical condition, or
 - c. The resident has an illness or injury that requires immediate intervention by an emergency medical services provider or treatment by a health care provider; and
 2. For an illness or injury in subsection (I)(1)(c), document the following:
 - a. The date and time of the illness or injury;
 - b. A description of the illness or injury;
 - c. If applicable, the names of individuals who observed the injury;
 - d. The actions taken by personnel members, according to policies and procedures;
 - e. The individuals notified by the personnel members; and
 - f. Any action taken to prevent the illness or injury from occurring in the future.
- J. If an administrator administers a resident's personal account at the request of the resident or the resident's representative, the administrator shall:
 1. Comply with policies and procedures established according to subsection (C)(1)(q);
 2. Designate a personnel member who is responsible for the personal accounts;
 3. Maintain a complete and separate accounting of each personal account;

 - d. Speech-language pathology, as defined in A.R.S. § 36-1901; and
 - e. Audiology, as defined in A.R.S. § 36-1901;
 2. Rehabilitation services are provided:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Under the direction of a qualified intellectual disabilities professional according to policies and procedures, and
- b. According to an order;
3. A resident receives the rehabilitation services required in the resident's individual program plan;
4. Unless otherwise required in the resident's individual program plan:
 - a. A resident does not remain in bed or in the resident's bedroom;
 - b. If the resident is not able to independently move from place to place, even with the use of an assistive device, the resident is moved from place to place in the ICF/IID; and
 - c. A resident receiving rehabilitation services is encouraged to participate in activities that are planned according to subsection (C)(2) and are appropriate to objectives in the resident's individual program plan;
5. A qualified intellectual disabilities professional reviews the rehabilitation services provided to a resident and revises the frequency, duration, method, or type of rehabilitation services being provided in the resident's individual program plan:
 - a. As necessary, if the resident is losing skills or failing to progress; or
 - b. If a goal in the resident's individual program plan has been accomplished and a new objective is to be initiated; and
6. The medical record of a resident receiving rehabilitation services includes:
 - a. An order for rehabilitation services that includes the name of the ordering individual and a referring diagnosis;
 - b. The resident's individual program plan, including all updates;
 - c. The rehabilitation services provided;
 - d. The resident's response to the rehabilitation services; and
 - e. The authentication of the individual providing the rehabilitation services.
- B.** Except as provided in subsection (D), an administrator shall ensure that:
 1. Personnel members are available to provide a resident with habilitation services required in the resident's individual program plan;
 2. A personnel member is only assigned to provide the habilitation services the personnel member has the documented skills and knowledge to perform;
 3. A resident receives the habilitation services in the resident's individual program plan;
 4. If applicable, a personnel member:
 - a. Suggests techniques a resident may use to maintain or improve the resident's independence in performing activities of daily living; and
 - b. Provides assistance with, supervises, or directs a resident's personal hygiene according to the resident's individual program plan;
 5. A resident receiving habilitation services is encouraged to participate in activities of the resident's choosing that are planned according to subsection (C)(2); and
 6. The medical record of a resident receiving habilitation services includes:
 - a. The resident's individual program plan, including all updates;
 - b. The habilitation services provided;
 - c. The resident's response to the habilitation services; and
 - d. The authentication of the individual providing the habilitation services.
- C.** An administrator shall ensure that:
 1. Multiple media sources, such as daily newspapers, current magazines, internet sources, and a variety of reading materials, are available and accessible to a resident to maintain the resident's continued awareness of current news, social events, and other noteworthy information;
 2. Daily social or recreational activities are planned according to residents' preferences, needs, and abilities;
 3. A calendar of planned activities is:
 - a. Prepared at least one week in advance of the date the activity is provided,
 - b. Posted in a location that is easily seen by residents,
 - c. Updated as necessary to reflect substitutions in the activities provided, and
 - d. Maintained for at least 12 months after the last scheduled activity;
 4. Equipment and supplies are available and accessible to accommodate a resident who chooses to participate in a planned activity on the premises;

- xxix. Potential for discharge;
- e. Is signed and dated by the qualified intellectual disabilities professional who conducts or coordinates the comprehensive assessment or review; and
- f. Is used to determine or update the resident's acuity;
- 2. If any of the conditions in subsection (A)(1)(d)(v) are answered in the affirmative during the comprehensive assessment or review, a behavioral health professional reviews a resident's comprehensive assessment or review and individual program plan to ensure that the resident's needs for behavioral care are being met;
- 3. A new comprehensive assessment is not required for a resident who is hospitalized and readmitted to an ICF/IID unless a physician, an individual designated by the physician, a qualified intellectual disabilities professional, or a registered nurse determines the resident has a significant change in condition; and
- 4. A resident's comprehensive assessment is reviewed at least once every three months after the date of the current comprehensive assessment and if there is a significant change in the resident's condition by:
 - a. A qualified intellectual disabilities professional; and
 - b. If the resident has a nursing care plan or medical care plan, a registered nurse.
- B. An administrator shall ensure that an individual program plan for a resident:
 - 1. Is developed, documented, and implemented for the resident within seven calendar days after completing the resident's comprehensive assessment required in subsection (A)(1);
 - 2. Includes the acuity of the resident;
 - 3. Is reviewed at least annually by the interdisciplinary team required in subsection (A)(1)(a) and revised based on any change to the resident's comprehensive assessment; and
 - 4. Ensures that a resident is provided rehabilitation services and other physical health services or behavioral care that:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Address any medical condition or behavioral care issue identified in the resident's comprehensive assessment, and
- b. Assist the resident in maintaining the resident's highest practicable well-being according to the resident's comprehensive assessment.

R9-10-515. Seclusion; Restraint**A.** An administrator shall ensure that:

- 1. An ICF/IID's policies and procedures for managing a resident's inappropriate behavior, as described in R9-10-503(C)(2)(g) are reviewed, approved, and monitored through the quality management process in R9-10-504; and
- 2. Restraint is provided according to the requirements in subsection (C).

B. An administrator of an ICF/IID authorized to provide seclusion shall ensure that:

- 1. Seclusion is provided according to the requirements in subsection (C);
- 2. If a resident is placed in seclusion, the room used for seclusion:
 - a. Is approved for use as a seclusion room by the Department;
 - b. Is not used as a resident's bedroom or a sleeping area;
 - c. Allows full view of the resident in all areas of the room;
 - d. Is free of hazards, such as unprotected light fixtures or electrical outlets;
 - e. Contains at least 60 square feet of floor space; and
 - f. Except as provided in subsection (B)(3), contains a non-adjustable bed that:
 - i. Consists of a mattress on a solid platform that is:
 - (1) Constructed of a durable, non-hazardous material; and
 - (2) Raised off of the floor;
 - ii. Does not have wire springs or a storage drawer; and
 - iii. Is securely anchored in place;
- 3. If a room used for seclusion does not contain a non-adjustable bed required in subsection (B)(2)(f):
 - a. A piece of equipment is available that:

- i. Is commercially manufactured to safely and humanely restrain a resident's body;
- ii. Provides support to the trunk and head of a resident's body;
- iii. Provides restraint to the trunk of a resident's body;
- iv. Is able to restrict movement of a resident's arms, legs, body, and head;
- v. Allows a resident's body to recline; and
- vi. Does not inflict harm on a resident's body; and

- b. Documentation of the manufacturer's specifications for the piece of equipment in subsection (B)(3)(a) is maintained; and

4. A seclusion room may be used for services or activities other than seclusion if:

- a. A sign stating the service or activity scheduled or being provided in the room is conspicuously posted outside the room;
- b. No permanent equipment other than the bed required in subsection (B)(2)(f) is in the room;
- c. Policies and procedures:
 - i. Delineate which services or activities other than seclusion may be provided in the room,
 - ii. List what types of equipment or supplies may be placed in the room for the delineated services, and
 - iii. Provide for the prompt removal of equipment and supplies from the room before the room is used for seclusion; and
- d. The sign required in subsection (B)(4)(a) and equipment and supplies in the room, other than the bed required in subsection (B)(2)(f), are removed before use as a seclusion room.

