1. The dates of the billing period;
  2. After January 1, 2013, the date and number of review hours performed during the billing period itemized by employee name, position type and specifically describing:

- E. Existing facility application deadline.** Existing facilities that qualify for coverage under subsections (A)(1), (A)(2), or (A)(3) on the effective date of this rule shall submit a Notice of Intent to Operate within 2 years of the effective date of this rule to obtain coverage. The Director may extend this date in individual cases if the facility could not have submitted an administratively complete Notice in time with reasonable diligence.
- F. Authorization review.**
1. Inspection. The Department may inspect the facility to determine that the applicable terms of this general permit are being met.
  2. Authority to Operate issuance.
    - a. If the Department determines, based on its review and an inspection, if conducted, that the facility conforms to the requirements of this general permit, the Director shall issue an Authority to Operate.
    - b. The Authority to Operate authorizes the person to operate the landfill under the terms of this general permit.
  3. Authority to Operate denial. If the Department determines, based on its review and an inspection, if conducted, that the facility does not conform to the requirements of this general permit, the Director shall notify the person of the decision not to issue the Authority to Operate and the person shall not operate the landfill under this general permit. The notification shall inform the person of:
    - a. The reason for the denial with reference to the statute or rule on which the denial is based;
    - b. The person's right to appeal the denial, including the number of days the applicant has to file a protest challenging the denial and the name and telephone number of the Department contact person who can answer questions regarding the appeals process; and

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

**H. Operational requirements.**

1. Inspect the landfill at least quarterly and after large storm events for overall integrity and condition of the facility, including stormwater diversions, and conduct maintenance and repairs as needed. For the purposes of this Section, a "large storm event" is defined as one-half inch of precipitation in any 24-hour period.
2. Direct storm water runoff from surrounding areas away from the landfill.
3. Restrict public access to the landfill or to the mining operation site by signs or physical barriers, including natural barriers.
4. Apply cover at such frequencies and in such a manner as to control windblown dispersion of waste, reduce the risk of fire and impede disease vectors' access to the waste, taking into account the types and volumes of waste placed in the landfill, the frequency of disposal, and other relevant considerations. The Department may allow other techniques that are demonstrated to be equally protective as applying cover material.
5. Concentrations of methane gas shall not exceed 25% of the lower explosive limit in facility structures within 100 feet of the landfill boundary and shall not exceed the lower explosive limit beyond the landfill boundary.
6. Methane monitoring.
  - a. For landfills that have accepted waste prior to the effective date of this Section only, the applicant shall include recent methane monitoring data as described in subsection (D)(6) with the Notice of Intent to Operate.
    - i. If the data demonstrate that concentrations of methane gas do not exceed 25% of the lower explosive limit, then no methane monitoring is required in order to operate under this permit.
    - ii. If the data demonstrate that concentrations of methane gas exceed 25% of the lower explosive limit, then annual methane monitoring using one of the data gathering methods described in subsection (D)(6) is required in order to operate under this permit. Results of such annual methane monitoring shall be submitted to the Department.
      - (1) A person operating a landfill subject to annual methane monitoring may reduce monitoring to once every five years if the results of three consecutive annual sampling events demonstrate that concentrations of methane gas do not exceed 25% of the lower explosive limit.
      - (2) A person operating a landfill subject to annual methane monitoring may request the Department to reduce or eliminate such monitoring based on any other methods approved by the Department, including consideration of the potential for methane gas to be present in facility structures within 100 feet of the landfill boundary at concentrations exceeding 25% of the lower explosive limit.
  - b. For landfills that have not accepted waste prior to the effective date of this Section, no methane monitoring is required in order to obtain coverage or operate under this permit.

7. Maintain an operating record that documents compliance with the conditions in this permit.

- I. Recordkeeping.** A permittee shall maintain the following information for at least 10 years and make it available to the Department upon request:
  1. Landfill construction drawings and as-built plans, if available;
  2. The operating record required by subsection (H)(7); and
  3. Methane monitoring results, if any, obtained under subsection (H)(6).
- J. Reporting requirements.** A permittee shall report the following to the Department:
  1. Methane monitoring concentrations that exceed those listed in subsection (H)(5) within 7 days of the determination.
  2. A change in ownership or expansion of the planned waste footprint as soon as practicable. These events shall require the filing of a new Notice of Intent to Operate.
- K. General applicability.** Landfills covered under this general permit:
  1. Are not subject to rules adopted by the Department under A.R.S. § 49-761.
  2. Are exempt from the solid waste facility plan requirements in A.R.S. §§ 49-762.03 and 49-762.04 as provided in A.R.S. § 49-762(B).

sonably possible in the [region, including rain and snow where applicable. 0.5 PMF is that flood represented by the flood hydrograph with ordinates equal to 0.5 the corresponding ordinates of the PMF hydrograph.]

9. "Probable maximum precipitation" means the greatest depth of precipitation for a given duration that is theoretically physically possible over a particular size storm area at a particular geographical location at a particular time of year.
10. "Reservoir" means a CCR surface impoundment.
11. "Residual freeboard" or "freeboard" means the vertical distance between the highest water surface elevation during the inflow design flood and the lowest point at the top of the CCR surface impoundment.
12. "Safe storage level" means the maximum reservoir surface elevation at which the Director determines it is safe to impound water, other liquids, or CCR in the reservoir.
13. "Safety deficiency" means a condition at a CCR surface impoundment that impairs or adversely affects the safe operation of the CCR surface impoundment.
14. "Spillway crest" means the highest elevation of the floor of the spillway along a centerline profile through the spillway.
15. "Storage capacity" means the maximum volume of CCR, liquid, sediment, or debris that can be impounded in the reservoir with no discharge, including the situation where an uncontrolled outlet becomes plugged. When spillways are present, the storage capacity is reached when the reservoir level is at the crest of the emergency spillway, or at the top of permanently mounted emergency spillway gates in the closed position. Storage capacity excludes dead storage below the natural ground surface.
16. "Total freeboard" means the vertical distance between the emergency spillway crest or the safe storage level and the top of the CCR surface impoundment.
17. "Unsafe" means that safety deficiencies in a CCR surface impoundment or spillway could result in failure of the CCR surface impoundment with subsequent loss of human life or significant property damage.

**R18-13-1003.01. Additional Arizona Design Criteria for New CCR Surface Impoundments and Lateral Expansions of CCR Surface Impoundments**

- A. The requirements in this Section are additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not replace any requirement of 40 CFR 257, subpart D, as incorporated herein.
  - B. Geotechnical Requirements. The owner or operator shall provide an evaluation of the static stability of the foundation, CCR surface impoundment, and slopes of the reservoir rim.
  - C. CCR surface impoundment Embankment Requirements.
    1. Geotechnical Requirements. Table 1 states additional minimum factors of safety for embankment stability under various loading conditions not covered by 40 CFR 257.74(e).
      - a. The analysis of minimum factors of safety shall include the effects of anisotropy on the phreatic surface position by using a ratio of horizontal permeability to vertical permeability of at least 10. The Director may require ratios of up to 100 if the material types and construction techniques will cause excessive stratification.
      - b. The owner or operator shall use tests modeling the conditions being analyzed to determine the strengths used in the stability analysis. The stability analysis shall include total and effective stress strengths appropriate for the different material zones and conditions analyzed. The stability analysis shall use undrained strengths or strength parameters for all saturated materials.
      - c. If applicable, the owner or operator shall perform an analysis of the upstream slope stability for a partial pool with steady seepage considering the reservoir level that provides the lowest factor of safety.
    2. Seismic Requirements
      - a. The owner or operator shall determine the seismic characteristics of the site as prescribed in R18-13-1002(B) and (C) and R18-13-1010.01(G)(3)(m).
      - b. The owner or operator shall determine the liquefaction susceptibility of the embankment, foundation, and abutments and may use standard penetration testing, cone penetration testing, shear wave velocity measurements, or a combination of these methods to make this determination. The owner or operator shall compute the minimum factor of safety against liquefaction at specific points and make a determination of whether the overall site is subject to liquefaction.
  - c. The owner or operator shall compute a minimum factor of safety against overtopping due to deformation and settlement in each of the following cases. The minimum factor of safety against overtopping can be no less than 2.5, determined by dividing the total pre-earthquake freeboard by the estimated vertical settlement in feet. The owner or operator shall determine the total vertical settlement by adding the settlement values of the upstream and downstream slopes.
    - i. An embankment, foundation, or abutment is not subject to liquefaction, has a maximum peak acceleration of more than 0.2g or a maximum peak acceleration of more than 0.35g and consists of clay on a clay or bedrock foundation; or
    - ii. The embankment, foundation or abutment is subject to liquefaction.
  - d. The owner or operator shall perform a liquefaction analysis to establish approximate boundaries of liquefiable zones and physical characteristics of the soil following liquefaction for an embankment, foundation, or abutment subject to liquefaction. The owner or operator shall perform an analysis of the potential for flow liquefaction.
  - e. Other analytical procedures may be required by the Director for sites with high seismicity or low strength embankment or foundation soils.
3. Miscellaneous Design Requirements
    - a. The design of any significant or high hazard potential CCR surface impoundment shall provide seepage collection and prevent internal erosion or piping due to embankment cracking or other causes.
    - b. The Director shall review the filter and permeability design for a chimney drain, drain blanket, toe drain, or outlet conduit filter diaphragms on the basis of unique site characteristics.
      - i. The minimum thickness of an internal drain is 3 feet.
      - ii. The minimum width of a chimney drain is 6 feet.
      - iii. The owner or operator shall filter match an internal drain to its adjacent material.
      - iv. The owner or operator shall design internal drains with sufficient capacity for the expected drainage without the use of drainpipes using only natural granular materials.
    - c. The use of a geosynthetic is not permitted in a design if it serves as the sole defense against CCR surface impoundment embankment failure. The use of geotextiles and geonets as a filter or drain material or a geomembrane liner is permitted only in a location that is easily accessible for repair or if its excavation cannot create an unsafe condition at the CCR surface impoundment. The Director may impose permit conditions, including monitoring appropriate to the hazard classification, inspection, and necessary repairs.
    - d. The owner or operator shall use armoring on any upstream slope of a CCR surface impoundment embankment. If the owner or operator uses rock rip-rap for armoring, it shall be well-graded, durable, sized to withstand wave action, and placed on a well-graded pervious sand and gravel bedding or

geotextile with filtering capacity appropriate for the site.

- e. The minimum width of the top of a CCR surface impoundment embankment is equal to the structural height of the CCR surface impoundment divided by 5 plus an additional 5 feet. The required minimum width for any CCR surface impoundment embankment is 12 feet. The maximum width for any CCR surface impoundment embankment is 25 feet.

- D. The requirements in this Section are based on Arizona dam safety standards additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:
  1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
  2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or
  3. CCR surface impoundments with a maximum height greater than 25 feet and a storage capacity of 15 acre-feet or less.

    - a. Sliding of upstream or downstream slopes or abutments contiguous to the CCR surface impoundment;
    - b. Sudden subsidence of the top of the CCR surface impoundment;
    - c. Longitudinal or transverse cracking of the top of the CCR surface impoundment;
    - d. Unusual release of water from the downstream slope or face of the CCR surface impoundment;
    - e. Other unusual conditions at the downstream slope of the CCR surface impoundment;

- f. Significant landslides in the reservoir area;
  - g. Increasing volume of seepage;

The owner shall incorporate appropriate recommendations generated by the reviews and submit the revised emergency action plan to the Department.
  6. Be reviewed and updated, at a minimum, every year to ensure the information is accurate and to incorporate changes such as new personnel, changing roles of emergency agencies, emergency response resources, conditions of the surface impoundment and information learned from mock exercises. The owner shall send updated portions of the plan to persons and agencies holding copies of the plan within 15 days after preparation of an update. The updated plan shall be placed in the facility's operating record as required by § 257.105(f)(6).
  7. Notwithstanding subsection (6) above, the owner or operator of a CCR surface impoundment may amend the written EAP at any time provided the revised plan is placed in the facility's operating record as required by § 257.105(f)(6). The owner or operator must amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.
  8. Be certified by a qualified professional engineer stating that the written EAP, and any subsequent amendment of the EAP, meets the requirements of this Article.
- B. In addition to the emergency action plan requirements in §§ 257.73(a)(3) and 257.74(a)(3), as incorporated:
    1. The owner or operator shall increase the frequency of observation when the reservoir is full, during heavy rains or flooding, and following an earthquake.
    2. The owner or operator is responsible for the safety of the CCR surface impoundment and shall take action to lower any liquid portion of the reservoir if it appears that the impoundment has weakened or is in danger of failing.
    3. The owner shall report these actions to the Director as

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

- soon as possible, but not later than 12 hours after discovery of the conditions.
4. If CCR surface impoundment failure appears imminent, the owner or operator shall notify the county sheriff, and the Arizona Department of Public Safety or other emergency official immediately.
  5. The owner or operator shall notify the Director immediately of any emergency condition that exists and any emergency action taken.
  6. Emergency actions not impairing the safety of the CCR surface impoundment may be taken before guidance can be provided by an engineer and do not require prior approval of the Director. Emergency actions do not excuse an owner's responsibility to promptly undertake a permanent solution. Emergency actions include:
    - a. Stockpiling materials such as riprap, earth fill, sand, sandbags, and plastic sheeting.
    - b. Lowering the reservoir level by making releases through the outlet or a gated spillway, by pumping, or by siphoning.
    - c. Armoring eroded areas by placing sandbags, riprap, plastic sheeting, or other available material.
    - d. Plugging leakage entrances on the upstream slope.
    - e. Increasing freeboard by placing sandbags or temporary earth fill on the CCR surface impoundment.
    - f. Diverting flood waters to prevent them from entering the reservoir basin.
    - g. Constructing training berms to control flood waters.
    - h. Placing sandbag ring dikes or reverse filter materials around boils at the downstream toe to provide back pressure.
    - i. Removing obstructions from outlet or spillway flow areas.
  7. Emergency actions impairing the safety of the CCR surface impoundment require prior approval of the Director. An owner shall not lower the water level by excavating the spillway or embankment unless failure is imminent.
  8. The Director shall issue an emergency approval to repair, alter, or remove an existing CCR surface impoundment if the Director finds that immediate remedial action is necessary to alleviate an imminent threat to human life or property.
    - a. The emergency approval shall be provided in writing.
    - b. The emergency approval may contain conditions the Director determines are appropriate to protect human life or property.
    - c. The emergency approval is effective immediately for 30 days after notice is issued unless extended in writing by the Director. The Director shall also send notice to the county flood control district of the county in which the CCR surface impoundment is located, all municipalities within five miles downstream of the CCR surface impoundment, and any additional persons identified in the emergency action plan.
    - d. The Director may institute legal or administrative proceedings that the Director deems appropriate for violations of the emergency approval or conditions of the emergency approval.
    - e. After the Director issues an emergency approval, the Department shall post information related to the approval on the Department's CCR website as soon as practicable.
  - C. The requirements in this Section are based on Arizona dam safety standards additional to those in 40 CFR 257, subpart D, as incorporated in this Article, and do not apply to:
    1. CCR surface impoundments with a maximum height of less than 6 feet, regardless of storage capacity;
    2. CCR surface impoundments with a maximum height of between 6 and 25 feet and a storage capacity of less than 50 acre-feet; or

1363 (April 25, 2025), effective date June 1, 2025 (Supp. 25-2).

