**ARTICLE 13. TREATMENT GUIDELINES****R20-5-1301. Adoption and Applicability of the Article**

- A. The Industrial Commission of Arizona (Commission) has adopted the Work Loss Data Institute's *Official Disability Guidelines – Treatment in Workers Compensation* (ODG) as the standard reference for evidence-based medicine used in treating injured workers within the context of Arizona's workers' compensation system. By adopting and referencing the most recent edition (at the time of treatment), and continuously updated Official Disability Guidelines, the Commission can ensure the latest available medical evidence is used in making medical treatment decisions for injured workers.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- B. Until further action of the Commission, the guidelines shall apply to all body parts and conditions.
- C. The Commission may modify or change the applicability of the guidelines as described in subsection (B) if the Commission determines that modification or changing the applicability of the guidelines will: 1) improve medical treatment for injured workers, 2) make treatment and claims processing more efficient and cost effective, and 3) if the Commission's modification expands the applicability of the guidelines, the guidelines adequately cover the relevant body parts or conditions. Before taking action to modify or change the applicability of the guidelines, the Commission shall provide an opportunity for public comment and hold a public hearing. A decision of the Commission under this subsection shall be made by a majority vote of a quorum of Commission members present at a public meeting.
- D. Action taken by the Commission to modify or change the applicability of the guidelines under subsection (C) shall be published in the minutes of the Commission meeting when such action was taken. The minutes of this action shall be published on the Commission's website and shall be available from the Commission upon request.
- E. The guidelines shall apply prospectively. Recommendations provided in the guidelines related to the management of chronic pain and the use of opioids for all stages of pain management shall apply to medical treatment or services occurring on or after October 1, 2016. For purposes of this process, chronic pain shall be defined by the guidelines. Recommendations provided in the guidelines related to all other body parts and conditions shall apply to medical treatment or services occurring on or after October 1, 2018.
- F. This Article applies to all claims filed with the Commission.
- G. This Article only applies to medical treatment and services for body parts and conditions that have been accepted as compensable.
- H. The guidelines are to be used as a tool to support clinical decision making and quality health care delivery to injured employees. The guidelines set forth care that is generally considered reasonable and are presumed correct if the guidelines provide recommendations related to the requested treatment or service. This is a rebuttable presumption and reasonable medical care may include deviations from the guidelines. To support a request to deviate from the guidelines, the provider must produce documentation and justification that demonstrates by a preponderance of credible medical evidence a medical basis for departing from the guidelines. Credible medical evidence may include clinical expertise and judgment.
- I. The Commission shall provide administrative review and oversight of this Article.

**INTRODUCTION**

Since 1925, when the Arizona Legislature passed the state's first Workers' Compensation Act ("Act"), the Industrial Commission of Arizona ("Commission") has administered the workers' compensation laws of that Act. The Act includes the authority of the Commission to set a schedule of fees to be charged by healthcare providers attending injured employees (also referred to in this document as "injured worker" or "claimant." A.R.S. § 23-908(B). In 2004, the Act was amended to include the setting of fees for prescription medicines required to treat an injured employee. A.R.S. § 23-908(C). This fee schedule is referred to as the Arizona Physicians' and Pharmaceutical Fee Schedule (Fee Schedule).

Any reference to "healthcare providers" in the Fee Schedule is intended to include all licensed professionals whose scope of practice allows them to legally provide services to injured workers. Any reference to "physician" in relation to workers' compensation cases includes the following: doctors of medicine, doctors of osteopathy, doctors of podiatric medicine, doctors of chiropractic, doctors of naturopathic medicine, certified registered nurse anesthesiologists, physician assistants and nurse practitioners. Healthcare providers treating employees under industrial coverage are entitled by law to charge according to the schedule of fees adopted by the Commission. Accurate calculation of fees based upon this schedule, the filing of reports and bills for payment, and the use of forms prescribed are essential to timely and correct payment for a provider's services and can be vital in the award of benefits to the injured worker and their dependents.

This Fee Schedule has been updated to incorporate by reference the following:

1. The 2023 Edition of the American Medical Association's *Current Procedural Terminology* (CPT®) publication, including the general guidelines, identifiers, modifiers, and terminology associated with the incorporated codes.
2. The 2023 Healthcare Common Procedure Coding System (HCPCS) codes that include procedures, supplies, products, and services published by the Centers for Medicare & Medicaid Services (CMS).

**A. GENERAL GUIDANCE**

1. Reimbursements and billing associated with Pharmaceuticals are found in the Pharmaceutical Fee Schedule Section of this document.
2. Except when governed by a separate contract or network that governs fees pursuant to A.R.S. § 23-908(J)(1), this Fee Schedule establishes the maximum reimbursement values for services performed by healthcare providers to injured workers under Arizona's workers' compensation law.
3. If a healthcare provider or insurance carrier is referring an injured worker to a medical specialist for evaluation and/or treatment, the medical specialist's diagnosis becomes the foundational diagnosis for billing purposes.
4. Routine progress and routine final reports filed by the attending healthcare provider do not ordinarily command a fee.
5. Payment will be made for only one professional visit in any one day except when the submitted report clearly demonstrates the need for the additional visit and fee.
6. Fees for hospital, office, or home visits, subsequent to the initial visit, are not to be added to coded surgical procedures performed on the same day.
7. Routine office treatment principally by injection of drugs, other than antibiotics, requires authorization by the carrier or self-insured employer for each series of 10 after the first series of 10.
8. Except in emergencies, a carrier must be given notice regarding a consultation and the consultant must provide his/her report to the carrier and the attending healthcare provider within a reasonable period of time to facilitate processing of the claim.
9. The Commission requests that carriers notify attending healthcare providers at the same time the claimant is notified that their claim is closed with or without supportive care. If a claim is approved for reopening, the carrier should also notify the attending healthcare provider of that approval.
10. Missed individual appointments for consultants, without prior notification, will be compensated at 50% of consultation fee.
11. No fees may be charged for services not personally rendered by the healthcare provider, unless otherwise specified.
12. The Commission will investigate an injured workers' complaint of bad faith/unfair claims processing practices, and if appropriate, impose penalties under A.R.S. § 23-930, in those circumstances where a "peer to peer" review was not conducted by a healthcare provider with appropriate skill, training, and knowledge or where the individual performing the "peer to peer" review was not licensed. The Commission will also investigate an injured workers' complaint of bad faith/unfair claims processing practice, and if appropriate, impose penalties under A.R.S. § 23-930, for a denial of treatment based on the failure of the treating doctor to participate in a "peer to peer" review, when the treating doctor has not been given reasonable time or opportunity to participate in the "peer to peer" review. As authorized under A.A.C. R20-5-128, the fee for the reproduction of medical records for workers' compensation purposes shall be 25¢ per page and \$10.00 per hour per person for reasonable clerical costs associated with locating and reproducing the documents.
13. Reimbursement values for telehealth services are governed by the Fee Schedule and no reductions are justified unless specified by the Fee Schedule. Performance of telehealth services are governed by Arizona Revised Statutes, Title 36,

Chapter 36. Bills for services performed via telehealth shall include the appropriate modifier and place of service code according to the incorporated AMA/CMS guidelines.

**B. PAYMENT AND REVIEW OF BILLINGS**

1. Under Arizona workers' compensation law, an insurance carrier, self-insured employer or their representative is not responsible for payment of a billing for medical, surgical, and hospital benefits that the insurance carrier, employer or representative received more than 24 months from the date that the medical service was rendered, or from the date on which the provider knew or should have known that the service was rendered, whichever occurs later. A subsequent billing or corrective billing does not restart the limitations period. *See A.R.S. § 23- 1062.01.*
2. It is incumbent upon the insurance carrier, self-insured employer and third party processing service to inform all parties, including the Commission, regarding changes in addresses for bill processing locations.
3. Under Arizona workers' compensation law, a healthcare provider is entitled to timely payment for services rendered. An insurance carrier, self-insured employer or claims processing representative shall make a determination whether to deny or pay a medical bill on an accepted claim, in whole or in part, including the decision as to the amount to pay, within thirty days from the date the claim is accepted, if the billing is received before the date of acceptance, or within thirty days from the date of the receipt of the billing if the billing is received after the date of acceptance. All billing denials shall be based on reasonable justification. The insurance carrier, self-insured employer, or claims processing representative shall pay the approved portion of the billing within thirty days after the determination for payment is made. If the billing is not paid within the applicable time period, the insurance carrier, self-insured employer, or claims processing representative shall pay interest to the health provider on the billing at a rate that is equal to the legal rate. Interest shall be calculated beginning on the date that the payment to the healthcare provider is due. *See A.R.S. § 23-1062.01.*

To ensure timely and accurate payment of a medical billing, a billing must contain the information required under A.R.S. § 23- 1062.01. A billing must contain at least the following information: Correct demographic patient information including claim number, if known; Correct provider information, including name, address, telephone number, and federal taxpayer identification number; Appropriate medical coding with dollar amounts and units clearly stated with all descriptions and dates of services clearly printed; and legible medical reports required for each date of service if the billing is for direct treatment of the injured worker.

4. Payment of a workers' compensation medical billing is governed by A.R.S. § 23-1062.01, which includes:
  - a. Timeframes for processing and payment of medical bills;
  - b. Criteria for billing denials;
  - c. A provision that the injured worker is not responsible for payment of any portion of a medical bill on an accepted claim or payment of any portion of a medical billing that is being disputed;
  - d. A provision that the insurance carrier or self-insured employer may establish an internal system for resolving payment disputes;
  - e. A provision that A.R.S. § 23-1062.01 does not apply to written contracts entered into between medical providers and insurance carriers and self-insured employers or their representatives that specify payment periods or contractual remedies for untimely payments; and
  - f. A provision that the Industrial Commission does not have jurisdiction over contract disputes between the parties.
5. "Reasonable justification" to deny a bill does not include that the payment/billing policies of other private or public entities (publications) unless the publication has been incorporated by reference in the Fee Schedule.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

6. Excluding bundling and unbundling issues, it is not the Commission's intent to restrict an insurance carrier's, self-insured employers or third party processing service's ability to address issues not addressed by the Fee Schedule. This includes evaluating unlisted procedures, establishment of values for unlisted procedures, establishment of values for codes that are listed as "BR" or "RNE", or new CPT® codes that have not been incorporated by the Industrial Commission, or issues outside the jurisdiction of the Fee Schedule, such as hospital billings.
7. Healthcare providers shall provide legible medical documentation and reports that are sufficient for insurance carriers/self-insured employers to determine if treatment is being directed towards injuries sustained in an industrial accident or incident. The healthcare provider shall ensure that their patients' medical files include the information required by A.R.S. § 32-1401.2. The healthcare provider is not required to provide copies of documents or reports that they did not author and that are not in their possession (*i.e.*, Employers' First Report of Injury).
8. Treating physicians shall submit a narrative that justifies the billing of a level 4 or 5 E/M service.
9. The Commission has incorporated by reference the Centers for Medicare and Medicaid Services, Evaluation and Management Services, <https://www.cms.gov/outreach-and-education/medicare-learning-network-mln/mlnproducts/downloads/eval-mgmt-serv-guide-icn006764.pdf> and the American Medical Association, Evaluation and Management Code and Guideline Changes, <https://www.ama-assn.org/system/files/2023-e-m-descriptors-guidelines.pdf>. Medical billings shall be prepared and reviewed consistent with how these guidelines are used and interpreted by CMS. Additionally, payers are required to disclose the guideline utilized in their Explanation of Reviews (or other similar document).
10. A payer's Explanation of Review (or other similar document) shall contain sufficient information to allow the healthcare provider to determine whether the amount of payment is correct and whom to contact regarding any questions related to the payment. Information in the Explanation of Review (or other similar document) shall include the following:
  - a. The name of the injured worker;
  - b. The name of the payer and the name of the third party administrator ("TPA"), if applicable;
  - c. If applicable, the name, telephone number, and address of all entities that reviewed the medical billing on behalf of the payer;
  - d. If applicable, the name, telephone number and address of the party that has a written contract signed by the healthcare provider that allows the contracting party or other third party to access and pay rates that are different from those provided under this Fee Schedule;
  - e. The amount billed by the healthcare provider;
  - f. The amount of any reduction due to a written contract with the healthcare provider; and
  - g. The amount of payment.
11. Nothing in this Fee Schedule precludes a healthcare provider from entering into a separate contract that governs fees. In this instance, reimbursement shall be made according to the applicable contracted charge. In the absence of a separate contract that governs a healthcare provider's fees, reimbursement shall be made according to this Fee Schedule. A payer shall demonstrate that it is entitled to pay the contracted rate in the event of a dispute by providing a valid copy of the governing contract to the healthcare provider. If a payer fails to provide evidence that it is entitled to pay a contracted rate, then the payer shall be required to make payment as provided in this Fee Schedule.
12. Billing and reimbursement guidelines for Pharmaceuticals is found in the Pharmaceutical Fee Schedule Section of this document.
13. The Fee Schedule does not apply to ambulance service providers. Service fees for ground ambulance transportation are set and mandated by the Arizona Department of Health Services through its Arizona Ground Ambulance Service Rate Schedule. A.R.S. § 36-2239(D) states "an ambulance service shall not charge, demand or collect any remuneration for any service greater or less than or different from the rate or charge determined and fixed by the department as the rate or charge for that service." Service fees published in the Arizona Ground Ambulance Service Rate Schedule are applicable in the workers' compensation setting.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