C. An administrator shall ensure that:

- 1. Policies and procedures for providing restraint or seclusion are established, documented, and implemented to protect the health and safety of a resident that:
 - a. Establish the process for resident assessment, including identification of a resident's medical conditions and criteria for the on-going monitoring of any identified medical condition;
 - b. Identify each type of restraint or seclusion used and include for each type of restraint or seclusion used:
 - i. The qualifications of a personnel member who can:
 - (1) Order the restraint or seclusion,
 - (2) Place a resident in the restraint or seclusion,
 - (3) Monitor a resident in the restraint or seclusion,
 - (4) Evaluate a resident's physical and psychological well-being after being placed in the restraint or seclusion and when released from the restraint or seclusion, or
 - (5) Renew the order for restraint or seclusion;
 - ii. On-going training requirements for a personnel member who has direct resident contact while the resident is in a restraint or seclusion; and
 - iii. Criteria for monitoring and assessing a resident including:
 - (1) Frequencies of monitoring and assessment based on a resident's medical condition and risks associated with the specific restraint or seclusion;
 - (2) For the renewal of an order for restraint or seclusion, whether an assessment is

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- required before the order is renewed and, if an assessment is required, who may conduct the assessment;
- (3) Assessment content, which may include, depending on a resident's condition, the resident's vital signs, respiration, circulation, hydration needs, elimination needs, level of distress and agitation, mental status, cognitive functioning, neurological functioning, and skin integrity;
 - (4) If a mechanical restraint is used, how often the mechanical restraint is loosened; and
 - (5) A process for meeting a resident's nutritional needs and elimination needs;
- c. Establish the criteria and procedures for renewing an order for restraint or seclusion;
 - d. Establish procedures for internal review of the use of restraint or seclusion; and
 - e. Establish medical record and personnel record documentation requirements for restraint and seclusion, if applicable;
2. An order for restraint or seclusion is:
 - a. Obtained from a physician or registered nurse practitioner, and
 - b. Not written as a standing order or on an as-needed basis;
 3. Restraint or seclusion is:
 - a. Not used as a means of coercion, discipline, convenience, or retaliation;
 - b. Only used when all of the following conditions are met:
 - i. Except as provided in subsection (C)(4), after obtaining an order for the restraint or seclusion;
 - ii. For the management of a resident's aggressive, violent, or self-destructive behavior;
 - iii. When less restrictive interventions have been determined to be ineffective; and
 - iv. To ensure the immediate physical safety of the resident, to prevent imminent harm to the resident or another individual, or to stop physical harm to another individual; and
 - c. Discontinued at the earliest possible time;
 4. If as a result of a resident's aggressive, violent, or self-destructive behavior, harm to the resident or another individual is imminent or the resident or another individual is being physically harmed, a personnel member:
 - a. May initiate an emergency application of restraint or seclusion for the resident before obtaining an order for the restraint or seclusion, and
 - b. Obtains an order for the restraint or seclusion of the resident during the emergency application of the restraint or seclusion;
 5. An order for restraint or seclusion includes:
 - a. The name of the physician or registered nurse practitioner ordering the restraint or seclusion;
 - b. The date and time that the restraint or seclusion was ordered;
 - c. The specific restraint or seclusion ordered;
 - d. If a drug is ordered as a chemical restraint, the drug's name, strength, dosage, and route of administration;
 - e. The specific criteria for release from restraint or seclusion without an additional order; and
 - f. The maximum duration authorized for the restraint or seclusion;
 6. An order for restraint or seclusion is limited to the duration of the emergency situation and does not exceed three continuous hours;
 7. If an order for restraint or seclusion of a resident is not provided by the resident's attending physician, the resident's attending physician is notified as soon as possible;
 8. A medical practitioner or personnel member does not participate in restraint or seclusion, assess or monitor a resident during restraint or seclusion, or evaluate a resident after restraint or seclusion, and a physician or registered nurse practitioner does not order restraint or seclusion, until the medical practitioner or personnel member, completes education and training that:
 - a. Includes:
 - i. Techniques to identify medical practitioner, personnel member, and resident behaviors, events, and environmental factors that may trigger circumstances that require restraint or seclusion;
 - ii. The use of nonphysical intervention skills, such as de-escalation, mediation, conflict resolution, active listening, and verbal and observational methods;
 - iii. Techniques for identifying the least restrictive intervention based on an assessment of the resident's medical or behavioral health condition;
 - iv. The safe use of restraint and the safe use of seclusion, including training in how to recognize and respond to signs of physical and psychological distress in a resident who is restrained or secluded;
 - v. Clinical identification of specific behavioral changes that indicate that the restraint or seclusion is no longer necessary;
 - vi. Monitoring and assessing a resident while the resident is in restraint or seclusion according to policies and procedures; and
 - vii. Except for the medical practitioner, training exercises in which the personnel member successfully demonstrates the techniques that the medical practitioner or personnel member has learned for managing emergency situations; and
 - b. Is provided by individuals qualified according to policies and procedures;
 9. When a resident is placed in restraint or seclusion:
 - a. The restraint or seclusion is conducted according to policies and procedures;
 - b. The restraint or seclusion is proportionate and appropriate to the severity of the resident's behavior and the resident's:
 - i. Chronological and developmental age;
 - ii. Size;
 - iii. Gender;
 - iv. Physical condition;
 - v. Medical condition;
 - vi. Psychiatric condition; and
 - vii. Personal history, including any history of physical or sexual abuse;
 - c. The physician or registered nurse practitioner who ordered the restraint or seclusion is available for consultation throughout the duration of the restraint or seclusion;
 - d. The resident is monitored and assessed according to policies and procedures;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- e. A physician or registered nurse assesses the resident within one hour after the resident is placed in the restraint or seclusion and determines:
 - i. The resident's current behavior;
 - ii. The resident's reaction to the restraint or seclusion used;
 - iii. The resident's medical and behavioral condition, and
 - iv. Whether to continue or terminate the restraint or seclusion;
 - f. The resident is given the opportunity:
 - i. To eat during mealtime, and
 - ii. To use the toilet; and
 - g. The restraint or seclusion is discontinued at the earliest possible time, regardless of the length of time identified in the order;
10. A medical practitioner or personnel member documents the following information in a resident's medical record before the end of the shift in which the resident is placed in restraint or seclusion or, if the resident's restraint or seclusion does not end during the shift in which it began, during the shift in which the resident's restraint or seclusion ends:
- a. The emergency situation that required the resident to be restrained or put in seclusion;
 - b. The times the resident's restraint or seclusion actually began and ended;
 - c. The monitoring required in subsection (C)(9)(d),
 - d. The time of the assessment required in subsection (C)(9)(e),
 - e. The names of the medical practitioners and personnel members with direct resident contact while the resident was in the restraint or seclusion,
 - f. The times the resident was given the opportunity to eat or use the toilet according to subsection (C)(9)(f), and
 - g. The resident evaluation required in subsection (C)(12);
11. If an emergency situation continues beyond the time limit of an order for restraint or seclusion, the order is renewed according to policies and procedures that include:
- a. The specific criteria for release from restraint or seclusion without an additional order, and
 - b. The maximum duration authorized for the restraint or seclusion; and
12. A resident is evaluated after restraint or seclusion is no longer being used for the resident.