**R18-13-1004. Operating Criteria**

- A. 40 CFR 257.80 through 40 CFR 257.84, revised as of December 14, 2020 (and no future editions) are incorporated by reference, modified by the following subsections, and on file with ADEQ:
  - B. 40 CFR 257.82(a)(3) is amended as follows: "(3) The inflow design flood is:
    - (i) For a high hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the probable maximum flood;
    - (ii) For a significant hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 1,000-year flood [or, for new impoundments and lateral expansions, 0.5 PMF, whichever is greater];
    - (iii) For a low hazard potential CCR surface impoundment, as determined under § 257.73(a)(2) or § 257.74(a)(2), the 100-year flood [or, for new impoundments and lateral expansions, 0.25 PMF, whichever is greater]; or
    - (iv) For an incised CCR surface impoundment, the 25-year flood."
- C. In addition to the requirements in 40 CFR 257.82(a), the following requirements are added:
  1. Inflow Design Flood Requirements. For new impoundments and lateral expansions, an owner or operator shall ensure that the total freeboard is the largest of the following:
    - a. The sum of the inflow design flood maximum water depth above the spillway crest plus wave run up.
    - b. The sum of the inflow design flood maximum water depth above the spillway crest plus 3 feet.
    - c. A minimum of 5 feet.
  2. Surface Impoundment Site and Reservoir Area Requirements
    - a. An owner or operator shall demonstrate that reservoir storage during the inflow design flood will not result in incremental adverse consequences during the inflow design flood. In determining whether a discharge will result in incremental adverse consequences, the Director shall evaluate whether the owner or operator has taken any or all of the following actions: issuing public notice to upstream affected property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flood easements or other acquisitions of real property, or

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

other actions appropriate to safeguard the CCR surface impoundment site and reservoir.

- b. The owner or operator shall clear the reservoir storage area of debris.
- c. The owner or operator shall place borrow areas a safe distance from the upstream toe and the downstream toe of the CCR surface impoundment to prevent a piping failure of the CCR surface impoundment.
- d. The owner or operator shall keep the top of the CCR surface impoundment and appurtenant structures accessible by equipment and vehicles for emergency operations and maintenance.

**D.** In addition to the requirements in 40 CFR 257.82(b), the following requirement are added:

**1.** Emergency Spillway Requirements. An owner or operator of a new CCR surface impoundment with emergency spillways or a lateral expansion of a CCR surface impoundment with emergency spillways shall:

- a. Construct each spillway in a manner that avoids flooding in excess of the flooding that would have occurred in the same location under the same conditions before construction. The owner or operator of a CCR surface impoundment shall demonstrate that a spillway discharge would not result in incremental adverse consequences. In determining whether a spillway discharge of a CCR surface impoundment would result in incremental adverse consequences, the Director shall evaluate whether the owner or operator has taken any or all of the following actions: issuing public notice to downstream property owners, complying with flood insurance requirements, adopting emergency action plans, conducting mock flood drills, acquiring flow easements or other acquisitions of real property, or other actions appropriate to safeguard the CCR surface impoundment site and flood channel.
- b. Include a control structure to avoid head cutting and lowering of the spillway crest for spillways excavated in soils or soft rock. In the alternative, the design may provide evidence acceptable to the Director that erosion during the inflow design flood will not result in a sudden release of the reservoir.
- c. Provide each spillway and channel with a minimum width of 10 feet and suitable armor to prevent erosion during the discharge resulting from the inflow design flood.
- d. Ensure that downstream spillway channel flows do not encroach on the CCR surface impoundment unless suitable erosion protection is constructed.
- e. Not construct bridges or fences across a spillway unless the construction is approved as part of the CCR facility permit. The CCR facility permit may include conditions regarding the design and operation of the spillway and fencing, based on safety concerns.
- f. Not use a pipe or culvert as an emergency spillway unless specifically approved in the CCR facility permit following review of the CCR surface impoundment design and site characteristics.

**2.** Outlet Works Requirements. An owner or operator shall ensure that a CCR surface impoundment that has outlet works has a low-level outlet works that:

- a. Is capable of draining the reservoir to the sediment pool level or CCR surface. A low-level outlet works for a high or significant hazard potential CCR surface impoundment shall be a minimum of 36 inches in diameter. A low-level outlet works for a low hazard potential CCR surface impoundment shall be a minimum of 18 inches in diameter.
- b. Has a filter diaphragm or other current practice measures to reduce the potential for piping along the conduit.
- c. Has accessible outlet controls when the spillway is in use.
- d. Has an emergency manual override system or can be operated manually.
- e. Is constructed of materials appropriate for loading condition, seismic forces, thermal expansion, cavitation, corrosion, and potential abrasion. The owner or operator shall not use corrugated metal pipes or other thin-walled pipes except as a form for a cast-in-place concrete conduit. The owner or operator shall construct outlet conduits of cast-in-place reinforced concrete. The owner or operator shall design each outlet to maintain water tightness. The owner or operator shall construct each outlet to prevent the occurrence of piping adjacent to the outlet.
- f. Has an operating or guard gate on the upstream end of any gated outlet.
- g. Has an outlet conduit near the base of one of the abutments on native bedrock or other competent material. The entire length of the conduit shall be supported on foundation materials of uniform density and consistency to prevent adverse differential settlement.
- h. Has an upstream valve or gate capable of controlling the discharge through all ranges of flow on any gated outlet conduit.
- i. Has a trashrack designed for a minimum of 25% of the reservoir head to which it would be subjected if completely clogged at the upstream end of the outlet.
- j. Has an outlet conduit designed for internal pressure equal to the full reservoir head and for superimposed embankment loads, acting separately.

**E.** 40 CFR 257.83(a)(1)(i) is amended to read: "At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit. [The owner or operator shall increase the frequency of observation when the reservoir is full, during heavy rains or flooding, and following an earthquake.]"

**F.** 40 CFR 257.83, titled "Inspection requirements for CCR surface impoundments", subsection (b)(1) is amended to read: "If the existing or new CCR surface impoundment or any lateral expansion of the CCR surface impoundment is subject to the periodic structural stability assessment requirements under § 257.73(d) or § 257.74(d), the CCR unit must additionally be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. [The owner or operator shall notify the Director and submit a written summary of the engineer's qualifications at least 14 days before the scheduled inspection.] The inspection must, at a minimum, include:"

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

- G.** In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83(b)(1), the following requirements are added:
1. Inspection of any permanent monument or monitoring installations;
  2. Assessment of all parts of the CCR surface impoundment that are related to the CCR surface impoundment's safety; and
  3. A recommendation regarding the safe storage level of the impoundment.
- H.** In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83(b)(5), the owner or operator shall notify the Department within 24 hours and in writing within five days if a deficiency or release could result in harm to human health or the environment or has resulted in a release. The owner or operator shall notify the Department in writing within 14 days of all other deficiencies under 40 CFR 257.83(b)(5).
- I.** In addition to the inspection requirements for CCR surface impoundments in 40 CFR 257.83, the following requirements are added:
1. Notwithstanding 40 CFR 257.73(a)(2)(i) and (ii) and 40 CFR 257.74(a)(2)(i) and (ii), a qualified professional engineer shall review the hazard potential classification of each CCR surface impoundment during each subsequent inspection under § 257.83(b)(4)(i) and revise the classification in accordance with current conditions.]
  2. Maintenance and Repair
    - a. An owner shall perform general maintenance and ordinary repairs that do not impair the safety of the CCR surface impoundment. General maintenance and ordinary repair activities listed under this subsection do not require prior approval of the Director. These repair activities include:
      - i. Removing brush or tall weeds.
      - ii. Cutting trees and removing slash from the embankment or spillway. Small stumps may be removed provided no excavation into the embankment occurs.
      - iii. Exterminating rodents by trapping or other methods. Rodent damage may be repaired provided it does not involve excavation that extends more than 2 feet into the embankment and replacement materials are compacted as they are placed.
      - iv. Repairing erosion gullies less than 2 feet deep on the embankment or in the spillway.
      - v. Grading the surface on the top of the CCR surface impoundment embankment or spillway to eliminate potholes and provide proper drainage, provided the freeboard is not reduced.
      - vi. Placing additional riprap and bedding on the upstream slope, or in the spillway in areas that have sustained minor damage and restoring the original riprap protection where the damage has not yet resulted in erosion and weakening of the CCR surface impoundment.
      - vii. Painting, caulking, or lubricating metal structures.

**R18-13-1011. Permit Contents**

- A.** Standard permit conditions for CCR facility permits. The following conditions shall be incorporated into all CCR facility permits either expressly or by reference. If incorporated by reference, a specific citation to these regulations shall be provided in the permit.
- 1. Duty to comply. The owner or operator shall comply with all conditions of this CCR facility permit, except to the extent and for the duration any noncompliance is authorized by the Director. Any unauthorized permit noncompliance constitutes a violation of this Article and is subject to enforcement action, permit termination, or denial of a permit application.
  - 2. Duty to reapply. If the owner or operator wishes to continue an activity regulated by this permit after the expiration date of the permit, the owner or operator shall apply for and obtain a new permit.
  - 3. Need to halt or reduce activity not a defense. It shall not be a defense for an owner or operator in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
  - 4. Requirement to mitigate impacts of noncompliance. In the event of noncompliance with this permit, the owner or operator shall take all reasonable steps to minimize releases to the environment and shall carry out such measures as necessary to reduce reasonable probability of adverse impacts on health and the environment.
  - 5. New statutory requirements or regulations. If the standards or regulations on which this permit is based change through changes to statute, promulgation of new or amended regulations, or by judicial decision, and this results in failure of the permit terms and conditions to ensure compliance with the revised standard or regulation, the owner or operator shall apply for a permit modification. The owner or operator shall submit an application to modify this permit to include the revised requirements within 180 days after the change becomes effective.
  - 6. Proper operation and maintenance. The owner or operator shall ensure the proper operation and maintenance of all units, appurtenant structures, ancillary equipment and systems of treatment and control, which are installed or used to achieve compliance with the conditions of this permit. Failure to properly operate and maintain such equipment or structures does not excuse failure to comply with requirements in this permit. The term "Proper operation and maintenance" includes effective performance, adequate funding, adequate staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures. Operation of back-up or auxiliary equipment or similar systems is required only when necessary to achieve compliance with the conditions of this permit.
  - 7. Permit actions. This permit may be modified, or terminated for cause. The application by the owner or operator for a permit modification, or termination, or anticipated noncompliance, does not stay any permit condition.
  - 8. Property rights. The permit does not convey any property rights of any sort, nor any exclusive privilege.
  - 9. Duty to provide information. The owner or operator shall furnish to the Director, within a reasonable time, any relevant information which the Director may request to determine whether cause exists for modifying, or terminating this permit, or to determine compliance with this permit. The owner or operator shall also furnish to the Director, upon request, copies of records required to be kept by this permit.
  - 10. Inspection and entry. The owner or operator shall allow the Director or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:
    - a. Enter at reasonable times upon the permitted premises where a regulated unit or activity is located or conducted, or where records that must be kept under the conditions of this permit are located;
    - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
    - c. Inspect at reasonable times any units, appurtenant structures, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and
    - d. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by this Article, any substances or parameters at any location.
  - 11. Monitoring and records.
    - a. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
    - b. The owner or operator shall retain records of all monitoring information, including all calibration,

## TITLE 18. ENVIRONMENTAL QUALITY

- maintenance, and quality assurance records; all original monitoring data; copies of all reports and certifications required by this permit; and records of all data for a period of at least ten years from the date of the sample, measurement, report, certification, or application. This period may be extended by request of the Director at any time. The owner or operator shall maintain records and data used to support a permit application for the lifetime of the permit. The owner or operator shall maintain records of all groundwater monitoring, including records of groundwater well construction and groundwater elevation measurements, throughout the active life of the unit, the post-closure care period and until completion of all corrective action.
12. Signatory requirements. All applications, reports, or information required to be submitted to the Director by this permit shall be signed and certified by each owner and operator of a CCR unit unless an agreement is provided to the Director that one owner or operator is certifying for the rest.
  13. Reporting requirements.
    - a. Anticipated noncompliance. The owner or operator shall provide written or electronic notice to the Director as soon as possible, but no later than 60 days in advance of any planned changes in the permitted facility or activity which may result in non-compliance with permit requirements.
    - b. The owner or operator shall report to the Department by phone or electronically any noncompliance or release which has a reasonable probability of adverse effects on health or the environment as soon as possible, and no later than 24 hours after the time the owner or operator first becomes aware of the circumstances. The notification shall include the following:
      - i. Information concerning release of any CCR that may endanger public drinking water supplies.
      - ii. Any information about a release of CCR that could have a reasonable probability of adverse effects on health or the environment outside the facility.
      - iii. The description of the release and its cause shall include:
        - (1) Name, business address, business email address, and business telephone number of the owner and operator;
        - (2) Name, address, email address, and telephone number of the facility;
        - (3) Date, time, and type of release;
        - (4) Name and quantity of material or materials involved;
        - (5) The extent of injuries, if any;
        - (6) An assessment of actual or potential hazards to the environment and human health outside the facility, where applicable;
        - (7) Estimated quantity and disposition of recovered material that resulted from the release; and
        - (8) Action taken to mitigate the risk, including any preparation in advance of a severe weather event
    - iv. A narrative shall also be posted on the facility CCR website no later than five days after the time the owner or operator becomes aware of the circumstances. The narrative shall contain a description of the noncompliance and its cause; the period of noncompliance including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance. The Director may waive the five-day notice requirement in favor of posting a written report within fifteen days.
    - c. Where the owner or operator becomes aware that they failed to submit any relevant facts in a permit application or submitted incorrect information in a permit application or in any report to the Director, the owner or operator shall promptly submit such facts or corrected information to the Director.
  14. Severability. Invalidation of a portion of this permit does not necessarily render the whole permit invalid. ADEQ intends that this permit remains in effect to the extent possible. In the event that any part of this permit is invalidated, the Director will advise the owner or operator as to the effect of such invalidation.
- B.** In addition to the standard conditions in subsection (A), the Director shall establish permit terms and conditions in a CCR facility permit, on a case-by-case basis, in accordance with the requirements and procedures of A.R.S. Title 49, Chapter 4 and this Article. At a minimum, each CCR facility permit shall include all permit terms and conditions necessary to ensure compliance with A.R.S. Title 49, Chapter 4 and this Article.
  - C.** Each CCR facility permit shall contain, either expressly or by reference, all requirements of this Article that are applicable to the permitted CCR units and CCR-associated solid waste management activities at the facility. In satisfying this provision, the Director may incorporate the applicable requirements directly into terms and conditions in the permit or incorporate them by reference. If incorporated by reference, a specific citation to the applicable regulations or requirements shall be provided in the permit.
  - D.** Protectiveness. Each CCR facility permit shall contain such terms and conditions as the Director determines are necessary to ensure there is no reasonable probability of adverse effects on safety, health or the environment from the solid waste management of CCR at the facility.
  - E.** The owner or operator of a CCR surface impoundment shall install, maintain, and monitor instrumentation to evaluate the performance of the CCR surface impoundment. The Director shall require site-specific instrumentation that the Director deems necessary for monitoring the safety of the CCR surface impoundment when failure may endanger human life and property. Conditions that may require monitoring include land subsidence, earth fissures, embankment cracking, phreatic surface, seepage, and embankment movements.
  - F.** The permit shall contain a safe storage level for each CCR surface impoundment.
  - G.** A CCR facility permit is issued for a fixed term of ten years. The term of a permit shall not be extended by modification of the permit beyond the maximum duration specified in this subsection.