1. Certified Registered Nurse Anesthetists (“CRNA’s”) are reimbursed at 85% of the fee schedule.
    - a. Physician Assistants and Nurse Practitioners are reimbursed at 85% of the fee schedule *except* if services are provided “incident to” a physician’s professional services. In that instance, reimbursement is required to be at 100% of the fee schedule. The following criteria are identified as establishing the “incident to” exception:
      - b. The Physician Assistant and Nurse Practitioner must work under the direct supervision of an appropriately licensed physician,
      - c. The Physician must initially see that patient and establish a plan of care for that patient (“treatment plan”),
      - d. Subsequent service provided by the Physician Assistant and Nurse Practitioner must be a part of the documented treatment plan, and
      - e. The Physician must always be involved in the patient’s treatment plan and see the patient often enough to demonstrate that the Physician is actively participating in and managing the patient’s care.
  2. For purposes of the Fee Schedule, the Commission recognizes that direct supervision of a Physician Assistant or Nurse Practitioner by a Physician can be accomplished through the use modern technology and telecommunications (telemedicine) and may not require the on-site presence of the Physician when the Physician Assistant or Nurse Practitioner sees the patient. In all instances, however, and regardless of the extent to which telemedicine is used, the Physician must actively participate in and manage the patient’s care if services provided by a Physician Assistant or Nurse Practitioner are billed at 100% of the fee schedule under the “incident to” exception.
- D.** It is the responsibility of the Physician to document if the services provided by a Physician Assistant and Nurse Practitioner are “incident to” the Physician’s professional service. If either the incident to criteria is not met, or the documentation submitted fails to support the “incident to” criteria, the reimbursement should be made at 85% of the fee schedule.
- DIRECTED CARE AND USE OF NETWORKS**

The Arizona Workers’ Compensation Act only permits private self-insured employers to direct medical care. A.R.S. § 23-1070(A); See also *Southwest Gas Corp. v. Industrial Commission of Arizona*, 200 Ariz. 292, 25 P.3d 1164 (2001). This limitation on the scope of directed care means that employees of private self-insured employers do not have an unrestricted right to choose their own medical providers, while employees of all other employers do (including public self-insured employers).<sup>1</sup> Notwithstanding an employee’s right to choose, many workers’ compensation insurance carriers (“carriers”) and public self-insured employers (“employers”) have taken advantage of “networks” to reduce their costs. This is done by either creating their own network of “preferred providers” or by contracting with a third party to access private health-care networks.

Actions or conduct that impair or limit the right of an employee to choose their medical provider may rise to the level of bad faith and/or unfair claims processing practices under A.R.S. § 23-930. The Commission will investigate a complaint of bad faith/unfair claims processing practices, and if appropriate, impose penalties under A.R.S. § 23- 930, in those circumstances where a carrier, employer, or TPA has engaged in conduct that results in directing a claimant to a “network” provider. The following are examples of conduct that the Commission would consider appropriate for investigation under A.R.S. § 23-930.

- A claimant is told that they must see a healthcare provider that is “in the network;”
- A claimant is told that care from a “non-network” healthcare provider is not authorized;
- A “network” healthcare provider is told that referrals are required to be made to another “network” healthcare provider;
- A “network” healthcare provider is told that they may not recommend a “non-network” healthcare provider to a

patient;

- A “non-network” healthcare provider is told that care will only be authorized if provided by a “network” provider; and
- A “non-network” healthcare provider is told that reimbursement will be made according to “network” discounts.

**E. TREATMENT OF INDUSTRIAL INJURIES AND DISEASES**

1. Only physicians and surgeons licensed in the State of Arizona are permitted to treat injured or disabled employees under the jurisdiction of the Commission, unless others are specifically authorized.
2. An employee who sustains an injury arising out of, or in the course of, employment is entitled, under Arizona law, to select a healthcare provider of his/her own choice unless that employee is employed by a private self- insured employer as described in A.R.S. § 23-1070. Employers described in A.R.S. § 23-1070, excluding the State or Political Subdivisions thereof, are allowed to direct medical care.

- 
- <sup>1</sup> It should be noted that the law governing directed care is not limited to “medical doctors,” but instead applies to medical, surgical, and hospital benefits. *See* A.R.S. § 23-1070. The phrase, “medical, surgical, and hospital benefits” is defined in A.R.S. § 23-1062(A), which states: “Promptly, upon notice to the employer, every injured employee shall receive medical, surgical and hospital benefits or other treatment, nursing, medicine, surgical supplies, crutches and other apparatus, including artificial members, reasonable required at the time of the injury, and during the period of disability. Such benefits shall be termed ‘medical, surgical and hospital benefits.’”
3. The attending healthcare provider’s promptness and professional exactness in the completion and filing of workers’ compensation forms are extremely important to the employee being treated. The injured or disabled employee’s claim to medical benefits and compensation can rest on the conscientious attention of the healthcare provider in processing the required reports. Rules addressing the completion of these forms are found in the Title 20, Chapter 5, Article 1 of the Arizona Administrative Code, which can be obtained at: [http://apps.azsos.gov/public\\_services/Title\\_20/20-05.pdf](http://apps.azsos.gov/public_services/Title_20/20-05.pdf)
  4. The Commission, the employer and the insurance carrier may, at any time, designate a healthcare provider or healthcare providers to examine an employee. Additionally, upon application of the employer, employee, or insurance carrier, the Commission may order a change of healthcare provider or a change of conditions of treatment when there are reasonable grounds or a belief that the employee’s health or progress can thus be improved.
  5. A claimant may not change doctors without the written authorization of the insurance carrier, the Commission or the attending physician. A claimant may not transfer from one hospital to another without the written authorization of the insurance carrier or the Commission. If the patient’s employment requires leaving the locale in which he/she is receiving treatment, the attending physician should arrange for continued treatment and notify the carrier of such arrangement. It is the responsibility of the physician or the hospital to which a patient has transferred to ascertain whether such a change has been authorized.
  6. Treatment of conditions unrelated to the injuries sustained in the industrial accident may be denied as unauthorized if the treatment seems directed principally toward the non-industrial condition or if the treatment does not seem necessary for the patient’s physical rehabilitation from the industrial injury.
  7. If the patient refuses to submit to a medical examination or to cooperate with the healthcare provider’s treatments, the carrier or self-insured employer should be notified.
  8. If an employee is capable of some form of gainful employment, it is proper for the healthcare provider to release the employee to light work and make a specific report to the carrier or self-insured employer as to the date of such release. It can be to the employee’s economic advantage to be released to light work, since he/she can receive compensation based on 66 2/3% of the difference between one’s earnings and one’s established wage. On the other hand, it would not be to the employee’s economic advantage to be released to light work if, in fact, the employee is not capable of performing such work. The healthcare

provider's judgment in such matters is extremely important.

9. If the employee no longer requires active medical care for the industrial injury and is discharged from treatment, the healthcare provider is required to provide a signed report with the date of discharge to the carrier or self-insured employer, even if, as a private patient, the employee may require further medical care for conditions unrelated to the industrial accident. This final report and discharge date are necessary for closing the claim file.
10. When a healthcare provider discharges a claimant from treatment, the healthcare provider shall determine whether the employee has suffered any impairment of function, or disfigurement about the head or face, including injury to or loss of teeth, and include this information in the final signed report provided to the carrier or self-insured employer. The Rules of Procedure Before the Industrial Commission of Arizona require that any rating of the percentage of functional impairment should be made in accordance with the standards of evaluation published in the most recent edition of the American Medical Association Guides to the Evaluation of Permanent Impairment. Additional guidance on appropriate billing and reimbursement for impairment evaluations is found in the Evaluation and Management Section of this document.
11. Once an exposure to blood-borne pathogen occurs, the workers' compensation insurance carrier/self-insured employer is responsible for payment of the accepted treatment protocol which includes the HBIG vaccination (Hepatitis B Immune Globulin), and, if necessary, the three (3) Hepatitis B vaccinations.  
When a work-related incident occurs that may have exposed an employee to Hepatitis, the insurance carrier/self-insured employer is responsible for paying for the testing and/or treatment of Hepatitis B or C. As to treatment of HIV, if a bona fide claim exists under A.R.S. § 23-1043.02, then the insurance carrier/self-insured employer is responsible for paying for the treatment.
12. It is the employer's responsibility, in accordance with existing OSHA standards, to pay for HIV testing. The insurance carrier may seek reimbursement from the employer for the costs associated with providing the series of three (3) Hepatitis B vaccinations if the employer failed to provide them in violation of federal and state laws.

**F. REOPENING OF CLAIMS**

1. Whether or not the employee has suffered a permanent disability, on a claim that has been previously accepted, the claim may be reopened on the basis of a new, additional or previously undiscovered disability or condition, but:
  - a. The claimant should use the form of petition prescribed by the Commission;
  - b. The petition must be personally signed by the worker or his authorized representative and must be filed at any office of the Industrial Commission of Arizona;
  - c. The petition, in order to be considered, must be accompanied by the healthcare provider's medical report.
2. If the claim is reopened, the payment for such reasonable and necessary medical, hospital and laboratory work expenses shall be paid by the insurance carrier if such expenses are incurred within 15 days of the filing of the petition to reopen.
3. No monetary compensation is payable for any period prior to the date of filing of the petition to reopen. Surgical benefits are not payable for any period prior to the date of filing of a petition to reopen, except that surgical benefits are payable for a period prior to the date of filing not to exceed seven (7) days if a bona fide medical emergency precludes the employee from filing a petition to reopen prior to the surgery. Other information relative to reopening rights may be found at A.R.S. § 23-1061(H).
4. If a claim is approved for reopening, the carrier must notify the attending healthcare provider of that approval.

**G. NO-INSURANCE CLAIMS**

"No-Insurance" claims are workers' compensation claims involving injuries to employees of employers who do not have workers' compensation insurance coverage as required by Arizona law. In such cases, all claims and reports are to be addressed to the No-Insurance Section of the Special Fund of The Industrial Commission of Arizona.

**H. CONSULTATIONS**

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

Workers' compensation cases can present additional medical and legal problems that justify consultation sooner and more frequently than for the average private patient. In complex cases and in cases requiring an estimate of general or unscheduled disability, consultation with specialists in the appropriate field may be requested by any interested party. The Industrial Commission continues to recognize the necessity for consultations in workers' compensation and establishes relative value units and rates for consultation codes.

**I. WITNESS FEES**

1. Insurance providers, self-insured employers, and the Special Fund of the Commission are responsible for paying \$150.00 for the first hour of testimony (or any portion thereof) and \$50.00 for each 20 minute increment following the initial hour (or any portion thereof) to a healthcare provider who testifies at hearing at their request.
2. The Commission is responsible for paying \$150.00 for the first hour of testimony (or any portion thereof) and \$50.00 for each 20 minute increment following the initial hour (or any portion thereof) to a healthcare provider who testifies at hearing on request of a workers' compensation claimant.

**J. DEFINITIONS OF SELECT UNIT VALUES**

1. BY REPORT "BR" ITEMS: "BR" in the value column indicates that the value of this service is to be determined "by report", because the service is too unusual or variable to be assigned a unit relativity. Pertinent information concerning the nature, intent and need for the procedure or service, the time, the skill and equipment necessary, etc., is to be furnished. A detailed clinical record is not necessary.
2. RELATIVITY NOT ESTABLISHED "RNE" ITEMS: "RNE" in the value column indicates new or infrequently performed services for which sufficient data has not been collected to allow establishment of a relativity. "RNE" items are clearly definable and not inherently variable as are BR procedures. A report may be necessary.
3. SERVICE "SV" ITEMS: "SV" in the value column indicates the value is to be calculated as the sum of the various services rendered (e.g., office, home, nursing home or hospital visits, consultation or detention, etc.), according to the ground rules covering those services. Identify by using the code number of the "SV" item. The Value is established by identifying each individual service, listing the code number and its value.
4. MATERIALS AND SUPPLIES: A healthcare provider is not entitled to be reimbursed for supplies and materials normally necessary to perform a billable service. Examples of those items that are not reimbursable are listed below. Billing and reimbursement guidelines for materials and supplies that are reimbursable are found in the HCPCS Section of the Fee Schedule.