R9-10-516. Physical Health Services

- A.** An administrator shall ensure that:
- 1. A resident has an attending physician;
 - 2. An attending physician is available 24 hours a day;
 - 3. An attending physician designates a physician who is available when the attending physician is not available;
 - 4. A physical examination is performed on a resident by a physician or by a physician assistant or registered nurse practitioner designated by the resident's attending physician:
 - a. If indicated, based on the resident's placement evaluation or comprehensive assessment; and
 - b. At least once every 12 months after the date of admission, including an assessment of the acuity of the resident's medical condition;
 - 5. If a resident's physical examination, placement evaluation, or comprehensive assessment indicates a need for:
 - a. Intermittent nursing services, the resident's attending physician, in conjunction with the director of nursing, develops a nursing care plan of treatment for the resident, which is integrated into the resident's individual program plan; or
 - b. Continuous nursing services, the resident's attending physician, in conjunction with the director of nursing, develops a medical care plan of treatment for the resident, which is integrated into the resident's individual program plan; and
 - 6. Vaccinations for influenza and pneumonia are available to each resident at least once every 12 months unless:
 - a. The attending physician provides documentation that the vaccination is medically contraindicated;
 - b. The resident or the resident's representative refuses the vaccination or vaccinations and documentation is maintained in the resident's medical record that the resident or the resident's representative has been informed of the risks and benefits of a vaccination refused; or
 - c. The resident or the resident's representative provides documentation that the resident received a pneumonia vaccination within the last five years or the current recommendation from the U.S. Department of Health and Human Services, Center for Disease Control and Prevention.
- B.** An administrator shall ensure that:
- 1. Nursing services are available 24 hours a day in an ICF/IID;
 - 2. For an ICF/IID authorized to admit a resident requiring:
 - a. Continuous nursing services, a registered nurse is on the premises; or
 - b. Intermittent nursing services, a nurse is on the premises according to the schedule in a resident's nursing care plan; and
 - 3. The director of nursing or an individual designated by the director of nursing participates in the quality management program.
- C.** A director of nursing shall ensure that:
- 1. A method is established and documented that identifies the types and numbers of nursing personnel that are necessary to provide nursing services to residents based on:
 - a. The acuity of the residents, and
 - b. The ICF/IID's scope of services;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

2. Sufficient nursing personnel, as determined by the method in subsection (C)(1), are on the ICF/IID's premises to meet the needs of a resident for nursing services;
 3. A registered nurse participates in the development, review, and updating of a resident's nursing care plan or medical care plan;
 4. Personnel members providing direct care to a resident with a nursing care plan or medical care plan receive direction from a nurse;
 5. At least once every three months, a nurse:
 - a. Assesses the health of a resident without a nursing care plan or medical care plan;
 - b. Documents the results in the resident's medical record; and
 - c. If the assessment indicates the need for physical health services or behavioral care, initiates action, according to policies and procedures, to address the resident's needs;
 6. Nursing personnel provide education and training to:
 - a. Residents on hygiene and other behaviors that promote health; and
 - b. Personnel members on:
 - i. Detecting signs of illness or injury or significant changes in condition,
 - ii. First aid, and
 - iii. Basic skills for caring for residents;
 7. As soon as possible but not more than 24 hours after one of the following events occur, a nurse notifies a resident's attending physician and, if applicable, the resident's representative, if the resident:
 - a. Is injured,
 - b. Is involved in an incident that requires medical services, or
 - c. Has a significant change in condition; and
 8. Only a medication required by an order is administered to a resident.
- D.** An administrator shall ensure that:
1. Dental services are provided to a resident by an individual licensed as:
 - a. A dentist under A.R.S. Title 32, Chapter 11, Article 2; or
 - b. A dental hygienist under A.R.S. Title 32, Chapter 11, Article 4;
 2. If needed, based on a resident's initial assessment, a dentist or dental hygienist in subsection (D)(1) participates as part of an interdisciplinary team in the development of the resident's individual program plan;
 3. A resident is provided with a complete dental examination within one month after admission, unless the ICF/IID has documentation of the resident's dental examination completed within 12 months before admission;
 4. If a resident's dental examination indicates the resident needs dental treatment:
 - a. A dentist or dental hygienist in subsection (D)(1) participates as part of an interdisciplinary team in the review and updating of the resident's individual program plan, and
 - b. The resident is provided with dental treatment;
 5. A dental examination is performed by a dentist or dental hygienist in subsection (D)(1) on a resident at least once every 12 months and treatment is provided as needed;
 6. If needed, a resident is provided with emergency dental services;
 7. A resident is provided with education and training in oral hygiene; and
 8. A resident's medical record contains documentation of:
 - a. Each dental examination of the resident,
 - b. All dental treatment provided to the resident, and
 - c. The resident's education and training in oral hygiene.
- E.** An administrator shall ensure that:
1. A resident's vision and hearing are assessed as part of the resident's comprehensive assessment and, if applicable, as part of the update of the comprehensive assessment; and
 2. If an issue is identified with the resident's vision or hearing, the resident is provided, as applicable, with:
 - a. Treatment to address the identified issue, or
 - b. An assistive device to address an issue.

R9-10-517. Behavioral Care

- A.** An administrator shall ensure that:
1. A resident who receives behavioral care from the ICF/IID is evaluated by a behavioral health professional or medical practitioner:
 - a. Within 30 calendar days before the resident is admitted to the ICF/IID or before the resident begins receiving behavioral care, and
 - b. At least once every six months throughout the duration of the resident's need for behavioral care;
 2. A behavioral health professional or medical practitioner:
 - a. Documents that the behavioral care needed by the resident is within the ICF/IID's scope of services, and
 - b. Includes measurable objectives for the behavioral care and the methods for meeting the objectives in the resident's individual program plan; and
 3. The documentation in subsection (A)(2) is included in the resident's medical record.
- B.** If a resident of an ICF/IID requires behavioral health services provided by a behavioral health professional on an intermittent basis as part of behavioral care, an administrator shall ensure that:
1. The behavioral health services are provided by a behavioral health professional licensed or certified to provide the type of behavioral health services required by the resident; and

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

2. Except for a psychotropic drug used as a chemical restraint or administered according to an order from a court of competent jurisdiction, informed consent is obtained from a resident or the resident's representative for a psychotropic drug and documented in the resident's medical record before the psychotropic drug is administered to the resident.

R9-10-518. Clinical Laboratory Services

If clinical laboratory services are authorized to be provided on an ICF/IID's premises, an administrator shall ensure that:

1. Clinical laboratory services and pathology services are provided through a laboratory that holds a certificate of accreditation, certificate of compliance, or certificate of waiver issued by the United States Department of Health and Human Services under the 1988 amendments to the Clinical Laboratories Improvement Act of 1967;
2. A copy of the certificate of accreditation, certificate of compliance, or certificate of waiver in subsection (1) is provided to the Department for review upon the Department's request;
3. The ICF/IID:
 - a. Is able to provide the clinical laboratory services delineated in the ICF/IID's scope of services when needed by the residents,
 - b. Obtains specimens for the clinical laboratory services delineated in the ICF/IID's scope of services without transporting the residents from the ICF/IID's premises, and
 - c. Has the examination of the specimens performed by a clinical laboratory;
4. Clinical laboratory and pathology test results are:
 - a. Available to the ordering physician:
 - i. Within 24 hours after the test is complete with results if the test is performed at a laboratory on the ICF/IID's premises, or
 - ii. Within 24 hours after the test result is received if the test is performed at a laboratory outside of the ICF/IID's premises; and
 - b. Documented in a resident's medical record;
5. If a test result is obtained that indicates a resident may have an emergency medical condition, as established in policies and procedures, personnel notify:

- a. The ordering physician,
- b. A registered nurse in the resident's assigned unit,
- c. The ICF/IID's administrator, or
- d. The director of nursing;
6. If a clinical laboratory report is completed on a resident, a copy of the report is included in the resident's medical record;
7. If the ICF/IID provides blood or blood products, policies and procedures are established, documented, and implemented for:
 - a. Procuring, storing, transfusing, and disposing of blood or blood products;
 - b. Blood typing, antibody detection, and blood compatibility testing; and
 - c. Investigating transfusion adverse reactions that specify a process for review through the quality management program; and
8. Expired laboratory supplies are discarded according to policies and procedures.