**R18-13-1012. Compliance Schedules**

- A.** The Director may include compliance schedules in the CCR facility permit according to subsection (B) or (C), or both.
- B.** The owner or operator shall follow a timeline for future compliance, if established in the CCR facility permit, that provides for action from the owner or operator that is not required until after the date of permit issuance. The timeline shall establish dates for their achievement.
  - 1. If the time necessary for completion of an interim requirement is more than one year and is not readily divisible into stages for completion, the permit shall contain interim dates for submission of reports on progress toward completion of the interim requirement and shall indicate a projected completion date.
  - 2. Unless otherwise specified in the permit, within 30 days after the applicable date specified in a compliance schedule, the owner or operator shall submit to the Department a report documenting that the required action was taken within the time specified.
- C.** When an owner or operator that has applied for a CCR facility permit will not be in compliance with one or more applicable requirements in A.R.S. Title 49, Chapter 4, or this Article at the time of permit issuance, the Director may include in the CCR facility permit a schedule of compliance. The schedule of compliance shall include an enforceable sequence of actions leading to compliance. This schedule of compliance shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the owner or operator is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements in A.R.S. Title 49, Chapter 4 or this Article on which it is based.
  - 1. Time for compliance. Any schedule of compliance established in a CCR facility permit under subsection (C) shall require compliance as soon as feasible.
  - 2. Interim dates. If a permit establishes a schedule of compliance which exceeds one year from the date of permit issuance, the schedule shall set forth interim requirements and the dates for their achievement.
    - a. The time between interim dates shall not exceed one year.
    - b. The permit shall require posting on the facility's CCR website of reports of progress toward completion of the interim requirements and indicate a projected completion date. The time between progress reports shall not exceed six months.
  - 3. Reporting. The permit shall require that, no later than 30 days following each interim milestone deadline and the final deadline of the schedule of compliance, the owner or operator shall submit a report to the Director documenting that the required action was taken within the time specified and shall post a notification on the facility's CCR website of its compliance or noncompliance with the interim or final requirement.
- D.** After reviewing the activity pursuant to any schedule established under this Section, the Director may modify the CCR facility permit, based on changed circumstances relating to the required action.

**Historical Note**

New Section made by final rulemaking at 31 A.A.R. 1363 (April 25, 2025), effective date June 1, 2025 (Supp. 25-2).

**R18-13-1013. CCR Facility Permit Issuance or Denial**

- A.** The Director shall issue CCR facility permits after CCR program approval, based upon the information obtained by or made available to the Department, if the Director determines that the permit requires the owner or operator to comply with A.R.S. Title 49, Chapter 4, this Article and Article 17. The procedures in this Article related to permit applications are applicable before CCR program approval, except that the licensing time frames requirements of 18 A.A.C. 1 do not apply until CCR program approval.
- B.** The Director shall provide the owner or operator with written notification of the final decision to grant or deny the permit within the applicable licensing time frames requirements and include the following:
  - 1. The owner or operator's right to appeal the final permit determination, including the number of days the owner or operator has to file an appeal and the name and telephone number of the Department contact person who can answer questions regarding the appeals process;
  - 2. If the permit is denied, the reason for the denial with reference to the statute or rule on which the denial is based; and
  - 3. The owner or operator's right to request an informal settlement conference under A.R.S. §§ 41-1092.03(A) and 41-1092.06.
- C.** The Director may deny a CCR facility permit if the Director determines upon completion of the application process that the owner or operator has:
  - 1. Failed or refused to correct a deficiency in the CCR facility permit application;
  - 2. Failed to demonstrate that the CCR units and their operation will comply with the requirements of A.R.S. Title 49, Chapter 4 and this Article. The Director shall base this determination on:
    - a. The information submitted in the CCR facility permit application,
    - b. Any information submitted to the Department following a public hearing, or
    - c. Any relevant information that is developed or acquired by the Department; or
  - 3. Provided false or misleading information.

**R18-13-1015. CCR Permit Termination**

The Director may, after notice and opportunity for a hearing, terminate a CCR facility permit for any of the following causes:

1. Significant noncompliance by the owner or operator with the permit;
2. Failure by the owner or operator in the permit application or during the permit issuance process to fully disclose all relevant facts;
3. Misrepresentation by the owner or operator of any relevant facts at any time;
4. A determination by the Director that the permit fails to ensure there is no reasonable probability of adverse effects to health or the environment and the permitted activity can only be regulated to acceptable levels by permit termination; and
5. The Director has determined that all permitted activities have ceased and the owner or operator has completed closure, the required post-closure care and any required corrective action.

**R18-13-1017. Modification of a CCR Facility Permit**

- A. The Director may modify a CCR facility permit upon the request of the facility owner or operator or upon the Director's initiative.
  1. The owner or operator may submit a request for CCR facility permit modification in writing on a form provided by the Department with the applicable fee established in R18-13-1021, explaining the facts and reasons justifying the request.
  2. The Department may modify a permit, classify the modification, and collect the appropriate fee if:
    - a. There are alterations, additions, or changes in the operation or condition of the permitted facility which occurred after permit issuance and require permit conditions or terms that are different or absent from those in the existing permit;
    - b. The Director has received new information after the permit has been issued that:
      - i. Was not available to the Director at the time of permit issuance (other than revised regulations, guidance, or test methods) and would have justified the inclusion of different permit conditions at the time of issuance to ensure compliance with A.R.S. ## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

- A. A generator of shredder residue shall follow sampling protocol as follows or submit to the Department for review and approval, at least two weeks prior to the sampling event, an alternative written sampling plan which is consistent with requirements set forth in "Test Methods for Evaluating Solid Waste," EPA SW-846, 3rd Edition, Volume II, Chapter Nine, Sampling Plan, Physical/Chemical Method, EPA, Office of Solid Waste and Emergency Response, Washington, D.C., September 1986, and updated November 1990, and no future editions or amendments, ("EPA Sampling Plan"), herein incorporated by reference and on file with the Department and the Office of the Secretary of State:
1. Sample collection shall be done in accordance with one of the following:
    - a. Sampling procedure 1, consisting of both of the following steps:
      - i. The generator shall collect samples from a shredder residue sampling pile which shall consist of the average amount of shredder residue from eight hours of operation of the shredder. The shredder residue sampling pile shall be formed into a square shape for sampling purposes. Refer to Exhibit 1.
      - ii. One 2,000-gram sample shall be collected from each sample point as indicated in Exhibit 1. Samples from sample points A-1, B-1, and C-1 shall be collected from the top of the pile. Samples from sample points A-2, B-2, and C-2 shall be collected from the base of the pile. A sample from sample point C-3 shall be collected at the vertical midpoint at the center of the pile. The seven 2,000-gram samples shall be numbered consecutively. Three of the seven 2,000-gram samples shall then be chosen at random by selecting numbers from a calculator programmed to generate random numbers. The samples shall be analyzed for the constituents and at the frequencies listed in Table A of this Section.
    - b. Sampling procedure 2, consisting of both of the following steps:
      - i. The generator shall collect seven 2,000-gram samples during or immediately following the normal generation of shredder residue. For each sample, shredder residue shall be collected for 8 to 12 minutes, during which a minimum of 500 pounds shall be generated. This process shall be performed seven times to create seven 500-pound amounts. Each 500-pound amount shall be formed into a square shape for sampling purposes. Refer to Exhibit 1.
      - ii. Twenty 100-gram samples shall be collected from throughout each of the seven 500-pound piles generated. Upon completion of collection, all 20 samples from each of the seven 500-pound piles shall be combined together into seven separate 2,000-gram samples and numbered consecutively. Three of the seven 2,000-gram samples shall then be chosen at random by selecting numbers from a calculator programmed to generate random numbers. The samples shall be analyzed for the constituents and at the frequencies listed in Table A of this Section.
  2. Each 2,000 grams of shredder residue collected shall include both large and small particles, in proportion to shredder residue generated. The generator shall use a container which is large enough to hold the entire amount of shredder residue collected from each sample point.
  3. The generator shall comply with requirements for sample preservation, temperature, and holding times, as set forth in the EPA Sampling Plan.
  4. Each one of the three 2,000-gram samples selected at random shall be divided into four equal 500-gram portions and a 200-gram subsample shall be taken from each of the four equal 500-gram portions. Each subsample shall then be passed through a 9.5mm screen. All particles which do not pass through the 9.5mm screen shall be hand cut until small enough to pass through the screen. All four 200-gram subsamples shall then be remixed together and redivided into four equal 200-gram portions. The following amounts shall be taken for constituent sampling:
    - a. 10-15 grams per 200-gram subsample for a total of 40-60 grams per 2,000-gram sample for Polychlorinated Biphenyls (PCB) analysis as set forth in subsection (A)(10).
    - b. 25 grams per 200-gram subsample for a total of 100 grams per sample for toxicity characteristic leaching procedure extractions for contaminants as set forth in 40 CFR 261.24, Table 1 (incorporated by reference in R18-8-261(A)), as set forth in subsection (A)(7).
    - c. 1.25 grams per 200-gram subsample for a total of 5 grams per 2,000-gram sample for extraction fluid determination.
  5. Each constituent sample shall be put into a container. Container labeling and chain-of-custody documentation shall be consistent with the requirements in the EPA Sampling Plan.
  6. The constituent samples shall be analyzed by a laboratory licensed by the Arizona Department of Health Services in accordance with A.R.S. § 36-495.
  7. Of the three samples selected at random, one sample amount required by subsection (A)(4)(b) shall be analyzed for the extractable heavy metals arsenic, barium, cadmium, chromium, lead, mercury, selenium, and silver, as set forth in 40 CFR 261.24, Table 1. The remaining two samples shall each be analyzed for extractable cadmium and lead.
  8. If the results of all three of the analyses for any extractable heavy metal in subsection (A)(7) are below the Regulatory Level of the Maximum Concentration of Contaminants for the Toxicity Characteristic as set forth in 40 CFR 261.24, Table 1, the simple arithmetic mean of the extractable cadmium and lead and the single analysis for the remaining six extractable heavy metals shall be used to determine if the sampled shredder residue will be classified as hazardous waste.
  9. If the analyses of any one of three selected samples exceeds the regulatory level as set forth in 40 CFR 261.24, Table 1, an additional subsample from the sample in question shall be subjected to confirmation analysis. If the confirmation sample analysis totals are in excess of the regulatory level as set forth in 40 CFR 261.24, Table 1, the remaining four of the original seven samples shall be analyzed for those extractable heavy metals which exceed the regulatory level as set forth in 40 CFR 261.24,

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

Table 1. The simple arithmetic mean of the results of all seven samples shall be used to determine if the sampled shredder residue will be classified as hazardous waste.

10. The three samples selected at random shall be analyzed for PCB concentration in the amounts required by subsection (A)(4)(a). If the samples contain concentrations of PCB less than 50 mg/kg, the simple arithmetic mean of the three samples shall be used for reporting to the Director. If any one of the three samples contains concentrations of PCB greater than 50 mg/kg, an additional subsample from the sample in question shall be subjected to confirmation analysis. If the PCB concentration for that sample exceeds 50 mg/kg, the remaining four of the original seven samples shall be analyzed for PCB, in amounts required by subsection (A)(4)(a), and the simple arithmetic mean of all the samples shall be used to determine if the sampled shredder residue will be classified as hazardous waste.
- B. Shredder residue determined to be hazardous waste shall be managed in accordance with A.R.S. § 49-921 et seq. and R18-8-260 et seq.
- C. The generator shall do all of the following:
  1. Secure the facility to prevent unauthorized entry;
  2. Cover or otherwise manage the shredder residue pile to prevent wind dispersal;
  3. Place the shredder residue pile on a surface with a permeability coefficient equal to or less than  $1 \times 10^{-7}$  cm/s;
  4. Design, construct, operate, and maintain a run-on control system capable of preventing flow onto the waste pile during peak discharge from, at a minimum, a 25-year storm;
  5. Design, construct, operate, and maintain a run-off management system to collect and control at a minimum, the water volume resulting from a 24-hour, 25-year storm;
  6. Provide collection and holding facilities for run-on and run-off control systems, which shall have a permeability coefficient equal to or less than  $1 \times 10^{-7}$  cm/s;
  7. Record the date accumulation of shredder residue begins.
- D. Shredder residue shall be treated, recycled, sorted, stored, or disposed at a Department-approved special waste facility approved in accordance with A.R.S. § 49-857. A facility which seeks to become a special waste facility shall submit a special waste management plan to the Department to ensure compliance with subsection (C).
- E. A generator shall not store shredder residue for longer than 90 days. A special waste facility shall not store shredder residue for longer than one year.
- F. Shredder residue which has been determined to be nonhazardous pursuant to this Section shall be transported in accordance with the requirements for transportation of garbage as set forth in R18-13-310.
- G. The owner or operator of a special waste facility shall pay, to the Department, the fees required by A.R.S. §§ 49-855(C)(2) and 49-863 as follows:
  1. \$6.68 per ton of shredder residue received; and
  2. Not more than \$66,835.67 per generator site per year for shredder residue that is transported to a facility regulated by the Department for treatment, storage or disposal.
- H. Beginning July 1, 2026, the Director shall adjust the fee amounts in subsection (G) of this Section annually by the following method, except that no adjustment in any year shall exceed four percent of the fee amount of the preceding year:
  1. Multiply the amount by the October CPI for the most recent year and then divide by the October CPI for the

year 2024. The October CPI for any year is the Consumer Price Index for All Urban Consumers, Phoenix-Mesa-Scottsdale, AZ, all items, published by the United States Department of Labor at [www.bls.gov/cpi/regional-resources.htm](http://www.bls.gov/cpi/regional-resources.htm), for October of that year.

2. Round the result from subsection (H)(1) down to the nearest cent. ADEQ shall post the new amounts on its webpage and install them in the billing software as soon as practicable.

Human blood and blood products: Discarded products and materials that are saturated and/or dripping with human blood or caked with dried human blood, including items that would release blood in a liquid or semi-liquid form if compressed or broken, and items that contain serum, plasma, and other blood components. An item would be considered caked if it could release flakes or particles when handled.
  - c. Human pathological wastes: Discarded organs, tissues, and body parts, including cerebrospinal fluid,

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

- synovial fluid, pleural fluid, peritoneal fluid, pericardial fluid and amniotic fluid, removed during surgery or other medical procedures, including autopsy, obstetrics, or emergency care. Human pathological wastes do not include the head, spinal column, hair, nails, or teeth.
- d. Medical sharps: Discarded sharps that pose a stick hazard that have come into contact with blood, blood products, or pathological waste. Examples include hypodermic needles; scalpel blades; and needles attached to tubing or syringes.

**R18-13-1415. Treatment Standards, Quantification of Microbial Inactivation and Efficacy Testing Protocols**

- A. A treater using an alternative treatment technology shall ensure that treatment achieves either of the following treatment standards:
1. A 6  $\log_{10}$  inactivation in the concentration of vegetative microorganisms.
  2. A 4  $\log_{10}$  inactivation in the concentration of *Bacillus stearothermophilus* or *Bacillus subtilis* as is appropriate to the technology.
- B. A treater utilizing an alternative treatment method shall conduct efficacy studies to demonstrate that the treatment mechanisms are capable of achieving the standards in subsection (A) through either of the following:
1. Mycobacterial species used as indicators of vegetative microorganisms:
    - a. *Mycobacterium phlei*, or
    - b. *Mycobacterium bovis* (BOG) (ATCC 35743)
  2. Spore suspensions of one of the following two bacterial species, as appropriate to the technology, used as biological indicators in efficacy tests of thermal, chemical, and irradiation treatment systems. Studies shall demonstrate a 4  $\log_{10}$  reduction in the concentration of viable spores, through the use of an initial inoculum suspension of 5  $\log_{10}$  or greater of:
    - a. *Bacillus stearothermophilus* (ATCC 7953), or
    - b. *Bacillus subtilis* (ATCC 19659).
- C. A treater utilizing an alternative treatment method shall quantify microbial inactivation as follows:
1. Microbial inactivation, or “kill” efficacy is equated to “ $\log_{10}$  Kill” that is defined as the difference between the logarithms of the number of viable test microorganisms before and after treatment. This definition is stated as:  
 $\log_{10}\text{Kill} = \log_{10}(\text{cfu/g “I”}) - \log_{10}(\text{cfu/g “R”})$   
 where:  
 $\log_{10}\text{Kill}$  is equivalent to the term  $\log_{10}$  reduction,  
 “I” is the number of viable test microorganisms introduced into the treatment unit,  
 “R” is the number of viable test microorganisms recovered from the treatment unit, and  
 “cfu/g” are colony forming units per gram of waste solids.
  2. For those treatment processes that can maintain the integrity of the biological indicator carrier of the desired microbiological test strain, biological indicators of the

required strain and concentration may be used to demonstrate microbial inactivation. Quantification is evaluated by growth or no growth of the cultured biological indicator.