Drugs that are administered to patients in a clinical setting shall be billed using the appropriate HCPCS code and reimbursed according to the Pharmaceutical Fee Schedule Guidelines. The provisions in this subsection do not apply to hospitals, ambulatory surgery centers, and ambulance service providers.

Examples of supplies that are usually not separately reimbursable include:

Applied hot or cold packs  
Eye patches, injections or debridement trays  
Steristrips  
Needles  
Syringes  
Eye/ear trays  
Drapes Sterile  
gloves  
Applied eye wash or eye drops  
Creams (massage) Fluorescein  
Ultrasound pads and gel

 Band-Aids and dressings for simple wound occlusion Head

 Aspiration trays  
 Sterile trays for laceration repair and more complex surgeries Tape for

5. **MODIFIERS:** A two-digit (numeric or alpha) sequence that provides the means by which the reporting healthcare provider can specify that a procedure performed has been altered under a special circumstance. This allows defining the modifying circumstance of the service or procedure without creating a separate procedure or listing.

## Modifier Examples

*Professional Component (PC):* Certain procedures are a combination of a physician, or Professional component and a technical component. When modifier 26 is added to an Appropriate code a PC allowable amount will be paid.

*Technical Component (TC):* The TC component reflects the technical portion of the procedure code. When the technical component is provided by a healthcare provider other than the one providing the professional component, the healthcare provider bills for the technical component by adding modifier TC to the applicable code.

## PHARMACEUTICAL FEE SCHEDULE

**I. GENERAL PROVISIONS AND APPLICABILITY OF THE PHARMACEUTICAL FEE SCHEDULE.**

- A. The Pharmaceutical Fee Schedule (PFS) applies to prescription and over-the-counter (OTC) medications required to treat an injured employee, whether administered by a medical practitioner or dispensed by a pharmacy (including online or mail order pharmacies) or by a medical practitioner.
- B. Medications are not reimbursable unless “reasonably required” at the time of injury or during the period of disability. *See* A.R.S. § 23-1062(A); A.A.C. R20-5-1303(A). The Industrial Commission of Arizona has adopted the Official Disability Guidelines (ODG), including ODG’s Drug Formulary Appendix A (ODG Formulary), as the standard reference for evidence-based medicine used in treating injured employees within the context of Arizona’s workers’ compensation system. Effective October 1, 2018, ODG applies to all body parts and conditions. *See* A.A.C. R20-5-1301(B), (E). ODG is to be used as a tool to support clinical decision making and quality health care delivery to injured employees. The ODG Formulary sets forth pharmaceutical guidelines that are generally considered reasonable and are presumed correct if the guidelines provide recommendations related to a particular medication. *See* A.A.C. R20-5-1301(H). Medical practitioners are encouraged to consult the ODG Formulary before dispensing, administering, or prescribing medications to injured employees.
- C. Generic drugs must be dispensed or administered to injured employees when appropriate, consistent with A.R.S. § 32-1963.01(A),<sup>1</sup> (B), and (D) through (L).<sup>2</sup> *See* A.R.S. § 23-908(C). For purposes of this subsection, the definitions in A.R.S. § 32-1963.01(L) apply.<sup>3</sup> Whenever possible: (1) medical practitioners should prescribe less costly drugs; and (2) pharmacies and medical practitioners (under Section VII) should dispense generic drugs with lower AWP values; (3) medical practitioners (under Section VI) should administer generic drugs with lower AWP values.

**II. DEFINITIONS.**

- A. “Administer” has the meaning set forth in A.R.S. 32-1901(1).
- B. “Average Wholesale Price” or “AWP” means the wholesale price charged on a specific commodity that is assigned by the drug manufacturer and is listed in a nationally-recognized drug pricing file.
- C. “Commercially available” means a drug product is widely available for purchase in pharmacies accessible to the general public, including in brick and mortar pharmacies accessible to the general public.

<sup>1</sup> A.R.S. § 32-1963.01(A) states: “If a medical practitioner prescribes a brand name drug and does not indicate an intent to prevent substitution as prescribed in subsection E of this section, a pharmacist may fill the prescription with a generic equivalent drug.”

<sup>2</sup> A.R.S. § 32-1963.01(E) states: “A prescription generated in this state must be dispensed as written only if the prescriber writes or clearly displays ‘DAW’, ‘dispense as written’, ‘do not substitute’ or ‘medically necessary’ or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form. A prescription from out of state or from agencies of the United States government must be dispensed as written only if the prescriber writes or clearly displays ‘do not substitute’, ‘dispense as written’ or ‘medically necessary’ or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form.”

<sup>3</sup> A.R.S. § 32-1963.01(L) states, in part:

2. “Brand name drug” means a drug with a proprietary name assigned to it by the manufacturer or distributor.
4. “Generic equivalent” or “generically equivalent” means a drug that has an identical amount of the same active chemical ingredients in the same dosage form, that meets applicable standards of strength, quality and purity according to the United States pharmacopeia or other nationally recognized compendium and that, if administered in the same amounts, will provide comparable therapeutic effects. Generic equivalent or generically equivalent does not include a drug that is listed by the United States food and drug administration as having unresolved bioequivalence concerns according to the administration’s most recent publication of approved drug products with therapeutic equivalence evaluations.

- D. "Compound medication" means a pharmaceutical product created by virtue of mixing or combining drugs and/or components to meet the unique needs of an individual patient when the finished product does not recreate a commercially-available product.
- E. "Dispense" or "dispensing" means to deliver to an ultimate user by or pursuant to the lawful order of a medical practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare for that delivery. *See* A.R.S. § 32-1901(27).
- F. "Drug" has the meaning set forth in A.R.S. § 32-1901(31).
- G. "Hospital" means any institution for the care and treatment of the sick and injured that is approved and licensed as a hospital by: (1) the Arizona Department of Health Services; or (2) an equivalent regulatory agency in another U.S. state, territory, or district. *See* A.R.S. § 32-1901(42).
- H. "Medical practitioner" means any person who is permitted/licensed and authorized by law to use and prescribe prescription medications, acting within the scope of such authority, for the treatment of sick and injured human beings or for the diagnosis or prevention of sickness in human beings in the State of Arizona or any U.S. state, territory or district. *See* A.R.S. § 32-1901(53).
- I. "Non-traditional strength" medication means a finished drug product in a strength (*i.e.*, dosage) that is not commercially available in pharmacies accessible to the general public.
- J. "Over-the-counter medication" or "OTC medication" means a finished drug product, including label and container according to context, which does not require a prescription order.
- K. "Pharmacy" has the meaning set forth in A.R.S. § 32-1901(71).
- L. "Pharmacy accessible to the general public" means a pharmacy that is readily accessible and provides pharmaceutical services (including prescription medication services) to all segments of the general public without restricting services to a defined or exclusive group of consumers, including but not limited to consumers who have access to services because they are treated by or have an affiliation with a specific entity or medical practitioner. This definition includes mail order pharmacies delivering pharmaceutical services to workers' compensation claimants if both of the following apply:
1. The pharmacy does not limit or restrict access to claimants with an affiliation to a medical provider or other entity.
  2. Any medical provider or other entity referring a claimant to the pharmacy does not receive or accept any rebate, refund, commission, preference, or other consideration as compensation for the referral.
- M. "Pharmacy not accessible to the general public" means a pharmacy that provides pharmaceutical services (including prescription medication services) only to a defined or exclusive group of consumers, including but not limited to consumers who have access to services because they are treated by or have an affiliation with a specific entity or medical practitioner. "Pharmacy not accessible to the general public" does not include a hospital pharmacy. This definition does not include mail order pharmacies delivering pharmaceutical services to workers' compensation claimants if both of the following apply:
1. The pharmacy does not limit or restrict access to claimants with an affiliation to a medical provider or other entity.
  2. Any medical provider or other entity referring a claimant to the pharmacy does not receive or accept any rebate, refund, commission, preference, or other consideration as compensation for the referral.
- N. "Prescription" means either a prescription order or a prescription medication. *See* A.R.S. § 32-1901(80).
- O. "Prescription medication" means any drug, including label and container according to context, which is dispensed pursuant to a prescription order. *See* A.R.S. § 32-1901(81).

- Q. "Repackaged medication" means a finished drug product removed from the container in which it was distributed by the original manufacturer and placed into a different container without further manipulation of the drug. The term also includes the act of placing the contents of multiple containers of the same finished drug product into one container. The term also includes "co-

pack drug” products which contain two or more separate finished medications that are contained in a single package or unit. The term does not include a drug that is manipulated in any other way, including if the drug is reconstituted, diluted, mixed, or combined with another ingredient.

- R. “Therapeutically-similar” medication means a medication that is expected to produce a clinical effect comparable to the original product. Key considerations for determining the “most therapeutically-similar” medications are: (1) the similarity of the clinical effects; (2) the extent to which active ingredients overlap; (3) the similarity of the dosage profiles; (4) the similarity of the mode of administration; and (5) the similarity of the intended strength.
- S. “Traditional strength” medication means a finished drug product in a formulation that is commercially available in pharmacies accessible to the general public.
- T. “Ultimate user” means a person who lawfully possesses a prescription medication for that person's own use or for the use of a member of that person's household. *See* A.R.S. § 32-1901(95).

### III. GENERAL GUIDELINES FOR BILLING AND REIMBURSEMENT OF PRESCRIPTION MEDICATIONS.

- A. Except as permitted in Sections VI and VII of the current PFS, an insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications only if all of the following apply:
  - 1. The prescription medication is dispensed by an individual who is currently licensed to practice the profession of pharmacy by either: (i) the Arizona State Board of Pharmacy; or (ii) an equivalent regulatory agency in another U.S. state, territory, or district; and
  - 2. The prescription medication is dispensed by a pharmacy accessible to the general public, including online or mail-order pharmacies that are accessible to the general public.
- B. Subject to Sections III(G), IV, V, and VI(B), reimbursement for prescription medications shall be based on the actual medication dispensed or administered, including a substituted medication that is dispensed or administered pursuant to A.R.S. § 32-1963.01.
- C. Except as specified in Sections IV and V of the current PFS, a pharmaceutical bill submitted for a prescription medication must include the National Drug Code (NDC) of the original manufacturer registered with the U.S. Food & Drug Administration (FDA), the quantity dispensed, and the reimbursement value of the medication. Under no circumstance shall an NDC other than the original manufacturer’s NDC be used.
- D. The reimbursement value for prescription medications shall be based on the current PFS reimbursement methodology in the absence of a contractual agreement between the pharmacy or medical practitioner and payer governing reimbursement. Network discounts may not be applied in the absence of a contractual agreement with the pharmacy or medical practitioner authorizing such discounts.
- E. The reimbursement value for a prescription medication shall be determined on the date a drug is dispensed from pricing published in the most recent issue, as updated in the most-recent update, of a nationally-recognized pharmaceutical publication designated by the Commission. For purposes of determining AWP, the Commission has selected Medi-Span®.
- F. The reimbursement value for a prescription medication shall be determined by reference to the original manufacturer’s NDC and shall be calculated on a per unit basis as follows:
  - 1. Generic drugs:
    - a. (75% of AWP per unit) x (number of units dispensed).
  - 2. Brand name drugs:
    - a. (85% of AWP per unit) x (number of units dispensed).
- G. Reimbursement for non-traditional strength prescription medications shall be calculated on a per unit basis, as of the date of dispensing or administering, based on the original manufacturer’s NDC and corresponding AWP of the most therapeutically-

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

similar traditional strength form of the same medication. Under no circumstance shall the NDC of the non-traditional strength medication be used.

- H. The reimbursement value for OTC medications shall be calculated on a per unit basis, as of the date of dispensing, based on the retail price (per unit) of the OTC medication in settings where the medication is commercially available.
- I. Subject to Section III(J), the reimbursement value for OTC medications that are not commercially available in pharmacies accessible to the general public shall be calculated on a per unit basis, as of the date of dispensing, based on the retail price (per unit) of the most therapeutically-similar OTC medication commercially available in pharmacies accessible to the general public. Under no circumstance shall the NDC or AWP of the non-commercially available OTC medication be used.
- J. The reimbursement value for OTC medications that are not commercially available may not exceed:
  - 1. Thirty dollars (\$30.00) for a thirty-day supply (or a pro-rated amount if the supply is greater or less than thirty days) for a topical cream or lotion.
  - 2. Seventy-five dollars (\$75.00) for a thirty-day supply (or a pro-rated amount if the supply is greater or less than thirty days) for topical patches.