R9-10-519. Respiratory Care Services

If respiratory care services are authorized to be provided on an ICF/IID's premises, an administrator shall ensure that:

1. Respiratory care services are provided under the direction of an attending physician;
2. Respiratory care services are provided according to an order that includes:
 - a. The resident's name;
 - b. The name and signature of the ordering individual;
 - c. The type, frequency, and, if applicable, duration of treatment;
 - d. The type and dosage of medication and diluent; and
 - e. The oxygen concentration or oxygen liter flow and method of administration;
3. Respiratory care services provided to a resident are documented in the resident's medical record and include:
 - a. The date and time of administration;
 - b. The type of respiratory care services provided;
 - c. The effect of the respiratory care services;
 - d. The resident's adverse reaction to the respiratory care services, if any; and
 - e. The authentication of the individual providing the respiratory care services; and

R9-10-520. Medication Services

- A. An administrator shall ensure that policies and procedures for medication services:
 1. Include:
 - a. A process for providing information to a resident about medication prescribed for the resident including:
 - i. The prescribed medication's anticipated results,
 - ii. The prescribed medication's potential adverse reactions,
 - iii. The prescribed medication's potential side effects, and
 - iv. Potential adverse reactions that could result from not taking the medication as prescribed;
 - b. Procedures for preventing, responding to, and reporting:
 - i. A medication error,
 - ii. An adverse response to a medication, or
 - iii. A medication overdose;
 - c. Procedures to ensure that a pharmacist reviews a resident's medications at least once every three months and provides documentation to the resident's attending physician and the director of nursing indicating potential medication problems such as incompatible or duplicative medications;
 - d. Procedures for documenting medication services; and
 - e. Procedures for assisting a resident in obtaining medication; and
 2. Specify a process for review through the quality management program of:
 - a. A medication administration error, and
 - b. An adverse reaction to a medication.
- B. An administrator shall ensure that:
 1. Policies and procedures for medication administration:
 - a. Are reviewed and approved by a pharmacist;
 - b. Specify the individuals who may:
 - i. Order medication, and
 - ii. Administer medication;
 - c. Ensure that medication is administered to a resident only as prescribed; and
 - d. Cover the documentation of a resident's refusal to take prescribed medication in the resident's medical record;
 2. Verbal orders for medication services are taken by a nurse, unless otherwise provided by law;
 3. A medication administered to a resident:
 - a. Is administered in compliance with an order, and
 - b. Is documented in the resident's medical record; and
 4. If a psychotropic medication is administered to a resident, the psychotropic medication:
 - a. Is only administered to a resident for a diagnosed medical condition; and
 - b. Unless clinically contraindicated or otherwise ordered by an attending physician or the attending physician's designee, is gradually reduced in dosage while the resident is simultaneously provided with interventions such as behavior and environment modification in an effort to discontinue the psychotropic medication, unless a dose reduction is attempted and the resident displays behavior justifying the need for the psychotropic medication, and the attending physician documents the necessity for the continued use and dosage.
- C. If an ICF/IID provides assistance in the self-administration of medication, an administrator shall ensure that:
 1. A resident's medication is stored by the ICF/IID;
 2. The following assistance is provided to a resident:
 - a. A reminder when it is time to take the medication;
 - b. Opening the medication container for the resident;
 - c. Observing the resident while the resident removes the medication from the container;
 - d. Verifying that the medication is taken as ordered by the resident's attending physician by confirming that:
 - i. The resident taking the medication is the individual stated on the medication container label,
 - ii. The resident is taking the dosage of the medication stated on the medication container label or according to an order from the resident's attending physician dated later than the date on the medication container label, and
 - iii. The resident is taking the medication at the time stated on the medication container label or according to an order from the resident's attending physician dated later than the date on the medication container label; or
 - e. Observing the resident while the resident takes the medication;
 3. Policies and procedures for assistance in the self-administration of medication are reviewed and approved by the resident's attending physician or registered nurse;
 4. Training for a personnel member, other than a physician, physician assistant, or registered nurse, in assistance in the self-administration of medication:
 - a. Is provided by the resident's attending physician, another physician, a physician assistant, or a registered nurse or an individual trained by a physician, physician assistant, or registered nurse; and
 - b. Includes:
 - i. A demonstration of the personnel member's skills and knowledge necessary to provide assistance in the self-administration of medication,
 - ii. Identification of medication errors and medical emergencies related to medication that require emergency medical intervention, and
 - iii. The process for notifying the appropriate entities when an emergency medical intervention is needed;
 5. A personnel member, other than a physician, physician assistant, or registered nurse, completes the training in subsection (C)(4) before the personnel member provides assistance in the self-administration of medication; and
 6. Assistance in the self-administration of medication provided to a resident:
 - a. Is in compliance with an order, and
 - b. Is documented in the resident's medical record.
- D. An administrator shall ensure that:
 1. A current drug reference guide is available for use by personnel members; and
 2. If pharmaceutical services are provided:
 - a. The pharmaceutical services are provided under the direction of a pharmacist;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- b. The pharmaceutical services comply with A.R.S. Title 36, Chapter 27; A.R.S. Title 32, Chapter 18; and 4 A.A.C. 23; and
 - c. A copy of the pharmacy license is provided to the Department upon request.
- E.** When medication is stored at an ICF/IID, an administrator shall ensure that:
- 1. Medication is stored in a separate locked room, closet, or self-contained unit used only for medication storage;
 - 2. Medication is stored according to the instructions on the medication container; and
 - 3. Policies and procedures are established, documented, and implemented to protect the health and safety of a resident for:
 - a. Receiving, storing, inventorying, tracking, dispensing, and discarding medication including expired medication;
 - b. Discarding or returning prepackaged and sample medication to the manufacturer if the manufacturer requests the discard or return of the medication;
 - c. A medication recall and notification of residents who received recalled medication; and
 - d. Storing, inventorying, and dispensing controlled substances.
- F.** An administrator shall ensure that a personnel member immediately reports a medication error or a resident's adverse reaction to a medication to the resident's attending physician or the physician who ordered the medication and the ICF/IID's director of nursing.
- d. Cleaning of an individual's hands when the individual's hands are visibly soiled and before and after providing a service to a resident;
 - e. Cleaning of a resident's bedroom, furniture, and bedding after the resident's discharge before the bedroom is reassigned to another resident;
 - f. Training of personnel members, employees, and volunteers in infection control practices; and
 - g. Work restrictions for a personnel member with a communicable disease or infected skin lesion;
- 4. Biohazardous medical waste is identified, stored, and disposed of according to 18 A.A.C. 13, Article 14 and policies and procedures;
 - 5. Soiled linen and clothing are:
 - a. Collected in a manner to minimize or prevent contamination;
 - b. Bagged at the site of use; and
 - c. Maintained separate from clean linen and clothing and away from food storage, kitchen, or dining areas;
 - 6. A resident's personal laundry is washed separately from towels, sheets, and bedding; and
 - 7. A personnel member, an employee, or a volunteer washes hands or uses a hand disinfection product after a resident contact and after handling soiled linen, soiled clothing, or potentially infectious material.

R9-10-521. Infection Control

An administrator shall ensure that:

- 1. An infection control program is established, under the direction of an individual qualified according to policies and procedures, to prevent the development and transmission of infections and communicable diseases including:
 - a. A method to identify and document infections occurring at the ICF/IID;
 - b. Analysis of the types, causes, and spread of infections and communicable diseases at the ICF/IID;
 - c. The development of corrective measures to minimize or prevent the spread of infections and communicable diseases at the ICF/IID; and
 - d. Documentation of infection control activities including:
 - i. The collection and analysis of infection control data,
 - ii. The actions taken related to infections and communicable diseases, and
 - iii. Reports of communicable diseases to the governing authority and state and county health departments;
- 2. Infection control documentation is maintained for at least 12 months after the date of the documentation;
- 3. Policies and procedures are established, documented, and implemented that cover:
 - a. Handling and disposal of biohazardous medical waste;
 - b. Sterilization, disinfection, and storage of medical equipment and supplies;
 - c. Using personal protective equipment such as aprons, gloves, gowns, masks, or face protection when applicable;

R9-10-522. Food Services

A. An administrator shall ensure that:

- 1. The ICF/IID has a license or permit as a food establishment under 9 A.A.C. 8, Article 1;
- 2. A copy of the ICF/IID's food establishment license or permit is maintained;
- 3. If the ICF/IID contracts with a food establishment, as established in 9 A.A.C. 8, Article 1, to prepare and deliver food to the ICF/IID:
 - a. A copy of the contracted food establishment's license or permit under 9 A.A.C. 8, Article 1 is maintained by the ICF/IID; and
 - b. The ICF/IID is able to store, refrigerate, and reheat food to meet the dietary needs of a resident;
- 4. A registered dietitian:
 - a. Participates as part of an interdisciplinary team for a resident requiring a modified or special diet,
 - b. Reviews a food menu before the food menu is used to ensure that a resident's nutritional needs are being met,
 - c. Documents the review of a food menu, and
 - d. Is available for consultation regarding a resident's nutritional needs; and
- 5. If a registered dietitian is not employed full-time, an individual is designated as a director of food services who consults with a registered dietitian as often as necessary to ensure that the nutritional needs of a resident are met.