3. For those treatment mechanisms that cannot ensure or provide integrity of the biological indicator, quantitative measurement of microbial inactivation requires a two-step approach: Step 1 “Control” and Step 2 “Test”. The purpose of Step 1 is to account for the reduction of test microorganisms due to loss by dilution or physical entrapment.
  - a. Step 1:
    - i. Use microbial cultures of a predetermined concentration necessary to ensure a sufficient microbial recovery at the end of this step.
    - ii. Add suspension to a standardized medical waste load that is to be processed under normal operating conditions without the addition of the treatment agent (that is, heat, chemicals).
    - iii. Collect and wash waste samples after processing to recover the biological indicator organisms in the sample.
    - iv. Plate the recovered microorganism suspensions to quantify microbial recovery. The number of viable microorganisms recovered serves as a baseline quantity for comparison to the number of recovered microorganisms from wastes processed with the treatment agent.
    - v. The required number of recovered viable indicator microorganisms from Step 1 must be equal to or greater than the number of microorganisms required to demonstrate the prescribed Log reduction, either a 6  $\log_{10}$  reduction for vegetative microorganisms or a 4  $\log_{10}$  reduction for bacterial spores. This can be defined by the following equation:  
 $\log_{10}\text{RC} = \log_{10}\text{IC} - \log_{10}\text{NR}$   
 or  
 $\log_{10}\text{NR} = \log_{10}\text{IC} - \log_{10}\text{RC}$   
 where:  
 $\log_{10}\text{RC}$  is greater than 6 for vegetative microorganisms and greater than 4 for bacterial spores and where:  
 $\log_{10}\text{RC}$  is the number of viable “control” microorganisms in colony forming units per gram of waste solids recovered in the non-treated, processed waste residue;  
 $\log_{10}\text{IC}$  is the number of viable “control” microorganisms in colony forming units per gram of waste solids introduced into the treatment unit;  
 $\log_{10}\text{NR}$  is the number of “control” microorganisms in colony forming units per gram of waste solids which were not recovered in the non-treated, processed waste residue.  $\log_{10}\text{NR}$  represents an accountability factor for microbial loss.
  - b. Step 2:
    - i. Use microbial cultures of the same concentration as in Step 1.
    - ii. Add suspension to the standardized medical waste load that is to be processed under normal operating conditions with the addition of the treatment agent.

## TITLE 18. ENVIRONMENTAL QUALITY

## CHAPTER 13. DEPARTMENT OF ENVIRONMENTAL QUALITY - SOLID WASTE MANAGEMENT

- iii. Collect and wash waste samples after processing to recover the biological indicator organisms in the sample.
- iv. Plate recovered microorganism suspensions to quantify microbial recovery.
- v. From data collected from Step 1 and Step 2, the level of microbial inactivation, "Log<sub>10</sub> Kill", is calculated by employing the following equation:  

$$\text{Log}_{10}\text{Kill} = \text{Log}_{10}\text{IT} - \text{Log}_{10}\text{NR} - \text{Log}_{10}\text{RT}$$
 where:  
 Log<sub>10</sub>Kill is equivalent to the term Log<sub>10</sub> reduction;  
 Log<sub>10</sub>IT is the number of viable "Test" microorganisms in colony forming units per gram of waste solids introduced into the treatment unit.  

$$\text{Log}_{10}\text{IT} = \text{Log}_{10}\text{IC};$$
  
 Log<sub>10</sub>NR is the number of "Control" microorganisms in colony forming units per gram of waste solids which were not recovered in the non-treated, processed waste residue;  
 Log<sub>10</sub>RT is the number of viable "Test" microorganisms in colony forming units per gram of waste solids recovered in treated, processed waste residue.

- D. A treater shall employ the appropriate methodology to determine efficacy of the treatment technology following the protocols in subsection (C) that are congruent with the treatment method.

**R18-13-1416. Recycled Materials**

- A. Once a generator places biohazardous medical waste in a red bag as required in R18-13-1407, a person shall not remove any of the biohazardous medical waste from the bag until the biohazardous medical waste has been treated as required in R18-13-1415.
- B. A generator of biohazardous medical waste intending to recycle any portion of the biohazardous medical waste shall segregate that portion of biohazardous medical waste from the portion of biohazardous medical waste that will not be recycled. The generator shall do either of the following:

- A. Medical sharps shall be handled as follows:
  - 1. A generator who treats biohazardous medical waste on site shall place medical sharps in a sharps container after rendering them incapable of creating a stick hazard by using an encapsulation agent or any other process that prevents a stick hazard. Medical sharps encapsulated or processed in this manner are considered to be solid waste.
  - 2. A generator who ships biohazardous medical waste off site for treatment shall either:
    - a. Place medical sharps in a medical sharps container and follow the requirements of R18-13-1406, or
    - b. Package and send medical sharps to a treatment facility via a mail-back system as prescribed by the instructions provided by the mail-back system operator. The generator shall retain proof of shipping.
- B. Notwithstanding subsections (A)(1) and (2), the following syringes do not have to be placed in a medical sharps container:
  - 1. Syringes that have never had a needle (sharp) attached.
  - 2. Syringes where a needle or sharp had been attached and has been separated from the syringe so that no stick or puncture hazard remains with the syringe.
- C. Syringes that are exempted by subsections (B)(1) and (2) from being placed in a medical sharps container are not biohazardous.

1. Cultures and stocks shall be incinerated, autoclaved, or treated by an alternative medical waste treatment method that meets the treatment standards set forth in R18-13-1415(A). If cultures and stocks are shipped off site for treatment or disposal, they shall be packaged inside a watertight primary container with absorbent packing materials. The primary container shall be placed inside a watertight secondary inner container that is then placed inside an outer container with sufficient cushioning material to prevent shifting between the secondary inner container and the outer container. If federal or state law prescribes specific requirements for packaging and transporting this waste, the treater shall comply with that law.
  2. Trace chemotherapy waste shall be incinerated or disposed of in either an approved solid waste or hazardous waste disposal facility.
  3. Experimental or research animal waste shall be handled as follows:
    - a. Autoclave bedding on site or package as described in R18-13-1407 for off-site treatment or landfilling.
    - b. Incinerate animal carcasses on site, or if taken off site for treatment, comply with one of the following requirements:
      - i. Package the waste in a leakproof, covered container, label the contents and send to an incinerator or a Department-approved landfill, or
      - ii. If treated by a method other than incineration, pre-process by grinding, then treat by a method that achieves the standards of R18-13-1415(A).
- B.** If a treater uses grinding in combination with another treatment method described in this Article, the treater shall conduct it in a closed system to prevent humans from being exposed to the release of the waste into the environment. If grinding is used for medical sharps, the grinding shall render the medical sharps incapable of creating a stick hazard.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “*Rule*’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2025 is cited as Supp. 25-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. The Office links to these codified Sections in the Table of Contents of this Chapter.

### RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

  - a. Charges or fees customarily received after a loan's closing including prepayment penalties, termination fees, reinvestment fees, late fees, default interest, transfer fees, impound account interest and fees, extension fees, and modification fees. However, extension fees and modification fees are compensation if the lender advances additional funds or increases the credit limit on an open-end mortgage as part of the extension or modification;
  - b. Out-of-pocket expenses paid to independent third parties including appraisal fees, credit report fees, legal fees, document preparation fees, title insurance premiums, recording, filing, and statutory fees, collection fees, servicing fees, escrow fees, and trustee's fees;

- Against a depositor;
- For injury caused by the depositor’s wrongful act, default, fraud, or misrepresentation committed in the course of the depositor’s licensed business activity; and
- Documented by:
  - A certified copy of the complaint in the action;
  - A certified copy of the judgment in the action;

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 4. DEPARTMENT OF INSURANCE AND FINANCIAL INSTITUTIONS - FINANCIAL INSTITUTIONS

- c. A statement that execution of the judgment has not been stayed, or an explanation of the terms and reason for any stay;
  - d. A statement of any amounts recovered on the judgment; and
  - e. A sworn and notarized statement that the claim is true and correct to the best of the claimant's knowledge and belief.
- C. A claimant shall file a claim with the Director, and all required supporting documentation, not more than six months after entry of the judgment asserted in the claim. However, if execution of the asserted judgment is stayed during the first six months after its entry, the claimant may file a verified claim only during the six months after the stay is lifted. The Department shall process a timely-filed verified claim as a request for hearing under A.R.S. § 41-1092.03(B).
- D. The claimant shall notify the depositor of the filing of a verified claim under this Section, and make the depositor a party to all proceedings on the claim. To do so, the claimant shall send the depositor a copy of all documents filed under subsection (B). The claimant shall make this delivery no more than 10 days after the original filing with the Director under subsection (B). The Department considers a proceeding on a verified claim to be a contested case, governed by the provisions of 20 A.A.C. 4, Article 12.
- E. The Director shall, after a hearing, deny a verified claim if the hearing produces evidence of any of the following circumstances:
  - 1. The judgment is not for an injury caused by the depositor and described in subsection (B)(2);
  - 2. The judgment was awarded by default, stipulation, or consent, and no showing is made in the hearing of an injury caused by the depositor and described in subsection (B)(2);
  - 3. The judgment's execution has been stayed for any reason;
  - 4. The judgment was procured through fraud or collusion;
  - 5. The judgment has been satisfied from other sources; or
  - 6. The action that produced the judgment was barred by the applicable statute of limitations at the time it was commenced.
- F. If the Director grants a verified claim, the Director shall do so in the amount of the compensatory damages awarded against the depositor in the judgment, exclusive of:
  - 1. Attorney's fees, and
  - 2. Amounts previously paid on the judgment.
- G. A person injured by a depositor shall give the Director written notice at the time of filing a civil action if the claims alleged could be made as a verified claim under this Section. The written notice shall include a statement of the amount of compensatory damages sought against the depositor. The injured person shall provide further information about the civil action to the Director upon request.
- H. If the Director grants a verified claim under subsection (F), the Director shall authorize the State Treasurer, in writing, to release the deposit to the claimant in the amount stated in subsection (F) if the Director has not received notice of another pending civil action under subsection (G).
- I. If given notice under subsection (G), the Director shall determine whether the deposit is sufficient to satisfy all claims under subsection (F). The Director shall determine award amounts for each claim of which the Director has notice, and authorize payment, as follows:
  - 1. If the deposit is sufficient to satisfy all claims under subsection (F), the Director shall authorize its release as described in subsection (H).
  - 2. If the deposit is not sufficient to satisfy all claims under subsection (F), the Director shall calculate the award on each claim as follows:
    - a. Each granted claim shall receive a pro rata share of the total deposit.
    - b. Each pro rata share shall be a dollar amount calculated by multiplying the total deposit by a fraction.
      - i. The numerator of the fraction is the amount of the Director's award for the verified claim.
      - ii. The denominator of the fraction is the sum of the amount of the Director's award for the verified claim plus the total compensatory damages sought in all other civil actions against the same depositor disclosed to the Director under subsection (G).
    - c. The Director shall authorize the State Treasurer to release the pro rata portion of the deposit calculated for each verified claim.
- J. A depositor or former licensee may request return of its deposit if it substitutes a bond for the deposit, or if its license is surrendered, revoked, or expired, and if all statutory conditions for release of the deposit have been satisfied. The Director shall not release any part of a deposit to a depositor or former licensee until the Director determines whether there are any awards on verified claims unsatisfied because of an apportionment under subsection (I). The Director shall use the deposit amount to pay any unsatisfied portion of those awards. If the deposit amount is not sufficient to pay in full all unsatisfied awards, the Director shall pay the remaining amount of the deposit to claimants in the ratio their awards bear to the total of all awards granted against the deposit.
- K. The court supervising a licensee in receivership may order the release of a deposit to persons injured by conduct described in subsection (B). In that event, the receiver shall deliver a certified copy of the court's order to the Director. The copy may be uncertified if the receiver is the Director or any other officer or agency of the state of Arizona. The Director shall then authorize the State Treasurer, in writing, to release the deposit to the receiver. The receiver shall distribute the deposit as ordered by the receivership court, rather than under this Section.

## PREFACE

Under Arizona law, the Department of State, Office of the Secretary of State (Office), Administrative Rules Division, accepts state agency rule notice and other legal filings and is the publisher of Arizona rules. The Office of the Secretary of State does not interpret or enforce rules in the *Administrative Code*. Questions about rules should be directed to the state agency responsible for the promulgation of the rule.

Scott Cancelosi, Director  
ADMINISTRATIVE RULES DIVISION

### RULES

The definition for a rule is provided for under A.R.S. § 41-1001. “Rule’ means an agency statement of general applicability that implements, interprets, or prescribes law or policy, or describes the procedures or practice requirements of an agency.”

### THE ADMINISTRATIVE CODE

The *Arizona Administrative Code* is where the official rules of the state of Arizona are published. The *Code* is the official codification of rules that govern state agencies, boards, and commissions.

The *Code* is separated by subject into Titles. Titles are divided into Chapters. A Chapter includes state agency rules. Rules in Chapters are divided into Articles, then Sections. The “R” stands for “rule” with a sequential numbering and lettering outline separated into subsections.

Rules are codified quarterly in the *Code*. Supplement release dates are printed on the footers of each Chapter.

First Quarter: January 1 - March 31  
Second Quarter: April 1 - June 30  
Third Quarter: July 1 - September 30  
Fourth Quarter: October 1 - December 31

For example, the first supplement for the first quarter of 2025 is cited as Supp. 25-1. Supplements are traditionally released three to four weeks after the end of the quarter because filings are accepted until the last day of the quarter.

Please note: The Office publishes by Chapter, not by individual rule Section. Therefore there might be only a few Sections codified in each Chapter released in a supplement. The Office links to these codified Sections in the Table of Contents of this Chapter.

### RULE HISTORY

Refer to the HISTORICAL NOTE at the end of each Section for the effective date of a rule. The note also includes the *Register* volume and page number in which the notice was published (A.A.R.) and beginning in supplement 21-4, the date the notice was published in the *Register*.

### AUTHENTICATION OF PDF CODE CHAPTERS

The Office began to authenticate Chapters of the *Code* in Supp. 18-1 to comply with A.R.S. §§ 41-1012(B) and A.R.S. § 41-5505.

A certification verifies the authenticity of each *Code* Chapter posted as it is released by the Office of the Secretary of State. The authenticated pdf of the *Code* includes an integrity mark with a certificate ID. Users should check the validity of the signature, especially if the pdf has been downloaded. If the digital signature is invalid it means the document’s content has been compromised.

### HOW TO USE THE CODE

Rules may be in effect before a supplement is released by the Office. Therefore, the user should refer to issues of the *Arizona Administrative Register* for recent updates to rule Sections.

### ARIZONA REVISED STATUTE REFERENCES

The Arizona Revised Statutes (A.R.S.) are available online at the Legislature’s website, [www.azleg.gov](http://www.azleg.gov). An agency’s authority note to make rules is often included at the beginning of a Chapter. Other Arizona statutes may be referenced in rule under the A.R.S. acronym.

### SESSION LAW REFERENCES

Arizona Session Law references in a Chapter can be found at the Secretary of State’s website, [www.azsos.gov](http://www.azsos.gov) under Services-> Legislative Filings.

### EXEMPTIONS FROM THE APA

It is not uncommon for an agency to be exempt from the steps outlined in the rulemaking process as specified in the Arizona Administrative Procedures Act, also known as the APA (Arizona Revised Statutes, Title 41, Chapter 6, Articles 1 through 10). Other agencies may be given an exemption to certain provisions of the Act.

An agency’s exemption is written in law by the Arizona State Legislature or under a referendum or initiative passed into law by Arizona voters.

When an agency files an exempt rulemaking package with our Office it specifies the law exemption in what is called the preamble of rulemaking. The preamble is published in the *Register* online at [www.azsos.gov/rules](http://www.azsos.gov/rules), click on the *Administrative Register* link.

Editor’s notes at the beginning of a Chapter provide information about rulemaking Sections made by exempt rulemaking. Exempt rulemaking notes are also included in the historical note at the end of a rulemaking Section.