**IV. BILLING AND REIMBURSEMENT FOR REPACKAGED MEDICATIONS.**

- A. A pharmaceutical bill submitted for a repackaged medication must identify the NDC of the repackaged medication, the NDC of the original manufacturer registered with the U.S. FDA, the quantity dispensed, and the reimbursement value of the repackaged medication. Under no circumstances shall the reimbursement value of a repackaged medication be based upon an NDC other than the original manufacturer's NDC. A repackaged NDC shall not be used for calculating the reimbursement value of a repackaged medication and shall not be considered the original manufacturer's NDC.
- B. If a pharmaceutical bill for a repackaged medication is submitted without the original manufacturer's NDC, the payer has the discretion to determine the appropriate NDC (and corresponding AWP) to use or, alternatively, may deny coverage until the appropriate NDC is furnished.
- C. The reimbursement value for a repackaged medication shall be based on the current PFS reimbursement methodology contained in Section III of the PFS, utilizing the NDC(s) and corresponding AWP(s) of the original manufacturer(s).
- D. Any component of a co-pack drug product for which there is no NDC shall not be reimbursed.

**V. BILLING AND REIMBURSEMENT FOR COMPOUND MEDICATIONS.**

- A. A pharmaceutical bill submitted for a compound medication must identify each reimbursable component ingredient, the applicable NDC of each reimbursable component ingredient, the corresponding quantity of each component ingredient, and the calculated reimbursement value of each component ingredient. All component ingredients of a compound medication must be billed on a single bill.
- B. The reimbursement value for a compound medication shall be calculated at the component ingredient level. The reimbursement value for a compound medication shall be based on the sum of the reimbursement values of each component ingredient and the corresponding component ingredient's NDC, based on the current PFS reimbursement methodology set forth in Section III.
- C. Any component ingredient in a compound medication for which there is no NDC shall not be reimbursed.
- D. Any component ingredient in a topical compound medication that is not FDA approved for topical use shall not be reimbursed.
- E. If any component ingredient in a compound medication is a repackaged medication, the reimbursement value for the repackaged medication ingredient shall be determined based on the current PFS reimbursement methodology set forth in Section III, using the AWP corresponding to the NDC of the original manufacturer. *See* Section IV.
- F. The maximum reimbursement value for a topical compound medication shall be the lesser of:

1. Two hundred dollars (\$200.00) for a thirty-day supply (or a pro-rated amount if the supply is greater or less than thirty days), or
2. The reimbursement value of the compound medication calculated under this section.

**VI. BILLING AND REIMBURSEMENT FOR MEDICATIONS ADMINISTERED BY A MEDICAL PRACTITIONER.**

- A. A pharmaceutical bill submitted for a medication administered by a medical practitioner must comply with billing procedures outlined in Sections III, IV, and V of the current PFS, as applicable.
- B. The reimbursement value for a medication administered by a medical practitioner shall be based on the current PFS reimbursement methodology contained in Sections III, IV, and V of the PFS, as applicable.

**VII. REIMBURSEMENT FOR MEDICATIONS DISPENSED BY A MEDICAL PRACTITIONER OR IN A PHARMACY NOT ACCESSIBLE TO THE GENERAL PUBLIC.<sup>4,5</sup>**

<sup>4</sup> Dispensing pursuant to Section VII is subject to the Arizona Opioid Epidemic Act, which imposes statutory limits on the prescribing and dispensing of schedule II opioids. For more information about the Arizona Opioid Epidemic Act, please see the FAQs published by the Arizona State Board of Pharmacy, available at <https://drive.google.com/file/d/1JCI8VwtdJ1T-DyGfJN3WWUm4KhDMXe-/view>.

<sup>5</sup> Section VII sets forth reimbursement guidelines for medications dispensed in settings that are not accessible to the general public in Arizona's worker's compensation system and does not interfere with a medical practitioner's ability to dispense medications pursuant to A.R.S. § 32-1491 or seek payment from sources unrelated to workers' compensation.

- A. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a medical practitioner or in a pharmacy not accessible to the general public if all of the following apply:
  1. The prescription medication is dispensed by a medical practitioner or a pharmacy not accessible to the general public to the injured employee within seven days of the date of the industrial injury;
  2. The prescription medication is limited to no more than a one-time, ten-day supply;
  3. The prescription medication conforms to dosages and formulations that are commercially available in pharmacies accessible to the general public.
- B. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a medical practitioner or in a pharmacy not accessible to the general public if all of the following apply:
  1. The injured employee does not have access to a pharmacy accessible to the general public within 20 miles of the injured employee's home address, work address, or the address of the prescribing medical practitioner;
  2. The injured employee cannot reasonably acquire the prescription medication from an online or mail order pharmacy accessible to the general public; and
  3. The prescription medication conforms to dosages and formulations which are commercially available in pharmacies accessible to the general public.
- C. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a medical practitioner or in a pharmacy not accessible to the general public if the dispensing of a prescription medication for an individual claim and specified duration has been pre-approved in writing by the insurance carrier, self-insured employer, or the Special Fund of the Commission. Nothing in this section requires an insurance carrier, self-insured employer, or the Special Fund of the Commission to pre-approve the dispensing of prescription medications under this subsection.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- D. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a pharmacy not accessible to the general public if all of the following apply:
1. The prescription medication was dispensed to an injured employee whose workers' compensation claim was initially denied by the carrier, self-insured employer, or the Special Fund of the Commission;
  2. The injured employee protested the claim denial by filing a timely request for hearing;
  3. The workers' compensation claim was either: (a) subsequently accepted by the carrier, self-insured employer, or the Special Fund of the Commission; or (b) the claim was found to be compensable by the Commission's Administrative Law Judge Division, the Arizona Court of Appeals, or the Arizona Supreme Court;
  4. Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for anesthesia services. To the extent that a conflict may exist between an incorporated portion of the CPT®, the most recent edition of *Relative Value Guide*, or the American Society of Anesthesiologists, and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. ## SURGERY GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for surgical services. To the extent that a conflict may exist between CMS, an incorporated portion of the CPT® and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

- A. **MATERIALS AND SUPPLIES:** A healthcare provider may charge for materials and supplies as described in the HCPCS Section of this Fee Schedule.
- B. **MULTIPLE PROCEDURES:** It is appropriate to designate multiple procedures that are rendered on the same date by separate entries. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes.
- C. **SPECIAL REPORT:** A typical request for more detailed information from an insurance carrier regarding a billing does not constitute a “special report”, which is defined in the CPT® book.
- D. **MODIFIERS:** Listed services and procedures may be modified under certain circumstances. When applicable, the modifying circumstance should be identified by the addition of the appropriate modifier code, which may be reported in either of two ways. The modifier may be reported by a two-digit number placed after the usual procedure number from which it is separated by a hyphen. Or the modifier may be reported by a separate five-digit code that is used in addition to the procedure code. If more than one modifier is used, the “Multiple Modifiers” code placed first after the procedure code indicates that one or more additional modifier codes will follow.

Modifiers either unique to Arizona or containing explanatory language specific to Arizona are as follows:

- Δ-22 **Increased Procedural Services:** Use of this modifier will result in a twenty-five percent (25%) increase in the listed value for the listed procedure.
- Δ-25 **Separately Identifiable Evaluation and Management Service by the same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service.** It may be necessary to indicate that on the day a procedure or service identified by a CPT® code was performed, the patient’s condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed (see Evaluation and Management Services Guidelines for instructions on determining level of E/M service). As such, different diagnoses are not required for reporting of the E/M services on the same date. The circumstance may be reported by adding modifier 25 to the appropriate level of E/M service.
- Δ-47 **Anesthesia by Surgeon:** The value shall be fifty percent (50%) of the calculated American Society of Anesthesiologists Relative Value Guide value.
- Δ-50 **Bilateral Procedure:** Unless otherwise identified in the listings, when bilateral procedures which add significant time or complexity to patient care are provided at the same operative session, identify and value the first or major procedure as listed. Identify the secondary or lesser procedure(s) by adding this modifier 50 to the usual procedure number(s) and value at fifty percent (50%) of the listed value(s). If, however, the procedures are independently complex and involve different parts of the body, including digits, the bilateral procedure rule would not apply. In such cases, independent procedures would be billed at one hundred percent (100%) of their listed value.
- Δ-51 **Multiple Procedures:** When multiple procedures are performed during the same operative session\*, the procedures should be valued at the appropriate percent of its listed value, as shown below:

100% (full value) for the first or major procedure  
50% for the second and multiple procedure(s) Sixth  
and subsequent procedures – by report

\*Multiple Procedure Guidelines do not apply to codes specifically identified as “Add-on/Additional Procedures, Global indicator ZZZ”.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

The major or primary procedure is defined as the procedure with the highest value and is the code that determines the follow-up days when a surgery has multiple procedures. The second procedure is the procedure with the next highest value, the third the next highest value, and so on. If, however, the procedures are independently complex such as digits, tendons, nerves or artery repair, the multiple procedure rule would not apply. In such cases, independent procedures would be billed at one hundred percent (100%) of their listed value.

When performing multiple procedures with different global period values during the same operative session, the global period value for the session is the largest global period value.

Δ-57 Decision for Surgery: An evaluation and management service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.

Δ-59 Distinct Procedural Service: Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services, other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.

**Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

Δ-62 Two Surgeons: By prior agreement, the total value of services performed by two surgeons working together as primary surgeons may be apportioned in relation to the responsibility and work done, provided the patient is made aware of the fee distribution according to medical ethics. If no apportionment is listed, the fee should be split evenly between the co-surgeons. The total value may be increased by twenty-five percent (25%) in lieu of the usual assistant's charge. Under these circumstances, the services of each surgeon should be identified by adding this modifier 62 to the joint procedure number(s) and valued as agreed upon. (Usual charges for surgical assistance may be warranted if still another physician is required as part of the surgical team.) The value of the procedure should be 125% of the customary value listed. Payment of 125% of the maximum allowable would be divided between the participating surgeons.

Two Surgeons – When 2 surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on codes(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If additional procedure(s) (including add-on procedure(s)) are performed during the same surgical session, separate code(s) may be reported with modifier 62 added.

**Note:** If a co-surgeon acts as an assistant in the performance of additional procedure(s), other than those reported with modifier 62, during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80, 81, or 82 added, as appropriate.

Δ-80 Assistant Surgeon: These services are valued at twenty percent (20%) of the listed value of the surgical procedure(s).

Δ-81 Minimum Assistant Surgeon: These services are valued at sixteen percent (16%) of the listed value of the surgical procedure(s).

Δ-82 Assistant Surgeon (when qualified resident surgeon not available): These services are valued at sixteen percent (16%) of the listed value of the surgical procedure(s).

Δ-AS Use the modifier AS for assistant at surgery services, when services are provided by a Physician Assistant (PA), Nurse Practitioner (NP), or Clinical Nurse Specialist (CNS). These services are valued at fourteen percent (14%) of the listed value of the surgical procedure(s). No further adjustment for mid-level medical providers as mentioned in section C of the Introduction shall be applied.

**NOTE:** A Medical Doctor or Doctor of Osteopathic Medicine should not submit the AS modifier. This modifier is only valid for use by a PA, NP, and CNS when billing under their own provider number.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

**RADIOLOGY GUIDELINES**

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to CMS and CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

**A. GENERAL GUIDELINES**

1. Values include usual contrast media, equipment, and materials. An additional charge may be warranted when special surgical trays and materials are provided by the healthcare provider.
2. Values include consultation and written reports to the referring healthcare provider.
3. X-ray findings and attending healthcare provider's written order for x-rays must be included with statement for x-ray services. Bills unsupported by findings will not be paid.
4. X-rays should be taken, reported, and be properly marked for identification and orientation in accordance with the accepted standard of radiologic practice in the State of Arizona.

**B. MODIFIERS**

Modifiers identify circumstances that alter or enhance the description of the service. For radiology codes, two modifiers affect the assigned unit value and are listed in *The Essential RBRVS*. However, other modifiers may be required for correct reporting of service. See CMS and the 2023 CPT® publication for additional information on modifiers. Listed radiology modifiers affect the unit values as follows:

1. Total: When no modifier is listed, the unit value represents the global value of the procedure. The five-digit code is used to represent a global service inclusive of professional and technical value of providing that service. The following sections provide additional definitions for each component.
2. Professional: Modifier 26 is used to designate professional services. The professional component includes examination of the patient, when indicated, performance and/or supervision of the procedure, interpretation and written report of the examination, and consultation with referring healthcare providers.
3. Technical: Modifier TC is used to designate the technical value of providing the service. The technical component includes personnel, materials, space, equipment, and other allocated facility overhead normally included in providing the service. Note that modifier TC is not CPT® compatible.