B. A registered dietitian or director of food services shall ensure that:

- 1. Food is prepared:
 - a. Using methods that conserve nutritional value, flavor, and appearance; and
 - b. In a form to meet the needs of a resident such as cut, chopped, ground, pureed, or thickened;
- 2. A food menu:
 - a. Is prepared at least one week in advance,

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- b. Includes the foods to be served on each day,
- c. Is conspicuously posted at least one day before the first meal on the food menu will be served,
- d. Includes any food substitution no later than the morning of the day of meal service with a food substitution, and
- e. Is maintained for at least 60 calendar days after the last day included in the food menu;
- 3. Meals and snacks for each day are planned and served using the applicable guidelines in <http://www.health.gov/dietaryguidelines/2015.asp>;
- 4. A resident is provided:
 - a. A diet that meets the resident's nutritional needs as specified in the resident's comprehensive assessment and individual program plan;
 - b. Food served in sufficient quantities to meet the resident's nutritional needs and at an appropriate temperature;
 - c. Three meals a day with not more than 14 hours between the evening meal and breakfast, except as provided in subsection (B)(4)(e);
 - d. The option to have a daily evening snack identified in subsection (B)(4)(e)(ii) or other snack; and
 - e. The option to extend the time span between the evening meal and breakfast from 14 hours to 16 hours if:
 - i. A resident group agrees; and
 - ii. The resident is offered an evening snack that includes meat, fish, eggs, cheese, or other protein, and a serving from either the fruit and vegetable food group or the bread and cereal food group;
- 5. A resident is provided with food substitutions of similar nutritional value if:
 - a. The resident refuses to eat the food served, or
 - b. The resident requests a substitution;
- 6. Recommendations and preferences are requested from a resident or the resident's representative for meal planning;
- 7. If food is used as a part of a program to manage a resident's inappropriate behavior:
 - a. A special diet is included as part of the resident's individual program plan, and
 - b. The special diet is reviewed and evaluated by a physician and a dietitian to ensure the special diet meets the resident's nutritional needs;
- 8. Meals are served to residents at tables in a dining area and in a manner that allows the resident to eat from an upright position, unless otherwise specified in the resident's individual program plan or by an attending physician;
- 9. A resident requiring assistance to eat is provided with assistance that recognizes the resident's nutritional, physical, and social needs, including the use of adaptive eating equipment or utensils;
- 10. Personnel members supervise meals in dining areas to:
 - a. Direct a resident's self-help dining procedures,
 - b. Ensure a resident consumes enough food to meet the resident's nutritional needs, and
 - c. Ensure that a resident eats in a manner consistent with the resident's developmental level;
- 11. Tableware, utensils, equipment, and food-contact surfaces are clean and in good repair; and
- 12. Water is available and accessible to residents.

R9-10-523. Emergency and Safety Standards**A.** An administrator shall ensure that:

- 1. A disaster plan is developed, documented, maintained in a location accessible to personnel members and other employees, and, if necessary, implemented that includes:
 - a. A floor plan of the facility showing emergency protection equipment, evacuation routes, and exits;
 - b. When, how, and where residents will be relocated, including:
 - i. Instructions for the evacuation or transfer of residents,
 - ii. Assigned responsibilities for each employee and personnel member, and
 - iii. A plan for continuing to provide services to meet a resident's needs;
 - c. How a resident's medical record will be available to individuals providing services to the resident during a disaster;
 - d. A plan for back-up power and water supply;
 - e. A plan to ensure a resident's medications will be available to administer to the resident during a disaster;
 - f. A plan to ensure a resident is provided nursing services, rehabilitation services, and other services required by the resident during a disaster; and
 - g. A plan for obtaining food and water for individuals present in the ICF/IID or the ICF/IID's relocation site during a disaster;
- 2. Personnel members receive training on the content and use of the disaster plan required in subsection (A)(1);
- 3. The disaster plan required in subsection (A)(1) is reviewed at least once every 12 months;
- 4. Documentation of a disaster plan review required in subsection (A)(3) is created, is maintained for at least 12 months after the date of the disaster plan review, and includes:
 - a. The date and time of the disaster plan review;
 - b. The name of each personnel member, employee, or volunteer participating in the disaster plan review;
 - c. A critique of the disaster plan review; and
 - d. If applicable, recommendations for improvement;
- 5. A disaster drill for employees is conducted on each shift at least once every three months and documented;
- 6. An evacuation drill for employees is conducted on each shift at least once every three months and documented;
- 7. An evacuation drill for residents:
 - a. Is conducted at least once each year on each shift and documented; and
 - b. Includes all residents on the premises except for:
 - i. A resident whose medical record contains documentation that evacuation from the ICF/IID would cause harm to the resident, and
 - ii. Sufficient personnel members to ensure the health and safety of residents not evacuated according to subsection (A)(7)(b)(i);
- 8. Documentation of each evacuation drill is created, is maintained for at least 12 months after the date of the drill, and includes:
 - a. The date and time of the evacuation drill;
 - b. The amount of time taken for employees and residents to evacuate to a designated area;
 - c. If applicable:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- i. An identification of residents needing assistance for evacuation, and
 - ii. An identification of residents who were not evacuated;
 - d. Any problems encountered in conducting the evacuation drill; and
 - e. Recommendations for improvement, if applicable; and
 - 9. An evacuation path is conspicuously posted on each hallway of each floor of the ICF/IID.
- B.** An administrator shall ensure that, if an ICF/IID has:
- 1. More than 16 residents or a resident who has a medical care plan or whose medical record contains documentation that evacuation from the ICF/IID would cause harm to the resident:
 - a. A fire alarm system is installed according to the National Fire Protection Association 72: National Fire Alarm and Signaling Code, incorporated by reference in R9-10-104.01, and is in working order; and
 - b. A sprinkler system is installed according to the National Fire Protection Association 13 Standard for the Installation of Sprinkler Systems, incorporated by reference in R9-10-104.01, and is in working order; and
 - 2. Sixteen or fewer residents, none of whom have a medical care plan or whose medical record contains documentation that evacuation from the ICF/IID would cause harm to the resident:
 - a. A fire alarm system and a sprinkler system meeting the requirements in subsection (B)(1) are installed and in working order; or
 - b. The ICF/IID has:
 - i. A fire extinguisher that is:
 - (1) Labeled as rated at least 2A-10-BC by the Underwriters Laboratories;
 - (2) Accessible to personnel members and inaccessible to residents;
 - (3) If a disposable fire extinguisher, replaced when its indicator reaches the red zone; and
 - (4) If a rechargeable fire extinguisher, is serviced at least once every 12 months, as documented by a tag attached to the fire extinguisher that specifies the date of the last servicing and the identification of the person who serviced the fire extinguisher; and
 - ii. Smoke detectors that are:
 - (1) Installed in each bedroom, hallway that adjoins a bedroom, storage room, laundry room, attached garage, and room or hallway adjacent to the kitchen, and other places recommended by the manufacturer;
 - (2) Either battery operated or, if hard-wired into the electrical system of the ICF/IID, has a back-up battery;
 - (3) In working order; and
 - (4) Tested at least once a month, with documentation of the test maintained for at least 12 months after the date of the test.
- C.** An administrator shall:
- 1. Obtain a fire inspection conducted according to the time-frame established by the local fire department or the State Fire Marshal,
 - 2. Make any repairs or corrections stated on the fire inspection report, and
 - 3. Maintain documentation of a current fire inspection.
- D.** An administrator shall ensure that, if applicable, a sign is placed at the entrance to a room or area indicating that oxygen is in use.
- Historical Note**