The Office makes a distinction to certain exemptions because some rules are made without receiving input from stakeholders or the public. Other exemptions may require an agency to propose exempt rules at a public hearing.

### PERSONAL USE/COMMERCIAL USE

This Chapter is posted as a public courtesy online, and is for private use only. Those who wish to use the contents for resale or profit should contact the Office about Commercial Use fees. For information on commercial use fees review A.R.S. § 39-121.03 and 1 A.A.C. 1, R1-1-113.

- I. In investigating the circumstances and facts surrounding an employee's report to an employer of a significant exposure under A.R.S. §§ 23-1043.02(C), 23-1043.03(C), and 23-1043.04(C), the employer, or its carrier, or any employees, agents or contractors of either the employer or carrier, shall not disclose to any person, except as authorized or required by law, that the reporting employee, or any witness or alleged source of exposure, may have or did contract the human immunodeficiency virus, acquired immune deficiency syndrome, hepatitis C, methicillin-resistant *Staphylococcus aureus*, spinal meningitis, or tuberculosis. If there is no authorized representative of employees, or if the Compliance Safety and Health Officer is unable to determine with reasonable certainty who is such representative, the Compliance Safety and Health Officer shall consult with a reasonable number of employees concerning matters of safety and health in the workplace.
- C. The representative(s) authorized by employees shall be an employee(s) of the employer. The employee of the division or the commission shall inform the person being interviewed of the person's right to receive a copy of the recorded oral statement within a reasonable time.

**ARTICLE 13. TREATMENT GUIDELINES****R20-5-1301. Adoption and Applicability of the Article**

- A. The Industrial Commission of Arizona (Commission) has adopted the Work Loss Data Institute's *Official Disability Guidelines – Treatment in Workers Compensation* (ODG) as the standard reference for evidence-based medicine used in treating injured workers within the context of Arizona's workers' compensation system. By adopting and referencing the most recent edition (at the time of treatment), and continuously updated Official Disability Guidelines, the Commission can ensure the latest available medical evidence is used in making medical treatment decisions for injured workers.
- B. Until further action of the Commission, the guidelines shall apply to all body parts and conditions.
- C. The Commission may modify or change the applicability of the guidelines as described in subsection (B) if the Commission determines that modification or changing the applicability of the guidelines will: 1) improve medical treatment for injured workers, 2) make treatment and claims processing more efficient and cost effective, and 3) if the Commission's modification expands the applicability of the guidelines, the guidelines adequately cover the relevant body parts or conditions. Before taking action to modify or change the applicability of the guidelines, the Commission shall provide an opportunity for public comment and hold a public hearing. A decision of the Commission under this subsection shall be made by a majority vote of a quorum of Commission members present at a public meeting.
- D. Action taken by the Commission to modify or change the applicability of the guidelines under subsection (C) shall be published in the minutes of the Commission meeting when such action was taken. The minutes of this action shall be published on the Commission's website and shall be available from the Commission upon request.
- E. The guidelines shall apply prospectively. Recommendations provided in the guidelines related to the management of chronic pain and the use of opioids for all stages of pain management shall apply to medical treatment or services occurring on or after October 1, 2016. For purposes of this process, chronic pain shall be defined by the guidelines. Recommendations provided in the guidelines related to all other body parts and conditions shall apply to medical treatment or services occurring on or after October 1, 2018.
- F. This Article applies to all claims filed with the Commission.
- G. This Article only applies to medical treatment and services for body parts and conditions that have been accepted as compensable.
- H. The guidelines are to be used as a tool to support clinical decision making and quality health care delivery to injured employees. The guidelines set forth care that is generally considered reasonable and are presumed correct if the guidelines provide recommendations related to the requested treatment or service. This is a rebuttable presumption and reasonable medical care may include deviations from the guidelines. To support a request to deviate from the guidelines, the provider must produce documentation and justification that demonstrates by a preponderance of credible medical evidence a medical basis for departing from the guidelines. Credible medical evidence may include clinical expertise and judgment.

**INTRODUCTION**

Since 1925, when the Arizona Legislature passed the state's first Workers' Compensation Act ("Act"), the Industrial Commission of Arizona ("Commission") has administered the workers' compensation laws of that Act. The Act includes the authority of the Commission to set a schedule of fees to be charged by healthcare providers attending injured employees (also referred to in this document as "injured worker" or "claimant." A.R.S. § 23-908(B). In 2004, the Act was amended to include the setting of fees for prescription medicines required to treat an injured employee. A.R.S. § 23-908(C). This fee schedule is referred to as the Arizona Physicians' and Pharmaceutical Fee Schedule (Fee Schedule).

Any reference to "healthcare providers" in the Fee Schedule is intended to include all licensed professionals whose scope of practice allows them to legally provide services to injured workers. Any reference to "physician" in relation to workers' compensation cases includes the following: doctors of medicine, doctors of osteopathy, doctors of podiatric medicine, doctors of chiropractic, doctors of naturopathic medicine, certified registered nurse anesthetists, physician assistants and nurse practitioners. Healthcare providers treating employees under industrial coverage are entitled by law to charge according to the schedule of fees adopted by the Commission. Accurate calculation of fees based upon this schedule, the filing of reports and bills for payment, and the use of forms prescribed are essential to timely and correct payment for a provider's services and can be vital in the award of benefits to the injured worker and their dependents.

This Fee Schedule has been updated to incorporate by reference the following:

1. The 2025 Edition of the American Medical Association's *Current Procedural Terminology* (CPT®) publication, including the general guidelines, identifiers, modifiers, and terminology associated with the incorporated codes
2. The 2025 Healthcare Common Procedure Coding System (HCPCS) codes that include procedures, supplies, products, and services published by the Centers for Medicare & Medicaid Services (CMS).
3. The unit values and guidance for consultative, diagnostic, and therapeutic services published in the most recent edition of *Relative Value Guide*, American Society of Anesthesiologists (ASA) <https://www.asahq.org>.

Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS codes and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier, or modifier shall control.

Except as otherwise noted, unit values assigned to the service codes listed in this document are the product of the Industrial Commission of Arizona and are not associated in any way with the American Medical Association, the American Society of Anesthesiologists, the Centers for Medicare and Medicaid Services, or any other entity or organization.

#### A. GENERAL GUIDANCE

1. Reimbursements and billing associated with Pharmaceuticals are found in the Pharmaceutical Fee Schedule Section and HCPCS Guidelines of this document.
2. A CPT code shall be billed when a CPT code exists that accurately describes the service provided. If no CPT code exists that accurately describes the service, a HCPCS code shall be billed. A miscellaneous or unlisted code shall not be used when a specific CPT or HCPCS code exists that describes the service. Reimbursement values for unlisted codes are By Report and the bill must be accompanied by documentation to support the amount billed. Exceptions apply to the following services for which HCPCS codes should be used in place of CPT codes:
  - Drug testing: CPT codes 80320-80377 may not be used to bill for drug testing. HCPCS codes G0480 - G0483 shall be used for definitive drug testing.
3. Except when governed by a separate contract or network that governs fees pursuant to A.R.S. § 23-908(J)(1), this Fee Schedule establishes the maximum reimbursement values for services performed by healthcare providers to injured workers under Arizona's workers' compensation law.
4. If a healthcare provider or insurance carrier is referring an injured worker to a medical specialist for evaluation and/or treatment, the medical specialist's diagnosis becomes the foundational diagnosis for billing purposes.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

5. Routine progress and routine final reports filed by the attending healthcare provider do not ordinarily command a fee.
6. Payment will be made for only one professional visit in any one (1) day except when the submitted report clearly demonstrates the need for the additional visit and fee.
7. Fees for hospital, office, or home visits, subsequent to the initial visit, are not to be added to coded surgical procedures performed on the same day.
8. Routine office treatment principally by injection of drugs, other than antibiotics, requires authorization by the carrier or self-insured employer for each series of ten (10) after the first series of ten (10).
9. Except in emergencies, a carrier must be given notice regarding a consultation and the consultant must provide his/her report to the carrier and the attending healthcare provider within a reasonable period of time to facilitate processing of the claim.
10. The Commission requests that carriers notify attending healthcare providers at the same time the claimant is notified that their claim is closed with or without supportive care. If a claim is approved for reopening, the carrier should also notify the attending healthcare provider of that approval.
11. Missed individual appointments for consultants, without prior notification, will be compensated at 50% of the consultation fee.
12. The Commission will investigate an injured worker's complaint of bad faith/unfair claims processing practices, and if appropriate, impose penalties under A.R.S. § 23-930, in those circumstances where a "peer to peer" review was not conducted by a healthcare provider with appropriate skill, training, and knowledge or where the individual performing the "peer to peer" review was not licensed. The Commission will also investigate an injured workers' complaint of bad faith/unfair claims processing practice, and if appropriate, impose penalties under A.R.S. § 23- 930, for a denial of treatment based on the failure of the treating doctor to participate in a "peer to peer" review, when the treating doctor has not been given reasonable time or opportunity to participate in the "peer to peer" review.
13. As authorized under A.A.C. R20-5-128, the fee for the reproduction of medical records for workers' compensation purposes shall be 25¢ per page and \$10.00 per hour per person for reasonable clerical costs associated with locating and reproducing the documents.
14. Reimbursement values for telehealth services are governed by the Fee Schedule and no reductions are justified unless specified by the Fee Schedule. The performance of telehealth services is governed by Arizona Revised Statutes, Title 36, Chapter 36. Bills for telehealth services shall include modifier -95 and place of service (POS) code according to the incorporated AMA/CMS guidelines. Reimbursement for telehealth services shall be based on the non-facility (NF) rate regardless of the POS code.

15. Healthcare providers shall use the appropriate International Statistical Classification of Disease and Related Health Problems (ICD-10 code(s)) published by the World Health Organization (WHO) to classify and code all diseases, signs, and symptoms, abnormal findings, social circumstances, and external causes of injury and/or disease. Mental health providers shall reference the most recent published version of the Diagnostic and Statistical Manual of Mental Disorder (DSM) published by the American Psychiatric Association to define and classify mental disorders when establishing the appropriate ICD-10 code(s).

## B. PAYMENT AND REVIEW OF BILLINGS

1. Under Arizona workers' compensation law, an insurance carrier, self-insured employer, or their representative is not responsible for payment of a billing for medical, surgical, and hospital benefits that the insurance carrier, employer, or representative received more than twenty-four (24) months from the date that the medical service was rendered, or from the date on which the provider knew or should have known that the service was rendered, whichever occurs later. A subsequent billing or corrective billing does not restart the limitations period. *See A.R.S. § 23-1062.01.*
2. It is incumbent upon the insurance carrier, self-insured employer, and third party processing service to inform all parties, including the Commission, regarding changes in addresses for bill processing locations.
3. Under Arizona workers' compensation law, a healthcare provider is entitled to timely payment for services rendered. An insurance carrier, self-insured employer, or claims processing representative shall make a determination whether to deny or pay a medical bill on an accepted claim, in whole or in part, including the decision as to the amount to pay, within thirty (30) days from the date the claim is accepted, if the billing is received before the date of acceptance, or within thirty (30) days from the date of the receipt of the billing if the billing is received after the date of acceptance. All billing denials shall be based on reasonable justification. The insurance carrier, self-insured employer, or claims processing representative shall pay the approved portion of the billing within thirty (30) days after the determination for payment is made. If the billing is not paid within the applicable time period, the insurance carrier, self-insured employer, or claims processing representative shall pay interest to the health provider on the billing at a rate that is equal to the legal rate. Interest shall be calculated beginning on the date that the payment to the healthcare provider is due. *See A.R.S. § 23-1062.01.*

To ensure timely and accurate payment of a medical billing, a billing must contain the information required under A.R.S. § 23-1062.01. A billing must contain at least the following information: Correct demographic patient information including claim number, if known; Correct provider information, including name, address, telephone number, and federal taxpayer identification number; Appropriate medical coding with dollar amounts and units clearly stated with all descriptions and dates of services clearly printed; and legible medical reports required for each date of service if the billing is for direct treatment of the injured worker.

4. Payment of a workers' compensation medical billing is governed by A.R.S. § 23-1062.01, which includes:
  - a. Timeframes for processing and payment of medical bills;
  - b. Criteria for billing denials;
  - c. A provision that the injured worker is not responsible for payment of any portion of a medical bill on an accepted claim or payment of any portion of a medical billing that is being disputed;

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- d. A provision that the insurance carrier or self-insured employer may establish an internal system for resolving payment disputes;
  - e. A provision that A.R.S. § 23-1062.01 does not apply to written contracts entered into between healthcare providers and insurance carriers and self-insured employers or their representatives that specify payment periods or contractual remedies for untimely payments; and
  - f. A provision that the Industrial Commission does not have jurisdiction over contract disputes between the parties.
5. Healthcare providers shall bill the code that most accurately describes the service performed. If an insurance carrier, self-insured employer, or claims processing representative determines that the documentation submitted does not support the procedure code billed, the payment to the healthcare provider may be appropriately adjusted based on Fee Schedule reimbursement values. *See* A.R.S. § 23-1062.01. The payer shall provide documentation justifying the adjustment and clearly outline the process a healthcare provider may follow to appeal the determination. Payers shall not downcode medical billings under the Arizona Physicians' & Pharmaceutical Fee Schedule. Downcoding is defined as a payer changing a code in a payment remittance to a code at a lower service level than was billed by the healthcare provider. As applicable, the health care provider may resubmit the bill with documentation that addresses the reason for the adjustment.
6. "Reasonable justification" to deny a bill does not include the payment/billing policies of other private or public entities (publications) unless the publication has been incorporated by reference in the Fee Schedule.
7. Excluding bundling and unbundling issues, it is not the Commission's intent to restrict an insurance carrier's, self-insured employer's, or third party processing service's ability to address issues not addressed by the Fee Schedule. This includes evaluating unlisted procedures, establishing values for unlisted procedures, establishing values for codes that are listed as "BR" or "RNE", or new CPT® codes that have not been incorporated by the Industrial Commission, or managing issues outside the jurisdiction of the Fee Schedule, such as hospital billings.
8. Healthcare providers shall provide legible medical documentation and reports that are sufficient for insurance carriers/self-insured employers to determine if treatment is being directed towards injuries sustained in an industrial accident or incident. The healthcare provider shall ensure that their patients' medical files include the information required by A.R.S. § 32-1401.2. The healthcare provider is not required to provide copies of documents or reports that they did not author and that are not in their possession (*i.e.*, Employers' First Report of Injury).
9. Treating physicians shall submit a narrative that justifies the billing of a level four (4) or five (5) E/M service.
10. The Commission has incorporated by reference the Centers for Medicare and Medicaid Services, Evaluation and Management Services Guide, and the most current American Medical Association, Evaluation and Management Code and Guideline Changes. Medical billings shall be prepared and reviewed consistent with how these guidelines are used and interpreted by CMS. Additionally, payers are required to disclose any additional guideline(s) utilized in their Explanation of Reviews (or other similar document).