**C. REFERENCE TO RELATIVE VALUES**

Two patterns of billing currently prevail in radiology. A total charge for the radiology service, to include both professional fees and technical costs, is made by radiologists working in offices, clinics and, under some circumstances, in hospital or ambulatory surgery center x-ray departments.

In a majority of voluntary hospital or ambulatory surgery center radiology departments, the radiologist submits a separate statement to the patient for his professional services. The hospital or ambulatory surgery center charges for use of the department facilities and the services of its employees. This pattern is similar to the charges made by the hospital or ambulatory surgery center for the use of delivery rooms or surgical suites. Such charges are entirely separate from the fees charged by obstetricians and surgeons. In most separate radiology billing situations, the total will approximate the amount billed singly by the radiologist in their office or billed singly by the hospital or ambulatory surgery center.

The two separate scales in Radiology Relative Values have been devised for use in radiology and are not coordinated with scales for services in other branches of medicine such as surgery, medicine or pathology. The two scales are compatible only within themselves.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

Within each of the two separate headings, the total dollar value and the PC or professional components dollar value, where appropriate, can be used. Some procedures are noted as a “BR” value or “By Report”. This usage is intended to indicate that circumstances involving a given patient procedure may require much more than the average amount of time and effort to perform and thus a value would be unique and could not be anticipated or established. When such added involvement is claimed, a written explanation will usually be required as an addendum to the bill.

The PC values do not include charges made by the hospital in which the procedure was accomplished. Such charges by the hospital or ambulatory surgery center cover the services of technologists and other helpers, the films, contrast media, radioactive agents, chemical and other materials, the use of the space and facilities of the x-ray department plus any other hospital or ambulatory surgery center costs. Most hospitals or ambulatory surgery centers have derived their own schedule of charges of these items. Establishment of hospital or ambulatory surgery center charges is not the subject of the Fee Schedule.

The separation of billing in no way implies a division of responsibility, but only a division of the charge. The radiologist is a physician performing a needed medical service for a patient, and he must retain full responsibility for his own activity and also full responsibility for the supervision of technologists, the selection and maintenance of equipment, the control of radiation hazards and the general administration of the radiology department.

**D. REVIEW OF DIAGNOSTIC STUDIES**

No separate charge is warranted for prior studies reviewed in conjunction with a visit, consultation, record review, or other evaluation by a healthcare provider; neither the professional component value modifier 26 nor the radiological consultation CPT® code 76140 is reimbursable. The review of diagnostic tests is included in the evaluation and management codes.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

## PATHOLOGY AND LABORATORY GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS code and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

A healthcare provider seeking reimbursement for presumptive, or “point of care” drug testing shall submit to the payer written documentation establishing:

1. That the testing is medically necessary and reasonably required;
2. The type of drug testing utilized; and
3. The healthcare provider’s interpretation of the “point of care” testing.

For purposes of this section, presumptive or “point of care” testing is testing that is performed at or near the site of patient care (*i.e.*, the healthcare provider’s office).

CPT® codes 80305-80307 are used for reporting presumptive drug class screening. Each code represents all drugs and drug classes performed by the respective methodology per date of service.

Healthcare providers performing validity testing on urine specimens utilized for drug testing shall not separately bill the validity testing. For example, if a laboratory performs a urinary pH, specific gravity, creatinine, nitrates, oxidants, or other tests to confirm that a urine specimen is not adulterated, this testing is not separately billed.

Definitive drug testing may be reported with HCPCS codes G0480 - G0483. These codes differ based on the number of drug classes including metabolites tested. Only one code from this group of codes may be reported per date of service. Any request for quantitative or definitive testing requires documentation that qualifies necessity.

G0480 – Definitive drug testing 1 – 7 drug class(es) including metabolites(s) if performed G0481 – Definitive drug testing 8 –

14 drug class(es) including metabolite(s) if performed G0482 – Definitive drug testing 15 – 21 drug class(es) including

metabolites(s) if performed G0483 – Definitive drug testing 22 or more drug class(es), including metabolite(s) if performed.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

## MEDICINE GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS codes and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

- A. **MATERIALS SUPPLIED BY A HEALTHCARE PROVIDER:** A healthcare provider may charge for materials and supplies as described in the HCPCS Section of the Physician's Fee Schedule.
- B. **COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT:** Code 99199 can be used to bill for the services of an interpreter when they are used to comply with the provisions of "The Americans With Disabilities Act", *i.e.*, interpreters for the hearing impaired.
- C. **ADD-ON CODES:** Some of the listed procedures are commonly carried out in addition to the primary procedure performed. All add-on codes found in the CPT® codebook are exempt from the multiple procedure concept. They are exempt from the use of modifier 51.
- D. **SEPARATE PROCEDURES:** Some of the procedures or services listed in the CPT® codebook that are commonly carried out as an integral component of a total service or procedure have been identified by the inclusion of the term "separate procedure". The codes designated as a "separate procedure" should not be reported in addition to the code for the total procedure or service of which it is considered an integral component.

When a procedure or service is carried out independently or considered to be unrelated or distinct from other procedures/services provided at that time, it may be reported by itself, or in addition to other procedures/services by appending modifier 59 to the specific "separate procedure" code to indicate that the procedure is not considered to be a component of another procedure, but is a distinct, independent procedure.

- E. **BUNDLED CODES:** Indicates that the service is always bundled in a payment for another service. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident (*e.g.*, a telephone call from a hospital nurse regarding the care of a patient).
- F. **MODERATE SEDATION:** Codes specific to the provider performing the services (*e.g.*, CPT® 99151, 99152 and 99153) are used when the physician performing the procedure provides the sedation whereas CPT® 99155, 99156 and 99157 are used when sedation is provided by a healthcare professional other than the physician performing the procedure.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

## PHYSICAL MEDICINE AND REHABILITATION GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to physical medicine and rehabilitation services. To the extent that a conflict may exist between an incorporated portion of the CPT® and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

General requirements in reporting services are found in the Introduction of the Fee Schedule. In addition to the definitions and commonalities preceding the coded medical procedures, several other requirements unique to this Section (Physical Medicine and Rehabilitation) are defined or identified as follows:

- A. Physical therapy (PT) evaluation codes (97161-97163) and occupational therapy (OT) evaluation codes (97165- 97167) are billed at the initial visit and a re-evaluation code (97164 for PT, 97168 for OT) may be billed once every two calendar weeks following an initial evaluation. Additional billing for PT and OT evaluation services may be allowed when specific additional services are warranted. Approval of the payer must be obtained prior to performing additional services. Criteria to select the appropriate evaluation and re-evaluation codes are outlined in the current CPT® publication.

NOTE: These limitations do **not** apply to referring healthcare providers or to providers who treat patients once per month.

- B. When multiple modalities (untimed 97012-97028 and/or time-based 97032-97036) are performed, the first modality (or the first unit of a time-based modality) is reported as listed. The second modality (or the second unit of a time- based modality) is identified by adding modifier -51 to the code number. The second and each subsequent modality (or unit(s) of a time-based modality) should be valued at 50% of its listed value.

First modality reported or first unit of a time-based modality	-100%
Second, third, and additional approved modality or unit(s)	- 50%

Any more than three modalities or more than three units of a time-based modality or any combination of time-based and untimed modalities equaling three billed units per body part being treated must have prior approval from the payer. The time a healthcare provider bills for a time-based modality (97032-97036) does not count towards the total timed therapeutic procedure maximum of four units or 67 minutes. However, the time spent performing time-based modalities counts towards the total treatment time and should be used to determine the number of units a provider bills (*see* Section E and Example 5). **The amount of time spent performing each specific procedure or modality provided to the patient is not required to be documented in the treatment note** (*see* Section G).

NOTE: 97010 is a bundled service and not separately reportable.

Example:

During a visit, a patient receives the following services: 45 minutes therapeutic exercise 97110  
15 minutes mechanical traction 97012  
15 minutes unattended electrical stimulation 97014  
10 minutes ultrasound 97035  
15 minutes moist heat 97010 while receiving the electric stimulation

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

Under the multiple modality rule, the healthcare provider would bill:

97110 3 units at 100% of value (therapeutic procedure, timed code)

97012 1 unit at 100% of value (modality, untimed code)

97014 1 unit at 50% of value (modality, untimed code)

97035 1 unit at 50% of value (modality, timed code)

97010 is bundled into the above services and not paid as a separate service. The total time spent performing time-based codes (97110 and 97035) is 55 minutes and justifies billing four units of time-based services (*see* Section E).

- C. CPT® codes describing therapeutic procedures (97110-97150 and 97530-97546) are not subject to the multiple modality rule and shall be paid at 100% of their listed value. When performing therapeutic procedure(s), (excluding work hardening/conditioning, 97545-97546, and physical test or measures for functional capacity evaluation, 97750), a maximum of four units or 67 minutes is allowed each day. Approval must be obtained from the payer prior to performing therapeutic procedures in excess of this maximum (*e.g.*, when multiple body parts are treated in a single visit).
- D. The values for the codes in this section include the time and work of the provider, the equipment required to provide the service, and the cost of the healthcare provider's liability insurance. Medications and disposable electrodes used in these procedures should be considered supplies and managed in accordance with the HCPCS Section of this Fee Schedule.
- E. Time-Based Physical Medicine and Rehabilitation CPT® codes are billed according to guidance from the Centers for Medicare and Medicaid Services (CMS), as published in the Medicare Claims Processing Manual, Chapter 5, Section 20.2, C. Counting Minutes for Timed Codes in 15 Minute Units.

When only one service is provided in a day, healthcare providers should not bill for services provided for less than 8 minutes. For any single 15-minute timed CPT code in the same day, healthcare providers bill a single 15-minute unit for treatment of greater than or equal to 8 minutes through and including 22 minutes. If the duration of a single procedure in a day is greater than or equal to 23 minutes through and including 37 minutes, two units should be billed. Please refer to the table below, which outlines how to bill for up to four units or 67 minutes, without payer approval.

Units	Number of Minutes
0	< 8 minutes
1	≥ 8 minutes and ≤ 22 minutes
2	≥ 23 minutes and ≤ 37 minutes
3	≥ 38 minutes and ≤ 52 minutes
4	≥ 53 minutes and ≤ 67 minutes

If additional therapeutic procedures and/or time-based modalities are approved by the payer, the pattern for determining time/units is continued.

When more than one service represented by 15-minute timed codes is performed in a single day, the total number of minutes of service determines the number of timed units billed (as noted in the chart above). For any service represented by a 15-minute timed code that is performed for 7 minutes or less on the same day as another service also represented by a 15-minute timed code performed for 7 minutes or less, and the total time of these two services is 8 minutes or greater, the provider may bill one unit of service that was performed for the most minutes. The same logic is applied if three or more different services are performed on the same day for 7 minutes or less.

The expectation, based on the work values assigned to these codes, is that a provider's direct patient contact time for each unit will average 15 minutes in length. If more than one 15-minute timed CPT® code is billed during a single calendar day, the total number of units billed is constrained by the total treatment time for that day.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

When documenting to support the billing of timed CPT® codes, the provider should **document the total number of timed minutes and the total time of the treatment provided that day.** Total treatment time includes the minutes for timed code treatment and untimed code treatment. Total treatment time does not include time for services that are not billable (*e.g.*, rest periods). **The amount of time for each specific intervention/modality provided to the patient is not required to be documented in the treatment note.**

It is important that the total number of timed treatment minutes support the billing of units on the invoice and that the total treatment time also reflects the services billed as untimed codes. The billing and the total timed code treatment minutes documented must be consistent. Additional guidance for documentation of timed codes is found in the CMS Benefit Policy Manual, Chapter 15, 220.3, E. Treatment Note

Examples on how to count the appropriate number of minutes for the total therapy minutes provided:

**Example 1**

During a visit, the patient receives the following services:

45 minutes therapeutic exercise 97110

5 minutes manual therapy 97140

7 minutes therapeutic activities 97530 Total

Timed Codes: 57 minutes

The healthcare provider would bill: 4 units

97110 3 units

97530 1 unit

Since the total time spent providing manual therapy and therapeutic exercises is greater than 8 minutes, one unit is billed of the service which was performed for more time.