- R9-10-524. Environmental Standards**
- A.** An administrator shall ensure that:
- 1. An ICF/IID's premises and equipment are:
 - a. Cleaned and disinfected according to policies and procedures or manufacturer's instructions to prevent, minimize, and control illness and infection; and
 - b. Free from a condition or situation that may cause a resident or an individual to suffer physical injury;
 - 2. A pest control program that complies with A.A.C. R3-8-201(C)(4) is implemented and documented;
 - 3. Equipment used to provide direct care is:
 - a. Maintained in working order;
 - b. Tested and calibrated according to the manufacturer's recommendations or, if there are no manufacturer's recommendations, as specified in policies and procedures; and
 - c. Used according to the manufacturer's recommendations;
 - 4. Documentation of equipment testing, calibration, and repair is maintained for at least 12 months after the date of the testing, calibration, or repair;
 - 5. Garbage and refuse are:
 - a. In areas used for food storage, food preparation, or food service, stored in a covered container lined with a plastic bag;
 - b. In areas not used for food storage, food preparation, or food service, stored:
 - i. According to the requirements in subsection (A)(5)(a), or
 - ii. In a paper-lined or plastic-lined container that is cleaned and sanitized as often as necessary to ensure that the container is clean; and
 - c. Removed from the premises at least once a week;
 - 6. Heating and cooling systems maintain the ICF/IID at a temperature between 70° F and 84° F;
 - 7. Common areas:
 - a. Are lighted to assure the safety of residents, and
 - b. Have lighting sufficient to allow personnel members to monitor resident activity;
 - 8. The supply of hot and cold water is sufficient to meet the personal hygiene needs of residents and the cleaning and sanitation requirements in this Article;
 - 9. The temperature of the hot water does not exceed 120° F;
 - 10. Linens are clean before use, without holes and stains, and not in need of repair;
 - 11. Oxygen containers are secured in an upright position;
 - 12. Poisonous or toxic materials stored by the ICF/IID are maintained in labeled containers in a locked area separate from food preparation and storage, dining areas, and medications and are inaccessible to residents;
 - 13. Combustible or flammable liquids stored by the ICF/IID are stored in the original labeled containers or safety containers in a locked area inaccessible to residents;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

14. If pets or animals are allowed in the ICF/IID, pets or animals are:
 - a. Controlled to prevent endangering the residents and to maintain sanitation;
 - b. Licensed consistent with local ordinances; and
 - c. For a dog or cat, vaccinated against rabies;
 15. If a water source that is not regulated under 18 A.A.C. 4 by the Arizona Department of Environmental Quality is used:
 - a. The water source is tested at least once every 12 months for total coliform bacteria and fecal coliform or *E. coli* bacteria;
 - b. If necessary, corrective action is taken to ensure the water is safe to drink; and
 - c. Documentation of testing is retained for at least 12 months after the date of the test; and
 16. If a non-municipal sewage system is used, the sewage system is in working order and is maintained according to all applicable state laws and rules.
- B.** An administrator shall ensure that:
1. Smoking tobacco products are not permitted within an ICF/IID; and
 2. Smoking tobacco products may be permitted outside an ICF/IID if:
 - a. Signs designating smoking areas are conspicuously posted, and
 - b. Smoking is prohibited in areas where combustible materials are stored or in use.
- C.** If a swimming pool is located on the premises, an administrator shall ensure that:
1. At least one personnel member with cardiopulmonary resuscitation training that meets the requirements in R9-10-503(C)(1)(g) is present in the pool area when a resident is in the pool area, and
 2. At least two personnel members are present in the pool area when two or more residents are in the pool area.
- Historical Note**

- R9-10-525. Physical Plant Standards**
- A.** An administrator shall ensure that, if an ICF/IID has:
1. More than 16 residents, the ICF/IID complies with:
 - a. The applicable physical plant health and safety codes and standards, incorporated by reference in R9-10-104.01, that were in effect on the earlier of:
 - i. The date the ICF/IID was originally certified as an ICF/IID by the federal Centers for Medicare and Medicaid Services, or
 - ii. The date the ICF/IID submitted architectural plans and specifications to the Department for approval according to R9-10-104; and
 - b. The requirements for Existing Health Care Occupancies in National Fire Protection Association 101, Life Safety Code, incorporated by reference in R9-10-104.01; and
 2. Sixteen or fewer residents, the ICF/IID complies with the requirements for Existing Health Care Occupancies in National Fire Protection Association 101, Life Safety Code, incorporated by reference in R9-10-104.01.
- B.** An administrator shall ensure that:
1. The premises and equipment are sufficient to accommodate:
 - a. The services stated in the ICF/IID's scope of services, and
 - b. An individual accepted as a resident by the ICF/IID;
 2. A common area for use by residents is provided that has sufficient space and furniture to accommodate the recreational and socialization needs of residents;
 3. A dining area has sufficient space and tables and chairs to accommodate the needs of the residents;
 4. At least one bathroom is accessible from a common area and:
 - a. May be used by residents and visitors;
 - b. Does not open into an area in which food is prepared;
 - c. Provides privacy when in use; and
 - d. Contains the following:
 - i. At least one working sink with running water,
 - ii. At least one working toilet that flushes and has a seat,
 - iii. Toilet tissue for each toilet,
 - iv. Soap in a dispenser accessible from each sink,
 - v. Paper towels in a dispenser or a mechanical air hand dryer,
 - vi. Lighting, and
 - vii. A window that opens or another means of ventilation;
 5. An outside activity space is provided and available that:
 - a. Is on the premises,
 - b. Has a hard-surfaced section for wheelchairs, and
 - c. Has an available shaded area;
 6. Exterior doors are equipped with ramps or other devices to allow use by a resident using a wheelchair or other assistive device; and
 7. The key to the door of a lockable bathroom or bedroom is available to a personnel member.
- C.** An administrator shall ensure that:
1. For every eight residents there is at least one working toilet that flushes and has a seat and one sink with running water;
 2. For every eight residents there is at least one working bathtub or shower;
 3. A resident bathroom provides privacy when in use and contains:
 - a. A mirror;
 - b. Toilet tissue for each toilet;
 - c. Soap accessible from each sink;
 - d. Paper towels in a dispenser or a mechanical air hand dryer for a bathroom that is used by more than one resident;
 - e. A window that opens or another means of ventilation;
 - f. Grab bars for the toilet and, if applicable, the bathtub or shower and other assistive devices, if required to provide for resident safety; and
 - g. Nonporous surfaces for shower enclosures and slip-resistant surfaces in tubs and showers;
 4. An ICF/IID is ventilated by windows or mechanical ventilation, or a combination of both;
 5. If required for the residents of the ICF/IID, the corridors are equipped with handrails on each side that are firmly attached to the walls and are not in need of repair;
 6. No more than two individuals reside in a resident bedroom; and
 7. A resident's bedroom:
 - a. Is accessible without passing through a storage area, an equipment room, or another resident's bedroom;
 - b. Is constructed and furnished to provide unimpeded access to the door;
 - c. Has floor-to-ceiling walls with at least one door;

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- d. Does not open into any area where food is prepared, served, or stored;
 - e. If a private bedroom, has at least 80 square feet of floor space, not including a closet or bathroom;
 - f. If a shared bedroom, has at least 60 square feet of floor space for each individual occupying the shared bedroom, not including a closet or bathroom;
 - g. Has a separate bed, at least 36 inches in width and 72 inches in length, for each resident, consisting of at least a frame and mattress that is clean and in good repair;
 - h. Has clean linen, including a mattress pad, sheets large enough to tuck under the mattress, pillows, pillow cases, a bedspread, waterproof mattress covers as needed, and blankets to ensure warmth and comfort for the resident;
 - i. Has furniture to meet the resident's needs and sufficient light for reading;
 - j. Has an openable window to the outside with window coverings for controlling light and visual privacy, and the location of the window permits a resident to see outside from a sitting position;
 - k. Has individual storage space for a resident's possessions and assistive devices; and
 - l. Has a closet with clothing racks and shelves accessible to the resident.
- D.** If a swimming pool is located on the premises, an administrator shall ensure that:
- 1. The swimming pool is enclosed by a wall or fence that:
 - a. Is at least five feet in height as measured on the exterior of the wall or fence;
 - b. Has no vertical openings greater than four inches across;
 - c. Has no horizontal openings, except as described in subsection (D)(1)(e);
 - d. Is not chain-link;
 - e. Does not have a space between the ground and the bottom fence rail that exceeds four inches in height; and
 - f. Has a self-closing, self-latching gate that:
 - i. Opens away from the swimming pool,
 - ii. Has a latch located at least 54 inches from the ground, and
 - iii. Is locked when the swimming pool is not in use; and
 - 2. A life preserver or shepherd's crook is available and accessible in the pool area.
- E.** An administrator shall ensure that a spa that is not enclosed by a wall or fence as described in subsection (D)(1) is covered and locked when not in use.