11. A payer's Explanation of Review (or other similar document) shall contain sufficient information to allow the healthcare provider to determine whether the amount of payment is correct and whom to contact regarding any questions related to the payment. Information in the Explanation of Review (or other similar document) shall include the following:
  - a. The name of the injured worker;
  - b. The name of the payer and the name of the third party administrator ("TPA"), if applicable;
  - c. If applicable, the name, telephone number, and address of all entities that reviewed the medical billing on behalf of the payer;
  - d. If applicable, the name, telephone number, and address of the party that has a written contract signed by the healthcare provider that allows the contracting party or other third party to access and pay rates that are different from those provided under this Fee Schedule;
  - e. The amount billed by the healthcare provider;
  - f. The amount of any reduction due to a written contract with the healthcare provider; and
  - g. The amount of payment.
12. Nothing in this Fee Schedule precludes a healthcare provider from entering into a separate contract that governs fees. In this instance, reimbursement shall be made according to the applicable contracted charge. In the absence of a separate contract that governs a healthcare provider's fees, reimbursement shall be made according to this Fee Schedule. A payer shall demonstrate that it is entitled to pay the contracted rate in the event of a dispute by providing a valid copy of the governing contract to the healthcare provider. If a payer fails to provide evidence that it is entitled to pay a contracted rate, then the payer shall be required to make payment as provided in this Fee Schedule.
13. Billing and reimbursement guidelines for Pharmaceuticals are found in the Pharmaceutical Fee Schedule Section of this document.
14. The Fee Schedule does not apply to ambulance service providers. Service fees for ground ambulance transportation are set and mandated by the Arizona Department of Health Services through its Arizona Ground Ambulance Service Rate Schedule. A.R.S. § 36-2239(D) states "an ambulance service shall not charge, demand or collect any remuneration for any service greater or less than or different from the rate or charge determined and fixed by the department as the rate or charge for that service." Service fees published in the Arizona Ground Ambulance Service Rate Schedule are applicable in the workers' compensation setting.

#### **C. REIMBURSEMENT OF MID-LEVEL MEDICAL PROVIDERS**

1. Certified Registered Nurse Anesthetists ("CRNAs") are reimbursed at 85% of the fee schedule.
  - a. Physician Assistants and Nurse Practitioners are reimbursed at 85% of the fee schedule *except* if services are provided "incident to" a physician's professional services. In that instance,

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

reimbursement is required to be at 100% of the fee schedule. The following criteria are identified as establishing the “incident to” exception:

- b. The Physician Assistant and Nurse Practitioner must work under the direct supervision of an appropriately licensed physician,
  - c. The Physician must initially see that patient and establish a plan of care for that patient (“treatment plan”),
  - d. Subsequent service provided by the Physician Assistant and Nurse Practitioner must be a part of the documented treatment plan, and
  - e. The Physician must always be involved in the patient’s treatment plan and see the patient often enough to demonstrate that the Physician is actively participating in and managing the patient’s care.
2. For purposes of the Fee Schedule, the Commission recognizes that direct supervision of a Physician Assistant or Nurse Practitioner by a Physician can be accomplished through the use of modern technology and telecommunications (telemedicine) and may not require the on-site presence of the Physician when the Physician Assistant or Nurse Practitioner sees the patient. In all instances, however, and regardless of the extent to which telemedicine is used, the Physician must actively participate in and manage the patient’s care if services provided by a Physician Assistant or Nurse Practitioner are billed at 100% of the fee schedule under the “incident to” exception.
  3. It is the responsibility of the Physician to document if the services provided by a Physician Assistant and Nurse Practitioner are “incident to” the Physician’s professional service. If either the incident to criteria is not met, or the documentation submitted fails to support the “incident to” criteria, the reimbursement should be made at 85% of the fee schedule.

#### D. DIRECTED CARE AND USE OF NETWORKS

The Arizona Workers’ Compensation Act only permits private self-insured employers to direct medical care. A.R.S. § 23-1070(A); See also *Southwest Gas Corp. v. Industrial Commission of Arizona*, 200 Ariz. 292, 25 P.3d 1164 (2001).

<sup>1</sup> It should be noted that the law governing directed care is not limited to “medical doctors,” but instead applies to medical, surgical, and hospital benefits. See A.R.S. § 23-1070. The phrase, “medical, surgical, and hospital benefits” is defined in A.R.S. § 23- 1062(A), which states: “Promptly, upon notice to the employer, every injured employee shall receive medical, surgical and hospital benefits or other treatment, nursing, medicine, surgical supplies, crutches and other apparatus, including artificial members, reasonably required at the time of the injury, and during the period of disability. Such benefits shall be termed ‘medical, surgical and hospital benefits.’”

This limitation on the scope of directed care means that employees of private self-insured employers do not have an unrestricted right to choose their own healthcare providers, while employees of all other employers do (including public self-insured employers).<sup>1</sup> Notwithstanding an employee's right to choose, many workers' compensation insurance carriers ("carriers") and public self-insured employers ("employers") have taken advantage of "networks" to reduce their costs. This is done by either creating their own network of "preferred providers" or by contracting with a third party to access private healthcare networks.

Actions or conduct that impair or limit the right of an employee to choose their healthcare provider may rise to the level of bad faith and/or unfair claims processing practices under A.R.S. § 23-930. The Commission will investigate a complaint of bad faith/unfair claims processing practices, and if appropriate, impose penalties under A.R.S. § 23-930, in those circumstances where a carrier, employer, or TPA has engaged in conduct that results in directing a claimant to a "network" provider. The following are examples of conduct that the Commission would consider appropriate for investigation under A.R.S. § 23-930.

- A claimant is told that they must see a healthcare provider that is "in the network;"
- A claimant is told that care from a "non-network" healthcare provider is not authorized;
- A "network" healthcare provider is told that referrals are required to be made to another "network" healthcare provider;
- A "network" healthcare provider is told that they may not recommend a "non-network" healthcare provider to a patient;
- A "non-network" healthcare provider is told that care will only be authorized if provided by a "network" provider; and
- A "non-network" healthcare provider is told that reimbursement will be made according to "network" discounts.

## **E. TREATMENT OF INDUSTRIAL INJURIES AND DISEASES**

1. An employee who sustains an injury arising out of, or in the course of, employment is entitled, under Arizona law, to select a healthcare provider of his/her own choice unless that employee is employed by a private self-insured employer as described in A.R.S. § 23-1070. Employers described in A.R.S. § 23-1070, excluding the State or Political Subdivisions thereof, are allowed to direct medical care.
2. The attending healthcare provider's promptness and professional exactness in the completion and filing of workers' compensation forms are extremely important to the employee being treated. The injured or disabled employee's claim to medical benefits and compensation can rest on the conscientious attention of the healthcare provider in processing the required reports. Rules addressing the completion of these forms are found in Title 20, Chapter 5, Article 1 of the Arizona Administrative Code, which can be obtained at: [http://apps.azsos.gov/public\\_services/Title\\_20/20-05.pdf](http://apps.azsos.gov/public_services/Title_20/20-05.pdf)

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

3. The Commission, the employer, and the insurance carrier may, at any time, designate a healthcare provider or healthcare providers to examine an employee. Additionally, upon application of the employer, employee, or insurance carrier, the Commission may order a change of healthcare provider or a change of conditions of treatment when there are reasonable grounds or a belief that the employee's health or progress can thus be improved.
4. A claimant may not change doctors without the written authorization of the insurance carrier, the Commission, or the attending physician. A claimant may not transfer from one hospital to another without the written authorization of the insurance carrier or the Commission. If the patient's employment requires leaving the locale in which he/she is receiving treatment, the attending physician should arrange for continued treatment and notify the carrier of such arrangement. It is the responsibility of the physician or the hospital to which a patient has transferred to ascertain whether such a change has been authorized.
5. Treatment of conditions unrelated to the injuries sustained in the industrial accident may be denied as unauthorized if the treatment seems directed principally toward the non-industrial condition or if the treatment does not seem necessary for the patient's physical rehabilitation from the industrial injury.
6. If the patient refuses to submit to a medical examination or to cooperate with the healthcare provider's treatments, the carrier or self-insured employer should be notified.
7. If an employee is capable of some form of gainful employment, it is proper for the healthcare provider to release the employee to light work and make a specific report to the carrier or self-insured employer as to the date of such release. It can be to the employee's economic advantage to be released to light work since he/she can receive compensation based on 66 2/3% of the difference between one's earnings and one's established wage. On the other hand, it would not be to the employee's economic advantage to be released to light work if, in fact, the employee is not capable of performing such work. The healthcare provider's judgment in such matters is extremely important.
8. If the employee no longer requires active medical care for the industrial injury and is discharged from treatment, the healthcare provider is required to provide a signed report with the date of discharge to the carrier or self-insured employer, even if, as a private patient, the employee may require further medical care for conditions unrelated to the industrial accident. This final report and discharge date are necessary for closing the claim file.
9. When a healthcare provider discharges a claimant from treatment, the healthcare provider shall determine whether the employee has suffered any impairment of function, or disfigurement about the head or face, including injury to or loss of teeth, and include this information in the final signed report provided to the carrier or self-insured employer. The Rules of Procedure Before the Industrial Commission of Arizona require that any rating of the percentage of functional impairment should be made in accordance with the standards of evaluation published in the most recent edition of the American Medical Association Guides to the Evaluation of Permanent Impairment. Additional guidance on appropriate billing and reimbursement for impairment evaluations is found in the Evaluation and Management Section of this document.

10. Once an exposure to a blood-borne pathogen occurs, the workers' compensation insurance carrier/self-insured employer is responsible for payment of the accepted treatment protocol which includes the HBIG vaccination (Hepatitis B Immune Globulin), and, if necessary, the three (3) Hepatitis B vaccinations.

When a work-related incident occurs that may have exposed an employee to Hepatitis, the insurance carrier/self-insured employer is responsible for paying for the testing and/or treatment of Hepatitis B or C. As to the treatment of HIV, if a bona fide claim exists under A.R.S. § 23-1043.02, then the insurance carrier/self-insured employer is responsible for paying for the treatment.

11. It is the employer's responsibility, in accordance with existing OSHA standards, to pay for HIV testing. The insurance carrier may seek reimbursement from the employer for the costs associated with providing the series of three (3) Hepatitis B vaccinations if the employer failed to provide them in violation of federal and state laws.

## **F. REOPENING OF CLAIMS**

1. Whether or not the employee has suffered a permanent disability, on a claim that has been previously accepted, the claim may be reopened on the basis of a new, additional, or previously undiscovered disability or condition, but:
  - a. The claimant should use the form of petition prescribed by the Commission;
  - b. The petition must be personally signed by the worker or his authorized representative and must be filed at any office of the Industrial Commission of Arizona;
  - c. The petition, in order to be considered, must be accompanied by the healthcare provider's medical report.
2. If the claim is reopened, the payment for such reasonable and necessary medical, hospital and laboratory work expenses shall be paid by the insurance carrier if such expenses are incurred within fifteen (15) days of the filing of the petition to reopen.
3. No monetary compensation is payable for any period prior to the date of filing of the petition to reopen. Surgical benefits are not payable for any period prior to the date of filing of a petition to reopen, except that surgical benefits are payable for a period prior to the date of filing not to exceed seven (7) days if a bona fide medical emergency precludes the employee from filing a petition to reopen prior to the surgery. Other information relative to reopening rights may be found at A.R.S. § 23-1061(H).
4. If a claim is approved for reopening, the carrier must notify the attending healthcare provider of that approval.

## **G. NO-INSURANCE CLAIMS**

"No-Insurance" claims are workers' compensation claims involving injuries to employees of employers who do not have workers' compensation insurance coverage as required by Arizona law. In such cases, all claims and reports are to be addressed to the No-Insurance Section of the Special Fund of The Industrial Commission of Arizona.

## H. CONSULTATIONS

Workers' compensation cases can present additional medical and legal problems that justify consultation sooner and more frequently than the average private patient. In complex cases and cases requiring an estimate of general or unscheduled disability, consultation with specialists in the appropriate field may be requested by any interested party. The Industrial Commission continues to recognize the necessity for consultations in workers' compensation and establishes relative value units and rates for consultation codes.

## I. WITNESS FEES

1. Insurance providers, self-insured employers, and the Special Fund of the Commission are responsible for paying \$150.00 for the first hour of testimony (or any portion thereof) and \$50.00 for each twenty (20) minute increment following the initial hour (or any portion thereof) to a healthcare provider who testifies at hearing at their request.
2. The Commission is responsible for paying \$150.00 for the first hour of testimony (or any portion thereof) and \$50.00 for each twenty (20) minute increment following the initial hour (or any portion thereof) to a healthcare provider who testifies at hearing on request of a workers' compensation claimant.

## J. DEFINITIONS OF SELECT UNIT VALUES

1. BY REPORT "BR" ITEMS: "BR" in the value column indicates that the value of this service is to be determined "by report" because the service is too unusual or variable to be assigned a unit relativity. Pertinent information concerning the nature, intent, and need for the procedure or service, the time, the skill and equipment necessary, etc., is to be furnished. A detailed clinical record is not necessary.
2. RELATIVITY NOT ESTABLISHED "RNE" ITEMS: "RNE" in the value column indicates new or infrequently performed services for which sufficient data has not been collected to allow the establishment of relativity. "RNE" items are clearly definable and not inherently variable as are BR procedures. A report may be necessary.
3. MATERIALS AND SUPPLIES: A healthcare provider is not entitled to be reimbursed for supplies and materials normally necessary to perform a billable service. Examples of those items that are not reimbursable are listed below. Billing and reimbursement guidelines for materials and supplies that are reimbursable are found in the HCPCS Section of the Fee Schedule.

Drugs that are administered to patients in a clinical setting shall be billed using the appropriate HCPCS code and reimbursed according to the Pharmaceutical Fee Schedule Guidelines. The provisions in this subsection do not apply to hospitals, ambulatory surgery centers, and ambulance service providers.

Examples of supplies that are usually not separately reimbursable include:

Applied hot or cold packs  
Eye patches, injections, or debridement trays  
Steri-strips  
Needles Syringes  
Eye/ear trays  
Drapes Sterile  
gloves  
Applied eye wash or eye drops  
Creams (massage)  
Fluorescein  
Ultrasound pads and gel Tissues  
Urine collection kits Gauze  
Cotton balls/fluff  
Sterile water  
Band-Aids and dressings for simple wound occlusion Head  
sheets  
Aspiration trays  
Sterile trays for laceration repair and more complex surgeries Tape for dressings

4. **MODIFIERS:** A two-digit (numeric or alpha) sequence that provides the means by which the reporting healthcare provider can specify that a procedure performed has been altered under a special circumstance. This allows defining the modifying circumstance of the service or procedure without creating a separate procedure or listing.

#### Modifier Examples

*Professional Component (PC):* Certain procedures are a combination of a physician, or Professional component and a technical component. When modifier 26 is added to an appropriate code, a PC allowable amount will be paid.

*Technical Component (TC):* The TC component reflects the technical portion of the procedure code. When the technical component is provided by a healthcare provider other than the one providing the professional component, the healthcare provider bills for the technical component by adding modifier TC to the applicable code.

**PHARMACEUTICAL FEE SCHEDULE****A. GENERAL PROVISIONS AND APPLICABILITY OF THE PHARMACEUTICAL FEE SCHEDULE**

1. The Pharmaceutical Fee Schedule (PFS) applies to prescription and over-the-counter (OTC) medications required to treat an injured employee, whether administered by a healthcare provider or dispensed by a pharmacy (including online or mail order pharmacies) or by a healthcare provider.
2. Medications are not reimbursable unless “reasonably required” at the time of injury or during the period of disability. *See* A.R.S. § 23-1062(A); A.A.C. R20-5-1303(A). The Industrial Commission of Arizona has adopted the Official Disability Guidelines (ODG), including ODG’s Drug Formulary Appendix A (ODG Formulary), as the standard reference for evidence-based medicine used in treating injured employees within the context of Arizona’s workers’ compensation system. Effective October 1, 2018, ODG applies to all body parts and conditions. *See* A.A.C. R20-5-1301(B), (E). ODG is to be used as a tool to support clinical decision-making and quality health care delivery to injured employees. The ODG Formulary sets forth pharmaceutical guidelines that are generally considered reasonable and are presumed correct if the guidelines provide recommendations related to a particular medication. *See* A.A.C. R20-5-1301(H). Healthcare providers are encouraged to consult the ODG Formulary before dispensing, administering, or prescribing medications to injured employees.
3. Generic drugs must be dispensed or administered to injured employees when appropriate, consistent with A.R.S. § 32-1963.01(A)<sup>1</sup>, (B), and (D) through (L)<sup>2</sup>. *See* A.R.S. § 23-908(C). For purposes of this subsection, the definitions in A.R.S. § 32-1963.01(L) apply<sup>3</sup>. Whenever possible: (1) healthcare providers should prescribe less costly drugs; (2) pharmacies and healthcare providers (under Section G) should dispense generic drugs with lower AWP values; and (3) healthcare providers (under Section F) should administer generic drugs with lower AWP values.