**Example 2**

During a visit, the patient receives the following services:

24 minutes neuromuscular reeducation 97112

23 minutes therapeutic exercise 97110 Total

Timed Codes: 47 minutes

The healthcare provider would bill: 3 units

97112 2 units

97110 1 unit

Each service is provided for more than 15 minutes, so at least one unit is appropriate for each. Two units are billed for Neuromuscular reeducation since that service was performed for more time.

**Example 3**

During a visit, the patient receives the following services: 20

minutes therapeutic activities 97530

20 minutes therapeutic exercise 97110 Total

Timed Codes: 40 minutes

The healthcare provider would bill: 3 units

97530 2 units

97110 1 unit

OR

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

97110 2 units

97530 1 unit

Each service was provided for 20 minutes, which would allow for one unit for each service. However, the total time of 40 minutes allows for three units to be billed. Since the time for each service is the same, the provider can choose which code to bill for two units and which code to bill for one unit.

Example 4

During a visit, the patient receives the following services:

33 minutes therapeutic exercise 97110

7 minutes manual therapy 97140

Total Timed Codes: 40 minutes

The healthcare provider would bill: 3 units

97110 2 units

97140 1 unit

The first 30 minutes of therapeutic exercise is 2 units. The remaining 3 minutes is added to the 7 minutes of manual therapy and then is billed for one unit of manual therapy. The time for manual therapy is greater than the remaining time from the therapeutic exercise.

Example 5

During a visit, the patient receives the following services:

18 minutes therapeutic exercise 97110

13 minutes manual therapy 97140

10 minutes gait training 97116

8 minutes ultrasound 97035 Total

Timed Codes: 49 minutes

The healthcare provider would bill: 3 units

97110 1 unit

97140 1 unit

97116 1 unit

Bill the procedures that the most time was spent performing. One unit each of 97110, 97140, and 97116. Although the ultrasound should be documented, it cannot be billed, as the healthcare provider is constrained by the total timed codes minutes. Since the total for the timed codes is 49 minutes, only three units would be billed.

- F. A work hardening program is limited to 6 1/2 hours per day, not to exceed a 6 week period of time.
- G. The payer has the right to require documentation to establish that a modality or therapeutic procedure was performed. Inasmuch as these Guidelines allow for re-evaluations to be performed every two weeks, it is at that time the healthcare provider should address and document the status of the treatment protocol.

It is not appropriate for the payer on a per billing basis to require a healthcare provider to provide unnecessary detailed documentation to justify payment. A healthcare provider is required to comply with A.R.S. § 23-1062.01 when submitting a bill. For example, the purpose of modalities like hot and cold packs, paraffin baths, and whirlpools are straightforward. Modalities are utilized as a sub-element of the over-all treatment protocol to prepare the injured worker for therapy or to minimize the impact of the therapy on the injured worker. Other than a statement that certain modalities were performed, any additional documentation such as the purpose of the application of modalities, resulting flexibility or comfort is unnecessary. Additionally, listing the amount of weight an individual is lifting,

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

repetitions, and sets is, again, unnecessary. During a re-evaluation visit, the healthcare provider should provide documentation regarding changes in strength, stamina, and flexibility.

Documentation of each treatment shall include the following elements:

- Date of treatment.
- Identification of each specific intervention/modality provided and billed, both timed and untimed services in a manner that it can be compared with the billing record to verify correct coding.
- Total timed code treatment minutes and total treatment time in minutes (the amount of time for each specific intervention/modality provided is not required).
- Signatures (written or electronic) and professional designation of the qualified healthcare provider who furnished or supervised the services provided.

## SPECIAL SERVICES GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to services uniquely utilized in Workers' Compensation in Arizona. To the extent that a conflict may exist between an incorporated portion of the CPT® and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

- A. PEER TO PEER CONSULTATION: Medical providers may bill for Peer-to-Peer consultations by using Arizona state specific codes AZ001 and AZ002. Determination of the proper code is based on time spent in discussion and review.

AZ001	Peer-to-Peer interprofessional telephone consultations between treating physician or medical provider and Peer Reviewer; 5-10 minutes of medical consultative discussion and review
AZ002	Peer-to-Peer interprofessional telephone consultations between treating physician or medical provider and Peer Reviewer; 11-30 minutes of medical consultative discussion and review

- B. NURSE CASE MANAGER MEETING: Medical providers may bill for meeting with a nurse case manager (NCM) by using Arizona state specific codes AZ003 and AZ004. Determination of the proper code is based on patient presence during the meeting.

AZ003	Meeting with NCM with patient.
-------	--------------------------------

AZ003 may be billed if time is spent discussing a patient's treatment plan or other related information with the NCM when the patient is present. This should not be billed if there is no interaction with the NCM who is present during the time that a service, which is billed using a separate CPT® code, is performed. The documentation must include:

- The name of the NCM.
- The name of the organization the NCM is representing
- The purpose of the interaction

AZ004	Meeting with NCM without patient
-------	----------------------------------

AZ004 may be billed if time is spent discussing a patient's treatment plan or other related information with the NCM when the patient is not present. The documentation must include:

- The name of the NCM.
- The name of the organization the NCM is representing.
- The purpose of the interaction.

It is not appropriate for the payer on a per billing basis to require a healthcare provider to provide unnecessary detailed documentation to justify payment. A healthcare provider is required to comply with A.R.S. § 23- 1062.01 when submitting a bill.

- C. SPECIAL REPORTS: Medical providers may bill for completion of workers' compensation insurance forms by using Arizona state specific code AZ005 when the request is submitted by the Commission, the payer or third-party administrator of the payer, or the Special Fund of the Commission and limited to one billing of code AZ005 per thirty- day period. The applicable form must be attached to the billing.

AZ005	Completion of workers' compensation insurance forms (i.e. return to-work status, work restrictions, supportive care restrictions) which are requested or required either by the Commission, the applicable payer (insurance, self-insured employer, or the Special Fund of the Commission), or a third-party administrator of

the applicable payer, not to exceed more than one billing in a thirty (30) day period. The applicable form must be attached to the billing.

D. TRAVEL REIMBURSEMENT: Medical providers may bill for collection and handling performed outside of a physician's office or laboratory.

- |       |   |
|-------|---|
| AZ026 | Mileage charge for collection and handling service performed outside of the physician's office or laboratory, within a radius of 7 miles.   |
| AZ027 | Mileage charge for collection and handling service performed outside of the physician's office or laboratory, per mile over 7 miles.  |
| AZ028 | When more than one patient is seen, apportion mileage charge among total number of patients. AZ030<br><br>Mileage round trip: each mile in excess of 8 miles of travel by physician.  |
| AZ031 | Within large metropolitan areas a travel time basis may be appropriate. Code AZ031 would apply to Arizona's major metropolitan areas, to include Phoenix, Tucson, Flagstaff, Kingman and Yuma. This code would only be used when travel times are 45 minutes or more. |

E. EXPERT TESTIMONY: Medical testimony by personal appearance or deposition of a physician is reported using Arizona specific code AZ099. Reimbursement for time spent providing testimony at hearing is described in Section I of the Introduction Section of the Fee Schedule.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

## EVALUATION AND MANAGEMENT GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction of the Fee Schedule.

The evaluation and management guidelines incorporated by reference may be found in the CPT® published by the AMA and is reprinted, in part, below with permission. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS code and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

Documentation and review of records, when required, is inclusive to the performance of the appropriate E/M service. A health care provider shall only be reimbursed for time that is not accounted for in the E/M service code by billing prolonged services codes 99354, 99355, 99356, 99357, 99358, or 99359. Proper documentation must justify the use of these codes and accompany the invoice.

**Impairment Examinations**

Impairment examinations shall be billed using CPT® 99455, work related or medical disability examination by the treating physician, or CPT® 99456, work related or medical disability examination by other than the treating physician. Physicians may bill one unit of these codes for the initial hour and an additional unit for each 30-minute increment after the initial hour. Each 30 minute increment commences the minute following the end of the previous time interval. The physician shall include documentation that demonstrates the complexity of the case and the time spent on the service to justify billing each additional unit. Reimbursement for CPT® codes 99455 and 99456 shall be made at 100% of the listed reimbursement value for the initial unit and then 50% of the listed reimbursement value for each additional unit.

Example:

A physician spends 72 minutes performing a work related disability examination on a patient they previously treated.

The physician would bill two units of 99455 and be reimbursed at 1.5 times the listed reimbursement value for CPT® 99455.

Two HCPCS codes are included in this section of the 2023/2024 Fee Schedule for remote monitoring:

**Remote Monitoring**

G2010 – Remote evaluation of recorded video and/or images submitted by an established patient (*e.g.*, store and forward), including interpretation with follow-up with the patient within 24 business hours, not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment.

G2012 – Brief communication technology-based service, *e.g.*, virtual check-in, by a physician or other qualified health care professional who can report evaluation and management services, provided to an established patient, not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment: 5-10 minutes of medical discussion.

**A. CLASSIFICATION OF EVALUATION AND MANAGEMENT (E/M) SERVICES.**

The E/M section is divided into broad categories such as office visits, hospital inpatient or observation care visits, and consultations. Most of the categories are further divided into two or more subcategories of E/M services. For example, there are two subcategories of office visits (new patient and established patient) and there are two subcategories of hospital inpatient and observation care visits (initial and subsequent). The subcategories of E/M services are further classified into levels of E/M services that are identified by specific codes.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

The basic format of the levels of E/M services based on medical decision making (MDM) or time is the same. First, a unique code number is listed. Second, the place and/or type of service is specified, (e.g., office or other outpatient visit). Third, the content of the service is defined. Fourth, time is specified. (A detailed discussion of time is provided in the Guidelines for Selecting Level of Service Based on Time.)

The place of service and service type are defined by the location where the face-to-face encounter with the patient and/or family/caregiver occurs. For example, service provided to a nursing facility resident brought to the office is reported with an office or other outpatient code.

**New and Established Patients**

Solely for the purposes of distinguishing between new and established patients, professional services are those face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services. A new patient is one who has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, within the past three years.

An established patient is one who has received professional services from the physician or other qualified health care professional or another physician. In the instance where a physician or other qualified health care professional is on call for or covering for another physician or other qualified health care professional, the patient's encounter will be classified as it would have been by the physician or other qualified health care professional who is not available. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician.

No distinction is made between new and established patients in the emergency department. E/M services in the emergency department category may be reported for any new or established patient who presents for treatment in the emergency department.

**Initial and Subsequent Services**

Some categories apply to both new and established patients (e.g., hospital inpatient or observation care). These categories differentiate services by whether the service is the initial service or a subsequent service. For the purpose of distinguishing between initial or subsequent visits, professional services are those face-to-face services rendered by physicians and other qualified health care professionals who may report evaluation and management services. An initial service is when the patient has not received any professional services from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, during the inpatient, observation, or nursing facility admission and stay.

A subsequent service is when the patient has received professional service(s) from the physician or other qualified health care professional or another physician or other qualified health care professional of the exact same specialty and subspecialty who belongs to the same group practice, during the admission and stay.

In the instance when a physician or other qualified health care professional is on call for or covering for another physician or other qualified health care professional, the patient's encounter will be classified as it would have been by the physician or other qualified health care professional who is not available. When advanced practice nurses and physician assistants are working with physicians, they are considered as working in the exact same specialty and subspecialty as the physician.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

For reporting hospital inpatient or observation care services, a stay that includes a transition from observation to inpatient is a single stay. For reporting nursing facility services, a stay that includes transition(s) between skilled nursing facility and nursing facility level of care is the same stay.

**Services Reported Separately**

Any specifically identifiable procedure or service (i.e., identified with a specific CPT code) performed on the date of E/M services may be reported separately.

The ordering and actual performance and/or interpretation of diagnostic tests/studies during a patient encounter are not included in determining the levels of E/M services when the professional interpretation of those tests/studies is reported separately by the physician or other qualified health care professional reporting the E/M service. Tests that do not require separate interpretation (e.g., tests that are results only) and are analyzed as part of MDM do not count as an independent interpretation, but may be counted as ordered or reviewed for selecting an MDM level. The performance of diagnostic tests/studies for which specific CPT codes are available may be reported separately, in addition to the appropriate E/M code. The interpretation of the results of diagnostic tests/studies (i.e., professional component) with preparation of a separate distinctly identifiable signed written report may also be reported separately, using the appropriate CPT code and, if required, with modifier 26 appended. The physician or other qualified health care professional may need to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant separately identifiable E/M service. The E/M service may be caused or prompted by the symptoms or condition for which the procedure and/or service was provided. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. As such, different diagnoses are not required for reporting of the procedure and the E/M services on the same day.