 - b. A description of any injury to the resident related to the suspected abuse or neglect and any change to the resident's physical, cognitive, functional, or emotional condition;
 - c. The names of witnesses to the suspected abuse, neglect, or exploitation; and
 - d. The actions taken by the administrator to prevent the suspected abuse, neglect, or exploitation from occurring in the future; and
 6. Maintain a copy of the documented information required in subsection (I)(5) and any other information obtained during the investigation for at least 12 months after the date the investigation was initiated.
- J.** In addition to the notification requirements in subsections (F), (G), (H), and (I), an administrator of a behavioral health residential facility providing services to children that contracts exclusively with the federal government and receives only federal monies for services provided shall comply with A.R.S. § 36-418.
- K.** An administrator shall:
1. Establish and document requirements regarding residents, personnel members, employees, and other individuals entering and exiting the premises;
 2. For a behavioral health residential facility licensed according to A.R.S. § 36-425.06 and in addition to the requirements in subsection (K)(1), establish and document requirements for a resident admitted according to A.R.S. § 36-550.09, consistent with R9-10-722(D);
 3. Establish and document guidelines for meeting the needs of an individual residing at a behavioral health residential facility with a resident, such as a child accompanying a parent in treatment, if applicable;
 4. If children under the age of 12, who are not admitted to a behavioral health residential facility, are residing at the behavioral health residential facility and being cared for by employees or personnel members, ensure that:
 - a. An employee or personnel member caring for children has current cardiopulmonary resuscitation and first aid training specific to the ages of children being cared for; and
 - b. The staff-to-children ratios in A.A.C. R9-5-404(A) are maintained, based on the age of the youngest child in the group;
 5. Establish and document the process for responding to a resident's need for immediate and unscheduled behavioral health services or physical health services;
 6. Establish and document the criteria for determining when a resident's absence is unauthorized, including criteria for a resident who:
 - a. Was admitted under A.R.S. Title 36, Chapter 5, Articles 3, 4, 5, or 10;
 - b. Is absent against medical advice; or
 - c. Is under the age of 18;
 7. If a resident's absence is unauthorized as determined according to the criteria in subsection (K)(5), within an hour after determining that the resident's absence is unauthorized, notify:
 - a. For a resident who is under 18 years of age, the resident's parent or legal guardian; and
 - b. For a resident who is under a court's jurisdiction, the appropriate court;
 8. Maintain a written log of unauthorized absences for at least 12 months after the date of a resident's absence that includes the:
 - a. Name of a resident absent without authorization,
 - b. Name of the individual to whom the report required in subsection (K)(6) was submitted, and
 - c. Date of the report; and
 9. Evaluate and take action related to unauthorized absences under the quality management program in R9-10-704.
- L.** An administrator shall ensure that a personnel member who is able to read, write, understand, and communicate in English is on the premises of the behavioral health residential facility.
- M.** An administrator shall ensure that the following information or documents are conspicuously posted on the premises and are available upon request to a personnel member, employee, resident, or a resident's representative:
1. The behavioral health residential facility's current license,
 2. The location at which inspection reports required in R9-10-720(C) are available for review or can be made available for review, and
 3. The calendar days and times when a resident may accept visitors or make telephone calls.
- N.** An administrator shall ensure that:
1. Labor performed by a resident for the behavioral health residential facility is consistent with A.R.S. § 36-510;
 2. A resident who is a child is only released to the child's custodial parent, guardian, or custodian or as authorized in writing by the child's custodial parent, guardian, or custodian;
 3. The administrator obtains documentation of the identity of the parent, guardian, custodian, or family member authorized to act on behalf of a resident who is a child; and
 4. A resident, who is an incapacitated person according to A.R.S. § 14-5101 or who is gravely disabled, is assisted in obtaining a resident's representative to act on the resident's behalf.
- O.** If an administrator determines that a resident is incapable of handling the resident's financial affairs, the administrator shall:
1. Notify the resident's representative or contact a public fiduciary or a trust officer to take responsibility of the resident's financial affairs, and
 2. Maintain documentation of the notification required in subsection (O)(1) in the resident's medical record for at least 12 months after the date of the notification.
- P.** If an administrator manages a resident's money through a personal funds account, the administrator shall ensure that:
1. Policies and procedure are established, developed, and implemented for:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

- a. Using resident's funds in a personal funds account,

R9-10-707. Admission; Assessment

- A.** An administrator shall ensure that:
1. A resident is admitted based upon:
 - a. The resident's primary condition for which the resident is admitted to the behavioral health residential facility being a behavioral health issue, and
 - b. The resident's behavioral health issue and treatment needs are within the behavioral health residential facility's scope of services;
 2. A behavioral health professional, authorized by policies and procedures to admit a resident, is available;
 3. Except as provided in subsection (A)(4), general consent is obtained from:
 - a. An adult resident or the resident's representative before or at the time of admission, or
 - b. A resident's representative, if the resident is not an adult;
 4. General consent is not required from a patient receiving a court-ordered evaluation or court-ordered treatment;
 5. The general consent obtained in subsection (A)(3) is documented in the resident's medical record;
 6. Except as provided in subsection (E)(1)(a), a medical practitioner performs a medical history and physical examination or a registered nurse performs a nursing assessment on a resident within 30 calendar days before admission or within 72 hours after admission and documents the medical history and physical examination or nursing assessment in the resident's medical record within 72 hours after admission;
 7. If a medical practitioner performs a medical history and physical examination or a nurse performs a nursing assessment on a resident before admission, the medical practitioner enters an interval note or the nurse enters a progress note in the resident's medical record within seven calendar days after admission;
 8. If a behavioral health assessment is conducted by a:
 - a. Behavioral health technician or registered nurse, within 24 hours a behavioral health professional, certified or licensed to provide the behavioral health services needed by the resident, reviews and signs the behavioral health assessment to ensure that the behavioral health assessment identifies the behavioral health services needed by the resident; or
 - b. Behavioral health paraprofessional, a behavioral health professional, certified or licensed to provide the behavioral health services needed by the resident, supervises the behavioral health paraprofessional during the completion of the assessment and signs the assessment to ensure that the assessment identifies the behavioral health services needed by the resident;
 9. Except as provided in subsection (A)(10), a behavioral health assessment for a resident is completed before treatment for the resident is initiated;
 10. If a behavioral health assessment that complies with the requirements in this Section is received from a behavioral health provider other than the behavioral health residential facility or if the behavioral health residential facility has a medical record for the resident that contains a behavioral health assessment that was completed within 12 months before the date of the resident's current admission:
 - a. The resident's assessment information is reviewed before treatment for the resident is initiated and