<sup>1</sup> A.R.S. § 32-1963.01(A) states: “If a medical practitioner prescribes a brand name drug and does not indicate an intent to prevent substitution as prescribed in subsection E of this section, a pharmacist may fill the prescription with a generic equivalent drug.”

<sup>2</sup> A.R.S. § 32-1963.01(E) states: “A prescription generated in this state must be dispensed as written only if the prescriber writes or clearly displays ‘DAW’, ‘dispense as written’, ‘do not substitute’ or ‘medically necessary’ or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form. A prescription from out of state or from agencies of the United States government must be dispensed as written only if the prescriber writes or clearly displays ‘do not substitute’, ‘dispense as written’ or ‘medically necessary’ or any statement by the prescriber that clearly indicates an intent to prevent substitution on the face of the prescription form.”

<sup>3</sup> A.R.S. § 32-1963.01(L) states, in part:

2. “Brand name drug” means a drug with a proprietary name assigned to it by the manufacturer or distributor.
4. “Generic equivalent” or “generically equivalent” means a drug that has an identical amount of the same active chemical ingredients in the same dosage form, that meets applicable standards of strength, quality and purity according to the United States pharmacopeia or other nationally recognized compendium and that, if administered in the same amounts, will provide comparable therapeutic effects. Generic equivalent or generically equivalent does not include a drug that is listed by the United States food and drug administration as having unresolved bioequivalence concerns according to the administration’s most recent publication of approved drug products with therapeutic equivalence evaluations.

**B. DEFINITIONS.**

1. “Administer” has the meaning set forth in A.R.S. 32-1901(1).
2. “Average Wholesale Price” or “AWP” means the wholesale price charged on a specific commodity that is assigned by the drug manufacturer and is listed in a nationally recognized drug pricing file.
3. “Commercially available” means a drug product is widely available for purchase in pharmacies accessible to the general public, including in brick and mortar pharmacies accessible to the general public.
4. “Compound medication” means a pharmaceutical product created by virtue of mixing or combining drugs and/or components to meet the unique needs of an individual patient when the finished product does not recreate a commercially available product.
5. “Dispense” or “dispensing” means to deliver to an ultimate user by or pursuant to the lawful order of a healthcare provider, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare for that delivery. *See* A.R.S. § 32-1901(27).
6. “Drug” has the meaning set forth in A.R.S. § 32-1901(31).
7. “Hospital” means any institution for the care and treatment of the sick and injured that is approved and licensed as a hospital by: (1) the Arizona Department of Health Services; or (2) an equivalent regulatory agency in another U.S. state, territory, or district. *See* A.R.S. § 32-1901(42).
8. “Healthcare provider” means any person who is permitted/licensed and authorized by law to use and prescribe prescription medications, acting within the scope of such authority, for the treatment of sick and injured human beings or for the diagnosis or prevention of sickness in human beings in the State of Arizona or any U.S. state, territory or district. *See* A.R.S. § 32-1901(53).
9. “Non-traditional strength” medication means a finished drug product in a strength (*i.e.*, dosage) that is not commercially available in pharmacies accessible to the general public.
10. “Over-the-counter medication” or “OTC medication” means a finished drug product, including label and container according to context, which does not require a prescription order.
11. “Pharmacy” has the meaning set forth in A.R.S. § 32-1901(71).
12. “Pharmacy accessible to the general public” means a pharmacy that is readily accessible and provides pharmaceutical services (including prescription medication services) to all segments of the general public without restricting services to a defined or exclusive group of consumers, including but not limited to consumers who have access to services because they are treated by or have an affiliation with a specific entity or medical practitioner. This definition includes mail order pharmacies delivering pharmaceutical services to workers’ compensation claimants if both of the following apply:

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

- a. The pharmacy does not limit or restrict access to claimants with an affiliation to a medical provider or other entity.
  - b. Any healthcare provider or other entity referring a claimant to the pharmacy does not receive or accept any rebate, refund, commission, preference, or other consideration as compensation for the referral.
13. “Pharmacy not accessible to the general public” means a pharmacy that provides pharmaceutical services (including prescription medication services) only to a defined or exclusive group of consumers, including but not limited to consumers who have access to services because they are treated by or have an affiliation with a specific entity or medical practitioner. “Pharmacy not accessible to the general public” does not include a hospital pharmacy. This definition does not include mail order pharmacies delivering pharmaceutical services to workers’ compensation claimants if both of the following apply:
  - a. The pharmacy does not limit or restrict access to claimants with an affiliation to a medical provider or other entity.
  - b. Any medical provider or other entity referring a claimant to the pharmacy does not receive or accept any rebate, refund, commission, preference, or other consideration as compensation for the referral.
14. “Prescription” means either a prescription order or a prescription medication. *See* A.R.S. § 32-1901(80).
15. “Prescription medication” means any drug, including label and container according to context, which is dispensed pursuant to a prescription order. *See* A.R.S. § 32-1901(81).
16. “Prescription order” shall have the meaning set forth in A.R.S. § 32-1901(84).
17. “Repackaged medication” means a finished drug product removed from the container in which it was distributed by the original manufacturer and placed into a different container without further manipulation of the drug. The term also includes the act of placing the contents of multiple containers of the same finished drug product into one container. The term also includes “co-pack drug” products which contain two or more separate finished medications that are contained in a single package or unit. The term does not include a drug that is manipulated in any other way, including if the drug is reconstituted, diluted, mixed, or combined with another ingredient.
18. “Therapeutically-similar” medication means a medication that is expected to produce a clinical effect comparable to the original product. Key considerations for determining the “most therapeutically-similar” medications are: (1) the similarity of the clinical effects; (2) the extent to which active ingredients overlap; (3) the similarity of the dosage profiles; and (4) the similarity of the mode of administration; and (5) the similarity of the intended strength.
19. “Traditional strength” medication means a finished drug product in a formulation that is commercially available in pharmacies accessible to the general public.
20. “Ultimate user” means a person who lawfully possesses a prescription medication for that person's own use or for the use of a member of that person's household. *See* A.R.S. § 32-1901(95).

**C. GENERAL GUIDELINES FOR BILLING AND REIMBURSEMENT OF PRESCRIPTION MEDICATIONS.**

1. Except as permitted in Sections F and G of the current PFS, an insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications only if all of the following apply:
  - a. The prescription medication is dispensed by an individual who is currently licensed to practice the profession of pharmacy by either: (i) the Arizona State Board of Pharmacy; or (ii) an equivalent regulatory agency in another U.S. state, territory, or district; and
  - b. The prescription medication is dispensed by a pharmacy accessible to the general public, including online or mail-order pharmacies that are accessible to the general public.
2. Subject to Sections C(7), D, E, and F(2), reimbursement for prescription medications shall be based on the actual medication dispensed or administered, including a substituted medication that is dispensed or administered pursuant to A.R.S. § 32-1963.01.
3. Except as specified in Sections D and E of the current PFS, a pharmaceutical bill submitted for a prescription medication must include the National Drug Code (NDC) of the original manufacturer registered with the U.S. Food & Drug Administration (FDA), the quantity dispensed, and the reimbursement value of the medication. Under no circumstance shall an NDC other than the original manufacturer's NDC be used.
4. The reimbursement value for prescription medications shall be based on the current PFS reimbursement methodology in the absence of a contractual agreement between the pharmacy or healthcare provider and payer governing reimbursement. Network discounts may not be applied in the absence of a contractual agreement with the pharmacy or healthcare provider authorizing such discounts.
5. The reimbursement value for a prescription medication shall be determined on the date a drug is dispensed from pricing published in the most recent issue, as updated in the most recent update, of a nationally recognized pharmaceutical publication designated by the Commission. For purposes of determining AWP, the Commission has selected Medi-Span®.
6. The reimbursement value for a prescription medication shall be determined by reference to the original manufacturer's NDC and shall be calculated on a per unit basis as follows:
  - a. Generic drugs:
    - (75% of AWP per unit) x (number of units dispensed).
  - b. Brand name drugs:
    - (85% of AWP per unit) x (number of units dispensed).
7. Reimbursement for non-traditional strength prescription medications shall be calculated on a per unit basis, as of the date of dispensing or administering, based on the original manufacturer's NDC and corresponding AWP of the most therapeutically-similar traditional strength form of the same medication. Under no circumstance shall the NDC of the non-traditional strength medication be used.

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

8. The reimbursement value for OTC medications shall be calculated on a per unit basis, as of the date of dispensing, based on the retail price (per unit) of the OTC medication in settings where the medication is commercially available.
9. Subject to Section C(10), the reimbursement value for OTC medications that are not commercially available in pharmacies accessible to the general public shall be calculated on a per unit basis, as of the date of dispensing, based on the retail price (per unit) of the most therapeutically-similar OTC medication commercially available in pharmacies accessible to the general public. Under no circumstance shall the NDC or AWP of the non-commercially available OTC medication be used.
10. The reimbursement value for OTC medications that are not commercially available may not exceed:
  - a. Thirty dollars (\$30.00) for a thirty-day supply (or a pro-rated amount if the supply is greater or less than thirty days) for a topical cream or lotion.
  - b. Seventy-five dollars (\$75.00) for a thirty-day supply (or a pro-rated amount if the supply is greater or less than thirty days) for topical patches.

**D. BILLING AND REIMBURSEMENT FOR REPACKAGED MEDICATIONS.**

1. A pharmaceutical bill submitted for a repackaged medication must identify the NDC of the repackaged medication, the NDC of the original manufacturer registered with the U.S. FDA, the quantity dispensed, and the reimbursement value of the repackaged medication. Under no circumstances shall the reimbursement value of a repackaged medication be based upon an NDC other than the original manufacturer's NDC. A repackaged NDC shall not be used for calculating the reimbursement value of a repackaged medication and shall not be considered the original manufacturer's NDC.
2. If a pharmaceutical bill for a repackaged medication is submitted without the original manufacturer's NDC, the payer has the discretion to determine the appropriate NDC (and corresponding AWP) to use or, alternatively, may deny coverage until the appropriate NDC is furnished.
3. The reimbursement value for a repackaged medication shall be based on the current PFS reimbursement methodology contained in Section C of the PFS, utilizing the NDC(s) and corresponding AWP(s) of the original manufacturer(s).
4. Any component of a co-pack drug product for which there is no NDC shall not be reimbursed.

**E. BILLING AND REIMBURSEMENT FOR COMPOUND MEDICATIONS.**

1. A pharmaceutical bill submitted for a compound medication must identify each reimbursable component ingredient, the applicable NDC of each reimbursable component ingredient, the corresponding quantity of each component ingredient, and the calculated reimbursement value of each component ingredient. All component ingredients of a compound medication must be billed on a single bill.
2. The reimbursement value for a compound medication shall be calculated at the component ingredient level. The reimbursement value for a compound medication shall be based on the sum of the reimbursement values of each component ingredient and the corresponding component ingredient's NDC, based on the current PFS reimbursement methodology set forth in Section C.
3. Any component ingredient in a compound medication for which there is no NDC shall not be reimbursed.
4. Any component ingredient in a topical compound medication that is not FDA approved for topical use shall not be reimbursed.
5. If any component ingredient in a compound medication is a repackaged medication, the reimbursement value for the repackaged medication ingredient shall be determined based on the current PFS reimbursement methodology set forth in Section C, using the AWP corresponding to the NDC of the original manufacturer. *See* Section D.
6. The maximum reimbursement value for a topical compound medication shall be the lesser of:
  - a. Two hundred dollars (\$200.00) for a 30-day supply (or a pro-rated amount if the supply is greater or less than 30 days), or
  - b. The reimbursement value of the compound medication as calculated under this section.

**F. BILLING AND REIMBURSEMENT FOR MEDICATIONS ADMINISTERED BY A HEALTHCARE PROVIDER.**

1. A pharmaceutical bill submitted for a medication administered by a healthcare provider must comply with billing procedures outlined in Sections C, D, and E of the current PFS, as applicable.
2. The reimbursement value for a medication administered by a healthcare provider shall be based on the current PFS reimbursement methodology contained in Sections C, D, and E of the PFS, as applicable.

**G. REIMBURSEMENT FOR MEDICATIONS DISPENSED BY A HEALTHCARE PROVIDER OR IN A PHARMACY NOT ACCESSIBLE TO THE GENERAL PUBLIC.<sup>4,5</sup>**

1. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a healthcare provider or in a pharmacy not accessible to the general public if all of the following apply:
  - a. The prescription medication is dispensed by a healthcare provider or a pharmacy not accessible to the general public to the injured employee within seven days of the date of the industrial injury;
  - b. The prescription medication is limited to no more than a one-time, ten-day supply;
  - c. The prescription medication conforms to dosages and formulations that are commercially available in pharmacies accessible to the general public.
2. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a healthcare provider or in a pharmacy not accessible to the general public if all of the following apply:
  - a. The injured employee does not have access to a pharmacy accessible to the general public within 20 miles of the injured employee's home address, work address, or the address of the prescribing healthcare provider;
  - b. The injured employee cannot reasonably acquire the prescription medication from an online or mail order pharmacy accessible to the general public; and
  - c. The prescription medication conforms to dosages and formulations which are commercially available in pharmacies accessible to the general public.
3. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a healthcare provider or in a pharmacy not accessible to the general public if the dispensing of a prescription medication for an individual claim and specified duration has been pre-approved in writing by the insurance carrier, self-insured employer, or the Special Fund of the Commission. Nothing in this section requires an insurance carrier, self-insured employer, or the Special Fund of the Commission to pre-approve the dispensing of prescription medications under this subsection.

<sup>4</sup> Dispensing pursuant to Section G is subject to the Arizona Opioid Epidemic Act, which imposes statutory limits on the prescribing and dispensing of schedule II opioids. For more information about the Arizona Opioid Epidemic Act, please see the FAQs published by the Arizona State Board of Pharmacy, available at <https://drive.google.com/file/d/1JCIs8VwtdJ1T-DyGfJN3WWUm4KhDMXe-/view>.

<sup>5</sup> Section G sets forth reimbursement guidelines for medications dispensed in settings that are not accessible to the general public in Arizona's worker's compensation system and does not interfere with a medical practitioner's ability to dispense medications pursuant to A.R.S. § 32-1491 or seek payment from sources unrelated to workers' compensation.

4. An insurance carrier, self-insured employer, or the Special Fund of the Commission is responsible for the payment of prescription medications that are dispensed by a pharmacy not accessible to the general public if all of the following apply:
  - a. The prescription medication was dispensed to an injured employee whose workers' compensation claim was initially denied by the carrier, self-insured employer, or the Special Fund of the Commission;
  - b. The injured employee protested the claim denial by filing a timely request for hearing;
  - c. The workers' compensation claim was either: (a) subsequently accepted by the carrier, self-insured employer, or the Special Fund of the Commission; or (b) the claim was found to be compensable by the Commission's Administrative Law Judge Division, the Arizona Court of Appeals, or the Arizona Supreme Court;
  - d. The prescription medication was dispensed during the time period between: (a) the initial claim denial and (b) the subsequent acceptance of the claim or the compensability determination by the Commission's Administrative Law Judge Division, the Arizona Court of Appeals, or the Arizona Supreme Court; and
  - e. The prescription medication conforms to dosages and formulations that are commercially available in pharmacies accessible to the general public.
5. The guidelines in Section C(1) and this section do not apply to prescription medications dispensed during in-patient hospital care or upon discharge from in-patient hospital care.
6. Subject to the limitations in this section, medications that have been provided as free samples to a healthcare provider may be dispensed to an injured employee when appropriate, but are not reimbursable.