**History and/or Examination**

E/M codes that have levels of services include a medically appropriate history and/or physical examination, when performed. The nature and extent of the history and/or physical examination are determined by the treating physician or other qualified health care professional reporting the service. The care team may collect information, and the patient or caregiver may supply information directly (e.g., by electronic health record [EHR] portal or questionnaire) that is reviewed by the reporting physician or other qualified health care professional. The extent of history and physical examination is not an element in the selection of the level of these E/M service codes.

**B. LEVELS OF E/M SERVICES.**

Select the appropriate level of E/M services based on the following:

1. The level of the MDM as defined for each service, **or**
2. The total time for E/M services performed on the date of the encounter.

Within each category or subcategory of E/M service, there are three to five levels of E/M services available for reporting purposes. Levels of E/M services are NOT interchangeable among the different categories or subcategories of service. For example, the first level of E/M services in the subcategory of office visit, new patient, does not have the same definition as the first level of E/M services in the subcategory of office visit, established patient. Each level of E/M services may be used by all physicians or other qualified health care professionals.

**Guidelines for Selecting Level of Service Based on Medical Decision Making**

Four types of MDM are recognized: straightforward, low, moderate, and high. The concept of the level of MDM does not apply to CPT codes 99211, 99281.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

MDM includes establishing diagnoses, assessing the status of a condition, and/or selecting a management option. MDM is defined by three elements. The elements are:

- The number and complexity of problem(s) that are addressed during the encounter.
- The amount and/or complexity of data to be reviewed and analyzed. These data include medical records, tests, and/or other information that must be obtained, ordered, reviewed, and analyzed for the encounter. This includes information obtained from multiple sources or interprofessional communications that are not reported separately and interpretation of tests that are not reported separately. Ordering a test is included in the category of test result(s) and the review of the test result is part of the encounter and not a subsequent encounter. Ordering a test may include those considered but not selected after shared decision making. For example, a patient may request diagnostic imaging that is not necessary for their condition and discussion of the lack of benefit may be required. Alternatively, a test may normally be performed, but due to the risk for a specific patient it is not ordered. These considerations must be documented. Data are divided into three categories:
  1. Tests, documents, orders, or independent historian(s). (Each unique test, order, or document is counted to meet a threshold number.)
  2. Independent interpretation of tests (not separately reported).
  3. Discussion of management or test interpretation with an external physician or other qualified health care professional or appropriate source (not separately reported).
- The risk of complications and/or morbidity or mortality of patient management. This includes decisions made at the encounter, associated with diagnostic procedure(s), and treatment(s). This includes the possible management options selected and those considered but not selected after shared decision making with the patient and/or family. For example, a decision about hospitalization includes considerations of alternative levels of care. Examples may include a psychiatric patient with a sufficient degree of support in the outpatient setting or the decision to not hospitalize a patient with advanced dementia with an acute condition that would generally warrant inpatient care, but for whom the goal is palliative treatment.

Shared decision making involves eliciting patient and/or family preferences, patient and/or family education, and explaining risks and benefits of management options.

MDM may be impacted by role and management responsibility.

When the physician or other qualified health care professional is reporting a separate CPT® code that includes interpretation and/or report, the interpretation and/or report is not counted toward the MDM when selecting a level of E/M services. When the physician or other qualified health care professional is reporting a separate service for discussion of management with a physician or another qualified health care professional, the discussion is not counted toward the MDM when selecting a level of outpatient/M services.

The Levels of Medical Decision Making (MDM) table (Table 1) is a guide to assist in selecting the level of MDM for reporting an E/M services code. The table includes the four levels of MDM (*i.e.*, straightforward, low, moderate, high) and the three elements of MDM (*i.e.*, number and complexity of problems addressed at the encounter, amount and/or complexity of data reviewed and analyzed, and risk of complications and/or morbidity or mortality of patient management). To qualify for a particular level of MDM, two of the three elements for that level of MDM must be met or exceeded.

Examples in the table may be more or less applicable to specific settings of care. For example, the decision to hospitalize applies to the outpatient or nursing facility encounters, whereas the decision to escalate hospital level of care (e.g., transfer to ICU) applies to the hospitalized or observation care patient. See also the introductory guidelines of each code family section.

**Number and Complexity of Problems Addressed at the Encounter**

One element used in selecting the level of office or other outpatient services is the number and complexity of the problems that are addressed at an encounter. Multiple new or established conditions may be addressed at the same time and may affect MDM. Symptoms may cluster around a specific diagnosis and each symptom is not necessarily a unique condition. Comorbidities/underlying diseases, in and of themselves, are not considered in selecting a level of E/M services **unless** they are addressed, and their presence increases the amount and/or complexity of data to be reviewed and analyzed or the risk of complications and/or morbidity or mortality of patient management. The final diagnosis for a condition does not, in and of itself, determine the complexity or risk, as extensive evaluation may be required to reach the conclusion that the signs or symptoms do not represent a highly morbid condition. Therefore, presenting symptoms that are unlikely to represent a highly morbid condition may “drive” MDM even when the ultimate diagnosis is not highly morbid. The evaluation and/or treatment should be consistent with the likely nature of the condition. Multiple problems of a lower severity may, in the aggregate, create higher risk due to interaction.

The term “risk” as used in these definitions relates to risk from the condition. While condition risk and management risk may often correlate, the risk from the condition is distinct from the risk of management.

Definitions for the elements of MDM (see Table 1, Levels of Medical Decision Making) are:

**Problem:** A problem is a disease, condition, illness, injury, symptom, sign, finding, complaint, or other matter addressed at the encounter, with or without a diagnosis being established at the time of the encounter.

**Problem addressed:** A problem is addressed or managed when it is evaluated or treated at the encounter by the physician reporting the service. This includes consideration of further testing or treatment that may not be elected by virtue of risk/benefit analysis or patient/parent/guardian/surrogate choice. Notation in the patient’s medical record that another professional is managing the problem without additional assessment or care coordination documented does not qualify as being addressed or managed by the physician reporting the service. Referral without evaluation (by history, examination, or diagnostic study[ies]) or

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

consideration of treatment does not qualify as being addressed or managed by the physician or other health care professional reporting the service. For hospital inpatient and observation care services the problem addressed is the problem status on the date of the encounter, which may be significantly different than on admission. It is the problem being managed or co-managed by the reporting physician or other qualified health care professional and may not be the cause of admission or continued stay.

**Minimal problem:** A problem that may not require the presence of the physician or other qualified healthcare professional, but the service is provided under the physician's or other qualified health care professional's supervision (see CPT codes 99211, 99281).

**Self-limiting or minor problem:** A problem that runs a definite and prescribed course, is transient in nature, and is not likely to permanently alter health status.

**Stable, chronic illness:** A problem with an expected duration of at least one year or until the death of the patient. For the purpose of defining chronicity, conditions are treated as chronic whether or not stage or severity changes (e.g., uncontrolled diabetes and controlled diabetes are a single chronic condition). "Stable" for the purposes of categorizing MDM is defined by the specific treatment goals for an individual patient. A patient who is not at his or her treatment goal is not stable, even if the condition has not changed and there is no short-term threat to life or function. For example, in a patient with persistently poorly controlled blood pressure for whom better control is a goal is not stable, even if the pressures are not changing and the patient is asymptomatic, the risk of morbidity **without** treatment is significant.

**Acute, uncomplicated illness or injury:** A recent or new short-term problem with low risk of morbidity for which treatment is considered. There is little to no risk of mortality with treatment, and full recovery without functional impairment is expected. A problem that is normally self-limited or minor but is not resolving consistent with a definite and prescribed course is an acute, uncomplicated illness.

**Acute, uncomplicated illness or injury requiring hospital inpatient or observation level care:** A recent or new short-term problem with low risk of morbidity for which treatment is required. There is little to no risk of mortality with treatment, and full recovery without functional impairment is expected. The treatment required is delivered in a hospital inpatient or observation I level setting.

**Stable, acute illness:** A problem that is new or recent for which treatment has been initiated. The patient is improved and, while resolution may not be complete, is stable with respect to this condition.

**Chronic illness with exacerbation, progression, or side effects of treatment:** A chronic illness that is acutely worsening, poorly controlled, or progressing with an intent to control progression and requiring additional supportive care or requiring attention to treatment for side effects.

**Undiagnosed new problem with uncertain prognosis:** A problem in the differential diagnosis that represents a condition likely to result in a high risk of morbidity without treatment.

**Acute illness with systemic symptoms:** An illness that causes systemic symptoms and has a high risk of morbidity without treatment. For systemic general symptoms, such as fever, body aches, or fatigue in a minor illness that may be treated to alleviate symptoms, see the definitions for *self-limited or minor problem* or *acute, uncomplicated illness or injury*. Systemic symptoms may not be general but may be a single system.

**Acute, complicated injury:** An injury which requires treatment that includes evaluation of body systems that are not directly part of the injured organ, the injury is extensive, or the treatment options are multiple and/or associated with a risk of morbidity.

**Chronic illness with severe exacerbation, progression, or side effects of treatment:** The severe exacerbation or progression of a chronic illness or severe side effects of treatment that have significant risk of morbidity and may require escalation in level of care.

**Acute or chronic illness or injury that poses a threat to life or bodily function:** An acute illness with systemic symptoms, and acute complicated injury, or a chronic illness or injury with exacerbation and/or progression or side effects of treatment, that poses a threat to life or bodily function in the near term without treatment. Some symptoms may represent a condition that is significantly probable and poses a potential threat to life or bodily function. These may be included in this category when the evaluation and treatment are consistent with this degree of potential severity.

#### **Amount and/or Complexity of Data to Be Reviewed and Analyzed**

One element used in selecting the level of services is the amount and/or complexity of data to be reviewed or analyzed at an encounter.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

**Analyzed:** the process of using the data as part of the MDM. The data element itself may not be subject to analysis (*e.g.*, glucose), but it is instead included in the thought processes for diagnosis, evaluation, or treatment. Tests ordered are presumed to be analyzed when the results are reported. Therefore, when they are ordered during an encounter, they are counted in that encounter. Tests that are ordered outside of an encounter may be counted in the encounter in which they are analyzed. In the case of a recurring order, each new result may be counted in the encounter in which it is analyzed. For example, an encounter that includes an order for monthly prothrombin times would count for one prothrombin time ordered and reviewed. Additional future results, if analyzed in a subsequent encounter, may be counted as a single test in that subsequent encounter. Any service for which the professional component is separately reported by the physician or other qualified health care professional reporting the E/M services is not counted as a data element ordered, reviewed, analyzed, or independently interpreted for the purposes of determining the level of MDM.

**Test:** Tests are imaging, laboratory, psychometric, or physiologic data. A clinical laboratory panel (*e.g.*, basic metabolic panel [80047]) is a single test. The differentiation between single or multiple tests is defined in accordance with the CPT® code set. For the purposes of data reviewed and analyzed, pulse oximetry is not a test.

**Unique:** A unique test is defined by the CPT® code set. When multiple results of the same unique test (*e.g.*, serial blood glucose values) are compared during an E/M service, count it as one unique test. Tests that have overlapping elements are not unique, even if they are identified with distinct CPT® codes. For example, a CBC with differential would incorporate the set of hemoglobin, CBC, without differential, and platelet count. A unique source is defined as a physician or other qualified healthcare professional in a distinct group or different specialty or subspecialty, or a unique entity. Review of all the materials from any unique source counts as one element toward MDM.

**Combination of Data Elements:** A combination of different data elements, for example, a combination of notes reviewed, tests ordered, tests reviewed, or independent historian, allows these elements to be summed. It does not require each item type or category to be represented. A unique test ordered, plus a note reviewed and an independent historian would be a combination of three elements.

**External:** External records, communications and/or test results are from an external physician, other qualified health care professional, facility, or health care organization.

**External physician or other qualified health care professional:** An external physician or other qualified health care professional who is not in the same group practice or is of a different specialty or subspecialty. This includes licensed professionals who are practicing independently. The individual may also be a facility or organizational provider such as from a hospital, nursing facility, or home health care agency.

**Discussion:** Discussion requires an interactive exchange. The exchange must be direct and not through intermediaries (*e.g.*, clinical staff or trainees). Sending chart notes or written exchanges that are within progress notes does not qualify as an interactive exchange. The discussion does not need to be on the date of the encounter, but it is counted only once and only when it is used in the decision making of the encounter. It may be synchronous (*i.e.*, does not need to be in person), but it must be initiated and completed within a short time period (*e.g.*, within a day or two).