- updated if additional information that affects the resident's assessment is identified, and
 - b. The review and update of the resident's assessment information is documented in the resident's medical record within 48 hours after the review is completed;
 - 11. A behavioral health assessment:
 - a. Documents a resident's:
 - i. Presenting issue;
 - ii. Substance abuse history;
 - iii. Co-occurring disorder;
 - iv. Legal history, including:
 - (1) Custody,
 - (2) Guardianship, and
 - (3) Pending litigation;
 - v. Criminal justice record;
 - vi. Family history;
 - vii. Behavioral health treatment history;
 - viii. Symptoms reported by the resident; and
 - ix. Referrals needed by the resident, if any;
 - b. Includes:
 - i. Recommendations for further assessment or examination of the resident's needs,
 - ii. The physical health services or ancillary services that will be provided to the resident until the resident's treatment plan is completed, and
 - iii. The signature and date signed of the personnel member conducting the behavioral health assessment; and
 - c. Is documented in resident's medical record;
 - 12. A resident is referred to a medical practitioner if a determination is made that the resident requires immediate physical health services or the resident's behavioral health issue may be related to the resident's medical condition; and
 - 13. Except as provided in subsection (E)(1)(d), a resident provides evidence of freedom from infectious tuberculosis:
 - a. Before or within seven calendar days after the resident's admission, and
 - b. As specified in R9-10-113.
- B.** An administrator shall ensure that:
- 1. A request for participation in a resident's behavioral health assessment is made to the resident or the resident's representative,
 - 2. An opportunity for participation in the resident's behavioral health assessment is provided to the resident or the resident's representative, and
 - 3. The request in subsection (B)(1) and the opportunity in subsection (B)(2) are documented in the resident's medical record.
- C.** An administrator shall ensure that a resident's behavioral health assessment information is documented in the medical record within 48 hours after completing the behavioral health assessment.
- D.** If information in subsection (A)(10) is obtained about a resident after the resident's behavioral health assessment is completed, an administrator shall ensure that an interval note, including the information, is documented in the resident's medical record within 24 hours after the information is obtained.
- E.** If a behavioral health residential facility is authorized to provide respite services, an administrator shall ensure that:
- 1. Upon admission of a resident for respite services:
 - a. Except as provided in subsection (F), a medical history and physical examination of the resident:
 - i. Is performed; or
 - ii. If dated within the previous 12 months, is available in the resident's medical record from a previous admission to the behavioral health residential facility;
 - b. A treatment plan that meets the requirements in R9-10-708:
 - i. Is developed; or
 - ii. If dated within the previous 12 months, is available in the resident's medical record from a previous admission to the behavioral health residential facility;
 - c. If a treatment plan, dated within the previous 12 months, is available, the treatment plan is reviewed, updated, and documented in the resident's medical record; and
 - d. The resident is not required to comply with the requirements in subsection (A)(13) if the resident is not expected to be present in the behavioral health residential facility:
 - i. For more than seven consecutive days, or
 - ii. For 10 days or more days in a 90-consecutive-day period;
 - 2. The common area required in R9-10-722(B)(1)(b) provides at least 25 square feet for each resident, including residents who do not stay overnight; and
 - 3. In addition to the requirements in R9-10-722(B)(3), toilets and hand-washing sinks are available to residents, including residents who do not stay overnight, as follows:
 - a. There is at least one working toilet that flushes and has a seat and one sink with running water for every 10 residents,
 - b. There are at least two working toilets that flush and have seats and two sinks with running water if there are 11 to 25 residents, and
 - c. There is at least one additional working toilet that flushes and has a seat and one additional sink with running water for each additional 20 residents.
- F.** A medical history and physical examination is not required for a child who is admitted or expected to be admitted to a residential behavioral health facility for less than 10 days in a 90-consecutive-day period.

R9-10-708. Treatment Plan

- A.** An administrator shall ensure that a treatment plan is developed and implemented for each resident that:
1. Is based on the medical history and physical examination or nursing assessment required in R9-10-707(A)(6) or (E)(1)(a) and the behavioral health assessment required in R9-10-707(A)(9) or (10) and on-going changes to the behavioral health assessment of the resident;
 2. Is completed:
 - a. By a behavioral health professional or a behavioral health technician under the clinical oversight of a behavioral health professional, and
 - b. Before the resident receives physical health services or behavioral health services or within 48 hours after the assessment is completed;
 3. Is documented in the resident's medical record within 48 hours after the resident first receives physical health services or behavioral health services;
 4. Includes:
 - a. The resident's presenting issue;
 - b. The physical health services or behavioral health services to be provided to the resident;
 - c. The signature of the resident or the resident's representative and date signed, or documentation of the refusal to sign;
 - d. The date when the resident's treatment plan will be reviewed;
 - e. If a discharge date has been determined, the treatment needed after discharge; and
 - f. The signature of the personnel member who developed the treatment plan and the date signed;
 5. If the treatment plan was completed by a behavioral health technician, is reviewed and signed by a behavioral health professional within 24 hours after the completion of the treatment plan to ensure that the treatment plan is complete and accurate and meets the resident's treatment needs; and
 6. Is reviewed and updated on an on-going basis:
 - a. According to the review date specified in the treatment plan,
 - b. When a treatment goal is accomplished or changed,
 - c. When additional information that affects the resident's behavioral health assessment is identified, and
 - d. When a resident has a significant change in condition or experiences an event that affects treatment.
- B.** An administrator shall ensure that:
1. A request for participation in developing a resident's treatment plan is made to the resident or the resident's representative,
 2. An opportunity for participation in developing the resident's treatment plan is provided to the resident or the resident's representative, and
 3. The request in subsection (B)(1) and the opportunity in subsection (B)(2) are documented in the resident's medical record.

R9-10-709. Discharge

- A.** An administrator shall ensure that a discharge plan for a resident is:
1. Developed that:
 - a. Identifies any specific needs of the resident after discharge,
 - b. Is completed before discharge occurs, and
 - c. Includes a description of the level of care that may meet the resident's assessed and anticipated needs after discharge;
 2. Documented in the resident's medical record within 48 hours after the discharge plan is completed; and
 3. Provided to the resident or the resident's representative before the discharge occurs.
- B.** An administrator shall ensure that:
1. A request for participation in developing a resident's discharge plan is made to the resident or the resident's representative,
 2. An opportunity for participation in developing the resident's discharge plan is provided to the resident or the resident's representative, and
 3. The request in subsection (B)(1) and the opportunity in subsection (B)(2) are documented in the resident's medical record.
- C.** An administrator shall ensure that a resident is discharged from a behavioral health residential facility when the resident's treatment needs are not consistent with the services that the behavioral health residential facility is authorized and able to provide.
- D.** An administrator shall ensure that there is a documented discharge order by a medical practitioner or behavioral health professional before a resident is discharged unless the resident leaves the behavioral health residential facility against a medical practitioner's or behavioral health professional's advice.
- E.** An administrator shall ensure that, at the time of discharge, a resident receives a referral for treatment or ancillary services that the resident may need after discharge, if applicable.
- F.** If a resident is discharged to any location other than a health care institution, an administrator shall ensure that:
1. Discharge instructions are documented, and
 2. The resident or the resident's representative is provided with a copy of the discharge instructions.
- G.** An administrator shall ensure that a discharge summary for a resident:

CHAPTER 10. DEPARTMENT OF HEALTH SERVICES - HEALTH CARE INSTITUTIONS: LICENSING

 - ii. The resident complaint process; and
 - e. Except as otherwise permitted by law, provides written consent to the release of information in the resident's:
 - i. Medical record, or
 - ii. Financial records.
- C.** For a behavioral health residential facility with licensed capacity of less than 10 residents, if a behavioral health professional determines that a resident's treatment requires the behavioral health residential facility to restrict the resident's ability to participate in the activities in subsection (B)(3), the behavioral health professional shall:
1. Document a specific treatment purpose in the resident's medical record that justifies restricting the resident from the activity,
 2. Inform the resident or resident's representative of the reason why the activity is being restricted, and
 3. Inform the resident or resident's representative of the resident's right to file a complaint and the procedure for filing a complaint.
- D.** For a behavioral health residential facility with a licensed capacity of 10 or more residents, if a clinical director determines that a resident's treatment requires the behavioral health residential facility to restrict the resident's ability to participate in the activities in subsection (B)(3), the clinical director shall comply with the requirements in subsections (C)(1) through (3).
- E.** A resident has the following rights:
1. Not to be discriminated against based on race, national origin, religion, gender, sexual orientation, age, disability, marital status, or diagnosis;
 2. To receive treatment that:
 - a. Supports and respects the resident's individuality, choices, strengths, and abilities;
 - b. Supports the resident's personal liberty and only restricts the resident's personal liberty according to a court order, by the resident's or the resident's representative's general consent, or as permitted in this Chapter; and
 - c. Is provided in the least restrictive environment that meets the resident's treatment needs;
 3. To receive privacy in treatment and care for personal needs, including the right not to be fingerprinted, photographed, or recorded without consent, except:
 - a. A resident may be photographed when admitted to a behavioral health residential facility for identification and administrative purposes;
 - b. For a resident receiving treatment according to A.R.S. Title 36, Chapter 37; or
 - c. For video recordings used for security purposes that are maintained only on a temporary basis;
 4. Not to be prevented or impeded from exercising the resident's civil rights unless the resident has been adjudicated incompetent or a court of competent jurisdiction has found that the resident is not able to exercise a specific right or category of rights;
 5. To review, upon written request, the resident's own medical record according to A.R.S. §§ 12-2293, 12-2294, and 12-2294.01;
 6. To be provided locked storage space for the resident's belongings while the resident receives treatment;
 7. To have opportunities for social contact and daily social, recreational, or rehabilitative activities;
 8. To be informed of the requirements necessary for the resident's discharge or transfer to a less restrictive physical environment;