#### **H. DISPENSING FEE.**

1. If a prescription medication is dispensed by a pharmacy accessible to the general public pursuant to a prescription order, a dispensing fee of up to seven dollars (\$7.00) per prescription medication, repackaged medication, or compound medication may be charged. The dispensing fee does not apply to OTC medications that are not prescribed by a healthcare provider.
2. If a prescription medication is dispensed by a healthcare provider or in a pharmacy not accessible to the general public pursuant to Section G(1), (2), or (3), a dispensing fee of up to seven dollars (\$7.00) per prescription medication, repackaged medication, or compound medication may be charged. If an OTC medication is dispensed by a healthcare provider or by a pharmacy not accessible to the general public, a dispensing fee is not permitted.
3. If a prescription or OTC medication is administered by a healthcare provider, a dispensing fee is not permitted.

P2 A patient with mild systemic disease	0
P3 A patient with severe systemic disease	1
P4 A patient with severe systemic disease that is a constant threat to life	2
P5 A moribund patient who is not expected to survive without the operation	3
P6 A declared brain-dead patient whose organs are being removed for donor purposes	0

- AA Anesthesia services personally performed by an anesthesiologist are reimbursed at 100% of the lesser of billed charges or the fee schedule calculation.

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

## SURGERY GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT<sup>®</sup> guidelines and represent additional guidance from the Commission relative to unit values for surgical services. To the extent that a conflict may exist between CMS, an incorporated portion of the CPT<sup>®</sup>, and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier, or modifier shall control. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

- A. **MATERIALS AND SUPPLIES:** A healthcare provider may charge for materials and supplies as described in the HCPCS Section of this Fee Schedule.
- B. **MULTIPLE PROCEDURES:** It is appropriate to designate multiple procedures that are rendered on the same date by separate entries. The additional procedure(s) or service(s) may be identified by appending modifier 51 to the additional procedure or service code(s). **Note:** This modifier should not be appended to designated “add-on” codes.
- C. **SPECIAL REPORT:** A typical request for more detailed information from an insurance carrier regarding a billing does not constitute a “special report”, which is defined in the CPT<sup>®</sup> book.
- D. **MODIFIERS:** Listed services and procedures may be modified under certain circumstances. When applicable, the modifying circumstance should be identified by the addition of the appropriate modifier code, which may be reported in either of two ways. The modifier may be reported by a two-digit number placed after the usual procedure number from which it is separated by a hyphen. Or the modifier may be reported by a separate five-digit code that is used in addition to the procedure code. If more than one modifier is used, the “Multiple Modifiers” code placed first after the procedure code indicates that one or more additional modifier codes will follow.

Modifiers either unique to Arizona or containing explanatory language specific to Arizona are as follows:

- 22 **Increased Procedural Services:** Use of this modifier will result in a twenty-five percent (25%) increase in the listed value for the listed procedure.
- 25 **Separately Identifiable Evaluation and Management Service by the same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service.** It may be necessary to indicate that on the day a procedure or service identified by a CPT<sup>®</sup> code was performed, the patient’s condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed (see Evaluation and Management Services Guidelines for instructions on determining level of E/M service). As such, different diagnoses are not required for reporting of the E/M services on the same date. The circumstance may be reported by adding modifier 25 to the appropriate level of E/M service.
- 47 **Anesthesia by Surgeon:** Used to report anesthesia by the attending or assistant surgeon (does not include local anesthesia). Reimbursement shall be fifty percent (50%) of the base unit as indicated in the Anesthesia section of the Fee Schedule. This modifier shall be allowed no more than once per surgical encounter.

- 50 **Bilateral Procedure:** Unless otherwise identified in the listings, when bilateral procedures which add significant time or complexity to patient care are provided at the same operative session, identify and value the first or major procedure as listed. Identify the secondary or lesser procedure(s) by adding modifier 50 to the usual procedure number(s) and value at fifty percent (50%) of the listed value(s). If, however, the procedures are independently complex and involve different parts of the body, including digits, the bilateral procedure rule would not apply. In such cases, independent procedures would be billed at one hundred percent (100%) of their listed value with modifier 51.
- 51 **Multiple Procedures:** When multiple procedures are performed during the same operative session\*, the procedures should be valued at the appropriate percent of its listed value, as shown below:
- 100% (full value) for the first or major procedure 50% for the second and multiple procedure(s) sixth and subsequent procedures – by report.

\*Multiple Procedure Guidelines do not apply to codes specifically identified as “Add-on/Additional Procedures, Global indicator ZZZ”.

The major or primary procedure is defined as the procedure with the highest value and is the code that determines the follow-up days when a surgery has multiple procedures. The second procedure is the procedure with the next highest value, the third the next highest value, and so on. If, however, the procedures are independently complex such as digits, tendons, nerves, or artery repair, the multiple procedure rule would not apply. In such cases, independent procedures would be billed at one hundred percent (100%) of their listed value.

When performing multiple procedures with different global period values during the same operative session, the global period value for the session is the largest global period value.

- 57 **Decision for Surgery:** An Evaluation and Management (E/M) service that resulted in the initial decision to perform the surgery may be identified by adding modifier 57 to the appropriate level of E/M service.
- 59 **Distinct Procedural Service:** Under certain circumstances, it may be necessary to indicate that a procedure or service was distinct or independent from other non-E/M services performed on the same day. Modifier 59 is used to identify procedures/services, other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Documentation must support a different session, different procedure or surgery, different site or organ system, separate incision/excision, separate lesion, or separate injury (or area of injury in extensive injuries) not ordinarily encountered or performed on the same day by the same individual. However, when another already established modifier is appropriate it should be used rather than modifier 59. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used.

**Note:** Modifier 59 should not be appended to an E/M service. To report a separate and distinct E/M service with a non-E/M service performed on the same date, see modifier 25.

**Note:** If an epidural or peripheral nerve block injection (62320-62327 or 64400-64530) for postoperative pain management is reported separately on the same date of service as an anesthesia 0XXXX code, **modifier 59** shall

## TITLE 20. COMMERCE, FINANCIAL INSTITUTIONS, AND INSURANCE

## CHAPTER 5. INDUSTRIAL COMMISSION OF ARIZONA

be appended to the epidural or peripheral nerve block injection code (62320-62327 or 64400-64530) to indicate that it was administered for postoperative pain management. An epidural or peripheral nerve block injection (62320-62327 or 64400-64530) for postoperative pain management in patients receiving general anesthesia, spinal (subarachnoid injection) anesthesia, or postoperative pain management in patients receiving general anesthesia, spinal (subarachnoid injection) anesthesia, or regional anesthesia by epidural injection as described above may be administered preoperatively, intraoperatively, or postoperatively.

- 62 Two Surgeons: By prior agreement, the total value of services performed by two (2) surgeons working together as primary surgeons may be apportioned in relation to the responsibility and work done, provided the patient is made aware of the fee distribution according to medical ethics. If no apportionment is listed, the fee should be split evenly between the co-surgeons. The total value may be increased by twenty-five percent (25%) in lieu of the usual assistant's charge. Under these circumstances, the services of each surgeon should be identified by adding this modifier 62 to the joint procedure number(s) and valued as agreed upon. (Usual charges for surgical assistance may be warranted if still another physician is required as part of the surgical team.) The value of the procedure should be 125% of the customary value listed. Payment of 125% of the maximum allowable would be divided between the participating surgeons.

Two Surgeons – When two (2) surgeons work together as primary surgeons performing distinct part(s) of a procedure, each surgeon should report his/her distinct operative work by adding modifier 62 to the procedure code and any associated add-on codes(s) for that procedure as long as both surgeons continue to work together as primary surgeons. Each surgeon should report the co-surgery once using the same procedure code. If additional procedure(s) (including add-on procedure(s)) are performed during the same surgical session, separate code(s) may be reported with modifier 62 added.

**Note:** If a co-surgeon acts as an assistant in the performance of additional procedure(s), other than those reported with modifier 62, during the same surgical session, those services may be reported using separate procedure code(s) with modifier 80, 81, or 82 added, as appropriate.

- 80 Assistant Surgeon: These services are valued at twenty percent (20%) of the listed value of the surgical procedure(s).
- 81 Minimum Assistant Surgeon: These services are valued at sixteen percent (16%) of the listed value of the surgical procedure(s).
- 82 Assistant Surgeon (when qualified resident surgeon not available): These services are valued at sixteen percent (16%) of the listed value of the surgical procedure(s).

AS Use the modifier AS for assistant at surgery services when services are provided by a Physician Assistant (PA), Nurse Practitioner (NP), or Clinical Nurse Specialist (CNS). These services are valued at fourteen percent (14%) of the listed value of the surgical procedure(s). No further adjustment for mid-level medical providers as mentioned in section C of the Introduction shall be applied.

**Note:** A Medical Doctor or Doctor of Osteopathic Medicine should not submit the AS modifier. This modifier is only valid for use by a PA, NP, and CNS when billing under their own provider number.

## RADIOLOGY GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to CMS and CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier or modifier shall control. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

**A. GENERAL GUIDELINES**

1. Values include usual contrast media, equipment, and materials. An additional charge may be warranted when special surgical trays and materials are provided by the healthcare provider.
2. Values include consultation and written reports to the referring healthcare provider.
3. X-ray findings and attending healthcare provider's written orders for x-rays must be included with the statement for x-ray services. Bills unsupported by findings will not be paid.
4. X-rays should be taken, reported, and be properly marked for identification and orientation in accordance with the accepted standard of radiologic practice in the State of Arizona.

**B. MODIFIERS**

Modifiers identify circumstances that alter or enhance the description of the service. For radiology codes, two modifiers affect the assigned unit value and are listed in *The Essential RBRVS*. However, other modifiers may be required for correct reporting of service. See CMS and the 2025 CPT® publication for additional information on modifiers. Listed radiology modifiers affect the unit values as follows:

1. Total: When no modifier is listed, the unit value represents the global value of the procedure. The five-digit code is used to represent a global service inclusive of the professional and technical value of providing that service. The following sections provide additional definitions for each component.
2. Professional: Modifier 26 is used to designate professional services. The professional component includes examination of the patient, when indicated, performance and/or supervision of the procedure, interpretation and written report of the examination, and consultation with referring healthcare providers.
3. Technical: Modifier TC is used to designate the technical value of providing the service. The technical component includes personnel, materials, space, equipment, and other allocated facility overhead normally included in providing the service.

### C. REFERENCE TO RELATIVE VALUES

Two patterns of billing currently prevail in radiology. The first pattern occurs when a total charge for the radiology service, including both the professional component (“PC”) and technical component (“TC”), is billed by appropriately licensed healthcare providers working in offices, clinics, and independent diagnostic testing facilities. The second pattern occurs when services are performed in settings such as a hospital or ambulatory surgery center radiology department. The radiologist submits a separate statement to the payer for services that compose the professional component. The hospital or ambulatory surgery center charges for use of the department facilities and the services of its employees as the technical component.

The Radiology Relative Values scales have been devised for use in radiology and are not coordinated with scales for services in other branches of medicine such as surgery, medicine, or pathology. The two scales are compatible only within themselves. Some procedures are noted as a “BR” value or “By Report”. This usage is intended to indicate that circumstances involving a given patient procedure may require much more than the average amount of time and effort to perform and thus a value would be unique and could not be anticipated or established. When such added involvement is claimed, a written explanation will usually be required as an addendum to the bill.

The PC values do not include TC charges made by the hospital in which the procedure was accomplished. Such charges by the hospital or ambulatory surgery center cover the services of technologists and other staff, the films, contrast media, radioactive agents, chemical and other materials, the use of the space and facilities of the x-ray department plus any other hospital or ambulatory surgery center costs. Most hospitals or ambulatory surgery centers have derived their own schedule of charges for these items. Establishment of hospital or ambulatory surgery center charges is not the subject of the Fee Schedule.

The separation of billing in no way implies a division of responsibility, but only a division of the charge. The radiologist is a physician performing a needed medical service for a patient and must retain full responsibility for his or her own activity and full responsibility for the potential supervision of technologists, the selection and maintenance of equipment, the control of radiation hazards, and the general administration of the radiology department.

### D. REVIEW OF DIAGNOSTIC STUDIES

No separate charge is warranted for prior studies reviewed in conjunction with a visit, consultation, record review, or other evaluation by a healthcare provider; neither the professional component value modifier 26 nor the radiological consultation CPT® code 76140 is reimbursable. The review of diagnostic tests is included in the evaluation and management codes.

## PATHOLOGY AND LABORATORY GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS code and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier, or modifier shall control. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

A healthcare provider seeking reimbursement for presumptive, or “point of care” drug testing shall submit to the payer written documentation establishing:

1. That the testing is medically necessary and reasonably required;
2. The type of drug testing utilized; and
3. The healthcare provider’s interpretation of the “point of care” testing.

For purposes of this section, presumptive or “point of care” testing is testing that is performed at or near the site of patient care (*i.e.*, the healthcare provider’s office).

CPT® codes 80305-80307 are used for reporting presumptive drug class screening. Each code represents all drugs and drug classes performed by the respective methodology per date of service.

Healthcare providers performing validity testing on urine specimens utilized for drug testing shall not separately bill the validity testing. For example, if a laboratory performs a urinary pH, specific gravity, creatinine, nitrates, oxidants, or other tests to confirm that a urine specimen is not adulterated, this testing is not separately billed.

Definitive drug testing may be reported with HCPCS codes G0480 - G0483. These codes differ based on the number of drug classes including metabolites tested. Only one (1) code from this group of codes may be reported per date of service. Requests for quantitative or definitive testing require documentation that qualifies necessity.

G0480 – Definitive drug testing 1 – 7 drug class(es) including metabolites(s) if performed

G0481 – Definitive drug testing 8 – 14 drug class(es) including metabolite(s) if performed

G0482 – Definitive drug testing 15 – 21 drug class(es) including metabolites(s) if performed

G0483 – Definitive drug testing of 22 or more drug class(es), including metabolite(s) if performed.

## MEDICINE GUIDELINES

Information regarding publications incorporated by reference is found in the Introduction Section of the Fee Schedule.

The following Commission guidelines are in addition to the CPT® guidelines and represent additional guidance from the Commission relative to unit values for these services. To the extent that a conflict may exist between an incorporated portion of the CPT® publication or HCPCS codes and a code, guideline, identifier, or modifier unique to Arizona, then the Arizona code, guideline, identifier, or modifier shall control. Codes that are unique to Arizona are preceded by an AZ identifier and numbered in the following format: AZxxx.

- A. **MATERIALS SUPPLIED BY A HEALTHCARE PROVIDER:** A healthcare provider may charge for materials and supplies as described in the HCPCS Section of the Physician's Fee Schedule.
- B. **COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT:** CPT® Code 99199 can be used to bill for the services of an interpreter when they are used to comply with the provisions of "The Americans With Disabilities Act", *i.e.*, interpreters for the hearing impaired.
- C. **ADD-ON CODES:** Some of the listed procedures are commonly carried out in addition to the primary procedure performed. All add-on codes found in the CPT® codebook are exempt from the multiple procedure concept. They are exempt from the use of modifier 51.
- D. **SEPARATE PROCEDURES:** Some of the procedures or services listed in the CPT® codebook that are commonly carried out as an integral component of a total service or procedure have been identified by the inclusion of the term "separate procedure". The codes designated as a "separate procedure" should not be reported in addition to the code for the total procedure or service of which it is considered an integral component.

When a procedure or service is carried out independently or considered to be unrelated or distinct from other procedures/services provided at that time, it may be reported by itself, or in addition to other procedures/services by appending modifier 59 to the specific "separate procedure" code to indicate that the procedure is not considered to be a component of another procedure, but is a distinct, independent procedure.

- E. **BUNDLED CODES:** Indicates that the service is always bundled in a payment for another service. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident (*e.g.*, a telephone call from a hospital nurse regarding the care of a patient).
- F. **MODERATE SEDATION:** Codes specific to the provider performing the services (*e.g.*, CPT® codes 99151, 99152, and 99153) are used when the physician performing the procedure provides the sedation whereas CPT® codes 99155, 99156, and 99157 are used when sedation is provided by a healthcare provider other than the physician performing the procedure.