**Independent historian(s):** An individual (*e.g.*, parent, guardian, surrogate, spouse, witness) who provides a history in addition to a history provided by the patient who is unable to provide a complete or reliable history (*e.g.*, due to developmental stage, dementia, or psychosis) or because a confirmatory history is judged to be necessary. In the case where there may be conflict or poor communication between multiple historians and more than one historian is needed, the independent historian requirement is met. The independent history does not need to be obtained in person but does need to be obtained directly from the historian providing the independent information.

**Independent interpretations:** The interpretation of a test for which there is a CPT® code and an interpretation or report is customary. This does not apply when the physician is reporting the service or has previously reported the service for the patient. A form of interpretation should be documented but need not conform to the usual standards of a complete report for the test.

**Appropriate source:** For the purpose of the discussion of management data element (see Table 1, levels of Medical Decision Making), an appropriate source includes professionals who are not health care professionals but may be involved in the management of the patient (*e.g.*, lawyer, parole officer, case manager, teacher). It does not include discussion with family or informal caregivers.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

**Risk of Complications and/or Morbidity or Mortality of Patient Management**

One element used in selecting the level of service is the risk of complications and/or morbidity or mortality of patient management at an encounter. This is distinct from the risk of the condition itself.

**Risk:** The probability and/or consequences of an event. The assessment of the level of risk is affected by the nature of the event under consideration. For example, a low probability of death may be high risk, whereas a high chance of a minor, self-limited adverse effect of treatment may be low risk. Definitions of risk are based upon the usual behavior and thought processes of a physician or other qualified healthcare professional in the same specialty. Trained clinicians apply common language usage meanings to terms such as *high*, *medium*, *low*, or *minimal* risk and do not require quantification for these definitions (though quantification may be provided when evidence-based medicine has established probabilities). For the purposes of MDM, level of risk is based upon consequences of the problem(s) addressed at the encounter when appropriately treated. Risk also includes MDM related to the need to initiate or forego further testing, treatment and/or hospitalization. The risk of patient management criteria applies to the patient management decisions made by the reporting physician or other health care professional as part of the reported encounter.

**Morbidity:** A state of illness or functional impairment that is expected to be of substantial duration during which function is limited, quality of life is impaired, or there is organ damage that may not be transient despite treatment.

**Social determinants of health:** Economic and social conditions that influence the health of people and communities. Examples may include food or housing insecurity.

**Surgery (minor or major, elective, emergency, procedure or patient risk):**

**Surgery - Minor or Major:** The classification of surgery into minor or major is based on the common meaning of such terms when used by trained clinicians, similar to the use of the term “risk.” These terms are not defined by a surgical package classification.

**Surgery – Elective or Emergency:** Elective procedures and emergent or urgent procedures describe the timing of the procedure when the timing is related to the patient’s condition. An elective procedure is typically planned in advance (e.g., scheduled for weeks later), while an emergent procedure is typically performed immediately or with minimal delay to allow for patient stabilization. Both elective and emergent procedures may be minor or major procedures.

**Surgery – Risk Factors, Patient or Procedure:** Risk factors are those that are relevant to the patient and procedure. Evidence-based risk calculators may be used, but are not required, in assessing patient and procedure risk.

**Drug therapy requiring intensive monitoring for toxicity:** A drug that requires intensive monitoring is a therapeutic agent that has the potential to cause serious morbidity or death. The monitoring is performed for assessment of these adverse effects and not primarily for assessment of therapeutic efficacy. The monitoring should be that which is generally accepted practice for the agent but may be patient-specific in some cases. Intensive monitoring may be long-term or short-term. Long-term intensive monitoring is not performed less than quarterly. The monitoring may be performed with a laboratory test, a physiologic test, or imaging. Monitoring by history or examination does not qualify. The monitoring affects the level of MDM in an encounter in which it is considered in the management of the patient. Examples of monitoring that do not qualify include monitoring glucose levels during insulin therapy, as the primary reason is the therapeutic effect (unless severe hypoglycemia is a current, significant concern); or annual electrolytes and renal function for a patient on a diuretic, as the frequency does not meet the threshold.

**Guidelines for Selecting Level of Service Based on Time**

Certain categories of time-based E/M codes that do not have levels of services based on MDM (e.g., Critical Care Services) in the E/M section use time differently. It is important to review the instructions for each category.

Time is **not** a descriptive component for the emergency department levels of E/M services because emergency department services are typically provided on a variable intensity basis, often involving multiple encounters with several patients over an extended period of time.

When time is used for reporting E/M services codes, the time defined in the service descriptors is used for selecting the appropriate level of services. The E/M services for which these guidelines apply require a face-to-face encounter with the

physician or other qualified health care professional and the patient and/or family/caregiver. For office or other outpatient services, if the physician's or other qualified health care professional's time is spent in the supervision of clinical staff who perform the face-to-face services of the encounter, use 99211.

For coding purposes, time for these services is the total time on the date of the encounter. It includes both the face-to-face time with the patient and/or family/caregiver and non-face-to-face time personally spent by the physician and/or other qualified health care professional(s) on the day of the encounter (includes time in activities that require the physician or other qualified health care professional and does not include time in activities normally performed by clinical staff). It includes time regardless of the location of the physician or other qualified health care professional (e.g., whether on or off the inpatient unit or in or out of the outpatient office). It does not include any time spent in the performance of other separately reported service(s).

A shared or split visit is defined as a visit in which a physician and other qualified health care professional(s) both provide face-to-face and non-face-to-face work related to the visit. When time is being used to select the appropriate level of services for which time-based reporting of shared or split visits is allowed, the time personally spent by the physician and other qualified health care professional(s) assessing and managing the patient and/or counseling, educating, communicating results to the patient/family/caregiver on the date of the encounter is summed to define total time.

Only distinct time should be summed for shared or split visits (*i.e.*, when two or more individuals jointly meet with or discuss the patient, only the time of one individual should be counted).

When prolonged time occurs, the appropriate prolonged services code may be reported. The total time on the date of the encounter spent caring for the patient should be documented in the medical record when it is used as the basis for code selection.

Physician or other qualified health care professional time includes the following activities, when performed:

- Preparing to see the patient (e.g., review of tests)
- Obtaining and/or reviewing separately obtained history
- Performing a medically appropriate examination and/or evaluation
- Counseling and educating the patient/family/caregiver
- Ordering medications, tests, or procedures
- Referring and communicating with other health care professionals (when not separately reported)
- Documenting clinical information in the electronic or other health record
- Independently interpreting results (not separately reported) and communicating results to the patient/family/caregiver
- Care coordination (not separately reported) Do not count time spent on the following:
  - The performance of other services that are reported separately
  - Travel
  - Teaching that is general and not limited to discussion that is required for the management of a specific patient

#### C. UNLISTED SERVICE.

An E/M service may be provided that is not listed in this section of CPT® codebook. When reporting such a service, the appropriate unlisted code may be used to indicate the service, identifying it by "Special Report," as discussed in item E. The "Unlisted Services" and accompanying codes for the E/M section are as follows:

99429 Unlisted preventive medicine service

99499 Unlisted evaluation and management service

#### D. SPECIAL REPORT.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

An unlisted service or one that is unusual, variable, or new may require a special report demonstrating the medical appropriateness of the service. Pertinent information should include an adequate definition or description of the nature, extent, and need for the procedure and the time, effort, and equipment necessary to provide the service. Additional items that may be included are complexity of symptoms, final diagnosis, pertinent physical findings, diagnostic and therapeutic procedures, concurrent problems, and follow-up care.

## CATEGORY III CODES GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS code and a code, guideline, identifier or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

Category III Codes are temporary codes developed to allow collection of data for emerging technology, services, and procedures. The five character alphanumeric codes contain four numbers with one alpha character in the fifth place. If a Category III Code is available, this code must be reported instead of a Category I unlisted code.

## HCPCS GUIDELINES

Information regarding the incorporation of HCPCS codes is found in the Introduction to the Fee Schedule. HCPCS

codes are five-character codes with a leading alpha-character followed by four numeric digits.

The following Commission guidelines are provided in addition to the Center for Medicare & Medicaid Services' (CMS) HCPCS codes and descriptions and represent additional guidance from the Commission relative to services unique or uniquely utilized in Workers' Compensation. To the extent that a conflict may exist between an incorporated HCPCS code and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier, or modifier shall control. Codes that contain explanatory language specific to Arizona are preceded by Δ in this Fee Schedule. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

HCPCS codes in this section are used to bill for services, equipment and supplies including:

- Medical and surgical supplies
- Durable medical equipment
- Physician-administered drugs
- Prosthetics and orthotics
- Vision and hearing supplies

In this section, any reference to Durable Medical Equipment (DME) also includes reimbursable supplies, prosthetics, and orthotics.

**A. REIMBURSEMENT**

1. Materials and supplies normally necessary to perform a service, such as needles and syringes, ultrasound pads and gel, band-aids and dressings are considered part of a healthcare provider's overhead and are not separately reimbursable. Please see Section J of the Introduction Guidelines to the Fee Schedule for more examples of non- reimbursable supplies and materials.
2. This section of the fee schedule includes maximum reimbursement amounts for DME, services, and procedures billed with HCPCS codes.
3. DME dispensed by a healthcare provider to the patient ancillary to an office visit shall be reimbursed at the lesser of the provider's billed charge or the value listed in the fee schedule. Refer to Section J of the Introduction Guidelines to the Fee Schedule for reimbursement when the item does not have an applicable HCPCS code.
4. DME may be reimbursed differently based on the whether the zip code where the materials are provided are classified by CMS as rural or nonrural. The fee schedule includes different rates for rural and nonrural zip codes where applicable. The zip codes included on the list below shall be reimbursed based on the fees in the "Rural" column in the fee schedule. All other zip codes shall be reimbursed based on the "Nonrural" fee.

5. DME shipped to the patient shall be reimbursed based on the location of the patient when determining if the fees for rural or nonrural zip codes apply.
6. HCPCS codes describing physician-administered drugs and biologicals including, chemotherapy and immunosuppressive drugs, inhalation solutions and other miscellaneous drugs and solutions shall be used when billing for these products. Please refer to the Pharmaceutical Fee Schedule for billing and reimbursement information for prescription and over-the-counter drugs, including those that are described by HCPCS codes.
7. Services and materials that are listed as By Report or have no listed value in the fee schedule, shall be reimbursed based on a predetermined agreement between the DME provider and the payer. HCPCS codes representing professional services that are not listed in the fee schedule may be reimbursed based on a predetermined agreement between the provider and the payer.
8. Reimbursement for DME shall not be less than the actual cost of an item. Specialized (*e.g.*, bariatric) equipment may have an actual cost that is greater than the reimbursement value listed in the Fee Schedule. The DME provider must demonstrate the actual cost of the DME is greater than the listed reimbursement value by presenting a copy of the original invoice for that item. The reimbursement value for the item shall be based on a predetermined agreement between the DME provider and the payer. When the DME was procured from an intermediary entity (*e.g.*, wholesaler) and not the original manufacturer, the provider must disclose any rebates, reductions, discounts, or relationship with that intermediary entity and the impact on the original manufacturer's cost of that item.
9. Home Health Care – please see the Home Health Care Fee Schedule Guidelines.

**B. MODIFIERS**

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- c. RR – indicates that the equipment is being rented. Rental periods shall be considered monthly unless defined differently in the code description.

**C. BILLING**

1. Providers of orthotics and prostheses may bill for fitting, training and management using CPT® codes 97760- 97763.
2. DME and Implantable devices shall be billed separately from facility and professional service fees only if they are not considered bundled with the primary service code.
3. Certain DME may be rented. Determination to purchase or rent DME shall be based on CMS Medicare guidelines in effect on the date the patient takes possession of the DME.
4. Materials, supplies, and equipment billed with a miscellaneous code (e.g., E1399 – durable medical equipment, miscellaneous) shall include the brand name and model number of the DME being supplied when available.
5. Actual shipping or delivery costs necessary to transit DME to the injured worker may be billed. Documentation demonstrating the cost of shipping shall be included with the invoice.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

### RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

**CHAPTER TABLE OF CONTENTS**

*Editor's Note: Chapter 3 contains rules which were exempt from the regular rulemaking process under Laws 2014, 2nd Special Session, Ch. 1, Sec. 158. The law required the Department to post on its website proposed exempt rulemakings for a minimum of 30 days, at which time the public could provide written comments. In addition, at least two public hearings were held prior to the filing of the final exempt rules. Because the Department solicited comments on its proposed exempt rules, the rules filed with the Office of the Secretary of State are considered final exempt rules (Supp. 15-4).*

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “‘Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2022 is cited as Supp. 22-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. This is why the Office lists only updated codified Sections on the previous page.

### RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.
